1 Federal Securities Exchange Act of 1934 Preface

Preface

For over thirty years "Sowards" has been the ultimate authority on the Securities Act of 1933 and "Gadsby" on the Securities Exchange Act of 1934. The treatises were originally the product of their talented hands and enormous experience - Sowards as a preeminent teacher and scholar, Gadsby as a former SEC chairman and outstanding practitioner. As the laws of which they wrote so well changed, and particularly after their deaths, their treatises increasingly reflected the work of the talented authors and editors at Matthew Bender & Co. and other outstanding lawyers and scholars who undertook to rewrite or update parts of the original treatises. While the original excellence of the books continued to reflect the pioneering work of Hugh Sowards and Ned Gadsby, the work of other capable hands became increasingly visible.

As the Securities and Exchange Commission rounded out its efforts to integrate the 1933 and 1934 Acts, a work commenced just about the time the original treatises were published, the distinction between the acts diminished, thus compelling the conclusion that there was little reason to distinguish the two treatises as sharply as had been done in the past. The volumes increasingly constituted an all-embracing "encyclopedia" of the two acts, an encyclopedia rounded out by *Securities Law Techniques* and the more recently published *Regulation of Investment Companies*. This integration of the core federal statutes, and recognition of the increased role of other authors, made it only fit and proper to integrate Sowards and Gadsby and their primary source volumes into the *Securities Regulation Series*.

So identified, they continue to be the unique resource for the practitioner they have always been: the one source in which he or she can find authoritative, up-to-date information about every aspect of the two acts. By combining the primary source volumes that have been discrete parts of each treatise, the recognition of the now integrated statutes and the treatise volumes is complete. Some tidying will continue, but the "heavy lifting" is done.

It is the continuing desire and determination of the editors and authors who are now and will in the future be responsible for these works to preserve the tradition of excellence, reliability and authoritativeness established by the two distinguished original authors. The debt which now more than one generation of securities law practitioners has to the original authors is monumental; it can only be repaid by their successors on behalf of those who use these volumes through continued adherence to the standards to which they so faithfully hewed when they write the original works.

Many of us who practiced through most of our careers with "Gadsby" and "Sowards" at our elbows may feel a sense of

loss when those familiar names no longer identify the volumes so long associated with them. But we can be confident their dedication to quality scholarship will continue unabated.

Federal Securities Act of 1933 Securities Primary Law Sourcebook

HIGHLIGHTS

Release 108 November 2010

Federal Securities Act of 1933

Chapter 1, *Introduction to the Securities Act of 1933 and to the Securities and Exchange Commission*

Chapter 10, *SEC Enforcement Practice*

Federal Securities Exchange Act of 1934

Chapter 9, *SEC Enforcement Legal Considerations*

Securities Primary Law Sourcebook

Volumes A, B, D and E have been revised and updated.

Federal Securities Act of 1933. Chapter 1, *Introduction to the Securities Act of 1933 and to the Securities and Exchange Commission*. Chapter One has been significantly revised to expand topics of discussion and reflect important legislative and regulatory developments since 2004. In particular, the discussion of the function and organization of the SEC has been broadened, including a new section on the structure of the SEC and an enhanced discussion of the roles of the Division of Corporation Finance and the Division of Enforcement. A new and in-depth discussion of the securities offering reform rules promulgated in 2005 has been added, including information on the categories of issuers, various reforms to the process of communicating with shareholders before, during and after registered securities transactions,

1 Federal Securities Exchange Act of 1934 Scope

the use of research reports and shelf registration reforms. Finally, an updated discussion of the enactment of the Sarbanes-Oxley Act of 2002 and developments under that Act since the prior update has been included.

Chapter 10, *SEC Enforcement Practice*. The chapter has been updated to reflected initiatives that the SEC took in 2009-2010 under the leadership of Chairman Schapiro and Enforcement Director Khuzami. These initiatives include delegating to the Staff authority to issue a Formal Order empowering the Staff to issue subpoenas, an extensive restructuring of the Enforcement Staff, and initiatives to encourage cooperation.

Federal Securities Exchange Act of 1934. Chapter 9, *SEC Enforcement--Legal Considerations*. Regulation of Market Manipulation Chapter 9 provides an overview of the SEC's power to investigate and initiate legal proceedings against the entities and individuals it regulates. This chapter reviews the investigative process and related legal issues. This chapter has been revised to reflect the legislative responses to the 2008 Financial Crisis, as well as to the revelation of Bernard Madoff's massive fraudulent Ponzi scheme. In particular, the Dodd-Frank Wall Street Reform and Consumer Protection Act, signed into law by President Obama in July 2010, represents perhaps the largest overhaul of the enforcement powers of the SEC since its creation in the 1930s. Dodd-Frank has broadened not only the jurisdictional reach of the SEC and the federal securities laws, but also granted the SEC new enforcement powers. Furthermore, Dodd-Frank enhances whistleblower protection and rewards whistleblowers who supply new information to the SEC with ten-to-thirty percent of any fines recovered in excess of \$1 million. In addition to Congressional action, the SEC itself has demonstrated its intention to be a more forceful watchdog of the securities industry through the reorganization of its subdivisions in order to be more expeditious in the prosecution of securities violations. The SEC has already created specialized enforcement units staffed by professionals with extensive experience in specialized areas and has begun seeking and obtaining increased monetary penalties against wrong-doers. Accordingly, as a result of these recent legislative and administrative developments, it can be expected that individuals and entities subject to the federal securities laws will face a more vigorous and rigorous regulatory and investigatory regime for the foreseeable future.

Securities Primary Law Sourcebook. Some of the highlights in The Securities Primary Law Sourcebook update includes new Sections to the Securities Exchange Act 1934 such as § 4D-Additional Duties of Inspector General, § 4E-Deadline for completing enforcement investigations and compliance examinations and inspections, § 4F-Report and certification of internal supervisory controls, § 4G-Triennial report on personnel management, 4H-Annual financial controls audit and § 4I-Report on oversight of national securities associations. There are also new sections 15F and 15G, pertaining to Registration and regulation of security-based swap dealers and major security-based swap participants and Credit Risk Retention. There is also a new rule to facilitate interim Commission review of Public Company Accounting Oversight Board inspection reports under Section 104(h) of the Sarbanes-Oxley Act of 2002, and its Rules of Organization and Program Management and Rule of Practice to delegate authority to the Chief Accountant related to these reviews. Regulation P is established to include procedural rules relating to the Public Company Accounting and Oversight Board.

CHAPTER SA-1 GENERAL EDITOR'S SPECIAL ALERT

1- Federal Securities Exchange Act of 1934 § I

§ I. Introduction to the National Securities Markets Improvement Act of 1996

On October 11, President Clinton signed into law the National Securities Markets Improvement Act of 1996 (H.R. 3005 -- "The Act") proclaiming it the "most significant overhaul of the securities regulatory structure in decades." The Act effected significant changes in the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Company Act of 1940, and the Investment Advisers Act of 1940, and removed many anomalies and inefficiencies from securities regulation that had been discussed and sought for a long time.

The Act originated with two bills introduced in 1995 by Representative Jack Fields, chairman of the House Commerce Committee's Subcommittee on Telecommunications and Finance. The first would have amended the Investment Company Act of 1940; the second would have amended the 1933 and 1934 Acts. The latter, while containing in different form many of the provisions eventually enacted, also contained a number of highly controversial provisions that were omitted from the Act as enacted.

CHAPTER SA-1 GENERAL EDITOR'S SPECIAL ALERT

1- Federal Securities Exchange Act of 1934 § II

§ II. Provisions of the Act Affecting the Securities Act of 1933 and the Securities Exchange Act of 1934

The following is a summary of the principal provisions of the Act affecting the Securities Act of 1933 ("the 1933 Act") and the Securities Exchange Act of 1934 ("the 1934 Act").

[A] Preemption of State Authority Over Securities Offerings

Perhaps the most significant change effected by the Act is the near total preemption of state authority over offerings of securities. Under amended Section 18 of the 1933 Act, no state may prohibit an offering or sale in the state, oppose additional disclosure requirements, impose "merit" standards, require the registration or qualification of a security or transaction, or prohibit or limit the use of any offering document prepared by or on behalf of an issuer in connection with an offering (including proxy statements and reports to shareholders required to be filed under Section 15A of the 1934 Act unless the issuer is incorporated in the state) if the security offered is a "covered" security. A "covered security is defined as:

- a security listed, or authorized for listing, on the New York Stock Exchange, the American Stock Exchange, the Nasdaq National Market System, and @ II) and footnotes(n1);vk n2 or listed or authorized for listing on a national securities exchange which the Securities and Exchange Commission ("Commission") determines has listing standards substantially similar to those of the named markets;
- a security that is equal in seniority or senior to a securities described in the preceding paragraph;
- a security issued by an investment company registered under the Investment Company Act;
- a security offered or sold to a "qualified purchaser" as defined by the Commission -- presumably the Commission will define such purchasers in a manner similar to the definition of "accredited investor" in Rule 501 under the 1933 Act;
- securities offered or sold pursuant to most of the exemptions contained in 1933 Act Sections 3(a) and 4 (in the case of Sections 4(1) and 4(3) the issuer must be a reporting company under the 1934 Act), the principal exceptions being the intrastate exemption in Section 3(a)(11) and the exemption in Section 3(a)(4) for securities issued by non-profit religious and eleemosynary institutions; and

1- Federal Securities Exchange Act of 1934 § II

- a security that will become a covered security under any of the foregoing definitions of covered security upon completion of the transaction.

The states may continue to impose filing requirements for documents filed with the Commission and for certain annual and periodic reports. The states may also require filing of consents to service of process and may impose filing fees (except for listed or to be listed securities and securities senior to them) in the amounts provided by state law on the day before the Act became effective. Moreover, the states under the Act continue to have the authority to investigate and bring enforcement actions for fraud and deceit or unlawful conduct by a broker or dealer.

With regard to brokers and dealers, while the states retain the power to require the registration of brokers and dealers subject to their jurisdiction, states may not impose requirements with respect to capital, custody, margin, financial responsibility, making and keeping records, bonding, or financial or operating requirements that differ from or are in addition to those provided by federal law. In addition, the Act provides an exemption from registration in a state by an associated person of a broker or dealer if he or she makes an occasional sale in the state to a previous customer who is visiting for a short period in the state.

[B] Commission Exemptive Authority

The Act gives the Commission the authority to exempt by rule or regulation any person, security or transaction, or class of such, from any provision of the 1933 Act or rule or regulation thereunder "to the extent that such exemption is necessary or appropriate in the public interest and is consistent with the protection of investors." It is believed that this latter clause, which qualifies all of the Commission's rulemaking power, would preclude the Commission from exempting a security, person or transaction from the anti-fraud provisions of the federal statutes.

The Act gives the Commission a similar exemptive authority, expanded to include the authority to exempt by order, with respect to the 1934 Act.

[C] Broker Dealer Margin Requirements

The Act permits broker-dealers to borrow from sources other than banks. It also exempts from the margin requirements credit extended, maintained, or arranged to or for a member of a national securities exchange or other broker or dealer: (1) a substantial portion of whose business consists of transactions with persons other than brokers or dealers (e.g., a retail broker), or (2) to finance its activities as a market maker or an underwriter.

[D] Promotion of Efficiency, Competition, and Capital Formation

The Act requires the Commission in its rulemaking and other actions to take into account whether its action promotes efficiency, competition, and capital formation.

[E] Coordination of Supervision

The Act requires that the Commission and the self-regulatory organizations, through cooperation and coordination of their activities and sharing of information, eliminate unnecessary and burdensome duplication of examinations. Somewhat in anticipation of the adopted of this provision, in late 1995 the Commission, state regulators, and the SROs entered into a memorandum of understanding with respect to the coordination of activities.

[F] Commission Reports

Congress mandated that the Commission undertake to make studies and submit to it reports with respect to a number of matters.

1- Federal Securities Exchange Act of 1934 § II

- Congress directed the Commission to examine proposals for the privatization of the EDGAR system and to report on such examination within 180 days after adoption of the Act, and to include in such report recommendations for legislative action to implement any Commission proposals for privatization.
- Congress directed the Commission to make a study of the impact of technological advances, the use of on-line information systems on securities markets, and related matters and to make a report within one year after the adoption of the Act of the steps the Commission has taken to address such matters.
- Congress directed the Commission to study whether shareholder access to proxy statements by the submission of shareholder proposals had been impaired by recent statutory, judicial or regulatory changes, and the ability of shareholders to have proposals relating to corporate practices and social issues included as a part of proxy statements, and to report within a year, including recommendations for regulatory or legislative changes to improve shareholder access to proxy statements. This proposal stemmed from the 1992 Commission staff decision allowing corporations to exclude shareholder proposals regarding corporate employment practices.
- Congress directed the Commission to study "preferencing," i.e., the practice of a broker as a dealer on a national securities exchange directing a customer order to itself for execution as principal under rules that permit the broker to take priority in execution over same-priced orders or quotations entered prior in time, and to report within 6 months after adoption of the Act.
- The Commission was directed to report to Congress within one year on progress in the development of international accounting standards and the outlook for the successful completion of a set of international standards that would be acceptable to the Commission for offerings and listings of foreign corporations in U.S. markets. Earlier, the Commission had indicated its support for the effort of the International Accounting Standards Committee to develop suitable standards and indicated the characteristics they would be required to have to be acceptable to the Commission.

[G] Foreign Press Conferences

Responding to the complaints of financial writers that they were often excluded from the press conferences of foreign companies proposing to offer securities in the United States because of concerns with the registration and prospectus requirements of the 1933 Act, Congress directed the Commission to develop, within a year, rules concerning the status of foreign press conferences and foreign press releases under the registration provisions of the 1933 Act.

[H] Fees

The Act contains provisions with respect to the fees that the Commission may charge. It directs the Commission to collect registration fees under the 1933 Act that are designed to recover the costs to the government of the securities registration process and the costs related to that process. It also sets forth a new schedule of such fees under which the registration fees are reduced each year until 2007. For the first time, pursuant to the Act, security transactions off an exchange are subjected to the same fees to which transactions on exchanges have been subject.

FOOTNOTES:

(n1)Footnote 2. The text of the Act does not appear to include as a "covered security" a security offered for listing on the Nasdaq National Market System; this appears to have been a drafting error. 142 Cong. Rec. E1928 (October 4, 1996) (statement of Rep. Bliley).

CHAPTER SA-1 GENERAL EDITOR'S SPECIAL ALERT

1- Federal Securities Exchange Act of 1934 § III

§ III. Provisions of the Act Affecting the Investment Advisers Act of 1940

Title III of the Act contains the Investment Advisers Supervision Coordination Act, which amends the Investment Advisers Act of 1940.

The principal effect of the Act on the Investment Advisers Act of 1940 is the partial federal preemption of the regulation of investment advisers. The Act accomplishes this by providing that no investment adviser regulated or required to be regulated in the state in which it maintains its principal office and place of business may register with the Commission unless it manages assets of not less than \$25 million (or such higher figure set by the Commission) or is an adviser to an investment company registered with the Commission under the Investment Company act of 1940, and that no state may require an investment adviser registered with the Commission to register, secure a license, or qualify under any state law. This formulation was apparently adopted to assure that no small investment advisers located in states that do not regulate investment advisers would be required to register with the Commission.

States may continue to require the registration of investment adviser representatives (broadly defined in the Act) if they have an office in the state.

States may not impose books and records, minimum capital, or bond requirements on advisers licensed in other states in addition to those required by the licensing state if the adviser is in compliance with those requirements. In addition, states may not require the licensing, registration, or qualification of anyone exempted from registration under the Investment Advisers Act of 1940 or of any investment adviser that does not have a place of business in the state and during the preceding twelve months has had fewer than six clients resident in the state.

Consistently with other provisions of the Act, the states' authority to investigate and bring enforcement actions with respect to fraud and deceit is preserved, and states may require the filing of anything filed with the Commission for notice purposes and continue to impose the fees in effect on the day before adoption of the Act.

In recognition of the Commission's frequent complaint about its ability to regularly examine investment advisers, the Act authorizes \$20 million in each of 1997 and 1998 for enforcement of the Investment Advisers Act of 1940.

CHAPTER SA-1 GENERAL EDITOR'S SPECIAL ALERT

1- Federal Securities Exchange Act of 1934 § IV

§ IV. Provisions of the Act Affecting the Investment Company Act of 1940

Title II of the Act contains the Investment Company Act Amendments of 1996. The most important of the amendments affecting investment companies are set forth below.

[A] Partial Preemption of State Registration Requirements -- Amendments to Section 18 of the Securities Act of 1933

One of the most important aspects of the National Securities Markets Improvement Act of 1996 is the partial preemption of state "blue sky" registration and disclosure requirements for mutual funds. Under amended Section 18 of the Securities Act of 1933, states may no longer impose registration or qualification requirements on certain sales of securities, including shares of registered investment companies. States are also precluded from reviewing mutual fund prospectuses and advertising.

However, states retain the authority to require investment companies to file, for notice purposes, any documents filed with the SEC and to continue to collect filing fees. States also retain jurisdiction to investigate and bring enforcement actions for fraud and deceit.

[B] Fund-of-Funds -- Amendments to Section 12(d)(1) of the 1940 act

The Investment Company Act amendments permit fund-of-fund structures within an investment company without an exemption from the SEC. Under amended Section 12(d)(1)(G) of the 1940 Act, a registered open-end investment company or unit investment trust (an "upper-tier fund") may acquire shares or units of other open-end funds or unit investment trusts ("lower-tier funds") within the same group of investment companies without percentage limitations, as long as:

- the shares or units are the only investments held by the upper-tier fund (other than government securities and short-term paper):
- distribution-related fees or charges are not charged by both the upper-tier and lower-tier funds, or, alternatively, the aggregate distribution-related charges at both levels are not excessive under SEC rules; and

- the lower-tier fund may not itself invest in shares or units of registered investment companies or unit investment trusts.

[C] Registration of Indefinite Amount of Securities -- Amendments to Section 24(f) of the 1940 Act

Under amended Section 24(f), commencing in October 1997 (or earlier if the SEC adopts rules), registered open-end investment companies and unit investment trusts will be deemed automatically to have registered an indefinite amount of securities and will pay registration fees based on the net amount of new shares or units sold (i.e., purchases less redemptions).

[D] Advertising Flexibility -- New Section 24(g) of the 1940 Act

Under new Section 24(g) of the 1940 Act, mutual fund advertising restrictions will be eased. Section 24(g) directs the SEC to adopt rules and regulations to permit advertising that includes information "the substance of which is not included in a [Section 10(a)] prospectus"

[E] Modification of Attribution Rule for Private Investment Companies -- Amendments to Section 3(c)(1) of the 1940 Act

The amendments significantly reduce the need for a private investment company to look through and count the underlying owners of an entity investing in it as its beneficial owners. Under amended Section 3(c)(1)(A) of the 1940 Act, the ownership of the private investment company is attributed to the underlying owners of the investing entity only if the investing entity itself is an investment company or an entity relying on the exclusion from the definition of an investment company in Sections 3(c)(1) or 3(c)(7).

[F] Exclusions for "Qualified Purchaser" Private Investment Companies -- Amended Section 3(c)(7) of the 1940 Act

The amendments provide an exclusion for a new type of private investment company. Under amended Section 3(c)(7) of the 1940 Act, effective October 1997, a company is excluded from the definition of an investment company if its outstanding securities are owned only by "qualified purchasers" and it is not making or proposing to make a public offering of its securities.

A "qualified purchaser" is defined in new Section 2(a)(51)(A) of the 1940 Act to include the following categories of persons:

- a natural person with at least \$5,000,000 in investments;
- certain family-owned companies owning at least \$5,000,000 in investments; and
- any person who, for its own account or for other qualified purchasers, owns and invests on a discretionary basis at least \$25,000,000 in investments.

[G] Expansion of Exclusion for Brokers and Financial Intermediaries -- Amendment to Section 3(c)(2) of the 1940 Act

In recognition of the growing number and complexity of financial instruments, Congress expanded the class of intermediaries entitled to rely on the exclusion from the definition of an investment company in Section 3(c)(2) of the 1940 Act. Under amended Section 3(c)(2), in addition to certain underwriters, distributors, and brokers, a "market intermediary" is excluded from the definition. A "market intermediary" is a person who holds itself out as being willing to engage in transactions on both sides of individually negotiated financial contracts, such as swaps, repurchase

agreements, and options.

[H] Exemption from Unit Investment Trust Requirements for Variable Insurance Contracts -- Amendments to Section 26 of the 1940 Act

Under new Section 26(e) of the 1940 Act, the trustee and custodian requirements governing unit investment trusts do not apply to any registered separate account funding variable annuity contracts, or the sponsoring insurance company and principal underwriter of the account, provided:

- the various fees and charges for the contract are reasonable; and
- the insurance company files annual financial information with the appropriate state insurance authority evidencing a combined capital and surplus of \$1,000,000.

CHAPTER SA-1 GENERAL EDITOR'S SPECIAL ALERT

1- Federal Securities Exchange Act of 1934 § V

§ V. Analysis and Conclusions by A. A. Sommer, Jr.

The National Securities Markets Reform Act of 1996 accomplished numerous reforms which virtually all practitioners and people in the securities industry regarded as long overdue without endangering investor protections. As capital markets have become increasingly global, the necessity of multiple state registration in addition to federal registration has become increasingly anomalous. The original scheme which carefully preserved state jurisdiction was the fruit of an age in which "states rights" were accorded deep respect and during which the national nature of the capital markets was less clear. The dual system of registration endured as long as it did because of the adoption of a number of devices designed to ease the burdens of the system (e.g., registration by coordination and notification, exemptions for offerings of securities to be listed, etc.).

In the final analysis, the states preserved perhaps their most important power which was imperiled in the first draft of the eventually enacted Act, namely, the undiminished power to pursue fraud committed within their jurisdictions. In addition, they continue to share concurrent jurisdiction over offerings of securities registered with the Commission which are not going to be listed. Thus, limited partnerships public offerings, initial public offerings of securities that will be traded in the NASDAQ Small Cap Market or in the "pink sheets," and offerings of numerous other types of "exotic" securities will continue to be subject to the full authority of the states where the offering is made.

Perhaps the main beneficiaries of the preemption are the investment companies that have historically been restrained because of the sometime vagaries of state regulation, many of which were recounted during the course of Congressional testimony on the Act.

The states retain considerable, if somewhat attenuated, authority with respect to brokers and dealers. However, the signals are clear in the Act and the dialogue leading to its enactment that failure by the states to use their authority in a less burdensome manner may result in the forfeiture of virtually all authority with respect to brokers and dealers.

The Commission received enhanced power to adopt rules and regulations providing exemptions under the 1933 and 1934 Acts. This eliminates the awkward necessity of using questionable "definitions" and other circuitous means to achieve needed exemptions, such as those included in Regulation D and Rule 144. The enhanced power opens the door to a more comprehensive and conceptually consistent overhaul of the disclosure system such as that reflected in the proposals of the Commission's Advisory Committee on the Capital Formation and Regulatory Processes.

1- Federal Securities Exchange Act of 1934 § V

The division of jurisdiction over investment advisers between the states and the Commission is a sensible way of assuring better policing of an activity that has never received the attention it should receive and which poses increasing peril to investors. Hopefully, the overall quality, quantity, and effectiveness of investment adviser will be considerably enhanced with the Act's direction that the SEC focus attention on the larger advisers and that the states retain unfettered opportunity to regulate small advisers.

The requirement in the Act that the Commission, in rulemaking, take into account efficiency, competition, and capital formation is unlikely to affect the Commission's rulemaking since the Commission would undoubtedly deny that any of its rulemaking ever mandated inefficiencies or hampered competition or capital formation.

Absent from the final version of the Act were some of the more controversial provisions of the original Fields bill, such as a provision that would have sharply reduced the ability of institutional investors to assert lack of suitability claims against broker-dealers. Apparently, the initiative of the National Association of Securities Dealers in adopting a rule governing suitability for institutional investors prompted Congress to drop this proposal. However, if Congress believes that the NASD rule, in practice, has not struck a fair balance, it may revisit the issue down the line.

The reports the Commission is directed to make after the numerous mandated studies may constitute the agenda for future legislation. However, it is doubtful that Congress will revisit the fundamentals of securities regulation in the near term. In the Act, Congress has addressed the most troublesome problems in the current securities regulation scheme and has given the Commission significantly increased power to deal with future problems. Perhaps the most pertinent question until the end of this century and somewhat beyond is how the Commission will use its enhanced powers.

CHAPTER 1 The Securities Exchange Act of 1934 and the SEC *

1-1 Federal Securities Exchange Act of 1934

SUMMARY OF THIS CHAPTER

The Securities Exchange Act of 1934 ("Exchange Act") is the foundation of the collection of Federal laws governing the nation's securities markets. It created the Securities and Exchange Commission ("SEC") as the primary Federal regulatory body for the nation's capital markets. The Exchange Act provided the SEC with broad authority in two areas: (1) to register and regulate stock exchanges and broker-dealers and the conduct of business in the purchase and sale of securities in the secondary market; and (2) to establish continuing public disclosure requirements for public companies listed on a stock exchange. The Exchange Act augmented this authority by transferring responsibility for administration and enforcement of the Securities Act of 1933 from the Federal Trade Commission to the SEC. In future years, as Congress passed new complementary laws, responsibility for these laws was assigned to the SEC. Congress provided the SEC with broad anti-fraud powers to effectively enforce compliance with these laws.

The capital markets of the United States have grown dramatically and Congress has periodically amended the Exchange Act, and the other Federal securities laws, to provide the SEC with greater authority as needed to fill gaps and to regulate an increasingly complex, sophisticated and, now global, market. Since its enactment, the Exchange Act has been amended or augmented by new laws, for example:

- The Maloney Act of 1937 permitted the organization of national securities associations to provide self-regulation of brokers and dealers;
- The Reorganization Plan 10 of 1950 fundamentally changed how the SEC functions by transferring administrative and decisional authority from the five member Commission to the Chairman of the Commission;
- The 1964 Amendments extended the Exchange Act's periodic disclosure system and other requirements to over-the-counter securities and provided authority necessary to enable the SEC to effectively regulate the OTC market;
- The Williams Act expanded the Commission's authority to require persons and institutions to disclose significant acquisitions of stock in a company and to regulate cash tender offers and other

1-1 Federal Securities Exchange Act of 1934

change in control transactions;

- The Securities Investor Protection Act of 1970 created the Securities Investor Protection Corporation ("SIPC") to provide federal insurance for customers' deposits of cash and securities in the hands of broker-dealers;

- The Securities Acts Amendments of 1975 expanded Commission authority over exchanges and SRO's to facilitate the adoption of a national market system and increase competition through the elimination of fixed commission rates;

- The Foreign Corrupt Practices Act of 1977 provided Commission authority to regulate internal corporate activities concerning creation of books and records and internal systems for preparing financial statements and to make it unlawful for domestic business concerns to engage in certain corrupt practices involving foreign officials;

- The Insider Trading Sanctions Act of 1984 and the Insider Trading and Securities Fraud Enforcement Act of 1988 established money penalties for unlawful trading on the basis of material nonpublic information and created liability for control persons;

- The Securities Enforcement Remedies and Penny Stock Reform Act of 1990, greatly expanded the Commission's enforcement powers of the Commission by expanding the penalties and remedies that could be imposed upon violators and strengthened regulation of the penny-stock market;

- The Market Reform Act of 1990, enhanced the power of the Commission to address market volatility problems and the Securities Acts Amendments of 1990, expanding the authority of the Commission to cooperate with foreign securities regulators;

- The Private Securities Litigation Reform Act of 1995 enabled public companies to expand disclosure of forward-looking information and reduced the likelihood of private class action lawsuits based on fraud;

- The National Securities Markets Improvement Act of 1996 limited state authority to regulate issuers of securities, investment companies and investment advisers;

- The Gramm-Leach-Bliley Act of 1999, repealed the Glass-Steagall Act which prohibited banks, securities firms and insurance companies from affiliating; and

- The Sarbanes-Oxley Act of 2002 created the Public Company Accounting Oversight Board and implemented a wide range of new restrictions and requirements on corporations and their officers and directors designed to increase the quality of corporate disclosure and to enhance public investor confidence in the integrity of the financial markets.

The Securities and Exchange Commission administers the Exchange Act, as well as the Securities Act of 1933, the Public Utility Holding Company Act of 1935 (repealed in 2005), the Trust Indenture Act of 1939, the Investment Company Act of 1940, and the Investment Advisors Act of 1940. In addition, the Commission serves as advisor to federal courts in corporate reorganization proceedings under Chapter 11 of the Bankruptcy Code. The Commission consists of five members, no more than three of whom may belong to the same political party. Members are appointed by the President, with the advice and consent of the Senate, for five-year terms, one term ending each year. The President designates the Chairman of the Commission. See § 1.02 *infra*

1-1 Federal Securities Exchange Act of 1934

The Commission exercises its regulatory authority by adopting rules and regulations appropriate to implement the provisions of the statutes that it administers. In addition, the SEC performs informal assistance to the public and companies subject to SEC regulation through the issuance of interpretations and "no action" letters to inform the public of the Commission's position regarding the applicability of such statutes and to guide prospective registrants and others in complying with those laws. Furthermore, the Commission exercises its regulatory authority by registering, regulating and inspecting exchanges, SRO's, broker-dealers, investment companies and investment advisers, including affiliated persons; and by investigating possible violations of the federal securities laws. Finally, the SEC institutes enforcement proceedings either in an administrative proceeding or in federal district court. See § 1.03 *infra*

* This chapter has been updated by Jonathan G. Katz. Mr. Katz served as the Secretary of the U.S. Securities and Exchange Commission from 1986 until his retirement in 2006.

CHAPTER 1 The Securities Exchange Act of 1934 and the SEC *

1-1 Federal Securities Exchange Act of 1934 § 1.01

§ 1.01 Securities Exchange Act of 1934

The Securities Exchange Act of 1934 n1 has two general purposes. First, the 1934 Act augments the disclosure requirements of the Securities Act of 1933 ("1933 Act") by compelling publicly held corporations to periodically furnish to the record holders and prospective purchasers of their securities information about their corporate affairs substantially comparable to that required of issuers under the 1933 Act. n2 The second purpose of the 1934 Act is to regulate broker-dealers and the markets for post-distribution purchases and sales of securities. n3 The 1934 Act, unlike the 1933 Act, is not a cohesive and unified piece of legislation; rather, it sets forth, section by section, the areas within the securities industry and securities markets which Congress believed required regulation and the means by which that regulation was to be imposed.

The scope of the 1934 Act was substantially broadened by amendments in 1964 and 1975. n4 The 1964 amendments imposed on issuers of securities traded in the over-the-counter market the requirements formerly applicable only to issuers of exchange listed securities. The 1975 amendments significantly enhanced the oversight function of the Securities and Exchange Commission with respect to the securities markets and their related self-regulatory organizations and services.

In 1977 the Foreign Corrupt Practices Act prohibited issuers subject to the jurisdiction of the SEC from paying bribes to foreign officials, n5 and imposed accounting standards upon reporting companies to insure the integrity of accounting records and reports and to require the establishment and maintenance of internal accounting controls.

The Exchange Act also was amended by the Insider Trading Sanctions Act of 1984 and the Insider Trading and Securities Fraud Enforcement Act of 1988, which created money penalties for persons who unlawfully traded on the basis of material nonpublic information and strengthened the enforcement of the laws against securities fraud. The Securities Enforcement Remedies and Penny Stock Reform Act of 1990 significantly expanded the authority of the Commission to enforce compliance with the securities laws and strengthened regulation of the penny-stock market; the Market Reform Act of 1990 gave the Commission new powers to address problems of market volatility; and the Securities Act Amendments of 1990 expanded the authority of the Commission to cooperate with foreign securities regulators, and sought to improve communications between investment companies and their shareholders. In 1996 the Private Securities Litigation Reform Act imposed various restrictions on private litigation under the securities laws. The Sarbanes-Oxley Act of 2002 increased management accountability for their company's financial statements, prohibited loans to management, improved disclosure of management's securities transactions in their company's securities and

created a new SRO for the accounting profession, the Public Company Accounting Oversight Board.

[1] Historical Background

The possibilities of broker-dealers defrauding their customers in securities transactions in general are as old as the concept of the corporation. In his treatise the late Professor Loss pointed out that there were attempts to regulate such activities in England as far back as 1285. n6 The problems associated with the purchase and sale of corporate securities had been recognized in this country long before the 1934 Act was enacted, and there had been numerous attempts at the state level to deal with the problems by enactment of the so-called Blue Sky laws. n7 Many of these laws required and still require a broker or dealer to register in a state before doing business there and generally required a screening process involving a showing of character and ability on the part of an applicant. Most Blue Sky laws also required the filing of statements of financial responsibility and provided for control of the distribution of securities sold within the state, with differing measures of control and criteria for approval.

As the national economy grew in complexity, complicated questions of conflict of laws in interstate transactions became rather common because the different states' securities laws varied greatly in their approach to securities fraud. Thus the Blue Sky laws alone proved ineffective as a method of control. n8

Following the stock crash of 1929, the report of the Pecora Committee, n9 revealed how easily the general public could be victimized when purchasing an exchange-listed security. n10 The report demonstrated that there was a great need to regulate the post-offering purchase and sale of securities in addition to the regulatory scheme for the initial offering of securities created by the Securities Act of 1933.

There was no consensus initially on the breadth of the regulatory scheme for the secondary market or on which Federal agency should have the responsibility. The New York Stock Exchange and securities industry strongly opposed Federal regulation in general and particularly if the Federal Trade Commission, the agency administering the Securities Act, became the regulatory body. Creation of a separate agency devoted exclusively to securities regulation was the compromise that prevailed.

[2] Coverage of the Exchange Act

The Exchange Act was enacted to address two broad regulatory goals -- creating a system of registration, regulation and oversight of securities exchanges, broker-dealers and the business of engaging in the purchase and sale of securities in the secondary market; and establishing a continuing disclosure obligation for public companies with securities listed on a stock exchange. Initially the SEC's authority regarding the same activity in the over the counter market was extremely limited. This authority would not be provided for thirty years with Congressional enactment of the Securities Act amendments of 1964.

To regulate the stock markets, the Exchange Act originally authorized the Commission to:

- Require stock exchanges to register with the Commission and subsequently file changes in any rules;
- Require broker-dealers to register with the Commission;
- Adopt rules governing trading;
- Suspend trading in a security for up to ten days;
- Enforce prohibitions on fraudulent and manipulative conduct.

1-1 Federal Securities Exchange Act of 1934 § 1.01

The Exchange Act authorized the Board of Governors of the Federal Reserve Board to set limits on margin loans by broker-dealers to customers and authorized the SEC to enforce these limits. The Federal Reserve also had authority to regulate borrowing by broker-dealers.

To ensure that the investing public had access to current information on public companies with securities trading in the secondary market, the Exchange Act authorized the Commission to adopt rules requiring companies to periodically release reports containing information about the company's operations, including annual audited financial statements. The Act also authorized the SEC to adopt national accounting standards for public companies; a responsibility that the Commission deferred to the accounting profession.

The Exchange Act created specific disclosure requirements for reporting trades by officers and directors and major investors in public companies and imposed a minimum holding period of six months on these persons, enforceable by private action. It also provided the Commission with the authority to mandate disclosure for proxy solicitations. Since the enactment of the Exchange Act and the creation of the SEC, there have been numerous amendments to the law greatly expanding the SEC's authority to achieve these two initial goals.

Today the Commission authority over exchanges and broker-dealers extends to almost every area of the securities industry and imposes obligations and prohibitions on its constituents, including issuers of securities, stock exchanges, brokers and dealers, municipal securities dealers and brokers, securities associations, clearing agencies and depositories, transfer agents and registrars, institutional investment managers, securities information processors and most recently credit rating agencies.

The 1934 Act's reporting provisions require a corporation with a security registered with the Commission to file with the Commission and each stock exchange on which the corporation has a listed security, periodic reports of its activities (including financial statements), and to prepare and distribute an annual report to its stockholders. To keep the information current, the registrant corporation must also file frequent periodic reports concerning important corporate events. n11 Commission authority pursuant to the Exchange Act over corporate reporting also encompasses:

- Soliciting proxies for voting in corporate elections and on other matters, which is made subject to SEC control. n12
- Acquiring corporate control by means of a tender offer which also is subject to Commission control. n13
- Limiting profits from short term trading by insiders in securities of their corporation. n14

Under the Exchange Act the Commission has broad authority to regulate the securities markets, broker-dealers and associated persons in a variety of ways:

- The stock exchanges and securities associations are required to register with the Commission n15 and their rules must be consistent with the requirements of the Exchange Act and the rules thereunder and are subject to Commission approval. In addition, the Commission conducts examinations and exercises supervisory authority over activities on registered exchanges and in the over-the-counter markets. n16
- Brokers and dealers are required to register n17 with the SEC and to furnish in connection therewith certain financial information, to maintain books and records required by Commission and SRO rules, n18 and to maintain sufficient liquid reserves as determined by Commission rules. n19 Provision is made for

a measure of self-regulation. n20 However, the exchanges, the Municipal Securities Rulemaking Board, and registered clearing agencies are also significant self-regulatory bodies.

- Certain activities by brokers or dealers which would interfere with an honest and free and open market are proscribed. n21
- Fraud in the purchase and sale of securities is generally proscribed. n22
- Control over the use of credit in securities transactions is vested in (a) the Federal Reserve Board for the establishment of standards, and (b) in the SEC for enforcement. n23

[a] Reorganization Plan 10 of 1950.

James Landis had a greater role in developing the Federal securities laws and outlining the operation of the SEC than any other one person. He, Benjamin Cohen and Thomas Corcoran were the principal authors of the Securities Act of 1933, the Exchange Act and the Public Utility Holding Company Act of 1935. He was one of the original five members of the Commission and was its second Chairman. In 1949 President Truman enlisted his services to conduct a comprehensive review of the operations of independent regulatory agencies (a task he would perform a second time in 1960 for President-elect Kennedy). His report to President Truman resulted in Congress enacting the Reorganization Plan 10 of 1950, n24 which fundamentally changed the role of the Chairman and the division of responsibility of the Chairman and the Commission as a decisional body.

Under the Plan the President was provided with formal authority to designate which of the five commissioners would be Chairman. While appointment as a Commissioner would continue to be for a fixed term, the designation of Chairman would be discretionary with the President. The Chairman would become a true executive function. Responsibility for the selection of staff, assignment of duties, allocation of budget and control over the agenda of Commission actions was transferred to the Chairman. n25

[b] The 1964 Amendments.

In 1964 Congress enacted a comprehensive series of amendments to the Federal securities laws. The focus of the 1964 amendments was the expansion of the basic Exchange Act regulatory system to the over the counter market. For the first time, the SEC could broadly regulate both the activities of the OTC market and impose disclosure requirements on companies with stock trading OTC.

A new section 12(g) of the Exchange Act extended the provisions of Section 12 (the security registration requirements), Section 13 (the periodic reporting requirements), Section 14 (the regulation of proxies), and Section 16 (the regulation of insider trading), with some modifications concerning banks, insurance companies and other designated exempt entities, to all corporations doing an interstate business and having assets over \$1 [now \$10] million and more than 500 stockholders. n26

Prior to 1964, few banks were listed on any stock exchange and such securities were (and still are) specifically exempted from the registration requirements of the 1933 Act by Section 3(a)(2) of that Act. n27 The 1964 amendments extended the periodic disclosure and other disclosure reporting obligations to banks. However regulatory authority for compliance with these requirements was assigned to the appropriate bank regulatory agency. n28 The Act also transferred to those agencies all administration and enforcement powers that the Commission possesses under the Exchange Act with respect to other corporations. n29

Rules and regulations applicable to banks and bank securities have been adopted by all the federal agencies involved.

The 1964 Act amendments created an analogous disclosure regulatory scheme for registration of insurance companies (but, again, not to a holding company owning an insurance company). Under Section 12(g)(2)(G) of the Exchange Act insurance company securities were exempted from the registration requirements of Section 12(g) if the company filed an annual statement with its domiciliary insurance commissioner conforming to a standard form prescribed by the National Association of Insurance Commissioners, was subject to proxy regulations conforming to those prescribed by the same Association, and was domiciled in a state that had adopted insider trading restrictions substantially similar to those contained in Section 16 of the 1934 Act. n30 They continued to be covered by the periodic disclosure requirements of the Act.

The 1964 amendments also extended many of the Commission's powers over trading on an exchange to trading OTC, such as the power to suspend trading in a security for up to ten days and the power to grant or deny unlisted trading privileges in an OTC stock on an exchange. The Commission's enforcement powers were also expanded. A new provision, section 15(c)(4) of the Exchange Act empowered the Commission to bring administrative proceedings against an issuer to determine whether it has failed to comply with the Act or a regulation thereunder and to issue an order requiring compliance. n31 A new provision of far greater significance was section 15(b)(7) [subsequently section 15(b)(6)]. This enabled the Commission to bring administrative proceedings against persons associated with a broker-dealer who violated the securities laws. Through this proceeding, the Commission could censure, suspend for up to twelve months or bar the individual from association with any broker-dealer. The Commission was also authorized to impose lesser sanctions, censures or suspension of up to twelve months, on broker-dealers. The grounds for denying or revoking a broker-dealer registration or other disciplinary sanction were also expanded. These new bases included willful violations of the Investment Company Act, the Investment Advisers Act, willful aiding or abetting violations, and, importantly, a broker-dealer's failure reasonably to supervise another person who commits a violation.

In an effort to improve the self-regulatory process, the 1964 amendments required the NASD, as the only registered securities association, to develop a system for training, testing and qualifying persons seeking to become associated with a broker-dealer. The NASD was also required to develop rules and regulations for the fair reporting of quotations and to develop procedures for collecting and publishing these quotations. This was the beginning of what would become NASDAQ.

[c] Williams Act Amendments.

Prior to 1968, if a corporation sought control of another by a stock-for-stock exchange, the offer was required to be registered under the Securities Act of 1933. Each shareholder was furnished a prospectus containing all material facts about the offer. Where corporate control was sought through a proxy contest, Section 14 of the 1934 Act also required that shareholders be informed of the identity of the participants and of their plans for the acquired company. When shares were purchased with borrowed funds, the lender's identity had to be disclosed if the funds were obtained otherwise than through a bank loan or margin account. In both the exchange offer and proxy fight, the information was required to be filed with the Commission and was subject to statutory requirements and sanctions. n32

In contrast, when a cash tender offer was made, no information was required to be filed or disclosed to shareholders. Since a cash tender offer was similar to a proxy contest, there appeared to be no justification for the exclusion of cash tender offers from the disclosure provisions of the securities laws. By the enactment of legislation to close the gap in 1968, Congress eliminated the process that allowed a person to acquire corporate control by a cash tender offer without any disclosure. Popularly known as the Williams Act, n33 after the sponsor, Senator Harrison Williams, it added subsections (d) and (e) to Section 13 of the Exchange Act and subsections (d), (e), and (f) to Section 14 to provide for full disclosure of corporate ownership of securities when a person or group of persons seeks to acquire a substantial block of securities of a corporation by a cash tender offer, alternatively called a "takeover bid," or when a corporation purchases its own securities. n34

In December 1970, the provisions of Sections 13(d) and 14(d) were extended by legislation to acquisitions of and tender

offers for securities of insurance companies. n35 Sections 13(d)(1) and 14(d)(1) were also amended to require full disclosure of acquisitions of and tender offers for over 5 percent of a company's stock. n36 In addition, the legislation subjected stock-for-stock exchange offers made pursuant to a registration statement under the Securities Act of 1933 to the tender offer requirements of Section 14(d) of the 1934 Act. n37 Further, Section 14(e) was amended to give the Commission additional rulemaking power to deal with certain types of fraudulent, deceptive, and manipulative practices. n38 Finally, the Commission was authorized to adopt rules and regulations to permit it to differentiate between control persons and issuers in filings required under Section 13(e). n39

Three other amendments to the Exchange Act were enacted during this period:

- (1) The Securities--Credit--Regulation Act amended Section 7 of the Exchange Act to extend margin requirements to over-the-counter securities. n40 See § 3A.02 at n.5 *infra*
- (2) The Securities--Institutional Investors--Effect on Markets Act added a new subsection(e) to Section 19 of the Exchange Act authorizing the Commission to investigate the effect of the operations of institutional investors on the securities markets. n41
- (3) The Bank Records and Foreign Transactions Act extended the applicability of the margin requirements to purchasers of stock, including American companies, their subsidiaries and others who make foreign purchases of U.S. corporate stock, broker-dealers, and financial institutions that lend money for such purposes. n42 See § 3A.02[1] *infra* for discussion of margin requirements pursuant to Section 7.

[d] Securities Investor Protection Act of 1970 ("SIPA").

In the latter part of the 1960s large increases in daily trading volume in the securities markets overwhelmed the capacity of many broker-dealers to clear and settle daily trading. The largely manual processes and the reliance on physical transfer of paper certificates caused some firms to be unable to accurately balance their books and properly record customer transactions. Several major brokerage firms failed. n43 The "paperwork crisis" of the late 1960s led to substantial losses for investors and securities firms, and the failures of more than 100 brokerage firms jeopardized the continued operation of the securities markets.

Prior to 1971, stock exchanges assumed liability for the obligations of an insolvent member firm to its customers and established guaranty funds to cover the obligations. Customers of insolvent broker-dealers who were not members of the stock exchange that established the fund, however, received no protection. Moreover, because the fund was voluntary and not required by law, there was no legal obligation for the exchange to protect the customers of its own members, and the desired protection was at best uncertain.

In response, Congress enacted the Securities Investor Protection Act of 1970, n44 which provided for the establishment of the Securities Investor Protection Corporation ("SIPC"). Congress sought to provide greater protection for customers by insuring their cash and securities in the custody of broker-dealers. The SIPA was amended in 1978 n45 to enhance investor confidence in the securities markets by addressing limitations on the SIPC's ability to adequately provide protection for customers and by responding to some problems arising in SIPA liquidation proceedings. Section 9(a) of the Securities Investor Protection Act was amended by the Securities Investor Protection--Right to Financial Privacy Act Amendments of 1980 n46 to increase the SIPC coverage on customers' assets maintained with broker-dealers from \$100,000 to \$500,000 (but not more than \$100,000 with respect to cash assets). n47 For a detailed discussion of the SIPA, see § 3.07[2] *infra*.

[e] Securities Acts Amendments of 1975.

1-1 Federal Securities Exchange Act of 1934 § 1.01

The Special Study of the Securities Markets completed its multi volume report to the SEC and Congress in 1963. It provided a comprehensive picture of the problems that existed in the nations securities markets and regulatory system and offered an extensive array of recommendations to address these problems. The paperwork crisis of the late 1960's provided the catalyst for Congress to eventually act by passing the Securities Act amendments of 1975. The Securities Acts Amendments of 1975 n48 contained the most significant and comprehensive legislation affecting the securities markets since the enactment of the Exchange Act itself. n49

The three principal purposes of the Exchange Act amendments in 1975 were:

- developing a national market system to modernize the securities industry and securities markets;
- coordinating clearance and settlement of securities transactions; and
- regulating municipal securities dealers and brokers.

The Senate Committee Report n50 characterized the securities industry as operating in 1975 by the same methods employed in the 1930's, resistant to modernization, and unresponsive to radically altered economic and technological conditions. The Senate Committee Report stated:

The Securities Industry Study Report of the Subcommittee on Securities (S. Doc. No. 93-13, 93d Cong., 1st Sess. 1973) identified a number of causes for the securities industry's languor in the face of great change and great opportunity: price fixing with respect to commission rates, artificial restrictions on market making activities, unjustified barriers to access to markets and market makers, opposition to market integration from powerful vested interests, monopoly control of essential mechanisms for dissemination of market information, and the absence of effective control of market developments and operations by the Securities and Exchange Commission ... n51

In place of the existing fragmented and inefficient markets, the 1975 amendments contemplated a national securities market system utilizing modern communication and data processing equipment. The efficiency of existing markets would be improved by the elimination of the undesirable practices and restrictions referred to by the Senate Committee.

[i] Fixed Commission Rates.

Schedules and fixed rates of commissions, allowances, discounts, and other fees of national securities exchanges were eliminated, with limited exceptions. However the amendments permitted fiduciaries to pay for research services with brokerage commissions (so-called "soft dollars"), but not in the form of "give-ups." n52

[iii] Self-Regulatory Organizations; Commission Oversight.

The 1975 amendments fundamentally altered the relationship between the SEC and the SROs. It made explicit the responsibilities of the SRO's to: adopt procedures for corporate governance and the selection of directors; adopt rules that are not a burden on competition; prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade; remove impediments to a national market system; and protect investors and the public interest. n53

The Commission's power to oversee the rulemaking, disciplinary, and other functions of self-regulatory organizations (securities exchanges, the NASD, registered clearing agencies, and the Municipal Securities Rulemaking Board) was increased and made unequivocal. All SRO rules must be filed with the Commission and could be disapproved by the Commission. Additionally, the Commission was authorized to amend the rules of any self-regulatory agency (other than

a clearing agency) in any respect consistent with the 1934 Act. n54

The Commission was also empowered to take enforcement action against an exchange or SRO for a violation of the securities law or regulations or the rules of the SRO. The SEC could also take action to enforce the rules of an SRO.

[iii] National Market System.

The 1975 amendments created section 11A of the Exchange Act, which states:

(1) The Congress finds that--

(A) The securities markets are an important national asset which must be preserved and strengthened.

(B) New data processing and communications techniques create the opportunity for more efficient and effective market operations.

(C) It is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure--

(i) economically efficient execution of securities transactions;

(ii) fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets;

(iii) the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities;

(iv) the practicability of brokers executing investors orders in the best market; and

(v) an opportunity, consistent with the provisions of clauses (i) and (iv) of this subparagraph, for investors' orders to be executed without the participation of a dealer.

(D) The linking of all markets for qualified securities through communication and data processing facilities will foster efficiency, enhance competition, increase the information available to brokers, dealers, and investors, facilitate the offsetting of investors' orders, and contribute to best execution of such orders.

(2) The Commission is directed, therefore, having due regard for the public interest, the protection of investors, and the maintenance of fair and orderly markets, to use its authority under this title to facilitate the establishment of a national market system for securities.

Section 11A directed the Commission to create a National Market Advisory Board to recommend actions that the Commission should take to facilitate the implementation of a national market system, and to study the need for a new self-regulatory organization to administer the system. The Board was required to submit its report to Congress no later than December 31, 1976. Section 11A also created a registration requirement and regulatory system for Commission oversight of securities information processors. The national market system for securities and the Commission's oversight role in its implementation and operation are discussed in § 2.05 *infra*.

[iv] Self-Dealing and Combination of Money Management and Brokerage.

With certain exceptions, members of national securities exchanges were prohibited, n55 from effecting transactions on their exchanges for:

- (a) their own accounts,
- (b) the accounts of associated persons, or
- (c) accounts with respect to which they or associated persons exercise investment discretion.

The commission was empowered to regulate or prohibit such self-dealing and combination of money management and brokerage:

- (a) by exchange members in transactions exempted from the prohibition described in the preceding sentence:
- (b) in transactions executed in the over-the-counter market by exchange members, brokers, or dealers; and
- (c) in transactions effected on a national securities exchange by brokers or dealers who are not members of the exchange. n56

[v] Registration and Regulation of Brokers and Dealers.

The 1975 Amendments made various changes in the provisions concerning brokers and dealers, including those dealing with registration, sanctions, capital rules, financial statements, and minimum standards of training, experience, and competence. n57 Effective December 1, 1975, brokers and dealers who conducted all their trading on the floor of an exchange (such as specialists, floor traders, and floor brokers) were required to register under Section 15. The Commission's power to regulate specialists and other market-makers was increased.

[vi] Municipal Securities Dealers and Brokers.

When the Exchange Act was adopted in 1934, the market for municipal securities (debt securities of the states and their political subdivisions) was thought to be dominated by institutional investors who would not need the protection accorded individual investors. Brokers and dealers in municipal securities, therefore, were exempted from the registration and regulatory provisions of the 1934 Act.

Because individual investors actually constitute a very significant part of the market for municipal securities, Congress concluded that the complicated nature of trading in municipal securities justified eliminating the exemption accorded to municipal securities brokers and dealers. The 1975 amendments created the Municipal Securities Rulemaking Board ("MSRB") n58 to act as a non-member controlled SRO with authority to regulate the municipal securities market and industry. Congress did not eliminate the exemption for issuers of municipal securities, however, which continue to be exempt from direct regulation under the federal securities laws. n59

Effective December 1, 1975, municipal securities dealers and brokers became subject to registration and regulation under the Exchange Act. n60 Municipal securities dealers include persons engaged in the business of buying and selling municipal securities for their own account, including banks (or separately identifiable bank departments or divisions). Excepted from that provision are (a) persons who buy and sell municipal securities for their own account, but not as part of a regular business and (b) banks that buy and sell such securities for their own account, but do so only in a fiduciary capacity. Inspection and enforcement functions for municipal securities dealers were granted to the banking regulatory agencies and the Commission, depending upon the nature of the dealer. n61

[vii] National System for Clearance and Settlement of Securities Transactions.

The inability of the securities and banking industries to handle the increased volume of trading in the securities markets during the late 1960s had very serious consequences for investors and securities firms and jeopardized continued operation of the securities markets. The "paperwork crisis" demonstrated that brokers, dealers, clearing agencies, depositories, transfer agents and registrars would have to coordinate their activities, and that a national system for clearance and settlement was a basic requirement for a healthy securities industry. The 1975 amendments provided for such coordination, contemplated establishing a national system for clearance and settlement, and subjected the various entities involved to registration and regulation under the Exchange Act.

The Commission was directed to facilitate the establishment of a national system for prompt and accurate clearance and settlement of transactions in securities and to provide for the registration and regulation of clearing agencies and transfer agents with the Commission or other appropriate regulatory agencies. Special provisions concerning missing, lost, counterfeit or stolen securities were added as Section 17(f). n62

[viii] Reporting by Institutional Investment Managers.

Institutional investment managers who exercise investment discretion with respect to accounts holding an aggregate fair market value of \$100 million or more of equity securities registered under Section 12 of the Act (and equity securities of certain insurance and investment companies) were required under new Section 13(f) to report to the Commission the quantity of each such security held, the aggregate fair market value of each such security, and other prescribed information.

[ix] Allocation of Regulatory Functions Among Government Agencies.

Because some entities that are subject to the requirements of the 1934 Act are state or national banks or bank holding companies, various administrative and inspection functions, and responsibility for the imposition of sanctions and other matters, were allocated between the Commission and the federal banking agencies by means of the "appropriate regulatory agency" concept. n63 Notwithstanding that allocation, the Commission possesses the dominant policy-making function under the 1934 Act.

[x] Judicial Review of Commission Rules.

A person "adversely affected" by a Commission rule promulgated pursuant to designated

sections of the Exchange Act n64 may obtain review of the rule in the Circuit Court of Appeals. n65

[xi] Miscellaneous Amendments.

The Securities Acts Amendments of 1975 also:

- Made uniform the criminal penalties for violation of the six statutes administered by the Commission. n66

- Amended Section 21 of the Exchange Act to exempt Commission instituted actions "for equitable relief" from consolidation or coordination with other actions not brought by the Commission unless the Commission consents. n67 The exemption paralleled the exemption provided for the Justice Department by **28 U.S.C. § 1407(g)**, and overruled the action of the *Judicial Panel on Multidistrict Litigation* (368 F. Supp. 1311 (J.P.M.L. 1973)) consolidating the Commission's *National Student Marketing* case with seven related private damage suits pending in other districts for pretrial discovery.

- Required the Commission, the Board of Governors of the Federal Reserve System, and the "appropriate regulatory agencies" enumerated in Section 3(a)(34) of the Exchange Act to report annually to the Congress on various matters within their respective areas of responsibility. n68

- Amended Section 31 of the Exchange Act to require, in addition to transaction fees paid to the Commission by exchanges for transactions on such exchanges, payment of transaction fees by brokers and dealers for trades in listed securities off a national securities exchange. The transaction fee was raised to one penny per three hundred dollars of the aggregate dollar amount of sales, but transactions in debt securities were excluded. Rule 31(f) has made most transactions in NASDAQ securities subject to the same fee. n69

- Authorized the Commission to promulgate rules concerning arrangements in which brokers and dealers loan securities held for the account of their customers. n70

- Amended Section 28(b) of the Exchange Act, with respect to arbitration proceedings, to include all self-regulatory organizations and their members, participants, municipal securities dealers and brokers, and persons who agree to be bound thereby. This amendment was not intended to change existing law, as stated in *Wilko v. Swan*, between members or participants in self-regulatory organizations and persons dealing with such members or participants. n71

- Directed the Commission to make a study of the practice of recording the ownership of securities in a name other than that of the beneficial owner (registration in "street name") and to determine

(i) whether the practice was consistent with the purposes of the Exchange Act, and

(ii) whether steps could be taken to facilitate communications between issuers and the beneficial owners while retaining the benefits of the practice. The Commission was to submit its preliminary findings in six months, and its final conclusions and recommendations within a year of enactment of the Securities Acts Amendments of 1975 (June 4, 1975). n72

- Prohibited the imposition of state or local taxes on securities, or upon the transfer of securities, merely because the facilities of a clearing agency or transfer agent are physically located in the state or locality. The provision preserves state taxing powers where the state has a traditional jurisdictional basis for taxation. n73

[f] Foreign Corrupt Practices Act of 1977.

[i] Accounting Standards; Foreign Corrupt Practices.

The Watergate investigation into illegal campaign contributions publicized the extensive practice of corporations making campaign contributions and using corporate funds to bribe government officials in countries worldwide. A report by the staff of the SEC cataloged the number and size of these corporate expenditures, which typically were not accounted for properly on company financial statements. Congress responded to the problem by passing the Foreign Corrupt Practices Act of 1977 ("FCPA") n74. Title I created Section 13(b)(2) of the Exchange Act to require every issuer which has a class of securities registered pursuant to Section 12 of the 1934 Act and every issuer which is required to file reports pursuant to Section 15(d) of the 1934 Act to:

(A) make and keep books, records, and accounts, which, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the issuer;

(B) devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that--

(i) transactions are executed in accordance with management's general or specific authorization;

(ii) transactions are recorded as necessary (I) to permit preparation of financial statements in conformity with generally accepted accounting principles or any other criteria applicable to such statements, and (II) to maintain accountability for assets.

The FCPA represented a significant expansion of Commission authority. n75 It empowered the Commission to regulate an important internal activity of a public corporation; the maintenance of its books and records and internal accounting systems. Furthermore the Commission could bring enforcement actions against companies and officials for violations, and the Justice Department could bring criminal actions for these violations under section 13(b)(5).

The Act was in many ways the precursor to the Sarbanes-Oxley Act of 2002 and, at the time was equally controversial. The accounting standards provisions of the FCPA apply to all Exchange Act reporting companies and are not limited to foreign corrupt practices. Section 104 of the FCPA, n76 which is administered by the Department of Justice, prohibited domestic concerns not covered by new Section 30A of the Exchange Act from engaging in the same type of conduct prohibited by Section 30A.

The FCPA makes it unlawful for both reporting companies and any domestic concern not subject to the Exchange Act to engage in certain corrupt practices involving foreign officials. n77 Specifically, a new Section 30A was added to the Exchange Act, making it unlawful for a reporting company, any of its officers, directors, employees, or agents, or any shareholder acting on behalf of the company, to corruptly make payments to a foreign official to influence an act or decision of the foreign official, including a decision not to act, or to induce such person to use his influence to affect any government act or decision, to assist the company in obtaining or retaining business or directing business to, any person. n78

[ii] Domestic and Foreign Investment Improved Disclosure Act of 1977.

Title II of the FCPA, the Domestic and Foreign Investment Improved Disclosure Act of 1977, n79 amended Section 13(d) of the Exchange Act to require additional disclosure of the residence, citizenship, and nature of beneficial ownership by any person who acquires beneficial ownership of more than 5 percent of, and added a new paragraph (g) to Section 13 requiring disclosures by any person who is the beneficial owner of more than 5 percent of, any equity security of a class which is registered pursuant to Section 12 of the 1934 Act; of an insurance company, which would have been required to be so registered except for the exemption contained in Section 12(g)(2)(G); or issued by a closed-end investment company registered under the Investment Company Act of 1940. n80

[g] Securities Investor Protection---Right to Financial Privacy Act Amendments of 1980.

A new Section 21(h) was added to the Exchange Act by the enactment of legislation n81 to reflect the applicability of the Right to Financial Privacy Act of 1978 n82 to the Commission. Under Section 21(h), the Commission is subject to the Right to Financial Privacy Act of 1978 except in specified cases where the Commission must have prompt access to financial records to permit the Commission to exercise its investigatory functions under the federal securities laws. In such cases, and subject to prior *ex parte* court approval, the Commission is entitled to subpoena financial records of a customer from a bank without prior notice to the customer. After obtaining the records, the Commission must give notice to the customer that it has obtained access to his records.

The customer can bring suit against the Commission for civil penalties and injunctive relief if the Commission's access was not for purposes authorized by the federal securities laws. n83

In addition, Section 21(h) contains provisions governing the transfer of financial records by the Commission to other governmental authorities, and requiring the Commission to report annually to Congress the occasions on which it obtains access to financial records pursuant to Section 21(h).

[h] Small Business Investment Incentive Act of 1980.

Section 3(a)(12) of the Exchange Act was amended by the Small Business Investment Incentive Act of 1980 ("SBIA") n84 to

- clarify the status as "exempted securities" under Section 3(a)(12) of contracts issued by insurance companies in connection with employee benefit plans qualified under **Section 401 of the Internal Revenue Code**, annuity plans that meet the requirements for deduction of an employer's contributions under Section 404(a)(2) of the Code, and certain governmental plans defined in Section 414(d) of the Code, regardless of whether the contracts are funded by a separate account or the insurer's general account; n85
- provide an exemption from registration under the 1934 Act for bank and insurance company funding of public employee retirement plans defined in **Section 414(d) of the Internal Revenue Code**
 - (a) that exclusively provide retirement benefits to employees or their beneficiaries and
 - (b) whose funds are segregated and cannot be diverted to other purposes; and
- (3) clarify that the exemption for interests or participations in a single trust fund does not depend upon whether the fund is maintained by a bank. n86

[i] Securities-Commodities Accord Amendments of 1982.

From the time it was established in 1934, the Commission has regulated trading in options on securities. Following the creation of the Commodity Futures Trading Commission ("CFTC") in 1974 and the subsequent development of standardized options and widespread trading in these options on exchanges, several factors created doubt regarding the Commission's jurisdiction over options trading.

First, the definitional sections of the securities laws did not expressly include "option" within the definition of "security," although the definition did include the 'right to purchase a security. Second, the development of innovative investment and trading instruments in the 1970's designed to aid in speculation on and hedging against inflation, fluctuations in interest and exchange rates, stock market movements, and related economic changes tended to confuse previously drawn lines of regulatory responsibility for these financial instruments and the markets on which they were traded.

Third, the act creating the CFTC provided it with exclusive jurisdiction over trading in commodity futures, and the expansion of the definition of "commodity" by the Commodity Exchange Act amendments of 1974 to include "all services, rights, and interests in which contracts for future delivery are presently or in the future dealt in" contained the potential for a jurisdictional conflict or an interpretation of the term "commodity" which would include anything that becomes the subject of futures trading, including securities options. n87

In *Board of Trade of the City of Chicago v. SEC*, n88 the Commission's authority to regulate options on exempted

securities was successfully challenged when a court held that exchange-traded standardized put and call options on Government National Mortgage Association (GNMA) mortgage-backed securities were not securities. The court also concluded that the sole authority of the Commission to regulate put and call options on securities exchanges is derived from Section 9 and that since Section 9 does not apply to an exempted security, options on GNMA securities were subject to the exclusive jurisdiction of the CFTC. n89

The decision raised the concern of securities industry members and legal experts that it could have disruptive ramifications far beyond the Commission's ability to regulate GNMA options.

In response to these developments and concerns, the Commission and the CFTC decided to seek an agreement ("The Shad Johnson Accord") on the meaning of inconsistent provisions in the securities acts and the Commodity Exchange Act. The two agencies jointly submitted to Congress amendments to the statutes that would clarify the allocation of authority over options and futures between the agencies.

The Securities-Commodities Accord Amendments of 1982 n90 substantially codifies this jurisdictional agreement. The Amendments expanded the definition of the term "security" in Section 3(a)(10) to include any put, call, straddle, option, or privilege on any security, certificate of deposit, or group or index of securities (including any interest therein or based on the value thereof) or any put, call, straddle, option, or privilege entered into on a national securities exchange relating to foreign currency. n91

The Amendments also added a new paragraph (g) to Section 9 that expressly grants the Commission authority to regulate options on exempted securities and clarifies that the Commission's authority extends to trading on options on all securities, securities groups and indices, certificates of deposit, and options relating to foreign currency if such options are traded on an exchange, except for options on a contract for future delivery. In addition, Section 28(a) was amended to provide a limited preemption of state antigaming and "bucket shop" laws for options contracts approved by the Commission for trading on an exchange. n92

[j] Insider Trading Sanctions Act of 1984.

Congress enacted the Insider Trading Sanctions Act of 1984 (ITSA) to increase the penalties for unlawful trading on the basis of material nonpublic information. n93

The most important provision of ITSA became Section 21(d)(2) of the Securities Exchange Act. Section 21(d)(2) authorized the Commission to seek a penalty of up to three times the amount of profit gained or loss avoided by a person who unlawfully purchased or sold a security while in possession of material nonpublic information, or who aided and abetted an unlawful transaction by tipping material nonpublic information to another person. Section 21(d)(2) was repealed, and replaced by Section 21A of the Exchange Act, when Congress enacted the Insider Trading and Securities Fraud Enforcement Act of 1988. n94

Another provision of ITSA became Section 20(d) of the Exchange Act. Section 20(d) establishes that a person who possesses material nonpublic information violates the Exchange Act by trading in options if he would violate the Act by trading in the securities underlying the options.

ITSA also increased the maximum criminal fines imposable on willful violators of the Exchange Act. n95

Finally ITSA amended § 15(c)(4) of the Exchange Act to authorize the Commission to bring administrative proceedings to require compliance with Section 14, relating to proxy solicitations and tender offers. n96

[k] Insider Trading and Securities Fraud Enforcement Act of 1988.

In the wake of widespread publicity about a number of massive insider-trading schemes, Congress enacted the Insider Trading and Securities Fraud Enforcement Act of 1988 (ITSFEA) "to enhance deterrence against insider trading and... to augment the current methods of detection and punishment of this behavior." n97 ITSFEA replaced Section 21(d)(2) of the Exchange Act, which had been enacted in 1984, with Section 21A of the Exchange Act. Section 21A authorizes the Commission to seek a court order imposing a civil penalty on any person who violated the Exchange Act by purchasing or selling securities while in possession of material nonpublic information, or by tipping material nonpublic information to another person who purchased or sold securities while in possession of that information. In addition, Section 21A provides for the imposition of a civil penalty on any person who directly or indirectly controlled a person who engaged in unlawful trading or tipping, if the controlling person failed to take appropriate steps to prevent the controlled person's violation of law.

Section 21A provides that the amount of any penalty imposed on a primary violator of the rules barring unlawful trading and tipping cannot exceed "three times the profit gained or loss avoided" as a result of the illegal activity. The maximum penalty that may be imposed on a controlling person is "the greater of \$1,000,000, or three times the amount of the profit gained or loss avoided as a result of [the] controlled person's violation" Penalties assessed under Section 21A are to be paid into the United States Treasury, except that the Commission can award up to ten percent of the amount of any penalty to a person who provided information leading to the imposition of the penalty. n98 ITSFEA also amended the Exchange Act by adding a new Section 20A, which grants an express private right of action to investors who traded "contemporaneously" with, but on the opposite side of the market from, defendants who violated the Exchange Act by trading while in possession of material nonpublic information. The total amount of damages that can be awarded under Section 20A is limited to the profit gained or loss avoided as a result of the defendants' unlawful activity.

ITSFEA increased the maximum criminal penalties not only for insider-trading offenses, but for virtually all willful violations of the Exchange Act or the rules and regulations thereunder. n99

Other provisions of ITSFEA authorize the Commission to assist foreign governments in investigating violations of their securities laws, n100 and direct the Commission to undertake a major study of the U.S. securities laws and the adequacy of their enforcement. n101

[I] The 1990 Legislation.

During 1990, Congress adopted three important sets of amendments to the federal securities acts. The Securities Enforcement Remedies and Penny Stock Reform Act of 1990 n102 significantly increased the authority of the Commission to enforce compliance with the securities laws, and strengthened regulation of the penny-stock market. The Market Reform Act of 1990 n103 enhanced the power of the Commission to address problems of market volatility. And the Securities Acts Amendments of 1990 n104 effected miscellaneous improvements in the scheme of securities regulation.

[i] Securities Enforcement Remedies and Penny Stock Reform Act of 1990.

During the decade of the 1980's the stock markets experienced a level of dramatic growth that had not been seen in a generation. The United States also witnessed a series of high profile SEC enforcement actions that was unprecedented in the history of the federal securities laws. SEC actions, combined with criminal prosecutions by the Justice Department through the U.S. Attorney for the Southern District of New York, against Dennis Levine, Ivan Boesky, Michael Milken and Drexel Burnham Lambert attracted front page attention. Less publicized but also important were SEC enforcement actions against First Jersey Securities and Blinder, Robinson & Co.. Both of these firms were broker-dealers that actively underwrote, offered and sold penny stocks, very low priced stocks in extremely small and obscure public companies. Often these companies were so-called "blank check" offerings, involving companies with no operations or business activities at the time of the offering.

1-1 Federal Securities Exchange Act of 1934 § 1.01

With the public's attention came questions regarding whether the SEC had sufficient resources and powers to regulate and police the nation's capital markets. Congress responded by appropriating the largest increases in agency budget in its history. In 1990, through SERPSRA, Congress greatly expanded the penalties for violations of the Federal securities laws and provided the SEC with unusually powerful authority to regulate the offering and sale of penny stocks n105 and secondary market trading in penny stocks, in particular blank check offerings.

The Securities Enforcement Remedies and Penny Stock Reform Act of 1990 ("SERAPSRA") provided the Commission with "new remedial authority ... to operate its enforcement program in a more flexible manner." n106 SERPSRA added Sections 21(d)(2) and 21(d)(3), 21B, and 21C to the Exchange Act, and analogous provisions to other federal securities statutes:

- Expanding penalties in civil injunctive actions;
- Expanding penalties against registered entities and associated persons in administrative proceedings; and
- Creating a new cease and desist proceeding, with jurisdiction over any person or entity.

Section 21(d)(2) of the Exchange Act authorizes a federal court, in an injunction proceeding brought by the Commission, to issue an order prohibiting any person who violated Section 10(b) from acting as an officer or director of any reporting company; n107 and Section 21(d)(3) authorizes the Commission to seek a court order imposing a civil monetary penalty on any person who violated any provision of the Exchange Act or the rules thereunder. n108

Section 21B authorizes the Commission to impose a civil monetary penalty, or to order an accounting and a disgorgement, in an administrative proceeding against a broker-dealer, investment adviser, or other regulated person who "willfully violated" any provision of the securities acts or "failed reasonably to supervise" a subordinate who violated such a provision. n109

Section 21C authorizes the Commission to enter an order, after an administrative proceeding, requiring any person "to cease and desist from committing or causing" any violation of the Exchange Act and "to take steps to effect compliance" with the law. n110 This provision also empowered the Commission to order a temporary cease and desist order against registered entities and associated persons.

Such an order shall be entered only after notice and opportunity for a hearing, unless the Commission determines that notice and hearing prior to entry would be impracticable or contrary to the public interest. A temporary order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings. n111

The second major purpose of SERPSRA was to curb "the pervasive fraud and manipulation in the penny stock market." n112 Title V of SERPSRA amended Section 15(b)(6) of the Exchange Act to authorize the Commission to bar certain persons from participating in an offering of "penny stock," n113 and added Section 15(g) to the Exchange Act to require the Commission to adopt rules imposing special disclosure obligations on brokers and dealers who carry out transactions in penny stocks. Title V also added to the Exchange Act a new Section 17B, which mandates the establishment of an automated quotation system for penny stocks. Finally, Title V amended Section 15A of the Exchange Act to require the NASD to establish a toll-free telephone listing to receive customer inquiries concerning the disciplinary histories of NASD members. n114

The Commission's rules on broker-dealer sales of penny stocks are unusually detailed and impose explicit disclosure

requirements on a broker-dealer selling such stocks. For example, under rule 15c-2 a customer must be provided with and sign a disclosure document providing information identified in SEC Schedule 15G; n115 must disclose the inside bid-offer quotations; n116 and must disclose the aggregate amount of compensation received on the transaction. n117

[ii] Market Reform Act of 1990.

Just as the scandals of the eighties provided the catalyst for Congressional passage of SERPSRA, the stock market break of 1987 and the studies which identified conditions and practices which had contributed to it provided a rationale for enactment of the Market Reform Act of 1990. n118 The Market Reform Act of 1990 was designed to provide the Commission "with enhanced powers to prevent manipulation that affects market volatility and to prohibit or constrain practices reasonably likely to engender extraordinary volatility, and with increased access to information critical to effective financial oversight of the securities markets."

The Act amended the Exchange Act in several ways, including:

- amending Section 12(k) of the Exchange Act to authorize the Commission to suspend all trading on any national securities exchange or otherwise for not more than 90 days n119 and to take appropriate actions to respond to market emergencies n120;
- adding Section 13(h) to the Exchange Act to require "large traders" n121 to provide the Commission with information concerning their trading;
- adding Section 17(h), which authorizes the Commission to require registered brokers and dealers to keep records and report information concerning the financial and other risks under which they operate as a result of the activities of their associated persons;
- amending Section 17A(a)(2) of the Exchange Act to direct the Commission to facilitate the establishment of a coordinated clearance system for transactions in securities and related financial instruments; and
- adding Section 9(h) to the Exchange Act to authorize the Commission to prescribe means reasonably designed to prevent manipulation of the market for equity securities, and to prohibit certain trading practices during periods of extraordinary market volatility.

[iii] Securities Acts Amendments of 1990.

One of the major purposes of the Securities Acts Amendments of 1990 was to streamline and modernize the Trust Indenture Act of 1939. Two titles of the Amendments, however, made significant changes in the Exchange Act.

Title II, the International Securities Enforcement Cooperation Act, revised various provisions of the Exchange Act to increase the ability of the Commission and foreign regulators to exchange information and to cooperate in the enforcement of their nations' securities laws. At the request of a foreign securities authority conducting an investigation to determine whether its securities laws are being or have been violated, the Commission may authorize the division to provide assistance to the foreign authority, even if the conduct in question would not constitute a violation of U.S. law. This assistance may include the issuance of an SEC formal order permitting the staff to issue subpoenas. When deciding to honor such a request, the Commission must consider whether the requesting authority has agreed to provide reciprocal assistance and whether providing the assistance would prejudice the public interest. n122

Title III, the Shareholder Communications Improvement Act, amended Section 14 of the Exchange Act to eliminate gaps that existed and ensure that proxy materials are delivered in a timely fashion to the shareholders of investment

companies and that company information statements are distributed even if a proxy is not solicited.

[m] The Government Securities Act Amendments of 1993.

The U.S. government securities market is generally considered the largest, most efficient and liquid securities market in the world. Because trading in this market is largely done by professionals, it has generally been exempt from the regulatory system that applies to other U.S. markets. Yet it has not been immune from scandal. In 1991, a manipulative trading scheme by a professional trader at Salomon Brothers demonstrated a need for greater regulation. In 1993 Congress passed the Government Securities Act Amendments of 1993. n123 This Act expanded on the Government Securities Act of 1986, which had been enacted following the failure of Bevill, Bresler and Schulman, a small government broker, to improve regulation of this market.

While the Department of Treasury has primary regulatory responsibility over the government securities market, the SEC plays an adjunct role. This Act amended the Exchange Act in several important areas.

Section 15C(d)(3) requires all government securities dealers to provide transaction records to the Commission, as may be required "to reconstruct trading in the course of a particular inquiry or investigation." n124 However the new section requires the Commission to minimize the burden placed on small government broker-dealers and the Commission may not use this authority to impose regular reporting requirements on government securities broker-dealers. Section 15(c)(1) of the Exchange Act was amended to subject government securities broker-dealers to its authority to adopt and enforce rules prohibiting manipulative, deceptive or other fraudulent device or contrivances. The Exchange Act was also amended to eliminate restrictions on the ability of the NASD to regulate its members activities in the government securities markets, including the authority to apply its sales practice rules and just and equitable principles of trade.

This Act also amended the Exchange Act in a completely unrelated area. Title III, entitled the Uniform Partnership Rollup Reform Act, added section 14(h) to the Exchange Act directing the Commission to adopt special proxy solicitation and tender offer rules in connection with limited partnership rollup transactions. A companion addition to the Exchange Act, section 15A(b)(12) required the NASD to apply its just and equitable principles of trade rules to prohibit member firms from participating in limited partnership rollup transactions that do not protect the rights of limited partners.

[n] The Private Securities Litigation Reform Act of 1995.

In 1995, Congress enacted the Private Securities Litigation Reform Act of 1995 ("PSLRA") which fundamentally changed the role of private litigation under the Federal securities laws. For much of its history the SEC had actively supported and promoted the role of private litigation as an essential adjunct of the Commission's enforcement program. n125 Through its *amicus* program the Commission had historically and routinely supported an expansive view of the availability of implied rights of private action under the securities laws.

Increasingly, this viewpoint was no longer consistently adhered to by the Commission and the courts had become increasingly wary of the plethora of class action law suits under the securities laws. There was a widespread perception that too many such class action lawsuits were frivolous and of dubious merit. Based on studies and its hearings Congress concluded that private securities class action litigation had become abusive in many respects and that a common practice was to file securities class action "strike suits" against issuers with the hope of settling these lawsuits based on their nuisance value.

The PSLRA fundamentally altered the law as it applied to class action law suits alleging a violation of the Federal securities laws. It created special rules of procedure and pleading standards for these actions that differed from the rules applicable to other class actions. The PSLRA added Section 21D to the Exchange Act-- Private Securities Litigation. This section provides for certification of certain matters by each plaintiff seeking to serve as a representative party on

behalf of a class and requires that, not later than 20 days after the date on which the complaint is filed, the plaintiff notify, by publication, all other members of the purported class of the pendency of the lawsuit. Section 21D also provides that not later than 90 days after notice is published, the court in which the complaint is brought shall appoint a lead plaintiff for the class and consolidate separately filed class action lawsuits under certain circumstances.

Section 21D(b) imposes a significant pleading requirement for allegations of fraud. Subparagraph (1) requires that:

the complaint shall specify each statement alleged to have been misleading, the reason or reasons why the statement is misleading, and, if an allegation regarding the statement or omission is made on information and belief, the complaint shall state with particularity all facts on which that belief is formed.

Subparagraph (2) further provides that:

In any private action arising under this title in which the plaintiff may recover money damages only on proof that the defendant acted with a particular state of mind, the complaint shall, with respect to each act or omission alleged... state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind.

Subparagraph (3) provides a special procedure for motions to dismiss and provides for a stay of discovery during the pendency of the motion to dismiss. Subparagraph (b)(4) established a clear loss causation requirement for the recovery of damages. Paragraph (d) created a system for submitting written interrogatories to the jury concerning findings of state of mind and proportionate liability

The PSLRA also amended Section 15(c) of the 1934 Act to prohibit referral fees from attorneys to brokers, dealers or persons associated with brokers or dealers in connection with obtaining the representation of any person in any private securities litigation. The PSLRA amended Section 20 of the Exchange Act including a subsection concerning liability of controlling persons and persons who aid and abet violations of the 1934 Act.

The PSLRA also added section 21E to the Exchange Act explicitly creating a safe harbor from litigation for forward-looking statements made by issuers of securities in reports filed with the Commission. The safe harbor also applies to persons acting on behalf of issuers, outside reviewers retained by issuers and underwriters. To receive the safe harbor the forward-looking statements must be identified as such and be accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those in the forward-looking statement. This safe harbor provision also covers all oral forward-looking statements under certain circumstances. Interestingly, the Commission held a series of public hearings in 1994 on the topic of whether to create a safe harbor provision by regulation. Because of the possibility of Congressional action, the Commission took no action on the concept.

If the purpose of the PSLRA was to substantially reduce the number of private class actions alleging violations of the securities laws, then the law must be considered a success. n126

Three year later Congress enacted the Securities Litigation Uniform Standards Act of 1998 n127 to eliminate an unintended consequence of the PSLRA, the shift of securities class action law suits into state courts. This Act added section 28(f)(1) to the Exchange Act, and parallel section 16(b) to the Securities Act of 1933 preempting such state actions. The Act also addressed, without completely resolving, uncertainties over whether the PSLRA altered the scienter standard required to establish fraud.

[o] The National Securities Markets Improvement Act of 1996.

The regulatory system for financial services is a highly complex structure with multiple Federal regulators and

additional regulation by state regulatory agencies. The National Securities Markets Improvement Act of 1996 ("NSMIA") attempted to improve the efficiency of capital markets by lessening some duplicative regulation on issuers of securities, investment companies and investment advisers.

The primary purpose of NSMIA was to preempt state regulation of securities issued by companies listed on a national stock exchange or on NASDAQ/NMS and securities issued by registered investment companies, as well as certain limited offerings under Regulation D under the Securities Act. However, it also contained provisions that amended the Exchange Act. While states could continue to require broker-dealers to register, NSMIA added Section 15(h) to the Exchange Act limiting the ability of states to impose additional capital, margin, books and records, bonding and reporting requirements for broker-dealers. In addition, NSMIA amended Section 7(c) of the 1934 Act concerning to unlawful credit extensions to customers, amended Section 8, eliminating one of the provisions relating to restrictions on borrowings by members, brokers and dealers and added Section 17(i) requiring the SEC and other examining authorities to eliminate any unnecessary and burdensome duplication in the examination process of entities regulated under the 1934 Act.

Another provision of NSMIA added section 3(f) requiring that:

whenever the Commission is engaged in rulemaking, or in the review of a rule of a self-regulatory organization, and is required to consider or determine whether an action is necessary or appropriate in the public interest, the Commission shall also consider, in addition to the protection of investors, whether the action will promote efficiency, competition, and capital formation. n128

Section 36 of the Exchange Act, added by NSMIA, provides the Commission with broad authority to grant exemptions under the Exchange Act.

[p] Gramm-Leach-Bliley Act of 1999.

The Securities Act of 1933 and the Securities Exchange Act of 1934 were only two of many laws passed in response to the stock market crash of 1929 and the ensuing great depression. In 1933 Congress also passed the Glass-Steagall Act which, while directed at banking, had a profound impact on the development of the securities industry in the United States. Glass-Steagall formally separated commercial banking and investment banking functions in the United States.

Through the 1980s and 1990s the separation of these activities steadily eroded through banking deregulation and judicial interpretation of the law. In 1999, Congress passed the Gramm-Leach-Bliley Act ("GLBA"), repealing Glass-Steagall. Banks could engage in underwriting securities and other securities activities through securities affiliates or by creating a financial holding company, which owned subsidiaries engaged in any form of financial services.

While most of the GLBA relates to federal banking laws, a portion of that act also amended the 1934 Act in connection with the regulation of brokers and dealers. In particular, the GLBA amended Section 3(a)(4) (definition of broker) and Section 3(a)(5) (definition of dealer) to provide a specific exemption for certain bank activities that might otherwise result in a bank being considered a securities broker-dealer. Specifically, the GLBA allows banks to enter into third party brokerage arrangements with brokers or dealers registered under the 1934 Act. The GLBA also made other technical amendments to certain 1934 Act definitions.

[q] Sarbanes-Oxley Act of 2002.

The Enron and Worldcom financial scandals, following closely after the "tech bubble" collapse in 2000, created a national crisis of lost public confidence in financial markets and in the effectiveness of the regulatory system. Congress responded in July 2002 when it passed the Sarbanes-Oxley Act of 2002 (the "SOX"), a sweeping overhaul of the Federal securities markets. SOX expanded securities law regulation on a wide array of topics - corporate governance,

disclosure, reporting, accounting requirements and penalties for violation. The law was written so broadly that it applied not only to domestic public companies filing reports with the SEC, including investment companies, but also to foreign companies that have securities publicly traded on domestic securities exchanges or the NASDAQ Stock Market. n129

SOX required the SEC to undertake a massive program to draft, propose and adopt implementing regulations in virtually every area of securities regulations. This expansion and revision of SEC rules as a result of a single Congressional action was virtually unprecedented in the Commission's history. Less than two years after enactment of SOX the Commission had completed a total of 19 final regulations n130:

- Additional Form 8-K Disclosure Requirements and Acceleration of Filing Date (Release Nos. 33-8400, 34-49424; File No.: S7-22-02; March 16, 2004)
- Management's Report on Internal Control over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports (Release Nos. 33-8392, 34-49313; IC-26357; File Nos.: S7-40-02; S7-06-03; February 24, 2004)
- Management's Reports on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports (Release Nos. 33-8238, 34-47986; IC-26068; File Nos.: S7-40-02; S7-06-03; June 5, 2003)
- Improper Influence on Conduct of Audits (Release Nos. 34-47890; IC-26050; FR-71; File No.: S7-39-02; May 20, 2003)
- Mandated Electronic Filing and Website Posting for Forms 3, 4 and 5 (Release Nos. 33-8230; 34-47809; 35-27674; IC-26044; File No.: S7-52-02; May 7, 2003)
- Standards Relating to Listed Company Audit Committees (Release Nos. 33-8220; 34-47654; IC-26001; File No.: S7-02-03; April 9, 2003)
- Filing Guidance Related to: Conditions for Use of Non-GAAP Financial Measures; and Insider Trades During Pension Fund Blackout Periods (Release Nos. 33-8216; 34-47583; IC-25983; FR-69; File Nos.: S7-43-02 and S7-44-02; March 27, 2003)
- Disclosure Required by Sections 406 and 407 of the Sarbanes-Oxley Act of 2002 (Release Nos. 33-8177A; 34-47235A; File No.: S7-40-02; March 26, 2003)
- Strengthening the Commission's Requirements Regarding Auditor Independence (Release Nos. 33-8183A; 34-47265A; 35-27642A; IC-25915A; IA-2103A; FR-68; File No.: S7-49-02; March 26, 2003)
- Implementation of Standards of Professional Conduct for Attorneys (Release Nos. 33-8185, 34-47276, IC-25919; File No.: S7-45-02; January 29, 2003)
- Strengthening the Commission's Requirements Regarding Auditor Independence (Release Nos. 33-8183, 34-47265, 35-27642, IC-25915, IA-2103, FR-68; File No.: S7-49-02; Jan. 28, 2003)
- Disclosure in Management's Discussion and Analysis about Off-Balance Sheet Arrangements and Aggregate Contractual Obligations (Release Nos. 33-8182, 34-47264, FR-67, International Series No. 1266; File No.: S7-42-02; January 28, 2003)

1-1 Federal Securities Exchange Act of 1934 § 1.01

- Certification of Management Investment Company Shareholder Reports and Designation of Certified Shareholder Reports as Exchange Act Periodic Reporting Forms; Disclosure Required by Sections 406 and 407 of the Sarbanes-Oxley Act of 2002 (Release Nos. 34-47262, IC-25914; File Nos.: S7-33-02 and S7-40-02; January 27, 2003)
- Retention of Records Relevant to Audits and Reviews (Release Nos. 33-8180, 34-47241, IC-25911, FR-66; File No.: S7-46-02; January 24, 2003)
- Disclosure Required by Sections 406 and 407 of the Sarbanes-Oxley Act of 2002 (Release Nos. 33-8177, 34-47235; File No.: S7-40-02; January 23, 2003)
- Insider Trades During Pension Fund Blackout Periods (Release Nos. 34-47225, IC-25909; File No.: S7-44-02; January 22, 2003)
- Conditions for Use of Non-GAAP Financial Measures (Release Nos. 33-8176, 34-47226, FR-65; File No.: S7-43-02; January 22, 2003)
- Certification of Disclosure in Companies' Quarterly and Annual Reports (Release Nos. 33-8124, 34-46427, IC-25722; File No.: S7-21-02; August 29, 2002)
- Ownership Reports and Trading by Officers, Directors and Principal Security Holders (Release Nos. 34-46421, 35-27563, IC-25720; File No.: S7-31-02; August 27, 2002)

The Act also mandated that the Commission undertake and complete six studies and submit them to Congress n131:

- Report and Recommendations Pursuant to Section 401(c) of the Sarbanes-Oxley Act of 2002 on Arrangements with Off-Balance Sheet Implications, Special Purpose Entities, and Transparency of Filings by Issuers (June 15, 2005)
- Study Pursuant to Section 108(d) of the Sarbanes-Oxley Act of 2002 on the Adoption by the United States Financial Reporting System of a Principles-Based Accounting System (July 25, 2003)
- Report on the Role and Function of Credit Rating Agencies in the Operation of the Securities Markets (January 24, 2003; in PDF format)
- Study and Report on Violations by Securities Professionals: Section 703 of the Sarbanes-Oxley Act Of 2002 (January 24, 2003; in PDF format)
- Report Pursuant to Section 308(c) of the Sarbanes-Oxley Act of 2002 (January 24, 2003; in PDF format)
- Report Pursuant to Section 704 of the Sarbanes-Oxley Act of 2002 (January 24, 2003; in PDF format)

While it is difficult to neatly summarize all of the substantive changes that SOX effected, they can grouped into four general categories:

- Corporate disclosure, internal operations; and restrictions on management and directors;

- SEC enforcement;
- Regulation of accountants and auditors;
- Miscellaneous changes in the securities laws.

[i] Corporate Disclosure, Internal Operations, and Restrictions on Management and Directors

SOX directed the Commission to undertake rulemaking to improve the quality, accuracy and speed of corporate disclosure. Specific provisions addressed the following:

- § 401 - Disclosure of material correcting adjustments identified by an auditor and disclosure of all material off-balance sheet transactions;
- § 401 - Rules requiring pro forma financial information to be not misleading and consistent with GAAP;
- § 302 - CEO/CFO certifications;
- § 404 - Internal controls requirements;
- § 404 - Disclose code of ethics or explain why the company does not have one;
- § 409 - Faster 8-K reporting;
- § 403 - § 16 ownership reports must be filed within 2 days and electronically;
- § 303 - Prohibits officers and directors from fraudulently influencing auditors; and
- § 301 - Exchanges must adopt listing standards on independent audit committees.

The law also mandated that the Commission must review disclosure filings of all listed issuers on a three-year rotation cycle (§ 308).

Other provisions of SOX prohibited corporations from making personal loans to corporate executives (§ 402); and established blackout periods on trading in company securities by corporate insiders (§ 306).

While each of these provisions was significant, two of the most significant provisions have been the § 302 CEO/CFO certifications and § 404 internal controls requirements. CEOs and CFOs are required to certify in annual and quarterly reports filed with the SEC that, to their knowledge, the filed report does not contain any untrue statement or omission of a material fact, and fairly presents the company's financial condition and results of operations. This certification also covers that company's internal controls as well as specified communications between officers and the audit committee of the board of directors. An additional certification requires that CEOs and CFOs certify that the specific period report fully complies with the requirements of Sections 13(a) and 15(d) of the 1934 Act and that the information contained in that report fairly presents, in all material respects, the financial condition and results of operations of the company.

The SOA sets forth penalties for a knowing violation of the certification requirement of up to a \$1,000,000 fine, ten year imprisonment or both. The penalty for willful violation is a fine of up to \$5,000,000, 25 year imprisonment or both. Included in these certifications are representations by the CEO and CFO that they are responsible for establishing and

maintaining internal controls. In addition, each annual report on Form 10-K or 10-KSB and quarterly report on Form 10-Q or 10-QSB is required to contain disclosure concerning their conclusions regarding the effectiveness of the company's internal controls. Each such report also is required to disclose whether there were significant changes in internal controls that could significantly affect internal controls subsequent to the date of their evaluation.

The internal controls requirements under § 404 have become the most well-known and controversial aspects of SOX. In 1977 when Congress passed the Foreign Corrupt Practices Act, it required public reporting companies to make and keep books and records fairly reflecting transactions and activities, and to develop a system internal accounting controls. Section 404 built upon this requirement by requiring that annual reports must contain a section describing responsibility for establishing and maintaining its internal control system and including an assessment of the effectiveness of the system, Section 404(b) required auditors to attest to the discussion.

Interpretation, application and compliance with this requirement quickly became so controversial that it overshadowed virtually every other provision in the Act. In response to the outcry, the Commission delayed compliance with the Act for years. In fact in 2008, six years after passage of Sarbanes-Oxley, all covered companies have still not fully complied and, as recently as 2007 the Commission was continuing to examine the costs of compliance and was still issuing interpretive guidance. n132

[ii] SEC Enforcement.

Congressional action on SOX provided the Commission with an opportunity to obtain Congressional action on a series of Exchange Act amendments that the Commission's Division of Enforcement had been seeking as well as additional remedies that Congress believed necessary. These changes included the following:

- § 304 - CEO/CFO forfeiture of bonuses, incentive-based compensation and profits from stock sales that occurred in year prior to accounting restatements resulting from material non-compliance with financial reporting requirements resulting from misconduct;
- § 305 - The standard for obtaining an officer and director bar was reduced from "substantial unfitness" to "unfitness";
- § 602 - Explicit statutory authority for § 102(e) administrative proceedings against professionals;
- § 603 - District judges may impose penny stock bars;
- § 604 - Commission administrative proceedings to discipline associated persons of broker-dealers or investment adviser can be based upon violations of state law;
- § 308 - Civil money penalties may be transferred into a FAIR fund for the benefit of investors.

[iii] Regulation of Accountants and Auditors.

While § 404 internal controls reporting has received the most publicity and engendered the most controversy, Title I of the Act, which creates the Public Company Accounting Oversight Board ("PCAOB") n133, may ultimately be the most significant piece of the law. SOX created the PCAOB to act as a non-member controlled regulator of the accounting and auditing profession, under the strong control and oversight of the SEC. The five member Board is appointed by the Commission and funded by public companies, with oversight by the SEC. It is authorized to set auditing, quality control and ethics standards for public accounting firms; inspect and investigate account firms; and impose disciplinary and remedial sanctions.

Sarbanes-Oxley also made significant changes in the relationship between auditors and the client corporation. It substantially increased the role of the audit committee of the Board of Directors as the link with the auditor. Each audit committee member must be unaffiliated with the company and no audit committee member may accept any compensation (including consulting, advisory or other compensatory fees) other than for services as a director (including fees for services as a member of the audit committee or any other board committee). Public companies are required to disclose in their annual and quarterly reports whether their audit committee includes at least one member who is a "financial expert" (and, if not, why not).

Under SOX, audit committees are now required to assume certain additional responsibilities. Audit committees must now pre-approve all audit and non-audit services by the company's independent auditor. The audit committee is also required to consider reports from the company's auditor relating to (i) the company's critical accounting policies and practices; (ii) all alternative treatments of financial information permitted under Generally Accepted Accounting Principles ("GAAP") that have been discussed with management, the ramifications of the use of such treatments and the preferred treatment by the auditor; and (iii) all other material written communications between the auditors and management of the company. The audit committee is also directed to resolve disagreements between the auditor and management of the company concerning the company's financial reporting. Furthermore, the audit committee is required to become involved in analyzing any internal controls deficiencies, as well as management or employee fraud identified in the CEO/CFO certifications made to the SEC. Finally, the audit committee is required to establish procedures for the receipt, retention and treatment of complaints received by the company regarding accounting, internal account controls or auditing matters and for the confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters.

The law also expanded upon Commission regulations adopted in 2002 concerning auditor independence. SOX prohibits auditors from performing specific non-audit services, including: bookkeeping or other services related to the accounting records or financial statements of the audit client; financial information systems design and implementation; appraisal or valuation services, fairness opinions or contribution-in-kind reports; actuarial services; internal audit outsourcing services; management functions or human resources; broker-dealer, investment advisor or investment banking services; legal services and expert services unrelated to the audit; and any other service that the newly created Public Company Accounting Oversight Board determines, by regulation, to be impermissible.

Finally section 303 of SOX prohibits a director or officer of a public company from taking any action to fraudulently influence, coerce, manipulate or mislead any independent auditor of the company's financial statements for the purpose of rendering the financial statements materially misleading.

[iv] Miscellaneous changes in the Securities Laws.

Sarbanes-Oxley also included several miscellaneous changes in the securities laws that were of great significance. Section 804 extends the applicable statute of limitations for securities fraud to the earlier of two years after discovery of the facts constituting the violation or five years after such violation and provides for federal administrative and court proceedings and remedies to protect whistleblower employees.

Section 307 required the Commission to adopt rules providing that attorneys who represent public companies are required to report evidence of a material violation of the securities laws or breach of a fiduciary duty or similar violation by the company or any agent of the company to the company's chief legal officer and chief executive officer. If there is not a proper response to the notification provided by legal counsel, the attorney is required to report this information to the audit committee of the board of directors. Similarly, section 501 of SOX required the Commission to adopt rules governing securities analysts' potential conflicts of interest.

[r] The Credit Rating Agency Reform Act of 2006.

The failures of Enron and WorldCom, which were catalysts for the passage of Sarbanes-Oxley highlighted the failure of the nation's credit rating organizations ("NRSRO's") to identify the companies financial weaknesses when rating debt securities. In 2006 Congress enacted the Credit Rating Agency Reform Act ("CRARA") n134 to provide the Commission with explicit statutory authority to register and regulate NRSRA, replacing an informal Commission practice based upon the issuance of a staff no-action letter. The practice of identifying NRSROs through staff no-action letters was criticized for its lack of transparency and for creating a barrier to entry for new or specialized entrants.

The Act added definitions to Section 3 of the Exchange Act, created a new Section 15E of the Exchange Act, and amended Section 17 of the Exchange Act. These new statutory provisions provided Commission rulemaking authority to establish a registration and regulatory program for credit rating agencies opting to have their credit ratings qualify for purposes of laws and rules using the term NRSRO. The Act required NRSRO's to register with the Commission, make public certain information to help persons assess their credibility, make and retain certain records, furnish the Commission with certain financial reports, implement policies to manage the handling of material non-public information and conflicts of interest, and abide by certain prohibitions against unfair, coercive, or abusive practices. Section 15E(c)(2) of the Act specifically directed that any Commission rules could not "regulate the substance of credit ratings or the procedures or methodologies by which an NRSRO determines credit ratings" n135

NRSRO's that previously had received staff no-action letters were prohibited from continuing to rely on the letter following the effective date of Commission implementing regulations. n136

FOOTNOTES:

(n1)Footnote 1. The Securities Exchange Act of 1934 is contained in **15 U.S.C. Section 78a et seq.** The Securities Exchange Act of 1934 is reprinted in the Securities Primary Law Sourcebook, Volume B, Section F.

The references in this work are to Sections of the 1934 Act, not to Sections of 15 U.S.C.

(n2)Footnote 2. For discussion of the objectives and scope of the Securities Act of 1933, see Federal Securities Act of 1933 § 1.02 (Matthew Bender).

(n3)Footnote 3. See Levinson, *The Role of the SEC as a Consumer Protection Agency*, 27 *Bus. Law.* 61, 63-64 (1971):

The dominant purpose of the Securities Exchange Act of 1934 is, as you know, disclosure of current information on the securities of publicly held companies and the regulation of broker-dealers and the public trading markets in which they operate. In contrast to the 1933 Act's theory of registering only the actual quantity of securities proposed to be offered, the 1934 Act contemplates registration of an entire class of securities as when registering on an exchange. Moreover, unlike the requirements of the 1933 Act which are potentially applicable to any company but only on the occasion of a public offering, the disclosure requirements of the 1934 Act are applicable only to those with securities listed and traded on an exchange or over-the-counter securities held by at least 500 persons and having at least 1 [now 10] million dollars in assets--but on a continuous basis. The importance of the trading markets in this country has grown substantially in the last two decades and with such growth has come an increasing Commission emphasis on the disclosure in periodic reports in terms of quality, frequency and availability. Material information periodically and currently provided regarding a company's affairs, both corporate and financial, is of the utmost importance when we consider the enormous increase in the size of the investing public...

(n4)Footnote 4. For a brief discussion of all the amendments to the Exchange Act beginning in 1964, see § 1.01[2][a]-[k] *infra*.

(n5)Footnote 5. The Foreign Corrupt Practices Act also prohibits domestic concerns not subject to the jurisdiction of the SEC from paying bribes to foreign officials, see §§ 1.01[2][e][i], 9.05[1] *infra*.

(n6)Footnote 6. 1 Loss & Seligman, *Securities Regulation* 3 (3d Ed. 1989)

(n7)Footnote 7. For a definitive account of state securities regulation, see *Blue Sky Regulation* (Matthew Bender).

See also Loss & Cowett, *Blue Sky Law* (1958); 1 Loss & Seligman, *n. 6 supra*, pp. 41, 148-152.

Even in the absence of specific legislation on the federal level, some securities frauds were prosecuted under the federal mail fraud statute. See *United States v. Maze*, 414 U.S. 395, 94 S. Ct. 645, 38 L. Ed.2d 603 (1974) .

For discussion of criminal prosecutions, see § 9.04 *infra*.

(n8)Footnote 8. See Federal Securities Exchange Act of 1934, A.A. Sommer, Jr., General Editor, (Matthew Bender). *Historical Development of the S.E.C.--The Government View*, 28 Geo. Wash. L. Rev. 6, 8 (1959):

It is difficult to evaluate the effect of the blue-sky laws. Certainly, strict fraud legislation, such as that adopted by Kansas, was successful in preserving the savings of many investors. For instance, in the first eighteen months under the Kansas statute only 100 out of 1500 companies which applied for clearance to issue securities were given such licenses. It was estimated that 75 percent of the offerings were potentially fraudulent and that half of the remaining proposed offerings were dangerously speculative. On the other hand, it is perfectly clear that the state regulatory scheme was ineffective to cope with the overall situation. The period in which there was no federal legislation, but when almost every state had some form of blue-sky law, has been described as, "an era in which disclosures in financial circles had shaken public confidence to its very foundation, and in which a considerable number of issues were found to have grossly misrepresented values and concealed essential facts--often in fraudulent or criminal transactions." The local statutes were inadequate not only because of the wide variations between states in their approach to securities regulation, but also because, with the growth of large corporate enterprises, state lines were coming to be of little importance, and state authorities were unable to cope with the dextrous interstate activities of promoters and manipulators. (Footnote omitted.)

To prevent evasion of state securities laws, it was originally proposed that the bill which became the Securities Act of 1933 contain a provision prohibiting a person from selling securities within a state from outside its boundaries if the sale would be a violation of the state's securities laws had it taken place wholly within its boundaries. H.R. Report No. 85, 73d Cong., 1st Sess. pp. 10, 11. That provision was not contained in the Senate bill and was eliminated by the Committee of Conference. H.R. Report No. 152, 73d Cong., 1st Sess. However, many states and the Uniform Securities Act take this approach. See *Blue Sky Regulation* (Matthew Bender).

(n9)Footnote 9. Actually, a subcommittee of the Senate Banking and Currency Committee to which Mr. Ferdinand Pecora (later a Commissioner on the SEC and Justice of the New York Supreme Court) was appointed counsel.

(n10)Footnote 10. Loomis, *The Securities Exchange Act of 1934*, 28 Geo. Wash. L. Rev. 214, 217 (1959):

The final report of the Committee pointed out that between September 1, 1929 and July 1, 1932, the total market value of stocks listed on the New York Stock Exchange dropped from approximately \$89 billion to approximately \$15 billion, a decrease of \$74 billion, or 83 percent. The report describes certain abuses in the securities markets to which it attributes a considerable share of the responsibility for the financial disaster of 1929. Primary among these was the excessive use of credit in the stock market resulting in speculation on small margins and the sale of securities on a mass scale to meet margin calls upon any decline in the market. Another matter considered in the report was the extensive manipulation of prices on the exchanges by pools, options, and particularly the participation in such pool operations by issuers and their management and short-swing trading by officers and directors in the stock of their own

companies, often on the basis of inside information. The report discussed the failure of listed corporations to provide adequate information as well as defects in the operation of the market itself. These are the principal problems with which the Exchange Act was designed to deal.

The Report of the Pecora Committee, S. Rep. No. 1455, 73rd Cong., 2d Sess. (1934), entitled "Stock Exchange Practices," is reprinted in the Securities Primary Law Sourcebook, Volume C, Section I of the 1934 Act.

(n11)Footnote 11. The Exchange Act reporting requirements are discussed in ch.4 *infra*.

(n12)Footnote 12. Regulation of proxies under Section 14 is discussed in ch.7 *infra*.

(n13)Footnote 13. Regulation of tender offers is discussed in § 7A.03 *infra*.

(n14)Footnote 14. Insider trading restrictions pursuant to Section 16 of the 1934 Act are discussed in ch.8 *infra*.

(n15)Footnote 15. For discussion of registration of exchanges and of securities associations, see § 2.02 *infra*.

(n16)Footnote 16. Exchange self-regulation and Commission oversight of exchanges and securities associations are discussed in § 2.03 *infra*.

See also § 4.01[6] *infra* for discussion of Commission authority to summarily suspend trading in a nonexempt security for up to 10 days in the over-the-counter market or on a national securities exchange.

(n17)Footnote 17. Registration of brokers and dealers is discussed in § 3.03[1],[2] *infra*.

(n18)Footnote 18. Post-registration record keeping requirements pursuant to Section 17(a)(1) are discussed in § 3.04[1] *infra*.

(n19)Footnote 19. Net capital requirements pursuant to Rule 15c3-1 are discussed in § 3.03[4] *infra*. The rules under the Securities Exchange Act of 1934 are reprinted in the Securities Primary Law Sourcebook, Volume B, Section G.

(n20)Footnote 20. Self-regulation has principally taken the form of the Financial Regulatory Agency, FINRA, which was created through a merger of the self-regulatory units of the NASD and the New York Stock Exchange, discussed in § 3.05 *infra*.

(n21)Footnote 21. Regulation of broker-dealer market activities is discussed in § 6.02 *infra*.

(n22)Footnote 22. Liability under *Rule 10b-5* is discussed in § 5.04 *infra*.

(n25)Footnote 25. 15 U.S.C. 78d-2

(n26)Footnote 26. The asset test has always been applied to total rather than net assets.

(n27)Footnote 27. Section 3(a)(2) of the 1933 Act exempts any security issued or guaranteed by a bank from the registration and prospectus delivery requirements of Section 5 of that Act. Section 3(a)(2) also defines the term "bank" for purposes of the exemption, see Federal Securities Act of 1933 § 3.03 (Matthew Bender).

(n28)Footnote 28. Bank Holding companies would be subject to SEC regulation.

(n29)Footnote 29. See Securities Acts Amendments of 1964, H.R. Rep. No. 1418, 88th Cong., 2d Sess. (1964), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I of the 1934 Act.

See also Depository Institutions--Insurance Act, P.L. 93-495, 88 Stat. 1500 (Act of October 28, 1974), § 105(b) which transferred responsibility for the regulation of securities issued by institutions insured by the Federal Savings and Loan Insurance Corporation from the SEC to the Federal Home Loan Bank Board.

Commission administration and enforcement of the 1934 Act are discussed in ch.9 *infra*.

(n30)Footnote 30. See Securities Acts Amendments of 1964, P.L. No. 88-467, 78 Stat. 565, Sec. 3(c) (Act of August 20, 1964.)

See also H.R. Rep. No. 1418, n.28 *supra*, at 5-681.

The insider trading restrictions of Section 16 of the Exchange Act are discussed in ch.8 *infra*.

A new subparagraph (H) was added to subsection 12(g)(2) by Sec. 28(c) of the Investment Company Amendments Act of 1970, P.L. 91-547, 84 Stat. 1413 (Act of December 14, 1970). New Section 12(g)(2)(H) exempted from the registration requirements of Section 12(g) any interest or participation in any collective trust fund maintained by a bank or in a separate account maintained by an insurance company. The interest or participation must be issued with respect to an employer benefit plan that meets the requirements for qualification under **Section 401 of the Internal Revenue Code** or an annuity plan meeting the requirements for deduction of the employer's contribution under **Section 404(a)(2) of the I.R.C.**

The exemptions from registration under Section 12(g)(2) are discussed in § 4.01[2][a][iv] *infra*.

(n31)Footnote 31. Section 15(c)(4) proceedings have become moribund following the creation of cease and desist proceedings in the Remedies Act of 1990.

(n32)Footnote 32. S. Rep. No. 550, 90th Cong., 1st Sess. (1967) and H.R. Rep. No. 1711, 90th Cong., 2d Sess. (1968), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I of the 1934 Act.

Until 1968, obtaining control of a corporation by means of a tender offer or other type of stock purchase was not specifically regulated under the federal securities laws. However, *Rule 10b-5* promulgated in 1943, prohibited fraud in the purchase or sale of any security, including purchases made to acquire corporate control. *Rule 10b-5* is discussed in § 5.05 *infra*.

Proxy regulation under Section 14 is discussed in ch.7 *infra*.

(n33)Footnote 33. P.L. 90-439, **82 Stat. 454** (Act of July 29, 1968).

(n34)Footnote 34. For detailed discussion of the provisions of the Williams Act, see ch.7A *infra*.

The Commission's Institutional Investor Study Report was issued in March 1971 as H.R. Doc. No. 64, 92d Cong., 1st Sess. (1971) (8 volumes).

(n35)Footnote 35. Investor Protection Act, P.L. 91-567, **84 Stat. 1497** (Act of December 22, 1970).

The Investor Protection Act did not disturb the decision reached by Congress in 1964 to leave periodic reporting, proxy solicitation, and regulation of insider trading with respect to securities of insurance companies to the appropriate state authorities. However, because most tender offers are nationwide and, prior to 1970, were not regulated by state

insurance commissions, it appeared appropriate to bring tender offers for securities of insurance companies within the purview of Sections 13(d) and 14(d). *See* Memorandum of the Securities and Exchange Commission on S. 3431, which became P.L. 94-567, 3 U.S.C.C. & A.N. 5031-5034 (1970).

(n36)Footnote 36. Prior to the amendment, the disclosure provisions applied only to acquisitions and tender offers of over 10 per cent. Secs. 1(a)(2), 3(2), P.L. 91-567, 84 Stat. 1497 (Act of December 22, 1970); S. Rep. No. 91-1125, 91st Cong., 2d Sess. (1970). *See* § 7A.01 n.11 and related text *infra*.

(n37)Footnote 37. S. Rep. No. 91-1125, 91st Cong., 2d Sess. (1970); H.R. Rep. No. 91-1655, 91st Cong., 2d Sess. (1970).

(n38)Footnote 38. Section 14(e) is discussed in § 7A.03[3] *infra*.

(n83)Footnote 83. H.R. Rep. No. 96-1321 Part I, 96th Cong., 2d Sess. 2 (1980).

(n84)Footnote 84. P.L. 96-477, **94 Stat. 2275** (Act of October 21, 1980).

The amendment to Section 3(a)(12) is in Sec. 702, Title VII--Employee Benefit Plan Exemptions, P.L. 96-477, **94 Stat. 2295**.

Section 3(a)(12) and the rules adopted pursuant thereto are discussed in § 4.01 n.3 *infra*.

Section 3(a)(12) had been amended twice in 1970 by:

(1) Sec. 401(b) of the Employment Security Amendments of 1970, P.L. 91-373, **84 Stat. 695** (Act of August 10, 1970) to provide, in effect, that industrial development bonds, the interest on which is excluded from gross income under **Section 103 of the Internal Revenue Code of 1954**, are to be exempt securities. Industrial development bonds are discussed in § 4.01 n.3 *infra*.

(2) Sec. 28(a) of the Investment Company Amendments Act of 1970, P.L. 91-547, 84 Stat. 1413 (Act of December 14, 1970) to expand the definition of the term "exempted securities" to include interest or participations in certain bank common trust funds, certain bank collective funds, and certain insurance company separate accounts. As with other securities exempted under Section 3(a)(12), the amendment did not exempt broker-dealers dealing in such interests or participations from Section 15(c) antifraud and antimanipulation liability or Section 10(b) liability.

The Investment Company Act Amendments of 1970, Sec. 28(b), P.L. 91-547, 84 Stat. 1413 (Act of December 14, 1970) also added a new Section 3(a)(19) to the Exchange Act providing that the terms "investment company," "affiliated person," "insurance company," and "separate account" have the same meaning as those terms are defined in the Investment Company Act (15 U.S.C. § 80a-1 *et seq.*).

(n85)Footnote 85. Contracts issued in connection with tax-deferred annuity loans defined in *Section 403(b) of the Internal Revenue Code*, which are adopted primarily by public school systems and departments of education, however, are excluded from the exemption and must be registered under the Exchange Act, unless some other exemption is available. Memorandum of the SEC on S. 2975, reprinted in 126 Congressional Record S 13465, 13466 (September 25, 1980). This codifies a prior Commission staff interpretation regarding the Securities Act Section 3(a)(2) exemption. *Sec. Act. Rel. No. 34-6281, Fed. Sec. L. Rep. (CCH) P 1052* (1981).

(n86)Footnote 86. This codifies a prior staff interpretation of identical language in the Securities Act Section 3(a)(2) exemption. *Sec. Act Rel. No. 34-6281, Fed. Sec. L. Rep. (CCH) P 1051* (1980) for a summary of the staff's position.

(n100)Footnote 100. As amended by ITSFEA, Section 21 (a)(2) of the Exchange Act provides that the Commission may give investigatory assistance to a "foreign securities authority" which requests such assistance, regardless of "whether the facts stated in the request would also constitute a violation of the laws of the United States."

(n101)Footnote 101. Section 7(b) of ITSFEA requires the SEC, subject to the availability of appropriated funds, to "make a study and investigation of the adequacy of the Federal securities laws... for the protection of the public interest and the interests of investors." No money has ever been appropriated for the study.

(n102)Footnote 102. P.L. 101-429, 104 Stat. 931 (Act of October 15, 1990).

(n105)Footnote 105. SERPSRA added section 7(b) to the Securities Act which provided the Commission with broad authority to require blank check companies to notify investors at the time of acquisition of an operating company and provide investors with a right of rescission and restricting the use of offering proceeds until disclosure of the proposed acquisition.

(n106)Footnote 106. H.R. Rep. No. 616, 101st Cong., 2d Sess. 13 (1990).

(n107)Footnote 107. The person can be barred from service as an officer or director "if [his or her] conduct demonstrates substantial unfitness to serve" in such a capacity.

(n108)Footnote 108. Section 21(d)(3) also authorizes the imposition of a civil penalty on any person who violated a cease-and-desist order entered by the Commission under Section 21C. It does not authorize the imposition of a civil penalty on a person for engaging in insider trading that is subject to a penalty under Section 21A.

The potential amount of the civil penalty increases with the seriousness of the violation, up to a maximum of the greater of (1) \$100,000 for a natural person or \$500,000 for any other person, or (2) the gross amount of the defendant's pecuniary gain.

(n109)Footnote 109. Section 21B also allows the Commission to assess a monetary penalty, ranging up to \$100,000 for an individual or \$500,000 for an entity, against a regulated person who "willfully aided, abetted, counseled, commanded, induced, or procured" a violation of the securities laws by another person, or who willfully made false or misleading statements in any application or report filed with the Commission or a similar regulatory agency.

(n110)Footnote 110. Besides entering a cease-and-desist order, the Commission may "enter an order requiring accounting and disgorgement, including reasonable interest."

(n111)Footnote 111. *15 U.S.C. § 78u-3(b)(1)*. Since the law was enacted the Commission has brought just one temporary cease and desist proceeding. See *In the Matter of A.R. Baron*, Proceeding 3-9010. Release No. 34-37240 / May 23, 1996. The Division of Enforcement's experience in this proceeding apparently persuaded them that it was easier and faster to obtain a TRO from a Federal Judge.

(n112)Footnote 112. H.R. Rep. No. 617, 101st Cong., 2d Sess. 7 (1990).

(n113)Footnote 113. The term "penny stock" is defined in Section 3(a)(51) of the Exchange Act. In common parlance, "[p]enny stocks are low-priced, highly speculative stocks generally sold in the over-the-counter (OTC) market and generally not listed on an exchange." H.R. Rep. No. 617, 101st Cong., 2d Sess. 8 (1990).

(n114)Footnote 114. FINRA, the successor to the NASD self-regulatory program subsequently created an internet system enabling the public to access the disciplinary history or registered persons. This is available on the FINRA website at <http://www.finra.org/InvestorInformation/InvestorProtection/ChecktheBackgroundofYourInvestmentProfessional/index.htm>

(n115)Footnote 115. *17 C.F.R. § 240.15g-2*

(n116)Footnote 116. *17 C.F.R. § 240.15g-3*

(n117)Footnote 117. 17 C.F.R. § 240.15g-4

(n118)Footnote 118. H.R. Rep. No. 524, 101st Cong., 2d Sess. 8 (1990).

(n119)Footnote 119. Before the Commission may take this extraordinary action, it must "notifies the President of its decision and the President notifies the Commission that the President does not disapprove of such decision. If the actions described in subparagraph (A) or (B) involve a security futures product, the Commission shall consult with and consider the views of the Commodity Futures Trading Commission." Before the Marke Reform Act, only the President had the authority to suspend trading on an exchange.

(n120)Footnote 120. The Commission's authority in an emergency is extremely broad. "The Commission, in an emergency, may by order summarily take such action to alter, supplement, suspend, or impose requirements or restrictions with respect to any matter or action subject to regulation by the Commission or a self-regulatory organization under the securities laws, as the Commission determines is necessary in the public interest and for the protection of investors." 17 U.S.C. § 78l(k)(2). The Commissio relied pon this authority when it responded to the emergency of September 11, 2001. See SECURITIES EXCHANGE ACT OF 1934 ☐ RELEASE NO. 44791 / September 14, 2001.

(n121)Footnote 121. Section 13(h)(8) of the Exchange Act defines a "large trader" as a person who "effects transactions for the purchase or sale of any publicly traded security or securities ... in an aggregate amount equal to or in excess of the identifying activity level." The same section defines "the identifying activity level" to mean "transactions in publicly traded securities at or above a level of volume, fair market value, or exercise value as shall be fixed from time to time by the Commission."

(n122)Footnote 122. 15 U.S.C. § 78u(a)(2).

CHAPTER 1 The Securities Exchange Act of 1934 and the SEC *

1-1 Federal Securities Exchange Act of 1934 § 1.02

§ 1.02 The Securities and Exchange Commission

[1] THE SEC

The Exchange Act is administered by the Securities and Exchange Commission. n1 The Commission consists of five members, no more than three of whom may belong to the same political party. Members are appointed by the President, with the advice and consent of the Senate, for five-year terms, one term ending each year. The President designates the Chairman of the Commission.

When Congress created the SEC, with the enactment of the Exchange Act, it transferred to the Commission the administration of the Securities Act of 1933, formerly administered by the Federal Trade Commission. Subsequent laws assigned to the Commission for administration include the Public Utility Holding Company Act of 1935 (repealed in 2005), the Trust Indenture Act of 1939, the Investment Company Act of 1940, and the Investment Advisors Act of 1940. In addition, the Commission serves as advisor to federal courts in corporate reorganization proceedings under Chapter 11 of the Bankruptcy Code.

[a] Commission Decision-Making

The Commission acts officially by a majority vote of a quorum of Commissioners. The Commission's rules provide that "a quorum of the Commission shall consist of three members; provided, however, that if the number of Commissioners in office is less than three, a quorum shall consist of the number of members in office." n2 If fewer than three Commissioners may participate, due to recusals, then the quorum is two. If only one Commissioner is eligible to vote, emergency actions may be taken by one Commissioner through the duty officer procedure. Each week, one Commissioner, other than the Chairman, is designated the duty officer. If, in the duty officer's opinion, "action is required to be taken which, by reason of its urgency, cannot practicably be scheduled for consideration at a Commission meeting" the duty officer is delegated to take action on behalf of the full Commission. n3 All duty officer actions are reported to the Commission's Secretary and are circulated to the other Commissioners eligible to vote for ratification.

The full Commission typically meets weekly to consider staff recommendations for action. These meetings are governed by the Government in the Sunshine Act n4 which requires that all Commission meetings must be conducted publicly, after advance notice of the agenda, unless the subject of the meeting fits into one of a series of exemptions. While the Sunshine Act establishes a presumption that Commission meetings will be public, in fact most Commission meetings are non-public. This is because the majority of the actions considered by the Commission pertain to

recommendations for action submitted by the Division of Enforcement, and are thus exempt from the public meeting requirement. Public meetings are typically conducted when the Commission considers a recommendation to propose or adopt a regulation, or when the Commission hears an oral argument concerning an appeal of an initial decision from one of its administrative law judges.

The Commission also takes formal action on staff recommendations through its *seriatim* process. n5 When matters are routine in nature and do not require joint deliberation by the Commission, the staff may submit a written recommendation for *seriatim* action. Each Commissioner, beginning with the duty officer, reviews the matter and votes to approve or disapprove the recommendation. When all eligible Commissioners have voted, the action is final. Because the *seriatim* process is limited to routine matters not requiring joint deliberation, any one Commissioner is entitled to have the matter heard at a Commission meeting. This halts the *seriatim* process, even when a quorum of commissioners has already voted.

[b] Commission Delegations of Authority

While the Commission is the ultimate decisional authority, it never considers the overwhelming majority of final agency actions. The Commission has delegated decisional authority for these routine actions to its staff. Under section 4A of the Exchange Act, the Commission may delegate its authority to its staff to take any action, other than the proposal, adoption or amendment of a rule or regulation. However any action taken by the staff pursuant to delegated authority may be reviewed by the Commission, at the request of one Commissioner or if the action is appealed to the Commission by an aggrieved party. The Commission may decline to consider such appeals, except in certain limited areas when review is mandatory, as specified in section 4A. n6

The Commission has delegated a wide range of authority to its staff. These routine delegations of authority have been adopted as Commission rules. n7 After the Commission has voted to delegate authority to its staff, the Chairman then determines which persons or categories of persons within an office or division may act under delegated authority. Typically these "sub-delegations" are made to categories of persons defined by reference to a job title, such as assistant director or branch chief, or by specifying the salary grade level required to take action. The Commission may also delegate authority on specific actions to its staff by order, without adoption of a Commission rule. This has occurred infrequently, typically in the context of a delegation to the division of enforcement to settle pending litigation.

Similarly, most of the Commission's formal and informal advisory procedures are the responsibility of the staff. n8 These include issuance of: staff no-action letters; staff frequently asked questions documents, or FAQs; staff legal bulletins or accounting bulletins; or staff comment letters.

[2] Functional Responsibilities and Organization

The staff of the Commission is organized into four operating divisions and nineteen offices located in the Washington, DC headquarters. Eleven regional offices located throughout the United States work under the direction of the Division of Enforcement. Regional Office staff work in the enforcement program or work in the examination and inspection program of the Office of Compliance, Inspections and Examinations (OCIE).

The four operating divisions are organized along functional lines:

- The Division of Corporation Finance administers the regulation of financial reporting and disclosure and the standards regarding debt securities indentures under the Trust Indenture Act of 1939;
- The Division of Trading and Markets (formerly Market Regulation) is responsible for regulating securities exchanges, the securities industry and the over-the-counter market;

1-1 Federal Securities Exchange Act of 1934 § 1.02

- The Division of Enforcement investigates possible violations of the securities laws and, where appropriate, institutes administrative proceedings and injunctive actions; and
- The Division of Investment Management is responsible for the administration of the Investment Company Act of 1940 and the Investment Advisors Act of 1940

The nineteen offices of the Commission vary greatly in size and responsibilities. For example, the OCIE is one of the largest groups in the SEC, with more staff (if the regional office examination groups are included) than either the Division of Trading and Markets or the Division of Investment Management. The Office of General Counsel is the primary legal advisor to the Commission and the staff. It has broad responsibility in virtually every area of the Commission's responsibilities. The Office of the Chief Accountant is the primary voice for SEC accounting and auditing policy. Each of the remaining offices performs one or more essential functions at the SEC, as described below.

[Click here to view image.](#)

[a] Division of Corporation Finance.

The Division of Corporation Finance administers the Commission's full disclosure program, which regulates the information that public companies must provide to investors and the market. The division establishes financial disclosure requirements for public companies that offer securities publicly and that have securities traded in the U.S. It has primary responsibility for recommending Commission action on the proposal, adoption and amendment of regulations in these areas and for the interpretation of these regulations. It selectively reviews issuer filings to monitor compliance and, to the extent possible, detect fraudulent statements. With the exception of companies registered under the Investment Company Act of 1940, the Division develops Commission standards and examines issuer compliance with these standards in the following areas:

- business and financial disclosure standards for securities offered for public sale pursuant to the registration requirements of the Securities Act of 1933 or available exemptions;
- registration, reporting and disclosure standards for securities traded on national securities exchanges or required to be registered pursuant to Section 12(g) of the Exchange Act or whose issuers are required to file reports pursuant to Section 15(d) of that Act n9;
- disclosure and procedural standards in soliciting proxies for electing directors and other corporate actions n10;
- disclosure standards for reporting beneficial ownership and transaction statements pursuant to Sections 13(d), (e), and (g) and 16(a) of the Exchange Act;
- Disclosure standards and substantive and procedural obligations relating to tender offers; and
- Disclosure and reporting standards for compliance with the Trust Indenture Act of 1939 regarding indentures covering debt securities.

Organization of the Division of Corporation Finance

The Division is organized into two broad groups, Disclosure Operations and Disclosure Support. The Disclosure Operations Group consists of eleven offices. Each office is supervised by an Assistant Director and has the responsibility for reviewing disclosure documents filed by companies in specified industry categories:

- Health Care and Insurance
- Consumer Products
- Computers and On Line Services
- Natural Resources and Food
- Structured Finance, Transportation and Leisure
- Manufacturing and Construction
- Financial Services
- Real Estate and Business Services
- Beverage, Apparel and Health Care Services
- Electronics and Machinery
- Telecommunications

The Disclosure Support Group consists of ten offices responsible for legal, accounting and technical questions, drafting and interpreting regulations, responding to questions from the public and industry professionals, assisting the Disclosure Operations staff and setting disclosure policy for the Division. The ten offices are:

- Office of Chief Counsel
- Office of Chief Accountant
- Office of Rulemaking
- Office of Mergers and Acquisitions
- Office of International Corporate Finance
- Office of Small Business Policy
- Office of Enforcement Liaison
- Office of Disclosure Support
- Office of Global Risk Security
- Office of Information Technology

Functions performed by the Division of Corporation Finance Disclosure Review

The primary function of Corporation Finance is to oversee the filing and review of disclosure documents by public

companies. Approximately 15,000 companies file documents with the SEC. Even though roughly 75% of all Division staff work in Disclosure Operations, it is impossible for the staff to review every document that is filed with the SEC. Instead the Division utilizes a process of selective review to determine which documents will be scrutinized and the level of review that will be conducted.

Historically the Division has placed the highest priority on reviewing documents from new registrants (typically companies engaged in an initial public offering, or IPO), third party tender offers, contested solicitations for shareholder proxies, going-private transactions and filings by small business companies. Beginning in 2002 the Division introduced a new policy of reviewing the 1000 public companies with the largest market capitalization on a three-year cycle. This informal experiment was expanded to create a three-year review cycle for all reporting companies and codified into law in the Sarbanes-Oxley Law in 2002. n11 Each Disclosure Operations industry group selects other company disclosure documents, based upon a series of screening criteria. There are three levels of review -- Full review, financial statement only review, and monitor. Occasionally the Division will conduct a systematic review of a large number of companies and focus on a specific area of disclosure. For example, in 2007, the Division conducted a broad review of company disclosure required by amended regulations on executive compensation.

When a securities registration statement filed under the Securities Act of 1933 is reviewed, the staff will typically send a series of questions to the company concerning areas in which accounting or disclosure requirements are incomplete, unclear, inconsistent or require clarification. The registrant must respond to these questions and it may be necessary that to file an amended document. The Division's goal is to send this letter within 30 days after the registration statement has been filed. Traditionally these comment letters were not disclosed to the public except in response to a Freedom of Information Act request. Beginning in 2005, the SEC revised this policy and it now posts comment letters on the EDGAR database no later than 45 days after the registration statement is declared effective. n12

While there is no comparable deadline for the registrant to respond to these questions, the staff will not declare a registration statement effective until a satisfactory response has been submitted. Authority to declare a registration statement effective has been delegated to the Division of Corporation Finance and sub-delegated to the Assistant Director responsible for the relevant industry group n13.

In instances when a filing does not meet basic technical requirements (e.g., if it has missing or unaudited financial statements) or is so carelessly prepared that it is unintelligible, the staff can issue a "bedbug" letter. A bedbug letter notifies the registrant that the staff will not review the filing until it meets the technical requirements of the form and/or is comprehensible. Such letters can identify major categories of deficiencies.

The disclosure review process for periodic filings, such as annual reports on Form 10-K, is different. Because these documents do not require SEC action to be effective, the staff cannot require companies to correct or revise the contents. Instead the staff will send its comments in a letter and request the issuer to address its concerns in a subsequent periodic filing. If the disclosure review identifies problems that may rise to a violation of SEC rules or represent fraud, the staff of the Division of Corporation Finance will refer the filing to the Division of Enforcement for investigation.

Functions of the Disclosure Support Offices

The *Office of Chief Counsel* provides legal advice to the Operations Groups to ensure uniform interpretations and applications of regulatory requirements. It also responds to questions and requests for interpretive guidance from registrants, professionals and the general public. The Office assists these groups by providing telephone responses to inquiries and by preparing no-action letters in response to technical legal or disclosure questions. When a request for a no-action letter is submitted, the staff has the discretion to decline to respond. Persons submitting a request may withdraw the request rather than receive a negative response. All no-action letters issued by the staff are made public, along with the incoming request, and are available on the SEC website. n14 The largest category of no-action letters

issued annually by the Division of Corporation Finance respond to companies seeking to exclude shareholder proposals from an annual proxy statement. n15 The office is responsible for granting or denying any application for confidential treatment of information filed with it pursuant to Section 24(b) and Rule 24b-2 of the 1934 Act, and for revoking requests previously granted. n16

The *Office of Chief Accountant* provides accounting advice to the Operations Group to ensure uniform treatment and application of accounting standards. It also responds to questions and requests for interpretive guidance from registrants, professionals and the general public. When a question involves significant, complex or original accounting issues, the Office solicits the views of the SEC Office of the Chief Accountant, the agency authority on accounting interpretations and policy.

The *Office of Rulemaking* is responsible for the drafting of SEC regulations pertaining to the SEC full disclosure program (excluding regulations under the Investment Company Act or Investment Adviser Act). While certain special categories of rulemaking are the responsibility of other Disclosure Support Offices, such as Mergers and Acquisitions and International Corporate Finance, the Office has overall responsibility for coordinating rulemaking activities within the Division and with the rulemaking activities performed by other Divisions of the Commission.

The *Office of Mergers and Acquisitions* is responsible for compliance with disclosure laws and regulations pertaining to mergers and acquisitions, tender offers, going-private transactions, proxy contests, and beneficial ownership reporting. The Office reviews all disclosure filings concerning these transactions, performs rulemaking and responds to questions or requests for interpretive guidance, exemptive orders, or no-action letters on these areas.

The *Office of International Corporate Finance* is responsible for disclosure compliance by foreign companies planning to register in the U.S. It provides informal assistance to foreign companies prior to filing with the SEC, reviews foreign company disclosure filings jointly with the Disclosure Operations Group, performs rulemaking and responds to questions or requests for interpretive guidance, exemptive orders, or no-action letters from foreign companies.

The *Office of Small Business Policy* is responsible for disclosure compliance by small public companies and SEC disclosure and securities offering regulations pertaining to limited, private, and intrastate offerings of securities, and offerings of securities by shell companies and blank check companies. The Office reviews disclosure filings from small public companies, performs rulemaking and responds to questions or requests for interpretive guidance, exemptive orders, or no-action letters in these areas.

The *Office of Enforcement Liaison* provides legal analysis and interpretive assistance to the Division of Enforcement on investigations or litigation involving violations of SEC full disclosure regulations. The Office reviews all Enforcement recommendations submitted to the Commission for action and provides advice to the Commissioners and their staff on these recommendations.

The *Office of Disclosure Support* is responsible for administrative functions of the Division and for records management and control.

The *Office of Global Risk Security* was created 2007 at the direction of Congress to work closely with Disclosure Operations staff to monitor whether the documents public companies file with the SEC include disclosure of material information regarding global security risk-related issues.

The *Office of Information Technology* is responsible for assisting issuers and the public filing documents electronically on the SEC EDGAR computer system. It serves as the Division's liaison with the SEC Office of Information Technology, which manages the EDGAR system.

[b] Division of Trading and Markets.

The Division of Trading and Markets (formerly the division of Market Regulation) is responsible for supervising and regulating securities markets pursuant to the Securities Exchange Act of 1934 (Exchange Act). The division's mission is to maintain fair, honest, and efficient securities markets. It oversees exchanges, securities associations, securities self-regulatory organizations (SROs), brokers and dealers, clearing agencies, transfer agents, alternative trading systems, municipal securities dealers, the Municipal Securities Rulemaking Board, and securities information processors.

The Commission has delegated decisional authority to the Division in a wide range of areas pertaining to oversight of the securities markets and entities operating in these markets, including the authority to: publish for comment and to approve rule filings from the exchanges, SROs, and joint industry plans; approve or revoke broker-dealer registrations; grant or withdraw unlisted trading privileges in securities; and grant exemptive relief to broker-dealers under the capital adequacy rules or the registration requirements. n17

Organization and Functions of the Division of Trading and Markets

A Director and two Deputy Directors head the division, which is organized into five offices, each headed by one or more Associate Directors:

- Office of Market Supervision
- Office of Trading Practices and Processing
- Office of Broker/Dealer Finances
- Office of Chief Counsel.
- Office of Market Operations

Office of Market Supervision

The Office of Market Supervision ("OMS") is responsible for national market system policy regulation and oversight of the securities industry SROs. Its principal duty is the review and approval of all SRO rule filings, as required by Section 19(b) of the Exchange Act. n18 These rules range from non-controversial fee filings, which are effective upon filing with the SEC, to significant market structure initiatives. In addition, the office has responsibility for regulation and oversight of alternative trading systems and electronic communications networks and for the review of applications for registration of exchanges. These market participants are hybrids, combining some features of exchanges with some features of broker-dealers. The office is also responsible for reviewing applications for registration, many of the rulemaking and interpretive issues related to securities futures and is the principal liaison to the Commodity Futures Trading Commission.

The OMS also includes the Office of Municipal Securities, which oversees the activities of the Municipal Securities Rulemaking Board and provides interpretive guidance on SEC regulations pertaining to the offer and sale of municipal securities.

Section 19(b)(1) of the Exchange Act requires each SRO to file proposed rule changes with the Commission, accompanied by a concise general statement of the basis for, and purpose of, the proposed change. The rule filing process under the Exchange Act allows the Commission to ensure that SRO rules and practices are consistent with the Exchange Act and the goals of the national market system, including promotion of fair competition among markets, transparency of prices, best execution of customer orders, fair and orderly markets, and most importantly, investor

protection. SRO rules also must be designed to prevent fraudulent and manipulative acts and practices, and promote just and equitable principles of trade. Finally, the Exchange Act contains a public notice and comment procedure to ensure that interested persons have an opportunity to provide input into SRO actions that may have a significant impact on market participants and individual investors.

Office of Trading Practices and Processing

The Office of Trading Practices and Processing ("OTPP") is responsible for regulating secondary market trading, including institutional trading activities, and for securities market clearance and settlement operations. The Office also acts the division's liaison with the Division of Enforcement.

The OTPP administers numerous trading rules concerning trading during initial distributions of securities, broker-dealer publication of stock quotations, issuer repurchases, and certain tender offer practices. Because most of these rules are transaction-based and prophylactic, the office is responsible for providing no-action, exemptive, or interpretive guidance to industry professionals. This often requires close coordination with the Division of Corporation Finance on underwriting activity, and staff regularly reviews issuer registration statements and other disclosure documents referred by Corporation Finance.

The Office also is responsible for oversight of the SROs operating the national system for the prompt and accurate clearance and settlement of securities transactions and for regulatory functions of securities transfer agents. The Depository Trust Company, the National Securities Clearing Corporation, the Options Clearing Corporation, and the Government Securities Clearing Corporation are SROs regulated by this office. Staff of this office review proposed rules and rule amendments ranging from non-controversial fee filings to major clearance and settlement initiatives. The process also is governed by section 19(b) of the Exchange Act. The office is also responsible for Commission rulemaking relating to clearance and settlement matters, as well as providing interpretive guidance and no-action relief.

Office of Broker/Dealer Finances

The Office of Broker/Dealer Finances is responsible for SEC customer protection rules, commonly referred to as the net capital rules, for the regulation and inspection of consolidated supervised entities ("CSEs"), for the regulation and registration of nationally recognized statistical rating agencies, and for the division's programs pertaining to prudential supervision and risk analysis.

The Office administers a comprehensive program that includes: drafting regulations, providing interpretive guidance, exemptive orders and no-action letters; and reviewing the largest broker/dealers' financial reports. The Commission's net capital rules govern all broker-dealers' financial responsibility to maintain adequate liquid capital reserves for the protection of customer assets, to create and maintain books and records, and to regularly report on the adequacy of these reserves. The group also oversees the Securities Industry Protection Corporation, the private company that ensures customer accounts against broker/dealer failures.

The Office is also responsible for regulation, oversight and inspection of a special category of certain broker-dealer holding companies on a consolidated basis, or "consolidated supervised entities." In this capacity, Commission supervision extends beyond the registered broker-dealer to the unregulated affiliates of the broker-dealer and the holding company itself. The office focuses on the financial and operational condition of the CSE to reduce the likelihood that weakness in the holding company or an unregulated affiliate endangers a regulated entity or the broader financial system. Like other consolidated supervisors overseeing internationally active institutions, the Commission requires CSEs to compute capital adequacy measures consistent with the Basel Standard. A broker-dealer becomes a CSE by applying for an exemption from the standard net capital rule, and the broker-dealer's ultimate holding company consenting to group-wide Commission supervision (if it does not already have a principal regulator). n19

This office is also responsible for implementing the Credit Rating Agency Reform Act of 2006, enacted on September 29, 2006. Under this act and the Commission's regulations, nationally recognized statistical rating organizations must apply for registration with the Commission. n20 To receive Commission approval, the rating agency must disclose in its application information to help persons assess its credibility; its procedures to manage the handling of material non-public information and conflicts of interest. The Commission has adopted rules on recordkeeping, financial reporting, and disclosure of conflicts of interest. n21 The registration process formalizes an informal SEC program through which rating agencies could obtain the nationally recognized designation via a division no-action letter.

Office of the Chief Counsel

The Office of Chief Counsel provides legal assistance to the division, other Commission divisions and offices, and Congress on a myriad of topics, including questions of what is a security and who is a broker. In addition, the office administers and interprets numerous rules that govern such diverse areas as customer transaction confirmations, the extension of credit on new issues, anti-money laundering, and the regulation of foreign broker-dealers with a U.S. presence. The office also works with the SROs on securities industry arbitration issues, and reviews requests by brokerage firms to employ someone who is barred from association, or "statutory disqualifications."

Office of Market Operations

The Office of Market Operations is responsible for the division's market surveillance and market continuity functions. In addition to real-time surveillance of secondary market operations, the office is responsible for the division's automation review program. This program was created in 1989 following completion of the division's study of the causes of the 1987 market decline. A Commission policy statement in November 1989 called for the SROs to establish voluntarily comprehensive planning and assessment programs. These assessment programs were formed to determine systems capacity and perform periodic stress testing of these systems and obtain annual independent assessments of their systems' capacity and future capacity requirements, as well as the adequacy of protection against physical threats. In 1991, the Commission issued a second statement that provided additional guidance on the independent review process and created a voluntary process for SROs to provide reports to the SEC.

[c] Division of Enforcement.

The Division of Enforcement is responsible for investigating possible violations of all laws administered by the Commission and conducting all enforcement actions brought by the SEC, either in civil litigation in Federal court or in administrative proceedings heard by an administrative law judge. n22 The Director of the Division has supervisory responsibility over the Commission's eleven regional offices in which more than half of all SEC enforcement staff is resident.

Because the SEC has only civil enforcement authority, the Division works closely with the Department of Justice when investigations uncover misconduct that warrants a criminal prosecution. The Division also coordinates its investigations with foreign regulatory authorities when misconduct involves persons or activities that occurred in another country. The Division is authorized to use its investigative powers to assist a foreign regulator in its investigations if the foreign regulator has an agreement with the SEC to provide reciprocal assistance. n23

While enforcement of the Federal securities laws involves a wide range of misconduct, the majority of enforcement actions fall into one of five categories: (1) issuer financial reporting, (2) unregistered securities offerings, (3) broker-dealer violations, (4) insider trading, and (5) market manipulations.

In addition, the Division brings subpoena enforcement proceedings to demand compliance with its investigative subpoenas and institutes follow-up civil contempt cases if a party has failed to comply with an injunction or other court order. On occasion the Department may request that the Department of Justice commence a criminal contempt action to

compel a party to obey a court order or subpoena. n24

In civil actions, the Commission seeks injunctions, civil money penalties, and

the disgorgement of ill-gotten gains. A federal district court may also bar or suspend individuals from acting as corporate officers or directors.

Organization of the Division of Enforcement

With the inclusion of the enforcement staff of the Commission's regional offices, the Division of Enforcement is the largest unit of the SEC, approximately 1000 employees. The Director and two Deputy Directors manage the division. In the Washington "home office," there are:

- Four Investigative Groups, each supervised by Associate Directors
- Office of the Chief Counsel
- Division Trial Unit, headed by the Chief Litigation Counsel
- Office of the Chief Accountant
- Associate Director for Regional Office Coordination

The four Associate Directors each oversee 3-5 investigating groups. The Chief Counsel is responsible for coordinating Division policy, reviewing all activities of the regional office enforcement staff, supervising the division's administrative staff. The Chief Litigation Counsel supervises the division's litigators and the Chief Accountant supervises the Division's accounting staff. The Associate Director for Regional Offices manages the operation of the eleven regional offices.

The basic investigative unit within the Division is a branch of four attorneys supervised by a branch chief. The staff attorneys and the branch chief are primarily responsible for performing an investigation's core functions - including issuing subpoenas, taking testimony, reviewing documents, analyzing evidence, and preparing recommendations for action to the Commission. An Assistant Director supervises two or three branches. Each Associate Director supervises three or four Assistant Director groups.

One Associate Director group also includes the Office of Market Surveillance. The Office of Market Surveillance acts as the primary point of contact between the division and the surveillance operations of the various SROs.

The Office of Chief Counsel ("OCC") acts as direct liaison between the regional offices and the Commission. The OCC also provides guidance to division staff on legal issues and policy concerns. It researches, reports, and coordinates the tracking of the division's workload, manages budget and administrative staff, acts as ethics liaison for the division, reviews all Freedom of Information Act requests related to the division and oversees the process of closing investigations and archiving investigative files.

The Chief and Deputy Chief Litigation Counsels manage the Trial Unit, comprised of all litigators in the home office. After an investigation has been completed and the Commission has authorized an administrative proceeding or civil injunctive action, if the investigating attorneys do not negotiate a settlement, the matter is assigned to an attorney in the Trial unit who is responsible for litigation of the matter. This includes any appeal to the Commission of an administrative law judge's initial decision, but does not include the appeal of a Federal District judge's decision in a civil injunctive action.

All accountants in the home office report to the Chief Accountant, who oversees all accounting matters within the division. Accountants in the office are assigned to work with investigating attorneys on any investigation that entails technical questions about the application of generally accepted accounting principles ("GAAP") or generally accepted auditing standards, or possible accounting or auditing violations. The division's Chief Accountant also works closely with the Commission's Office of the Chief Accountant and the Chief Accountant in the Division of Corporation Finance ("Corp Fin") on accounting policy and technical issues.

The eleven regional offices have an enforcement staff that performs the same duties as the home office, investigating any matter they deem appropriate. Regional offices are not limited in the types of investigations they may conduct, and no explicit geographic limitations are placed on any particular office, although in practice, the majority of investigations done by the regional offices are within their geographic territory. The size of the regional offices varies greatly, with New York being the largest and Salt Lake the smallest.

Functions of the Division of Enforcement

The Commission has a broad mandate to investigate any matter of interest related to enforcement of the Federal securities laws. Within the division, any attorney may initiate an informal inquiry (with the approval of his or her immediate supervisor) and generally, the first attorney to identify the matter conducts any ensuing investigation. SEC investigations are considered non-public events and the SEC has a policy of neither confirming nor denying the existence of an investigation. *See § 1.03 infra.*

Upon completion of the investigation, if the staff believes that formal enforcement action should be recommended to the Commission, the parties to be named will be notified and provided an opportunity to make a written statement to the Commission explaining why the facts, circumstances or legal theories do not justify Commission enforcement action. This document is known as the "Wells statement." When persons or entities receive a "Wells notice," it is common for the party to engage in settlement negotiations with the staff. n25 If a settlement of the matter is negotiated, it will be submitted to the Commission at the same time as the recommendation for action. The Commission, in its discretion, may approve the recommended action and the recommended settlement, or it may approve the recommendation for action and reject the proposed settlement.

SEC Enforcement Actions

SEC enforcement may be brought as an injunctive action in U.S. Federal Court or as an administrative proceeding, heard by an administrative law judge. The choice of proceeding reflects a combination of factors, including the type and severity of the alleged violation and the person or entity to be charged. However, the most significant factor is the type of penalty or relief sought.

Injunctive actions

The SEC may bring civil injunctive actions in the proper Federal district court against any person who is "engaged or is about to engage in acts or practices constituting a violation" of the Federal securities laws, SEC regulations or the rules of any securities self-regulatory organization. n26 In addition to seeking the entry of an injunctive order prohibiting future violations of the applicable provisions of the law, the S.E.C. may seek: an order of disgorgement; an order barring the person from serving as an officer or director of a registered, public company; an order barring a person from participating in an offering of penny stock; or an order directing the payment of a civil money penalty. The SEC obtained the authority to obtain money penalties, officer and director bars and penny stock bars in 1990 when Congress enacted the Securities Enforcement Remedies and Penny Stock Reform Act of 1990 ("Remedies Act"). n27

Administrative Proceedings

Since the creation of the SEC, it has had the authority to bring administrative proceedings to address violations of the securities laws. The scope of its authority to bring an administrative proceeding and the sanctions that can be ordered in an administrative proceeding has grown dramatically over time.

The Remedies Act dramatically expanded the nature of SEC administrative proceedings. It authorized the Commission to enter a cease and desist order against any person who is violating, has violated, or is about to violate any provision of the securities laws or any rule or regulation thereunder.ⁿ²⁸ In a cease and desist proceeding the Commission can order a party to take steps to effect compliance with its rules, to provide an accounting and to disgorge profits gained or losses avoided. The Sarbanes-Oxley Act further expanded the remedies available in a cease and desist proceeding by authorizing the SEC to bar an individual from serving as an officer or director of a public company if they violated the antifraud provisions of the 1933 Act or Exchange Act.ⁿ²⁹ This Act also created a proceeding to enable the SEC to issue a temporary cease and desist order. While the Commission has used its cease and desist authority extensively, it has brought only one proceeding under its temporary cease and desist authority.ⁿ³⁰

The Remedies Act also expanded the remedies that the SEC can order in an administrative proceeding against broker-dealers, investment advisers, investment companies and persons associated with these registered entities. The SEC can order disgorgement and civil penalties comparable to those available in an injunctive action.ⁿ³¹

A third form of administrative proceeding is a proceeding to deny a person, temporarily or permanently, from appearing or practicing before the Commission as an attorney, accountant or other professional. While the Commission has brought "rule 102(e)" proceedings (until 1992 they were known as rule 2(e) proceedings) throughout its history, based upon rules adopted under its general rulemaking authority, its authority to take action against persons licensed to practice by applicable state authorities was periodically questioned and challenged. Any uncertainty over this authority was eliminated by section 602 of the Sarbanes-Oxley Act, which added section 4C to the Exchange Act, incorporating the Commission's rule 102(e). While the Commission may initiate a proceeding under this provision against an attorney, an accountant, or other professional such as an engineer or geologist, the Commission's Office of General Counsel litigates such proceedings if the professional named is an attorney.

All administrative proceedings are heard by an administrative law judge (ALJ). Administrative law judges operate in a quasi-autonomous status. The SEC hires ALJs from a list of eligible candidates determined by the U.S. Office of Personnel Management and is obligated to pay the ALJ's salary and provide office and support services. To ensure the independence of the administrative process, once hired, the SEC has no authority to promote, reward or discipline an ALJ. After the institution of an administrative proceeding, the Chief Administrative Law Judge assigns it to one of the ALJs. The ALJ presides over the administrative hearing, taking testimony, reviewing briefs and issuing an initial decision containing findings of fact, conclusions of law and, if violations have been found, a proposed sanction. All ALJ initial decisions are appealable to the Commission, which conducts a *de novo* review. An initial decision is not final until the Commission has completed its review and issued its opinion and order, or if not appealed, until the Commission issues a finality order.

Other enforcement proceedings

Under section 12(k) of the Exchange Act, the Commission may issue an order suspending trading in a security for a period of up to ten business days if it finds that "the public interest and the protection of investors so require."ⁿ³² A trading suspension order takes effect at a day and time specified by the Commission in the order, typically the beginning of trading on the day of issuance. No hearing is required prior to the order's effectiveness. The Commission often issues a trading suspension in a security when it identifies an ongoing market manipulation. Frequently at the expiration of the trading suspension, secondary market trading will not resume in the stock, as the commission may have succeeded in obtaining a temporary restraining order against the perpetrators of the fraud or because market makers in the security are unable to satisfy the current information requirements of Exchange Act rule 15c2-11.

Prior to 1978, the SEC frequently would issue a new trading suspension order at the expiration of the ten-day period. This practice was discontinued following the Supreme Court's decision in *SEC v. Sloan*.ⁿ³³ The Commission has on rare occasions issued a second trading suspension against a security when it found a new factual basis for suspending trading.ⁿ³⁴

Occasionally, the Commission will decline to bring a formal enforcement action and will, instead, issue a report of its investigation under section 21(a) of the Exchange Act.ⁿ³⁵ These administrative orders describe the results of the staff's investigation and articulate the Commission's interpretation of applicable law to the conduct. The Commission often issues these reports in circumstances when it believes that a violation of the law has occurred but that the legal theory supporting its conclusion is novel or untested. The purpose of the report is to advise the public and the industry of the Commission's views and provide guidance. These reports are normally issued with the consent of the parties identified in the order.ⁿ³⁶

Criminal Enforcement Actions

The SEC enforcement authority is limited to civil actions. When conduct is sufficiently egregious it may warrant criminal prosecution by the Department of Justice; frequently through the Office of the U.S. Attorney for the Southern District of New York. The Division of Enforcement actively coordinates its investigations with criminal authorities. In some cases this is done at the beginning of the investigation, with the criminal authorities using the powers of a Federal Grand Jury to obtain testimony and evidence. In other instances, the division will complete its investigation and provide the appropriate criminal prosecutor with access to the investigative record compiled by the division. In exceptional circumstances, the Commission may formally vote to refer a matter for criminal prosecution.ⁿ³⁷

[d] Division of Investment Management.

The Division of Investment Management ("IM")ⁿ³⁸ has primary responsibility for SEC regulation under the Investment Company Act of 1940 and the Investment Advisers Act of 1940. It regulates investment companies, investment advisers, and variable insurance products. IM is responsible for the application of the disclosure reporting requirements of the Securities Act and Exchange Act to investment companies and reviewing disclosure documents filed by these entities, such as mutual fund prospectuses. It also has delegated authority in a wide range of activities, such as declaring mutual fund prospectuses effective and responsibility for considering and providing exemptive relief to regulated companies and individuals as permitted under the Investment Company Act.ⁿ³⁹

Organization and functions of the Division of Investment Management

A Director and Deputy Director head the division, which is organized into five groups, each headed by an Associate Director. Each of these groups has several offices, headed by one or more Assistant Directors. The organization generally is structured along functional lines:

- The Office of Investment Company Regulation
- The Office of the Chief Counsel
- The Office of Disclosure and Review
- The Office of Investment Adviser Regulation
- The Office of Insurance Products

- The Office of Regulatory Policy
- The Office of Disclosure Regulation

Office of Investment Company Regulation

The Office of Investment Company Regulation reviews and grants applications for exemptive orders. It also responds to requests for no-action positions and interpretive advice concerning previously issued exemptive orders. The Investment Company Act provides the SEC with broad authority to grant exemptions from compliance with specific provisions in the law. n40 Through exemptive relief, the SEC has responded flexibly to innovations in the mutual fund industry; such as the creation of money market funds and exchange-traded funds. Exemptive orders have dealt with a wide variety of issues, from complex trading vehicles that do not necessarily fit within the regulatory parameters of the Investment Company Act, to new sales and distribution practices in the mutual fund industry, as well as relatively minor operational matters affecting investment companies. Although most applications are "filed" with the Commission, amendments to these applications may be submitted in draft form. Once the staff has completed its review of an application, the Investment Company Act requires the Commission to publish a notice in the Federal Register outlining the requested relief and giving interested persons an opportunity to object to the application and request a hearing. The notice provides extensive information about the relief requested and the conditions for the exemptive relief. After a notice period of approximately 25 days, an order is issued granting the requested relief, unless a hearing is requested by an interested party or is ordered by the Commission on its own motion.

Office of the Chief Counsel

The office functions as "in-house" lawyer for the division. It is also the primary contact for others in the Commission, as well as for the industry, bar, and public seeking interpretive guidance on the Investment Company Act. The office performs a variety of functions, including: (1) responding to no-action and interpretive requests, (2) providing informal guidance to the public, the industry, and others in the Commission, (3) reviewing and commenting on registration statements filed under the Securities Act of 1933 and referred from Corp Fin that raise investment company issues, as well as requests from foreign governments, (4) reviewing and approving requests for confidential treatment of information concerning securities holdings of money managers, (5) commenting on proposed enforcement actions involving investment companies and investment advisers, and (6) preparing congressional testimony and comments on legislative proposals, and responding to letters from Congress.

Office of Disclosure and Review

The Office of Disclosure and Review examines and analyzes disclosure and accounting information in registration statements, proxy solicitation materials, and other reports filed with the Commission by investment companies. The disclosure review function of Investment Management differs from the disclosure review program of the division of Corporation Finance. In Investment Management the staff examines how a fund will comply with the Investment Company Act and the rules under the Act. It reviews disclosure of expenses, investment policies, and a fund's compliance and operational matters, including certain back office operations. In contrast, Corp Fin focuses primarily on the adequacy and clarity of the issuer's disclosure of material information that an investor may require in making an investment decision. In addition to reviewing the registration statement of all new funds and new portfolios, the staff conducts comprehensive reviews of active funds, called "integrated reviews."

This Office also includes the Division's Office of Chief Accountant and Office of Financial Analysis. These units provide support to the division's disclosure operations.

Office of Investment Adviser Regulation

The Office of Investment Adviser Regulation is responsible for regulatory functions that apply to investment advisers. The office reviews exemptive applications submitted by advisers seeking relief from compliance with specified statutory requirements, provides applicants with written and oral comments on applications, issues notices of applications that are published in the Federal Register, and issues orders. The office also prepares all rulemaking proposals under the Investment Advisers Act and participates in other special projects relating to investment adviser regulation.

Office of Insurance Products

The Office of Insurance Products is responsible for the regulation of insurance products that are registered as securities under the Federal securities laws. While the insurance industry has traditionally been regulated by the states, certain insurance products, such as variable annuities and variable life insurance contracts, are viewed as securities. In addition to regulating variable annuities and variable life insurance, the Office of Insurance Products regulates mutual funds that serve as funding vehicles for insurance products. Staff members (1) review and comment on registration statements, proxy statements, and other disclosure documents filed in connection with insurance products; (2) process requests for exemption from provisions of the Investment Company Act; (3) handle no-action requests; (4) develop rulemaking recommendations and advise other division offices on rulemaking projects that may affect insurance products; and (5) respond to inquiries from investors, the industry, and others.

Office of Regulatory Policy and Office of Disclosure Regulation

These two offices are responsible for developing recommendations to the Commission for new rules or amendments to existing rules, as necessary under the Investment Company Act. The Office of Regulatory Policy is responsible for developing regulations to standardize issues raised by multiple exemptive applications. The Office of Disclosure Regulation has responsibility for regulations pertaining to mutual fund disclosure, accounting and reporting requirements, companies and pooled investment funds.

[e] Office of the General Counsel

The General Counsel is the Commission's chief legal officer. The Office of the General Counsel provides legal analyses and advice to the Commission and its operating divisions on all recommendations submitted to the Commission for action and on any other matters that raise novel or important legal issues. It works closely with the staff of other offices and divisions on proposed rulemakings and all recommendations for enforcement actions. OGC also represents the Commission and its staff in federal court and administrative litigation as a plaintiff, defendant, or friend of the courtⁿ⁴¹; oversees the Commission's bankruptcy program; prepares draft opinions for the Commission when decisions of ALJs and SROs are appealed to the Commission and acts as the final decisional authority for the agency on appeals of denials of action under the Freedom of Information Act and Privacy Act.

The office also advises the Commission and its staff on matters arising out of the agency's procurement, contracting, fiscal, personnel, and other administrative activities; counsels the Commission and its staff regarding conflicts of interest and other ethics questions; and provides technical assistance to the Congress in matters involving Federal securities laws and regulations. The Commission has delegated to the General Counsel final agency authority in a broad range of areas.ⁿ⁴²

Organization and functions of the Office of General Counsel

The Office of General Counsel is headed by the Commission's General Counsel, a Deputy General Counsel and the Commission's Solicitor. OGC has five offices, each of which performs a distinct function:

- Office of Legal Policy

- Office of Adjudication
- Office of Appellate Litigation and Bankruptcy
- Office of General Litigation and Administrative Practice
- Ethics Office.

Office of Legal Policy

The Office of Legal Policy reviews all recommendations submitted by agency staff to the Commission. It provides the Commissioners with an analysis of the legal, regulatory, and legislative interests raised. The Office reviews all staff certifications to consider a matter at a closed meeting under the Government in the Sunshine Act before to certification by the General Counsel. The office also has responsibility for reviewing all legislative proposals considered by Congress and provides technical assistance to Congress in the drafting of legislation. The staff in the office also reviews all staff speeches, articles and other publications prior to release.

Office of Adjudication

The Office of Adjudication (Adjudication) is responsible for preparing draft Commission opinions when initial decisions by administrative law judges or disciplinary actions by SROs are appealed to the Commission. Adjudication also drafts the Commission's rulings on all procedural and substantive motions made in connection with such appeals.

By law, the Commission must conduct a *de novo* review. In other words, the Commission must independently review the facts of the case and the legal analysis and determine, by a preponderance of the evidence, whether the violations have been proven. The Commission has full discretion to impose a different sanction on appeals from an ALJ initial decision.

Section 19(d) of the Exchange Act authorizes the Commission to review SRO actions that impose disciplinary sanctions on members or associated persons or persons seeking to become associated with a member, denies membership or participation to any applicant, or prohibits or limits access to services offered by the SRO or a member of the SRO. n43 While Commission review is *de novo*, the Commission may only affirm the action taken by the SRO, modify the sanction or remand the matter for further proceedings. It may not increase the sanction. One other important procedural difference concerns oral arguments before the Commission. Commission rules presume a right to oral argument when requested in appeals of ALJ decisions unless "exceptional circumstances make oral argument impractical or inadvisable," n44 but provide discretion to deny oral argument requests on appeals of SRO actions.

In an effort to improve the timeliness of its review, the Commission has adopted non-binding guidelines providing that final decisions:

should be issued within seven months from the date the petition for review, application for review, or mandate of the court is filed, unless the Commission determines that the matter presents unusual complicating circumstances, in which case a decision by the Commission on the matter may be issued within 11 months from the date the petition for review, application for review, or mandate of the court is filed. The Commission retains discretion to take additional time to dispose of an appeal. n45

Office of Appellate Litigation and Bankruptcy

The Office of Appellate Litigation and Bankruptcy represents the Commission in actions pending in the U.S. Courts of

Appeals and (in conjunction with the Solicitor General of the United States) the U.S. Supreme Court. Cases include appeals from enforcement cases, petitions for review of Commission opinions and *amicus curiae* briefs filed by the Commission in private litigation. Appellate also oversees the Commission's bankruptcy program. The Commission is the only federal agency with the responsibility and right to participate in bankruptcy cases. It acts as a statutory advisor to the courts to protect the interests of public investors. This program is conducted by bankruptcy staff in four regional offices, with oversight by Appellate.

Office of General Litigation and Administrative Practice

The Office of General Litigation and Administrative Practice represents the Commission in a wide variety of cases brought against it in district court, such as contractual disputes, claims by employees and applicants for employment before the Equal Employment Opportunity Commission and the Merit Systems Protection Board. General Litigation attorneys also represent current and former Commission employees who are subpoenaed to testify in private and criminal actions. The office has delegated authority to issue decisions on Freedom of Information Act appeals.

General Litigation includes a contracting group that advises the Commission's administrative staff on procurement, contracting, fiscal, personnel, and other administrative activities, including operation of the Commission's EDGAR system, legal issues surrounding operation of its information technology systems, intellectual property matters, and procurement of goods and services for the SEC. This group also litigates any resulting disputes in these areas.

Ethics Office

The Ethics Office counsels the Commissioners and the staff on day-to-day ethics issues (e.g., securities transactions, gifts, foreign travel, etc.), providing training to all Commission employees on ethics issues, and ensuring that all staff make the financial disclosures required in light of their positions at the Commission. The Ethics Office acts as the agency liaison with the Department of Justice on the application of government-wide rules of ethical conduct.

The Ethics Counsel is responsible for oversight of compliance with the Commission's conduct regulations, n46 and investigation of allegations of violations of that Regulation; the Commission's Canons of Ethics, n47 and the Code of Behavior concerning Ex Parte Communications. The Ethics Counsel is also responsible for referring complaints that appear to involve a violation of federal criminal statutes, after a preliminary investigation has determined that the complaint is not frivolous, to the Chairman or most senior Commissioner, for transmission to the Department of Justice in accordance with the provisions of **28 U.S.C. 535** ; and acting as liaison with the Department of Justice on referral.

[f] Office of Compliance, Inspections and Examinations

The Office of Compliance, Inspections and Examinations ("OCIE") was created in 1995 when the inspection programs of the Division of Market Regulation (renamed the Division of Trading and Markets) and the Division of Investment Management were consolidated into this new office. OCIE administers the SEC's examination and inspection program with examiners in Washington DC and in the Commission's 11 regional offices. The program has responsibility for examining securities self-regulatory organizations, broker-dealers, transfer agents, investment companies and investment advisers. n48

To promote uniformity among its examination staff, OCIE has developed a series of examination "modules." A module has been developed for virtually every function of the securities industry that may be the subject of an examination. OCIE uses these modules to conduct an examination and as the basis for preparing staff reports. Following completion of an examination, OCIE staff routinely provide an oral assessment to the firm in an "exit interview." If information has been obtained suggesting a regulatory violation, OCIE may issue a "deficiency letter" notifying the firm examined of the deficiencies found and identifying necessary corrective action to be taken. Findings of more egregious violations may be referred to the Division of Enforcement. OCIE also provides its examination findings to the Commission or

other divisions or offices to assist in the development of policy or for rulemaking. On occasion OCIE may issue a public report addressing broad regulatory issues affecting a significant segment of the industry. n49

Organization and Functions of the Office of Compliance Inspections and Examinations

A Director and Deputy Director head the office, which is organized into four groups:

- Office of Chief Counsel
- Office of Broker-Dealer Examinations
- Office of Investment Company/Investment Adviser Examinations
- Office of Market/SRO Oversight

Office of Chief Counsel

The Office of Chief Counsel provides legal advice to OCIE staff in Washington and the eleven regional offices. The office also conducts selected special compliance examinations, typically in new areas. A Training Branch is responsible for planning and implementing staff training programs for new and experienced OCIE staff. A Registrations Branch reviews applications, amendments and withdrawals submitted by investment advisers, broker-dealers, transfer agents, and municipal securities dealers (regulated entities). The office also coordinates the Chief Compliance Officers Outreach seminars that OCIE conducts for personnel employed by regulated entities n50 and periodically publishes on the SEC website "compliance alert" letters providing advice to industry compliance personnel on timely regulatory issues. n51

Office of Broker-Dealer Examinations

The Office of Broker-Dealer Examinations is responsible for examining the approximately 6,900 broker-dealers in the United States n52 as well as non-mutual fund transfer agents, and clearing agencies. In addition, examiners from the BD examination group assist the SRO inspection group on inspections of FINRA's 14 District Offices. The BD examination program closely coordinates its examination program with the broker-dealer examination program of FINRA.

OCIE conducts four categories of examination -- oversight, cause, internal control, and surveillance/sweeps. Oversight exams represent the largest number of OCIE examinations of broker-dealers. These examinations evaluate both the broker-dealer's compliance with the Federal securities laws and the quality of FINRA's most recent examination. In general, an oversight examination includes a review of the broker-dealer's compliance with operational, financial, and sales practice requirements. A cause examination is made when OCIE has received credible information indicating a firm is not in compliance with Commission regulations. Unlike oversight examinations, the scope of cause examinations typically is limited to those areas that gave rise to the examination. Firms may also be selected on the basis of a "risk matrix" system that reviews available information to identify firms that have a higher likelihood of regulatory failure. Internal controls examinations differ from normal sales practice and financial/operational examinations. They examine a firm's overall control and supervisory systems in areas such as credit, liquidity, funding, and other risk areas. These examinations focus on the largest broker-dealers holding a significant proportion of investor assets. Finally the office periodically conducts "surveillance" or "sweep" examinations of a sample of firms to assess industry practices in a discrete area or program. These examinations often result in an internal or public report describing the staff's findings.

Office of Investment Company/Investment Adviser Examinations

The Office of Investment Adviser/Investment Company Examinations is responsible for the examination of approximately 10,600 investment advisers ("IAs") and 940 investment company complexes ("ICs") registered with the Commission with total assets of approximately \$32.3 trillion dollars. "During 2003-2006, the Office's staff conducted reviews focused on market timing and late trading, investment company pricing procedures, payments to obtain business, fund expenses, anti-money laundering prevention, disaster recovery planning, proxy voting and selective disclosures, among other areas." n53

Office of Market SRO Oversight

Unlike the other OCIE examination programs, the Market/SRO examination program is conducted exclusively by OCIE staff in the Washington headquarters; although examiners from the regional/district offices assist in performing examinations of the District Offices of FINRA. The program is designed to conduct inspections of the SROs (including all registered exchanges, FINRA and the Municipal Securities Rulemaking Board), and approximately 70 alternative trading systems. The SRO examination group is divided into two offices. One group focuses on market oversight and the second group focuses on listings, arbitration, and sales practice oversight.

OCIE's SRO groups conduct routine and risk-based inspections of SRO regulatory programs, including: market surveillance, investigation, disciplinary, broker-dealer examination, listing and arbitration programs, among others. In the market surveillance area, OCIE staff examine whether the stock markets have systems and procedures in place to uncover possible market manipulation and other violations. In the listing area, staff examine whether stock markets are ensuring that listed companies satisfy all applicable financial and corporate governance listing standards. n54

[g] Office of the Chief Accountant

The Chief Accountant is the Commission's principal advisor to the Commission and the Commission's staff on accounting matters. The Chief Accountant has general supervisory authority over the execution of Commission policy concerning the accounting and auditing principles and practices that public companies must follow in the preparation of financial statements filed with the Commission. The Chief Accountant works closely with the Chief Accountants in each division to resolve difficult questions and to ensure consistency in the positions taken. The Chief Accountant is responsible for recommending the institution of administrative proceedings related to the disqualification of accountants to practice before the Commission, for assisting counsel in the conduct of such proceedings. The Office has primary responsibility for overseeing the activities of the Financial Accounting Standards Board and the Public Company Accounting Oversight Board ("PCAOB").

The Chief Accountant, in conjunction with the Division of Corporation Finance, has responsibility for the drafting of rules and regulations establishing the requirements as to the form and content of financial statements to be filed with the Commission and for the general administration of those accounting requirements. To this end, the Commission has adopted a basic accounting regulation (Regulation S-X, 17 C.F.R. Part 210) that, together with a number of opinions entitled Accounting Series Releases and Staff Accounting Bulletins, governs the form and content of most of the financial statements filed with it. n55 These accounting rules, along with SEC decisions and opinions concerning auditing issues, in conjunction with authoritative pronouncements by professional accounting societies and by other governmental agencies, have achieved a substantial clarification and improvement in the accounting and auditing principles and practices generally followed in the preparation of financial statements.

The Office of the Chief Accountant is organized into three groups:

- Accounting Group
- Professional Practice Group

● International Affairs Group

The *Accounting* group works closely with the Financial Accounting Standards Board on the development, application and interpretation of GAAP and questions concerning SEC financial disclosure requirements. These functions require close coordination with accounting staff in the Division of Corporation Finance, Investment Management, and Enforcement.

The *Professional Practice* group works closely with the PCAOB on matters concerning auditing policies and procedures. This group also manages the resolution of auditor and preparer independence and ethical matters that have been brought to the attention of the Commission.

The *International Affairs* group works with international accounting, auditing, and regulatory organizations on the development of consistent and uniform international accounting standards. Convergence of U.S. GAAP with the International Financial Reporting Standards (IFRS) adopted by the International Accounting Standards Board (IASB) is a priority for the SEC.

In 2007, the SEC created an Office of Interactive Data under the supervision of the Office of the Chief Accountant. This office is charged with identifying and applying the latest innovations in information technology to the Commission's EDGAR system. A primary objective of this program is the application of XBRL programming to corporate disclosure documents.

[h] Office of International Affairs

The Office of International Affairs (OIA) acts as the principal liaison with foreign capital markets regulators and international organizations such as the International Organization of Securities Commissions. The office has direct responsibility for making requests on behalf of the division of enforcement to foreign regulators for investigation assistance and receives similar investigation requests from foreign regulators seeking investigation assistance from the SEC. The Office represents the SEC on multinational bodies advancing the development of global best practices and regulatory standards and actively negotiates international cooperation and cross-border information sharing agreements. It coordinates these activities with staff in the relevant offices and divisions of the Commission.

OIA conducts training and technical assistance programs in the United States and overseas for foreign securities and law enforcement authorities. Every year it hosts a regulatory training conference for regulatory officials from developing market economies. In addition its staff, and staff from other offices and divisions, provides direct technical assistance to foreign regulators.

OIA analyzes the impact of SEC rules and actions upon foreign market participants active in US markets, and advises the Commission regarding the manner in which SEC and non-US initiatives affect the cross-border activities of US issuers and US financial service providers.

[i] Office of Economic Analysis

The Office of Economic Analysis is responsible for advising the Commission and its staff on economic issues associated with the SEC's regulatory activities. Whenever the Commission proposes a regulatory action the Office prepares a cost analysis that is published in the regulatory release. These analyses are used in the consideration of whether to take action on the proposal and also to satisfy legal requirements of the Small Business Regulatory Enforcement Fairness Act. The Office also assists the Division of Enforcement by analyzing the market impact of illegal conduct and quantifying the profits made or losses avoided by persons engaged in insider trading. The Office analyzes the likely consequences of proposed regulations, and engages in research in support of longer-term SEC policy initiatives and plans. This includes research into the causes and consequences of significant developments in the

securities markets, in prevailing financial practices among issuer firms, and in SEC policy. Findings from staff research are disseminated to internal decision officials through oral and written presentations and may also be disseminated to external audiences through attendance at academic conferences and publication.

[j] Office of Investor Education and Advocacy

The Office was established in May 1976 as the Office of Consumer Affairs to consolidate several functions into a coordinated office. The Office acts as the principal link with individual investors and as the representative of their interests at the Commission. The Office focuses its attention on creation of educational publications explaining the U.S. capital markets, investment alternatives and alerting the public to frauds and questionable practices.

The office receives and reviews all correspondence and complaints submitted to the SEC. Matters requiring enforcement investigation or regulatory action are referred to the appropriate office or division of the Commission. When a letter concerns a private dispute with a broker or other regulated entity, the office will often request a written response from that organization.

The office reviews all proposed regulatory initiatives and advises the Commission and staff on the impact the initiative may have on individual investors. The office also assists the Division of Trading and Markets in oversight of the securities industry dispute resolution program.

[k] Office of Risk Assessment

The Office of Risk Assessment (ORA) is responsible for coordinating the SEC's risk management program. ORA was formed in 2004 to help the SEC anticipate, identify, and manage risks. ORA focuses on risk issues across the corporate and financial sector, including issues relevant to corporate disclosure, market operation, sales practices, new product innovation, and many other activities of financial market participants.

ORA's responsibilities can be grouped into three general categories:

- Information Analysis on new industry trends and risks from a variety of sources, such as external experts, domestic and foreign agencies, industry and financial services, empirical data and other market data.
- Managing the agency's risk assessment process by defining relevant risk frameworks and common risk language.
- Serving as the agency's risk management resource by coordinating with other offices and divisions of the Commission.

[l] Secretary of the SEC

The Office of the Secretary is responsible for coordinating the deliberations of the Commission. The Office has responsibility for scheduling Commission meetings and preparing the calendar of items for action. The Office also coordinates staff requests for Commission action by seriatim action or duty officer action. The Office is responsible for drafting the Commission's official minutes and for reviewing all Commission orders, releases and other statements prior to issuance. The office is responsible for agency compliance with the Government in the Sunshine Act and the Federal Advisory Committee Act.

The office also manages the Commission's library, online reference services and the SEC Internet website and internal intranet. In 2007, the records management functions performed by the Office of Filings and Information Services

(OFIS) were transferred to the Office of the Secretary when OFIS was dissolved.

The office has primary responsibility for the administration of Commission administrative proceedings. It is responsible for service of all actions and for receipt of all filings in these proceedings. It prepares the official record of action for the administrative law judges and for the Commission, in the event of an appeal. It performs the same function on SRO actions that are appealed to the Commission. In the event that an order of disgorgement is entered in an administrative proceeding, the Commission has delegated to the office the responsibility to review and approve all proposed plans of disgorgement.

[m] Office of Administrative Law Judges

The Office of Administrative Law Judges is headed by a Chief Administrative Law Judge who supervises the administrative law judges assigned to hear administrative proceedings brought by the SEC. To maintain the integrity of the administrative process, all ALJs must be qualified by the Office of Personnel Management, which provides the SEC with a list of eligible candidates. Once hired by the SEC, the Commission is obligated to pay the ALJ's salary and provide office and support services. However, the SEC has no authority to promote, reward or discipline an ALJ.

After the institution of an administrative proceeding, the Chief Administrative Law Judge assigns it to one of the ALJs. The ALJ presides over the administrative hearing, taking testimony, reviewing briefs and issuing an initial decision containing findings of fact, conclusions of law and, if violations have been found, a proposed sanction. All ALJ initial decisions are appealable to the Commission, which conducts a *de novo* review. An initial decision is not final until the Commission has completed its review and issued its opinion and order, or if not appealed, until the Commission issues a finality order.

[n] Office of Public Affairs

This Office is the Commission's chief public information officer. It communicates the Commission's actions to the public and the news media. An SEC News Digest is published daily highlighting all public actions taken by the Commission. n56 When newsworthy events occur, the Office prepares a Press Release announcing the action and distributes the Press Release to the media and through the SEC website.

[o] Office of the Inspector General

The Commission established the Office of Inspector General in March 1989 as required by the Inspector General Act of 1978. Under this act, the Office is independent of Commission management and has freedom to determine what it will investigate or audit. The Chairman, however, appoints the Inspector General and appraises his/her performance.

The Office's primary functions are to (1) perform audits of Commission operations, programs, activities, functions, and organizations, and (2) conduct investigations of alleged staff (and contractor) misconduct. A final report is prepared at the completion of an investigation. These reports are distributed to the SEC officials responsible for taking corrective actions and the audit reports are available to the public on the SEC website, as are required semiannual reports to Congress, and other documents generated by the Office. n57

[p] Office of Equal Employment Opportunity

The primary mission of the EEO Office is to prevent employment discrimination, including discriminatory harassment. The Office investigates complaints from Commission employees and applicants for employment to determine if a violation of law may have occurred. The Office also provides training and counseling to SEC staff and management. It also sponsors events celebrating diversity and heritage.

[q] Office of Legislative Affairs

This office serves as the principal liaison between the SEC and members of Congress and their staffs and advises SEC Commissioners on legislative strategy and response to Congressional requests and provides information about SEC actions to Congress. This office also organizes briefings given to Congress by SEC staff members and coordinates the testimony of SEC officials before Congressional committees. In addition, this office works closely with other government agencies regarding legislation that might affect the SEC.

[r] Regional Offices

Staff of the eleven regional offices perform two functions. One group in each office is responsible for conducting enforcement investigations and litigating any legal actions arising from these investigations. The second group performs examinations and inspections of regulated entities under the direction of OCIE.

A regional director and two or more deputy directors manage each regional office. The Division of Enforcement oversees the enforcement programs in each regional office and the Director of Enforcement has supervisory authority over regional office management and administration. The Director of OCIE provides program supervision over the examination and inspection program in each region.

[s] Executive Director.

The Executive Director functions as the chief operating officer of the Commission on matters of budget, staffing and administration. The Office is responsible for advising the Chairman on preparation of the annual agency appropriation request to Congress and on all decisions regarding staffing, personnel and administrative services. The office also supervises SEC staff that respond to public requests under the Freedom of Information Act. To accomplish these responsibilities the Executive Director supervises the operations of the following offices:

[i] Office of Financial Management

The Office of Financial Management is headed by the Commission's Chief Financial Officer. The office manages the expenditure of funds by the agency, monitors the utilization of agency resources, and develops, oversees, and maintains SEC financial systems. These activities include cash management, accounting, fee collections, travel policy development, and oversight and budget justification and execution.

[ii] Office of Human Resources

This Office develops and implements the personnel programs of the Commission, including recruitment, placement, and staffing; position classification and wage administration; employee career development and training; labor management relations including representing management on labor relations matters; personnel management evaluation; employee performance evaluation; insurance and health benefits; and incentive awards. The Office also serves as liaison with the Office of Personnel Management, professional organizations, and other government agencies on personnel matters

[iii] Office of Administrative Services

The Office of Administrative Services manages the agency's facilities and related support services. The office services headquarters and regional office locations, and includes services such as procurement and contracting, physical security, emergency management, property management, office lease acquisition and administration, space renovation, supplies and office equipment management, transportation, mail distribution, publications, printing, and desktop publishing.

[t] Office of Information Technology.

The Office has overall management responsibility for the Commission's IT program including application development,

infrastructure operations and engineering, user support, IT program management, capital planning, security, and enterprise architecture. The Office operates the EDGAR system through which public companies and other regulated entities file more than 750,000 documents annually.

(n18)Footnote 18. 15 USC § 78s(b).

(n19)Footnote 19. This description of consolidated supervised entities regulation is extracted from the SEC website description of consolidated supervised entities contained at <http://www.sec.gov/divisions/marketreg/hcsupervision.htm>. A comprehensive description of the regulation and program is available as well.

(n20)Footnote 20. 15 U.S.C. 78o-7

(n21)Footnote 21. SEC Release No. 34-55857.

(n22)Footnote 22. The Office of General Counsel, not the Division of Enforcement, is responsible for conducting investigations and bringing enforcement actions pertaining to improper professional conduct or violations of the securities laws by attorneys in circumstances where the misconduct occurred in the context of an Enforcement investigation

(n23)Footnote 23. 15 U.S.C. § 78u(a)(2). At one time the Commission relied heavily upon bilaterally negotiated memoranda of understanding with foreign securities regulators to satisfy the reciprocity requirement. In recent years, the Commission has looked to whether the requesting authority is a signatory to the multilateral memorandum of understanding drafted and overseen by the International Organization of Securities Commissions (IOSCO).

(n24)Footnote 24. The Commission has delegated authority to the Division to bring a subpoena enforcement action, 17 CFR § 200.30-4(a)(10)200.30-4(a)(10). Criminal contempt proceedings have been brought to compel a party to produce assets covered by an order of disgorgement in an SEC civil proceeding. Under criminal contempt, a party may be incarcerated to coerce compliance.

(n25)Footnote 25. The relevant Commission regulation provides that "the staff, with specific authorization, may discuss with persons involved the disposition of such matters by consent, by settlement, or in some other manner." 17 CFR § 202.5(f). While this provision appears to require the staff to obtain authorization from the Commission before engaging in settlement negotiations, this has not been standard practice. Recently it has been reported that the Commission has begun an experimental process of requiring the division to advise the Commission of settlement negotiations involving the payment of a large money penalty by a public corporation. See Bloomberg News Service, "SEC Penalties Fall Amid 'New Ethos' on Company Fines". November 19, 2007.

(n26)Footnote 26. *For example*, 15 U.S.C. § 78u(d). Comparable provisions are contained in the Securities Act of 1933, the Investment Company Act of 1940 and the Investment Advisers Act of 1940.

(n27)Footnote 27. P.L. 101-429, 104 Stat. 931 (Act of October 15, 1990).

(n28)Footnote 28. 15 U.S.C. § 78u-3. The same authority was added to the Securities Act of 1993, 15 U.S.C. § 77h-1; the Investment Company Act of 1940, 15 U.S.C. § 80a-9(f); and the Investment Advisers Act of 1940, 15 U.S.C. § 80b-3(k).

(n29)Footnote 29. Section 1105 SOX XXXX

(n30)Footnote 30. In the Matter of A.R. Baron, Proceeding 3-9010. Release No. 34-37240 / May 23, 1996

(n31)Footnote 31. 15 U.S.C. § 78u-2.

(n32)Footnote 32. 5 U.S.C. § 78l(k).

(n33)Footnote 33. 98 S.Ct. 1702 (1978) . This case also is significant as it was the last case in which a unanimous Supreme Court ruled against the U.S. government and in favor of a *pro se* litigant.

(n34)Footnote 34. *See, for example*, two successive trading suspensions in the securities of Struthers Industries Inc., Exchange Act release No 34-39531 / January 9, 1998 and Exchange Act Release No. 39578 / January 26, 1998.

(n35)Footnote 35. "The Commission is authorized in its discretion, to publish information concerning any such violations." 15 U.S.C. § 78u(a).

(n36)Footnote 36. *See, for example*, In the Matter of Donald Fuerstein. Exchange Act Release No. 34-31554 / December 3, 1992.

(n37)Footnote 37. Because the division has delegated authority to provide access to its files to criminal authorities, 17 CFR § 200.30-4, it rarely requests that the Commission vote on a formal criminal referral.

(n38)Footnote 38. In June 1976, the Division of Investment Management Regulation was renamed the Division of Investment Management. Sec. Exch. Act Rel. No. 12568 (1976). Between January 1973 and June 1976, the Division was known as the Division of Investment Management Regulation. 39 SEC Ann. Rep. 133 (1973). From August 1972 to January 1973, it was called the Division of Investment Company Regulation. Before that, it was part of the Division of Trading and Markets, previously called the Division of Trading and Exchanges. *See* 1 Loss & Seligman, Securities Regulation 300, n. 25 (3d. ed 1989).

(n39)Footnote 39. The delegation of authority to the Division of Investment Management is contained at 17 C.F.R. § 200.30-5.

(n40)Footnote 40. *See, for example*, sections 6(c), 12(d)(1)(J), 17(b) and 17(d) of the Investment Company Act of 1940.

(n41)Footnote 41. In cases between private parties involving statutes administered by the Commission, the Office of the General Counsel represents the Commission where the case presents legal issues of great importance, participating therein as a friend of the court. 17 C.F.R. § 200.21.

CHAPTER 1 The Securities Exchange Act of 1934 and the SEC *

1-1 Federal Securities Exchange Act of 1934 § 1.03

§ 1.03 The Work of the SEC in Administering and Enforcing the 1934 Act

The Commission exercises its regulatory authority by adopting rules and regulations necessary or appropriate to implement the provisions of the statutes that it administers; by informal assistance to the public and companies subject to SEC regulation through interpretations and "no action" letters discussing the Commission's position regarding the applicability of such statutes; by investigating possible violations of the federal securities laws; and by instituting enforcement proceedings.

[1] Regulatory Policy

[a] Rulemaking.

Section 23(a) authorizes the Commission to prescribe rules and regulations necessary or appropriate to implement of the Exchange Act and to execute the functions vested in the Commission under the 1934 Act. n1 All Commission rulemaking activities must be conducted in accordance with section 553 of the Administrative Procedures Act. n2 The Commission must also comply with a variety of other requirements which Congress has imposed. These include:

- Regulatory Flexibility Act ("RegFlex Act"); n3
- Paperwork Reduction Act; n4
- Small Business Regulatory Enforcement Fairness Act of 1996 ("SBREFA"); n5
- Federal Advisory Committee Act; n6
- § 23(a)(2) of the Exchange Act;
- National Securities Markets Improvements Act of 1996 ("NSMIA"). n7

The APA establishes the core requirements for all Federal agency rulemaking. It requires, with two limited exceptions, that "the agency shall give interested persons an opportunity to participate in the rulemaking through the submission of written data, views, or arguments with or without opportunity for oral presentation" n8 Written comments are public documents unless the Commission grants confidential treatment, upon request. n9

In 1980 Congress enacted the RegFlex Act which requires agencies to consider the impact of regulations on small business and other small entities. Under the act, unless the Chairman certifies that the proposed action "will not have a significant economic impact on a substantial number of small entities" n10 an agency must prepare, make available for public comment, and publish in the Federal Register, an initial regulatory flexibility analysis ("IRFA") of every proposed rule for which a notice of proposed rulemaking is issued. The IRFA is a preliminary SEC assessment of the effect of the proposed rule on individuals, small businesses, small organizations, and small governmental jurisdictions. n11 If a rule is adopted, the Commission must include in the adopting release a final regulatory flexibility analysis that includes a statement concerning less burdensome alternatives that were considered and explaining why the less burdensome alternatives were not adopted. n12

The RegFlex Act also requires all agencies to publish in the Federal Register a plan to review all existing rules that have a significant impact on a substantial number of small entities. The agencies then must to publish in the Federal Register twice annually, in October and April, a regulatory flexibility agenda that identifies all rules under development that may have a significant impact on a substantial number of small agencies. n13

The Paperwork Reduction Act was also enacted in 1980. The Act requires Federal agencies, including the Commission, to obtain prior approval from the Office of Management and Budget ("OMB") for any collection of information from ten or more persons. This includes SEC use of questionnaires and surveys and all SEC forms. Any proposed agency collection of information from 10 or more persons must be published for notice and comment in the Federal Register. The notice must explain the purpose and need for the collection and the burden to be imposed. The agency must provide an estimate of the burden and the cost of compliance, including initial and ongoing or annual compliance costs. Comments must be requested on whether collection of information is necessary and will have practical utility; whether the agency estimate of burden is accurate; suggestions on improving the quality, utility and clarity of information to be collected; and suggestions on how to minimize the burden. The PPRA approval must be renewed every three years, through notice and comment and OMB review.

In 1996 Congress enacted SBREFA, which created a procedure for Congressional review of agency regulations. All regulations must be submitted to both houses of Congress and the General Accounting Office ("GAO") upon adoption. The act provides two review processes, based on whether a rule is a "major rule." It defines a major rule n14 as one that is likely to have an annual effect on the economy of 100 million; both costs or benefits; or result in a major increase in costs or prices for consumers or individual industries or have significant adverse effects on competition, investment or innovation. The Commission's internal analysis of this is not required to be included in the release but the Commission's determination may be the subject of public comment. If a rule is a major rule it may not take effect for sixty days. Minor rules may take effect sooner than sixty days, subject to Congressional action. The GAO must provide Congress with a written report on all major rules within 15 days of receipt. Disapproval of a rule requires a joint declaration of Congress. n15

Many suggestions for rule modification follow extensive consultation with industry representatives and others affected. n16 The Federal Advisory Committee Act governs creation by the Commission of an advisory committee to provide advice on important policy questions, such as the development or amendment of regulatory policy.

In making rules and regulations, the Commission must consider their effects on competition. n17 The National Securities Markets Improvements Act further amended the securities laws to require that "whenever the Commission is engaged in rulemaking, or in the review of a rule of a self-regulatory organization, and is required to consider or determine whether an action is necessary or appropriate in the public interest, the Commission shall also consider, in addition to the protection of investors, whether the action will promote efficiency, competition, and capital formation." n18 These provisions are often believed to have created a requirement that the Commission conduct a formal cost-benefit analysis for a proposed rule. While the Commission has voluntarily conducted such analyses, they are not mandated. However costs, benefits and alternatives must be considered as part of the public interest analysis. n19

[b] Self-Regulatory Organization Rulemaking

Section 19(b) of the Exchange Act requires that:

each self-regulatory organization n20 shall file with the Commission... any proposed rule or any proposed change in, addition to, or deletion from the rules of such self-regulatory organization (hereinafter in this subsection collectively referred to as a "proposed rule change") accompanied by a concise general statement of the basis and purpose of such proposed rule change. The Commission shall, upon the filing of any proposed rule change, publish notice thereof together with the terms of substance of the proposed rule change or a description of the subjects and issues involved. The Commission shall give interested persons an opportunity to submit written data, views, and arguments concerning such proposed rule change. No proposed rule change shall take effect unless approved by the Commission or otherwise permitted in accordance with the provisions of this subsection. n21

The rule filing process under the Exchange Act allows the Commission to ensure that SRO rules and practices are consistent with the Exchange Act and the goals of the national market system. These goals include promotion of fair competition among markets, transparency of prices, best execution of customer orders, fair and orderly markets, and most importantly, investor protection. SRO rules also must be designed to prevent fraudulent and manipulative acts and practices, and promote just and equitable principles of trade. Finally, the Exchange Act contains a public notice and comment procedure to ensure that interested persons have an opportunity to provide input into SRO actions that may have a significant impact on market participants and individual investors.

The Exchange Act provides two alternative procedures, for SEC action. Under Section 19(b)(2), once an SRO files a proposed change, the Commission must publish notice of the filing in the Federal Register, typically for a 21-day period, seeking public comment (this period can be extended for complex filings). Within 35 days of publication (or up to 90 days for good cause or with the consent of the SRO), the Commission must either issue an order approving the proposal or an order instituting proceedings to determine whether the proposal should be disapproved. If a proceeding is ordered, it must be concluded within 180 days from publication of the original notice (subject to a 60-day extension for good cause or a longer period if agreed to by the SRO). Under Section 19(b)(2) the Commission must approve a proposed rule change if it finds that the proposal is consistent with the requirements of the Act and the applicable rules and regulations. Commission approval of an SRO rule change confers implied antitrust immunity.

The Section 19(b)(3) process is an expedited procedure. Certain types of rules, such as changes in fees, may become effective upon filing with the Commission. n22 These filings are published for notice and comment and the Commission has 60 days from filing to summarily abrogate a filing. If abrogated, the SRO must re-file under Section 19(b)(2). The division, however, rarely abrogates filings under this section (in part because SROs typically withdraw the filing rather than have it abrogated by the division).

While section 19(b) contains explicit time periods for acting upon SRO rule filings, in practice these time frames are not applied rigidly. Instead, the process has evolved into one that is both highly flexible and more time consuming. Because the statutory time limits are triggered by Federal Register publication and the division controls that decision, it can minimize the impact of the time limits by delaying publication. Similarly, an SRO can control the process by initially providing the filing as an informal draft, and then, after the official filing, voluntarily agreeing to extend the deadlines. Or it can file amendments to an application, with each amendment restarting the statutory time frame. Although Commission review of SRO rulemaking requires an opportunity for public notice and comment, it is not a process subject to the APA or the other procedural requirements enacted by Congress and applicable to Federal agency rulemaking. However, the requirement under NSMIA to consider "in addition to the public interest whether the action will promote efficiency, competition and capital formation" applies to SEC consideration of SRO rule filings. n23

[b] Interpretations, "No-Action" Letters and Informal Guidance.

As part of its activities, the Commission, through its divisions and offices, provides informal guidance and administrative interpretations of the securities laws and the regulations thereunder to members of the public, prospective registrants, and others. n24 This informal guidance may take several forms, including an informal telephone response, a "no-action" letter, a public statement containing answers to "frequently asked questions" ("FAQ"), a Staff Legal Bulletin ("SLB") or a Staff Accounting Bulletin ("SAB"). On more than one occasion the public has been informed of staff or Commission interpretations through a public speech by a Commissioner or senior member of the staff or through the issuance of a press release n25. While the Commission has been occasionally criticized for its frequent use of informal guidance to create a body of "informal regulations," it has become an important vehicle for advising the public and regulated industries of Commission positions and interpretations.

Requests for no-action letters are frequently used by the private bar on behalf of a corporate or individual client, to obtain informal advice from the SEC staff. In the request, the writer generally is seeking advice, interpretations, opinions or assurances that no enforcement action will be recommended to the Commission in regard to a particular transaction prior to its consummation. The response by the SEC staff to such a request is known as a "no-action" letter. The advice, for example, may include an informal expression of opinion about whether the a particular security is subject to the registration requirements and, if so, advice as to compliance with the disclosure requirements of the applicable registration form. Because the response usually contains the words "we will not recommend that the Commission take any action" they are referred to as a "no-action" letter.

When a request for a no-action letter is submitted, the staff has the discretion to decline to respond. Persons submitting a request may withdraw the request rather than receive a negative response. All no-action letters issued by the staff are made public, along with the incoming request, and are available on the SEC website. n26

The Commission is not bound by these staff-written letters, and the letters are not to be considered rulings of the Commission on questions of law or fact and are not dispositive of the legal issues raised as to the applicability of the federal securities laws to a given transaction. n27 The staff responses in no-action letters only purport to represent the views of the officials who give them. As Professors Loss stated in an earlier edition of his treatise, the official says, in effect: "this is my view based on the facts as you describe them. You may not rely on it as if it were a Commission decision. If you don't like it, you are at liberty to disregard it and follow your own construction, subject to the risk that I may recommend appropriate action to the Commission and the Commission may institute proceedings or take other steps if the Commission agrees with my view." n28

The Commission's staff increasingly relies upon published compilations of answers to "frequently asked questions," or FAQs, to efficiently respond to repeated questions for general interpretations of a rule. When the staff publishes a list of FAQs, it typically begins with a standard disclaimer reading: "the answers to these frequently asked questions represent the views of the Division of Corporation Finance. They are not rules, regulations nor statements of the Securities and Exchange Commission. Further, the Commission has neither approved nor disapproved them." n29

Staff Legal Bulletins and Staff Accounting Bulletins are more authoritative statements of staff interpretive positions on important or complex questions. While they represent interpretations and policies followed by the division or office issuing it, they are not considered legally binding because they represent the views of the staff rather than the Commission. n30

Recently the Commission has made public another source of guidance on the views of its staff. Since 2004, the Commission has posted to its EDGAR system the comment letters prepared by the staffs of the Divisions of Corporation Finance and Investment Management in the review of securities registration statements and periodic reports. n31

[2] Enforcement Program

[a] Investigations

One of the core responsibilities of the Commission is investigating complaints or other indications of possible violations of the Federal securities laws. Explicit authority to investigate violations is contained in each of the Federal securities laws. n32 Since its creation in 1972, virtually all investigations are conducted by the Division of Enforcement and the enforcement staff resident in each of the Commission's eleven regional offices. The Commission's rules provide that all investigations are to be non-public. n33

The Commission has a broad mandate to investigate any matter of interest related to enforcement of the Federal securities laws. Within the division, any attorney may initiate an informal inquiry (with the approval of his or her immediate supervisor) and generally, the first attorney to identify the matter conducts any ensuing investigation. SEC investigations are considered non-public events and the SEC has a policy of neither confirming nor denying the existence of an investigation.

An informal inquiry or matter under investigation ("MUI") entails the analysis of publicly available information and information provided on a voluntary basis by persons or entities. At the informal inquiry stage, the staff does not have the authority to issue subpoenas to compel testimony or to produce documents. While some investigations are completed through the MUI process, typically the staff will convert a MUI into a formal investigation. This requires the staff to submit an action memorandum to the Commission requesting the authority to issue a formal order of investigation. The staff memo describes the information they have obtained that indicates that a violation of the Federal securities laws may have occurred. While the memorandum often identifies the individuals or entities who may have violated the law, as a matter of policy the Commission does not consider these persons to be "targets" of the investigation.

Following Commission approval, a formal order is issued. The formal order provides basic factual information defining the scope of the investigation, specifies the provisions of federal law or regulation that may have been violated and lists the staff who are authorized to conduct the investigation and issue subpoenas to compel testimony or the production of documents. Any person or entity receiving a subpoena may request to see the formal order to confirm that the subpoena is consistent with the scope of the formal order. n34 While a person may review the formal order, they are not entitled to retain a copy of it, without the approval of an Assistant Director or Assistant Regional Director. If a transcript of testimony is created, the person providing the testimony is entitled to receive a copy of the transcript, upon written request. The Commission may deny such a request only for good cause.

If a person or entity refuses to comply with a subpoena issued by the division, the staff may initiate an action in Federal district court to compel compliance. The decision to bring a subpoena enforcement action does not require a vote of the Commission. The Director of the Division of Enforcement has been delegated the authority to authorize such an action. n35

At the request of a foreign securities authority conducting an investigation to determine whether its securities laws are being or have been violated, the Commission may authorize the division to provide assistance to the foreign authority, even if the conduct in question would not constitute a violation of U.S. law. This assistance may include an SEC formal order permitting the staff to issue subpoenas. When deciding to honor such a request, the Commission must consider whether the requesting authority has agreed to provide reciprocal assistance and whether providing the assistance would prejudice the public interest of the U.S. n36

Following completion of its investigation the division may submit a recommendation for action to the Commission. The action memorandum must provide a detailed description of the individuals or entities to be charged with violations, the specific violations that will be alleged to have occurred, the evidence obtained proving that the violations occurred, as well as an analysis of any legal issues raised.

Persons or entities to be charged with violations are typically notified prior to submission of a staff recommendation to the Commission and provided with the opportunity to make a written submission to the Commission responding to the staff allegations. n37 These statements are commonly called "Wells" submissions, named after John Wells, the Chairman of an SEC Advisory Committee that recommended creating the procedure. The process is not mandatory however. The division staff is not required to notify persons prior to requesting Commission authority. Also, if the Commission authorizes an enforcement action, the Wells statement is not considered a privileged document and may be used as evidence in litigation by division staff.

When persons or entities receive a "Wells" notice, it is common for the party to engage in settlement negotiations with the staff. n38 If a settlement of the matter is negotiated, it will be submitted to the Commission at the same time as the recommendation for action. The Commission, in its discretion, may approve the recommended action and settlement, or it may approve the recommendation for action and reject the proposed settlement.

[b] Enforcement Actions

SEC enforcement actions may be brought as an injunctive action in a U.S. Federal Court or as an administrative proceeding, heard by an administrative law judge. The choice of proceeding reflects a combination of factors, including the type and severity of the alleged violation and the person or entity to be charged. However, the most significant factor is the type of penalty or relief sought.

[i] Administrative Proceedings.

Since the SEC's creation, it has had the authority to bring administrative proceedings to address violations of the securities laws. The scope of its authority to bring an administrative proceeding and the sanctions that can be ordered in an administrative proceeding has grown dramatically over time.

Early in the history of the SEC, the administrative proceeding was limited to proceedings to halt an offering of securities to the public, or a "stop order," under section 8 of the Securities Act, n39 and proceedings to reject an application for or revoke the registration of a broker-dealer n40 or investment adviser n41.

In 1964, Congress amended the Exchange Act n42 and provided the Commission with the authority to institute administrative proceedings to bar or suspend associated persons of broker-dealers or investment advisers. This authority has become a staple of the SEC enforcement program.

For a time the SEC occasionally brought administrative proceedings under section 15(c)(4) of the Exchange Act. n43 This provision enabled the SEC to institute administrative proceedings against "any person subject to the provisions of section 12, 13, 14, or subsection (d) of section 15," the corporate registration provisions. Under section 15(c)(4) the Commission could "publish its findings and issue an order requiring such person, and any person who was a cause of the failure to comply due to an act or omission the person knew or should have known would contribute to the failure to comply... to comply, or to take steps to effect compliance." For approximately ten years the Commission used this avenue to address corporate violations that did not warrant an injunctive action, frequently as a settled negotiated order. In 1987 an initial decision by an SEC administrative law judge in 1987 concluded that an order under this section could not require prospective relief. n44 While the authority still exists, in 1990 the passage of the Remedies Act created new forms of administrative proceedings that superceded and obviated proceedings under section 15(c)(4).

The Remedies Act dramatically expanded the nature of SEC administrative proceedings. It authorized the Commission to enter a cease and desist order against any person who is violating, has violated, or is about to violate any provision of the securities laws or any rule or regulation thereunder n45. In a cease and desist proceeding the Commission can order a party to take steps to comply with its rules, to provide an accounting and to disgorge profits gained or losses avoided. The Sarbanes-Oxley Act further expanded the remedies available in a cease and desist proceeding by authorizing the

SEC to bar an individual from serving as an officer or director of a public company if they violated the antifraud provisions of the Securities Act or Exchange Act. n46 This Act also created a proceeding to enable the SEC to issue a temporary cease and desist order. While the Commission has used its cease and desist authority extensively, it has brought only one proceeding under its temporary cease and desist authority. n47

The Remedies Act also expanded the remedies that the SEC can order in an administrative proceeding against broker-dealers, investment advisers, investment companies and persons associated with these registered entities. The SEC can order disgorgement, and civil penalties comparable to those available in an injunctive action. n48

A third form of administrative proceeding is a proceeding to deny a person, temporarily or permanently, from appearing or practicing before the Commission as an attorney, accountant or other professional. While the Commission has brought "rule 102(e)" proceedings (until 1992 they were known as "rule 2(e)" proceedings) throughout its history, based upon rules adopted under its general rulemaking authority, its authority to take action against persons licensed to practice by applicable state authorities was periodically challenged. Any uncertainty over this authority was eliminated by section 602 of the Sarbanes-Oxley Act, which added section 4C to the Exchange Act, incorporating the Commission's rule 102(e). While the Commission may initiate a proceeding under this provision against an attorney, an accountant, or other professional such as an engineer or geologist, the Commission's Office of General Counsel litigates such proceedings if the professional named is an attorney.

All administrative proceedings are heard by an administrative law judge. Administrative law judges operate in a quasi-autonomous status. The SEC hires ALJs from a list of eligible candidates determined by the U.S. Office of Personnel Management and is obligated to pay the ALJ's salary and provide office and support services. To ensure the independence of the administrative process, once hired, the SEC has no authority to promote, reward or discipline an ALJ. After the institution of an administrative proceeding, the Chief Administrative Law Judge assigns it to one of the ALJs. The ALJ presides over the administrative hearing, taking testimony, reviewing briefs and issuing an initial decision containing findings of fact, conclusions of law and, if violations have been found, a proposed sanction. All ALJ initial decisions are appealable to the Commission, which conducts a *de novo* review. An initial decision is not final until the Commission has completed its review and issued its opinion and order, or if not appealed, until the Commission issues a finality order. All final Commission decisions may be appealed to the relevant U.S. Circuit Court of Appeals.

Other enforcement proceedings

Under section 12(k) of the Exchange Act, the Commission may issue an order suspending trading in a security for a period of up to ten business days if it finds that "the public interest and the protection of investors so require." n49 A trading suspension order takes effect at a day and time specified by the Commission in the order, typically the beginning of trading on the day of issuance. No hearing is required prior to the order's effectiveness. The Commission often issues a trading suspension in a security when it identifies an ongoing market manipulation. Frequently at the expiration of the trading suspension, secondary market trading will not resume in the stock, as the commission may have succeeded in obtaining a temporary restraining order against the perpetrators of the fraud or because market makers in the security are unable to satisfy the current information requirements of Exchange Act rule 15c2-11.

Prior to 1978, the SEC frequently would issue a new trading suspension order at the expiration of the ten-day period. This practice was discontinued following the Supreme Court's decision in *SEC v. Sloan*. n50 The Commission has on rare occasions issued a second trading suspension against a security when it found a new factual basis for suspending trading. n51

Occasionally, the Commission will decline to bring a formal enforcement action and will, instead, issue a report of its investigation under section 21(a) of the Exchange Act. n52 These administrative orders describe the results of the staff's investigation and articulate the Commission's interpretation of applicable law to the conduct. The Commission often

issues these reports in circumstances when it believes that a violation of the law has occurred but that the legal theory supporting its conclusion is novel or untested. The purpose of the report is to advise the public and the industry of the Commission's views and provide guidance. These reports are normally issued with the consent of the parties identified in the order. n53

[iii] Judicial Actions.

The SEC may bring civil injunctive actions in the proper Federal district court against any person who is "engaged or is about to engage in acts or practices constituting a violation" of the Federal securities laws, SEC regulations or the rules of any securities self-regulatory organization. n54 In addition to seeking the entry of an injunctive order prohibiting future violations of the applicable provisions of the law, the SEC may pursue an order of disgorgement, an order barring a person from serving as an officer or director of a registered, public company, an order barring a person from participating in an offering of penny stock or an order directing the payment of a civil money penalty. The SEC obtained the authority to obtain money penalties, officer and director bars and penny stock bars in 1990 when Congress enacted the Securities Enforcement Remedies and Penny Stock Reform Act of 1990 ("Remedies Act"). n55

The Insider Trading Sanctions Act of 1984 ("ITSA") had previously provided the SEC with the authority to seek civil penalties for insider trading violations. ITSA penalties differ from Remedies Act civil penalties for other violations of the law. Under section 21A of the Exchange Act, a person engaged in insider trading (as a buyer, seller or tipper) may be required to pay a penalty up to a maximum of three times the amount of the profit gained or loss avoided. n56 However the maximum penalty is rarely imposed. As an informal practice, the Commission typically has agreed to accept a one-time penalty, plus disgorgement in settled cases. The Commission has also considered the defendant's ability to pay a penalty and or disgorgement in seeking these orders.

SEC authority to obtain civil penalties in injunctive proceedings for other violations of the securities laws is governed by section 21(d)(3) of the Exchange Act. n57 Rather than establishing a maximum penalty of three times the profit gained or losses avoided, there is a three-tier penalty scale.

- Tier one imposes a maximum penalty of "the greater of (I) \$ 5,000 for a natural person or \$ 50,000 for any other person, or (II) the gross amount of pecuniary gain to such defendant as a result of the violation."
- Tier two increases the maximum penalty to "the greater of (I) \$ 50,000 for a natural person or \$ 250,000 for any other person, or (II) the gross amount of pecuniary gain to such defendant as a result of the violation, if the violation described in subparagraph (A) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement."
- Tier three increase the maximum penalty to "the greater of (I) \$ 100,000 for a natural person or \$ 500,000 for any other person, or (II) the gross amount of pecuniary gain to such defendant as a result of the violation, if--
 - (aa) the violation described in subparagraph (A) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and
 - (bb) such violation directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons."

Historically all civil penalties were to be made payable to the U.S. Treasury. In 2002 the Sarbanes-Oxley law created an alternative use of money paid to satisfy these civil penalties. Section 308 of that law provided for the creation of a "Fair Fund" for investors. If the Commission obtains an order of disgorgement, it may request that all money penalties be

paid into the Fair Fund and be distributed to eligible investors along with disgorged funds. Since enactment of that law, it has been standard practice for the Commission to request creation of a Fair Fund and transfer into it all penalty funds collected. In some settled cases, where disgorgement would not have been ordered, the Commission has obtained orders of a nominal disgorgement to enable creation of a Fair Fund. n58

Imposition of civil money penalties against public companies that violated the securities laws has been a difficult philosophical problem for the Commission. Although the Commission has consistently sought money penalties against public companies since passage of the Remedies Act, the size and frequency of the penalties has varied greatly. In 2006, the Commission issued a public policy statement articulating the factors that it would consider when seeking a money penalty from a public company. n59

[iii] Criminal Prosecution.

The SEC enforcement authority is limited to civil actions. When conduct is sufficiently egregious it may warrant criminal prosecution by the Department of Justice; frequently through the Office of the U.S. Attorney for the Southern District of New York. The Division of Enforcement actively coordinates its investigations with criminal authorities. In some cases this is done at the beginning of the investigation, with the criminal authorities using the powers of a Federal Grand Jury to obtain testimony and evidence. In other instances, the division will complete its investigation and provide the appropriate criminal prosecutor with access to the investigative record compiled by the division. In exceptional circumstances, the Commission may formally vote to refer a matter for criminal prosecution. n60

An example of the certification of the Chairman is as follows:

REGULATORY FLEXIBILITY ACT CERTIFICATION

I, Harold M. Williams, Chairman of the Securities and Exchange Commission, hereby certify,

pursuant to **5 U.S.C. 605(b)**, that the proposed amendments published in Release No. 34-17517 (February 5, 1981), "PROPOSED AMENDMENTS TO PROXY RULES AND PROVISIONS RELATING TO SHAREHOLDER COMMUNICATIONS GENERALLY" will not, if promulgated, have a significant economic impact on a substantial number of small entities.

The reasons for such certification are that the proposed amendments will apply only to those entities (including small entities) that already are subject to the Commission's rules and regulations, and that these proposed amendments are expected to result in a minor net reduction in costs to all registrants. It is anticipated that the effects of the proposed amendments will not be significant for any class of registrants. Thus, the proposed amendments will not have a significant economic impact on any small entities.

February 5, 1981 Harold M. Williams

CHAPTER 2 Regulation of Securities Markets *

1-2 Federal Securities Exchange Act of 1934

SUMMARY OF THIS CHAPTER

After the initial sale or other distribution of securities, the securities are traded on "secondary" markets. Secondary securities markets serve two general purposes: to facilitate capital formation for businesses and government and to provide a system through which investors can profitably utilize assets. The most efficient markets do this by providing a means by which buyer and seller interest efficiently establishes a market price and liquidity is available at a low cost. Secondary markets also serve as important leading indicators of economic trends and as a source of diversity of investment and hedging vehicles.

Conceptually, there are two primary types of securities markets: centralized "auction" markets and "negotiation" or "dealer" markets. While none of the established United States securities markets are pure auction or pure dealer markets, historically exchanges have functioned as auction markets and over-the-counter, or "OTC" and the Nasdaq Stock Market ("Nasdaq"), markets have functioned as dealer markets. There are ten national securities exchanges: the American, Boston, National, Chicago, New York and Philadelphia Stock Exchanges, NYSE Arca (formerly the Pacific Exchange), the International Securities Exchange, the Chicago Board of Options Exchange and the Nasdaq Stock Market ("Nasdaq"). The OTC market encompasses all non-exchange traded securities, including corporate and government bonds, debentures, and mutual funds. The OTC market was long dominated, at least in terms of public perception, by Nasdaq, which grew out of a simple inter-dealer quotation system operated by the National Association of Securities Dealers, Inc. ("NASD").¹ However, in January 2006 Nasdaq became a registered national securities exchange. As a result, the formal components of the over-the-counter market are the Over-the-Counter Bulletin Board, which is operated by, but not part of Nasdaq, and stocks quoted on a less formal quotation system known as the "pink sheets." Alternative trading systems, securities markets which operate with some characteristics of exchanges and some of the OTC market, rose in prominence at the end of the 20th century.

Alternative trading systems in some cases established relationships with national securities exchanges as a means of gaining direct access to the national market system. In October 2001, the Archipelago ECN effectively became subject to exchange regulation by becoming a facility of the Pacific Exchange. In August 2002 the Island ECN began disseminating its orders through the National Stock Exchange, then known as the Cincinnati Stock Exchange.

The late 20th and early 21st century had seen the rise of alternative trading systems, particularly electronic trading

1-2 Federal Securities Exchange Act of 1934

systems, or "ECNs," which typically function as electronic auction markets. The rise of ECNs had fostered dramatically greater competition between markets. However, by 2006, the proliferation of securities markets had largely been reversed through mergers and acquisitions. In April 2005, Archipelago, one of the last independent ECNs, agreed to be acquired by the NYSE. The lasting legacy of ECNs, however, was the expansion of electronic trading at the expense of floor-based markets. As a result of massive consolidation in the industry, this electronic trading was increasingly taking place on national securities exchanges. This trend culminated in the granting of Nasdaq's exchange application in January 2006.

In adopting the Securities Exchange Act of 1934 ("Exchange Act"), Congress intended the securities exchanges to be responsible for enforcement of the Exchange Act against exchange members, and persons associated with members, while the exchanges would be subject to regulation by the Securities and Exchange Commission ("SEC" or the "Commission"). Accordingly, Section 6 of the Exchange Act requires all national securities exchanges to be registered with the Commission. Similarly, the Exchange Act requires an "association" of brokers and dealers, such as the FINRA (previously the NASD), which regulates much of the OTC market, to be registered pursuant to Section 15A. Congress designated all registered national securities exchanges and securities associations as "self-regulatory organizations" ("SROs").

Transactions on national securities exchanges have historically been effected through brokers and dealers eligible to trade on an exchange, and were generally confined to securities listed on the exchange and to OTC securities that meet certain standards. Customers' buy and sell orders were traditionally executed on the exchange floor through a continuous auction system in which bids to buy and offers to sell are made by brokers on behalf of their customers. Prices of completed transactions are reported by the exchange through electronic systems.

Sales and purchases of securities on the OTC market have historically been executed through negotiation, rather than auction, by dealers buying and selling for their own account, with a mark-up or "spread" charged to investors. Nasdaq, which until 2006 was technically part of the OTC Market, is a highly-developed system through which customer orders and broker-dealer quotes interact in a central facility. Reports of transactions effected on the OTC market are made via NASD-sponsored trade reporting facilities.

The Securities Acts Amendments of 1975 directed the Commission to facilitate the development of a "national market system" integrating the various securities markets, and clarifying and strengthening the Commission's authority to promote the achievement of such a system. These amendments imposed stringent and explicit requirements and limitations on the exchanges and greatly increased the Commission's oversight functions. Congress granted the Commission unequivocal powers over the rules of SROs and imposed mandatory affirmative and negative requirements on SRO rules designed to assure that the SROs' self-regulatory role was fulfilled. *See § 2.01 infra.*

Under its new authority, the Commission adopted Rule 6a-1, enumerating the requirements for registration as a national securities exchange. Section 15A and the rules thereunder apply substantially the same requirements to the registration of securities associations such as FINRA. Both securities exchanges and FINRA are subject to periodic reporting requirements. Section 19(a)(1) prescribes the procedures the Commission must follow in processing an application for registration filed by an exchange or securities association. For an exchange or securities association to be so registered, the Commission must be satisfied that it has the capacity to comply and enforce its members' compliance with the provisions of the Exchange Act. These include standards governing the admission and discipline of members, and rules prohibiting the fixing of commission rates and establishing procedures for the reporting of securities quotations. *See § 2.02 infra.*

SROs are required to file all proposed rule changes with the Commission for approval. The Commission also is empowered on its own initiative to make certain changes to SRO rules in furtherance of the purposes of the Exchange Act. Any registered broker-dealer meeting applicable capital and competency requirements may be admitted to membership. Although Section 6(e)(1) prohibits national securities exchanges from unilaterally imposing fixed

1-2 Federal Securities Exchange Act of 1934

commissions and other charges, the Commission may permit the setting of reasonable fixed rates if such practice is reasonable in relation to the cost of providing the service and does not impose undue burdens on competition. In those instances in which the Commission lacks express authority to regulate SRO practices, any practices of an SRO that, in the absence of an exemption, would violate the antitrust laws could give rise to antitrust liability of the SRO and its member. Sections 6(d) and 15A(h) require SROs to provide fair procedures for disciplining members, denying membership, barring persons from becoming associated with members or barring access to services of the SRO. Any of these actions imposed by an SRO are reviewable by the Commission, and the Commission may modify or set aside any such action if it finds such actions inconsistent with the provisions of the Exchange Act to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act. The Commission's orders, in turn, are reviewable in the appropriate Court of Appeals.

The Commission is charged with overseeing the activities of an SRO on a continuing basis. In furtherance of this regulatory mandate, the Commission may conduct on-site inspections of the daily operations of the SRO and require the SRO to submit periodic reports. The Commission also may allocate regulatory responsibilities among SROs for the purpose of easing the burdens on the individual SROs. Pursuant to Rule 17d-2 under the Exchange Act, any two or more SROs may file a plan of allocation of regulatory responsibilities for the Commission's approval. The Commission may under certain circumstances censure, suspend or expel any member of an SRO. Under Section 21, the Commission may seek injunctive relief to enforce not only the provisions of the Exchange Act and the rules thereunder, but the SRO rules as well. Under Section 19(h), the Commission may suspend or revoke the registration of an SRO if it finds that the SRO has violated the Exchange Act or the rules thereunder or has unreasonably failed to enforce its own rules. *See § 2.03 infra.*

Section 11A of the Exchange Act, added by the 1975 Amendments, contemplates the development of a national securities market system linking all securities markets through data processing and communications facilities and making available current information on quotations and transactions to brokers, dealers and traders. The Commission is required to facilitate the establishment of a national market system and to designate the securities or classes of securities that will be qualified for trading in the national market system ("NMS"). Rule 600 of Regulation NMS, adopted in 2005 as part of a reorganization of the Commission's market regulation rules to replace former Rule 11Aa2-1, designates as NMS securities all OTC or exchange-listed securities for which transactions are reported pursuant to an effective transaction reporting plan approved by the Commission pursuant to Rule 601 of Regulation NMS [former Rule 11Aa3-1]. This includes all securities listed on the NYSE, Amex and Nasdaq and those listings of the smaller exchanges that substantially meet NYSE or Amex listing criteria.

In Rule 602(b) of Regulation NMS [former Rule 11Ac1-1(c)], the "Quote Rule," the Commission adopted a procedure for collecting, processing and disseminating bids, offers, and quotation sizes that may be relied upon by traders placing orders for the quoted securities. Brokers and dealers communicating bids and offers under the Quote Rule are obliged to publicly display their best bid and offer, including those placed in ECNs, and to honor the prices bid or quoted unless the bid or quote is revised before an order is presented. In furtherance of a National Market System, the Commission also has adopted Rule 602(a) of Regulation NMS [former Rule 11Ac-1(b)], which provides for a consolidated quotation (CQ) plan for making quotations available to vendors of market information on a current and continuing basis; Rule 601 of Regulation NMS [former Rule 11Aa3-1], which provides for a Consolidated Transaction Reporting System (CTRS) for the collection and dissemination of last sale information; Rule 603 of Regulation NMS [former Rule 11Ac1-2], governing the format in which quotations and transaction data must be displayed; and Rule 604 of Regulation NMS [former Rule 11Ac1-4], requiring the display of certain customer limit orders in broker-dealer quotations. The Commission also has adopted Rule 609 of Regulation NMS [former Rule 11Ab2-1], which enumerates the requirements for registration of exclusive securities information processors under Section 11A(b)(1). *See § 2.04 infra.*

The ten-year period beginning in 1995 was characterized by dramatic changes in the structure and ownership of securities markets, driven primarily by the increasing importance of electronic trading. Alternative trading systems, aided by favorable regulation and featuring electronic trading platforms with cutting edge technology, garnered

significant market share, primarily in Nasdaq stocks. While there were initially numerous alternative trading systems with significant market share, by 2005 there had been major consolidation both among alternative trading systems and between alternative trading systems and national securities exchanges. The consolidation occurred to such a degree that it appeared that the NYSE and Nasdaq would remain the two dominant markets, with the major effect of the growth of alternative trading systems being the increased importance of and changes in the nature of electronic trading.

In 2005 the SEC, at the end of a lengthy process, completed a highly controversial overhaul of its regulations governing securities markets by adopting Regulation NMS. In part, Regulation NMS was a reorganization of existing rules governing the securities markets into a single regulation. In addition, however, it involved four major substantive components. First, it extended a prohibition on "trade-throughs," or execution of orders on one exchange while a better price exists on another exchange, to Nasdaq, in addition to exchange-listed, stocks, though limiting "protected" quotes to those against which automatic executions are immediately available. See § 2.04[2][b][iii] *infra*. Second, Regulation NMS included a rule designed to improve access to quotations in NMS stocks, which includes a limit on fees that markets can charge for access to their quotations. See § 2.04[2][c][ii] *infra*. Third, the Commission adopted a rule prohibiting pricing in increments of less than one cent for all stocks priced at \$1.00 or more. See § 2.04[2][c][iii] *infra*. Fourth, Regulation NMS included amendments to the rules governing market data, designed to improve the availability of market data and allocate market data revenues in a manner that would reward markets that produce the most valuable data. See § 2.04[2][f] *infra*. In January 2006 Nasdaq became registered as a national securities exchange, eliminating the distinction between Nasdaq and exchange-listed securities. By 2008 the degree of competition between markets had subsided from its peak, and a major issue was whether electronic trading would eventually replace all floor-based trading. See § 2.05 *infra*.

FOOTNOTES:

(n1)Footnote 1. In July 2007, the NASD merged with certain functions of the New York Stock Exchange to become the Financial Industry Authority ("FINRA"). For general purposes of this chapter, the NASD and NYSE will be referred to as such if the reference is to a time prior to the merger.

* This chapter was revised and updated by Madeleine J. Dowling, a partner at Sidley Austin LLP in New York, New York. Ms. Dowling represents investment banks, broker-dealers and hedge funds in connection with a variety of regulatory, enforcement and compliance matters. She received her BA in English Literature at St. Lawrence University and her J.D. at Fordham University School of Law. Ms. Dowling thanks Bracha Pollack, Donna Tumminio, Jessica Hirsh, and Cindy Feng of Sidley Austin LLP for their contributions to this chapter.

CHAPTER 2 Regulation of Securities Markets *

1-2 Federal Securities Exchange Act of 1934 § 2.01

§ 2.01 The National Market System

[1] The National Market System for Securities--General

On June 9, 2005, the SEC adopted Regulation NMS, a sweeping reform of regulations governing the national market system. Regulation NMS had a long, tortuous and controversial history. It was first proposed in February 2004. n1 The initial Regulation NMS release contained four substantive proposals: the adoption of a uniform rule to prevent "trade-throughs," i.e., the executions of orders on a marketplace where a superior price is displayed on another market, subject to two major exceptions; the adoption of a rule governing the terms of access under which markets grant access to quotations for purposes of execution against them; a prohibition of "subpenny pricing," i.e. displaying quotations in increments of less than one cent; and amendments to the rules and joint industry plans governing dissemination of market data to change the manner in which revenues were allocated among markets. On April 21, 2004, the Commission held a Regulation NMS hearing at which various representatives of market participants and institutional customers discussed the four proposals. n2 The Commission then, based on the opinions expressed at the Regulation NMS hearing, issued a supplemental request for comment, on May 20, 2004. n3

On December 16, 2004, as a result of proposed significant modifications to the initial Regulation NMS proposal, the Commission published a new Regulation NMS release and established a new comment period. n4 The debate on Regulation NMS was particularly contentious, both within and outside the Commission. Commissioners Cynthia Glassman and Paul Atkins filed a dissent to the Regulation NMS adopting release, focusing on the extension of the trade-through rule to the Nasdaq market, which they believed was based on a flawed analysis and, further, would "limit competition and stifle innovation." n5 Several members of Congress also harshly criticized Regulation NMS, primarily because of its trade-through provisions, and the Senate Banking, Housing and Urban Affairs Committee went so far as to hold hearings between the time Regulation NMS was approved and before the Adopting Release was published. n6

Though most of the attention and debate on Regulation NMS understandably centered on the above substantive proposals, Regulation NMS also included a major reorganization of the regulations governing the national market system. While the substantive provisions of the final Regulation NMS received a decidedly mixed reception, the reorganization of the regulations, which had become riddled with inconsistencies, outdated references and unnecessary repetition, was an unqualified success. All regulations directly governing the national market system are now contained within Regulation NMS, which consists of Rules 600 through 612. n7 In addition, multiple and inconsistent definitions of the same term have been eliminated. In one extreme example, the key term "covered security" was defined

differently in the Quote Rule, the Limit Order Display Rule and Rule 11Ac1-6 [now Rule 606]. n8 The term "reported security" was separately defined in four rules--consistent definitions appeared in the Limit Order Display Rule, Rule 11Ac1-2 [now 603] and Rule 11Aa3-1 [now 601], but a different definition appeared in the Quote Rule. n9 The terms "covered security" and "reported security" have both been eliminated in favor of the terms "NMS security" and "NMS stock." n10 The adopting release for Regulation NMS includes a detailed discussion of the manner in which definitions under the national market system regulations were modified, moved or eliminated in Regulation NMS.

Appendix 2C has a detailed chart cross-referencing the provisions of the national market system regulations prior to Regulation NMS with the provisions of Regulation NMS. The chart identifies whether a particular provision has been moved to Regulation NMS or eliminated and, if moved, the corresponding provision of Regulation NMS.

Although the Securities Acts Amendments of 1975 (the "1975 Amendments") n11 added Section 11A to the Securities Exchange Act of 1934 ("Exchange Act") in a manner designed to ensure the development of a national securities market system linking all securities markets through data processing and communications facilities n12 the history extends back well before the 1975 Amendments. Pursuant to the 1975 Amendments, the Securities and Exchange Commission (the "SEC" or the "Commission") was directed by Congress to facilitate establishment of the national market system and given broad authority in Sections 11A(a) and (c) to oversee its implementation and operation. n13

While the concept of a "national market system" is not defined in the Exchange Act, n14 the national market system was intended to encompass all segments of the corporate securities markets n15 to fully realize the goals of Congress. n16 The two "paramount" objectives cited by the Committee on Banking, Housing and Urban Affairs of the United States Senate in the development of a national market system are:

- (1) the maintenance of stable and orderly markets, with maximum capacity for absorbing trading imbalances without undue price movements, and
- (2) the centralization of all buying and selling interest to enable each investor to have the opportunity for the best possible order execution, wherever the order originates in the system. n17

The problem of how to encourage the development and implementation of a national market system was approached in Senate Bill 249, as modified by the Conference Report, as n18

- (1) preserving the competing markets for securities that had developed,
- (2) breaking down all barriers to competition not serving a valid regulatory purpose, and
- (3) encouraging maximum reliance on communication and data processing equipment consistent with justifiable costs. n19

[a] The Origin of the Concept of a National Market System

The Commission traditionally has been compelled to devote most of its limited resources "to correcting abuses and responding to fundamental change as it occurred" in the secondary securities market. n20 The Special Study of the Securities Markets in the early 1960s, n21 the commission rate hearings in the late 1960s n22 and the Institutional Investors Study of 1971 n23 gave the Commission a factual predicate upon which regulatory analysis could be made of the efficiency and effectiveness of secondary securities markets. In particular, the Institutional Investors Study verified that multiple trading of stocks on more than one exchange tended to "fragment" the marketplace which, in turn, could impair the auction-agency character of the secondary securities markets. n24 Concerned about the continued efficacy of these markets, the Commission in its letter of transmittal accompanying the Institutional Investors Study first endorsed

the concept of a strong central market system for securities of national importance, in which all buying and selling interest in these securities could participate and be represented under a competitive regime n25

Shortly after the Commission issued its statement in connection with the Institutional Investor Study, the New York Stock Exchange (NYSE) n26 released a special study on the organization and operation of the securities industry. n27 This NYSE report called for the development of a "central market system" comprised of the New York, American, and certain regional securities exchanges to cure market fragmentation, to promote market efficiency, and to assure best execution of transactions. n28

The Commission in the fall of 1971 held extensive hearings that culminated in a "white paper" issued in early 1972 entitled "Policy Statement on the Future Structure of the Securities Markets." This statement was a broad, wide-ranging outline of many of the major problems the Commission had observed in the operation and structure of the secondary securities markets and announced certain major policies to deal with those problems.

The statement outlined four goals of a central market system:

- (1) implementation of a nationwide system for disclosure of market information designed to make price and volume information in all markets and quotations from all market makers universally available;
- (2) elimination of artificial impediments to dealing in the best available market created by exchange rules or otherwise;
- (3) establishment of terms and conditions upon which any qualified broker-dealer can negotiate access to all exchanges; and
- (4) integration of third market firms into the central market system while subjecting them to appropriate market responsibilities and other regulatory requirements commensurate with the benefits they may realize. n29

The Commission in this Statement, however, did not attempt to propose a detailed plan for the achievement of these goals. Instead, the Commission established three advisory committees to report to the Commission on the optimum method of implementing these objectives: the Advisory Committee on Corporate Disclosure; the Advisory Committee on a Central Market System; and the Advisory Committee on Block Transactions.

The Commission also announced two proposed rules--Rules 17a-14 and 17a-15 n30--to implement the first of its policy goals: the creation of a nationwide disclosure and market information system, the so-called composite tape and quotation systems, which would be the core of a new and efficient nationwide securities market system.

In March 1973, following receipt of reports from the three advisory committees, n31 the Commission issued another "white paper" in which the Commission concluded that the adoption of a central market system would foster more efficient, effective allocation of one of the nation's "most precious resources--investment capital." n32

To achieve this objective, the Commission proposed the formation of a central market system at the heart of which "will be an efficient and comprehensive communications linkage between market centers consisting of a real-time composite transaction reporting system and a composite quotation system displaying the bids and offers of all qualified market makers and listed securities." n33

Recognizing that "the implementation of an operational communication system, without more, would necessarily precipitate some restructuring of the way securities are traded," n34 the Commission identified certain problem areas to be resolved, including:

- (1) preservation of the principle of best execution;
- (2) nonmember access to exchange trading facilities;
- (3) off-board trading restrictions then imposed by exchange rules;
- (4) direct dealing between specialists and institutions;
- (5) the role of "upstairs market makers";ⁿ³⁵
- (6) regulation of market makers; and
- (7) implementation of a composite quotation system.

The policy statement concluded with a proposal by the Commission of a plan for implementation of a central market system. This plan involved, in substance, republication, revision, or revocation of Commission and self-regulatory organization (SRO) rules pertaining to membership, short sales, manipulative practices, regulation of third market makers, trade reporting, and anti-manipulative acts and practices.ⁿ³⁶

While the Commission was formulating its views on the central market system, members of both houses of Congress were advocating enactment of new legislation that would affect the duties and responsibilities of the Commission and, in some instances, mandate implementation of the regulatory proposals then espoused by the Commission. Subcommittees in both houses of Congress held extensive hearings that resulted in numerous Congressional reports.ⁿ³⁷ In addition, eighteen bills were introduced in the Senate over a four-year period.

The regulatory and legislative efforts culminated in the enactment of the Securities Acts Amendments of 1975, which specifically directed the formation of a national market system and charged the Commission with responsibility for facilitating that goal. In hindsight, the Commission has characterized its promotion of a national market system as an "unusual if not unique ... attempt by a federal agency to influence the evolutionary forces which shape the market place in order to stimulate the exploitation of technological advancements and to insure a fair field of vigorous competition."ⁿ³⁸

[b] Goals and Objectives of a National Market System

Section 11A(a)(1), enacted as part of the Securities Acts Amendments of 1975, sets forth the goals and objectives of a national market system for qualified securities,ⁿ³⁹ in the form of the following Congressional findings:

- (1) the securities markets are an important national asset to be preserved and strengthened;ⁿ⁴⁰
- (2) new data processing and communications techniques create the opportunity for more efficient and effective market operations;ⁿ⁴¹
- (3) it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure
 - (a) economically efficient execution of securities transactions,
 - (b) fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets,

(c) the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities,

(d) the practicability of brokers executing investors' orders in the best market, and

(e) an opportunity, consistent with the preceding four provisions, for investors' orders to be executed without the participation of a dealer; n42 and

(4) the linking of all markets for qualified securities through communication and data processing facilities will foster efficiency, enhance competition, increase the information available to brokers, dealers, and investors, facilitate the offsetting of investors' orders, and contribute to best execution of such orders. n43

[c] Underlying Principles

The Senate Committee on Banking, Housing and Urban Affairs, in its report to accompany Senate Bill 249, specified the basic underlying principles that should govern the establishment of a national market system. n44 First, the Committee expressed a clear preference for auction trading principles:

[W]ith respect to securities which are suitable for auction trading, the Committee believes that every effort should be made to design the national market system in such a way that public investors in these securities receive the benefits and protections associated with auction-type trading. n45

The second major national market system principle is that the types of securities qualified to be included in the national market system n46 should depend primarily on their characteristics n47 rather than the market, *i.e.*, exchange or over-the-counter, in which they happen to be traded. n48

The third principle was a refusal by Congress to achieve a nationwide centralized auction-type market for qualified securities by abolishing over-the-counter trading in listed securities, *i.e.*, the "third market," n49 unless the Commission found that "the maintenance or restoration of fair and orderly markets in such securities may not be assured through other lawful means" under the Exchange Act. n50

[d] National Market Advisory Board

Congress added a provision to the Exchange Act in 1975 that required the Commission to establish, within 180 days after the date of enactment of the 1975 Amendments, a National Market Advisory Board of fifteen members. n51 The members were to serve for a term specified by the Commission of at least two and not more than five years. n52 The members of the National Market Advisory Board were required to be from different geographical areas of the United States and had to consist of:

(1) persons associated with brokers and dealers, who were to be a majority of the members, and

(2) persons not so associated who were to have been representative of the public, and, to the extent possible, also to have knowledge of the securities markets of the United States. n53

The National Market Advisory Board was given the responsibility of formulating and furnishing to the Commission its views on significant regulatory proposals made by either the SEC or any self-regulatory organization concerning the establishment, operation, and regulation of the securities markets in the United States. n54

The National Market Advisory Board was directed to study and make recommendations to the SEC concerning appropriate steps to facilitate the establishment of a national market system. n55 The National Market Advisory Board was also directed to study the possible need for modifications to the scheme of self-regulation under the Exchange Act to adapt such scheme to a national market system. n56 This study was to include the Board's views on the need for establishment of a new self-regulatory organization, the National Market Regulatory Board, to administer the national market system. n57 Congress directed the National Market Advisory Board to report to it, on or before December 31, 1976, the results of its study of possible modifications of the scheme of self-regulation under the Exchange Act, with recommendations for legislation. n58

On December 6, 1977, the National Market Advisory Board presented its final report to the Commission. After more than two years of debate, the Board members were unable to make any specific recommendations concerning the development of the National Market System. The December 1977 report provided the Commission with a statement of major alternatives, but did not make any specific recommendations. In his transmittal letter to the Commission, John J. Scanlon, Chairman of the National Market Advisory Board, admitted that the Board members could not agree on any one course of action to follow to achieve the objectives of a functional national market system. n59

In its 21-page report, the Board considered four alternative courses of action, with several Board members endorsing each alternative. These alternatives were:

- (1) No Commission action beyond continuing involvement in the development of a composite quotation system. n60
- (2) Commission involvement in the development of a composite quotation system in addition to regulatory action to encourage establishment of intermarket linkage. n61
- (3) Commission action to encourage establishment of a composite limit order book designed to protect limit orders on a system-wide basis, which would be in addition to, or supplement, a composite quotation system and intermarket linkage system, but that would permit execution of orders left in the system only by specialists and qualified market makers.
- (4) Commission action to encourage establishment of a composite limit order book with orders in the book always having priority at a price over any other orders in the system at that price. n62

Upon submission of this final report to the Commission, the National Market Advisory Board became dormant. The terms of the original Board members expired and no new Board members were appointed.

[e] Commission Response to the National Market Advisory Board Report

Shortly after the release of the National Market Advisory Board (NMAB) final report, members of Congress demanded that the Commission announce a specific timetable and plan for the development of a national market system. n63 In response to this pressure and to fill the void left by the board's report, the Commission:

- (1) adopted Rule 11Ac1-1 [now Rule 602], which requires every securities association and exchange to collect, process, and disseminate to vendors certain market information for inclusion in a composite quotation system, n64 and
- (2) announced a program and timetable to facilitate the development of a functional national market system. n65

In summary, the Commission's program called for

- (1) the implementation of Rule 11Ac1-1 [now Rule 602] by May 1, 1978;
- (2) the "prompt" development of market linkage and order routing systems n66 with specific plans to be submitted to the Commission by the SROs by April 15, 1978;
- (3) the "prompt" development of SRO systems to effectively protect public limit orders, n67 with specific plans to be tendered by September 30, 1978;
- (4) the evaluation by the Commission of the effect of Rule 19c-1 which prohibited certain SRO off-board trading restrictions n68 and a determination by September 30, 1978 whether further regulatory action was appropriate;
- (5) a Commission determination by April 30, 1978 whether additional regulatory action was required to facilitate the development of a consolidated transaction reporting system; n69 and
- (6) the commencement of rule-making proceedings by the Commission no later than June 30, 1978 to determine what categories of securities would be eligible for trading in the national market system. n70

Finally, the Commission identified five "additional issues" relating to a national market system that, according to the Commission, had to be resolved. n71

[2] Components of a National Market System

The 1975 Amendments n72 contained broad goals for the national market system n73 and provided that detailed operational questions were to be resolved by the Commission and the securities industry. n74 The development of the national market system was essentially open-ended: no specific trading system has been mandated as the target toward which the securities markets are evolving. n75

The Commission's January 1978 policy statement on the development of a national market system for "qualified securities" n76 sets forth, among other things, the Commission's view of the elements of a national market system. Such a system includes: market linkage and order routing systems, a composite quotation system, a consolidated transaction reporting system, and nationwide limit order protection. n77

[a] Designation of "Qualified Securities" for the National Market System

Section 11A directs the Commission, by rule, to designate the securities or classes of securities that will be qualified for trading in the national market system ("NMS"). n78 "Exempted securities," such as U.S. Treasury bills and municipal securities, are not eligible for NMS trading. n79

After soliciting public comment on the issue of what securities should be included in the NMS, n80 the Commission concluded that both listed equity securities and certain OTC securities possess characteristics, such as national investor interest and substantial asset and earnings history, that justify their inclusion in the NMS. Before designating OTC securities for the NMS, however, the Commission would require the implementation of certain technical elements of the NMS, specifically the development of a system for reporting current quotes and last sale information. n81

In 1976, the Commission released proposed Rule 11Aa2-1 [now replaced by Rule 602], which would establish two "quantitatively different sets of standards" to determine whether an equity security would be designated as an NMS security. n82 Securities satisfying the first standards (Tier 1 securities) would automatically be deemed to be NMS securities. Other securities (Tier 2 securities) could be designed NMS securities if they satisfied less-stringent criteria

upon application of the issuer or two or more current or prospective market centers. n83

In making this proposal, the Commission announced certain informal policy conclusions that re-enforced the two-tier concept of proposed Rule 11Aa2-1:

- (1) Issuers should not be permitted to avoid the inclusion of their securities in the NMS.
- (2) Designation of equity securities as NMS securities should be made on the basis of their individual characteristics such as trading volume, price, and number of shareholders, and not on whether the securities had previously been traded on an exchange or through the OTC market.
- (3) The NMS should be restricted to securities traded in two or more market centers.
- (4) Trading of a particular security in the NMS should not commence until "investors in that security receive the benefits and protections inherent in the system as a whole." n84 Therefore, OTC securities should be required to be participants in both the consolidated quotation system and the consolidated transaction reporting system before such securities, even if satisfying the Tier 1 criteria, could trade in the NMS. n85
- (5) There should be some sort of nationwide price protection for OTC NMS securities. n86

By 1981, many of the regulatory concerns voiced by the Commission had been resolved. The securities industry, for example, had implemented an apparently effective consolidated transaction reporting system and consolidated quotation system. The NASD had upgraded its Nasdaq trading system. n87 Significant progress had been made in the automatic linkage of multiple trading markets. n88 Finally, off-board trading restrictions had been eased, n89 and nonmember access to exchange trading facilities had been enhanced. n90

As many of its regulatory concerns had been addressed, the Commission adopted Rule 11Aa2-1 and its two tier criteria for designation of NMS securities, n91 which focused on a company's financial status and the trading characteristics of its securities. These standards applied to OTC stocks only. n92 Rule 11Aa2-1 was amended several times n93 to broaden the definition of national market system securities. In 1987 the Commission amended Rule 11Aa2-1 to abandon the two-tier system for OTC securities n94 and adopt instead a new standard n95 designating as national market system securities all "reported securities," defined in former Rule 11Aa3-1(a)(4) [now eliminated] as "any security or class of securities for which transaction reports are collected, processed and made available pursuant to an effective transaction reporting plan." n96 With the adoption of Regulation NMS in 2005, Rule 11Aa2-1 was eliminated, and the term "national market system security" was preserved only to define the term for purposes of Section 11(a)(2) of the Exchange Act. Under Rule 600(a), the term "national market system security" means "NMS security." n97 This latter term, along with the term "NMS stock," are used to identify the securities subject to the various provisions of Regulation NMS. The term "NMS stock," which excludes listed options, is needed because some of the national market system regulations do not apply to listed options. n98

In February 1998, the NASD amended its "Designation of Nasdaq National Securities." n99 The plan called for the NASD to review Nasdaq securities to determine their eligibility for NMS status, but also permitted issuers to petition the NASD for voluntary designation. A standing committee of the NASD Board of Governors would decide whether any such petition met the voluntary designation criteria.

Originally, if Nasdaq determined that a security qualified for NMS status, it could be included on the Nasdaq National Market. n100 However, because NMS securities are defined by reference to whether they are included in a transaction reporting plan filed with the Commission, and because the UTP Plan since 2001 has included all Nasdaq securities, a distinction arose between "NMS securities," which include all Nasdaq securities, and "Nasdaq National Market

Securities," which are only those securities satisfying Nasdaq's more stringent National Market listing standards. n101

[b] Market Linkages and Order Routing

An important component of a national market system for securities is a market linkage and order routing system. Such a system would permit the efficient transmission of orders

(1) among the various markets for qualified securities, whether on an exchange or over-the-counter ("qualified markets"), and

(2) from brokers and dealers to all qualified markets. n102

To link qualified markets effectively, two components are needed, at a minimum:

(1) an intermarket order routing system to permit orders for the purchase and sale of multiple-traded securities to be sent directly from any qualified market to another such market promptly and efficiently, and

(2) a universally available message switch to permit any broker or dealer to route orders for the purchase or sale of qualified securities from the offices of the broker or dealer to any qualified market trading that security. n103

Following enactment of the Securities Acts Amendments of 1975, the securities industry developed several competing market linkage and order routing systems: the Intermarket Trading System ("ITS"), the Regional Market System ("RMS"), the National Securities Trading System ("NSTS") of the Cincinnati Stock Exchange, n104 and the Computer Assisted Execution System ("CAES"), n105 a part of the Nasdaq system.

By 1981, the ITS and CAES n106 had emerged as the dominant systems. n107 In that year, the Commission ordered the members of ITS n108 and the NASD to implement an automatic interface between the ITS and CAES to provide, among other things, a market linkage and order routing system with automatic execution capability. n109

[i] Evolution of Competing Market Linkage Systems

The major problems to be remedied by the adoption of the NMS arise from market fragmentation. n110 Accordingly, while the Commission addressed various regulatory issues, such as fixed commission rates n111 and off-board trading restrictions, n112 a major focus was to mandate the securities industry's development of market linkage systems.

[A] The Intermarket Trading System

In 1978, five securities exchanges, under the leadership of the NYSE, n113 obtained Commission authorization to initiate on an experimental basis an electronic market linkage system to be jointly funded and operated. n114 This system was designated the Intermarket Trading System ("ITS") and was touted by its members as "the" pivotal element of an NMS. n115

The primary function of ITS is to link geographically separated market centers by routing messages between them. n116 The ITS enables a trading participant physically present on the floor of an exchange to transmit his own or a customer's order in an ITS-traded security to another market center.

An ITS transaction is initiated by the entry of an order, known as a "commitment to trade," into a computer terminal

located on the floor of the exchange. At that moment, the commitment is time stamped, validated, assigned a unique identification number, and logged by ITS.

In a matter of seconds, the commitment is delivered on queue for delivery to the destination market center, where the commitment is printed on an ITS printer.

A "commitment to trade" is a firm obligation to either buy or sell an ITS security for either one minute (a "T-1" option) or two minutes (a "T-2" option). The originator elects which option to apply, and the commitment is irrevocable during that period.

If the "commitment to trade" is accepted by a broker or dealer at the designated market, an abbreviated message is entered into the system and ITS reports an execution to the originating market center.

Accordingly, the ITS preserves the exchange floor as the prime focus of the auction process, and facilitates the flow of orders from brokers and specialists on one floor to specialists on another. The ITS functions with a separate order execution system from the quotation display system. n117

ITS commenced operations in 1978 with 11 securities. n118 By 2004, approximately 5,041 securities were being traded in the ITS network. n119 During 2004, there were 13.4 million trades through ITS, totaling 17.9 billion shares. n120

The Commission has monitored closely the operation, efficiency, and effectiveness of the ITS. n121 The Commission has expressed some concern over the possibility of "trade-throughs." n122 In 1981, the Commission approved a "trade-through" rule, outlining procedures for corrective action in the event of a trade-through. n123 The Commission's staff has concluded that less than one percent of the ITS trades involve potential trade throughs. n124 Moreover, ITS has significantly reduced execution costs. Accordingly, the Commission terminated the experimental classification of ITS and approved the system for an indefinite period. n125

While the ITS has been an important component of the National Market System since its introduction in 1978, advances in technology and the changing structure of markets led to questions as to whether it is even necessary. n126 The implementation of Regulation NMS was widely expected to spell the end of the ITS system, which at the time Regulation NMS was adopted did not even provide the functionality demanded by the new Trade-Through Rule. n127 In August 2005, Nasdaq announced that it would withdraw from the system. n128 Several of the smaller exchanges also appeared to be considering alternatives to the ITS. n129

[B] The Regional Market System and the National Securities Trading System

In 1977, four regional stock exchanges commenced a pilot program, the Regional Market System ("RMS"), to transmit principal and agency orders electronically between market centers. n130 Brokers and dealers participating in the system could enter orders, which would be stored and displayed on the basis of time and price priority. The RMS began pilot operations with 36 issues.

Thereafter, the Cincinnati Stock Exchange, now known as the National Stock Exchange ("NSE"), obtained Commission approval to institute, on an experimental basis of nine months, the National Securities Trading System ("NSTS") as a pilot program utilizing RMS technology. n131 Originally called the Multiple Dealer Trading System, this system permitted NSE members, without the necessity of maintaining a presence on the floor of the NSE or any other exchange, to participate in an auction-type market.

In addition, the NSTS permitted a specialist on any national securities exchange, without being or becoming a member of the NSE, to enter bids in the NSTS as principal or agent in any security in which the specialist is registered on another exchange. The NSTS effectively linked the NSE exchange and "upstairs" market makers in geographically

dispersed locations, thereby permitting the full range of off-board trading contemplated by Congress. n132

The NSTS is an electronic communication system through which bids and offers of competing dealers, as well as public bids and offers, may be consolidated for review and execution by "Users." n133 Orders are accepted into the NSTS in certain securities ("designated issues") from persons who qualify as "Users." n134 All orders must be entered into the NSTS as limit orders; market orders, as such, are not executed by the system. n135

Orders in the NSTS are executed first by price and then, as to orders at the same price, by time of entry. "Public agency orders" n136 are granted priority over other orders at the same price. n137 A nonexecuted public agency order, once entered in the NSTS, may be removed only upon cancellation, in connection with a transfer of the order to another exchange, or to permit the approved dealer or member who entered the order to execute the order as principal pursuant to a prior guarantee to provide an execution should a trade take place in another market at the specified limit price (a "limit order guarantee"). n138 Trades executed on the NSTS are confirmed by a hard-copy confirmation of each transaction promptly to each User, or User's agent, who is a party to the transaction. n139

The NSTS was initially authorized by the Commission as a "pilot" experimental program. n140 The Commission twice extended the duration of that program. n141 In 1982, the Commission approved an application by the NSE to terminate the "pilot" phase of the NSTS and granted permanent status to the system. n142

The number of NSTS stocks has grown steadily since the system commenced operation in June 1978 with 38 issues. By 1980, this figure had increased to 49, and by the end of 1981 to 73. By August 1982, there were 88 NSTS stocks, of which 85 were NYSE-listed. n143

Merrill Lynch, Pierce, Fenner & Smith, the largest participant in the NSTS at the time, withdrew from the system in 1983, precipitating a large drop in the NSE's volume. The NSE's percentage of share volume dipped from 0.38 percent in 1982 to 0.15 percent in 1985. n144 In order to remedy this problem, the NSE began an affiliation with the Chicago Board Options Exchange ("CBOE"). After that time, trading volume increased, and in 2004 the NSE percentage of dollar volume on all national securities exchanges and Nasdaq was 10.5 percent, with over \$2.9 trillion in dollar volume. n145

Due to the limited number of NSTS issues and participants, NSTS trading volume has been modest compared to the NYSE, although trading increased steadily. n146

[C] The Computer Assisted Execution System

In the early 1970s the NASD determined to improve the efficiency of negotiating OTC transactions and developed an automated telecommunications system known as Nasdaq, now a registered national securities exchange known as the Nasdaq Stock Market. n147 Through a network of computer terminals, NASD members currently have virtually instantaneous interoffice communications.

Following the 1975 Amendments, the Commission urged the NASD to upgrade Nasdaq to permit intermarket linkage between the OTC market and securities exchanges. n148 The NASD responded by developing a Computer Assisted Execution System ("CAES") to route and automatically execute certain orders.

Utilizing Nasdaq, CAES participants could enter orders that are routed automatically to the participating market maker offering the best price. An order is executed automatically with the market maker who has entered the best price, if the order is within the market maker's displayed size. If the order exceeds his size, the balance is executed with the next market maker(s), according to time priority. n149

Every trade in CAES was reported within 90 seconds after execution. Large block trades are negotiated over the

telephone, but reported and displayed like any other trade through the Nasdaq system. All Nasdaq/National Market securities were traded through CAES. In March 2004, the Commission approved a Nasdaq proposal under which all securities traded through ITS were traded using SuperMontage, which resulted in the elimination of CAES because it was no longer necessary. n150

[iii] Interfacing of Market Linkage Systems

The second type of facility, in addition to an intermarket order routing system, n151 necessary to link qualified markets effectively is a universally available message switch. The message switch would permit any broker or dealer to route orders for the purchase or sale of qualified securities n152 from its offices "upstairs," or off the floor of an exchange, to any qualified market trading in that security. n153

A universally available "upstairs" message switch should operate in a neutral fashion, *i.e.*, permitting brokers and dealers to route orders to and among all such markets on a nondiscriminatory basis. n154

In its January 1978 statement concerning the development of a national market for securities, n155 the Commission expressed its belief that the self-regulatory organizations should combine their efforts and take joint action to make available to their members a single broker order routing system. n156 In June 1978 the Commission requested eight self-regulatory organizations to comment on issues relating, among other things, to whether the routing of orders by brokers on an order-by-order basis should be a characteristic of a national market system, and, if so, whether a single exclusive message switch is the means by which such routing should be achieved. n157

The development of a universally available, neutral, "upstairs" message switch was not imminent. n158

The formation and successful operation of the ITS, RMS, and NSTS proved, however, at least to the Commission, that the goals of Section 11A of the Exchange Act n159 were attainable. The ITS appeared to provide an effective basis for an intermarket order routing system for the purchase and sale of multiply-traded securities, n160 which was recognized by the Commission as early as 1978. n161

The NSTS also contained elements of a NMS, namely a composite quotation system, an order routing system, an intermarket communication system, and a central limit order book. n162 Moreover, the NASD's pending enhancements to Nasdaq offered further potential for NMS linkage.

In 1978 the Commission solicited comments on the feasibility and practicality of ordering some sort of interface between ITS, NSTS, and the NASD's systems. n163 The Commission also requested the NYSE and AMEX to make available to other SROs their jointly owned common message switch. n164

After extensive public comment, Commission analysis of the ITS and NSTS, and completion of the Nasdaq upgrading, the Commission announced in 1981 a proposed order that would mandate an automated interface between the ITS, NSTS, and Nasdaq. n165

Shortly thereafter, the NSE joined the ITS and the Commission approved a manual interface between the NSTS and the ITS. n166 Under the plan, an ITS terminal would be placed on NSE's trading floor and staffed by NSE personnel. n167 All commitments to or from the NSTS would be routed to the NSE trading floor and, thereafter, rerouted to the designated ITS market center.

While the Commission expressed concern that the manual interface might not be efficient, n168 the Commission viewed the linkage of ITS and NSTS to be "critical" to achieving the Commission's goals of "eliminating trade throughs and ensuring nationwide price protection of limit orders traded through ITS." n169

In April 1981, the Commission ordered the members of the ITS and the NASD to implement by March 1, 1982 an "automated interface" between the ITS and NASD's CAES, a part of the Nasdaq system. n170 The order set forth certain functional characteristics of the interface: n171

- (1) The integrated system should be able to send and receive commitments to trade and responses, preopening notifications and responses, and administrative messages.
- (2) Communications should be in standard ITS format.
- (3) The system should cover any security eligible for off-board trading under Rule 19c-3, n172 already included in ITS, and which had at least one OTC market member registered with the NASD.
- (4) No person other than a registered OTC market maker may have access to the automated interface to send or receive commitments to trade, preopening notifications, or administrative messages except through the facilities of an exchange participating in the ITS.
- (5) Registered OTC market makers may have access only with respect to securities in which they are acting as a CAES market maker.

Rejecting various arguments that the automated interface was premature, n173 the Commission asserted that the automated interface was essential to the development of an NMS. Accordingly, the Commission ordered the submission of an implementation timetable by June 15, 1981.

In March 1982, the Commission issued a "status report" on the ITS/CAES interface. n174 Simultaneously, the Commission announced proposed amendments to the ITS plan that would mandate integration of the NASD in ITS. Acknowledging that the ITS members and NASD had made "good faith efforts" toward achieving the interface, the Commission nevertheless concluded that progress had not been satisfactory. Declaring the interface "to be a critical event in the development of the national market system," the Commission lamented the "failure" of the ITS participants and the NASD to reach a final agreement. The Commission concluded that it could no longer refrain from interjecting its views in the negotiating process and, therefore, proposed amendments to the ITS plan which, in effect, would resolve or defer for future consideration the various issues raised by the ITS/NASD negotiators. n175

The Commission deferred implementation of the automatic interface until May 1, 1982 to obtain comments on its proposed order and to afford additional time to complete negotiations between ITS members and the NASD. In May 1982, the Commission adopted amendments to the ITS plan in substantially the same form as proposed but deferred the implementation date of the ITS/CAES interface to May 17, 1982. n176

On May 17, the ITS/CAES interface commenced "pilot" operations with trading limited to 30 exchange traded securities eligible for off-board trading. n177 After approximately six months of operation, the Commission termed the interface "a significant achievement," acknowledging however, that "there are a number of aspects of ITS which deserve further attention and improvement" n178

[iii] Trade-Through Rule

The trading of securities across multiple markets had long created a concern that transactions could be executed on one market while a better quotation is available on another market. In this situation, the market with the inferior quotation is said to "trade through" the superior quotation on the second market. Until Regulation NMS, the Commission did not directly address trade-throughs. As a result in the quirk in the development of securities markets, a trade-through rule applied only to exchange-listed, but not Nasdaq, securities. This situation came about because the only trade-through rule in existence prior to Regulation NMS was contained in the ITS Plan. n179 Nasdaq at the time was not a national

securities exchange and therefore not a participant in the ITS Plan, and no trade-through rule was adopted with respect to Nasdaq stocks. The ITS trade-through rule was thought by many to be ineffective and to inhibit competition, and many commentators argued for its abolition. n180 Ultimately, the Commission proposed not eliminating the rule but in fact expanding it, which touched off highly-charged debate reaching all the way to the halls of Congress. In the initial Regulation NMS proposing release, the Commission requested comment on a rule that would require markets trading national market system securities to adopt and enforce policies and procedures reasonably designed to prevent trade-throughs in their markets. n181 The proposed rule had two exceptions: the first was an "opt out" exception that would have allowed customers, as well as broker-dealers trading for their own account, to consent to having their orders executed on a market without regard to quotations in other markets, and the second would have allowed automated markets to trade through a non-automated market within certain price parameters. n182

As a result of the Regulation NMS Hearings and comments on the initial Regulation NMS proposing release, when it repropose Regulation NMS in December 2004, the Commission took a different approach to the proposed trade-through rule. One major difference is that under the repropose trade-through rule only automated quotations would be protected from trade-throughs. n183 In the December 2004 release the Commission also proposed two alternatives for the quotations covered by the trade-through rule, one labeled the "Market BBO Alternative" and the other designated as the "the Voluntary Depth Alternative." n184 The Market BBO Alternative would have protected only quotations that represented the best national bid or offer for a security. The Voluntary Depth Alternative would have protected any quotations that markets voluntarily disseminate in the consolidated quotations stream. n185 In addition, repropose trade-through rule had more exceptions than those in the rule as originally proposed, including one for failures or material delays in the market displaying the quotation that would otherwise be protected, for "intermarket sweep orders," i.e., limit orders that, when combined with other orders are designed to execute against the full displayed size of all protected quotations with a superior price. n186

The Commission received more than 2200 comments on the trade-through proposal, including over 34 from members of Congress. n187 Many of the comments were on the issue of whether extending trade-through protection was even appropriate. n188 The Commission exhaustively analyzed these comments, to the point of supplementing a study by the Commission's Office of Economic Analysis on the incidence of trade-throughs on the various markets when commenters questioned the accuracy of the original study. n189

As adopted, the Trade-Through Rule, Rule 611 of Regulation NMS, requires markets, subject to exceptions set forth in the rule, to "establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent trade-throughs on that trading center of protected quotations in NMS stocks." n190 The term "protected quotations" is defined to include all automated quotations disseminated pursuant to an effective national market system plan. n191

The Trade-through Rule also requires trading center to conduct regular surveillance to determine the accuracy of its trade-through policies and procedures and to take prompt action to remedy deficiencies in the policies and procedures. n192

The Trade-Through Rule has exceptions for transactions:

- executed when the market displaying the traded-through quotation was experiencing a failure, material delay, n193 or malfunction of its systems or equipment;
- that are not settled "regular way," such as transactions with extended settlement terms;
- that are a single-priced opening, reopening, or closing transaction by the trading center; n194
- executed at a time when a protected bid was priced higher than a protected offer in the stock, i.e. when a market is "crossed";

- that are executions of intermarket sweep orders;
- effected by a market that simultaneously routed an intermarket sweep order to execute against the full displayed size of any protected quotation in the NMS stock in question. n195
- that represent executions of orders at a price not based, directly or indirectly, on the quoted price of the NMS stock at the time of execution and for which the material terms were not reasonably determinable at the time the commitment to execute was made;
- where the market displaying the protected quotation that was traded through had displayed, within one second prior to execution of the transaction that constituted the trade-through, a best bid or best offer, as applicable, for the NMS stock with a price that was equal or inferior to the price of the trade-through transaction;
- that represent executions by a market of an order for which, at the time of receipt of the order, the trading center had guaranteed an execution at no worse than a specified price, i.e., a "stopped order." n196

A market's trade-through procedures must include procedures designed to ensure compliance with the conditions for any exemption claimed. n197 The Commission may grant exceptions to the Trade-Through Rule, either unconditionally or on specified terms and conditions, to specific persons or for particular transactions, securities or classes of securities, quotations or orders. n198

[c] Composite Quotation System

Communications systems designed to provide automated dissemination of last sale and quotation information with respect to securities were cited in the Senate Committee Report to accompany Senate Bill 249 as forming "the heart of the national market system." n199 In Section 11A, added by the 1975 Amendments, Congress:

- (1) set forth one of the goals of a national market system as assuring to brokers, dealers, and investors the availability of information with respect to both quotations for and transactions in securities, n200 and then
- (2) granted the Commission rule-making powers relating to quotations and transactions. n201

The development of a composite quotation system was mentioned by the Commission as one of the initiatives that must be taken over the next year, in its January 1978 statement on the development of a national market system. n202 To facilitate the prompt development of a composite quotation system, the Commission adopted Rule 11Ac1-1 [now Rule 602] to improve the quality and reliability of quotation information made available by national securities exchanges and third market makers. n203

[i] Quote Rule--Rule 602 [former Rule 11Ac1-1]

In 1978, n204 the Commission adopted Rule 11Ac1-1, n205 "Dissemination of Quotations for Reported Securities," governing dissemination of quotation information with respect to equity securities n206 as to which last sale information is reported in the consolidated transaction reporting system. n207 After its adoption, Rule 11Ac1-1, the "Quote Rule," n208 was amended six times before being redesignated as Rule 602 with the adoption of Regulation NMS in 2005. n209

Rule 602 requires every exchange and association to establish and maintain procedures and mechanisms for:

- (1) collecting bids, offers, quotation sizes, and aggregate quotation sizes from responsible brokers or dealers n210 (who are members of such exchange or association);
- (2) processing such bids, offers, and sizes; and
- (3) making them available to vendors, n211 as follows:
 - (i) as to a national securities exchange, at all times the exchange is open for trading, the exchange must collect, process and make available to vendors the best bid, the best offer, and aggregate quotation sizes for each subject security n212 listed or admitted to unlisted trading privileges which is communicated on any national securities exchange by any securities responsible broker or dealer, n213 and
 - (ii) as to an association, at all times that last sale information with respect to reported securities is reported pursuant to an effective transaction reporting plan, the association must collect, process and make available to vendors the best bid, best offer, and quotation sizes communicated otherwise than on an exchange by each member of such association acting in the capacity of an OTC market maker n214 for each subject security and the identity of that member. n215

For each published bid or offer n216 of a member with respect to a subject security, every exchange is required to establish and maintain procedures for ascertaining and disclosing to exchange members, upon presentation of orders sought to be executed by exchange members in reliance upon Rule 602(b)(2) [former Rule 11Ac1-1(c)(2)], n217 the identity of each responsible broker or dealer who made the bid or offer n218 published, and the quotation size associated with the bid or offer.

If an exchange determines that, at any time while open for trading, the level of trading activity or the existence of unusual market conditions makes the exchange incapable of collecting, processing, and making available to quotation vendors the data for a reported security required by Rule 602(a)(1)(i) [former Rule 11Ac1-1(b)(1)] n219 in a manner accurately reflecting the current state of the market on the floor of that exchange, then the exchange must immediately notify all specified persons n220 of that determination. n221 Any such exchange determination must be pursuant to rules and regulations approved by the Commission under Section 19(b)(2). n222 Upon notification, both the responsible brokers or dealers who are members of that exchange and the exchange itself are relieved of their obligation under paragraphs (b)(2) and (c)(3), and (a)(1) and (2), respectively, of Rule 602 [Paragraphs (c)(2) and (d)(3) and (b)(1) and (2) of former Rule 11Ac1-1] with respect to that security. n223

An exchange or association may make available to quotation vendors

- (1) indications of interest, or
- (2) bids or offers with respect to a subject security at any time such exchange or association is not required by Rule 602(a)(1) [former Rule 11Ac1-1(b)(1)] to do so. n224

Any exchange may elect to collect, process and disseminate data on a covered security, except that notification must be given to all specified persons if the security is traded on only one exchange and not traded by any OTC market maker. n225

Similarly, an OTC market maker may elect to comply with the Quote Rule with respect to any covered security by communicating to his association bids, offers, and quotation sizes, except that notification of the election must be given to both the association and all specified persons if the covered security is traded on only one exchange and not traded by any other OTC market maker. n226

Any election by an exchange or OTC market maker to comply voluntarily with the Quote Rule will cease to be in effect if the exchange or market maker ceases to make available or communicate bids, offers, and quotation sizes. n227

Rule 602(b) [former Rule 11Ac1-1(c)] contains the obligations of responsible brokers and dealers under the Quote Rule. Responsible brokers and dealers must promptly communicate to their exchange or association, as the case may be, their bids, offers, and quotation sizes with respect to any subject security, pursuant to procedures established by that exchange or association. n228

Every responsible broker or dealer is obligated, subject to paragraph (b)(3) of Rule 602 [paragraph (c)(3) of former Rule 11Ac1-1], discussed below, to execute any order to buy or sell a subject security, other than an odd-lot order, presented to such broker or dealer by either

- (1) another broker or dealer, or
- (2) any other person belonging to a category of persons with whom such responsible broker or dealer customarily deals. n229

The order must be at a price at least as favorable as the bid price or offer price comprising the responsible broker's or dealer's published bid or published offer n230 in any amount up to the published quotation size. n231

The Quote Rule contains two exceptions to the firmness provisions discussed above. One exception is in the case of a "revised quotation size" and the other concerns a "revised bid or offer." n232

A responsible broker or dealer is not obligated by the firmness provisions in paragraph (b)(2) of Rule 602 [paragraph (c)(2) of former Rule 11Ac1-1] to purchase or sell a subject security in an amount greater than the broker's or dealer's revised quotation size, if

- (1) prior to the presentation of an order to buy or sell a subject security, a responsible broker or dealer has communicated to its exchange or association a revised quotation size, or
- (2) at the time an order to buy or sell a subject security is presented, a responsible broker or dealer is in the process of effecting a transaction in the subject security, and immediately after such transaction is completed, the broker or dealer communicates to its exchange or association a revised quotation size. n233

A responsible broker or dealer is obligated by the firmness provisions in paragraph (b)(2) of Rule 602 to execute a transaction in a subject security only at his revised bid or offer in any amount up to either his published or revised quotation size, as the case may be, if

- (1) before the order sought to be executed is presented, a responsible broker or dealer has communicated to its exchange or association a revised bid or offer, or
- (2) at the time the order sought to be executed is presented, the responsible broker or dealer is in the process of effecting a transaction in such subject security, and immediately after completion of such transaction, the broker or dealer communicates to its exchange or association a revised bid or offer. n234

Subject to the right of an exchange or OTC market maker to elect to comply voluntarily with the Quote Rule as to any reported security, n235 no exchange or OTC market maker may make available, disseminate, or otherwise communicate for display on a terminal or other display device any bid, offer, quotation size, or aggregate quotation size for any covered security not a subject security. n236

Similarly, no quotation vendor may disseminate or display on a terminal or related device any bid, offer, quotation size, or aggregate quotation size from any exchange or OTC market maker for any reported security which is not a covered security. n237

Finally, the Commission has broad exemptive powers under the Quote Rule, whenever the Commission determines that an exemption is consistent with the public interest, the protection of investors, and the removal of impediments to and perfection of the mechanism of a national market system. n238

[ii] Access to Quotations

One of the issues the Commission sought to address with Regulation NMS was ensuring full access to all markets participating in the national market system. In the Regulation NMS adopting release the Commission noted the difference between access to quotations for exchange-listed and Nasdaq stocks. As a result of provisions in the ITS requiring all participating markets to allow access to quotations without the imposition of fees, access to quotations in exchange-listed stocks was theoretically free and open. n239 However, as a practical matter access to quotations through the ITS was, in the words of the Commission, "often slow and limited." n240 For Nasdaq stocks, by contrast, there was no intermarket linkage system at all, leaving individual markets trading Nasdaq stocks free to establish their own access standards and fees. n241 While the system governing Nasdaq stocks had advantages in that it was more flexible and could adapt to technological advances, in some cases it inhibited access to a market's quotations. n242

The Commission believed that the fair access dilemma could be solved without the need for a collective intermarket linkage to which all markets belonged, if uniform rules were adopted for access to quotations. n243 Accordingly, with Rule 610 the Commission imposed several requirements designed to ensure fair access to all quotations. First, Rule 610(a) prohibits SROs from imposing "unfairly discriminatory terms that prevent or inhibit any person from obtaining efficient access" to quotations in NMS stocks through a member of the SRO. n244 Second, the Commission attempted to ensure that market participants have full access to the quotations of markets that are disseminated through the NASD's alternative display facility ("ADF"). n245 Rule 610(b)(1) requires any market displaying quotations in an NMS stock through the alternative display facility to "provide a level of cost and access to such quotations that is substantially equivalent to the level and cost of access to quotations displayed by SRO trading facilities in that stock." n246 Rule 610(b)(2) prohibits markets displaying quotations through the ADF from imposing "unfairly discriminatory terms" that serve to prevent access to quotations through the market's members or subscribers. n247 Finally, Rule 610(c) limits the fees that markets may charge for execution of orders at prices equaling the best bid or offer of a national securities exchange or Nasdaq to \$0.003 per share for stocks being quoted at a price of \$1.00 or more. n248 For quotations of less than \$1.00, the limitation on the fee is 0.3 percent of the quotation price per share. n249

In connection with its adoption of rules designed to ensure fair access to quotations, with Regulation NMS the Commission also addressed a related problem, that of "locked" and "crossed" markets. A "locked" market is one in which the bid price of one quoting market participant equals the ask price of another participant. n250 A "crossed" market is one in which the bid price of a quoting participant is more than the ask price of another participant. n251 Locked and crossed markets are thought to be a sign of inefficiencies in the markets. n252 They can occur within a market or across markets. In connection with Regulation NMS, the Commission was concerned with locked or crossed quotations that occur across markets, i.e., the bid quotation of a participant in one market being equal or higher than the ask quotation in another market. n253 Rule 610(d) of Regulation NMS requires each national securities exchange and national securities association to adopt rules requiring its members to reasonably avoid locking or crossing a quotation

in any NMS stock that is protected under the Trade-Through Rule, or displaying manual quotations that lock or cross any quotation in an NMS stock disseminated under an effective national market system plan. n254 National securities exchanges and associations must also adopt rules, under Rule 610(d), designed to ensure the reconciliation of locked or crossed quotations in NMS stocks and prohibiting members from "engaging in a pattern or practice of displaying quotations that lock or cross" or displaying manual quotations that lock or cross quotations disseminated under an effective national market system plan, except to the extent a valid exception exists under the SRO's rules. n255

[iii] Prohibition on Subpenny Pricing

Since April 2001 all quoting and trading in U.S. securities markets has been in decimals rather than in fractions. While "decimalization" is generally believed to have benefited investors by reducing spreads and eliminating the need to convert fractions to decimals, one unfortunate by-product of decimalization was that it made it easier for broker-dealers to "step ahead" of customer limit orders, a practice which reduces the quality of executions for customers. n256 When decimal trading first began there was no minimum uniform pricing increment, and some markets allowed quotations in increments of less than one cent, or "subpennies," which exacerbated the trading ahead problem. n257 The Commission ultimately concluded that the costs of subpenny quoting outweighed the benefits, and with Regulation NMS eliminated subpenny quoting. n258 Accordingly, the Commission, in what was the least controversial substantive aspect of Regulation NMS, adopted Rule 612, which prohibits markets and broker-dealers from disseminating a quotation for an NMS security that, if in the amount of \$1.00 or more per share, is in an increment smaller than \$0.01. n259 For quotations in an amount of less than \$1.00 per share, the minimum pricing increment is \$0.0001. n260 Rule 612 does not prevent trades from being executed in subpennies, which may occur, for example, when the execution price of a trade is based on the midpoint between the bid and offer or a volume weighted-average formula. n261

[iv] Consolidated Quotation (CQ) Plan

One of the four goals announced by the Commission in 1972 for the "central market system" was the development of a communications system in which "information on prices, volume and quotes for all securities in all markets [will be] available to all investors" n262 As the first step toward this goal, the Commission, also in 1972, proposed the adoption of Rule 17a-14 which, in substance, would require all registered securities exchanges and associations to make quotations available to vendors of market information on a current and continuing basis. n263

In 1974, the Commission revised proposed Rule 17a-14 to require that the securities industry adopt a joint plan for reporting quotations on a consolidated basis. n264 The plan would call for the collection, processing, and dissemination of quotations in all exchange and OTC traded securities on a real-time, current, and continuing basis.

The Commission refocused its proposal in late 1974 and, by letter, formally requested each national securities exchange to amend any rules or practices that restrict access to or use of quotation information to any quotation vendor. These changes were to be effected by May 1, 1975. n265 By facilitating access to quotation information, the Commission hoped to stimulate competition to provide market data to the securities industry.

Following the voluntary amendment of exchange rules and practices governing access to quotation information and the adoption of the Securities Acts Amendments of 1975, the Commission proposed the adoption of a firm quote rule--Rule 11Ac1-1[now Rule 602]. n266 Although Rule 11Ac1-1 as proposed did not specify the manner in which quotation information would be disseminated, the rule did contemplate communication of quotations by exchange specialists and OTC market makers. The final rule, adopted in January 1978, n267 required all SROs to collect and disseminate to vendors quotations and quotation size for all reported securities, *i.e.*, securities as to which last sale price is reported in the consolidated transaction reporting system. n268

In July 1978, the NYSE and AMEX filed with the Commission a plan for the development and operation of a consolidated quotation reporting system (the "CQ Plan"). n269

The Commission issued an order permitting implementation of the CQ Plan for a period of 180 days, n270 establishing requirements concerning the dissemination of quotation information for a particular reported security by a participating market center during a regulatory halt initiated by the "primary" market for that security. n271

The CQ Plan establishes joint procedures to govern the collection, processing, and dissemination of all quotation information required to be made available under Rule 602(a)(1) [former Rule 11Ac1-1(b)(1)] by the participating market centers. n272 The CQ Plan provides for selection and evaluation of an exclusive processor n273 to collect quotation information from participants and to make that information available to quotation vendors in a single data stream. n274 Finally, the CQ Plan establishes fees relating to the receipt of quotation information. n275

As a result of the ITS/CAES interface, n276 the CQ Plan participants in July 1982 submitted to the Commission certain amendments to the Plan. n277 Approved in December of that year, n278 the amendments, in substance, provided for the dissemination of an ITS/CAES best bid and offer display, *i.e.*, a display of the best bid and best offer price, together with the quotation size, for each ITS/CAES security based upon quotations submitted by exchange and OTC market makers which trade through the interface. n279

[v] Best Execution

One of the goals of a national market system is to assure "the practicability of brokers executing investors' orders in the best market." n280

At the time of the adoption of Rule 11Ac1-1 [now Rule 602], the Quote Rule, the Commission declined to adopt a "best execution" rule to require brokers under all circumstances to route their customers' orders to the market displaying the best quotation. n281 In its January 1978 statement on the development of a national market system, issued concurrently with the Commission's announcement of the adoption of Rule 11Ac1-1, the Commission expressed the belief that the availability of comprehensive quotation information would improve the knowledge of both brokers and public investors of current prices at which reported securities can be bought or sold throughout the country. n282 The availability of this information should then, among other things, lead to increased efforts by brokers to make informed order routing decisions from among the various competing market centers to choose that particular market affording, at that particular time, the most favorable execution opportunities to their customers. n283

While various members of the securities industry have urged the adoption of a "best execution" rule, n284 the Commission has declined to adopt such a rule based upon its belief that a "best execution" rule would be "unenforceable and unnecessarily burdensome given the present limitations on the firmness of quotations and the manner in which customer orders are currently handled." n285 Instead, the Commission has relied on the SROs to provide guidance to members concerning their duty to execute customer orders at the most favorable price obtainable. n286

In September 1996, the SEC again declined to adopt a proposed rule that would have required market makers to provide all market orders with an opportunity for price improvement. n287 Despite the absence of a formal rule adoption at this time, the SEC re-examined and effectively expanded a broker-dealer's duty of best execution.

Prior to September 1996, automatic execution of market orders in over-the-counter securities at the national best bid/best offer ("NBBO") was generally recognized as satisfying a market maker's duty of best execution. n288 The SEC noted that market evolution was changing the scope of a market maker's best execution obligations:

The duty of best execution requires a broker-dealer to seek the most favorable terms reasonably available under the circumstances for a customer's transaction. The scope of this duty of best execution must evolve as changes occur in the market that give rise to improved executions for customer orders, including opportunities to trade at more advantageous prices. As these changes occur, broker-dealers'

procedures for seeking to obtain best execution for customer orders also must be modified to consider price opportunities that become "reasonably available". n289

The SEC found that NBBO-based executions "would not necessarily satisfy a broker-dealer's duty of best execution." n290 Market makers were instructed to take into account all reasonably available price-improvement opportunities when executing customer orders, including undisplayed inside customer limit orders. This interpretation has resulted in substantial modifications to market makers' systems, which typically provided automatic executions at the NBBO. The SEC has continued to rely on SROs to provide further best execution guidance to their members. n291

[d] Consolidated Transaction Reporting System

A consolidated transaction reporting system ("CTRS") along with a composite quotation system, was considered by the Senate Committee on Banking, Housing and Urban Affairs to be part of the communications systems that would form "the heart of the national market system." In 1975 Congress granted the Commission rule-making power to facilitate the development of a CTRS, as well as a composite quotation system. n292 Prior to the Securities Acts Amendments of 1975, however, the Commission had already adopted Rule 17a-15 calling for the implementation of a consolidated tape to report transactions. n293 The advent of the 1975 Amendments resulted in the Commission amendment and redesignation of Rule 17a-15 as Rule 11Aa3-1. n294 With the adoption of Regulation NMS in 2005, Rule 11Aa3-1 was redesignated as Rule 601. n295

[i] Collection and Dissemination of Last Sale Information--Rule 601 [former Rule 11Aa3-1]

In 1972, the Commission adopted Rule 17a-15, "Reporting of Market Information on Transactions in Listed Securities." n296 The Rule required every registered national securities exchange and every national securities association to file a plan with the Commission on or before February 26, 1973. The plan was to provide for the dissemination of information, with respect to transactions executed through the facilities of the exchange, in the case of a registered national securities exchange, and with respect to over-the-counter transactions executed by association members, in the case of a national securities association, in securities registered or admitted to unlisted trading privileges on an exchange, through vendors of market transaction information. n297 After March 26, 1973, exchanges, associations, and members thereof were prohibited from releasing on a current and continuing basis last sale reports relating to transactions in listed securities executed through either the facilities of any exchange or in the over-the-counter market, except pursuant to an effective plan filed under Rule 17a-15 [now Rule 601]. n298

Every plan filed under Rule 17a-15 had to specify:

- (1) the manner of collecting, processing, sequencing, distributing, and displaying last sale reports;
- (2) the standards and methods to be utilized to ensure promptness of reporting, accuracy, completeness, and similar matters;
- (3) the rules or procedures to be adopted to prevent fraud and manipulation in reporting last sale information; and
- (4) the standards for denial of access to users of last sale reports and procedures for Commission review of such denials. n299

Furthermore, every plan had to require that every vendor receiving reports of transactions in listed securities must agree to make available to its subscribers, on a current and continuing basis, through a moving, real-time last sale reporting system (a "composite tape") or an interpretation system, last sale reports from all reporting markets in any listed security reported on by the vendor. n300 Last sale reports could not be excluded from any system for the display of such reports

based upon the market in which the transaction was executed. n301 The marketplace where each transaction displayed on either a tape or interrogation system was executed had to be identified on the tape or interrogation system itself. n302

In March 1973, five securities exchanges n303 and the NASD jointly filed with the Commission a plan for consolidated reporting of transactions. n304 Declared effective in May 1974, n305 the plan provides for a "tape" to be composed of two separate data networks, which are displayed. n306

While the consolidated transaction reporting system was generally considered to be a success, the Commission expressed concern in two major areas:

- (1) the anticompetitive consequences of a standard consolidated system symbol to recall data on a particular security, and n307
- (2) the then existing prohibition on retransmission n308 of the data stream of transaction reports. n309

In 1978, the Commission announced proposals to amend Rule 17a-15 that would restate the rule in revised format, n310 redesignate the Rule as Rule 11Aa3-1 n311 and relocate the provisions of Rule 17a-15 that currently govern the display of last sale reports in a new rule, proposed Rule 11Ac1-2. n312

Rule 11Aa3-1, "Dissemination of Transaction Reports and Last Sale Data With Respect to Transactions in Reported Securities," as amended in 1987 and 1997 n313 differed from Rule 17a-15 in two principal respects. n314 First, Rule 11Aa3-1, unlike Rule 17a-15, explicitly sets forth the manner in which any effective transaction reporting plan n315 may be amended. n316 Second, the Rule provided that no national securities exchange or association may prohibit retransmission n317 of the entire data stream of transaction reports contained in the consolidated transaction reporting system on a current and continuous basis for the purpose of creating a continuous moving ticker display. n318

In addition to the two principal differences between Rule 17a-15 and Rule 11Aa3-1, the Commission also made several technical amendments to Rule 17a-15, including the incorporation into Rule 11Ac1-2 n319 of the Rule 17a-15 provisions indirectly prescribing the manner in which market information vendors display transaction reports. n320

Rule 11Aa3-1 was amended six times before being redesignated as Rule 601 in Regulation NMS. n321 With the adoption of Rule 11Aa2-1 [now Rule 600(a)], n322 which established procedures to qualify securities for trading in the national market system, paragraph (b)(1) of Rule 11Aa3-1 was amended to make non-listed NMS securities subject to the transaction reporting requirements of the rule. n323

Similarly, when the Commission adopted Rule 11Aa3-2 to establish procedures for consideration of joint industry plans relating to the NMS, n324 Rule 11Aa3-1 was amended to delete the procedural requirements of this Rule relating to amendment of consolidated tape plans n325

Under existing regulation, every exchange must file with the Commission a "transaction reporting plan" regarding transactions in listed equity and Nasdaq securities executed through its facilities, and every association must file a "transaction reporting plan" regarding transactions in listed equity and Nasdaq securities executed by its members otherwise than on an exchange. n326 At a minimum, such plan must specify:

- (1) the listed equity and Nasdaq securities or classes of such securities for which transaction reports will be required by the plan;
- (2) reporting requirements with respect to transactions in listed equity securities and Nasdaq securities, for any broker or dealer subject to the plan;

1-2 Federal Securities Exchange Act of 1934 § 2.01

- (3) the manner of collecting, processing, sequencing, making available and disseminating transaction reports and last sale data reported pursuant to the plan;
- (4) the manner in which transaction reports will be consolidated with reports from the plans of other exchanges or associations;
- (5) the applicable standards and methods which will be utilized to ensure promptness, accuracy and completeness of transaction reports;
- (6) rules to prevent fraudulent or manipulative distribution of reports or last sale data;
- (7) specific terms of access to transaction reports; and
- (8) that transaction reports or last sale data made available to any vendor for display on an interrogation device identify the marketplace where each transaction was executed. n327

The NASD's "transaction reporting plan" could be amended by filing the text of the proposed amendment with the Commission with a statement of the purpose of the amendment. n328 Upon receipt of the NASD's "designated plan" or any amendment thereto, the Commission is to publish notice of the filing and solicit public comment prior to taking final regulatory action. n329 No "designation plan" or amendment may become effective without specific Commission approval. n330 Within 120 days after publication of notice, the Commission is to approve the plan or amendment, with such changes or subject to such changes or conditions as the Commission orders in the public interest, for the protection of investors, or "to remove impediments to and perfect the mechanism of a national market system," or in furtherance of the Exchange Act. n331

[ii] Display of Quotation and Transaction Data--Rule 603 [Replacing former Rule 11Ac1-2]

Rule 11Ac1-2 [now eliminated in favor of Rule 603] contained comprehensive requirements governing the manner in which vendors n332 display

- (1) transaction reports in securities with respect to which transaction reports are disseminated under Rule 11Aa3-1 [now Rule 601], and
- (2) quotation information with respect to certain equity securities. n333

The display requirements in Rule 11Ac1-2 were designed to assure that vendors provide consolidated market data in an easily accessible and useful format. n334

The rule governing the display of transactions reports n335 and quotation information requires the removal of market identifiers from a moving ticker n336 unless the moving ticker includes identifiers for all transaction reports for such security from all reporting market centers in that security. n337 Rule 11Ac1-2 also includes highly technical quotation display and retrieval requirements. n338

Rule 11Ac1-2 contained display requirements for quotation information n339 with respect to equity securities traded over-the-counter. n340 A consolidated display n341 of quotation information for any equity security traded over-the-counter must include, at a minimum, either

- (1) the best bid and best offer for such security together with identifiers indicating the market center and the quotation size, or

(2) a "quotation montage," *i.e.*, a display on an interrogation device that simultaneously disseminates quotations from all reporting market centers in such security. n342

Also, a representative bid or offer n343 can no longer be provided by a vendor on any interrogation device with respect to any subject security. n344

The rule governing the display of transaction reports and quotation information permits a vendor to combine the consolidated last sale display and the consolidated quotation display for a particular subject security. n345

Rule 11Ac1-2 did not apply to dissemination of market data made on the trading floor of a securities exchange, any system maintained by an SRO for surveillance or monitoring purposes, n346 or any system implementing market linkage n347 pursuant to a plan approved by the Commission under Section 11A(a)(3)(B) of the Exchange Act. n348 The Commission reserved the right to grant exceptions from the application of Rule 11Ac1-2 under certain circumstances. n349

Rule 11Ac1-2 became effective on April 5, 1980, except for the provisions of

(1) paragraph (c)(vi), which prohibited display of a representative bid or offer, and

(2) paragraphs (b)(2)(ii), (b)(2)(vi), (c)(2)(i), (ii), (iv) and (v), which establish certain technical requirements for the retrieval of data and the format for display of information.

Implementation of these paragraphs was repeatedly deferred to permit the industry to remedy certain technical problems. n350 The Rule became fully effective on October 1, 1981. n351 With the adoption of Regulation NMS in 2005, Rule 11Ac1-2 was eliminated in favor of Rule 603, which greatly simplified the consolidated display requirements. Rule 603 requires that any exclusive source of market information, whether an exclusive processor or a broker-dealer that is the exclusive source for specific information, distribute the market information "on terms that are fair and reasonable." n352 The rule similarly requires exchanges, associations or broker-dealers distributing information to "do so on terms that are not unreasonably discriminatory." n353 The only display obligations under Rule 603 are imposed on securities information processors and broker-dealers, and prohibit these parties from displaying quotation for a stock that can be used to implement trading or order-routing decisions without also providing last sale information. n354 These display requirements do not apply to the dissemination of information on the floor of an exchange or through "a market linkage implemented in accordance with an effective national market system plan." n355

[iii] Transaction Reporting Plans

There are four transaction reporting plans that have been filed with and approved by the SEC. n356 The first, known as the "Consolidated Tape," or "CTA Plan," was filed with the Commission pursuant to Rule 17a-15 [now Rule 601] n357 by six self-regulatory organizations n358 on March 23, 1973. n359 The second plan is the NASD's plan, which governs trading of Nasdaq NMS securities on Nasdaq. It was approved by the SEC on March 31, 1982. n360 As the NASD plan is not a joint industry plan like the CTA Plan, its provisions are simply set forth in the NASD's Rules. n361 The third plan is called the "Reporting Plan for Nasdaq-Listed Securities Traded on Exchanges on an Unlisted Trading Privileges Basis," more commonly known as the "UTP Plan," and governs the collection and dissemination of last sale information for Nasdaq securities listed on an exchange or traded on an exchange through the granting of unlisted trading privileges. n362 The participants in the UTP Plan are the NSE, the NASD, Amex, the Boston Stock Exchange, the Chicago Stock Exchange, the Pacific Exchange [now NYSE Arca] and the Philadelphia Stock Exchange. n363 Nasdaq became eligible to become a participant in the plan when its exchange application was granted. n364 The fourth plan is the Plan for Reporting of Consolidated Options Last Sale Reports and Quotation Information, known more commonly as the "OPRA Plan." n365

The Commission declared the CTA Plan effective as of May 17, 1974. n366 After a pilot phase of the Joint Industry Plan began operations for a limited number of securities on October 18, 1974, the entire consolidated transaction reporting system became fully operational on April 30, 1976. n367

The Consolidated Tape Association, an unincorporated association, was created by the Joint Industry Plan to administer the system, and the Securities Industry Automation Corporation was employed as the initial processor of the consolidated transaction reporting system. n368

Under the Joint Industry Plan, the consolidated transaction reporting system consists of two discrete data streams: Network A, for transactions in NYSE-listed securities, and Network B, for transactions in securities listed or admitted to unlisted trading privileges on the AMEX and certain securities traded on participating regional exchanges. n369

At the time the participating exchanges requested the Commission to approve their plan for the creation of an Intermarket Trading System (ITS), n370 the exchanges requested the Commission to issue an exemptive order pursuant to Rule 17a-15(h) [now Rule 601(f)] n371 to permit the deletion of market identifiers from moving ticker displays for all transactions effected in any market participating in the ITS. n372 The Commission issued temporary, conditional exemptions to both the Consolidated Tape Association and the Securities Industry Automation Corporation from the market identifier requirements of Rule 17a-15 insofar as they apply to moving ticker displays. n373 This exemption, which was scheduled to expire on January 31, 1983, n374 was superseded by the adoption of Rule 11Ac1-2 [now eliminated in favor of Rule 602]. n375

[e] Securities Information Processors

[i] Registration of Securities Information Processors

The Senate Committee Report to accompany Senate Bill 249 stated that communications systems designed to provide automated dissemination of the prices at which transactions in particular securities are taking place (last sale reports) and the prices at which other traders have expressed their willingness to buy or sell (quotations) securities would form the heart of the national market system. n376 As the trading markets shifted from independent, self-contained units to a single integrated system, clear regulatory control over the communication links among markets became imperative. n377 The 1975 Amendments greatly expanded the Commission's regulatory authority over the processors and distributors of market information. n378 Section 11A was enacted with the intention of bringing under the Commission's direct jurisdiction all organizations engaged in the business of collecting, processing, or publishing information relating to quotations for, indications of interest to purchase and sell, and transactions in securities. n379

Section 11A(b)(1) makes it unlawful for any securities information processor, n380 directly or indirectly, to make use of the mails or any means or instrumentality of interstate commerce to perform the functions of a securities information processor unless registered in accordance with Section 11A(b). Unless the Commission, by rule or order, provides otherwise, n381 the only securities information processors that would be required to register are exclusive processors. n382 The Senate Committee Report to accompany Senate Bill 249 stated that all current proposals for a national market system appeared to assume the eventual existence of an exclusive processor or service bureau to which the exchanges and the NASD would transmit data and which, in turn, would make transactions and quotation information available to vendors of such information. n383 The Senate Committee Report stressed the key role an exclusive processor would play in determining how quotations and transaction information would reach the public. An exclusive information processor should be regarded as a public utility required to function in an absolutely neutral manner with respect to all market centers, market makers, and private firms. n384

[ii] Registration Statement

An application for registration must be in such form as the Commission prescribes by rule and must contain:

- (1) the address of the processor's principal office or offices;
- (2) names of securities and markets for which it is then acting and proposes to act as a securities information processor; and
- (3) such other information and documents as the Commission, by rule, may prescribe regarding:
 - (a) performance capability;
 - (b) standards and procedure for collecting, processing, distributing, and publishing information with respect to quotations for and transactions in securities;
 - (c) personnel qualifications and financial condition; and
 - (d) "such other matters as the Commission determines to be germane." n385

Rule 609 [former Rule 11Ab2-1] provides that an application for the registration of a securities information processor shall be filed on Form SIP n386 in accordance with the instructions contained therein. n387 An applicant or registrant seeking an exemption from responding to any item or exhibit of Form SIP should apply to the Commission for such exemption, which will be considered under Rule 609(c) [former Rule 11Ab2-1(c)]. n388

Every amendment filed pursuant to Rule 609 is a "report" within the meaning of: Sections 17(a), which requires the keeping of such records and the making and dissemination of such reports as the Commission prescribed by rule; 18(a), which imposes liability for false or misleading statements in any application, report, or document filed pursuant to the Exchange Act; and 32(a), which imposes criminal penalties for willful violation of the Exchange Act or for willfully and knowingly making a false or misleading statement in any application, report, or document filed pursuant to the Exchange Act. n389

[iii] Grant or Denial of Registration

After an application is filed with the Commission pursuant to Section 11A(b)(2), the Commission must publish notice of the filing and afford interested persons an opportunity to submit written data, views, and arguments concerning the application. n390 Within ninety days after the notice is published, the Commission must either grant such registration, by order, or institute proceedings to determine whether registration should be denied. n391 If proceedings with regard to denial of registration are instituted, the Commission must by order at the conclusion of the proceedings grant or deny application for registration of a securities information processor. n392

The Commission must grant the registration of a securities information processor if the Commission finds that the applicant is able to:

- (1) assure prompt, accurate, and reliable performance of its functions;
- (2) comply with the Exchange Act;
- (3) carry out its functions in a manner consistent with the purposes of Section 11A; and
- (4) insofar as it is acting as an exclusive processor, operate fairly and efficiently.

If any such finding is not made the application must be denied. n393

[iv] Withdrawal and Cancellation of Registration

A registered securities information processor may withdraw from registration, upon such terms and conditions as the Commission deems necessary or appropriate in the public interest or for the protection of investors, by filing a written notice of withdrawal with the Commission. n394

The Commission is directed in Section 11A(b)(4) to cancel, by order, the registration of any registered securities information processor that the Commission finds is:

- (1) no longer in existence, or
- (2) has ceased to do business in the capacity specified in its application for registration.

[v] Review of the Denial of Service by a Securities Information Processor

The Commission is empowered to review and set aside any exclusionary action by a registered securities information processor. n395 A registered processor is required to promptly file notice with the Commission of any prohibition or limitation of any person's access to services offered, directly or indirectly, by the processor. n396

Review of a prohibition or limitation may be upon the Commission's own motion or upon application by any person aggrieved thereby. n397 An application must be filed within thirty days after the processor's notice has been filed with the Commission and received by the aggrieved person, or such longer period as the Commission may determine. The filing of an application or the institution of a review does not operate as a stay of the prohibition or limitation. But the Commission may order a stay either summarily or after notice and opportunity for hearing. The Commission must establish an expedited procedure for appropriate cases on the question of a stay. n398

In a review proceeding, the Commission after notice and opportunity for hearing must set aside the prohibition or limitation unless the Commission finds such action consistent with the provisions of the Exchange Act, and the rules and regulations thereunder, and that the aggrieved person has not been discriminated against unfairly. If the Commission does not so find, or if the Commission does find that the prohibition or limitation does impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act, n399 then the Commission by order must set aside the prohibition or limitation and require the registered securities information processor to permit the aggrieved person access to its services. n400

[vi] Enforcement Power of the Commission

The Commission has the power to censure, place limitations upon the activities, functions, or operations of, suspend for a period of up to twelve months, or revoke the registration of any registered securities information processor. n401

Before the Commission may exercise its enforcement power, the Commission must find (on the record after notice and opportunity for hearing) n402 that:

- (1) the sanction is in the public interest, necessary or appropriate for the protection of investors, or to assure the prompt, accurate, or reliable performance by the securities information processor of its functions; and
- (2) the processor has violated or is unable to comply with any Exchange Act provisions, or the rules and regulations thereunder. n403

[f] Allocation of Market Data Revenues

The allocation of the revenues from the dissemination of securities data n404 by the United States securities markets has long been a source of controversy. n405 This controversy stems from the fact that the securities markets claim a proprietary interest in the information, while users of the information, such as brokerage firms, dispute this ownership claim and allege that the markets charge excessive fees for the information. n406 On December 9, 1999, the Commission issued a comprehensive concept release in which it solicited comment on these and other issues relating to market data fees. n407 In August 2000, the Commission formed a committee known as the SEC Advisory Committee on Market Information ("Advisory Committee"). On September 14, 2001, the Advisory Committee issued its report. n408 The Advisory Committee recommended, among other things, that no change be made to Rule 11Ac1-2 [now 603], the Display Rule, n409 under which markets are required to submit quotation and transaction information for consolidation and dissemination. However, the Advisory Committee recommended that markets be free to disseminate, and charge fees for, other market information, such as limit order data, as they see fit. n410 The Advisory Committee was split on the question of whether the current system, under which markets must disseminate market data to a single consolidator, should be retained. n411

In February 2004, in the Regulation NMS proposing release, the Commission proposed to dramatically revise the system for allocating market data revenue. Specifically, the Commission proposed to revise the formula to, among other things, reflect contributions to "price discovery," *i.e.*, volume of trades that have the effect of establishing a price for a stock, rather than simply trading volume. n412 The Commission also proposed to create advisory committees for the various market data plans, as a means of allowing additional parties to participate in their governance. n413 In addition, under the Commission's proposal, individual members of an SRO, such as specialists or market makers would still be required to report their trades to their SRO, but for the first time they would be able to also distribute their trade data independently. n414 The proposing release also included changes designed to ensure that trade data is consolidated from the various markets but also reduce the trade data required to be reported by requiring the inclusion of only the national best bid and offer and last sale information. n415 Finally, the proposing release requested comment on whether the system for consolidating and disseminating market data should be overhauled. n416

The Commission noted that if an overhaul was appropriate, alternative deconsolidation, competing consolidators and hybrid models would be considered. n417 Under a deconsolidation model, vendors and broker-dealers would no longer be required to provide consolidated data to their customers, and the national market system plans and networks would not be necessary. n418 Instead, each market would be required to disseminate its own information, to multiple vendors and brokers, and would set its own market data fees. n419 A competing consolidators model would retain the consolidated display requirement, but the plans and networks would not be necessary. n420 Under this model, each market could establish its own fees and its own arrangements for distributing market data, as well as its own distribution facility. n421 Under the hybrid model, originally proposed by Nasdaq, the existing system would have remained largely intact, but only the national best bid and offer would have been disseminated. n422 Commenters generally advocated some variation of the competing consolidator or hybrid model, but both were rejected by the Commission in the Regulation NMS adopting release. n423

In the Regulation NMS adopting release, the Commission discussed the level of market data fees, and specifically the questions raised by many panelists at the NMS Hearing regarding whether the costs were reasonably related to the cost of the data. n424 The Commission postponed any action on these fees, however, based on its belief that the level of the fees had to be considered in the context of a broader review of SRO funding. n425

On the issue of governance of national market system plans, with Regulation NMS the Commission adopted amendments to the plans that require the creation of non-voting advisory committees for each plan. n426 Many commenters thought that this did not go far enough to address perceived problems with the administration of the plans. n427 However, the Commission believed that a more extensive overhaul of the administration of the plans could interfere with their operations. n428

The amendments to the formula for allocation of market data fees was adopted with only minor modifications. n429 Under the new formula, revenues are allocated on an annual basis in two steps. n430 In the first step, the eligible revenues from a network will be allocated among the various securities in the network's data stream. n431 This allocation, known as the "security income allocation," is generally based on the square root of the dollar volume of trading revenue in each security. n432 In the second step, each participant in the plan will receive an annual payment equal to the sum of its "Trading Shares" and "Quoting Shares." n433 This formula is designed to measure the usefulness of that market's information. n434 An SRO's Trading Share for a security is the product of 50 percent of the security income allocation and its "trade rating" for the security. n435 The trade rating represents the SRO's proportion of the dollar volume and qualified trading in the security. n436 The Quoting Share for a security is the product of 50 percent of the security income allocation for the security and the SRO's "quote rating" for the security. n437 The quote rating is the SRO's proportion of best bids and best offers that equaled the price of the national best bid or offer, expressed in terms of "quote credits." n438

[g] Public Limit Order Protection

In its January 1978 statement concerning the development of a national market system, the Commission cited nationwide limit order protection as a necessary element of such a system. n439 The Commission proposed that nationwide limit order protection be achieved by a central limit order book for public agency orders to buy and sell qualified securities in specified amounts at specified prices ("public limit orders"). n440 Nationwide limit order protection is based upon the basic principle that the benefits of auction-type trading protections should be received by all agency orders in qualified securities, regardless of location. n441

The objectives of a central limit order book are:

- (1) to make available a mechanism in which public limit orders n442 can be entered and queued for execution according to the auction trading principles of price and time priority, and
- (2) to provide a means by which public limit orders can be assured of receiving an execution prior to the execution of any other order by a broker or dealer in any market at the same or inferior price. n443

The capacity to execute against public limit orders in the central limit order book may have to be limited to persons performing market making functions in a qualified market. n444 Brokers, however, would be able to enter, alter, or withdraw public limit orders in or from the CLOB. n445

The Commission requested the self-regulatory organizations to prepare and submit to the Commission a plan or plans by September 30, 1978, for the design, construction, and operation of a CLOB. n446 In calling for proposals concerning a CLOB, the Commission pointed out that its determination to proceed with the development of a CLOB should not be interpreted as "a decision to force all auction trading into an electronic system with automatic execution capabilities." n447

The Commission addressed the issues pertaining to nationwide limit order protection in its March 1979 status report entitled Development of a National Market System. n448 The Commission expressed as its first priority the achievement of nationwide price protection for all public limit orders based on the principle of price priority. n449 The Commission stated that nationwide price protection, whereby any appropriately displayed public limit order n450 for a qualified security is assured of receiving an execution prior to any execution by a broker or dealer at an inferior price, should be a basic characteristic of a national market system. n451

As an initial step towards the goal of nationwide price protection, the Commission determined to give the proponents of the Intermarket Trading System n452 an opportunity to develop that system as a means of providing intermarket price protection for public limit orders. n453 The Commission cited two types of initiatives as necessary to achieve

nationwide price protection through the use of the Intermarket Trading System (ITS).

First, the various practical and technical problems associated with:

- (1) disseminating and displaying public limit order information from each market center, n454 and
- (2) promptly enhancing the ITS to serve as a means by which price protection for public limit orders can be afforded on an intermarket basis, n455

must be resolved by collective action on the part of the self-regulatory organizations and the securities industry. n456

Second, the Commission would propose a rule (with an effective date "sufficiently distant to afford time for the industry to design and put in place procedures and facilities needed to assure price protection for all public limit orders in qualified securities") prohibiting any broker or dealer from executing any order to buy or sell a qualified security at a price inferior to the price of any displayed public limit order, a practice known as "trading ahead." The broker or dealer need not adhere to the price protection requirement of the proposed rule if, simultaneous with or immediately after execution, the broker or dealer assures that those limit orders displayed at the time of execution are satisfied at the limit price, or such better price as may be required by the principles of "gap print pricing." n457

The Commission, in a March 1979 status report, requested the views of the self-regulatory organizations, the securities industry, and the investing public on whether the Commission should bypass the interim step of providing price protection for public limit orders and proceed directly to price protection for all orders at the market. n458 The Commission emphasized that it was prepared to explore alternative mechanisms to provide nationwide price protection for public limit orders. n459

Shortly after the release of proposed Rule 11Ac1-3 [now Rule 607], the ITS announced the formation of a pilot Limit Order Information System ("LOIS"), which would provide on the floor of each Intermarket Trading System (ITS) participant a display of limit orders from all ITS members. n460 LOIS was intended to provide nationwide limit order protection for at least block transactions.

A significant event in the formation of a central limit order book occurred with the interface of ITS and the Computer Assisted Execution System (CAES). n461 While the Commission's order directing this interface did not expressly require development of a central limit order book, n462 the integrated CAES and ITS systems appeared to have the capacity to develop a CLOB.

The Commission's Market 2000 Report recommended that the SROs consider whether to encourage the display of all limit orders when the orders in listed stocks are priced better than the best intermarket quotes (unless the ultimate customer expressly requests that an order not be displayed). n463 The Market 2000 Report also recommended that the NASD consider whether to encourage the display of limit orders in Nasdaq stocks when the orders are at prices that are better than the best Nasdaq quotes, unless the ultimate customer expressly requests that an order not be displayed. n464 Recognizing that Nasdaq operates as an automated display of market maker quotes and not as an auction market, the report nonetheless states that increased transparency in Nasdaq could tighten spreads and enhance investors' ability to monitor the quality of execution received on trades. n465

Beginning in 1988, an NASD disciplinary action and subsequent rule changes dramatically increased limit order protection by limiting the practice of trading ahead. In 1988, in a disciplinary action against E.F. Hutton & Company, Inc. in 1988, the NASD interpreted its rules to prohibit trading ahead of customer limit orders. n466 In May 1989 the NASD proposed a new rule interpretation to clarify its position on the trading ahead issue. n467 This interpretation provided that an NASD member would not be deemed to have violated the NASD rules of fair practice if it provided a statement to customers describing the circumstances in which the firm accepted limit orders and the policies and

procedures followed in handling those orders. n468 This proposal, however, never became final.

In July 1993 the NASD decided that trading ahead of customer limit orders should not be allowed even if disclosed to customers. n469 The NASD therefore withdrew the proposed rule interpretation and filed a new proposed interpretation under which market makers would be prohibited from trading ahead of customer limit orders of their own customers. n470

The interpretation proposed by the NASD in July 1993 contained a "Terms and Conditions" exception under which a broker-dealer could negotiate the terms and conditions under which limit orders placed by institutional accounts for 10,000 shares or more and valued at least \$100,000 would be executed. n471 In a release known as "Manning I," the SEC approved the proposed interpretation in June 1994. n472 In the adopting release, however, the Commission stated that it believed that the ban on trading ahead of limit orders should apply not only to orders of a broker-dealer's own customers, but also to orders of customers of other firms that are sent to a broker-dealer for handling. n473

After "Manning I," the NASD appointed a task force to further study the practice of trading ahead of limit orders. n474 The task force recommended that the ban on trading ahead of limit orders of customers of other broker-dealers apply only if the trade occurred at a price better than the limit order price. n475 The NASD proposed for member comment an interpretation of its Rules of Fair Practice, under which a market maker would not be allowed to trade ahead of a customer limit order at a price equal to or better than the limit order price if the order was for 1,000 shares or less, and at a price better than the limit order if the order was for more than 1,000 shares. n476

The SEC expressed its displeasure with the NASD's intended resolution of the trading ahead issue by proposing a rule of its own which would prohibit broker-dealers from trading ahead of orders of customers of other firms regardless of the size of the order. n477 The NASD acceded to this SEC pressure, and the rule change actually filed by the NASD, in November 1994, proposed to limit the trading ahead of limit orders placed by customers of another broker-dealer, without differing obligations based on the size of the order. n478 It also proposed to amend the interpretation of the Rules of Fair Practice to limit the "Terms and Conditions" exception to limit orders from institutional accounts, whether from the broker-dealer's own customers or customers of another firm, regardless of order size, and limit orders from non-institutional accounts if the order is for 10,000 or more shares and has a value of at least \$100,000. n479 The Commission approved the proposed changes in May 1995, in a release known as "Manning II." n480 In approving the change, the SEC noted that market makers are not required to accept limit orders and are still permitted under NASD rules to charge commissions for handling limit orders, as long as the commission charges are fully disclosed to customers. n481 In February 2001, the SEC approved a Nasdaq rule change which extended limit order protection to some OTC Bulletin Board securities. n482 In December 2002 the SEC approved a Nasdaq rule change extending limit order protection to all OTC Bulletin Board Securities. n483 Protection was further expanded, to include exchange-listed securities, in August 2005. n484

[h] Order Handling Rules

On August 28, 1996, the SEC adopted Rule 11Ac1-4, [now Rule 604] the "Limit Order Display Rule," and amendments to Rule 11Ac1-1, [now Rule 601] the "ECN Rule". n485 These rules are collectively known as the "Order Handling Rules." The Order Handling Rules apply to the Nasdaq Stock Market and exchange specialists and were designed to enhance the quality of published quotations in Nasdaq securities, promote competition, improve price discovery, and increase market depth and liquidity. n486

The Limit Order Display Rule requires, subject to certain exceptions, the display of customer limit orders in market maker quotes if the limit order is priced better than the market maker's quote, or priced equal to the market maker's quote if the quote is at the national best bid or offer price and the limit order represents more than a de minimis change relative to the market maker's quote. n487

The ECN Rule requires market makers in exchange-listed stocks to reflect in their quotes certain orders that they place into an ECN. Market makers are not required to display the full size of the superior priced order in their Nasdaq quotes. Instead of updating its own quote, a market maker may comply with the ECN Rule through the ECN itself. In order to rely on the ECN for compliance, the ECN must ensure that the best-priced orders entered into its system are communicated to Nasdaq for public dissemination. The ECN must also provide access to non-subscribing broker-dealers to enable them to utilize the superior quotes.

The Order Handling Rules were phased in by particular securities beginning in January 1997. n488

[i] Order Routing and Execution Practices Disclosure Rules

In November 2000 the Commission adopted Rules 11Ac1-5 and 11Ac1-6 [now Rules 605 and 606 respectively], which are intended to improve order execution through enhanced disclosure. The Commission believes that the rules will provide brokers with more information to consider when choosing among market centers when determining where to route customer orders, and that investors will in turn be better able to evaluate the quality of their brokers' order executions. n489

Rule 605 [former 11Ac1-5] requires "market centers" n490 to make specified information available to the public each month in electronic form. The rule covers only NMS securities, n491 and "covered orders," which are orders received when a national "consolidated best bid and offer" is disseminated. n492 Rule 605 requires that the following information be included in market centers' reports for all covered orders for each NMS security:

- total number of covered orders;
- total number of shares for covered orders;
- total number of shares for covered orders cancelled before execution;
- total number of shares executed at the market center originally receiving the order;
- total number of shares executed at a market center other than that originally receiving the order;
- the number of shares for covered orders executed within five specified categories based on the time elapsed between receipt and execution, such as zero to nine seconds and ten to twenty-nine seconds; and
- the "average realized spread" for covered orders. n493

Rule 605 requires the following information for market orders and marketable limit orders only:

- the "average effective spread" for covered orders;
- the total number of shares for covered orders executed with price improvement;
- for shares executed with price improvement, the average price improvement, weighted by number of shares;
- the number of shares executed at the quote;
- for shares executed at the quote, the average time from order receipt to execution, weighted by number of shares;

- the number of shares executed outside the quote;
- for shares executed outside the quote, the average amount the prices were outside the quote, weighted by number of shares; and
- for shares executed outside the quote, the average time from order receipt to execution, weighted by number of shares. n494

Reports disseminated under Rule 605 [former Rule 11 Ac1-5], commonly known as "dash - 5 reports," have had an effect on order routing practices because market centers with better statistics have increased their market share. n495 However, some market participants believe that the reports do not accurately measure the quality of trade execution, primarily because they do not consider quotations beyond a market's best bid and offer, which could be important for larger orders. n496

Rule 606 [former Rule 11Ac1-6] requires broker-dealers to make disclosures to customers regarding the broker-dealers' order routing practices. While Rule 605 applies only to NMS stocks, Rule 606 applies to all NMS securities, including listed options. n497 Rule 606 requires broker-dealers to disseminate quarterly reports containing the following information: n498

- "non-directed orders," or customer orders which were not directed to a particular market center, as a percentage of total customer orders;
- the percentages of non-directed orders which were market orders, limit orders and "other" orders; and
- for each of the various market centers to which the broker-dealer sent non-directed orders, the percentage of non-directed orders sent to the market center, along with the percentage of non-directed market orders, non-directed limit orders, and non-directed "other" orders sent to the market center.

Rule 606 requires a broker-dealer to discuss the material aspects of its relationship with each of the market centers to which it has sent orders, including a description of any payment for order flow or profit-sharing arrangements. n499 Rule 606 also requires a discussion and analysis by the broker-dealer of its order routing practices, including the "objectives" affecting its order routing practices, the results obtained by them, a comparison of the execution quality of the market centers to which the broker-dealer routes orders to that of other market centers, and a statement as to whether the broker has made or intends to make significant changes in its order routing practices. n500 Broker-dealers are not required to send the reports required under Rule 606 to their customers, but must make the reports "publicly available," by posting them on a website, furnishing a written copy on request, and notifying customers at least once per year that the report will be furnished upon request. n501 In addition to making the quarterly reports available, broker-dealers must furnish, upon customer request, the name of the market center or centers to which the customer orders were routed in the six months preceding the request, whether the orders were directed or non-directed and, for any executed orders, the time of execution. n502 Broker-dealers also must notify customers at least annually that this additional detail is available upon request. n503

[3] Duties and Powers of the Commission

The Commission is directed in Section 11A(a)(2) to use its authority under the Exchange Act, having due regard for

- (1) the public interest,

- (2) the protection of investors, and
- (3) the maintenance of fair and orderly markets,

to facilitate the establishment of a national market system for securities in accordance with the findings and to carry out the objectives set forth in Section 11A(a)(1). n504 The national market system may include subsystems for particular types of securities with unique trading characteristics. n505

The Commission also has a duty to designate, by rule, the securities or classes of securities qualified for trading ("qualified securities") in the national market system from among securities other than exempted securities. n506

[a] Commission Implementation Authority

In furtherance of the Commission's efforts to facilitate the establishment of a national market system for securities, the Commission was authorized to:

- (1) create advisory committees pursuant to the Federal Advisory Committee Act n507 and to employ one or more outside experts; n508
- (2) permit or require self-regulatory organizations to act jointly in planning, developing, operating or regulating a national market system, or one or more facilities thereof; n509 and
- (3) study, and recommend to Congress from time to time, the possible need to modify the scheme of self-regulation under the Exchange Act to adapt such scheme to a national market system. n510

To provide a procedural framework for consideration of industry sponsored National Market System ("NMS") proposals, the Commission in 1981 adopted Rule 11Aa3-2 [now Rule 608]. n511 Under this rule, any two or more self-regulatory organizations jointly may submit or amend a national market system plan. n512

Every NMS plan shall be filed with the Commission accompanied by:

- (1) copies of all "governing or constituent documents," and
- (2) to the extent applicable
 - (a) a detailed plan of implementation;
 - (b) a list of the significant phases of development and implementation and estimated completion dates for each phase;
 - (c) an analysis of the effect of competition upon implementation of the plan;
 - (d) a description of any written agreements or undertakings between plan sponsors n513 or participants n514 with respect to interpretations of the plan or conditions for being a sponsor or participant; and
 - (e) in the case of an amendment to an existing plan, a statement that the amendment has been duly approved by the sponsors. n515

In addition, a detailed description of the method of operation is required. n516

After receipt of a proposed NMS Plan, the Commission will publish notice of the filing and solicit public comments. n517 No NMS plan may become effective unless approved by the Commission. n518

Within 120 days after publication, the Commission will approve the plan with such changes and subject to such conditions as the Commission deems appropriate. n519 An appeal from Commission action is permitted under certain circumstances. n520 To date, no NMS plan has been formally filed with the Commission, primarily because the SROs have elected to respond to Commission initiatives rather than create their own plan. n521

[b] Commission Rule-Making Powers

Section 11A(c) grants the Commission extensive rule-making powers with respect to information concerning quotations for and transactions in securities, trading in listed securities off an exchange, and exchange rules limiting the ability of exchange members to trade off the exchange. The purpose of this rulemaking power is to enable the Commission to develop and regulate both the national market system itself and the activities of persons involved in that system. n522

[i] Powers Relating to Quotations and Transactions

Self-regulatory organizations, members of such organizations, securities information processors, brokers, and dealers must comply with Commission rules adopted n523 for the following purposes:

(1) preventing the use, distribution, or publication of fraudulent, deceptive, or manipulative information concerning securities quotations or transactions. n524

(2) assuring:

(I) prompt and accurate collection, processing, distribution, and publication of information concerning securities quotations and transactions, and

(ii) the fairness and usefulness of the form and content of the information; n525

(3) assuring all securities information processors n526 access, for purposes of distribution and publication, to information concerning securities quotations and transactions from exclusive processors on fair and reasonable terms; n527

(4) assuring access by exchange members, brokers, dealers, securities information processors, and others to information concerning securities quotations and transactions published or distributed by a self-regulatory organization or a securities information processor on terms that are not unreasonably discriminatory; n528

(5) assuring that all exchange members, brokers, and dealers transmit and direct orders for the purchase or sale of qualified securities n529 in a manner consistent with the establishment and operation of a national market system; n530

(6) assuring equal regulation of all markets for qualified securities and all exchange members, brokers, and dealers effecting transactions in such securities. n531

The broad scope of the rule-making powers granted to the Commission in Section 11A(c)(1) is illustrated by the scope of activities covered by that Section. Persons subject to the Commission's rule-making powers consist of self-regulatory

organizations, members thereof, securities information processes, brokers and dealers. n532 The activities of such persons covered by the Commission's rule-making powers are:

- (1) collecting, processing, distributing, publishing, and preparing for distribution or publication information concerning quotations for or transactions in any nonexempt security. n533
- (2) effecting any transaction in any security (other than an exempted security), and
- (3) inducing or attempting to induce purchase or sales of any nonexempt security. n534

Commission rules pursuant to Section 11A(c)(1) have a greater scope than other provisions in the Exchange Act prior to the 1975 Amendments. In particular, a violation can be established by showing that a person subject to Section 11A(c)(1) violated a rule in an "attempt to induce the purchase or sale of" a nonexempt security, even though no purchase or sale was actually consummated. The general antifraud provision applicable to brokers and dealers, Section 15(c)(1), n535 was amended in 1975 to prohibit a broker or dealer from attempting to induce a purchase or sale by manipulation, deception, or other fraudulent devices. n536

[ii] Power to Require Reports of Transactions in Qualified Securities

The Commission has the power to require, by rule, as the Commission deems necessary or appropriate in the public interest or for the protection of investors,

- (1) persons purchasing or selling any qualified security n537 to report such purchase or sale to a registered securities information processor, national securities exchange, or registered securities association, and
- (2) such processor, exchange, or association to make appropriate distribution and publication of the information so reported. n538

[iii] Power to Prohibit Third Market Trading n539

Although the Congress refused to prohibit third market trading as part of the Securities Acts Amendments of 1975, n540 the Commission was given rulemaking power to prohibit brokers and dealers from trading in listed securities; n541 except on a national securities exchange. n542

Before the Commission may exercise its rule-making power under Section 11A(c)(3)(A), the Commission must find, on the record after notice and opportunity for hearing, that:

- (1) as a result of transactions in listed securities occurring over-the-counter, the fairness or orderliness of the markets for listed securities has been affected contrary to the public interest or the protection of investors;
- (2) no rule of any national securities exchange unreasonably impairs a dealer's ability to solicit or effect transactions in listed securities for his or her own account, n543 or unreasonably restricts competition:
 - (i) among dealers in such securities, or
 - (ii) between dealers acting in the capacity of market makers who are specialists in such securities and other such dealers who are not specialists in the listed securities; and

(3) the maintenance or restoration of fair and orderly markets in listed securities cannot be assured through other means under the Exchange Act. n544

The Commission also has the authority to conditionally or unconditionally exempt any security, transaction, class of securities, or class of transactions from any prohibition of third market trading by brokers and dealers. n545

General Effects of Regulation NMS

Overall, it appears that Regulation NMS has fostered increased competition among different markets to attract order flow and trade volume. For example, in April 2008, the NYSE Hybrid Market executed 34 percent of the volume in NYSE listed stocks and NASDAQ executed 42 percent of the volume in NASDAQ listed stocks. n546

With respect to the trade-through provisions (i.e., trade executions at prices inferior to the best-priced quotes displayed by automated trading centers) under Rule 611 of Regulation NMS, the Securities and Exchange Commission updated the responses to Frequently Asked Questions ("FAQs") Concerning Rule 611 and 610 of Regulation NMS on April 8, 2008. n547 These FAQs primarily address issues related to the increase in trading volumes and the manual trading of block transactions in volatile conditions under Rule 611.

Regarding Rule 612 of Regulation NMS, the sub-penny pricing rule, the SEC granted national securities exchanges a limited exemption, thereby permitting such exchanges to accept certain cross orders priced in sub-penny increments. n548 Rule 612 prohibits a national securities exchange, as well as other entities, from displaying, ranking, or accepting a bid or offer, an order, or indication of interest in any NMS stock that is priced in an increment of less than one penny per share, unless the price of the bid or offer, order, or indication of interest is priced less than \$1.00 per share. n549 The SEC also approved a number of self-regulatory organization rule changes that contemplate the acceptance of certain cross orders in sub-penny prices. n550 This exemption from the sub-penny pricing rule is limited to the acceptance of national securities exchanges of cross orders arranged by members that priced in sub-penny increments and are immediately executed against one another. n551 The SEC's rationale for exemption is that Rule 612 was designed to limit the ability of a market participant to gain execution priority over a competing limit order by an insignificant amount. The SEC subsequently observed that sub-trading does not give rise to the same concerns as sub-penny quoting. n552 Furthermore, sub-penny executions due to price improvement are generally beneficial to retail investors. As such, the SEC believes that permitting the exchanges to accept sub-penny cross orders for the limited purpose of immediately executing them, is similar to a sub-penny execution, and does not cause any problems with respect to sub-penny quoting. n553

Effects upon Exchanges

The major U.S. exchanges have modified or built new trading platforms to ensure compliance with Regulation NMS. The American Stock Exchange implemented a new hybrid structure known as "Auction & Electronic Market Integration" ("AEMI") to integrate automated and floor-based trading for equities and exchange traded funds. The American Stock Exchange designed AEMI to comply with Rules 610 and 611 of Regulation NMS in particular. n554

The Boston Stock Exchange, Inc. (the "BSE") launched a new electronic equities trading market, the BeX. n555 Although the BSE ceased operation of the BeX market on September 5, 2007, n556 the fact that the BSE created a new electronic trading market is reflective of the impact of Regulation NMS.

The Chicago Stock Exchange ("CHX") has proposed and implemented a new trading model that permits its participants to interact in a fully automated matching system. This trading system no longer utilizes a physical trading floor where on-floor specialists, brokers and market makers seek execution; n557 rather, the CHX now operates an automated system where market participants may participate from any location. Similarly, the National Stock Exchange, Inc. revamped its technology platform to comply with Regulation NMS. The NSX Blade System was built to meet the needs

of a post-Regulation NMS environment. n558

The NASDAQ has integrated the operations of the NASDAQ Market Center with its Brut ECN and the INET ECN facilities to create a single integrated system with a single pool liquidity. This integrated system is designed to enable NASDAQ to operate its execution system as a national securities exchange, as well as to comply with Regulation NMS. n559

The Philadelphia Stock Exchange, Inc. also ceased to operate its physical trading floor for equity securities, and developed a new equity trading system known as "XLE." n560 This system provides for entirely automated executions to occur within a central matching system.

Perhaps the most significant effect of Regulation NMS was that it compelled the NYSE to expand its electronic capacity. The NYSE Hybrid Market provides electronic execution along with traditional floor services. The SEC approved the NYSE Hybrid Market proposal on March 22, 2006. n561 The Order Protection Rule provides that market centers must satisfy better-priced quotes in other fast markets before filling orders in their own market. To qualify as a fast market, there must be sub-second automatic execution and immediate or cancel capabilities. Therefore, in order to comply with the Order Protection Rule, the NYSE established the NYSE Hybrid Market, which transformed the NYSE from an auction market to a fast market. n562

Thus, although Regulation NMS may not have brought about its intended results with respect to transparency, due to the increased use of dark pools (see below), it did cause an overall modernization of the major U.S. exchanges.

Dark Pools

Notwithstanding the stated purpose of Regulation NMS, it appears that dark pools of liquidity may be undermining some of those purposes. For example, large institutional traders have been utilizing alternative trading venues, such as dark pools, to perhaps avoid Regulation NMS.

The term "dark pools" of liquidity was defined broadly by Erik Sirri, Director of the SEC's Division of Trading and Markets, as "a service offered by any trading venue that offers the potential interact with liquidity beyond the venue's public quotes." n563 Dark pools reveal neither the identity of the parties nor the price until after the transaction is completed. Dark pools of liquidity are typically used by institutional investors to trade large blocks of stock without alerting market makers, as the order is broken up into by computer programs into smaller pieces that are matched and executed in different segments in separate transactions. n564 Dark pools are either independent, owned by exchanges, owned by broker-dealers, or owned by a consortium. Independent dark pools of liquidity include, for example, Instinet's "Instinet Crossing," Investment Technology Group's "POSIT," and Liquidnet's "Liquidnet." Exchange owned dark pools include, for example, ISE's "Midpoint Match," NASDAQ's "NASDAQ Crossing Network," and NYSE Euronext's "NYSE MatchPoint". The broker-dealer owned dark pools include, for example, Fidelity Capital Markets Services' "CrossStream," Goldman Sachs Execution and Clearing's "SIGMA X," Lehman Brother's "LCX," and Morgan Stanley's "MS POOL." The consortium owned dark pools include BIDS Trading, 'The BIDS ATS.' This is a wholly owned subsidiary of BIDS Holdings, a joint venture of Bank of Marica, Bear Stearns, Citigroup, Credit Suisse, Deutsche Bank, Goldman Sachs, JP Morgan Chase & Co., Knight Capital Group, Lehman Brothers, Merrill Lynch, Morgan Stanley, and UBS. In May 2008, the Goldman Sachs Group, Morgan Stanley, and UBS AG entered into bilateral agreements that allow one another use each other's dark pools. n565 Although it has been estimated that trades in dark pools account for approximately 10 percent to 12 percent of all trades n566, and 20 percent of all trades in NYSE-listed stocks n567, others estimate that dark pool volume consists of approximately 5 percent to 9 percent of U.S. equity trades. n568

The use of dark pools of liquidity may give rise to a number of regulatory issues, although such issues have not, to date, been officially addressed by the regulators. Such issues include price transparency and trade-through related matters under Regulation NMS, best execution obligations, and fair access. In addition, concerns have been raised with respect

to dark pools causing volatility due to the lack of price visibility and lack of a central marketplace. When traders meet in a dark pool, however, they are not necessarily looking for the best price, but for efficient execution and anonymity. n569

The Trade Through Rule

One of the intentions underlying the adoption of Regulation NMS is price transparency, as per the establishment of Rule 611 of Regulation NMS (the "trade-through rule"). n570 The trade-through rule requires that markets "establish, maintain and enforce written policies and procedures that reasonably designed to prevent trade-through on that trading center of protected quotations in NMS stocks." n571 A trade-through occurs when an order placed in one trading center is executed despite immediately available better priced quotations in other trading centers. Therefore, if the best price is the displayed, it cannot be ignored or traded-through. This presents an issue with respect to large institutional transactions. Prior to Regulation NMS, block trades could go outside the National Best Bid and Offer. Post Regulation NMS, execution must now occur at the or within the National Best Bid and Offer. In the event that one wants to go outside the NBBO, then one must use an intermarket sweep order that will show the presence of the buyer or seller. As a result, institutional traders have sought out dark pools so as not to notify the market of their trading intentions. The use of a dark pool therefore avoids the identification of the parties involved. Although there is no mechanism for such trading venues to show large trading volumes, an argument could be made that dark pools have an incentive to show volume, as it would enhance liquidity.

Best Execution Obligations

When utilizing a dark pool, there is no guarantee that one will necessarily receive the best price or the lowest execution charge. Instead, institutional traders avail themselves of dark pools so as preserve anonymity. As a result, with respect to dark pools owned by broker-dealers or a consortium of broker-dealers, this may impact their best execution obligations under FINRA rules and guidance. n572

Fair Access

The use of dark pools may give rise to issues related to the fair access provisions under Regulation ATS and Regulation NMS. Rule 610 of Regulation NMS addresses access to markets and quotations and

prohibits trading centers from imposing unfairly discriminatory terms that would prevent or inhibit the efficient access of any person through members, subscribers, or customers of such trading center, and enable access to NMS quotations through private linkages, rather than mandating a collective intermarket linkage facility. n573

In connection with adopting Rule 610, the SEC amended Rule 301 of Regulation ATS, lowering the volume threshold that triggers the Regulation ATS fair access requirements from 20 percent to 5 percent of the average daily volume in a security. n574

Rule 301(b)(5), the "Fair Access Rule" of Regulation ATS provides, among other things, that if an ATS accounts for a certain percentage of the average daily trading volume over four of the preceding six months, then the ATS must establish written standards for granting access to trading on its system and must not unreasonably prohibit access to the system. n575 Rule 301(b)(5) of Regulation ATS provides that ATS's that display quotes to more than one person must make their quotes publicly available for each stock in which they exceed 5 percent.

Liquidnet Holdings Inc. ("Liquidnet"), a dark pool, received an exemption from the SEC allowing it to retain its 20 percent threshold test with respect to the Fair Access Rule. n576 Liquidnet's system interacts with a subscriber's order management system to determine the subscriber's open trading interest and identify potential contra-side interest. If

interest is located on both sides, the buyer and the seller can negotiate the transaction through Liquidnet's instant messaging system on an anonymous basis. Liquidnet argued that its system operates in a similar fashion to a traditional block trading desk, which would not be subject to Regulation ATS. n577 Liquidnet further argued that in the event that they cross the 5 percent threshold, it would be prohibited from denying a membership application based upon the potential strategies of the applicant, which is contrary to their business model which is premised on the ability to deny access to certain subscribers. n578

The Liquidnet subscribers expect that counterparties will negotiate in good faith, and will not use information gained on the system to trade ahead of such interest outside the Liquidnet system. The SEC granted Liquidnet limited relief from the Fair Access Rule, thereby preserving its ability to deny access to subscribers or potential subscribers whose trading strategies could cause institutional customers to discontinue use of Liquidnet's system, as Liquidnet does not disseminate trade quotations. The SEC provided in its order granting the exception, that "applying the new 5 percent fair access threshold to Liquidnet would not further the Commission's primary policy in lowering the threshold, namely facilitating indirect access to the quotes of ATSS that are displaying them in the public quote stream." n579 Therefore, if Liquidnet has 20 percent or more the average daily volume in at least four of the six preceding calendar months, it must cease applying its access standards in a manner that may be unfair or discriminatory and fully comply with Rule 301(b)(5) of Regulation ATS with respect to such security.

Sub-Penny Pricing

Rule 612 of Regulation NMS (the "Sub-Penny Rule") prohibits market participants from accepting, ranking, or displaying orders, quotations, or indications of interest in a pricing increment smaller than a penny, except for orders, quotations, or indications of interest that are priced at less than \$1.00 per share. n580 The SEC's purpose for adopting such rule is "to promote greater price transparency and consistency, and to prevent market participants from stepping ahead of other orders by an economically insignificant amount." n581

Liquidnet obtained an order granting a limited exemption to the Sub-Penny Rule. n582 Liquidnet explained to the SEC the methodology of its trading platform. Liquidnet's system scans the order management system of each subscriber to identify trading interest that may match that of another subscriber. When the system locates a potential match, it notifies the buyer and seller, who then negotiate the transaction amongst themselves. n583 During a negotiation, a subscriber enters certain information into the system, and instead of entering a specific price, a subscriber can elect to execute a trade at the midpoint by clicking 'mid.' n584 The midpoint is the current midpoint between the security's NBBO. In the event that the NBBO is an odd number at the given time, then the price of the order would result in a sub-penny increment. Prior to execution, the subscriber has the opportunity to submit the order, which would then transmit the firm-priced order to the potential counterparty, who could then accept, reject, or mark a counter-offer. n585 The Liquidnet system does not automatically execute a trade at the midpoint; instead there is an additional step in which the parties view the actual price at which the trade would occur if accepted. n586 Under the Sub Penny Rule, these midpoint quotes would be prohibited. As a result, Liquidnet requested and received an exemption from the Sub-Penny Rule, based upon the extra confirmatory step.

Regulatory Implications

Although it appears that dark pools are gaining in popularity since the implementation of Regulation NMS, the regulatory implications with respect to use of the dark pools is still unknown. Furthermore, it has been argued that institutional traders are fragmenting the market due to their use of dark pools. n587 Perhaps the most interesting aspect with respect to the adoption and implementation of the Regulation NMS is the manner in which dark pools such as Liquidnet are seeking and receiving exemptions from Regulation NMS based upon the mechanics of their trading systems. It is possible that the Liquidnet exemptions from Regulation NMS may serve as a foundation for other alternative trading venues to carve out exemptions from Regulation NMS based upon the structure of their trading platforms. As a result, the SEC's intention of creating a modern centralized electronic market system via the adoption of

Regulation NMS may be undermined by dark pools.

For discussion of the development of the concept of a national market system, see Sec. Exch. Act Rel. No. 14416, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,502 (Jan. 26, 1978) (hereinafter cited as "National Market System Release"); Harman, *The Evolution of the National Market System--An Overview*, 33 *Bus. Law.* 2275 (1978). *See also* § 2.04[2] *infra*. For a discussion of the duties and powers of the Commission, see § 2.04[3] *infra*.

(n14)Footnote 14. The Committee on Banking, Housing and Urban Affairs of the United States Senate felt that the general concept of a "national market system" was "sufficiently clear from the words themselves" so that a definition of the term was not included in the Exchange Act. Senate Report, *supra*, at p. 7. The Senate Committee also rejected the approach of mandating certain minimum components of the national market system in favor of establishing "a statutory scheme clearly granting the Commission broad authority to oversee the implementation, operation, and regulation of the national market system and at the same time charging it with the clear responsibility to assure that the system develops and operates in accordance with Congressionally determined goals and objectives." Senate Report, *supra*, at 8-9.

(n15)Footnote 15. These segments include: all types of common and preferred stocks, bonds, debentures, warrants,

and options. Senate Report, *supra*, at 7.

(n16)Footnote 16. "The term "national market system" as used in the bill would encompass all segments of the corporate securities markets including all types of common and preferred stocks, bonds, debentures, warrants and options. This is desirable because many of the goals of the national market system, *e.g.*, availability of information with respect to price, volume, and quotations, coordination of self-regulatory systems, and strengthening of Commission oversight, are nearly universal in scope and might not be fully realized within separate market systems." This is not to say that it is the goal of the legislation to ignore or eliminate distinctions between exchange markets and over-the-counter markets or other inherent differences or variations in components of a national market system. Some present distinctions may tend to disappear in a national market system, but it is not the intention of the bill to force all markets for all securities into a single mold. Therefore, in implementing the bill's objectives, the SEC would have the power to classify markets, firms, and securities in any manner it deems necessary or appropriate in the public interest or for the protection of investors and to facilitate the development of subsystems within the national market system. (n27)Footnote 27. NYSE, *The Securities Markets: A Report with Recommendations* by William McC. Martin, Jr. (Aug. 5, 1971). (Hereinafter referred to as the "Martin Report.")

(n28)Footnote 28. To serve the interests of the public and the nation, as well as the interests of the securities industry itself, a national exchange system must be developed to provide a single, national auction market for each security qualified for listing. Such a system would integrate the New York Stock Exchange, the American Stock Exchange and the regional exchanges. Because of their geographical locations and their identification with local needs, the regional exchanges have a vital role to play in making a truly national system. To accomplish this, the structure of the market mechanism must be redesigned and modernized. The characteristics of this national auction market should

include the following:

1. A market which provides maximum opportunity for public buyers and sellers to effect trades directly through their agents, as opposed to a market in which the public trades with dealers trading for their own account;
2. A market in which the activities of broker-dealers, specialists and other professionals are uniformly defined and regulated and subordinated to the interests of the public;
3. A market which provides fair commission rates to all investors;
4. A market which permits equal access for a maximum number of broker-dealers and their customers, regardless of geographical location; and
5. A market which provides for equal access by all investors to material information about both the market itself and the securities traded in that market, including centralized reporting of price and volume of all trades.

The creation of such a national exchange system would provide one market for each listed security. There could be two or more divisions within this national exchange system. The present listing requirements of the New York and American Stock Exchanges might provide appropriate listing requirements for two such divisions. Whether all securities which meet the listing requirements for a particular division of the national exchange system should be required to be listed for trading in that division should be considered. Securities which are not listed on any division of the national exchange system would be traded in the over-the-counter market. Securities should be traded either in a single division of the national exchange system or in the over-the-counter market, not in both markets.

Suitable regulations will be required to coordinate the over-the-counter market, with the national exchange system and to protect the integrity of each. Martin Report, *supra*, at p. 4.

(n30)Footnote 30. Sec. Exch. Act Rel. Nos. 9529, [1971-1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P78,599 (Mar. 8, 1972), and 9530, [1971-1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P78,600, (Mar. 8, 1972).

(n31)Footnote 31. In July 1972, the Disclosure Committee tendered its initial report recommending, among other things, the formation of a central processor to receive and disseminate last sale data. The Disclosure Committee recommended that this processor be a neutral body "not under the control or domination of any particular market center" but functioning "under a set of rules approved by the Commission" In addition, the Committee urged that any moving display or interrogation system should include market identification because "the public is entitled to know ... under what regulatory conditions a transaction is taking place"

The Commission's republication of Rule 17a-15 and the consolidated tape plan filed pursuant to that rule substantially reflected the recommendations of the Disclosure Committee.

Shortly thereafter, the Central Market System (CMS) Committee in its interim report identified three problem areas that it believed required resolution concurrently with the implementation of the composite transaction recording and reporting system.

The reporting of unregulated short sales on a consolidated tape would create, in the view of the CMS Committee, a

serious problem since all sales displayed would have equal potential for attracting long sellers. In response to this concern, in March 1974, the Commission adopted Rule 10a-1 to regulate the display of short sales in the composite transaction reporting system. Sec. Exch. Act Rel. No. 11030, [1974-1975 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,971 (Sept. 27, 1974).

With respect to the anti-manipulative rules, the CMS concluded that Sections 9, 10, and 15 of the Exchange Act were sufficiently broad to provide self-regulatory bodies adequate latitude to prevent deceptive trade practices provided that there was a basic rule prohibiting participation by brokers and dealers in securities transactions for the purpose of creating or inducing "a false, misleading or artificial appearance of activity" in a listed security or for the purpose of "unduly or improperly influencing the market price" for a listed security or for the purpose of "establishing a price which does not reflect the true state of the market" to a listed security.

The CMS Committee was also concerned that the securities exchanges and the NASD set up a review mechanism to determine whether a trading suspension by any self-regulatory body should be effective for all markets. This issue was addressed by the Commission when it adopted the consolidated tape plan in May 1974. In particular, Section X of that plan provides that, whenever the primary market halts or suspends trading in a security because of inadequate disclosure of information or other "regulatory problems which should be clarified before trading is permitted to continue," the primary market will notify each participant and the consolidated tape would not print any reports of last sale prices in that security, unless the Commission determines that the exclusion of reports is not necessary for the maintenance of fair and orderly markets.

Finally, in August 1982, the Advisory Committee on Block Transactions submitted its final report, which concentrated on the need to strengthen the ability of the market to absorb large blocks. The Committee specifically recommended amendments to certain exchange and SRO rules pertaining to block transactions. The more important of these recommendations focused on the activities of block positioners and exchange specialists, in such transactions, who would be permitted to register as "upstairs market makers" and to permit exchange specialists to accept "not held" orders and thereby aid in the accumulation or disposition of a position taken by a block trader. The Commission accepted many of these recommendations.

(n41)Footnote 41. Section 11A(a)(1)(B).

(n42)Footnote 42. Section 11A(a)(1)(C).

(n43)Footnote 43. Section 11A(a)(1)(D). The Market 2000 Report states the Commission's view that it was "expected that in the NMS, competition would generate the best prices, comprehensive disclosure of market information would foster best execution of customer orders, and broker-dealers would place the interests of their customers first." Evaluating the progress towards these objectives, the report states that, "[s]ubsequent action by the Commission and the markets to advance the NMS have made the U.S. markets the most efficient and liquid in the world." "Market 2000: An Examination of Current Equity Market Developments," p. 1 (January 1994) (hereinafter cited as "Market 2000 Report").

(n44)Footnote 44. National Market System Release, *supra*.

(n45)Footnote 45. Senate Report, *supra*, at p. 16. Two benefits cited by the Committee as associated with trading in an ideal auction-type market for securities are:

(1) the limited price orders of public investors would have to be satisfied before any transaction could be effected at the same price, by a specialist or other market maker for his dealer account, or by the customer's broker for that broker's proprietary account, or by any participant in that market at a price less favorable to the other party to the trade than the limit order price, Sec. Exch. Act Rel. No. -14416, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P81,502 (Jan. 26, 1978), and

(2) the market orders of public investors could be executed against another public limit or market order at a better price than is currently being quoted by any dealer for his own account.

The investor benefits of auction trading would result from the placing of public orders ahead of dealers' orders in determining the sequence in which the orders entering the market are executed. Currently, for example, if a stock exchange member holds a customer's market or executable limited price order he may not initiate a transaction for his own account on the same side of the market until his customer's order has been executed. In other words, a member is required to yield priority to his customers' orders. Similarly, a member trading on the floor of an exchange is not entitled to parity with or precedence over orders originating off the floor of an exchange. The effect of this later requirement is to guarantee that public orders (or members' orders originated from off-the-floor), placed with a specialist are executed ahead of the specialist's own bid (or offer) at that price as well as ahead of the bid (or offer) of any other member trading on the floor.

The auction trading principle was the basis for the Commission's central limit order book proposals, *see* § 2.04[2][g] *infra*.

A fundamental goal of the national market system is the elimination of fragmented markets for securities suitable for auction trading, *see* Section 11A(a)(1)(D), so that all buying and selling interest in a given security can be centralized, to assure public investors the best execution available, thereby fully realizing the protections and benefits of the auction market. Senate Report, *supra*, at p. 17. The Senate Committee stated that the implementation of a consolidated transaction reporting system, discussed in § 2.04[2][d] *infra*, and a composite quotation system, discussed in § 2.04[2][c] *infra*, would do much to eliminate fragmented securities markets and Section 11A(c)(1), discussed in § 2.04[3][b][i] *infra*, would foster the development of the tape and quotation system:

However, a composite tape and composite quotation system will not by themselves provide appropriate protection for limit orders held in one market against transactions completed in other markets at prices somewhat above or below the prevailing market price. Nor will such facilities guarantee that orders of public investors receive priority over orders of specialists, floor traders, or market makers and other dealers regardless of the market in which they are entered. Therefore, the Committee believes that to eliminate market fragmentation and thus to achieve a true national market system, a set of trading rules and procedures must be adopted which will tie the individual market centers together.

Id.

Developments in the area of market linkage systems are discussed in § 2.04[2][b] *infra*.

Section 12(f) was amended in 1975 to extend auction-type protections to unlisted securities by permitting exchanges, subject to Commission approval, to commence trading in any unlisted security. Senate Report, *supra*, at p. 19. When an application is made to the Commission for the extension of unlisted trading privileges to a security not listed and registered on a national securities exchange, the Commission must consider, among other things, the desirability of removing impediments to and the progress that has been made toward the development of a national market system. Section 12(f)(2). This provision was included to prevent an extension of unlisted trading privileges, if such extension would have an effect similar to the disruption caused to the existing patterns of dealing in an over-the-counter stock admitted to trading on an exchange by the then existing restrictions against exchange member brokers effecting transactions off an exchange with nonmembers in listed securities traded on the exchange and because of the restrictions against member dealers who have made or would make competitive markets in such security effecting transactions off an exchange with members or nonmembers. See Senate Report, *supra*, at pp. 19-20.

The Committee views unlisted trading as appropriate to a national market system in which all market makers and brokers are permitted to deal freely with one another without unnecessary regulatory constraints, such as the NYSE's Rule 394(b). Until substantial progress has been made toward the development of such a national market system, the ability of an exchange to commence unlisted trading in an OTC security might well decrease rather than increase competition. This result would be directly contrary to the Committee's intention, and therefore Section 12(f)(2) directs the SEC to consider carefully the progress that has been made toward the development of a national market system.

Id. at 20.

Restrictions on off-board transactions by exchange members in listed securities are discussed in § 2.03[2][c] *supra*.

Unlisted trading privileges are discussed in § 2.01[1][c] *infra*.

(n46)Footnote 46. Qualified securities are discussed in § 2.04[2][a] *infra*.

(n47)Footnote 47. These characteristics are trading volume, price, and number of stockholders. S. Rep. No. 94-75, 94th Cong., 1st Sess., 16 (1975).

(n49)Footnote 49. Third market trading is discussed in § 2.03[2][c] *supra*.

(n50)Footnote 50. National Market System Release, *supra*; Section 11A(c)(3)(A), discussed in § 2.04[3][b][iii] *infra*. The New York Stock Exchange and "other industry groups" had urged that Senate Bill 249 require all trading in listed securities to take place on national securities exchanges after fixed commission rates have been eliminated. Senate Report, *supra*, at p. 20. Commission rates are discussed in § 2.03[2][d] *supra*.

(n51)Footnote 51. Section 11A(d)(1).

(n52)Footnote 52. The initial membership of the National Market Advisory Board was announced by the Commission in August of 1975, see Sec. Exch. Act Rel. No. 11623, [1975-1976 Transfer Binder] Fed. Sec. L. Rep.

(CCH) P80,288 (Aug. 28, 1975). The initial terms of the National Market Advisory Board members would have expired on September 30, 1977, but were extended by the Commission until December 31, 1977; 43 SEC Ann. Rep., p. 11 (1977).

(n53)Footnote 53. Section 11A(d)(1) of the Securities Exchange Act of 1934 reprinted in the Securities Primary Law Sourcebook, Volume B, Section F.

(n54)Footnote 54. Section 11A(d)(2).

(n55)Footnote 55. Section 11A(d)(3)(A). The National Market Advisory Board did, in fact, advise the Commission on several areas related to the development of a national market system: in September 1976 on in-house agency cross transactions; in January 1977 on the development of a composite limit order book; and in February and May of 1977 on off-board trading restrictions. 43 SEC Ann. Rep., pp. 5, 11-12 (1977); Report of the National Market Advisory Board on the Next Steps to Be Taken to Facilitate the Establishment of a National Market System, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P81,381 (Dec. 6, 1977). Off-board trading restrictions and in-house agency cross transactions are discussed in § 2.03[2][c] *supra*.

(n56)Footnote 56. Section 11A(d)(3)(B).

(n57)Footnote 57. Section 11A(d)(3)(B). Were the National Market Advisory Board to conclude that a National Market Regulatory Board (Regulatory Board) should be established, then the National Market Advisory Board should make recommendations as to:

- (1) the time when the Regulatory Board should be established;
- (2) its composition;
- (3) the scope of its authority;
- (4) the relationship of the Regulatory Board to both the Commission and existing self-regulatory organizations; and
- (5) the manner in which the Regulatory Board should be funded.

Id.

(n58)Footnote 58. Section 11A(d)(3)(B). The National Market Advisory Board issued a report to Congress pursuant to Section 11A(d)(3)(B) of the Exchange Act. National Market Advisory Board Report to the Congress, *The Possible Need for Modifications of the Scheme of Self-Regulation in the Securities Industry so as to Adapt it to a National Market System* (Dec. 31, 1976). The National Market Advisory Board saw no need for a new self-regulatory organization, the National Market Regulatory Board ("Regulatory Board") to administer the national market system:

Because at this time the exact form which the national market system may take is not clear, the [National Market Advisory] Board cannot now advise as to whether, at some later stage in the development of a national market system, it would be desirable for a Regulatory Board to be created. However, the Board believes that the establishment of a national market system can best be facilitated, and that at least certain national market system facilities best administered, by one or more coordinating entities in which the self-regulatory organizations and the public are represented, but in which no one or two existing self-regulatory organizations have a dominant position.

Id. at p. 9.

The National Market Advisory Board saw no need for new legislation to implement its recommendation with respect to the administration of a national market system because:

(1) the National Market Advisory Board made no recommendations of substantial modifications of the scheme of self-regulation provided for in Exchange Act, and

(2) the Exchange Act was recently amended to give the Commission power to require self-regulatory organizations "to act jointly with respect to matters as to which they share authority ... in planning, developing, operating, or regulating a national market system [Section 11A(a)(3)(B), see § 2.04[3][a] *infra*] ...

Id. at p. 10.

The Securities Acts Amendments of 1975 added a new Section 11A(e) directing the Commission to make a study, and report to Congress its findings on or before December 1, 1976, of the extent to which persons excluded from the definitions of "broker" and "dealer" maintain accounts on behalf of public customers for buying and selling securities registered under Section 12 and whether such exclusions are consistent with the protection of investors and with the other purposes of the Exchange Act.

Registration of securities pursuant to Section 12 is discussed in § 4.01 *infra*.

(n59)Footnote 59. Chairman Scanlon's letter said, in part:

"A variety of viewpoints are, by design, represented on the Board. Accordingly, rather than providing a single recommendation with respect to the next steps to be taken toward the establishment of a national market system, we provide a statement of major alternatives which we believe are open to the Commission." 432 B.N.A. Sec. Reg. L. Rep. I-1 (Dec. 14, 1977).

(n60)Footnote 60. The composite quotation system is discussed in § 2.04[2][c] *infra*.

(n61)Footnote 61. Intermarket linkage is discussed in § 2.04[2][b] *infra*.

(n62)Footnote 62. 432 B.N.A. Sec. Reg. L. Rep. I-1, I-2 (Dec. 14, 1977).

(n63)Footnote 63. On December 19, 1977, Senator Harrison A. Williams, Chairman of the Senate Banking and Securities Subcommittee, Rep. Bob Eckhardt, Chairman of the House Consumer Protection Subcommittee, and Rep. John E. Moss, Chairman of the House Oversight and Investigations Subcommittee, transmitted a joint letter to Harold Williams, the then Chairman of the Securities and Exchange Commission. The letter demanded that the Chairman establish by December 30, 1977, "the specific date by which the Commission will announce the exact next steps which it proposes to take to facilitate the establishment of a national market." See 433 B.N.A. Sec. Reg. L. Rep. A-12 (1978).

Thereafter, in early January 1978, Chairman Williams committed to issue a timetable and program for the development of a national market system. That program was announced in National Market System Release, *supra*.

(n64)Footnote 64. The composite quotation system is discussed in § 2.04[2][c] *infra*.

(n65)Footnote 65. National Market System Release, *supra*.

(n66)Footnote 66. Market linkage and order routing systems are discussed in § 2.04[2][b] *infra*.

(n67)Footnote 67. Public limit order protection is discussed in § 2.04[2][g] *infra*.

(n68)Footnote 68. Off-board trading restrictions are discussed in § 2.03[2][c] *supra*.

(n69)Footnote 69. The consolidated transaction reporting system is discussed in § 2.04[2][d] *infra*.

(n70)Footnote 70. The designation of securities eligible for trading in the NMS are discussed in § 2.04[2][a] *infra*.

(n71)Footnote 71. The five issues were:

- (1) whether to revise certain SRO rules prohibiting certain direct dealings between members and institutional customers;
- (2) the role, if any, standardized options should play in an NMS;
- (3) the extent to which there should be centralized governance of the NMS and nationwide surveillance of market professionals;
- (4) whether to revise the prohibition, then embodied in Section 11(a)(1), which prohibited an exchange member from effecting a transaction for its own account on such exchange; and
- (5) whether a national system for clearance and settlement is necessary for the operation of an NMS.

(n72)Footnote 72. P.L. 94-29, 89 Stat. 97 (June 4, 1975).

(n73)Footnote 73. See Section 11A(a)(1), discussed in § 2.04[1][b] *supra*.

(n74)Footnote 74. Melton, *Corporate Equities and the National Market System*, 3 Federal Reserve Bank of N.Y.Q. Rev. 25 (Winter 1978-79) (hereinafter cited as "Melton.")

(n75)Footnote 75. Melton stated in *Corporate Equities and the National Market System*:

The SEC has wisely refrained from attempting to design a system and to impose it on the industry, and has instead proceeded to implement the NMS [National Market System] by prodding the industry to develop trading systems that possess the essential features of the NMS as mandated by the Congress.

While the Congress clearly contemplated that the exchanges and the third market would continue to compete, the legislation [1975 Amendments] did not mandate any specific design for the NMS. In essence, the Congress expressed a preference for nationwide implementation of public auction trading principles, for competition in all aspects of the market, and for the development of an electronic communications system to facilitate attainment of these objectives.

Melton, *supra*, at 20.

(n76)Footnote 76. National Market System Release, *supra*. See also Sec. Exch. Act Rel. No. 15671 [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,016 (Mar. 22, 1979) (hereinafter cited as "National Market System Progress Assessment"). The concept of "qualified securities" is discussed in § 2.04[2][a] *infra*.

(n77)Footnote 77. National Market System Release, *supra*. The Commission also discussed several policy areas to be considered with its program for development of a national market system. These areas included:

- (1) institutional trading prohibitions--consideration of the elimination of NYSE and AMEX prohibitions in NYSE Rule 113 and AMEX Rule 190 regarding direct dealing by specialists with institutional customers, and consideration of the extent to which all market makers should be limited in their ability to deal directly with companies for which they act as market makers, and with insiders of such companies;
- (2) options--the Commission must ultimately determine what role standardized put and call option contracts should play in a national market system;
- (3) government and surveillance--the need for changes in the functioning of self-regulatory organizations to provide (a) centralized governance of both national market facilities and participants and (b) comprehensive and nationwide surveillance of market professionals;
- (4) Section 11(a)--whether further Commission action with respect to Section 11(a) (Section 11(a)(1) prohibits, with certain exceptions, any member of a national securities exchange from effecting any transaction on such exchange for its own account, the account of an associated person, or an account with respect to which the member or any of its associated persons exercise investment discretion; Section 11(a)(3), as amended by P.L. 95-283, 92 Stat. 249 (Act of May 21, 1978), makes the provisions of Section 11(a)(1) effective on February 1, 1979 as those provisions pertain to transactions on a national securities exchange effected by a member thereof who was a member on February 1, 1978) is necessary or appropriate in the public interest and for the protection of investors (Section 11(a) is discussed in § 3.02 *infra*); and
- (5) clearance and settlement--the Commission must review the problems impeding the prompt development of an efficient, competitive national system for clearance and settlement of securities transactions.

Id.

Also cited by the Commission as two areas pertaining to the development of a national market system for securities are off-board trading restrictions, discussed in § 2.03[2][c] *supra*, and qualified securities, discussed in § 2.04[2][a] *infra*. *Id.*

The market structure program described in the January Statement [Sec. Exch. Act Rel. No. 14416 (1978)] consisted of six interrelated initiatives: the development and implementation of three new national market system facilities (a consolidated quotation system, a nationwide network of order routing facilities and a central public agency limit order file), the refinement of an existing national market system facility (the consolidated transaction reporting system), the commencement of rulemaking proceedings to consider designation of certain categories of securities as qualified for trading in the national market system, and the continued consideration of off-board trading rules in light of the progress made toward a national market system. The January Statement also indicated that the Commission anticipated consideration of certain corollary issues in conjunction with this program, including institutional trading prohibitions, options market structure, governance and surveillance, the provisions of Section 11(a) of the Act, and clearance and settlement.

National Market System Progress Assessment, *supra*.

The Commission's statement on the development of a national market system in National Market System Progress Assessment, *supra*, set forth an updated program attempting to be responsive to the progress made and the commentary received on the national market system during 1978 while remaining consistent with the objectives set forth in Section 11A(a), *see* § 2.04[1][b] *supra*. The Commission cited two major national market system facilities developments during 1978:

- (1) the implementation of the Commission's Quote Rule, Rule 11Ac1-1 [now Rule 602], discussed in § 2.04[2][c][i] *infra*, and
- (2) the two experimental programs (the ITS and the NSTS, *see* § 2.04[2][b] *infra*) intended to achieve comprehensive market linkage systems.

National Market System Progress Assessment, *supra*. The Commission announced that its priorities for 1979 in the development of a national market system for securities were: to achieve nationwide price protection for public limit orders against executions at inferior prices, *see* § 2.04[2][g] *infra*; to assure the general availability of neutral order routing facilities linking brokers' and dealers' offices to all market centers trading in reported securities, *see* § 2.04[2][b][ii] *infra*; and to initiate rule-making proceedings to consider whether to preclude the application of off-board trading restrictions to securities not previously subject to those restrictions. *Id.*

Proposals have been advanced to create a national market system having different assumptions and different characteristics than those contemplated by the Commission in achieving the objectives articulated by Congress in the 1975 Amendments. The Commission seeks to establish mechanisms for the linking of existing market centers (and any other market centers created in the future) in an increasingly close and effective manner to avoid market fragmentation and to coordinate the various market centers so that they will constitute, in combination, a national market system. National Market System Release, *supra*. Two proposed alternative concepts that the Commission has not sought to pursue are:

- (1) a national market system created by modifying the existing "primary" markets, particularly the NYSE, resulting in substantially all orders interacting either through the mechanisms of, or on the floor of, the "primary" market, with all qualified broker-dealers, possibly together with certain other organizations, having access to that market on a nondiscriminatory basis, and
- (2) an electronic market system in which all orders are entered into a computer-based system and executed on the basis of strict time and price priority.

(n78)Footnote 78. Section 11A(a)(2). It was never contemplated that all securities traded in the secondary securities markets would be eligible for trading in the national market system. In 1971, when the Commission first proposed the concept of a "central market system," the Commission envisioned a system limited to "securities of national importance." SEC, Institutional Investor Study Report, H. R. Doc. 92-64, 92d Cong., 1st Sess., pt. 1 at XXIV-XXV (1971). The House version of the 1975 amendments appeared to include all securities in the national market system, unless otherwise exempted from the system by order of the Commission. *See* Sec. 501 of H. R. 4111, 94th Cong., 1st Sess. (1975). This reflected a belief that the structure of the national market system should not be predetermined by Congress or the Commission, but, rather, should evolve "through the ingenuity and response of the marketplace" H. R. Rep. No. 94-123, 94th Cong., 1st Sess., 50-51 (1975).

In contrast to H. R. 4111, the Senate bill imposed upon the Commission the responsibility to define the classes of securities eligible for trading in the national market system. The Senate recognized:

"that many securities do not have the characteristics--*e.g.*, trading volume, price, and number of stockholders--which would justify auction-type trading. Within a national market system, securities should trade in the manner most appropriate to their characteristics, consistent with the public interest. However, with respect to securities which are suitable for auction trading, the Committee believes that every effort should be made to design the national market system in such a way that public investors in these securities receive the benefits and protections associated with auction-type trading."

Senate Report at 16. The Senate version was adopted by the conference committee. Conference Report at 92-93.

(n79)Footnote 79. Section 11A(a)(2). The term "exempted security" is defined in Section 3(a)(12). In summary, "exempted securities" include obligations of the U.S. government, securities issued or guaranteed by corporations in which the U.S. has a direct or indirect interest, municipal securities, bank sponsored trust funds, and certain insurance contracts. *See* historical comment, 3 Fed. Sec. L. Rep. (CCH), at P15586.001 (1994).

(n80)Footnote 80. Sec. Exch. Act. Rel. No. 12158, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P80,399 (Mar. 2, 1976) (hereinafter cited as "Composite Book Release").

(n81)Footnote 81. Composite Book Release, *supra*.

(n82)Footnote 82. Composite Book Release, *supra*.

(n83)Footnote 83. The Commission sought public comment on the standards that would distinguish Tier 1 securities from Tier 2 securities.

(n84)Footnote 84. Composite Book Release, *supra*.

(n85)Footnote 85. To effect this objective, the Commission announced proposed amendments to proposed Rule 11Aa3-1 [now Rule 601] that would require inclusion of all Tier 1 securities in consolidated transaction reporting and quotation systems within two months of the effective date of a trading program filed pursuant to Rule 11Aa2-1 [now replaced by Rule 600].

(n86)Footnote 86. Price protection mechanisms are discussed in § 2.04[2][g] *infra*.

(n87)Footnote 87. Nasdaq at the time was part of the OTC market. For a discussion of Nasdaq, *see* § 2.01[1][a][ii] *supra*.

(n88)Footnote 88. For a discussion of this linkage, *see* § 2.04[2][b][ii] *infra*.

(n89)Footnote 89. Off-board trading restrictions are discussed in § 2.03[2][c] *supra*.

(n90)Footnote 90. Nonmember access is discussed in § 2.03[2][b] *supra*.

(n91)Footnote 91. Sec. Exch. Act Rel. No. 17549, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,826 (Feb. 17, 1981) (hereinafter cited as "NMS Securities Release").

(n92)Footnote 92. The rule did not apply to exchange-listed securities because almost all of these securities were already part of the Consolidated Quotation Plan and Consolidated Tape Association, through which quote information and transaction information are combined, respectively, in a single data stream for multiple markets. *Id.* For a description of the Consolidated Quotation Plan and Consolidated Tape Association, *see* § 2.04[2][c][ii] and 2.04[2][d][iii], respectively.

(n93)Footnote 93. Sec. Exch. Act Rel. No. 18397, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,077

(Jan. 7, 1982); Sec. Exch. Act Rel. No. 21583, [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,721 (Dec. 18, 1985); Sec. Exch. Act Rel. No. 22413, [1985-1986 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,914 (Sept. 16, 1985); Sec. Exch. Act Rel. No. 24635, [1987 Transfer Binder] Fed. Sec. L. Rep. (CCH) P84,140 (June 23, 1987).

Implementation of Rule 11Aa2-1 [now replaced by Rule 600] was deferred twice to permit the NASD to phase in the approximately 1500 Tier 2 securities that would join the NMS from the OTC market. *See* Sec. Exch. Act Rel. Nos. 18514, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,101 (Feb. 25, 1982), and 19092, [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,261, (Sept. 29, 1982).

(n94)Footnote 94. When the Commission proposed this change, it recognized that Congress had anticipated that the NMS designation criteria would relate to the trading characteristics of securities. It also noted, however, that Congress had provided the Commission with maximum flexibility in developing the NMS. Market 2000 Report, *supra*, at p. I-11 (footnote omitted).

(n95)Footnote 95. *See* Sec. Exch. Act Rel. No. 24635, [1987 Transfer Binder] Fed. Sec. L. Rep. (CCH) P84,140 (June 23, 1987).

(n96)Footnote 96. Former Rule 11Aa3-1a(4). The effect of this amendment was to allow the NASD to determine which securities were NMS securities by deciding which securities would be subject to the transaction reporting plan. However, there was little substantive change in the designation criteria because the NASD adopted standards for inclusion in the transaction reporting plan that incorporated the Tier 2 criteria and added corporate governance requirements. *Id.* Transaction reporting plans are discussed in § 2.04[2][d][iii].

The definition of "reported security" in former Rule 11Aa3-1(a)(4) was identical to that in former Rules 11Ac1-4(a)(10) and former Rule 11Ac1-2(a)(20), but differed from the definition in former Rule 11Ac1-1(a)(20). *See* Regulation NMS Adopting Release, *supra*, at *505. As a result of this inconsistency, and other changes to the NMS terminology, the term "reported security" was eliminated by Regulation NMS in favor of the terms "NMS Security" and "NMS Stock." *See id.*; Rule 600(b).

(n97)Footnote 97. Rule 600(a), 17 C.F.R. § 242.600(a).

(n98)Footnote 98. *See* Regulation NMS Adopting Release, *supra*, at *499-501.

(n99)Footnote 99. NASD rules 4400-4480 (1998).

(n100)Footnote 100. The Nasdaq National Market therefore was effectively created by Rule 11Aa2-1 [now replaced by Rule 600]. *See* NASD Manual, Rule 4400. The criteria for listing on the Nasdaq National Market are described in § 2.01[1][b] *supra*.

(n101)Footnote 101. *See* Sec. Exch. Act Rel. No. 45081, 2001 SEC LEXIS 2346 (Nov. 19, 2001). The UTP Plan is discussed in § 2.04[d][3] *infra*. Had the UTP Plan not been amended in 2001 to include all Nasdaq securities, all Nasdaq securities would have become NMS Securities in 2006, when Nasdaq became registered as a national securities exchange. *See* Sec. Exch. Act Rel. No. 53128 (Jan. 13, 2006). The distinction between Nasdaq National Market securities and the remaining Nasdaq securities, which used to be known as Nasdaq SmallCap Securities and now are known as Nasdaq Capital Market securities, remained after Nasdaq became a national securities exchange, when the Nasdaq National Market and Nasdaq Capital Market became separate listing tiers. *See id.*

(n102)Footnote 102. The Commission believes that communications and data processing facilities which link all qualified markets and permit orders in qualified securities to be transmitted promptly and efficiently from brokers or dealers to any qualified market, and from one such market to another, are necessary to increase the opportunities for brokers to secure best execution of their customers' orders, to ensure effective competition among qualified markets and to achieve the purposes of a national market system established by the Congress in Section 11A(a) of the Act. National

Market System Release, *supra*.

The linking of all markets for qualified securities through communication and data processing facilities is one of the goals of a national market system, *see* Section 11A(a)(1)(D), discussed in § 2.04[1][b] *supra*.

(n103)Footnote 103. National Market System Release, *supra*.

(n104)Footnote 104. The NSTS was originally referred to as the Multiple Dealer Trading System. *See* Sec. Exch. Act Rel No. 14674 (1978) (hereinafter cited as "NSTS Approval Order"). The Cincinnati Stock Exchange is now known as the National Stock Exchange.

(n105)Footnote 105. CAES is discussed in more detail in § 2.04[2][b][i][C] *supra*.

(n106)Footnote 106. The RMS was merged with the NSTS. *See* NSTS Approval Order, *supra*. The NSTS subsequently became part of the ITS. *See* Sec. Exch. Act Rel. Nos. 7516 n.22, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,818 (Feb. 5, 1981), and *Sec. Exch. Act Rel. No. 17532, 1981 SEC LEXIS 2094 (Feb. 10, 1981)* (hereinafter cited as "ITS CSE Amendment Release").

(n107)Footnote 107. While volume on the NSTS had increased to an average 8.1 million shares in 1982, approximately 2.8 million had originated or were confirmed through the ITS. For an analysis of the NSTS, *see* SEC, Report on the Operation of the Cincinnati Stock Exchange National Securities Trading System (1982).

(n108)Footnote 108. The original ITS members were the American, Boston, New York, Pacific, and Philadelphia Stock Exchanges. *See* Sec. Exch. Act Rel. No. 14661 (1978). The Midwest Stock Exchange joined ITS in 1979. *See* Sec. Exch. Act Rel. No. 15533 n.20, [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 22,808B (Jan. 29, 1979). The Cincinnati Stock Exchange, now known as the National Stock Exchange, joined in 1981. *See* ITS CSE Amendment Release, *supra*.

(n109)Footnote 109. *See* Sec. Exch. Act Rel. No. 17744, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,866 (Apr. 21, 1981). The interface was desirable because ITS routed orders between markets but had no automatic execution capability, while CAES provided automatic executions but only within one market. For a more complete description of the ITS and CAES systems, *see* §§ 2.04[2][b][i][A] and [C] *infra*, respectively.

(n110)Footnote 110. National Market System Release, *supra*.

"Market fragmentation" refers to the existence of multiple, geographically separated forums in which trading in the same security occurs, and from the institutionalization of the markets. [The problems arising from market fragmentation] include, among others: (i) the need to perfect existing mechanisms for the disclosure of information concerning all completed transactions in multiply-traded securities; (ii) the absence of a comprehensive, composite quotation system displaying buying and selling interest in those securities from all markets (whether on an exchange or over-the-counter); (iii) the inadequacy of existing means available to brokers for routing orders to and among markets in pursuit of the most favorable execution opportunities; (iv) the lack of a mechanism to provide nationwide agency limit order protection, affording time and price priority to such orders regardless of geographical location; (v) impediments to effective market-maker competition for orders of relatively small size; and (vi) the need to integrate block transactions more effectively into the normal course of securities trading.

Id.

(n111)Footnote 111. Commission rates are discussed in § 2.03[2][d] *supra*.

(n112)Footnote 112. Off-board trading restrictions are discussed in § 2.03[2][c] *supra*.

(n113)Footnote 113. The exchanges were the American, Boston, New York, Pacific and Philadelphia Stock Exchanges. Sec. Exch. Act Rel. No. 14661 (1978).

(n114)Footnote 114. *Id.* The Commission initially authorized the system to operate for one year. In 1979, the Commission issued an order approving the continuation of the system until January 31, 1983. Sec. Exch. Act Rel. No. 16214 (1979). Thereafter, the Commission granted the system permanent status by extending its operating authority indefinitely. Sec. Exch. Act Rel. No. 19456 (1983) (hereinafter cited as "ITS Approval Order").

(n115)Footnote 115. According to the NYSE, for example:

The Intermarket Trading System is a simple, workable and inexpensive system. It provides the core of a communications and trading facility that can evolve and expand, to become, along with other elements, the National Market System called for by Congress.

NYSE, A Cornerstone of the National Market System: The ITS (1979).

(n116)Footnote 116. For a discussion of ITS, see ITS Approval Order, *supra*. See also Melton, *supra*. See also Sec. Exch. Act Rel. No. 15533, [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P22,808B (Jan. 30, 1979):

The ITS provides facilities and procedures for (i) display on the floors of each of the participating exchanges (at the designated trading posts for ITS-traded securities) of composite quotation information disseminated pursuant to Rule 11Ac1-1 [now Rule 602] under the Act [Rule 602 is discussed in § 2.04[2][c][i] *infra*], thereby permitting members of each participating exchange to determine readily the best bid and offer available from any participant for a particular multiply traded security, (ii) routing of "commitments to trade" and administrative messages between and among the participants, and (iii) participation, under certain conditions, by members of all participating exchanges in opening transactions on those exchanges. (Footnotes omitted.)

Since the Composite Quotation System (CQS) used in conjunction with the Intermarket Trading System is an electronic system designed to display to broker-dealers on an exchange floor the best quotations--with size for listed stocks in different market centers--the Composite Quotation System contains no execution capability; Melton, *supra* at 22. Consequently, the ITS trading procedure, in conjunction with the CQS, is as follows:

Upon receipt of an order, a broker on the floor of a participating exchange checks the CQS display screen showing quotations on the various markets. If the quotation on his exchange is as good as or better than any other on the display screen, the broker would execute it on his exchange. If the display screen shows that a better quotation is posted on another exchange, the floor broker may decide to send the order there.

To do this, he enters a commitment for the bid or offer, stipulating the amount of shares and the price, in an ITS terminal located on the exchange floor and transmits it to the specialist on the other exchange. In principle, the price placed on a buy order must be the offering price quoted for the destination market on the CQS display, and a sell order must carry the bid price quoted for the destination market; the broker cannot enter a price between the quoted bid and offer. The specialist can either fill the order or cancel it. He might cancel it if there has been some sort of malfunction or if he was in process of changing his quotation. Any commitment not accepted within two minutes is automatically canceled by the system. While an order commitment is in ITS, the sender may not retrieve it to execute it on his own floor. Currently, the average time elapsed between submission of order commitments and

receipt of return messages is slightly less than one minute.

Melton, *supra* at 22.

Not only does the Composite System contain no execution capability, the CQS also displays only the best quotations in different market centers with specialists continuing to have exclusive knowledge of limit orders in their order books. Furthermore, a broker still must be physically present on the exchange floor to know of limit orders being held in the crowd. Such situation is inconsistent with nationwide protection of limit orders. Melton, *supra* at 22.

The Composite Quotation System is discussed in § 2.04[2][c] *infra*. Nationwide limit order protection is discussed in § 2.04[2][g] *infra*.

As to the "commitment to trade" that is part of the Intermarket Trading System trading procedure a question arose concerning whether a "commitment to trade" sent via the ITS would satisfy the requirements of Rule 11a2-2(T), or the "effect versus execute rule". The rule requires that orders for covered accounts ("covered accounts" are defined to include: (i) a member's own account (known as a "proprietary account"); (ii) the account of a person associated with a member; and (iii) an account over which the member or any person associated with the member exercises investment discretion (known as a "discretionary account"). Sec. Exch. Act Rel. No. 14563, 3 Fed. Sec. L. Rep. (CCH) at P22,808 (Mar. 14, 1978)) be transmitted from off the exchange floor. Sec. Act Rel. No. 14563, Fed. Sec. L. Rep. (CCH) P22,808 (Mar. 14, 1978). In a transaction through the ITS by a firm that was a member of both the exchange from which the order was sent and the exchange at which it was received, it was uncertain that this requirement would be satisfied. In a letter to the Pacific Stock Exchange, the Commission stated that ITS transactions of this nature would be deemed in accordance with the rule. *See Pacific Stock Exchange Inc.*, [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P81,967 (1979). Though termed a "temporary rule," Rule 11a2-2(T) has remained in existence since its adoption in 1978.

(n127)Footnote 127. *See* Mark Hendrickson, *Intermarket Trading System is Doomed, but What Will Replace it?*, Securities Week, Vol. 32, No. 33, August 22, 2005, at 1.

(n128)Footnote 128. *See* Reuters, *A Nasdaq Trading Change*, New York Times, August 9, 2005, at C13.

(n129)Footnote 129. *See* Ivy Schmerken, *Are Regional Stock Exchanges Seeking an Alternative to ITS?*, Wall Street & Technology, September 1, 2005, at S14.

(n130)Footnote 130. The four participating exchanges were the Boston, Cincinnati [now National], Chicago and Pacific [now NYSE Arca] Stock Exchanges. *See* National Market System Release, *supra*.

(n131)Footnote 131. NSTS Approval Order, *supra*; *see also* Sec. Exch. Act Rel. Nos. 15413 and 16215 (1979).

(n132)Footnote 132. For a discussion of off-board trading, *see* § 2.03[2][c] *supra*.

(n133)Footnote 133. NSTS Approval Order, *supra*. The NSTS has been described as the only "hard CLOB" presently operating in the equities market. Melton, *supra*, at 23. A CLOB is a "central limit order book," *see* § 2.04[2][g] *infra*. A hard CLOB is a mandatory system which integrates electronic order execution capability with an electronic file of all outstanding limit orders, irrespective of the market center in which they were inserted. *Id.* A "soft CLOB" is a similar system but is voluntary. In the NSTS a "broker-dealer with access to the system can enter his own quotations and limit orders into the system, and he can "hit" bids and offers displayed on the system essentially instantaneously." *Id.*

(n134)Footnote 134. "Users" include members of the NSE and specialist and exchange market makers in designated issues registered as such on other exchanges who may (along with NSE members) become "approved dealers" on the exchange. *See* Article I, Section 1(a) of NSE By-laws; NSE Rules 11.9(a)(7), 11.9(a)(4) and 11.9(a). NSE members and approved dealers can enter both agency and principal orders, whereas access nonmembers of the NSE can enter only agency orders. NSE Rules 11.9(e) and 11.9(f).

(n135)Footnote 135. A market order, however, will be translated by a floor trader into a limit order and then the trading mechanism will match that order against a corresponding limit order on the other side of the market. Deloitte Haskins Sells; Evaluation of the Multiple Dealer Trading Facility (Cincinnati/NMS), p. 12 (Nov. 14, 1978) (hereinafter cited as "Evaluation"). The various types of orders that a customer may give his broker in connection with the purchase or sale of securities on an exchange are discussed in § 2.01[1] *supra*.

The NSTS is an auction market that has been observed to contain the following key elements of an auction market:

- (1) highest bid meeting lowest offer;
- (2) easy access to quote information;
- (3) firm quotes based only on executable orders; and
- (4) execution of orders at a price within a quoted spread.

Id.

(n136)Footnote 136. A "public agency order" is defined by NSE Rule 11.9(a)(9) as "any order for the account of a person other than a member, an Approved Dealer or a person who could become an Approved Dealer by complying with this Rule with respect to his use of the System, which order is represented, as agent, by a User."

(n137)Footnote 137. NSTS Approval Order, *supra*; Evaluation, *supra*, at p. 7.

(n138)Footnote 138. NSTS Approval Order, *supra*; Evaluation, *supra*, at pp. 6, 7.

(n139)Footnote 139. NSTS Approval Order, *supra*; Evaluation, *supra*, at pp. 7, 8.

(n140)Footnote 140. NSTS Approval Order, *supra*.

(n141)Footnote 141. Sec. Exch. Act Rel. Nos. 15413 and 16215 (1979).

(n142)Footnote 142. Sec. Exch. Act Rel. No. 18985 (1982).

(n143)Footnote 143. SEC, A Report on the Operation of the Cincinnati Stock Exchange National Securities Trading System 1978-1982, pp. 4, n.6 (1982). (Hereinafter referred to as "NSTS Report.")

(n144)Footnote 144. SEC Ann. Rep., Table 20 (1997).

(n145)Footnote 145. In September 2004, however, the CBOE announced that it was reducing its ownership stake in the NSE from 68 percent to approximately 10 percent. JB, *CBOE Selling Most of its Share of NSX*, Securities Week, Vol. 31, No. 38, September 20, 2004, at 10.

(n146)Footnote 146. One issue raised by the NSTS is the role of specialists in the system. While the NSTS enhances opportunities for market makers to compete because the order book is public and orders may be hit regardless of the geographical location of the market makers, a problem arises because exchange specialists derive a substantial amount of commission income by executing limit orders left with them:

In [the NSTS], execution of such orders is automatic and there are no commissions to be earned. Thus specialists may have less of an incentive to accept an affirmative obligation to preserve price continuity in the market unless some other means of compensating them is developed. Whether such compensation is necessary--and if so, how best to provide it--is an important policy issue, but there is no logical inconsistency between payments for specialist services and hard CLOB.

Melton, *supra*, at p. 24.

Another problem raised in connection with the NSTS is the entry of matching orders through the use of "internalization." A broker-dealer may "internalize" orders by entering one side within the existing spread and then executing against that order by immediately entering the other side. Evaluation, *supra*, at p. 26. This ability of NSE approved dealers to trade against their own retail order flow without exposing those orders to other buying or selling interest has been criticized by both the NYSE and the AMEX in comments to the Commission as possibly leading to market fragmentation and as being inconsistent with national market system objectives. See Sec. Exch. Act Rel. No. 15413 (1978).

The Commission announced in Sec. Exch. Act Rel. No. 15533, [1979 Transfer Binder] Fed. Sec. L. Rep. 9 (CCH) P22,808B (Jan. 29, 1979), that Section 11(a)(1) of the Exchange Act (discussed in § 3.02 *infra*,) may not have a

substantial impact on the operation of the NSTS because several of the exemptive provisions (such as the market maker exemption in Section 11(a)(1)(A) or, in the case of accounts as to which an NSE member exercises investment discretion, the effect versus execute exemption in Temporary Rule 11a2-2(T)) apply to trading in the NSTS.

(n147)Footnote 147. For a discussion of Nasdaq, see § 2.01[2][a][ii] *supra*.

(n148)Footnote 148. See, e.g., Sec. Exch. Act Rel. No. 16888, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,608 (June 11, 1980).

(n150)Footnote 150. See Sec. Exch. Act Rel. No. 49349 (Mar. 8, 2004); Sec. Exch. Act. Rel. No. 48674 (Oct. 21, 2003).

(n151)Footnote 151. See § 2.04[2][b] *supra*.

(n152)Footnote 152. Qualified securities are discussed in § 2.04[2][a] *supra*.

(n153)Footnote 153. National Market System Release, *supra*.

(n154)Footnote 154. *Id.* Section 11A(c)(1)(E), discussed in § 2.04[3][b][i] *infra*, gives the Commission rulemaking power to assure that all exchange members, brokers, and dealers transmit orders for the purchase or sale of qualified securities in a manner consistent with the establishment and operation of a national market system.

(n155)Footnote 155. National Market System Release, *supra*.

(n156)Footnote 156. The Commission, while expressly refraining from endorsing one broker order routing system over another, did state that a new message switch facility for the routing of orders from brokers' and dealers' offices to any qualified market would not have to be developed if the existing order routing facility operated by the Securities Industry Automation Corporation (SIAC), and offered to members of the NYSE and the AMEX, were expanded to receive orders in qualified securities and if access to that facility were made generally available to all brokers and dealers. *Id.*

(n157)Footnote 157. Sec. Exch. Act Rel. No. 14885, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P81,625 (June 23, 1978).

The Commission had received two proposals concerning a universally available, neutral "upstairs" message switch:

(1) that of the NASD envisioning a national order routing system as the primary means for routing orders to the various market centers (and as the center of a communications network connecting all brokers, dealers, and market centers), and

(2) that of the NYSE, and concurred in by the AMEX, to use the existing order routing facility operated by SIAC.

The NYSE proposal contemplated the continued evidence of multiple, competing switches. *Id.*

The Commission received comments from several self-regulatory organizations, retail brokerage firms, the Securities Industry Association (now the Securities Industry and Financial Markets Association), and one individual in response to its June 1978 request for comment. National Market System Progress Assessment, *supra*. The commentators opposed

any Commission mandate to establish a single order routing facility that would eliminate broker discretion (to consider factors other than price, such as: order size, execution and clearing costs, perceptions as to the reliability of the displayed quotation, and the likelihood of obtaining execution at a price better than that indicated by the displayed quotation) by forcing automatic routing of all orders on the basis of machine-displayed quotations. *Id.*

(n158)Footnote 158. SEC Chairman Harold Williams stated in 1978:

While the Commission has not formally acted, I think it would be unlikely for the Commission to require order-by-order routing decisions by retail firms given the existing structure of the markets. Absent quotations which are firm under all conditions, given limitations on access and differences in clearing costs, and, most importantly, absent the means of accessing those quotations in a timely manner, such a requirement would not appear feasible at this time.

Whether order-by-order routing to the best market in size will eventually be a characteristic of a national market system should be left for future consideration in light of subsequent developments in the structure of the markets. However, improvements in order routing facilities can, and should, be achieved. We are aware that various brokerage service firms offer order routing facilities permitting brokers to route orders to any market center. However, as a practical matter, many of those brokers currently linked to the New York-AMEX switch, which provides access only to those exchanges, have no ready means of routing orders to other markets. Therefore, I urge the New York and the AMEX to promptly pursue the commitment they made in their responses to the January Statement [Sec. Exch. Act Rel. No. 14416 (1978)] to provide other market centers with access to their common switching facilities.

Address of Chairman Williams, *see* § 2.04[1][e] *supra*. *See also Work on a National Stock Trading System Lags Badly; Some Blame Brokers and SEC*, Wall Street Journal, p. 34 cols. 1-4 (Feb. 2, 1979).

In the Commission's status report on the progress made in 1978 in pursuing the initiatives described by the Commission in its January 1978 statement on the development of a national market system, *see* § 2.04[2] *supra*, the Commission reiterated its views on a broker order routing system:

The Commission continues to believe that a broker routing retail orders in a particular security to a single market (whether by automated or other means) must at least make periodic assessments of the quality of competing markets to assure that it is taking all reasonable steps under the circumstances to seek out best execution of customers' orders. For most brokers, the availability of a neutral order routing mechanism which would permit a firm easily to shift its order flow from one market center to another would facilitate compliance with this obligation. The need for development of neutral order routing facilities is not, however, premised solely on the contribution such facilities would make to the ability of a broker to achieve "best execution" of his customers' orders. Development of order routing facilities which facilitate the routing of orders to any market center also will contribute to establishment of an environment satisfying the statutory objective of assuring fair competition among brokers and dealers and among markets.

National Market System Progress Assessment. (Footnotes omitted)

The Commission announced that it was deferring consideration of whether order by order routing of retail orders to the best market in size should be required in a national market system for securities, in view of an offer in 1978 by both the NYSE and the AMEX to modify their message switch, *see* Address of Chairman Williams, *supra*, to permit all market centers desiring such linkage to send and receive messages through the system. In support of its decision to defer consideration of a broker order routing system, the Commission questioned whether individualized routing of all orders

on the basis of machine-displayed quotations should be required in the current trading environment (characterized by quotes that are not firm under all circumstances, practical limitations on access for execution purposes, and differences in clearing costs). *Id.* The need to develop a system capable of order by order routing from upstairs offices to all market centers may, in fact, diminish (at least from the standpoint of satisfying a broker's best execution responsibility, see § 2.04[2][c] *infra*) as market linkage systems are "enhanced," *i.e.*, the operating characteristics of the market linkage systems are substantially improved. *Id.*

(n159)Footnote 159. Section 11A of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F, established certain goals for a national market system, which are discussed in § 2.04[1][b] *supra*.

(n160)Footnote 160. See Address by Chairman Williams, National Market System Release, *supra*. The intermarket order routing system was only one of the two types of facilities the Commission cited as mechanisms needed to link qualified markets effectively.

(n161)Footnote 161. National Market System Release, *supra*.

(n166)Footnote 166. ITS CSE Amendment Release, *supra*.

(n167)Footnote 167. For a description of the mechanics of this interface, see Sec. Exch. Act Rel. No. 17516 at n.22, [1980-1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,818 (Feb. 5, 1981).

(n168)Footnote 168. According to the Commission, the manual interface between ITS and NSTS may "prove too slow and cumbersome to provide an efficient mechanism for routing orders among market centers." Sec. Exch. Act Rel. No. 17516 [1981-1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,818 (Feb. 5, 1981); Amendment to ITS Release, *supra*.

(n169)Footnote 169. ITS CSE Amendment Release, *supra*.

(n170)Footnote 170. Sec. Exch. Act Rel. No. 17744, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,866 (Apr. 21, 1981) (hereinafter cited as "Release 17744").

(n171)Footnote 171. Release 17744, *supra*.

(n172)Footnote 172. Off-board trading is discussed in § 2.03[2][c] *supra*.

(n173)Footnote 173. The arguments that the ITS/ CAES interface was premature were numerous and varied. The Pacific Stock Exchange (now NYSE Arca) and the Chicago Stock Exchange urged the Commission to follow the NSTS/ITS route by ordering OTC market makers to install an ITS terminal in their trading rooms. Release 17744, *supra*, at n.22. The NYSE, while generally supporting some type of interface, argued that interfacing should be deferred until action was taken to abate the industry concern over internalization of off-board transactions. *Id.* at n.27. Specifically, the NYSE endorsed a two element "test" linkage of ITS and CAES: a pilot electronic linkage limited to the

30 most active Rule 19c-3 securities and a "preliminary" rule on internalization. The Commission rejected these arguments noting that it:

remains fully cognizant of the concerns raised by commentators relating to internalization by OTC market makers and its possible effects on the securities markets. However, the Commission carefully considered these concerns in the context of its Rule 19c-3 proceeding and determined that, on balance, any adverse effects resulting from the removal of off-board trading restrictions for a limited number of newly listed securities were off-set by the prospects of enhanced competitive and experimental benefits resulting from that action. The Commission concludes that it is neither necessary nor appropriate to reconsider that determination at this time. While the Commission views self-regulatory efforts to resolve industry concerns relating to OTC trading in listed securities as significant and positive, and remains prepared to take regulatory action itself if adverse consequences result from internalized trading and SRO efforts are unsuccessful, the Commission believes that the achievement of an efficient linkage between exchange and OTC markets is fundamental to the entire national market system program and must be implemented promptly independent of these collateral market structure concerns.

Id.

(n174)Footnote 174. Sec. Exch. Act Rel. No. 18536, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,107 (Mar. 4, 1982).

(n175)Footnote 175. The major impediments, according to the Commission, were the issue of internalization, market maker commitment requirements of OTC market makers participating in CAES, ITS order entry procedures, OTC trade reporting, identification by CAES of short sales, display of CAES bids and offers where the market is "locked" (*i.e.*, a displayed bid quotation is identical to an offer quotation) or "crossed" (*i.e.*, when a displayed bid is higher than a displayed offer), and certain technical matters. *Id.*

The Commission's lengthy plan covered such matters as administration of the ITS plan, monitoring the ITS/ CAES interface, receipt and submission of quotations, reporting of ITS trades, elements of a commitment to trade, acceptance of a commitment, validation of commitments, routing of commitments, pre-opening applications, implementation of the plan, order protection, OTC market obligations, clearance and settlement, operational matters, allocation of costs and expenses and withdrawal from the ITS plan. *Id.*

(n176)Footnote 176. Sec. Exch. Act Rel. Nos. 18712, [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,213 (May 6, 1982), and 18713, [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,214 (May 6, 1982).

(n177)Footnote 177. ITS Approval order, *supra* at n.7.

(n178)Footnote 178. ITS Approval Order, *supra*. The Commission made the following further comments on the interface:

The Commission recognizes that for CAES to be able to effectively prevent trade-throughs and for the system to operate at maximum efficiency, CAES' ITS order entry process must be enhanced so that CAES orders can be automatically entered into ITS without the manual intervention of a CAES market maker whenever an ITS exchange market is displaying a quotation superior to any interest in CAES. The NASD proposed to develop such a capability, which would enhance CAES to provide for automated routing to ITS if an exchange market is displaying a superior quotation and no CAES market maker matches or betters such a quotation within a specified time period. The Commission believes that use of the interface in this manner does not raise concerns with respect to CAES being employed as an order-routing mechanism by the users of CAES enabling those users to avoid brokerage and transaction

fees and the need for exchange membership. Accordingly, the Commission expects the participants to amend the ITS Plan by the end of the pilot phase of the linkage to provide for such an automated interface. *Id.* at n.20.

The Commission also notes that in order to achieve fully the Congressional goal that all markets for qualified securities be linked (Section 11A(a)(1)(D) of the Act), it will be necessary in the future for the ITS/CAES interface to be expanded to include all stocks traded in the third market. The Commission encourages the ITS participants to move promptly to achieve this goal once all Rule 19c-3 Securities are included in the interface.

The Commission views Rule 11Ac1-1 [now Rule 602] as an integral step in accomplishing the statutory goal, set forth in Section 11A(a)(1)(D), of linking all markets to:

- (1) foster efficiency,
- (2) enhance competition, and
- (3) contribute to best execution of customers' orders.

Id. Market linkage systems are discussed in § 2.04[2][b] *supra*. Best execution is discussed in § 2.04[2][c][v] *infra*.

(n204)Footnote 204. Quote Rule Adopting Release, *supra*.

(n205)Footnote 205. Rule 11Ac1-1 [now Rule 602] originally was to become effective on May 1, 1978. The Commission, however, postponed the effective date for three months to permit the self-regulatory organizations subject to the Quote Rule to plan for its joint implementation, *see* § 2.04 [2][c][ii] *infra*, by making available to vendors quotations in eligible securities from each participating self-regulatory organization through a single data stream. Sec. Exch. Act Rel. No. 14711, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P81,576 (Apr. 27, 1978).

(n206)Footnote 206. Rule 11Ac1-1 [now Rule 602] did not apply to quotations in listed options until 2000. *See* Sec. Exch. Act Rel. No. 43591 (Nov. 17, 2000).

(n207)Footnote 207. The consolidated transaction reporting system is discussed in § 2.04[2][d] *infra*.

(n208)Footnote 208. The rule is also frequently referred to as the "Firm Quote Rule" because one of its Primary Provisions requires broker-dealers to honor quotations in certain securities, *i.e.* disseminate "firm" quotations.

(n209)Footnote 209. Sec. Exch. Act Rel. Nos. 16589, [1979-1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,455, (Feb. 19, 1980) (hereinafter cited as "Transaction Reporting Release"); 18482, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,098, (Feb. 11, 1982); 24635, [1987 Transfer Binder] Fed. Sec. L. Rep. (CCH) P84,140 (June 23, 1987); 37619A, [1997 Transfer Binder] Fed. Sec. L. Rep. (CCH) P85,837 (Sept. 6, 1996); 38110 [1997 Transfer Binder] Fed. Sec. L. Rep. (CCH) P85,875 (Apr. 10, 1997); and 38139, [1997 Transfer Binder] Fed. Sec. L. Rep. (CCH) P85,876 (Jan. 20, 1997).

Rule 11Ac1-1[now Rule 602] evolved from Rule 17a-15, which required every exchange and association to file a plan with the Commission for the collection, processing, and transmission of quotation information on listed securities and securities admitted to unlisted trading privileges. Rule 17a-15 had been adopted in 1972. Sec. Exch. Act Rel. No. 9850, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,082 (Jan. 3, 1972).

In March 1973 various SROs filed a plan with the Commission to disseminate market information obtained pursuant to Rule 17a-15 in a consolidated system. *See § 2.04[2][d][i] infra*. The plan was approved in 1974. Sec. Exch. Rel. No. 440787, [1973-1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,782 (May 10, 1974).

By 1980, the securities industry had witnessed numerous legal, regulatory, and operational changes, which prompted the Commission to adopt a new rule, Rule 11Ac1-1, governing dissemination of quotations. The changes included:

- (1) The enactment of the Securities Acts Amendments of 1975, which mandated the formation of a national market system, subjected securities information processors to regulation (*See § 2.04[2][e] infra*), and gave the Commission express authority to order the development and implementation of an effective market communication system.
- (2) The speed, reliability, and performance capacity of computer and electronic equipment had improved.
- (3) Exchange off-board trading restrictions had been largely rescinded (*See § 2.03[2][c] supra*).
- (4) Nonmembers were allowed access to exchange trading facilities (*See § 2.03[2][b] supra*).
- (5) Various types of market linkage programs had been developed and were undergoing evolution (*See § 2.04[2][b][i] supra*).
- (6) Numerous service companies were competing to supply computerized programs and services to the securities industry.
- (7) The Commission and the securities industry had almost five years of experience in the operation and effect of a consolidated quotation system (*See § 2.04[2][c][iv] infra*).

The 1980 amendments to Rule 11Ac1-1 were accompanied by the amendment and re-designation of Rule 17a-15 as Rule 11Aa3-1 [now Rule 601]. Transaction Reporting Release, *supra*. The amendments to Rule 11Ac1-1 were largely technical in nature.

The 1982 amendments, however, permitted market centers, under some circumstances, to disseminate quotations on a voluntary, rather than mandatory, basis. Sec. Exch. Act Rel. No. 18482, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,098 (Feb. 11, 1982). The Commission concluded that Rule 11Ac1-1 "has not achieved its objective of fostering increased competition for order flow through [mandatory] dissemination of firm quotations by market makers." *Id.* This failure was attributable to:

- (1) continued reliance by regional exchanges on "other methods" to compete with the primary markets, such as reduced clearings and settlement charges,
- (2) routine routing of orders by retail firms to the primary market, and
- (3) a willingness and ability by specialists at the primary market to match superior quotations from

regional exchanges.

Id.

In addition, the Commission identified several problems in the operation of the Quote Rule in the three years since its adoption. These problems primarily arose from the practice of both regional exchange specialists and third market makers of disseminating "nominal, away-from-the-market quotations in many securities." The Commission identified the problems as:

- (1) Unreliable quotations published by secondary market makers, especially third market makers who are not linked to primary markets through the Intermarket Trading System (ITS). Because there is little incentive to maintain up-to-date quotations, some third market makers disseminate quotations with broad spreads or do not update quotes during the trading day. These quotes can "lock" or "cross" the market.
- (2) Some regional exchange specialists attempt to comply with the Quote Rule by releasing nominal away-from-the-market quotations, sometimes generated by computerized systems that are not accurate (*See* Sec. Exch. Act Rel. No. 18482 at n.16, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,098 (Feb. 11, 1982)).
- (3) The volume of quotations from secondary market makers places an unnecessary burden on vendors.

Accordingly, the Commission amended the Quote Rule in two significant respects:

- (1) Mandatory dissemination of quotations was required only where the information is necessary "to assure pricing efficiency or to enable investors to monitor the quality of executions." Sec. Exch. Act Rel. No. 18482, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,098 (Feb. 11, 1982). Therefore, mandatory dissemination was required only from
 - (a) the principal markets, and
 - (b) market makers in Rule 19c-3 securities (*i.e.*, securities eligible for trading off-board (*See* § 2.03[2][c] *supra.*)).

Secondary market makers, even participants in ITS, were no longer required to comply with the Quote Rule.

- (2) Market makers in NM "qualified securities" (*See* § 2.04[2][a] *supra.*) are not required to disseminate quotations pursuant to Rule 11Ac1-1, but may do so voluntarily.

As part of the changes effected by the Order Handling Rules adopted in 1996, an amendment to the Quote Rule expanded the quotation requirements of substantial OTC market makers and exchange specialists to require that they publicly disseminate continuous two sided quotations for any exchange-listed security for which they account for 1 percent or more of the trading volume. Prior to this amendment, mandatory quotations were only required from OTC market makers and exchange specialists who transacted more than 1 percent of the volume in a Rule 19c-3 security. The amended Quote Rule also included electronic communication systems' quotes within the definition of "bid" and "offer." *See* Sec. Exch. Act Rel. 37619A, [1997 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,837 (Sep. 6, 1996) (hereinafter cited as "Order Handling Release"). In 2000 the Quote Rule was amended to apply to listed options in addition to stocks. Sec. Exch. Act. Rel. No. 43591 (Nov. 17, 2000). Other technical amendments have also been made, primarily

relating to quotation dissemination standards for Rule 19c-3 securities.

(n210)Footnote 210. "Responsible broker or dealer" is defined in Rule 600(b)(65) [former Rule 11Ac1-1(a)(3)] to mean:

(i) When used with respect to bids or offers communicated on a national securities exchange, any member of such national securities exchange who communicates to another member on such national securities exchange, at the location (or locations) or through the facility or facilities designated by such national securities exchange for trading in an NMS security a bid or offer for such NMS security, as either principal or agent; provided, however, that, in the event two or more members of a national securities exchange have communicated on or through such national securities exchange bids or offers for an NMS security at the same price, each such member shall be considered a responsible broker or dealer for that bid or offer, subject to the rules of priority and precedence then in effect on that national securities exchange; and further provided, that for a bid or offer which is transmitted from one member of a national securities exchange to another member who undertakes to represent such bid or offer on such national securities exchange as agent, only the last member who undertakes to represent such bid or offer as agent shall be considered the responsible broker or dealer for that bid or offer; and

(ii) When used with respect to bids and offers communicated by a member of an association to a broker or dealer or a customer, the member communicating the bid or offer (regardless of whether such bid or offer is for its own account or on behalf of another person).

An "NMS security" is any security for which transactions are reported under a plan approved by the Commission. Rule 600(b)(46) [former Rule 11Ac1-1(a)(20)].

(n211)Footnote 211. The term "vendor" is defined in Rule 600(b)(83) [former Rule 11Ac1-1(a)(19)] to mean:

any securities information processor engaged in the business of disseminating transaction reports, last sale data, or quotations with respect to NMS securities to brokers, dealers, or investors on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker, or interrogation device.

Securities information processors are discussed in § 2.04[2][e] *supra*.

When the Commission announced the adoption of the Quote Rule, the Commission decided against imposing specific obligations on quotation vendors to display quotations from all market centers, believing that adequate dissemination of quotation information would be achieved without Commission action. Quote Rule Adopting Release, *supra*. However, the Commission expects quotations to "be displayed on a non-discriminatory basis (*i.e.*, from all market centers) and that access to composite quotations will be provided in a manner which will allow recall of these quotations as readily as quotations from a single market." The Commission's 1980 amendment to the Quote Rule, which excludes secondary market makers from the rule, was intended to reduce significantly the volume of multiple quotations on a single issue.

The Commission nevertheless expects vendors to indicate to users when the quotations are not firm due to an unusual market condition. *Id.*

The Commission reconsidered its decision not to impose specific obligations on vendors concerning the display of quotation information. See former Rule 11Ac1-2(c). However, specific display obligations were eliminated with the adoption of Regulation NMS. See Rule 603.

(n212)Footnote 212. "Subject security" is defined in Rule 600(b)(73) [former Rule 11Ac1-1(a)(25)] to mean:

(i) With respect to a national securities exchange: (A) Any exchange-traded security other than a security for which the executed volume of such exchange, during the most recent calendar quarter, comprised one percent or less of the aggregate trading volume for such security as reported pursuant to an effective transaction reporting plan or effective national market system plan; and (B) Any other NMS security for which such exchange has in effect an election, pursuant to [Rule 602(a)(5)(i)], to collect, process, and make available to a vendor bids, offers, quotation sizes, and aggregate quotation sizes communicated on such exchange; and

(ii) With respect to a member of a national securities association: (A) Any exchange-traded security for which such member acts in the capacity of an OTC market maker unless the executed volume of such member, during the most recent calendar quarter, comprised one percent or less of the aggregate trading volume for such security as reported pursuant to an effective transaction reporting plan or effective national market system plan; and (B) Any other NMS security for which such member acts in the capacity of an OTC market maker and has in effect an election, pursuant to [Rule 602(a)(5)(ii)], to communicate to its association bids, offers, and quotation sizes for the purpose of making such bids, offers, and quotation sizes available to a vendor.

(n213)Footnote 213. Rule 602(a)(1)(i) [former Rule 11Ac1-1(b)(1)(i)]. Exceptions are provided for: (1) Any bid or offer executed immediately after communication and any bid or offer communicated by a responsible broker or dealer other than an exchange market maker which is cancelled or withdrawn if not executed immediately after communication; and (2) Any bid or offer communicated during a period when trading in that security has been suspended or halted, or prior to the commencement of trading in that security on any trading day, on that exchange. *Id.*

(n214)Footnote 214. "OTC Market Maker" is defined in Rule 600(b)(52) [former Rule 11Ac1-1(b)(1)] to mean: "Any dealer that holds itself out as being willing to buy from and sell to its customers, or others, in the United States, an NMS Stock for its own account on a regular or continuous basis otherwise than on an exchange in amounts of less than block size."

(n215)Footnote 215. Rule 602(a)(1)(ii) [former Rule 11Ac1-1(b)(1)(ii)]. Any bid or offer executed immediately after communication is excluded from Rule 602(a)(1)(ii). An association is not required to make available any quotation information concerning a subject security during any period when over the counter trading in that security has been suspended. *Id.*

(n216)Footnote 216. The term "published bid" or "published offer" means "the bid or offer of a responsible broker or dealer for an NMS security communicated by it to its national securities exchange or association pursuant to [Rule 602] and displayed by a vendor on a terminal or other display device at the time an order is presented for execution to such responsible broker or dealer." Rule 600(b)(60) [former Rule 11Ac1-1(a)(16)].

(n217)Footnote 217. Rule 602(a)(1)(i) is discussed below.

(n218)Footnote 218. Rule 602(a)(2) [former Rule 11Ac1-1(b)(2)].

(n219)Footnote 219. Rule 602(a)(1)(i) is discussed below.

(n220)Footnote 220. The term "specified persons," when used in connection with the notification required to be provided pursuant to Rule 602(a)(3)(i) [former Rule 11Ac1-1(b)(3)(i)], shall mean:

(i) each vendor;

(ii) every plan processor; and

(iii) the processor for the Options Price Reporting Authority (in the case of a notification with respect to a subject security which is a class of securities underlying options admitted to trading on any national securities exchange).

Rule 600(b)(69) [former Rule 11Ac1-1(a)(24)].

To expedite the notification process, the Commission omitted any requirement that the Commission itself must be notified under Rule 602(a)(3)(i) [former Rule 11Ac1-1(b)(3)]. See Quote Rule Adopting Release, *supra*.

(n221)Footnote 221. Rule 602(a)(3)(i) [former Rule 11Ac1-1(b)(3)(i)].

(n222)Footnote 222. Rule 602(a)(3)(i). The requirement that exchange procedures utilized in making a determination that unusual market conditions exist be filed with the Commission under Section 19(b), which contains procedures for Commission approval of rule changes by self-regulatory organizations and is discussed in § 2.03[1][a] *supra*, is "to assure some uniformity between the various exchanges and to assure that the factors to be considered in reaching these determinations are consistent with the Commission's intention in providing the exception." Quote Rule Adopting Release, *supra*.

(n223)Footnote 223. Rule 602(a)(3)(i) [former Rule 11Ac1-1(b)(3)(i)]. The exchange must continue, to the maximum extent practicable, to collect, process, and make available to quotation vendors data for that security in accordance with Rule 602(a)(1) [former Rule 11Ac1-1(b)(1)]. *Id*.

During the period that the notification pursuant to paragraph (a)(3)(i) of Rule 602 [paragraph (b)(3)(i) of former Rule 11Ac1-1] is in effect, the exchange that gave such notification must monitor the activity or conditions forming the basis for the notification. Rule 602(a)(3)(i) [former Rule 11Ac1-1(b)(3)(ii)]. When the exchange is once again able to fulfill its obligations under paragraph (a)(1) of Rule 602 [paragraph (b)(1) of former Rule 11Ac1-1] with respect to the security that is the subject of the notification, the exchange must then immediately so renotify all specified persons. Such renotification reinstates the obligations imposed upon the exchange or responsible broker or dealer that had been suspended as a result of the prior notification. *Id*.

(n224)Footnote 224. Rule 602(a)(4) [former Rule 11Ac1-1(b)(4)].

(n225)Footnote 225. Rule 602(a)(5) [former Rule 11Ac1-1(b)(5)(i)]. This election was added in 1980. The notification is effective at the opening of trading on the business day following the notification. Rule 602(a)(5)(ii) [former Rule 11Ac1-1(b)(4)(ii)].

The election is no longer effective at such times as the market no longer transmits quotation information for a security. Rule 602(a)(5)(iii) [former Rule 11Ac1-1(b)(5)(iii)].

The Commission is aware that some persons required to provide quotations for dissemination pursuant to the Rule may be tempted to avoid the Rule's requirements by disseminating bid and asked prices which are a minimal increment "away" from, for example, the best published bid or offer, or from the published bid or published offer of the "primary" market, while quoting a more competitive market orally in response to inquiry. In this regard, it should be understood that the definitions of the terms "bid" and "offer" in the Rule require that the actual bid and asked prices at which a responsible broker or dealer is willing to effect transactions in reported securities from time to time be communicated to its exchange or association. The Commission believes that if a market maker continuously communicates quotations

which do not reflect its actual market, that activity would constitute a violation of Rule 11Ac1-1 [now Rule 602] and the issuance of fictitious quotations within the meaning of Section 15(c)(2) of the Act.

Quote Rule Adopting Release, *supra*.

Notwithstanding the Commission's concern, the occurrence of these practices prompted the Commission to amend Rule 11Ac1-1 in 1980.

(n226)Footnote 226. Rule 602(b)(2) [former Rule 11Ac1-1(c)(2)].

(n227)Footnote 227. The bid price or offer price is exclusive of any commission, commission equivalent, or differential customarily charged by such responsible broker or dealer in connection with execution of any such order pursuant to the broker's or dealer's obligation under Rule 602(b)(2) [former Rule 11Ac1-1(c)(2)]. Rule 602(b)(2).

(n228)Footnote 228. *Id.* The Commission declined to provide an exception from the firmness obligations of brokers and dealers under Rule 11Ac1-1(c)(2) [now Rule 602(b)(2)] for responsible brokers or dealers who communicate erroneous quotations:

"The Commission believes that responsible brokers and dealers should be held accountable for their own errors in order (i) to create incentive on the part of responsible brokers and dealers to accurately communicate their quotations and (ii) to avoid "backing away" by responsible brokers and dealers under the guise of erroneous quotations."

Quote Rule Adopting Release, *supra*.

The firmness provisions of Rule 11Ac1-1(c)(2) [now Rule 602(b)(2)], which require a responsible broker or dealer to deal directly with any person belonging to a category of persons with which such broker or dealer customarily deals, are not intended to supersede or contravene rules governing suitability and diligence as to customer accounts. *Id.* For example, see NYSE Rule 405, "Diligence as to Accounts," NYSE Guide (CCH) P 2405 (2003).

(n229)Footnote 229. Rule 11Ac1-1(c)(2) under the Securities Exchange Act of 1934 reprinted in the Securities Primary Law Sourcebook, Volume B, Section G. "[T]he Commission notes that the phrase "customarily deals" connotes, among other things, that a responsible broker or dealer should not engage in a transaction with a customer when the broker's fiduciary responsibility, including principles of suitability and other obligations imposed on such brokers by law, would otherwise prohibit such a transaction." Quote Rule Adopting Release, *supra*.

(n230)Footnote 230. Quote Rule Adopting Release, *supra*.

(n231)Footnote 231. Quote Rule Adopting Release, *supra*. The exception to the firmness provisions in Rule 11Ac1-1(c)(2) [now Rule 602(b)(2)] for revised quotations prevents a responsible broker or dealer from being required to execute more than one order on the basis of his published bid or published offer. Quote Rule Adopting Release, *supra*.

(n232)Footnote 232. See Rule 602(a)(4) [former Rule 11Ac1-1(b)(4)].

(n233)Footnote 233. Rule 602(b)(3)(i)(B) [former Rule 11Ac1-1(c)(3)(i)(B)].

(n234)Footnote 234. Rule 602(b)(3)(ii) [former 11Ac1-1(c)(3)(ii)]. The exception to the firmness provisions in Rule 602(b)(2) [former Rule 11Ac1-1(c)(2)] for revised quotations prevents a responsible broker or dealer from being required to execute more than one order on the basis of his published bid or published offer. Quote Rule Adopting

Release, *supra*.

(n235)Footnote 235. See Rule 602(a)(4) [former Rule 11Ac1-1(b)(4)].

(n236)Footnote 236. Rule 602(b)(4)(i) [former Rule 11Ac1-1(c)(4)(i)].

(n237)Footnote 237. Rule 602(b)(4)(ii) [former Rule 11Ac1-1(c)(4)(ii)].

(n238)Footnote 238. Rule 602(c) [former Rule 11Ac1-1(d)]. The exemptive provisions of the Quote Rule are designed to exempt market centers not accounting for any significant trading in a subject security or market centers that would suffer economic burdens not justified by the purposes of the Exchange Act, and to deal with other market structure developments (such as the Regional Market System (now the National Securities Trading System)), *see* § 2.04[2][b][i][B] *supra*, should such system eventually reflect all buying and selling interest in those securities traded in the system at all participating exchanges). Quote Rule Adopting Release, *supra*.

The Commission granted several exemptions from the requirements of the Quote Rule after consideration of the aggregate dollar and share trading volume in the reported securities and the cost burdens to the exchange in proportion to the benefits that would be obtained as a consequence of compliance with the Quote Rule. The Commission exempted the National Stock Exchange (only those reported securities traded on the National Stock Exchange other than through the Multiple Dealer Trading System (now the National Securities Trading System)), *See* Sec. Exch. Act Rel. No. 15010 (1978); the Spokane Stock Exchange, *See* Sec. Exch. Act Rel. No. 15011 (1978); the Intermountain Stock Exchange, *See* Sec. Exch. Act Rel. No. 15012 (1978); and the Philadelphia Stock Exchange (only from those provisions of the Quote Rule requiring that bids and offers made available to quotation vendors be accompanied by their associated size), *See* Sec. Exch. Act Rel. No. 15013 (1978).

(n263)Footnote 263. Sec. Exch. Act Rel. No. 9529, [1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P78,599 (Mar. 8, 1972).

(n264)Footnote 264. Sec. Exch. Act Rel. No. 10969, [1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,931 (Aug. 14, 1974). The Commission's proposal would provide the exchanges and NASD with the option to develop such a plan. Only if an exchange or the NASD did not file a plan could other persons submit quotation plans.

(n265)Footnote 265. Sec. Exch. Act Rel. No. 11288, [1975 Transfer Binder] Fed. Sec. L. Rep. (CCH) P80,129 (Mar. 5, 1975).

The Commission also stated that it [had] determined that quotation information, such as that currently provided by some exchanges to their members, is essential to broker-dealers, whether members or not, in discharging their duty of reasonable diligence in the execution of customers' orders. A broker-dealer that is prohibited from access to that information is severely disadvantaged thereby. In addition, quotation information is of significant value to the market place as a whole insofar as a quotation reflects the considered judgment of a market professional as to various factors affecting the market, including the current price levels and size of buying and selling interest. Thus, restrictions on dissemination of that information detract from the efficiency of the market place in reflecting all available fundamental and market information respecting an issuer's securities. Finally, quotation information is of considerable value to investors, both individual and institutional, in determining the best market for execution and in understanding the market forces at work at any given time.

(n266)Footnote 266. Sec. Exch. Act Rel. No. 12670, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P80,658 (July 29, 1976). The Quote Rule is discussed in § 2.04[2][c][i] *supra*.

(n267)Footnote 267. Quote Rule Adopting Release, *supra*.

(n268)Footnote 268. The consolidated transaction reporting system is discussed in § 2.04[2][d] *infra*.

(n269)Footnote 269. Sec. Exch. Act Rel. No. 15009 (July 28, 1978) (hereinafter cited as "CQ Plan Initial Approval Order"). The plan was entitled "Plan for the Purpose of Implementing Rule 11Ac1-1 under the Securities Exchange Act of 1934."

(n270)Footnote 270. See CQ Plan Initial Approval Order, *supra*. On January 24, 1979 the Commission announced the extension of authorization of the CQ Plan for a period of twelve months, subject to the participants' not implementing the regulatory halt provision. Sec. Exch. Act Rel. No. 15511 (Jan. 24, 1979) (hereinafter cited as "CQ Plan Extension Order").

(n271)Footnote 271. The CQ Plan contains a regulatory halt provision: all participants must cease communicating quotation information in a security to the CQ Plan processor during a regulatory halt in that security called by the "primary market" for that security. The practical effect of the halt provision would be to require every participant to halt trading during the pendency of any regulatory halt initiated by the "primary" market. CQ Plan Extension Order, *supra*.

In announcing the continuation of temporary authorization of the CQ Plan, the Commission requested the participants to eliminate the regulatory halt provisions from the CQ Plan. *Id*. The Commission believed that the regulatory halt provision may have anticompetitive effects on both the regional exchanges and the third market and that the provision would, in effect, delegate to the "primary" market for a particular security the power to halt all trading in that security in a manner possibly "contrary to the scheme of self-regulation created by the [Exchange] Act." *Id*.

(n272)Footnote 272. The original participants in the CQ Plan were the New York, American, Boston, Pacific, Philadelphia and Midwest Exchanges, and the National Association of Securities Dealers, Inc. CQ Plan Extension order, *supra*, at n.3. The current participants in the CQ Plan are the original participants plus the Chicago Board Options Exchange and the National Stock Exchange.

(n273)Footnote 273. The Securities Industry Automation Corporation ("SIAC") sequences and transmits the quotation information collected by the participants in the CQ Plan by means of a consolidated high speed data transmission line to vendors and subscribers.

(n274)Footnote 274. CQ Plan Extension Order, *supra*.

(n275)Footnote 275. CQ Plan Extension Order, *supra*. The fee schedule in the CQ Plan creates a permanent two-tier structure for quotation information: Network A reports transactions in NYSE-listed securities that occur on any participating exchange, in the "third market," or through the Institutional Networks Corporation; Network B reports transactions in AMEX and certain regional exchange listed securities.

Transaction and quotation information for Nasdaq securities traded on Nasdaq before Nasdaq's registration as a national securities exchange, was disseminated pursuant to a plan filed by the NASD. See § 2.04[2][d][iii] *infra*. See Sec. Exch. Act Rel. No. 43863 (Jan. 19, 2001). The Nasdaq securities covered by the CQ Plan are only those securities traded on Nasdaq. A separate plan governed the collection and dissemination of transaction and quotation information for Nasdaq securities listed on an exchange or traded on an exchange through the granting of unlisted trading privileges. See Sec. Exch. Rel. No. 44937 (Oct. 15, 2001). This plan is known as the "Reporting Plan for Nasdaq-Listed Securities Traded on Exchanges on an Unlisted Trading Privileges Basis." See Sec. Exch. Rel. No. 48882 (Dec. 4, 2003); § 2.04[2][d][iii] *infra*.

(n277)Footnote 277. Sec. Exch. Act Rel. No. 18982 (1982).

(n278)Footnote 278. Sec. Exch. Act Rel. No. 19363 (1982).

(n279)Footnote 279. *Id.* at n.4. For a discussion of the operation of the CQ Plan as it relates to the Intermarket Trading System, see § 2.04[2][b][i][A] *supra*.

(n280)Footnote 280. Section 11A(a)(1)(C)(iv). Furthermore, one of the purposes cited for the linking of all markets for qualified securities through communication and data processing facilities is to contribute to the best execution of investors' orders. Section 11A (a)(1)(D). The goals and objectives of a national market system are discussed in § 2.04[1][b] *supra*. See Harman, *The Evolution of The National Market System--An Overview*, 33 *Bus. Law.* 2275, 2296, 2297 (1978).

(n281)Footnote 281. "Because the Commission believes that a broker's existing fiduciary duty to his customer requires that he take cognizance of quotation information available through a composite quotation system in seeking best execution of his customer's order, it is not clear at this time that a more definitive Commission rule prescribing best execution standards is necessary to ensure adherence to appropriate principles of agency conduct by brokers." Quote Rule Adopting Release, *supra*.

(n282)Footnote 282. National Market System Release, *supra*.

(n283)Footnote 283. National Market System Release, *supra*.

(n284)Footnote 284. See, e.g., Sec. Exch. Act Rel. No. 16590, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,456 (Feb. 19, 1980) (hereinafter cited as "Display of Market Data Adopting Release").

(n285)Footnote 285. Display of Market Data Adopting Release, *supra*.

The Commission's determination to defer consideration of a 'best execution' rule, given the current posture of the evolution of a national market system, is not intended to be an indication that the quality of individual markets (as reflected by transaction and quotation information disseminated from each market) should not be regarded as an important factor in determining to which market an order should be sent. In the release announcing the adoption of Rule 11Ac1-1 [now Rule 602], the Commission indicated that it expected that the rule would improve the quality of quotation information available from all market centers and that brokers would utilize that information in making informed order routing decisions Furthermore, the Commission has also indicated that it expects that those broker-dealers that automatically route retail customer orders in a particular security to a predesignated market, at a minimum, make periodic assessments as to the quality of such market ... The Commission continues to believe that awareness of nationwide market information by brokers, dealers and investors is essential to improving the quality of order execution.

Furthermore, the Commission believes that broker-dealers who choose to automatically route their customer orders to a designated market should be alert for unusual market conditions in the designated market which would require brokers to take additional measures (such as disclosure of market conditions or special handling of customer orders). Examples of such unusual market conditions would include substantial price disparity between the designated market and other markets, extreme volatility of the market in the security and unusual trading patterns. In addition, the Commission notes that a broker's fiduciary responsibility to obtain the best execution of a customer's order under the circumstances may continue beyond the initial routing decision. In this regard, the Commission has proposed Rule 11Ac1-3 [now Rule 607] which would provide for nationwide protection of certain displayed public limit orders. See *Sec. Act Rel. No. 15770* (Apr. 26, 1979), 44 *FR* 26692 .

(n292)Footnote 292. That rule-making power is contained in Section 11A(c)(1)(A) and (B). See Senate Report, *supra*, at pp. 103, 104.

(n293)Footnote 293. The adoption of Rule 17a-15 was announced in Sec. Exch. Act Rel. No. 9850, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,082 (Nov. 8, 1972).

(n294)Footnote 294. See Transaction Reporting Proposing Release, *supra*, and Sec. Exch. Act Rel. No. 16589 (Feb. 19, 1980).

The Commission also adopted a new Rule 11Ac1-2 [now eliminated in favor of Rule 603] to govern the display of last sale reports now covered by Rule 11Aa3-1 [now Rule 601], see Sec. Exch. Act Rel. No. 15250 [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P81,749 (Oct. 20, 1978) (hereinafter cited as "Transaction Reporting Proposing Release") and Transaction Reporting Release, *supra*. Sec. Exch. Act Rel. No. 15251, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,750, (Oct. 20, 1978) (hereinafter cited as "Display of Market Information Proposing Release") and Display of Information Release, *supra*. The rules are discussed in §§ 2.04[2][d][i] and 2.04[2][d][ii] *infra*.

Among other things, the 1975 Amendments

(1) consolidated and explicitly stated the Commission's power to regulate the dissemination and use of last sale (*i.e.*, the price and volume at which a completed transaction involving the purchase or sale of a security took place) and quotation information,

(2) granted the Commission plenary authority to regulate the manner in which vendors display transaction reports, and

(3) permitted the Commission to designate any security, not just securities registered or admitted to unlisted trading privileges on an exchange, as qualified for trading in the national market system.

Transaction Reporting Proposing Release, *supra*.

(n295)Footnote 295. See Regulation NMS Adopting Release, *supra*, at *491.

(n297)Footnote 297. Rule 17a-15 [now Rule 601]. Every broker or dealer not an exchange or association member who effects transactions in listed securities not reported pursuant to Rule 17a-15 by any exchange or association had to

file a plan meeting the requirements of Rule 17a-15(a). Former Rule 17a-15(e).

(n298)Footnote 298. Rule 17a-15 [now Rule 601]. Five national securities exchanges and the National Association of Securities Dealers, Inc. filed a Joint Industry Plan under Rule 17a-15, *see* § 2.04[2][d][iii] *infra*, to put into effect a consolidated tape system.

(n299)Footnote 299. Rule 17a-15 [now Rule 601].

(n300)Footnote 300. Rule 17a-15(b) [now Rule 601].

(n301)Footnote 301. Any public display of selected last sale reports, *i.e.*, reports of prices and volumes of all completed transactions, had to be clearly identified as only reporting selected transactions according to size, category of security, or other criteria. *Id.*

(n302)Footnote 302. Rule 17a-15 [now Rule 601].

(n303)Footnote 303. The five securities exchanges were the American, Midwest [now Chicago], New York, Philadelphia, and Pacific [now NYSE Arca] Stock Exchanges. *See* Sec. Exch. Act Rel. No. 10026, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,255 (Mar. 5, 1973).

(n304)Footnote 304. Sec. Exch. Act Rel. No. 10026 (1973), *supra*.

(n305)Footnote 305. Sec. Exch. Act Rel. No. 10787, [1973-1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,782 (May 10, 1974). The proposed plan was revised several times in response to Commission staff comments. *See* Sec. Exch. Act Rel. Nos. 10073, [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,307 (Mar. 29, 1973), 10218, [1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,397, (June 13, 1973), and 10671, [1973-1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,700 (Mar. 8, 1974).

(n306)Footnote 306. For a discussion of this plan, *see* § 2.04[2][d][iii] *infra*.

(n307)Footnote 307. *See* National Market System Release, *supra*.

Of particular concern to the Commission is the manner in which vendors currently provide for the recall of last sale data on information retrieval display devices. These vendors now permit information from the primary market by input of the letter (or combination of letters) used to identify the particular security involved in the consolidated system (the 'consolidated system symbol') followed by depression of an information request key. In most cases, entry of additional letters or symbols (plus depression of the information request key) is required in order to recall consolidated last sale information or last sale data from any particular market other than the primary market.

To date, this practice has been permitted under a Commission interpretation of Rule 17a-15 [now Rule 601] issued in March 1975. In that release the Commission stated:

Vendors may use the consolidated tape ticker symbol (the old NYSE symbol in the case of an NYSE listed security) to interrogate for last sale information from the NYSE and some other symbol to interrogate for consolidated data. However, any symbol which differs from the consolidated tape symbol which is used to interrogate for consolidated data must be simple and easy for brokers and dealers to use.

The Commission has reconsidered that interpretative statement in light of its experience with the consolidated system and no longer believes that vendors should be permitted to program their information retrieval devices for the recall of consolidated data by use of any combination of letters or symbols other than the consolidated system symbol. Current practice, with each vendor using a different

combination for the recall of consolidated data (generally a more complicated routine than that used for the retrieval of data from the primary market), discourages use of consolidated information, has anticompetitive consequences for markets as to which last sale data may be recalled only by relatively more difficult and time consuming interrogation routines, and impedes progress toward a national market system. Consequently, the Commission believes vendors should modify their systems promptly to confine use of consolidated system symbols in their interrogation and display devices to the recall of consolidated last sale data.

This problem was apparently remedied by the adoption of Rule 11Ac1-2 [now eliminated in favor of Rule 603], which prescribes the format for retrieval of last sale and quotation information. See § 2.04[2][d][ii] *infra*.

(n308)Footnote 308. "Retransmission" refers to the communications process by which the entire data stream of transaction reports disseminated through the consolidated [transaction reporting] system would be received by a vendor and retransmitted to its subscribers as a moving ticker display." Transaction Reporting Proposing Release, *supra*.

(n309)Footnote 309. National Market System Release, *supra*.

(n310)Footnote 310. Transaction Reporting Proposing Release, *supra*. Any plans previously filed and declared effective under Rule 17a-15 [now Rule 601], any amendments to such plans, and any Commission action concerning such plans or amendments thereto, would remain in effect without further action by the Commission under proposed Rule 11Aa3-1. Any provisions of any plan filed under Rule 17a-15, see § 2.04[2][d][iii] *infra*, that prohibit the retransmission of data for purposes of creating a moving ticker display, however, would be modified by paragraph (e) of proposed Rule 11Aa3-1. *Id.* at n.16.

(n311)Footnote 311. The Commission decided, in conjunction with its consideration of ways to improve the operation of the consolidated transaction reporting system, to propose its amendments to Rule 17a-15 under Section 11A and to renumber the Rule under Section 11A, because the 1975 Amendments now place explicit Commission authority to regulate the consolidated transaction reporting system in that Section of the Exchange Act. Transaction Reporting Proposing Release, *supra*.

(n312)Footnote 312. Transaction Reporting Proposing Release, *supra*.

(n313)Footnote 313. Transaction Reporting Proposing Release, *supra*; order Handling Release, *supra*.

(n314)Footnote 314. In addition, the Commission revised former Rule 17a-15 in the following respects:

- (1) to permit exchanges and associations to impose a "subscriber charge condition" that would permit the CTA to assure that CTA collects the charges it levies for dissemination of transaction information on moving tickers;
- (2) to delete the provisions of former Rule 17a-15(f) that permitted any exchange or association to require a vendor to make information it distributes available to all qualified subscribers throughout the continental United States at a uniform price;
- (3) to clarify under what conditions an amendment to the plan may be submitted to the Commission; and
- (4) to add additional definitions.

Id.

The Commission had considered, but did not adopt, an amendment that would permit an exchange or association to require that vendors ensure that all subscribers reserve transaction information at substantially the same display rate as subscribers to the ticker networks, the "synchronization condition." *Id.*

Similarly, the Commission determined not to impose accuracy and reliability standards on vendors. *Id.*

(n315)Footnote 315. "Transaction reporting plan" is defined in Rule 600(b)(82) [former Rule 11Aa3-1(a)(2)] to mean "any plan for collecting, processing, making available or disseminating transaction reports with respect to transactions in reported securities filed with the Commission pursuant to, and meeting the requirements of, this [Rule 601]."

(n316)Footnote 316. Under Rule 601(a)(2) [former Rule 11Aa3-1(b)(2)], all amendments to transaction reporting plans must be considered in accordance with the procedures outlined in Rule 608. Under Rule 608 [former 11Aa3-2], any two or more self-regulatory organizations, acting jointly, or the Commission can propose an amendment to a transaction reporting plan by filing the proposed amendment with the Commission, together with a statement of the purpose of the amendment and the proposed means of implementation and operation. The Commission then must publish a notice of the filing and afford interested parties the opportunity to offer written comments. Within 120 days of the publication of the notice of filing, or 180 days if the Commission finds that additional time for review is necessary, the Commission will approve the amendment if it finds the proposed changes are in the public interest, for the protection of investors, helpful in implementing a national market system, or in furtherance of the purposes of the Exchange Act. A proposed amendment may be declared temporarily effective for up to 120 days if doing so is deemed to be in the public interest. Certain minor amendments may be implemented upon filing the amendment with the Commission under Rule 11Aa3-2(c)(3).

(n317)Footnote 317. Rule 11Aa3-1(a)(11) defines the term "vendor" as any securities information processor engaged in the business of disseminating transaction reports or last sale data with respect to transactions in reported securities to brokers, dealers, or investors on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker or interrogation device. Securities information processors were brought under the direct jurisdiction of the Commission in 1975 with the enactment of Section 11A(b) of the Exchange Act, discussed in § 2.04[2][e] *infra*.

(n318)Footnote 318. Rule 17a-15 contained no provisions concerning retransmission. The CTA Plan (discussed in § 2.04[2][d][iii] *infra*) filed with the Commission pursuant to Rule 17a-15, however, does prohibit retransmission "except as may be incidental to the operation of approved interrogation devices or display devices." Transaction Reporting Proposing Release, *supra*. Rule 11Aa3-1(d) rendered the retransmission provisions of the Joint Industry Plan inoperative. *Id.* n. 75.

The Securities Acts Amendments of 1975, particularly the provisions of Section 11A(b)(5), *see* § 2.04[2][e][v] *infra*, and 11A(c)(1), *see* § 2.04[3][b][i] *infra*, expressly extended the Commission's authority to assure that market information is made available by exchanges, associations, and persons acting on their behalf, in the manner consistent with the development of a national market system. Transaction Reporting Proposing Release, *supra*. This extension of authority was an important factor in prompting the Commission to re-examine the retransmission prohibition. *Id.* While the statutory scheme in Section 11A contemplates that exclusive processors may exercise exclusive control over collecting and processing certain securities information, the Act further contemplates that exclusive processors would function as neutral suppliers of that information to competing vendors for distribution to subscribers, *see* Senate Report, § 2.01 *supra*, at pp. 11, 12. Therefore, the continued control by an exclusive processor (specifically the Consolidated Tape Association, *see* § 2.04[2][d][iii] *infra*) over its ticker network (specifically the ticker network of the Consolidated Tape Association, *see* § 2.04[2][d][iii] *infra*) may be inconsistent with the balance sought by the Exchange Act between the potential for efficiency derived from centralized data collection and the need for competition in the distribution of securities information. *Id.*

(n319)Footnote 319. Rule 11Ac1-2, entitled "Display of Transaction Reports, Last Sale Data and Quotation Information," was proposed simultaneously with Rule 11Aa3-1. Display of Market Information Proposing Release, *supra*. Rule 11Ac1-2 was also adopted simultaneously with Rule 11Aa3-1. Display of Market Information Adopting Release, *supra*.

(n320)Footnote 320. Display of Market Information Adopting Release, *supra*.

(n321)Footnote 321. Sec. Exch. Act Rel. Nos. 17549, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,826 (Feb. 17, 1981); 17580, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,836, (Feb. 26, 1981); 20409, [1983 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,457, (Nov. 22, 1983); 22413, [1985-1986 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,914, (Sept. 16, 1985); and 24635, [1987 Transfer Binder] Fed. Sec. L. Rep. (CCH) P84,140 (June 23, 1987); Order Handling Release, *supra*.

(n323)Footnote 323. NMS Securities Release, *supra*.

(n324)Footnote 324. NMS Securities Release, *supra*.

(n325)Footnote 325. NMS Securities Release, *supra*.

(n326)Footnote 326. Rule 601(a)(1) [former Rule 11Aa3-1(b)(1)].

(n327)Footnote 327. Rule 601(a)(2) [former Rule 11Aa3-1(b)(2)]. For more information on Rule 601(a)(2), see § 2.04[2][d][i] *infra*.

(n328)Footnote 328. Rule 608(b)(1) [former Rule 11Aa3-2(c)(1)].

(n329)Footnote 329. Rule 608(c)(1) [former Rule 11Aa3-2(d)(1)].

(n330)Footnote 330. Rule 608(c)(1) [former Rule 11Aa3-2(d)(1)].

(n331)Footnote 331. Rule 608(b)(2) [former Rule 11Aa3-2(c)(2)]. The 120-day period may be extended by the Commission to 180 days if the NASD consents to such extension or if the Commission "finds such longer period to be appropriate and publishes its reasons for so finding" *Id.*

Rule 608(b)(4) [former Rule 11Aa3-2(c)(4)] permits a proposed amendment to be placed into operation on a temporary basis, not to exceed 120 days, if the Commission finds such implementation to be in furtherance of the Exchange Act, for the protection of investors, or in furtherance of the national market system.

Where the NASD acts or fails to act in the designation of a NMS security or revokes or suspends any such designation, the Commission will entertain an appeal on its own motion or upon application by any aggrieved person. The application must be filed within 30 days of the event in question. Rule 608(d)(1) [former Rule 11Aa3-2(e)(1)]. Any appeal or request for review will not operate as a stay of the action in question. *Id.*

The Commission will dismiss the appeal if it finds, after appropriate notice and opportunity for hearing, that

(1) the action is in accordance with "applicable provisions" of a designated plan, and

(2) the "applicable provisions" were applied in a manner consistent with the public interest, protection of investors and the Exchange Act.

Rule 608(d)(3) [former Rule 11Aa3-2(e)(3)]. If the Commission does not make such a finding or if it finds that the action in question imposes a burden on competition not necessary and appropriate in furtherance of the Exchange Act, the Commission shall, by order, set aside the event in question. *Id.*

(n332)Footnote 332. The term "vendor" is defined in Rule 600(b)(83) [former Rule 11Ac1-2(a)(2)] to mean "any securities information processor [discussed in § 2.04[2][e] *supra*] engaged in the business of disseminating transaction reports, last sale data or quotation information with respect to subject securities to brokers, dealers or investors on a real-time or other current or continuing basis, whether through an electronic communications network, moving ticker or interrogation device."

(n333)Footnote 333. Until this time, the Commission has given vendors broad latitude regarding the manner in which they display market information, including transaction and quotation information. The results achieved in this unregulated environment have been mixed; although some progress has been made to assure that market information is made available to brokers, dealers, and investors in a nondiscriminatory manner, the Commission is also aware that some practices have continued or arisen which tend to impede the availability of important market information. Furthermore, the Commission's experience in attempting to rectify certain of these perceived difficulties through informal means has indicated an unwillingness on the part of certain vendors to alter voluntarily the manner in which they currently display market information unless the Commission were to establish mandatory, industry-wide minimum display criteria. For these reasons, the Commission is at this time proposing Rule 11Ac1-2 under the Act.

Display of Market Proposing Release, *supra*. (Footnote omitted.)

Currently, several vendors disseminate transaction and quotation information received through the consolidated transaction reporting and quotation systems without, for the most part, any Commission regulation. The Commission has preferred and still would prefer to let competition forces dictate the manner in which market information is displayed. However, the Commission has determined that it must take regulatory action to rectify deficiencies in the manner in which vendors operate their market information systems.

Display of Market Data Adopting Release, *supra*.

(n334)Footnote 334. Sec. Exch. Act Rel. No. 16990 (1980). On or after April 5, 1980, vendors who provide on an interrogation device transaction reports or quotation information with respect to a particular reported security from an individual market center would also have to provide on that same device consolidated transaction reports or last sale data that must include, at a minimum, the consolidated price and value or cumulative consolidated value for such security and an identifier indicating the reporting market center associated with the consolidated price and volume. Rule 11Ac1-2(b)(2)(i) [now eliminated in favor of Rule 603].

(n335)Footnote 335. "Transaction report" is defined in Rule 600(b)(80) [former Rule 11Aa3-1(a)(1)] as "a report containing the price and volume associated with a transaction involving the purchase or sale of one or more round lots of a security ("transaction")." This definition applied to Rule 11Ac1-2. Former Rule 11Ac1-2(a)(1). With Regulation NMS all definitions relating to NMS Securities have been consolidated.

(n336)Footnote 336. The term "moving ticker" means any "continuing real-time moving display of transaction reports or last sale data (other than a market minder) provided on an interrogation or other display device." Rule 600(b)(40)(i) [formerly in Rule 11Ac3-1(a)(9) and incorporated by reference into Rule 11Ac1-2(a)(1)].

(n337)Footnote 337. Rule 11Ac1-2(b)(2)(iv).

The Commission has consistently been of the belief that non-discriminatory market identifiers may

be an important tool to investors and in encouraging competition among market centers. For these reasons, the Commission included within Rule 17a-15 [now Rule 601] the requirement that transaction information be accompanied by market identifiers. However, the CTA Plan required that all moving tickers be supplied only from the low speed data streams which provide information to moving tickers at the rate of only 900 characters per minute. Because of the limitations of low speed data transmission, it became obvious that transaction information appearing on moving tickers could not include market identifiers on a non-discriminatory basis without unreasonably delaying the display of transaction information. As a result, the CTA instituted a manner of identifying markets of execution on moving ticker displays which differentiated between transactions executed in the primary markets and in other market centers. Primary market transactions which comprise the majority of reported transactions were not followed by any symbol, while transactions in other market centers were followed by an ampersand and a single alphabetic character identifying the market of execution. By utilizing this method of market identification excessive delays were avoided on moving tickers.

The regional exchanges and third market makers contended that this method of identification discriminated against their markets by differentiating the method of identifying transaction information emanating from their markets as compared to transaction information from primary markets. In the course of discussions among various market centers negotiating with respect to the creation of the ITS, those market centers jointly requested that the Commission permit the deletion of market identifiers from the tape with respect to ITS participants by amending Rule 17a-15 or by granting an exemption from that rule. In 1978, the Commission issued an exemptive order from Rule 17a-15 granting this request, conditioned on the prompt removal, as soon as technically possible, of all market identifiers. The Commission stated in its order that such differentiated transaction reporting was inconsistent with the underlying purpose of a consolidated system.

In adopting Rule 11Aa3-1 [now Rule 601] today, the Commission has created an opportunity to alter the environment in which transaction information is displayed. Specifically, Rule 11Aa3-1 permits the retransmission of transaction information supplied by the high speed data stream via moving tickers. Moving tickers so created might not be subject to excessive reporting delays engendered by non-discriminatory identification of markets. Accordingly, the Commission has adopted the market identifier provision in modified form to reflect this changed environment. Thus, Rule 11Ac1-2 [now eliminated in favor of Rule 603] precludes only the use of market identifiers for some, but not all, market centers and would permit the non-discriminatory use of market identifiers. Because the Commission believes that market identifiers provide useful information it urges vendors who are contemplating retransmitting transaction information to consider the feasibility of including market identifiers for all markets.

The Commission recognizes that market identifiers provide especially valuable information with respect to certain types of transactions, most particularly block trades and the opening transaction on each exchange. Accordingly, Rule 11Ac1-2, as adopted, would also permit the non-discriminatory use of market identifiers on a moving ticker for any definable sub-set of transactions. The Commission believes that tickers fed by either the low or high speed data systems could incorporate market identifiers for at least opening and block transactions without substantial delays and urges both the CTA and any other vendor who constructs a ticket network to provide market identifiers for such transactions.

Consolidated transaction information displayed on interrogation devices currently includes market identifiers on a nondiscriminatory basis (*i.e.*, all markets are identified by a symbol) without incurring delays in reporting because interrogation devices are supplied with transaction information via the high speed data stream. Because market identification may be included on consolidated displays without delay and in a non-discriminatory fashion and on the basis of the unanimous comment that market identifiers remain relevant to investors, the Rule will continue to require inclusion of market identifiers on the

consolidated display.

Display of Market Data Adopting Release, *supra*.

(n338)Footnote 338. If a vendor distributes, publishes, or otherwise provides quotation information to brokers or dealers on a real-time or other current and continuing basis, whether by an interrogation device, electronic communications network, moving ticker, or otherwise, the following conditions apply:

(1) If the information is furnished on an interrogation device, the vendor must also provide a consolidated display of quotation information for each security that, at a minimum, includes either:

(a) the best bid and best offer for the security, and for a reported security, (i) identifiers indicating the reporting market center, and (ii) the quotation size or aggregate quotation size, or

(b) a display on the interrogation device that disseminates simultaneously quotations in that security from all reporting market centers, *i.e.*, a quotation montage.

(2) The method of access must occur through retrieval instructions "involving a number of key strokes which is fewer than the number of strokes required to access any individual market center quotation display," provided that an equal number of key strokes is permissible if the information request or transmit key for the consolidated quotation display is the "most prominent."

(3) Subject to the provisions of paragraph (1) above, a vendor may provide data on an individual market center through an interrogation device or a quotation montage.

(4) A consolidated quotation display or separate quotation montage may not exclude any quotation information because the market center is making such information available, but data from third market makers can be consolidated to derive a best bid and offer for all such market centers if the interrogation device is capable of displaying, either separately or as part of a quotation montage

(a) identifiers indicating the market centers with the best bid and best offer, and

(b) quotation sizes for each quote.

(5) Vendors may not display a representative bid or offer.

Former Rule 11Ac1-2(c)(2)(i) through (vi).

The terms "best bid" and "best offer" were defined in former Rule 11Ac1-2(a)(15) to mean:

(i) with respect to quotations for a reported security, the highest bid or lowest offer for that security made available by any reporting market center pursuant to § 240.11Ac1-1 (Rule 11Ac1-1 under the Act) (excluding any bid or offer made available by an exchange during any period such exchange is relieved of its obligations under paragraphs (b)(1) and (2) of § 240.11Ac1-1 by virtue of subparagraph (b)(3)(i) thereof: provided, however, that in the event two or more reporting market centers make available identical bids or offers for a reported security, the bid or best offer (as the case may be) shall be computed by ranking all such identical bids or offers (as the case may be) first by size (giving the highest

1-2 Federal Securities Exchange Act of 1934 § 2.01

ranking to the bid or offer associated with the largest size), then by time (giving the highest ranking to the bid or offer received first in time); and

(ii) with respect to quotations for a subject security other than a reported security, the highest bid or lowest offer (as the case may be) for such security disseminated by an over-the-counter market maker in Level 2 or 3 of NASDAQ.

This definition has since been modified and moved to Rule 600(b)(8). The term "representative bid or offer" was defined in Rule 11Ac1-2(a)(17) to mean:

any number representing a bid price or an offer price (as the case may be) for a particular subject security which is (i) the mean, median, mode or weighted average of two or more bids or offers of reporting market centers in such security, (ii) calculated with reference to or derived from any such mean, median, mode or weighted average, or (iii) calculated by adding to or subtracting from the bid or offer of any reporting market center in such security any number representing a commission, commission equivalent, mark-up or differential.

(n339)Footnote 339. The Commission discussed in the Display of Market Data Proposing Release, *supra*, why minimum display requirements with respect to quotations were being proposed:

Discussion between the Commission's staff and each of the major vendors of market information have indicated that most vendors are in the process of further enhancing their quotation display facilities. However, these discussions have also indicated a hesitancy on the part of at least certain vendors to expend the capital necessary to develop composite quotation displays without some indication from the Commission as to the nature of an acceptable display. These discussions have convinced the Commission that further development in the display of quotation information may, in fact, be impeded because the Commission has not specified minimum display requirements with respect to quotations. Therefore, the Commission is at this time proposing that Rule 11Ac1-2 include minimum quotation display requirements.

(n340)Footnote 340. The traditional over-the-counter market and Nasdaq, formerly the most active and developed segment of the over-the-counter market but now a national securities exchange, are discussed in § 2.01[2] and 2.01[a][1][ii] *supra*, respectively.

(n341)Footnote 341. Former Rule 11Ac1-2(a)(8) provided that the term "consolidated display" shall mean, with respect to a particular reported security,

(i) any display (other than a moving ticker or market minder) of transaction reports for such security from all reporting market centers;

(ii) any display (other than a moving ticker or market minder) of last sale data for such security, or information derived therefrom, based on transaction reports from all reporting market centers; or

(iii) any display of quotation information for that security based on quotations from all reporting market centers.

Former Rule 11Ac1-2(a)(8).

(n342)Footnote 342. Former Rule 11Ac1-2(c)(2)(i).

(n343)Footnote 343. Prior to 1980, Nasdaq Level 1 terminals displayed a "representative bid and ask" quotation. With the adoption of Rule 11Ac1-2, Nasdaq was enhanced to display current quotations. *See § 2.01[2][b] supra.*

(n344)Footnote 344. Former Rule 11Ac1-2(c)(2)(vi); Sec. Exch. Act Rel. Nos. 15250 n.55, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P81,750 (Oct. 20, 1978); and 16590, [1979-1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,456 (Feb. 19, 1980).

(n345)Footnote 345. Former Rule 11Ac1-2(d). Were a vendor to provide both the most recent transaction report and quotation for a security from a particular market center on a single interrogation device display, then that vendor was required by Rule 11Ac1-2(d) to comply with Rule 11Ac1-2(b)(2)(ii) and (c)(2)(ii). These subsections required, in summary, that the consolidated quotation display and last sale display be accessed by retrieval instructions involving certain specified number of key strokes.

(n346)Footnote 346. SRO surveillance programs are discussed in § 2.03[3][a] *supra*.

(n347)Footnote 347. Market linkage programs are discussed in § 2.04[2][b] *supra*.

(n348)Footnote 348. Former Rule 11Ac1-2(f).

(n349)Footnote 349. Former Rule 11Ac1-2(g). To grant an exemption, the Commission must determine that the exception "is consistent with the public interest, the protection of investors and the removal of impediments to, and perfection of the mechanisms of, a national market system." *Id.*

(n350)Footnote 350. Sec. Exch. Act Rel. Nos. 16924, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,617 (June 24, 1980), and 17368, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,703, (Dec. 11, 1980) and 18066, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P83,022 (Aug. 26, 1981).

(n351)Footnote 351. Former Rule 11Ac1-2(h).

(n352)Footnote 352. Rule 603(a)(1).

(n353)Footnote 353. Rule 603(a)(2).

(n354)Footnote 354. *See* Rule 603(c)(1); Rule 600(b)(13).

(n355)Footnote 355. Rule 603(c)(2).

(n356)Footnote 356. Pursuant to Rule 11Aa3-2(b)(8), NMS Plan participants were required to post up-to-date versions of plans and proposed amendments on their website. Although this rule has been rescinded, the plans are still available online. The CTA Plan is available at <http://www.nysedata.com/cta>. The UTP Plan is available at <http://www.utpdata.com>. The OPRA Plan is available at <http://www.opradata.com>.

(n357)Footnote 357. Rule 17a-15 was amended and redesignated as Rule 11Aa3-1, which was itself redesignated as Rule 601. *See § 2.04[2][d][i] supra.*

(n358)Footnote 358. The plan was filed by the New York, American, Midwest, Pacific, and PBW (predecessor to the Philadelphia Stock Exchange) exchanges, and the National Association of Securities Dealers, Inc. Transaction Reporting Proposing Release, *supra*. The NASD was a participant in the plan because of the trading of listed securities by Nasdaq market makers in the so-called "third market." Third market trading is discussed in § 2.03[2][c] *supra*.

(n359)Footnote 359. Transaction Reporting Proposing Release, *supra*.

(n360)Footnote 360. Sec. Exch. Act Rel. No. 18590 (Mar. 31, 1982). The NASD was required to file this plan by virtue of an amendment to Rule 11Aa3-1 approved in 1981 in connection with the designation of NMS Securities. See NMS Securities Release, *supra*.

(n361)Footnote 361. See NASD Manual, Rule 4400, 4600 Series.

(n362)Footnote 362. Prior to November 2001, Nasdaq SmallCap Securities were not included in this plan. See Sec. Exch. Act Rel. 45081 (Nov. 19, 2001). Accordingly, Nasdaq SmallCap Securities were not considered "reported securities" for the purpose of Commission rules such as Rule 11Ac1-1 [now Rule 602]. See § 2.04[2][c][i] *supra*. In November 2001, the plan was amended to include Nasdaq SmallCap Securities, and all Nasdaq Securities became "reported securities." See Exch. Act. Rel. No. 45081 (Nov. 19, 2001).

(n363)Footnote 363. See Sec. Exch. Act Rel. No. 48882, 2003 SEC LEXIS 2907 (Dec. 4, 2003) .

(n364)Footnote 364. See Sec. Exch. Act Rel. No. 48882, 2003 SEC LEXIS 2907, at *4 (Dec. 4, 2003) . Even before its exchange registration, however, beginning in 1996, Nasdaq functioned like a participant in the UTP Plan because the NASD delegated to Nasdaq the authority to administer the NASD's participation in the plan, including the right to vote. See Sec. Exch. Act Rel. No. 48761, 2003 SEC LEXIS 2675 (Nov. 7, 2003) . However, the existence of the Alternative Display facility made this delegation problematic, as the ADF, which is a facility of the NASD, had no representation in connection with the plan because of the delegation. See *id.* at *3-4. Accordingly, at the SEC's prompting, the NASD has proposed to retract the delegation. See *id.* This proposed change was never adopted, and became unnecessary with the registration of Nasdaq as a national securities exchange in January 2006, because as a registered exchange Nasdaq was eligible to directly participate in the plans. See Sec. Exch. Act. Rel. No. 53128 (Jan. 13, 2006).

(n365)Footnote 365. See Sec. Exch. Act Rel. No. 42208 (Dec. 9, 1999).

(n366)Footnote 366. Sec. Exch. Act Rel. No. 10787, [1973-1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P79,782 (May 10, 1974).

(n367)Footnote 367. Transaction Reporting Proposing Release, *supra*.

(n368)Footnote 368. Transaction Reporting Proposing Release, *supra*. Both the Consolidated Tape Association and the Securities Industry Automation Corporation are exclusive processors (as defined in Section 3(a)(22)(B)) and are registered with the Commission as such. *Id.*, n. 50. The Securities Industry Automation Corporation is also the processor for the CQ Plan, § 2.04[2][c][iv] *supra* .

(n369)Footnote 369. Transaction Reporting Proposing Release, *supra*. The CQ Plan contains a similar two-tier structure for quotation information with Networks A and B, see § 2.04[2][c][iv] *supra*.

(n370)Footnote 370. The Intermarket Trading System is one of the two competing designs for a market linkage system and is discussed in § 2.04[2][b][i][A] *supra*.

(n371)Footnote 371. Rule 17a-15 was amended and redesignated as Rule 11Aa3-1, which itself has been redesignated as Rule 601. See § 2.04[2][d][i] *supra*. Former Rule 17a-15(h) [now Rule 601(f)] permitted the Commission to exempt from the provisions of the Rule any exchange, association, broker, dealer, vendor, or specified type of security, if the Commission found that it was not necessary in the public interest or for the protection of investors that such party or security be subject to the provisions of Rule 17a-15.

(n372)Footnote 372. Sec. Exch. Act Rel. No. 15059 (1978).

(n373)Footnote 373. Sec. Exch. Act Rel. No. 14662 (1978). This temporary exemption was extended for twelve months on August 11, 1978, see Sec. Exch. Act Rel. No. 15059 (1978), the same date that the Commission extended its

temporary approval of the Intermarket Trading System for twelve months, see Sec. Exch. Act Rel. No. 15058 (1978).

(n374)Footnote 374. Sec. Exch. Act Rel. No. 16216 (1979).

(n375)Footnote 375. See § 2.04[2][d][ii] *supra*.

(n376)Footnote 376. Senate Report, *supra*, at p. 9.

(n377)Footnote 377. Senate Report, *supra*, at p. 9.

(n378)Footnote 378. "The goals of this pervasive regulatory authority would be to insure the availability of prompt and accurate trading information, to assure that these communications networks are not controlled or dominated by any particular market center, to guarantee fair access to such systems by all brokers, dealers and investors, and to prevent any competitive restriction on their operation not justified by purposes of the Exchange Act." Senate Report, *supra*.

(n379)Footnote 379. Senate Report, *supra*.

(n380)Footnote 380. The term "securities information processor" is defined in Section 3(a)(22)(A) to mean:

... any person engaged in the business of (i) collecting, processing, or preparing for distribution or publication, or assisting, participating in, or coordinating the distribution or publication of, information with respect to transactions in or quotations for any security (other than an exempted security) or (ii) distributing or publishing (whether by means of a ticker tape, a communications network, a terminal display device, or otherwise) on a current and continuing basis, information with respect to such transactions or quotations.

Excluded from the definition are bona fide newspaper, news magazine, or business and financial publications of general and regular circulation, and any self-regulatory organization. Banks, brokers, dealers, building and loan, savings and loan, and homestead associations are exempted to the extent that they would come within the definition of "securities information processor" solely by reason of functions performed as part of their customary activities. Section 3(a)(22)(A).

A common carrier subject to the jurisdiction of the FCC or a state commission is exempt unless the Commission determines the carrier is engaged in the business of collecting, processing, or preparing for distribution or publication, information with respect to transactions in or quotations for any security. Senate Report, *supra*.

(n381)Footnote 381. Section 11A(b)(1) empowers the Commission to conditionally or unconditionally exempt any securities information processor, class of securities information processors, security, or class of securities from any provisions of Section 11A, or the rules or regulations thereunder. Before such exemption may be granted, however, the Commission must find the exemption consistent with the public interest, the protection of investors, and the purposes of Section 11A, including:

- (1) the maintenance of fair and orderly markets in securities, and
- (2) the removal of impediments to and perfection of the mechanism of a national market system.

(n382)Footnote 382. An "exclusive processor" is defined in Section 3(a)(22)(B) as:

... any securities information processor or self-regulatory organization which, directly or indirectly, engages on an exclusive basis on behalf of any national securities exchange or registered securities

association or any national securities exchange or registered securities association which engages on an exclusive basis on its own behalf in collecting, processing, or preparing for distribution or publication any information with respect to (i) transactions or quotations on or effected or made by means of any facility of such exchange or (ii) quotations distributed or published by means of any electronic system operated or controlled by such association.

A self-regulatory organization, although an exclusive processor of securities information, is nonetheless excluded from designation as a securities information processor (*see* Section 3(a)(22)(A)) and is thus exempt from registration under Section 11A(b)(1). Sec. Exch. Act Rel. No. 11673, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P80,302 (Sept. 23, 1975) (hereinafter cited as "SIP Release"). Subsidiaries and affiliates of national securities exchanges and registered securities associations that engage in the business of securities information processing, however, are not exempt from registration under Section 11A(b)(1). Senate Report, § 2.01 *supra*, at p. 10.

Moreover, to the extent a national securities exchange or registered securities association engages in the business of securities information processing other than through a subsidiary or other instrumentality registered as a securities information processor, the Commission's broad authority under the bill [Senate Bill 249] includes all powers necessary to ensure the regulation of the securities information processing activities of such exchanges and associations in the same manner and to the same extent as the Commission may regulate securities information processors registered and regulated under new Section 11A(b).

Id.

(n383)Footnote 383. Senate Report, *supra* at 11.

(n384)Footnote 384. The Committee believes that if economics and sound regulation dictate the establishment of an exclusive central processor for the composite tape or any other element of the national market system, provision must be made to insure that this central processor is not under the control or domination of any particular market center. Any exclusive processor is, in effect, a public utility, and thus it must function in a manner which is absolutely neutral with respect to all market centers, all market makers, and all private firms. Although the existence of a monopolistic processing facility does not necessarily raise antitrust problems, serious antitrust questions would be posed if access to this facility and its services were not available on reasonable and nondiscriminatory terms to all in the trade or if its charges were not reasonable. Therefore, in order to foster efficient market development and operation and to provide a first line of defense against anti-competitive practices, Sections 11A(b) and (c)(1) would grant the SEC broad powers over any exclusive processor and impose on that agency a responsibility to assure the processor's neutrality and the reasonableness of its charges in practice as well as in concept.

Senate Report, *supra* at 11-12.

In the SIP Release, *supra*, the Commission cited the following six "persons" whose activities at that time appeared to the SEC to be within the Section 3(a)(22) definition of securities information processor, and who also appeared to be performing the functions of an exclusive securities information processor:

(1) the Consolidated Tape Association, created for the purpose of coordinating and administering a plan for the dissemination on a current and continuing basis of last sale prices relating to completed transactions in eligible securities traded on a national securities exchange, *see* § 2.04[2][d][iii] *supra*.

(2) the Options Price Reporting Authority, which administers a plan for the reporting of options last sale price information;

(3) the Securities Industry Automation Corporation (SIAC), a wholly-owned subsidiary of the New York and American Stock Exchanges (on November 1, 2006, NYSE purchased AMEX's stake in SIAC), which collects, processes, and prepares for distribution the information disseminated by the consolidated tape, consolidated options tape, and with respect to transactions and quotations on the NYSE and AMEX;

(4) Bunker Ramo Corporation, a publicly-owned corporation that was the exclusive securities information processor for the NASD and builder of Nasdaq, discussed in § 2.01[2][b] *supra*.

(5) Pacific Stock Exchange Service Corp. (now NYSE Arca), wholly-owned subsidiary of, and exclusive securities information processor for, the Pacific Stock Exchange, Inc.; and

(6) Quotron Systems, Inc., a publicly-owned company that is the exclusive securities information processor on behalf of both the Midwest and Boston Stock Exchanges. (Quotron was subsequently acquired by Citicorp and later Automatic Data Processing).

As of June 30, 1976, the SEC had granted registration as a securities information processor to the Consolidated Tape Association, Options Price Reporting Authority, and the Securities Industry Automation Corporation. A temporary exemption was granted to NASDAQ, Inc., pending review of its application for registration. The Commission also exempted from registration as a securities information processor, subject to certain conditions, the Bunker Ramo Corporation, Quotron Systems, Inc., and P.C. Service Corporation. 42 SEC Ann. Rep., p. 23 (1976).

In fiscal year 1977, the Commission granted the registration of NASDAQ, Inc. as a securities information processor and exempted from registration the Bradford National Clearing Corporation, which took over the securities information processing services performed for the Pacific Stock Exchange, Inc. by the P.C. Service Corporation. 43 SEC Ann. Rep., p. 19 (1977). Nasdaq is the exclusive SIP for both OTC securities and for the UTP Plan. *See* Supermontage Approving Release, *supra*, at *230-31. In connection with its approval of the Supermontage system, the SEC stated that as a condition of extending the effectiveness of the UTP Plan, it would require that Nasdaq and the other participants in the UTP Plan engage in good faith discussions regarding the establishment of a different entity as the SIP for Nasdaq securities, either on an exclusive or non-exclusive basis. *See id.* at *238-40.

Control Data Corporation applied to the Commission on March 23, 1979, for a determination that it is not an exclusive processor as defined in Section 3(a)(22)(B), or, in the alternative, for an exemption from registration as a securities information processor. Sec. Exch. Act Rel. No. 15759, [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P82,060 (Apr. 24, 1979). Control Data Corporation, through its Service Bureau Company division, purchased the hardware and software owned by Weeden Holding Corporation and used to operate the National Securities Trading System of the National Stock Exchange (discussed in § 2.04[2][b][i][B] *supra*). *Id.*

(n385)Footnote 385. Section 11A(b)(2) of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F.

(n386)Footnote 386. Form SIP contains thirty-one items under the following headings: general information, business organization, signatures, exhibits--business organization, exhibits--financial information, exhibits--operational capability, and exhibits--access to services. The information provided by Form SIP is required to enable the Commission to make the finding required by Section 11A(b)(3) before granting an applicant's registration; or, if it appears such findings cannot be made, to institute proceedings to determine whether registration of a securities information processor should be denied. SIP Release, *supra*.

(n387)Footnote 387. Rule 609(a) [former Rule 11Ab2-1(a)]. Rule 609(b) [former Rule 11Ab2-1(b)] provides that a

securities information processor must promptly file an amendment on Form SIP correcting any information reported in Items 1-13 or Item 21 of Form SIP, or in any amendment thereto, that has become inaccurate for any reason. If Form SIP is being filed as an amendment (other than an annual amendment), only the facing page, signature page (Item 11), and any pages on which an answer is being amended (together with such exhibits as are being amended) need be filed. Paragraph 8, General Instructions for Preparing and Filing Form SIP, Form SIP. Furthermore, the submission of an amendment constitutes a representation that all unamended items and exhibits are "true, current and complete as previously filed." *Id.*

(n388)Footnote 388. SIP Release, *supra*.

(n389)Footnote 389. Rule 609(d) [former Rule 11Ab2-1(d)]. To keep the information about each registered securities information processor current so that the Commission would be able to ascertain that the processor continues to be able to perform its functions as such, the Commission proposed in the SIP Release, *supra*, Rule 11Ab2-2, which would require each registered securities information processor to file on or before June 30 of each year, an annual amendment to Form SIP. The Commission also proposed Rule 11Ab2-3 in the SIP Release, *supra*, which would allow a successor to a registered securities information processor to be registered for an initial period of thirty days following the date of succession, provided that the successor files a statement with the Commission adopting the Form SIP, and all amendments thereto, of its predecessor as its own. Neither Rule 11Ab2-2 nor Rule 11Ab2-3 were ever adopted. See Sec. Exch. Act Rel. No. 42208 (Dec. 9, 1999).

(n390)Footnote 390. Section 11A(b)(3).

(n391)Footnote 391. Section 11A(b)(3). Proceedings to determine whether registration of a securities information processor should be denied must include notice of the grounds for denial under consideration and opportunity for hearing and must be concluded within 180 days of the date the notice of the filing of the application for registration was published. Section 11A(b)(3).

(n392)Footnote 392. Section 11A(b)(3).

(n393)Footnote 393. Section 11A(b)(3).

(n394)Footnote 394. Section 11A(b)(4).

(n395)Footnote 395. Section 11A(b)(5)(A).

(n396)Footnote 396. *Id.* Section 11A(b)(5)(A) grants the Commission rule-making power over the form and content of the information that the notice of prohibition or limitation of access must contain. In the SIP Release, *supra*, the Commission announced a proposed Rule 11Ab5-1 that would require the notice to be filed within fifteen days of the prohibition or limitation of access to any of the services offered by the registered securities information processor and a copy of such notice to be sent to the aggrieved person. The notice would have included, among other things, the reason for the prohibition or limitation and would have to have been in narrative form. Proposed Rule 11Ab5-1. The Commission never adopted this proposed rule.

(n397)Footnote 397. The Commission did, in fact, receive a request in fiscal year 1977 under Section 11A(b)(5) to review a limitation of access to the services of a registered securities information processor. See 43 SEC Ann. Rep., pp. 19-20 (1977).

Regulation

NMS Adopting Release, *supra*, at *480.

(n439)Footnote 439. National Market System Release, *supra*.

Each exchange specialist today maintains a book of public limit orders placed with him by other brokers for execution at specified prices. Any transactions in that security at a price inferior to the customer's limit order price will trigger a transaction for that customer. In other words, his order is "protected" in that market against any transaction taking place at a more favorable price or, under some circumstances, at the same price. Although the customer's limit order is protected in the market in which he places that order, transactions may take place in other markets at the same price or a more favorable price without triggering the customer's limit order. The Commission has indicated that it is in the public interest to develop a means of providing nationwide comprehensive limit order protection.

Harman, The Evolution of the National Market System--An Overview, 33 *Bus. Law.* 2275, 2286 (1978).

The Commission had initially raised the issue of public limit order protection in its release adopting Rule 19c-1, governing off-board trading by exchange numbers. Sec. Exch. Act Rel. No. 11942 (1976). Off-board trading is discussed in § 2.03[2][c] *supra*. In 1976, the Commission and the National Market Advisory Board, see § 2.04[1][d] *supra*, solicited public comments on this issue, including, in particular, whether the then computer technology could provide the protection sought by the Commission. Composite Book Release, *supra*.

(n440)Footnote 440. National Market System Release, *supra*.

The Commission called for comment, on or before May 1, 1976, on specific questions concerning the development and implementation of a CLOB as a means of providing nationwide limit order protection. Composite Book Release, *supra*. The Commission received the views of the National Market Advisory Board on the establishment of a CLOB. In a letter to the Commission dated January 28, 1977, the National Market Advisory Board expressed its belief that an important objective of a national market system for securities is the development of facilities providing limit order protection "to the maximum extent practicable" and that the securities industry itself, rather than the Commission, should be allowed the primary role in any effort to achieve limit order protection.

The types of orders a customer may give his broker, including limit orders, are discussed in § 2.01[1][a] *supra*.

The Commission altered its views as to nationwide limit order protection, in favor of nationwide price protection, and as to the necessity of a CLOB, in favor of use of the ITS with modifications, or "enhancements" (the CLOB being only one alternative should the ITS prove inadequate), in its March 1979 status report on the development of a national market system, discussed *infra*.

(n441)Footnote 441. National Market System Release, *supra*.

(n442)Footnote 442. The Commission defined "public limit order," for the purposes of a CLOB, as "any limit order not for the proprietary account of a broker or dealer." National Market System Release, *supra*, at n.52. The Commission pointed out that not all public limit orders, regardless of size, may be appropriate for inclusion in the CLOB. *Id.*

(n443)Footnote 443. Price is to be determined by reference to the price that must be reported in the consolidated transaction reporting system pursuant to Rule 11Ac1-2, [now eliminated in favor of Rule 603] see § 2.04[2][d][ii] *supra*, in the event of a completed transaction. See National Market System Release, *supra*. On the subject of price and time priority, see Senate Report, *supra*, at pp. 17-18.

In its Policy Statement on the Structure of a Central Market System [March 29, 1973], the SEC proposed that all trading in the national market system for listed securities be subject to two basic rules. First, public limit orders, wherever entered or held in the system, must be satisfied before any transaction in the same security is effected anywhere at a less favorable price to the other party. Thus, any public order in the system would be "protected" against a transaction being effected at an inferior price without prior satisfaction of that order. Second, public orders would have price priority over the bids or offers of specialists and other market makers. This would mean that a dealer operating in the system could not trade for his own account unless he is willing to buy at a higher price or sell at a lower price than any available public bid or offer.

According to the Commission:

adoption of these [two] rules would take the best features of the auction-agency market that exchanges now provide and expand them into principles to govern the functioning of the entire central market system [for securities with suitable trading characteristics].

The Committee is satisfied that S.249 [that became, as modified by the Conference Committee, the Securities Acts Amendments of 1975] grants the Commission complete and effective authority to implement a system for the satisfaction of public limit orders. The bill would give the SEC broad authority to prescribe rules requiring all broker-dealers trading for their own account in such securities to yield in the execution of their transactions to public orders. Sections 11(a)(2) and 11(b) [discussed in § 3.02 *infra*] would provide the SEC with this authority over members of exchanges. Section 15(c)(5) would provide the SEC with this authority with respect to other dealers. The SEC would also be given similar regulatory control over transactions effected by persons with access to exchange markets on terms comparable to those enjoyed by members. (Section 6(f).)

In order to assure priority for public orders, a mechanism must be established by which specialists and other market members can be made aware of all such orders within the national market system. The bill would not mandate the form of such a mechanism nor would it prescribe the precise terms of any rules with respect to auction-type protections. The Commission would be free to provide appropriate exemptions or to adopt an entirely different approach to the achievement of auction-type protections than the approach outlined in the Commission's Policy Statement. The bill would, however, remove all questions concerning the SEC's authority over trading practices and market integration and establish a clear Congressional policy supporting the preservation and extension of the protections associated with auction-type trading for appropriate securities under appropriate circumstances.

Section 11(a), discussed in § 3.02 *infra*, prohibits exchange members from trading on the exchange for their own account, with certain exceptions. One exception permits a member to effect a transaction for its own account if the member satisfies:

- (1) the "business mix" test (gross income of member derived principally from certain types of business), and
- (2) the transaction is both consistent with the maintenance of fair and orderly markets and yields priority, parity, and precedence in execution to orders for the account of persons who are neither members nor associated with members of the exchange.

The proprietary trading rule, Rule 11a1-1(T), "Transactions Yielding Priority, Parity, and Precedence," was adopted to

implement the exemptions under Section 11(a)(1)(G) for members' proprietary transactions. Sec. Exch. Act Rel. No. 15533, 3 Fed. Sec. L. Rep. (CCH) P22,808B (Jan. 29, 1979). Compliance with the terms of Rule 11a1-1(T) is deemed to be compliance with Section 11(a)(1)(G)(ii). Sec. Exch. Act Rel. No. 14563, 3 Fed. Sec. L. Rep. (CCH) P22,808 (Mar. 14, 1978). To satisfy the requirements of Section 11(a)(1)(G)(ii), a transaction effected on a national securities exchange for the account of a member must meet each of the following requirements:

(1) disclosure that the bid or offer is for the account of a member must be made--

(a) by the member to any other exchange member with whom the bid or offer is placed or to whom it is communicated, and

(b) by any member through whom such bid or offer is communicated to others participating in effecting the order;

(2) disclosure by a member (other than the specialist in the security) to the specialist and to other members also present for trading in that security that the member is presenting an order for the account of a member, immediately before executing the order; and

(3) priority must be granted (notwithstanding rules of priority, parity, and precedence otherwise applicable) by any member, presenting for execution a bid or offer for either its own account or for the account of another member, to any bid or offer at the same price, for the account of a person who is neither a member, nor associated with a member, regardless of the size of the bid or offer or the time when entered.

Temporary Rule 11a1-1(T)(a)(1), (2), (3).

(n444)Footnote 444. In 1978, it appeared that such a limit might be necessary "for technological among other reasons." National Market System Release, *supra*. Due largely to increased technological advancements, this may no longer be true. National Market System Release, *supra*.

(n445)Footnote 445. *Id.* In its January 1978 statement, the Commission also addressed the question whether information as to all public limit orders in the CLOB should be made publicly available on a current and continuous basis and concluded that such information should be available, at least in summarized form. *Id.*

(n446)Footnote 446. In response to the Commission's proposal for a CLOB, several alternative approaches to providing nationwide limit order protection were suggested. Both the New York and Midwest [now Chicago] Stock Exchanges suggested, in place of a single CLOB, that each exchange maintain its own separate electronic file of limit orders, that orders in each of these files would have the same priority in that market as manually entered limit orders presently have, and that the Intermarket Trading System (discussed in § 2.04[2][b][i][A] *supra*), enhanced to provide more rapid execution, be employed to provide limit order protection among markets. The NYSE suggested intermarket limit order protection on a voluntary basis, whereas the Midwest Stock Exchange proposed that the Commission adopt a rule requiring brokers or dealers to satisfy limit orders at a better price in other markets prior to executing a trade in their own market. Address of Chairman Harold M. Williams to the Securities Industry Association 1978 Annual Convention, The Securities Industry and the National Market System: A Current Perspective (Nov. 30, 1978).

The NYSE announced plans to begin operating a preliminary version of an electronic limit order file, known as a "market center limit order file" or MCLOF, that would handle "good-til-cancelled" limit orders (discussed in § 2.01[1] *supra*), on December 4, 1978. 480 B.N.A. Sec. Reg. L. Rep. A-5, A-6 (Nov. 29, 1978). The MCLOF would give all interested parties current knowledge of limit orders held by specialists and market makers on the floor of the NYSE. *Id.* at A-6. Prior to the operation of the MCLOF, NYSE floor specialists handled limit orders by writing down all orders in

their "book" and manually matching and executing limit orders. *Id.*

(n447)Footnote 447. National Market System Release, *supra*.

An electronic file of all outstanding limit orders, regardless of market center, integrated with electronic order execution capability is known as a "hard CLOB." Melton, *supra*, at 23.

One of the objections to the creation of a "hard CLOB" as a component of a national market system for securities is that it would result in the gradual elimination of the exchange specialist system, because the "hard CLOB" would permit upstairs (off the floor of the exchange) firms to enter orders directly into the system, or would permit orders to meet without the intervention of a dealer. Harman, *supra*, at 2295.

(n448)Footnote 448. National Market System Progress Assessment, *supra*. The purpose of the status report was two-fold:

(1) to assess the progress made in 1978 in pursuing the initiatives described in the January 1978 Statement (Sec. Exch. Act Rel. No. 14416), and

(2) to indicate the Commission's views concerning what the next issues are to be resolved and steps taken to continue progress towards a national market system.

Id.

(n449)Footnote 449. National Market System Progress Assessment, *supra*.

(n450)Footnote 450. The Commission defined "public limit order" for the purpose of its discussion of nationwide price protection as:

... any limit order to purchase or sell a qualified security not for the proprietary account of a broker or dealer or any person associated with a broker or dealer which is entered into a market center's limit order repository (whether that be a specialist's book or some other similar mechanism) and displayed in other market centers.

National Market System Progress Assessment, *supra* at n. 24.

Compare the definition of "public limit order" as used in the National Market System Release, *supra*.

(n451)Footnote 451. National Market System Progress Assessment, *supra*.

(n452)Footnote 452. The Intermarket Trading System is discussed in § 2.04[2][b][i][A] *supra*.

(n453)Footnote 453. National Market System Progress Assessment, *supra*.

(n454)Footnote 454. Each self-regulatory organization was required to develop a means of storing public limit order information (not necessarily by creating facilities permitting the electronic storage of limit orders, although the Commission did encourage the NYSE to continue the implementation of its own electronic repository for limit orders routed to the NYSE and disseminating that information for electronic display in all other market centers. *Id.*

(n455)Footnote 455. Certain operating characteristics of the ITS were required to be substantially improved; for example, the length of time required to enter commitments to trade, and receive execution or rejection reports had to be

reduced to "significantly less than one minute." *Id.*

(n456)Footnote 456. In furtherance of the necessary collective action called for by the Commission, each self-regulatory organization was required to:

- (1) inform the Commission in writing, by May 1, 1979, of its commitment to work actively with other self-regulatory organizations in concert, and
- (2) submit to the Commission by September 1, 1979 a joint plan for implementing the mechanisms to provide price protection for all public limit orders, at least on a pilot basis, not later than the end of calendar year 1980.

National Market System Progress Assessment, *supra*. A joint plan, however, was never submitted.

(n457)Footnote 457. *Id.* "Gap print pricing" is the execution of limit orders at the "cleanup" price of a block transaction, *see, e.g.*, NYSE Rule 127, "Block Positioning," NYSE Guide (CCH) P2127 (2003). In the Commission's view, gap print pricing for displayed public limit orders away from the market should be a characteristic of price protection in the national market system. National Market System Progress Assessment, *supra*.

The creation of an explicit obligation on the part of a broker to execute an order according to the proposed price protection rule "would in no way limit a broker's existing duty to seek to obtain best execution of his customers' orders." *Id.* n. 30. Best execution is discussed in § 2.04 [2][c][iii] *supra*.

(n458)Footnote 458. "[I]f nation-wide price protection is to be accomplished in a fair manner consistent with the purposes of the [Exchange] Act, it ultimately should encompass protection for all buying and selling interest displayed by a particular market center as part of its current bid or offer--regardless of whether or not that interest is comprised of public limit orders--as well as all displayed public limit orders away from the market at prices superior to the price of a proposed trade. In this context, nation-wide price protection for public limit orders should be viewed as an interim step toward, and experiment in, the achievement of price protection for all displayed orders. The techniques developed to implement this interim goal should provide valuable experience in assessing the practicability of requiring price protection for all displayed orders in the future." National Market System Progress Assessment, *supra*.

(n459)Footnote 459. Two examples of possible alternatives are:

- (1) an electronic trading facility modeled after the National Stock Exchange NSTS, *see* § 2.04[2][b][i][B] *supra*, as repository for limit orders from varying locations, with market makers in any market center executing directly against those orders, and
- (2) a CLOB, modified to remove priority for orders stored in the CLOB over other orders at the same price in the various market centers.

National Market System Progress Assessment, *supra*.

(n460)Footnote 460. 46 SEC Ann. Rep., p. 2 (1981).

(n461)Footnote 461. *See* § 2.04[2][b][i][C] *supra*.

(n462)Footnote 462. *See* Release 17744, *supra*.

(n463)Footnote 463. Market 2000 Report, *supra*, at p. 17 (1994).

(n464)Footnote 464. On June 29, 1994, the Commission approved a proposed rule change by the NASD issuing an interpretation to its Rules of Fair Practice that would prohibit member firms from trading ahead of customer limit orders in their market making capacity, but would continue to allow members to continue trading ahead of limit orders of non-customers sent to them for execution by other firms. *See* Sec. Exch. Act Rel. No. 34270 (June 29, 1994).

(n465)Footnote 465. Sec. Exch. Act Rel. No. 34270 (June 29, 1994).

(n466)Footnote 466. *See* Sec. Exch. Rel. No. 25887 (July 6, 1988) (hereinafter cited as "E.F. Hutton Release"). The action arose out of a limit order placed by William Manning, a customer of E.F. Hutton, in January 1984. *Id.* Manning placed a limit order to sell 5,000 shares of Genex Corporation at 17 1/2 at a time when the inside quotation for Genex was 17 bid, 17 1/8 offer. *Id.* E.F. Hutton sold 4,755 shares of Genex from its own inventory at 1/4 and 1/2 and, because the price of Genex subsequently declined, never filled Manning's order. *Id.* Manning instituted a disciplinary hearing against Hutton. At the time of the Manning case the NASD's rules allowed a customer of a NASD firm to bring a disciplinary action against the firm. *See id.* at *1 n.1. The rules were later amended to eliminate this procedure. Sec. Exch. Rel. No. 40690 (Nov. 19, 1998).

After a hearing, the NASD found that E.F.Hutton violated Article III, Section 1 of the NASD's Rules of Fair Practice, which required NASD members to "observe high standards of commercial honor and just and equitable principles of trade." E.F. Hutton Release, *supra*. Article III, Section 1 of the Rules of Fair Practice has since been redesignated as Rule 2110 of the NASD's Conduct Rules. *See* NASD Manual, Rule 2110, at 4111. The only sanction imposed against E.F. Hutton by the NASD was a letter of caution. E.F. Hutton Release, *supra*.

E.F. Hutton appealed the NASD's decision to the SEC, arguing that it had no obligation to execute Manning's limit order. *Id.* The Commission found, however, that E.F. Hutton assumed a fiduciary obligation to Manning by agreeing to act as his agent with regard to the limit order, and therefore had an obligation not to give its own trade priority over Manning's order. *Id.* The Commission also found that E.F. Hutton could have avoided this obligation by disclosing to Manning that it intended to give its own proprietary position priority over his orders. *Id.* However, no such disclosure had been made. *Id.* E.F. Hutton argued that the NASD was adopting a new interpretation of its rules, which could only be accomplished by rulemaking. *Id.* at *4. The Commission, in sustaining the NASD decision, rejected this argument on the grounds that the interpretation at issue was supported by "long-standing principles and prior decisions of the courts" and the Commission. *Id.*

(n479)Footnote 479. Manning II Release, *supra*.

(n480)Footnote 480. Manning II Release, *supra*.

(n481)Footnote 481. Manning II Release, *supra*. In April 2001 the Commission approved Nasdaq's establishment, on a pilot basis, of standards for determining what constituted price improvement in a decimal environment. *See* Sec. Exch. Act Rel. No. 45286 (Jan. 15, 2002). Under these standards, a market maker trading ahead of customers, without executing those orders, would have to provide a minimum of \$.01 in price improvement for orders placed at or inside the best market displayed in Nasdaq. *Id.* For orders outside the best market, the market maker would be required to provide price improvement in an amount equal to Nasdaq's minimum quotation increment, which is currently \$.01. *Id.* The pilot price improvement standard was implemented on a permanent basis on February 26, 2007. *See* Sec. Exch. Act Rel. No. 34-55351 (Feb. 26, 2007).

(n482)Footnote 482. Sec. Exch. Rel. No. 43944 (Feb. 8, 2001).

(n483)Footnote 483. Sec. Exch. Act Rel. No. 47008 (Dec. 16, 2002).

(n484)Footnote 484. Sec. Exch. Act Rel. No. 52210 (Aug. 4, 2005). The NASD also separately extended equivalent protection to market orders with the adoption of Rule 2111 in August 2005. Sec. Exch. Act Rel. No. 52226 (Aug. 9, 2005).

(n485)Footnote 485. Order Handling Release, *supra*.

(n486)Footnote 486. Order Handling Release, *supra*.

(n487)Footnote 487. Order Handling Release, *supra*. Rule 604 [former Rule 11Ac1-4] provides in part:

(1) Each member of an exchange that is registered by that exchange as a specialist, or is authorized by that exchange to perform functions substantially similar to that of a specialist, shall publish immediately a bid or offer that reflects:

(i) The price and the full size of each customer limit order held by the specialist that is at a price that would improve the bid or offer of such specialist in such security; and

(ii) The full size of each customer limit order held by the specialist that:

(A) Is priced equal to the bid or offer of such specialist for such security;

(B) Is priced equal to the national best bid or offer; and

(C) Represents more than a de minimis change in relation to the size associated with the specialist's bid or offer.

(2) Each registered broker or dealer that acts as an OTC market maker shall publish immediately a bid or

offer that reflects:

- (i) The price and the full size of each customer limit order held by the OTC market maker that is at a price that would improve the bid or offer of such OTC market maker in such security; and
- (ii) The full size of each customer limit order held by the OTC market maker that:
 - (A) Is priced equal to the bid or offer of such OTC market maker for such security;
 - (B) Is priced equal to the national best bid or offer; and
 - (C) Represents more than a de minimis change in relation to the size associated with the OTC market maker's bid or offer.

Exceptions. The requirements in [preceding paragraphs (1) and (2)] shall not apply to any customer limit order:

- (1) That is executed upon receipt of the order.
- (2) That is placed by a customer who expressly requests, either at the time that the order is placed or prior thereto pursuant to an individually negotiated agreement with respect to such customer's orders, that the order not be displayed.
- (3) That is an odd lot order.
- (4) That is a block size order, unless a customer placing such order requests that the order be displayed.
- (5) That is delivered immediately upon receipt to an exchange or association sponsored system, or an electronic communications network that complies with the requirements of Sec. 240.11Ac1 1(c)(5)(ii) [now Rule 602(b)(5)(ii)] with respect to that order.
- (6) That is delivered immediately upon receipt to another exchange member or OTC market maker that complies with the requirements of this section with respect to that order.
- (7) That is an "all or none" order.

Exemptions. The Commission may exempt from the provisions of this section, either unconditionally or on specified terms and conditions, any responsible broker or dealer, electronic communications network, exchange, or association if the Commission determines that such exemption is consistent with the public interest, the protection of investors and the removal of impediments to and perfection of the mechanism of a national market system.

(n488)Footnote 488. Order Handling Release, *supra*. While greatly improving market transparency, the Order Handling Rules had an unfortunate side effect, which was that it allowed unscrupulous customers to engage in a practice known as "spoofing." Spoofing occurs when a customer places orders, typically through an ECN, at a price superior to the best price currently displayed in the market, for the purpose of artificially affecting the price of the stock in question in order to execute a trade on the other side of the market. A party engaged in spoofing can profit by placing larger orders on the other side of the market or by cancelling the original order before it is executed against. *See* Sec. Exch. Rel. No. 45018 (Nov. 5, 2001).

(n489)Footnote 489. See Sec. Exch. Rel. No. 43590 (Nov. 17, 2000) (hereinafter cited as "Disclosure Release").

(n490)Footnote 490. "Market centers" generally include exchange specialists, market makers in OTC securities, and alternative trading systems, including ECNs. Disclosure Release, *supra*.

(n491)Footnote 491. NMS Securities are discussed in § 2.04[2][a] *supra*.

(n492)Footnote 492. *Id.* As a consolidated best bid and offer is not disseminated at the market opening, market opening orders are not covered orders. Rule 605 [former Rule 11Ac1-5] also does not apply to orders such as short sales for which special handling was requested.

(n493)Footnote 493. Rule 605. The "realized spread" for an order is defined as double the difference between the execution price of an order and the midpoint of the consolidated best bid and offer thirty minutes after the execution time. See Rule 600(b)(6).

(n494)Footnote 494. Rule 605. The effective spread for an order is defined as double the difference between the execution price and the midpoint of the consolidated best bid and offer at the time the order is received. See Rule 600(b)(6). The average effective spread for marketable limit orders and market orders is a measure of the price improvement, or lack thereof, associated with these orders. Disclosure Release, *supra*. In other words, it measures the "liquidity premium" associated with placing orders that are immediately marketable. *Id.*

The average realized spread has different significance for non-marketable and marketable orders. *Id.* For non-marketable limit orders, the average realized spread measures "adverse selection" costs, or the extent to which limit orders tend to "be executed when the market is moving significantly against them." *Id.* The Commission believes that the practice of "stepping ahead" of limit orders by local traders on exchange floors and OTC market makers increases adverse selection costs. *Id.* For market orders and marketable limit orders, the average realized spread measures the routing of "informed" and "uninformed" orders. *Id.* Informed orders are orders placed by parties with better information than generally available in the marketplace. *Id.* Market centers are believed to have an incentive to attract uninformed orders, which are considered to have less risk. *Id.* A positive average realized spread for a market center would presumably mean that the market center attracted informed orders, while a market center with a negative average realized spread would be presumed to have attracted uninformed orders. *Id.*

(n495)Footnote 495. Peter Chapman, *Dash - 5 Stats Headed for Extinction?*, Traders Magazine, November 1, 2005.

(n496)Footnote 496. Peter Chapman, *Dash - 5 Stats Headed for Extinction?*, Traders Magazine, November 1, 2005.

(n497)Footnote 497. Rule 11Ac1-6. The rule applies only to "customer orders," which are defined as orders not for the account of the broker-dealer that have a market value of less than \$50,000, in the case of options, or \$200,000, in the case of other securities. *Id.* Broker-dealers are not required to provide order routing disclosures with regard to orders that a customer directs to a specific market center. *Id.*

(n498)Footnote 498. Rule 606.

(n499)Footnote 499. Rule 606 [former Rule 11Ac1-6] expands on the disclosures required by Rule 10b-10 and Rule 607 [former 11Ac1-3]. Rule 10b-10 requires a broker-dealer to disclose on its trade confirmations only that payment for order flow was received and to furnish details upon written request, and Rule 607 requires broker-dealers to disclose to new customers and annually to existing customers its "policies" on payment for order flow and order routing.

(n500)Footnote 500. Rule 606.

(n501)Footnote 501. Rule 606.

(n502)Footnote 502. Rule 606.

(n503)Footnote 503. Rule 606. The Commission's Division of Market Regulation has issued a staff legal bulletin which answers frequently asked questions of broker-dealers regarding the form and content of the reports required under Rule 606. *See* Division of Market Regulation: Staff Legal Bulletin No. 13A, available at 2001 SEC No-Act. LEXIS 759.

(n504)Footnote 504. The findings and objectives set forth in Section 11A(a)(1) are discussed in § 2.04[1][b] *supra*.

(n505)Footnote 505. Section 11A(a)(2) of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F. On the subject of subsystems within the national market system, the conference committee on Senate Bill 249 stated: The Senate Bill specifically referred to the possibility of subsystems within the national market system. The conferees determined that such reference is desirable. Although the studies and hearings on which the bills are based were concerned almost exclusively with common stocks, it is the intention of both Houses that all securities, other than exempted securities, be eligible to be qualified for trading in the national market system. The unique characteristics of other securities however, may require treatment different from that for listed common stocks. For example, it has not been determined whether a transactional reporting system is appropriate for debt securities. Accordingly, the Commission should have the flexibility of establishing subsystems within the national market system, which are tailored to the characteristics of the particular type of securities, which are to be traded in each subsystem. H.R. Rep. No. 94-229, 94th Cong., 1st Sess., 92-93 (1975).

(n506)Footnote 506. Section 11A(a)(2). Exempted securities are defined in Section 3(a)12, see § 4.01 *infra*. It was the intention of Congress that all securities, other than exempted securities, be eligible to become qualified securities 90 Stat. 1247 (Sept. 13, 1976); *see also* 5 U.S.C.A. App. 1 § 1. *See* § 2.04[2][a] *supra* for further discussion of qualified securities.

Any advisory committee created pursuant to the Federal Advisory Committee Act is in addition to the National Market Advisory Board established under Section 11A(d), *see* § 2.04[1][d] *supra*. Section 11A(a)(3)(A).

(n507)Footnote 507. P.L. 92-463, 86 Stat. 770 (Oct. 6, 1972), as amended P.L. 94-405, § 5(c).

(n508)Footnote 508. P.L. 92-463, 86 Stat. 770 (Oct. 6, 1972), as amended P.L. 94-405, § 5(c).

(n509)Footnote 509. Section 11A(a)(3)(B).

(n510)Footnote 510. Section 11A(a)(3)(C).

(n511)Footnote 511. Sec. Exch. Act. Rel. No. 17580, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) 82.836 (Feb. 26, 1981). Prior to the adoption of Rule 11Aa3-2, SROs would approach the Commission on an ad hoc basis seeking Commission approval of proposed undertakings. *See, e.g.*, Sec. Exch. Act Rel. Nos. 11255 (1975) (approving an industry sponsored consolidated transaction reporting system) and 14661 (1978) (approving on an experimental basis the formation of the Intermarket Trading System, which is discussed in § 2.04[2][b][i][A] *supra*).

Rule 608 [former 11Aa3-2] provides a procedure for the Commission to carry out the express statutory authority embodied in Section 11A(a)(3)(B), *i.e.*, to approve joint industry plans with respect to the establishment of a NMS.

(n512)Footnote 512. Rule 608(b)(2) [former 11Aa3-2(b)]. The term "national market system plan" means any SRO plan in connection with:

1-2 Federal Securities Exchange Act of 1934 § 2.01

(i) The planning, development, operation or regulation of a national market system (or a subsystem thereof) or one or more facilities thereof, or

(ii) The development and implementation of procedures and/or facilities designed to achieve compliance by self-regulatory organizations, their members or nonmember brokers and dealers with any section of this subpart promulgated pursuant to Section 11A of the Act. Rule 608(b)(43) [former Rule 11Aa3-2(a)(1)].

(n513)Footnote 513. The term "sponsor" means any SRO that is a signatory to the plan and has agreed to act in accordance with the plan. Rule 600(b)(70) [former 11Aa3-2(a)(5)].

(n514)Footnote 514. The term "participant" means any SRO or nonmember broker or dealer that has agreed to act in accordance with the plan but is not a signatory to the plan. Rule 600(b)(53) [former Rule 11Aa3-2(a)(6)].

(n515)Footnote 515. Rule 608(a)(4) [former Rule 11Aa3-2(b)(4)].

(n516)Footnote 516. The operation statement must include:

- (a) the terms and conditions under which broker, dealers, and SROs will be granted or denied access;
- (b) the calculation of any fees or charges to be imposed and the distribution of such proceeds;
- (c) the method and frequency of evaluating the performance of the plan processor; and
- (d) the method for resolving disputes arising out of operation of the plan.

Rule 608(a)(5)(i)-(iv) [former Rule 11Aa3-2(b)(5)(i)-(iv)].

(n517)Footnote 517. Rule 608(b)(2) [former Rule 11Aa3-2(c)(1)].

(n518)Footnote 518. Rule 608(b) [former Rule 11Aa3-2(c)(1)].

(n519)Footnote 519. Rule 608(b)(2) [former Rule 11Aa3-2(c)(2)]. The processing period may be extended for up to 180 days if the Commission determines that additional time is appropriate and publishes its reasons for so concluding. *Id.* The Commission may revise a proposed NMS plan if it finds that such plan or amendment is necessary or appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of, a national market system, or otherwise in furtherance of the purposes of the Act. *Id.* A proposed plan may become effective upon filing if the sponsors designated it as

- (1) establishing or changing a fee or other charge,
- (2) concerned solely with the administration of the plan or involving the governing or constituent documents, or
- (3) involving solely technical or ministerial matters.

Rule 608(b)(3) [former Rule 11Aa3-2(c)(3)].

(n520)Footnote 520. Rule 608(d) [former Rule 11Aa3-2(e)]. In summary a petition for review must be filed within

30 days after entry of the Commission's order. The Commission may move to review its prior action *sua sponte*. During the period of review, there is no automatic stay of the action under evaluation. Upon review, the Commission will dismiss the proceeding if it determines that the action or failure to act is in accordance with the applicable provisions of such plan and the applicable provisions are, and were, applied in a manner consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanisms of, a national market system. Rule 608(d)(3) [former Rule 11Aa3-2(e)(3)]. If it cannot so find, or if the Commission concludes that the action under review would impose an unnecessary burden on completion, the Commission will set aside or amend the action as the Commission deems necessary or appropriate in the public interest, for the protection of investors, and the maintenance of fair and orderly markets, or to remove impediments to, and perfect the mechanisms of, a national market system. *Id.*

(n521)Footnote 521. *See, e.g.,* the discussion of the designation of "qualified securities" for the NMS in § 2.04[2][a] *supra* .

(n522)Footnote 522. Senate Report, *supra*, at p. 103.

(n523)Footnote 523. Commission rules adopted pursuant to Section 11A(c)(1) must be necessary or appropriate in the public interest, for the protection of investors, or in furtherance of the purposes of the Exchange Act. Section 11A(c)(1).

(n524)Footnote 524. Section 11A(c)(1)(A). Section 15(c)(2) generally prohibits a broker, dealer, or municipal securities dealer from using any means or instrumentality of interstate commerce to purchase or sell, or induce or attempt to induce the purchase of or sale of, any security in connection with, among other things, any fictitious quotation made by such person.

(n525)Footnote 525. Section 11A(c)(1)(B). The Commission, for example, has the authority under Section 11A(C)(1)(A) and (B) to prescribe the hours of operation of any ticker tape or quotation system, the method and format of reporting various types of transactions on a tape, and the identification, if any, of market centers. Senate Report, § 2.01 *supra* , at p. 104.

(n526)Footnote 526. Securities information processors are discussed in § 2.04[2][e] *supra*.

(n527)Footnote 527. Section 11A(c)(1)(C).

(n528)Footnote 528. Section 11A(c)(1)(D). The Commission is directed by Section 11A(c)(1)(C) and (D) "to remove present and prevent future anti-competitive restrictions on access to basic market information, e.g., by eliminating rules giving members of an exchange an exclusive right to particular information." Senate Report, § 2.01 *n.42 supra* , at p.104.

(n529)Footnote 529. Qualified securities are discussed in § 2.04[2][a] *supra*.

(n530)Footnote 530. Section 11A(c)(1)(E).

[T]he Commission would be required to assure that any order transmission or "switching" system utilized by a brokerage firm or an exchange operates in a manner consistent with the development and operation of a national market system. Large brokerage firms rely heavily on high-speed systems for the direction of orders to a designated facility for execution. The Committee has been informed that many of these systems are currently geared to route orders for any particular security to only one market center, e.g., the NYSE. The functioning of such systems in this manner is inconsistent with the development and operation of a national market system. It may also be inconsistent with a broker's obligation to obtain "best execution" for his customers. The subsection [Section 11 A(c)(1)(E)] would accordingly give the SEC the responsibility to require brokers to utilize order "switching" services which are "neutral" as to market centers, giving preference to one execution facility over another only to insure best execution. Senate Report, *supra*, at

p. 104-105.

The "best execution" of customers' orders, *i.e.*, the execution by brokers of investors' orders in the best market, is one of the goals of a national market system, see Section 11A(a)(1)(C)(iv). "Best execution" is discussed in conjunction with a composite quotation system, *see* § 2.04[2][c][v] *supra*.

A switching or broker order routing system is discussed in § 2.04[2][b][ii] *supra*.

(n531)Footnote 531. Section 11A(c)(1)(F), The term "equal regulation" is defined in Section 3(a)(36):

A class of person or markets is subject to "equal regulation" if no member of the class has a competitive advantage over any other member thereof resulting from a disparity in their regulation under this title [the Exchange Act] which the Commission determines is unfair and not necessary or appropriate in furtherance of the purposes of this title.

In the Committee's view equal regulation is appropriate only if the phrase is understood to mean that persons enjoying similar privileges, performing similar functions, and having the potential for similar market impact are treated equally. For example, the purpose of integrating all market makers into a single system is not to make them all do business in the same way, but rather to enable public investors to take full advantage of the distinctive contributions that each group can make. The slogan "equal regulation," therefore, is not a meaningful guide to regulatory action unless persons similarly situated in terms of the purpose of the regulation are first identified; S. Rep. No. 94-75, 94th Cong., 1st Sess., 16 (1975).

The definition of "equal regulation" in Section 3(a)(36), when combined with the Commission's power to classify in Section 23(a)(1), *see* § 9.01 n.16 *infra*, is intended to ensure that the Commission "regulate comparably those market matters and specialists enjoying the same opportunities, having the same market power, and subject to the same conflicts of interest." *Id.*

If it should appear to the Commission that any disparity in regulation which permits an unfair competitive advantage is not justified by any of the purposes of the Act the Commission, in the exercise of its discretion, is authorized to modify such regulation. It should be noted, however, that this section is not intended to create a new standard for any right of action by any person to challenge the Commission's determination to exercise, or not to exercise, its authority under this provision; rather, it is intended to provide a guide for Commission action. *Id.*

Commission regulation of market makers, including specialists and other dealers, pursuant to Sections 11(b) and 15(c)(5) (discussed in § 3.02 *infra*) must be carried out with a view to Sections 11A(a)(1)(C)(ii) (establishing fair competition among brokers and dealers as a goal of the Exchange Act) and 11A(c)(1)(F) (empowering the Commission to assure "equal regulation" of all dealers effecting transactions in qualified securities); S. Rep. No. 94-75, 94th Cong., 1st Sess., 15 (1975).

The concept of "equal regulation" is used in other contexts in addition to the Commission's rule-making powers with respect to a national market system for securities. Section 6(f), discussed in § 2.03[3][b] *supra*, empowers the Commission to subject certain nonmembers of a national securities exchange to the rules of such exchange in order, among other things, to assure "equal regulation." Section 11 (a)(2), discussed in § 3.02 *infra*, grants the Commission rule-making power to regulate or prohibit certain transactions by exchange members, brokers, or dealers, if the Commission deems such rule-making necessary or appropriate, among other things, to assure "equal regulation" of both exchange markets and markets occurring otherwise than on an exchange.

(n532)Footnote 532. Section 11A(c)(1).

(n533)Footnote 533. "Exempted securities" are listed in Section 3(a)(12), *see* § 4.01 *infra*.

(n534)Footnote 534. The activities covered by the rulemaking power granted in Section 11A(c) are discussed in Senate Report, § 2.01 *supra* .

It would be unlawful for any self-regulatory organization, member thereof, broker, dealer or securities information processor to perform the functions of a securities information processor with respect to any security (other than an exempt security) or to purchase or sell any such security in contravention of rules prescribed by the Commission as necessary or appropriate for the development of a national market system or for the regulation of the use and operation of communications and data processing facilities and services related to that system. Under this grant of authority, the SEC would have regulatory control over all organizations engaged in the business of collecting, processing or publishing information relating to transactions in and quotations for securities.

The Commission's rule-making authority would extend to facilitating the development of a composite tape and composite quotation system, determining the occasion for suspension of the operation of a tape or quotation system with respect to particular securities, establishing performance standards for securities information processors, prescribing the terms and conditions for retransmission of information collected by any exclusive processor, preventing the use or publication of fraudulent, deceptive, or manipulative market information, and integrating information services and market facilities. The Commission's direct regulatory authority under this subsection is intended to assure that it will play an effective leadership role in the establishment and regulation of a national market system.

(n535)Footnote 535. Section 15(c)(1) is discussed in § 6.01 *infra*.

(n536)Footnote 536. See Senate Report, *supra*, at p. 197. Prior to 1975, Section 15(c)(1) was limited to actual--as opposed to attempted--purchases of sales. Section 10(b), the statutory basis of *Rule 10b-5*, however, was not amended in 1975 and continues to prohibit activities "in connection with the purchase or sale of any security." Section 10(b) and *Rule 10b-5* are discussed in § 5.04 *infra*.

(n537)Footnote 537. Qualified securities are discussed in § 2.04[2][a] *supra*.

(n538)Footnote 538. Section 11A(c)(2).

(n539)Footnote 539. Third market trading is discussed in § 2.03[2][c] *supra*.

(n540)Footnote 540. P.L.94-29, 89 Stat. 97 (June 4, 1975).

(n541)Footnote 541. Listed securities are discussed in § 4.01[1] *infra*.

(n542)Footnote 542. Section 11A(c)(3)(A).

[T]he Committee [on Banking, Housing and Urban Affairs of the United States Senate] believes that the SEC should be vested with flexible and effective power to deal with any serious disruptions in the operation of the markets for listed securities caused by trading in the third market. Section 11A(c)(3) embodies this proposition. Senate Report, § 2.01 *supra* , at p. 21. In fact, one of the principles cited as a basic underlying principle of a national market system for securities was the refusal by Congress to abolish over-the counter trading in exchange-listed securities, see § 2.04[1][c] *supra*.

It was the response to concerns that the advent of competitive commission rates would cause serious disruptions in the operation of the exchange markets for listed securities that resulted in the enactment of Section 11A(c)(3). See Senate Report, *supra*, at p. 20-21.

(n543)Footnote 543. Any rule of an exchange

(1) fairly and reasonably prescribing the sequence of order execution, or

(2) adopted to effect compliance with a Commission rule adopted pursuant to the provisions of the Exchange Act shall not be deemed to unreasonably impair the ability of a dealer to solicit or effect transactions in securities for his own account. Section 11A(c)(3)(B).

(n544)Footnote 544. Section 11A(c)(3)(A); The Conference Committee Report to accompany Senate Bill 249 refers to the provision for prohibition of trading of an exchange in listed securities as " ... failsafe powers," reflecting the expectation that they are provisions which may only be used as regulatory powers of last resort." H.R. Rep. No. 94-229, 94th Cong. 1st Sess., 95 (1975). This expectation is codified in the Section 11A(c)(3)(A)(iii) requirement that the Commission find that the maintenance or restoration of fair and orderly markets in securities registered pursuant to Section 12(b), discussed in § 4.01[1] *infra*, may not be assured through other lawful means under the Exchange Act.

(n545)Footnote 545. Any such exemption must be consistent with the public interest, the protection of investors, and the maintenance of fair and orderly markets. Section 11A(c)(3)(A).

Section 11A(c) contains two other provisions, one of which has expired and the other not pertaining to Commission rule-making powers to facilitate the development and regulation of the national market system. Section 11A(c)(4) directs the Commission to review all exchange rules that limit or condition the ability of an exchange member to trade off the exchange (off-board trading restrictions are discussed in § 2.03[2][c] *supra*.) and report to Congress the results of its review within ninety days of the date of enactment of the Securities Acts Amendments of 1975.

Section 11A(c)(5) prohibits a national securities exchange or a registered securities association from limiting or conditioning the participation of any member in any registered clearing agency.

CHAPTER 2 Regulation of Securities Markets *

1-2 Federal Securities Exchange Act of 1934 § 2.02

§ 2.02 Securities Markets: An Overview

Secondary securities markets n1 serve two general purposes: to facilitate capital formation for businesses and the government and to provide a means of profitable asset utilization for investors. n2 The most efficient markets achieve these goals through effective price discovery n3 and low-cost liquidity. n4 Secondary markets also serve as important leading indicators of economic trends.

Conceptually, there are two primary types of securities markets: centralized "auction" markets and "negotiation" or "dealer" markets. Historically, the United States securities markets could be easily divided into two segments national securities exchanges, which were floor-based auction markets, and the over-the-counter, or "OTC" market, which was a dealer market. In the late 20th and early 21st century, there were many more securities markets, and the distinction between national securities exchanges and the OTC market, while still technically accurate, became less useful. Currently, as a result of markets' consolidating, the clear division between the exchange and OTC markets is returning. This is particularly true in light of the registration of Nasdaq, which as discussed below had historically been part of the OTC market, as a national securities exchange. There are currently ten national securities exchanges. Six of these exchanges operate floor-based auction markets--the American, Boston, Chicago, New York, and Philadelphia Stock Exchanges and the Chicago Board Options Exchange. n5 Three national securities exchanges, the National Stock Exchange, the International Securities Exchange and Nasdaq, are purely electronic markets, with no trading floor. n6 NYSE Arca (formerly the Pacific Exchange) operates two trading floors for options, but all equity trading on the exchange occurs through a purely electronic facility. n7

The over-the-counter, or "OTC," market encompasses all non-exchange traded securities, including stocks, corporate and government bonds, debentures, and mutual funds. n8 The over-the-counter market was long dominated, at least in terms of public perception, by the Nasdaq Stock Market ("Nasdaq"), which grew out of a simple inter-dealer quotation system operated by the NASD. n9 Once Nasdaq became registered as a national securities exchange, this left the Over-the-Counter Bulletin Board, n10 which is operated by, but not part of, Nasdaq, and stocks quoted on a less formal quotation system known as the "pink sheets" as the primary components of the over-the-counter market. n11 Alternative trading systems, which are securities markets operating with some characteristics of exchanges and some of the OTC market, rose in prominence in the late 20th and early 21st century years. Alternative trading systems are technically part of the OTC market, but the Commission has created a separate regulatory scheme for these systems. n12 In 2006, the market value of equity and option transactions on registered exchanges total \$42.3 million. n13

1-2 Federal Securities Exchange Act of 1934 § 2.02

Certain securities tend to trade in certain kinds of markets. n14 Exchange traded or "listed" securities generally must be registered with the Commission and meet exchange-determined listing criteria. n15 Similar requirements existed with regard to securities included in Nasdaq before it became registered as a national securities exchange. n16

Some trading of exchange registered or "listed" securities occurs on the OTC markets. n17 Conversely, in addition to listed securities, certain OTC securities that have been admitted to unlisted trading privileges trade on exchanges. n18 Although they have similar regulatory responsibilities, n19 the exchange and OTC markets have historically operated very differently with respect to the execution of transactions. n20

The federal securities laws regulating national securities exchanges were passed in reaction to the "speculative boom of the Roaring Twenties and the ensuing Great Depression." n21 In drafting legislation, Congress specifically considered whether the securities industry should continue to govern the conduct of and establish professional standards for securities professionals or whether that responsibility should shift to the federal government. n22 Finding that direct government regulation of securities markets would be "ineffective," n23 Congress approved a unique pattern of regulation under which the securities exchanges were to be directly responsible for enforcement of the Exchange Act as well as the applicable standards of professional conduct. n24 The newly created Securities and Exchange Commission ("SEC" or "Commission") was given oversight responsibilities with respect to exchanges to assure that the system of self-regulation was effective. n25

Accordingly, Section 6 of the Exchange Act n26 requires national securities exchanges to register with the Commission. n27 The Exchange Act establishes registration criteria that the exchanges must satisfy, including that exchanges have a mechanism for disciplining their members, and persons associated with their members, for violations of the federal securities laws, including the Exchange Act and the rules and regulations thereunder, as well as for violations of exchange rules. n28 The Exchange Act also prescribes the grounds upon which exchanges may or must deny persons membership or bar persons from becoming associated with members. n29

As enacted originally, the Exchange Act did not regulate the OTC market. n30 Recognizing the increasingly important role of the OTC markets, in 1938 Congress amended the Exchange Act to add Section 15A, n31 which permits associations of brokers and dealers to register with the Commission as national securities associations or affiliated national securities associations, with responsibilities substantially similar to the national securities exchanges.

In 1971, the Commission embarked upon an attempt to "influence the evolutionary forces which shape the market place in order to stimulate the exploitation of technological advancements and to insure a fair field of vigorous competition." n32 The Commission called for the creation of a "central market system" to assure the continued viability of securities markets, to minimize "market fragmentation," and to foster competition among securities professionals. n33 After four years of regulatory initiatives by the Commission n34 and numerous studies, hearings, and congressional inquiries, n35 Congress through the Securities Acts Amendments of 1975 (the "1975 Amendments") directed the Commission to "facilitate" implementation of a "national market system." n36 The national market system is discussed in more detail in § 2.04 *infra*. This system would embrace "the principles of competition in which all buying and selling interests are able to participate and be represented" n37 in order "to enhance competition and to allow economic forces, interacting within a fair regulatory field, to arrive at appropriate variations in practices and services." n38

In the debate leading to the enactment of the 1975 Amendments, Congress reconsidered the regulatory framework of the Exchange Act n39 and again concluded that direct regulation of the securities markets by the government would be "ineffective." n40 Congress reaffirmed that the securities industry should continue to be regulated directly by those registered marketplaces through which secondary trading occurs. To eliminate any doubt as to the responsibilities of these registered markets, Congress designated all registered national securities exchanges and securities associations to be self-regulatory organizations n41 responsible for enforcing "at their own initiative compliance by members of the industry with both the legal requirements laid down in the Exchange Act and ethical standards which go beyond those requirements." n42 Moreover, Congress expanded the power of the Commission to oversee the operations of

self-regulatory organizations n43 and reconfirmed that the self-regulatory organizations' regulatory authority emanates solely from the Commission. n44

Since 1975, the Commission, the SROs, and other participants in the secondary securities markets have spent inestimable time and money in response to the 1975 Congressional mandate and have instituted numerous regulatory and operational changes in an attempt to develop a functional national market system. n45 These changes have dramatically altered the organization, operation, and future of the secondary securities markets. n46

Since April 2001, securities on all markets have been traded in decimals. n47 The purpose of the conversion to decimal pricing was to reduce bid-ask spreads and eliminate the need to convert fractions to decimals. n48 The conversion has, however, also allowed professional traders to trade in a manner which can be detrimental to investors. n49

In June 2005 the SEC attempted a major reform of the national market system with its adoption of Regulation NMS. n50 Regulation NMS itself is in large part a reorganization of existing rules governing the securities markets into a single regulation. In adopting Regulation NMS, however, the SEC also significantly revised existing regulations by:

- extending a prohibition on "trade-throughs," or execution of orders on one exchange while a better price exists on another exchange, to Nasdaq, in addition to exchange-listed, stocks, though limiting "protected" quotes to those against which automatic executions are immediately available; n51
- limiting fees that markets can charge for access to their quotations, in an effort to improve access to quotations in NMS stocks. n52
- prohibiting pricing in increments of less than one cent, or "subpenny pricing," for all stocks priced at \$1.00 or more. n53
- amending the rules governing market data, in an effort to improve the availability of market data and allocate market data revenues in a manner designed to reward markets that produce the most valuable data. n54

[1] Trading on Exchanges

The three primary stock exchanges, the New York Stock Exchange ("NYSE"), the Nasdaq Stock Market and the American Stock Exchange ("Amex"), list most of the stocks traded on exchanges. The five other national stock exchanges, n55 the Boston, Philadelphia, National, Chicago, and NYSE Arca (formerly the Pacific) Stock Exchanges, generally trade securities that also are listed on the primary markets. n56

Since 1990 the Chicago Board Options Exchange ("CBOE") has been authorized to trade stocks, n57 but as of 2003 trades primarily standardized n58 options. n59 In 2006, the market value of CBOE transactions was approximately \$531 billion. n60 The International Securities Exchange exclusively trades options. The exchange began trading in 2000, and by 2004 had dollar trading volume of approximately \$221 billion. n61

Both stock and options trade on the Amex, NYSE Arca and Philadelphia Stock Exchanges. n62 The largest exchange in terms of market value of stock traded is the NYSE, but Nasdaq typically has higher total share volume. n63 In 2006, transactions on the NYSE accounted for 37.1 percent of the total market value of all stock transactions on exchanges and Nasdaq; Nasdaq's percentage of the total market value of these transactions was 54 percent. n64

[a] Operation of Markets

[i] Traditional Exchanges

The primary exchanges operate as modified auction markets. In such an auction all order flow for a stock is directed to a central location, the trading post for the specialist in the stock, and orders interact to the maximum extent possible without specialist intervention. n65 A specialist acts as a market maker by trading for its own account to ameliorate temporary disparities in supply and demand for the stock and also acts as agent for orders left with it by parties seeking execution. n66

Transactions effected on a national securities exchange traditionally have been made through a member of that exchange who is customarily an individual, often a general partner or holder of voting stock in one of the brokerage concerns that is known as a "member firm" or "member corporation" by virtue of the exchange membership of a partner or stockholder. n67 At the end of 2002, the NYSE had 337 member firms. n68 In 2006, the New York Stock Exchange, Inc. ("NYSE") demutualized, resulting in the termination of NYSE seat ownership. Presently, shares of NYSE Euronext trade on the New York Stock Exchange. n69 On June 17, 2008, NYSE Euronext and the American Stock Exchange announced that The American Membership Corporation ("AMC") approved a merger agreement between AMC and NYSE Euronext and certain of their subsidiaries. Rule changes related to the merger are subject to the approval of the U.S. Securities and Exchange Commission (the "SEC"). n70

As a result of the 1975 Amendments, the exchanges were directed to permit non-members to access their trading facilities under certain circumstances. n71 The NYSE, for example, permits members to lease their seats to non-members n72 and provides non-members with electronic access to the exchange trading floor. n73 In 1982, the NYSE introduced a special category of membership, Physical Access Membership, effective for a one-year period and carrying no equity rights, but otherwise permitting full participation in exchange trading operations. n74

Each exchange has specific rules addressing categories of market professionals who are eligible to participate in the trading process and imposing duties and responsibilities upon these participants commensurate with their level of participation in the marketplace. n75 Because the definition of trading participants and allocation of responsibilities is a matter of exchange rule rather than statute, no mandated or uniform exchange practices exist. n76 However, the exchanges generally have adopted rules governing member conduct and activity which embody similar principles. Section 6(b)(5) of the Exchange Act states that the rules of an exchange must be designed to, among other things, "prevent fraudulent and manipulative acts and practices," "promote just and equitable principles of trade," "remove impediments to and perfect the mechanism of a free and open market and a national market system," and "protect investors and the public interest." n77 Further, the rules of an exchange may not "impose any burden on competition not necessary or appropriate in furtherance of the purposes of" the Exchange Act." n78 The categories of market professionals most commonly defined and regulated by the exchanges are the following:

Specialists, who act as dealers to the extent necessary to maintain fair and orderly markets. The specialist is responsible for purchasing and selling securities in a manner that contributes to the maintenance of fair and orderly markets in the particular security to which he or she is assigned. n79

Dealers, who trade for their own accounts on the floor of the exchange.

Commission brokers, who are employed by member firms to represent customer orders on the trading floor.

Floor brokers, who act as independent commission brokers to execute customer orders and buy and sell stock on the floor of the exchange. n80

Registered Competitive Market Makers ("RCMM"), who, when called upon by an exchange official, trade for their own accounts to narrow the existing quote spread or improve the depth of an existing quote. An RCMM may also be asked to assist a commission broker or floor broker in executing a customer's otherwise unexecutable order.

Historically, the procedures for effecting a trade on the floor of a securities exchange were nearly identical at all exchanges. The most common method of trading is known as a "continuous two-sided auction market" in which investors or brokers representing them trade directly with each other, as opposed to a dealer market where most trades are made through a dealer at the dealer's bid or ask price. n81 In this market, each security that is traded on an exchange is traded at one designated place on the "floor" of the exchange called a "post." At each post there are one or more exchange members who are registered with that exchange as specialists in one or more securities. At the larger exchanges, each equity security is generally allocated to a single specialist. These specialists are awarded, in effect, a monopoly right to make a market in that security on the floor, in return for which the specialist undertakes certain responsibilities. n82

In a typical transaction on a floor-based exchange, a public customer would contact his broker with an order to either buy or sell a certain security. The broker then communicates with his firm's order booth at the exchange, and the order soon reaches the floor of the exchange. There a commission or floor broker receives the order and proceeds to the trading post for that particular security. At the post, the broker ascertains the current market either by inquiry to the specialist or by visually checking a video display screen which discloses current market data for each security traded at that post. The broker then announces his bid or requests a quote from the other traders at the post. When a sale is made, the broker notifies his central office, which, in turn, notifies the customer. n83

In the case of an order to buy or sell less than 100 shares, known as an "odd lot" order, the price is based upon the best price quoted at the time the order is received. n84

In addition to an "at the market" order (*i.e.*, an order to buy or sell a security at the best market price), there are several special instructions a customer may give his broker in connection with a purchase or sale of securities on an exchange:

- A *limit order* specifies a maximum price at which the stock may be purchased or a minimum price at which the stock may be sold.
- A *stop order* requires that a security be bought or sold once a certain price level has been reached. Once the market reaches that price, the stop order effectively becomes a market order. n85
- A *good-till cancelled order* is carried by a broker until either he is able to execute the order or the customer cancels it.

As a result of technological advances and competition from electronic markets, among other factors, traditional exchanges have modified their execution systems. For example, in December 2000 the Commission approved the NYSE's proposal to establish NYSEDirect+, under which member firms could submit customer orders of 1099 shares or less for automatic execution. n86 Though originally approved as a one-year pilot program, the NYSEDirect+ pilot was extended on numerous occasions n87, and appears to have been implemented on a permanent basis n88.

As an electronic platform, NYSEDirect+ seeks to provide faster order execution than the traditional NYSE auction market. In August 2004, the NYSE filed a proposal to create the "NYSE Hybrid Market," which would expand the types of orders that could be entered through Direct+ allowing investors to choose either the NYSE's traditional auction model or its electronic trading platform to execute orders. n89 This was approved in March 2006. As noted above, NYSEDirect+ currently only allows automatic execution of limit orders of 1,099 shares or less. In addition, NYSEDirect+ has a number of other limitations, including, a 30-second restriction for orders of the same beneficial owner, and a lack of functionality for immediate or cancel ("IOC") orders. n90 As a way of increasing investor interaction with NYSEDirect+, the Hybrid proposal aims to improve upon NYSEDirect+ by, among other things:

- eliminating the current order restriction from automatic execution to allow the full extent of an order

size to be automatically executed;

- eliminating the 30-second limitation for consecutive automatically executed orders for accounts in which the same person is directly or indirectly interested;
- introducing IOC functionality;
- permitting market orders to be automatically executed, if so designated;
- creating new order types; and
- fostering greater floor broker and specialist interaction with Direct+. n91

The Hybrid Proposal's enhancements to NYSEDirect+ allows marketable limit orders and market orders designated for automatic execution, regardless of size, to be eligible for immediate execution against the trading interest reflected in the NYSE's published quotations. Any unfilled portion of an order would "sweep" the NYSE Display Book, n92 a file reflecting broker agency interest and a file reflecting specialist interest until the order is executed, or until other conditions are satisfied. n93 In addition, Hybrid Market orders would automatically be routed to other "fast markets" when those market centers quote a better price than the NYSE. n94 If the order is designated as "Do Not Ship," however, the order would remain at the NYSE. n95 In the Hybrid Market, customer orders may be directly submitted electronically, or through floor brokers. n96

As a way to enhance floor broker and specialist interaction with Direct+, the Hybrid proposal provides new tools for floor brokers and specialists to continue to meet their best execution and market making obligations on the NYSE. Floor brokers would represent customer interest on the NYSE Display Book through NYSE e-Quote, also referred to as "NYSE Floor Broker Agency Interest Files." n97 Specialists would have the ability to provide electronic representations of their trading interest through NYSE s-Quote, also referred to as "NYSE Specialist Interest Files." n98 In each instance, the NYSE noted that its intent is to provide customer orders greater choice in execution, while giving floor brokers greater flexibility in their representation of customer orders, and enhancing the specialists' ability to add liquidity and stabilize prices. n99

When an order is executed, notice of the transaction is disseminated by the exchange through various types of electronic reporting systems. On the NYSE, for instance, trade reporting is done directly through the specialist's electronic display book or by floor reporters on wireless, hand-held computer terminals. The data then travels to the NYSE's Market Data System for validation and dissemination. n100 In 1974, the Commission approved a plan n101 filed jointly by the American, Chicago, Pacific, Philadelphia, and New York Stock Exchanges and the NASD for the formation of a Consolidated Tape Association which would compile and report price and volume information for completed transactions with respect to securities "listed" on exchanges, irrespective of whether the trade occurred on the floor of an exchange, through the Nasdaq system, or in the "third market." n102

Most national securities exchanges maintain a specific trading floor. However, Nasdaq, n103 the National Stock Exchange and the International Securities Exchange ("ISE") are "electronic markets" or "black box systems," through which buyers and sellers effect trades through computer terminals. n104 The Pacific Exchange has two trading floors for options, but its equity trading occurs exclusively through an electronic facility n105 known as the Archipelago Exchange (now NYSE Arca). n106 All of the others have computerized systems to expedite the execution of certain categories of orders. n107 The exchanges have also developed an Intermarket Trading System ("ITS") which electronically links geographically separate markets, provides timely and accurate price and quotation information to participants and allows orders to be routed to the market providing the best price at a given point in time. n108

Each exchange is required to maintain a market surveillance system to detect improper or illegal trading practices. n109

Over the years, the SEC has maintained continued discussions with the exchanges regarding continued improvements in market surveillance. n110 The exchanges' response to Commission demands for improved market surveillance has been varied and negotiations continue with the Commission. n111

In October, 1980, Congress authorized appropriations for the Commission to design and purchase a computerized Market Oversight and Surveillance System ("MOSS"). n112 This federally owned and operated system would have permitted the Commission to oversee various aspects of market activity through direct access to exchanges' computerized files. n113 Though the MOSS System was never implemented on a permanent basis, the potential of direct Commission surveillance of the exchanges' markets prompted increased self-regulation by the exchanges. n114

[iii] Nasdaq

Nasdaq rose from humble beginnings as a simple electronic quotation service to a major stock market and ultimately a registered national securities exchange. n115 Originally, Nasdaq simply created greater exposure for unlisted securities and diminished a statistical information gap that existed prior to its creation. This increased quotation exposure enabled brokers to obtain real-time prices and better order execution.

In 2004, the Nasdaq Stock Market surpassed the trading volume of the NYSE by a wide margin. n116 The share volume of Nasdaq securities in 2004 was 455.6 billion shares, as compared to an aggregate share volume of 367 billion on the NYSE. n117

Nasdaq market participants access quotes and orders using the Nasdaq WorkstationSM, which in 2005 replaced Workstation II. n118 WorkstationSM has three levels of service--Query Only, Order Entry and Market Maker. n119 Query Only Service allows a participant to view quotes and orders, but not to enter orders or make trades. n120 Participants who subscribe to Order Entry Service can view quotations and orders and also enter orders into the Nasdaq system. n121 Market Maker Service allows registered market makers to view all other quotations and orders, and to enter both quotations and orders into the system for execution. n122

In the late 1990s and early 21st century, Nasdaq introduced trading systems which fundamentally changed the nature of the market. The first was the "Nasdaq National Market System," or "SuperSOES," approved by the SEC in January 2000. n123 The SuperSOES system provided for automatic execution of orders for Nasdaq National Market securities of up to 999,999 shares. n124 The SuperSOES System introduced a "reserve size functionality" which allows market makers to display only a portion of a customer's order and hold the remainder in reserve.

The second major system introduced by Nasdaq, the "SuperMontage" system, was approved by the Commission on January 10, 2001, and began operations in October 2002. n125 SuperMontage expanded the SuperSOES order display. In addition, unlike SuperSOES, it applied to all Nasdaq securities, including National Market and SmallCap [now Capital Market] securities. The Nasdaq Workstation II [since replaced by WorkstationSM] contained a "quotation montage" displaying the quotes and orders of market participants. The advanced system took its name from one of its primary features, the Nasdaq Order Display Facility, or "SuperMontage," which supplemented an amended quotation montage. Nasdaq began revising or adding new features to SuperMontage even before its launch, and frequently made changes after the launch as well. n126

In 2004 Nasdaq eliminated the "SuperMontage" terminology and called its system simply the "Nasdaq Market Center," though the operation of the system was unchanged. n127 Through the Nasdaq Market Center, quotes and orders for all Nasdaq securities are displayed and can be executed. The Nasdaq Market Center displays orders four levels away from the so-called "top of the market," or best bid and ask quotes. n128 The Nasdaq Market Center displays trading interest of market makers and ECNs, as well as exchanges on which Nasdaq stocks have UTPs. n129 The Nasdaq Market Center allows Nasdaq market makers and ECNs, collectively known as "Nasdaq Quoting Market Participants," to display their trading interest anonymously, on both a pre and post-trade basis. n130 The Nasdaq Market Center, like the SuperSOES

system, allows Nasdaq Quoting Participants to use "reserve size," which is not displayed in the quotation montage or Order Display Facility, but against which orders can be executed. n131 The SuperMontage proposal, which established what is now known as the Nasdaq Market Center, introduced an Order Collector Facility, which is a central facility through which all orders are channeled for execution.

The SuperMontage system, now known as the Nasdaq Market Center, continued the trend, starting with the original SOES system, toward automatic executions of orders for Nasdaq securities. In fact, Nasdaq market makers are required to provide automatic executions. n132 However, ECNs and UTP exchanges are not required to provide automatic executions. n133

There are numerous variations on the types of orders that market participants can enter into the Nasdaq Market Center. As in other markets, orders may be market or limit orders. In addition, participants can enter "non-directed," "preferenced" or "directed orders." Non-directed orders, the most common type, are entered into the system for execution against the quotes or orders of quoting market participants. Preferenced orders are entered into the system and intended for a specific participant, but are only executed if that participant is at the inside market when the order is next in line for execution. Directed orders are intended for a particular participant and entered into the normal order display and execution system. n134 There are numerous other variations as well. For example, in November 2003, Nasdaq introduced a "pegged order," which is a non-directed limit order that is automatically adjusted to correspond to the inside market, and in January 2004 the Commission approved Nasdaq's establishment of an "Auto-Ex" order, which executes only against the quotes or orders of market participants who do not charge a separate quote-access fee. n135

In 2004, when Nasdaq dropped the SuperMontage terminology, it also introduced a single trading platform that combined the functionality of not only SuperMontage and CAES and other systems, but allowed trading of securities listed on other markets. n136

Nasdaq securities are divided into two separate subgroups. First, some Nasdaq securities are designated as National Market System securities ("Nasdaq/National Market Securities"). n137 Nasdaq/National Market Securities are securities that are listed on Nasdaq and that must satisfy criteria relating to trading volume and issuer financial strength which are more stringent than criteria for other Nasdaq securities. n138 As a general matter, Nasdaq/National Market Securities represent the most highly capitalized, most actively traded Nasdaq securities. n139 The second group of Nasdaq securities--Nasdaq Capital Market [formerly SmallCap] n140 Securities--are securities which are listed on Nasdaq, but are either ineligible for designation as Nasdaq/National Market Securities or have elected not to be so designated. n141 These securities, while sometimes actively traded, generally are less highly capitalized than Nasdaq/National Market Securities and less actively traded. n142

One important consequence of the Nasdaq System was an increase in OTC surveillance. n143 The Market Surveillance Section of the NASD monitors activity in all Nasdaq issues and relies heavily upon the daily computer analysis of all quotation changes and trading volume entered into the Nasdaq System. n144

[b] Listing Standards

As of December 31, 2003, there were 5,471 issues of stock and bonds listed on national securities exchanges. n145 Each exchange has its own initial listing and maintenance criteria. n146 The NYSE's requirements, the most stringent of all exchanges, specify, among other things, that the applicant must have:

- Either 2,000 holders of 100 shares or more; 2,200 total stockholders together with average monthly trading volume for the last six months of 100,000 shares; or 500 total shareholders together with average monthly trading volume of one million shares for the last twelve months. n147
- A minimum of 1,100,000 publicly-held shares with a market value of \$60 million for companies that

list at the time of their initial public offerings, and \$100 million for all other companies. n148

- Total pre-tax earnings of \$10 million in the aggregate for the last three fiscal years, together with a minimum of \$2 million in each of the two most recent fiscal years, and positive amounts in all three years; for companies with at least \$500 million in market capitalization and \$100 million in revenues during the last year, a total of \$25 million in operating cash flow for the past three years, if cash flow was positive in each year; or, for companies with at least \$750 million in market capitalization, revenues of \$75 million during the most recent fiscal year. n149

The NYSE has long had extensive corporate governance and similar requirements which issuers must follow in order for their securities to become and remain eligible for listing. n150 For example, issuers must follow rules regarding the dissemination of material information, the voting rights of shareholders, proxy solicitations, and similar matters. n151 However, in 2003 the exchange's corporate governance requirements were dramatically revised and expanded, primarily as the result of several high-profile corporate scandals. n152 In 2002, as the result of these scandals, the SEC's Chairman requested that the exchanges and Nasdaq review their listing standards with a focus on corporate governance. n153 Before the NYSE had filed the first proposal to revise its listing standards, Congress adopted the Sarbanes-Oxley Act of 2002, a sweeping corporate reform measure which, among other things, prescribed, in general terms, corporate governance listing standards to be adopted by the exchanges and Nasdaq. n154 The drafters of the Sarbanes-Oxley Act chose to direct the Commission to adopt more specific rules governing the listing standards as one means of reforming corporate governance practices. n155 As a result, the Commission adopted Rule 10A-3 in April 2003. n156 Rule 10A-3 specifies requirements that listing standards of the exchanges must include, at a minimum, and these bodies are expected to adopt requirements which are even more specific and perhaps more strict. n157

The NYSE's significant revision of its listing standards was approved by the SEC in November 2003. n158 The revised standards require, among other things, that:

- a majority of the members of issuers' boards of directors be independent;
- directors, to be considered independent, satisfy a more stringent definition of "independence" designed to exclude directors who, among other things, have been employed with the issuer or its outside auditor in the past three years or have received material compensation other than directors' fees, or whose family members have had specified relationships with the issuer;
- independent board members meet in "executive sessions" without management;
- each issuer have a nominating/corporate governance committee composed entirely of independent directors;
- each issuer have a compensation committee composed entirely of independent directors;
- the compensation of each issuer's CEO be established by either the compensation committee or all independent directors of the board and be based on the CEO's performance;
- the responsibilities of each issuer's audit, corporate governance/nominating and compensation committees be specified in a written charter;

1-2 Federal Securities Exchange Act of 1934 § 2.02

- each issuer have an internal audit function;
- each issuer adopt corporate governance guidelines and make them publicly available;
- each issuer adopt a code of business conduct for directors, officers and employees; and
- the CEO of each issuer annually certify that he or she is not aware of any violation by the issuer of the exchange's corporate governance listing standards. n159

Prior to Nasdaq's registration as a national securities exchange in January 2006, it had established criteria that all securities were required to satisfy in order to be included on the market, as well as financial and trading criteria which differ depending on whether the issuer was seeking inclusion in the Nasdaq National Market or the SmallCap Market. Once Nasdaq became registered as a national securities exchange, these criteria became listing standards.

To be listed on Nasdaq, an issuer's securities must be registered under Section 12(b) of the Exchange Act. n160 The following are the financial and trading criteria for listing in the Nasdaq SmallCap Market: n161

	Initial	Continued
Market Makers:	3	2
Stockholders' Equity/Market Capitalization/Income	(1) Stockholders' Equity of \$5 million; (2) Market capitalization of \$50 million; or (3) net income from continuing operations of \$750,000 in most recently completed fiscal year or two of three most recently completed fiscal years.	(1) Stockholders' Equity of \$2.5 million; (2) Market Capitalization of \$35 million; or (3) net income from continuing operations of \$500,000 in most recently completed fiscal year or two of three most recently completed fiscal years.
Operating History:	At least two years or market capitalization of \$50 million	--
Minimum Bid Price per Share n162	\$4	\$1
Round Lot Shareholders n163	300 for common stock, 100 for preferred stock and secondary classes of common stock	
Shares (Public Float) n164	1,000,000 for common stock, 200,000 for preferred stock and secondary classes of common stock	500,000 for common stock, 100,000 for preferred stock and secondary classes of common stock
Market Value of Public Float	\$5 million for common stock, \$2 million for preferred stock and secondary classes of common stock	\$ 1 million for common stock, \$500,000 for preferred stock and secondary classes of common stock

An issuer's securities are eligible for initial inclusion in the Nasdaq National Market if the issuer satisfies one of three alternative entry standards, which are summarized below: n165

1-2 Federal Securities Exchange Act of 1934 § 2.02

	ENTRY STANDARD 1	ENTRY STANDARD 2	ENTRY STANDARD 3
Market Makers:	3	3	4
Pre-tax income	\$1,00,000 in most recently completed fiscal year or two of three most recently completed fiscal years	--	--
Stockholders' Equity	\$15 million	\$30 million	--
Market Value of Listed Securities/Assets and Revenue	--	--	Market Value of Listed Securities of \$75 million or total assets and total revenue of \$75 million each for most recently completed fiscal year or two of last three most recently completed fiscal years
Minimum Bid per Share	\$5	\$5	\$5
Round Lot Shareholders	400	400	400
Shares (Public Float)	1,100,000	1,100,000	1,100,000
Market Value of Public Float	\$8 million	\$18 million	\$20 million
Operating History	--	2 Years	--

To maintain its inclusion in the Nasdaq National Market, an issuer must satisfy one of two alternative maintenance standards, which are summarized below n166

	MAINTENANCE STANDARD 1	MAINTENANCE STANDARD 2
Market Makers:	2	4
Stockholders' Equity	\$10 million	--
Market Value of Listed Securities/Assets and Revenue	--	Market value of listed securities of \$50 million or total assets of \$50 million for most recently completed fiscal year or two of last three most recently com-

1-2 Federal Securities Exchange Act of 1934 § 2.02

		pleted fiscal years
Minimum Bid Price per Shares	\$1	\$1
Round Lot Shareholders	400	400
Shares (Public Float)	750,000	1,100,000
Market Value of Public Float	\$5 million	\$15 million

For its securities to be eligible for listing in either segment of Nasdaq, an issuer must satisfy corporate governance and similar requirements. n167 Like the corporate governance standards of the NYSE, Nasdaq's standards were revised extensively in 2003, primarily as the result of a corporate reform movement prompted by several high-profile corporate failures. Nasdaq's revised standards require, among other things, that:

- a majority of the members of issuers' boards of directors be independent;
- directors, to be considered independent, satisfy a more stringent definition of "independence" designed to exclude directors who, among other things, have been employed with the issuer in the past three years or have received material compensation other than directors fees, who have been employed by the issuer's outside auditor in the last three years, or whose family members have had specified relationships with the issuer;
- independent board members meet in "executive sessions" without management;
- the compensation of each issuer's CEO be established by either the compensation committee or all independent directors of the board;
- nominees for director positions be made by either a nominating committee composed of independent directors or a majority of independent directors;
- each issuer have a written charter addressing the process for nominating directors;
- each issuer's audit committee have a formal written charter;
- each issuer have a code of conduct applicable to all directors, officers and employees;
- issuers publicly disclose if they have received an audit opinion containing a going concern qualification; and
- each issuer review related party transactions for conflicts of interest on an ongoing basis, and that related party transactions be approved by the issuer's audit committee or a majority of its independent directors. n168

A security is subject to removal from Nasdaq if it does not satisfy the criteria summarized above. In addition, a security may be subject to removal from the market if:

- it is the subject of a suspension by the SEC from trading;
- it fails to disclose promptly to the public material information; or

- it fails to disclose promptly material information to any state or federal agency requiring the disclosure.

Exchanges list and trade a large number of derivative products, typically with returns tied to the return of a specified index. These products may be in the form of options, warrants, index funds shares or equity-linked notes. n169 The listing and trading of these products pose special problems because each product with a different structure has historically been considered a new type of security, requiring the exchange listing and trading the product to adopt listing standards for the particular type of product. Adopting new listing standards, in contrast to the listing of a new security covered by existing listing standards, is considered a rule change subject to Commission approval. The requirement that a new rule filing be made for each new product became a major obstacle to the trading of derivative products when their trading began to accelerate in the mid 1990s. Accordingly, in 1998 the Commission amended Rule 19b-4 to make it easier for exchanges to trade and list new derivative products. n170 Rule 19b-4(e), which was added by the 1998 amendments, allows exchanges to adopt "generic" listing standards for a particular product class, so that future products falling within that class do not require rule filings. n171

Exchange rules governing derivatives products typically combine listing and trading standards, and the listing standards are therefore generally not located with the listing standards for more conventional securities. n172 Within the rules governing derivatives products are the "generic" listing standards that a new product must satisfy to avoid a rule filing under Rule 19b-4, typically focused on the criteria that the index underlying the derivatives products. n173 The generic listing criteria must be approved by the Commission. n174 If the underlying index for a new product does not satisfy the generic listing criteria, the exchange seeking to list and trade the product must make a filing under Rule 19b-4. n175

[c] Unlisted Trading Privileges

A security may not be traded on a national securities exchange unless it is registered with, or "listed," on the exchange, or if it has been extended unlisted trading privileges ("UTP") by that exchange. n176 Few OTC securities were granted unlisted trading privileges before 1975, either because the SEC did not have the power to approve the extension of such privileges or because its power was not exercised. The SEC was originally given the authority to approve extensions of UTP in OTC stocks with the 1936 amendments to the Exchange Act, but this authority was limited to stocks subject to disclosure requirements that were "substantially equivalent" to those for listed companies. n177 However, OTC stocks were not subject to periodic reporting requirements until 1964, and from 1936 to 1964 the Commission rarely granted UTP for OTC stocks. n178 When the Exchange Act was amended in 1964 to extend the periodic reporting requirements to OTC stocks, Congress removed the Commission's power to grant UTP for OTC stocks. n179 This authority was reinstated with the 1975 amendments to the Exchange Act. n180

The 1975 amendments to the Exchange Act permitted exchanges to extend UTP to OTC securities provided that certain standards were satisfied. n181 From 1975 to 1985, the SEC, awaiting progress on the development of the national market system, generally refrained from granting exchanges UTP in OTC stocks. n182 In 1985, the SEC announced a new policy, allowing each exchange to trade OTC securities pursuant to UTP, subject to an application, notice, and approval process. n183 In each of the following ten years, the SEC processed hundreds of exchange applications for UTP, but only in extremely rare situations did it receive any comments on an application. n184 The Unlisted Trading Privileges Act of 1994 amended the Exchange Act to remove this application and notice process requirement for exchange-listed securities, in effect allowing exchanges to trade via UTP any security listed on another exchange without further SEC approval. n185 However the Exchange Act still prohibited the extension of UTP in OTC securities except pursuant to a rule, regulation, or order of the SEC. n186 This requirement was, and continues to be, fulfilled by periodic SEC approval orders granting temporary extensions to the Nasdaq UTP Plan, which governs the collection, consolidation and dissemination of quotation and transaction information in Nasdaq securities listed on an exchange or traded on an exchange pursuant to a grant of UTP, subject to the conditions of that program as they are updated from time to time. n187 Accordingly, there is currently no need for exchanges to apply to the SEC on a case-by-case basis to

approve the extension of UTP to a security, and there is no requirement that a security granted UTP by an exchange must fulfill that exchange's listing standards to be traded pursuant to UTP, so long as the stock is listed on another national security exchange or is an eligible security under the Nasdaq UTP Plan. n188

[2] Trading in and Regulation of the OTC Market

The trading which takes place away from exchanges is known as the "over-the-counter," or "OTC," market. n189 From 1971 through 2005, the OTC market was divisible into two rather distinct segments: the traditional OTC market and the Nasdaq Stock Market. However, in January 2006, Nasdaq became registered as a national securities exchange, leaving only the traditional OTC market. n190

The traditional OTC market encompasses off-exchange trading of securities including corporate stocks, corporate and government bonds, debentures, and mutual funds. The OTC market is a way of doing business by negotiation. n191 Traditionally, in the OTC market, dealers, acting as principals, buy from and sell to investors or other dealers at an undisclosed profit. n192 More the OTC market has become predominantly an agency market. n193

In a dealer market, historically there was little or no interaction between customer orders: each order was executed against a market-maker's inventory. n194 Market-makers n195 in a dealer market post prices at which they are willing to buy or sell a security. Interested investors or their brokers then contact the market maker to execute a trade for that security at the market maker's posted price. The price is determined through competition among market makers for incoming orders, not through the meeting of buy and sell interest as in an auction market. Since there is no central "book" of orders, there is no way a public order to buy a security at a price can meet directly with a public order to sell the same security at the same price.

There are no "seats" in the OTC market. n196 The buying, selling, and trading taking place in the OTC market is conducted by brokers and dealers, n197 most of whom are members of the NASD. n198 Under Section 15(b)(8) of the Exchange Act, every registered broker or dealer who engages in transactions in securities, other than commercial paper, bankers' acceptances or commercial bills, must become a member of a registered securities association unless the broker or dealer effects transactions in securities solely on a national securities exchange of which it is a member. Thus, every broker-dealer must be a member of, and therefore subject to the regulation and oversight of, a self-regulatory organization, either a securities association or an exchange. n199 FINRA (formerly the NASD) is registered with the Commission pursuant to Section 15A of the Exchange Act as a national securities association and is the only association so registered. n200

NASD members are classified as either wholesale dealers or retail firms. The wholesale dealer, often referred to as a "market maker," buys securities from and sells securities to professionals who act for themselves or on behalf of customers. n201 The retail firm is engaged in selling securities to its customers and buying or finding buyers when its customers wish to sell. n202 A broker or dealer doing business in the OTC market may also be a stock exchange member. Furthermore, most stock exchange member firms maintain OTC departments.

Issuers of OTC securities that are not traded on an exchange must be registered under Section 12(g) n203 and are subject to the same reporting, n204 proxy, n205 and insider trading n206 provisions as issuers whose securities are traded on a national exchange.

Historically, obtaining quotations in the OTC market was difficult. n207 Using a combination of telephone calls, teletype, and statistical charts published daily by the National Quotation Bureau *i.e.*, pink sheets, n208 the broker determined the price of a security. However, the pink sheets did not provide real-time quotation information, and telephone calls were a cumbersome and inefficient method of obtaining such information. n209

Today, real-time quotations are available on the OTC Bulletin Board, which is a computerized communications systems

operated by, but not part of, Nasdaq, linking all dealer members. Even "pink sheet" quotations are now available in real time. n210

The SEC conditioned approval of Nasdaq's SuperMontage system n211 on, among other things, the NASD's providing an alternative quotation medium for market participants who did not wish to use Supermontage. n212 Accordingly, the NASD established the Alternative Display Facility for these participants. n213 The Alternative Display Facility was originally established for a pilot period of nine months, beginning July 24, 2002. n214 On April 10, 2003, the SEC approved an extension of the pilot through January 26, 2004, and on January 27, 2004 another extension through October 26, 2004. n215 The Alternative Display Facility is a means only of displaying quotes and reporting transactions; it does not include an order execution facility. n216 Participants using the facility are responsible for establishing their own order linkages. n217 The system is similar to the Nasdaq system before Nasdaq began implementing automatic order execution features, except that ECNs are recognized, along with market makers, as a type of participant. Market participants must allow other participants to access their quotes and orders electronically, but may charge access fees. n218 The NASD has established numerous other rules for the Alternative Display Facility governing matters such as minimum times for accepting or declining an order, trade reporting and withdrawal of quotations. n219 Use of the ADF, which was never widespread, declined to the point where by October 2005 it was used in connection with only 15,000 trades per day. n220 On January 26, 2007, the SEC granted approval of a proposed rule change to operate ADR on a permanent basis. Securities Exchange Act. Release No. 34-55181 (Jan. 26, 2007). n221

The Federal Reserve Board establishes guidelines for the margin eligibility of OTC securities. To be eligible for margin, OTC securities must meet the following minimum requirements: n222

- be registered pursuant to Exchange Act Section 12(g);
- have four market makers;
- have either 1,200 public holders of record or an average daily trading volume of 500 shares;
- be of an issuer that has been in existence for three years;
- have been publicly traded for six months;
- have daily quotes for bid and asked prices that are continuously available to the public;
- be of an issuer that has 400,000 publicly held shares;
- have an average bid price per share of \$5, and
- be of an issuer that has \$4 million of capital, surplus, and undivided profits. n223

[3] Alternative Trading Systems

Alternative trading systems ("ATSs") are systems which bring securities buyers and sellers together, like exchanges, but typically require less participation of a party acting as a principal such as a specialist or market maker. Regulation of participants by ATSs is limited to trading conduct, and ATSs in turn are less heavily regulated by the SEC than are exchanges. n224 An electronic communications network ("ECN") is a type of electronic ATS that collects buy and sell orders for securities and allows the orders to be executed against each other. n225 ECNs do not generally "make markets" in the sense of acting as a principal on trades; instead, they act purely as agents by bringing buyers and sellers together. ECNs place limitations on the parties who may subscribe to their system, and typically charge an access fee. ECNs display subscriber orders, typically to subscribers but in some cases to the general public. n226

ECNs have existed since 1969. n227 They did not begin to flourish, however, until the mid to late 1990s, aided by the development of the Internet and other communications technologies and the SEC's adoption of its Order Handling Rules in September 1996. n228 The Order Handling Rules were adopted partially to address perceived problems created by the rise of ECNs, but actually facilitated the growth of ECNs by sanctioning the role of ECNs in order executions, subject only to the condition that they open their book of orders to investors beyond their subscribers.

In June 2000, there were nine independent ECNs operating in the United States--Instinet, Island, Bloomberg Tradebook, Archipelago, REDIBook, Brut, Attain, NexTrade, Market XT and GFI Securities. n229 One by one, however, almost all either merged with one another or were acquired by Nasdaq or the NYSE. Instinet and Island, two of the larger ECNs, merged in September 2002. n230 This merger created the INET ECN. n231 Archipelago purchased REDIBook in 2002. n232 MarketXT filed for bankruptcy in June 2005. n233 In October 2005, Knight Capital Group acquired Attain and renamed it Direct Edge. n234 In December 2005, Nasdaq purchased Instinet Group Incorporated, the owner of the INET ECN. n235 As of June 2006, the following entities operated as ECNs n236: Bloomberg, Tradebook, Direct Edge, Track, NexTrade, BATS ECN n237, and OnTrade ECN n238. In contrast to the Archipelago and Inet ECNs, which had each garnered approximately 25 percent of the volume of trading in Nasdaq stocks by 2004, none of the remaining ECNs had a significant market share in Nasdaq stocks. n239

[4] National Market System

During 1963 through 1971, the Commission conducted three major studies of the securities industry. n240 These provided an analytical basis upon which the Commission could determine whether the secondary securities markets were operating effectively, efficiently, and equitably. n241 Following these studies, in 1971 the Commission conducted hearings into the structure of the securities markets. n242 Following these hearings, the Commission called for a revolutionary integration of the securities markets into a "central market system" to achieve various policy objectives:

1. "To make the relationships in the securities markets and their operatives as simple, as direct, and as open as [the SEC] can."
2. "To adapt the securities markets to growing institutionalization, with its increased tempo and magnitude of transactions, while maintaining the confidence and the participation of the individual investor."
3. To make "the professional service available to investors as efficient and economic as possible without diluting standards of service and responsibilities." n243

By 1975, the Commission had received final reports from three special advisory committees, n244 held extensive public hearings on the proposed "central market system," n245 and adopted or proposed the adoption of several significant new rules affecting directly the organization and operation of the secondary securities markets. n246

The Commission's enthusiasm and vigor was mirrored in both Houses of Congress as members sponsored proposed legislation and Congressional subcommittees held extensive hearings into the securities industry. n247 These efforts culminated with the 1975 Amendments which mandated, among other things, that the Commission "facilitate" the establishment of a "national market system" for securities. n248 The objectives of the national market system are enumerated in Section 11A of the Exchange Act which provides in relevant part:

It is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure

- (i) economically efficient execution of securities transactions;

(ii) fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets;

(iii) the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities;

(iv) the practicability of brokers executing investors' orders in the best market; and

(v) an opportunity consistent with the provisions of clauses (i) and (iv) of this subparagraph, for investors' orders to be executed without the participation of a dealer." n249

Congress determined that these objectives could be best achieved by the integration of all secondary securities markets, thereby permitting access to these markets by all qualified broker-dealers and eliminating artificial impediments to dealing in the best available markets. n250

Since the 1975 Amendments, the Commission has worked to eliminate market fragmentation and to integrate the various securities markets to create a national market system. n251 The exchanges and the NASD have combined efforts to develop intermarket communications systems to facilitate market linkage and order routing. n252 The Commission has required the creation of a composite quotation system to improve the quality and reliability of quotation information disseminated by securities information vendors. n253 The Commission also has mandated the development of SRO requirements to ensure that public limit orders n254 obtain priority nationwide over the execution of any order by a broker or dealer at the same or an inferior price. n255

All exchange off-board trading restrictions have been eliminated, through a combination of Commission rulemaking and pressure. n256 Members of an exchange are now permitted to effect OTC agency transactions in securities listed or admitted to unlisted trading privileges on an exchange with any other person not also represented as agent by that member. n257 The Commission has stated that the elimination of these restrictions has furthered the purposes of the Exchange Act by enhancing the practicability of brokers executing investors' orders in the best market and improving customers' ability to achieve the most economically efficient execution of their securities transaction. n258

[5] The Role of the Securities and Exchange Commission

As self-regulatory organizations, the national securities exchanges and FINRA are granted special rulemaking and enforcement responsibilities under the Exchange Act to assist the SEC in regulating the securities industry. n259 Self-regulatory organizations are responsible for establishing, reviewing and enforcing standards of conduct for their members and, if they provide trading facilities, for fair and orderly operation of those facilities. n260 In practical terms, this means the self-regulatory organizations must make rules governing sales practices, trading and business practices, member financial responsibility and enforcement of those rules and the securities laws and regulations. n261

The Commission's mandate is to oversee the self-regulators and, when necessary, to compel remedial industry action. Among other things, the Commission has the authority to

1. Establish industry-wide standards governing commission rates; n262
2. Allocate duties and responsibilities among self-regulators to avoid duplication of expenses and to promote industry cooperation; n263
3. Review disciplinary proceedings; n264
4. Approve, disapprove or modify exchange and NASD rules; n265

5. Adopt rules and promulgate regulations as well as amend, delete, or abrogate rules and regulations of an SRO to protect investors and assure a fair, orderly market; n266 and

6. Commence administrative and civil proceedings to discipline SROs for failure to fulfill their statutory duties and responsibilities. n267

The Commission functions as an independent regulatory agency accountable to Congress and the President. n268 Accordingly, while many of its orders and final agency actions are reviewable by a federal court, n269 the Commission largely exercises its independent judgment in the performance of its statutory mandate. n270

FOOTNOTES:

(n1)Footnote 1. The term "secondary trading of securities" refers to purchases and resales of securities after the initial or primary distribution. For a discussion of primary securities distributions, *see* SEC Report of the Special Study of the Securities Markets of the Securities and Exchange Commission, House Document No. 95, Pt. I, p. 495 (1963) (hereinafter cited as "Special Study").

<http://www.sec.gov/about.shtml>.

(n14)Footnote 14. In January 1994, the Commission's Division of Market Regulation issued a report entitled "Market 2000: An Examination of Current Equity Market Developments" (hereinafter cited as "Market 2000 Report") announcing the results of a year and a half study of the overall structure of the U.S. equity markets. See Sec. Exch. Act Rel. No. 30920 (July 14, 1992), 57 FR 32589 (hereinafter cited as "Concept Release"). Citing dramatic changes in the markets since 1975 in response to advances in technology, new product developments, and global economic expansion, the Division determined that it was appropriate to raise questions regarding whether the existing regulatory framework had kept pace with market developments. During the review, the Division gathered data on equity trading and analyzed comment letters submitted in response to the Concept Release. Concurrently with the study, Congress held hearings on many of the issues addressed in the study: Oversight Hearing on the Future of the Stock Market focusing on the National Market System Before the Subcomm. on Telecommunications and Finance of the House Comm. on Energy and Commerce, 103d Cong., 1st Sess. (Apr. 14 1993); Oversight Hearing on the Future of the Stock Market focusing on Inducements for Order Flow Before the Subcomm. on Telecommunications and Finance of the House Comm. on Energy and Commerce, 103d Cong., 1st Sess. (May 13, 1993); Oversight Hearing on the Future of the Stock Market focusing on Proprietary Trading Systems Before the Subcomm. on Telecommunications and Finance of the House Comm. on Energy and Commerce, 103d Cong., 1st Sess. (May 26, 1993); Oversight Hearing on the Future of the Stock Market focusing on Soft Dollar Practices Before the Subcomm. on Telecommunications and Finance of the House Comm. on Energy and Commerce, 103d Cong., 1st Sess. (July 13, 1993)). In addition, the U.S. General Accounting Office ("GAO") released a report on market structure (GAO, SEC Actions Needed to Address Market Fragmentation Issues (1993)): Oversight Hearing on the Future of the Stock Market focusing on the Results of a GAO Study on Market Fragmentation Before the Subcomm. on Telecommunications and Finance of the House Comm. on Energy and Commerce, 103d Cong., 1st Sess. (June 29, 1993).

In the Market 2000 report, the Division stated:

The Division's basic finding is that today's equity markets are operating efficiently within the existing regulatory structure. Record amounts of trading activity are processed smoothly and efficiently. The equity markets continue to perform effectively their primary function of raising capital for public corporations. Investors have a wide range of alternative trading mechanisms from which to select. Although trading of major U.S. equities has become dispersed among the various markets and participants, this development has not impaired market quality. Accordingly, the Division does not believe that a major revision of equity market regulation is needed. The Commission should, however, concentrate on the improvements that are needed to make the markets work better for investors and to make competition work better for the markets. The Division believes that improvements are possible in four areas.

The first area involves the *fair treatment of investors*. The broadest possible investor participation, both retail and institutional, is vital to the health of the market. If the market structure works to the disadvantage of customers, they ultimately will lose confidence in the integrity and fairness of the market. To protect customers, professionals should seek to secure the best prices for their customers and should disclose relationships that could interfere with the customers' interests. Market practices such as payment for order flow, soft dollar arrangements, and certain order handling procedures raise concerns as to whether investors are being treated fairly.

Second, *market information* should be disclosed in a timely and comprehensive manner. Information on quotations, trading volume, and trading prices is essential to the effective operations of the markets. Selective or partial disclosure of information impairs the secondary market pricing mechanism, weakens the ability of markets to compete, and prevents customers from monitoring the quality of their executions

...

1-2 Federal Securities Exchange Act of 1934 § 2.02

Third, *fair competition* among markets and market participants should be promoted ... To promote fair competition as well as investor protection, the Commission must ensure that the regulatory responsibilities of the various market centers are rationally allocated without stifling the ability of alternative markets and services to emerge. In some instances, this goal will require more vigorous oversight of new trading systems. In other instances, this goal will justify different regulatory guidelines for the organized markets.

Fourth, *open market access* needs to be expanded. Restrictions on where the users of the markets can transact business limits the ability of competition to provide ... better markets and services. Several exchange rules and proposals act to restrict market access. These restrictions need to be examined to determine if they serve valid regulatory purposes.

The Division recommends specific action in each of these areas. The most significant recommendations involve Commission rulemakings on payment for order flow and soft dollar practices; proposals to narrow spreads and expand transaction reporting; and increased oversight of automated trading systems and third market makers.

(n15)Footnote 15. Section 12(a) of the Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F provides that it is unlawful for "any member, broker, or dealer to effect any transaction in any security on a national securities exchange unless a registration is effective as to such security." Section 12(b) specifies the procedures for registration of securities on a national stock exchange. In addition, each exchange has its own rules for registration of securities. The registration requirements of the NYSE are summarized in § 2.01[1][b] *infra*, and are discussed in more detail in § 4.01 *infra*. A security that has been registered for trading is said to be "listed" on the exchange for which the registration is effective.

(n16)Footnote 16. The Exchange Act does not directly require securities to be registered unless listed on a national securities exchange. If an issuer's securities are not listed on an exchange, they must still be registered with the Commission if the issuer has over 500 shareholders and \$10 million in total assets. See Section 12(g)(1); Rule 12g-1. While it is conceivable that an issuer could have not been subject to this registration requirement and still have met the financial criteria for inclusion on Nasdaq, before its exchange registration Nasdaq required, with limited exceptions, securities to be registered with the Commission to be considered for inclusion in the market. NASD Manual, Rule 4310(a)(1).

(n17)Footnote 17. The trading of listed securities away from exchanges is known as the "third market." Third market trading is discussed in § 2.03[2][c] *infra*.

(n18)Footnote 18. Unlisted trading privileges are summarized in § 2.01[1][c] *infra*, and are discussed in more detail in § 4.01[5] *infra*.

(n19)Footnote 19. Section 3(a)(26) defines a "self-regulatory organization" to include every national securities exchange and securities association which is registered with the Securities and Exchange Commission. Accordingly, registered exchanges and associations have statutory responsibilities to enforce both the federal securities laws as well as their own rules and regulations. For a more detailed discussion of the regulatory responsibilities of self-regulatory organizations, see § 2.03 *infra*.

(n20)Footnote 20. The trading procedures of stock exchanges are discussed in § 2.01[1][a] *infra*, and the trading procedures of the OTC market are discussed in § 2.01[2] *infra*.

(n21)Footnote 21. Report by the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce, House of Representatives, H.R. 95-134, 94th Congress, 2d Sess., 18,-21 reprinted in the Securities Primary Law Sourcebook, Volume C, Section I of the 1934 Act. See also Special Study Part I, *supra*, at pp. 2-5.

(n22)Footnote 22. House Report No. 94-123, 94th Congress, 1st Sess., 48 (1975) (hereinafter cited as "House Report"), reprinted in the Securities Primary Law Sourcebook, Vol. C, Section I.

(n23)Footnote 23. House Report; *See also* § 2.03 *infra*.

(n24)Footnote 24. Section 6 provides, in part, that an exchange "shall not be registered as a national securities exchange unless the Commission determines that-(1) such exchange is so organized and it has the capacity to be able to enforce compliance by its members and persons associated as members, with the provisions of this title, the rules and regulations thereunder, and the rules of the exchange." A more detailed discussion of the specific responsibilities of national securities exchanges can be found in §§ 2.03[3] and [4] *infra*. While it is unlikely that the self-regulatory system will be eliminated in the foreseeable future, in the 1990s and early 21st century questions arose as to the efficacy of the system, in light of the failures of markets, particularly Nasdaq and the NYSE, to police themselves. Accordingly, there have been calls for a modification of the system, such as a requirement that the regulatory function for each market be separated from the operation of the market itself. *See* § 2.05 *infra*.

(n25)Footnote 25. As restated by Congress in 1975, the pattern of self-regulation mandated by the Exchange Act "calls upon industry organizations to exercise delegated governmental powers in order to enforce at their own initiative compliance by members of the industry with both legal requirements laid down in the Securities Exchange Act and ethical standards which go beyond those requirements. The SEC is charged with supervising the exercise of this regulatory power in order to assure that it is used effectively to fulfill the responsibilities assigned to regulatory organizations, and that it is not used in a manner inimical to the public interest or unfair to private interest." House Report, *supra*, at 48.

(n26)Footnote 26. **15 U.S.C. § 78f.**

(n27)Footnote 27. Exchange registration under Section 6 is discussed in § 2.02 *infra*.

(n28)Footnote 28. Section 6(b)(6). For a discussion of exchange disciplinary action, *see* § 2.03[4] *infra*.

(n29)Footnote 29. Section 6(b)(7) and (d). Membership on a national securities exchange is discussed in § 2.03[2] *infra*.

(n30)Footnote 30. "When the [Exchange] Act was adopted in 1934, it contained a very brief section dealing with the national securities exchanges, and did not treat at all the subject of the over-the-counter market." House Report, *supra*, at 59. Transactions effected in the OTC market were subject, however, to various provisions of the Exchange Act, including the antifraud provisions. *See* § 2.02 n.1 *infra*.

(n31)Footnote 31. **15 U.S.C. § 78-3.** The criteria that an association of brokers and dealers must satisfy to register as a securities association or affiliated securities association with the SEC are discussed in § 2.02[2] *infra*.

Senate Committee on Banking, Housing and Urban Affairs, 94th Cong., 1st Sess., Summary of Principal Provisions of Securities Acts Amendments of 1975, S. 249 (Comm. Print 1975).

(n36)Footnote 36. The 1975 Amendments, discussed in § 1.01[d] *supra*, added a new Section 11A to the Exchange Act. Section 11A provides, in part, that the Commission is directed "having due regard for the public interest, the protection of investors and the maintenance of fair and orderly markets, to use its authority under this title to facilitate the establishment of the national market system for securities."

To carry out the mandate of Section 11A, the Commission was authorized "to create one or more advisory committees pursuant to the Federal Advisory Committee Act" and "by rule or order, to authorize or require self-regulatory organizations to act jointly with respect to matters as to which they share authority under this title in planning, developing, operating, or regulating a national market system (or a subsystem thereof) or one or more facilities thereof."

For a discussion of the legislative intent underlying Section 11A, see Conference Report to the Securities Act Amendments of 1975, H. Rep. No. 94-229, Cong., 1st Sess., 91 (1975) (hereinafter cited as "Conference Report"), reprinted in Securities Primary Law Sourcebook, Vol. C, Section I and House Report, *supra*, at 49-57.

(n37)Footnote 37. House Report, *supra*, at 51.

(n38)Footnote 38. House Report, *supra*, at 51.

(n39)Footnote 39. The 1975 Amendments were preceded by "the most searching reexamination of the competitive, statutory and economic issues facing the securities markets, the securities industry, and, of course, the public investors, since the 1930's." Conference Report, *supra*, at p. 91. In recommending adoption of this legislation, the Conference Committee further concluded that the:

securities markets of the United States are indispensable to the growth and health of this country's

and the world's economy. In order to raise the enormous sums of investment capital that will be needed in the years ahead and to ensure that capital is properly allocated among the competing uses, these markets must continue to operate fairly and efficiently. The increasing tempo and magnitude of the changes that are occurring in our domestic and national economy make it clear that the securities markets are due to be tested as never before. Unless these markets adapt and respond to the demands placed upon them, there is a danger that America will lose ground as an international financial center and that the economic, financial and commercial interests of the nation will suffer.

The basic goals of the Exchange Act remain salutary and unchallenged: To provide fair and honest mechanisms for the pricing of securities, to assure that dealing in securities is fair and without undue preference or advantages among investors, to ensure that securities can be purchased and sold at economically efficient transaction costs, and to provide, to the maximum degree practicable, markets that are open and orderly.

Conference Report, *supra*, at 91-92. For a summary of the four-year battle to enact the 1975 Amendments, see House Report, *supra*, at pp. 45-47.

(n40)Footnote 40. House Report, *supra*, at 48.

(n41)Footnote 41. The term "self-regulatory organization" had not been used before the 1975 Amendments, as exchanges and securities associations were subject to separate regulatory schemes. The 1975 Amendments in large measure combined these two schemes into one. See S. Rep. No. 94-75, 94[th] Cong., 1[st] Sess., 2 (1975), reprinted in the Securities Primary Law Sourcebook, Vol. C, Section I (hereinafter cited as "Senate Report").

Section 19 grants to the Commission the authority to regulate self-regulatory organizations. The Commission's oversight function is to assure that the self-regulatory organizations are enforcing applicable legal and ethical standards, to assure fair dealings in securities, to protect investors, and to establish over-riding standards of trading that will promote fair orderly markets. Act of June 4, 1975, P.L. 94-29, 89 Stat. 97. The 1975 Amendments are Senate Bill 249, as modified by the Conference Committee in lieu of House Bill, H.R. 4111.

S. 249 would significantly amend the provisions of the Exchange Act dealing with the powers of the self-regulatory organizations and the oversight authority of the SEC with respect to these organizations. The Committee [Senate Committee on Banking, Housing, and Urban Affairs] believes that self-regulation should be preserved in the securities industry, but it also believes that the self-regulatory organizations must display a greater responsiveness to their statutory obligations and to the need to coordinate their functions and activities. In the new regulatory environment created by this bill, self-regulation would be continued, but the SEC would be expected to play a much larger role than it has in the past to ensure that there is no gap between self-regulatory performance and regulatory need and, when appropriate, to provide leadership for the development of a more coherent and rational regulatory structure to correspond to and to police effectively the new national market system.

Senate Report, *supra*.

(n42)Footnote 42. House Report, *supra*, at 48.

(n43)Footnote 43. The 1975 Amendments provide the Commission with "certain oversight powers with respect to exchanges which are absent from the present statute but which have been a part of the regulatory pattern with respect to registered securities associations such as the NASD. Thus, the Commission will for the first time be in a position to disapprove changes in an exchange's body of rules. And the Commission may, upon its own motion, review disciplinary

action taken by the exchange against one of its members as a means of assuring an observance of fair procedures and a coherent, and more uniform, imposition of sanctions for prohibitive conduct." House Report, *supra*, at 49.

(n44)Footnote 44. "The securities industry regulatory organizations, it should be emphasized, are intended to be subject to the SEC's control and have no governmentally derived authority to act independently of SEC oversight." House Report, *supra*, at 48.

(n45)Footnote 45. The years since the enactment of the 1975 Amendments have seen the securities industry, prodded by the Commission, move toward the Congressional goal of a national market system. Notably, the development of the Intermarket Trading System (ITS) has helped further the Congressional objective of "the linking of all markets for qualified securities through communication and other data processing facilities." Section 11A(a)(1)(D). The ITS is discussed in more detail in § 2.04[2][b][i][A], *infra*.

The Commission has also, by rule, mandated the development of a composite quotation system to improve the dissemination of price information to brokers and public investors throughout the country. Sec. Exch. Act Rel. No. 14416, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,502 (Jan. 26, 1978). This composite system, by providing more information, allows brokers to choose among the competing market centers for the most favorable execution of their customers' orders. The composite quotation system is discussed in more detail in § 2.04[2][c], *infra*. The Commission, in an effort to facilitate the nationwide disclosure of market information in a fair and useful form, has also adopted several rules under Section 11. These rules govern the collection and dissemination of transaction information, the manner in which transactions, quotations, and market information are displayed by vendors of securities information.

Sec. Exch. Act Rels. No. 16589 (Feb. 19, 1980) and No. 16590 (Feb. 19, 1980). Collection, dissemination, and display of transaction reports, last sale data, and quotation information is discussed in § 2.04[2][d] *infra*.

The Commission in 1980 adopted Rule 19-3, which precludes the application of offboard trading restrictions to certain securities that became exchange listed after April 26, 1979. The rules also allow broker-dealers who are members of exchanges to deal as principals in an over-the-counter market in securities which became listed on exchanges after April 26, 1979. Offboard trading restrictions are discussed in more detail in § 2.03[2][c] *infra*.

In 1981 the Commission established criteria for the designation of certain OTC securities as national market system securities with the adoption of Rule 11Aa2-1. Sec. Exch. Act Rel. No. 17549 [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,826 (Feb. 17, 1981). Those OTC securities that met the criteria for designation as national market system securities were deemed to be qualified for trading in a national market system. Once designated as national market system securities, these OTC securities were subject to the rules regarding the dissemination of transaction and quotation information.

In 1987 the Commission amended Rule 11Aa2-1 [now replaced by Rule 600] to designate as national market system securities all OTC or exchange listed securities for which transactions are reported pursuant to an effective transaction reporting plan approved by the Commission. National market system securities and the criteria for designation as such are discussed in more detail in § 2.04[2][a] *infra*. In 1996 the SEC implemented Order Handling Rules which govern the display of customer limit orders and the use of Electronic Communications Networks. See Sec. Exch. Act Rel. No. 37619A (Sept. 6, 1996). The Order Handling Rules are discussed in § 2.04[2][h] *infra*.

The developments discussed above represent a movement by the Commission and the securities industry toward a national market system. Congress, in enacting the 1975 Amendments, believed that the establishment of a national market system was essential to insure that our nation's capital markets continue to be the best in existence. Conference Report, *supra*, at 92-93. The 1975 Amendments charged the Commission with the clear responsibility to assure that the national market system developed and operated in accordance with congressional objectives. House Report, *supra*, at

50-51 n.180. A more detailed discussion of the 1975 Amendments' goals and objectives is found in § 2.04[1][b] *infra*.

(n46)Footnote 46. The status of the national market system is discussed in § 2.04 *infra*.

(n47)Footnote 47. See Sec. Exch. Rel. No. 43232 (Aug. 30, 2000).

(n48)Footnote 48. See *id*; Sec. Exch. Rel. No. 42360 (Jan. 28, 2000).

(n49)Footnote 49. See § 2.04[2][c][iii] *infra*.

(n50)Footnote 50. Sec. Exch. Act Rel. No. 51808, 2005 SEC LEXIS 1349 (June 9, 2005) (hereinafter cited as "Regulation NMS Adopting Release").

(n51)Footnote 51. The extension of trade-through protection to Nasdaq stocks is discussed in § 2.04[2][b][iii] *infra*. While at the time Regulation NMS was adopted the distinction between Nasdaq and exchange-listed stocks was important, it later became irrelevant when Nasdaq became registered as a national securities exchange. See Sec. Exch. Act. Rel. No. 53128 (Jan. 13, 2006).

(n52)Footnote 52. Access fees are discussed in § 2.04[2][c][ii] *infra*.

(n53)Footnote 53. Subpenny pricing is discussed in § 2.04[2][c][iii] *infra*.

(n54)Footnote 54. Allocation of market data revenues is discussed in § 2.04[2][f] *infra*.

(n55)Footnote 55. Under the terminology of the Exchange Act, any exchange which is registered with the SEC is a "national securities exchange." See Section 6(a). The Boston, Philadelphia, National, Chicago and Pacific (now NYSE Arca) exchanges are sometimes referred to as "regional exchanges." However, this terminology can be confusing, because of the conflict with the terminology used in the Exchange Act, and will not be used here.

(n56)Footnote 56. In the late 1990s and early 21st century there were numerous mergers, failed mergers and other activities which dramatically altered the ownership and capital structure of the United States securities markets. In 1998 Amex merged with, and became a subsidiary of, the NASD. See Nasdaq Completes Its Merger with Amex, N.Y. Times, November 3, 1998, C10. Also in 1998, the Pacific Exchange and the Chicago Board Options Exchange entered into a merger agreement. See Greg Burns, CBOE, Pacific Exchange Dot Merger I's, Chicago Tribune, November 12, 1998. However, the Chicago Board Options Exchange canceled the merger in January 1999. See Sam Zuckerman, Arthur M. Louis, Peter Sinton, Merger Partner Abruptly Jilts Pacific Exchange, San Francisco Chronicle, January 8, 1999, A1. In July, 2000, the Pacific Exchange entered into a transaction with Archipelago, LLC, one of the larger ECNs, which ultimately led to Archipelago's becoming a trading facility of the Pacific Exchange. See Sam Zuckerman, Pacific Exchange Nearing Launch Into Cyberspace, San Francisco Chronicle, July 14, 2000, B1. The operation of the Archipelago facility is discussed in § 2.01[3] *infra*. Nasdaq announced its plans to become a for-profit market in the Summer of 1999, and sold 40 percent of its stock to investors in a private placement in June 2000. See Press Release, Nasdaq Completes the First Phase of its Private Placement, 40 Percent of Nasdaq sold to Over 2,800 Investors, Over \$330 million raised (June 28, 2000). For a more detailed discussion of Nasdaq's transition to for-profit status, see § 2.05.

Instinet and Island, two of the larger ECNs, merged in September 2002. Reuters, Instinet Completes Island Merger, San-Diego Union Tribune, September 21, 2002, at C-2. This merger created the INET ECN. JB, As SEC Ponders Access Fee Changes, SuperMontage Fee Cap Begins, Securities Week, Vol. 31, No. 9, March 1, 2004, at 9. In November 2003, after a failed attempt to sell Amex to a buyout firm, the NASD decided to sell the exchange to its members, which would essentially reverse the 1998 merger. See Donna Block, NASD Cuts Amex Loose, Daily Deal, November 5, 2003. This sale was completed in January 2005. Exchanges Changing Hands; Stock Exchanges,, Securities Industry News, January 10, 2005. In September 2005, Archipelago Holdings, Inc., the owner and operator of the Archipelago Exchange, acquired PCX Holdings, Inc., the parent company of the Pacific Exchange and PCX

Equities, Inc. Archipelago Holdings, Inc., Form 8-K (September 27, 2005). In December 2005, Nasdaq purchased Instinet Group Incorporated, the owner of the INET ECN. Nasdaq Press Release, NASDAQ Completes Acquisition of INET, December 8, 2005, *available at* www.nasdaq.com/newsroom/news/pr2002/ne_sections_118.stm. The NYSE's members in December 2005 approved a transaction under which the NYSE would acquire Archipelago and both the exchange and Archipelago would become part of a new for-profit publicly-traded entity known as NYSE Group, Inc. Donna Block, Members Approve NYSE Merger, *The Daily Deal*, December 8, 2005, M&A Section; see Final Prospectus pursuant to Rule 424(b)(3) filed by NYSE Group, Inc., SEC File No. 333-126780 (Nov. 4, 2005).

(n57)Footnote 57. See Sec. Exch. Act Rel. No. 28556 (Oct. 19, 1990).

(n58)Footnote 58. In 1976, the Commission authorized the Chicago, then known as the Midwest, Stock Exchange to commence trading in standardized options. After approximately three years of trading both stock and options, the exchange concluded that it was not economically feasible to continue options trading and, accordingly, merged its options program with that of the CBOE. See Sec. Exch. Act Rel. No. 15762 (1979). The NYSE began trading options in 1983, but never gained a significant market share in options trading, and agreed to sell its options business to the CBOE in 1997. Laurie Morse, *NYSE in Options Deal with CBOE*, *Financial Times*, March 6, 1997, at International Capital Markets Section, p.40.

(n59)Footnote 59. Prior to 1972 there were no established markets for the purchase and sale of options. While an informal group of OTC broker-dealers wrote options, the contract terms and price were negotiated on a transaction-by-transaction basis and no secondary market for resale existed. In 1973 the Commission authorized the CBOE to commence trading standardized options on a "pilot" basis. See Sec. Exch. Act Rel. No. 9985 [1972-1973 Transfer binder] Fed. Sec. L. Rep. (CCH) P 79,212 (Feb. 1, 1973). The options traded by the CBOE differed from the OTC options previously available in that the CBOE option was standardized, having a uniform set of terms and conditions which made them readily transferable in a secondary market. See SEC Report of the Special Study of the Options Markets, 96th Cong., 1st Sess., pp. 73-74 (1978) (hereinafter cited as "Options Study").

(n66)Footnote 66. Division of Market Regulation, SEC, October 1987 Market Break Report at 4-1 to 4-4 (1988) (hereinafter cited as "Market Break Study").

(n67)Footnote 67. See, e.g., NYSE Rules 311 to 324, NYSE Guide, *supra*, at PP 2311-2344. NYSE member firms in 1981 constituted only 18.3 percent of the classified securities firms, but accounted for 88.5 percent of total broker-dealer revenues and employed approximately 80 percent of the employees working for broker-dealers. SEC Staff Report on the Securities Industry in 1981, p. 35 and Exhibit III-10. The definitions of "member," "membership," "member firm," "allied member," "non-member," and "member corporation" are found in Sec. 3, Article I, New York Stock Exchange, Inc. Constitution. See New York Stock Exchange Constitution, Sec. 3, NYSE Guide (CCH) P 1003 (2003). In 2005 the NYSE amended its constitution and rules to allow limited liability companies, in addition to individuals, to become members of the exchange. Sec. Exch. Act Rel. No. 52891 (Dec. 5, 2005). For discussion of the requirements of the Exchange Act concerning membership on a national securities exchange, see § 2.03[2][a] *infra*.

(n68)Footnote 68. New York Stock Exchange Facts & Figures, Member Organization By Type (1972-2002), at www.nyxdata.com/nysedata/default.aspx?tabid=115 (last visited on May 4, 2008), (hereinafter cited as "NYSE Facts & Figures"). There were over 8,000 brokers and dealers registered with the Commission in 2002. SEC Annual Report, at p. 32 (2002).

(n69)Footnote 69. See Securities Exchange Act Release 34-53382 (Feb. 27, 2006).

(n70)Footnote 70. See Amex Members Approve Acquisition of Amex by NYSE Euronext, Joint News Release, available at <http://www.nyse.com/press/1213699341224.html>). In April 2002, the International Stock Exchange was restructured from a limited liability company to a corporation. (See Exchange Act Release No. 34-45803 (Apr. 23, 2002)). In 2004, the SEC granted an order approving the demutualization of the Pacific Stock Exchange, Inc., converting the ownership of the Pacific Stock Exchange from a non-stock, not-for-profit corporation into a for-profit stock corporation. In 2005, Archipelago Holdings, Inc. purchased PCX Holdings Inc., the parent of the Pacific Stock Exchange, who, in turn, was acquired by the New York Stock Exchange in 2006. As a result of the acquisition by the New York Stock Exchange, the names of the Pacific Exchange, Inc. and the Archipelago Exchange, LLC were changed to NYSE Arca, Inc. and NYSE Arca, LLC, respectively. (See Securities Exchange Release No. 34-49718 (May 17, 2004) (granting approval of the demutualization of the Pacific Stock Exchange); Securities Exchange Act Release No. 34-53615 (Apr. 7, 2006) (filing and approval of proposed rule change and amendments thereto to change the names of the Pacific Exchange, Inc., PCX Equities, Inc., PCX Holdings, Inc., and the Archipelago Exchange, L.L.C.). In 2000, the NASD commenced action to restructure its relationship with the Nasdaq through a series of private placements. As a result of such restructuring, Nasdaq became a separate entity from the NASD. In 2005, Nasdaq completed a public offering, and in 2006, Nasdaq received SEC approval to become its own national securities exchange. (See Securities and Exchange Act Release No. 34-52049 (July 15, 2005) (filing of proposed rule change relating to Nasdaq's separation from the NASD, pending approval of Nasdaq's anticipated registration as a national securities exchange); Securities Exchange Act Release No. 34-53128 (Jan. 23, 2006) (granting approval of the Nasdaq's registration as a national securities exchange). In 2006, the National Stock Exchange received SEC approval to reorganize as a for-profit stock corporation. (See Securities Exchange Act Release No. 34-53963 (June 8, 2006) (order granting approval of proposed rule change and amendments relating to the demutualization of the National Stock Exchange). In May 2008, the Boston Stock Exchange, Inc. ("BSE") filed with the SEC certain proposed rule changes relating to the acquisition of BSE by the Nasdaq OMX Group, Inc. (formerly Nasdaq Stock Market, Inc.). As a result of the proposed merger, Nasdaq OMX Group, Inc. would acquire all of the outstanding interests in BSE; BSE member would not retain ownership interests in BSE or its affiliates. (See Securities Act Release No. 34-57757 (May 1, 2008)). In 2004, the Chicago Stock Exchange, Inc. became a for-profit stock corporation as a result of demutualization. (See Securities Exchange Act Release No. 34-51149 (Feb. 9, 2005)). In 2004, the Philadelphia Stock Exchange became the first "floor based" stock exchange to demutualize. (See Securities Exchange Act Release No. 34-49098 (Jan. 16, 2004; see also SEC Approves Philadelphia Stock Exchange Demutualization--PHLX Becomes The First Floor-Based US Stock Exchange To Demutualize, Press Release, available at <http://www.exchange-handbook.co.uk/index.cfm?section=news&action=detail&id=45694>). In 2007, the Chicago Board Options Exchange ("CBOE") announced an anticipated plan to demutualize. As result of the proposed demutualization, CBOE would become a wholly-owned subsidiary of CBOE Holdings, Inc. Furthermore, CBOE would become a for-profit stock corporation whose memberships would be converted to shares of CBOE Holdings, Inc. The proposed restructuring is subject to SEC approval. (See CBOE Board Unanimously Approves Filing to Demutualize; CBOE Reports Earnings for First Six Months of 2006, Press Release, available at <http://www.cboe.com/AboutCBOE/ShowDocument.aspx? DIR=ACNews&FILE=20060727b.doc>).

(n71)Footnote 71. For a discussion of non-member access to exchange facilities, see § 2.03[2][b] *infra*.

(n72)Footnote 72. See Sec. Exch. Act Rel. No. 14256 (Dec. 12, 1977).

(n73)Footnote 73. Sec. Exch. Act Rel. No. 14256 (Dec. 12, 1977).

(n74)Footnote 74. See Sec. Exch. Act Rel. No. 19520 (Feb. 22, 1983). Other exchanges have adopted similar

limited memberships. *See, e.g.*, Article IV, Section 1 of the Constitution of the American Stock Exchange (associate members permitted to maintain electronic access to certain automated systems of the exchange); Pacific Stock Exchange Rule 1.14; (permitting access to exchange data systems and conferring other limited membership rights and responsibilities).

(n75)Footnote 75. *See, e.g.*, American Stock Exchange General and Floor Rules; Chicago Board Options Exchange Rules ch. VI; PCX Equities, Inc. Rule 2.

(n76)Footnote 76. *See generally* Options Study, pp. 129-32; Special Study, *supra*, Pt. 2 at 40-47.

(n77)Footnote 77. Section 15A(b)(6) of the Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F, contains similar provisions with respect to registered securities associations.

(n78)Footnote 78. Section 6(b)(8) of the Exchange Act. Section 15A(b)(9) of the Exchange Act imposes similar requirements on registered securities associations.

(n79)Footnote 79. *See* Market Break Study, *supra*, at 4-2. The NYSE describes the specialist's role as follows:

Market professionals called specialists are the contact point between brokers with buy and sell orders in the NYSE's agency auction market. Each stock is allocated to a specialist, who acts as an auctioneer in specific stocks at a designated location. All buying and selling of a stock occurs at that location, called a trading post. The number of stocks traded by an individual specialist varies according to the total activity of the stocks. High-definition post display units above the trading posts contain a variety of information about each stock that is traded at that location.

Although 95 percent of orders are delivered directly to the trading post by electronic means, they represent 65 percent of the share volume. The remaining 5 percent of orders, which represents 35 percent of share volume, are represented by the floor brokers who meet openly at the trading post to find the best price for a security by interacting with a specialist.

The people who gather around the specialist's post are referred to as the trading crowd. Bids to buy and offers to sell are spoken aloud so that anyone present has an opportunity to participate in the buying and selling. This enhances the competitive determination of prices. When the highest bid meets the lowest offer, a trade is executed.

The specialist is responsible for maintaining the market's fairness, competitiveness, and efficiency. Specifically, the specialist performs four vital functions:

- Auctioneer: At the start of each trading day, specialists establish a fair market price for each of their stocks. They base that price on the supply and demand for the stock. Then, during the day, specialists quote the current bids and offers in their stocks to other brokers, acting as auctioneers.

- Agent: A specialist is the agent for all orders routed electronically through the SuperDOT(r) System, and for orders with special instructions on them left with the specialists by floor brokers to be executed at the best price available.

- Catalyst: Specialists are called upon to maintain "orderly markets" in their assigned stocks. That is, they ensure that trading in their stocks moves smoothly during the day with minimal fluctuation in price so that the public is protected.

- Dealer: If there are temporarily more buy orders than sell orders in a specialist's assigned stocks--or if there are more sell orders than buy orders--then the specialist is required to step in and sell

or buy stock using his own firm's money or reserves of that stock. This is done by buying or selling against the trend of the market, until a price is reached at which public supply and demand are once again in balance. In this role, the specialist acts as principal or dealer.

New York Stock Exchange, A Guide to the World's Leading Securities Market, *available at* www.nyse.com/about/education/1098034584990.html (last visited May 4, 2008), at 10-11.

(n80)Footnote 80. Floor brokers are often referred to as "two dollar brokers," because at one time they charged two dollars for every 100 share execution. Floor brokers are discussed in Special Study, *supra*.

(n81)Footnote 81. See Market Break Study, *supra*, at 4-1.

(n82)Footnote 82. Market Break Study, *supra*, at 4-1. In its 1963 Special Study of the Securities Markets, the SEC described the operation of exchange markets as follows:

The fundamental distinction between exchange and over-the-counter markets is that the exchange provides a centralized marketplace or "floor." All buying and selling interests are funneled to one place, where buyers have an opportunity to find the cheapest sellers, and sellers the most eager buyers.

The method of trading on the two major New York exchanges is known as the continuous auction system. This system, although somewhat resembling the conventional auction procedure, differs from it in that it is a two-way process with competition among sellers as well as among buyers, and that parties usually can achieve an execution, at least for 100 shares, at any time during the trading session. The prevailing "market" or the "quote" for each security is the highest bid and the lowest offer, e.g., 50 (bid), 50 1/4 (offer). An investor desiring to buy or sell with as little delay as possible will usually do so "at the market." If the investor does not wish to execute at the market price, he may enter his own bid or offer to buy or sell at a particular price. This is known as a "limit" order. He may also enter a "discretionary" order, empowering his broker to decide the time and price at which to execute the transaction. Trading in each security takes place at a specified place on the Exchange floor known as a "post." There are 22 posts on the floor of the NYSE, each with an average of about 100 stocks traded at it. A broker who is at a post to trade in a particular security is in "the crowd," which is merely a way of saying he is participating in the auction.

When two or more parties have placed bids (offers) in a security at the same price, technical rules determine who is entitled to the transaction. These are known as "priority," "precedence," and "parity." "Priority" holds that the bid or offer which is first in time is entitled to the first execution. If all orders were placed simultaneously, or if the party entitled to priority has effected his transaction, the principle of "precedence" becomes determinative, holding that bids (or offers) are to be executed in order of size. All bids for amounts as large or larger than the amount of stock offered are considered of equal size, or on a "parity." These bidders then "match" (flip a coin) to determine who is entitled to the execution. If none of the bids is as large as the amount offered (or no offer as large as the bid), they are executed in order of size, with parties having bids (or offers) of equal size "matching" to determine the order of execution.

The continuous auction method of trading, in which orders from the public to buy and to sell are often joined at a central location, operates best when there are many participants in the auction.

Special Study, *supra*, Pt. 2 at pp. 40, 41 (1963).

The Special Study's description of exchange operations is still useful because, although some modern exchanges do

not have trading floors, all employ basis auction principles. However, there are many variations in the procedures employed by the various exchanges, which limit the description's utility in describing the precise nature of trading at the exchanges. Even the NYSE, which is aptly described as a continuous auction market, does not fit this mold perfectly; at times the NYSE functions as a "call auction" market, in which all open orders are executed at a fixed point in time. *See* Market Structure Report of the New York Stock Exchange Special Committee on Market Structure, Governance and Ownership 20 (2001).

(n83)Footnote 83. The NYSE uses the following example to illustrate the process through which orders are executed:

1. Roger Smith of Des Moines, Iowa, decides to invest in the stock market.
 - 1A. Diane Whitford of Hartford, Connecticut, decides to sell 100 shares of Gap Stores stock (GPS) to help pay for a new car.
2. Roger consults a broker who is a member of the New York Stock Exchange. They discuss a number of possible long-term investments. Roger asks his broker for a quote--the highest bid (to buy) and the lowest offer (to sell) for a stock at any given time--on Gap Stores stock (GPS).
 - 2A. Diane calls her broker, a member of the New York Stock Exchange, and asks for a quote on Gap Stores (GPS).
3. The brokers access an electronic market data system to obtain quotes on (GPS) Gap Stores stock from the NYSE floor. A number of information vendors offer this service to brokerage houses. The information vendors get quotes from the NYSE systems via direct high-speed lines.
4. Taking into account what he already knows about GPS--and after a discussion with his broker--Roger instructs his broker to purchase 100 shares of GPS at the current market price. Or Roger goes to his online computer at his home or office and enters the order through his online account which links to SuperDot.
 - 4A. Diane instructs her broker to sell 100 shares of GPS at the current market price. Or Diane goes to her online computer at her home or office and enters the order through her online brokerage account which links to SuperDot.
5. The two brokers send their orders to the floor of the NYSE. Orders can be sent to the floor in two ways: electronically to a booth around the perimeter of the floor and displayed via touch screen in an order management system called Broker Booth Support System (BBSS). Floor brokers are given these orders in printed form or by wireless voice or data terminals, and represent these orders in the trading crowds. If the SuperDot system is used, the order is sent directly to the workstation.
6. At the post, the specialist who handles GPS makes sure the transactions are executed fairly and in an orderly manner.
7. The two floor brokers compete with other brokers on the Trading Floor to get the best price for their customers. The brokers representing Roger and Diane agree on a price.
8. After the transaction is executed, the specialist's workstation sends notice to the firms originating the orders and to the consolidated tape so that a written record is made of every transaction.
9. The transaction is reported by computer and appears within seconds on the consolidated tape displays across the country and around the world.

10. The transaction is processed electronically, crediting Roger's brokerage firm and debiting the account of Diane's brokerage firm. Both Roger and Diane receive a trade confirmation from their respective firms within a few days describing the trade, its terms and conditions, and the exact amount to be tendered or credited.

11. Roger settles his account within three business days after the transaction by submitting payment to his brokerage firm for the 100 shares of GPS, plus any applicable commissions.

11A. Diane's trade is also settled in three business days. Her account will be credited with the proceeds of the sale of stock, minus any applicable commissions.

New York Stock Exchange, *How a Stock is Bought and Sold*, available at <http://www.nyse.com/about/education/1098034584990.html> (last visited February 17, 2006).

Historically, specialists have had exclusive access to valuable information on customer limit orders. See *Smart Gamble*, U.S. BANKER, Vol. 110, No. 9, Sept. 2000, at 12, available at 2000 WL 17705070; *The Battle for Efficient Markets*, ECON., June 17, 2000. The NYSE, however, introduced a service known as "OpenBook," which allows investors, for a fee, to view buy and sell orders on the specialist's limit order book. See *The Exchange*, Volume 9, No. 1, available at www.nyse.com/pdfs/xnlv9n01pc.pdf (January 2002); Sec. Exch. Act Rel. No. 44138 (Dec. 7, 2001); see also www.nyxdata.com/nysedata/tabid/214/default.aspx.

(n84)Footnote 84. In the example used by the NYSE, *supra*, if Helen wanted to only purchase 25 shares, this "odd-lot" would typically be processed by a NYSE firm specializing in odd-lot executions at the best national offer price, whether on the NYSE or another exchange. See NYSE Rule 124, NYSE Guide (CCH) PP 2124, 2124.6 (2003) (hereinafter cited as "NYSE Guide").

(n85)Footnote 85. Market Break Study, *supra*, at 4-1 n.3. The NYSE has described the Purpose of Stop Orders as follows:

STOP ORDERS may be used in an effort to protect a paper profit or to try to limit a possible loss to a certain amount. To illustrate: if you bought stock at \$35 a share, you could enter an order to sell at "30 stop." In the event the stock declines to \$30 or below, your order automatically becomes a market order and is then executed at the best price available to your broker on the floor--which could be at \$30, or below or above \$30, depending upon the market in the stock at that time.

Or, if stock bought at \$35 a share should rise to \$55, the customer could enter a stop order to sell at \$50. Should the stock decline to \$50 or below the stop order would automatically become a market order and the stock would be sold at the best price then available to him on the floor. Stop orders may also be used when buying stock.

NYSE Pamphlet, pp. 32, 34 (1976).

(n86)Footnote 86. Sec. Exch. Act. Rel. No. 43767 (Dec. 22, 2000).

(n87)Footnote 87. See Sec. Exch. Act. Rel. No. 53014 (Dec. 22, 2005).

(n88)Footnote 88. See Sec. Exch. Act. Rel. No. 53539 (Mar. 22, 2006).

(n89)Footnote 89. See Sec. Exch. Act. Rel. No. 50173 (Aug. 10, 2004) (hereinafter cited as "NYSE Hybrid

Proposal"). In response to market participant concerns over the Hybrid Market's operation and its impact on the securities market as a whole, the NYSE filed a number of amendments to the Hybrid Proposal seeking to either clarify or make additional changes to the Hybrid Market. *See* Sec. Exch. Act Rel. No. 50667 (Nov. 15, 2004) (hereinafter cited as "Hybrid Amendment Nos. 2 and 3"); Sec. Exch. Act. Rel. No. 51906 (June 22, 2005) (hereinafter cited as "Hybrid Amendment No. 5"). In order to test the effectiveness of certain components of the Hybrid Market, the NYSE filed a proposal to implement a pilot program, which was approved by the SEC on December 14, 2005. Sec. Exch. Act Rel. No. 52954 (Dec. 14, 2005). SEC Exch. Act Rel. No. 2954 (Dec. 14, 2005). For this pilot program, the NYSE selected approximately 200 securities out of the 3,600 listed on the NYSE and identified them as pilot securities. *Id.* The pilot commenced on December 12, 2005 and is scheduled to terminate in 90 calendar days from that date or until the SEC approves the Hybrid proposal, whichever comes first. *See id.* *See also* Sec. Exch. Act. Rel. No. 53539 (mar. 22, 2006).

(n90)Footnote 90. These are market or limit orders that execute immediately and automatically cancel any unfilled portion of the order.

(n91)Footnote 91. *See* NYSE Hybrid Proposal, Hybrid Amendment Nos. 2 and 3, Hybrid Amendment No 5, *supra*.

(n92)Footnote 92. NYSE Display Book is an order-management and execution facility used by specialists on the floor of the NYSE. The NYSE Display Book receives and displays orders to the specialist and provides a mechanism to execute and report transactions on the NYSE. *See* Sec. Exch. Act. Rel. No. 51906, n.12 (June 22, 2005).

(n96)Footnote 96. NYSE Hybrid Proposal, *supra*.

(n97)Footnote 97. NYSE e-Quote is a new electronic tool that would be used by floor brokers to electronically place bids and offers at various prices via their hand-held devices. Sec. Exch. Act. Rel. No. 52954 (Dec. 14, 2005)

(n98)Footnote 98. The specialists' trading interest could be entered manually into the NYSE Display Book, or entered algorithmically through the NYSE Specialist Application Programming Interface, a new tool that would operate as an electronic conduit allowing specialists to interact with customer orders. NYSE Hybrid Proposal, *supra*.

(n99)Footnote 99. *See* Hybrid Amendment No. 5, *supra*.

(n100)Footnote 100. Trade and Quote Reporting 2002, NYSE Facts and Figures, *supra*.

(n101)Footnote 101. Sec. Exch. Act Rel. No. 10787, [1973-1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,782 (May 10, 1974).

(n102)Footnote 102. The term "third market" refers to OTC transactions in exchange-traded securities effected between or among brokers or dealers that do not take place on the floor of an exchange. The generic term "third market" should be distinguished from "Nasdaq's Third Market," which is a specific system operated by Nasdaq for third market trading. For a discussion of the consolidated transaction reporting system contemplated by the national market system, see § 2.04[2][d] *infra*.

(n103)Footnote 103. Nasdaq is discussed in detail in § 2.01[1][a][ii] *infra*.

(n104)Footnote 104. The ISE, on which only options are traded, is an electronic auction market. *See* Sec. Exch. Act. Rel. No. 42455 (Feb. 24, 2000), *available at* 2000 SEC LEXIS 325, at *48. Liquidity is provided by three classes of members--"primary" and "competitive" market makers, and "electronic access members." *Id.* at *10, 48. Primary

market makers have the highest level of responsibility, but also have superior access information concerning pending orders and quotations. *Id.* at *48. The auction market function of the National Stock Exchange is performed by the National Securities Trading System, which is described in § 2.04[2][b][i][B] *infra*.

(n105)Footnote 105. Section 3(a)(9) defines "facility" of an exchange broadly to include, among other things, the exchange's physical location, any tangible or intangible property of the exchange, and the right to use the exchange's property "for the purpose of effecting or reporting a transaction" on the exchange. This definition is broad enough to include both the floor of an exchange, the phone or computer systems used on or near the floor, and trading systems located completely away from the floor. The use of the term "facility" in the Exchange Act and the rules thereunder ensures that the reach of these provisions extends to systems or property other than the floor of an exchange, and transactions occurring using these systems or properties.

(n106)Footnote 106. Sec. Exch. Act Rel. No. 44983 (Oct. 25, 2001). The Archipelago Exchange is essentially an ECN which has been transformed into a facility of an exchange. In 2000, Archipelago, LLC, which operated the ECN, entered into an alliance with the Pacific Exchange under which the Pacific Exchange received a 10 percent interest in Archipelago LLC's parent company and Archipelago LLC and the Pacific Exchange agreed to develop a purely electronic equities exchange. The Pacific Exchange then made an application to the SEC for approval of the creation of the Archipelago Exchange as a facility of the Pacific Exchange. *See id.* As a facility of the Pacific Exchange, Archipelago is subject to the self-regulatory function of the Pacific Exchange, though it continues to be operated by Archipelago, LLC. *See id.*

The Archipelago Exchange functions like an electronic auction market in which there is no specialist to facilitate orderly trading but market makers enter orders for their own accounts to provide liquidity. The Archipelago Exchange allows users, which are typically broker-dealers but may be other persons who are "sponsored" by a broker-dealer authorized to trade on the exchange, to enter orders of various types which interact on the exchange with orders placed by other users. *Id.* Users have substantial flexibility in the types of orders they may enter. For example, a user may enter a market order, a limit order, an order directed to a particular market maker, and order in which only a portion of the shares the user is willing to buy or sell are displayed, and other types of orders. *Id.* Market makers are required to maintain continuous limit orders on both the buy and sell sides of the market in securities for which they are registered as market makers. *Id.*

However, there is no requirement that there be market makers for all securities. *Id.*

(n107)Footnote 107. In 1976, for example, the NYSE introduced its Designated Order Turnaround, or "DOT," System. The system, which is now called "SuperDOT" because of enhancements made to it, permits a member firm or non-member access firm to transmit market and limit orders for up to 3,000,000 shares electronically to the proper trading post, thereby bypassing the commission and floor brokers. *See* www.nyse.equities/nyseequities/10952052040263.html.

See Sec. Exch. Act Rel. No. 44399 (June 7, 2001). During 2002, there were 339 subscribers to the SuperDot system. *Order Transmission and the SuperDot System*, NYSE Facts and Figures, *supra*. The advantages of SuperDOT are that electronic order-routing and execution reporting directly to and from the specialist post reduces transaction costs and the probability of human error. While the original DOT system had been criticized for significant operational problems during the market crash of 1987, *See* Market Break Study at 7-16 to 7-24, improvements to the SuperDOT system have greatly increased system-wide speed and efficiency.

In 2002, SuperDot processed an average of 5,427,980 orders per day. *Id.*

The Commission has outlined the operation of the regional exchanges' automated systems as follows:

The Boston, Midwest [now Chicago], Pacific ("PSE") [now NYSE Arca], and Philadelphia (Phlx) Stock Exchanges have developed systems called BEACON, MAX, SCOREX, and PACE, respectively, that automatically route and execute small orders (generally up to 1,099 shares). These four systems basically operate in the same manner. After an order is routed to the system, it is priced based on the best bid or offer displayed on the Intermarket Trading System ("ITS") at the time the order was received by the system, and then routed to the applicable specialist post. The order is then displayed on a video terminal at the post for 15 seconds to permit the specialist and/or trading crowd to improve upon the price. If no floor trader intervenes within the 15 seconds, the order is automatically executed against the specialist at the predetermined price. Under the PACE system, however, orders are executed once priced and are not displayed for price improvement. The four systems also transmit transaction reports to members and market data vendors.

Sec. Exch. Act Rel. No. 27445, [1989-1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,505, at n.7 (Nov. 16, 1989).

(n108)Footnote 108. For a discussion of the Intermarket Trading System, see § 2.04[2][b][i][A], *infra*.

(n109)Footnote 109. Section 6(b)(1), reprinted in the Securities Primary Law Sourcebook, Volume B, Section F of the 1934 Act

(n110)Footnote 110. For a discussion of the New York Stock Exchange surveillance system and the dialogue between the Commission and the exchange on continued improvement, see Options Study, pp. 223-30. *See also* Sec. Exch. Act Rel. No. 15575, [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,962 (Feb. 22, 1979), in which the Commission announced that further expansion of exchange trading of standardized options was dependent upon significant improvements in, among other things, the exchanges' market surveillance systems.

The Commission generally inspects the market surveillance programs of the SROs annually. During the 1980s the Commission criticized the SROs' ability to adapt their surveillance programs to an increasingly complex market, *see, e.g.*, 47 SEC Ann. Rep., at 10 (1983), and in response the SROs enhanced their capabilities. A Commission review of the NASD Market Surveillance Department in November 1992 found that the NASD had "significantly improved its automation and enhanced its surveillance procedures." A similar inspection of NYSE procedures found "significant improvement in the NYSE's surveillance and investigatory operations for program trading," and that generally the NYSE maintained "effective surveillance programs." 59 SEC Ann. Rep., at p. 35 (1994). However, the Commission in recent years has continued to find what it believes to be significant deficiencies in the SROs' fulfillment of their market surveillance responsibilities. In 2000 a report by the Commission's Office of Compliance Inspections and Examinations and Office of Economic Analysis found "significant weaknesses" in the SROs' market surveillance programs as they relate to compliance with limit order display requirements. *See* Securities and Exchange Commission, *Special Study: Report Concerning Display of Customer Limit Orders* (May 4, 2000), available at www.sec.gov/news/studies/limitorder.htm (last visited May 4, 2008).

(n111)Footnote 111. *See, e.g.*, Options Study, pp. 19-33.

(n112)Footnote 112. Section 401, Small Business Investment Incentive Act of 1980, Pub. L. No. 96-477, 94 Stat. 2291 (1980). For a general discussion of MOSS, see SEC, Fourth Six-Month Report to the Senate Committee on

Banking, Housing and Urban Affairs and the House Committee on Energy and Commerce Regarding Implementation of the Market Oversight and Surveillance System, Attachment A at pp. 2-3 (Oct. 1, 1982) (hereinafter cited as "MOSS Report").

(n113)Footnote 113. In authorizing the Commission to proceed with the development of the MOSS Project through fiscal 1983, the Senate Committee instructed the Commission to begin discussions with the SROs, in fiscal year 1981, regarding the receipt by the Commission for use in MOSS of certain additional information maintained by the SROs. This information included: (1) NASD broker-dealer quotes; (2) NASD end of day broker-dealer volume; (3) NASD broker-dealer quote drops; (4) broker-dealer symbol cross-references; (5) broker-dealer securities relationships; (6) unmatched option trades; and (7) inquiry/investigations. In fiscal years 1982 and 1983, the Commission was to initiate discussions with the SROs regarding the specifics of interfacing with the MOSS System on matters regarding: (1) inspections of brokers and dealers; (2) extensions of credit pursuant to Regulation T; (3) investor complaints; (4) sales personnel; (5) securities' violations and pending actions; and (6) Broker-Dealer Focus Reports. MOSS Report, *supra*, at p. 8.

See also Report of the Senate Committee on Banking, Housing and Urban Affairs to Accompany S. 2465, S. Rep. No. 96-752, 96 Cong., 2d Sess. (1980) at pp. 4-5 and Report to the House Committee of Interstate and Foreign Commerce to Accompany H.R. 6830, H. Rep. No. 96-961, 96th Cong., 2d Sess. (1980).

(n114)Footnote 114. The Commission in the MOSS Report noted that the "development of MOSS was a precipitating factor encouraging SRO efforts to develop an effective intermarket surveillance program and the New York Stock Exchange's efforts to develop and implement a complete transaction audit trail for its listed equity securities. The Commission's MOSS pilot enabled the staff to provide the SROs with theoretical and technical input concerning an effective multimarket surveillance program. It also demonstrated to the SROs the Commission's commitment to realize an effective intermarket surveillance program, whether administered by the Commission or by the SROs, that would be responsive to the Commission's mandate to oversee the integrity of the nation's financial marketplaces as well as the Commission's commitment to improve its oversight capabilities of SRO surveillance programs." MOSS Report, *supra*, at pp. 9-10.

Moreover, in February, 1981, the Intermarket Surveillance Group ("ISG") was formed to design and implement improved intermarket surveillance procedures among the self-regulatory organizations. The self-regulatory organizations participating in the ISG are: The American Stock Exchange, Boston Stock Exchange, Chicago Board of Options Exchange, Cincinnati Stock Exchange, Chicago Stock Exchange, National Association of Securities Dealers, New York Stock Exchange, Pacific Stock Exchange, and Philadelphia Stock Exchange. Members of the ISG are committed to work jointly to assure that there is appropriate coordination of intermarket surveillance matters as a national market system develops. In addition to the ISG surveillance efforts, each individual SRO continues to maintain and develop its own surveillance facilities. *Id.*, Attachment A at pp. 2-3.

(n115)Footnote 115. In 1982, the NASD summarized the growth of Nasdaq as follows:

In a single decade, NASDAQ has brought order to what had been a largely unrecognized and sometimes chaotic market and, in the process, completely transformed the nature of over-the-counter trading. Before NASDAQ came on the scene, up-to-the-minute quotations for OTC securities were elusive. Messengers scrambled to deliver multi-colored sheets with quotations that were hours, even days, old. For a more recent quote, a broker had to contact a market maker by telephone or telegraph. Shopping for the best quotation among various market makers was practical only for large orders. Small wonder, then, that promising companies fled the OTC market for the relative calm and organization of

the exchanges.

The climate began to change when NASDAQ began operations as a trailblazer of the electronics age a decade ago. The NASDAQ's electronic flow of up-to-the-second price quotations throughout the trading day created a vital communications link between the market makers, brokers and investors. It also brought the market its first real public visibility. The system started with quotation information only but was soon expanded to include other trading information that in the past had been largely unavailable. Volume information was added in the system's first year, as a running index of NASDAQ's stock performance. Other innovations such as the best bid and asked prices (known as "inside quotations") were added later.

Until NASDAQ, many investors had considered the over-the-counter market to be a moribund backwater of the securities industry. The initial statistics gathered by the NASDAQ's computers were surprising to the skeptics. During 1972, NASDAQ's first full year, 2.2 billion shares were traded. By 1981, NASDAQ volume had surged to a record 7.8 billion shares, up 17 percent over the previous year and more than twice the level of 1979. The NASDAQ Securities Fact Book, at pp. 1-2 (1982).

In January 2006, Nasdaq became registered as a national securities exchange. Sec. Exch. Act. Rel. No. 53128 (Jan. 13, 2006).

(n116)Footnote 116. See 2004 Nasdaq Annual Report, at 6; 2004 New York Stock Exchange Annual Report, at 11.

(n117)Footnote 117. See 2004 Nasdaq Annual Report, at 6; 2004 New York Stock Exchange Annual Report, at 11.

(n118)Footnote 118. See National Association of Securities Dealers, Inc., "Transaction Services/How to Become a Market Participant," at www.nasdaqtrader.com/trader/tradingservices (last visited February 2, 2004); Sec. Exch. Act. Rel. No. 51583 (Apr. 20, 2005).

(n119)Footnote 119. Nasdaq formerly used three different types of terminals corresponding to three different levels of service. Level 1 served individual investors and registered representatives. 1994 NASD Fact Book, *supra*, at p. 30. Level 1 terminals, located primarily in retail branches, provided quotation information, last sale reports, and market summary data. *Id.* Level 2 terminals were used by institutions and brokerage firms. *Id.* The Level 2 terminals showed specific quotations by market makers in Nasdaq securities but did not permit the entry of information into the Nasdaq system. Level 3 terminals were used by market makers in Nasdaq securities to enter, change, or update their quotations and view the quotations of other market makers. *Id.* at p.43.

Prior to 1980, Level 1 terminals did not display the actual quotations of specified market makers. Rather, they displayed for each security quoted in the Nasdaq system, a single "Representative Bid and Ask" ("RBA") consisting of the median bid and the median offer price of all registered market makers who had entered quotations for that security into the Nasdaq system. For a discussion of the representative bid and ask system, see Sec. Exch. Act Rel. No. 15250 nn. 45 and 46, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,749 (Oct. 20, 1978).

In 1980 the Commission adopted Rule 11 Ac1-2 [now Rule 603]. Sec. Exch. Act Rel. No. 16590, [1979-1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,456 (Feb. 19, 1980). This rule prohibited the display of representative bid and ask price information on Level 1 terminals. Instead, Level 1 terminals were required to display at a minimum the highest bid and lowest offer price for a given security. The Commission believed that the display of this information on Level 1 terminals would make broker-dealers more diligent in executing customer orders at the best price. Sec. Exch. Act Rel. No. 15250, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,749 (Oct. 20, 1978). The Commission felt that the only feasible way for a customer to police a broker's efforts to obtain the best execution was to

receive information as to the best bid and offer available at the time the order is placed to buy or sell a Nasdaq security. The Commission felt that a retail customer who only had RBA information could not properly evaluate the quality of execution of price and services rendered by the broker-dealer handling the order. *Id.*

(n120)Footnote 120. See National Association of Securities Dealers, Inc., Transaction Services/How to Become a Market Participant, *available at* www.nasdaqtrader.com/trader/tradingservices (last visited February 2, 2004).

(n121)Footnote 121. National Association of Securities Dealers, Inc., Transaction Services/How to Become a Market Participant, *supra*.

(n122)Footnote 122. See National Association of Securities Dealers, Inc., Transaction Services/How to Become a Market Participant, *supra*.

(n123)Footnote 123. Sec. Exch. Act. Rel. No. 42344 (Jan. 14, 2000) (hereinafter cited as "SuperSOES Adopting Release"). The SuperSOES system grew out of Nasdaq's Small Order Execution System ("SOES"), which provided for automatic execution of small orders, and which was designed to allow small investors to obtain rapid executions. For a description of the SOES system, see Sec. Exch. Act Rel. No. 26361 (Dec. 15, 1988). As originally instituted, participation in the SOES system was voluntary, and under the SOES system orders for up to 500 shares were automatically executed at the inside bid or offer of participating market makers. *Id.* The rules governing the SOES system were later amended on several occasions. Among other changes, the system became mandatory for Nasdaq market makers with respect to National Market securities, and the maximum order sizes for National Market securities were introduced which vary to based on the characteristics of securities. *Id.*

(n124)Footnote 124. SuperSOES Adopting Release, *supra*.

(n125)Footnote 125. See Sec. Exch. Act Rel. No. 43863 (Jan. 19, 2001), *available at* 2001 SEC LEXIS 112, at *12 (S.E.C.) (hereinafter cited as "SuperMontage Adopting Release"); John Sandman, ADF Still Lagging in FIX Connectivity, Securities Industry News, October 21, 2002. Once SuperMontage was phased in for all Nasdaq securities, it replaced SuperSOES. See Sec. Exch. Act. Rel. No. 45906 (May 10, 2002).

(n126)Footnote 126. See, e.g., Sec. Exch. Act Rel. No. 45790 (Apr. 19, 2002); Sec. Exch. Act Rel. No. 46141 (June 28, 2002); Sec. Exch. Act. Rel. No. 48798 (Nov. 17, 2003).

(n127)Footnote 127. See Sec. Exch. Act. Rel. No. 50074 (July 23, 2004).

(n128)Footnote 128. As originally proposed, the system would have displayed trading interest at the top of the market and two levels away. See SuperMontage Adopting Release, *supra*. In April 2002, the SEC approved a change under which the top of the market and four additional levels are displayed. Sec. Exch. Act Rel. No. 45790 (Apr. 19, 2002).

(n129)Footnote 129. SuperMontage Adopting Release, *supra*.

(n130)Footnote 130. *Id.* Post-trade anonymity was not a feature of the original system, but was added as the result of a rule change approved by the SEC in September 2003. See Sec. Exch. Act Rel. No. 48527 (Sept. 23, 2003). In addition to Nasdaq Quoting Market Participants, SuperMontage allows for the participation of "order entry firms," which can execute against the quotes and orders of other firms. See SuperMontage Adopting Release, *supra*. Order entry firms may not enter quotes into the system, and any orders entered into the system are for immediate execution only, and are to be canceled if not immediately executed. See *id.*

(n131)Footnote 131. SuperMontage Adopting Release, *supra*. In addition, in May 2003, the SEC approved a pilot

program under which order entry firms may also use reserve size. Sec. Exch. Act Rel. No. 47830 (May 12, 2003).

(n132)Footnote 132. See SuperMontage Adopting Release, *supra*, at * 18 n.27.

(n133)Footnote 133. SuperMontage Adopting Release, *supra*, at * 18 n.27.

(n134)Footnote 134. See The Nasdaq Stock Market Inc., NASDAQ SuperMontage, *available at* www.nasdaqtrader.com/trader/hottopics/smfactshe08063.pdf (last visited January 31, 2004). Directed orders, because they are not entered into the system like other orders, may be at any price and quantity and also may be executed outside normal trading hours. *Id.*

(n135)Footnote 135. Sec. Exch. Act Rel. No. 48798 (Nov. 17, 2003). Market participants can also enter "reverse pegged orders," which are pegged to the opposite side of the market but deviate from that price by \$.01. *Id.* For example, if the inside market for a stock is \$30.00--\$30.05, a reverse pegged buy order would peg at a price of \$30.04. A reverse pegged order cannot be pegged to the exact price on the opposite side of the market, because this would result in a "locked" market, *i.e.*, a market in which a bid quote and ask quote are the same. See *id.* For a discussion of "Auto-Ex orders, see Sec. Exch. Act. Rel. No. 49020 (Jan. 5, 2004).

(n136)Footnote 136. Nasdaq Unveils Single Platform, Cross, Securities Industry News, March 22, 2004.

(n137)Footnote 137. See Rule 11Aa2-1 [now Rule 600(a)] under the Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section G. Rule 11Aa2-1 was amended in 1987 to designate as NMS securities all OTC or exchange-listed securities for which transactions are reported pursuant to an effective transaction reporting plan approved by the Commission pursuant to Rule 11Aa3-1 under the Exchange Act. This included in the NMS designation all securities listed on the NYSE and Amex and sole regional exchange listings that substantially meet Amex or NYSE listing criteria, as well as OTC securities that meet NMS eligibility criteria in the NASD's Transaction Reporting Plan. See Sec. Exch. Act Rel. Nos. 24633 and 24635 (June 23, 1987). See § 2.04 *infra*.

(n139)Footnote 139. Market Break Study, *supra*, at 9-2-9-3.

(n140)Footnote 140. In September 2005, Nasdaq renamed the Nasdaq SmallCap Market the "Nasdaq Capital Market." Sec. Exch. Act. Rel. No. (Sept. 21, 2005).

(n141)Footnote 141. Nasdaq SmallCap [now Capital Market] securities were not originally subject to Nasdaq's transaction reporting plan, which covered only National Market securities, although transactions in SmallCap securities were reported on a real-time basis. Beginning in November 2001, SmallCap securities became subject to Nasdaq's reporting plan. See Sec. Exch. Rel. No. 45081 (Nov. 19, 2001).

(n142)Footnote 142. Market Break Report at 9-3.

(n143)Footnote 143. In 1981 the NASD described the increased OTC surveillance as follows:

The NASDAQ Computer System allowed the NASD to greatly expand its market surveillance. In July of 1981, the NASD's Market Information Data Access System (MIDAS) became operational. MIDAS represented a major enhancement of the NASD's market surveillance capabilities. The system provided the 17 NASD professionals who are assigned exclusively to market surveillance with instantaneous, on-line access to up to 60 days of price information about every NASDAQ security. MIDAS can recapture quotation data on a second-by-second basis and reconstruct trading patterns as they occurred. This gives the NASD the ability to create a complete audit trail of quotation activity for all market makers. NASD 1981 Ann. Rep. pp. 14-15.

Better supervision of listed stocks once was claimed as a desirable reason for exchange listing since there was no comparable way of monitoring the OTC market's activity or performance. NASDAQ has reduced this advantage by making possible for the first time a computerized "Stock Watch" program for OTC companies. Created by the NASD, this program monitors trading patterns of Nasdaq securities and irregular market activity. The program is supervised by trained analysts who constantly check such things as unusual price fluctuation, irregular volume swings, new highs and lows of stocks, and uncommon variances between bid and asked prices. Market surveillance data ranges from all Nasdaq markets made by each market maker to Nasdaq issuer press releases and earnings reports, recent financial filings, and histories of price and volume trends.

NASDAQ and the Listing Dilemma--How the NASDAQ System is Influencing the Corporate Question on Stock Exchange Listing, p. 16 (NASD Pamphlet 1973).

(n144)Footnote 144. In 1997 the NASD described the surveillance of Nasdaq as follows:

The NASD continues to update and improve its monitoring of Nasdaq. The NASD currently employs a number of sophisticated computer systems to monitor trading. The Nasdaq Equity Audit Trail ("NEAT") provides a fully integrated data base of second by second quotation, transaction, and clearance and settlement information for all Nasdaq securities on a firm by firm basis. NEAT is used in a broad range of NASDR surveillance systems and provides an efficient and effective means of overseeing trading activity in the Nasdaq market. In addition to NEAT, the NASD monitors trading through an automated system known as the StockWatch Automatic Tracking ("SWAT") system. SWAT analyzes trading activity on a monthly, weekly, and daily basis for any unusual price or volume movements in any Nasdaq security.

SWAT, along with NEAT, enables analysts to reconstruct unusual trading patterns and create a complete audit trail of quotation changes by all market makers in an issue. These capabilities facilitate the efforts of analysts to investigate insider trading cases and document other instances of questionable activity.

The Research and Data Analysis Repository, RADAR, further facilitates the analysis of trading activity. RADAR provides immediate access to market data and other related information, allowing large quantities of data to be analyzed quickly. Whenever Nasdaq's SWAT system detects unusual price or volume movements in a stock's trading, RADAR assists market surveillance analysts by rapidly pinpointing the identity of the securities firms responsible for the trading, the precise time at which trades took place, how much was bought or sold, and for whose account.

NASD Manual, Administrative Profile at p. 152-153, 157-158 (1997).

In addition to its existing systems, in 1998 NASDR began implementation of the Order Audit Trail System ("OATS"). OATS is designed to provide an accurate, time-sequenced record of orders and transactions beginning with the order and documenting the life of the order through routing and execution. This information enables NASDR to construct a comprehensive audit trail of order and transaction data. Sec. Exch. Act Rel. No. 39729 (Mar. 6, 1998).

(n183)Footnote 183. Sec. Exch. Act Rel. No. 22412 (Sept. 16, 1985).

(n184)Footnote 184. Sec. Exch. Act Rel. No. 35323 (Feb. 2, 1995).

(n185)Footnote 185. Sec. Exch. Act Rel. No. 35323 (Feb. 2, 1995).

(n186)Footnote 186. Section 12(f)(1)(E); Sec. Exch. Act Rel. No. 35637 (Apr. 21, 1995).

(n187)Footnote 187. *See, e.g.*, Sec. Exch. Act Rel. No. 51292 (Mar. 2, 2005); Sec. Exch. Act Rel. No. 44937, n. 3 (Oct. 15, 2001); Sec. Exch. Act Rel. No. 36481, n.2 (Nov. 13, 1995). The Nasdaq UTP Plan is discussed in § 2.04[2][d][iii], *infra*.

(n188)Footnote 188. In fact, to trade such a security pursuant to UTP, all that is required is that the exchange has in effect trading rules providing for transactions in that class or type of security. *See* Rule 12f-5; Sec. Exch. Act Rel. No. 51691, n. 8 (May 12, 2005). Language in certain SEC releases dealing with derivative products suggests a further requirement--that in order to trade a particular class or type of security pursuant to UTP, an exchange must have in place listing standards "comparable" to those of the listing exchange. *See, e.g.*, Sec. Exch. Act Rel. No. 46834, n.21 (Nov. 14, 2002); Sec. Exch. Act Rel. No. 37589 (Aug. 21, 1996). However this language only surfaces, and is only relevant, with respect to derivative products. This language has emerged because listing standards and trading rules are often combined with respect to these products. The listing of derivative products is discussed in more detail in § 2.01[1][b], *supra*. The granting of Nasdaq's exchange application in January 2006 made even the requirement that securities be eligible under the UTP Plan irrelevant, because all Nasdaq securities are now listed securities. *See* Sec. Exch. Act Rel. No. 53128 (Jan. 13, 2006).

(n189)Footnote 189. (n191)Footnote 191. A Look at Nasdaq, 1994 Nasdaq Fact Book and Company Directory, p.1 (hereinafter cited as "1994 NASD Fact Book").

(n192)Footnote 192. The SEC's 1963 Special Study of the Securities Markets aptly describes the traditional OTC market:

Exchange markets and over-the-counter trading markets are fundamentally similar in purpose and functions but substantially dissimilar in mechanics and practices. A brief introductory enumeration of certain of their respective characteristics may help to show their basic similarities and differences and, as to the latter, may help to differentiate between those that are fundamental, inherent or substructural, and those that are merely historical, superficial or incidental.

In general, although exchange markets differ widely among themselves, each exchange market is relatively concentrated, homogeneous and organized. By comparison, over-the-counter markets are diffuse, heterogeneous and more loosely organized.

Over-the-counter markets exist, as organized markets, only as and to the extent that dealers elect to "make" them, by standing ready to buy and sell for their own accounts. As many as 20 or 30 dealers, or as few as 1 or 2, or none, may be trading a particular security at any time. There is no place of congregation of buyers and sellers, and therefore the transaction of business depends on telephone and wire connections through which firms may communicate and negotiate. There are organized systems for interdealer circulation of quotations, and an intricate communications network which permits broker-dealers to keep in touch with one another, directly or indirectly, and to be generally aware of changes in quotations and in buying and selling pressures. The only vestige of a "counter" over which business may be done is at the retail level.

On the exchanges there is a clear-cut definition of who may participate in the auction on the exchange floor, through the concept of exchange membership, or "seats." Furthermore, there is on most exchanges a recognized division of labor among members; the members act within a framework of regulations prescribed by their exchange and the Commission, which governs how particular functions are to be performed and who may perform them.

In the over-the-counter markets there is no institutional limit on who may engage in any particular function with respect to any or all securities, except in the broad sense that all broker-dealers in interstate commerce must register with the Commission, and most over-the-counter broker-dealers are under economic compulsion to join the National Association of Securities Dealers. The latter, which is the over-the-counter markets' only officially recognized central institution, is essentially regulatory rather than operational in function.

For the exchanges there is also a clear-cut definition of what securities may be traded on each exchange, through the concepts of "listing" and controlled "unlisted trading privileges."

In the over-the-counter markets there are no similar concepts or controls, except insofar as the Securities Act of 1933 may limit initial entry into a public market.

Like other major institutions, securities markets in the United States are dynamic rather than static. Historically they have shown a considerable capacity to change, grow, and adapt to the needs of their times, even if not always voluntarily, not always immediately, and not always perfectly--also like other major institutions. In their present forms, each market reflects the results of shifting needs and responses. The process of change and adaptation has not ended. For example, the volume of over-the-counter trading in exchange-listed securities has grown considerably in recent years and apparently is still growing. To mention only one more development, recent improvements in communications and data processing have had notable effects on the mechanics of doing business and the allocation of business, and there are strong indications that the full potential of these developments has not yet been realized.

Special Study, *supra*, Pt. 2, at pp. 7-9, 12.

(n193)Footnote 193. See SEC Staff Report on The Securities Industry in 1981, Exhibit III-1 (1982).

(n194)Footnote 194. International Institute, *supra*, at page 4.

(n195)Footnote 195. A market maker in a dealer market is obligated to make a two-sided continuous market in those securities in which it is registered, to execute orders for a limited number of shares at its displayed prices at all times the market is open and to keep its prices competitive. International Institute, *supra*, at page 4.

(n196)Footnote 196. Loss, Securities Regulation 2578 (3rd Ed. 1990 Supp. 1998).

(n197)Footnote 197. The term "broker" means "any person engaged in the business of effecting transactions in securities for the account of others, but does not include a bank." Section 3(a)(4).

The term "dealer" means "any person engaged in the business of buying and selling securities for his own account, through a broker or otherwise, but does not include a bank, or any person insofar as he buys or sells securities for his own account, either individually or in some fiduciary capacity, but not as part of a regular business." Section 3(a)(5).

Section 15 provides, in part, that it is unlawful "for any broker or dealer to make use of the mails or any means or instrumentality of interstate commerce to effect any transactions in, or to induce or attempt to induce the purchase or sale of, any security unless such broker or dealer is registered in accordance with subsection (b) of this Section." Special

Study, *supra*, Pt. 2 at pp. 546-50:

Just as there is an unlimited right of entry of securities into the over-the-counter markets, there is also virtually free access of persons into the over-the-counter securities business. In February 1962, there were about 5,000 active broker-dealers registered with the Commission. Of these, 3,303 participated in over-the-counter transactions in equity issues in 1961. By comparison, approximately 1,200 member firms participated in trading on the Nation's securities exchanges.

Broker-dealer participants in the over-the-counter markets exhibited vast differences in size, experience, and type of activity. Firms range in size from the large retail firm with a network of branch offices to the sole proprietor principally engaged in distributing mutual fund shares or merchandising a single underwritten issue. The reported over-the-counter sales of stocks by any one broker-dealer during 1961 ranged from less than \$50,000 to \$2 billion.

There is a high concentration of over-the-counter business within a few large firms. Fifty-six broker-dealers, or less than 2 percent of the total number, accounted for half the dollar volume of over-the-counter sales reported by broker-dealers for their own accounts or the accounts of others in 1961. NYSE member firms were responsible for 47 percent of the number of shares sold and 55 percent of the dollar volume of over-the-counter sales during 1961. Of 67 broker-dealers with over-the-counter sales of \$100 million or more in 1961, 43 were NYSE members.

Firms engaging in over-the-counter business show wide differences in professional experience and capital commitment. Some older firms have years of experience in over-the-counter trading while many of the newer firms are managed by persons totally unacquainted with the intricacies of the over-the-counter markets.

As described below, professional activity in the over-the-counter markets breaks down into two general categories--wholesale and retail. The wholesale dealer "makes markets" by standing ready to buy or sell securities for his own account from or to professionals who act for themselves or for the public. The retail firm, on the other hand, is engaged in selling securities to public customers and buying or finding buyers when its customers wish to sell. Some of the most important firms--called "integrated firms"--combine wholesale and retail activities in varying degrees.

In early 1962, there were about 1,100 broker-dealer firms who "made markets" in over-the-counter securities. These firms ranged from sole proprietorships making markets in only 1 or 2 stocks to a few large firms making markets in 200 or more. Almost 40 percent of the dealer firms made markets in five or fewer stocks. Some firms making markets were primarily wholesale dealers who sold principally to other broker-dealers and institutional investors, while others were integrated firms who made markets in order to service their customers. By way of contrast there were 110 specialist units on the NYSE, each registered in an average of 12 common stocks.

(n198)Footnote 198. Since December 6, 1983 all broker-dealers have been required to be registered with a national securities association, *i.e.*, the NASD. Section 15(b)(8), amended by Section 3, P.L. 98-38 (Act of June 6, 1983). As the Commission noted in its 1963 Special Study of the Securities Markets, even before this date brokers had a financial incentive to become members of the NASD: the "bulk of the over-the-counter broker-dealers are members of the NASD. In trading with nonmember broker-dealers, NASD members must charge the same price as they charge the general public, whereas member broker-dealers may be given a "wholesale" price. Thus, there is an important economic pressure on all broker-dealers doing business in the over-the-counter markets, including member firms of the exchanges, to join the NASD." Special Study, *supra*, Part I at 13. The National Association of Securities Dealers, Inc. is discussed in § 3.05 *infra*.

(n199)Footnote 199. Many member firms of the NASD are also members of national securities exchanges and, accordingly, these dual-member firms and their sales staff are subject to the jurisdiction of multiple self-regulatory organizations. *See* SEC Special Studies of the Options Markets, p. 517 (1979).

(n200)Footnote 200. Section 15A of the Exchange Act is discussed in § 2.02[2][c] *infra*.

(n201)Footnote 201. The OTC market makers, ready to buy and sell as individual and institutional orders appear, are vital links in merchandising securities through the OTC distribution network. *NASDAQ and The Listing Dilemma--How the NASDAQ System is Influencing the Corporation Question on Stock Exchange Listing*, 7 (NASD Pamphlet 1973).

A market maker's role is similar in many ways to that of a stock exchange specialist. One important difference, however, is that there is only one specialist making a market in most exchange stocks, while a half-dozen or more market makers may compete in a particular NASDAQ-OTC security, thus adding to market depth and liquidity." *Id.*

(n202)Footnote 202. *See* Special Study, *supra*, Pt. 2 at pp. 550, 553-57, 610.

(n203)Footnote 203. Registration under Section 12(g) of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F, is discussed in § 4.01 *infra*.

(n204)Footnote 204. Periodic reporting requirements are discussed in § 4.02 *infra*.

(n205)Footnote 205. Proxy regulation is discussed in ch. 7 *infra*.

(n206)Footnote 206. Insider transactions are discussed in ch. 8 *infra*.

(n207)Footnote 207. For a discussion of the pre-1971 problems affecting the NASD, see *An Introduction to the NASD*, p. 10 (1982):

Until February 8, 1971, over-the-counter quotes were disseminated by telephones, private wires and printed quotation sheets. Published quotations were generally stale by the time they were disseminated. Locating the best market was, at a minimum, cumbersome and expensive. Important data such as volume and price indices were unavailable.

(n208)Footnote 208. Actually, the "pink sheets" were the stock sheets of the Eastern edition of the quotations published by the National Quotation Bureau, Inc. There were two other editions of the National Daily Quotation Service--the Western edition from Chicago and the Pacific Coast edition from San Francisco. 5 Loss, Securities Regulation 3320 (2d ed. 1961 Supp. 1969). For discussion of the National Daily Quotation Service, see Loss 3317-27.

(n209)Footnote 209. *See* *NASDAQ and the Listing Dilemma--How the NASDAQ System is Influencing the Corporate Question on Stock Exchange Listing*, pp. 5-6. (NASD Pamphlet 1973).

(n210)Footnote 210. The National Quotation Bureau later changed its name to Pink Sheets, LLC, and now offers real-time quotations on some securities. *See* Pink Sheets, at www.pinksheets.com.

Though the OTC market now no longer includes Nasdaq, there still remains an active group of brokers and dealers who participate in the OTC market. Because the volume of trades effected by such individuals is very small, probably less than one percent of the aggregate volume of all securities transactions, there is little attention given to them. Nevertheless, they remain a part of the secondary securities markets and can be important to holders of securities not

eligible for trading on a national securities exchange, such as holders of new issues recently offered by companies that have "gone public."

(n211)Footnote 211. Nasdaq and SuperMontage are discussed in § 2.01[1][a][ii] *supra*.

(n212)Footnote 212. See Sec. Exch. Act Rel. No. 46429 (Aug. 29, 2002).

(n213)Footnote 213. See Sec. Exch. Act Rel. No. 46249 (July 24, 2002) (hereinafter cited as. "ADF Release").

(n214)Footnote 214. ADF Release, *supra*.

(n215)Footnote 215. Sec. Exch. Act Rel. No. 47663 (Apr. 10, 2003); Sec. Exch. Act Rel. No. 49131 (Jan. 27, 2004).

(n216)Footnote 216. ADF Release, *supra*.

(n217)Footnote 217. ADF Release, *supra*.

(n218)Footnote 218. ADF Release, *supra*.

(n219)Footnote 219. ADF Release, *supra*.

(n220)Footnote 220. See Gregory Bresiger, NASD Seeks ADF Extension, Traders Magazine, October 1, 2005. As of January 2006, only three firms used the ADF.

(n221)Footnote 221. Sec. Exch. Act Rel. No. 55181 (Jan. 26, 2007).

(n222)Footnote 222. For discussion of margin requirements, *i.e.*, the amount of credit that may be extended on any security, and the role of the Federal Reserve Board, see § 3A.02[1] *infra*.

(n223)Footnote 223. For continued eligibility, OTC securities must satisfy the following minimum requirements:

- be registered under Section 12(g) of the Securities Exchange Act of 1934;
- have three market makers;
- have 800 public holders of record or average daily trading volume of 300 shares;
- have daily quotations for bid and asked prices continuously available to the public;
- have 300,000 publicly held shares;
- have a minimum average bid price of \$2 per share; and
- be of an issuer that has at least \$1 million of capital, surplus, and undivided profits.

12 C.F.R. 220.11(b). Prior to January 2006, when the Nasdaq Stock Market became registered as an exchange, most OTC stocks satisfying the margin criteria were included in the Nasdaq Stock Market. See Sec. Exch. Act Rel. No. 53128 (Jan. 13, 2006). Since January 2006, Nasdaq stocks have been considered exchange-traded, rather than part of the OTC market, and few OTC stocks will be eligible for margin.

(n224)Footnote 224. The term "alternative trading system" is defined in Rule 300(a) of Regulation ATS as:

any organization, association, person, group or persons, or system:

(1) That constitutes, maintains, or provides a market place of facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange within the meaning of [Rule 3b-16]; and

(2) That does not:

(i) Set rules governing the conduct of subscribers other than the conduct of such subscribers' trading on such organization, association, person, group of persons, or system; or

(ii) Discipline subscribers other than by exclusion from trading.

For a discussion of Regulation ATS, see § 2.02[4] below.

(n225)Footnote 225. Rule 11Ac1-1 defines the term ECN to include as "any electronic system that widely disseminates to third parties orders entered therein by an exchange market maker or OTC market maker, and permits such orders to be executed against in whole or in part." Under Rule 11Ac1-1, the definition of ECN does not include systems that cross multiple orders at specified times only at a price determined by the system and a system operated by or on behalf of a market maker that executes orders primarily against the account of the market maker as a principal, other than a riskless principal. In a "riskless principal" transaction a broker-dealer technically acts as a principal but has arranged for another party to buy or sell from it, which eliminates the risk normally associated with a principal transaction. Sec. Exch. Act Rel. No. 33743 (Mar. 9, 1994).

(n226)Footnote 226. The Island ECN makes its order display available to the public through its "BookViewer." See Island BookViewer, *available at* www.island.com/BookViewer/index.htm (last visited Mar. 19, 2001).

(n227)Footnote 227. Instinet was the first ECN. It was founded in 1969 to allow institutional money managers to trade directly with each other.

CHAPTER 2 Regulation of Securities Markets *

1-2 Federal Securities Exchange Act of 1934 § 2.03

§ 2.03 Regulation of Exchanges, Securities Associations and Alternative Trading Systems

When the Exchange Act was adopted, its primary focus, as evidenced by the title, was organized securities markets, *i.e.*, the stock exchanges, although it covers generally all security transactions including over-the-counter and private transactions. n1 Accordingly, the exchanges are the first subject of the Exchange Act, after Section 2's statement of purpose, the definitions of Section 3, and the establishment of the SEC in Section 4.

Section 5 prohibits any broker-dealer from effecting a transaction in a security on an exchange unless the exchange is either registered as a national securities exchange under Section 6 or is exempt from such registration. n2 The procedures that an exchange must follow, and the standards that it must satisfy to obtain registration with the Commission, are enumerated in Section 6. n3

In 1938, Congress adopted the Maloney Act which amended the Exchange Act by adding new Section 15A n4 to add the concept of a national securities association as a means of recognizing a self-regulatory organization that could oversee the OTC markets. Section an association of brokers and dealers to become registered with the Commission. The NASD (now FINRA), which became registered in 1939, is still the only registered securities association.

Under Section 15A, an association of brokers and dealers may be registered under the terms and conditions contained therein and in accordance with the provisions of Section 19(a) either

- as a national securities association pursuant to Section 15A(b); or
- as an affiliated securities association pursuant to Section 15A(d).

Registration is accomplished by filing an application with the Commission. n5 Once registered, an entity becomes fully subject to the provisions of Section 15A and 19.

The end of the long-standing prohibition on the trading of futures on a single stock, as opposed to a stock market index, complicated the regulatory scheme for national securities exchanges and registered securities associations. Single-stock futures were prohibited for over 20 years as the result of what was, by all accounts, a "turf battle" between the SEC and the CFTC. n6 Congress' adoption of the Commodity Futures Modernization Act of 2000 ("CFMA") legalized single

stock futures, n7 although whether it improved relations between the two regulators is unclear. n8

Under the CFMA, the SEC and CFTC jointly regulate single stock futures. n9 From the securities perspective, the legislation was designed to allow the SEC to exercise limited jurisdiction over commodities exchanges and market participants who otherwise do not engage in securities activities, and whose primary regulator is the CFTC. Commodities markets on which single stock futures are traded therefore must undertake a process known as "notice registration," which is far less burdensome than the traditional registration process. n10 Similarly, a futures association registered with the CFTC under the Commodity Exchange Act must register with the SEC as a "limited purpose national securities association" for the purpose of regulating members of the association who are registered as broker-dealers by virtue of their trading of single stock futures. n11

[1] Prior to the Securities Acts Amendments of 1975

A comparison of Section 6 as it stood prior to the 1975 Amendments n12 and today n13 demonstrates significant differences in the congressional approach to the regulation of securities exchanges. Notwithstanding vigorous criticism of the securities exchanges in the 1930s, n14 Section 6 as adopted originally evidenced a fair amount of deference on several significant matters, *e.g.*, rates and fees that exchange members may charge investors, disciplinary proceedings against exchange members and associated persons, the qualifications and number of exchange members, and access to exchange services by nonmembers. n15 Section 6(c) in particular appeared to embody a Congressional intent to preserve a limited autonomy of the exchanges. n16

Similarly, original Section 19, n17 concerning the powers of the Commission with respect to exchanges, granted a limited, if somewhat ambiguous, mandate. Under this section, the Commission: (1) possessed only cumbersome, ambiguous powers with respect to the rules of self-regulatory organizations such as the exchanges, (2) was unable to enforce a self-regulatory organization's rules directly and (3) lacked authority to review and alter securities exchange disciplinary actions n18. Such deference may have been necessary during the controversial early days of the New Deal. n19 After several decades, however, the situation was quite different. The 1975 Amendments imposed more explicit requirements and limitations on the exchanges and greatly increased the Commission's oversight functions.

In contrast to the ambiguity surrounding its oversight authority of exchanges, the Commission, after Section 15A of the Exchange Act was adopted in 1938, possessed clear and expansive oversight authority over registered securities associations. n20 One of the purposes of the 1975 Amendments was to clarify the Commission's oversight function with respect to exchanges by extending the pattern of regulation applicable to registered securities associations under Section 15A to the exchanges. n21

[2] Under the Securities Acts Amendments of 1975

The 1975 Amendments effected significant changes in the provisions of the Exchange Act governing self-regulatory organizations, n22 such as the securities exchanges and the NASD (now FINRA). n23 The two main purposes of the 1975 Amendments with respect to self-regulatory organizations were:

- (1) to clarify the scope of the responsibilities of such organizations, and the manner in which SROs exercise those responsibilities, and
- (2) to clarify and strengthen the Commission's oversight role.

The Senate Committee on Banking, Housing and Urban Affairs (the "Committee") emphasized its disagreement with the "common and serious misunderstanding" that the "securities industry regulates itself" through the securities exchanges and the NASD, without being subject to government regulation. It also rejected forcefully any suggestion

that the self-regulatory organizations and the Commission are on equal footing. If there is a "partnership" between the self-regulatory organizations and the Commission, the Committee left little doubt as to the senior partner. It stated: "the self-regulatory organizations exercise authority subject to SEC oversight. They have no authority to regulate independently of the SEC's control." n24

Illustrative of the approach taken in the 1975 Amendments are:

- (1) the provisions granting the Commission unequivocal powers over the rules of a self-regulatory organization; n25
- (2) the provisions prescribing the subjects of an organization's rules in terms that impose both affirmative and negative requirements on an organization, *i.e.*, what it *must* do and what it *may not* do; n26 and
- (3) the *repeal* of former Section 6(c) thereby terminating "the seemingly open-ended authority" of exchanges to adopt rules and regulations without prior Commission approval. n27

[a] Application for Registration as a National Securities Exchange and Special and Periodic Reporting Requirements

Section 6(a) of the Exchange Act provides for the registration of a national securities exchange with the Commission n28 under the terms and conditions provided in Section 6 n29 and in accordance with the provisions of Section 19(a) of the Exchange Act. An exchange is required to file an application for registration in such form as the Commission may determine by rule. n30

Rule 6a-1(a) under the Exchange Act provides that an application for registration as a national securities exchange, or for exemption from such registration, is to be made in duplicate on Form 1. n31 Rule 6a-1(b) requires any amendment to Form 1 to be filed in duplicate, dated, and numbered in order of filing, on Form 1-A. An exchange must file an amendment correcting any inaccuracy in the Form 1 or any exhibit or amendment thereto promptly after discovery of the inaccuracy. n32

Within ten days after an exchange, registered as a national securities exchange or exempted from such registration, takes any action rendering inaccurate certain information in its Form 1 or Form 1-A, the exchange must file with the Commission written notice of the action and the effective date thereof. n33 Rule 6a-2 contains an annual filing requirement, but was amended in 1994 to ease the filing burden on exchanges, in light of the increased availability of the required information in other publications. n34 The rule currently requires exchanges to file an amendment to Form 1 by June 30 of each year to update the following: financial statements for the exchange and subsidiaries and affiliates; in the case of an exchange that is not member-owned, information on its owners; the list of its members; and the list of securities listed on or otherwise traded on the exchange. n35 Complete exhibits containing corporate governance documents, rulings and interpretations and information on subsidiaries, affiliates, service providers for trading systems and officers, governors and committee members must be filed every three years. n36 However, an exchange may satisfy the above filing requirements for all of the information, except financial information, through one of three alternative methods: identifying a publication in which the information is contained, and certifying to its accuracy as of the publication date; certifying that the information is kept up to date and available to the Commission and the public upon request; or indicating the location of a website on which the information is available and certifying to the accuracy of the information on the site. n37

Three copies of any material issued or made generally available to members of the exchange must be filed by the exchange with the Commission within ten days of issuance. n38 This information, however, can be provided by indicating its location on a website and certifying to the accuracy of the information on the site. n39 An exchange must file a report with the Commission within fifteen days after the end of each calendar month concerning stock, bonds,

rights, and warrants traded on the exchange during the month. n40

New registrations of national securities exchanges are rare. From 1975 to 2006 there were only two--the registration of the International Securities Exchange, which was approved on February 24, 2000, n41 and Nasdaq's registration, which was approved on January 13, 2006. n42

[b] Application for Registration as a National or Affiliated Securities Association and Special and Periodic Reporting Requirements

An application for registration as either a national securities association or as an affiliated securities association must be made on Form X-15AA-1. n43 Registration statements and applications for registration must be kept current by the filing of amendments n44 and current supplements n45 on Form X-15Aj-1. n46 In addition, an annual consolidated supplement must be filed with the Commission on Form X-15Aj-2 n47 "promptly" after March 1 of each year, and a supplement, setting forth the balance sheet at the close of the fiscal year and the income and expense statement for the fiscal year must be filed "promptly" after the close of each fiscal year of the association. n48

[c] Requirements for Registration as a National Securities Exchange or Securities Association

As discussed above, the registration of an exchange with the Commission as a national securities exchange and the registration of an association of brokers and dealers as a national securities association must be in accordance with the provisions of Section 19(a) of the Exchange Act. n49 Section 19(a)(1) prescribes the procedures to be followed by the Commission after a securities exchange or securities association has filed an application for registration. n50 The Commission must publish notice of the filing and afford interested persons the opportunity to submit written data, views, and arguments. Within ninety days after publication of the notice, or later, if the applicant consents, the Commission must either grant the registration or institute proceedings to determine whether registration should be denied. Such proceedings must include notice of the grounds for denial under consideration and an opportunity to be heard. A proceeding must be concluded within one hundred eighty days of the publication of notice of filing of the application. The time for conclusion of the proceeding may be extended up to ninety days for good cause by the Commission or for a longer period if the applicant consents. Registration must be granted or denied at the conclusion of the proceeding. n51

[i] Organization and Regulatory Capacity

Section 6(b) of the Exchange Act enumerates explicit requirements for registration with the Commission as a national securities exchange, n52 which are substantially identical to the registration requirements under Section 15A for national securities associations.

For an exchange or association of brokers and dealers to be registered, the applicant must be organized so as to have the capacity to:

(1) be able to carry out the purposes of the Exchange Act and the rules thereunder, and

(2) comply, and enforce compliance by its "members" and "persons associated with members," with the Exchange Act, the rules thereunder, and its own rules. n53 If the applicant is a proposed national securities association, Section 15A also requires that the applicant have the capacity to enforce compliance by its "members" and "persons associated with members" with the rules of the Municipal Securities Rulemaking Board ("MSRB"). n54 Moreover, a Section 15A applicant must show that, by the number and geographic distribution of its members and the scope of their transactions, the proposed association is able to carry out the purposes of the Exchange Act. n55

The rules of every applicant under Section 6 or 15A must cover specified purposes and standards, including:

- (1) admission to membership or becoming associated with a member; n56
- (2) fair representation of members in the selection of directors of the applicant and in the administration of its affairs, with issuers and investors being represented by at least one director each; n57
- (3) equitable allocation of dues, fees, and other charges; n58
- (4) prevention of fraud and manipulation and the promotion of just and equitable principles of trade; n59
- (5) fostering cooperation and coordination with persons engaged in regulating, clearing, and settling securities transactions, as well as those processing information with respect to transactions; n60
- (6) promotion of a free and open market and a national market system; n61
- (7) protection of investors and the public interest, without permitting unfair discrimination between customers, issuers, brokers, or dealers and without permitting regulation of matters not related to the purposes of the Act or the administration of the applicant; n62
- (8) appropriate disciplining of members and persons associated with members for violations of the Exchange Act, the rules thereunder or the rules of the applicant and, for Section 15A applicants, the rules of the MSRB; n63
- (9) provision of a fair procedure for disciplining members and persons associated with members in accordance with the due process requirements set forth, as applicable, in either Section 6(d) or Section 15A(h); n64
- (10) provision of a fair procedure for the denial of membership to an applicant, the barring of any person from becoming associated with a member, and the prohibition or limitation of access to services offered by the applicant or a member; n65
- (11) avoidance of the imposition of any burden on competition not necessary or appropriate in furtherance of the Act; n66 and
- (12) no rule may fix minimum profits, impose any schedule, or fix any rates of commission, allowances, discounts or other fees to be charged to members. n67

In addition, the rules of an applicant under Section 15A:

- (1) must satisfy the requirements of Section 15A(c) relating to an affiliated securities association, if applicable; n68 and
- (2) provide for the form, content, and distribution of securities quotations distributed or published by any member or person associated with any member, relating to OTC securities not sold on a national securities exchange and the persons to whom such quotations may be supplied. n69

The former requirement that an exchange agree to comply, and to enforce compliance, with the provisions of the Exchange Act has been deleted, presumably as being unnecessary. n70 However, the rules of an exchange, like those of a securities association, must provide for the expulsion, suspension, or discipline of a member or persons associated

with a member for conduct that violates any provision of the Exchange Act, the rules or regulations thereunder, or the rules of the applicant, including rules mandating adherence to just and equitable principles of trade. n71

[ii] Elimination of Unnecessary Regulatory Restrictions

Neither an exchange nor a securities association can be registered unless the Commission determines that the applicant's rules do not impose any burden on competition that is unnecessary or inappropriate in furthering the purposes of the Exchange Act. n72 This is only one of several provisions added by the 1975 Amendments directing the Commission to review burdens on competition. n73 Under Sections 15A(b)(9) (rules of securities associations), 19(b) (proposed rule changes of self-regulatory organizations) n74 and 19(c) (Commission amendment of rules of self-regulatory organizations), n75 as well as under Section 6(b)(8), the Commission must review the existing, and proposed, rules of the organization and set aside or amend any rule having the effect of a competitive restraint not necessary or appropriate in furtherance of the purposes of the Exchange Act.

Under Sections 19(e) and (f), n76 in reviewing any final disciplinary sanction or exclusionary action of a self-regulatory organization, the Commission or other appropriate regulatory agency must set aside any action imposing an unnecessary or inappropriate burden on competition.

Section 23(a)(2) requires the Commission to consider the effect of its own proposed rules on competition and prohibits the Commission from adopting any rule that would impose an unnecessary or inappropriate burden on competition.

Under Section 12(f)(2) of the Exchange Act, the Commission has been directed to deny applications for unlisted trading privileges by national securities exchange if any rule of the national securities exchange would unreasonably impair competition in the markets for the security. n77

Under Section 6(e), n78 the Commission cannot permit a national securities exchange, by rule, to impose a schedule or fixed rate of commissions, allowances, discounts, or other fees to be charged after November 1, 1976, unless the Commission finds that such schedule or fixed rates further the purposes of the Exchange Act without imposing any unnecessary or inappropriate burden on competition. n79 Similarly, Section 15A(b) provides that the rules of a registered securities association may not establish minimum profits or fix commissions, allowances, discounts, or other fees. n80

As to the anticompetitive effects of exchange rules restricting members from effecting transactions off the exchange, Section 11A(c)(4) originally directed the Commission to:

- (1) review national securities exchange rules that limit or condition the ability of members to effect transactions in securities off the exchange;
- (2) report the results of its review to Congress within ninety days following the enactment of the Securities Acts Amendments of 1975; and
- (3) commence a proceeding under Section 19(c) to amend any rule imposing an unnecessary or inappropriate burden on competition. n81

[iii] Additional Considerations Regarding Applications Under Section 15A

[A] Affiliated Securities Associations

The Commission has the authority to permit or require the rules of an applicant for registration as a national securities association to provide for the admission of an association, registered as an affiliated securities association pursuant to

Section 15A(d), to participation in the applicant securities association as an affiliate of the association:

- (1) under terms permitting such powers and responsibilities to the affiliated securities association; and
- (2) under such other appropriate terms and conditions, as may be provided by the rules of the applicant securities association. n82

The rules of the applicant securities association, governing the admission of an affiliated securities association thereto, must appear to the Commission to be appropriate in the public interest or for the protection of investors, and to carry out the purposes of Section 15A. n83 Furthermore, any affiliation between a national securities association and an affiliated securities association does not in any way limit the duties and powers of the Commission regarding either association. n84

For a securities association to be registered as an affiliated securities association, the Commission must be satisfied that:

- (1) the applicant, whether or not it satisfied the requirements of Section 15A(b)(1), "forthwith upon the registration thereof" will be admitted to affiliation with an association previously registered as a national securities association, according to the rules of such national securities association as provided in Section 15A(c); n85 and
- (2) the applicant and its rules must satisfy the requirements of Section 15A(b)(2) through (10) and (12); n86 however, any restrictions of the type authorized by Section 15A(b)(3) n87 cannot be less stringent than those of the national securities association with which the applicant is to be affiliated. n88

[B] Dealings by Members With Nonmember Professionals

The rules of a registered securities association may provide that no member may deal with a "nonmember professional" except at the "same prices, for the same commissions or fees, and on the same terms and conditions as are by such member accorded to the general public." n89

A "nonmember professional" is a registered broker or dealer, including a municipal securities broker or dealer, that is not a member of a registered securities association. n90 An exception is made for banks that are municipal securities dealers: such banks are not regarded as "nonmember professionals." n91

The rules of an association may not, however, prevent an association member or a municipal securities dealer that is a bank, or division or department of a bank, from granting to any other member of any registered securities association or any municipal securities dealer that is a bank, any dealer's discount, allowance, commission, or special terms in connection with the purchase or sale of securities, including, in the case of municipal securities dealers, municipal securities. n92 However, any dealer's discount, allowance, commission, or special terms granted in connection with the purchase or sale of municipal securities is subject to the rules of the MSRB adopted pursuant to Section 15B(b)(2)(K). n93

[d] Withdrawal From Registration as a National Securities Exchange or Securities Association

A self-regulatory organization n94 may withdraw from registration:

- (1) upon such terms and conditions as the Commission, by rule, deems necessary or appropriate in the public interest or for the protection of investors; and
- (2) by filing a written notice of withdrawal with the Commission. n95

The Commission may cancel the registration of a self-regulatory organization if it no longer exists or has ceased doing business in the capacity specified in its application. n96

[3] Under the Commodity Futures Modernization Act of 2000

Under the CFMA, because single stock futures are considered both securities and futures, an exchange that trades these products must be registered as a national securities exchange. n97 However, under Section 6(g) of the Exchange Act, which was added by the CFMA, a commodities market may register as a national securities exchange for the limited purpose of trading single stock futures, through a process known as "notice registration," if it is subject to the regulation of the CFTC, either as a "contract market" or a "derivative transaction execution facility," is in good standing with the CFTC, and does not serve as a securities market other than with respect to single-stock futures or futures on broad-based indices. n98 A notice registration filed by a commodities market is effective upon filing with the Commission, unless its CFTC registration is subject to revocation by that agency. n99 Similarly, a self-regulatory organization in the commodities industry may become registered as a "limited purpose national securities association" under Section 15A(k) of the Exchange Act. n100

The Commission adopted Rule 6a-4 to implement the registration provisions of the CFMA. Rule 6a-4 is modeled after Rules 6a-1, 6a-2 and 6a-3, which govern the initial registration, filing of amendments to registration statements and filing of supplemental information for traditional national securities exchanges, but its requirements are less onerous. n101 Rule 6a-4 provides that a commodities market that satisfies the requirements described above may register as a national securities exchange solely for the purpose of trading single stock futures by filing Form 1-N, which was adopted specifically in connection with the notice registration process. Rule 6a-4 also provides that the information in Exhibit F of Form 1-N, which requires information on the owners of an exchange which is not wholly owned by members, must be updated within 30 days after it becomes incorrect or incomplete, and that the information on the execution page of the form must be updated within ten days. n102 Most of the remaining information must be kept up to date merely by making the updated information available to the public and the SEC upon request, filing an updated exhibit once every three years, or some combination of these two methods. n103

Under Rule 6a-4(c), a commodities exchange must file with the SEC any materials relating to the trading of single stock futures, such as notices or periodicals, within ten days after making the information publicly available. n104 This information may also be provided by reference to the exchange's website. n105 Commodities exchanges trading single stock futures must file a report within 15 days of the end of each month with information on the number of contracts and the number of shares underlying the contracts for each single stock future traded on the exchange. n106

[4] Regulation ATS

The Commission's adoption of Regulation ATS in 1998 was designed to address numerous issues raised by the emergence of alternative trading systems, primarily ECNs. By the time Regulation ATS was adopted more than twenty percent of orders for Nasdaq securities and almost four percent of orders for exchange-listed securities occurred on alternative trading systems. n107 In conjunction with the adoption of Regulation ATS, the Commission adopted Rule 3b-16 to clarify the definition of an "exchange." The adoption of Rule 3b-16 clarified the applicability of the definition of an "exchange" to electronic trading systems but also granted the Commission authority to exempt systems from the definition. n108 Under Rule 3b-16, an entity will generally be considered an exchange if it brings together buyers and sellers and establishes fixed rules for executing their orders. n109

Regulation ATS is designed to impose new regulations on electronic trading systems without requiring them to register as an exchange. Rule 3a1-1, accordingly, exempts systems from the definition of exchange if they comply with Regulation ATS and do not exercise self-regulatory responsibilities. n110 Rule 3a-1, accordingly, exempts systems from the definition of an exchange if they are operated by a national securities association, comply with Regulation

ATS, or are exempt from Regulation ATS. A trading system will lose its exemption from the definition of an exchange if the system exceeds certain volume levels and the Commission determines, after giving the system notice and an opportunity to respond, that an exemption is not appropriate. n111

Regulation ATS n112 is designed to allow developing systems with low volume to operate with minimal regulatory burdens. Systems with larger volume must comply with more extensive regulation of their quotation dissemination and access standards, depending on the significance of their market presence. n113 "Alternative trading system" is generally defined to include any organization or system that meets the definition of an exchange but does not set rules governing subscribers' conduct, other than trading conduct, and does not discipline subscribers other than by prohibiting them from trading on the system. n114 Some entities that are subject to a separate regulatory scheme, either under the Exchange Act or banking laws, or which have been granted an exemption from registration as an exchange based on limited trading volume, are exempt from Regulation ATS under Rule 301. n115 The Commission also may exempt a trading system from some or all of the requirements of Regulation ATS. n116

Trading systems subject to Regulation ATS must register as broker-dealers. n117 Systems subject to Regulation ATS must also file an initial operation report, on Form ATS, at least twenty days before beginning operations as a trading system. n118 Amendments to Form ATS are required if a system proposes a material change to its operations, learns that the form was inaccurate when filed, or if the form was accurate when filed but later becomes inaccurate. n119 A trading system must file a "cessation of operations" report if it ceases to operate as an alternative trading system. n120 Filings under Regulation ATS are confidential, but are treated like other reports filed under the Exchange Act for purposes of liability for false or misleading statements. n121

Regulation ATS has provisions governing public display and execution of orders. However, these provisions apply only to "NMS stocks," which are generally exchange-listed securities. n122 Whether a system is subject to these provisions depends upon the volume in a particular covered security, not the total volume of the system. As a result, a trading system could be subject to the requirements of Regulation ATS for some securities but not others. If a trading system displays orders for a particular security, either to subscribers or third parties, and had trading volume during four of the previous six months of at least five percent of the total average daily volume of the security, it must supply the best prices to a national securities exchange for public dissemination. n123 Rule 301(b)(3) also requires that a system provide registered broker-dealers with an ability to execute against orders placed in the system for these securities. n124

Alternative trading systems such as ECNs charge access fees to their subscribers. n125 However, because alternative trading systems are in many cases required under Regulation ATS to make their orders available to broker-dealers that do not subscribe to the system, Regulation ATS also addresses the ability of ECNs to charge fees to these non-subscribers. Under Rule 301(b)(4) alternative trading systems are prohibited from charging fees that are "inconsistent with [the] equivalent access to the system" required by Rule 301(b)(3). n126

Trading systems subject to Regulation ATS must establish written standards for granting access to its system and may not apply the standards in a discriminatory or unfair manner. If a trading system is subject to Regulation ATS it also is required to keep records and make reports of access grants and denials for any security in which it has twenty percent or more of the average daily volume. n127 The fair access provisions, like the public display and order execution provisions, are applied on a security-by-security basis. A trading system can therefore arbitrarily exclude access to trades in some securities but not others. n128 Systems which match customer orders, without displaying them, at a price on or derived from an automated quotation system or transaction reporting plan are exempt from the fair access requirements. n129

Regulation ATS has system capacity, integrity, and security requirements for alternative trading systems that meet certain volume thresholds. n130 Like the fair access, public display and order execution standards, the system capacity, integrity and security requirements are applied on a security-by-security basis. n131 Systems that match orders are exempt from the system capacity, integrity, and security provisions. n132

Regulation ATS has extensive record keeping requirements. n133 Trading systems subject to the regulation must preserve certain records for at least three years, the first two years in an "easily accessible place." n134 In addition, some records that are not required must nonetheless be retained for three years if created. n135

A trading system must retain, for the entire period of its existence, copies of its organizational documents, such as articles of incorporation and copies of reports filed with the Commission. n136 Records required under Regulation ATS can be kept electronically, and trading systems may be maintained by a third party if certain procedures are followed. n137 Records kept under Regulation ATS are subject to examination by the Commission. n138

Systems subject to Regulation ATS are required to file quarterly reports on Form ATS-R. n139 The form must include the volume of trading in each class of security traded on the system, such as exchange-listed stocks, and listed options, by share or other unit of trading and by dollars, and information on denials of access to the system. n140 Regulation ATS also requires systems to establish procedures to protect confidential trading information. n141 Trading systems may not use the word "exchange" or a similar term, such as "stock market," in their names. n142

FOOTNOTES:

(n1)Footnote 1. There is some doubt that Congress had in mind the private transaction when adopting the Exchange Act. The statement of purposes in Section 2 refers only to transactions on the exchanges and in the OTC market. However, the courts have consistently ignored this fact and have applied the Act to private transactions not involving any broker-dealer or the mechanics of either security market. *See, e.g., Robinson v. Difford*, 92 F. Supp. 145, 147-49 (E.D. Pa. 1950):

Defendants' first argument for the dismissal of the complaint is that the Securities Exchange Act does not apply where, as in the present case, the securities in question were neither registered on a national exchange nor traded in the over-the-counter market. Clearly this argument is without foundation.

The Act applies both to securities registered on a national securities exchange and to 'any security not so registered.' Rule X-10B-5 [now Rule 10b-5] clearly makes the acts set forth in the complaint unlawful. Consequently, the Act applies to the present case even though the securities involved were not registered on a securities exchange and were never traded in the over-the-counter market. This is so clear from the language of section 10(b) itself that no other proper interpretation is possible. However, defendants vigorously contend that the limited purpose of the Act was to regulate only transactions in securities registered on a national exchange or traded in the over-the-counter market, and not to regulate private transactions. In support of this contention they point to the preamble statement (section 2, **15 U.S.C.A. 78b**) of the general purpose of the Act and to statements made by members of Congress when the Act was under consideration therein. Without deciding that these statements do show such a limited purpose as is contended by defendants, this court must reject defendants' contention, because section 10(b) itself, under which the present action was brought, is unambiguous. Reliance on the preamble statement of section 2 in order to alter the plain and unambiguous provisions of section 10(b) would violate a basic canon of statutory construction that statements in a preamble may be referred to only for the purpose of clarifying an ambiguity in a statutory provision. Likewise, the legislative history of an act may not properly be considered in construing an unambiguous statutory provision such as section 10(b). There are no other sections of the Act which indicate that Congress intended to limit the application of the Act to transactions involving either registered securities or unregistered securities traded in the over-the-counter market. (Footnotes omitted.)

Indeed, the first case holding that Rule 10b-5 under Section 10(b) would support a private civil action involved a

controversy growing out of a private transaction between the four shareholders of a closed corporation. *Kardon v. National Gypsum Co.*, 69 F. Supp. 512 (E.D. Pa. 1946), 73 F. Supp. 798 (E.D. Pa. 1947), 83 F. Supp. 613 (E.D. Pa. 1947). *See, generally*, § 5.01 *infra*.

See also *Fratt v. Robinson*, 203 F.2d 627, 630-631 (9th Cir. 1953):

We think the whole tenor of the Act indicates that its operative procedure is by regulation of security-transfer businesses and persons who function in or through them. That 'stock exchange' and 'over-the-counter markets' mean, in the Act, any security-transfer business wherein the businesses of marketing securities is conducted. We think the authors of the Act realized that the remedy of the abuses sought to be applied by the Act would be more or less completely effective in the proportion of security-trading done on or through the established businesses. To this end § 10 was enacted in order that those who desire to promote crooked deals would see little advantage in using devious methods to bypass the security-dealing business houses under regulation. And, further, that prospective crooked deals would be under a powerful deterrent by reason of the fact that perpetrators of fraud in security exchanges would be in violation of federal laws and, as we shall see in our discussion under the next point to be considered herein, would be answerable in damages in federal courts to those they have injured.

We are in substantial agreement with Judge Clark's dissenting opinion in the case of *Baird v. Franklin*, 2 Cir., 1944, 141 F.2d 238, 244, *cert. denied*, 323 U.S. 737, 65 S. Ct. 38, 89 L. Ed. 591, as to which we shall have more to say presently, wherein he construed § 6(b) of the same Act upon the point under consideration as we construe § 10 and, as we see it, such construction conforms to the intent of Congress as expressed in the Act's preamble, that is, to make the control of security transactions 'reasonably complete and effective.' Without going into the details of the legislative history, and we have made some examination thereof, we believe our construction is in harmony therewith.

The decisions on the point, save the one in the case we are now reviewing, are in accord with our conclusion, but the reasoning of the several courts varies. Some of the courts take the straight road, that no matter about the rest of the Act, the wording of the section is too plain to admit of extraneous matter in explanation of its meaning. Some say, as does the Commission, that over-the-counter security transfers include all security transactions not made through 'stock exchanges' and therefore all transfers covered by § 10 are included in the preamble and sections of the Act following it. The terms 'stop-gap,' 'plugging a loop-hole' and 'catch-all' have been applied to § 10. Each expression has been used in argument to support the theory that the questioned section was placed in the Act to more perfectly effectuate the primary purposes of the Act. There appears to be a logic in all these roads to the common destination. There is one phase common to the reasoning of all the cases: § 10 is in aid of the end sought by the Act, to-wit, the lessening of fraudulent and sharp practices in the securities market. We hold that the district court erred in holding that the facts as alleged in the complaint are outside the purview of the Act, and that it was error to dismiss the action. (Footnotes omitted.)

Accord, *Errion v. Connell*, 236 F.2d 447 (9th Cir. 1956); *Miller v. Bargain City, U.S.A., Inc.*, [1964 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,360 (D. Pa. 1964).

See also *Schine v. Schine*, 250 F. Supp. 822, 823 (S.D.N.Y. 1966), *appeal dismissed*, 367 F.2d 685 (2d Cir. 1966):

First, the defendants move to dismiss the complaint for lack of subject matter jurisdiction pursuant to Rule 12(b)(1) of the Federal Rules of Civil Procedure. The defendants here advance a contention repeatedly urged upon the courts from the inception of the 1934 Act, to wit, that section 10(b) does not apply to transactions in the instance of closely held or family-owned corporations, but was intended by Congress to reach deceptive and manipulative practices only in instances of the purchase and sale of

1-2 Federal Securities Exchange Act of 1934 § 2.03

securities registered on a national exchange or publicly traded and distributed. This court recently rejected such a contention in analogous circumstances, holding that as long as the jurisdictional requirements as to the use of commerce are satisfied, it matters not that the securities transaction was private. Other courts which have considered the question uniformly have ruled adversely to the defendants' contention. (Footnotes omitted.)

(n2)Footnote 2. *See* Federal Home Loan Mortgage Corporation, [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,677 (Dec. 14, 1973); USF Mortgage Exchange, [1971 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 78,636 (Oct. 18, 1971).

As of December 31, 2004, there were nine registered national securities exchanges. *See* 2004 SEC Annual Report, *supra*, at Table 12. This does not include two exchanges registered solely for the purpose of trading single stock futures, and Nasdaq, which at the time was not registered as a national securities exchange. In addition, the Arizona Stock Exchange operates pursuant to an exemption from registration granted by the SEC. Sec. Exch. Act. Rel. No. 37271 (June 3, 1996).

There were originally a far greater number of exchanges, but the ranks were thinned by mergers and dissolutions. Thirty exchanges filed applications for registration, practically all of them in 1934. At one time, as many as twenty-five exchanges were registered. 2 Loss, Securities Regulation 1170 (2d Ed. 1961 Supp. 1969). In addition, not all exchanges trade the same category of securities, *See* § 2.01[1] *supra*. *See also* Board of Trade of the City of Chicago v. SEC, [1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,555 (7th Cir. 1989) (SEC order registering system covering trading in options and government securities remanded to the Commission for determination of essential preliminary question whether the system constituted an "exchange" under Section 3(a)(1) of the Exchange Act.

(n12)Footnote 12. Act of June 4, 1975, P.L. 94-29, **89 Stat. 97**.

Section 6 formerly required that a securities exchange enter into an agreement with the Commission as a condition to registration as a national securities exchange. The agreement, in substance, required the exchange "to comply, and to enforce so far as is within its powers compliance by its members, with the provisions of [the Exchange Act], and any amendment thereto and any rule or regulation made or to be made [t]hereunder." As the 9th Circuit observed in *Hughes v. Dempsey-Tegeler and Co., Inc.*, 534 F.2d 156 (9th Cir.), *cert. denied*, 429 U.S. 896 (1976):

Private suits have been allowed against exchanges for violation of Section 6 on two legal theories. The first, established by the leading case of *Baird v. Franklin*, 141 F.2d 238, *cert. denied*, 323 U.S. 737, 65 S. Ct. 38, 89 L. Ed. 591 (1944), is essentially a tort theory in which the duty element is supplied by § 6(b) of the Act. The second theory, suggested in the *Baird* case, *supra*, and subsequently adopted in *Weinberger v. New York Stock Exchange*, 335 F. Supp. 139 (S.D.N.Y. 1971), is that the private plaintiff can sue as a third party beneficiary of the agreement required by § 6 (a) of the Act between the registered exchange and the Commission. In our view, the content of that duty is the same under either of the two theories.

The Supreme Court has, of course, recently handed down several decisions bearing on the question of whether a private right of action is to be implied under a statute which does not expressly provide for such a right of action. *See Cort v. Ash*, 422 U.S. 66, 95 S. Ct. 2080, 45 L. Ed. 2d 26 (1975); *Securities Investor & Protection Corp. v. Barbour*, 421 U.S. 412 95 S. Ct. 1733, 44 L. Ed. 2d 263, 4 C.B.C. 274 (1975). The parties have not argued and we find no reason to conclude that the factors enunciated in those decisions mandate a reversal of the longstanding rule that a private right of action is available under Section 6. *Id.*, at 166 n.5.

The Second Circuit has limited the application of *Hughes* to private actions brought by public investors. In *Lank v. New York Stock Exchange*, 548 F.2d 61 (2d Cir. 1977), the court concluded that:

The beneficiary of the 1934 legislation was intended to be the public investor. One finds in the Act and its legislative history no indication of intention to benefit members of the ex-changes at the expense of the exchange itself. 548 F.2d at 65.

It was the intention of Congress to draw a clear line of demarcation between public investors, on the one hand, who may assert claims against a stock exchange for damages arising out of violations of Section 6, and, on the other hand, members of those exchanges, who may not. Congress did not enact Section 6 for the purpose of affording protection to those very members of the stock exchanges whose conduct was being regulated at the expense of those exchanges. We, therefore, hold that a securities exchange is not liable to a member organization for failure to force the member to comply with the exchange's rules. *Id.* at 66.

Moreover, with respect to the right of third party beneficiaries to commence civil actions against an exchange for violation of Section 6, the court in *Lank* also concluded that such beneficiaries:

... [stand] in the shoes of the corporation and can assert only those claims which the corporation could have asserted.

... Since the member corporation may not sue the exchange, neither may its receiver nor its creditor, for the latter cannot bring themselves within the protective class. To the extent that a receiver's recovery in a Section 6 suit would benefit public investors those investors already have a cause of action in their own right under *Baird v. Franklin* and the receiver's suit would add nothing to those rights. To allow the

receiver to sue as a representative of the corporation's creditors would be to allow the corporation itself to sue, for ultimately the recovery is the same. Finally, to allow the receiver but not the corporation to sue would create the anomalous situation of allowing recovery only where the corporation becomes insolvent and enters receivership while denying recovery by a going concern which suffered the same sort of injury.

548 F.2d at 67.

See also Carr v. New York Stock Exchange, 414 F. Supp. 1292 (N.D. Cal. 1976).

Where there is judicial recognition of a right of an investor to sue as a third party beneficiary, the plaintiff may take advantage of the longer statute of limitations applicable to suit based on contract, as opposed to the shorter period provided for suit on a liability created by statute. *Arneil v. Ramsey*, 414 F. Supp. 334 (S.D.N.Y. 1976), *aff'd*, 550 F.2d 774 (2d Cir. 1977); *Fischer v. New York Stock Exchange, Inc.*, 408 F. Supp. 745 (S.D.N.Y. 1976); *Lank v. New York Stock Exchange, Inc.*, 405 F. Supp. 1031 (S.D.N.Y. 1975), *rev'd on other grounds*, 548 F.2d 61 (2d Cir. 1977).

In *Lank, supra*, the District Court applied the contract period of limitations even though the plaintiff had alleged only a breach of statutory duty, since a dismissal based on expiration of that period of limitations could be avoided by an amendment of the complaint to allege breach of the agreement. The District Court noted that the Securities Acts Amendments of 1975 deleted the statutory requirements of an agreement from Section 6. *See S. Rep. No. 94-75*, 94th Cong., 1st Sess., 33-34 (1975):

At present, an exchange's responsibility for its members' compliance with the Exchange Act and regulations thereunder takes the form of an agreement filed by the exchange with the Commission 'to comply, and to enforce, so far as is within its powers compliance by its members, with the provisions of this title.' This formulation is replaced by a provision in Section 6(b)(1) to the effect that, when the Commission permits registration of an exchange, it must appear that the exchange is so organized and has the capacity to comply with and enforce compliance by its members and persons associated with its members with the Exchange Act, the rules and regulations thereunder, and the rules of the exchange. In making this change the Committee has omitted the phrase 'so far as is within its powers' as superfluous. Section 19(g) would obligate a self-regulatory organization 'absent any reasonable justification or excuse' to enforce compliance by its members or participants with applicable provisions of the Exchange Act and its own rules. In Section 19(h)(1), the SEC or other appropriate regulatory agency would be authorized to sanction any self-regulatory organization which fails to enforce compliance by its members 'without reasonable justification or excuse.' The Committee believes the standard in these Sections appropriately defines the responsibility of the self-regulatory organizations. Such organizations should never be placed in the position of being insurers of their members' compliance. They do, however, have an obligation to enforce applicable provisions of the Exchange Act and their own rules which they should not be permitted to avoid except for a good cause.

The Amendments did not affect the plaintiff in *Lank* because they took effect after the time period involved in that action.

The Second Circuit has recognized, however, a cause of action against a securities exchange based on the failure of the exchange to use reasonable diligence in supervising and disciplining a member firm. *Rich v. New York Stock Exchange*, 522 F.2d 153 (2d Cir. 1975). The majority opinion in *Rich* characterized the plaintiff's cause of action as being based on a negligence standard. *Id.* at 155 n.4. *But see Hochfelder v. Midwest Stock Exchange, infra.*

See also *Bosco v. Serhant*, 836 F.2d 271, 278 (7th Cir. 1987) (The appeals court asserted that a cause of action against a securities or mercantile exchange would be valid "if [the] exchange's regulation imposes a duty that the exchange should know is being flouted." The exchange would then be acting "wrongfully" and bad faith would be established using a negligence standard).

See also *Brawer v. Options Clearing Corp.* 807 F.2d 297 (2d Cir. 1986).

In general, investors also lack an implied private right of action for violations by member firms of exchange rules. *See* *Sacks v. Reynolds Secur., Inc.*, 434 F. Supp. 37 (D.D.C. 1977); *Zagari v. Dean Witter and Co., Inc.*, [1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,777 (N.D. Cal. 1976); *Colonial Realty Corporation v. Bache & Co.*, 358 F.2d 178 (2d Cir. 1966).

(n13)Footnote 13. *See* § 2.02[2] *infra*.

(n14)Footnote 14. The Act was adopted after the hearings of the "Pecora Investigation," *see* "Stock Exchange Practices," S. Rep. No. 1455, 73d Cong., 2d Sess. (1934), *reprinted in* the Securities Primary Law Sourcebook, Volume C, Section I of the 1934 Act. Securities Exchange Bill of 1934, H. R. Rep. No. 1383, 73d Cong., 2d Sess. (1934), confirmed the existence of unsavory practices in the securities markets in the period following World War I and continuing into 1934. Those conditions included dishonesty in securities transactions in the banking and securities industries, abuse of "inside information" by directors, officers, and principal stockholders of publicly-held companies, refusal of corporate managements to render fair and adequate reports to security holders, and ultimately disastrous speculation in securities by means of margin accounts collateralized by securities valued at unrealistically high prices, *i.e.*, at prices supported only by the speculative hysteria in the markets preceding the Depression, "discounting the hereafter."

As a consequence, the Exchange Act was originally intended to have its greatest effect on the stock exchange markets and issuers whose securities were listed on the exchanges, although the Commission (by Section 4 of the Act) was also given certain powers as to the over-the-counter markets.

With respect to issuers, the effects of the Exchange Act were originally confined to issuers whose securities were listed on a national stock exchange. They were required to file periodic and annual reports with the Commission and the exchanges on which their securities were listed. They were also required to supply information concerning matters to be voted on at annual and special meetings to security holders if their proxies were solicited. Additionally, the directors, officers, and principal stockholders of listed companies were required to report their holdings of equity securities of their companies and to disgorge profits realized in "short-swing" trading in such securities, *i.e.*, any purchase and sale, or sale and purchase, within a period of less than six months.

In 1964, the provisions of the Exchange Act previously applicable only to issuers of listed securities were imposed on the much larger number of corporations whose equity securities are traded over-the-counter. An issuer with total assets of three [now effectively ten for most issuers] million dollars and a class of equity security held of record by five hundred or more persons must register the security under the Exchange Act as amended. *See* § 4.01[2] *infra*). Such an issuer then becomes subject to the reporting and proxy requirements of the Act and its directors, officers, and principal stockholders become subject to the equity security reporting requirement and to liability for "short-swing" profits. In 1968 the Williams Act amendments to the Exchange Act imposed disclosure requirements on persons acquiring substantial holdings of equity securities that are registered under the Exchange Act, as well as securities of investment and insurance companies, and on persons making "tender offers" for such securities. The Williams Act amendments also empowered the Commission to prescribe rules regarding repurchase of equity securities by their issuers. The Williams Act amendments to the Exchange Act are discussed in ch. 7A *infra*.

(n15)Footnote 15. In addition to the agreement between an exchange and the Commission discussed above,

Section 6(a) of the Exchange Act required an exchange, as part of a registration statement filed with the Commission, to agree to furnish the Commission "copies of any amendments to the rules of the exchange forthwith upon their adoption." Section 6(a)(4). The registration statement of an exchange as a national securities exchange had to contain the data that the SEC required as necessary or appropriate in the public interest or for the protection of investors concerning the organization, rules of procedure, and membership of the exchange. Section 6(a)(2) of the Securities and Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F. Furthermore, the exchange had to provide the SEC with copies of its constitution, articles of incorporation, and rules. Section 6(a)(3).

Under Section 6(b), an exchange could not be registered as a national securities exchange unless the rules of the exchange provided for expulsion, suspension, or disciplining of a member "for conduct or proceeding inconsistent with just and equitable principles of trade" and the rules of the exchange provided that the willful violation of the Exchange Act or any rule or regulation thereunder would be considered "conduct or proceeding inconsistent with just and equitable principles of trade."

The Commission was required by Section 6(d) to register an exchange as a national securities exchange if (1) the exchange was so organized to be able to comply with the Exchange Act and the rules and regulations thereunder, and (2) the rules of the exchange were just and adequate to insure fair dealing and to protect investors.

Section 6(e) concerned the procedure the Commission had to follow in granting or denying registration as a national securities exchange.

Section 6(f) provided for withdrawal of a registration by an exchange.

(n16)Footnote 16. Section 6(c), prior to the 1975 Amendments, stated:

Nothing in this title shall be construed to prevent any exchange from adopting and enforcing any rule not inconsistent with this title and the rules and regulations thereunder and the applicable laws of the State in which it is located.

(n17)Footnote 17. Section 19 was proposed originally in 1934 as Section 18, "Powers With Respect to Exchanges and Securities," in H.R. Rep. No. 1383, 73d Cong., 2d Sess. (1934).

(n18)Footnote 18. The powers of the Commission with respect to exchanges in original Section 19 are discussed in H.R. Rep. No. 1383, 73d Cong., 2d Sess. (1934) reprinted in the Securities Primary Law Sourcebook, Volume C, Section I of the 1934 Act.:

Subsection (a) authorizes the Commission when it deems such action necessary-(1) to suspend or withdraw registration of an exchange which the Commission finds has violated the act or the rules and regulations thereunder or has failed to take adequate steps to enforce compliance therewith by its members, (2) to deny, postpone, suspend, or withdraw the registration of the security in case of violation by the issuer, (3) to suspend or expel a member or officer of an exchange who is guilty of a violation or of aiding a violation by acting as broker for a person whom he has reason to believe is engaged in a violation, and (4) summarily to suspend trade in any registered security for a period not exceeding 10 days or with the approval of the President of the United States summarily to suspend all trade on a registered exchange for not more than 90 days. Orders issued pursuant to (1), (2), and (3), must be preceded by appropriate notice and opportunity for hearing; action under (4) is of an emergency nature and therefore limited in time.

Subsection (b) authorizes the Commission to amend the rules of an exchange in certain particulars by rules and regulations, after the exchange has failed to comply with the Commission's written request

for such amendment of the rules of the exchange as the Commission deems necessary or appropriate for the protection of investors or to insure fair dealing or administration of the exchange.

See *San Francisco Mining Exchange v. SEC*, 378 F.2d 162 (9th Cir. 1967), affirming an order of the SEC, entered pursuant to Section 19(a)(1) of the Exchange Act, withdrawing the registration of the San Francisco Mining Exchange. Oversight by the SEC of the self-regulatory activities of an exchange is discussed in § 2.03[5] *infra*

(n19)Footnote 19. See Schlesinger, *The Coming of the New Deal*.

(n20)Footnote 20. As Congress observed in debating the enactment of the Securities Acts Amendments of 1975:

When the [Exchange] Act was adopted in 1934 it contained a very brief section dealing with the national securities exchanges, and did not treat at all the subject of the over-the-counter market. In 1938 this was rectified by the passage of the Maloney Act, which added Section 15A to the Securities Exchange Act. That section provided for the establishment of national securities associations, which would regulate professional participants in the over-the-counter market. In comparison to the very brief section dealing with national securities exchanges, the Maloney Act addition contained a quite lengthy and detailed section governing the authorities and responsibilities of national securities associations. H.R. Rep. No. 1383, *supra*, at 59-60.

The Commission in its Special Study of the Securities Markets discussed the development of regulation of the over-the-counter markets:

Regulation of the over-the-counter markets has developed in several stages. While comparatively little was known about these markets in 1934 when the Exchange Act became law, it was early recognized that their regulation was necessary, since 'to leave the over-the-counter markets out of a regulatory system would be to destroy the effects of regulating the organized exchanges.' Because of the potential scope and complexity of over-the-counter regulation, the statute entrusted to the Commission broad rulemaking powers over the over-the-counter markets rather than creating a detailed system of regulation as in the case of the exchanges.

SEC, Report of the Special Study of the Securities Markets of the Securities and Exchange Commission, House Document No. 95, Pt. 4, p. 604 (1963). With respect to the scope of OTC regulation by a securities association, the Special Study observed:

As an inducement to joining, the act permits a registered association to prohibit its members from dealing with non-members 'except at the same prices, for the same commissions or fees, and on the same terms and conditions as are by such member accorded to the general public.' To become registered, an association must meet certain standards. It must be appropriately organized by reason of the number and geographical distribution of its members and the scope of their transactions to be able to comply with and carry out the purposes of the act; it must admit to membership all qualified broker-dealers and continue in membership those who remain qualified; it must insure a certain degree of internal democracy in the administration of its affairs; its rules must meet certain broad objectives; and, of primary importance, it must discipline those who violate its rules.

The writings and public statements of the period indicate that the self-regulatory objectives of the act were twofold: first, to bring about self-discipline in conformity to law--'voluntary law obedience so complete that there is nothing [sic] left for government representatives to do'-and, secondly, to encourage 'obedience to ethical standards beyond those any law can establish.' The end product of such a system

would be to put the over-the-counter markets on a 'highly professional plane' and at the same time 'afford to the investor a service characterized by efficiency commensurate with its economic importance' It was thought that this kind of self-regulation was far preferable to detailed and pervasive regulation by the Government which might be overly burdensome to business and Government alike. Senator Maloney, shortly after enactment of the legislation, described the allocation of regulatory responsibilities between the NASD and the Commission in this way:

... Congress has undertaken to provide a mechanism whereby the securities business of the country may deal with all problems of technical regulation, leaving to the Securities and Exchange Commission what it is hoped will be the residual position of policing the submarginal fringe which recognizes no sanctions save those of the criminal law and of dealing with those problems of regulation with which the industry, as organized under the act, finds itself unsuitable or unable to deal.

The existing allocation of regulatory responsibility between the exchanges and the Commission was envisioned as the basic pattern to be followed, but 'with 1938 improvements.'

Id., Pt. 4 at pp. 605-06.

(n21)Footnote 21. The Senate Committee on Banking, Housing and Urban Affairs in its Summary of the Principal Provisions of the Securities Acts Amendments of 1975 stated:

The Exchange Act does not clearly specify the substantive reach of an exchange's authority over its members. Apart from specific provisions confirming an exchange's authority in particular areas, there is nothing in the Exchange Act which limits or defines an exchange's rule-making authority. Indeed, present section 6(c) states:

Nothing in this title shall be construed to prevent any exchange from adopting and enforcing any rule not inconsistent with this title and the rules and regulations thereunder and the applicable laws of the State in which it is located.

The authority of registered securities associations is dealt with substantially differently. The scope of an association's rule-making authority is defined by present section 15A(b) in terms of affirmative and negative requirements. The bill would extend the pattern now applicable to registered securities associations to exchanges. Thus, the bill would eliminate present section 19(b) of the Act insofar as it provides an enumeration of subject matters of exchange rulemaking. And it would also eliminate the open-ended authority in present section 6(c). Although these provisions have been read as expressing, at least in part, both the scope and the limits of an exchange's rule-making authority, they have proved to be unclear and unsatisfactory in both respects. Under the bill the scope of the rule-making authority and responsibility of all self-regulatory organizations would be defined in terms of purposes and standards rather than subject matters. The purposes to be served by self-regulatory rules would be expressed affirmatively and negatively (what the rules must be, and what they may not be designed to accomplish). New sections 6(b)(5) and 15A(b)(6) would require the rules of any self-regulatory organization to be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to provide safeguards against unreasonable profits or unreasonable rates of commissions or other charges, to foster cooperation and coordination with other self-regulatory organizations, to remove impediments to and perfect the mechanism of a national market system, and, in general, to protect investors and the public interest. Similarly, by reason of the same sections a self-regulatory organization's rules must not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers or to regulate matters not related to the purposes of the Exchange Act or the administration of the exchange or association. Under procedures established by the bill

whereby self-regulatory rule changes would have to be justified to and reviewed by the Commission after opportunity for public comments, the Commission's action in approving any such change would constitute a determination by the Commission that the rule is within the permitted purposes and is in conformity with the specified standards of the Exchange Act (Sec. 19(b)). Summary of Principal Provisions of Securities Acts Amendments of 1975, S. 249, Committee on Banking, Housing and Urban Affairs, United States Senate (1975).

(n22)Footnote 22. The term "self-regulatory organization" is defined by Section 3(a)(26) of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F to mean any national securities exchange, registered securities association, or registered clearing agency. The term "self-regulatory organization" also includes the Municipal Securities Rulemaking Board (the "Board"), *see* § 3.06[6] *infra*, but only for purposes of:

- (1) the Board's proposed changes of its rules;
- (2) Commission amendment of Board rules; and
- (3) Commission reports to Congress.

At present, the only registered securities association is FINRA (formerly the NASD).

The Commission is the "appropriate regulatory agency" for national securities exchanges, registered securities associations, the Municipal Securities Rulemaking Board, and for any clearing agency that is not a bank.

(n23)Footnote 23. The NASD is discussed in § 3.05 *infra*.

(n24)Footnote 24. Senate Report, *supra*.

(n25)Footnote 25. Section 19(b) and (c). *See* § 2.03[1] *infra*.

The 1975 Amendments added two new subsections to Section 3(a) defining the rules of self-regulatory organizations. Section (a)(27) defines "rules of an exchange," "rules of an association" or "rules of a clearing agency" to mean:

The constitution, articles of incorporation, bylaws, and rules, or instruments corresponding to the foregoing, of an exchange, association of brokers and dealers, or clearing agency, respectively, and such of the stated policies, practices, and interpretations of such exchange, association, or clearing agency as the Commission, by rule, may determine to be necessary or appropriate in the public interest or for the protection of investors to be deemed to be rules of such exchange, association or clearing agency.

The term "rules of a self-regulatory organization" is defined by Section 3(a)(28) to mean the rules of a national securities exchange, a registered securities association, a registered clearing agency, or the Municipal Securities Rulemaking Board.

(n26)Footnote 26. *See* Sections 6(b), 15A(b).

As the Senate Committee concluded:

Under the bill the scope of the rule-making authority and responsibility of all self-regulatory organizations would be defined in terms of purposes and standards, rather than subject matters. The

purposes to be served by self-regulatory rules would be expressed affirmatively and negatively (what the rules must be, and what they may not be, designed to accomplish).

Summary of Principal Provisions of Securities Acts Amendments of 1975, Senate Committee on Banking, Housing and Urban Affairs, 94th Cong., 1st Sess. 6 (1975), *supra*.

Section 15A(b), pertaining to the requirements for registration as a national securities association, is discussed in § 2.02[2][c] *infra*.

(n27)Footnote 27. S. Rep. No. 94-75, 94th Cong., 1st Sess., p. 27 (1975), reprinted in the Securities Primary Law Sourcebook, Vol. 2, Section I (hereinafter cited as "Senate Report"). The 1975 Amendments also repealed former Section 6(a).

(n28)Footnote 28. Section 6(a) "would provide for the registration of a national securities exchange with the Commission. The SEC would have the authority to require an exchange to file such documents and information as it deems necessary or appropriate in the public interest or for the protection of investors and to prescribe the form and substance of an exchange's application for registration." Senate Report, *supra*, at p. 95.

(n29)Footnote 29. Section 6(b), discussed in § 2.02[2][c][i] *infra*, contains the "explicit statutory requirements that must be satisfied before an exchange may be registered as a national securities exchange." *Id*.

(n30)Footnote 30. Section 6(a) explicitly requires the application for registration as a national securities exchange to contain the rules of the exchange.

(n31)Footnote 31. Form 1, under the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section H. "Application For Registration or Exemption From Registration As A National Securities Exchange," requires information about the organization, membership, and conduct of business of the exchange.

Under Section 19(b), as amended in 1975, an exchange must generally file all proposed rule changes with the Commission and receive Commission approval prior to the exchange rule taking effect. Some routine rule changes may be effective on filing with the Commission, subject to the right of the Commission, within 60 days of the filing, to abrogate the rule filing and to require its re-consideration under the usual procedures. See Section 19(b)(3); § 2.03[1][a] *infra*.

Form 1 also requires the filing of certain exhibits, including copies of the constitution, articles of incorporation, by-laws, rules, and written rulings of the exchange; exchange forms; financial statements for the exchange, and its affiliates and subsidiaries; a list of the officers of the exchange and of its affiliates and subsidiaries; a list of member firms of the exchange; a schedule of securities listed on the exchange; and a schedule of securities admitted to unlisted trading privileges on the exchange. If any exhibit required by Form 1 is inapplicable, then a statement to that effect must be filed in place of the exhibit. Note 2, Form 1.

(n32)Footnote 32. Rule 6a-1(c) under the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section G. An exchange may, either at its own election or at the request of the Commission, file as an amendment a complete new Form 1 "whenever the number of changes to be reported in an amendment, or the number of amendments filed, are so great that the purpose of clarity will be promoted by the filing of a new complete statement and exhibits." Rule 6a-1(d). With its Governance and Transparency Release in November 2004, the Commission proposed a major revision of the exchange registration process, including revising Form 1 and providing that it would be used for both initial registrations and amendments. Sec. Exch. Act. Rel. No. 50699, 2004 SEC LEXIS 2683, at *202 (Nov. 18, 2004) (hereinafter cited as "Governance and Transparency Release").

(n33)Footnote 33. Rule 6a-2(a). The information to be updated within ten days is that on the execution page, which contains the most basic information on the exchange, and that contained in the following exhibits: C (pertaining to subsidiaries and service providers for trading systems); F (membership applications); G (member financial responsibility); H (listing applications); J (officers, governors, and members of committees); K (ownership information for exchanges not owned by members); and M (list of members, subscribers and other users). *Id.*; Form 1.

(n34)Footnote 34. *See* Sec. Exch. Act Rel. No. 35123 (Dec. 20, 1994).

(n35)Footnote 35. Rule 6a-2(b); *see* Form 1. The financial information must be current as of the end of the latest fiscal year of the exchange, and the remaining information must be current as of the latest practicable date within three months of filing. *Id.*

(n36)Footnote 36. Rule 6a-2(c); *see* Form 1.

(n37)Footnote 37. Rule 6a-2(d).

(n38)Footnote 38. Rule 6a-3(a)(1). The material covered by this requirement includes "notices, circulars, bulletins, lists, and periodicals." *Id.*

(n39)Footnote 39. Rule 6a-3(a)(2).

(n40)Footnote 40. The report must set forth the aggregate dollar amount and number of shares of stock, aggregate dollar amount and principal amount of bonds and aggregate dollar amount and number of units sold of rights and warrants. Rule 6a-3(b).

In November 2004 the Commission proposed a new Rule 17a-26 that would require national securities exchanges to file quarterly and annual reports containing detailed information about their regulatory programs. Governance and Transparency Release, *supra*, at *312-313.

(n41)Footnote 41. *See* Sec. Exch. Act. Rel. No. 42455 (Feb. 24, 2000).

(n42)Footnote 42. *See* Sec. Exch. Act. Rel. No. 53128 (Jan. 13, 2006).

(n43)Footnote 43. Rule 15Aa-1. Form X-15AA-1 contains thirty items under the following headings: organization, membership, representation of membership, dues and expenses, business conduct and protection of members, disciplining of members, affiliated associations, miscellaneous, and additional information to be supplied if application is made for registration as an affiliated securities association. Exhibits to Form X-15AA-1 include:

- (1) copies of the association's constitution, charter, articles of incorporation or association (with all amendments thereto), by-laws, and any rules or instruments corresponding to the foregoing (Exhibit A);
- (2) a balance sheet as of a date within thirty days of the filing of the Form X-15AA-1, along with an income and expense statement for the year preceding the date of the balance sheet (or from the date the association was organized to the date of the balance sheet, if the association was organized during the year preceding the balance sheet date) (Exhibit B); and
- (3) an alphabetical list of the name and principal place of business of each member of the association (Exhibit C).

In November 2004 the Commission proposed a major revision of the process for registration as a national securities association, including replacing Form X-15AA with a new Form 2 and providing that the new form would be used for

both initial filings and amendments. Governance and Transparency Release, *supra*, at *202.

(n44)Footnote 44. Amendments must be filed with the Commission "promptly after the discovery of any inaccuracy in the registration statement or in any amendment or supplement thereto" correcting such inaccuracy. Rule 15-Aj-1(a).

(n45)Footnote 45. Current Supplements must be filed "promptly" after any change rendering any information in the registration statement, or in any amendment or supplement thereto, no longer accurate. Rule 15Aj-1(b). However, changes in the information called for by Exhibit B (financial statements) do not require the filing of a current supplement; changes in the information called for in Exhibit C (list of association members) do not require the filing of a current supplement until ten days after the calendar month in which the changes occur. *Id.* In fact, if changes in the information called for in Exhibit C are published by the association at least once a month and promptly filed in triplicate with the SEC, no current supplement need be filed with respect to these changes. Rule 15Aj-1(b)(3).

(n46)Footnote 46. Rule 15Aj-1.

(n47)Footnote 47. Form X-15Aj-2, "Annual Consolidated Supplement," contains items similar to those found on Form X-15AA-1. In addition, the three exhibits to be furnished with Form X-15AJ-2 are identical with those required for Form X-15AA-1, discussed above, except that the financial statements to be furnished as Exhibit B to the annual consolidated supplement must cover the last fiscal year of the securities association.

(n48)Footnote 48. Rule 15Aj-1(c)(1),(2). Three copies of any notices, reports, circulars, loose-leaf insertions, riders, new additions, lists, or other records of changes covered by amendments or supplements, if available to members of the association, must be sent to the Commission, in addition to the formal filing of amendments and supplements required by Rule 15Aj-1. Rule 15Aj-1(d).

It is important to keep in mind that Rule 15Aj-1 was enacted well before the Securities Acts Amendments of 1975. Section 19(b), as amended in 1975, contains new procedures for Commission approval of proposed rule changes by self-regulatory organizations, including securities associations, requiring the filing of proposed rule changes with the Commission. Section 19(b) is discussed in § 2.03[1][a] *infra*. Thus, many of the changes necessitating the filing of a current supplement pursuant to Rule 15Aj-1 will already be on file with the Commission, thereby resulting in a filing pursuant to Rule 15Aj-1 for informational purposes only, the rule change already having been approved by the Commission under Section 19(b).

(n49)Footnote 49. Sections 6(a) and 15A(a). As part of its Governance and Transparency Release, in November 2004 the Commission proposed a new Rule 17a-26 that would require national securities associations to file quarterly and annual reports containing detailed information about their regulatory programs. Governance and Transparency Release, *supra*, at *312-313.

(n50)Footnote 50. The purpose of Section 19(a)(1) is to "establish a uniform pattern for the registration with the Commission of national securities exchanges, registered securities associations and registered clearing agencies." Senate Report, at p. 128.

(n51)Footnote 51. In the case of clearing agencies for which the Commission is not the appropriate regulatory agency, *e.g.*, banks, Section 19(a)(2) prescribes different procedures that involve review by the other regulatory agency prior to final Commission action.

(n52)Footnote 52. The full text of Section 6(b) is as follows:

(b) An exchange shall not be registered as a national securities exchange unless the Commission determines that-

1-2 Federal Securities Exchange Act of 1934 § 2.03

- (1) Such exchange is so organized and has the capacity to be able to carry out the purposes of this title and to comply, and (subject to any rule or order of the Commission pursuant to Section 17(d) or 19(g)(2) of this title) to enforce compliance by its members and persons associated with its members, with the provisions of this title, the rules and regulations thereunder, and the rules of the exchange.
- (2) Subject to the provisions of subsection (c) of this section, the rules of the exchange provide that any registered broker or dealer or natural person associated with a registered broker or dealer may become a member of such exchange and any person may become associated with a member thereof.
- (3) The rules of the exchange assure a fair representation of its members in the selection of its directors and administration of its affairs and provide that one or more directors shall be representative of issuers and investors and not be associated with a member of the exchange, broker, or dealer.
- (4) The rules of the exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities.
- (5) The rules of the exchange are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, or to regulate by virtue of any authority conferred by this title matters not related to the purposes of this title or the administration of the exchange.
- (6) The rules of the exchange provide that (subject to any rule or order of the Commission pursuant to section 17(d) or 19(g)(2) of this title) its members and persons associated with its members shall be appropriately disciplined for violation of the provisions of this title, the rules or regulations thereunder, or the rules of the exchange, by expulsion, suspension, limitation of activities, functions, and operations, fine, censure, being suspended or barred from being associated with a member, or any other fitting sanction.
- (7) The rules of the exchange are in accordance with the provisions of subsection (d) of this section, and, in general, provide a fair procedure for the disciplining of members and persons associated with members, the denial of membership to any person seeking membership therein, the barring of any person from becoming associated with a member thereof, and the prohibition or limitation by the exchange of any person with respect to access to services offered by the exchange or a member thereof.
- (8) The rules of the exchange do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of this title.
- (9) The rules of the exchange prohibit the listing of any security issued in a limited partnership roll-up transaction (as such term is defined in paragraphs (4) and (5) of section 14(h)), unless such transaction was conducted in accordance with procedures designed to protect the rights of limited partners, including-

(A) the right of dissenting limited partners to one of the following:

(i) an appraisal and compensation;

(ii) retention of a security under substantially the same terms and conditions as the original issue;

(iii) approval of the limited partnership roll-up transaction by not less than 75 percent of the outstanding securities of each of the participating limited partnerships;

(iv) the use of a committee of limited partners that is independent, as determined in accordance with rules prescribed by the exchange, of the general partner or sponsor, that has been approved by a majority of the outstanding units of each of the participating limited partnerships, and that has such authority as is necessary to protect the interest of limited partners, including the authority to hire independent advisors, to negotiate with the general partner or sponsor on behalf the limited partners, and to make a recommendation to the limited partners with respect to the proposed transaction; or

(v) other comparable rights that are prescribed by rule by the exchange and that are designed to protect dissenting limited partners;

(B) the right not to have their voting power unfairly reduced or abridged;

(C) the right not to bear an unfair portion of the costs of a proposed limited partnership roll-up transaction that is rejected; and

(D) restrictions on the conversion of contingent interests or fees into non-contingent interests or fees and restrictions on the receipt of a non-contingent equity interest in exchange for fees for services which have not yet been provided.

As used in this paragraph, the term "dissenting limited partner" means a person who, on the date on which soliciting material is mailed to investors, is a holder of a beneficial interest in a limited partnership that is the subject of a limited partnership roll-up transaction, and who casts a vote against the transaction and complies with procedures established by the exchange, except that for purposes of an exchange or tender offer, such person shall file an objection in writing under the rules of the exchange during the period during which the offer is outstanding.

Section 6(b)(9) was added in 1993 as part of the Limited Partnership Roll-up Reform Act of 1993, in response to perceived abuses in connection with limited partnership roll-ups. See Federal Securities Law Reports (CCH) (2001), P 21,360.001.

(n53)Footnote 53. Sections 6(b)(1), 15A(b)(2).

Section 3(a)(3)(A), as amended, sets forth a new definition of "member" with respect to an exchange to mean:

(1) a natural person permitted to effect transactions on the floor of the exchange without using another person as a broker;

(2) a registered broker or dealer with which such a natural person is associated;

(3) a registered broker or dealer permitted to designate such a natural person as a representative; and

(4) any other registered broker or dealer that agrees to be regulated by the exchange and with respect to which the exchange undertakes to enforce compliance with the Act, the Rules thereunder and the exchange's rules.

The term "member" also includes persons required by the Commission to comply with exchange rules pursuant to Section 6(f), *see* § 2.03[3][b] *infra*, for certain purposes, including compliance with the Act and rules thereunder, allocation of fees and charges, disciplinary proceedings by the exchange and investigations and enforcement proceedings by the Commission.

Section 3(a)(3)(B) defines the term "member" when used with respect to a national securities association to mean "any broker or dealer who agrees to be regulated by such association and with respect to the association undertakes to enforce compliance with the provisions of [the Exchange Act], the rules and regulations thereunder, and its own rules."

The term "person associated with a member" or "associated person of a member" is defined in amended Section 3(a)(21) to mean:

- (1) any partner, officer, director, or branch manager of a member (or a person occupying a similar status or performing similar functions);
- (2) any person directly or indirectly controlling, controlled by, or under common control with a member; or
- (3) any employee of a member.

(n54)Footnote 54. Section 15A(b)(2).

(n55)Footnote 55. Section 15A(b)(1).

(n56)Footnote 56. Sections 6(b)(2), 15A(b)(3). The rules of an exchange concerning membership on the exchange are subject to the provisions of Section 6(c) of the Exchange Act. *Id.* Section 6(c) sets forth the grounds on which an exchange may deny a person membership or bar a person from becoming associated with a member.

Section 6(b)(2), which is designed to prevent unfair discrimination in the membership approval process, essentially provides that Section 6(c)'s grounds for denial are the only permissible grounds for excluding members.

Similarly, the rules of a securities association are subject to the provisions of Section 15A(g), which also provides grounds upon which an association may deny membership or bar a person from becoming associated with a member.

Sections 6(c) and 15A(g) are discussed in § 2.03[2][a], *infra*.

(n57)Footnote 57. Sections 6(b)(3), 15A(b)(4).

(n58)Footnote 58. Sections 6(b)(4), 15A(b)(5).

(n59)Footnote 59. Sections 6(b)(5), 15A(b)(6).

(n60)Footnote 60. Sections 6(b)(5), 15A(b)(6).

(n61)Footnote 61. *Id.* This requirement in Sections 6(b)(5) and 15A(b)(6) is one of several provisions of the 1975

Amendments addressing the anticompetitive effects of exchange rules restricting members from effecting transactions off the exchange. *See* § 2.02[2][c][ii] *infra*.

(n62)Footnote 62. Sections 6(b)(5), 15A(b)(6).

The rules of a securities association are not permitted "to fix minimum profits, to impose any schedules or fix rates of commissions, allowances, discounts, or other fees to be charged by its members." Section 15A(b)(6). A similar prohibition is placed upon exchanges by Section 6(e)(1).

The regulation of commission rates is discussed in § 2.03[2][d] *infra*.

(n63)Footnote 63. Sections 6(b)(6), 15A(b)(7).

The rules of an exchange or securities association providing for appropriate disciplinary action are subject to any rule or order of the Commission pursuant to Section 17(d) or Section 19(g)(2) of the Exchange Act. Sections 6(b)(6), 15A(b)(7).

Section 17(d) of the Exchange Act authorizes the Commission "to relieve self-regulatory organizations of regulatory responsibilities for persons who are members of or participants in more than one self-regulatory organization and to allocate among self-regulatory organizations the authority to exercise regulatory authority." Senate Report, *supra*, at p. 121. One purpose of the Commission's power to allocate regulatory responsibilities is to "remove impediments to the development of a national market system and national system for the clearance and settlement of securities transactions." *Id.* The national market system is discussed in § 2.04 *infra*.

Section 19(g)(2) of the Exchange Act, authorizing the Commission to relieve any self-regulatory organization from enforcing compliance with the Exchange Act, the rules thereunder, and the rules of the self-regulatory organization, is discussed in § 2.03[3][a] *infra*.

(n64)Footnote 64. Sections 6(b)(7), 15A(b)(8). Disciplinary procedures are discussed in § 2.03[4][a] *infra*.

(n65)Footnote 65. Sections 6(b)(7), 15A(b)(8).

(n66)Footnote 66. Sections 6(b)(8), 15A(b)(9). For discussion of the Commission's review of the burdens on competition, *see* § 2.02[2][c][ii] *infra*.

(n67)Footnote 67. Section 15A(b)(6) of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F. Similarly, under Section 6(e), the Commission cannot permit a national securities exchange, by rule, to impose a schedule or fixed rate of commissions, allowances, discounts, or other fees to be charged after November 1, 1976, unless the Commission finds that such schedule or fixed rates further the purposes of the Exchange Act without imposing any unnecessary or inappropriate burden on competition.

(n68)Footnote 68. Section 15A(b)(10). Pursuant to Section 15A(c), the Commission may require that the rules of a registered securities association provide for the admission of a registered affiliated securities association under Section 15A(d) under such terms and with such responsibilities as the Commission deems necessary and appropriate.

(n69)Footnote 69. Section 15A(b)(11). These rules are required to "be designed to produce fair and informative quotations, and to promote orderly procedures for collecting, distributing and publishing quotations." *Id.*

(n70)Footnote 70. *See* Section 6(a)(1) (prior to the 1975 Amendments), discussed above.

(n71)Footnote 71. Sections 6(b)(6), 15A(b)(7). *See* *Hochfelder v. Midwest Stock Exchange*, 350 F. Supp. 1122 (N.D. Ill. 1972), *aff'd*, 503 F.2d 364 (7th Cir.), *cert. denied*, 419 U.S. 875 (1974) (defendant stock exchange not required

to investigate and supervise member's activities to the extent plaintiffs alleged):

[P]laintiffs also allege that this defendant violated Section 6(a)(1) of the Securities Exchange Act (15 U.S.C. § 78f). This section, in part, requires a national securities exchange to file an agreement with the S.E.C. 'to enforce so far as is within its powers compliance by its members, with the provisions of this chapter, and any amendment thereto and any rule or regulation made or to be made thereunder.' Presumably such an agreement was filed by Midwest.

The remainder of plaintiffs' allegations against this defendant involve its alleged failure to investigate and supervise Nay's activities sufficiently to discover his fraud. No case has been cited where this type of omission or practice gives rise to an action against an exchange under Rule 10b-5. The only cited case resulted in summary judgment for the exchange. *Butterman v. Walston & Co., Inc., et al.*, 387 F.2d 822 (7th Cir. 1967). As a matter of fact it is doubtful that the language of Section 6(a)(1) supports an action by a third party except possibly as a contract beneficiary.

The other cited cases involve representations or omissions made with respect to the issuance or sale of specific securities. There is no indication that Rule 10b-5 was intended to make a national security exchange responsible for all of the personal transactions and financial stability of its members. *Cf. Buttrey v. Merrill Lynch et al.*, 410 F.2d 135 (7th Cir. 1969) for a typical case involving violations of a stock exchange rule by a broker.

Assuming, however, that Midwest could be liable for ineffectively policing its members' dealings in unlisted securities, the defendant's affidavits demonstrate that it adequately performed its agreement under Section 6(a)(1) of the Act. Although plaintiffs have shown instances where this defendant arguably was put on notice of Nay's untrustworthiness, these do not raise an issue of fact concerning the adequacy of the defendant's supervision, but merely tend to show that it was not fluoroscopic. Neither the law nor common sense requires perfection but only an agreement 'to enforce so far as is within its powers compliance by its members' (15 U.S.C. § 78f). Defendant affidavits establish this without contradiction.

The court finds and concludes as a matter of law that Midwest performed its obligations under Section 6(a)(1) and that no triable issue of fact remains therein.

350 F. Supp. at 1123-25.

(n72)Footnote 72. Sections 6(b)(8), 15A(b)(9).

(n73)Footnote 73. The purpose behind a Commission review of burdens on competition to eliminate all present and future restraints on competition that are incompatible with the purposes of the Exchange Act was to facilitate the development of a national market system. Senate Report, *supra*, at pp. 12-13.

(n74)Footnote 74. Section 19(b) is discussed in § 2.03[1][a] *infra*.

(n75)Footnote 75. Section 19(c) is discussed in § 2.03[1][b] *infra*.

(n76)Footnote 76. Sections 19(e) and (f) are discussed in § 2.03[4][c] *infra*.

(n77)Footnote 77. Unlisted trading privileges are discussed in § 4.01[5] *infra*.

(n78)Footnote 78. Section 6(e) is discussed in § 2.03[2][d] *infra*.

(n79)Footnote 79. Section 6(e)(1)(B)(ii).

(n80)Footnote 80. Section 15A(b)(6).

(n81)Footnote 81. The Commission reported the results of its initial review pursuant to Section 11A(c)(4) to the Congress on September 2, 1975. SEC, Report of the Securities and Exchange Commission on Rules of National Securities Exchanges Which Limit or Condition the Ability of Members to Effect Transactions Otherwise Than on Such Exchanges, Sec. Exch. Act Rel. No. 11628 (1975). In view of its conclusion that certain existing off-board trading restrictions were apparently unnecessary, the Commission instituted a proceeding pursuant to Section 19(c) to determine whether to modify or rescind the restrictions. After public hearings in October 1975, the Commission announced on December 19, 1975 in Sec. Exch. Act Rel. No. 11942 the adoption of Rule 19c-1, effective March 31, 1976, preventing the rules, policy, or practice of a national securities exchange from prohibiting, conditioning, or limiting the ability of any member acting as agent, *i.e.* broker, to effect transactions otherwise than on such exchange in listed equity securities, or securities to which unlisted trading privileges have been extended on that exchange.

On December 4, 1987, Section 11A(c)(4) was amended to delete reference to the reporting requirement of 11A(c)(4)(2) and the Section 19(c) proceeding requirement of 11A(c)(4)(3). SEC Authorization Act of 1987, Sec. 313, Pub. Law 100-181, 101 Stat. 1249.

Section 11A(c)(4) now reads: "The Commission is directed to review any and all rules of national securities exchanges which limit or condition the ability of members to effect transactions in securities otherwise than on such exchanges."

For a discussion of off-board trading developments, see § 2.03[2][c] *infra*.

The applicability of the antitrust statutes to the securities industry is discussed in § 2.03[6] *infra*.

(n82)Footnote 82. Section 15A(c).

(n83)Footnote 83. Section 15A(c).

(n84)Footnote 84. Section 15A(c).

(n85)Footnote 85. Section 15A(d)(1).

(n86)Footnote 86. Sections 15A(b)(2) through (10) contain requirements that an association of brokers and dealers must meet to be registered with the Commission as a national securities association, *See* § 2.02[2][c][i] *supra*.

Section 15A(b)(12), governing the form and content of securities quotations, became (with some alteration) Section 15A(b)(11) as a result of the Securities Acts Amendments of 1975. *See* Senate Report, *supra*, at p. 204.

(n87)Footnote 87. Section 15A(b)(3) requires, as a condition for registration as a national securities association, that the rules of an association (defined in Section 3(a)(27)) provide that any registered broker or dealer may become a member of such association and any person may become associated with a member, subject to the provisions of Section 15A(g), discussed in § 2.03[2][a] *infra*.

(n88)Footnote 88. Section 15A(d)(2).

(n89)Footnote 89. Section 15A(e)(1). *See* 42 SEC Ann. Rep., p. 83 (1976) at 83:

In adopting legislation to permit the formation and registration of national securities associations, Congress provided an incentive to membership by permitting such associations to adopt rules precluding any member from dealing with a nonmember broker or dealer except on the same terms and conditions and at the same prices as the member deals with the general public. The NASD has adopted such rules.

As a practical matter, therefore, membership is necessary for profitable participation in many underwritings since members properly may grant only to other members price concessions, discounts and similar allowances not granted to the general public.

(n90)Footnote 90. Section 15A(e)(2). *See* Senate Report, *supra*, at p. 112.

The bill would also further amend subsection 15A(e) of the Act to change the definition of the term non-member for purposes of the authority granted to registered securities [associations] to prohibit members, by rule, from dealing with non-members except at the same prices and on the same terms and conditions as are accorded to the general public. Since the self-regulatory organization created for the municipal securities industry by the bill, the Municipal Securities Rulemaking Board, would not be a membership organization, the revision to this important provision of the Act would effectively require all nonbank municipal securities dealers which participate in underwriting syndicates to join the NASD. In this connection, syndicate and underwriting practices and the granting of any discounts, allowances or concessions would be the subject of direct rulemaking by the Municipal Securities Rulemaking Board.

Broker-dealer registration requirements under the Exchange Act are discussed in § 3.03 *infra*.

(n91)Footnote 91. Section 15A(e)(2).

(n92)Footnote 92. Section 15A(e)(3).

(n93)Footnote 93. *Id.* Section 15B(b)(2)(K) requires the Municipal Securities Rulemaking Board, *see* § 3.06[6] *infra*, to propose and adopt rules that, at a minimum, would "establish the terms and conditions under which any municipal securities dealer may sell, or prohibit any municipal securities dealer from selling, any part of a new issue of municipal securities to a municipal securities investment portfolio during the underwriting period."

(n94)Footnote 94. For the definition of "self-regulatory organization," *see* § 2.02[2] *supra*.

(n95)Footnote 95. Section 19(a)(3).

(n96)Footnote 96. Section 19(a)(3).

(n97)Footnote 97. *See* Sec. Exch. Act Rel. No. 44692, *available at* 2001 SEC LEXIS 1641 (Aug. 13, 2001) (hereinafter "Single-Stock Futures Release"), at *7.

(n98)Footnote 98. *See* Section 6(g).

(n99)Footnote 99. *See* Section 6(g)(2)(B).

(n100)Footnote 100. Section 15A(k).

(n101)Footnote 101. The initial registration and subsequent filing requirements applicable to traditional exchanges are discussed in § 2.02[2] *supra*.

(n102)Footnote 102. Rule 6a-4(b). The information on the cover page of Form 1-N consists of basic data such as the name, address and form of organization of the exchange, and therefore is unlikely to change frequently. *See* Form 1-N.

(n103)Footnote 103. *See* Rule 6a-4(b).

(n104)Footnote 104. Rule 6a-4(c)(1)(i).

(n105)Footnote 105. Rule 6a-4(c)(1)(ii).

(n106)Footnote 106. Rule 6a-4(c)(2).

(n107)Footnote 107. Sec. Exch. Act Rel. No. 40760 (Dec. 8, 1998) (hereinafter cited as "Reg. ATS Adopting Release").

(n108)Footnote 108. Reg. ATS Adopting Release, *supra*.

(n109)Footnote 109. Rule 3b-16 provides that an entity is an exchange if it:

- (1) Brings together the orders for securities of multiple buyers and sellers; and
- (2) Uses established, non-discretionary methods (whether by providing a trading facility or by setting rules) under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade.

"Non-discretionary methods" are fixed procedures or rules which govern order execution. *See* Reg. ATS Adopting Release, *supra*. For example, exchange rules that establish a priority for the execution of orders in terms of price, time, or some other criteria are non-discretionary methods. The "non-discretionary" element of the definition of exchange excludes routine functions of broker-dealers from the definition. For example, a broker-dealer's block trading desk, at which employees of the broker-dealer execute large customer orders but retain discretion in determining how to fill the orders, would not be considered an exchange. *See id.*

(n110)Footnote 110. *See* Reg. ATS Adopting Release, *supra*; *see also* Rule 3a1-1(a).

(n111)Footnote 111. The volume levels are as follows:

1. Fifty percent of the average daily trading volume in any single security and five percent of the average daily trading volume for any class of security, such as equity securities, listed options, or investment-grade debt; or
2. Forty percent of the average daily trading volume for any class of security. If a system exceeds these levels for three out of four calendar quarters, the Commission may seek to revoke the exemption, but is not required to do so.

See Rule 3a1-1(b)(1)(i), (ii).

(n112)Footnote 112. Regulation ATS consists of Rules 300 through 303.

(n113)Footnote 113. Reg. ATS Adopting Release, *supra*.

(n114)Footnote 114. The term "alternative trading system" is defined in Rule 300(a) of Regulation ATS as:

any organization, association, person, group or persons, or system:

- (1) That constitutes, maintains, or provides a market place of facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange within the meaning of [Rule 3b-16]; and

(2) That does not:

(i) Set rules governing the conduct of subscribers other than the conduct of such subscribers' trading on such organization, association, person, group of persons, or system; or

(ii) Discipline subscribers other than by exclusion from trading.

A system cannot be considered an "alternative trading system" within the meaning of the rule if it performs self-regulatory functions; the Commission believes that any system exercising any significant self-regulatory authority should be registered as an SRO. Reg. ATS Adopting Release, *supra*.

(n115)Footnote 115. Under Rule 301 a system does not have to comply with Regulation ATS if it:

1. is registered as a national securities exchange;
2. is exempted by the Commission from registration as an exchange based on limited trading volume;
3. is operated by a national securities association; or
4. is registered as a broker-dealer, or is a bank, and limits the securities it deals in to specified government securities and commercial paper.

(n116)Footnote 116. Rule 301(a)(5).

(n117)Footnote 117. Rule 301(b)(1).

(n118)Footnote 118. Rule 301(b)(2). The initial operation report is simply a notice filing; no Commission approval is required.

(n119)Footnote 119. Rule 301(b)(2)(ii), (iii), (iv).

(n120)Footnote 120. Rule 301(b)(2)(v).

(n121)Footnote 121. See Sections 17, (a), 18(a), 32(a) of the Exchange Act; Rule 301(b)(2)(vi), (vii).

(n122)Footnote 122. See Rule 301(b)(3); Reg. ATS Adopting Release, *supra*; Rules 600(b)(46), 600(b)(47).

(n123)Footnote 123. Rule 301(b)(3).

(n124)Footnote 124. Rule 301(b)(3).

(n125)Footnote 125. See § 2.01[3] *supra*.

(n126)Footnote 126. Rule 301(b)(4). In the Regulation ATS adopting release, the Commission stated that any fees charged by these systems should be similar to communications or access fees charged by other markets. Reg ATS Adopting Release, *supra*.

(n127)Footnote 127. Rule 301(b)(5).

(n128)Footnote 128. Reg. ATS Adopting Release, *supra*.

(n129)Footnote 129. Rule 301(b)(5)(iii)(A)-(C).

(n130)Footnote 130. Rule 301(b)(6)

(n131)Footnote 131. The volume threshold under Rule 301(b)(6) is five percent of the average daily volume for a security in four of the preceding six months. 17 C.F.R. § 242.301(b)(6). The threshold was originally 20 percent, but was lowered to 5 percent by Regulation NMS in 2005. *See* Sec. Exch. Act Rel. No. 51808 (June 9, 2005). Once the threshold is satisfied, for systems that support order entry, order routing, order execution, transaction reporting and trade comparison, the system must:

- establish reasonable capacity estimates;
- conduct capacity stress tests of critical systems;
- institute procedures to review its system development and testing methodology;
- review the vulnerability of its systems to hackers, physical hazards and natural disasters;
- establish adequate contingency and disaster recovery plans;
- have an independent review performed of the system's controls, and have senior management of the system review the report; and
- notify the SEC promptly of significant system outages and changes.

Rule 301(b)(6)(ii). The Commission recognized that, as a practical matter, if the requirements apply to one security the entire trading system would have to satisfy the requirements. *See* Reg ATS Adopting Release, *supra*.

(n132)Footnote 132. Rule 301(b)(6)(iii).

(n133)Footnote 133. Rule 302 of Regulation ATS requires that the following records be kept:

1. A record of subscribers to the system;
2. Daily summaries of trading which include:
 - a. securities traded;
 - b. transaction volume for securities including number of trades, number of shares traded, and dollar volume;
 - c. transaction volume for debt securities including number of trades and dollar value;
3. Time-sequenced records of order information which include:
 - a. the date and time, to the second, that orders are received;
 - b. the identity of the security;
 - c. the number of shares or the principal amount of bonds;
 - d. a special identification if the order relates to a program trade or an index arbitrage

trade;

- e. designation of the order as a buy or a sell;
- f. designation of the order as a short-sale, if applicable;
- g. designation of the type of order, such as market, limit, or stop loss;
- h. a limit or stop price, if applicable;
- i. the date at which the order expires or, for a day order, the time;
- j. the time during which the order is in force;
- k. any instructions to modify or cancel the order;
- l. the type of account, such as retail, wholesale, employee, etc.;
- m. the date and time, to the second, that the order was executed;
- n. the price at which the order was executed;
- o. the size of the executed portion of the order, in number of shares or, for bonds, principal amounts;
- p. the identity of the parties to the transaction.

(n134)Footnote 134. Rule 303(a)(1).

(n135)Footnote 135. The following records must be retained if they are created:

- notices to subscribers;
- if the system is subject to the fair access standards, a copy of its access standards and all documents relating to its grants or denials of access;
- all documents related to its compliance with the capacity, integrity and system requirements.

Rule 303(a)(1).

CHAPTER 2 Regulation of Securities Markets *

1-2 Federal Securities Exchange Act of 1934 § 2.04

§ 2.04 Self-Regulation and Commission Oversight

Congress, at the urging of the securities industry, took the position in the Exchange Act that primary responsibility for the discipline of exchange members should rest with the exchange itself. Then Commission Chairman Douglas described it as letting the exchange take the leadership with Government playing a residual role. Government would keep the shotgun, so to speak, behind the door, loaded, well oiled, cleaned, ready for use but with hope it would never have to be used. n1

Accordingly, Section 6 of the Exchange Act required an exchange to agree to enforce the provisions of the Exchange Act and rules and regulations thereunder. n2 Moreover, Section 6 further stated that no registration "shall be granted or remain in force" unless the rules of the exchange provided for the discipline of the member for conduct that was "inconsistent with just and equitable principles of trade," including the provisions of the Exchange Act and the rules thereunder. n3 Similarly, Section 6(c) as enacted provided seemingly open-ended authority for rule making by an exchange without Commission approval. n4 Prior to the 1975 Amendments, Section 19 provided the Commission with limited and ambiguous oversight power over the exchanges. n5 For example, the SEC had no jurisdiction to review administratively a disciplinary action by an exchange against a member of that exchange, the member's only remedy being a lawsuit against the exchange for reinstatement or damages. n6

In contrast to the exchanges, the OTC market had no member organizations upon which government regulation could focus. Accordingly, the Maloney Act subjected any national securities association to more stringent statutory obligations and Commission oversight. n7 While there was recognition that "to leave the over-the-counter markets out of a regulatory system would destroy the effects of regulating the organized exchanges," n8 the Commission was concerned that direct government regulation without a self-regulatory organization "is a little like trying to build a structure out of dry sand. There is no cohesive force to hold it together, no organization with which we can build." n9

The adoption of Section 15A reflected concern over the effectiveness of new securities associations and differed in several significant respects from the original 1934 pattern. For example, registered national securities associations were from the beginning required to file with the Commission all proposed rule changes, n10 and the Commission could enter a single order of disapproval preventing effectiveness. n11 Moreover, the Commission had from the beginning the authority to "abrogate" an association's rule if necessary to assure fair dealing, fair representation or otherwise to protect investors. n12 The Commission also had the authority to proceed against an officer or director of an association for willful failure to enforce an association's rules, but, as in the case of exchanges, the Commission had no direct authority

to take disciplinary action for violation of association rules.

In marked contrast to its authority with respect to exchanges, the Commission had the express power to review association disciplinary action taken against a member and could reduce, but not increase, any penalty. n13

The 1975 Amendments effected significant changes in the statutory responsibilities imposed upon national securities exchanges and the Commission's oversight powers over these exchanges. n14 In summary, Congress subjected the exchanges to the statutory scheme embodied originally in Section 15A for registered securities associations. n15 The 1975 amendments:

- (1) imposed more explicit requirements with respect to exchange rules;
- (2) gave the Commission power to impose more flexible sanctions on an exchange and its officers;
- (3) imposed due process requirements to be observed in any exchange disciplinary or exclusionary proceeding; and
- (4) subjected such proceedings to review by the Commission.

The 1975 Amendments clearly evidence Congressional concern over the anti-competitive effects of regulation in the securities industry, including the effects of exchange rules and disciplinary and exclusionary proceedings. n16 Thus, exchange rules may not be designed to allow the exchange or its members to unfairly discriminate between customers, issuers, brokers, or dealers. n17 Nor may an exchange's rules regulate, by virtue of any authority contained in the Exchange Act, matters not related to the purposes of the Exchange Act or the administration of the exchange. n18 Nor may the rules of an exchange impose a burden on competition that is not necessary or appropriate to further the Exchange Act. n19 Moreover, Congress designated both registered securities exchanges and associations to be self-regulatory organizations, n20 with virtually identical substantive duties and responsibilities under the Exchange Act.

The Commission has also taken steps to ensure the fairness of the self-regulatory regime. Commission inquiries into the operation of the NASD and NYSE spurred a significant restructuring of the organizations in 1996 and 2003, respectively, to ensure equitable treatment and enforcement among its diverse member constituencies. n21 As SROs increasingly come into competition with their members, Commission oversight of the potential for conflicts of interest will likely increase. Failures of the self-regulatory system as employed by both the NYSE and NASD (now FINRA--the NASD as well as certain functions of the NYSE) have increased the likelihood that the self-regulatory regime will be re-examined and perhaps modified. n22

[1] Adoption of Rules and Regulations by Self-Regulatory Organizations (SROs)

[a] Commission Review of Proposed Rules n23

[i] National Securities Exchanges and Registered Securities Associations

The 1975 Amendments establish a procedure for Commission review of a proposed change in any self-regulatory organizations' rules n24 and impose upon the Commission "the responsibility to determine with respect to such change that the requirements of the Exchange Act are satisfied." n25

The procedure for Commission approval of rule changes of self-regulatory organizations, including national securities exchanges and registered securities associations, is contained in Section 19(b) of the Exchange Act. Section 19(b)(1) provides that a proposed rule of an SRO or any proposed change in, addition to, or deletion from the rules of an SRO,

1-2 Federal Securities Exchange Act of 1934 § 2.04

n26 must be filed with the Commission n27 together with a concise general statement of the basis and purpose of the proposed rule or change. n28 The Commission requires a statement which, at a minimum, describes the reasons for adopting the proposed rule and the problems to be addressed by the rule. n29 In addition, the form filed as to the proposed rule or rule change must be accompanied by a "detailed and specific" statement adequate to permit the Commission to find that the proposed rule is consistent with the provisions of the Exchange Act and the rules and regulations thereunder. n30 The Commission must then publish notice of the filing and the substance of the proposed rule or change, or a description of the subjects and issues involved. Interested persons must be given an opportunity to submit written data, views, and arguments. n31 No proposed rule change can take effect unless approved by the Commission or otherwise permitted in accordance with Section 19(b). n32

Within thirty-five days of publication of the notice of filing, the Commission must either:

- (1) approve the proposed rule or change, or
- (2) institute proceedings to determine whether the proposed rule or change should be disapproved, giving notice of the grounds for disapproval under consideration and an opportunity for hearing.

The proposed rule or change must be approved if it is found to be consistent with the requirements of the Exchange Act and the rules thereunder applicable to the organization. n33 The thirty-five day period for the Commission to approve or institute proceedings may be extended up to ninety days by the Commission or upon consent of the organization. If the Commission orders a proceeding, it must be concluded within one hundred eighty days from the date of publication of the notice of filing; that period may be extended for up to sixty days by the Commission or for a longer period if the organization consents. n34 A proposed rule or change may not be approved prior to the thirtieth day after publication of the notice of filing unless the Commission finds good cause for doing so, and publishes its reasons. n35

The Commission must promptly publish notice of orders approving or disapproving a proposed rule change together with a written statement of the reasons for the Commission action. n36

In 1998, the Commission adopted an amendment to Rule 19b-4 designed to make it easier for SROs to trade and list new derivative products. n37 Accordingly, Rule 19b-4 now provides that proposals to list and trade new securities derivatives products will not be considered proposed rule changes, so long as the SRO has rules and standards applicable to the product and a surveillance program for the class of product to which the new issue belongs. n38 SROs are required to notify the SEC of the creation of a new derivative product, on a newly-created form, Form 19b-4(e). n39

Under Section 19(b)(3)(A) of the Exchange Act, a proposed rule or change may take effect upon filing if:

- (1) it is designated by the self-regulatory organization as
 - (i) constituting a stated policy, practice, or interpretation of an existing rule of the organization;
 - (ii) establishing or changing dues, fees, or other charges; or
 - (iii) dealing solely with the administration of the organization, or n40
- (2) it is a matter that has been excluded from Section 19(b)(2) by a rule of the Commission. n41

In December 1994, the SEC adopted a significant amendment to Rule 19b-4 designed to streamline the process under which SRO rules are adopted or amended. n42 The amendment added two categories of rule filings to those that may take effect upon filing--routine amendments to existing order-entry and trading systems, and so-called

"non-controversial filings." n43 Specifically, Rule 19b-4 now provides that a rule change may take effect upon filing if:

- it changes an existing order-entry or trading system of an SRO in a manner that does not limit access to or the availability of the system; or
- it does not become effective for 30 days after filing, and the SRO has given the Commission five business days notice of the filing. n44

In either case the filing must not "significantly affect the protection of investors or the public interest" or impose significant burdens on competition. n45

A rule or change put into effect summarily may be abrogated within sixty days by the Commission and it must then be refiled in accordance with Section 19(b)(1) and reviewed in accordance with Section 19(b)(2). n46

A rule or change may also be put into effect summarily by the Commission if it finds such action necessary for the protection of investors, maintenance of fair and orderly markets, or the safe-guarding of securities or funds, but the rule or change must then be filed promptly under Section 19(b)(1). n47

When the Commission approves a self-regulatory rule change, the notice of final disposition of the matter and the entry of an order approving such change must be accompanied by a written statement of the reasons for the Commission's approval of the change. n48

In early 2001, the Commission proposed to improve the efficiency of the process for approving SRO rule changes by, among other things, requiring the Commission to issue a release relating to a proposed rule change within ten business days of filing and allowing more rule changes to become immediately effective upon filing. n49 However, this proposed rule change was never approved.

In October 2004 the Commission amended Rule 19b-4 to require SROs to file rule changes and amendments to rule changes electronically, to post proposed rule changes on their web sites within two business days of filing, and to maintain a complete, up-to-date version of their rules on their website. n50

[iii] Security Futures Product Exchanges and Limited Purpose National Securities Associations

As a result of the CFMA, the SEC and CFTC jointly regulate single stock futures and commodities exchanges that trade single stock futures as well as commodities. n51 From the securities perspective, the legislation was designed to allow the SEC to exercise limited jurisdiction over commodities exchanges and market participants who otherwise do not engage in securities activities and whose primary regulator is the CFTC. Commodities markets on which single stock futures are traded therefore must undertake a process known as "notice registration." n52 Similarly, futures associations may register as "limited purpose national securities associations" under the CFMA. n53

In connection with single stock futures, the drafters of the CFMA had to consider the desirability of Commission review of rule filings relating to securities but also the need to minimize the administrative burden imposed on exchanges and associations subject to joint regulation in connection with these new products. The act attempts to balance these competing concerns by requiring rule filings with the Commission only on certain topics and allowing most rule filings to become effective immediately. Specifically, under Sections 6(a) and 15A(k) of the Exchange Act, which were added by the CFMA, a commodities SRO must file a proposed rule change with the Commission under the normal procedures mandated by Sections 19(b)(1) and 19(b)(2) of the Exchange Act if the rule change relates to margin, unless it imposes a higher margin level. n54 Rule changes that relate to "higher margin levels, fraud or manipulation, recordkeeping, reporting, listing standards, or decimal pricing," sales practices, or "effectuating" the SRO's "obligation to enforce the securities laws" must be filed with the Commission under Section 19(b)(7) of the Exchange Act, which was added by

the CFMA. n55 These rule changes are effective immediately upon filing, as long as a certification is filed with the CFTC to the effect that the filing is in compliance with the Commodity Exchange Act, the CFTC determines that review of the rule filing is not necessary, or the CFTC approves the rule change. n56 The SEC may abrogate rule filings made pursuant to Section 19(b)(7), after consulting with the CFTC, if it appears to the Commission that the rule change "unduly burdens competition or efficiency, conflicts with the securities laws, or is inconsistent with the public interest and the protection of investors." n57 The SEC implemented Section 19(b)(7) by adopting Rule 19b-7, which mandates the use of a newly-adopted form, Form 19b-7, for these filings, and requires the SROs to maintain and make available to the public, at their principal place of business, a copy of all rule filings and related comment letters. n58

[b] Commission-Initiated Changes in SRO Rules

Section 19(c) of the Exchange Act permits the Commission to "abrogate, add to, and delete from" the rules of a self-regulatory organization, other than a registered clearing agency, to insure fair administration of the organization or as it deems necessary or appropriate in furtherance of the purposes of the Exchange Act. n59 The Commission must notify the organization and publish a notice of the proposed rulemaking in the Federal Register that includes the text of the proposed amendment and a statement of the Commission's reasons for the proposed rulemaking. n60 Interested persons must be given an opportunity for oral presentation of data, views, and arguments, in addition to written submissions. A transcript must be kept of oral presentations. n61

A Commission-initiated rule under Section 19(c) must incorporate:

- (1) the text of the amendment to the organization's rules,
- (2) a statement of the Commission's basis and purpose for the amendment,
- (3) an identification of any facts on which the Commission considers its determination to be based, and
- (4) the reasons for the Commission's conclusions as to any facts disputed in the rulemaking. n62

In addition to the procedures specified in paragraphs (1) through (3) of Section 19(c), Commission-initiated rulemaking must be in accordance with the procedures specified in **Section 553 of Title 5 of the U.S. Code** (the "Administrative Procedure Act") for rulemaking not on the record. An amendment to an organization's rules pursuant to Section 19(c) is considered to be a rule of the organization and not a rule of the Commission. n63

[2] Regulation of Members and Associated Persons

[a] Admission to Membership

Section 6(b)(2) of the Exchange Act requires the rules of every exchange to provide that any registered broker or dealer or natural person associated with a registered broker or dealer may become a member of that exchange if certain conditions are satisfied. n64 This requirement subjects the exchanges to the same open membership requirement that Section 15A establishes for national securities associations. n65 Section 6(c) enumerates the grounds upon which an exchange may or must deny a person membership or bar a person from becoming associated with a member. Section 15A(g) establishes substantially the same criteria governing membership in a national securities association.

Membership in an SRO must be denied to any person who is not a registered broker or dealer. n66 Membership or association with a member may be denied by a self-regulatory organization, and must be denied if directed by the Commission, if the applicant for membership on a national securities exchange is subject to a "statutory disqualification." n67 The statutory disqualification scheme of the Exchange Act is the source of some confusion. In particular, it is not immediately obvious how this scheme meshes with the provisions of the Exchange Act under which

the Commission can revoke or suspend a firm's registration with the Commission or membership in an exchange or securities association or bar or suspend an individual with association with a member. n68 For example, if the Commission has permanently barred an individual from association with a broker or dealer, the statutory disqualification provisions, which prevent the individual from being associated with a member of an exchange or securities association, are superfluous. However, if an individual is barred with the right to reapply in a number of years, the statutory disqualification scheme ensures that when the individual seeks to become associated with a member of an SRO the SRO will have to notify the Commission if it intends to allow the association. n69 In addition, there are numerous regulatory actions, in addition to SEC orders, which create a statutory disqualification. For example, any type of felony conviction would form the basis for a statutory disqualification, which places the burden on the individual to demonstrate suitability for association with a member of an SRO. n70

A self-regulatory organization may deny membership to, or condition the membership of, a broker or dealer who:

- (1) does not meet financial responsibility or operational capability standards;
- (2) does not meet training, experience, or competence standards prescribed by the rules of the self-regulatory organization; or
- (3) has engaged and is reasonably likely to again engage in acts or practices inconsistent with just and equitable principles of trade. n71

A self-regulatory organization may, in accordance with the procedures established by its rules, examine and verify the qualifications of;

- (1) both an applicant to become a member and the natural persons associated with such applicant, n72 and
- (2) an applicant to become a person associated with a member. n73

A person may be barred from becoming a member or associated with a member on ground (2) or (3) above. n74

An SRO may bar a person from becoming associated with a member if the person does not agree to:

- (1) supply such information concerning his relationship and dealings with the member as may be specified in the rules of the SRO or
- (2) permit examination of his books and records to verify the accuracy of information supplied by that person. n75

A national securities exchange may limit the number of:

- (1) members and
- (2) members and designated representatives of members permitted to effect transactions on the exchange floor;

but it may not decrease either number below that in effect on May 1, 1975 or the date of registration of the exchange under the Act, whichever is later. n76

The Commission may increase (but not decrease), or remove any limitation on, the number of:

(1) members of an exchange, or

(2) members and designated representatives permitted to effect transactions on the exchange floor. n77

Finally, a registered securities association may deny membership to a registered broker or dealer on the ground that it is not engaged in a type of business in which the rules of the association require members to be engaged. n78 However, membership may not be denied by reason of either the amount of such type of business done, or other types of business in which the registered broker or dealer is engaged. n79

[b] Non-Member Access

Although the Exchange Act provides that certain categories of individuals are not eligible for membership to a national securities exchange, n80 it nevertheless permits an exchange to establish its own rules governing admission to membership. Accordingly, prior to the 1975 Amendments, some exchanges denied membership to persons or companies who were otherwise statutorily eligible to be a member of an exchange and who, in fact, might be members of other exchanges. n81 A broker wishing to execute a transaction through the facilities of an exchange of which he was not a member was obligated, therefore, to utilize the services of a member, for which a discounted commission was charged, n82 to gain access to the exchange trading facilities.

In early 1968, the Commission initiated a lengthy analysis of the effect of increased institutional participation in the securities markets. n83 This analysis ultimately led to the Commission's issuance in 1972 of a "white paper" n84 advocating the formation of a "central market system" n85 which would establish, among other things, "terms and conditions upon which any qualified broker-dealer can attain access to all exchanges." n86 A subsequent Congressional report also issued in 1972 took this concept one step further by concluding:

One must start with the assumption that all broker-dealers unless for some reason disqualified by lack of experience or inadequate financial resources should have equal access to a central market system.
n87

As a result of Congressional support for the view that exchanges are public institutions and, therefore, should be accessible by all qualified broker-dealers, n88 the Commission requested each national securities exchange to adopt by July 31, 1972, the substance of a proposed rule regarding utilization of exchange memberships. n89 By August, 1972, it became apparent that the exchanges would not comply voluntarily with the Commission's request. Consequently, the Commission proposed Rule 19b-2, n90 which was adopted in January, 1973 n91 and rescinded three years later in January, 1976. n92

To increase access to exchange trading facilities, Rule 19b-2:

(1) eliminated the practice of some exchanges of restricting membership to firms whose primary business was that of a broker or dealer, and

(2) prevented institutions and others from joining exchanges for the sole purpose of trading for their own accounts. n93

Thus, Rule 19b-2 removed the anticompetitive effect of certain exchange membership criteria that prevented some broker-dealers from becoming members if, for example, they were subsidiaries of financial institutions. The rule also assured that exchange members were principally engaged in a public securities business. n94

To minimize the potential adverse effect of Rule 19b-2, the Commission provided for a three year phase-in period for

exchange members not then conducting a predominantly public business.

In March, 1973, the Commission issued a second "white paper" n95 which re-emphasized, among other things, that the "central market system" had two essential elements:

- (1) the "elimination of artificial impediments, created by exchange rules or otherwise, to dealing in the best available market," and
- (2) the "establishment of terms and conditions upon which any qualified broker-dealer can attain access to all exchanges." n96

Asserting that a system "of negotiable access by all broker-dealers" is both "logical and efficient," n97 the Commission determined to proceed "with caution" to avoid an adverse effect upon the self-regulatory system. n98 Additionally, the Commission observed that the then imminent demise of fixed commission rates n99 might foster increased access to exchange trading facilities. n100 Nevertheless, the Commission called upon exchanges to modify their rules "to increase the maximum level up to which non-member access can be negotiated," n101 which may require "some sort of basic redefinition of the membership status of a recipient of such access." n102

The Commission's authority to promulgate a rule regulating exchange membership and the rulemaking procedures followed by the Commission in adopting Rule 19b-2 were criticized strongly by various facets of the securities industry. n103 Within a month after the adoption of Rule 19b-2, the PBW Stock Exchange petitioned the United States Court of Appeals for the Third Circuit for judicial review of the Commission's rulemaking action. n104

The court, after a lengthy analysis of the Exchange Act and Supreme Court precedents, concluded that the Commission's rulemaking action did not constitute an "order" within the parameters of the Exchange Act and, therefore, the court lacked jurisdiction to review Rule 19b-2. n105 The Supreme Court declined to issue a writ of certiorari.

During the three year phase-in period of Rule 19b-2, it became increasingly clear that Congress intended to address the issue of exchange membership. The subsequent enactment of the 1975 Amendments did so in three significant respects:

- (1) the concept of membership was clearly defined; n106
- (2) Section 6 was amended to provide, in substance, that any registered broker or dealer which satisfied exchange established standards of financial responsibility and competence should be granted membership; n107
- (3) the Commission was given express authority to amend any rule of a national securities exchange, including rules pertaining to membership. n108

Additionally, Section 31(b) of the 1975 Amendments authorized the Commission to conduct a special review of the rules of every national securities exchange and association to verify that such rules complied with the Exchange Act, as amended. Pursuant to this section, the Commission announced on March 2, 1976 the commencement of a general inquiry into exchange rules governing membership and association with members. n109 Thereafter, the Commission disapproved two proposed NYSE rules that would have (1) denied membership to any broker-dealer whose parent was not a United States person, unless the NYSE determined that broker-dealers domiciled in the U.S. could obtain reciprocal access to securities exchanges in the domicile of the applicant's parent, and (2) prohibited a member from being controlled by or being under common control with a commercial banking operation within the United States. n110 The Commission reasoned that the 1975 Amendments made exchange membership available to any registered broker or dealer irrespective of the nature, origin, or character of its "parent." n111

Given the pervasive sweep of the 1975 Amendments, the Commission rescinded Rule 19b-2 n112 and the securities exchanges, notably the NYSE, began to propose various plans to enhance nonmember access, including direct electronic access, n113 leasing of memberships, n114 and purchase of floor access privileges for short term periods. n115 Additionally, the implementation of an intermarket electronic trading system greatly expanded the accessibility of exchange markets to nonmembers. n116

In April 1998, in a proposed rule release that would overhaul the regulatory framework governing alternative trading systems, the SEC addressed the issue of institutional membership in national securities exchanges. Although recognizing the increasingly important role that institutions play in today's marketplace, the SEC concluded that non-broker-dealers should not be permitted to be exchange members. n117

[c] Off-Board Trading

Under Section 11 of the Exchange Act, as enacted originally, the Commission was authorized "to prevent such excessive trading on the exchange but off the floor by members as the Commission may deem detrimental to the maintenance of a fair and orderly market." n118 The Commission never exercised that authority.

Each national securities exchange, however, adopted rules that prohibited exchange members from effecting securities transactions otherwise than through such exchange (off-board trading rules). n119 Off-board trading rules required exchange members to route trades in listed securities through the exchange, thereby assuring the exchange of its transaction fee, as well as restricting the ability of third-market makers to compete for agency orders handled by exchange members. n120

From 1961 through 1975, off-board trading rules underwent extensive scrutiny by both Congress and the Commission. n121 The 1975 Amendments addressed specifically these rules by directing the Commission "to review any and all rules of national securities exchanges which limit or condition the ability of members to effect transactions in securities otherwise than on such exchanges." n122 Moreover, the Commission was further directed, within 90 days of the enactment of this legislation, to report to Congress "the results of its review, including the effects on competition of such rules," and to commence a proceeding pursuant to Section 19(c) to "amend any such rule imposing a burden on competition which does not appear to the Commission to be necessary or appropriate in furtherance of" the purpose of the Exchange Act. n123

Following the solicitation of comments on the off-board trading rules, n124 the Commission reported to Congress that "off-board trading rules of exchanges impose burdens on competition, and the Commission is not prepared to conclude that these burdens are necessary or appropriate in furtherance of the purposes of the [Exchange] Act." n125

Accordingly, the Commission commenced a proceeding to determine the extent of such burdens, whether there are countervailing considerations justifying the retention, and, if not, whether modifications are appropriate. Simultaneously, the Commission released three alternative proposed rules which, in effect, would permit off-board trading under certain circumstances. n126

Following extensive public hearings, n127 the Commission adopted Rule 19c-1 which required amendments to exchange off-board trading rules as of January 2, 1977, to eliminate prohibitions that prevented exchange members from effecting OTC agency transactions in listed securities with third market makers and non-member block positioners. n128 The Commission determined simultaneously that other exchange rules which also affected off-board trading had anticompetitive effects, but declined to mandate modifications of those rules pending further study n129 and receipt of comments from the recently established National Market Advisory Board ("Board"). n130

In May 1977, the Board submitted its final conclusions regarding off-board trading rules to the Commission. n131 In summary, the Board determined that "the purposes of the Exchange Act do not justify exchanges promoting such

restrictions generally and indefinitely." n132 To minimize the potential adverse effect of immediate rescission, the Board recommended that "an effective composite quotation system should be in place prior to removal." n133 Moreover, the Board urged the Commission to make "appropriate changes to Commission rules (and permit comparable rescissions of exchange rules) so that those who make markets in listed securities on exchange floors and those who do so off such floors may be subject to 'equal regulation' as defined in the Exchange Act." n134 Thereafter, the Commission proposed Rule 19c-1 to expand the scope of off-board trading and also proposed Rule 19c-2 to permit an exchange member to effect an "in-house" agency cross as both principal and agent. n135

Following extensive public hearings, n136 the Commission amended Rule 19c-1 to permit OTC agency transactions in listed securities and securities admitted to unlisted trading privileges between two broker-dealers. n137 Trades which a broker-dealer acted as agent on both sides of the trade, i.e., "in-house" agency crosses, were still prohibited. n138

Consideration of Rule 19c-2 was deferred pending further study and analysis. n139

On April 26, 1979, the Commission once again initiated proceedings to consider rulemaking to amend the exchanges' off-board trading rules. n140 The Commission simultaneously proposed for comment Rule 19c-3, which would rescind off-board trading rules with respect to OTC transactions in any exchange traded security which became listed on an exchange after April 26, 1979, or which was traded on an exchange as of April 26, 1979, but which ceased to be exchange traded for any period of time thereafter. n141 According to the Commission, proposed Rule 19c-3 would increase competition between the OTC and exchange markets for a narrow class of securities, which would provide incentives for markets to compete aggressively in the types and costs of services offered to brokers and investors. n142

After considering the various arguments raised by the commentators, n143 on June 11, 1980, the Commission adopted Rule 19c-3, and withdrew from consideration Rule 19c-2. n144 The Commission later released a report on the first year of operation of Rule 19c-3. n145 The report contained an overview of trading in Rule 19c-3 securities, including a discussion of trends in the number of such securities, volume of trading, market maker participation, continuous market making and characteristics of order flow. The report also contained an assessment of the effect of Rule 19c-3 on market quality and execution quality as well as an evaluation of the NASD surveillance of Rule 19c-3 trading. The report concluded that too few transactions had been effected pursuant to Rule 19c-3 to support any conclusions concerning the rule's effect on the securities market. The report stated that the perceived experimental nature of Rule 19c-3 trading had deterred broker-dealers from making the financial commitments necessary to trade extensively in 19c-3 securities. More time would be needed, the report concluded, before the Commission could make a valid assessment of Rule 19c-3.

To improve the trading of 19c-3 securities, the Commission then took several steps. Recognizing that effective competition for order flow would be impaired without an efficient linkage between exchange and off-board trading markets, the Commission on April 21, 1981, ordered an automated interface between the Computer Assisted Execution System ("CAES") operated by the NASD and the Intermarket Trading System ("ITS") operated by seven national securities exchanges. n146 This interface became operational on May 17, 1982.

In addressing NYSE Rule 390, the NYSE's off-board trading rule which prohibited NYSE members from effecting certain transactions off an exchange in NYSE-listed stocks, n147 the Market 2000 Report concluded that the practical effect of the rule, together with Rule 19c-3, is to prevent exchange member firms from directly internalizing order flow during exchange hours in stocks listed before April 26, 1979 and encourage such members to effect transactions overseas in these stocks after the close of the exchange (after-hours trading). The Market 2000 Report concluded further that it cannot identify a continuing justification for maintaining off-board trading rules as applied to after-hours trading. They force NYSE member firms desiring to act as principal to trade with U.S. customers overseas, losing the protection offered by the Commission's oversight of the markets. Moreover, the anti-competitive effect of the after-hours restriction within the United States is absolute. NYSE member firms simply have no choice: they must trade overseas or be forced to use the NYSE's crossing sessions, which are limited in time and scope. As a result, NYSE members send orders after hours via fax or telephone to their overseas trading desks. The Division recommends that the NYSE submit

a proposed rule change to lift the off-board trading restrictions as they apply to after-hours trading. If the NYSE were to develop a viable after-hours trading session that operated after the NYSE crossing sessions, the Division would be willing to reconsider whether off-board trading restrictions could apply during the session's operation.

With respect to off-board trading rules during regular trading hours, the report reached a different conclusion:

The actual effect on NYSE members of off-board trading restrictions during regular trading hours is somewhat less constraining than it appears. Numerous regional specialists have become affiliated with large NYSE member firms, which generally route small order flow to their regional affiliates. In practice, these alternatives allow a NYSE member firm to, in effect, execute its order flow as principal without running afoul of off-board trading restrictions. Furthermore, the anti-competitive effect of Rule 390 has been somewhat reduced to the extent that NYSE members can act as agents and route orders to third market makers for executions. n148

The report concluded that:

Although the circumstances just described do not remove the anti-competitive nature of off-board trading restrictions, in the Division's view, they reduce the urgency with which off-board trading restrictions have to be addressed. n149

As a result of SEC pressure to completely eliminate off-board trading restrictions, the exchanges rescinded the rules imposing these restrictions, beginning with the NYSE's Rule 390 on May 5, 2000. n150 On June 1, 2000, all remaining off-board trading restrictions were rescinded. n151

[d] Commission Rates

One of the principal amendments to the Exchange Act effectuated by the 1975 Amendments concerned schedules and fixed rates of commissions, allowances, discounts, and other fees of national securities exchanges. n152 Section 6(e)(1), as amended in 1975, prohibits a national securities exchange from unilaterally imposing schedules or fixed rates of commissions, allowances, discounts, or other fees to be charged by the exchange's members. n153

The Commission, however, may permit a national securities exchange to impose schedules or fixed rates in accordance with specified procedures. For schedules or fixed charges on transactions made after November 1, 1976, the Commission must find that such schedules or fees:

- (1) are reasonable in relation to the costs of providing the service (and publish the standards employed in determining reasonableness); and
- (2) further the purposes of the Exchange Act without imposing any unnecessary or inappropriate burden on competition.

In making the second finding the Commission must weigh the adverse competitive effects of the schedule or fixed rates against the competitive effects of alternative actions the Commission could take under the Exchange Act. n154

Commission proceedings concerning proposed schedules or fixed charges must follow the general procedures for proposed rule changes by self-regulatory organizations, n155 as modified by the special provisions for proceedings concerning schedules or rates contained in Section 6(e)(3). The latter affords interested persons an opportunity for oral presentation of data, views, arguments and, with respect to proposed schedules or rates for transactions after November 1, 1976, rebuttal submissions and cross-examination. n156

Section 6(e)(2) empowers the Commission to abrogate any exchange rule imposing a schedule or fixed rate if the Commission determines that the schedule or fixed rate is no longer reasonable, in the public interest, or necessary to accomplish the purposes of the Exchange Act.

To assure that the Commission has flexible authority to deal effectively with any "untoward consequences of a fully competitive rate environment," the 1975 Amendments granted the SEC certain powers, in addition to broad general powers related to the protection of investors and the maintenance of fair and orderly markets: n157

(1) to require any nonmember broker or dealer regularly effecting transactions on an exchange to comply with "such rules of such exchange as the Commission may specify," n158 and

(2) to take all appropriate action to deal with any serious disruption in the market operations for listed securities caused by trading in the third market after the advent of fully competitive rates. n159

With the elimination of fixed commission rates, Congress adopted Section 28(e) which protects fiduciaries under state and federal law, except state or federal legislation enacted to the contrary after June 4, 1975, from being charged with a breach of duty solely because the fiduciary failed to obtain the least expensive commission for an account as to which he or she exercises investment discretion. Section 28(e) permits a fiduciary to pay an exchange member, a broker, or a dealer an amount of commission greater than that charged by others (i.e., "soft dollars") if the fiduciary determines in good faith that the amount of the commission paid is reasonable. The fiduciary's decision as to reasonableness may take into consideration the value of the brokerage and research services provided by the member, broker, or dealer with respect to a specific transaction or with respect to all of the fiduciary's accounts. n160

"Payment for order flow" generally refers to the payment of cash by dealers and specialists to brokers to induce them to send aggregated small orders to purchase or sell securities to the dealers for execution. n161 This practice has generated much controversy. On the one hand, it is argued that it causes the broker to violate its fiduciary duty to the individual customer and, by influencing the broker's order-routing decision, diminishes the likelihood that best execution will be obtained for that order. Conversely, order handling practices derive from business relationships between firms, and the connection between order flow practices and overall business interests is not always direct. n162 The Commission has taken the position that customers need more information to monitor execution quality more closely where payment or inducements are provided and thus adopted Rule 11Ac1-3 in 1994 to increase disclosure of payment for order flow. n163

[3] SRO Enforcement

[a] Statutory Framework and SRO Programs

Every SRO must comply with the provisions of the Exchange Act and the rules thereunder, and the rules of the self-regulatory organization itself. In addition, in the absence of reasonable justification or excuse, n164 an SRO must enforce compliance with such provisions by its members and by persons associated with its members. n165 The Commission, by rule, may relieve a self-regulatory organization of any responsibility to enforce compliance with any provision of the Exchange Act or the rules thereunder by any member or person associated with a member. n166 The Commission adopted Rule 19g2-1 pursuant to its exemptive authority under Section 19(g)(2). n167 Under this rule, a national securities exchange or national securities association is not required to take certain actions n168 to enforce compliance by members and persons associated with members: n169

(1) with Sections 12 n170(other than Sections 12(j) (suspension or revocation of the registration of a security) and 12(k) (summary suspension of trading in a security)), 13, n17114 n172(other than Section 14(b) (solicitation by exchange members, brokers, or dealers)), 15(d), n173 and 16, n174 and the rules and regulations thereunder, except to the extent of any action normally taken with respect to any person

not an exchange member or person associated with an exchange member, n175

(2) regarding persons associated with a member, other than securities persons or persons who control a member, n176 and

(3) with respect to persons associated with a member, other than securities persons n177 whose functions are not solely clerical or ministerial, by (a) conducting examinations as to the qualifications of such persons, (b) requiring the filing of periodic reports by such persons, or (c) conducting regular inspections, including examinations of books and records, of such persons. n178

There are three categories of SRO surveillance and detection programs that enable SROs to uncover questionable activities and, when appropriate, to initiate remedial action.

Market Surveillance programs focus on trading activities and seek to detect suspect transactions. n179 Several SROs have developed computerized systems for identifying suspect trades, while others rely primarily on trained personnel to identify particular transactions for subsequent analysis. Once a trade is singled out for review, a detailed trading analysis is generally conducted. n180

Member firm compliance programs focus on the organization and operation of member firms. n181 In one program, potential salespeople are screened by one or more SROs to verify that there is no statutory bar to employment and to determine whether special supervision or other action is required. n182 In addition, complaints from customers are investigated to determine whether SRO or Exchange Act rules may have been violated. Proposed advertising also is reviewed to assure compliance with SRO rules prohibiting deceptive and questionable solicitations. Finally, member firm offices are inspected to ascertain, among other things, whether records have been properly maintained and to analyze selected customer accounts for potential improper practices. n183

Financial responsibility programs are designed to: require a broker-dealer to maintain sufficient liquid assets such that it could be liquidated in an orderly manner without the need for a formal proceeding; provide safeguards with respect to customer funds and securities held at registered broker-dealers; ensure accountability of those funds and securities; ensure that extensions of credit comply with applicable standards; and require the maintenance of accurate books and records. n184 An important financial responsibility requirement for broker-dealers is Rule 15c3-1 under the Exchange Act, the Net Capital Rule, which prescribes minimum liquidity standards for broker-dealers. n185 Another important financial responsibility requirement for broker-dealers is Rule 15c3-3 under the Exchange Act (the "Customer Protection Rule"), the purpose of which is to prevent a broker-dealer from using customer monies to finance its business. n186 A SRO is free to impose additional requirements in order to protect the interests of the customers of its members. n187

Not every SRO maintains each of these programs. To conserve resources and minimize expenses, the SROs frequently allocate responsibility for maintaining certain surveillance programs among themselves and this is one of the purposes for the creation of FINRA. n188 The Commission evaluates periodically the adequacy and effectiveness of SRO surveillance programs. n189

[b] Extension of Exchange Regulatory Control to Non-Members

Section 6(f) of the Exchange Act, as amended in 1975, authorizes the Commission to require persons who are not members or designated representatives of members to comply with the rules of an exchange:

(1) if they deal on the exchange without the services of another person as broker or, (2) if they are nonmember brokers or dealers and trade on the exchange on a regular basis. n190

The Commission may exercise its power to extend exchange regulatory control to non-members of the exchange, by rule or order, as the Commission deems necessary or appropriate in the public interest and for the protection of investors (a) to maintain fair and orderly markets or (b) to assure equal regulation. n191

[4] SRO Disciplinary Action

[a] Fair Disciplinary Procedures

For an exchange or securities association to be registered under the Exchange Act, the rules of the applicant must provide fair procedures for disciplining members and persons associated with members, denying membership, barring persons from becoming associated with members, and limiting or prohibiting access to services offered by the applicant or any member thereof. n192 These procedures must reflect fundamental standards of due process. n193 Section 6(d) describes the minimum due process that an exchange must follow in disciplinary and other proceedings. n194 Section 15A(h) establishes substantially the same due process standards for national securities associations.

Sections 6(d) and 15A(h) of the Exchange Act set forth identical procedures to be followed by an exchange or securities association in determining whether to:

- (1) discipline a member or person associated with a member; or
- (2) deny a person membership, bar a person from becoming associated with a member, or prohibit or limit a person with respect to access to services offered by the exchange or association or a member of an SRO.

In the case of disciplining a member, or person associated with a member, or denying membership, or prohibiting a person from becoming associated with a member, or limiting access to services, the person who is the subject of the proceeding must be given notice of the grounds for the proposed sanction or other action and an opportunity to be heard. A record of the proceedings must be kept. The imposition of a disciplinary sanction must be supported by a statement setting forth:

- (1) the act or practice engaged in or omitted,
- (2) the specific provision of the Act, the Commission rule, or SRO rule, that the person is deemed to have violated, and
- (3) the sanction imposed and the reason for imposing the sanction. n195

If the disciplinary sanction involves the denial of membership, association with an SRO member, or access to services offered by the exchange or its members, must be supported by a statement setting forth the specific grounds on which the denial or limitation is based. n196

Sections 6(d)(3) and 15A(h)(3) provide for summary proceedings on specific grounds. Such proceedings may be brought:

- (1) against members and persons associated with members who have been expelled or suspended by a SRO or who have been barred from being associated with a member of the organization, or
- (2) against members on the basis of financial or operating difficulty.

Proceedings also may be brought to limit or prohibit any person access to services of an SRO if either of the grounds

specified in (1) or (2) above is applicable to such person, or if not a member, the person does not meet the requirements for access and cannot be permitted access with safety to investors, creditors, members, or the SRO. Persons aggrieved by a summary action must be afforded a prompt hearing in accordance with Sections 6(d)(1) and (2) and 15A(h)(2) and (3), described above. The Commission may stay a summary action on its own motion or application by an aggrieved person if the Commission determines summarily, or, after notice and opportunity for hearing, that such stay is consistent with the public interest and the protection of investors. n197

[b] Review by the Commission

If an SRO imposes any final disciplinary sanction on any member thereof, participant therein, or any person associated with a member; denies an application for membership or participation; bars any person from becoming associated with a member; or prohibits or limits access to services offered by the SRO or a member thereof, then the SRO taking such action must give notice to:

(1) the regulatory agency for the SRO, and

(2) the appropriate regulatory agency, if different from that for the SRO, for the person against whom the action was taken. n198

The form and content of the notice of action by the SRO are governed by rule of the appropriate regulatory agency. n199

The action by an SRO of the type specified in Section 19(d)(1) is subject to review by the regulatory agency for the person against whom the action was taken on its own motion or upon application by any person aggrieved, filed within thirty days, or longer period if the agency so determines. An application for review does not stay the organization's action, but the regulatory agency may order a stay, either summarily or after notice and opportunity for hearing. Each regulatory agency is directed to establish an expedited procedure for consideration and determination of the question of a stay. n200

In a proceeding to review a final disciplinary action by an SRO against a member or a person associated with a member, the Commission must affirm or modify the sanction, or remand to the exchange for further proceeding, if it finds:

(1) the person engaged in the acts or omissions specified in the SRO's findings;

(2) the acts or omissions violated the Act, the rules or regulations thereunder, or the SRO's rules; and

(3) the provisions the person was found to violate are consistent with, and are applied in a manner consistent with, the Act. n201

The Commission must set aside the sanction and, if appropriate, remand for further proceedings if it does not make any of the foregoing findings. n202 If the sanction is found to impose an unnecessary or inappropriate burden on competition, or is excessive or oppressive, the Commission may cancel, reduce, or require the remission of the sanction. n203

In a proceeding to review an exclusionary action, n204 the Commission must dismiss the proceeding if it finds that the ground on which the action was based exists in fact, that the action is in accordance with the exchange's rules, and that the rules are and were applied in a manner consistent with the purposes of the Act. If the Commission does not make all the foregoing findings, or if it finds that the SRO's action imposes a burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, it must set aside the action and require the SRO to take affirmative action on the request. n205

[c] Judicial Review**[i] Financial Industry Regulatory Authority (Formerly the National Association of Securities Dealers)**

Final Commission orders under Sections 19(e) and (f) are reviewable at the instance of the person aggrieved in the appropriate Court of Appeals by the filing of a written petition within sixty days after the entry of the order. n206

[5] Commission Oversight of SROs

As stated above, the Exchange Act delegates to the Commission the responsibility to ensure that SROs require their members to comply with the federal securities law and the rules of the SROs. n207 In the performance of its oversight responsibilities, the Commission is in continual contact with the SROs. In addition the Commission, on its own initiative, may obtain access to SRO records n208 and employees in order to verify that each SRO is fulfilling its statutory mandate. n209

[a] Inspection and Monitoring Programs

The Commission maintains various programs to inspect and monitor SROs. Each year, the Commission conducts routine inspections of programs administered by the SROs, including SRO market surveillance programs, clearing operations, and regulatory and arbitration programs. n210

In addition, the Commission requires SROs and their members to file an annual report and, sometimes, to report to the Commission on the effect of new Commission rules or unusual trading activity. n211

On the basis of this activity, the Commission may engage in rulemaking activity, request SROs to initiate new regulatory programs, n212 institute an administrative proceeding to sanction an SRO, n213 or seek legislative action from Congress.

[b] Allocation of SRO Responsibilities

Section 17(d) authorizes the Commission to allocate certain regulatory responsibilities among SROs "to foster cooperation and coordination among self-regulatory organizations or to remove impediments to and foster the development of a national market system." n214 In particular, the Commission has the authority:

1. to relieve an SRO of the responsibility to receive regulatory reports, to examine for compliance with the provision of its rules, and to carry out other regulatory functions with respect to any person who is a member of or participates in more than one SRO, n215 and
2. to allocate among SROs the authority to adopt rules on matters as to which they share authority. n216

In exercising this authority, the Commission is required to take into consideration the regulatory capabilities of the SROs, including "availability of staff, convenience of location, unnecessary regulatory duplication" and other relevant factors. n217

In 1976, the Commission adopted Rule 17d-2 which provides, in substance, that any two or more SROs may file a plan with the Commission for allocation of regulatory responsibilities. n218 Thereafter, the Commission will solicit public comment prior to ruling on the application. Through fiscal 1982, more than 25 plans were filed, many of which related to allocation of oversight responsibilities of member firms. n219

[c] SRO Governance

[i] Financial Industry Regulatory Authority

Effective July 30, 2007, the NASD and NYSE Regulation, Inc. ("NYSE Regulation"), a subsidiary of the New York Stock Exchange LLC ("NYSE"), merged to form a new SRO, the Financial Industry Regulatory Authority, Inc. ("FINRA"). As a result of the consolidation, FINRA became responsible for the supervision and regulation of broker-dealers that engage in securities transactions with the public. FINRA consists of both the former NASD and NYSE Regulation employees and conducts business from Washington, D.C. and New York, in addition to 15 district offices located in various states. The U.S. Securities and Exchange Commission ("SEC") is responsible for the supervision and oversight of FINRA.

A. History

Prior to the formation of FINRA, the regulation of securities firms was administered by the various SROs, including both NYSE Regulation and the NASD. The NYSE created NYSE Regulation to facilitate the oversight of the NYSE and its member firms. The creation of NYSE Regulation served as a means of protecting investors by ensuring compliance through the enforcement of NYSE rules and federal securities laws. NYSE Regulation was divided into four different divisions: Market Surveillance, Member Regulation, Enforcement, and Listed Company Compliance. Market Surveillance reviewed trading activities on the NYSE trading floor, including surveillance for abusive trading practices, while the Enforcement Division was responsible for the enforcement of NYSE rules and securities laws through the use of investigations and disciplinary actions against securities firms.

In 1939, the NASD was created as result of the 1938 Maloney Amendments to the Exchange Act, which allowed for the self-regulation of the over-the-counter markets. The NASD was formerly the largest private securities regulator responsible for overseeing approximately 5100 securities firms, 116,000 branch offices and 650,000 registered securities representatives. In connection with its regulatory functions, the NASD's responsibilities included registering entities and individuals who intended to effect securities transactions with the public, providing for the examination of securities firms, and enforcing both NASD rules and federal securities laws. In addition, the NASD provided investors with an alternative dispute resolution forum in which to resolve securities related controversies and claims.

In November 2006, the NASD and NYSE Group, Inc. announced that the two entities had signed a letter of intent to merge the regulatory arms of the NASD and NYSE Regulation into a single SRO. The consolidation was intended to facilitate the regulation of the financial services industry and to increase consistency in connection with the administration and oversight of securities laws and rules, by providing for the establishment of a single set of rules and subjecting members firms to regulatory examinations by one examining authority. In addition, as approximately 200 of the NASD's 5100 members were also NYSE members, the consolidation was aimed at reducing regulatory costs by millions of dollars per year.

In seeking SEC approval of the merger, the NASD specifically stated that its objectives were to establish a new organization to be

the single SRO for all securities firms doing business with the public in the U.S.; build and sustain the confidence critical to the operation of vibrant capital markets; increase efficient, effective and consistent regulation of securities firms; provide cost savings to securities firms of all sizes; and strengthen investor protection and market integrity.

The plans for consolidation received praise from the SEC. In response to the announcement of the merger, the Chairman of the SEC, Christopher Cox, stated that the merger was "a significant step forward for America's investors and for our nation's capital markets. Protecting investors from fraud in today's complex, integrated markets requires that regulators look across markets to prevent wrongdoers from exploiting the seams in regulatory jurisdiction. Eliminating overlapping regulation, establishing a uniform set of rules, and placing oversight responsibility in a single organization

will therefore enhance investor protection while increasing competitiveness in our markets."

In connection with the merger, the NASD filed with the SEC a proposed rule change to amend its By-laws. The amendments to the NASD By-laws were aimed predominantly at implementing changes with respect to governing the new SRO. On July 26, 2007, the SEC granted approval of the amendments to the NASD By-laws. Although the merger became effective on July 30, 2007, FINRA is undergoing a three year transitional period during which the Chief Compliance Officers of the former NASD and NYSE Regulation will serve as governors of the new SRO, and dual member firms of the former NASD and NYSE Regulation must continue to comply with NASD and NYSE Regulation rules until FINRA establishes a consolidated rulebook.

B. FINRA's Mission

FINRA's objective is to protect investors and to maintain market integrity through "effective and efficient regulation and complementary compliance and technology-based services." In connection with its regulatory function, FINRA is responsible for monitoring and administering the regulatory oversight of all securities firms that transact business with the public. Included among its responsibilities, FINRA oversees the licensing of broker-dealers and representatives, provides professional training, and administers arbitration and mediation functions for the securities industry. In addition, FINRA is responsible for administering member firm examinations, advertising review, enforcement, and market surveillance, which addresses abuses within the securities industry, such as illegal trading. Furthermore, FINRA regulates, via contract, The NASDAQ Stock Market, Inc., the American Stock Exchange LLC, and the International Securities Exchange, LLC, in addition to industry utilities (i.e, Trade Reporting Facilities and over-the-counter operations).

In connection with FINRA's mission to protect investors, FINRA places a strong emphasis on investor education. To achieve this goal, FINRA provides investors with internet, media and public forums to educate investors and enhance investor understanding of the markets and investing.

C. Consolidated Rulebook

Immediately prior to the merger of the NASD and NYSE regulation, each regulatory entity had its own rulebook by which its members firms had to comply. As a result of the consolidation between the NASD and NYSE Regulation, the rulebooks of each respective entity will be combined into one consolidated rulebook. Although the merger between the NASD and NYSE Regulation became effective in July 2007, the harmonization of each former SRO's rules into a single rulebook is still pending, as a result of the significant number of rules that require reconciliation. Until a new rulebook is created, the NASD and NYSE Regulation rulebooks will be preserved, and NASD and NYSE member firms must continue to comply with each entities' respective rulebook. During this "transitional period," FINRA will continue to harmonize duplicative rules, so as to create a more efficient and effective rulebook to aid in the regulation of securities firms.

On March 12, 2008, FINRA issued an Information Notice (the "FINRA Information Notice"), discussing the methods to be used by FINRA in connection with the development of a consolidated FINRA rulebook. Pursuant to the FINRA Information Notice, FINRA has established a four-pronged approach to aid in the development of a consolidated FINRA rulebook. The approach is as follows:

1. FINRA will use "analytical touchstones" to review NASD rules and NYSE rules for obsolescence, or that may otherwise be duplicative in nature. All obsolete and duplicative NASD rules and NYSE rules will be omitted from the consolidated FINRA rulebook.
2. FINRA will identify differences in the NASD rules and the NYSE rules relating to member conduct, member application and registration, and financial and operation requirements and will determine how

the NASD rules and NYSE rules will influence the consolidated FINRA rules.

3. FINRA will explore possible approaches, including "principle-based and tiered" approaches, to apply in connection with the consolidated FINRA rules governing member conduct, member application and registration, and financial and operation requirements. 4. FINRA will review NASD rules and NYSE rules that may not be conducive to the analytical approaches, as discussed above, and that may be incorporated into the consolidated FINRA rulebook without undergoing substantive alterations.

All consolidated FINRA rules are subject to the approval of the SEC. In order to obtain the necessary SEC approval, FINRA intends on making several rule filings with the SEC. Upon receiving SEC approval and upon the effective date of the consolidated FINRA rule, FINRA members must comply with the consolidated FINRA rule. In addition, upon SEC approval, the NASD rule and NYSE rule will be eliminated and subsequently replaced with the consolidated FINRA rule.

[iii] National Association of Securities Dealers (Now FINRA)

As historic background relating to the NASD-side of FINRA, in 1994, the SEC initiated an investigation into the trading practices of the Nasdaq market and the operation of the NASD as a self-regulatory organization. The investigation culminated in a wide-ranging settlement in 1996. n220 As part of its investigation, the SEC determined that the NASD did not comply with certain of its rules or satisfy its obligations under the Exchange Act to enforce its rules and the federal securities laws. The NASD was censured and agreed to spend \$100 million over five years to improve its market surveillance capabilities and to increase staffing for examinations, surveillance, enforcement and internal audit. n221 The NASD also agreed to implement the following:

- To provide for at least 50 percent public and non-industry membership on the NASD, Nasdaq Stock Market and NASD Regulation boards and on several influential committees; n222
- To ensure that its subsidiary, NASD Regulation, has primary responsibility for the regulation, surveillance, examination and disciplining of member firms and registered persons;
- To mandate that professional hearing officers who are trained attorneys preside over disciplinary hearings;
- To ensure that the regulatory staff of the NASD be independent and autonomous with sole discretion as to investigations, membership approval, rule proposals and other policy matters and generally insulated from the commercial interests of the Nasdaq market;
- To promulgate and apply consistently uniform standards for regulatory and other access issues and to institute safeguards to insure fair and evenhanded access to NASD services and facilities;
- To ensure a substantial, independent internal audit staff;
- To design and implement an audit trail to document the life cycle of orders; n223
- To improve substantially the surveillance and examination of order handling;
- To improve substantially the reliability of trade reporting;
- To upgrade substantially the NASD's capability to enforce the Quote Rule; n224

- To propose a rule expressly making unlawful coordination among market makers of quotes, trades and trade reports;
- To enhance market maker competitiveness by eliminating anticompetitive or unlawfully enforced pricing conventions, coordination of quotes, trades and trade reports and concerted discrimination and refusals to deal by market makers;
- To redefine or repeal the excess spread rule; and
- To retain an independent consultant to monitor and report on the implementation of the above actions. n225

Concurrently with the SEC investigation, the NASD chartered a committee to respond to criticism that it was not meeting its regulatory obligations relating to supervising the OTC market. The committee examined four main issues during its review. These included basic NASD structure, the effectiveness of Nasdaq policies and processes, the fairness of NASD governing entities and the fairness and effectiveness of NASD disciplinary procedures.

In 1995, the committee released a report summarizing its findings, known as the "Rudman Report." n226 The Rudman Report concluded that, overall, the NASD had discharged its self-regulatory functions professionally and reasonably.

However, the Rudman Report recognized several areas that required improvements in response to rapid changes and growth in the Nasdaq market.

The most fundamental change recommended by the Rudman Report was the proposal that the NASD create two new, independent entities, the Nasdaq Stock Market, Inc. and NASD Regulation, Inc. The Nasdaq Stock Market would be responsible for the operation and oversight of Nasdaq. NASD Regulation would be responsible for the regulation of NASD members and associated persons. The NASD would remain the parent organization of these two new entities and would maintain ultimate policy making and oversight authority. n227

The Rudman Report also called for: increased public representation on the boards of the NASD and its subsidiaries; increased diversity in the types and sizes of member firm representation on District Committees; procedural improvements and increased funding for disciplinary proceedings; and the establishment of an Office of Internal Review. n228

As part of its settlement with the NASD, the SEC recognized the NASD' to implement the changes recommended by the Rudman Report. The NASD has complied with virtually all of these undertakings.

[iii] New York Stock Exchange

Before the creation of FINRA and prior to the end of 2003, the corporate governance structure of the NYSE permitted the exchange's Chief Executive Officer to exercise a great deal of control and autonomy. n229 Specifically, the exchange had a large Board of Directors consisting of 24 outside directors and as many as three members of management. n230 Of the 24 outside directors, 12 were to represent the securities industry and 12 the public. n231 In February 2003, the NYSE appointed a special committee to review its corporate governance practices. n232 The committee was formed as a reaction to the furor over perceived deficiencies in corporate governance practices at listed companies that culminated in the passage of the Sarbanes-Oxley Act in 2002. The formation of the committee was designed to address, among other things, the incongruity of the exchange's demanding corporate governance practices of listed issuers that were stricter than those of the exchange itself. The major event prompting a change in the NYSE's governance practices, however, was the disclosure in late 2003 of a \$139.5 million retirement-pay package to the exchange's Chief Executive Officer. n233 After disclosure of the proposed pay package, the SEC specifically

questioned the wisdom of the fact that the exchange's Chief Executive Officer's compensation was established by persons regulated by the exchange, and the exchange's corporate governance practices in general. n234

The NYSE quickly proposed a series of dramatic changes to its constitution to address governance issues raised by the compensation controversy, and the changes were approved by the SEC on December 17, 2003. n235 One major change related to the size and composition of the Board of Directors. As amended, the constitution provides that the Board of Directors will be comprised of six to twelve outside directors, plus the Chairman of the Board and, if the Chief Executive Officer is not also the Chairman, the Chief Executive Officer. n236 All directors, other than the Chief Executive Officer, must be independent. n237 The amended provisions of the NYSE constitution approved in 2003 included some basic independence standards, n238 and a more detailed independence policy, designed to establish standards similar to those applicable to NYSE-listed issuers, was approved in 2005. n239 The revised policy requires the Board of Directors to make a determination that each director, other than the CEO, does not have any material relationship with the NYSE. n240 The policy also lists certain relationships between directors or their family members and the exchange that would be deemed to impair independence. n241

The NYSE's amended constitution calls for a Board of Executives responsible for advising the CEO in connection with the managing the exchange. The Board of Executives is to consist of the Chairman of the Board, the CEO if different from the Chairman, and at least 20 but no more than 25 other members. n242 The Board of Executives must include: at least six individuals who are the principal executive officer of a broker-dealer with direct contact with customers; at least two representatives of NYSE specialist firms; at least two floor representatives who are not specialists; at least two lessors of seats on the exchange who are not affiliated with a broker-dealer; at least four persons who are the principal executive officer of an institutional investor, one of whom is a fiduciary for a public pension fund; and at least four individuals who are the principal executive officer of a listed company. n243

The amendment to the NYSE's constitution that reduces the size of the Board of Directors could create concerns regarding compliance with the "fair representation requirement" of Section 6(b)(3) of the Exchange Act. Section 6(b)(3) requires that the rules of any registered exchange provide for fair representation of its members in the selection of its directors and administration of its affairs, and that issuers and investors be represented by at least one director each. n244 To address this concern, the exchange included a provision in the constitution that the members of the Board of Executives representing the securities industry recommend candidates for election to the board comprising at least 20 percent of the directors to be elected, but in any event no fewer than two directors. n245 The constitution provides that the industry members must propose directors who, in their opinion, "are committed to serving the interests of the public and strengthening the [NYSE] as a public market, and will allow the [NYSE] to meet the fair representation requirements" of Section 6(b)(3). n246 Similar requirements apply to the committee responsible for nominating candidates for director, and to the members themselves in electing directors. n247

Under the NYSE constitution, as amended, at least forty members can propose a candidate for an elected position, and at least 100 members can propose an entire ticket. n248 In either case the proposed candidates will appear on the ballot if the Board of Directors determines they are eligible for election. n249

The amendments to the NYSE's constitution approved in December 2003 also mandated the formation of committees with specified responsibilities. n250 Most significantly, the constitution provides for the creation of Nominating and Governance, Human Resources and Compensation, Audit and Regulatory Oversight & Regulatory Budget Committees consisting exclusively of directors other than the CEO. n251 The constitution further provides for a Regulation, Enforcement and Listing Standards ("RELS") Committee that includes members of the Board of Directors and of the Board of Executives, including at least one member representing the securities industry. n252 This committee reports to the Regulatory Oversight & Regulatory Budget Committee, and a majority of the members of the committee voting on a particular matter must be members of the Board of Directors. n253 Other committees may have members of the Board of Directors and Board of Executives, but report to the board and must have at least one independent director as a member. n254

In addition to the above changes, the amendments to the constitution approved in December 2003: provide for the creation of special committees, advisory committees and other bodies; define the officers of the exchange and the responsibilities of its Chairman, who may or may not be the same person as the CEO; allow delegation of functions by the Board of Directors, within prescribed limits; and allow the Board of Directors, in limited circumstances, to amend the constitution without member approval. n255

Among other changes, the 2005 supplemental governance amendments prohibit the exchange's CEO from participating in reviews by the Board of Directors of decisions by staff, officers or committees of the exchange; requiring reviews of disciplinary decisions or participating in Board reviews of disciplinary decisions. n256 Under the constitution as amended in 2005 members of the Board of Executives are prohibited from serving on the NYSE's Hearing Board. n257

In light of the fact that all members of the RELS Committee were to be members of the Board of Directors or Board of Executives, and the annual election of directors and annual appointment of members of the Board of Executives, a concern arose that significant turnover on the RELS Committee could impair its effectiveness. n258 Continuity of RELS Committee members is desirable in light of the committee's function of hearing appeals. n259 Accordingly, in 2004 the NYSE constitution was amended to allow prior members of the RELS Committee or its predecessor, the Committee for Review, to serve on the RELS Committee. A majority of the members of the Committee voting on a matter, however, must be members of the Board of Directors. n260

In December 2005, the NYSE members voted to approve an historic merger with Archipelago Holdings, Inc., the operator of the Archipelago Exchange. n261 The NYSE-Archipelago merger resulted in a major restructuring of the NYSE, including its regulatory division. After the merger, NYSE Group, Inc. ("NYSE Group"), a public company, wholly owned New York Stock Exchange, LLC, which was the entity registered as a national securities exchange. n262 New York Stock Exchange, LLC was the sole equity member of NYSE Regulation, Inc. ("NYSE Regulation"), a not-for-profit corporation performing the functions then performed by the NYSE's regulatory division. n263 The consolidation with the NASD has now superseded this structure.

[d] Commission Enforcement Powers

The Commission exercises its enforcement powers over the securities markets both directly, by disciplining participants in the securities markets who violate the relevant provisions of the Exchange Act or Commission rules, and indirectly, through oversight of SROs, which are charged with enforcing both the above provisions and their own rules governing trading.

[i] Direct Regulation

The Commission may, by order, suspend for a period not exceeding twelve months or expel any member of an SRO or participant therein, if the member or participant is subject to a Commission order pursuant to Section 15(b)(4). n264 The Commission may suspend or bar any person from becoming associated with a member of a SRO, if the person is subject to a Commission order pursuant to Section 15(b)(6). n265 If the Commission finds on the record, after notice and opportunity for hearing, that a member, participant, or person associated with a member has willfully violated, or has effected any transaction for any other person that the member, participant, or person associated with a member had reason to believe was violating, with respect to such transaction, any provision of the Securities Act of 1933, the Investment Advisers Act of 1940, the Investment Company Act of 1940, the Exchange Act, or the rules or regulations under any of such statutes, then the Commission has the power to suspend or expel a member or participant in an SRO and to suspend or bar any person from being associated with a member of such SRO. n266

[ii] Oversight Powers

The oversight powers of the Commission, and other "appropriate regulatory agencies" in the case of banks, have been increased significantly by various legislative initiatives, including the 1975 Amendments. Under the 1975 Amendments, the Commission was given the authority to censure SROs, n267 or impose limits upon their activities, functions, and operations, if, after notice and opportunity for hearing, the agency finds, on the record, that the self-regulatory organization has:

- (1) violated or is unable to comply with any provisions of the Exchange Act, the rules or regulations thereunder, or its own rules, or
- (2) without reasonable justification or excuse n268 failed to enforce compliance with any such provision, by a member thereof or by a person associated with a member thereof. n269

Prior to the 1975 Amendments, Commission oversight of the activities of registered securities exchanges and associations was governed by Sections 15A and 19. n270 The 1975 Amendments consolidated all oversight provisions in Section 19, n271 and made those provisions applicable to all "self-regulatory organizations," n272 not just to registered securities associations. n273 The provisions of the Exchange Act governing Commission oversight of SROs are:

- (1) Section 19(a)(1) concerning Commission action after an application for registration is filed with the SEC; n274
- (2) Section 19(a)(3) concerning withdrawal from registration; n275
- (3) Section 19(b) concerning Commission review of proposed self-regulatory rules; n276
- (4) Section 19(c) concerning Commission-initiated changes in the rules of self-regulatory organizations; n277
- (5) Section 19(d) concerning Commission review of final disciplinary action by self-regulatory organizations; n278
- (6) Section 19(e) concerning the standard for review by the Commission of final disciplinary sanctions imposed by self-regulatory organizations; n279
- (7) Section 19(f) concerning the standard for review by the Commission of denial of membership or participation in a self-regulatory organization, barring association with a member thereof, or prohibiting or limiting access to services offered by such organization or any member thereof;
- (8) Section 19(g) concerning enforcement and compliance responsibilities of self-regulatory organizations; n280 and
- (9) Section 19(h) concerning the Commission's power to sanction a self-regulatory organization. n281

The grounds for the sanctions of removal from office or censure of any director or officer of a self-regulatory organization include willful violations of the Exchange Act, the rules and regulations thereunder, or the rules of the self-regulatory organization, willful abuse of authority, and failure to enforce compliance, without reasonable justification or excuse, n282 with the provisions that the organization is required to enforce by any member or person associated with a member. n283

The Commission adopted Rule 19h-1 in 1977 n284 to prescribe the form and content of:

(1) notices by self-regulatory organizations of proposed admission to, or continuances in, membership, participation, or association with a member, of any person subject to a statutory disqualification, n285 and

(2) applications to the Commission for relief from a statutory disqualification. n286

Historically, the Commission has infrequently exercised its authority to discipline SRO's for failure to carry out their regulatory responsibilities. However, in the 1990s, the Commission instituted two major enforcement actions against SROs. The first was filed in 1996 against the NASD, and resulted from an SEC investigation into the conduct of Nasdaq market makers and Nasdaq's oversight thereof. Among the violations uncovered as a result of the investigation were: a "pricing convention" under which market makers in Nasdaq securities quoted stocks only in even-eighth prices; market makers' colluding with other market makers to display quotations at prices at which they did not intend to trade; and market makers' failing to honor their price quotations and consistently reporting their trades late to Nasdaq. n287 The SEC found that the NASD ignored substantial evidence of wrongdoing on the Nasdaq market and therefore failed to properly carry out its supervisory responsibilities. n288 On the same date as the enforcement action, the Commission issued a "Section 21(a)" report detailing the problems both with the Nasdaq market and with the NASD's supervision of the market. n289 The enforcement action took the form of a settled administrative proceeding against the NASD, in which the SEC did not impose any fine but required the NASD to comply with certain "actions" relating to its composition and surveillance and enforcement functions. n290

The Commission instituted an administrative proceeding against the NYSE in June 1999 based on alleged supervisory failures in connection with independent floor brokers' trading for their own accounts, or sharing in others' trading profits, which is considered the equivalent of trading for their own account. n291 The Commission found that the NYSE failed to diligently carry out its self-regulatory responsibilities in connection with the floor brokers' alleged violations. Specifically, the Commission found that the NYSE violated failed to properly investigate the receipt of performance-based compensation by independent floor brokers, a violation of Commission and NYSE rules. n292 In addition, the Commission found that the NYSE, without reasonable justification, suspended its surveillance of floor brokers for extended periods of time. n293 The Commission's enforcement action against the NYSE, like the NASD action, did not impose a fine, but required the NYSE to comply with various undertakings relating to its market surveillance and its education of members and their representatives. n294

In September 2003, in a settled proceeding, the SEC brought a disciplinary action against the Chicago Stock Exchange based on what the Commission found to be the exchange's failure to adequately enforce the Quote rule, prohibitions on trading ahead and the Limit Order Display rule. n295 Specifically, the Commission found, among other things, that the exchange's surveillance systems were inadequate, that it lacked adequate standards for its surveillance staff, that its disciplinary actions were untimely and inadequate and that it focused on individual violations rather than on patterns of violations. n296 The Commission found that the exchange therefore violated Section 19(g)(1) of the Exchange Act, and imposed a censure and cease-and-desist order against it. n297 The exchange also, as part of the settlement, agreed to actions designed to improve its regulatory processes. n298 Among these were the creation of a Regulatory Oversight Committee and the engagement of a consultant to analyze the efficacy of the exchange's surveillance and enforcement procedures and compliance with the recommendations of the consultant to the extent practicable. n299

The Commission's 1999 enforcement action against the NYSE was followed less than six years later with another action, this one involving specialists. In April 2005, the Commission instituted a settled administrative proceeding against the NYSE based on what was alleged to be a "widespread and pervasive" pattern of illegal proprietary trading by several specialist firms. n300 The Commission found that from 1999 through 2003, individuals associated with seven specialist firms engaged in two types of unlawful trading--"interpositioning" and "trading ahead." n301 Both practices are considered a major violation of specialists' duty to place the interests of the public above their own interests. n302 The Commission found that the NYSE failed to "properly detect, investigate and discipline" these

practices by its specialist firms, and that the NYSE therefore violated Section 19(g) of the Exchange Act. n303 Specifically, the Commission found that the NYSE established parameters in its automated surveillance system designed to detect trading ahead by specialists that were unreasonably broad, and also reviewed trading for unreasonably narrow periods. n304 Where alerts were generated, the Commission found, the NYSE's surveillance department, as a result of deficient referral procedures, referred only a small number of the alerts for further investigation. n305 The Commission further found that when the surveillance department made referrals, it was almost always with respect to violations of Rule 104.10, which could be resolved informally, rather than Rule 92, which required a refer for a formal enforcement action. n306

In the 2005 disciplinary action against the NYSE, the Commission found that the exchange's trading investigations department failed to fulfill its responsibilities by failing to: conduct thorough investigations of potential violations referred to it; attempt to determine whether trading ahead activity was intentional; or expand its reviews to cover time periods beyond those specified in the referral. n307 Finally, the Commission found that the disciplinary actions recommended by the trading investigations department were inappropriately lenient. n308

In determining the sanctions to impose against the NYSE, the Commission considered significant changes the NYSE had made to its corporate governance structure. n309 The Commission also considered the NYSE's voluntary undertaking to cooperate in several respects in connection related actions, undoubtedly in connection with SEC actions against the specialist firms and individuals. n310 The sanctions against the NYSE consisted of:

- a censure;
- a cease-and-desist order against future violations of Section 19(g);
- an undertaking to retain a third-party regulatory auditor to comprehensively audit the exchange's surveillance, examination, investigation and disciplinary functions relating to specialists;
- an action to improve the NYSE's regulation of floor members by increasing authority of various supervisory personnel to make enforcement referrals and mandatory training for staff involved in surveillance, examination, investigation and discipline of floor members;
- an undertaking to implement a pilot audio and video surveillance system to monitor activity at exchange trading posts;
- an undertaking to enhance its trading systems with a view to preventing specialists from trading ahead and interpositioning; and
- an undertaking to create a staff position with specific responsibilities relating to regulation of floor members. n311

On the same date that the NYSE resolved the charges relating to specialist practices, the Commission instituted administrative and cease-and-desist proceedings against twenty former specialists. n312 In these proceedings, the Commission alleged that these individuals, between 1999 and mid-2003, violated numerous provisions of the Exchange Act, Commission regulations and the NYSE rules by engaging in interpositioning and trading ahead. n313 The Commission had previously, in March and July 2004, instituted settled administrative proceedings against several specialist firms based on the activity of the individual specialists. n314

In May 2005, in a proceeding similar to that against the NYSE the previous month, the National Stock Exchange settled Commission charges by agreeing to a censure and cease-and-desist order. n315 The exchange's President and Chief Executive Officer was also named as a respondent in the proceedings. n316 The Commission found that, among other

violations, the National Stock Exchange failed to enforce its customer priority rule, which is designed to prevent trading ahead of customer orders. n317 The exchange's alleged failures to enforce the rule took the form of a failure to conduct surveillance, for a period of several years, for violations of the priority rule. n318 The Commission found that the exchange's failure to enforce its priority rule violated Section 19(g) of the Exchange Act. n319 In addition to a censure and cease-and-desist order, the exchange agreed to numerous actions designed to strengthen its enforcement of its rules, including the creation of a regulatory oversight committee, the appointment of a chief regulatory officer who reports to the exchange's board of directors and regulatory oversight committee, and the implementation of daily automated surveillance for violations of its priority rule. n320

The Commission is empowered by Section 21 to apply to a federal district court to enjoin violations of, or enforce compliance with, the Exchange Act, the rules and regulations thereunder, or the rules of a self-regulatory organization. It may also compel an SRO to enforce compliance with such provisions. n321 However, with respect to the rules of an SRO, the Commission cannot take action against any person pursuant to Section 21(e) unless it appears to the Commission that:

- (1) the self-regulatory organization is unable or unwilling to take appropriate action against such person, or
- (2) such action is otherwise necessary or appropriate in the public interest or for the protection of investors. n322

For Congress to monitor the Commission's exercise of its oversight responsibilities, the Commission must report annually to Congress on its work during the preceding year. n323

[6] Effect of Antitrust Laws

[a] On Securities Exchanges

An exchange, being a voluntary association, is privileged to establish its own requirements for membership, and to adopt rules governing the conduct of its members. In fact, it is required by Section 6 to do so. n324 The question arises whether the collective action of the members in adopting or implementing these rules is subject to the antitrust laws if it injures a nonmember.

The Exchange Act does not provide for antitrust immunity; however, securities exchanges do enjoy an implied and limited exemption from the antitrust laws. n325 The propriety of self-regulation by an exchange was not subject to an antitrust challenge until 1963. Then, in *Silver v. New York Stock Exchange* n326 the Supreme Court held that:

- (1) the Exchange Act was not a pervasive regulatory scheme that ousted the courts of antitrust jurisdiction;
- (2) self-regulatory exchange activities not subject to SEC review are subject to judicial review under the antitrust laws; n327 and
- (3) the appropriate antitrust test was a rule of reason approach that could immunize activities
 - (a) if the activities were essential to a policy of the Exchange Act, and
 - (b) only to the minimum extent necessary to make that policy work. n328

Since the founding of the New York Stock Exchange, one of its basic features was the minimum commission

provisions, that were established from time to time by the member firms. Serious questions were raised, especially at the insistence of the Attorney General, whether this provision of the Exchange charter was in violation of the antitrust laws.

An early challenge to the minimum commission provisions was *Kaplan v. Lehman Brothers*,ⁿ³²⁹ a class action suit brought on behalf of investors generally. The plaintiffs claimed that the minimum commission fee regulations of the New York Stock Exchange violated the Sherman Act since the regulations precluded competition among brokers and resulted in higher commission rates charged to investors. Referring to the Supreme Court's holding in *Silver*, the Court of Appeals held that the questioned regulations were immune from antitrust attack since Section 19(b)(9) of the Securities Exchange Act of 1934ⁿ³³⁰ authorized the Commission to alter rules regarding the fixing of reasonable commission rates. The Exchange commission rules, the Court of Appeals found, therefore served as a necessary part of the statutory legislation.

In *Gordon v. New York Stock Exchange, Inc.*, the Supreme Court was again presented with an antitrust challenge involving fixed commission rates.ⁿ³³¹ The Supreme Court held the challenged activity was necessary to make the regulatory scheme work and was, therefore, impliedly immune from the antitrust laws.ⁿ³³²

Following the Supreme Court's decision in *Silver*, the Commission in 1965 tendered to the Senate Committee on Banking and Currency its views on the application of the antitrust laws to the regulatory system embodied in the Exchange Act.ⁿ³³³ The Commission acknowledged that its lack of authority to review exchange rulemaking action was a significant factor in the Supreme Court's determination that exchange activities not subject to Commission review are subject to judicial review under the antitrust laws. The Commission contrasted its authority over exchange rule-making activities with its powers over the NASD. The Commission concluded that "a different case would arise concerning exemption" from the antitrust laws if the Exchange Act were to be amended or require exchanges to adhere to the same substantive rulemaking procedures as are applicable to registered securities associations. Noting that "marked differences between the provisions defining the Commission's powers with respect to exchanges and those applicable in respect to the NASD affect the Commission's authority to intervene in secondary securities markets, the Commission concluded that the *Silver* case "pointed out the need to assure, throughout said review, that what is done in the name of self-regulation is genuinely such and not inimical to other aspects of the public interest."ⁿ³³⁴

The Commission concluded that effective self-regulation "requires that the self-regulatory bodies take concerted action to enforce the standards of conduct which they establish. Such enforcement by concerted action involves conduct which, absent the statutory mandate of the Exchange Act, would frequently constitute a violation of the antitrust laws."ⁿ³³⁵

The Commission proceeded to identify areas of exchange operation which, in the Commission's view, raised problems under the antitrust laws. These activities included the rules which fixed minimum commission rates and provided lower commissions for transactions between members than are charged to nonmembers; restrictions on the ability of members to deal in listed securities off the floor of the exchange; and the application of Section 19(b) to exchange activities which operate as "an unreasonable and unjustified restraint upon interstate commerce." The Commission concluded that "ad hoc determinations in the antitrust courts of complex matters" such as off-board trading and commission rates could have "an undesirable impact on the quality of the markets and the interests of the investing public."ⁿ³³⁶ Accordingly, the Commission asserted that "specific gaps in the rule-making, enforcement and disciplinary areas of exchange activity should be filled by some form of review power and, to that end, [the Commission has] initiated discussions with the principal exchanges looking toward legislation to be submitted" to Congress.ⁿ³³⁷ Finally, the Commission contended that the review process would be subject to judicial review under Section 25 of the Exchange Act and any failure on the part of the Commission "to give proper weight to the antitrust considerations to be corrected in that way."ⁿ³³⁸ Accordingly, the Commission urged that "it might, therefore, be advisable to provide antitrust immunity in areas subject to this review."ⁿ³³⁹

The 1975 Amendments have had a major impact in some of the areas addressed in 1965 by the Commission. In particular, the Exchange Act now prohibits exchange rules that establish minimum commission rates. n340 Section 6(e)(1), as amended in 1975, prohibits a national securities exchange from unilaterally imposing schedules or fixed rates of commissions, allowances, discounts, or other fees. However, the Commission does have the authority to permit the exchanges to reestablish fixed rates at any time, provided the Commission makes certain findings. n341 In view of the 1975 Amendments, it is doubtful that antitrust challenges to collective action by exchange members in adopting or implementing the rules of an exchange will continue to be focused upon commission rates. n342

On the subject of membership on a national securities exchange, a district court has held that a securities broker-dealer denied full membership on the Midwest Stock Exchange, after being accorded procedural due process, n343 was still entitled to a trial on the issue of whether the Exchange rules that the plaintiff was alleged to have violated were essential enough to the operation of the Exchange Act so as to preclude operation of the antitrust laws. n344 Another district court found both the New York and American Stock Exchanges immune from antitrust liability for temporarily suspending a broker-dealer from membership thereon for failure to comply with the net capital rule of the Exchanges. n345

Concerning the delisting of stock, the actions of the American Stock Exchange in suspending trading in stock listed on the Exchange and applying to the SEC to strike the suspended stock from listing on the Exchange n346 were held immune from antitrust liability in *Harding v. American Stock Exchange, Inc.* n347

The Seventh Circuit addressed the scope of antitrust immunity that the modern regulatory framework provides to securities exchanges in *American Agriculture Movement v. Chicago Board of Trade* ("AAM"), n348 in which a farmer's organization alleged that the CBOT created an unreasonable restraint of trade, in violation of the Sherman Act, when requiring certain owners of soybean futures contracts to reduce their holdings. The CBOT claimed immunity from the Sherman Act under the Commodities Exchange Act of 1974 (CEA). The court's reasoning in AAM proceeded along lines that, if adopted by other courts, could provide useful guidelines for the analysis of antitrust claims against securities exchanges. The court first considered whether the CEA was written in a manner that bestowed "pervasive" implied immunity on the markets it regulated. Finding that the Act's legislative history did not support this conclusion, n349 the court ruled that "we may imply immunity in either one of two circumstances: first, where the challenged action was compelled by a statute, regulation, or agency, and, second, where the action was 'scrutinized] and approv[ed] by the appropriate agency'." n350 Since the CBOT's action was not mandated by any law or by the supervising regulatory agency, in this case the Commodities Futures Trading Commission ("CFTC"), the court turned to the level of scrutiny given to the CBOT action by the CFTC. While finding that the CFTC had the ability to scrutinize the CBOT action, the court ruled that the agency failed to do so to an extent that conferred implied antitrust immunity. Summarizing its findings, the court concluded:

Silver and Gordon teach that outside the context of a pervasive regulatory scheme, such immunity is proper when the relevant agency's scrutiny and approval of the challenged practice is active, intrusive and appropriately deliberative. Put another way, an antitrust court, before relinquishing jurisdiction over allegedly anticompetitive activities, must be convinced that the agency has exercised its independent judgment in reflecting upon and approving the activity at issue. n351

In the wake of AAM, a challenge to the action of a securities exchange on antitrust grounds may not succeed if the overseeing regulatory agency conducts a thorough examination of the exchange decision.

In addition to the effect of the antitrust laws upon the collective action of exchange members, there is an entirely separate question of the effect of the antitrust laws upon concentration in the securities industry itself. There has been a consolidation trend among securities firms, especially since competitive commission rates went into effect on May 1, 1975. n352 Mergers by securities firms have not yet been challenged by the Justice Department, n353 and there are no provisions of the Exchange Act that directly pertain to securities firm mergers. n354 An approach to the area of

securities firm mergers has been suggested whereby the proposed merger would first be reviewed by the SEC for a determination of its reasonableness in the context of the national market system n355 and then subject to an antitrust proceeding under the Clayton Act. n356

[b] On National Securities Associations

Antitrust issues have also been raised with respect to the NASD (now FINRA), as a registered national securities association. In 1945, for example, the Commission vacated an NASD disciplinary proceeding against members who participated in an underwriting of a bond issue for selling bonds below the price schedules contained in the syndicate agreements. n357 The NASD found that such conduct violated a rule of the association requiring members to observe high standards of commercial honor and just and equitable principles of trade. The Commission concluded that "whatever may be the general meaning of the term 'just and equitable principles of trade,' it is clear that as used in the NASD rules the term cannot be interpreted or applied so as to add 'impediments to a free and open market,' to 'fix minimum profits,' or to impose 'any schedule of prices' or 'any schedule of commissions, allowances, discounts or other charges.'" n358

Although the Department of Justice asserted that the price maintenance provisions of the syndicate agreements violated the Sherman Act, the Commission refused to address that issue since it concluded that the NASD's interpretation of its rules was inconsistent with the Exchange Act. Nevertheless, the Commission proffered that it was "inclined to the view that the price maintenance agreements now" before it was "not illegal under the Sherman Act." n359 Cautioning that its views should not be taken to mean "that the Sherman Act is inapplicable to the underwriting business," the Commission concluded that "the mere making of agreements containing provisions for a fixed price offering, price maintenance and stabilization is not per se unlawful. But, like many other contracts, these may be entered into and performed under circumstances that amount to an unlawful suppression of competition." n360

In 1950 the Department of Justice addressed again the issue of the application of the antitrust laws to national securities associations registered pursuant to Section 15A of the Exchange Act. Observing that "the Maloney Act grants to associations formed thereunder no express exemption from the antitrust laws," the Department of Justice concluded that the Maloney Act must be construed to provide "no exemption for acts or activities that would constitute a violation of the antitrust laws, except to the extent that such acts or activities are expressly authorized by" the Maloney act, and that the provisions of the Maloney Act are to be construed, insofar as possible, "in a manner consistent with the principles of the antitrust laws." n361

From this prospective, the Department concluded that the only provision of the Maloney Act "that in any way could be construed as limiting the application of the antitrust laws is subsection (i)(1)," which states that the rules of a registered securities association may provide that a member must deal with a nonmember "at the same prices, for the same commissions or fees, and on the same terms and conditions as or by such member accorded to the general public." n362

In view of that conclusion, the Department of Justice posed four issues:

1. Whether the NASD has conformed to the principles of the antitrust laws "in the conduct of its affairs and activities and in the promulgation of rules for its members." n363
2. Whether subsection (i)(1) of the Maloney Act "is a desirable provision or one that should be stricken from the law." n364
3. Whether 'self-regulatory' organizations of the NASD type have any proper place "in our economic structure. Assuming arguendo that they do, [the Department] seriously question[s] the propriety of authorizing by statutes organizations with such power that they can practically compel all those in the trade to become members." n365

4. Whether "this type of regulatory statute is fundamentally undesirable and inconsistent with our traditional free enterprise system." n366

In conclusion, the Department of Justice commented upon the NASD disciplinary procedures and concluded:

That the trial system of the NASD appears to be a rather distinctive departure from our usual conception of democratic procedure. The NASD acts as investigator, complainant, judge and jury in connection with the hearings before its committees. Moreover, it may well be difficult to obtain an impartial decision from a committee of the association when those who are actively engaged in the securities business sit in judgment on their competitors. n367

Notwithstanding the views of the Department of Justice, the Maloney Act has not been amended. Prior to 1996, the major involvement of the Department of Justice was with regulatory proposals by the Commission dealing with fixed commissions, n368 the structure, operation and regulation of the securities markets including, n369 in particular, the formation of a central market system, and market structure issues concerning standardized options trading. n370 In 1996, the Justice Department's Antitrust Division instituted a major enforcement initiative resulting from alleged anti-competitive practices in the OTC market which led to settlements with numerous broker-dealers. n371

FOOTNOTES:

(n1)Footnote 1. Douglas, *Democracy and Finance* 82 (1936). *See also* SEC, Report of the Special Study of the Securities Markets of the Securities and Exchange Commission, House Document No. 95, Pt. 3, pp. 501-02 (1963) (hereinafter cited as "Special Study").

The Commission's relationship to the business it regulates is fundamentally different from that of other Federal independent administrative agencies; it is not only regulator, but also supervisor of 'self'-regulators. There are, no doubt, many other instances in which the policy of entrusting a degree of social control to 'private' groups has been adopted, but securities regulation is unique in featuring self-regulation, as an essential and officially sanctioned part of the regulatory pattern.

Self-regulation was originally advanced and adopted as a feature of Federal control on the ground of practicality. Initially, attention was focused on the exchanges--the over-the-counter market was too uncharted in 1934 to be capable of detailed regulation--and it was thought that the extent of the control necessary, either actually or potentially, made direct governmental intervention ineffective, if not infeasible. As John Dickinson, Assistant Secretary of Commerce and Chairman of the so-called "Roper Committee," put it in his testimony before the House of Representatives:

In framing a regulatory measure, the practical problem of administration has always to be faced and when regulation gets beyond a certain point the sheer ineffectiveness of attempting to exercise it directly through government on a wide scale counterbalances the fact that possibly the exchanges might not be as diligent as we would wish them to be about regulating themselves or as diligent as the Government would be if the task were compact enough to fall within the limits of effective governmental performance.

As indicated in the latter part of the quotation, an important limitation of self-regulation was recognized from the outset, that self-regulatory agencies might approach their regulatory duties with something less than enthusiasm. To quote Dickinson again (this time emphasizing the limitation but reverting to the theme of practicality):

Now, it may be said, of course, cynically--and I think that there is a good deal in it, and of course we have to recognize the weakness of human nature--it may be said that the idea of self-regulation is just a

device to avoid regulation and so in some instances it no doubt is; but self-regulation in the first instance, with the Government holding its power in reserve to see that self-regulation is exercised, is after all a necessary recourse in view of the mere physical limitations in time and in personnel, which operate on the direct exercise of the powers of government as the task of regulation becomes more and more extensive over a wider and wider field.

The safeguard was inherent in the original conception: it was to be the power of government held in reserve. Congressman Wolverton put the matter somewhat colorfully, in a nutshell:

I understand that the fundamental principle ... is this--that the exchanges should be permitted or required to regulate themselves; but there should be Federal authority holding the power which in a previous administration would have been referred to as 'a big stick.'

Thus there was to be, not merely self-regulation, but self-regulation supervised by the Government.

The need for public supervision is at least threefold. The aspect emphasized by Dickinson, providing assurance that self-regulatory agencies actually assume responsibility for and effectively discharge those functions assigned to them instead of to the Government, hardly needs elaboration. One of the important rationales of self-regulation is that the Government's undertaking those functions would be inefficient and self-defeating. If the Government does not undertake them and self-regulatory bodies do not perform them faithfully and effectively, the result will be an appearance, a mere facade, of protection for the public that will be more dangerous than no protection at all.

Secondly, self-regulation by a member organization involves some degree of impairment of competition and public control is necessary not only to insure that such impairment is compensated for by effective regulation, but also to insure that the kinds and extent of impairment are only such and no greater than required by the exigencies of regulation. Inherent in self-regulation is the 'private' formulation of restrictive standards of business conduct and their enforcement by, at the very least, exclusionary practices. It is essential that the standards and their application not be left to the unfettered discretion, or perhaps even lack of bona fide regulatory purpose, of the private regulators. The accommodation of various public policies inherent in the formulation of appropriate standards and their proper application cannot be abdicated by public authority.

Finally, in some of their aspects self-regulatory agencies, at present especially the exchanges, operate as quasi-public utility institutions in relation to the general public and in this capacity require public oversight for much the same reason that railroads, power companies, or telephone companies do. Thus, for example, exchanges actually operate a marketplace for public participants and fix minimum commission rates to be paid by such participants; operation of that marketplace and enforcement of the rates involve, perhaps consist largely of, conducting what is essentially a business affected with the public interest and therefore requiring public supervision and control. (Footnotes omitted).

(n2)Footnote 2. Former Section 6(a)(1) of the 1934 Act, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F.

(n3)Footnote 3. Former Section 6(b), which is discussed in § 2.02 *supra*.

The statute by no means places the entire burden of policing the exchange market upon the Commission. Recognizing that in a highly complex field like the securities business there is a large area for the operation of exchange rules on the level of business ethics rather than law, Congress relied in some measure upon the exchanges themselves to assure high standards of trade and to discipline members who violate those standards. 2 Loss, Securities Regulation 1175-76 (2d Ed. 1961 Supp. 1969).

(Footnote omitted.)

The provisions of Section 6, prior to the Securities Acts Amendments of 1975, are discussed in § 2.02 *supra*.

(n4)Footnote 4. The text of former Section 6(c) appears in § 2.02 *supra*.

(n5)Footnote 5. The powers of the Commission with respect to exchanges in original Section 19 are discussed in § 2.02 *supra*.

The statutory procedure under old Section 19(b), authorizing the Commission to amend the rules of an exchange, has been described as "on the circuitous side, and not too well articulated:"

Traditionally, the Commission discharged its functions under the section by means of informal procedures, which were not significantly changed until 1958. At least in the commission rate area, the New York Stock Exchange would notify it of a proposed rule change well in advance and wait for an indication of lack of objection. 2 Special Study, *supra*, at 344.

Rates aside, a letter from the President of the New York Stock Exchange to the Director of the Division of Trading and Markets formalized the previous practice whereby the Exchange as a "courtesy" undertook, except in "unusual circumstances," to give the staff notice of any "material change in Exchange rules or stated policy at least 2 weeks before such change is publicly announced." *Id.* at 711. And from some time in 1962 the Exchange followed a policy of discussing all rule changes informally with the staff shortly before submission to the Board [of Governors of the NYSE], instead of doing so only on occasion as it had previously. *Id.* at 711-12.

The American Stock Exchange, in the absence of any written agreement with the Commission or its staff regarding proposed rule changes, adopted the practice of discussing them in advance with the staff when the new administration of the Exchange took office in 1962. And the regional exchanges generally did not discuss rule changes in advance, but merely filed them pursuant to § 19(b) after adoption. *Id.* at 712.

In early 1964 the Commission adopted Rule 17a-8 [superseded by Rule D-4, and therefore rescinded in Sec. Exch. Act Rel. No. 11604 (1975)], under the recordkeeping provision of the statute in order to require every exchange to file a report of any proposed change in its rules not less than three weeks before any action is taken by the membership or any governing body of the exchange. If any substantive change is made in a proposal after a report is filed, the notice process must be repeated unless the change is made to comply with a suggestion by the Commission. In an emergency the exchange need give only as much notice as the circumstances permit, together with a written statement of reasons why the filing of a report as required was impracticable. *See* Sec. Exch. Act Rels. 7218 (1964) (proposed), 7253 (1964) (adopted). Authority under the rule to approve requests of exchanges to file reports of proposed changes or additions less than three weeks prior to their adoption has been delegated to the Director of the Division of Trading and Markets.

Counsel to the New York Stock Exchange thought that the Commission's power to require a report under § 17 did not give it authority to delay an exchange from exercising its rule-making powers under § 6(c) or to require the filing of rule changes otherwise than "forthwith upon their adoption" as specified in § 6(a)(4). *See* 2 Investor Protection, Hearings before Subcom. of House Com. on Int. & For. Commerce on H. R. 6789, H. R. 6793, S. 1642, 88th Cong., 1st Sess. (1963-64) 1137-38 (hereinafter cited as "Investor Protection"). And the Chairman of the House committee, though critical of the Exchange, nevertheless reminded the Commission that its own Special Study report had said that "the Exchange Act

does not require exchanges to file rule changes prior to adoption" (4 Special Study, *supra*, at 725). See Cary, Politics and the Regulatory Agencies (1967) 52. But the Commission decided that its authority to require reports was adequately broad and clear (See 2 Investor Protection, *supra*, at 1068-71), and so it went ahead, ultimately receiving a letter from the Chairman of the House committee to the effect that he was "not unaware of the fact that on March 3 the Commission adopted Rule 17a-8." Cary, Politics and the Regulatory Agencies, *supra*, at 52. The Exchange, for its part, had decided not to oppose adoption of the rule, while reserving its right to test its position at some future time. 2 Investor Protection, *supra*, at 1137-238. In any event, the Commission's rule is specific that an exchange's failure to file a required report "shall not affect the validity, force or effect of any rule of the exchange or of any exchange action or omission to act thereunder." Former Rule 17a-8(d). This proviso is altogether appropriate in view of the fact that § 19(b) does not contemplate the SEC's giving "affirmative sanction" to exchange rules. *Silver v. New York Stock Exchange*, 196 F. Supp. 209, 221 (S.D.N.Y. 1961), *rev'd on other grounds*, 320 F.2d 714 (2d Cir. 1962), *rev'd on other grounds*, 373 U.S. 341, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963), *supra* p. 3127.

2 Loss, *supra*, 1969 Supp. at 3150-3153.

(n6)Footnote 6. In contrast with the Exchange Act's lack of any requirements with regard to an exchange's disciplinary and other proceedings, Section 15A required that disciplinary actions and similar proceedings of the NASD meet certain criteria and provide for review by the Commission. Section 15A, concerning registered securities associations, is discussed in § 2.02 *supra*.

(n7)Footnote 7. This may reflect that the NASD is "a creature of statute" which "did not exist as an organization prior to the adoption of the Exchange Act." 4 Special Study, *supra*, at 603. Congress also may have been influenced by the comparative intangible nature of the OTC market. While trading on an exchange "is concentrated in a central marketplace where it can be observed and supervised, trading on the over-the-counter markets takes place throughout the country over a telephone-and-wire network connecting members bilaterally and privately with one another. The lack of "tape" or other means of reporting and publicizing transactions results in an absence of continuing information about market activities." *Id.*

(n11)Footnote 11. Former Section 15A(j).

(n12)Footnote 12. Former Section 15A(k)(1).

(n13)Footnote 13. Former Sections 15A(g) and (h).

(n14)Footnote 14. See S. Rep. No. 94-75, 94th Cong., 1st Sess., p. 27 (1975), reprinted in the Securities Primary Law Sourcebook, Vol 2, Sec. I (hereinafter cited as "Senate Report").

... S. 249 [the Securities Acts Amendments of 1975] would significantly amend the provisions of the Exchange Act dealing with the powers of self-regulatory organizations and the oversight authority of the SEC with respect to these organizations. The Committee believes that self-regulation should be preserved in the securities industry, but it also believes that the self-regulatory organizations must display a greater responsiveness to their statutory obligations and to the need to coordinate their

functions and activities. In the new regulatory environment created by this bill, self-regulation would be continued, but the SEC would expect to play a much larger role than it has in the past to ensure that there is no gap between self-regulatory performance and regulatory need and, when appropriate, to provide leadership for the development of a more coherent and rational regulatory structure to correspond to and to police effectively the new national market system.

Id. at 2.

The self-regulatory roles of the exchanges and the NASD have been major elements of the regulatory scheme of the Exchange Act since 1934 and 1938, respectively. Although self-regulation has not always performed up to expectations, on the whole it has worked well, and the Committee believes it should be preserved and strengthened. S. 249 [the Securities Acts Amendments of 1975] is designed to accomplish this, not only by clarifying regulatory responsibility at all levels but also by assuring that the self-regulatory organizations follow effective and fair procedures, that their activities are not anticompetitive and that the Commission's oversight powers are ample and its responsibility to correct self-regulatory lapses is unmistakable. The intent of the bill is not to diminish the role of self-regulation but to strengthen the total regulatory fabric.

Id. at 23.

(n15)Footnote 15. According to the Senate Committee, "the statutory pattern governing the scope of the NASD's authority is basically sound. The bill would extend the pattern now applicable to the registered securities associations to exchanges." *Id.* at 27.

(n16)Footnote 16. (n17)Footnote 17. Section 6(b)(5). For discussion of what criteria rules of an exchange must meet under Section 6(b) so that it may be registered as a national securities exchange, *see* § 2.02[2][c][i] *supra*.

(n18)Footnote 18. Section 6(b)(5).

(n19)Footnote 19. Section 6(b)(8).

(n20)Footnote 20. *See* § 2.01[5] *supra*.

(n21)Footnote 21. *See* §§ 2.03[5][c][i] and [ii] *infra*.

(n22)Footnote 22. *See* § 2.05 *infra*.

(n23)Footnote 23. Section 3(a)(27) of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F defines the term "rules of an exchange" and "rules of an association" to mean "the constitution, articles of incorporation, bylaws, and rules, or instruments corresponding to the foregoing, of an exchange [or] association of brokers and dealers ... and such of the stated policies, practices, and interpretations of such exchange [or] association ... as the Commission, by rule, may determine to be necessary or appropriate in the public interest or for the protection of investors to be deemed to be rules of such exchange [or] association"

Rule 19b-4(b) under the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section G, defines the phrase "stated policy, practice, or interpretation" to mean "(1) any material aspect of

the operation of the facilities of the self-regulatory organization or (2) any statement made generally available to the membership of, to all participants in, or to persons having or seeking access ... to facilities of, the self-regulatory organization ('specified persons') or to a group or category of specified persons that establishes or changes any standard, limit, or guideline with respect to (i) the rights, obligations, or privileges of specified persons, or, in the case of national securities exchanges or registered securities associations, persons associated with specified persons, or (ii) the meaning, administration, or enforcement of an existing rule."

Rule 19b-4(c) further provides that a stated policy, practice or interpretation is deemed to be a proposed rule change "unless (1) it is reasonably and fairly implied by an existing rule of the self-regulatory organization or (2) it is concerned solely with the administration of the self-regulatory organization and is not a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the self-regulatory organization."

Finally, pursuant to Rule 19b-4(d), an interpretation of an existing rule is itself a proposed rule change if "(1) it is approved or ratified by the governing body of the self-regulatory organization and (2) it is not reasonably and fairly implied by that rule."

(n24)Footnote 24. The term "self-regulatory organization" is defined in Section 3(a)(26), *see also* § 2.02[2] *supra*.

(n25)Footnote 25. Senate Report, *supra*, at p. 129.

On the subject of rule-making by self-regulatory organizations, the Report of the Senate Committee on Banking, Housing and Urban Affairs ("the Committee") to accompany Senate Bill 249 (that became, as modified by the Conference Committee, the Securities Acts Amendments of 1975) states:

The Exchange Act says very little about the internal decision-making processes of the self-regulatory organizations. These bodies do not act just like Government agencies, whose procedures and functions are derived from, and often prescribed by statutes rather than from the decisions of those who choose to become members, and the Committee believes the distinction is essential to the concept of self-regulation. This does not mean that the decision-making processes of the self-regulatory bodies cannot be improved. Quite to the contrary, but in the Committee's view it would be self-defeating to saddle the self-regulatory organizations with the whole panoply of Governmental administrative procedure.

One of the advantages of self-regulation is the flexibility and informality of its decision-making procedures. Further, self-regulatory organizations differ as to their membership, regulatory responsibilities, and economic power. It would be difficult to prescribe a single "proper" decision-making procedure appropriate to the circumstances of every self-regulatory organization, and it is doubtful that any such formal procedure would better serve the goal of effective securities regulation than the present practice of encouraging each organization to develop procedures which best serve its needs and those of the public investors.

The increased use of public governors, providing an opportunity for public comment on proposed rule changes, and the delegation of increased authority to professional staffs are only some of the positive steps that are being taken by the self-regulatory organizations in the area of policy formation. The Committee encourages the self-regulatory organizations to continue their healthy experimentation and innovation with regard to decision-making processes, keeping in mind at all times that they are quasi-public organizations, not private clubs, and that one of their principal goals is the prevention of inequitable and unfair practices and the advancement of the public interest.

Id. at 28-29.

(n26)Footnote 26. The terms "rules of an exchange" and "rules of an association" are defined in Section 3(a)(27). The term "rules of a self-regulatory organization" is defined in Section 3(a)(28), *see* § 2.02[2] *supra*.

(n27)Footnote 27. The filing with the Commission must be in accordance with "such rules as the Commission may prescribe." Section 19(b)(1).

The Commission initially adopted Rule 19b-4 and related forms 19b-4A and 19b-4B to establish procedures for the notification and review process mandated by Section 19(b) of the Exchange Act. As initially adopted, Rule 19b-4 contained a definition of the term "proposed rule change" and further defined the circumstances under which a stated policy, practice, or interpretation of a self-regulatory organization would be deemed not to be a rule of such organization. *See* Sec. Exch. Act Rel. No. 11604, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,267 (Aug. 19, 1975).

In 1979, the SEC proposed a definition of the term "rule" that was meant to resolve "problems with the existing standards for determining whether a particular self-regulatory action is a 'proposed rule change.'" SEC Release No. 34-15838 (May 18, 1979). The proposed Rule 3b-7 would have defined "rule" as:

the whole or part of any statement or of any stated policy, practice, or interpretation (including any form, report, or questionnaire) (a) that is of general or particular applicability and future effect, (b) that is designed to implement, interpret, describe, or prescribe a requirement, procedure, definition, standard, guideline, policy, or any part of a corporate or financial structure or organization, and (c) that directly or indirectly affects the rights or obligations of any person or the conduct of business by any person; [p]rovided, however, [t]hat the term "rule" shall not include any stated policy, practice, or interpretation with respect to an existing rule that is reasonably and fairly implied by that rule and that is not required under the rules of the self-regulatory organization to be approved by the governing body of the self regulatory organization.

Release No. 34-15838. Ultimately, many commentators objected to the proposed definition. Some expressed concerns relating to the breadth of the definition, others thought that the terms meaning was "already sufficiently clear," and still others thought the definition was "difficult to read and understand." SEC Release No. 34-17258 (Oct. 30, 1980). Ultimately, this proposal was withdrawn. *Id.*

Effective January 1, 1981, the Commission amended Rule 19b-4, *See* Sec. Exch. Act Rel. No. 17258, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,681 (Oct 30, 1980). The amendments clarify which actions of a self-regulatory organization will be deemed to constitute proposed rule changes and, thereby, come within the parameters of Section 19(b). In particular, Rule 19b-4, as amended, provides, in pertinent part, that a stated policy, practice, or interpretation of a self-regulatory organization shall be deemed to be a proposed rule change:

unless (1) it is reasonably and fairly implied by an existing rule of the self-regulatory organization or (2) it is concerned solely with the administration of the self-regulatory organization and is not a stated policy practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the self-regulatory organization.

Rule 19b-4(c). The "reasonably and fairly implied" standard has generated the most review by the Commission. While there is no clear standard for determining whether a proposal is "reasonably implied" by an existing rule, most administrative decisions have held that when an SRO's interpretive statements establish a new standard of conduct for its membership, these statements are not "fairly and reasonably implied" by existing SRO rules, and therefore do not fall within the exception of 19b-4(c). Another relevant consideration is whether the SRO may bring an enforcement action for purported violations of the standard. *See, e.g., Matter of the National Stock Exchange and David Colker*, SEC

Release No. 34-51714, 2005 SEC Lexis 1178 (May 19, 2005) (holding that the National Stock Exchange's failure to file a proposed rule change concerning the enforcement of its market order exposure rule violated Section 19(b)); *Matter of the Application of Bloomberg L.P.*, SEC Release No. 34-49076, 2004 SEC Lexis 79 (January 14, 2004) (finding that the NYSE's certain attempts to impose contractual restrictions on vendors' use of market quotation data disseminated by the NYSE via Bloomberg could not be "fairly implied"); *Lehl v. SEC*, 90 F. 3d 1483, 1487-88 (10th Cir. 1996) (holding that the NASD's markup policy did not set forth a new standard of conduct, and, therefore it was not a rule change requiring formal approval by the Commission).

The 1980 amendments to Rule 19b-4 also provided that a proposed rule change may take effect upon filing with the Commission if the proposal has been designated by the self-regulatory organization as:

(1) constituting a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule, (2) establishing or changing a due, fee, or other change, [or] (3) concerned solely with the administration of the self-regulatory organization

Rule 19b-4(f).

Finally, through the 1980 amendments the Commission rescinded Form 19b-4B and modified and redesignated Form 19b-4A as Form 19b-4. Accordingly, all filings with respect to proposed rule changes by self-regulatory organizations must now be made on Form 19b-4. Rule 19b-4(a).

Form 19b-4 requires disclosure of:

(1) The text of the proposed rule change and, if the self-regulatory organization "reasonably expects" that the proposed rule "will have any direct effect, or significant indirect effect, on the application of any other rule of the self-regulatory organization," the designation or title of such rule and a description of the anticipated effect of the proposed rule on the application of such other rule. Item 1, Form 19b-4.

(2) A description of the action taken by the members or board of directors or other governing body with respect to the proposed rule, together with the names and telephone numbers of the persons on the staff of the self-regulatory organization who are prepared to respond to questions and comments on the proposed rule change. Item 2, Form 19b-4.

(3) A detailed and specific statement of the purpose of the proposed rule change and its basis under the Exchange Act and the rules and regulations thereunder applicable to the self-regulatory organization together with a response specifically addressing all significant arguments that the proposed rule change is inconsistent with those requirements. Item 3, Form 19b-4. At a minimum, the statement is required to describe the reasons for adopting the proposed rule change, any problems that the proposed rule change is intended to address, the manner in which the proposed rule change will resolve those problems, any significant issues known to the self-regulatory organization that persons affected are likely to have in compliance with the proposed rule change, together with an explanation as to why the proposed rule change is consistent with the Exchange Act requirements and the rules and regulations thereunder. *Id.*

(4) A statement whether the proposed rule change will have an effect on competition and, if so, the nature of that effect and the particular categories of persons and kinds of business upon which any burden will be imposed. Item 4, Form 19b-4.

(5) A summary of the written comments, if any, that were received by the self-regulatory organization pertaining to the proposed rule change. Item 5, Form 19b-4.

(6) A statement whether the self-regulatory organization consents to an extension of time within which the Commission may consider the proposed rule. Item 6, Form 19b-4.

(7) A statement of the basis for summary effectiveness or accelerated effectiveness if requested by the self-regulatory organization. Item 7, Form 19b-4.

(8) A statement whether the proposed rule change is based upon the rules of another self-regulatory organization or of the Commission and, if so, an explanation of any differences between the proposed rule and the rule upon which it is based. Item 8, Form 19b-4.

In addition, the application is required to be accompanied by certain exhibits including

- (1) a completed notice of proposed rule change for publication in the Federal Register;
- (2) copies of notices issued by the self-regulatory organization soliciting comments on the proposed rule change and copies of all written comments received, including comments received after the original filing date of the rule change;
- (3) any transcript of comments on the proposed rule change made at any public meeting, and if the transcript is not available, a summary of such comments; and
- (4) copies of any form, report, or questionnaire to be utilized by the self-regulatory organization in the operation or implementation of the proposed rule. Item 9, Form 19b-4.

SROs were formerly required to file twelve copies of Form 19b-4 and a specified number of copies of the exhibits, but these requirements were removed in 2004 when the Commission mandated electronic filings of all Forms 19b-4. See Sec. Exch. Act. Rel. No. 50486 (Oct. 4, 2004); General Instruction F to Form 19b-4.

(n28)Footnote 28. Section 19(b)(1). Prior to the Securities Acts Amendments of 1975, self-regulatory organizations were not required to file any explanation or justification for any proposed rule changes filed with the Commission. The requirement of a justification for the proposed change was added to facilitate expeditious Commission review and evaluation of such proposals and to assure informed public comment on the proposals. Senate Report, *supra*, at p. 29. Also, in its report the Senate Committee on Banking, Housing and Urban Affairs stated that it was its "intention in adopting this standard to hold the self-regulatory organizations to the same standards of policy justification that the Administrative Procedure Act imposes on the SEC." *Id.*

(n29)Footnote 29. Item 3, Form 19b-4.

(n30)Footnote 30. Item 3, Form 19b-4. Section 19(b)(2) provides, in part, that the "Commission shall approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of this title [the Exchange Act] and the rules and regulations thereunder applicable to such organization. The Commission shall disapprove a proposed rule change of a self-regulatory organization if it does not make such finding."

(n31)Footnote 31. "[T]he Committee believes interested persons should have a meaningful opportunity to obtain accurate information about proposed changes in self-regulatory rules and to comment on the need or justification for these changes. Section 19(b)(1) would require the SEC to give notice and provide an opportunity for interested persons to participate in the process of reviewing a proposed change in a self-regulatory organization's rules. In addition, this

section would require that all comments and all correspondence between the SEC and the self-regulatory agency concerning the proposal be available for public inspection." Senate Report, *supra*, at pp. 29-30.

Rule 19b-4(g) states the Commission's policy of allowing both the self-regulatory organization and interested persons the opportunity to submit additional written data, views, and arguments, after the Commission has instituted proceedings to determine whether a proposed rule change should be disapproved.

Rule 19b-4(i) requires all self-regulatory organizations to retain a file, at their principal place of business, for public inspection and copying, of all filings and correspondence received with respect to any filing made pursuant to Rule 19b-4.

(n32)Footnote 32. Section 19(b)(2). Under Section 19(b)(3)(A) and Rule 19b-4(f), a proposed rule change may take effect upon filing with the Commission if certain requirements are satisfied.

(n33)Footnote 33. Section 19(b)(2).

(n34)Footnote 34. Section 19(b)(2). These matters, however, are usually dealt with informally; the Commission almost never uses the outlined formal procedures.

For example, the Commission's approval of Nasdaq's SuperMontage proposal took over fifteen months. Sec. Exch. Act. Rel. No. 43863 (Jan. 19, 2001), *available at* 2001 SEC LEXIS 112, at *1. As is almost always the case with controversial rule changes, Nasdaq chose to work informally with the SEC staff rather than forcing the Commission to institute proceedings to determine whether the rule change should be approved. The proposal was amended nine times, primarily in response to staff comments. *Id.* at *1-2.

Proposed rule changes may be filed by a self-regulatory organization, such as a national securities exchange, prior to completion of all action required to be taken under the constitution, articles of incorporation, by-laws, rules, or instruments corresponding thereto if the organization consents to an extension of the time period specified in Exchange Act Section 19(b)(2) until at least thirty-five days after appropriate amendments have been filed with the Commission setting forth the completion of all such action. Paragraph E, General Instructions, Form 19b-4.

On the subject of the Commission's procedure after a proposed rule change is filed by a self-regulatory organization, the Senate Committee on Banking, Housing, and Urban Affairs, *supra*, stated:

Section 19(b)(2) would give the SEC sufficient flexibility to fashion a proceeding appropriate to the particular self-regulatory proposal being considered. In many, perhaps most, situations, notice and an opportunity for written comment would be sufficient and there would undoubtedly be few, if any, comments. In cases in which fundamental policy issues are involved, however, oral hearings or publicly announced conferences might be most appropriate.

[T]he Exchange Act at present creates the anomalous situation whereby an exchange, which may not lawfully do business until its rules have undergone official scrutiny in relation to statutory standards, is free to change those rules at any time thereafter without similar advance scrutiny or approval. Section 19(b)(2) would fill this regulatory gap by providing that, subject to certain exceptions specified in Section 19(b)(3), no change in the rules of any self-regulatory organization may become effective until the SEC finds it to be consistent with the registration requirements for the organization and the purposes of the Exchange Act. The Committee believes the Commission has a responsibility to see that self-regulatory rules are fully responsive to regulatory needs. By explicitly providing that the Commission's oversight authority encompasses major self-regulatory [sic] policies, the bill would make this responsibility clear and substantially decrease the possibility of slippage between regulatory need and self-regulatory performance.

Senate Report, *supra*, at p. 30.

(n35)Footnote 35. Section 19(b)(2). The Commission frequently grants accelerated approval to amendments to proposed rule changes, and when it does so, typically solicits comments on the amendments. *See, e.g.*, Sec. Exch. Act Rel. No. 43863 (Jan. 19, 2001); Sec. Exch. Act Rel. No. 47351 (Feb. 11, 2003).

(n36)Footnote 36. Rule 19b-4(g), reprinted in the Securities Primary Law Sourcebook, Volume B, Section G.

(n37)Footnote 37. Sec. Exch. Act Rel. No. 40761 (Dec. 8, 1998).

(n38)Footnote 38. Rule 19b-4(e).

(n39)Footnote 39. *Id.* The 1998 amendments also re-designated Rules 19b-4(e), (f), (g) and (h) as 19b-4(f), (g), (h) and (i), respectively. Sec. Exch. Act Rel. No. 45761 (Dec. 8, 1998).

(n40)Footnote 40. Rule 19b-4(f)(1)-(3).

(n41)Footnote 41. Section 19(b)(3)(A).

(n42)Footnote 42. Sec. Exch. Act Rel. No. 35123, 1994 SEC LEXIS 4053 (Dec. 20, 1994). This amendment was in part in response to SRO concerns that the process of modifying rules was too lengthy and hampered their efforts to provide prompt, flexible and innovative order-entry and trading services to their members and to the investing public. *See* "Market 2000: An Examination of Current Equity Market Developments" (January 1994) (hereinafter cited as "Market 2000 Report") (recommending that the self-regulatory rule review process be expedited for routine procedural and administrative modifications to existing order entry and trading systems).

(n43)Footnote 43. Sec. Exch. Act Rel. No. 35123, 1994 SEC LEXIS 4053 (Dec. 20, 1994).

(n44)Footnote 44. Rule 19b-4(f)(5) and (6).

(n45)Footnote 45. Rule 19b-4(f)(5) and (6).

(n46)Footnote 46. Section 19(b)(3)(C).

(n47)Footnote 47. Section 19(b)(3)(B). Special provisions are contained in Section 19(b)(4) for proposed rules or rule changes of registered clearing agencies for which the Commission is not the "appropriate regulatory agency," *i.e.*, banks. These provisions permit review by the other agency before Commission action and permit the appropriate regulatory agency to compel disapproval of the proposed rule or rule change if it determines that it is inconsistent with the safeguarding of securities or funds in the custody or control of the clearing agency for which it is responsible.

(n48)Footnote 48. Section 23(c).

(n49)Footnote 49. Sec. Exch. Act Rel. No. 43860 (Jan. 19, 2001). The Commission proposed adopting a new rule, Rule 19b-6, to replace Rule 19b-4. The primary effect of Rule 19b-6 would be to:

- require the SEC to issue a release relating to a proposed SRO rule change within ten business days of filing, unless the SRO consents to a longer time period;
- eliminate the pre-filing and thirty-day waiting period before effectiveness for "non-controversial" rule changes;
- include changes to trading rules, other than those which make fundamental structural changes to a

market, in the categories of rule changes which can become immediately effective;

- clarify that if a rule change becomes immediately effective under Section 19(b)(3)A, this does not create an inference that the change is in the public interest; and
- permit SROs to file rule changes electronically.

(n55)Footnote 55. Section 19(b)(7); *see* Sec. Exch. Act Rel. No. 44692, 2001 SEC LEXIS 1641, at *42-43 (Aug. 13, 2001) (hereinafter cited as "Single-Stock Futures Release").

(n56)Footnote 56. Section 19(b)(7)(B). This process conforms to the rule approval process used in the futures industry. *See* Single Stock Futures Release, *supra*, at *51-53.

(n57)Footnote 57. Section 19(b)(7)(c).

(n58)Footnote 58. Rule 19b-7.

(n59)Footnote 59. Section 19(c) was amended in 1975 to address several problems with the SEC's then existing indirect regulatory powers, *i.e.*, through requiring self-regulatory organizations such as exchanges to take specified actions. The Senate Report explained:

First, the SEC has divergent authority with respect to a registered securities association's rules on the one hand and an exchange's rules on the other. Under the bill, the SEC would have uniform authority to "abrogate, add to, or delete from" any self-regulatory organization's rules. (Section 19(c)). Moreover, where the Commission has exercised its rulemaking authority under Section 19(c) of the Exchange Act to abrogate, add to, or delete from the rules of any self-regulatory organization, any rule of a self-regulatory organization inconsistent with such Commission rule adopted pursuant to Section 19(c) shall be null and void.

Second, there has been a continuing controversy as to the precise scope of the SEC's power to amend the rules of a self-regulatory organization. The bill would give the SEC clear authority to amend any self-regulatory organization's rules in any respect consistent with the objectives of the Exchange Act (Section 19(c)).

Third, there is also a controversy over the procedures that the SEC must follow in order to force a change in the rules of a self-regulatory organization. In recognition of the quasi-legislative, policy-making nature of an SEC determination to require such a change, Section 19(c) would provide that the Commission's action shall be by "rule". Accordingly, the basic procedures the Commission would be required to follow are specified in the Administrative Procedure Act (5 U.S.C. § 553) for rulemaking not on the record. The bill would, however, also require the Commission to (1) provide all

interested persons an opportunity to present their views in person as well as in writing; (2) keep a transcript of all oral presentations; and (3) publish a statement of its reasons for taking the action it did, including an identification of the facts, if any, it has relied upon in reaching its conclusion. (Section 19(c)).

In order to avoid any doubt as to the SEC's authority in areas where its direct authority overlaps its indirect authority, Section 19(c)(4) would make clear that where the Commission has direct authority, it would not be required to proceed under Section 19(c) or to follow the procedures specified in that section. In such cases, the SEC could rely on its direct authority and follow the usual Administrative Procedure Act requirements for notice and comment rule-making.

Senate Report, *supra*, at pp. 31-32.

Although section 19(c) would give the SEC plenary power over self-regulatory rules, the section in no way limits the SEC's ability to use its other powers or modifies the standard requirements that it must comply with in doing so. Where the SEC has direct authority with respect to a specific subject matter and a self-regulatory organization also exercises authority in the area, the SEC may change regulatory policy in any one of three ways: (1) by promulgating its own substantive rule preempting self-regulatory rules on the subject, *e.g.*, Rule 10a-1 concerning short sales; (2) by promulgating a rule under its grant of substantive authority which imposes conditions on the exercise of self-regulatory jurisdiction in the area or the utilization of self-regulatory facilities, *e.g.*, Rule 9b-1 concerning options trading and Rule 11b-1 concerning specialist trading; or (3) by utilizing section 19(c) to force the self-regulatory organization to change its rules. The bill would not alter the SEC's ability to proceed in these ways.

(n60)Footnote 60. Section 19(c)(1) of the Securities Exchange Act of 1934, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F.

(n61)Footnote 61. Section 19(c)(2).

(n62)Footnote 62. Section 19(c)(3).

(n63)Footnote 63. Section 19(c)(4).

(n64)Footnote 64. Section 6(b)(2).

(n65)Footnote 65. Former Section 15A(b)(3) provided, in part, that the rules of every national securities association must provide that "any broker or dealer who makes use of the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce the purchase or sale of, any security otherwise than on a national securities exchange," is eligible to become a member of such association, unless ineligible for membership pursuant to Section 15A(b)(4), which specifies various categories of misconduct, or 15A(b)(5), which permits associations to establish training, experience, and education criteria for members.

(n66)Footnote 66. Sections 6(c)(1); 15A(g)(1). In the case of an exchange, a person "associated with" a registered broker-dealer is eligible for membership. Section 6(c)(1). The 1975 Amendments added to the Exchange Act a definition of the term "person associated with a broker or dealer" or "associated person of a broker of dealer" in Section 3(a)(18) to mean:

any partner, officer, director, or branch manager of such broker or dealer (or any person occupying a

similar status or performing similar functions), any person directly or indirectly controlling, controlled by, or under common control with such broker or dealer, or any employee of such broker or dealer, except that any person associated with a broker or dealer whose functions are solely clerical or ministerial shall not be included in the meaning of such term for purposes of section 15(b) of this title (other than paragraph (6) [sanctions] thereof).

Broker-dealer registration requirements under Section 15 of the Exchange Act are discussed in § 3.03 *infra*.

(n67)Footnote 67. Sections 6(c)(2); 15A(g)(2). A national securities exchange or association cannot admit a person to membership or permit a person to become associated with a member if that person is under a statutory disqualification, without prior notice to the Commission. The notice must be not less than thirty days prior to admission or permission to become associated with a member, and the form and content of the notice are governed by Commission rule. Section 6(c)(2); Section 15A(g)(2). Neither a registered securities association nor a registered clearing agency may admit a person under a statutory disqualification to membership or permit a person to become associated with a member without prior notice to the Commission. Section 15A(g)(2); Section 17A(b)(4)(A).

Section 3(a)(39) provides that a person is subject to a "statutory disqualification" if such person:

(A) has been and is expelled or suspended from membership or participation in, or barred or suspended from being associated with a member of, any self regulatory organization, foreign equivalent of a self regulatory organization, foreign or international securities exchange, contract market designated pursuant to section 5 of the Commodity Exchange Act (7 U.S.C. 7), or any substantially equivalent foreign statute or regulation, or futures association registered under section 17 of such Act (7 U.S.C. 21), or any substantially equivalent foreign statute or regulation, or has been and is denied trading privileges on any such contract market or foreign equivalent;

(B) is subject to:

(i) an order to the Commission, other appropriate regulatory agency, or foreign financial regulatory authority:

(I) denying, suspending for a period not exceeding 12 months, or revoking his registration as a broker, dealer, municipal securities dealer, government securities broker, or government securities dealer or limiting his activities as a foreign person performing a function substantially equivalent to any of the above; or

(II) barring or suspending for a period not exceeding 12 months his being associated with a broker, dealer, municipal securities dealer, government securities broker, government securities dealer, or foreign person performing a function substantially equivalent to any of the above;

(ii) an order of the Commodity Futures Trading Commission denying, suspending, or revoking his registration under the Commodity Exchange Act (7 U.S.C. 1 *et seq.*); or

(iii) an order by a foreign financial regulatory authority denying, suspending, or revoking the person's authority to engage in transactions in contracts of sale of a commodity for future delivery or other instruments traded on or subject to the rules of a contract market, board of trade, or foreign equivalent thereof;

(C) by his conduct while associated with a broker, dealer, municipal securities dealer, government securities broker, or government securities dealer, or while associated with an entity or person required to be registered under the Commodity Exchange Act, has been found to be a cause of any effective suspension, expulsion, or order of the character described in subparagraph (A) or (B) of this paragraph, and in entering such a suspension, expulsion, or order, the Commission, an appropriate regulatory agency, or any such self regulatory organization shall have jurisdiction to find whether or not any person was a cause thereof;

(D) by his conduct while associated with any broker, dealer, municipal securities dealer, government securities broker, government securities dealer, or any other entity engaged in transactions in securities, or while associated with an entity engaged in transactions in contracts of sale of a commodity for future delivery or other instruments traded on or subject to the rules of a contract market, board of trade, or foreign equivalent thereof, has been found to be a cause of any effective suspension, expulsion, or order by a foreign or international securities exchange or foreign financial regulatory authority empowered by a foreign government to administer or enforce its laws relating to financial transactions as described in subparagraph (A) or (B) of this paragraph;

(E) has associated with him any person who is known, or in the exercise of reasonable care should be known, to him to be a person described by subparagraph (A), (B), (C), or (D) of this paragraph; or

(F) has committed or omitted any act enumerated in subparagraph (D), (E), or (G) of paragraph (4) of section 15(b) of this title, has been convicted of any offense specified in subparagraph (B) of such paragraph (4) or any other felony within ten years of the date of the filing of an application for membership or participation in, or to become associated with a member of, such self regulatory organization, is enjoined from any action, conduct, or practice specified in subparagraph (C) of such paragraph (4), has willfully made or caused to be made in any application for membership or participation in, or to become associated with a member of, a self regulatory organization, report required to be filed with a self regulatory organization, or proceeding before a self regulatory organization, any statement which was at the time, and in the light of the circumstances under which it was made, false or misleading with respect to any material fact, or has omitted to state in any such application, report, or proceeding any material fact which is required to be stated therein.

Section 15(b)(4), referred to in subsection (F) of Section 3(a)(39), contains the grounds upon which the Commission may impose a sanction upon a broker or dealer.

(n68)Footnote 68. Sections 15(b)(4) and 15(b)(6), which provide the Commission with the authority to suspend or revoke a firm's registration or suspend or bar an individual from association with a broker-dealer, and Sections 19(h)(2) and (3), under which the Commission may suspend or bar a firm from membership in an association or an individual from membership in the association, are discussed in § 2.03[5][d] *infra*.

(n69)Footnote 69. Conversely, the Commission would not seem to need to bring an administrative proceeding barring someone from the securities industry if they have been subject to an injunction in an SEC action, because Section 3(a)(39)(F) makes this type of injunction the basis for a statutory disqualification. However, the Commission always brings these types of "follow-up" administrative proceedings, which provide guidance to the self-regulatory organizations regarding when, if ever, readmittance may be appropriate.

(n70)Footnote 70. The procedures which must be followed to overcome a statutory disqualification are summarized in § 2.03[5][d] *infra*.

(n71)Footnote 71. Sections 6(c)(3)(A); 15A(g)(3)(A).

(n72)Footnote 72. Sections 6(c)(3)(B); 15A(g)(3)(B).

(n73)Footnote 73. An SRO may also require a person associated with a member, or any class of such persons, to be

registered with the SRO in accordance with procedures established by its rules. Sections 6(c)(3)(B); 15A(g)(3)(B).

(n74)Footnote 74. Sections 6(c)(3)(B), and 15A(g)(3)(B). The phrase "natural person" appears in Section 6(c)(3)(B) but is omitted from Section 15A(g)(3)(B), which refers only to a "broker or dealer." This discrepancy does not appear to have any substantive significance because the criteria for barring an applicant from membership are identical in both Section 6(c)(3)(B) and Section 15A(g)(3)(B).

Sections 6(c)(3) and 15A(g)(3) authorize a national securities exchange and association to establish, by rule, procedures enabling the SRO to examine and verify the qualifications of an applicant to become a member, or a person associated with a member. Furthermore, an SRO may require either a person associated with a member or a class of such persons to be registered with the SRO according to procedures established by the SRO. *Id.*

(n75)Footnote 75. Sections 6(c)(3)(C); 15A(g)(3)(C). Commission review of action by an SRO that results in denial of membership or barring of a person from becoming associated with a member is governed by Section 19(e) and (f), *see* § 2.03[4][c] *infra*.

(n76)Footnote 76. Section 6(c)(4).

(n77)Footnote 77. Section 6(c)(4).

(n78)Footnote 78. Section 15A(g)(5).

(n79)Footnote 79. Section 15A(g)(5). Under the conference substitute, a registered securities association would be permitted to deny membership to registered brokers and dealers who are not engaged in particular types of business specified in the association's rules. An association would be prohibited, however, from denying membership to a registered broker and dealer by reason of his being engaged in other lines of business not specified in the rules of the association or because of any mixture of specified and nonspecified business. Thus, the substitute has the advantage of permitting specialized associations of broker and dealers to be formed and registered with the SEC, but assures that eligibility for membership will not be determined in an arbitrary or discriminatory manner. If such a specialized association is formed, the conferees believe the SEC has ample authority under amended section 17(d) and 19(g)(2) and elsewhere to tailor the association's statutory responsibilities to its specialized objectives.

H.R. Rep. No. 94-229, 94th Cong., 1st Sess., 99 (1975).

Section 17(d) empowers the Commission to relieve a self-regulatory organization of certain responsibilities, and Section 19(g)(2) empowers the Commission to relieve a self-regulatory organization from enforcement of compliance responsibilities.

(n80)Footnote 80. *See* § 2.03[2][a] *supra*.

(n81)Footnote 81. For example, some exchanges, *e.g.*, the New York and American Stock Exchanges, denied membership to any person or entity whose "parent" was not also engaged in a securities business. This effectively barred from membership broker-dealer firms which were subsidiaries of financial institutions. In contrast, most regional exchanges, *e.g.*, the Philadelphia, Pacific [now NYSE Arca], Boston and Midwest [now Chicago] Stock Exchanges, permitted some form of institutional membership. For a general discussion of the then existing exchange membership criteria, *see* Sec. Exch. Act Rel. No. 9950, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,178 (Jan. 16, 1973).

(n82)Footnote 82. As of 1973, the executing member normally charged a standard commission, less a professional discount of about 40 percent. *See* SEC, Policy Statement of the Securities and Exchange Commission for the Structure of Central Market System, pp. 48-49 (Mar. 29, 1973) (hereinafter cited as "Policy Statement").

(n83)Footnote 83. For a history of the Commission's analysis, see Sec. Exch. Act Rel. No. 9950, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,178 (Jan. 16, 1973).

(n84)Footnote 84. SEC, Statement on the Future Structure of the Securities Markets (Feb. 2, 1972). (hereinafter referred to as "Future Structure Statement"). The Statement had been preceded by extensive hearings in 1971 which included 83 witnesses and covered 3,907 pages of transcript. In the Matter of the Structure, Operation and Regulation of the Securities Markets (Commission File No. 4-147). The Commission first endorsed the concept of a "central market system" in the letter of transmittal to its 1971 Institutional Investor Study Report, H.R. Doc. No. 92-64, 92d Cong., 1st Sess., pt. 1 (1971).

(n85)Footnote 85. For a discussion of the "central market system" and its successor, the "national market system," see § 2.04 *infra*.

(n86)Footnote 86. Future Structure Statement, *supra*, at p. 10.

(n87)Footnote 87. Subcommittee on Commerce and Finance of the House Committee on Interstate and Foreign Commerce, 92d Cong., 2d Sess., Securities Industry Study at 122 (Comm. Print 1972). ("House Study"). The report acknowledged that:

it will be physically impossible to accommodate on one single trading floor all members of a central market system who might wish to trade thereon. Accordingly, some members of the system, must be given priority in the use of the exchanges' physical facilities In this sense, but only in this sense, should the concept of "seats" on a particular exchange have continuing validity. To put the matter differently, a seat on an exchange should not represent a monopoly on its use or economic advantages to exchange members which are disproportionate to the value of the functions they perform for others.

Id. at 122-23.

(n88)Footnote 88. See House Report No. 94-123, 94th Cong., 1st Sess., 48 (1975) (hereinafter cited as "House Report"); See also Hearings on S. 1164 and S. 3347 before the Subcommittee on Securities of the Senate Committee on Banking, Housing and Urban Affairs, 92d Cong., 2d Sess. (1972).

(n89)Footnote 89. Letter, dated May 26, 1972, from William J. Casey, Chairman, Securities and Exchange Commission, to the President of each national securities exchange, Sec. Exch. Act Rel. No. 9623 (1972).

(n90)Footnote 90. Sec. Exch. Act Rel. No. 9616 (1972).

(n91)Footnote 91. Sec. Exch. Act Rel. No. 9950, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,178 (Jan. 16, 1973).

(n92)Footnote 92. Sec. Exch. Act Rel. No. 12055, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,367 (Jan. 27, 1976).

(n93)Footnote 93. See Response of the Securities and Exchange Commission to the Subcommittee on Oversight and Investigations of the House Committee on Interstate and Foreign Commerce, Questionnaire for Regulatory Commissions (July 25, 1975) (hereinafter cited as "SEC Response").

(n94)Footnote 94. A member would be deemed to have the requisite "public purpose" if at least 80 percent of the value of exchange securities transactions within the preceding six months was effected.

(a) for or with persons who are not affiliated with the broker, or

(b) in one of eight categories of specified transactions. Rule 19b-2(a).

(n95)Footnote 95. Policy Statement, *supra*.

(n96)Footnote 96. Policy Statement, *supra*, at p. 49.

(n97)Footnote 97. Policy Statement, *supra*, at p. 52.

(n98)Footnote 98. Policy Statement, *supra*, at p. 52.

(n99)Footnote 99. As of 1973, most exchanges had a rule mandating the commission rates to be charged by members. The Commission had announced its opinion, however, that such rules were not consistent with the just and equitable principles of trade mandated by the Exchange Act and, therefore, would be the subject of remedial rulemaking. For a discussion of the deregulation of exchange mandated commission rates, see § 2.03[2][d] *infra*.

(n100)Footnote 100. Policy Statement, *supra*, at pp. 53-54.

(n101)Footnote 101. Policy Statement, *supra*, at p. 55.

(n102)Footnote 102. Policy Statement, *supra*, at p. 58. The Commission acknowledged, but did not address, the issue of exchange access by foreign financial institutions. *Id.* at pp. 60-61.

(n103)Footnote 103. The Commission's release adopting Rule 19b-4 attempted to respond to many of these criticisms. Sec. Exch. Act Rel. No. 11604, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,267 (Aug. 19, 1975). In summary, opponents of Rule 19b-2 asserted that

- (a) the regulatory objectives of the Exchange Act did not encourage exchange membership,
- (b) the Commission lacked statutory authority to mandate changes to exchange membership rules, and
- (c) adoption of any rule directly affecting exchange membership should be preceded by an evidentiary, adversary hearing.

The Department of Justice supported the Commission's assertion of authority:

[T]here is an open-ended phrasing of Section 19(b) granting the Commission power over exchange rules concerning matters that are "similar" to those enumerated in the statute. Because of this open-ended phrasing and inherent relationship between many of the categories enumerated in 19(b) and membership, it would seem that the Commission does have sufficient power to deal with this problem.

Hearings Before the Subcommittee on Commerce and Finance of the House Committee on Interstate and Foreign Commerce, 92d Cong., 2d Sess., pt. 8, p. 4119 (1972).

For a discussion of the effects of the antitrust laws on the Exchange Act and the views of the Department of Justice, see § 2.03[6] *infra*.

(n104)Footnote 104. PBW Stock Exchange, Inc. v. Securities and Exchange Commission, 485 F.2d 718, [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,162 (3d Cir. 1973), *cert. denied*, 416 U.S. 969, 94 S. Ct. 1992, 40 L. Ed.

2d 558 (1973). The PBW Stock Exchange (currently the Philadelphia Stock Exchange) was joined by three other petitioners: two broker-dealers and the Treasurer of the State of Connecticut.

(n105)Footnote 105. Section 25(a) of the Act provides, in part, that any "person aggrieved by a final order of the Commission" may obtain review of that order in the United States Court of Appeals in the district in which the aggrieved person resides or has his principal place of business or for the District of Columbia. Judicial review of Commission orders is discussed in § 2.03[4][c] *infra*.

The court in PBW concluded that the Commission had elected to engage in rulemaking under Section 19(b) rather than by order. Accordingly, the court had "no jurisdiction under § 25(a) to review on direct appeal rules and regulations promulgated by the Commission." 485 F.2d at 731.

(n106)Footnote 106. Section 3(a)(3)(A) defines the term "member" when used with respect to a securities exchange to mean

(i) any natural person permitted to effect transactions on the floor of the exchange without the services of another person acting as broker, (ii) any registered broker or dealer with which such a natural person is associated, (iii) any registered broker or dealer permitted to designate as a representative such a natural person, and (iv) any other registered broker or dealer which agrees to be regulated by such exchange and with respect to which the exchange undertakes to enforce compliance with the provisions of [the Exchange Act], the rules and regulations thereunder, and its own rules.

Section 3(a)(3)(B) defines the term "member" with respect to a registered securities association to be "any broker or dealer who agrees to be regulated by such association and with respect to which the association undertakes to enforce compliance with the provisions of [the Exchange Act], the rules and regulations thereunder, and its own rules.

(n107)Footnote 107. Section 6(c)(3). Congress recognized, however, that floor space may be inadequate and, therefore, permitted exchanges to limit the number of memberships available, provided that the number of memberships could not be less than the number in effect on May 1, 1975. Section 6(c)(4).

(n113)Footnote 113. See Sec. Exch. Act Rel. No. 14535 (1978), in which the Commission tentatively approved a NYSE proposal that would create two categories of membership: physical floor access and electronic access members. See § 2.01[1] *supra*.

(n114)Footnote 114. See Sec. Exch. Act Rel. No. 14256 (1977).

(n115)Footnote 115. See Sec. Exch. Act Rel. No. 19520 (1983), in which the Commission approved an NYSE proposal to create a class of access rights under the title "Physical Access Membership." See § 2.01[1][a] *supra*.

(n116)Footnote 116. The intermarket trading system is discussed in § 2.04[2][b][i][A] *infra*.

(n117)Footnote 117. Sec. Exch. Act Rel. 39884, at p. 66-68. (Apr. 17, 1998).

(n118)Footnote 118. This provision reflected Congressional concern over the potential adverse market effect of "pool" operations who initiated transactions away from the floor of the exchange and, thus, were unsupervised. See Special Study, *supra*, Pt. 2 at pp. 242-246.

(n119)Footnote 119. See, e.g., former NYSE Rule 394, Amex Rule 5, CBOE Rule 6.49(a), and PSE Rule XIII. For a summary of these rules, see Sec. Exch. Act Rel. No. 11628 (1975). The Commission's Rule 19c-3, discussed *infra*, limited the applicability of these rules to securities listed on or before April 26, 1979. As the result of Commission pressure, all off-board trading rules were completely rescinded by June 1, 2000. See Sec. Exch. Act Rel. No. 16888, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,608 (June 11, 1980).

(n120)Footnote 120. For a discussion of the anticompetitive effect of the off-board trading rules, see Sec. Exch. Act Rel. No. 11628 (1975) and Regulatory Reform Report by the Subcommittee on Oversight and Investigations of the House Committee on Interstate and Foreign Commerce, 95th Cong., 1st Sess., 24-29 (1976) (hereinafter cited as the "Regulatory Reform Report").

(n121)Footnote 121. The Commission's 1963 Special Study of the Securities Markets found, for example, that off-board trading "accounts for approximately 5 percent of total exchange purchases and sales, but on occasion accounts for more than 50 percent of all purchases or sales in a given stock over a given day or week." Special Study, *supra*, Pt. 2 at p. 246. Nevertheless, the Study concluded that further information was necessary before "conclusions as to the significance of such trading may be reached." *Id.*, Pt. 5 at pp. 98-99.

Thereafter, in 1965, the Commission's staff completed a special study of NYSE Rule 394, which prohibited off-board trading by NYSE members. SEC, Report: Rule 394 (Sept. 1965) (hereinafter cited as "Rule 394 Report") While the staff acknowledged the prophylactic effect of regulatory supervision of floor trades and public reporting of transactions, the report concluded:

Whatever are the advantages which these aspects offer the public, they must be balanced against the disadvantages as well as considered from the point of view of whether the same advantages could be preserved with certain adjustments in the Rule. On balance, the disadvantages seem to outweigh the advantages, and neither the Rule nor the current interpretations seem to be a *sine qua non* for a healthy market operating in the public interest. It simply goes too far and encompasses too much.

Rule 394 Report at pp. 206-07.

Also in 1965, the Commission represented to Congress that it had the authority to regulate off-board trading rules and that further legislation in this area was not necessary. See letter dated July 30, 1965, from Manuel F. Cohen, Chairman, Securities and Exchange Commission to Hon. A Willis Robertson, Chairman, Senate Committee on Banking and Currency. Nevertheless, the Commission did not initiate any regulatory action until 1973 when, as part of its policy statement on a "central market system," the Commission called for the formation of a new nationwide trading system that would embrace all listed securities and all market centers. This system would render off-board trading rules, such as NYSE Rule 394, obsolete. See Policy Statement, *supra*, at pp. 61-64.

By 1973, both Houses of Congress had determined that off-board trading rules were unnecessary. See H.R. Rep. No.

92-1519, 92d Cong., 2d Sess., XIII (1972); Securities Industry Study Report, S. Doc. No. 93-13, 93d Cong., 1st Sess., 104-05 (1973).

For a discussion of other Congressional statements regarding off-board trading rules, *see* Regulatory Reform Report, *supra*, at pp. 25-27.

(n122)Footnote 122. Section 11A(c)(4)(A).

(n123)Footnote 123. Although Congress did not prohibit off-board trading rules, there was little doubt of Congressional sentiment. A House Subcommittee concluded in 1972 that:

New York Exchange Rule 394 is not necessary to make the Exchange Act work. Accordingly, the New York Stock Exchange should immediately rescind the rule. If this is not done, the Subcommittee will introduce legislation which will have the effect of abrogating the rule.

H.R. Rep. No. 92-1519, 92d Cong., 2d Sess., XIII (1972).

The New York Stock Exchange did not heed this request. Accordingly, H. R. 4111 (the House version of the 1975 amendments) provided that from and after September 1, 1975 no national securities exchange may "by rule or otherwise, limit or condition a member's ability to transact business on any other exchange or otherwise than on an exchange" unless such rule has been previously approved by the Commission. H. R. 4111, Title V. Sec. 501. The accompanying report concluded that "the third market has proved to be a valuable competitive force in the market place, and, accordingly, [the subcommittee] reject[s] proposals that all trading in listed securities be confined to exchange markets." House Report at 91.

Similarly, the Senate, while endorsing the concept of a Commission study of off board trading rules in lieu of an absolute prohibition of such rules, concluded that the Commission should "break down all barriers to competition that do not serve a valid regulatory purpose." Senate Report, § 2.01 *supra*, at p. 8. Thus, the Commission is called upon "to balance, against other regulatory criteria and considerations, the competitive implications" of self-regulatory rules. *Id.* at 13. With respect to off-board trading rules,

The Committee has carefully evaluated all arguments that have been presented in support of abolishing the third market and found them unpersuasive. The advent of competitive commission rates will unquestionably result in altered economic and regulatory conditions in the securities industry. It appears to the Committee, however, that on balance the changes will be beneficial and will contribute to a stronger industry and more efficient markets. Furthermore, the Committee found that the dealers operating in the third market provide valuable competition to the specialists operating on the exchanges and that this competition enhances the total market capacity for listed securities.

Id. at 20-21.

Finally, the Conference Committee, in accepting the Senate proposal for a study of off-board trading rules, emphasized the underlying goal of the 1975 amendments, *i.e.*, to eliminate "restrictive rules and practices which prohibit brokers from searching out the best price for their customers or which limit or impede market making activities as inconsistent with the development of a national market system." Conference Report to the Securities Act Amendments of 1975, H. Rep. No. 94-229, Cong., 1st Sess., 94 (1975) (hereinafter cited as "Conference Report").

(n124)Footnote 124. Sec. Exch. Act Rel. No. 11521 (1975).

(n125)Footnote 125. Sec. Exch. Act Rel. No. 11628 (1975).

(n126)Footnote 126. *Id.* Proposed Rule 19c-1[A] would have, effectively, rescinded all off-board trading rules.

Proposed Rule 19c-1[B] would permit off-board transactions at a price equal to or better than the current bid/offer on the floor. If the proposed off-board transaction was to occur at a price worse than the current bid/offer, the member would be required (a) to verify whether public limit orders on the specialist's book could satisfy the proposed transaction, (b) to believe that a better price may be obtained off floor, and (c) to assure that public limit orders on the specialist's book and disclosed to the member are satisfied at the same prices obtained by the member.

Proposed Rule 19c-1 under the Securities Exchange Act of 1934, reprinted in the Securities Primary Law sourcebook, Volume B, Section G was substantially similar to Proposed Rule 19c-1[B], but would restrict off-board trades to transactions "at a price between the highest bid and the lowest offer on the exchange."

(n127)Footnote 127. In the Matter of Rules of National Securities Exchanges Which Limit or Condition the Ability of Members to Effect Transactions Otherwise than on Such Exchanges, Commission File No. 4-180 (1975). Hearings were held for eight days and encompassed more than 1,400 pages of testimony.

(n128)Footnote 128. *See* Sec. Exch. Act Rel. No. 11942 (1975). Block positioners facilitate the purchase or sale of large blocks by acting as principals in these transactions. *See* New York Stock Exchange Rule 97, NYSE Guide (CCH) P 2097.10 (2003).

(n129)Footnote 129. New York Stock Exchange Rule 97, NYSE Guide (CCH) P 2097.10 (2003). In summary, the Commission also focused on off-board trading restrictions that precluded members from executing OTC transactions as principal or as agent through "in-house" agency crosses and other agency transactions. In deferring further regulatory action, the Commission stated its need for "additional time to develop and propose such new rules (and to eliminate such existing rules) as may be necessary or appropriate in the context of an environment permitting off-board market making by retail firms." *Id.*

Finally, the Commission emphasized its belief that

... the self-regulatory organizations and the securities industry in general should be afforded additional time to take steps to ensure the prompt development of a composite quotation system, a composite book and facilities for the routing and execution of orders and to consider whether changes should be made in existing self-regulatory organization rules coincident with establishment of a more competitive environmental for market making.

Id.

The composite quotation system is discussed in § 2.04[2][c] *infra*.

(n130)Footnote 130. The 1975 Amendments ordered the Commission to "establish a National Market Advisory Board ... to formulate and furnish to the Commission its views on significant regulatory proposals ... concerning the establishment, operation, and regulation of the markets for securities in the United States ... [to] study and make appropriate recommendations to the Commission as to the steps it finds appropriate to facilitate the establishment of a national market system ... [to] study the possible need for modifications of the scheme of self-regulation provided for in this title so as to adapt it to a national market system" and to report to Congress "the results of such study and recommendations."

Sections 11A(d)(1), (3)(A) and (3)(C).

The Board was established on September 30, 1975, and tendered its report to Congress on December 31, 1976. Report of the National Market Advisory Board published in Hearings before the Subcommittee on Oversight and Investigation and the Subcommittee on Consumer Protection and Finance of the House Committee on Interstate and Foreign Commerce, 95th Cong., 1st Sess., 3-55 (1977) (hereinafter cited as "NMAB Report"). The Board's conclusions and recommendations are discussed in § 2.04[1][d] *infra*.

(n131)Footnote 131. The Board had furnished its preliminary views by correspondence to the Commission in September 1976 and February 1977.

(n132)Footnote 132. See Sec. Exch. Act. Rel. No. 13662, Fed. Sec. L. Rep. (CCH) No. 700 Extra Edition (June 23, 1977) (hereinafter cited as "Off-Board Trading Release").

(n133)Footnote 133. Off-Board Trading Release, *supra*. The composite quotation system is discussed in § 2.04[2][c] *infra*.

(n134)Footnote 134. Off-Board Trading Release, *supra*.

(n135)Footnote 135. Off-Board Trading Release, *supra*.

(n136)Footnote 136. The hearings were conducted in August 1977. Off-Board Trading Release, *supra*.

(n137)Footnote 137. See Sec. Exch. Act Rel. No. 14325, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,397 (Dec. 30, 1977).

(n138)Footnote 138. Sec. Exch. Act Rel. No. 14325 (1977), *supra*.

(n139)Footnote 139. See Exch. Act Rel. No. 14416, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,502 (Jan. 26, 1978). The Commission's announcement was part of a larger statement entitled "Development of a National Market System." This statement summarized the progress to date in the implementation of the Congressionally mandated national market system. In summary, the Commission deferred further consideration of Rule 19c-2 pending receipt of industry responses to the NMAB Report and related Commission statements. *Id*.

(n140)Footnote 140. Sec. Exch. Act Rel. No. 15769, [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,061 (Apr. 26, 1979).

(n141)Footnote 141. Sec. Exch. Act Rel. No. 15769 (1979), *supra*.

(n142)Footnote 142. Sec. Exch. Act Rel. No. 15769 (1979), *supra*.

(n143)Footnote 143. The Commission received numerous comments opposing the adoption of proposed Rule 19c-3. The commentators who opposed the rule were concerned primarily with the possibility that broker-dealers with substantial retail order flow or extensive correspondent networks ("integrated firms") would internalize buy and sell orders for 19c-3 securities, *i.e.*, execute these orders completely "in-house" without exposing them to buying and selling interest in other market centers, the sale and purchase of 19c-3 securities. Sec. Exch. Act Rel. No. 16888, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,608 (June 11, 1980). This internalization, the commentators argued, would be more anticompetitive than the off-board trading restrictions which Rule 19c-3 was designed to eliminate. *Id*.

Several commentators suggested that it would be in the best interest of the large integrated firms to execute their retail order flow "in-house," thereby eliminating the opportunity for specialists and third market makers to compete for this order flow. *Id*. Internalization by integrated firms would also place small broker-dealers at a competitive disadvantage because they would no longer be able to provide executions equivalent to those provided by the integrated firms.

Integration of market making and retail business by the larger firms enable them to provide lower cost executions than could be provided by smaller firms. *Id.*

Further, the commentators felt that internalization would result in market fragmentation which would adversely affect market efficiency and liquidity. *Id.* The commentators were afraid that the adoption of Rule 19c-3 would cause the order flow in 19c-3 securities to be directed away from the AMEX and NYSE and "primary" markets. *Id.* Movement away from these primary markets, the commentators feared, would, in the absence of a comprehensive intermarket linkage system, result in a dispersion of order flow that would make the markets in 19c-3 securities less efficient. *Id.*

Other commentators, however, argued that internalization was appropriate if the execution of customer orders was required to be made at a price equal to the best price displayed in the consolidated quotation system. Those commentators suggested that internalization did not raise competitive concerns as long as there was no overreaching, and the customer received an execution price equal to or better than the best price available in any other market. *Id.*

(n144)Footnote 144. Sec. Exch. Act Rel. No. 16888, (1977), *supra*. In its Regulatory Reform Report, the Subcommittee on Oversight and Investigations of the House Committee on Interstate and Foreign Commerce stated:

The Commission has been strongly criticized for its protracted response to the Congressional mandate of 1975 to evaluate off-board trading rules and initiate remedial rulemaking action within 90 days of enactment of the Securities Acts Amendments of 1975. According to the House Subcommittee on Oversight and Investigations, the regulatory action taken by the Commission shows a failure by the Commission to carry out the terms of the statute as written by the Congress. It has moved more slowly than the Congress intended. It seems most reluctant to disturb the status quo. It seems to have substituted its own judgment for the basic legislative conclusion. Finding that all criteria for abrogation were met, it nevertheless concluded that it was not wise to take the action required by statute. The Commission may certainly come to Congress and request amendment to the statute. It may not disregard the law.

Regulatory Reform Report, *supra*, at p. 29.

(n145)Footnote 145. Sec. Exch. Act Rel. No. 18062, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,024 (Aug. 25, 1981).

(n146)Footnote 146. See Exch. Act Rel. No. 17744, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,866 (Apr. 21, 1981). This interface is discussed in more detail in § 2.04[2][b][ii] *infra*.

(n147)Footnote 147. The NYSE replaced Rule 394 with Rule 390 to comply with Rule 19c-1 as originally adopted. See Off-Board Trading Release, *supra*. Rule 390 was amended in 1978 in accordance with the amendment of Rule 19c-1. See Sec. Exch. Act. Rel. No. 14599 (Mar. 24, 1978).

(n148)Footnote 148. See Market 2000 Report, *supra*, n.25 at 29-30.

(n149)Footnote 149. Market 2000 Report, *supra*, at 29-30.

(n150)Footnote 150. Sec. Exch. Act Rel. No. 42758 (May 5, 2000).

(n151)Footnote 151. See Sec. Exch. Act Rel. No. 42450; Sec. Exch. Act Rel. No. 42888 (June 1, 2000).

(n152)Footnote 152. For discussion of developments in the area of exchange commission rates in the 1960s, see 2 Loss, *supra*, p. 3173-3186. For a summary of the evolution of exchange commission rates and discussion of the SEC's consideration of such rates prior to the 1975 Amendments, see Sec. Exch. Act. Rel. No. 11203 (Jan. 23, 1975).

(n153)Footnote 153. An exception was provided for schedules or fixed rates on transactions by members acting as floor brokers or odd-lot dealers, until May 1, 1976. An order for less than the number of shares making up the normal unit of trading is an "odd-lot" order. Odd-lot dealers trade with parties placing odd-lot orders to facilitate the execution of these orders.

(n154)Footnote 154. Section 6(e)(1)(B) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F. To assure a proper data base for any ratemaking proceeding, the Commission has explicit authority under Section 17(e) over the accounting practices of brokers and dealers. Senate Report, *supra*, at 72.

Section 6(e)(1)(A) pertains to schedules or fixed charges imposed on transactions occurring prior to November 1, 1976, and required that such commissions only be "reasonable" and "in the public interest."

Prior to the Securities Acts Amendments of 1975, the Commission adopted Rule 19b-3, which prohibited a national securities exchange from requiring, by rule, any member or person associated with a member to charge any person any fixed rate of commission for transactions effected on, or effected by the use of the facilities of, such exchange. Rule 19b-3(a); Sec. Exch. Act. Rel. No. 11203 (Jan. 23, 1975). Furthermore, each exchange was required to provide in its rules that nothing in those rules, or in the practices of the exchange, shall be construed to require or authorize any member, or person associated with a member, to charge any fixed rate of commission for exchange transactions. Rule 19b-3(b). Both the New York and American Stock Exchanges adopted identical rules, effective May 1, 1975, embodying the provisions of Rule 19b-3(b), *See* New York Stock Exchange Rule 388, NYSE Guide (CCH) P 2388 (2003); AMEX Rule 401, AMEX Constitution and Rules (CCH) P 9429B (1978). Rule 19b-3 became effective on May 1, 1975, except as to floor brokerage commissions (the effective date being May 1, 1976). Rule 19b-3(e).

The House of Representatives proposed to adopt the provisions of Rule 19b-3 as part of a new Section 6(p) of the Exchange Act concerning commission rates. *See* H.R. Rep. No. 94-123, 94th Cong. 1st Sess. p. 67 (1975). However, the Conference Committee that acted upon what were to become the Securities Acts Amendments of 1975 did not adopt the House of Representatives' proposal concerning commission rates, but rather adopted a conference substitute that is the present Section 6(e) of the Exchange Act. *See* H.R. Rep. No. 94-229, 94th Cong. 1st Sess. pp. 107-08 (1975). Rule 19b-3, as it was no longer necessary, was rescinded in Sec. Exch. Act. Rel. No. 26180, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,338 (Oct. 14, 1988).

(n155)Footnote 155. The general procedures for proposed rule changes by self-regulatory organizations, contained in Section 19(b), are discussed in § 2.03[1][a] *supra*. For the definition of the term "self-regulatory organization," *see* § 2.01 *supra*.

(n156)Footnote 156. Section 6(e)(3)(A). The Commission has the authority to limit by rule and rulings the oral presentation permitted by subparagraph (A) and to require any cross-examination, also permitted by subparagraph (A), to be conducted by the Commission on behalf of the person entitled to cross-examine. Section 6(e)(3)(B).

In case any class of persons, the members of which are entitled to cross-examination under this section, cannot agree upon a single representative for the purposes of cross-examination, the Commission can, by rule and rulings, determine how such interests will be represented and the cross-examination conducted. Section 6(e)(3)(C)(i). However, a member of a class, upon satisfaction of the Commission that the member has made a reasonable and good faith effort to reach agreement with the class members as to a representative of the class and that there are substantial and relevant issues that would not be presented adequately by the class representative determined by the Commission pursuant to Section 6(e)(3)(C)(i), cannot be denied the opportunity to cross-examine as to the issues affecting that member's particular interests. Sections 6(e)(3)(C)(ii).

The Commission must keep a transcript of any oral presentation and cross-examination. Section 6(e)(3)(D).

If the Commission issues an order pursuant to Section 19(b), *see* § 2.03[1][a] *supra*, approving an exchange rule imposing a schedule or fixed rates of commissions, allowances, discounts, or other fees, a court, reviewing such order, may set the order aside if the court finds either that

(1) a Commission determination that an interested person is not entitled to conduct cross-examination or make rebuttal submissions, or

(2) a Commission rule or ruling limiting the petitioner's cross-examination or rebuttal submissions has precluded full disclosure and proper resolution of disputed issues of material fact necessary for fair determination by the SEC.

Section 6(e)(3)(E).

These bases for setting aside a Commission order are in addition to those specified in Section 25, *see* § 9.02[2][c] *infra. Id.*

(n157)Footnote 157. Senate Report, *supra*, at 72.

(n158)Footnote 158. Furthermore, a broker or dealer, required by the Commission to comply with the rules of the exchange, would be deemed a "member" of the exchange with respect to transactions on the exchange for purposes of various procedural and regulatory provisions of the Exchange Act. *See* Section 3(a)(3), containing the new definition of "member" with respect to an exchange; Section 6(d)(3)(C) with respect to summary action by an exchange involving a nonmember of the exchange. The exchange itself would be entitled to enforce compliance with its rules by any nonmember broker or dealer required to comply with such rules by the SEC under Section 6(f). Senate Report, *supra*, at p. 73.

(n159)Footnote 159. Section 11A(c)(3). The Commission could even prohibit all trading of listed securities in the third market upon carefully prescribed factual findings and subject to judicial review. *Id.* Section 25(b), discussed in § 9.02[2][c] *infra*; Senate Report, *supra*, at p. 73.

(n160)Footnote 160. The Commission has the authority to prescribe, by rule, the disclosure that a person, subject to regulation by the Commission, exercising investment discretion with respect to an account, must make of that person's policies and practices with respect to commissions to be paid for effecting securities transactions. Section 28(e)(2).

The Conference Report of the House Committee on Interstate and Foreign Commerce on what was to become the Securities Acts Amendments of 1975 indicates that the conferees considered the possibility that Section 28(e) could be used to reintroduce the "give-ups" and reciprocal practices of the late 1960's. The conferees concluded that the language of Section 28(e) would not permit such a result. The new Section, they stated, provides only that "a money manager may pay a broker or dealer an amount of commission, for that broker or dealer's executing a transaction, if the money manager determines that the services it receives from that broker or dealer justify the payment. The provisions have no application whatsoever to a situation in which payment is made by a money manager to one broker or dealer for services rendered by another broker or dealer. The give-up was a regrettable chapter in the history of the securities industry and the limited definition of fiduciary responsibility added to the law by this bill will in no way permit its return. H.R. Rep. No. 94-229, 94th Cong. 1st Sess. p. 108 (1975).

(n161)Footnote 161. Market 2000 Report, *supra*, at p.22.

(n162)Footnote 162. Market 2000 Report, *supra*, at p.22.

(n163)Footnote 163. Sec. Exch. Act Rel. No. 34902 (Oct. 27, 1994). Rule 11Ac1-3 provides in part:

(a) No broker or dealer acting as agent for a customer may effect any transaction in, induce or attempt to induce the purchase or sale of, or direct orders for the purchase or sale of, any security unless such broker or dealer informs the customer, in writing, upon opening a new account and on an annual basis thereafter, of the following:

(1) The broker's or dealer's policies regarding receipt of payment for order flow from any broker or dealer, national securities exchange, registered securities association, or exchange member to which it routes customers' orders for execution, including a statement as to whether any payment for order flow is received for routing customer orders and a detailed description of the nature of the compensation received; and (2) The broker's or dealer's policies for determining where to route customer orders that are the subject of payment for order flow absent specific instructions from customers, including a description of the extent to which orders can be executed at prices superior to the best bid or best offer.

Rule 11Ac1-3 also provides the Commission with the authority to issue exemptions to this rule if such exemptions are consistent with the public interest and the protection of investors.

(n164)Footnote 164. What constitutes "reasonable justification or excuse" for relieving a self-regulatory organization of its duty to enforce compliance under Section 19(g)(1) was explained by the Commission in Sec. Exch. Act Rel. No. 12994 (Nov. 18, 1976) (hereinafter cited as "Enforcement Obligations Release"):

[S]ection 19(g)(1) qualifies the obligation to enforce compliance with the phrase 'absent reasonable justification or excuse.' Generally an exchange or association will have 'reasonable justification or excuse' for failing to prevent a particular violation of the Act or the rules thereunder as to which it is required to enforce compliance, unless, at a time when action reasonably within its capacity would have prevented the violation, it knew, or, in view of all the facts and circumstances, should have known, that a member or person associated with a member proposed to commit acts constituting the violation. Similarly, an exchange or association should normally have 'reasonable justification or excuse' with respect to any failure to stop a course of conduct which violates any provision of the Act or the rules and regulations thereunder and as to which it is required to enforce compliance unless it knew, or, in view of all the facts and circumstances, should have known, that its system of reports, examinations and inspections was in material respects inadequate, in relation to resources reasonably available to it for the purpose of detecting such a course of conduct. Also, in appropriate circumstances, an exchange or association will have 'reasonable justification or excuse' if its failure to enforce compliance resulted from its reliance in good faith upon reports prepared by qualified independent third parties, such as independent accountants, unless the exchange or association possessed or should otherwise have discovered information suggesting the need for further inquiry. (Footnotes omitted.)

(n165)Footnote 165. Section 19(g)(1). The enforcement of compliance requirements of Section 19(g)(1) are subject to: (1) the provisions of Section 17(d) (granting the SEC the power to allocate regulatory responsibilities among self-regulatory organizations) discussed in § 2.03[5][b] *infra*; (2) Section 19(g)(2) (granting the SEC authority to relieve a self-regulatory organization from the duty to enforce compliance); and (3) Rule 19g2-1, discussed below. Section 19(g)(1).

Requiring self-regulatory organizations to comply, and to enforce compliance by its members or participants, with these provisions [the Exchange Act, the rules and regulations thereunder, and the rules

of the self-regulatory organization itself], is an essential prerequisite to vigilant and effective self-regulation.

Senate Report, *supra*, at p. 133.

As a requirement for registration as a national securities exchange or national securities association, the Commission must determine that the Applicant is so organized and has the capacity, subject to Section 17(d) (*See* § 2.03[5][b]) or 19(g)(2), to enforce compliance by its members and persons associated with its members, with the provisions of the Exchange Act, the rules and regulations thereunder, and the rules of the applicant. Sections 6(b)(1) and 15A(b)(2) are discussed in § 2.02[2][c][i] *supra*.

(n166)Footnote 166. Section 19(g)(2).

The Committee recognizes, however, that the affirmative duty to enforce compliance imposed by this subsection [19(g)] may not be appropriate in some circumstances. Therefore, although the obligation of a self-regulatory organization would be expressed as an affirmative duty, the Commission would be given the authority to relieve any self-regulatory organization of the responsibility to enforce compliance with specified provisions of the Exchange Act, the rules thereunder, or its own rules, by any member or participant or person associated with a member. It is expected that the Commission will use this authority, for example, to limit in a manner consistent with the purposes of the Exchange Act, a self-regulatory organization's responsibilities with respect to corporate parents of members or participants.

Senate Report, *supra*, at p. 133.

For an exchange or securities association to be registered, the Commission must determine that the rules of the applicant provide for appropriate disciplinary action against members or persons associated with members for violation of the Exchange Act, the rules thereunder, or the rules of the applicant, subject to any rule or order of the Commission pursuant to Section 17(d) (*See* § 2.03[5][b] *infra*) or 19(g)(2). Sections 6(b)(6) and 15A(b)(7), discussed in § 2.02[2][c][i] *supra*.

(n167)Footnote 167. Enforcement Obligations Release, *supra*.

(n168)Footnote 168. Such actions include: adopting rules, conducting inspections, reviewing reports, making inquiries as to particular acts or practices, monitoring trading activity, determining qualifications, denying membership, instituting disciplinary proceedings, and imposing disciplinary sanctions for particular violations. *Id.*

[A] self-regulatory organization is not expected to employ at all times the full range of enforcement techniques with a view to preventing or discovering violations by every possible person associated with a member within the meaning of the Act.

Id.

(n169)Footnote 169. Rule 19g2-1(a) of the 1934 Act, reprinted in the Securities Primary Law Sourcebook, Volume B, Section G. Rule 19g2-1 establishes three classes of associated persons:

(1) a "securities person," defined in Rule 19g2-1(b)(1) as a general partner or officer (or person occupying a similar status or performing similar functions) or employee of an exchange member, and includes the general partners, officers, and employees of a registered broker or dealer that (a) controls, is

controlled by, or is under common control with an exchange member and (b) effects, directly or indirectly, transactions in securities through the exchange member by use of facilities maintained or supervised by such exchange;

(2) a person who controls a member, control being defined by Rule 19g2-1(b)(2) as the power to direct or cause the direction of the management or policies of a company through stock ownership, by contract, or otherwise, provided that the following three classes of persons are presumed to control a member: (A) any person with the right to vote 25 percent or more of the voting securities, (B) any person entitled to receive 25 percent or more of the net profits, or (c) a director of the company (or a person occupying a similar status or performing similar functions); and

(3) all others.

Enforcement Obligations Release, *supra*.

Rule 19g2-1 relieves a national securities exchange (and a registered securities association) of the obligation to take specific types of action, to enforce the Exchange Act and the rules thereunder, depending upon the classification of an associated person. *Id*.

(n170)Footnote 170. Section 12 contains the registration requirements for securities and is discussed in ch. 4 *infra*.

(n171)Footnote 171. Section 13 contains the reporting requirements under the Exchange Act and is discussed in ch. 4 *infra*.

(n172)Footnote 172. Section 14 contains the provisions governing proxies, discussed in ch. 7 *infra*, and tender offers, discussed in ch. 7A *infra*.

(n173)Footnote 173. Section 15(d) governs the reporting requirements under the Exchange Act for issuers with a registration statement that has become effective under the Securities Act of 1933 and is discussed in ch. 4 *infra*.

(n174)Footnote 174. Section 16 governs insider transactions and is discussed in ch. 8 *infra*.

(n175)Footnote 175. Rule 19g2-1(a)(1). An exchange or association does not have any greater obligation to assure compliance with the sections of the Exchange Act specified in Rule 19g2-1(a)(1) by an issuer of securities who is a member of the exchange or association than by any other issuer of securities listed or traded on or through the facilities of the exchange or association. However, Rule 19g2-1 does not "contemplate discontinuance of steps taken by an exchange or association, consistent with the Act, to facilitate the distribution of information provided by any issuer." Enforcement Obligations Release, *supra*.

(n176)Footnote 176. A "securities person" and a person who controls a member are defined above. Rule 19g2-1(a)(2) does not impose any limitation on investigatory techniques when violations are suspected or when appropriate disciplinary proceedings are brought:

The rule simply makes clear that an exchange or association need not employ routine techniques such as reporting requirements or routine inspections with respect to associated persons who are not engaged in the securities business.

Enforcement Obligations Release, *supra*.

(n177)Footnote 177. "Securities person" is defined above.

(n178)Footnote 178. Rule 19g2-1(a)(3). Paragraph (a)(3), when read in connection with paragraph (a)(2), essentially relieves an exchange or association of any obligation to take the specified types of surveillance action (such as administration of examinations or regular inspection programs) with respect to persons who control a member but are not securities persons." Enforcement Obligations Release, *supra*.

(n179)Footnote 179. For a discussion of SRO market surveillance programs, see SEC Report of the Special Study of the Options Markets, 96th Cong., 1st Sess. 197-206 (1978) (hereinafter cited as "Options Study").

(n180)Footnote 180. See Options Study, *supra*, at 243-54.

(n181)Footnote 181. For a general discussion of member firm compliance programs, see Options Study, *supra*, at 487-501.

(n182)Footnote 182. The SROs are required to prevent their members from employing, without appropriate authorization, individuals who have been prohibited from selling securities because they have been found to have violated the federal securities laws or certain other statutes or rules as specified in the Exchange Act, or who are subject to a "statutory disqualification" as defined in the Exchange Act. In addition, each SRO has specified qualification standards for registered representatives which include the passing of certain qualification examinations. As an initial step in the qualifying process, an applicant must apply for registration with the SROs to which his prospective employer belongs. The standard application form used by the SROs requires the applicant to respond to questions about his background and employment history, and to state whether he is currently the subject of any investigation by an SRO, the Commission, or other securities regulatory bodies. Through this registration process, SROs should be able to identify those individuals who may require special supervision by the employing firm, or who should be excluded from the securities business.

When a salesperson leaves a firm, the firm is required to notify each SRO of which it is a member so that the salesperson's registration with the SRO may be cancelled. SROs require these termination notices to specify the circumstances of termination, including whether the salesperson was terminated because he violated a provision of the securities laws or an SRO rule, is or has been the subject of a customer complaint, or has been named as a defendant in a civil action for alleged violations of the securities laws. The SRO compliance staffs believe that termination notices aid significantly in detecting potential problems.

Options Study, *supra*, at 493-94 (footnotes omitted).

(n183)Footnote 183. NASD staff examiners conduct on-site inspections in the offices of broker/dealers who were trading the securities during the periods under investigation. The examiners look at the broker/dealers' books and records, to see precisely what transactions they made, and may request written statements from traders and others, concerning their activities in the securities. Further, the examiners may obtain additional information from investors for whom the transactions were made. This NASD broker/dealer surveillance activity is an important reinforcement of the work of Market Surveillance.

Broker/dealers trading Nasdaq securities are subject not only to the NASD's Market Surveillance regulatory programs, but also the qualification standards, financial reporting requirements, routine examinations and disciplinary proceedings of the Association. In its overall surveillance of broker/dealers, the Association checks for and enforces compliance with the NASD By-Laws and Rules of Fair Practice and with Federal and state regulations.

The NASD through its disciplinary proceedings in 2005, expelled 15 firms, barred 383 individuals and suspended 3 firms and 357 individuals. NASD Regulation Statistics, NASDR Web Site, *available at* www.nasdr.com/web/idcplg?IdcService=ss_get_page&nodeId+749 (updated 2/7/06).

(n184)Footnote 184. Financial regulation of broker-dealers and related SRO programs are discussed in the Options Study, *supra*, pp. 615-92.

(n185)Footnote 185. The purpose of the Net Capital Rule is to ensure that broker-dealers maintain sufficient liquid assets to satisfy promptly the claims of customers in the event the broker-dealer fails, plus a cushion of liquid assets in excess of liabilities to cover potential market and credit risks.

Rule 15c3-1 describes how to compute "net capital." In determining net capital, a broker-dealer first computes its net worth in accordance with generally accepted accounting principles and then adds to that amount subordinated liabilities (as defined in the rule). From that figure, the broker-dealer subtracts assets not readily convertible into cash such as fixed assets, exchange seats, and most unsecured receivables. The broker-dealer then subtracts prescribed percentages of the market value, known as "haircuts," of securities owned by the broker-dealer to discount for market movement. The resulting figure is the broker-dealer's net capital, a figure which reflects the current liquidity status of the broker-dealer, *i.e.*, its ability to pay promptly all liabilities. Under the rule, a broker-dealer may elect one or two specified methods for calculating net capital.

In 1992, the Commission amended the net capital rule to raise the absolute minimum net capital required of certain registered broker-dealers. *See* Sec. Exch. Act Rel. No. 31511, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 5,064 (Nov. 24, 1992).

(n186)Footnote 186. Rule 15c3-3 protects customer funds and securities held by the broker-dealer. The first part of this two part rule requires the broker-dealer to have possession or control of all fully paid and excess margin securities of customers. The broker-dealer must make a daily determination to ensure that its complying with this aspect of the rule. The second part covers customer funds, and requires the broker-dealer to make a periodic computation to determine how much money it is holding which is either customer money or money obtained from use of customer securities (credits). From that figure the broker-dealer subtracts the amount of money which it is owed by customers or by other broker-dealers relating to customer transactions (debits). If the credits exceed the debits, the broker-dealer must deposit the excess in a Special Reserve Bank Account for the Exclusive Benefit of Customers (Special Reserve Bank Account). If the debits exceed the credits, no deposit is necessary. The broker-dealer must therefore provide the capital to finance its firm activities such as the purchase of furniture, fixtures, and equipment and trading, and may not rely upon customers' monies left with the firm for such purposes.

(n187)Footnote 187. *See* Warren & Brown Associates, Inc., Sec. Exch. Act Rel. No. 25963, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,331 (Aug. 4, 1988).

(n188)Footnote 188. The Commission has in the past been critical of uncoordinated, duplicatory SRO surveillance programs. Options Study, *supra*, at pp. 516-518 (footnotes omitted). Subsequently, SROs have attempted to eliminate duplicative efforts, *see* § 2.03[5][b], *infra*; NYSE 1993 Ann. Rep. p. 19.

(n189)Footnote 189. The Commission's annual reports to Congress discuss such evaluations. *See, e.g.*, 59 SEC Ann. Rep., pp. 34-35 (1994). While during the 1980s the Commission was critical of the SROs' ability to adapt their surveillance programs to an increasingly complex market, *see* 47 SEC Ann. Rep., at 10 (1983), it later found that the SROs had made improvements in this area. A Commission review of the NASD Market Surveillance Department in November 1992 found that the NASD had "significantly improved its automation and enhanced its surveillance procedures." A similar inspection of NYSE procedures found "significant improvement in the NYSE's surveillance and investigatory operations for program trading," and that the NYSE maintained "effective programs." 59 SEC Ann. Rep., at 35. The Commission continues to recommend to the SROs that their programs be updated, as it did when reporting that the Boston Stock Exchange's compliance and financial surveillance programs were "adequate but in need of improvement". *Id.*

The Commission's inspection and monitoring programs are discussed in § 2.03[5][a] *infra*.

(n190)Footnote 190. Such nonmember broker-dealers and other persons, designated in Section 6(f)(1), are deemed to be members of the exchange for certain purposes, including compliance with the Exchange Act and the rules thereunder, allocation of fees and charges, disciplinary proceedings by the exchange, and investigations and enforcement proceedings by the Commission. *See* Section 3(a)(3)(A), discussed *supra*.

(n191)Footnote 191. Section 6(f). The Senate Committee on Banking, Housing, and Urban Affairs commented on what was to become Section 6(f) of the Exchange Act:

[T]he Committee is strongly committed to the principle that all persons enjoying preferential or privileged access to execution facilities, *e.g.*, as members now do to exchange markets, should be subject to SEC regulation to insure that their trading is not inconsistent with the maintenance of fair and orderly markets or with equal regulation. This subsection would give the SEC the power to effect such regulation as well as the authority to define the scope and extent of an exchange's responsibility and authority with respect to trading on the exchange by non-members.

Senate Report, *supra*, at p. 99.

(n192)Footnote 192. Sections 6(b)(7) and 15A(b)(8). The requirements for registration as a national securities exchange or national securities association are discussed in § 2.02[2][c] *supra*.

(n193)Footnote 193. The self-regulatory organizations exercise government power, and they do so in basically three ways which may adversely affect the interests of particular persons: (1) by imposing a disciplinary sanction, broadly defined, on a member or person affiliated with a member, (2) by denying membership to an applicant, and (3) by requiring members to cease doing business entirely or in specified ways with a particular non-member or with respect to a particular security.

The self-regulatory organizations must exercise governmental-type powers if they are to carry out their responsibilities under the Exchange Act. When a member violates the Act or a self-regulatory organization's rules, the organization must be in a position to impose appropriate penalties or to revoke relevant privileges. Similarly, a self-regulatory organization must be able to prevent an unqualified person from obtaining access to facilities and business opportunities by denying membership. And members' transactions and relationships with non-members must be regulated, as the Supreme Court pointed out in the *Silver* case, in order that "... contact with an unreliable non-member (does not) injure the member or the member's customer on whose behalf the contract is made and [thus] ultimately imperil the future status of the [self-regulatory organization] by sapping public confidence."

Recognizing that the self-regulatory organizations utilize governmental-type powers in carrying out their responsibilities under the Exchange Act highlights the fact that these organizations must be required to conform their activities to fundamental standards of due process.

Senate Report, *supra*, at pp. 24-25.

(n194)Footnote 194. As previously mentioned, the Exchange Act contained no requirements prior to the 1975 Amendments concerning both the disciplinary proceedings of an exchange and Commission review of enforcement actions of an exchange. However, the Exchange Act contained requirements concerning disciplinary actions by the NASD, *see* § 3.05 *infra*. The 1975 Amendments amended Sections 6(b)(7), 15A(b)(8) (rules of a national securities association must provide a fair procedure for disciplinary and other proceedings), and 19(d) and (e) (notice requirement and review of final disciplinary sanction by SROs) to eliminate the situation prior to the 1975 Amendments whereby the Exchange Act contained standards governing disciplinary actions by the NASD but not by a national securities exchange and to "establish uniform standards to which both exchange and NASD rules would be required to conform

and in accordance with which SEC review would be available." Senate Report, § 2.01 *supra*, at p. 25. Furthermore, the 1975 Amendments established the same procedural requirements and review rights for exchange and NASD actions concerning (1) membership applications and (2) a nonmember of the self-regulatory organization (for the definition of the term "self-regulatory organization" see § 2.01 *supra*.) *Id.*

Since the adoption of the 1975 Amendments, the adequacy of the disciplinary procedures of the NYSE have survived several constitutional challenges. See 6 Loss, Securities Litigation, at p. 2736 fn. 199 (3d. ed. 1990). For example, in 1992 the SEC restated the long-held opinion that, for the purposes of its disciplinary proceedings, the NYSE possessed immunity from liability for alleged violations of constitutional rights, for its authority to discipline, does not make the NYSE a governmental agency for the purposes of the Fifth Amendment.

In re Daniel Turov, Sec. Exch. Act Rel. No. 31649, 53 SEC Dock. 198, 200 (Dec. 23, 1992).

In 2001, in a case arising out of investigations by the SEC and the United State's Attorney's Office involving NYSE floor brokers' improperly sharing in profits on customers' trades, in violation of Section 11(a) and Rule 11a-1, the United States Court of Appeals for the Second Circuit found that the NYSE enjoys immunity from lawsuits when it acts in its capacity as an SRO and its conduct is consistent with the quasi-governmental powers delegated to it under the Exchange Act and SEC regulations. *D'Allessio v. New York Stock Exchange et al.*, 258 F.3d 93 (2d Cir. 2001). The investigation of the floor brokers' activity resulted in numerous disciplinary actions, including an action by the SEC against the NYSE for failure to properly exercise its supervisory responsibility. The SEC's action against the NYSE is discussed in § 2.03[5][d] *infra*. One of the NYSE enforcement actions resulting from this investigation, against John D'Allessio and D'Allessio Securities, Inc., was appealed to the Commission, and sustained in April 2003. Sec. Exch. Act Rel. No. 47627, 2003 LEXIS 806 (Apr. 3, 2003). In sustaining the decision, the Commission rejected several procedural and due process challenges to the NYSE's action, including claims that the respondents were induced to commit the violations at issue by the NYSE's failure to enforce the relevant provisions of the securities laws, and that the action was brought in retaliation for the respondents' lawsuit against the exchange. *Id.* Section 11(a) is discussed in § 3.02 *infra*.

(n195)Footnote 195. Sections 6(d)(1) of the 1934 Act, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F. 15A(h)(2).

(n196)Footnote 196. Sections 6(d)(2), 15A(h)(2).

(n197)Footnote 197. Sections 6(d)(3) and 15A(h)(3).

(n198)Footnote 198. Section 19(d)(1).

(n199)Footnote 199. *Id.* The Commission adopted Rule 19d-1 to prescribe the form and content of notices that self-regulatory organizations for which the SEC is the appropriate regulatory agency must file with the Commission. Sec. Exch. Act Rel. No. 13726,[1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,225 (July 8, 1977) (hereinafter cited as "Disciplinary Sanctions Release"). Rule 19d-1 provides for the content of notices relating to four general types of self-regulatory actions:

- (1) final disciplinary actions (Rule 19d-1(c) and (d)),
- (2) final denial, bar, prohibition, or limitation of membership, participation, or association with a member, or of access to services offered by a self-regulatory organization or a member thereof, based on qualification or administrative rules (Rule 19d-1(e) and (f)),
- (3) based on prior adjudicated statutory disqualifications (Rule 19d-1(g) and (h)), and
- (4) summary suspension of a member, participant, or person associated with a member or summary

limitation or prohibition of any person with respect to access to or services offered by the organization or a member thereof pursuant to Section 6(d)(3), see § 2.03[4][a] *supra* (summary action by a national securities exchange), 15A(h)(3) (summary proceedings by a registered securities association), see § 2.03[4][a] *supra*, or 17A(b)(5)(C) (summary suspension by a registered clearing agency) (Rule 19d-1(i)). *Id.*

Rule 19d-1(a) excludes from the scope of the Rule notice of an action taken by a self-regulatory agency to condition or limit membership, participation or association with a member, or access to services based upon a statutory disqualification as defined in Section 3(a)(39) of the Exchange Act, where the self-regulatory organization and the parties involved have; agreed on the conditions or limitations. In such a case, notice is filed pursuant to Rule 19h-1, see § 2.03[5][d] *infra*, since the SEC will review all such actions on the merits and not merely where an appeal is taken or where the SEC calls up the matter. Disciplinary Sanctions Release, *supra*.

(n200)Footnote 200. Section 19(d)(2). The Commission adopted Rules 19d-2 and 19d-3 to set forth certain Commission review procedures. Disciplinary Sanctions Release, *supra*. The two rules are not reporting rules as such and do not apply to actions over which the Commission has no review jurisdiction. *Id.* Persons desiring to stay actions by a self-regulatory organization must apply to the Commission pursuant to Rule 19d-2. *Id.* Filing may be by telegram or otherwise, and the request for a stay must be in writing and include a statement why the stay of the self-regulatory action should be granted. Rule 19d-2. Prior to the 1975 Amendments, NASD disciplinary actions were subject to the automatic stay provisions of Section 15A(g) of the Exchange Act. Disciplinary Sanctions Release, *supra*. Now, sanctions may become effective upon the date set by the self-regulatory organization, unless the Commission orders a stay. *Id.*

Rule 19d-3 provides procedures for review of all final disciplinary sanctions, membership denials, and similar actions of self-regulatory organizations (SROs):

The Secretary of the Commission will serve a copy of the application for review on the SRO which, within 10 days, must certify and file with the Commission one copy of the record and seven copies of an index of the record. The Secretary will then serve on the parties copies of the index and any papers subsequently filed. The applicant may file a brief within 20 days after receipt of the copy of the index and, within 20 days thereafter, the SRO shall file its brief. Oral argument may be requested by the applicant or the SRO which request may be granted or denied at the discretion of the Commission. These procedures are essentially the same as those found in present Rule 15Ag-1 (as to the NASD), which is rescinded.

Disciplinary Sanctions Release, *supra*.

(n201)Footnote 201. Section 19(e)(1)(A). In a proceeding to review a final disciplinary action by an SRO, after notice of the proceeding has been given, there must be an opportunity for a hearing prior to the affirmance, modification, or remand, as the case may be. Such hearing may consist solely of consideration of the record before the Commission and opportunity for presentation of supporting reasons for the Commission action desired by the party making the presentation. Section 19(e)(1).

(n202)Footnote 202. Section 19(e)(1)(B).

(n203)Footnote 203. Section 19(e)(2). For discussion of the provisions added by the 1975 Amendments directing the Commission to review burdens on competition, see § 2.02[2][c][ii] *supra*.

(n204)Footnote 204. An exclusionary action is an action of the type described in Section 6(d)(2) or Section

15A(h)(2) governing SRO procedures for denial of membership. *See* § 2.03[2][a] *supra*.

(n205)Footnote 205. Section 19(f).

(n206)Footnote 206. The written petition must request that the final order of the Commission be modified or set aside in whole or in part. Section 25(a)(1). For discussion of appeals from Commission orders, *see* § 9.02 *infra*.

(n207)Footnote 207. *See* § 2.03[3][a] *supra*.

(n208)Footnote 208. Section 17(a) authorizes the Commission, by rule, to proscribe recordkeeping requirements applicable to SROs and the circumstances under which copies of such records shall be furnished to the Commission. Rule 17a-1(c) provides, in pertinent part, that every SRO "shall, upon request by any representative of the Commission, promptly furnish to the possession of such representative copies of any documents required to be kept and preserved" pursuant to Rule 17a-1(a) or (b).

(n209)Footnote 209. For a discussion of the statutory duties of SROs, *see* § 2.03[3][a], *supra*.

(n210)Footnote 210. International Institute for Securities Market Development, Markets and Regulation Overview, Securities and Exchange Commission, p. 11 (1993) (hereinafter cited as "International Institute"). SRO surveillance programs are discussed in § 2.03[3][a], *supra*. The results of the Commission's inspections are summarized in the Commission's annual report to Congress.

(n211)Footnote 211. When the Commission authorized the commencement of trading in standardized options, for example, the Commission labeled the endeavor a "pilot" project and instituted a monitoring program. *See* Sec. Exch. Act Rel. No. 9985, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,212 (Feb. 1, 1973). After the adoption of Rule 19c-3 permitting off-board trading in certain exchange listed securities, *see* § 2.03[2][c] *supra*, the Commission instituted a monitoring program to determine the extent of off-board trading and its impact on the market. Sec. Exch. Act Rel. No. 18062, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,024 (Aug. 25, 1981). Similarly, the Commission watched closely the activities of the Cincinnati Stock Exchange, now known as the National Stock Exchange, when it commenced trading operations in 1978 and requested periodic data upon which a special report was based. SEC, Report on the Operation of the Cincinnati Stock Exchange (1982). Special reports also have been issued by the Commission on the effect of Section 6(c)(3), which prohibited exchange rules that fixed commission rates, and on the operation of the Intermarket Trading System (*see* § 2.04[2][b][i][A], *infra*).

(n212)Footnote 212. In 1978, for example, the Commission's staff observed, during an inspection of a regional securities exchange, that trading continued on the floor of the exchange in standardized options after the close of the NYSE market. Upon inquiry to other exchanges, the staff verified that the several exchanges which traded standardized options did not have a common rule regulating the cessation of trading at the close of a trading day. The Commission requested the exchanges to adopt such a rule. The exchanges responded with a uniform rule that would permit trading in standardized options to extend through 4:10 p.m. (E.S.T.). *See* Sec. Exch. Act Rel. No. 15241 (Oct. 18, 1978).

(n213)Footnote 213. *See* § 2.03[5][d] *infra*.

(n214)Footnote 214. Section 17(d)(1). This provision was added through the Securities Acts Amendments of 1975 in order to remedy two "significant" defects:

1. The activities and records of many firms are subject to inspection and surveillance by more than one self-regulatory agency. This may lead, on the one hand, to duplication of effort and increased expense to the firms, and, on the other hand, to the danger of violations that are missed because they fall somewhere between the responsibilities of different agencies. The Commission and the self-regulatory agencies have over the years arrived at general understandings governing the allocation of regulatory responsibilities, but these understandings are informal and tend to be somewhat inexact in practical application. The

Commission found large gaps in the coverage and coordination of the regulatory pattern.

2. The standards of the different self-regulatory agencies differ both in substance and in enforcement. As a result public investors cannot always rely on uniform rules being applied to the different brokers with whom they may deal.

Senate Report at 32.

(n215)Footnote 215. Section 17(d)(1)(A).

(n216)Footnote 216. Section 17(d)(1)(B).

(n217)Footnote 217. Section 17(d)(1).

(n218)Footnote 218. Sec. Exch. Act Rel. No. 12935 (Oct. 28, 1976).

(n219)Footnote 219. See 43 SEC, Ann. Rep., p. 18 (1978); 44 SEC, Ann. Rep., p. 19 (1979); 46 SEC Ann. Rep., p. 12 (1981); 47 SEC, Ann. Rep., p. 14 (1982). Within nine months after the adoption of Rule 17d-2, SROs filed 21 plans with the Commission. Of these, 15 embodied agreements between two exchanges with respect to dual members. In general these plans pertained to allocation of financial responsibility monitoring activity. In addition, plans were submitted to permit the NASD to assume responsibility for inspecting the retail firm activities of regional exchange members who were also NASD members. Also, the then five exchanges that traded standardized options submitted a plan to eliminate duplicative investigations of questionable options transactions. See 43 SEC Ann. Rep., at p. 18 for a more detailed discussion of these plans.

(n220)Footnote 220. See Sec. Exch. Act Rel. No. 37542, 1996 SEC LEXIS 2121 (Aug. 8, 1996) (hereinafter cited as "NASD Report") and Sec. Exch. Act Rel. No. 37538, 1996 SEC LEXIS 2146 (Aug. 8, 1996) (hereinafter cited as "NASD Disciplinary Order"). For a more detailed description of the Nasdaq settlement, see § 2.03[5][d] *infra*.

(n221)Footnote 221. NASD Disciplinary order, *supra*.

(n222)Footnote 222. In November 2004 the Commission proposed to adopt a new Rule 15Aa-3 that would require, among other things, that a national securities association's board of directors have a majority of independent directors. Governance and Transparency Release, *supra*, at *57. The rule would also require that each national securities association have, at a minimum, Nominating, Governance, Compensation, Audit and Regulatory Oversight Committees. *Id.* at *87.

(n223)Footnote 223. See Sec. Exch. Act Rel. No. 39729 (Mar. 6, 1998) (SEC approval of the Order Audit Trail System, OATS).

(n224)Footnote 224. The Quote Rule is discussed in § 2.04[2][c][i], *infra*.

(n225)Footnote 225. NASD Disciplinary order, *supra*.

(n226)Footnote 226. Report of NASD Select Committee on Structure and Governance to NASD Board of Governors (September 15, 1995).

(n227)Footnote 227. *Id.* This restructuring of the NASD was originally approved by the SEC on a temporary accelerated basis in 1996. See Exch. Act Rel. No. 37107 (Apr. 11, 1996). Subsequent temporary approvals were granted in Exch. Act Rel. No. 37425 (July 11, 1996); Exch. Act Rel. No. 37957 (Nov. 15, 1996); Exch. Act Rel. No. 38645 (May 15, 1997); and Exch. Act Rel. No. 38909 (Aug. 7, 1997). The NASD later reduced its ownership in Nasdaq in connection with Nasdaq's transition to for-profit status, and intends to ultimately divest itself of its remaining ownership

interest in Nasdaq. See § 2.05 *supra*. In its Governance and Transparency Release issued in November 2004, the Commission proposed to require national securities associations to ensure that their regulatory program be either functionally or structurally separate from its market operations or other commercial enterprises. Governance and Transparency Release, *supra*, at *110-111. It also proposed, as a means of allowing the Commission to monitor the degree of control exercised by a single member, a new Rule 17a-27 that would require any member of an association to disclose to the Commission its beneficial ownership of 5 percent of more of any class of securities of the association or a facility of the association. *Id.* at *367-69.

A rule proposed by the Commission in its Governance and Transparency Release in November 2004 would require exchanges to provide for a functional or structural separation of their regulatory program from their market operations or other commercial enterprises. Governance and Transparency Release, *supra*, at *110-111.

(n264)Footnote 264. Section 15(b)(4) governs Commission orders of censure, limitation on activities, functions, or operations of, suspension, or deregistration of brokers and dealers. Control over brokers and dealers is discussed in ch. 3 *infra*.

1-2 Federal Securities Exchange Act of 1934 § 2.04

(n265)Footnote 265. Section 15(b)(6) governs the censure, limitation on the activities or functions, suspension for a period not exceeding twelve months, or bar of any person associated with or seeking to become associated with a broker or dealer, by order of the Commission.

(n266)Footnote 266. The Commission may sanction a member, participant, or person associated with a member pursuant to Section 19(h)(2) or (3) without the necessity for prior action by an SRO.

(n267)Footnote 267. For the definition of the terms "self-regulatory organization" and "appropriate regulatory agency" *see* § 2.02[2] *supra*.

(n268)Footnote 268. For discussion of the Commission's interpretation of what constitutes "reasonable justification or excuse" in the context of Section 19(g)(1), *see* § 2.03[3][a] *supra*.

(n269)Footnote 269. Section 19(h)(1). Registered securities associations are also charged with the responsibility of enforcing the rules of the Municipal Securities Rulemaking Board and therefore may be subject to a disciplinary action if they fail to adequately enforce these rules. *Id.*

(n270)Footnote 270. Specifically, Section 15A(e), (f), (g), (h), (j), (k), and (l) and Section 19(a) and (b).

(n271)Footnote 271. *See* H. Rep. No. 94-75, 94th Cong., 1st Sess., 111-12 (1975).

(n272)Footnote 272. The term "self-regulatory organization" is defined by Section 3(a)(26) to mean any national securities exchange, registered securities association, or registered clearing agency. The term "self-regulatory organization" also includes the Municipal Securities Rulemaking Board (the "Board") but only for purposes of: (1) the Board's proposed changes of its rules, (2) Commission amendment of Board rules, and (3) Commission reports to Congress.

Furthermore, as a result of the 1975 Amendments, the SEC is the "appropriate regulatory agency" for national securities exchanges, registered securities exchanges, registered securities associations, the Municipal Securities Rulemaking Board and any nonbank clearing agency. Section 3(a)(34).

(n273)Footnote 273. *See* the introductory Subsection of § 2.03 *supra*.

(n274)Footnote 274. Section 19(a)(1) is discussed in connection with national securities exchanges in § 2.02[2][c] *supra*.

(n275)Footnote 275. Section 19(a)(3) is discussed in § 2.02[2][d] *supra*.

(n276)Footnote 276. Section 19(b) is discussed in § 2.03[1][a] *supra*. Rule 19b-4, pertaining to filings with respect to proposed rule changes by a self-regulatory organization, is also discussed in § 2.03[1][a] *supra*.

(n277)Footnote 277. Section 19(c) is discussed in § 2.03[1][b] *supra*.

(n278)Footnote 278. Notice to the Commission of final disciplinary action, or denial, bar, or limitation respecting membership, by a self-regulatory organization is governed by Rule 19d-1.

Rule 19d-2, pertaining to applications to the Commission for stays of final disciplinary sanctions or summary suspensions by a self-regulatory organization, is discussed above.

Rule 19d-3, pertaining to applications and procedure for, Commission review of final disciplinary sanction, denial or conditioning of membership, association, or participation, or prohibition or limitation with respect to access to services by either a self-regulatory organization or a member thereof, is discussed above.

SROs are required under Section 19(d)(1) of the Exchange Act and Rule 19d-1 to file reports with the SEC of all final disciplinary actions. In fiscal 2002, the SROs filed a total of 2,507 reports with the SEC, as follows: 30 by Amex, 112 by CBOE, 414 by the Chicago Stock Exchange, 1,317 by the NASD, 528 by the NYSE, 25 by the Philadelphia Stock Exchange and 68 by the Pacific Exchange. No reports were filed by the Boston or National Stock Exchanges. SEC Ann. Rep. (2002), at pp. 75-76.

(n279)Footnote 279. Section 19(e) is discussed in § 2.03[4][b] *supra*. In the case of a registered securities association, violation of the rules of the Municipal Securities Rulemaking Board is one of the grounds for a final disciplinary sanction to be imposed by a registered securities association upon a member thereof, participant therein, or person associated with a member; and, a sanction based thereon is subject to Commission review under Section 19(e)(1)(A).

Judicial review of a final order of the Commission is provided for in Section 25(a)(1).

(n280)Footnote 280. A registered securities association is required, absent reasonable justification or excuse, to enforce compliance with the provisions of the rules of the Municipal Securities Rulemaking Board by its members and persons associated with its members, Section 19(g)(1)(B), unless relieved from responsibility to enforce compliance by Commission rule, Section 19(g)(2).

Rule 19g2-1 sets forth the matters for which a registered securities association, and a national securities exchange, are not required under Section 19(g) to enforce compliance.

(n281)Footnote 281. A registered securities association may be sanctioned for failure to enforce compliance by a member or person associated with a member with any provision of the rules of the Municipal Securities Rulemaking Board. Section 19(h)(1)(B). Any member of, or participant in, a registered securities association may be suspended for up to twelve months or expelled from the association, if such member or participant willfully violates, or effects any transaction for any other person whom the member or participant had reason to believe was violating with respect to such transaction, the rules of the Municipal Securities Rulemaking Board. Section 19(h)(2)(B). Any person may be suspended for up to twelve months or barred from being associated with a member of a registered securities association, if such person willfully violates, or effects any transaction for any other person whom the person associated with a member had reason to believe was violating with respect to such transaction, the rules of the Municipal Securities Rulemaking Board. Section 19(h)(3)(B). Finally, any officer or director of a registered securities association may be removed from office or censured by the Commission, if such officer or director, without reasonable justification or excuse, has failed to enforce compliance with any provision of the rules of the Municipal Securities Rulemaking Board by any member of a registered securities association. Section 19(h)(4)(B).

Rule 15A12-1 provides that Rule 15b7-1, governing proceedings under Sections 15(b), 15A(1)(2) and 19(a)(3) of the Exchange Act, governs a proceeding under Section 15A(1)(2), transferred in amended form to Section 19(h)(2), to the extent that such proceeding involves the conduct of any person other than a member of a national securities association.

(n282)Footnote 282. For discussion of the Commission's interpretation of what constitutes "reasonable justification or excuse" in the context of Section 19(g)(1), see § 2.03[3][a] *supra*.

(n283)Footnote 283. Section 19(h)(4). Section 19(h)(4) combines the powers of the Commission over exchange officials in old Section 19(a)(3) and its powers over NASD officials in old Section 15A(l)(3). See Senate Report, *supra*, at p. 134.

(n284)Footnote 284. Disciplinary Sanctions Release, *supra*.

(n285)Footnote 285. The term "statutory disqualification" is defined in Section 3(a)(39) of the Exchange Act, See

§ 2.03[2][a] *supra*. Rule 19h-1(a) requires the filing of the notice and supporting record of the proposed admission or continuance in membership, participation, or association with a member of any person subject to a statutory disqualification. If such person has not consented to the proposed admission or continuance, then notice must be filed pursuant to Rule 19d-1. § 2.03[4][b] *supra*.

In the case of a national securities exchange, or registered securities association, notice need be filed with the Commission pursuant to Rule 19h-1 with respect to a person associated with a member only if such person: (1) controls (as defined in Rule 19h-1(f)(2), such definition being identical to that in Rule 19g2-1(b)(2), *see* § 2.03[3][a] *supra*, except Rule 19g2-1 uses a 25 percent stockholding or net profit entitlement standard, whereas Rule 19h-1(f) uses a 10 percent standard for stockholding or net profit entitlement) the member or is a general partner, officer, or employee of such member, or (2) is an unregistered broker or dealer, controls an unregistered broker or dealer, or is a general partner of such broker or dealer. Rule 19h-1(a). One purpose behind this provision is to avoid the burden upon all parties concerned of requiring a self-regulatory organization to notify the SEC in the case of a disqualified person not in a control position in relation to the member firm and employed in a non-securities affiliate of a large, diversified corporation. Disciplinary Sanctions Release, *supra*. Another purpose is to require the filing of a notice in the case of a nonmember affiliate in the securities business:

[N]onmember affiliates which are in the securities business are of significant regulatory concern in the context of the purposes of the reporting requirements of the Rule. However, those affiliates will, unless not registered with the Commission, generally fall under the immediate jurisdiction of another SRO [self-regulatory organization] ... which would be responsible for compliance with the Rule as to both the affiliate and its personnel.

Id.

Rule 19h-1(a) also provides that notice need not be filed with the Commission pursuant to Rule 19h-1 if:

(1) the person subject to the statutory disqualification is then a participant in, member of, or a person associated with a member of another self-regulatory organization and the proposed admission or continuance is on essentially the same terms and conditions as the person's prior admission or continuance, or

(2) the sole disqualification consists of a willful violation of the Securities Acts, Investment Advisers Act, Investment Company Act, or a rule or regulation under one or more of such Acts and the sanction for such violation is no longer in effect.

Under Rule 19h-1(b), a second notice representing the same proposed employment need not be filed by a second self-regulatory organization, after the first filing of such notice by a different self-regulatory organization, if the second organization agrees with the terms and conditions of the notice filed by the first organization. Such concurrence would be noted in the application for admission or continuance filed pursuant to Rule 19h-1(a). Rule 19h-1(c)(6). *See* Disciplinary Sanctions Release, *supra*.

(n286)Footnote 286. Rule 19h-1(d), (e), (g), and (h). At the time of filing a notice pursuant to Rule 19h-1(a), an application may be made to the Commission for an order stating that the Commission will not proceed under Section 15(b) (empowering the Commission to sanction a broker or dealer, *see* § 3.03[7] *infra*) or 19(h), notwithstanding the statutory disqualification. Rule 19h-1(d). Rule 19h-1(a) requires the filing of notice not only in the case of a disqualified person initially seeking entry or reentry, but also when a disqualified person is to be continued in membership or association. In both cases:

... the Commission, depending upon the nature of the disqualification, may have independent authority under section 15(b) or 19(h) effectively to prevent the admission or continuance and will need to have the information called for in the notice [required by Rule 19h-1(a)] to determine if it wishes to exercise that power.

Disciplinary Sanctions Release, *supra*. Accordingly, an application pursuant to Rule 19h-1(d) is needed.

Under Section 6(c)(2) of the Exchange Act, a national securities exchange cannot admit a person to membership or permit a person to become associated with a member if that person is under a statutory disqualification, without prior notice to the Commission. *See* § 2.03[2][a] *supra*. Rule 19h-1 implements, in part, the provisions of Section 6(c)(2) (and also of Sections 15A(g)(2), *see* § 2.03[2][a] *infra*, and 17A(b)(4)(A), *see* § 2.03[2][a] *supra*) by requiring notice to the Commission by the self-regulatory organization respecting proposed admissions of disqualified persons. Disciplinary Sanctions Release, *supra*. The notice filed pursuant to Rule 19h-1(a) may be accompanied by an application to the Commission for an order declaring that the Commission will not direct otherwise, *i.e.*, will not direct that membership be denied, as provided in Section 6(c)(2), 15A(g)(2), or 17A(b)(4)(A). Rule 19h-1(d)(2).

Rule 19h-1(e) describes the contents of an application filed pursuant to Rule 19h-1(d). The Commission may grant or deny an application filed pursuant to Rule 19h-1(d) on the basis of the papers filed by the parties, without an oral hearing, unless a request for oral hearing or argument is submitted with the application. Rule 19h-1(g). The SEC Rules of Practice (17 C.F.R. Part 201, *see* § 9.02[2][a] *infra*) apply to proceedings under Rule 19h-1 to the extent that they are not inconsistent with Rule 19h-1. Rule 19h-1(h).

(n287)Footnote 287. NASD Report, *supra*.

(n288)Footnote 288. NASD Report, *supra*.

(n289)Footnote 289. NASD Report, *supra*. A "Section 21(a) report" is issued under Section 21(a) of the Exchange Act, which grants the Commission the authority to issue a report detailing findings of violations of the securities laws, generally in lieu of an enforcement action. In the NASD's case, however, the Section 21(a) report supplemented an enforcement action.

(n323)Footnote 323. Section 23(b).

(n324)Footnote 324. Section 6(b)(2) requires the rules of an exchange to provide that any registered broker or dealer, or any natural person associated therewith, may become a member of the exchange and that any person may become associated with a member, as a condition for registration as a national securities exchange.

Section 6(c) sets forth the grounds on which an exchange may deny a person membership or bar a person from becoming associated with a member, see § 2.03[2][a] *supra*.

Section 6(d) contains the minimum due process requirements that an exchange must follow in disciplinary and other proceedings, see § 2.03[4] *infra*.

(n325)Footnote 325. The federal laws do not contain an express exemption for organized securities or commodities exchanges, such as the various stock exchanges, the Chicago Board of Trade, and the Sugar and Cotton Exchanges. However, an implied exemption has long been assumed to exist because of the very nature of the functions of such exchanges and because of the extensive statutory regulation of securities and commodities exchanges, as well as of administrative and government sanctioned self regulation. This exemption has been assumed to apply to the formation of uniform standards for quality, terms, trading hours, and fees, some degree of discipline for members and traders, and a con-comitant right to ostracize non-members so as to make membership advantageous.

Securities and Commodity Exchanges, 33 A.B.A. Antitrust L.J. 88 (1966). (Footnote omitted.)

See *Silver v. New York Stock Exchange*, 373 U.S. 341, 83 S. Ct. 1246, 10 L. Ed. 2d 389, *reh'g denied*, 375 U.S. 870 (1963):

The Securities Exchange Act contains no express exemption from the antitrust laws or, for that matter, from any other statute. This means that any repealer of the antitrust laws must be discerned as a matter of implication, and '[i]t is a cardinal principle of construction that repeals by implication are not favored.' *United States v. Borden Co.*, 308 U.S. 188, 198, 60 S. Ct. 182, 188, 84 L. Ed. 181; see *Georgia v. Pennsylvania R. Co.*, 324 U.S. 439, 456-457, 65 S. Ct. 716, 725-726, 89 L. Ed. 1051; *California v. Federal Power Comm.*, 369 U.S. 482, 485, 82 S. Ct. 901, 903, 8 L. Ed. 2d 54. Repeal is to be regarded as implied only if necessary to make the Securities Exchange Act work, and even then only to the minimum extent necessary. This is the guiding principle to reconciliation of the two statutory schemes.

373 U.S. at 357, 83 S. Ct. at 1257, 10 L. Ed. 2d at 400.

The question of the applicability of the antitrust statutes to the securities industry and the corollary question of the primary jurisdiction for the SEC was studied in 1972 by the House Subcommittee on Commerce and Finance:

The Subcommittee concludes, therefore, that it would not be in the public interest to grant the blanket immunity from the antitrust laws being sought here. Rather, we concur with the following language from the Supreme Court's opinion in *Silver*, 373 U.S. at 359-60:

Since the antitrust laws serve, among other things, to protect competitive freedom, *i.e.*, the freedom of individual business units to compete unhindered by the group action of others, it follows that the antitrust laws are peculiarly appropriate as a check upon anticompetitive acts of exchanges which conflict with their duty to keep their operations and those of their members honest and viable. Applicability of the antitrust laws, therefore, rests on the need for vindication of their positive aim of insuring competitive freedom. Denial of their applicability would defeat the congressional policy reflected in the antitrust laws without serving the policy of the Securities Exchange Act.

The Subcommittee agrees with its colleagues on the Judiciary Committee and in the Senate, however, that any challenge to an exchange rule on antitrust grounds should be made to the Federal courts and not to the agency.

H.R. Rep. No. 92-1519, 92d Cong., 2d Sess. (1972).

On the subject of the primary jurisdiction of the SEC, see *Nielsen v. Dean Witter & Co.*, 1975-1 Trade Cases P 60,264 (N.D. Cal. 1975), in which a district court held that it should stay a treble damage suit by a terminated securities representative, whose registration as a representative was revoked by the NASD Board of Governors, against his former employer pending SEC review of the disciplinary action by the NASD. The court also held that it would not only be appropriate but also extremely helpful to refer the matter back to the SEC for review to determine if the revocation of the plaintiff's registration was in accordance with the Commission's rules. Also, "where certain facets of the dispute are within the jurisdiction of the SEC," SEC review of the facts would be of material aid to the court. Finally, the SEC could even consider the antitrust implications of the dispute; however, "a federal court may be the final adjudicator of antitrust claims."

See also *Ricci v. Chicago Mercantile Exchange*, 409 U.S. 289, 93 S. Ct. 573, 34 L. Ed. 2d 525, *reh'g denied*, 410 U.S. 960 (1973) (district court antitrust case should be stayed pending administrative review where the Commodity

Exchange had administrative authority over the dispute); *United States v. National Association of Securities Dealers, Inc.*, 422 U.S. 694, 95 S. Ct. 2427, 45 L. Ed. 2d 486, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,214 (June 26, 1975) (certain vertical restrictions on secondary market transactions in mutual fund shares immune from antitrust laws because Section 22(f) of the Investment Company Act of 1940 grants the SEC the final authority in the matter).

(n326)Footnote 326. In *Silver*, the complainant, a broker-dealer in the over-the-counter market, was deprived of his private wire service to members of the New York Stock Exchange by the Exchange itself. No notice was given to the complainant, nor was any reason given nor an opportunity to be heard. The Supreme Court found that the statutory duty to regulate conduct of exchange members, including their relations with nonmembers, did not exempt an exchange from liability under the antitrust laws, where it had ordered members to terminate wire services with a nonmember over-the-counter dealer without giving him an explanation of the reasons for the termination. Having ruled that the procedurally arbitrary decision of the New York Stock Exchange violated Section 1 of the Sherman Act, the Supreme Court refused to discuss the substantive issue of whether the act of depriving an over-the-counter dealer access to wire service with member houses violated the antitrust laws.

Silver is discussed in 5 Loss, Securities Regulation 3157-63 (2d Ed. 1961, 1969 Supp.).

See also *Robert W. Stark, Jr., Inc. v. New York Stock Exchange, Inc.*, 346 F. Supp. 217, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,573 (S.D.N.Y. 1972), *aff'd*, 466 F.2d 743, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,607 (2d Cir. 1972); *Cowen v. New York Stock Exchange*, 256 F. Supp. 462 (S.D.N.Y. 1966), *aff'd*, 371 F.2d 661, [1966-1967 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,884 (2d Cir. 1967) (discharged stockbroker's treble damage action under the antitrust laws dismissed; plaintiff made aware of precise charges against him, conceded the truth thereof, and his conduct violated both the Exchange Act and the New York Stock Exchange Rules).

(n327)Footnote 327. The holding in *Silver* was made in the context of self-regulatory activities not then subject to the appropriate federal agency's review:

Although the Act gives to the Securities and Exchange Commission the power to request exchanges to make changes in their rules, § 19(b), **15 U.S.C. § 78s(b)**, and impliedly, therefore, to disapprove any rules adopted by an exchange, See also § 6(a)(4), **15 U.S.C. § 78f(a)(4)**, it does not give the Commission jurisdiction to review particular instances of enforcement of exchange rules. See 2 Loss, *cit.*, *supra*, at 1178; *Westwood and Howard, supra.*, 17 Law & Contemp. Prob., at 525. This aspect of the statute, for one thing, obviates any need to consider whether petitioners were required to resort to the Commission for relief before coming into court. Compare *Georgia v. Pennsylvania R. Co.*, 324 U.S., at 455, 65 S. Ct. at 725. Moreover, the Commission's lack of jurisdiction over particular applications of exchange rules means that the question of antitrust exemption does not involve any problem of conflict or coextensiveness of coverage with the agency's regulatory power. See *Georgia v. Pennsylvania R. Co.*, *supra*; *United States v. Radio Corp. of America*, 358 U.S. 334, 79 S. Ct. 457, 3 L. Ed. 2d 354; *California v. Federal Power Comm.*, *supra*; *Pan American World Airways, Inc. v. United States*, 371 U.S. 296, 83 S. Ct. 476, 9 L. Ed. 2d 325. The issue is only that of the extent to which the character and objectives of the duty of exchange self-regulation contemplated by the Securities Exchange Act are incompatible with the maintenance of an antitrust action. Compare *Maryland & Virginia Milk Production Ass'n v. United States*, 362 U.S. 458, 80 S. Ct. 847, 4 L. Ed. 2d 880.

Silver v. New York Stock Exchange, 373 U.S. at 357-58, 83 S. Ct. at 1257, 10 L. Ed. 2d at 400-01. (Footnote omitted.)

(n328)Footnote 328. In *Gordon v. New York Stock Exchange, Inc.*, 422 U.S. 659, 682-83, 95 S. Ct. 2598, 2611, 45 L. Ed. 2d 463, 479, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,215 (June 26, 1975), the Supreme Court

summarized the principles which had developed in cases in which it had been argued that provisions of the securities laws constituted an implied repeal of antitrust law. Certain axioms of construction are now clearly established. Repeal of the antitrust laws by implication is not favored and not casually to be allowed. Only where there is a "plain repugnancy between the antitrust and regulatory provisions" will repeal be implied.

The starting point for our consideration of the particular issue presented by this case, whether the antitrust laws are impliedly repealed or replaced as a result of the statutory provisions and administrative and congressional experience concerning fixed commission rates, of course, is our decision in *Silver*. There the Court considered the relationship between the antitrust laws and the Securities Exchange Act, and did so specifically with respect to the action of an exchange in ordering its members to remove private direct telephone connections with the offices of nonmembers. Such action, absent any immunity derived from the regulatory laws, would be a *per se* violation of § 1 of the Sherman Act. 373 U.S. at 347, 83 S. Ct. at 1251. Concluding that the proper approach to the problem was to reconcile the operation of the antitrust laws with a regulatory scheme, the Court established a "guiding principle" for the achievement of this reconciliation. Under this principle, "[r]epeal is to be regarded as implied only if necessary to make the Securities Exchange Act work, and even then only to the minimum extent necessary."

Id., at 357, 83 S. Ct. at 1257.

See also *Thill Securities Corp. v. New York Stock Exchange*, 433 F.2d 264, [1969-1970 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,756 (7th Cir. 1970), *cert. denied*, 401 U.S. 994, 91 S. Ct. 1232, 28 L. Ed. 2d 532 (1971).

(n329)Footnote 329. 371 F.2d 409 (7th Cir.), *cert. denied*, 389 U.S. 954 (1967), *rehearing denied*, 390 U.S. 912 (1968). See 5 Loss, *supra*, at 3164.

(n330)Footnote 330. Exchange Act, Section 19(b)(9) provided that the Commission could "alter or supplement the rules of such exchange ... in respect of such matters as ... (9) the fixing of reasonable rates of commission, interest, listing, and other charges" The Securities Acts Amendments of 1975 altered the SEC's authority with respect to commission rates, see § 2.03[2][d] *supra*. Furthermore, as a result of the 1975 Amendments, Section 19(b) now contains a new procedure for SEC review of proposed changes in the rules of self-regulatory organizations, see § 2.03[1][a] *supra*.

(n331)Footnote 331. Unlike the situation in *Silver* (see *supra*), the Supreme Court in *Gordon* was faced with an antitrust issue involving an activity over which the SEC actively exercised its direct regulatory powers.

(n332)Footnote 332. In *Gordon*, the Supreme Court, affirming the holding of the Second Circuit and district court dismissing a private action, held that the fixed commission rates utilized by the New York Stock Exchange and the American Stock Exchange were immunized from antitrust attack because of the SEC's direct regulatory power under § 19(b)(9) to approve or disapprove exchange commission rates. The Court held that to permit operation of the antitrust laws with respect to commission rates would unduly interfere with the operation of the Exchange Act.

In *Abbott Securities Corp. v. New York Stock Exchange*, 1976-2 Trade Cas. P 61,017 (D.D.C. 1976), the plaintiffs' antitrust suit against the exchange, based upon the exchange rule prohibiting the plaintiffs as nonmembers of the New York Stock Exchange from sharing commissions with members of the Exchange, was dismissed because the court, following *Gordon*, found the prohibition as part of the "regulatory scheme which specifically authorizes the SEC to oversee the fixing of Commission rates," and, as such, immune from the antitrust laws.

Cf. *Thill Securities Corp. v. New York Stock Exchange*, 433 F.2d 264, [1969-1970 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,756 (7th Cir. 1970), *cert. denied*, 401 U.S. 994, 91 S. Ct. 1232, 28 L. Ed. 2d 532 (1971), in which the

Court of Appeals reversed a district court holding that had upheld the Exchange's anti-rebate rule--whereby members are prohibited from sharing with non-members any commission earned on purchase or sale of securities even though the non-member refers the customer. The district court held the rule was authorized by Section 19(b)(9), and was not subject to antitrust review since it fell within the scope of Commission review. The Court of Appeals held that in order for the Exchange rule to be immune from the antitrust laws, the Exchange must show that exemption from the antitrust laws "is necessary to discharge its responsibilities under the Securities Exchange Act," and the Court of Appeals remanded the case to the district court for trial on that issue. The Court of Appeals in *Thill* also held that even though the Commission exercises supervisory power over the rules of the Stock Exchange, the Exchange is not *ipso facto* granted immunity for conduct relating to those rules.

It is important to note that the Supreme Court in *Gordon v. New York Stock Exchange, Inc.*, *supra*, declined to follow *Thill* to the extent that the Seventh Circuit viewed the question of implied repeal of the antitrust laws as a question of fact, *i.e.*, whether the particular rule is necessary to make the Act work. The Supreme Court held that it was proper to decide the case on the basis of a summary record compiled on motions for summary judgment without any further evidence that might be gained from a trial on the merits because there was ample evidence regarding the extent of SEC review under a specific provision of the Securities Exchange Act.

Interpreting the "rule of reason" enunciated in *Silver*, to mean that "within the area of supervised self-regulation contemplated by the Securities Exchange Act; *per se* concepts are generally displaced and the courts are to examine whether the particular restraint, even though it would be a *per se* violation if performed by others, was reasonable," the Court of Appeals in *Jacobi v. Bache & Co., Inc.*, 520 F.2d 1231, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,253 (2d Cir. 1975), *cert. denied*, 423 U.S. 1053, 96 S. Ct. 784, 46 L. Ed. 2d 642 (1976), held that the New York Stock Exchange rule prohibiting an automatic pass-through of a portion of the service charge by member firms to registered representatives was not immune from the antitrust laws. However, the Court of Appeals found that the plaintiffs failed to show that the exchange rule constituted price fixing, by failing to meet plaintiffs' burden of showing that the rule was not "germane" to the purposes of the Exchange Act and was unreasonable.

(n333)Footnote 333. Letter from Manuel F. Cohen, Chairman, Securities and Exchange Commission, to A. Willis Robinson, Chairman, Senate Committee on Banking and Currency (July 30, 1965) (hereinafter cited as "Letter from Cohen").

(n334)Footnote 334. Letter from Cohen, *supra*.

(n335)Footnote 335. Letter from Cohen, *supra*.

(n336)Footnote 336. Letter from Cohen, *supra*.

(n337)Footnote 337. Letter from Cohen, *supra*.

(n338)Footnote 338. Letter from Cohen, *supra*.

(n339)Footnote 339. Letter from Cohen, *supra*. After the Supreme Court's decision in *Gordon*, the district court on remand in *Thill Securities Corp. v. New York Stock Exchange*, 473 F. Supp. 1364, [1979-1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 97,185 (E.D. Wis. 1979), reaffirmed its holding that the now revoked anti-rebate rule was immune from antitrust analysis and that the Commission adequately exercised its regulatory authority.

The Seventh Circuit affirmed that decision, 633 F.2d 65, [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 97,663 (7th Cir. 1980), and held that the anti-rebate rule was an integral part of the entire fixed-commission rate system, which required antitrust immunity from the "obvious interference" that separate private antitrust actions would cause. *Id.* at p. 98,519.

See also Shumate & Co., Inc. v. New York Stock Exchange, Inc., [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 97,585 (N.D. Tex. 1980) (the implied repeal of the federal antitrust laws as to the enforcement of the New York Stock Exchange's off-board trading restrictions is necessary to effectuate the purposes of the Exchange Act).

(n340)Footnote 340. Exchange commission rates are discussed in § 2.03[2][d] *supra*.

(n341)Footnote 341. Section 6(e)(1)(B). The provisions of the Securities Acts Amendments of 1975 governing commission rates are discussed in § 2.03[2][d] *supra*. Prior to the adoption of the 1975 Amendments, the Commission adopted Rule 19b-3 prohibiting a national securities exchange from fixing the rate of commission for transactions effected on, or effected by the use of the facilities of, such exchange.

(n342)Footnote 342. For discussion of the extent to which the 1975 Amendments impliedly repeal the antitrust laws with respect to both national securities exchanges and registered securities associations, *see* Note, SEC Regulation As A Pervasive Regulatory Scheme--Implied Repeal of the Antitrust Laws With Respect to National Securities Exchanges and the NASD, 44 Fordham L. Rev. 355 (1975).

In *Drayer v. Krasner*, 572 F.2d 348, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 96,299 (2d Cir. 1978), the Court of Appeals held that the New York Stock Exchange requirement of arbitration in a dispute between a registered representative and a member firm was immune from the antitrust laws. The plaintiff had complained that New York Stock Exchange Rule 347, compelling all member firms to include an arbitration clause in contracts with registered representatives, violated the antitrust laws. In concluding that the arbitration requirement was immune from antitrust attack, the Court of Appeals examined the effect of the Securities Acts Amendment of 1975 upon supervised exchange self-regulation. The court found that SEC review of exchange rules pursuant to Section 31(b) of the 1975 Amendments, *see* § 2.03[1][a] *supra*, had "not implicated" Rule 347. Furthermore, the Commission had not sought to exercise its power under Section 19(c), *see* § 2.03[1][b] *supra*, to initiate changes in exchange rules, to alter the New York Stock Exchange arbitration provisions. The Court of Appeals held that Rule 347 "would seem to fall within" the provisions of Sections 6(b)(5) and (8), *see* § 2.02[2][c][i] *supra*, 19(b)(2) and (3), *see* § 2.03[1][a] *supra*, and 19(c), *see* § 2.03[1][b] *supra*, these sections being the "measure of congressionally delegated authority for self regulation in the national interest:"

Whatever the relationship of this rule [New York Stock Exchange Rule 347] to the objective of investor protection, it is germane to the goal of market efficiency, reflected in § 6(b) and throughout the 1975 amendments, *see, e.g.*, §§ 2; 11A(a)(1)(C); 15A(b)(6); (9); 17A(a)(1); 19(f); 23(a)(2), and to the objective of fair administration of the Exchange, implicated in § 6(b) and an explicit standard of § 9(c). Registered representatives play an important role in the flow of business on securities exchanges. The arbitration provision enables member firms to rid themselves of registered representatives who, as they believe, are dishonest or ineffective, or who have violated rules of the NYSE, including the "know-your-customer" rule, Rule 405(1), without subjecting themselves to lengthy and costly litigation--including, as here, a request for punitive damages. *See also* Rust, *supra*, 352 F. Supp. at 718. It is likewise in the interest of fair administration and market efficiency, as well as the public interest, that honest and ethical registered representatives should have speedy, cheap and effective remedies against their employers. At least, the NYSE is entitled to think this in the absence of any indication otherwise from the SEC.

572 F.2d at 358. (Footnote omitted.)

(n343)Footnote 343. There being no showing of an implied repeal of the antitrust laws, the Court turns to defendants' contention that because they accorded Blackman procedural due process, there is no violation of the antitrust laws. Plaintiffs do not challenge the procedure whereby their application was acted upon and it appears that such procedure is adequate under the circumstances. *Cf. Crimmins v. American Stock Exchange*, 346 F. Supp. 1256

(S.D.N.Y. 1972). *Silver* teaches, however, that the granting of procedural due process does not remove the Exchange's action from scrutiny by an antitrust court: procedural due process is merely the threshold justification for exemption from the antitrust laws and having failed to grant fair procedures in *Silver*, the action of the New York Stock Exchange was treated as a per se violation of the Sherman Act.

Zuckerman v. Yount, 362 F. Supp. 858, 863, [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,109 (N.D. Ill. 1973).

(n344)Footnote 344. Zuckerman v. Yount, *supra*:

In light of the fact that the antitrust laws are to be impliedly repealed only to the minimum extent necessary to make the 1934 Act work, this Court rejects defendants' contention that, based on the present record, there has been an implied repeal of the antitrust laws in this case. Blackman was charged with violation of certain Exchange rules. It appears that if the implied repeal of the antitrust laws is to be kept to the minimum, there must first be an inquiry as to whether the rules that were allegedly violated are essential enough to the operation of the 1934 Act that the anti-competitive impact that may result from their enforcement must be tolerated. In short, a preliminary question is whether the charges, if true, would justify anticompetitive restrictions on membership in light of the purposes of the 1934 Act.

Id. at 862, 863. (Footnote omitted.)

The court in Zuckerman pointed out that control over membership was one of the responsibilities imposed on a stock exchange as part of the exchange's duty of self-regulation under Section 6(b). However, since Zuckerman was decided, Congress amended the Exchange Act in 1975 to give the SEC power to review disciplinary actions, including denial of membership on an exchange, by an exchange.

(n345)Footnote 345. J.R. Williston & Beane, Inc. v. Haack, 387 F. Supp. 173, [1974-1975 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,921 (S.D.N.Y. 1974). The district court pointed out in *Williston* that the purpose of the net capital rule of both Exchanges is to assure the financial responsibility of broker-dealers and that the rule is the kind of rule Congress had in mind in granting the SEC authority under Section 19(b)(1) to require the exchanges to provide adequate "safeguards in respect of the financial responsibility of members." The court then held:

... that since enforcement of the net capital rule is essential to the purposes of the Securities Exchange Act, and since the action of the Exchanges in the present instance satisfied constitutional standards the Exchanges are immune from antitrust liability.

387 F. Supp. at 182.

(n346)Footnote 346. The application to the Commission was pursuant to an American Stock Exchange rule governing the delisting of securities selling at a low price for a substantial period of time and resulted in an SEC order striking the stock from listing and registration on the Exchange.

(n347)Footnote 347. 527 F.2d 1366, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,461 (5th Cir. 1976). The Court of Appeals pointed out that (1) the American Stock Exchange rule governing delisting was subject to SEC authority under Section 19(b)(3) of the Exchange Act, (2) the delisting was subject to SEC approval under Section 12(d), and (3) the formal order of the SEC to delist the stock was issued pursuant to Rule 12d2-2. Therefore, immunity under the antitrust laws was "necessary in this case to make the Exchange Act viable." For discussion of delisting of securities see § 4.01[6] *infra*.

(n348)Footnote 348. 977 F.2d 1147 (7th Cir. 1992).

(n349)Footnote 349. The court noted that, "during deliberations on the 1974 Act, the House Agriculture Committee considered and rejected a provision that would have shielded for antitrust attack any conduct [taken pursuant to a regulatory rule]." 977 F.2d 1147 at 1161.

(n350)Footnote 350. 977 F.2d at 1161 (*citing* National Germicidal Hosp. & Gerontology Ctr. v. Blue Cross, 101 S.Ct 2415, 2422 (1981) (alterations in original).

(n351)Footnote 351. *Id.*, at 1167.

(n352)Footnote 352. Loomis, The Shakeout on Wall Street Isn't Over Yet, *Fortune* 59 (May 22, 1978). From the end of 1968 to May 1, 1975, the number of New York Stock Exchange member firms declined from 646 to 505, an average loss of more than twenty firms per year. By April 1978, the total number of NYSE member firms was down to 465. *Id.* at 59-60. Along with the increased concentration in the securities industry has come an increasing concentration of capital: from 1972 to 1977, the total capital of the twenty-five largest securities firms grew from \$1.7 billion to nearly \$ 2.7 billion, while the total capital of all the NYSE member firms (including the twenty-five largest firms or their subsidiaries), and of the holding companies behind some of them, has "held just about steady, at around 4.2 billion in each year. Thus, the top twenty-five have increased their share of the total capital from about 41 percent to 64 percent." *Id.* at 64.

For discussion of the effect of the 1975 Amendments on schedules, fixed rates of commissions, allowances, discounts, or other fees, *see* § 2.03[2][d] *supra*.

(n353)Footnote 353. Comment, Concentration in the Securities Industry: Antitrust Aspects of Securities Firm Mergers, 42 Albany L. Rev. 619, 624 (1978). "This may be attributable, however, to the fact that only recently have these mergers joined large, reasonable healthy competitors. Thus, the possibility of a challenge by the Justice Department is becoming more of a reality." *Id.* at 624. (Footnote omitted.)

(n354)Footnote 354. Comment, Concentration in the Securities Industry: Antitrust Aspects of Securities Firm Mergers, 42 Albany L. Rev. 619, 631 (1978). The securities firm acquired in a merger should file with the Commission on Form BDW a notice of withdrawal from registration as a broker or dealer pursuant to Section 15(b)(5). Rule 15b6-1, *see* § 3.03[6] *infra*. The acquiring securities firm should file an amendment on Form BD to its application for registration as a broker or dealer to reflect the acquisition. Rule 15b3-1(b), *see* § 3.03[2][b] *infra*. Furthermore, New York Stock Exchange Rule 313 requires all documents pertaining to a merger involving a "member corporation" (a corporation transacting business as a broker or dealer in securities, approved by the Board of Directors of the NYSE as a member corporation, having at least one NYSE member as an officer of the member corporation and holder of voting stock therein, and having all its other NYSE members as officers thereof and holders of voting stock therein, to be submitted to and be acceptable to the NYSE prior to becoming effective. CHAPTER 2 Regulation of Securities Markets *

1-2 Federal Securities Exchange Act of 1934 § 2.05

§ 2.05 Directions of Future Change in the Regulation of Securities Markets

For over 20 years, the Commission has struggled with providing US investors with safe access to foreign markets and with opening the US borders to foreign market participants such as broker-dealers and stock exchanges. n1 This concept has been generally known as "mutual recognition". In March 2008, the Commission announced in a press release initial steps for implementing mutual recognition by taking the following actions:

- "Exploring initial agreements with one or more foreign regulatory counterparts, which would be based upon a comparability assessment by the SEC and by the foreign authority of one another's regulatory regimes.
- Considering adoption of a formal process for engaging other national regulators on the subject of mutual recognition. This process could be accomplished through rulemaking or other appropriate mechanisms, possibly informed by one or more initial agreements with other regulators.
- Developing a framework for mutual recognition discussions with jurisdictions comprising multiple securities regulators tied together by a common legal framework, including Canada (which has no national securities regulator, but rather provincial regulators) and the European Union (whose national securities regulators are subject to supranational legislation and directives).
- Proposing reforms to Rule 15a-6 in order to improve the process by which US investors have access to foreign broker-dealers." n2

Since the March 2008 press release, the Commission issued a joint announcement with Australian Prime Minister Kevin Rudd that the Commission, the Australian Securities and Investment Commission ("ASIC"), and the Australian Treasury Department have begun formal discussions to develop a mutual recognition arrangement for the two nations' securities markets. n3 Similarly, in late May 2008, SEC Chairman Christopher Cox and Chairmen of four Canadian securities regulators announced "a schedule for the completion of a process agreement that would open the way for discussions of a potential US-Canada mutual recognition arrangement". n4

In late June 2008, the Commission also proposed amendments to Rule 15a-6 under the Securities Exchange Act of 1934 (the "Exchange Act"). n5 Rule 15a-6 provides conditional exemptions from broker-dealer registration for foreign

entities engaged in certain activities with certain US investors. Such proposals significantly expand the scope of the conditional exemptions available to foreign broker-dealers or eliminate some of the more onerous restrictions between foreign broker-dealers and US customers. The Commission is proposing such amendments due to increasing market globalization. As such, the proposed amendments are intended to remove certain barriers to access foreign markets and securities, while still maintaining investor protections. n6

As noted above, mutual recognition has a long history. In 1989, the Commission published a concept release entitled "Recognition of Foreign Broker-Dealer Regulation" that sought comments on opening the US markets to foreign broker-dealers that have comparable foreign regulation. n7 This concept release was published as a companion to the adopting release of Rule 15a-6 and noted that

The Commission believes that recognition of foreign broker-dealer regulation deserves serious consideration. Over the last decade, many institutional investors have actively participated in foreign securities markets in order to diversify their portfolios. Many foreign broker-dealers possess special expertise in foreign markets that would be of use to US institutional investors, yet they may not anticipate obtaining sufficient US business to justify registering in the United States. Recognizing foreign regulation as a substitute, in certain circumstances, for US registration would allow certain of these foreign broker-dealers to deal with US institutional investors without incurring the expense of US registration. This would substantially increase the access of US investors to the valuable services that foreign broker-dealers provide relative to foreign markets. By increasing this access, an approach involving reliance on comparable foreign regulation and cooperation with foreign securities authorities could facilitate international securities transactions, while maintaining effective broker-dealer oversight and preserving the essential protections of US broker-dealer regulation. n8

The release further stated that the conceptual approach would be based upon the following limitations:

1. A limitation on the scope of the exemption to foreign broker-dealers operating outside the United States whose business is predominantly foreign, who do not have US broker-dealer affiliates, and who limit their activities requiring US broker-dealer registration to providing cross border services to major US institutional investors.
2. The existence of investigative and financial memoranda of understanding ('MOU'), or comparable treaties, between the Commission and the foreign securities authority ('FSA'), that support the reliance by the Commission on the FSA that this conceptual approach would entail.
3. The existence of a foreign regulatory regime that is comparable to that of the United States.
4. Compliance by exempted broker-dealers with specific US regulatory requirements deemed necessary by the Commission for the protection of US investors and markets. n9

The concept release was subject to a number of negative comments "because it would not have applied to foreign affiliates of US broker-dealers and it failed to require reciprocal treatment of US intermediaries by foreign regulators." n10 As a result, no action was taken based upon this conceptual release.

The next significant, yet ineffective, effort in mutual recognition was a 1997 conceptual release by the Commission that discussed, among other things, foreign market activities in the US. n11 In this release, the Commission stated as follows:

[T]echnological advances have enabled market members themselves to trade from remote locations outside of particular markets' home countries. Many foreign markets have integrated new technology into

their trading processes in recent years, either by using computers in combination with traditional floor trading procedures, or by completely automating their trading facilities. This enhanced technology enables members of those markets to trade without being physically present on a market 'floor' or establishing a physical presence in a market's home country. As a result, several foreign markets have begun to offer their members in non-US jurisdictions 'remote' access to their trading facilities, typically by installing proprietary market terminals in the members' offices, by providing data feeds or codes for use with software operated through the members' own computers, or by allowing members to access a market's trading facilities through third party service vendors or public networks (such as the Internet). In recent years, several foreign markets have proposed permitting US broker-dealers and institutional investors to become market members through similar remote access arrangements. If this remote access were offered in the United States, US investors would have the ability to trade directly on foreign markets and to bypass broker-dealers. n12

In the release, the Commission stated that its goal was to initiate a dialogue regarding how to develop a consistent, long-term approach that clarifies the application of the US securities laws to the US activities of foreign markets. Any such approach must not impose unnecessary regulatory costs on cross-border trading and, at the same time, must allow the Commission to oversee foreign markets' activities in the United States and protect US investors under the US regulatory framework. There are several ways to achieve these goals. As discussed below, for example, the Commission could (1) rely solely on a foreign market's home country regulator; (2) require all foreign markets to register as national securities exchanges or apply for an exemption from registration; or (3) develop a tailored regulatory scheme designed to regulate the entity that provides US investors with the ability to trade directly on foreign markets, rather than regulating the foreign market itself. The Commission solicits comments on whether any other alternatives could achieve the goals discussed above." *Id.* This concept release, like the 1988 release, did not result in any action on mutual recognition.

Then, in late 2007, Ethiopis Tafara, the Commission Director of the Office of International Affairs, and Robert J. Peterson, the Senior Counsel of the Office of International Affairs, published an article in the Harvard International Law Journal entitled "A Blueprint for Cross-Border Access to US Investors: A New International Framework. n13 This article prompted a Commission roundtable to examine how retail and institutional investors, US and non-US exchanges, global and regional broker-dealers, and others may be impacted by a selective mutual recognition regulatory regime. n14 This led to the implementation of mutual recognition as discussed above.

FOOTNOTES:

(n1)Footnote 1. See, e.g., Recognition of Foreign Broker-Dealers, Release No 34-27018 (Jul. 11, 1989) including n.6.

(n2)Footnote 2. SEC Announces Next Steps for Implementation of Mutual Recognition Concept, SEC Press Release 2008-49 (Mar. 24, 2008). The press release stated that the concept of mutual recognition is premised upon the following:

Globalized markets and increased cross-border access offer many potential benefits for US investors, including broader investment choices, lower transaction costs resulting from increased competition and technology, increased efficiency of transactions, improved integration of cross-border trading and technology, greater opportunity for diversification, and more access to information about foreign investment opportunities. At the same time, taking advantage of these developments requires greater international cooperation to ensure consistent and strengthened investor protection.

Today, regulatory overlap from different national securities regulatory regimes can pose impediments to cross-border trading. This overlap can result in additional costs for US investors and regulatory compliance burdens on market participants without consideration of whether such costs afford any additional meaningful investor protections.

Even as exchanges consolidate and trading occurs without regard to borders, securities regulation remains primarily a national function, and likely will remain the province of domestic regulators for the foreseeable future.

While presiding over their own national regulatory regimes, securities regulators worldwide continue to work together to promote efforts to reach consensus on, and where possible convergence of, shared principles of high-quality securities regulation designed to promote the protection of investors globally. This does not mean that regulators will adopt one identical approach to securities regulation, but differing approaches may achieve the same desired outcomes.

[I] Objective

An Exchange who is registered as a specialist is accountable to the Exchange and the investing public for the quality of the Exchange markets in the securities in which for the quality of the Exchange markets in the securities in which he is registered and is responsible for fostering and acting to maintain liquid and continuous two-sided auction markets on the Exchange Floor in those securities. This is accomplished by his acting as agent and principal in such securities, in accordance with the provisions of Federal and Exchange rules and policies, to help insure that such markets are fair, orderly and operationally efficient in the public interest, and competitive with non-Exchange markets in those securities. A "fair" market is one which is free from manipulative and deceptive practices and which affords no undue advantage to any of the participants therein. An "orderly" market is one with regularity and reliability of operation manifested by the presence of price continuity and depth exhibited by the avoidance of large and unreasonable price variations between consecutive sales, and the avoidance of overall price movements without appropriate accompanying volume.

Appendix 2A: Specialist Job Description

1-2A Federal Securities Exchange Act of 1934 [II]

[II] Principal Duties

As Agent

1. To act as agent on behalf of orders entrusted to him, to hold the interests of such orders above his own interest and to fulfill in professional manner all other duties of an agent of include, but not to be limited to, insuring that each such order, regardless of its size or source, receive proper representation and timely, best possible execution in accordance with the terms of the order and the rules and policies of the Exchange.
2. To act as a catalyst in the markets for the securities in which he is registered by professionally and impartially servicing the interests of other members, to be helpful, communicative, cooperative and professional, to make reasonable efforts to bring together buyers and sellers without interfering as principal unless reasonably necessary to the performance of his duties, and to act together with all members involved to insure that the equitable needs of all parties are considered.
3. To perform effectively the administrative duties with respect to orders entrusted to him as agent to include, but not be limited to, cooperating with other members in the confirmation of open orders and issuing timely and accurate status reports and execution reports.
4. To insure that his acceptance and execution of orders as agent are in compliance with applicable Federal and Exchange rules and policies; to accept as agent only those types of orders he is permitted to accept pursuant to those rules and policies, and not to accept any order for the purchase or sale of a stock in which he is registered directly from the company using such stock or any officer, director or 10% shareholder thereof, from any pension or profit-sharing fund, or from any institution such as a bank, a trust company, an insurance company or an investment company.

As Principal

1. To buy and sell securities as principal when such transactions are necessary in the public interest to minimize an actual or reasonably anticipated short-term imbalance between supply (offers at or near the last sale price) and demand (bids at or near the last sale price) in the auction market, and the absence of this transactions could otherwise result in an unreasonable lack of continuity and/or depth.

1-2A Federal Securities Exchange Act of 1934 [II]

2. To make continuous two-sided quotations and effect transactions when necessary to fulfill his duties as principal, and to insure that such quotations, if acted upon, and transactions are in the public interest by being reasonably calculated to contribute to the maintenance of price continuity with reasonable depth in view of the general market, the market in the particular security and the adequacy of his total position in such security with respect to the actual or reasonably anticipated needs of the market.

3. To make such quotations and effects such transactions in accordance at all times with applicable Federal or Exchange rules and policies, to act as principal in a manner which does not upset the natural longer-term forces of supply and demand, and to insure that each opening and reopening price reflects a professional assessment of market conditions at the time with due consideration given to the balance of supply and demand as reflected by public orders.

4. To avoid transactions in a security as principal which are excessive in view of the market for such security. To trade as principal in a manner which reflects an awareness of his financial resources and to report to the Exchange any actual or imminent financial problems.

Other Duties

1. To insure the orderly functioning of the trading Crowd by exercising leadership and objectively observing trading Crowd activity and order flow, to seek the advice and assistance of Floor Officials when required, and to request delays in opening or trading halts when called for by unusual market conditions.

2. In order to foster a positive professional relationship between the Exchange and listed companies and to educate company representatives regarding the workings of the Exchange's continuous two-way auction market system, the specialist is permitted to have periodic contact with representatives of the companies in whose securities he is registered as specialist provided he abides by applicable Federal or Exchange rules or guidelines with regard to such contacts.

3. To foster the efficient operation of the auction market process by insuring the presence of adequate manpower (professional and clerical, full-time or relief) on the Floor at all times, by efficiently processing necessary trade documents and by cooperating in the resolution of questioned trades and errors.

4. To keep records required by Federal and Exchange rules to report required information to the Exchange on timely and accurate basis and to comply with all Exchange rules which govern the financing of specialist operations.

5. To be aware of and abide by all Federal and Exchange rules and policies governing his activities in non-specialty securities and trading activities off the Exchange Floor, and to be aware of and abide by an Exchange-developed code of acceptable business practices for specialists.

6. In addition to the above, to take any other action not prohibited by Federal or Exchange rule or policy or precluded by professional judgment to foster and maintain liquid continuous two-sided auction markets on the Exchange Floor and to insure that such markets are fair, orderly and efficient in the public interest and competitive with non-Exchange markets in Exchange-listed securities and to avoid any action which would hinder the achievement of these objectives.

1-2B Federal Securities Exchange Act of 1934

Date	Description	Source
1971	Commission endorses concept of a central market system	Transmittal letter accompanying SEC Institutional Investors Study Report
August 5, 1971	New York Stock Exchange calls for the development of a central market system	Martin Report
February 2, 1972	Commission outlines goals of the central market system	SEC Policy Statements on the Future Structure of the Securities Markets
March 8, 1972	Creation of the composite tape and quotation system	Exch. Act Rel. Nos. 9529 and 9530
November 8, 1972	Commission adopts Rule 17a-15 concerning collection and dissemination of last sale information	Exch. Act Rel. No. 9850
March 29, 1973	Commission proposal for the implementation of a central market system	Policy Statement of the Securities and Exchange Commission for the structure of a central market system
May 10, 1974	Implementation of a consolidated tape plan	Exch. Act Rel. No. 10787
June 4, 1975	Enactment of the Securities Acts tape plan	P.L. 94-29, 89 Stat. 97
August 28, 1975	Members appointed to the National Market Advisory Board	Exch. Act Rel. No. 11623
January 21, 1976	Commission and the National Securities Market Advisory Board call for the adoption of an industry wide central limit order book by the end of 1976	Exch. Act Rel. No. 12158

1-2B Federal Securities Exchange Act of 1934

March 11, 1976	Commission institutes proceedings to review New York Stock Exchange Non-Member Access Rules	Exch. Act Rel. No. 12181
March 31, 1976	New York Stock Exchange implements Dot systems to allow member firms to send orders directly to Exchange Trading Post	B.N.A. Securities Regulation and Law Report
July 29, 1976	Commission proposes Rule 11 Ac1-1 to govern the dissemination of quotation for securities on the consolidated tape	Exch. Act Rel. No. 12181
September 29, 1976	National Market Association is formed by six stock exchanges and the NASD spearheading a joint industry effort toward formation of a national market system	B.N.A. Securities Regulation and Law Reports
December 1, 1976	Commission notifies the national securities exchanges and the NASD that certain of their rules hinder the establishment of a national market system and are inconsistent with the requirements of the 1975 Amendments	Exch. Act Rel. No. 13027
December 15, 1976	National Market Association publishes a proposed plan for the development of a national market system	B.N.A. Securities Regulation and Law Report
March 18, 1977	Commission proposes rules under Section 11A that would provide exchange access to all qualified persons	Exch. Act Rel. No. 13388
June 23, 1977	Commission announces proposed rule-making to consider the elimination of off-board trading restrictions	Exch. Act Rel. No. 13662
August 19, 1977	New York Stock Exchange and Pacific Stock Exchange reach agreement on the development of an intermarket execution system linking the two exchanges	B.N.A. Securities Regulation and Law Report
December 7, 1977	National Market Advisory Board submits its final report to the Commission	Final Report of the National Market Advisory Board
December 30, 1977	Commission adopts amendments to Rule 19c-1 to eliminate off-board security trading restriction except those pertaining to in-house agency cross transactions	Exch. Act Rel. No. 14325
January 26, 1978	Commission publishes a release outline guidelines for the development of a national market system	Exch. Act Rel. No. 14416
April 17, 1978	The Intermarket Trading System begins pilot operations	B.N.A. Securities Regulation and Law Report

1-2B Federal Securities Exchange Act of 1934

April 21, 1978	Commission approves Cincinnati Stock Exchange's NSTS Plan	Exch. Act Rel. No. 14694
May 10, 1978	The NASD submits to the Commission an alternative to the Inter market Trading System	B.N.A. Securities Regulation and Law Report
August 1, 1978	Rule 11Ac1-1, which sets forth rules for the collection and dissemination of quotation information, becomes effective	Exch. Act Rel. No. 14711
October 10, 1978	Commission proposes Rule 11Aa3-1 covering the collection and dissemination of transaction reports	Exch. Act Rel. No. 15250
October 10, 1978	Commission proposes Rule 11Ac1-2 concerning the collection and dissemination of transaction reports and quotation information	Exch. Act Rel. No. 15251
March 22, 1979	Commission publishes a status report on the development of a National Market System	Exch. Act Rel. No. 15617
April 26, 1979	Commission announces proposed Rule 19c-3 concerning the elimination of off-board trading restrictions with respect to certain securities	Exch. Act Rel. No. 15770
April 26, 1979	Commission announces proposed Rule 11Ac1-3 concerning price protection for public limit orders	Exch. Act Rel. No. 15770
June 15, 1979	Commission announces proposed Rule 11A2-1, which provides for designation of certain securities as National Market System securities	Exch. Act Rel. No. 15926
February 20, 1980	Commission announces plans to develop and build the MOSS system.	B.N.A. Securities Regulation and Law Report
May 1, 1980	House Commerce and Consumer Protection and Finance Subcommittee limits funding for the Commission's MOSS system	B.N.A. Securities Regulation and Law Report
June 11, 1980	Commission announces the adoption of Rule 19e-3, which prohibits the application of off-board trading restrictions to securities listed after April 26, 1979	Exch. Act Rel. No. 16888
February 5, 1981	Commission proposes an order requiring an automated interface between ITS and the NASDAQ system	Exch. Act Rel. No. 17516
February 17, 1981	Commission adopts Rule 11Aa2-1 designating certain securities as National Market System Securities	Exch. Act Rel. No. 17549

1-2B Federal Securities Exchange Act of 1934

April 21, 1981	Commission orders automated interface between ITS and the NASDAQ system	Exch. Act Rel. No. 17744
August 25, 1981	Commission issues monitoring report on the operation and effects of Rule 19c-3	Exch. Act Rel. No. 18062
February 11, 1982	Commission announces the adoption of amendments to Rule 11Ac1-1, which will allow regional exchange and third market makers to disseminate information on a voluntary rather than a mandatory basis	Exch. Act Rel. No. 18482
May 6, 1982	Commission adopts amendments to National Market System plan to allow for the implementation of the automated interface between ITS and the NASD source	Exch. Act Rel. No. 18713
May 13, 1982	Commission proposes for comment several alternative order exposure rules	Exch. Act Rel. No. 18738
May 17, 1982	Interface between the ITS and the NASDAQ system becomes operational	Exch. Act Rel. No. 18713
December 21, 1982	Commission repropose and order exposure rule designed to eliminate the internalization of trading in Rule 19c-3 securities	Exch. Act Rel. No. 19372
January 27, 1983	Commission ends the experimental status of the ITS and makes it permanent by extending its operating authority indefinitely	Exch. Act Rel. No. 19456
August 12, 1983	Commission requests comments on off-board trading pursuant to Rule 19c-3	Exch. Act Rel. No. 20074

Appendix 2C: Regulation NMS Cross-Reference Chart

1-2C Federal Securities Exchange Act of 1934

The following chart contains cross-references between the provisions of the former rules relating to the national market system and the provisions of Regulation NMS. Minor, technical changes to the former rules adopted in connection with Regulation NMS are not noted in the chart, but where the substance of a rule was modified this is noted.

Former Rule	Description	Current Status
11Aa2-1	Definition of "national market system security"	Modified and moved to Rule 600(a)
11Aa3-1	Transaction Reporting	Definitions moved to Rule 600; most provisions moved to Rule 601
11Aa3-1(a)(1)	Definition of "transaction report"	Rule 600(b)(80)
11Aa3-1(a)(2)	Definition of "transaction reporting plan"	Rule 600(b)(82)
11Aa3-1(a)(3)	Definition of "effective transaction reporting plan"	Rule 600(b)(22)
11Aa3-1(a)(4)	Definition of "reported security"	Eliminated in favor of definitions of "NMS security" contained in Rule 600(b)(46) and "NMS stock" contained in Rule 600(b)(47)
11Aa3-1(a)(5)	Definition of "listed equity security"	Rule 600(b)(34)
11Aa3-1(a)(6)	Definition of "NASDAQ security"	Rule 600(b)(41) (modified)
11Aa3-1(a)(7)	Definition of "transaction reporting association"	Rule 600(b)(81)
11Aa3-1(a)(8)	Definition of "interrogation device"	Rule 600(b)(31)
11Aa3-1(a)(9)	Definition of "moving ticker"	Rule 600(b)(40)
11Aa3-1(a)(10)	Definition of "market minder"	Rule 600(b)(20) (term changed to "dynamic market monitoring device")
11Aa3-1(a)(11)	Definition of "vendor"	Rule 600(b)(83)

1-2C Federal Securities Exchange Act of 1934

11Aa3-1(a)(12)	Definition of "last sale data"	Rule 600(b)(33)
11Aa3-1(b)(1)	Requires filing of transaction reporting plans	Rule 601(a)(1)
11Aa3-1(b)(2)	Sets out requirements for amendments to plans	Rule 601(a)(2)
11Aa3-1(b)(3)	Requires Commission approval of plans	Rule 601(a)(3)
11Aa3-1(c)(1)	Prohibits broker-dealers' executing transactions in reported securities unless transaction reporting plan in effect	Rule 601(b)(1)
11Aa3-1(c)(2)	Prohibits exchanges' or members' disseminating transactions reports other than through effective transaction reporting plan	Rescinded
11Aa3-1(c)(3)	Prohibits associations' or members' disseminating transactions reports other than through effective transaction reporting plan	Rescinded
11Aa3-1(c)(4)	Requires broker-dealers to promptly transmit information required by transaction reporting plan	Rule 601(b)(2)
11Aa3-1(d)	Prohibits exchanges or associations from prohibiting or limiting retransmission of transaction data	Rule 601(c)
11Aa3-1(e)	Clarifies that uniform charges for transaction data permitted	Rule 601(d)
11Aa3-1(f)	States that Commission may hear appeals relating to transaction reporting plans	Rule 601(e)
11Aa3-1(g)	Provides for Commission's granting of exemptions	Rule 601(f)
11Aa3-2	Filing and amendment of national market system plans	Definitions moved to Rule 600; most provisions moved to Rule 608
11Aa3-2(a)(1)	Definition of "national market system plan"	Rule 600(b)(43)
11Aa3-2(a)(2)	Definition of "effective national market system plan"	Rule 600(b)(21)
11Aa3-2(a)(3)	Definition of "self-regulatory organization"	Rule 600(b)(68)
11Aa3-2(a)(4)	Definition of "joint self-regulatory organization plan"	Rule 600(b)(32)
11Aa3-2(a)(5)	Definition of "sponsor"	Rule 600(b)(70)
11Aa3-2(a)(6)	Definition of "participants"	Rule 600(b)(53)
11Aa3-2(a)(7)	Definition of "plan processor"	Rule 600(b)(55)

1-2C Federal Securities Exchange Act of 1934

11Aa3-2(a)(8)	Definition of "vendor"	Rule 600(b)(83)
11Aa3-2(b)(1)	Provides for filing with Commission of joint plans or amendments to joint plans	Rule 608(a)(1)
11Aa3-2(b)(2)	Provides for Commission's proposing amendments to plans	Rule 608(a)(2)
11Aa3-2(b)(3)	Authorizes SROs to act jointly in operating national market facilities, filing plans and amendments and implementing plans	Rule 600(a)(3)
11Aa3-2(b)(4)	Filing requirements for plans and amendments	Rule 608(a)(4)
11Aa3-2(b)(5)	Requirements for descriptions of national market system facilities accompanying filings	Rule 608(a)(5)
11Aa3-2(b)(6)	Filing requirements in connection with selection of plan processor	Rule 608(a)(6)
11Aa3-2(b)(7)	Requires that plan filed pursuant to rule comply with requirements of any other applicable rule	Rule 608(a)(7)
11Aa3-2(b)(8)	Requires up-to-date versions of plans and proposed amendments to be posted on website	Rescinded
11Aa3-2(c)(1)	Provides for filing of and public comment on national market system plans and amendments	Rule 608(b)(1)
11Aa3-2(c)(2)	Establishes time frame for approval of national market system plans and amendments	Rule 608(b)(2)
11Aa3-2(c)(3)	Provides for effectiveness on filing of certain amendments to national market system plans	Rule 608(b)(3)
11Aa3-2(c)(4)	Provides for summary effectiveness of certain amendments to national market system plans on temporary basis	Rule 608(b)(4)
11Aa3-2(d)	Requires each SRO to comply with terms of any plan in which it participates	Rule 608(c)
11Aa3-2(e)(1)	Provides for review by Commission of actions or failures to act by participants in national market system plans	Rule 608(d)(1)
11Aa3-2(e)(2)	Provides that application for review of action taken under national market system plan normally does not operate as a stay of action	Rule 608(d)(2)
11Aa3-2(e)(3)	Sets forth general standards for Commission action upon applications for re-	Rule 608(d)(3)

1-2C Federal Securities Exchange Act of 1934

	view	
11Aa3-2(f)	Provides for Commission's granting of exemptions	Rule 608(e)
11Ab2-1	Form of Application and Amendments for Registration of Securities Information Processors ("SIPs")	Moved to Rule 609
11Ab2-1(a)	Mandates use of Form SIP for applications for registration of SIPs	Rule 609(a)
11Ab2-1(b)	Requires prompt amendments for certain items of Form SIP	Rule 609(b)
11Ab2-1(c)	Provides for Commission's granting of exemptions	Rule 609(c)
11Ab2-1(d)	Provides that amendments to applications constitute reports under Sections 17(a), 18(a) and 32(a) of Exchange Act	Rule 609(d)
11Ac1-1	Dissemination of Quotations	Definitions moved to Rule 600; most provisions moved to Rule 602
11Ac1-1(a)(1)	Definition of "aggregate quotation size"	Rule 600(b)(1)
11Ac1-1(a)(2)	Definition of "association"	Changed to "national securities association" and moved to Rule 600(b)(44)
11Ac1-1(a)(3)	Definition of "best bid and best offer"	Rule 600(b)(7)
11Ac1-1(a)(4)	Definitions of "bid" and "offer"	Rule 600(b)(8)
11Ac1-1(a)(5)	Definition of "consolidated system"	Removed
11Ac1-1(a)(6)	Definition of "covered security"	Eliminated in favor of definitions of "NMS security" contained in Rule 600(b)(46) and "NMS stock" contained in Rule 600(b)(47)
11Ac1-1(a)(7)	Definition of "effective transaction reporting plan"	Rule 600(b)(22)
11Ac1-1 (a)(8)	Definition of "electronic communications network"	Rule 600(b)(23)
11Ac1-1(a)(9)	Definition of "exchange market maker"	Rule 600(b)(24)
11Ac1-1(a)(10)	Definition of "exchange-traded security"	Rule 600(b)(25)
11Ac1-1(a)(11)	Definition of "make available"	Removed
11Ac1-1(a)(12)	Definition of "odd-lot"	Rule 600(b)(49)
11Ac1-1(a)(13)	Definition of "OTC market maker"	Rule 600(b)(52)
11Ac1-1(a)(14)	Definition of "plan processor"	Rule 600(b)(55)
11Ac1-1(a)(15)	Definition of "published aggregate quotation size"	Rule 600(b)(59)
11Ac1-1(a)(16)	Definitions of "published bid" and "published offer"	Rule 600(b)(60)

1-2C Federal Securities Exchange Act of 1934

11Ac1-1(a)(17)	Definition of "published quotation size"	Rule 600(b)(61)
11Ac1-1(a)(18)	Definition of "quotation size"	Rule 600(b)(63)
11Ac1-1(a)(19)	Definition of "quotation vendor"	Rule 600(b)(83) (term changed to "vendor" and modified)
11Ac1-1(a)(20)	Definition of "reported security"	Eliminated in favor of definitions of "NMS security" contained in Rule 600(b)(46) and "NMS stock" contained in Rule 600(b)(47)
11Ac1-1(a)(21)	Definition of "responsible broker or dealer"	Rule 600(b)(65)
11Ac1-1(a)(22)	Definition of "revised bid or offer"	Rule 600(b)(66)
11Ac1-1(a)(23)	Definition of "revised quotation size"	Rule 600(b)(67)
11Ac1-1(a)(24)	Definition of "specified persons" for purposes of notifications and elections under Rule 11Ac1- 1(b)(3)or(b)(5)	Rule 600(b)(69)
11Ac1-1(a)(25)	Definition of "subject security"	Rule 600(b)(73)
11Ac1-1(a)(26)	Definition of "customer"	Rule 600(b)(16)
11Ac1-1(a)(27)	Definition of "listed option"	Rule 600(b)(35)
11Ac1-1(a)(28)	Definition of "options class"	Rule 600(b)(50)
11Ac1-1(a)(29)	Definition of "options series"	Rule 600(b)(51)
11Ac1-1(a)(30)	Definition of "trading rotation"	Rule 600(b)(79)
11Ac1-1(b)(1)	Requires exchanges and national securities associations to establish and maintain procedures for collecting quotations	Rule 602(a)(1)
11Ac1-1(b)(2)	Requires exchanges and national securities associations to establish and maintain procedures for identifying broker-dealer making best bid or offer for a security	Rule 602(a)(2)
11Ac1-1(b)(3)	Requires exchanges to notify specified persons of problems with quotation data	Rule 602(a)(3)
11Ac1-1(b)(4)	Permits exchanges and national securities associations to disseminate quotation information to vendors even when not required to do so	Rule 602(a)(4)
11Ac1-1(b)(5)	Permits exchanges and members of national securities associations to elect to treat securities as "subject securities" for purposes of Rule 11Ac1-1	Rule 602(a)(5)
11Ac1-1(c)(1)	Requires prompt dissemination of quotations by broker-dealers	Rule 602(b)(1)
11Ac1-1(c)(2)	Generally requires broker-dealer to execute orders for quoted securities	Rule 602(b)(2)

1-2C Federal Securities Exchange Act of 1934

	presented to it, i.e., to "honor" quotations	
11Ac1-1(c)(3)	Sets forth exceptions to obligation to honor quotations	Rule 602(b)(3)
11Ac1-1(c)(4)	Generally prohibits broker-dealers from disseminating, and quotation vendors from displaying, quotations for securities other than "subject securities"	Rule 602(b)(4)
11Ac1-1(c)(5)	Provides that entry of quotations into electronic communications network ("ECN") is a quotation covered by Rule 11Ac1-1; sets forth standards for ECN quotations deemed to be in compliance with rule	Rule 602(b)(5)
11Ac1-1(d)(1)	Governs collection of quotations in listed options	Rule 602(c)(1)
11Ac1-1(d)(2)	Provides that if an options exchange does not require brokers or dealers to disseminate quotations in options, brokers or dealers are relieved of dissemination obligations under Rule 11Ac1-1 and that brokers or dealers will be deemed to have complied with obligation to honor quotes if they execute orders up to size established by exchange	Rule 602(c)(2)
11Ac1-1(d)(3)	Requires thirty-second response by broker-dealer receiving order for listed option in amount greater than its quotation size	Rule 602(c)(3)
11Ac1-1(e)	Provides for Commission's granting of exemptions	Rule 602(d)
11Ac1-2	Display of Quotation and Transaction Data	Definitions moved to Rule 600; substantive provisions moved to Rule 603 but substantially modified
11Ac1-2(a)(1)	Cross-reference to definitions of "transaction report," "effective transaction reporting plan," "moving ticker," "last sale data," "market minder" and "interrogation device in Rule 11Aa3-1	Removed
11Ac1-2(a)(2)	Definition of "vendor"	Rule 600(b)(83)
11Ac1-2(a)(3)	Definition of "NASDAQ"	Removed
11Ac1-2(a)(4)	Definitions of "subject security"	Modified and moved to Rule 600(b)(73)
11Ac1-2(a)(5)	Definitions of "quotations" and "quotation information"	"Quotation" definition modified and moved to Rule 600(b)(62); "quotation information" definition eliminated

1-2C Federal Securities Exchange Act of 1934

11Ac1-2(a)(6)	Definitions of "bid" and "offer"	Modified and moved to Rule 600(b)(8)
11Ac1-2(a)(7)	Cross-reference to definitions of "quotation size," "aggregate quotation size," "third market maker" and "make available" in Rule 11Ac1-1	Removed
11Ac1-2(a)(8)	Definition of "consolidated display"	Modified and moved to Rule 600(b)(13)
11Ac1-2(a)(9)	Definition of "consolidated price"	Removed
11Ac1-2(a)(10)	Definition of "consolidated volume"	Eliminated in favor of definition of "consolidated last sale information" contained in Rule 600(b)(14)
11Ac1-2(a)(11)	Definition of "cumulative consolidated volume"	Removed
11Ac1-2(a)(12)	Definition of "individual market center display"	Removed
11Ac1-2(a)(13)	Definition of "over-the-counter market maker"	Rule 600(b)(52) (term changed to "OTC market maker")
11Ac1-2(a)(14)	Definition of "reporting market center"	Removed
11Ac1-2(a)(15)	Definitions of "best bid" and "best offer"	Modified and moved to Rule 600(b)(7)
11Ac1-2(a)(16)	Definition of "quotation montage"	Removed
11Ac1-2(a)(17)	Definition of "representative bid or offer"	Removed
11Ac1-2(a)(18)	Definition of "market information"	Removed
11Ac1-2(a)(19)	Definition of "market linkage system"	Removed
11Ac1-2(a)(20)	Definition of "reported security"	Eliminated in favor of definitions of "NMS security" contained in Rule 600(b)(46) and "NMS stock" contained in Rule 600(b)(47)
11Ac1-2(b)	Display requirements for transaction information	Substantially modified and moved to Rule 603
11Ac1-2(c)	Display requirements for quotation information	Substantially modified and moved to Rule 603
11Ac1-2(d)	Permits joint display of transaction and quotation information for a particular security	Substantially modified and moved to Rule 603
11Ac1-2(e)	Prohibits broker-dealer's displaying information that would not be permitted to be displayed by a vendor under Rule 11Ac1-2	Substantially modified and moved to Rule 603
11Ac1-2(f)	Establishes exceptions from display requirements	Substantially modified and moved to Rule 603
11Ac1-2(g)	Provides for Commission's granting of exemptions	Modified and moved to Rule 603(d)

1-2C Federal Securities Exchange Act of 1934

11Ac1-2(h)	Establishes effective date for Rule 11Ac1-2	Removed
11Ac1-3	Customer Account Statements	Moved to Rule 607
11Ac1-3(a)(1)	Requires notice to customer upon opening of account an annually thereafter of policy regarding payment for order flow	Rule 607(a)(1)
11Ac1-3(a)(2)	Requires notice to customer upon opening of account an annually thereafter of policy regarding routing of orders subject to payment for order flow arrangement	Rule 607(a)(2)
11Ac1-3(b)	Provides for Commission's granting of exemptions	Rule 607(b)
11Ac1-4	Display of Customer Limit Orders	Definitions moved to Rule 600; most provisions moved to Rule 604
11Ac1-4(a)(1)	Definition of "association"	Rule 600(b)(44) (term changed to "national securities association")
11Ac1-4(a)(2)	Cross reference to definition of "best bid" and "best offer" in Rule 11Ac1-1(a)(3)	Removed
11Ac1-4(a)(3)	Cross reference to definition of "bid" and "offer" in Rule 11Ac1-1(a)(4)	Removed
11Ac1-4(a)(4)	Definition of "block size"	Rule 600(b)(9)
11Ac1-4(a)(5)	Definition of "covered security"	Eliminated in favor of definitions of "NMS security" contained in Rule 600(b)(46) and "NMS stock" contained in Rule 600(b)(47)
11Ac1-4(a)(6)	Definition of "customer limit order"	Rule 600(b)(17)
11Ac1-4(a)(7)	Cross reference to definition of "electronic communications network" in Rule 11Ac1-1(a)(8)	Removed
11Ac1-4(a)(8)	Cross reference to definition of "exchange-traded security" in Rule 11Ac1-1(a)(10)	Removed
11Ac1-4(a)(9)	Definition of "OTC market maker"	Rule 600(b)(52)
11Ac1-4(a)(10)	Definition of "reported security"	Eliminated in favor of definitions of "NMS security" contained in Rule 600(b)(46) and "NMS stock" contained in Rule 600(b)(47)
11Ac1-4(b)(1)	Requires specialists to display customer limit orders	Rule 604(a)(1)
11Ac1-4(b)(2)	Requires OTC market makers to display customer limit orders	Rule 604(a)(2)
11Ac1-4(c)(1)	Provides exception to display require-	Rule 604(b)(1)

1-2C Federal Securities Exchange Act of 1934

	ment for limit orders executed upon receipt of order	
11Ac1-4(c)(2)	Provides exception to display requirement where customer expressly requests that order not be displayed	Rule 604(b)(2)
11Ac1-4(c)(3)	Provides exception to display requirement for odd-lot orders	Rule 604(b)(3)
11Ac1-4(c)(4)	Provides exception to display requirement for block orders, unless customer requests display	Rule 604(b)(4)
11Ac1-4(c)(5)	Provides exception to display requirement for limit orders immediately delivered to exchange or association-sponsored system or to ECN	Rule 604(b)(5)
11Ac1-4(c)(6)	Provides exception to display requirement for limit orders delivered to another broker-dealer	Rule 604(b)(6)
11Ac1-4(c)(7)	Provides exception to display requirement for "all or none" orders	Rule 604(b)(6)
11Ac1-4(d)	Provides for Commission's granting of exemptions	Rule 604(c)
11Ac1-5	Disclosure of Order Execution Information	Definitions moved to Rule 600; most provisions moved to Rule 605
11Ac1-5(a)(1)	Cross-reference to definition of "alternative trading system" in Regulation ATS Rule 300(c)	Rule 600(b)(2)
11Ac1-5(a)(2)	Definition of "average effective spread"	Rule 600(b)(5)
11Ac1-5(a)(3)	Definition of "average realized spread"	Rule 600(b)(6)
11Ac1-5(a)(4)	Definition of "categorized by order size"	Rule 600(b)(10)
11Ac1-5(a)(5)	Definition of "categorized by order type"	Rule 600(b)(11)
11Ac1-5(a)(6)	Definition of "categorized by security"	Rule 600(b)(12)
11Ac1-5(a)(7)	Definition of "consolidated best bid and offer"	Eliminated in favor of definitions of "national best bid" and "national best offer" contained in Rule 600(b)(42)
11Ac1-5(a)(8)	Definition of "covered order"	Rule 600(b)(15)
11Ac1-5(a)(9)	Definition of "exchange market maker"	Rule 600(b)(24)
11Ac1-5(a)(10)	Definition of "executed at the quote"	Rule 600(b)(26)
11Ac1-5(a)(11)	Definition of "executed outside the quote"	Rule 600(b)(27)
11Ac1-5(a)(12)	Definition of "executed with price improvement"	Rule 600(b)(28)
11Ac1-5(a)(13)	Definitions of "inside-the-quote limit or-	Rule 600(b)(29)

1-2C Federal Securities Exchange Act of 1934

	der," "at-the-quote limit order" and "near-the-quote limit order"	
11Ac1-5(a)(14)	Definition of "market center"	Rule 600(b)(38)
11Ac1-5(a)(15)	Definition of "marketable limit order"	Rule 600(b)(39)
11Ac1-5(a)(16)	Cross reference to definition of "effective national market system plan" in Rule 11Aa3- 2(a)(2)	Removed
11Ac1-5(a)(17)	Cross reference to definition of "national market system security" in Rule 11Aa2-1	Removed
11Ac1-5(a)(18)	Definition of "OTC market maker"	Rule 600(b)(52)
11Ac1-5(a)(19)	Definition of "regular trading hours"	Rule 600(b)(64)
11Ac1-5(a)(20)	Definition of "time of order execution"	Rule 600(b)(74)
11Ac1-5(a)(21)	Definition of "time of order receipt"	Rule 600(b)(75)
11Ac1-6(a)(9)	Definition of "profit-sharing relationship"	Rule 600(b)(56)
11Ac1-6(a)(10)	Cross reference to definition of "time of the transaction" in Rule 10b-10(d)(3)	Rule 600(b)(76)
11Ac1-6(b)(1)	Requires broker-dealers to make quarterly report on routing of non-directed orders available, specifies content of report	Rule 606(a)(1)
11Ac1-6(b)(2)	Requires routing reports to be available within one month of end of month	Rule 606(a)(2)
11Ac1-6(c)(1)	Requires broker-dealer, on request of customer, to disclose venue to which orders routed in prior six months, whether orders directed or non-directed and times of transactions	Rule 606(b)(1)
11Ac1-6(c)(2)	Requires broker-dealer to notify customers at least annually that information on routing of orders available	Rule 606(b)(2)
11Ac1-6(d)	Provides for Commission's granting of exemptions	Rule 606(c)

CHAPTER 2A Registration and Regulation of Transfer Agents and Clearing Agencies *

1-2A Federal Securities Exchange Act of 1934 § 2A.01

§ 2A.01 The National System For Clearance and Settlement

[1] Historical Overview

While trading procedures utilized in the secondary securities exchanges n1 have remained essentially unchanged since execution of the Buttonwood Tree Agreement in 1792, n2 the clearance and settlement process has undergone significant evolution. For more than 100 years, the securities industry has struggled to improve the efficiency of this labor and paper intensive process n3 to assure timely delivery of funds and securities.

As early as 1868, members of the New York Stock Exchange ("NYSE") formed a voluntary, informal clearing system, but lack of participation soon killed this project. n4 Similar attempts in 1877, 1879, and 1880 also were abandoned. n5

About 1892, active NYSE members experienced a financial crisis that threatened the continuation of their business and, ultimately, resulted in a major enhancement to the clearing and settlement process. At that time, the NYSE rules required cash payment of the purchase price in every transaction. Accordingly, brokers were dependent upon banks to extend temporary credit through certification of settlement checks. n6 In 1892, after several years of concern, n7 the president of the Bank of the State of New York threatened to suspend further certification of brokers' settlement checks unless the clearing process could be expedited. n8

In response to this pressure, the NYSE formed in 1892 the Stock Clearing House ("SCH"), an informal organization administered by a committee of the NYSE. n9 Although initially limited to four railroad stocks, participation in the SCH by NYSE members soon became compulsory. n10 On its first day of operation, the SCH obviated the need for \$7,000,000 in certified checks. n11 With such obvious success, the SCH was soon expanded and enabled many NYSE brokers to weather the subsequent market panics of 1893 and 1901. n12

The SCH continued to operate on an informal basis until the volume of transactions justified a more formal structure. The SCH was incorporated in 1920 by the NYSE as a wholly owned subsidiary, the Stock Clearing Corporation ("SCC"), with initial capitalization of \$500,000. n13

In 1913, the securities industry focused its attention on the recently formed Vienna Stock Exchange ("VSE") and the central securities depository maintained on behalf of VSE members. The NYSE reviewed the VSE clearing procedures and received a very strong endorsement of that system from the NYSE members who had toured the VSE. n14

Implementation, however, of clearing procedures by the NYSE was aborted with the commencement of World War I. n15

Since the enactment of the Securities Exchange Act of 1934, the Commission has focused from time-to-time on the clearance and settlement procedures.

In 1938, for example, the Commission addressed the issue of the need for a central securities depository system. n16 Primarily concerned with the protection of customer assets, the Commission concluded that:

[I]t is our view that the ideally effective measure for dealing with customers' free credit balances and customers' fully paid or excess collateral securities would be the establishment of trust institutions in various financial centers. * * * Such an institution would assume all banking and custodial functions now performed by brokers as an incident to their brokerage business whether conducted on a cash or on a margin basis. * * * Institutions of this character would have the advantage of placing centralized banking activities under appropriate supervision, reducing to a minimum financial risk to customers, and lessening the overhead expenses of individual brokers. Their use would also serve to remove customers' cash and securities from the risks of insolvency involved in the combination of the dealer with the brokerage function. n17

The NYSE rejected the SEC's proposal in 1939 finding the idea of a central trust too costly and difficult to implement, until trading volume increased. n18 The issue was reconsidered by the NYSE in 1955, and two years later the NYSE initiated a pilot project for central handling of securities, the Central Stock Bookkeeping Service ("CSBS"). The CSBS permitted participating member firms to exchange multiple stock certificates for one large certificate held in the name of a nominee and, thereby, expedite clearance and settlement. n19

After five years of experimentation, the NYSE in 1962 launched a program to obtain legislation in each of the 50 states to permit the transfer of title to securities by bookkeeping entry. n20

While the Commission historically has devoted little of its resources to the clearance and settlement system, during the period 1961 through 1963, the Commission, as part of a Congressionally mandated study of the securities markets, n21 scrutinized, among other things, the "manner, method, and place of making settlements, payments and deliveries, and of closing accounts. n22

The study suggested system deficiencies, which indicated that the then existing system for clearance and settlement "would prove inadequate to meet any substantial increase in [trading] volume," n23 and concluded that "late or nondelivery of securities by broker-dealers" could:

- lead to "a loss of confidence in the industry among public investors;"
- result in adverse financial stability among broker-dealers; and
- render it difficult for investors to sell when they so desire.

To remedy these potential adverse consequences, the Study recommended that:

The industry, with the cooperation of the Commission, should give continuing attention to possibilities for modernizing and improving existing securities handling, clearing and delivery systems, with the goal of evolving institutions and procedures which would permit the reduction of physical transfers of securities and centralization of functions now performed by broker-dealer back offices insofar as possible. n24

The securities industry responded favorably to the Study's recommendations. In 1964, for example, the NYSE announced plans for a Central Certificate Service ("CCS"), an electronic bookkeeping system designed to reduce by as much as 75% the physical delivery and processing of stock certificates among SCC members. n25

[2] The Paperwork Crisis of 1968 and the Regulatory Environment Prior to the Securities Acts Amendments of 1975

Before the securities industry could implement the Study's recommendations and complete its modernization program, a crisis occurred. In 1967, trading on the NYSE surged to 2.53 billion shares--an increase from 1966 of at least 33 1/3% percent. n26 The industry was not prepared for this volume. According to the Commission, "the aftermath was virtual chaos experienced by a substantial number of firms." n27 The Commission described back offices of many broker-dealers to be "a trackless forest." n28 It was "utterly impossible to keep books and records apace with the mounting speed and volume of transactions." n29 In short order, the books and records of many broker-dealers became "veritable shambles ... all elements in the processing of transactions collapsed ... " n30

To deal with this crisis, trading hours were reduced to give back office personnel more time to process back logs. n31 The Commission issued special bulletins demanding that broker-dealers comply with applicable rules regarding maintenance of current books and records and prompt clearance of securities and funds. n32 The Commission also proposed, but did not adopt, a rule that would make it unlawful for an issuer of publicly traded securities "to fail to provide appropriate facilities for the prompt transfer of securities." n33

To meet the operational demands caused by the surge in trading volume, many firms incurred significant increases in operating expenses and, accordingly, experienced serious financial problems. n34 These financial pressures placed investor funds and securities at risk and, ultimately, resulted in the enactment of the Securities Investor Protection Act of 1970. n35

Moreover, legislation was introduced in the Senate to establish a National Securities Corporation ("NSC") to be owned and operated by the United States. n36 The NSC would constitute the key element in a Congressionally mandated national depository system.

The House also conducted an independent study of Commission records on the operational and financial problems experienced by broker-dealers. n37 The study concluded that the securities industry was not prepared to handle the increased trading volume of the late 1960s and that "serious, complex and far reaching problems embrace all sectors of the securities industry." n38 The study urged, among other things, an "extensive study" of the industry by the Commission.

This recommendation led to the Commission's preparation of a special report to Congress on the unsafe and unsound practices of brokers and dealers. n39 Citing a long list of problem areas, n40 the Commission concluded that the:

[c]learance, settlement, depository and transfer functions form part of a continuous process. To ensure the prompt development of a national system, the Commission's present authority over clearance, settlement and record keeping should be extended to the depository and transfer functions ... n41

Specifically, the Commission requested the enactment of new legislation that would impose federal regulations over "the transaction handling process, particularly with a view to standardization, automation, and increased protection for industry participants and members of the investing public." n42

The Senate Committee on Banking, Housing and Urban Affairs prepared a separate study of the operational problems facing the securities industry. n43 This study recommended legislation "to require all organizations engaged in the

clearing and settlement of securities transactions to register with the SEC" and to give the Commission "clear and complete power and responsibility" to create "an integrated national system" for clearance and settlement. n44 Legislation was then introduced and extensive hearings held on the issue of direct federal regulation of the clearing and settlement process. Legislation was finally enacted in 1975. n45

While Congress and the SEC were evaluating the need for and structure of legislation, the securities industry voluntarily initiated several remedial programs. The drive for systemic improvements was spearheaded by a special committee denominated as the Banking and Securities Industry Committee ("BASIC") composed of the presidents of the NYSE, Amex and NASD, the chairmen of three major New York Clearing House banks and, executive director, a retired senior partner of Price Waterhouse & Co. n46 BASIC had analogous counterparts in various segments of the securities industry. n47

In 1971, BASIC announced that a "Memorandum of Understanding" had been executed, calling for the formation of a Comprehensive New York Securities Depository System (CNYSDS) by the NYSE, Amex, NASD, and the eleven members of the New York Clearing House Association. According to the participants, the CNYSDS would have the following major advantages:

- feasibility of relatively rapid start-up of operations, despite the likelihood of some delays in the passage of enabling legislation;
- maximum flexibility in interrelating with broker/dealer clearing systems and the constraints on fiduciaries;
- minimum cross-assumption of risks among depositor groups;
- maximum protection of certificates;
- maximum building upon--and minimum interruption of--the Central Certificate Service; and
- immobilization of the stock certificate to a degree that would enhance the feasibility of a final step of legislation to eliminate the stock certificate should that prove desirable. n48

Citing these advantages, the participants agreed to attempt to create a central depository to be linked to the various regional depositories. n49 To facilitate the operations of the Central Certificate Service ("CCS"), n50 Cede & Co., a wholly owned subsidiary of the NYSE, was formed to serve as the common nominee. n51 By mid-1972, banks and NYSE brokerage firms were utilizing the CCS for both NYSE, American Stock Exchange, and over-the-counter issues. The CCS was also utilized to expedite the delivery of cash dividends and voted about 75% of all eligible NYSE, Amex, and OTC shares by proxy or on instructions from clearing members. n52

In addition, the Stock Clearing Corporation ("SCC") n53 was authorized to permit out-of-state and foreign banks, investment companies and regional clearing corporations (as "Affiliate Members") to open an omnibus account at the CSS. Through such an account, the Affiliate Members could receive or deliver any eligible security to or from any participating regional exchange without the physical movement of securities. n54

Finally, the CCS adopted a delivery system to reduce the clerical effort and paperwork required to balance order deliveries, n55 experimented with the concept of a "locked-in-trade," n56 and computerized bond deliveries.

Notwithstanding these enhancements, the clearance and settlement system was not efficient. According to the Securities Industry Association ("SIA"), there were two causes for the industry's problems: the paper and labor intensive clearing process, particularly in the over-the-counter market; and "segmentation" of the securities processing industry. n57 The

answer, according to the SIA, "is the creation of an integrated, national clearance and settlement system. n58

[3] The Statutory Mandate of the Securities Acts Amendments of 1975

After more than three years of debate and analysis, Congress, in 1975, enacted sweeping amendments to the Securities Exchange Act of 1934. The ensuing legislation, n59 which amended the Exchange Act by adding a new Section 17A: was predicated upon a Congressional finding n60 that:

- "prompt and accurate" clearance and settlement of securities transactions "are necessary for the protection of investors;"
- inefficient clearance and settlement procedures "impose unnecessary costs" on investors;
- advances in data collection and dissemination create "the opportunity for more efficient, effective, and safe" settlement procedures; and
- the integration of all clearance and settlement facilities and the adoption of "uniform standards and procedures" will reduce unnecessary costs and enhance investor protection.

Section 17A, accordingly,

- directs the Commission to use its authority "to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of transactions in securities;" n61
- requires registration of clearing agencies and transfer agents; n62
- vests specific regulatory authority in the Commission with respect to all facets of the clearing and settlement process, particularly clearing agencies and transfer agents; n63
- allocates regulatory responsibility among the Commission and the various bank regulatory authorities; n64 and
- instructs the Commission to use its authority "to end the physical movement of securities certificates" in the clearance and settlement process. n65

Two basic themes underlie the legislative history of Section 17A, the prevention of another paperwork crisis and the establishment of a "safe, efficient and modern national clearing and settlement system." n66

The Senate Report on S.249, the Securities Acts Amendments of 1975, concludes, for example, that "the present uncoordinated state of affairs with respect to securities processing should not be allowed to continue" n67 and charges the Commission with responsibility for shaping a national system to remedy problem areas of excessive costs and poor service. n68 Similarly, the Conference Report observed that the goal of Section 17A is to assure "the development of a modern, nationwide system for the safe and efficient handling of securities transactions" under the guidance of the Commission. n69

[4] The Commission's Implementation of Section 17A

The Commission was well prepared to implement Section 17A. Since the back office crisis of the late 1960s, the Commission's staff had studied and evaluated virtually every aspect of the clearance and settlement process. n70 The Commission had also sponsored at least one lengthy industry conference on the handling of securities certificates in an

attempt to spur industry reform prior to the enactment of legislation. n71

The Commission's efforts toward implementation of Section 17A were directed to three areas: the adoption of registration criteria and standards of performance for transfer agents, n72 the registration of clearing agencies, n73 and the formation of a national system for clearance and settlement.

As a practical matter, each of these three areas is interrelated and, therefore, the regulatory initiatives implemented in one area have had a direct impact on other initiatives under Section 17A. Moreover, since 1975, the securities industry has experienced significant changes in its operational capacity due, primarily, to the advent of electronic communication systems. n74 Therefore, no aspect of the Commission's initiatives under Section 17A should be viewed in a vacuum.

As to the information of a national system of clearance and settlement, the Commission was reluctant to force the securities industry to adopt any particular system and preferred to offer general comments and observations while reacting to industry sponsored initiatives. n75 Therefore, initial progress towards this Congressionally mandated system was slow.

The Commission's initial direct effort toward the Congressional goal of a national system of clearance and settlement commenced in late 1975 when the Commission formally adopted registration requirements for transfer agents n76 and clearing agencies. n77

Shortly thereafter, the Commission was requested to approve the merger of the three largest clearing agencies n78 into a single entity -- the National Securities Clearing Corporation ("NSCC") -- and to grant to the NSCC final registration as a clearing agency pursuant to Section 17A(b) of the Securities Exchange Act. n79 Because the application raised "important and novel legal and policy issues" relating to the evolution of a national system for clearance and settlement and because the merger would likely have "a determinative impact on the development" of that system, the Commission instituted a public proceeding pursuant to Section 17A. n80 A second public proceeding was commenced with respect to the registration application of thirteen additional clearing agencies. n81

The Commission, in the context of the NSCC hearing, announced n82 that the national system of clearance and settlement should possess the following "minimum acceptable" characteristics:

- The ability to process securities transactions by means suitable to the character of the issues processed, including book entry. n83
- All broker-dealers and financial institutions n84 should have access, directly or indirectly, to the system. n85
- Each participant in the system should have the ability to compare, account for and settle through one entity all trades in securities included in the system, regardless of the location of the other party to the trade or the market in which the trade is executed. n86
- Each participant should be able to deposit and maintain its securities in a custodial account at the depository level that permits book entry movements between participants, settle participants' clearing obligations, effect pledges and perform other functions that may be effected by book entry. n87
- Each participant should be able to make a single daily money settlement for both clearing and depository functions, in funds valued the next day. n88
- The book entry process should permit same-day turnaround at both the clearing corporation and

depository levels. n89

During the pendency of the NSCC proceedings, the Commission received and approved n90 a proposal by the New York Stock Exchange to permit its members to utilize single denomination stock certificates ("SDSC"). n91 Because SDSCs are fed through a computer controlled high-speed reader-printer, transaction time and expense for transfer agents have been reduced significantly. n92 Moreover, the SDSC was a major step toward the immobilization of the stock certificates, a Congressionally mandated Commission objective. n93

In December 1976, the Commission released its report to Congress on the practice of recording the ownership of securities in other than the name of the beneficial owner, i.e., "street" or "nominee" record ownership. n94

The Commission concluded that the continued use of street and nominee name registration is "essential" to the development of a national system of clearance and settlement because such registration reduces significantly the volume of paperwork and greatly expedites the use of book entry transfers. n95 The Commission nevertheless recommended various steps to improve the performance of the then clearing and settlement system, including the development of better communication between issuers and beneficial owners who are represented by broker-dealers. n96

Subsequently, the Commission approved the application of the NSCC for registration as a clearing agency. n97 In its order, the Commission found that the registration of the NSCC "is an essential step toward the establishment, at an early date, of a comprehensive network of linked clearance and settlement systems and branch facilities with the national scope, efficiencies and safeguards envisioned by Congress in enacting the 1975 Amendments." n98

As to the characteristics of the evolving national clearance system, the Commission reiterated in its NCSS order the six minimum operational standards announced in mid-1976 n99 but acknowledged that the Commission's views would be influenced by "the dynamic growth process of the nation's securities markets" and "the concomitant need for a ... system with the capacity to service, and the flexibility to adapt to changes in, the nation's capital-raising mechanisms." n100 Finding that registration of NSCC was justified, the Commission granted registration; however, the Commission's order was immediately challenged and litigation quickly developed. n101

During the pendency of this litigation, the Commission adopted its initial set of performance standards for transfer agents. n102 These rules were designed to contribute to the establishment of a national system of clearance and settlement by establishing minimum performance criteria for all transfer agents and mandatory interfaces among transfer agents and between transfer agents and broker-dealers.

Notwithstanding the progress that had been made in the development of a national clearance system, some members of Congress were disappointed with the Commission's leadership. Following six days of hearings and analysis of extensive written submissions, n103 a report was issued that was very critical of the Commission. n104 In summary, the Commission was criticized for approving the merger of the three largest clearing agencies that created the NSCC n105 and, in the view of certain members, for failing to assert aggressively its leadership position within the securities industry. n106 Congressman John E. Moss, Chairman of the House Subcommittee on Oversight and Investigations, was particularly vitriolic in his criticism of the Commission. n107

Although certain members of Congress were critical of the NSCC merger, the judiciary was not. In the fall of 1978, the United States Court of Appeals for the District of Columbia Circuit affirmed the Commission's order granting registration to the NSCC but directed the Commission to reinstitute its review proceeding to reconsider certain aspects of the NSCC's pricing structure and its facilities management agreement. n108 Shortly thereafter, the Commission completed its review of the transaction completion rules of the securities exchanges and the National Association of Securities Dealers, Inc. As a result of this review, more than 100 exchange and NASD rules were amended or deleted. n109

The Commission also held extensive hearings on the national clearance and settlement system and authorized expanded interfaces among securities depositories, which further immobilized securities certificates and facilitated the use of a single depository to settle trades regardless of the location of the parties or the market site at which the trade occurred. n110

To foster participation by registered investment companies in the national system of clearance and settlement, the Commission adopted Rule 17f-4, n111 which designates the Federal Reserve/Treasury book-entry system for United States and federal agency securities as a permitted depository for securities owned by registered investment companies. n112

In 1979, the Commission issued a statement on the status of the national market system n113 and the national system for clearance and settlement of securities transactions. n114 The Commission, citing the six standards that, in its view, the clearance and settlement system should meet, n115 *further stated that "perhaps the most important of those characteristics" is "one account processing" that permits participants "to compare, clear and settle, through single accounts with a clearing agency and with a depository," all trades of securities included in the system regardless of the location of the trade or the other party to the trade.* n116

Consistent with its primary objective, the Commission announced its intention to direct its attention to three other areas:

- the establishment of regional clearing centers to permit broker-dealers to clear trades without regard to their physical location or that of the clearing agency; n117
- the interface fees charged by clearing agencies; n118 and
- the expansion of processing activities by clearing agencies. n119

By late 1979, the securities industry had made significant progress in interfacing its regional securities depositories, aided by the Commission's approval of an interface between the two principal depositories -- the Depository Trust Company ("DTC") and the Philadelphia Depository Trust Company ("PDTC"). n120 This interface eliminated the need for actual withdrawal and physical movement of securities to settle transactions among DTC and PDTC participants. Similar interfacing developed between other depositories.

The next major step occurred with the Commission's approval of various rule changes by the NSCC and Bradford Securities Processing Services, Inc. that expanded the scope of processing activities by creating processing procedures for municipal securities. n121

Similar expansion efforts developed in the over-the-counter ("OTC") market with the adoption of a uniform comparison system by three regional stock clearing corporations compatible with the system utilized by the NSCC. n122 In a further effort to compel market makers in the OTC market to participate in an efficient, low cost clearing system, the NASD in 1982 adopted a rule requiring its market makers to clear and settle through a registered clearing agency situated within 25 miles of the market maker, if such a clearing agency exists. n123

Finally, with respect to institutional trades, the Commission in 1982 approved various rule changes of the Midwest Securities Trust Company, the PDTC, and the DTC to establish a nationwide delivery system. n124 The Commission also adopted in that year minimum performance standards for transfer agents. n125

By 1983, the rudiments of a national system of clearance and settlement were in place. Securities transactions were processed largely by book entries, except when unusual circumstances required specific delivery. Brokers, dealers, and financial institutions had access to all facets of the system. One account processing was generally available and securities certificates had been greatly immobilized. Uniform performance standards had been adopted for transfer

agents that resulted in prompt turnaround.

[5] Current Development

The securities industry continues to explore new procedures for minimizing cost and expediting the settlement process. The Commission is frequently asked to approve various rules and operational changes. The Commission also monitors the clearance and settlement process and initiates regulatory proposals whenever it feels remedial action is necessary for the protection of investors.

The Commission monitors the activities of transfer agents and clearing agencies and confers frequently with the self-regulatory organizations and other elements of the securities industry to identify potential problem areas.

(n3)Footnote 3. For discussion of the clearing and settlement process, see Loss & Seligman, Securities Regulation 2908-2912 (Little Brown).

(n4)Footnote 4. The early attempts to improve the clearing and settlement process are discussed in a submission by the NYSE to a Congressional Committee analyzing that issue. *See Clearance and Settlement of Securities Transactions: Hearings on S.3412, S.3297 and S.3662 Before the Subcomm. on Securities of the Senate Comm. of Banking, Housing, and Urban Affairs*, 92d Cong., 2d Sess. 189-248 (1972) [hereinafter *Clearance and Settlement Hearings*].

(n5)Footnote 5. *Clearance and Settlement Hearings*, n.4 *supra*, at 244.

(n6)Footnote 6.

When a firm delivered 100 shares of a stock, it expected payment at the time of delivery by messenger. In many cases, the buying firm had insufficient funds to meet all such payments. Of course, once the buying firm secured title to the stock, it could pledge the stock at the bank for enough money to meet the entire amount due, but it could not pledge the stock until it secured title, and it could not secure title until it paid for the stock.

This seeming impasse was broken by two expedients, neither of which pleased the bankers of that day. First, the purchasing broker could secure temporary funds by over certification of his check. In this process, the bank certified the check for more than the broker's balance. The check became, in effect, an unsecured loan, which neither the bank nor the government looked upon with approval. Another method was for the bank to give the broker a 'morning loan.' This was a loan for a few hours, which was to be secured as soon as the broker received possession of the collateral. In both cases, the banks were extending vast amounts of credit to brokers, often without sufficient credit standing.

Clearance and Settlement Hearings, n.4 *supra*, at 217-18. This certification process is also discussed in detail in S. Pratt, *The Work of Wall Street 164-66* (1975) [hereinafter "Pratt"]. *See also* R. Sobel, *The Curbstone Brokers: The Origins of The American Stock Exchange* (1970).

(n7)Footnote 7. The Bank's concern was exacerbated by the formation of a functional stock-clearing system in Frankfurt in 1867 and the swift adoption of the system in Berlin, Hamburg, Vienna and London, and by the Boston and

Philadelphia Stock Exchanges; however, the NYSE refused to adopt a similar system. Pratt, n.6 *supra*, at 164-65.

(n8)Footnote 8. Pratt n.6 *supra*, at 165.

(n9)Footnote 9. *See Clearance and Settlement Hearings*, n.4 *supra*, at 216-18, 244; *see also* Pratt, n.6 *supra*, at 164-65.

The Report of the NYSE Special Committee that recommended incorporation of the Stock Clearing House emphasized the need for prompt NYSE action.

If this Exchange is to take the proper place in the future among the stock-markets of the world, a system of doing business will be required which will stand the strain of a volume of business larger than any heretofore known. Our present system of actual payment of entire value in every transaction blocks up in active times both banks and offices to an intolerable extent, and is an obstacle to the growth of the business commensurate with the growth of the country. For causes well understood, the banking facilities for this business have not increased during recent years. A proper system of clearing by largely reducing the volume of checks and deliveries would relieve both offices and banks of much of the confusion and risk with which we are so familiar.

Pratt, n.6 *supra*, at 165-66.

(n10)Footnote 10. *Clearance and Settlement Hearings*, n.4 *supra*, at 218.

(n11)Footnote 11. *Id.*

(n12)Footnote 12. Pratt, n.6 *supra*, at 166-68.

(n13)Footnote 13. *Clearance and Settlement Hearings*, n.4 *supra*, at 218.

(n14)Footnote 14. The report to the NYSE Governing Committee described the VSE clearance procedure and concluded:

[T]he institution has also an arrangement for the clearing of stocks, issued from one party to another, by cheque. All the firms who are members have a deposit of transfers or stock with the institution just in the same way as they have a deposit of cash, and these are issued from one firm to another in the same way as with cash. The Account holder who has stocks to deliver hands over to the institution, instead of actual stocks, his check on the Giro Stock Department, where his particular stocks are being kept. In the same way, the man who is to receive these particular stocks, has also a deposit of securities with the institution, and so, he does not collect the said securities, but the same are placed with his particular deposit. Then, the account of the man who delivered the stocks is credited with the amount of the same in cash, and the receiver's account is likewise debited with a similar amount, without the necessity of any change in the amount of securities taking place in the deposits of the Giro-Cassen Verein. In this way the responsibility of the member is relieved, as he has not sent any cash or securities through the streets from one house to another. Nearly 38% of the business of buying and selling stocks, which takes place in Vienna, is done by the Giro Stock Deposit System, exceptions being made, of course, through new members joining, and not having sufficient securities or anything similar.

The proof ... of the benefits of this system is that there are over one billion kroner worth of securities always on deposit. The proof of this system against fraud is so evident that we need not mention anything on the subject.

Clearance and Settlement Hearings, n.4 *supra*, at 225-26.

(n15)Footnote 15. *Id.* at 226. *See also* Pratt, n.6 *supra*, at 164-68.

(n16)Footnote 16. As discussed in the Commission's Special Study of the Securities Market:

Two types of central securities depository systems have been suggested. In one, securities would be physically held in one place together with the associated records. In the other, the central depository would serve as a conduit through which the securities would flow to the appropriate transfer agents, who would hold them and make bookkeeping entries as to changes in ownership, delivering out such securities as were needed by firms or customers. Each system contemplates cross-pledging of securities by bookkeeping entry, upon order by member firms, so that no physical transfer of securities would be required for that purpose. Transfers between firms likewise would not require physical delivery.

SEC, Report of the Special Study of the Securities Markets, H.R. Doc. No. 95, Pt. 1, 88th Cong., 1st Sess. at 425 (1963) [hereinafter "SEC Special Study"].

(n17)Footnote 17. SEC, Report on Investigation, In the Matter of Richard Whitney, (1938).

(n18)Footnote 18. The NYSE engaged the accounting firm of Haskins & Sells ("H&S") to evaluate the feasibility of a central depository. H&S concluded that such a depository would be impractical if average daily NYSE trading volume was less than 2 million shares. *Clearance Settlement Hearings*, n.4 *supra*, at 245.

The [NYSE] board in its report on August 31, 1939, rejected the idea of a central trust institution on the grounds that it would involve reorganization of the industry at a time when it was operating unprofitably; there would be a duplication of existing recordkeeping machinery; it would interfere with the confidential broker-dealer relationship; there was doubt that banks would lend on securities without physical transfer; and it was feared that concentration of securities in one institution would create various problems in regard to handling of proxies, removal of competition among brokerage firms in servicing customer accounts, danger to the market of concentrated selling from a single source, congestion at periods of maximum activity, and handling of margin accounts mechanically with no consideration of the credit worthiness of the borrower.

The board also rejected the idea that banking functions of brokerage houses be handled by banks on the grounds that handling margin accounts is a specialized business which can be more efficiently handled by the brokerage firms themselves and that separating custodial and margin-keeping functions would offer difficulties which would outweigh any other advantages.

SEC Special Study, n.16 *supra*, at 425-26.

(n19)Footnote 19. *Clearing and Settlement Hearings*, n.4 *supra*, at 245. In his Annual Report to the NYSE Membership, the president of the NYSE observed:

An experiment which may prove as important to our industry as the establishment of the clearing function has been worked out by a Special Committee [of the Board of Governors]. Fifteen firms, twenty listed companies, and one transfer agent ... and a newly created division of Stock Clearing Corporation, the Central Stock Bookkeeping Service, are cooperating in this one-year pilot program for the centralized handling of securities. The plan holds great promise for future savings.

Under this experiment, the securities placed in the plan by member firms are held in the name of the bank nominee in large denomination certificates, subject to instructions transmitted by the Clearing Corporation. Interfirm securities movements are reflected by bookkeeping entries in the Clearing Corporation rather than by physical movement of certificates thus avoiding much of the work involved in handling, accounting, assignment and delivery of share certificates. The plan also provides for the elimination of due bills for inter-pilot firm deliveries, more effective control of dividend payments, and for channelling corporate communications to the beneficial owner of the stock held in nominee name.

(n36)Footnote 36. Senator Roth, one of the sponsors of this bill (S.2551), summarized the NSC as follows:

In order to focus the industry's efforts at solving what has become a national problem; namely, the need for safer, cheaper, and more efficient means of transferring ownership in American business enterprise, I am proposing the establishment of a national program to bring into operation a nationwide system for transferring securities ownership.

This program will operate in two stages: First, it will establish a COMSAT-type, privately owned and funded, National Securities Corp. This Corporation will, as soon as practicable, commence operation as a nationwide depository system. It will act as a comprehensive settlement system, maintaining physical custody of corporate stocks and bonds placed on deposit by the Nation's financial institutions in decentralized regional depositories. Transfer of ownership of certificates will be made by bookkeeping entry, much as the Federal Reserve System accomplished for deposits of member banks.

Cong. Rec. S. 32473 (daily ed. Sept. 20, 1971) (remarks of Sen Roth concerning S. 2551).

(n39)Footnote 39. Study of Unsafe and Unsound Practices, n.26 *supra*.

(n40)Footnote 40. The Commission identified 14 "practices" that, in the Commission's view, "permitted things to get out of control." *Id.* at 2. At least four of these focused upon the clearance and settlement system:

- (1) securities were not checked and counted frequently enough nor were they controlled tightly enough;
- (2) to respond to the paperwork crisis, new and expensive technologies were "hastily" adopted by brokerage firms "without adequate preparation, analysis of cost or mastery of technical requirements;"
- (3) "Fails" remained outstanding, causing additional delivery problems and "resulting in shock waves of loss throughout the brokerage community," and
- (4) delivery, clearance and transfer facilities became "hopelessly clogged as they proved unequal to the increased volume."

Id. at 2-3.

(n41)Footnote 41. *Id.* at 1.

(n42)Footnote 42. *Id.* at 6. The Commission also commented that:

Regulation of the process as a whole is clearly desirable, and the Commission is in the best position to furnish such regulation in that it now has jurisdiction over the broker-dealer community, investment companies, stock exchanges, securities associations, issuer companies (in certain respects), and subsidiaries of exchanges and securities association which now perform clearance, settlement and depository tasks. However, certain tasks, such as the transfer and registration of transfer of certificates, are not directly within the Commission's regulatory jurisdiction and even the depository function would

appear to be subject to direct regulation by the Commission only if performed by entities which are registered with it. Therefore, in order to ensure that the transaction handling process can be made to function efficiently as a whole, the Commission recommends that it be given authority over the qualifications, performance, business practices and rules of entities performing transfer and depository functions, but only to the extent that their performance of these specific functions is involved. The Commission, in seeking this authority, is not desirous of expanding its jurisdiction to conflict with that of Federal or state bank-regulatory agencies. Economic regulatory authority is not being sought. Rather, the Commission is merely desirous of having all necessary authority to oversee the development of a unified securities processing system and the establishment of the performance standards and access practices necessary for the development and proper functioning of such a system.

(n48)Footnote 48. *Id.* at 240.

(n49)Footnote 49. In summary, the Memorandum of Understanding called for the "two stage evolution" of the present CCS into an expanded depository system. In the first stage, CCS would become "a direct, wholly owned subsidiary of the New York Stock Exchange, Inc.," instead of a division of Stock Clearing Corporation. A corporation that might be used for this purpose was created on March 31, 1972. The Amex, NASD, Clearing House Banks, and other users would be represented on the board of directors of that subsidiary, which was chartered as a trust company under New York State banking law. In the second stage of the expansion, "ownership of the depository will be shared by its users." The agreement contemplated that the New York Stock Exchange would be appropriately compensated for unrecovered start-up costs of the original Central Certificate Service and its successor, Central Certificate Service, Inc.

Clearance and Settlement Hearings, n.4 *supra*, at 242.

(n50)Footnote 50. *See* text at n.25 *supra*.

(n51)Footnote 51. *Clearance and Settlement Hearings*, n.4 *supra*, at 228.

Though the technical aspects of the Central Certificate Service are complex, the basic operations are quite simple. Brokerage firms maintain shares of eligible securities on deposit in their CCS accounts. These accounts are credited with the number of shares deposited, and stock certificates representing these shares are registered in the name of a common nominee, Cede & Co. CCS does not acquire any beneficial interest in these shares.

To make delivery, the selling brokerage firm instructs CCS to debit its account by, say, 500 shares of XYZ Corporation and credit the buying broker's CCS account with the same number of XYZ shares.

Title to the shares is thus transferred by a computerized bookkeeping entry while the certificates themselves remain immobilized. At the same time, in Stock Clearing Corporation, the offsetting changes in the buying and selling members' daily cash balances are also made by electronic bookkeeping entry.

Under the old system, a firm executing a sale for one of its customers would have to get the certificate; make certain that it was signed, checked, stamped, counted, then put in an envelope and make physical delivery through the Stock Clearing Corporation. Similarly, the buying brokerage firm would have to receive the certificate physically, examine it, log it in, check it, stamp it, etc.--a reciprocal sequence of many time-consuming manual steps. With CCS, it is estimated that about 75% of brokers' certificate-handling can be eliminated.

Id. at 228-29.

(n52)Footnote 52. *Id.* at 230.

(n53)Footnote 53. *See* text at n.13.

(n54)Footnote 54. *Clearance and Settlement Hearings*, n.4 *supra*, at 236.

(n55)Footnote 55. The new program, referred to as the "PDQ System," would be "aimed at cutting paperwork and clerical effort associated with balance-order deliveries." The System would also eliminate the tedious necessity for Clearing Members to notify CCS of each specific delivery to be made by computerized bookkeeping entry. Instead, a Clearing Member would preauthorize CCS to make deliveries automatically--with the exception of those deliveries which, according to the NYSE, "cannot be made because of segregation or certain other considerations--in the absence of specific instructions to the contrary." By eliminating much of the clerical activity formerly involved in initiating computerized delivery through CCS, the new system significantly expedited the delivery process. At the same time, PDQ made it possible to do away with a considerable amount of ancillary paperwork in connection with the basic CCS elimination of certificate movement.

Id. at 237.

(n56)Footnote 56.

Essentially, the locked-in-trade concept envisions a series of automatic operations, triggered by the transmission of an order to the trading floor, and following through all the steps subsequent to the execution of the order--including reporting and confirmation of trade data, clearance and settlement of the transaction, delivery (whether by computerized bookkeeping entry or physical delivery of a certificate to a customer at his request) --to complete the transaction.

In a fully developed system, after a trade is executed in the auction market, the computer would report the trade on the ticker tape and would notify the brokerage firms involved that their customers' orders to buy or sell had been executed. The names of both the buyer and seller would be recaptured automatically to provide information for the stock clearing and settlement process after execution. Ultimately, it should be possible to innovate to the point where the clearance function could be eliminated, with the trade information going directly to settlement in the depository.

Id. at p. 238.

(n57)Footnote 57. *Id.* at 145 (statement of Robert M. Gardiner on behalf of the Securities Industry Association). According to the SIA:

Segmentation of the industry refers to the fact that the clearance and settlement of every securities

transaction demands prompt and coordinated action by a number of different organizations each functioning within the processing network. These various participants include brokerage firms, banks, transfer agents, depositories, the exchanges, public corporations, institutional investors, and banknote printers. * * * We believe that segmentation has proved to be the most difficult problem to resolve, but that its resolution is absolutely essential if the paperwork question is to be laid to rest.

Although the members of that community allegedly have a common interest in making this system work for the benefit of the investor, the separate units also have individual self interests that can work against the overall desired result. The conflicts thus generated can work to increase rather than reduce 'fails, lead to excessive transfer time, place dividends in limbo, lead to incompleting trades and the rejection of partial deliveries. They also reflect the fact that the stock certificate is not merely a piece of paper. It represents a significant sum of money and that money is at interest, with one party paying the interest and the other party receiving it.

Id. at 146.

(n58)Footnote 58. *Id.* at 145.

(n59)Footnote 59. The Securities Acts Amendments of 1975, Pub. L.No. 94-29, 89 Stat. 97 (Act of June 4, 1975), discussed in § 1.01 [2][d] *supra*.

(n60)Footnote 60. Section 17A(a)(1).

(n61)Footnote 61. Section 17A(a)(2)(A) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F. The clearance and settlement system would complement the national market system, which Congress also mandated. See §§ 2.01[3] and 2.04 *supra* .

As the House Report observed:

Tied to the national market system will be a national clearance and settlement system to facilitate the paperwork attendant to transactions executed in the national market system. The national clearance and settlement system will eliminate the transcontinental shipment of money and securities and will allow stock brokers to perform the clearance and settlement function in their own region. This should insure that investors receive their money or evidences of ownership in a timely fashion, and should also produce significant cost savings to stock brokers, savings which the Committee expects to be passed on to the investor under the competitive commission rate system.

It should be made clear that the statutory charge to develop a unified system for the clearance and settlement of securities transactions does not carry with it the call--nor does it grant the authority--to eliminate competition among separate entities in the performance of these functions. Many of the innovations and improvements in clearance and settlement of the last several years have been the product of vigorous and healthy competition among different service entities. Often new market entrants have been responsible for the most significant advances. The Committee believes, therefore, that a national system, through (sic) fully integrated, must make full allowance for the continuance and future entry of separate service entities.

H.R. Rep. No. 123, 94th Cong., 1st Sess. 51 (1975), [hereinafter "H.R. 94-123"], reprinted in Part 2A *infra*.

(n62)Footnote 62. The registration requirement for clearing agencies is discussed in § 2A.03 *infra* and for transfer agents in § 2A.02 *infra* .

(n63)Footnote 63. See §§ 2A.02[2][a] and 2A.03[1] *infra* .

(n64)Footnote 64. See §§ 2A.02[2][a] and 2A.03[4] *infra* .

(n65)Footnote 65. Section 17A(e). According to the accompanying House Report,

Testimony received by your Committee's Subcommittee on Commerce and Finance in the conduct of its study of the securities industry made clear that the ultimate solution to the paperwork problem is the elimination of the stock certificate as a means of settling securities transactions. Indeed, the Subcommittee found widespread agreement in the securities industry that the certificate can and should be eliminated. Accordingly, this legislation directs the securities and Exchange Commission to initiate steps to bring about the elimination of the certificate as a means of settlement among brokers or dealers of transactions in securities. Your Committee wishes to emphasize that it is only recommending that the certificate be eliminated as a means of settlement. Individual shareholders will continue to be able to demand and receive certificates as proof of ownership of their shares. While it is possible that we will proceed ultimately to eliminate the stock certificates, that result is not specifically called for in this legislation.

(n70)Footnote 70. See, e.g., Study of Unsafe and Unsound Practices, n.26 *supra* ; Review of Demise of Selected Broker-Dealers, n.37 *supra*.

(n71)Footnote 71. The conference held in June 1971 discussed four approaches to handling stock certificates, problems relating to machine readable certificates, the concept of a certificateless system, and the immobilization of the stock certificate. See Sec. Exch. Act Rel. No. 34-9240, [1970-1971 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 78,145 (July 2, 1971).

(n72)Footnote 72. See § 2A.02 *infra*.

(n73)Footnote 73. See § 2A.03 *infra*.

(n74)Footnote 74. See, e.g., the discussion of the trading procedures of the National Association of Securities Dealers in § 2.01[2] *supra* .

(n75)Footnote 75. In 1976, for example, the securities depositories proposed the adoption of transfer agent custodian ("TAC") programs. The Commission quickly approved of these programs and reported to Congress that:

Generally in a TAC program the depository maintains a working supply of certificates of particular issue, while depositing the remaining certificates with the transfer agent to be held in its custody in the form of a balance certificate registered in the name of the depository. As the need for certificates in the depository changes, the depository adjusts its in-house inventory by increasing or decreasing the number of shares held in-house in nominee name, correspondingly decreasing or increasing the number of shares

held by the transfer agent. Appropriate shipments of securities between the depository and the transfer agent are made to effect these adjustments.

42 SEC Ann. Rep. 102, n.77 (1976). *See also* Sec. Exch. Act Rel. No. 34-12,579 (1979), in which the Commission discusses and approves the TAC Program of the Midwest Securities Trust Company.

The industry also began to improve and expand interfaces among clearing agencies and depositories, which further immobilized securities certificates. As the Commission reported to Congress:

As a result of such improvements, as well as the increased participation in depositories by brokers and dealers, banks and other institutions, the Commission believes that progress is being made toward the development of an efficient national system for the clearance and settlement of securities transactions. This progress can be measured by the fact that securities processing mechanisms efficiently handled record trading volume during the early months of calendar year 1976. The Commission expects that the continued development and refinement of clearing and depository services will attract more persons to become participants in these systems in order to realize the substantial benefits which accrue from such participation. Increased participation will in turn further reduce the dependency of the clearance and settlement mechanisms upon the physical movement of certificates.

(n82)Footnote 82. Sec. Exch. Act Rel. No. 34-12,954, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,785 (Nov. 3, 1976).

(n83)Footnote 83.

A National System should permit the settlement by book entry movement of all securities transactions in issues for which book entry treatment proves to be more economical than alternative forms of processing. A possible measure of the universe of issues for the book entry portion of the National System would be the number of issues which have been included in the book entry operations of existing securities depositories.

The National System should also be able to process, other than by book entry, issues (i) whose certificate float is insufficient, or whose transfer agent arrangements are not adequate, to permit inclusion in a book entry environment, or (ii) which are ineligible for inclusion in a book entry environment due to legal requirements of the jurisdiction in which the issuer is organized. Existing envelope delivery and similar settlement systems presumably could be adapted to provide the requisite non-book entry settlement capability for issues which fall into these categories.

Issues whose shareholders are concentrated in a small geographic area or which have a small number of shareholders might not require inclusion in the National System. Presumably such issues would continue to be cleared and settled outside the National System through the informal arrangements which exist today.

Id. at 87,046 (footnote omitted).

(n84)Footnote 84. The term "financial institution" is intended to include: banks; insurance companies; investment companies; clearing agencies; and any other entity (whether an organization or an individual) which "(i) satisfies financial responsibility criteria, (ii) makes the requisite clearing fund and participant fund contributions to the National System, and (iii) has the operational capability to interface and reconcile with the National System."

Id. at 87,046 n.22.

(n85)Footnote 85. According to the Commission:

All broker-dealers and financial institutions should have access to the National System. Because most transactions in active issues would be processed through the National System, any broker-dealer or financial institution excluded from participation would be at a significant competitive disadvantage.

Broad access could be achieved by the establishment of standards for direct access to the components of the National System that were the least rigorous possible consistent with the existence of adequate financial and operational safeguards. For example, in the case of broker-dealer participants the standard could be tied to the Commission's financial responsibility rules in a way which would permit participation in the National System by any broker-dealer qualified to engage in a general securities business. Alternatively, assuming establishment of a standard for participation in the National System more rigorous than the standard for participation in a general securities business, indirect access, through correspondent relationships or by other means, should be available at a reasonable cost.

Id. at 87,046 (footnote omitted).

(n86)Footnote 86.

Although the National System would include a number of different clearing and settlement depository entities, it should not be necessary for any participant to be a member of, or deal with or through, either directly or through a correspondent, more than one clearing and settlement and one depository entity. In addition to the need for interfaces between clearing and settlement entities and for interfaces between depositories, each clearing and settlement entity should be linked to a depository so that deliveries to, and receipts from, the clearing and settlement entity may be made through the depository by book entry.

The book entry clearing components of the National System should have the following characteristics: (i) an accounting function which nets participants' securities positions daily and permits netted positions to be carried forward and netted against positions established on subsequent days ("continuous netting"); (ii) a trade guarantee as of settlement date; (iii) mark-to-the-market protection

from settlement date onward, (iv) one clearing position per issue for each participant; (v) a link between the continuous netting system and a depository to make possible automatic book entry delivery to satisfy short valued positions in the continuous netting system and to permit deliveries to, and receipts from, the continuous netting system at various remote locations; and (vi) a same-day turnaround capability for both securities received by a participant from the continuous netting system and securities delivered to a participant which the participant wishes to re-deliver to the continuous netting system.

The non-book entry clearing portion of the National System, which could include low-volume clearing operations, should guarantee transactions as of, and mark them from, settlement date. In addition, subject to the limitations of certificate as opposed to book entry settlement, same-day turnaround should be available for securities settled through the non-book entry portion of the System.

The National System would permit participants to elect to use all, or only a portion of, the System's clearing and settlement services. Accordingly, while a participant should be able to compare, account for and settle all his trades through one clearing entity regardless of the location of the other party to the trade or the market in which the trade was executed, the participant should be able to (i) compare trades through the clearing entity affiliated with the marketplace in which the trade was executed and direct delivery of the compared trade to the clearing entity the participant selects to perform the accounting operation and (ii) direct delivery of the securities' settlement instructions generated by the accounting operation to the depository entity the participant elects to use for securities' settlement. While broker-dealers have indicated that their present need to deal with several securities marketplaces would require the National System to provide the ability to direct delivery of compared trades to a clearing entity other than the one which performs the comparison, broker-dealers have not insisted that the National System include an ability to direct delivery of securities' settlement instructions to a depository other than the one linked to the clearing entity which generated the instructions. Nonetheless, because of possibility of competitive innovation at the depository level--including development of a TAD system--the Commission believes the National System should have the flexibility to permit development of an ability to direct delivery of securities' settlement instructions to any depository entity.

Id. at 87,046-47 (footnote omitted).

(n87)Footnote 87.

The depository portion of the National System should be related to the book entry clearing components of the System so as to make possible the settlement by book entry of all deliveries between the participants and the clearing components of the System. Furthermore, the depository portion of the System should permit participants to deposit or withdraw securities from the System throughout the country.

The depository portion of the National System should have the following capabilities: (i) ability of a participant to make valued and free securities deliveries by book entry; (ii) dividend and proxy protection for securities left on deposit; (iii) facilities for the deposit and withdrawal of securities at locations remote from the central depository, and (iv) a same-day turn-around capability for (A) free or valued book entry deliveries to a participant's depository account from the clearing portion of the System, (B) free or valued book entry deliveries to a participant's depository account through the depository, and (C) deposits to a participant's depository account.

The depository portion of the System should have the capability to perform all securities processing functions which may be effected by book entry. To date, and without foreclosing the possibility that additional functions will be developed, these include free and valued movements of securities, movements to effect pledges and loans of securities, expedited withdrawals of certificates, withdrawals of certificates in street name and withdrawals of certificates in registered form.

The depository portion of the National System should be designed to be compatible with TAD's, transfer agent custodian ("TAC") programs, and other developments in the transfer agent area which have the effect of reducing certificate movement.

Id. at 87,046-48 (footnote omitted).

(n88)Footnote 88.

Each participant should be able to make one daily money settlement, in funds valued the next day, which would satisfy all the participant's obligations to the National System for that day, including monies due to or from the clearing portion of the System, marks to the market, state transfer taxes, dividend adjustments, and amounts payable with respect to valued depository movements.

Currently funds valued the next day are virtually uniformly used in the settlement of securities transactions, and it appears that in the near future no other medium of payment will be used. Should new developments, such as automated funds transfer techniques, make desirable the use of other media, the appropriateness of establishing another uniform medium should be considered.

Id. at 87,048-49 (footnotes omitted).

(n89)Footnote 89.

The ability to re-deliver securities on the day on which they are received--same-day turnaround--is critical to broker-dealers. If a broker-dealer receives and pays for securities which are to be redelivered against payment, failure to effect redelivery on the day on which the securities are received requires the broker-dealer to hold the securities in inventory until the next day. In order to maintain the securities in inventory during this period, the broker-dealer usually obtains bank financing. Accordingly, the availability in a National system of same-day turnaround at the clearing and depository levels, would enable broker-dealers to reduce unnecessary interest charges.

The failure of many financial institutions to participate in a book entry environment necessitates certificate deliveries by broker-dealers, a procedure which frequently entails substantial delays and which withdraws securities from the book entry environment, thereby reducing the opportunity for multiple same-day turnaround. Consequently, it appears that this failure to participate, rather than technological limitations, would be the primary impediment to the ability of participants in a National System to achieve same-day turnaround.

To maximize the same-day turnaround capability of the National System, the largest possible universe of securities handlers should participate in a book entry environment at both the clearing and depository levels. While participation at the depository level would permit bookkeeping deliveries in all cases and thereby at least bring securities handlers into the book entry environment, the failure to include participants at the clearing level would result in book entry movements at the depository level which would not have been necessary had the underlying transactions been netted in the clearing corporation operation. Assuming that unnecessary movements have a cost participation in the National System at the depository level only may prove sufficiently expensive to impel securities handlers to participate at the clearing level also.

Should same-day turnaround become generally available on a real-time basis so that a participant with a terminal in his office could know the moment securities deliveries reach his account and could redeliver them by book entry movements initiated with a terminal-originated instruction, the nature of clearing and settlement would change radically. In such an environment, clearing and settlement would occur instantaneously and could be completed by the evening of the day on which comparison of the underlying transaction were completed. And, if comparison could be completed on the transaction date,

it would be possible to complete the entire comparison, clearing and settlement process within 24 hours of the time the transaction occurred.

Id. at 87,049 (footnotes omitted).

(n90)Footnote 90. Sec. Exch. Act Rel. No. 34-12,874 P (1976).

(n91)Footnote 91.

On October 7, 1976, the Commission approved a rule proposal of the NYSE to permit its listed companies to use, along with or in place of existing stock certificates, a new single denomination stock certificate (SDSC). The three traditional forms of stock certificates include the upper left and right hand corners an engraving that limits the share denomination represented by the certificate. An odd-lot certificate is designated "less than 100 shares," a single round-lot certificate is designated "100 shares" and the third type of certificate is designated "more than 100 shares."

The NYSE proposal permits companies to add a new SDSC that contains no corner denomination limitations. Instead, the SDSC must either have an engraved punch-out panel, with the share denomination indicated by punching out numbers in the panel, or must indicate the share denomination (1) in numbers in the share counter (the small box area currently used), (2) in numbers in a five-position matrix in the "open throat" area, and (3) in words in the open throat area. All such share information must be printed with penetrating ink on top of fine-line intaglio engraving.

43 SEC Ann. Rep. 24 (1977) (footnotes omitted). *See also* SEC, Response to Questionnaire for Federal Regulatory Agencies from the Subcomm. on Oversight and Investigation of the House Comm. on Interstate and Foreign Commerce (March 1978).

(n92)Footnote 92.

Proponents of the SDSC believe it permits new certificates to be issued more efficiently and inexpensively. Issuers using the SDSC need not maintain inventories of three different stock certificates and pay the cost of three engraving plates; similarly, a transfer agent using the SDSC does not have to handle three different types of certificates to issue new certificates of varying amounts. Moreover, because the SDSC can be fed through a computer-controlled high-speed printer, the proper number of shares and other information for each new certificate can be imprinted rapidly, and certificates of varying denominations can be printed without interruption.

(Comm. Print. 95-27) (1977) [hereinafter "Oversight Report"].

(n105)Footnote 105.

Section 17A of the Securities Exchange Act of 1934, as added by the 1975 Amendments, directs the SEC to use its authority to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of transactions in securities. What was contemplated was one system composed of competing entities so linked together as to allow individual brokerage firms to conduct all of their clearance and settlement activities with one entity.

What appears to be emerging, however, is something quite different. In January of this year the SEC conditionally approved a merger of the clearing operations of the New York Stock Exchange, American Stock Exchange and National Association of Securities Dealers. That merger creates a single clearing entity, the National Stock Clearing Corporation (NSCC), which would have an 85 percent share of the clearance and settlement market. The subcommittees are concerned that the entity may have the ability to drive its competitors out of existence, thus presenting the potential for a monopoly situation in the clearance and settlement field. Should such a monopoly situation exist, it would inevitably lead to higher prices and poorer service than would exist in a national system composed of competing entities. Moreover, a monopoly clearing entity would require the Securities and Exchange Commission to assume the type of regulation necessary for a public utility. The subcommittees firmly believe that such a posture would be bad for the SEC, the industry and the investing public.

The Commission's approach of approving the merger of NSCC suffers from an inherent problem. Experience with monopolists has shown that, over time, prices tend to rise and services tend to deteriorate. If the SEC's regulatory decision leads to the elimination of competing entities in the clearance and settlement area, as it appears likely to do, broker-dealers and their customers will eventually be left with higher prices and poorer service than would result in an environment of competition. While the Commission has approved the merger subject to a number of conditions intended to preserve competition, there are serious questions as to whether the conditions are adequate to place clearing corporations other than NSCC in a truly competitive position. More importantly, it is clear that compliance with the conditions is taking far longer than was initially intended. In the meantime, there are indications that the delay is exacerbating the potential for complete dominance by NSCC. Rather than to permit that trend to continue, the SEC should consider immediately revoking the registration of NSCC, and should search for ways to create a fair field of competition.

Oversight Report, n.4 *supra*, at 4-5, 6 (footnotes omitted).

(n106)Footnote 106.

It is clear that the SEC must exercise vigorous leadership in supervising the process of drawing the separate trading markets and clearing facilities into a cohesive national system. But in so doing, the SEC should not lose sight of a basic principle of the 1975 Amendments: they do not call for the preservation or favoring of any particular market or clearing facility. Nor do they require that any existing market or facility be dismantled. The subcommittees are skeptical as to the ability of the SEC or any other government agency to select among the existing markets and clearing facilities those which would best serve the investing public. The 1975 Amendments looked not to the fostering of competition among them, including any future markets and facilities.

In the national market system, whether a particular market center will continue to serve as a focal point for orders will no longer depend on its ability to maintain rules which confine orders to itself, or on the lack of efficient facilities for order flow to other locations, but on its ability to attract orders by offering useful and competitively priced services. The same is true with regard to the separate clearing facilities of the national clearance and settlement system. In an environment of true competition, those markets and clearing facilities which best serve the investing public will flourish.

The legislation and technology necessary to fashion a national market system and national clearance and settlement system are available. It is clear the industry has failed to take any effective initiative, although that is not entirely surprising in light of the divergent interests of the historically separate market centers. The SEC must now exert the necessary leadership to harness those competing interests. It must forcefully move, and move others, to erect physical connections among the separate markets and clearing facilities. It must at the same time avoid any action to promote a particular market or clearing facility over others.

As to the national system for securities trading, the SEC has moved too slowly. As to the national system for clearance and settlement, the SEC has produced more visible results, but appears to have exacerbated the potential for dominance by a single clearing facility. The SEC should act promptly to correct its misjudgment and to move forward in both areas.

Id. at 8-9.

(n107)Footnote 107.

These individual views on the SEC's actions in the clearance and settlement area are offered in addition to, but not in dissent from, the views expressed by the subcommittees in the main body of this report. I have reached similar but more emphatic conclusions, for I believe the SEC should do more than merely consider revoking NSCC's registration: it should revoke the registration immediately. I believe the subcommittees have invited the SEC to pursue an impossible task. Any effort by the SEC to justify its determination in light of the aims of the 1975 Amendments would, I am convinced, be fruitless. The approval of the NSCC is antithetical to the system envisioned by the Congress and authorized by Section 17A. The integrated system for clearance and settlement as envisioned by the Congress was to have been so structured as to permit separate entities to compete effectively.

Furthermore, the SEC's regulatory authority and expertise are not adequate to prevent NSCC from becoming a monopoly or to constrain such a monopoly to serve the public interest. The SEC is not designed for that role, has no experience at it, and should be reluctant to assume it.

If the SEC determines that the dual goals of competition among clearing agencies and competition

among broker-dealers are indeed incompatible, and that creation of a single entity is the best way to establish a national system in the public interest, the SEC is free to seek new legislation. If so, the type of legislation which authorized the creation of the Communications Satellite Corporation, which is referred to in this report in connection with the national securities market system, might be useful in the clearance and settlement area as well. Like the communications satellite system, the clearance and settlement system is a highly technical area vested with important national interests. If a single clearing entity were appropriate, it would be necessary for the Congress to carefully design that entity, to precisely balance the representation on its board of directors, perhaps to restrict allowable percentages of stock ownership and voting, and above all to provide an adequate system of accountability to a public body. In short, any single entity would have to be a quasi-governmental body which balances private initiative with public control. NSCC is not such a body; the existing statutory standards for registration of a clearing agency were not designed with that type of balance in mind; and the SEC is not well suited to protect the public interest in the face of a monopoly and a statutory framework designed for a different system.

I would unequivocally call upon the SEC to revoke the registration of NSCC and to explore alternative ways to facilitate the establishment of a national system with effective competition among both clearing agencies and broker-dealers. If the SEC finds those two types of competition irreconcilable, and determines that the single clearing entity approach is best, it should return to the Congress with a request for legislation which would permit development of that approach in a fashion consistent with the public interest.

(n109)Footnote 109. 44 SEC Ann. Rep. 4 (1978).

(n110)Footnote 110.

Progress toward a national system also was evident in other areas. The expansion of interfaces among clearing agencies has permitted most brokers and dealers to clear through a single clearing agency (one account processing) all transactions regardless of market of execution. Expanded interfaces among depositories have further immobilized securities certificates and allowed most participants to move securities throughout the country, to effect pledges and to make deliveries by book entry. These developments have reduced costs and accelerated the settlement process.

During the year, the Commission took two important steps in immobilizing certificates. First, Rule 17f-4 under the Investment Company Act was adopted. The rule established the conditions under which registered investment companies, or custodians for registered investment companies, may deposit investment company securities in a securities depository.

The Commission also worked toward increasing insurance company participation in securities depositories. Insurance companies are large holders of securities but, principally because of certain requirements of state laws, have been inhibited from widespread participation in securities depositories. The National Association of Insurance Commissioners recently formed a task force on the use of book entry and depository systems by insurance companies. Members of the Commission staff met with the task force and were appointed by the task force to serve on an advisory committee which will seek solutions to both the legal and practical problems restricting company participation.

(n111)Footnote 111. Inv. Co. Act Rel. No. 10,453, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,753 (Oct.

26, 1978).

(n112)Footnote 112. To invoke Rule 17f-4 under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G, the board of directors of the investment company must approve and annually review the depository agreement and should verify the technical capability of the parties to discharge their responsibilities and other safety or cost effective features.

(n113)Footnote 113. This system is discussed in § 2.01 [3] *supra*.

(n114)Footnote 114. Sec. Exch. Act Rel. No. 34-15,671, [1979 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,016 (Mar. 22, 1979).

(n115)Footnote 115. *Id.* at n.55.

See also text at ns.82-89 *supra*.

(n116)Footnote 116. *Sec. Exch. Act. Rel. No. 34-18,274, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,054 (Nov. 20, 1981). According to the Commission:*

That capability, in addition to its impact on the efficiency of clearing procedures, is essential to enable a broker-dealer to seek the best price available without concern that his choice of market of execution will result in materially increased clearance and settlement costs.

The development and expansion of interfaces during the past year, particularly the establishment of regional interfaces for the processing of over-the-counter transactions, has made one-account processing almost universally available. The Commission will seek during the coming year to complete that process so that all broker-dealers and financial institutions participating in the national clearance and settlement system have one-account processing.

Id. at 81,574.

(n117)Footnote 117.

Clearing agency branch offices or remote terminals provide broker-dealers throughout the country with access to the national clearance and settlement system without the necessity of physical presence in the principal clearing centers. The establishment of regional centers will permit each participant broker-dealer or financial institution to clear through the entity of its choice without regard to its own physical location or that of the clearing agency. Thus, in conjunction with one-account processing, a participant in the national clearance and settlement system may select any clearing agency and may clear and settle transactions with that entity effected from any market center.

Id. at 81,575.

(n118)Footnote 118.

As previously announced, the Commission intends to initiate a proceeding to consider issues associated with interface fees or charges which function as interface fees. These charges make it more expensive for a broker-dealer to clear and settle a transaction executed in a market other than the market affiliated with his clearing agency. In the context of this proceeding, the Commission must explore whether these charges would in fact affect the participant's choice of markets. In addition, the United States Court of Appeals for the District of Columbia Circuit has remanded to the Commission for further consideration the use of geographic price mutualization by the National Securities Clearing Corporation

("NSCC"). This pricing mechanism, which enables NSCC to provide services to all its participants at an equal price regardless of geographic location, was deemed by the Commission to have an important impact on competition among broker-dealers and, pursuant to the discussion of the Court of Appeals, must be reconsidered during the coming year.

Id. (footnotes omitted).

(n119)Footnote 119.

During the next year the Commission will continue to encourage clearing agencies and depositories to include in their processing activities all securities which are suitable for inclusion in the system. In addition, we will continue to encourage all broker-dealers and financial institutions to participate directly or indirectly in the national clearance and settlement system in order to reduce the physical movement of securities, increase the efficiency of the national clearance and settlement system, and otherwise advance the Congressional objectives set forth in the Act.

CHAPTER 2A Registration and Regulation of Transfer Agents and Clearing Agencies *

1-2A Federal Securities Exchange Act of 1934 § 2A.02

§ 2A.02 Registration and Regulation of Transfer Agents

[1] The Registration Requirement

The Securities Acts Amendments of 1975 n1 amended the Securities Exchange Act of 1934 n2 by adding a new Section 17A. n3 Subsection 17A(c) requires, in substance, that every "transfer agent" register n4 with the Securities and Exchange Commission as part of the Congressionally mandated national system for clearance and settlement. n5

The term "transfer agent" is defined in Section 3(a)(25) of the Exchange Act n6 to include "any person" n7 who "on behalf of an issuer of securities or on behalf of itself as an issuer of securities" performs any of the following functions:

- countersigns securities upon issuance;
- monitors the issuance of securities "with a view to preventing unauthorized issuance," n8 i.e., functions as a registrar;
- registers the transfer of securities;
- exchanges or converts securities; or
- transfers ownership of securities by bookkeeping entry without physical issuance of a certificate.

The Commission has stated that the federal securities laws do not prohibit a registered transfer agent from also serving as a registrar. n9 The Commission cautions, however, that applicable state law or the rules of the national securities markets may require separate entities. n10

Exempted from the definition of "transfer agent" is any insurance company or "separate account" that performs any of these functions "solely" with regard to variable annuity contracts or variable life policies which it issues. Also excluded is any clearing agency registered with the Commission pursuant to Section 17A n11 that functions as a transfer agent "solely with respect to options contracts which it issues." n12

The Commission has cautioned that an issuer who performs "any one or more" of the transfer agent functions will be

deemed to be a "transfer agent" even if the issuer employs a registered transfer agent to perform other transfer agent functions. For example, an issuer which maintains the corporate security holder records is required to register as a transfer agent even if a transfer agent is engaged to countersign certificates, monitor the issuance of certificates, or prepare the data required for the security holder records. n13

Similarly, "any person" who acts as both a clearing agency n14 and a transfer agent must be registered pursuant to Section 17A n15 in both capacities. n16

The Commission may exempt "any person" or security from one or all of the provisions of Section 17A upon a finding that the exemption "is in the public interest and consistent with the protection of investors and the purposes of [Section 17A], including the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds. ..." n17

[2] The Registration Process

[a] Determining Jurisdiction. Registration as a transfer agent pursuant to Section 17A is accomplished through the "appropriate regulatory agency" for the applicant. n18 Section 3(a)(34) of the Exchange Act allocates regulatory jurisdiction as follows:

En- Appropriate Regulatory
tity Agency

1. National bank or a bank operating under the Code of Law for the District of Columbia, or a Federal branch or Federal agency of a foreign bank	Comptroller of the Currency
2. State bank member of the Federal Reserve System, a foreign bank, an uninsured state branch or state agency of a foreign bank, a commercial lending company owned or controlled by a foreign bank, or a corporation organized or having an agreement with the Board of Governors	Board of Governors of the Federal Reserve System
3. Bank insured by the Federal Deposit Insurance Corporation (other than a member of the Federal Reserve System) or an insured state branch of a foreign bank	Federal Deposit Insurance Corporation
4. Saving association the deposits of which are insured by the Federal Deposit Insurance Corporation	Director of the Office of Thrift Supervision
5. All other applicants	Securities and Exchange Commission

[b] Applications for Registration. In October 1975 the Commission adopted Rule 17Ac2-1, which establishes the registration procedures, and related Form TA-1, through which an applicant may seek registration. n19 Substantially similar rules were adopted by the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the FDIC. n20 Form TA-1 was designated by the four regulatory bodies as the "common form for the registration of all transfer agents. ..." n21

Rule 17Ac2-1 requires every transfer agent for which the Commission is the "appropriate regulatory agency" to file an application for registration on Form TA-1. n22 The application shall become effective forty-five days after filing with the Commission, n23 unless the Commission accelerates, denies, or postpones registration pursuant to Section 17A(c). n24

[c] Form TA-1. Form TA-1 is the form common to each "appropriate regulatory agency" for the registration of all transfer agents. n25 The form was designed "to identify, and to provide the Commission with basic information regarding the size and nature of the registrant's transfer agent activities and to assist in the development of appropriate regulatory standards." n26

The form is composed of seven questions. The questions solicit basic information concerning the identity and place of business of the applicant and where transfer agent activities are to be performed. In 1986, the Commission revised Form TA-1. n27 Revised Form TA-1 remains essentially the same as the prior form except that several questions that the Commission viewed as no longer necessary were deleted and others shifted to the new Form TA-2. n28 In addition, the Commission adopted an SEC Supplement to Form TA-1, which is to be completed only by independent, non-issuer transfer agents whose "appropriate regulatory agency" is the Securities and Exchange Commission. n29

The SEC Supplement to Form TA-1 requests background information about control persons at these transfer agencies "with particular emphasis on whether offenses have been committed by these persons, and, therefore, whether the transfer agent's association with a particular individual would have an impact on the transfer agent's ability to perform its functions properly." n30 Specifically, the SEC Supplement to Form TA-1 requires transfer agents to identify the individuals holding key management positions and to provide information concerning involvement by management in certain civil, criminal, and administrative proceedings. Moreover, registrants must submit the appropriate schedule of the SEC Supplement to Form TA-1: Schedule A for corporations; Schedule B for partnerships; and Schedule C for applicants other than partnerships and corporations. If any such applicant answers affirmatively to questions in the SEC Supplement, the applicant must also complete Schedule D, detailing any court or regulatory action. n31

If the registrant's appropriate regulatory agency is the Commission, the registrant must file the original and three copies of Form TA-1, SEC Supplement, and any amendment with the Commission. n32 If the registrant's appropriate regulatory agency is either the Comptroller of the Currency, the Federal Deposit Insurance Corporation, or the Board of Governors of the Federal Reserve System (collectively referred to as Federal Bank Regulators or "FBRs"), the registrant must file the original and four copies of Form TA-1 and any amendment with its appropriate regulatory agency n33 *and* with the Commission. n34 The original copy of Form TA-1 must be manually signed and any additional copies may be photocopies of the original signed copy. n35

The forms and any amendments thereto must be executed by a duly authorized "official" of a corporation n36 or a duly authorized "principal" of a non-corporate registrant. n37

[d] The Review Procedure. Upon filing, the Commission will acknowledge receipt of Form TA-1 n38 and the forty-five day review period will commence. n39

Section 17A(c)(3) vests with each "appropriate regulatory agency" the power to "censure, place limitations on the activities, functions, or operations" of an applicant for registration as transfer agent. Any such action must be preceded by a finding "on the record after notice and opportunity for hearing" that the remedial action:

is in the public interest and that such transfer agent, whether prior or subsequent to becoming such, or any person associated with such transfer agent, whether prior or subsequent to becoming so associated--

(A) has committed or omitted any act enumerated in [section 15(b)(4)(A), (D), (E), or (G) of the Exchange Act], has been convicted of any offense specified in [section 15(b)(4)(B)] within ten years of

the commencement of the proceedings under this paragraph, or is enjoined from any action, conduct, or practice specified in [section 15(b)(4)(C)]; or

(B) is subject to an order entered pursuant to [section 17A(c)(4)(C)] barring or suspending the right of such person to be associated with a transfer agent. n40

Pending a final determination regarding an application for registration, the reviewing regulatory agency may postpone, by order, the effective date of such registration for a period not to exceed fifteen days. If, however, after notice and opportunity for hearing, the reviewing regulatory agency deems it necessary or appropriate "in the public interest or for the protection of investors," the reviewing regulatory agency shall order the effective date postponed. n41

[e] Amendments to Form TA-1. An application for registration on Form TA-1 may be amended at any time by filing an original and four copies, if the appropriate regulator is an FBR, or an original and three copies, if the appropriate regulator is the SEC. n42 The filing of an amendment recommences the thirty day review period. n43 n44

A transfer agent is required to amend its Form TA-1 within sixty days following the date upon which the information reported therein becomes "inaccurate, incomplete or misleading. ..." n45 This obligation survives the effective date of registration. n46 n47

[f] Form TA-2. In 1986 the Commission adopted Form TA-2, which requires transfer agents to disclose the volume and nature of their business activities. n48

The Form requests such basic information as the transfer agents name and its appropriate regulatory agency. In addition, the proposed text of Form TA-2 requested a variety of very specific information, some of which was not kept by all transfer agents filing Form TA-2. After reviewing the opinions of several commentators, the Commission realized the administrative problems that would be caused, and in response adopted a version of Form TA-2 that is somewhat different from the original. The adopted version of Form TA-2 allows certain categories of transfer agents to approximate statistics that they might not ordinarily have available. n49

Rule 17Ac2-2 requires all transfer agents to file Form TA-2. n50 However, those transfer agents that received, "fewer than 1,000 items for transfer in the reporting period and that did not maintain master securityholder files for more than 1,000 individual securityholder accounts as of December 31 of the reporting period are only required to supply the information requested in Items 1-5 and 11 of the Form. n51 Furthermore, a transfer agent must complete only items 1-3 of Form TA-2 if a service company performs all of the transfer agent's transfer and processing functions. n52

[3] Special Regulations Applicable to Transfer Agents

Section 17A reflects a clear Congressional mandate that the unsafe and unsound practices which precipitated the paperwork crisis of the late 1960's not recur. n53 Accordingly, through Section 17A(d)(1) Congress vested in the Commission the specific authority to adopt rules and regulations governing the conduct of all registered transfer agents. n54

Pursuant to this mandate, the Commission in 1977 adopted Rules 17Ad-1 through d-7 n55 which were intended:

- (1) to assure that registered transfer agents perform their functions in a prompt and accurate manner;
- (2) to provide early warning of inadequate transfer agent performance; (3) to provide a mechanism to limit expansion of transfer agent activities when transfer agents are unable to meet their performance time standards; (4) to assure prompt response to inquiries concerning the status of items presented for transfer; and (5) to require the maintenance and preservation of certain records necessary to monitor compliance with the ... rules. n56

To assist transfer agents in their attempts to comply with the seven complex rules, the Commission issued in 1980 a lengthy interpretative release. n57

Thereafter, in 1983 the Commission adopted seven additional rules n58 that

(1) require registered transfer agents to maintain certain information concerning securityholder records; (2) require registered transfer agents to maintain current and accurate securityholder records; (3) require registered transfer agents to post promptly all transfers, purchases, and redemptions to those securityholder records and to notify their appropriate regulatory agency if they are unable to do so; (4) require registered transfer agents to exercise diligent and continuous attention in resolving record inaccuracies; (5) require registered transfer agents to disclose directly to the issuers for whom they perform transfer agent functions and to their appropriate regulatory agency information regarding record inaccuracies; (6) require registered transfer agents to buy-in certain record inaccuracies that result in a physical overissuance of securities; (7) prescribe a minimum level of communication between registered transfer agents contractually related to the same issuer; (8) set standards for the safeguarding of funds and securities in the custody or possession of registered transfer agents; (9) require certain registered transfer agents to obtain, on an annual basis, an internal accounting control report prepared by an independent public accountant; and (10) eliminate the requirement that transfer agents whose appropriate regulatory agency is either the Commission or the Office of the Comptroller of the Currency file notices regarding their status as exempt transfer agents under Section 240.17 Ad-4(b)." n59

In 1984 the Commission adopted Rule 17Ad-14. The Rule places further responsibility on transfer agents by requiring transfer agents to establish accounts with "qualified registered securities depositories." n60

A "qualified registered securities depository" is defined as "a registered clearing agency having rules and procedures approved by the Commission pursuant to Section 19 of the Securities Exchange Act of 1934 to enable book entry delivery of the securities of the subject company to, and return of those securities from, the transfer agent through the facilities of that securities depository." n61

The established accounts are to be maintained to facilitate the transfer of securities by requiring a securities transfer to be performed by book-entry rather than the more time consuming transfer of physical certificates. n62 The book-entry system facilitates the transfer of securities as well as the return of securities should a potential transfer be canceled.

In 1992, the Commission adopted Rule 17Ad-15 which deals with signature guarantees. n63 This rule attempts to set forth a criteria by which transfer agents must adhere to when determining whether or not to accept a signature guarantee.

The rule sets forth the following:

- a transfer agent may not engage in activity in relation to a guarantee that results in inequitable treatment to any eligible guarantor institution;
- transfer agents must set forth standards and procedures upon which they base a decision to accept or reject a guarantee;
- a transfer agent must make such standards and procedures available to any person who requests a copy;

- if the guarantee is rejected the transfer agent must notify the guarantor within two business days after the rejection; and
- the rule does not infringe upon any other rights of rejection, not associated with the guarantee, that the transfer agent may have. n64

The cumulative effect of Rules 17Ad-1 through 17Ad-15 has been the creation of a sophisticated, complex matrix of substantive performance criteria which has been praised as providing "greater safeguards against abuse" and criticized as either "unnecessary or inappropriate" or generating "unnecessary costs." n65

Rules 17Ad-1 through 17Ad-15 establish the minimum performance standards and recordkeeping requirements for all registered transfer agents. These rules do not supercede any rules of self-regulatory organizations, n66 which may impose more stringent performance standards. n67

The application of these rules is triggered by the presence of an "item" for which a transfer agent is requested to perform a transfer agent function. n68

An "item" is defined n69 to mean either:

- a certificate or certificates of the same issue of securities covered by one "ticket" n70 (or, if there is no "ticket," presented by one presenter) presented for transfer, or
- an instruction to a transfer agent holding securities registered in the name of the presenter to transfer such securities or to make available all or a portion of such securities.

In the case of an outside registrar, each certificate to be countersigned is an "item." n71

The Commission has rejected arguments that the term "item" should be restricted to each "individual transfer instruction for certificates of a single issue of securities within a single ticket." n72 Also rejected by the Commission was the argument that securities not registered under Section 12 of the Exchange Act n73 should be excluded from the definition of an item. According to the Commission, "once a transfer agent is registered, the turnaround rules apply to all securities. ..." n74

[a] Turnaround, Processing and Forwarding of Items. Rule 17Ad-2 establishes the basic requirement that every registered transfer agent shall "turnaround" within three "business days" of "receipt" at least 90 percent of all "routine" items received for "transfer" during a month. n75

A "business day" is defined to include every day that a transfer agent is "normally open for business," excluding Saturdays, Sundays and legal holidays and other holidays "normally observed by the transfer agent." n76 In addition, a "business day" does not exist when the transfer agent operates on a skeleton staff due to severe inclement weather "which adversely affects other businesses *and* local transportation" or when a city, municipal or state government orders or requests businesses to close. n77

For purposes of Rule 17Ad-2, an item is deemed to be received when it "arrives at the premises at which the transfer agent performs transfer agent functions." n78 The Commission has cautioned that delivery of an item to a mail room "located in the same building" as the transfer agent is deemed to constitute "receipt" of the item by the transfer agent. n79 Therefore, the Commission has stated that "it is in the transfer agent's interest ... to ensure that a received item is promptly forwarded from the mail room to the transfer department." n80

If, however, the transfer agent maintains, at a subsidiary location, a "drop" or "window" to receive items, the agent is required to have "appropriate" procedures to assure that items delivered to such subsidiary sites are forwarded "promptly" to the processing center. n81 But such items are not deemed to be "received" until delivered to the site of processing. n82 Similarly, the tender of an item to a service bureau for the transfer agent is not "received" by the agent until the item arrives at the processing site. n83

The Commission has also concluded that items tendered, but rejected, at a "drop" or "window" are not deemed to be received. n84 Moreover, the "prompt return" of items submitted for transfer for, e.g. nonpayment of fees, rescinds the "receipt." n85

Items "received" before noon are deemed to have been received on that day, but items "received" after noon are deemed to have been received on the following business day. n86

The turnaround rule applies only to "routine" items. The Commission cautions that the definition of a "routine item" is stated in the negative, "i.e. an item received for transfer will be deemed routine unless it falls within [certain] specified exceptions. ..." n87 There are eight categories of proposed transfers that are exempt from the turnaround rules:

- Situations in which the transfer agent does not maintain a supply of certificates and must requisition additional certificates. n88
- Certificates as to which there is a stop order or other restriction on transfer. n89
- Proposed transfers that require additional instructions, endorsements, guarantees, opinions of counsel, or other documents. n90
- Proposed transfers that require review by the transfer agent of supporting documentation "other than assignments, endorsements, or stock powers, certified corporate resolutions, signature or other common and ordinary guarantees or appropriate tax or tax waivers." n91
- Transfers arising out of a reorganization, tender offer, exchange, redemption or liquidation. n92
- Transfers including a warrant, right, or convertible security presented within five business days before lapse or change. n93
- The exercise of any warrant, right, or convertible security. n94
- Transfers arising out of a public offering effected within the previous fifteen business days. n95

For purposes of Rule 17Ad-2, a "transfer" has occurred when "all acts necessary to cancel the certificate ... and to issue a new certificate ..." have been accomplished, including "the performance of the registrar function," and the release of the completed item by the transfer agent. n96

If a transfer agent acts as an "outside registrar," n97 the agent is required to "process" n98 at least 90 percent of all "items received" n99 during a month by "at least the opening of business on the next business day, in the case of items received before noon on a business day, and ... by noon of the next business day, in the case of items received after noon on a business day." n100

If a registered transfer agent fails to meet the turnaround and processing timetable mandated by Rule 17Ad-2, a written notice must be filed with the "appropriate regulatory agency" and the Commission within 10 business days after the end

of any such month. n101

The notice must state, among other things, the number of routine and non-routine items received during the month, the number of items not timely turned around or processed, the percentage which such items represent of all routine items presented to the transfer agent for the month in question, the reason for the failure, and the steps which have been or will be taken to remedy the current failure and to prevent future failures. n102

In addition, all routine items not timely turned around or processed must be handled "promptly" and all non-routine items "shall receive diligent and continuous attention and shall be turned around as soon as possible". n103

The turnaround, processing, and forwarding requirements of Rule 17Ad-2 have been the subject of an extensive interpretive release n104 in which the Commission applies these substantive performance standards to hypothetical situations and amplifies various definitions.

[b] Limitations on Expansion. Any registered transfer agent required, for three consecutive months, to file a notice of its failure to comply with the turnaround and processing rules n105 is prohibited for the succeeding three months from expanding its transfer agent business. n106

In addition, if the transfer agent fails for two consecutive months to turnaround on a timely basis at least 75% of all routine items or to process at least 75% of all items presented to it, such transfer agent is

- prohibited for the three succeeding months from expanding its business, and
- required to send a copy of the failure notice n107 to the chief executive officer of each issuer on whose behalf the transfer agent functions. n108

Once the limitation has been imposed, the transfer agent is prohibited from expanding *both* its transfer agent and registrar business until the agent's performance meets both the turnaround and processing standards of Rule 17Ad-2 for three consecutive months. n109 The restriction on new business applies to activities which the Commission does not regulate, such as dividend disbursements. n110

According to the Commission, these limitations n111 "are not intended to be a penalty" but, rather "are designed to maintain the status quo so that a transfer agent can bring its performance into compliance with the rules." n112 The Commission has reserved, however, its right to institute administrative, civil or criminal proceedings irrespective of these limitations. n113

[c] Recordkeeping. Every registered transfer agent is required by Rules 17Ad-6 and 17Ad-7 "to make and keep current" extensive records on every routine and non-routine item submitted for turnaround or processing.

According to the Commission, the recordkeeping and record retention requirements

are intended to serve a dual purpose: (1) to assure that all registered transfer agents are maintaining the minimum records necessary to monitor and keep adequate control over their own performance; and (2) to permit the appropriate regulatory authorities to examine registered transfer agents on an historical basis for compliance with applicable rules. n114

The records include, among other things:

- a "receipt, ticket, schedule, log or other record" reflecting the receipt and disposition of every item; n115

- a "log, tally, journal or schedule" reflecting the aggregate volume and disposition of all routine and non-routine items for each month; n116
- if the transfer agent acts as an outside registrar, a "receipt, ticket, schedule, log or other record" showing the date and time each item is received and processed, each "written or oral notice of refusal to perform" the registrar function, and the aggregate volume and disposition of all items for each month; n117
- every written inquiry or request, "including those not subject to the requirements of [Rule 17Ad-5]," n118 showing the date received and disposition of such matter; n119
- any "document, resolution, contract, appointment or other writing and supporting documentation" for the appointment or termination of any appointment of the transfer agent to act "in any capacity" on behalf of an issuer; n120
- A copy of every transfer journal and registrar journal prepared by the transfer agent; n121 and
- Documentation supporting the transfer agent's determination that the particular item is exempt from turnaround and processing requirements of Rule 17Ad-1(i)(5) or (8). n122

Numerous questions have been posed to the Commission concerning the scope and application of the recordkeeping requirements of Rules 17Ad-6 and 7. The Commission's responses appear in a special interpretative release issued in 1980. n123

The Commission has also adopted very explicit record retention requirements defining the time periods for which a transfer agent must retain records required pursuant to Rule 17Ad-6 and personnel fingerprints required to be retained pursuant to Rule 17f-2. n124 In general, most records are required to be "easily accessible" for at least 6 months and retained for a period of not less than two years. n125

Under certain circumstances, a microfilm copy may be substituted for the hard copy. n126 Similarly, use of a service bureau is permitted provided that the bureau undertakes in writing to provide the Commission with access "at any time" to the relevant records. n127

The Commission has discussed the record retention rules in an interpretive release that contains illustrative examples and responds to specific questions on the application of these rules. n128

[d] Exemptions from the Turnaround, Processing, Recordkeeping, and Record Retention Rules. The Commission, in response to comments from various interested parties, has exempted certain categories of transactions from the turnaround, processing, recordkeeping and record retention rules. n129

Interests in limited partnerships, redeemable securities of registered investment companies and interests in dividend reinvestment programs are exempt from the turnaround and processing provision of Rule 17Ad-2, n130 the limitation on expansion of Rule 17Ad-3, n131 and most of the recordkeeping rules. n132

If the transfer agent qualifies as an "exempt transfer agent" due to the volume of items submitted to it for transfer or processing n133 and also documents its qualification n134 with the "appropriate regulatory agency," n135 the transfer agent is exempt from the 90 percent turnaround and processing requirement n136 and certain of the recordkeeping requirements. n137

[e] Written Inquiries and Responses. Transfer agents have specific obligations to respond within prescribed time frames to written inquiries. n138 The information the inquirer must present "is the type of information that in practice is given to a transfer agent and is found sufficient to enable the agent to identify the account involved and the item presented." n139

The affirmative obligation to respond is summarized in the following table:

Nature of Inquiry	Required Response	Re-sponse Time

Status of item presented for transfer within preceding 6 months. n140	if received and not transferred, the reason for the delay and what further data is required to effect transfer; If received and transferred, the specific facts concerning the transfer, or, a declaration that the item was not received. n141	Within 5 business days after receipt of inquiry.
A request by a broker-dealer for acknowledgment of transfer instructions or possession of securities or for revalidation of a window ticket. n142	Acknowledge transfer instructions; confirm or deny possession of securities; or; revalidate window ticket. n143	Within 5 business days after receipt of inquiry.
A request for confirmation of possession of a securities certificate presented within 30 days preceding the inquiry. n144	Confirm or deny possession.	Within 10 business days after receipt of inquiry n145
A request for a transcript of an account with respect to a particular issue as it appeared on a specific date within 6 months of the date of inquiry. n146	Provide the requested transcript.	Within 20 business days after receipt of inquiry. n147

A transfer agent who receives a request which fails to provide the necessary information or which refers to a time period earlier than the time periods specified above is required to confirm the receipt of the inquiry promptly and to respond to the inquiry "as soon as possible." n148

The Commission issued an interpretive release discussing particular inquiries and their disposition under the applicable rules. n149

[f] Creation and Maintenance of Accurate Securityholder Files. Transfer agents are "an integral component" of the clearance, settlement and transfer process, and "substantial performance by a transfer agent can affect the accuracy of an issuer's securityholders records and interrupt the channels of communication between issuers and shareowners." n150 Therefore, the Commission has adopted Rule 17Ad-10 n151 which requires, among other things, that:

- every registered "recordkeeping transfer agent" n152 maintain and keep current "master securityholder files" n153 and "subsidiary files," n154 if any; n155
- all debits and credits to the master securityholder file be posted "promptly and accurately" n156 with the "minimum and appropriate certificate detail" n157 for every security transferred, purchased, redeemed or issued; n158
- the exercise of "diligent and continuous attention" by the recordkeeping transfer agent to resolve and post any "record difference" n159 between the certificate detail for any security transferral on redeemed and the corresponding detail contained in the master securityholder file; n160
- every co-transfer agent promptly dispatch or mail to the recordkeeping transfer agent (a) a record of debit and credits for every security transferred or issued, n161 and (b) a report within three business days following the end of each month setting forth the reason and dollar value of any "buy-in;" n162 and,
- every transfer agent who has knowledge of "any physical over issue that such transfer agent caused" shall within 60 days of the discovery, "buy-in securities equal to either the number of shares in the case of equity securities or the principal dollar amount in the case of debt securities." n163

The Commission has cautioned that the "performance standard" mandated by Rule 17Ad-10 "is a minimum standard" to which transfer agents must adhere.

[g] Reporting Requirements. In addition to any other report required by other rules, n164 Rule 17Ad-11 requires n165 every recordkeeping transfer agent to tender a monthly report to the issuer or its agent n166 regarding "aged record differences," n167 buy-ins, n168 and failures to post certificate detail. n169

In addition, every "recordkeeping transfer agent" n170 is required, if certain threshold volume criteria are satisfied, to file with the "appropriate regulatory agency" a quarterly report containing detailed information on its buy-ins and its aged "record differences." n171

[h] Safeguarding of Funds and Securities. To "strengthen investor protection," n172 every transfer agent with custody or possession of funds or securities is required by Rule 17Ad-12 to assure that such assets are safeguarded and protected "in light of all facts and circumstances" from misuse, loss, theft or destruction. n173

While rejecting suggestions that "minimum insurance requirements" should be required in place of a generalized standard of care, n174 the Commission agreed that the "cost of various safeguards and proceedings as well as the nature and degree of potential financial exposure are two relevant factors" in evaluating whether a transfer agent has employed adequate potential safeguards for funds and securities. n175

[i] External Evaluation of Internal Control. Unless otherwise exempt, every registered transfer agent is required to file a report annually with both the Commission and the "appropriate regulatory agency" n176 concerning the transfer agent's "internal accounting control and related procedures for the transfer of record ownership and the safeguarding of related securities and funds." n177

The report must be prepared by an independent accountant and include a detailed discussion of any deficiencies. n178

For purposes of the report, the objective of a system of internal accounting control

should be to provide reasonable, but not absolute, assurance that securities, and funds are safeguarded against loss from unauthorized use or disposition and that transfer agent functions are performed promptly and accurately. n179

A "material inadequacy" is deemed to exist when the independent accounting believes that the system of internal accounting controls

do not reduce to a relatively low level the risk that errors or irregularities, in amounts that would have a significant adverse effect on the transfer agent's [performance] ability ... would occur or not be detected within a timely period by analysis in the normal course of performing their assigned functions. n180

If a material inadequacy is found to exist by the accountant, the transfer agent is required to notify both the Commission and the appropriate regulatory agency in writing of the remedial action to be taken. n181

A transfer agent is exempt from the external evaluation requirement if it:

- performs transfer agent functions solely for its own securities or corporations or subsidiaries in which the transfer agent owns 51% or more of the capital stock; n182
- receives fewer than 500 items for transfer and fewer than 500 items for processing within six consecutive months; n183 or
- Is subject to the jurisdiction of the Board of Governors of the Federal Reserve System, the Comptroller of Currency or the Federal Deposit Insurance Corporation and provides a "report similar in scope" to either the bank's board of directors or audit committee. n184

[j] Tender Agents. Rule 17Ad-14 states that unless otherwise exempt, n185 every transfer agent must establish a 'specially designated account' with a 'qualified registered securities depository' n186 before such transfer agent can act as a depository on behalf of a bidder of securities. n187 An account is required to be established in order to facilitate transfer of securities by utilizing a book-entry system for the actual securities exchange. A book-entry system is more efficient than requiring the exchange of physical certificates.

Any account opened pursuant to Rule 17Ad-14 must be maintained for the duration of the offer period. During the offer period a "qualified registered securities depository" will hold the securities in question. When notified by the transfer agent, the depository will either tender the securities to the bidder by book-entry delivery, or if the offer is withdrawn, return the securities to the original holder.

[k] Use of Signature Guarantees Rule 17Ad-15 addresses the standards by which a transfer agent must act in regards to the acceptance or rejection of signature guarantees. The rule makes clear that a transfer agent can not engage in any activity, with regard to a guarantee, that may result in the discriminatory treatment of any guarantor institution. n188 Transfer agents must establish standards and procedures that guarantor institutions must meet in order for a guarantee to be accepted by the transfer agent. n189 The requirement, that a transfer agent have established standards, helps guarantor institutions in the preparation of the guarantee. It also provides a guideline that transfer agents must adhere to and thus decreases the likelihood of discriminatory behavior toward the guarantor institution. To facilitate review of the standards, transfer agents are required to maintain a copy of such standards and procedures and must also provide a copy of the standards and procedures to anyone who requests. n190

If the transfer agent, after determining that the guarantee fails to meet the standards set forth, rejects the guarantee, such

transfer agent must notify the guarantor of the rejection and the reasons therefor. n191 The transfer agent must also keep a record of any transfer rejected, and the reasons for rejection, for a period of three years. Nothing contained in Rule 17Ad-15 prohibits a transfer agent from rejecting a request for transfer on grounds not related to the sufficiency of the guarantee.

[4] Withdrawal from Registration

Section 17A(c) provides that a transfer agent may withdraw from registration "upon such terms and conditions" as the appropriate regulatory agency "deems necessary and appropriate in the public interest, for the protection of investors, or in furtherance of the purposes of this section. ..."

Pursuant to this section, the Commission has adopted Rule 17Ac3-1 and designated Form TA-W for use in effecting a withdrawal from registration.

Form TA-W is a one page form consisting of twelve questions which, in substance, seek verification of any pending operational problems or legal disputes, identification of any successor transfer agent and assurance that books and records will be properly maintained. n192

Withdrawal becomes effective 60 days after filing Form TA-W or such shorter time as the Commission may require. n193

(n15)Footnote 15. Registration of clearing agencies is discussed in § 2A.03[2] *infra*.

(n16)Footnote 16. Section 17A(b)(1).

(n17)Footnote 17. Section 17A(c)(1).

As discussed in § 2A.02[2] *infra*, certain transfer agents are registered through the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, or the Federal Deposit Insurance Corporation. Section 17A(c)(1) provides that these regulatory bodies may not grant an exemption from registration as a transfer agent if the Commission objects to such exemption.

(n18)Footnote 18. For a discussion of the rationale underlying this allocation of regulatory jurisdiction, see § 2A.01[2] *supra*.

(n19)Footnote 19. Sec. Exch. Act Rel. No. 34-11759, n.13 *supra*. Rule 17Ac2-1 was initially proposed in August 1975. Sec. Exch. Act Rel. No.34-11,622, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,282 (Aug. 28, 1975).

The Commission amended Rule 17Ac2-1 to revise certain provisions of Form TA-1 and adopted Rule 17Ac2-2 to establish a new form TA-2. Sec. Exch. Act Rel. No. 23,084, [1985-1986 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,975 (Apr. 1, 1986).

(n20)Footnote 20. The transfer agent registration rule adopted by the FDIC substitutes the term "Corporation" for the word "Commission" but is otherwise identical to Rule 17Ac2-1.

The Comptroller of the Currency's registration rule, which appears at 12 C.F.R. § 9.20, is also similar to Rule 17Ac2-1, except that the term "Comptroller" is substituted for the term "Commission." In addition, a new subparagraph (e) was added as follows:

Notwithstanding the provisions of paragraphs (a) and (b) of this section, if any application for registration, pursuant to section 17A(c) of the Act, is filed on or before November 17, 1975, the registration shall become effective on December 1, 1975, unless the Comptroller takes affirmative action to deny or postpone the registration in accordance with the provisions of section 17A(c) of the Act. Any amendments to an application for registration, which application has been filed on or before November 17, 1975, shall not operate to postpone the effective date of such registration as provided for in this paragraph (e).

The Federal Reserve Board's registration rule appears at 12 C.F.R. § 208.8(f) and is substantially the same as Rule 17Ac2-1.

(n21)Footnote 21. Sec. Exch. Act Rel. No. 34-11622, n.19 *supra*.

(n22)Footnote 22. Rule 17Ac2-1(a) under the Securities exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G.

(n23)Footnote 23. Section 17A(c)(2). The review period was extended to 45 days by the "Securities and Exchange Commission Authorization Act of 1987," Pub. L. No. 100-181, § 322, 1987 U.S.C.C.A.N. (101 Stat.) 1249,1257. The filing of an amendment to a pending application recommences the processing period. Rule 17Ac2-1(b).

(n24)Footnote 24. Rule 17Ac2-1(a). For a discussion of the Commission's post-filing review procedures and its authority to deny registration or place limitations on the activities of a transfer agent, *see* § 2A.03[2][d] *infra*.

Rule 17Ac2-1 and Form TA-1 were adopted on October 25, 1975. Sec. Exch. Act Rel. No. 34-11759, n.13 *supra*. Section 17A became effective as of December 1, 1975. *See* n.4 *supra*. Due to the abbreviated time period for filing and review of applications for registration, the Commission determined to enter an order as of December 1, 1975 making effective as of that date "any properly completed application for registration on Form TA-1 which is filed on or before November 17, 1975," unless the Commission initiates action to deny or postpone registration. *Id.* In addition, any amendment to an application on Form TA-1 filed on or before November 17, 1975 would not recommence the 30-day review period. *Id.*

(n123)Footnote 123. Sec. Exch. Act Rel. No. 34-17111, n.9 *supra*.

See also Sec. Exch. Act Rel. No. 34-13636, n.52 *supra*.

(n124)Footnote 124. Rule 17Ad-7.

The Commission cautions that this rule is "not intended to replace longer retention periods that might be required by state law or other federal law." Sec. Exch. Act Rel. No. 34-13636, n.52 *supra*. *See also*, Sec. Exch. Act Rel. No. 34-17111, n.9 *supra*.

For discussion of fingerprinting requirements under Rule 17f-2, *see* § 3.03[1][b] *infra*.

(n125)Footnote 125. Rule 17Ad-7.

(n126)Footnote 126. For discussion of the steps a transfer agent must take if microfilm is substituted for hard copy, *see* §§ 3.03[1][b] and 3.04[2] at n.46 *infra*.

(n127)Footnote 127. Rule 17Ad-7(g) under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, section G.

(n128)Footnote 128. Sec. Exch. Act Rel. No. 34-17111, n.9 *supra*.

(n129)Footnote 129. Rule 17Ad-4.

(n130)Footnote 130. Rule 17Ad-2 is discussed at *Section 2A.03[3][a] supra*.

(n131)Footnote 131. Rule 17Ad-3 is discussed at *Section 2A.03[3][b] supra*.

(n132)Footnote 132. In particular, the transfer agent is exempt from the provisions of Rule 17Ad-6(a)(2) through (7) and (11). The transfer agent must continue to maintain records to reflect the receipt and disposition of each routine and non-routine item (Rule 17Ad-6(a)(1)), to document agreements to act on behalf of issuers (Rule 17Ad-6(a)(8)), to document any restriction on transfer (Rule 17Ad-6(a)(9)), and also to maintain a copy of every transfer or registrar journal prepared by the transfer agent (Rule 17Ad-6(a)(10)).

(n133)Footnote 133. To so qualify, the transfer agent over a period for six consecutive months must have "received fewer than 500 items for transfer and fewer than 500 items for processing." Rule 17Ad-4(b)(1).

(n134)Footnote 134. Within ten business days following the close of the sixth consecutive month, to obtain an exemption the transfer agent shall:

(i) If its appropriate regulatory agency is either the Commission or the Office of the Comptroller of the Currency, prepare and maintain in its possession a document certifying that the transfer agent qualifies as exempt under paragraph (b)(1) of [Rule 17Ad-4];" or

(ii) If its appropriate regulatory agency is either the Board of Governors of the Federal Reserve System or the Federal Deposit Insurance Corporation, file with the appropriate regulatory agency a notice certifying that it qualifies as exempt under paragraph (b)(1) of [Rule 17Ad-4].

Rule 17Ad-4(b)(3).

As originally adopted, Rule 17Ad-4(b) required a transfer agent to file with the appropriate regulatory agency a notice "certifying" that it met the volume limitations necessary to be exempt. In October 1982 the Commission proposed to eliminate the notice requirement. Sec. Exch. Act Rel. No. 34-19142, [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,267 (Oct. 15, 1982). The Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation opposed the rescission of the notice requirement because these agencies utilize exemption notices in carrying out their regulatory responsibilities. Accordingly, when Rule 17Ad-4(b) was amended in 1983, the Commission retained the requirement that transfer agents whose "appropriate regulatory agency" is either the Board of Governors of the Federal Reserve System or the FDIC file an exemption notice with that agency. *See* Sec. Exch. Act Rel. No. 34-19860 (1983), n.55 *supra*. If the "appropriate regulatory agency" is the Commission, no filing is required.

(n135)Footnote 135. Rule 17Ad-4.

(n136)Footnote 136. The transfer agent is not exempt from other provisions of Rule 17Ad-2, such as the duty to turn around "promptly" any routine item not turned around within three business days and to give "diligent and continuous attention" to all non-routine items (Rule 17Ad-2(e)), the obligation to forward "promptly" to the processing or transfer center all items received at satellite facilities (Rule 17Ad-1(f)), and the duty to return "promptly" items tendered by an outside registrar (Rule 17Ad-2(g)).

(n137)Footnote 137. The exempt transfer agent is only exempt from the provisions of Rules 17Ad-6(a)(2) through (7) and (11). *See* n.124 *supra*.

(n138)Footnote 138. Rule 17Ad-5. An inquiry may come from any participant in the transfer process, including retail customers.

(n139)Footnote 139. Sec. Exch. Act Rel. No. 34-13636, n.52 *supra*. Depending upon the nature of the inquiry, however, Rule 17Ad-5 specifies the specific details that must accompany the inquiry for the transfer agent to be subject to the timetable specified in that Rule. *See* Rule 17Ad-5(a) through (d).

(n140)Footnote 140. Rule 17Ad-5(a).

(n141)Footnote 141. The response must include certain specific data, such as:

the date and manner in which the completed item was made available, the addressee and address to which it was made available and the number of any new certificate which was registered and the name in which it was registered.

Rule 17Ad-5(a).

(n142)Footnote 142. Rule 17Ad-5(b).

(n143)Footnote 143. "If a new certificate is dispatched or mailed to the presenter within five business days following receipt of a request pertaining to a certificate, no further response to the inquiry shall be required. ..."

Id.

(n144)Footnote 144. Rule 17Ad-5(c).

(n145)Footnote 145. The transfer agent may require "assurance of payment of a reasonable fee" prior to processing the inquiry. *Id.*

(n151)Footnote 151. For a discussion of the origin and application of this rule, *see* Sec. Exch. Act Rel. No. 34-19142, n.126 *supra*. and Sec. Exch. Act Rel. No. 34-19860, n.55 *supra*.

(n152)Footnote 152. A "recordkeeping transfer agent" is "the transfer agent that maintains and updates the master securityholder file." Rule 17Ad-9(h). *See* n.145 *infra*.

(n153)Footnote 153. The "master securityholder file" is "the official list of individual securityholder accounts." Rule 17Ad-9(b). For uncertified securities of registered investment companies, the master securityholder file "may consist of multiple, but linked, automated files." *Ibid*.

(n154)Footnote 154. A "subsidiary file" is "any list or record of accounts, securityholders, or certificates that evidence debits or credits that have not been posted to the master securityholder file." Rule 17Ad-9(c).

(n155)Footnote 155. Rule 17Ad-10(b).

(n156)Footnote 156. The term "promptly" means the following time period "after issuance, purchase, transfer or redemption of a security":

(i) With respect to recordkeeping transfer agents (other than transfer agents that perform transfer agent functions with respect to redeemable securities issued by investment companies registered under Section 8 of the Investment Company Act of 1940) that are exempt transfer agents under Section 240.17Ad-4(b), 30 calendar days;

(ii) With respect to recordkeeping transfer agents (other than transfer agents that perform transfer agent functions with respect to redeemable securities issued by investment companies registered under Section 8 of the Investment Company Act of 1940) that (A) perform transfer agent functions solely for their own or their affiliated companies' securities issues, and (B) employ batch posting systems, ten business days; and

(iii) With respect to all other recordkeeping transfer agents, five business days; Provided, however, that all securities transferred, purchased, redeemed or issued prior to record date, but posted subsequent thereto, shall be posted as of the record date.

Rule 17Ad-10(a)(2).

(n157)Footnote 157. The term "certificate detail" is defined as follows:

with respect to certificated securities, at minimum, all of the following, and with respect to uncertificated securities, includes items (2) through (8):

(1) The certificate number;

(2) The number of shares for equity securities or the principal dollar amount for debt securities;

(3) The securityholder's registration;

(4) The address of the registered securityholder;

(5) The issue date of the security;

(6) The cancellation date of the security;

(7) In the case of redeemable securities of investment companies, an appropriate description of each debit and credit (i.e., designation indicating purchase, redemption, or transfer); and

(8) Any other identifying information about securities and securityholders the transfer agent reasonably deems essential to its recordkeeping system for the efficient and effective research of record differences.

Rule 17Ad-9(a).

(n158)Footnote 158. Rule 17Ad-10(a)(1).

(n159)Footnote 159. A "record difference" exists when

either (1) The total number of shares or total principal dollar amount of securities in the master security-holder file does not equal the number of shares or principal dollar amount in the control book; or
(2) The security transferred or redeemed contains certificate detail different from the certificate detail currently on the master security-holder file, which difference cannot be immediately resolved.

Rule 17Ad-9(g).

(n160)Footnote 160. Rule 17Ad-10(a)(1).

(n161)Footnote 161. Rule 17Ad-10(c)(1).

(n162)Footnote 162. Rule 17Ad-10(c)(2). The report must state the "principal dollar amount of debt securities or the number of shares and related market value of equity securities comprising any buy-in. ..." *Id.*

The Commission has noted that there appear to be only three common instances that necessitate a buy-in:

(1) a transfer in violation of a stop order, *see* § 2.01[1] *supra*;

(2) the issuance of a new certificate that exceeds in dollar or share amount the former certificate, or

(3) the erroneous issue of a certificate upon cancellation of a certificate for a different issue. Sec. Exch. Act Rel. No. 19860, n.55 *supra*.

(n163)Footnote 163. Rule 17Ad-10(g).

(n164)Footnote 164. *See* discussion at § 2A.02[3][e] *supra*.

(n165)Footnote 165. According to the Commission, Rule 17Ad-11 will foster two objectives:

First, the reports would provide issuers with information necessary to make informed decisions about whether the transfer agent is performing its recordkeeping functions in a satisfactory manner, and whether the amount of aged record differences is sufficiently serious to require disclosure to securityholders. In this manner, the reports should enhance the ability of issuers to monitor transfer agent performance, thereby reducing the need for direct government intervention.

Second, the reports provide regulatory authorities with timely information concerning the source and extent of aged record differences and buy-ins and the identity of registered transfer agents who are experiencing serious difficulties in posting their records. Armed with such reports regulatory authorities should be able to focus their limited resources more effectively on those transfer agents whose performance may represent potential harm to investors or a threat to the smooth operation of the national system for clearance and settlement of securities transactions.

Sec. Exch. Act Rel. No. 34-19860, n.55 *supra*.

(n166)Footnote 166. If required, the report shall be sent

(i) By every recordkeeping transfer agent (other than a recordkeeping transfer agent that performs transfer agent functions solely for its own securities):

(A) To the official performing corporate secretary functions for the issuer of the securities for which the aged record difference exists or for which the buy-in occurred;

(B) With respect to an issue of municipal securities, to the chief financial officer of the issuer of the securities for which the aged record difference exists or for which the buy-in occurred; or

(C) If it acts as a service company, to the named transfer agent; and

(ii) By every named transfer agent that is engaged by an issuer to maintain and update the master securityholder file:

(A) To the official performing corporate secretary functions for the issuer of the securities for which the aged record difference exists or for which the buy-in occurred; or

(B) With respect to an issue of municipal securities, to the chief financial officer of the issuer of the securities for which the aged record difference exists or for which the buy-in occurred.

Rule 17Ad-11(a)(3).

(n167)Footnote 167. For a definition of "record difference," *see* n.151 *supra*.

(n168)Footnote 168. *See* Rule 17Ad-10(g) and § 2A.02[3][f] *supra* .

(n169)Footnote 169. *See* n.149 *supra*.

(n170)Footnote 170. *See* n.144 *supra*.

(n171)Footnote 171. Pursuant to Rule 17Ad-11(c), the trigger point to require submission of a quarterly report is:

(i) \$300,000 if the transfer agent is a recordkeeping transfer agent for 5 or fewer issues;

- (ii) \$500,000 for 6-24 issues;
- (iii) \$800,000 for 25-49 issues;
- (iv) \$1 million for 50-74 issues;
- (v) \$1.2 million for 75-99 issues;
- (vi) \$1.4 million for 100-499 issues;
- (vii) \$1.6 million for 500-999 issues;
- (viii) \$2.6 million for 1000-1999 issues; and
- (ix) An additional \$1 million for each additional 1000 issues.

A report concerning buy-ins of all issues for which a transfer agent acts as recordkeeping transfer agent is required when the aggregate market value of all mandatory buy-ins during that calendar quarter exceeds \$100,000.

Finally, when a recordkeeping transfer agent has any debits or credits for securities transferred, purchased, redeemed or issued that are unposted to the master securityholder and subsidiary files for more than five business days after debits and credits are required to be posted, the agent is required to report such fact to its appropriate regulatory agency and shall state in that report what steps have been, and are being, taken to correct the situation.

(n172)Footnote 172. Sec. Exch. Act Rel. No. 34-19860, n.55 *supra*. According to the Commission:

Registered transfer agents, in addition to possessing securities in transfer, may have custody and possession of substantial amounts of funds and securities for a variety of reasons. First, some transfer agents maintain balanced certificates in their capacity as transfer agent custodians. Second, an increasing number of transfer agents are becoming administrators of dividends reinvestment plans ('DRPs'), which require the handling and safeguarding of both funds and securities. Third, dividend checks and certificates of securityholders who cannot be located must be retained by transfer agents for various periods of time under state law. Fourth, transfer agents often maintain a substantial working supply of unissued securities certificates for each issue. Fifth, some transfer agents, as authorized by their issuers, distribute cash dividends to the securityholders shown on the master securityholder file. Finally, some transfer agents may be the entities through which mutual fund shares are redeemed.

(n174)Footnote 174. Sec. Exch. Act Rel. No. 34-19860, n.55 *supra*.

(n175)Footnote 175. Rule 17Ad-12(a)(2).

(n176)Footnote 176. For a discussion of the "appropriate regulatory agency," *see* § 2A.02[2][a] *supra*.

(n177)Footnote 177. Rule 17Ad-13. In mandating this report, the Commission stated that it:

believes that the goal of the external Evaluation, ultimately, is to enhance securityholder protection. The safe and accurate performance of transfer agent functions depends on the accuracy and reliability of the systems and procedures used by registered transfer agents in performing transfer agent activities, and the Commission believes it is imperative that there be systematic verification that transfer agents operate safely and accurately. The Commission also believes that an adequate system of internal accounting control is critical to the accurate and safe clearance and settlement system for securities transactions. Moreover, through the discipline associated with an External Evaluation, transfer agents will be informed on a timely basis about any inadequacies in their system of internal accounting control for transfer agent activities and for safeguarding related funds and securities and should, as a result, be able to make any needed changes on a timely basis.

The Commission believes that the External Evaluation is a critical feature of the scheme of internal disciplines that the rules adopted today are designed to promote. The External Evaluation provides an important objective review and should promote uniform high-quality transfer agent performance. Moreover, the External Evaluation should increase public confidence in the national clearance and settlement system

Sec. Exch. Act Rel. No. 34-19860, n.55 *supra*.

(n178)Footnote 178. Rule 17Ad-13. The report is required to be filed within 90 calendar days of date of the study. *Id.*

(n179)Footnote 179. Rule 17Ad-13(a)(3).

(n180)Footnote 180. *Id.* Rule 17Ad-13(a)(3) further provides: "Occurrence of errors or irregularities more frequently than in isolated instances may be evidence that the system has a material inadequacy. A significant adverse effect on a transfer agent's ability promptly and accurately to transfer record ownership and safeguard related securities and funds could result from any condition or conditions that individually, or taken as a whole, would reasonably be expected" to:

(1) Inhibit the transfer agent from promptly and accurately discharging its responsibilities under its contractual agreement with the issuer;

(2) Result in material financial loss to the transfer agent; or

(3) Result in a violation of Sections discussed in § 2A.03[3][a], [f] and [h] respectively, *supra*.

(n181)Footnote 181. Rule 17Ad-13(b).

(n182)Footnote 182. Rule 17Ad-13(d)(1)(i) through (iii).

(n183)Footnote 183. Rule 17Ad-13(d)(2). In addition, if the transfer agent functions pertain to redeemable securities issued by a registered investment company, the transfer agent is exempt from Rule 17Ad-13 if it

"maintains a master securityholder file consisting of fewer than 1000 shareholder accounts, in the aggregate, for each of such issues. ..."

Id.

(n184)Footnote 184. Rule 17Ad-3(d)(3).

(n185)Footnote 185. The Commission may exempt specific transfer agents or certain transactions for a broad range of reasons including the protection of investors, the maintenance of fair markets, or for the overall public good. Rule 17Ad-14(d) under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G.

(n186)Footnote 186. *See § 2A.03[3]* for the definition of a 'qualified registered transfer agent.'*See also* Rule 17Ad-14(c)(4).

(n187)Footnote 187. Rule 17Ad-14(a). Before a transfer agent is required to open an account, the securities of the subject company must be declared eligible for the services of a qualified registered securities depository. Thereafter, once a tender or exchange offer is made, the transfer agent has two days to open the account.

(n188)Footnote 188. Rule 17Ad-15.

CHAPTER 2A Registration and Regulation of Transfer Agents and Clearing Agencies *

1-2A Federal Securities Exchange Act of 1934 § 2A.03

§ 2A.03 Registration and Regulation of Clearing Agencies

[1] The Registration Requirement

Section 17A of the Securities Exchange Act of 1934 provides for federal regulation of the securities handling process, specifically the registration and regulation of both clearing agencies and transfer agents. n1 Section 17A(b) requires every clearing agency to register with the Commission if it performs any clearing agency function for any security other than an exempted security. n2

The term "clearing agency" is defined in Section 3(a)(23) of the Exchange Act to include "any person" n3 who

- is an intermediary for payments or deliveries or both in connection with transactions in securities; or
- provides "facilities for comparison of data respecting the terms of settlement of securities transactions, to reduce the number of settlements of securities transactions, or for the allocation of securities settlement responsibilities." n4

The term "clearing agency" also includes any person, such as a securities depository, who

- functions as a "custodian of securities" in connection with a system for the central handling of securities by which all securities of a particular class or series of any issuer deposited within the system are treated as fungible and may be "transferred, loaned or pledged by bookkeeping entry" without physical delivery of securities certificates; or
- otherwise "permits or facilitates" the settlement of securities transactions or the hypothecation or lending of securities without physical delivery of securities certificates. n5

Excluded from the definition of a "clearing agency" n6 is any:

- federal reserve bank, federal home loan bank or federal land bank;
- national securities exchange or registered securities association, n7 which provides facilities only

"for comparison of data respecting the terms of settlement of securities transactions effected on such exchange or by means of any electronic system operated or controlled by such association"; n8

- bank, broker, dealer, savings and loan association or cooperative bank that functions "solely" as an agent for another clearing agency or that performs clearing agency services "solely" as a part of its "customary" professional activities unless the Commission, by rule, mandates registration; n9

- life insurance company, its registered separate account or subsidiary that performs clearing agency functions "solely" for variable annuity contracts or variable life insurance policies; n10

- registered open-end investment company or unit investment trust that functions as a clearing agency "solely" for the shares that it issues; n11 and

- person who functions "solely" as a transfer agent. n12

The Commission "by rule or order, upon its own motion or upon application" is empowered to exempt "conditionally or unconditionally" any clearing agency or security or class of clearing agencies or securities from any provision of Section 17A and the rules and regulations thereunder upon a finding that such exemption "is consistent with the public interest, the protection of investors and the purposes of [Section 17A], including the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds." n13

Unless otherwise exempt, every clearing agency is required by Section 17A to register with the Commission. In this regard, the registration process for clearing agencies differs from that applicable to transfer agents. While transfer agents are registered through the Commission, the Comptroller of the Currency, the Board of Governors of the Federal Reserve System or the Federal Deposit Insurance Corporation, depending upon which of these four regulatory agencies oversees the day-to-day affairs of the transfer agent, all clearing agencies are registered through the Commission. The bank regulatory agencies nevertheless have the authority to object to registration of any entity over which an agency has direct jurisdiction and also to adopt and enforce rules and regulations applicable to clearing agencies subject to their respective jurisdiction. n14

[2] The Registration Process

[a] Application for Registration. Every clearing agency seeking registration is required to file with the Commission an application for registration on Form CA-1. n15

An applicant is required to file four "completed copies" of this Form. n16 Each copy must bear an "original, manual signature." n17 In the case of a corporation, Form CA-1 must be executed by a "principal officer." n18 For all other applicants, the Form must be signed by a "duly authorized principal." n19

The date upon which the Commission receives a Form CA-1 is deemed to be its filing date "if all the requirements with respect to the filing have been complied with." n20 The processing period commences upon the filing date. n21

[b] Form CA-1. The Form consists of nine questions and requires submission of eighteen exhibits and possibly one additional exhibit if this is an application for exemption from registration as a clearing agency. n22 The questions solicit basic information about the applicant, e.g. name, business address, type of business organization, fiscal year and the number of employees engaged in clearing agency activities.

In addition, the applicant must provide certain information regarding its insurance carrier, and discuss "the operational, organizational or other rules, procedures or practices" that (a) create exposure to the applicant, or (b) protect the applicant against losses n23 if a participant fails to perform its obligations to the clearing agency. n24

Moreover, the applicant must discuss its internal policies and procedures for reconciling differences in its clearing agency activities, n25 and state, "the dollar amount of the potential exposure of registrant ... as a result of differences ... in its clearing agency activities not resolved after twenty business days." n26

An application for registration must be accompanied by various exhibits that provide supplemental information concerning the applicant's business organization, n27 financial condition, n28 *operational capacity* n29 and accessibility to the clearing agency services. n30

[c] The Review Procedure and Criteria for Granting Registration. The Commission will acknowledge receipt of an application for registration; n31 however, a Form CA-1 that is not properly prepared and executed may be returned "as not acceptable for filing." n32

Registered clearing agencies are deemed to be "self-regulatory organizations," n33 and, therefore, the registration procedure is governed by Section 19 of the Exchange Act. n34 This section requires that the Commission, upon the filing of an application for registration, "shall" publish notice of the filing and afford interested persons an opportunity to comment. Notices of applications are published in the Federal Register.

Section 19(a)(1) also requires that the Commission, within ninety days after publication of a notice, either grant such registration or institute a proceeding to determine whether to deny registration. If a proceeding is commenced, the Commission is required to issue a notice specifying "the grounds for denial under consideration" and schedule a hearing on the application. A final decision is required within 180 days after publication of the notice of filing. n35

If the Commission is not the "appropriate regulatory agency" for the applicant, n36 three special provisions apply.

First, the Commission is required, before granting an application, to wait at least sixty days after publication of the notice of application unless the "appropriate regulatory agency" has notified the Commission that the applicant is organized and has the capacity "to safeguard securities and funds in its custody or control" and that the rules of the applicant are designed to assure the safeguarding of such securities and funds. n37

Second, the Commission is required, if requested by the appropriate regulatory agency, to institute a proceeding to determine whether to grant an application for registration. n38

Finally, the Commission is required to deny registration if the appropriate regulatory agency makes a determination, prior to the conclusion of the Commission's proceeding, that the applicant "is not ... organized or does not have" the capacity to safeguard securities or funds in its control or custody or for which it has responsibility and the reasons for such determination. n39

In addition to the procedural mandate of Section 19(a), the Commission is required by Section 17A(b) to make nine determinations before granting registration to any applicant. n40

The first determination is that the applicant's organization and operational capacity enable the applicant to:

- facilitate the clearance and settlement of securities transactions;
- safeguard securities and funds;
- carry out the provisions of the Exchange Act.
- enforce compliance by its participants with the rules of the steering agency; and

- carry out the purposes of Section 17A. n41

The remaining determinations focus upon the applicant's rules and require a finding by the Commission that, among other things, the rules:

- provide reasonable access, fair representation of participants in the applicant's affairs and an equitable allocation of dues and fees;
- do not impose a schedule of prices for services rendered by participants;
- provide for appropriate discipline of participants;
- assure fundamental fairness in disciplinary actions and denials of access; and
- carry out the purposes of Section 17A and do not impose any burden on competition "not necessary or appropriate in furtherance of the purposes of the Exchange Act." n42

The Commission, if requested by the applicant, may grant temporary registration without making all nine of the determinations required by Section 17A, but such temporary registration is effective for only eighteen months. n43 Within nine months after permitting temporary registration, the Commission is required either to grant permanent registration or to commence a proceeding concerning the application. n44

After more than three years of debate, over the registration standards to be imposed by the Commission and the scope and impact of such registration, the Commission in 1980 announced specific standards that applicants would be required to satisfy before the Commission would render the determinations required by Section 17A. n45 If an applicant believes that a standard is "inappropriate," a waiver of that standard may be requested by submitting to the Division of Market Regulation "a detailed description" of:

- the reasons why the standard is inappropriate;
- a proposed alternative to achieve the stated objective of the standard; and
- why the proposed alternative satisfies the statutory criteria. n46

[d] Updating and Amending Form CA-1. An applicant may update or amend its Form CA-1 by filing with the Commission four copies of the page on which the amended or revised answer appears. n47 The amended page must be accompanied by properly completed cover and execution pages. n48 The page must be completed in full, including all unamended items. n49

Form CA-1 is required to be amended "promptly" if the information reported at Items 1 to 3 becomes "inaccurate, incomplete or misleading." n50 This obligation survives the effective date of registration. n51

The filing of additional information or documents prior to the effective date of registration extends by ninety days the processing period. n52

Every amendment or supplement to a Form CA-1 is deemed to be a "report" or "application" within the meaning of Section 17, n53 and, therefore, the clearing agency is required to file a copy of the amendment or supplement with the "appropriate regulatory agency." n54

If a registered clearing agency intends to amend any of the rules or operating policies that originally were submitted as part of its application on Form CA-1, the clearing agency is required, due to its classification as a "self-regulatory organization," n55 to comply with special Commission rules and procedures. n56

[e] Clearing Agency Registrations to Date. Although Section 17A was adopted in 1975 (effective December 1st of that year) n57 the Commission did not grant full registration to any clearing agency until September 1983. n58 This eight year period witnessed an unusual maelstrom of legal maneuvers by the Commission and various clearing agencies.

The drama commenced in November 1975, when the Commission announced that it would not be able, by the effective date of Section 17A, either to grant registration or to determine whether to grant exemptions from registration to all clearing agencies. n59 To permit existing clearing agencies to continue in operation, the Commission concluded that temporary registration would be granted to clearing agencies which had applications on file as of November 24, 1975, and had requested such status. n60

By the end of November 1975, thirteen clearing agencies had requested temporary registration, n61 and additional requests by other clearing agencies continued for several months. n62

In May 1976, the Commission instituted proceedings to determine whether to deny or grant registration to the National Securities Clearing Corporation ("NSCC"). n63 A similar proceeding was instituted in September 1976 with respect to thirteen other clearing agencies. n64

After more than a year of deliberation, the Commission granted registration to the NSCC in January 1977. n65 The Commission's action came under sharp Congressional criticism n66 and ignited litigation by Bradford National Clearing Corporation challenging the Commission's order granting registration. n67 In the midst of these developments, the Commission released a statement of proposed standards by which the Division of Market Regulation would evaluate pending and future applications for registration, excluding NSCC which had already been registered. n68 These proposed standards were revised in March 1978. n69

In the fall of 1978, the United States Court of Appeals for the District of Columbia Circuit affirmed the Commission's order granting registration to NSCC, but directed that the Commission reinstitute its review proceeding to reconsider certain aspects of the NSCC's pricing structure and its facilities management agreement. Pursuant to this mandate, the Commission requested public comments on these issues. n70

By the summer of 1980, the Commission had adopted final standards to be applied in evaluating registration applications of clearing agencies. n71 The Commission subsequently requested that all clearing agencies temporarily registered resubmit a Form CA-1 complying with the new standards for registration. n72

In February 1981, the Commission concluded its reconsideration of the NSCC application for registration and once again decided in favor of NSCC. n73

Finally, in September 1983, full registrations were granted by the Commission to nine clearing agencies, including NSCC and Bradford. n74

[f] Exemptions from Registration. The Commission is empowered to grant exemptions from registration upon a finding that such exemption "is consistent with the public interest, the protection of investors" and the purposes of Section 17A. n75 Applications for an exemption must be made on Form CA-1 with all applicable items answered "in full." n76

In addition, the exemption application must be accompanied by a statement "demonstrating" why the grant of an exemption is consistent with the applicable statutory criteria. n77

[3] Special Regulations Applicable to Clearing Agencies

[a] Clearing Agencies as Self-Regulatory Organizations. Congress has defined the concept of a "self regulatory organization" n78 ("SRO") to include all registered clearing agencies. n79 Therefore, clearing agencies are subject to a wide variety of special statutory and regulatory requirements that are not applicable to transfer agents.

As an SRO, a registered clearing agency must comply with the provisions of Section 19 of the Exchange Act. Section 19:

- establishes a procedural framework for the consideration of applications for registration; n80
- requires that a copy of every proposed SRO rule or rule change be filed with and approved by the Commission, after interested persons are given and opportunity to comment; n81
- directs that an SRO file with the appropriate regulatory agency a notice of any final disciplinary action, denial of membership or right of participation, or order barring a person from association with a member, n82 which notice "shall" be subject to review by the agency; n83
- establishes standards to be applied by the appropriate regulatory agency in reviewing notices filed with it n84 and authorizes the agency to modify a disciplinary sanction under certain circumstances; n85
- mandates that every SRO enforce compliance by its participants with its own rules; n86 and
- grants to the appropriate regulatory agency the authority to sanction an SRO for violating any provision of the Exchange Act or for failure to enforce its rules, n87 and the authority to sanction members and participants for violating the rules of the SRO. n88

The Commission is also empowered to allocate regulatory responsibilities among SRO's, including clearing agencies, to foster cooperation and coordination with respect to regulation of participants in more than one SRO. n89

[b] Participation--Statutory Disqualification. A registered clearing agency *may* deny participation, and *must* deny participation if directed by the Commission, to any person subject to a "statutory disqualification." n90 In this context, a clearing agency is required to file a notice with the Commission at least 30 days prior to admitting to participation a statutorily disqualified person if the agency knew "or in the exercise of reasonable care should have known" that the person was disqualified. n91

In addition, a clearing agency *may* deny or condition participation if a person fails to meet "standards" of financial responsibility, operational capacity, experience and competence. n92 Examinations may be conducted to verify the qualifications of an applicant. n93

[c] Disciplinary Actions and Denial of Participation. As discussed above, n94 clearing agencies are required to enforce compliance with their rules by participants. In any disciplinary proceeding, the clearing agency is required to state the "specific charges" and to give the respondent an opportunity to defend himself. n95

To impose a sanction, the clearing agency must issue a "statement" that specifies the improper acts, practices or omissions, the rules that have been violated, the sanction imposed "and the reasons therefor." n96

A similar "statement" must be issued when a clearing agency denies, limits, or prohibits participation. n97

To assure the integrity of the clearing and settlement system, clearing agencies are authorized n98 to "summarily

suspend and close the accounts" of any person who is

- expelled or suspended from any self-regulatory organization; or
- has defaulted in his obligation to deliver funds or securities to the clearing agency.

In addition, the clearing agency must notify the appropriate regulatory agency that suspension and closing of accounts are necessary for the protection of the clearing agency and its participants, creditors, or investors. n99

If such a suspension is ordered, the suspended participant must be given a "prompt" hearing by the clearing agency. n100 In addition, the agency, on its own motion or upon request of any interested person, may stay the suspension if the agency concludes that the stay is "consistent" with the public interest and the protection of investors. n101

[d] Access to Services. When Congress adopted the Securities Acts Amendments of 1975, there was substantial debate and evaluation over the competitive impact of the legislation and the anticompetitive forces within the securities industry. n102 Consistent with this concern, Section 17A(b)(6) prohibits a clearing agency from prohibiting or restricting access by any person to the services offered by any participant.

[e] Securities Position Listing. The Commission in 1979 adopted Rule 17Ad-8 n103 which requires that clearing agencies furnish to issuers a securities position listing upon request. n104 The origin of the rule was a recommendation in the Final Report of the Street Name Study n105 that issuers have access to a list of persons on whose behalf depositories hold issuer securities. n106 In the Commission's view, access to such a list would facilitate communication between issuers and their shareholders. Clearing agencies may impose a "reasonable" fee for providing such a list. n107

[f] Books and Records. A registered clearing agency is required to maintain such books and records as the Commission may prescribe. n108 The "appropriate regulatory agency" may also adopt supplemental recordkeeping requirements. n109

All books and records are subject to inspection "at any time" by the Commission and the appropriate regulatory agency. n110 The Commission is required, however, to give notice to and "consult with" the appropriate regulatory agency before conducting any "examination" of a clearing agency to avoid "unnecessary regulatory duplication or undue regulatory burdens." n111

[4] Coordination and Cooperation Among the Regulatory Agencies

Several provisions of the Exchange Act are designed to promote cooperation and coordination among the various agencies that regulate clearing agencies. Applications for registration, for example, are required to be filed with *both* the Commission and the appropriate regulatory agency. n112 The same filing requirement applies to every notice, proposal, and report. n113

The Commission may not grant an application for registration without notice to the appropriate regulatory agency. n114 Similarly, the Commission may not conduct an "examination" of a clearing agency for which it is not the appropriate regulatory agency without notice to and consultation with such agency. n115

Moreover, Congress specifically directed the Commission and the various bank regulatory agencies to "consult and cooperate with each other" in sharing their regulation of clearing agencies. n116 This includes giving at least 15 days advance notice before public issuance of any proposed rule or regulation. n117 Congress further directed the agencies that, in adopting rules and regulations, they should ensure that, to the extent possible, such regulatory standards are "in accord with sound banking practices" insofar as they affect banking institutions. n118 In an effort to minimize potential jurisdictional conflicts, Congress also directed that the appropriate regulatory agency has "primary responsibility" for examination of clearing agencies under its control and related compliance action. n119

[5] Withdrawal from Registration

Because registered clearing agencies are deemed to be self-regulatory organizations, n120 withdrawal from registration is governed by Section 19(a)(3) of the Exchange Act. This Section mandates that a written notice be filed with the Commission, but authorizes the Commission to adopt rules governing the withdrawal process. Section 19(a) also authorizes the Commission to impose "terms and conditions" prior to permitting withdrawal. Moreover, the Commission may cancel registration upon a finding that the SRO has ceased to do business or is no longer existence.

FOOTNOTES:

(n1)Footnote 1. Registration and regulation of transfer agents is discussed in § 2A.02 *supra*. A description of the operational problems that motivated Congress to adopt Section 17A are discussed in § 2A.01 *supra*.

(n2)Footnote 2. The term "exempted security" is defined in Section 3(a)(12) of the Exchange Act and discussed in § 4.01 *infra*. For purposes of Section 17A, however, municipal securities are not classified as "exempted securities." Section 3(a)(12) of the Securities Exchange Act of 1934 reprinted in the Primary Law Sourcebook, Volume B, section F. Therefore, persons acting as clearing agents for municipal securities are required to register pursuant to Section 17A even though the securities are exempted from various provisions of the Exchange Act.

(n3)Footnote 3. The term "person" means a "natural person, company, government or political subdivision, agency or instrumentality of a government." Section 3(a)(9).

(n4)Footnote 4. Congress specifically intended Section 17A to encompass "every facet of the securities handling process in the United States--clearing agencies, securities depositories, corporate issuers and transfer agents." Conference Report concerning the Securities Acts Amendments of 1975, 94th Cong., 1st Sess. 102 (1975). Accordingly, the definition of the term "clearing agency" encompasses an unusually wide range of administrative functions.

(n5)Footnote 5. Section 3(a)(23)(A).

(n6)Footnote 6. Section 3(a)(23)(B).

(n7)Footnote 7. National securities exchanges and securities associations are discussed in § 2.02 *supra*.

(n8)Footnote 8. Section 3(a)(23)(B)(ii).

(n9)Footnote 9. Section 3(a)(23)(B)(iii).

To mandate registration, the Commission must find that registration is necessary or appropriate "to assure the prompt and accurate clearance and settlement of securities transactions or to prevent evasion" of the Exchange Act. *Id.*

(n10)Footnote 10. Section 3(a)(23)(B)(iv).

(n11)Footnote 11. Section 3(a)(23)(B)(v).

(n12)Footnote 12. Section 3(a)(23)(B)(vi).

Transfer agents are discussed in § 2A.03 *supra*. If, however, a "person" functions as both a transfer agent and a clearing agent, registration in both capacities is required. Section 17A(b)(1).

(n13)Footnote 13. Section 17A(b)(1).

(n14)Footnote 14. Section 17A(b)(2).

See §§ 2A.02[2][a], 2A.02[3][c] and [e], *supra* and 2A.03[2][c] *infra* .

(n15)Footnote 15. In November 1975, the Commission adopted Rule 17Ab2-1 which specifies the registration procedures applicable to clearing agencies. Sec. Exch. Act Rel. No. 34-11787, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,320 (Nov. 3, 1975). Simultaneously, the Commission designated Form CA-1 as the appropriate registration form. *Id.* Final standards were adopted in 1980. Sec. Exch. Act Rel. No. 34-16,900, Fed. Sec. L. Rep. (CCH) P 26,303G (June 17, 1980).

(n16)Footnote 16. Instruction I.2 to Form CA-1.

In addition, if the Commission is not the "appropriate regulatory agency" for the applicant, see § 2A.02[2][a] *supra*, a "signed copy" of the application must be filed with the "appropriate regulatory agency." Section 17(c)(1) of the Exchange Act. See also Instruction I.1 to Form CA-1.

(n17)Footnote 17. Instruction I.4 to Form CA-1.

(n18)Footnote 18. For purposes of Form CA-1, the term "principal officer" means "the president, vice president, treasurer, secretary, comptroller or any other person performing a similar function." Instruction I.5 to Form CA-1.

(n19)Footnote 19. *Id.*

(n20)Footnote 20. Instruction I.3 to Form CA-1. But see § 2A.03[2][c] *infra*.

(n21)Footnote 21. For a discussion of the review procedures and processing timetable, see § 2A.03[2][c] *infra*.

(n22)Footnote 22. Applicants are warned by the Commission that "intentional misstatements or omissions of fact constitute Federal Criminal Violations." Form CA-1, citing 15 U.S.C. 78ff(a) and 18 U.S.C. 1001.

(n23)Footnote 23. Such protective measures might include maintenance of a clearing or participant's fund or marking to the market open obligations, i.e., computing the purchase price of disputed transfers based upon the closing price of the security in order to estimate the amount at risk and, thereafter, establishing a reserve account in an amount equal to all or a percentage of the "at risk" proceeds.

(n24)Footnote 24. Items 5(c)(i) and (d)(i) of Form CA-1.

(n25)Footnote 25. This reconciliation must focus specifically upon "long and short stock record differences and dividend differences." Item 7(a) to Form CA-1.

(n26)Footnote 26. In calculating this potential exposure, the applicant is not to offset long differences against short differences and is not to offset any suspense account items. Item 7(b) to Form CA-1.

(n27)Footnote 27. In summary, the applicant must provide information concerning:

(1) any person who, directly or indirectly, "may control or direct the management or policies of the registrant" (Exhibit A to Form CA-1);

(2) every officer, trust officer, manager or person performing a similar function, including name, title, area of responsibility and summary of business experience for preceding five years (Exhibit B to Form CA-1);

1-2A Federal Securities Exchange Act of 1934 § 2A.03

- (3) the registrant's organizational structure. This description should be in "narrative and graphic" form (Exhibit C to Form CA-1);
- (4) persons who, directly or indirectly, are controlled by or are under common control with the clearing agency (Exhibit D to Form CA-1);
- (5) the "currently effective" constitution, articles of incorporation, bylaws and "all dues, fees and other charges imposed by registrant for its clearing agency activities" (Exhibit E of Form CA-1);
- (6) any material pending legal proceeding "other than ordinary and routine litigation incidental to the business ...", including any such proceeding known to be contemplated by the Commission (Exhibit F to Form CA-1);
- (7) all contracts with any national securities exchange, national securities association, clearing agency, or securities market for which the clearing agency acts as a clearing agency or performs clearing agency functions (Exhibit G to Form CA-1); and
- (8) all offices in which clearing agency functions are performed (Exhibit I to Form CA-1).

For Exhibits E and G copies of relevant documents must be submitted to the Commission.

(n28)Footnote 28. Each applicant is required to submit a balance sheet and statement of income and expenses for its most recent fiscal year, certified by an independent accountant (Exhibit H to Form CA-1). "If certified financial information is not available, uncertified financial information should be submitted." *Id.*

(n29)Footnote 29. *In summary, the applicant must provide operational capability information consisting of:*

- (1) a narrative description of each clearing agency service or function to be performed by the applicant (Exhibit J to Form CA-1);
- (2) a description of the "measures or procedures" employed by the applicant to provide for "the security of any system which performs the function of a clearing agency" (Exhibit K to Form CA-1);
- (3) a description of the "measures or procedures" to provide for "the safeguarding of securities and funds" in the applicant's custody or control (Exhibit L to Form CA-1); and
- (4) a description of "all back-up systems or subsystems" that are designed to prevent interruptions in the performance of any clearing agent function as a result of technical or other malfunction, if the applicant utilizes automated facilities or systems to perform clearing agency functions, (Exhibit M to Form CA-1).

Exhibits K and L must "identify any instances" within the past year in which the security measures or safeguards failed to prevent unauthorized access and the measures taken to prevent a recurrence of any such incident.

(n30)Footnote 30. *In summary, the applicant must provide:*

- (1) a list of the persons who participate or who have applied for participation in the applicant's clearing agency activities (Exhibit N to Form CA-1);
- (2) a description of any "specifications, qualifications or other criteria" that "limit, are interpreted to

limit, or have the effect of limiting" access to or use of the clearing agency services and a statement of the reasons for imposing such limitations (Exhibit O to Form CA-1);

(3) a copy of every form of contract "governing the terms on which persons who subscribe to clearing agency services ..." (Exhibit P to Form CA-1);

(4) a schedule of "any prices, rates or fees" for services to be rendered by the applicant (Exhibit Q to Form CA-1); and

(5) a schedule of "any prohibitions or limitations" imposed by the applicant on access "by any person" to services to be offered by the applicant (Exhibit R to Form CA-1).

See § 2A.03[3][d] infra.

(n31)Footnote 31. Sec. Exch. Act Rel. No. 34-11787, n.15 *supra*.

(n32)Footnote 32. Instruction I.3 to Form CA-1.

Moreover, acceptance of a Form CA-1 for filing "shall not constitute a finding that it has been filed as required or that the information submitted is true, current or complete." *Id.*

(n33)Footnote 33. Section 3(a)(26).

For a general discussion of the duties and responsibilities of clearing agencies as self-regulatory organizations, *see § 2A.03[3][a] infra.*

(n34)Footnote 34. Section 19(a)(1).

In 1975, after lengthy debate, Congress amended the Securities Exchange Act of 1934 to classify as "self-regulatory organizations" ("SROs") certain components of the securities industry, i.e., national securities exchanges and associations and registered clearing agencies. *See § 2.01[2] supra.*

(n35)Footnote 35. The 180-day period may be extended by consent of the applicant or for an additional 90 days by the Commission "for good cause" provided that the Commission "publishes its reason for so finding ..." Section 19(a)(1)(B).

(n36)Footnote 36. For a definition and discussion of the term "appropriate regulatory agency," *see § 2A.02[2][a] supra.*

(n37)Footnote 37. Section 19(a)(2)(A) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, section F.

(n38)Footnote 38. Section 19(a)(2)(B).

The appropriate regulatory agency, to trigger a proceeding, must notify the Commission that the agency has determined that the applicant "may not be" organized or have the capacity to be able to safeguard funds or securities in its possession and the reasons for such determination. *Id.*

(n39)Footnote 39. Section 19(a)(2)(C).

(n40)Footnote 40. Section 17A(b)(3). The Securities Acts Amendments of 1975, which added Section 17A to the

Exchange Act, became effective December 1, 1975. *See* § 2A.02 n.4 *supra*. Accordingly, all clearing agencies were required to be registered by that date. In November 1975, the Commission concluded that it would not be able, by that date, either to make the requisite determination or to grant exemptions from registration. *See* n.15 *supra*. Accordingly, the Commission decided to exempt temporarily from registration all applicants whose application were filed with the Commission on or before November 24, 1975. *Id.* In addition, upon application, the Commission undertook to grant temporary registration to selected clearing agencies based upon partial determinations. Thirteen clearing agencies qualified for this temporary registration. *See* Sec. Exch. Act Rel. No. 34-16900, Fed. Sec. L. Rep. (CCH) P 26,203G.

Thereafter, in 1977 and 1978, the Commission released for comment proposed standards to be applied in evaluating registration applications. *See* Sec. Exch. Act Rel. Nos. 34-13584, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,183 (June 1, 1977) and 14,531, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,525 (Mar. 6, 1978). Final standards were adopted in 1980. Sec. Exch. Act Rel. No. 34-16,900, Fed. Sec. L. Rep. (CCH) P 26,203G (June 17, 1980). Then, all clearing agencies that had been temporarily registered were required to submit a new Form CA-1 to demonstrate compliance with these standards. *See* Sec. Exch. Act Rel. No. 17231, Fed. Sec. L. Rep. (CCH) P 26,203H (1980).

For a discussion of registrations pursuant to Section 17A from 1975 through early 1984, *see* § 2A.03[2][e] *infra*.

(n71)Footnote 71. Sec. Exch. Act Rel. No. 34-16900, n.15 *supra*.

(n72)Footnote 72. Sec. Exch. Act Rel. No. 34-17,231, Fed. Sec. L. Rep. (CCH) P 26,203H (Oct. 20, 1980)

(n73)Footnote 73. Sec. Exch. Act Rel. No. 34-17,562, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,833 (Feb. 20, 1981).

(n74)Footnote 74. Sec. Exch. Act Rel. No. 34-20221, n.43 *supra*.

(n75)Footnote 75. Section 17A(b)(1).

(n76)Footnote 76. Rule 17Ab2-1(a) and Instruction II.10 to Form CA-1.

(n77)Footnote 77. Instruction II.11 to Form CA-1.

(n78)Footnote 78. Self-regulatory organizations are discussed and defined in §§ 2.02[2] and 2.03 *supra* .

(n79)Footnote 79. Section 3(a)(26).

(n80)Footnote 80. Section 19(a)(1) requires, for example, that the Commission publish notice of the filing of an application for registration and afford interested persons an opportunity to comment. *See* § 2.01[2][c] *supra*. *See also* § 2A.03[2][e] *supra*.

(n81)Footnote 81. Section 19(b)(1), which is discussed at § 2.02[1][a] *supra*. Although Section 19(c) authorizes the Commission to "abrogate, add to, and delete from" the rules of an SRO, *see* § 2.02[1][b] *supra*, this authority does not extend to registered clearing agencies.

(n82)Footnote 82. Section 19(d)(1), which is discussed at § 2.03[5][d] and § 2.03[4] *supra* .

(n83)Footnote 83. Section 19(d)(2), which is also discussed at § 2.03[5][d] and § 2.03[4] *supra* .

(n84)Footnote 84. Section 19(e)(1). *See* § 2.03[5][d] and § 2.03[4] *supra* .

(n85)Footnote 85. Sections 19(e)(2) and (f). *See* § 2.03[5][d] and § 2.03[4] *supra* .

(n86)Footnote 86. Section 19(g)(1)(C). While clearing agencies need only enforce compliance with their own rules, other categories of SRO's (i.e. national securities exchanges and associations) are required also to enforce compliance with the provisions of the Exchange Act. *See* § 2.02[4] *supra*.

(n87)Footnote 87. Section 19(h)(1). *See* § 2.02[6][c] *supra*.

If a clearing agency's registration is suspended or revoked, the appropriate regulatory agency may apply to a "court of competent jurisdiction," as defined in Section 21(d) or 27 of the Exchange Act, for the appointment of a trustee. Section 19(i). If an application is filed, the Exchange Act authorizes the court to assert "exclusive jurisdiction" over all records and assets of the clearing agency "wherever located." *Ibid*. The court may appoint the appropriate regulatory agency or any other person to serve as trustee with the power "to take possession and continue to operate or terminate the operations" of the clearing agency. *Id*.

(n88)Footnote 88. Section 19(h)(2).

(n89)Footnote 89. Section 17(d). *See* § 2.02[6][b] *supra*.

(n90)Footnote 90. For a definition and discussion of the term "statutory disqualification," *see* § 2.02[2][a] *supra*.

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 3.syn

AUTHOR: W. Reece Bader

§ 3.syn Synopsis to Chapter 3: Regulation of Brokers and Dealers

Scope

§ 3.01 Introduction

§ 3.02 Separation of Broker-Dealer Functions--Sections 11(a) and (b)

[1] Floor Traders

[2] Odd-Lot Dealers

[3] Specialists

§ 3.03 Registration of Brokers and Dealers

[1] Introduction

[2] Who Must Register.

[3] Application for Registration as a Broker and Dealer

[a] Form BD.

[b] Registration of Successors and Fiduciaries.

[c] Registration of Separately Identifiable Department or Division.

[d] Amendments to Form BD.

[e] Grant or Denial of Application.

[4] Fingerprinting Requirements

[a] Permissive Exemptions.

[b] Exemptions by Application.

[c] Satisfaction of the Fingerprinting Requirements by Fulfilling other Law or Rule.

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934

AUTHOR: W. Reece Bader

Summary of This Chapter

Federal regulation of brokers and dealers is part of the regulation of the securities markets mandated by the Securities Exchange Act of 1934 ("Exchange Act"). Section 15(c)(3) of the Exchange Act directs the Securities and Exchange Commission ("SEC" or "Commission") to prescribe rules and regulations for the financial responsibility and related practices of broker-dealers, including the custody and use of customers' securities, deposits, and credit balances. Section 15(h)(1) of the Exchange Act bars states from imposing requirements on broker-dealers, municipal securities dealers or government securities dealers which differ from or are in addition to the Exchange Act requirements in these areas. The Commission also oversees the regulation of broker-dealers' conduct by subjecting broker-dealers to the rules of the self-regulatory organizations of which they are members. Broker-dealers are also subject to the regulation of credit, as implemented by the rules and regulations of the Federal Reserve Board, and to the registration and post-registration provisions of the Exchange Act and the blue sky laws. Section 18(c)(1) of the Securities Act of 1933 ("Securities Act"), preserves state authority to investigate and bring enforcement actions under state law with respect to fraudulent, deceitful or otherwise unlawful broker-dealer sales practices in connection with any securities transaction.

The Commission is empowered to adopt rules to maintain fair and orderly markets and to ensure equal regulation of transactions on the exchange and over-the-counter markets. The Commission has determined that the combination of broker and dealer functions performed by broker-dealers may lead to the abuse of the fiduciary relationship between broker-dealers and their customers. To address this conflict, the Commission has adopted rules under Section 11(a) and (b) of the Exchange Act for the regulation of floor traders, odd-lot dealers, and specialists. *See § 3.02 infra.*

Section 15(a)(1) requires all brokers and dealers that use any means of interstate commerce to effect transactions in securities to register on Form BD. Registration subjects the registrant to rigorous recordkeeping, reporting and financial requirements. Brokers and dealers are also subject to fingerprinting requirements and net worth and capital requirements. Brokers and dealers who participate in regulated activities but fail to register are subject to injunctive or disciplinary action, denial of registration, and criminal prosecution. *See § 3.03 infra.*

Registered brokers and dealers are required to make and keep current the books and records set forth in Rule 17a-3

under the Exchange Act and to preserve them for the length of time prescribed by Rule 17a-4. Registered brokers and dealers that clear transactions or carry customer accounts are required to file monthly reports on the Financial Operational Combined Uniform Single (FOCUS) Report. Broker-dealers are required to file annually with the Commission monthly reports of their financial condition and to provide customers statements as to that condition. *See § 3.04 infra.*

The Financial Industry Regulatory Authority ("FINRA") is the sole self-regulatory organization of over-the-counter brokers and dealers. n1 Any registered broker or dealer that meets prescribed standards and that regularly transacts business in the investment banking or securities business is eligible for membership in the FINRA. Broker-dealers that are FINRA members are subject to surveillance by the FINRA. *See § 3.05 infra.*

Section 15B of the Exchange Act requires municipal securities dealers, including banks, to register with the Commission. The Municipal Securities Rulemaking Board ("MSRB") promulgates rules governing the municipal securities industry, subject to oversight by the Commission. Section 15B(b)(1) of the Exchange Act requires that the MSRB rules contain provisions dictating, *inter alia*, standards of operation capability, training, and competence, prevention of fraud and manipulation, and periodic examination of municipal securities brokers and dealers. *See § 3.06 infra.*

Because of the special characteristics and importance of the government securities market, Section 15C of the Exchange Act, added by the Government Securities Act of 1986, provides a different regulatory scheme for government securities brokers and dealers. The Secretary of the Treasury has the authority to adopt rules which are administered and enforced by the SEC or the banking or financial regulator that otherwise has jurisdiction over the particular broker or dealer. The most significant difference between the regulation of registered brokers and dealers under Section 15 of the Act and government securities brokers and dealers under Section 15C is that the latter are subject to a different set of capital requirements and a separate set of requirements concerning custody of customer securities. *See § 3.07 infra.*

Effective May 12, 2001, the Gramm-Leach-Bliley Act of 1999 integrated the regulation of banks acting in a broker-dealer capacity with the Federal Securities regulation scheme. n2

Finally, in addition to the net worth and capital requirements, the financial responsibility rules promulgated by the Commission subject registered brokers and dealers to restrictions on the hypothecation and loan of customers' securities and requirements concerning bank reserves and physical possession and control of customers' securities. Failure to comply with the financial responsibility rules, designed to protect the assets of customers, is one ground for Commission action against registered broker-dealers and associated persons. The Securities Investor Protection Corporation is available to protect qualifying customers' assets in the event of broker-dealer insolvency. *See § 3.08 infra.*

FOOTNOTES:

(n1)Footnote 1. FINRA was created in 2007 through the consolidation of the National Association of Securities Dealers, Inc. ("NASD") and the member regulation, enforcement and arbitration functions of the New York Stock Exchange ("NYSE"), <http://www.finra.org/AboutFINRA/CorporateInformation/index.htm> (last visited Apr. 7, 2008). Because FINRA is currently consolidating NASD and NYSE rules into a single set of FINRA rules, the citations contained herein will be to NASD and NYSE rules. The reader should be aware that, at some point in the future, the NASD and NYSE rules will become FINRA rules. Firms that were members only of NASD as of July 30, 2007, along with firms that join FINRA only, are currently subject only to NASD rules. NYSE rules apply to firms that join the NYSE, <http://www.finra.org/RulesRegulation/FINRARules/index.htm> (last visited Apr. 7, 2008). This chapter contains numerous pre-2007 references to FINRA; the reader should understand that FINRA was known as NASD prior to July 2007. However, formal names, such as NASD committees or publications, will retain their NASD titles herein.

(n2)Footnote 2. The Commission adopted various rules following the Gramm-Leach-Bliley Act and extended time

for bank compliance to May 12, 2002.

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 § 3.01

AUTHOR: W. Reece Bader

§ 3.01 Introduction

Broker-dealers are organized in various forms, operating as individual proprietorships, partnerships, and corporations. n1 Federal regulation of brokers and dealers is part of the regulation of securities markets mandated by the Securities Exchange Act of 1934 ("Exchange Act"). n2 A broker or dealer subject to Section 15(a) of the Exchange Act, which includes any broker or dealer doing business in interstate commerce in nonexempt securities, must register with the Securities and Exchange Commission ("Commission" or "SEC") on Form BD and meet the standards of professional competence, operational capability, and financial responsibility established by the Commission and often implemented by self-regulatory organizations. n3

A broker-dealer's obligations under the Exchange Act do not end with registration. Once registered, the broker-dealer must maintain and preserve the books and records prescribed by the Commission. n4 A registered broker-dealer is subject to the monthly, quarterly, and annual reporting requirements of Rule 17a-5 n5 and the FOCUS reporting system designed to simplify the reporting obligations of brokers and dealers. n6

The Exchange Act is designed to regulate and control transactions in securities conducted upon securities exchanges and in the over-the counter ("OTC") market and to regulate practices and matters related to such transactions. n7 In particular, the Commission is directed to prescribe rules and regulations establishing safeguards concerning the financial responsibility and related practices of brokers and dealers, including the custody and use of customers' securities, deposits, and credit balances. n8 The financial responsibility rules of the Commission subject registered brokers and dealers to minimum net capital requirements, n9 restrictions on hypothecation and loan of customers' securities, n10 and bank reserve and physical possession or control of customers' securities requirements. n11 The financial responsibility rules are designed to protect, directly and indirectly, the assets of customers. Failure to comply with the financial responsibility rules is one of the grounds for Commission action against a registered broker-dealer or person associated with a broker or dealer. n12

Should a registered broker or dealer encounter financial difficulty because, for instance, the broker or dealer is not in compliance with the financial responsibility rules of the Commission, the Securities Investor Protection Corporation ("SIPC") may be available to protect the customers' assets. n13 SIPC maintains a fund financed in part by the regulated industry, available to protect qualifying customers' funds in cases of broker-dealer insolvency. n14

Not only does the Commission regulate the conduct of brokers and dealers directly, the Commission also oversees the regulation of their conduct by organizations in the securities industry of which they are members. n15 Brokers and dealers that are members of the Financial Industry Regulatory Authority ("FINRA") are subject to the rules, regulations, and on-site inspections of FINRA. n16 Brokers and dealers transacting business on exchanges are also subject to the rules and regulations of the exchanges of which they are members.

The Securities Acts Amendments of 1975 n17 expanded broker-dealer regulation under the Exchange Act to include municipal securities brokers and dealers; created a new category of dealer, a municipal securities dealer; provided that municipal securities dealers that are banks must register under new Section 15B of the Exchange Act; and established a new rulemaking self-regulatory organization, the Municipal Securities Rulemaking Board ("MSRB"), to promulgate rules concerning the municipal securities industry. n18 In 1986 the Exchange Act was further amended, adding Section 15C, which required the registration of brokers and dealers in U.S. government securities. n19

Broker-dealers are also subject to the regulation of credit under the Exchange Act, as implemented by the rules and regulations of the Federal Reserve Board. n20 The regulation of fraudulent market activities and fraudulent practices involving the broker-client relationship is also part of broker-dealer regulation under the Exchange Act. n21

As though the regulation of brokers and dealers under the Exchange Act and through self-regulation by industry groups were not enough, brokers and dealers must also comply with the registration and post-registration provisions of the blue sky laws. n22

The National Securities Markets Improvement Act of 1996 n23 significantly revised the federal securities laws. The predominant purpose of the new law was to reduce overlapping federal and state regulation, preempt state regulation of many offerings, n24 divide regulation of investment advisors, n25 and impose significant limits on state regulation of broker-dealers.

The 1996 legislation added a new Section 15(h)(1) to the Exchange Act which prohibits inconsistent state regulation of capital, margin, custody, books and records or financial responsibility. n26

Sections 15(h)(2) and 15(h)(3) bar any state from prohibiting an unregistered representative from effecting transactions for customers so long as the person is not ineligible to be registered, is registered with FINRA and one other state, and the broker-dealer is registered in the state.

Finally, in new Section 18(c)(1) n27 of the Securities Act, state authority to investigate and file enforcement actions for unlawful conduct by a broker-dealer in connection with a securities transaction, is preserved. n28

On November 11, 1999, Congress passed the Gramm-Leach-Bliley Act, n29 also known as the Financial Modernization Act of 1999. The Act, effective at various future dates, imposes additional obligations on broker-dealers, especially with respect to privacy matters. n30 The Act also repeals the blanket exception of banks from the definition of "broker" and "dealer" in the Exchange Act, replacing such with more functional definitions of such terms. Rules adopted by the Commission, effective May 12, 2002, then create certain exceptions.

(n24)Footnote 24. See R. Rapp, Blue Sky Regulation, Ch. 11 *supra* .

(n25)Footnote 25. See Ch. 5C.

(n26)Footnote 26. Section 15(h) of NSMIA is codified at 15 U.S.C. § 78o(h).

(n27)Footnote 27. NSMIA Section 18(c)(1) is codified at 15 U.S.C. § 77r(c)(1).

(n28)Footnote 28. For example, in *United States v. Schulman*, 1998 U.S. Dist. LEXIS 2013 (S.D.N.Y. Feb. 24, 1998) , the court rejected a defendant's motion to dismiss, premised upon an argument that Section 15 preempts state regulation of securities laws. The Court explained that Section 15, also known as 15 U.S.C. § 78o, "By its terms, it is limited to the establishment of "financial or operational *reporting* requirements for brokers" that differ from the requirements set forth elsewhere in the Exchange Act. 15 U.S.C. § 78o(h)(1). It does not apply to disclosure requirements or purport to restrict the state's ability to prosecute the undisclosed receipt of bribes by brokers under state commercial bribing statutes. *Id.* at *5-6. States may not, however, rely on Section 18(c)(1) to regulate the registration and offering process, which the 1996 legislation removed from state authority. See 142 Cong. Rec. H12047 (daily ed. Sept. 28, 1996). For example, in *Myers v. Merrill Lynch & Co.*, 1999 U.S. Dist. LEXIS 22642 (N.D. Cal. Aug. 23, 1999) , *aff'd* 249 F.3d 1087 (9th Cir. 2001) , the Court held that a plaintiff's claims against a broker dealer for violation of California's unfair business practices statutes were preempted by NSMIA and rejected the plaintiff's argument that by authorizing states to investigate and prosecute acts of broker dealer fraud, Section 18(c)(1) defeated the defendant's preemption argument.

(n29)Footnote 29. Pub. L. No. 106-102, 113 Stat. 1338 (1999).

(n30)Footnote 30. In 2000, the SEC promulgated proposed privacy rules for broker-dealers pursuant to Gramm-Leach-Bliley. See Exch. Act Rel. No. 34-42, 848 (Mar. 2, 2000). The Commission adopted final rules such that financial institutions must provide customers with written notice of its privacy policies and practices and must not disclose personal information of consumers to non-affiliated third parties, absent satisfaction of certain requirements. Exch. Act Rel. No. 34-42, 974 (June 22, 2000).

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 § 3.02

AUTHOR: W. Reece Bader

§ 3.02 Separation of Broker-Dealer Functions--Sections 11(a) and (b)

At the time of the adoption of the Securities Exchange Act, Congress was deeply concerned over brokers and dealers acting interchangeably as principal and agent. Specifically, where a single person acts in the capacity of both broker and dealer, that person's own interests may conflict with the interests of those to whom the broker/dealer owes a fiduciary duty. While the Exchange Act defines the terms separately, n1 Congress originally considered including a provision prohibiting any broker from also acting as a dealer. Since Congress did not have enough information, however, to determine what, if anything, should be done to segregate these functions, it directed the Commission to study the segregation of functions. n2 In its final report, the Commission concluded that the combination of the broker and dealer functions involves an inherent conflict of interest which may lead to the abuse of the fiduciary relationship between the broker and the customer, but recommended that no legislation be enacted at that time. n3

In three particular fields, however, Congress felt that some direct action should be taken. It empowered the Commission to adopt rules for the regulation of floor traders, odd-lot dealers, and specialists. The Securities Acts Amendments of 1975 further amended Section 11(a) of the Act to add more specific trading restrictions.

[1] Floor Traders

A floor trader is an exchange member who deals on the floor of the exchange for his or her own account. Although floor trading still exists, its activity is quite limited. The original 1934 bills contained an absolute prohibition of floor trading. n4 However, the final Act provided only that the Commission prescribe rules it deems necessary or appropriate to regulate or prevent floor trading. n5

In 1964, as a result of the 1963 Special Study, n6 the Commission adopted Rule 11a-1. The rule provides that no member is permitted to buy or sell for his or her own account on the floor except where the transactions involve specialists, odd-lot dealers, stabilizing syndicates, arbitrageurs and a few others, including persons acting in conformity with a Commission-approved exchange plan designed to eliminate floor trades not beneficial to the market. n7 Such plans have been adopted by the major exchanges. n8

Section 11(a), n9 as amended in 1975, is directed in large part at the problems presented by the combination of

1-3 Federal Securities Exchange Act of 1934 § 3.02

brokerage and money management. Historically, exchange members with managed accounts have enjoyed competitive advantages over nonmember money managers. The rules of the New York and American Stock Exchanges barred financial institutions and their affiliates from membership but did not prohibit exchange members from engaging in money management. The exchange member, therefore, could go into the business of managing money and obtain brokerage income from the managed accounts, while the money manager was unable to earn brokerage income.

Fixed commission rates then in effect added impetus to the efforts of money managers to obtain brokerage income or to reduce brokerage expenses. Under a fixed rate system, commissions on institution-sized orders were sufficiently profitable that brokerage firms were willing to assume the management function for a nominal fee in order to obtain the resulting brokerage income.

The combination of brokerage and money management is still viewed as having undesirable aspects. A customer's account may be managed with a view to the production of brokerage income rather than in the best interests of the customer. For example, production income can be generated by engaging in an excessive number of transactions ("churning") or by executing those orders in which the largest commission can be realized. Moreover, preferences can be given to certain accounts over other accounts by providing advance information of new developments in a security or priority in executing orders. Finally, the elimination of fixed commission rates in 1975 presented a new conflict of interest: determination by the broker-manager of fair commission charges for managed accounts' transactions. n10

The approach adopted by the 1975 Amendments was to prohibit an exchange member from trading on the exchange for the member's own account, the account of an associated person, or an account with respect to which the member or an associated person exercises investment discretion. n11

There are specific exemptions from the prohibition of Section 11(a)(1). These concern:

- market maker transactions; n12
- trades by odd-lot dealers;
- stabilizing transactions by a participant in the distribution of a security;
- certain arbitrage and hedge transactions, expressly including "risk arbitrage"; n13
- transactions for the account of a natural person, the estate of a natural person, or a trust created by a natural person for himself or another natural person;
- transactions to offset errors;
- transactions for a member's own account provided: (a) the member is primarily engaged in underwriting and distributing securities, selling securities, and acting as broker, or any one or more of those activities, and whose gross income normally is derived from that business and related activities; and (b) the transactions are in accordance with Commission Rules which assure transactions will be consistent with the maintenance of fair and orderly markets and yields priority, parity and precedence to orders of nonmembers;
- certain transactions for an account over which the member or an associated person exercises investment discretion; and
- other transactions exempted by Commission Rules. n14

Section 11(a)(2) n15 empowers the Commission, consistent with the public interest, to maintain fair and orderly markets, or to assure "equal regulation" of exchange markets and other markets by regulating or prohibiting:

- transactions by exchange members not unlawful under Section 11(a)(1) (except if members are acting as market makers or odd-lot dealers);
- transactions effected otherwise than on a national securities exchange by an exchange member, a broker or dealer: (a) for its own account (except those acting as market makers), (b) an account of an associated person, or (c) an account with respect to which the member, broker, dealer or associated person exercises investment discretion;
- transactions on a national exchange by a nonmember broker or dealer for: the member's own account (unless acting as a market maker); the account of an associated person; and an account as to which the broker, dealer or associated person exercises investment discretion. n16

Under the authority of Section 11(a)(1), the Commission adopted Rule 11a1-1(T) which provides that a transaction for the account of an exchange member, which meets the "business mix" test of paragraph (G)(i) of section 11(a)(1), n17 will satisfy the requirements of paragraph (G)(ii) of that section if the member discloses, to all other members involved in communicating or effecting the bid or offer, that it is for the account of a member. In addition, the executing floor member, immediately before executing the order, must disclose to the specialist and other members then present that it is for the account of a member, and, notwithstanding any other applicable rules of parity, priority and precedence, the executing broker must grant priority to any bid or offer at the same price for the account of a non-member (or non-affiliate of a member) regardless of the size or time of entry of such public order.

Rule 11a1-1(T)(b) also clarifies the meaning of Section 11(a)(1)(G)(i)'s requirement that the member be "primarily" engaged in certain kinds of business.

Rule 11a1-2, the "Look-Through" rule, permits a member to effect a transaction for its associated person (or for an account carried by such associated person) if the member could have effected the transaction for its own account. For purposes of this rule, the associated person must independently meet the test of being "primarily engaged" in the kinds of business covered by Section 11(a)(1)(G)(i).

Perhaps the most important exemptive rule adopted by the Commission under Section 11(a)(1) is Rule 11a2-2(T), the "Effect v. Execute" rule. This rule permits a transaction to be effected for the account of a member or its associated person (the "initiating member") if it is "executed" on the floor of the exchange by a member *not* associated with the initiating member. The rule also requires that the initiating member (or its associated person) have investment discretion over the account and does not retain any compensation in connection with the transaction, except pursuant to a written contract that makes specific reference to section 11(a) and Rule 11a2-2(T), and which is signed by the initiating member (or its associated person) and the person who has granted the discretionary authority. The rule also requires annual reporting of any compensation retained by the initiating member or its associate. n18

[2] Odd-Lot Dealers

The unit of exchange trading is usually 100-share lots (round lots), a mechanism developed on the New York Stock Exchange ("NYSE") whereby certain odd-lot firms act as dealers to fill orders for less than a round lot for other brokerage houses, adjusting their own inventory by round-lot transactions on the floor. Such transactions have been handled somewhat differently on the other exchanges, where the specialist acts as the odd-lot dealer. In 1976, the NYSE acquired the computerized odd-lot system operated by Carlisle De Coppet & Co. This system is operated on behalf of the NYSE's specialist units, which have, in effect, become the NYSE's odd-lot dealers in the stocks assigned to them. These specialists absorb stock when odd-lot customers are selling, and supply stock from their inventories when odd-lot

customers are buying. Odd-lot orders were previously priced on the next effective round-lot sale. In December 1987, the Commission approved a NYSE proposal modifying odd-lot pricing procedures under Rule 124 so that odd-lot market orders immediately received a price based on the prevailing NYSE quote, with no differential charged on the quote, while odd-lot limit orders were still charged a differential. n19 Odd-lot limit orders are still charged a differential. The odd-lot business was studied in some detail by the Special Study Group. n20 In June 2004, the Commission approved amendments to NYSE Rule 124 so that odd-lot orders would be priced and executed at the price of subsequent round-lot transactions. n21 The new pricing was phased in beginning on June 21, 2004, with all odd-lot orders to be priced in compliance as of June 28, 2004. n22

[3] Specialists

The place of the specialist in the exchange is described as follows:

[T]he major American exchanges are, for the most part, "continuous auctions" rather than call markets. On the larger exchanges the various securities are allocated to different localities or "posts" on the "floor," and buy or sell orders may be brought to the appropriate post at any time during the trading session for immediate or later execution. Since there may not be matching buy and sell orders from public customers at the same moment, a continuous auction market requires mechanisms for linking the buy and sell interests during the trading sessions, and the main cog in the established mechanisms is the specialist who joins the orders in specific securities. n23

The functions and activities of the floor specialists were given special attention by the Special Study group. n24 In general, the Special Study group found the role of the specialist to be necessary, although it almost inevitably involved certain conflicts of interest. The Special Study group recommended some changes in exchange rules to minimize the effects of conflicts of interest. Accordingly, in 1965, the SEC ordered the adoption by the national securities exchanges of Commission-approved rules in this area. n25 The major exchanges have adopted these rules. n26

The Securities Acts Amendments of 1975 amended Section 11(b) to grant the Commission plenary power over all aspects of specialists' activities and to eliminate the statutory requirement that a specialist acting as a dealer limit his or her transactions to those necessary to maintain a fair and orderly market. The Commission is also authorized to limit a specialist's activities to that of a broker or dealer.

Section 11(b) authorizes an exchange, consistent with Commission Rules, to permit members: to be registered as odd-lot dealers and buy and sell as reasonably necessary to carry on odd-lot transactions; or to be registered as specialists.

Specialists are prohibited by Section 11(b) from disclosing information concerning orders placed with them to any person other than an official of the exchange, a representative of the Commission or a specialist acting for the specialist. The Commission, however, may require disclosure of orders placed with a specialist to all members of an exchange. Moreover, a specialist permitted to act as a broker or dealer may not effect any transaction as a broker except upon a market or a limited order.

Section 15(c)(5), intended to be complementary to Section 11(b), provides that dealers (other than registered specialists acting in the capacity of market makers or otherwise) are subject to such rules as the Commission may prescribe in the public interest or for the protection of investors. The Commission may prohibit a dealer in a security from acting as a broker in that security. n27

FOOTNOTES:

(n1)Footnote 1. Section 3(a)(4), 15 U.S.C. § 78c(a)(4), defines a broker as "any person engaged in the business of effecting transactions in securities for the account of others" Section 3(a)(5), 15 U.S.C. § 78c(a)(5), defines a dealer

as "any person engaged in the business of buying and selling securities for his own account, through a broker or otherwise," excluding those who do not buy or sell as part of a regular business. The Securities Exchange Act of 1934 is reprinted in the Securities Primary Law Sourcebook, Volume B, Section F (Matthew Bender).

(n6)Footnote 6. *See* Special Study, Pt. 2. Excerpts from this study follow:

Members participating in the trading of securities on the floor of the NYSE are of four types: specialists, odd-lot dealers and their associate brokers, floor brokers, and floor traders. In the ranks of these floor members the floor trader is unique, for he is the only such member who is not assigned, and does not assume, any responsibility in the handling of orders on the Exchange. Floor brokers and specialists must meet fiduciary standards of behavior in executing agency orders. Associate brokers consider themselves obligated to fill every odd-lot order placed with them. Specialists must, in certain situations, buy stock from or sell stock to willing sellers or buyers. The floor trader, on the other hand, is no one's agent, and under no conditions is he required to buy or sell stock. His presence on the floor is dictated only by his personal desire to trade profitably, for his own account, on the floor of the Exchange.

In acting on a pure profit motive, the floor trader is on firm free enterprise footing. Highly controversial, however, is the propriety of his trading *on the floor*, in view of the fact he is not assigned any role in the execution of orders on the Exchange. Critics of floor trading maintain that his competitive trading advantage is unwarranted, and that floor traders accentuate price movements by selling stock on price declines and purchasing stock on price rises. The Exchange, on the other hand, has contended that floor traders produce certain beneficial "byproducts," enumerated as improved market liquidity, stability, and continuity, which warrant their presence on the floor.

A "floor trade," according to NYSE regulations, is any transaction initiated by a member, while on the floor of the Exchange, for his own account or for an account in which he or his member organization has an interest, except for transactions effected by a specialist in stocks in which he specializes or by an odd lot dealer in stocks in which he is registered. A floor trade may thus be effected by a specialist in stocks in which he is not specializing, by an odd-lot dealer in stocks in which he is not registered, by any floor broker, by a "floor trader" or by any other member who happens, for whatever reason, to be on the floor. In classifying members, the Exchange designates them as "floor traders," "floor brokers," etc., according to each member's principal activity. When evaluating the propriety of floor trading, however, it is necessary to include all member trading on the floor, with the exception of specialist and odd-lot dealer trading in stocks in which they are registered.

(n7)Footnote 7. Rule 11a-1, 17 C.F.R. § 240.11a-1, reprinted in the Securities Primary Law Sourcebook, Volume B, Section G (Matthew Bender).

(n8)Footnote 8. *Exch. Act Rel. No. 34-7330, Fed. Sec. L. Rep. (CCH) P 77,001* (June 2, 1964); *Exch. Act Rel. No. 34-7375, [1964-1966 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 77,110* (July 23, 1964).

(n9)Footnote 9. *15 U.S.C. § 78k(a)(1)*.

(n10)Footnote 10. *See S. Rep. No. 94-75, 94th Cong., 1st Sess. Section 8 (1975)*, reprinted in the *Securities Primary Law Sourcebook*, Volume C (Matthew Bender).

(n11)Footnote 11. Section 11(k)(a)(1), *15 U.S.C. § 78k(a)(1)*. Investment discretion is defined in Section 3(a)(35). A person exercises investment discretion with respect to an account if the following applies, directly or indirectly. The person is authorized to determine the securities or other property to be purchased or sold by or for the account. In addition, investment discretion is shown if the person exercises influence with respect to the purchase and sale of securities or other property by or for the account and it is of a type which the Commission, by rule, determines (in the public interest or for the protection of investors) should be subject to the operation of the Exchange Act (and the rules and regulations thereunder).

Therefore, if an associated person (but not a member) has discretion only as to the timing of a transaction but not as to the kind or amount of security to be bought or sold, neither Section 11(a)(1) nor Rule 11a-1 would apply.

(n12)Footnote 12. Rule 11a1-5 exempts transactions by a registered competitive market maker on the New York Stock Exchange or a registered equity market maker on the American Stock Exchange.

(n13)Footnote 13. Rule 11a1-3(T) confirms the availability of the exemption for bona fide hedge transactions.

(n14)Footnote 14. Rule 11a1-4(T) exempts transactions in debt securities.

(n15)Footnote 15. *15 U.S.C. § 78k(a)(2)*.

(n16)Footnote 16. Although the Commission has the power under Section 11(a)(2) to prohibit exchange trading that is exempted under Section 11(a)(1), Congress stressed that the Commission would not have authority to prohibit a member's transactions on the basis of the type of business done or the type, amount or mix of transactions effected. The Conference Committee warned that a Rule such as the Commission's Rule 19b-2, which limits exchange memberships on the basis of the type and amount of business done on an 80-20 business mix, "would violate both the letter and the spirit of the Exchange Act." *See H.R. Conf. Rep. No. 229, 94th Cong., 1st Sess. 106 (1975)*, reprinted in the *Securities Primary Law Sourcebook*, Volume C (Matthew Bender). The Committee also warned that the Commission cannot grant exemptions to member firms that are "unrelated to the market impact of the specific transactions at issue." *Id.*

The Conference Committee Report stated that members believed that the Department of Labor and the Internal Revenue Service, in administering the Employee Retirement Income Security Act ("ERISA"), should provide an exemption from the prohibited transactions provisions of that statute. The exemptions would "permit securities firms to continue providing brokerage services to accounts with respect to which they exercise investment discretion until May 1, 1978," permitting the firms to phase out combined services in an orderly way. The Committee suggested that the Department of Labor and the Internal Revenue Service, to the maximum extent consistent with the policies of ERISA, conform the prohibitions in that statute applicable to securities firms and municipal securities dealers to the policies of the Securities Acts Amendments of 1975. *Id.* at 107.

(n17)Footnote 17. The "business mix" test of Section 11(a)(G)(i) requires that the member be primarily engaged in "the business of underwriting and distributing securities issued by other persons, selling securities to customers, and acting as broker, or any one or more of such activities" In addition, the member's gross income must be normally derived from such business and related activities.

(n18)Footnote 18. The SEC has issued three major interpretative releases with respect to Section 11(a)(1) and the

rules thereunder. *Exch. Act Rel. No. 14,563, 3 Fed. Sec. L. Rep. (CCH) P 22,808* (Mar. 14, 1978) deals with the meaning of the term "investment discretion;" the "Effect v. Execute" Rule, 11a2-2(T); the "Look-Through" Rule, 11a1-2; and members' proprietary transactions, Rule 11a1-1(T). *Exch. Act Rel. No. 34-14713, 3 Fed. Sec. L. Rep. (CCH) P 22,808A* (Apr. 27, 1978), discusses the exemptive rule for bond transactions, 11a1-4(T); the Proprietary Trading Rule, 11a1-1(T); the "Look-Through" Rule, 11a1-2; the "Effect Versus Execute" Rule, 11a2-2(T); the exemption for natural persons, Section 11(a)(1)(E); and the relationship of various exemptions to each other. *Exch. Act Rel. No. 34-15,533, 3 Fed. Sec. L. Rep. (CCH) P 22,808B* (Jan. 30, 1979), discusses the relationship between Section 11(a)(1) and the development of a national market system (Section 11A and the rules thereunder); exemptions under Section 11(a)(1)(A) (market makers) and (D) (arbitrage and hedge transactions); Rule 11a1-3(T) covering certain hedge transactions; and the Proprietary Trading Rule, 11a1-1(T).

(n19)Footnote 19. See *Exch. Act Rel. No. 34-25,177* (Dec. 7, 1987).

(n20)Footnote 20. Special Study Pt. 2, pp. 171-202. An excerpt from this part of the report follows:

The unit of trading in most stocks on the exchanges is the "round lot" of 100 shares. Trading in the regular auction market on the floor of an exchange is conducted in round lots, or multiples thereof. An order to buy or sell a security on an exchange in any amount less than the round lot is an "odd-lot" order. Under this system, odd-lot orders do not enter the flow of buy and sell orders in the regular auction market. The business of the odd-lot dealer consists of filling odd-lot orders by buying or selling for his own account as principal. He transacts business exclusively with other brokerage firms, and not with the public.

The conduct of the odd-lot business is nevertheless very significant for the public investor, particularly the small investor, although odd lots also include any portion of a larger order that is not a multiple of 100. ... Almost all odd-lot orders are executed at prices determined automatically by round-lot sales in the same securities. The odd-lot buyer pays a fraction of a point more per share and the odd-lot seller receives a fraction of a point less per share than the controlling round-lot price. This fraction is called the "odd-lot differential," and the odd-lot dealer's compensation is derived from it. A public customer purchasing or selling an odd lot pays, in addition to the differential which is passed on to him, a standard commission to his brokerage firm.

On the New York Stock Exchange, where the price of an odd lot is determined by the next ("triggering") round-lot sale, the differential for stocks in which the round-lot unit is 100 shares is 1/8 of a point (12 1/2 cents) if the controlling round-lot sale is at 39 7/8 or below or 1/4 of a point (25 cents) if the round-lot sale is at 40 or above ("quarter stocks"). Almost 99 percent of the volume of odd-lot transactions on that exchange is handled by two member firms.

On the American, and most regional stock exchanges, odd-lot transactions are handled by the specialists in their respective stocks; most exchanges have no dealers handling odd lots exclusively. The specialist odd-lot dealer fills all odd-lot orders in the securities in which he specializes, by taking for or supplying from his own account the stock involved in such orders. On the American Exchange, like the New York Stock Exchange, odd-lot orders are filled at a fraction of a point above or below the next round-lot price for active stocks, and on the American and regional exchanges, the differential is the same amount as on the New York Stock Exchange.

(n22)Footnote 22. NYSE Info Memo, Number 04-32.

(n23)Footnote 23. NYSE Info Memo, Number 04-14 at 8.

(n24)Footnote 24. NYSE Info Memo, Number 04-32, Pt. 2, at 57-170. An excerpt from the Report follows:

Although centralized securities exchanges have been in existence for several centuries, the specialist system, as presently in effect on major American exchanges, is less than 100 years old. About a century ago the American exchanges adopted the continuous auction method of trading, which is responsible for the present specialist system. Under the continuous auction system, each issue is traded at one designated place on the floor called the "post." There are 19 such posts on the New York Stock Exchange (NYSE), 21 on the American Stock Exchange (Amex), 7 on the Midwest Stock Exchange (MSE), and 31 on the Los Angeles and San Francisco floors of the Pacific Coast Stock Exchange (PCSE). At each trading post are one or more exchange members who "specialize" in some or all of the issues traded at the particular post, and who are registered with their exchange as "specialists" in their particular securities. Their activities are circumscribed by Section 11 of the Exchange Act and the rules of the different exchanges.

The specialist performs two basic functions with respect to the issues in which he specializes. As a broker, he holds and executes orders for the public (usually forwarded to him by other exchange members). As a dealer he is a "market maker" and trades for his own account in the securities in which he is registered.

The service that the specialist performs as broker derives from the nature of the continuous auction market and an exchange which trades a large number of issues. It is the basic obligation of a broker to execute a customer's order expeditiously when, according to its terms and under the rules and procedures of the market, the order is capable of execution. Many investors use "limited price" orders specifying a price above which the customer will not buy or below which he will not sell. Until the market moves to the point set by the customer, such orders are not capable of execution. A floor broker cannot carry limited orders with him as he moves about the floor since he may be elsewhere as the limit is reached and may "miss the market." It is likewise not feasible to have floor brokers wait at a post for a limit to be reached since in some cases the market may never move to the limit, and in others it may take hours, days, or weeks until such orders can be executed. Under existing trading methods it is a practical solution for floor brokers to transmit limited orders to a single broker who stations himself at the post and acts as a central repository of such orders. The utility of this function has never been questioned.

The specialist who holds an order is a subagent in a fiduciary relationship with his principal, the customer who originated the order. Thus, in the event of an erroneous execution a customer may hold both the specialist and his own broker liable for any damages. Section 11 of the Exchange Act prohibits a specialist from disclosing information regarding orders placed with him. In the alternative, a proviso grants authority to the exchanges or the Commission to require full disclosure of *all* orders which the specialist holds. The unexecuted public orders entrusted to the specialist for execution comprise what is known as the "book."

Section 11 of the Exchange Act also permits the specialist to act as a dealer, but his dealer transactions must be restricted "so far as practicable to those reasonably necessary to permit him to maintain a fair and orderly market." An Exchange rule reiterates this limitation; at the same time, as discussed below, specialists are encouraged to engage in dealer transactions in order to maintain a fair and orderly market. As a reflection of the specialists' obligation to maintain fair and orderly markets, their dealer participation extends fairly evenly over all types of stocks rather than being concentrated in particular stocks classified by price or volume.

* * *

[T]he conduct of specialists directly affects the interests of a large proportion of investors and illustrate the specialists' importance in the auction market. But in addition to their volume of trading, no other class of exchange member is so intimately connected with the trading process and in so crucial a position to affect trading as to prices and as to manner and speed of execution of orders. Thus, the rules and practices defining the functions and conduct of the specialist business are of vital significance to the health of the entire auction market and affect all of those who deal in it.

Id. at 57-59.

In the staff report on the Amex, the specialist's crucial position was described as follows:

In his unique capacity the specialist stands at the heart of the Exchange market mechanism. He has intimate knowledge of the past market action of the stocks in which he specializes. He also has sole access to the specialist book showing outstanding orders both below and above the market, which affords him a great competitive advantage over the public. In addition, he exercises a significant influence on the public appraisal of a security, since he is the one who quotes the market. For all these reasons, it is a matter of tremendous importance in the maintenance of a fair and orderly market that a specialist's transactions as principal be only of such kinds and in such amounts as are consistent with his function of acting as broker at the vital center of the auction market.

The statutory scheme and the rules of the Exchange have attempted to establish a workable regulatory pattern whereby the specialist is permitted to trade for his own account in addition to acting as a broker. These provisions were designed to resolve the inherent conflict arising from the combination of functions by maintaining the fiduciary standards which are expected of a broker and yet permitting him to trade as a principal to maintain the continuity of a fair and orderly market.

See also Wolfson and Russo, *The Stock Exchange Specialist: An Economic and Legal Analysis*, 1970 *Duke L.J.* 707 (1970), in which the functions of the stock exchange specialist are explored and the Commission rules and NYSE rules regulating specialists receive comment.

(n25)Footnote 25. Rule 11b-1. *See* Exch. Act Rel. No. 34-7465, [1964-1966 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 77,156 (Nov. 23, 1964). The rule, as then in effect, permitted exchanges to authorize their members to act as specialists and dealers, if their rules contained adequate minimum capital requirements, requirements as to maintenance of an orderly market, surveillance procedures, and similar matters. Paragraph (d) authorizes the SEC to exempt any exchange from the rule. In adopting the rule, the SEC, by order, exempted all of the exchanges except the New York and American Stock Exchanges with respect to securities listed solely on one or more regional exchanges. *Id.* In 1981, by order, the SEC eliminated this exemption for the Boston, Cincinnati, Midwest, Pacific and Philadelphia Stock Exchanges. Exch. Act Rel. No. 34-18,157, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,040 (Oct. 7, 1981). The rule as adopted also required exchanges to file copies of their rules with the SEC. This requirement was eliminated in 1981 in light of the requirements of Section 19(b) and Rule 19b-4. [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,834 (Feb. 25, 1981). The rule was also amended to make it applicable to "securities" (including options), instead of just "stocks." *Id.*

The Commission has modified the exemption of the Boston, Cincinnati, Midwest, Pacific, and Philadelphia Stock Exchanges from Rule 11b-1 by making these exchanges subject to Rule 11b-1 as to any security that is listed on any of these exchanges and not listed on either the American or New York Stock Exchanges. Exch. Act Rel. No. 34-18,157, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,040 (Oct. 7, 1981).

(n26)Footnote 26. Exch. Act Rel. No. 34-7432, [1964-1966 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 77,134

(Sept. 24, 1964); Exch. Act. Rel. No. 34-7465, [1964-1966 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 77,156 (Nov. 23, 1964).

(n27)Footnote 27. In 1977, the SEC proposed few rules pursuant to Section 15(c)(5), which have not been withdrawn or adopted. *See* Exch. Act Rel. No. 34-13,662, Fed. Sec. L. Rep. (CCH) Report No. 700, Extra Edition (June 23, 1977). These proposed rules would provide (in the alternative):

- Rule 15c5-1[A]--A dealer could not effect a principal transaction in a "reported security" in the over-the-counter market except with a "financial institution."
- Rule 15c5-1[B]--A dealer could not effect such a transaction with a retail customer at a price less favorable to the customer than the best "composite quotation execution."
- Rule 15c5-1[C]--A dealer could not effect such a transaction without disclosure of the current bid and offer prices for the security.
- Rule 15c5-1[D]--A dealer could not effect such a transaction with a retail customer at a price less favorable to the customer than if the transaction had been effected on an agency basis.

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 § 3.03

AUTHOR: W. Reece Bader

§ 3.03 Registration of Brokers and Dealers

[1] Introduction

Section 15(a)(1) of Exchange Act n1 requires the registration with the Commission of all brokers and dealers n2 who use the mail system or any other means or instrumentality of interstate commerce to effect transactions in, or induce or attempt to induce the purchase or sale of, securities. n3 The section extends to a web site operated by a foreign broker-dealer if the broker-dealer does not take steps to reasonably ensure that it does not effect transactions with people in the United States. n4

Registration is effected by filing Form BD with the Commission. Form BD requires the disclosure of general business information and of any previous securities acts violations. n5 Once registered, brokers and dealers are subject to inspection to determine their compliance with the Act by the Commission or a self-regulatory organization under the Commission's direction. n6

Registration of a broker or dealer under Section 15, subjects the registrant to rigorous recordkeeping, reporting and financial requirements. n7 Further, standards of operational capability, training, and experience, as set and tested by the Commission, must be met. Additionally, registrants must comply with net worth and capital requirements, which ensure sufficiency of liquid assets by requiring a minimum ratio of net capital to aggregate indebtedness. n8 All registered brokers and dealers must also submit their fingerprints to the United States Attorney General. n9 Individuals who engage in regulated activities but fail to register are subject to injunctive or disciplinary action, n10 denial of registration when an application is finally submitted, n11 criminal prosecution, n12 and possible prejudice in civil litigation. n13

[2] Who Must Register.

Section 3(a)(4) of the Exchange Act classifies a "broker" as "any person engaged in the business of effecting transactions in securities for the account of others, but does not include a bank." n14, While someone who executes transactions for others on an exchange is clearly a broker, not all situations present such clarity. There are business brokers, or "finders" who, for a fee make referrals to a variety of financial entities; persons who market real estate or insurance products which may be securities; placement agents; and a variety of similar enterprises. Whether these

1-3 Federal Securities Exchange Act of 1934 § 3.03

individuals are brokers required to be registered depends on the specifics of the activity being conducted. While there is no "bright line" test, the Commission poses questions on its web-site to assist in the evaluation:

- Do you participate in important parts of a securities transaction, including solicitation, negotiation, or execution of the transaction?
- Does your compensation for participation in the transaction depend upon, or is it related to, the outcome or size of the transaction or deal. Do you receive trailing commissions, such as 12b-1 fees? Do you receive any other transaction-related compensation?
- Are you otherwise engaged in the business of effecting or facilitating securities transactions?
- Do you handle the securities or funds of others in connection with securities transactions?

A "yes" answer to any of these questions indicates that you may need to register as a broker. n15 The term "dealer" is defined as "any person engaged in the business of buying and selling securities for such person's account, through a broker or otherwise, ... but a bank shall not be considered to be such a dealer [when engaged] in [certain] activities" n16 The definition of a "dealer" also excludes any person who buys or sells securities for one's own account, either individually or in a fiduciary capacity, as long as the transactions are not a part of a regular business. n17 Obviously, a firm holding itself out as a market-maker in securities is a dealer. Other situations are less clear. Again the Commission web-site is instructive:

Here are some of the questions you should ask to determine whether you are acting as a dealer:

- Do you advertise or otherwise let others know that you are in the business of buying and selling securities?
- Do you do business with the public (either retail or institutional)?
- Do you make a market in, or quote prices for both purchases and sales of, one or more securities?
- Do you participate in a "selling group" or otherwise underwrite securities?
- Do you provide services to investors, such as handling money and securities, extending credit, or giving investment advice?
- Do you write derivatives contracts that are securities?

A "yes" answer to any of these questions indicates that you may need to register as a dealer. n18

With the rapid advances in technology that have occurred over the last two decades, "alternative trading systems" have become increasingly common. An alternative trading system is defined as follows:

any organization, association, person, group of persons, or system: (1) that constitutes, maintains, or provides a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange within the meaning of Rule 3b-12 of the Exchange Act; and (2) that does not (A) set rules governing the conduct of subscribers other than the conduct of such subscribers' trading on such organization, association, person, group of persons, or system, or (B) discipline subscribers other than by exclusion from trading. n19

In general, alternative trading systems offer many of the same services as traditional exchanges but are regulated as broker-dealers. Thus, currently, the systems are not subject to the same checks and balances or public scrutiny as traditional exchanges. As a result, in April 1998, the SEC published proposed rules regarding alternative trading systems. n20 Following, final rules were adopted allowing alternative trading systems the option of registering as exchanges or as broker-dealers with additional requirements under the new Regulation ATS. n21 Notwithstanding the broad registration language, there are groups of persons or entities exempt from registration. For example, as discussed in § 3.03[4] infra, "stock brokers" or "associated persons," employed by broker-dealers usually do not have to register, although they are subject to supervision by a registered broker-dealer. Similarly, a broker-dealer who conducts all of its business in one state does not have to register, although the exemption is quite narrow. The single state exemption flows from the Commission's territorial approach to registration, which is also applicable to international activities of broker-dealers. Broker-dealers operating outside the United States are exempt from registration n22 so long as they do not solicit securities transactions by U.S. citizens, do not use the interstate commerce of the United States or use the internet to accomplish the same purpose. n23

[3] Application for Registration as a Broker and Dealer

[a] Form BD. Form BD, the Uniform Application for Registration as a Broker and Dealer, is the general form used to apply either for original registration as a broker or dealer or to amend a prior application.

The form has been revised substantially to make it compatible with other forms such as those required by various states and self-regulatory organizations as well as other SEC forms. n24 Form BD is compatible with the Central Registration Depository ("CRD") system, a computer database maintained by the Financial Industry Regulatory Authority ("FINRA") for the retention of current registration information about all broker-dealers who are members of FINRA or registered with a state participant. In 1992, the Commission adopted a new system which permits the submission of one Form BD to FINRA, which enters the information in the CRD. n25 The information is then electronically forwarded to the Commission. Thus, one centralized database contains all registrant information and is easily accessible by both agencies. In 1996, FINRA delayed the implementation of a redesigned version of the CRD. One of the benefits of the new CRD will be the increased availability to the public of information regarding broker-dealers. In mid-1999, the Commission made final amendments to Form BD. n26

The amendments, which modify the 1996 version of Form BD, are technical in nature, designed principally to meet the changes required by the new Internet-based CRD system. The Web CRD was effective August 16, 1999.

The amendments modify the general filing instructions and the disclosure reporting forms and will assist implementation of the electronic filing of registration information regarding broker-dealers and registered persons. The changes essentially direct how broker-dealers are to transition to the new system and comply with their filing obligations. Rules 15b3-1, 15Ba2-2 and 15Ca2-1, which contained "temporary filing instructions," are also being modified. The rule delineates how the changes will occur during an initial sixteen-day transition and also provides that enforcement action will not be taken if broker-dealers respond within certain time frames.

The application for registration is filed with either the Commission's Washington, D.C. office in triplicate or with FINRA. Each execution page must be manually signed and the signatory must certify the accuracy of all information contained in the form and attest to the broker-dealer's compliance with bonding requirements and consent to service of process. n27 No registration fees are required. n28

In sum, Form BD requires rigorous detail regarding the identification information about the applicant, identification of entities or persons subject to control of the management or policies of the applicant, and descriptions of previous judicial or regulatory agency disciplinary action in connection with investment activities or any willful nondisclosure of information to a regulatory agency. Additionally, any outside services used for a recordkeeping or financial repository

must be identified, and the identities of executive officers, directors and significant shareholders (direct owners of more than 5% of the applicant's stock) must also be furnished.

A registrant's failure to keep current the information submitted on the form may result in disciplinary, injunctive, administrative, or criminal action. Intentional misstatements or omissions on the form may result in criminal penalties.

[b] Registration of Successors and Fiduciaries. Successors to registered broker-dealers are entities which intend to "succeed" to the business of the registered entity. Successors may be registered prior to their succession in order to prevent the disruption of the business during a subsequent registration period. n29 The application must contain information and documents regarding the applicant, successor, and persons associated with them. n30

If the successor continues the business of the predecessor, the predecessor's registration is deemed to remain effective as to the successor for a period of 75 days after the succession. n31 However, to adopt his predecessor's registration, the successor must file a new application for registration on Form BD within 30 days of the succession. n32

The registration of a broker or dealer may be deemed to be the registration of a fiduciary appointed or qualified by a court of competent jurisdiction to continue the business of the registered broker or dealer if the fiduciary files with the Commission a statement setting forth the information required by Form BD within 30 days after beginning performance of his or her duties. n33

[c] Registration of Separately Identifiable Department or Division. Any person who is classified as a broker or dealer because of activities as a municipal securities dealer or municipal securities broker and who so acts through a separately identifiable department or division may register (on Form BD) the separately identifiable department or division under Section 15. n34 The separately identifiable department or division must have been in operation on June 4, 1975. n35 If the separately identifiable department or division is so registered and the Commission grants the registration, the department or division, rather than the individual, is deemed to be the broker or dealer for purposes of the Exchange Act. n36

[d] Amendments to Form BD. Information contained in Form BD is considered cumulative and ongoing, and must be promptly updated or amended at the time of any changes regarding the required information. Amendments are required to be filed on Form BD. Amendments consist of an execution page containing original signatures, and the original pages with any revisions attached, with the affected question numbers circled. n37

[e] Grant or Denial of Application. Prior to 1975, registration applications automatically became effective 30 days after the Commission received the application, unless they were denied. Presently, an affirmative act on the Commission's part is required before the registration takes effect.

The Commission must, within 45 days of the date of filing the application or a longer period to which the applicant consents, either issue an order granting the application or institute proceedings to determine whether registration should be denied. n38 The applicant must be given notice of the grounds for denial as well as an opportunity for hearing. If it appears that the applicant is unable to satisfy the broker-dealer registration requirements, or, if registration is granted, it would be subject to revocation or suspension, the application must be denied. n39 The hearing must be concluded within 120 days of the filing of the application. n40

The Commission must grant the registration if it is satisfied that the applicant has complied with all of the broker-dealer registration requirements.

[4] Fingerprinting Requirements

In the early 1970s, after the results of two studies were disclosed, one prepared by Congress n41 and the other by the Commission, attention was drawn to the problem of theft of securities by brokerage firm employees. n42 In order to

discourage and minimize such thefts, Congress enacted a fingerprinting requirement to assist in identifying certain securities industry employees who potentially pose security risks. n43

Section 17(f)(2) of the Exchange Act requires every partner, director, officer, or employee of a member of a national securities exchange, broker, dealer, registered transfer agent, or registered clearing agency to be fingerprinted and to submit the fingerprints to the Attorney General of the United States for identification. n44 For virtually all registered broker-dealers, this requirement is satisfied by submission of fingerprint cards to a registered national exchange or registered national securities association, which in turn forwards the fingerprint cards to the United States Attorney General. n45 The Act grants the Commission authority to exempt, by rule, any class of partners, directors, officers or employees from the fingerprinting requirements. n46

Fingerprint cards may be turned into a registrant's exchange or registered national securities organization who have had a fingerprinting "plan" approved by the Commission. n47 The fingerprinting plans of FINRA, as well as the American, Midwest, Pacific, Boston, Philadelphia, and New York Stock Exchanges have been so approved. n48

[a] Permissive Exemptions. Pursuant to its statutory authority to grant exemptions to the fingerprinting requirements, the Commission promulgated Rule 17f-2 to provide for certain permissive exemptions. n49 Rule 17f-2(a)(1) sets forth four permissive exemptions from the fingerprinting requirements that may be claimed by any member of a national securities exchange, broker, dealer, registered transfer agent, and registered clearing agency as long as they comply with the notice requirement of the rule. n50

First, every member of a national securities exchange, broker, dealer, or registered clearing agency may claim an exemption for any partner, director, officer, or employee who: is not engaged in the sale of securities; does not regularly have access to the keeping; handling, or processing of securities, monies, or the original books and records relating thereto; and does not have any direct supervisory responsibility over persons engaged in those activities.

Second, a registered transfer agent n51 may claim an exemption for any partner, director, officer, or employee who does not: perform "transfer agent functions;" n52 regularly have access to the keeping, handling, or processing of securities, monies, or the original books and records relating to such securities or monies; and have any direct supervisory responsibility over persons engaged in those activities.

Third, a registered broker-dealer may claim an exemption for any partner, director, officer, or employee who does not regularly have access to the keeping, handling, or processing of securities, monies, or the related original books and records if the broker-dealer: is engaged exclusively in the sale of shares of registered open-end management investment companies, variable contracts, or interests in limited partnerships, unit investment trusts, or real estate investment trusts, provided these securities usually are not evidenced by certificates; is current in its obligation to update Item 10 of Form BD to disclose the existence of any statutory disqualifications set forth in the Act; n53 maintains insurance or bonding, indemnifying it for losses to customers caused by the fraudulent or criminal acts of any of its partners, directors, officers, or employees for whom an exemption is being claimed under this subsection; n54 and is subject to the jurisdiction of a state insurance regulator concerning its sale of variable contracts.

Finally, any partner, director, officer, or employee who is required to be fingerprinted will be exempt if the organization can demonstrate that, on at least three occasions: it has attempted in good faith n55 to obtain from the partner, director, officer, or employee a complete set of fingerprints acceptable to the Attorney General for identification and processing by having the person's fingerprints rolled by a person competent to do so and submitting the fingerprint cards to the Attorney General in accordance with proper procedures; the person's fingerprint cards have been returned to it by the Attorney General without the person's fingerprints having been identified because the fingerprints were not legible; and the fingerprint cards that were rejected as illegible by the Attorney General have been retained by the organization. n56

[b] Exemptions by Application. The Commission may grant an exemption from the fingerprinting requirements,

upon specified terms, conditions and periods, to any class of partners, directors, officers, or employees of a subject organization if the Commission determines that the grant of the exemption is not inconsistent with the public interest or the protection of investors. n57

[c] Satisfaction of the Fingerprinting Requirements by Fulfilling other Law or Rule. An organization may satisfy the fingerprinting requirements of Section 17(f)(2) as to any partner, director, officer, or employee if that person, in connection with his or her employment with the subject organization, has been fingerprinted pursuant to any other law, rule, or regulation of any state or federal government or agency thereof. The fingerprint cards must have been processed by the Attorney General or his or her designee and maintained in accordance with Rule 17f-2(d). n58

[d] Record Maintenance. Regardless of the method used to fulfill the fingerprinting requirements, each organization must keep the processed fingerprint cards or other substitute records (*e.g.*, when the card is not returned after processing) n59 to be maintained. In addition, the organization must keep any information received from the Attorney General pertaining to the fingerprinting of all partners, directors, officers, and employees. n60

All processed cards, substitute records, and information received from the Attorney General should be kept in an easily accessible place at the organization's principal office for inspection, upon request, by the Commission, an appropriate regulatory agency (if not the Commission itself), or other designated examining authority. The organization's principal office must furnish the regional, branch, or satellite office actually employing the person with written evidence that the person's fingerprints have been processed by the FBI together with a copy of any criminal history record information received from the FBI. n61

All fingerprint cards, records, and information required to be maintained should be retained for a period of at least three years after termination of that person's employment or relationship with the organization. n62

The processed fingerprint cards and other records may be maintained on microfilm if the organization at all times:

- has facilities for the immediate and easily legible projection of the microfilm and for the production of clear legible facsimile enlargements;
- files and indexes the films in a manner that permits the immediate location and retrieval of any particular record;
- is ready to immediately provide a clear facsimile enlargement of any records requested by the Commission, appropriate regulatory agency, or designated examining authority or their examiners or other representatives; and
- stores a copy of the microfilm records separately from the original microfilm records. n63

[5] Exemptions from Broker-Dealer Registration Requirements

Exemptions from registration requirements are either statutorily derived from the express language of the Exchange Act n64 or made pursuant to the

Commission's authority to make exemptions for a particular broker or dealer or class of brokers or dealers. n65 The Exchange Act itself provides exemptions for any person whose securities activities are exclusively intrastate n66 in that they do not use a national securities exchange or any means of interstate commerce such as the mail system to transact their business. n67 Rule 15a-6 of the Act exempts foreign broker dealers who limit their activities to those proscribed in the rule. In essence a foreign broker dealer who effects unsolicited transactions or deals with major U.S. institutional investors under certain specified conditions is exempt. n69 Guidance is available from the Commission for these foreign

broker-dealers. n70 In addition, foreign broker dealers who do not solicit securities transactions with U.S. persons or who do not use the instrumentalities of U.S. interstate commerce may also be exempt from registration.

Several classes of securities are also expressly exempt by the Act. n71 Such exemptions remove from registration requirements any broker or dealer who engages solely in transactions involving the exempt securities.

The Commission has exercised its exemption power to exclude from registration requirements the following securities and entities:

- shares of cooperative apartment corporations that represent ownership or entitle the holders to possession and occupancy of specific apartment units owned by the corporations, when the shares are sold by or through licensed real estate brokers of the political subdivision in which the property is located; n72
- exchange members who have become disassociated from registered broker-dealers and have submitted a Form BD and meet certain other requirements; and n73
- certain non-bank lenders participating in the Small Business Administration's guaranteed loan program. n74

The Commission has denied requests for exemption when granting an exemption would be inconsistent with either the general interests of the public or the protection of investors. n75

The Gramm-Leach-Bliley Act ("GLB Act") repealed the blanket exception of banks from the definition of "broker" and "dealer" under the Exchange Act and replaced it with functional exceptions incorporated in amended definitions of "broker" and "dealer." Under the GLB Act, banks that engage in securities activities either must conduct those activities through a registered broker-dealer or ensure that their securities activities fit within the terms of a functional exception to the amended definitions of "broker" and "dealer."

The GLB Act provided that the amended definitions of "broker" and "dealer" were to become effective May 12, 2001. On May 11, 2001, the Commission issued interim final rules ("Interim Rules") to define certain terms used in, and grant additional exemptions from, the amended definitions of "broker" and "dealer." n76 Since that time, the Commission has been wrestling with the task of drafting rules to govern the securities broker and dealer activities of banks under the GLB Act. n77 In February 2003, the Commission issued final rules governing certain bank securities dealer activities. Specifically, under the final rules of bank securities dealer activities, banks have been granted an exemption from dealer registration for a de minimus number of riskless principal transactions and certain asset-backed transactions, and certain securities lending transactions. These changes became effective September 30, 2003 and alter Rules 3a5-1, 3b-18, 15a-8 and 15a-11. n78

As to final rules related to bank securities broker activities, in June 2004, the Commission unanimously voted to propose new Regulation B, which will interpret various of the bank securities activities exceptions from the definition of "broker" in Section 3(a)(4) of the Exchange Act. Regulation B does not provide interpretive guidance on all the bank broker exceptions contained in Section 3(a)(4) of the Exchange Act. n79

The Interim Rules included a temporary exemption that gave banks time to come into full compliance with the more narrowly-tailored exceptions from broker-dealer registration. n80 To further accommodate the banking industry's continuing compliance concerns, the Commission delayed the effective date of the bank "broker" and "dealer" rules through a series of orders that, among other things, ultimately extended the temporary exemption from the definition of "broker" to January 15, 2007. n81

[6] Inspection of Newly-Registered Broker-Dealers

In 1975, the Commission determined that all newly-registered brokers and dealers must submit to an inspection within six months of their registration to ensure compliance with the Exchange Act and applicable regulations. n82 Originally, either the Commission itself or a self-regulatory organization to which the new broker belonged would conduct the inspection. However, in 1982, the Commission delegated the entire responsibility for conducting these inspections to the self-regulatory organizations, after having determined that these organizations typically conducted their own inspection of new members. n83

Accordingly, Rule 15b2-2(b) authorizes the self-regulatory organizations to conduct inspections to determine compliance with financial responsibility rules n84 within six months of registration, and to conduct an inspection to ensure conformity with the remaining provisions of the Exchange Act and the rules relating to it within twelve months of registration. n85 The organizations are permitted to conduct both inspections at once within the first six months. n86

The new registrant inspection may be delayed up to an additional six months following registration for registrants who have not yet initiated sufficient operations to provide the necessary books and materials for inspection. n87

[7] Withdrawal from Registration

Withdrawal from registration is a formal process requiring Commission approval. Absent such an approved withdrawal, a broker or dealer remains subject to all of the requirements of a registered entity or person. Withdrawal may be desired for several reasons, including avoidance of disciplinary action which would affect registration such as suspension or revocation of registration pursuant to the Act, n88 termination of brokerage business, or denial of a registration application. Withdrawal is accomplished by filing a written notice on Form BDW. n89 Withdrawal will be approved as long as the withdrawal meets with the terms and conditions of withdrawal which the Commission has deemed appropriate or necessary to further the public interest or to protect investors. n90

Rule 15(b)6-1 sets forth the terms and conditions established by the Commission for withdrawal. n91 In 1993, this rule was revised to allow brokers or dealers who belong to the FINRA to file Form BDW with the FINRA's central data processing system, the Central Registration Depository (CRD). Previously, a withdrawal application was required to be made with both the Commission and the FINRA. n92 A statement describing the applicant's financial condition within 10 days before the filing of the form must also be submitted. n93 Granting withdrawal is completely discretionary if a disciplinary proceeding is underway at the time withdrawal is sought. n94

Form BDW requires information pertaining to the date a brokerage business ceased its operations, a description of money or securities owed to any customers, brokers, or dealers, as well as any complaints, proceedings, or unsatisfied judgments or liens against the entity seeking withdrawal.

[a] When Withdrawal Becomes Effective. Until recently, withdrawal became effective on the 60th day after filing Form BDW, unless the Commission instituted a proceeding prior to that date to censure, suspend, or revoke the registration of such broker or dealer, or imposes any other terms and conditions on the withdrawal. n95 In its April 30, 1999 Release, the Commission amended its prior rule to allow a broker-dealer and the Commission to agree to extend that 60 day period to permit the Commission further time to investigate a broker-dealer without being forced to institute a proceeding rather than lose jurisdiction over the withdrawing broker-dealer. n96

The Commission may shorten the time after which the withdrawal becomes effective. n97 The existence of customer claims against a broker or dealer who has filed a notice of withdrawal from registration may result in an extension of the effective date of the withdrawal by six months or such shorter period as the Commission may determine. n98 Such extensions are available only where outstanding customer claims exist against the broker or dealer which arose prior to the effective date of withdrawal. This rule operates to extend the withdrawal period in order to allow the broker to carry

out the purposes of the Securities Investor Protection Act of 1970 (SIPA). n99 Beyond this qualification, the broker or dealer may not operate or engage in any securities business as a broker or dealer during the extension period.

[8] Suspension, Revocation, and Cancellation of Registration

[a] Violations Triggering Disciplinary Action. The Commission may censure, place limits on the activities or functions of, suspend (for a period not exceeding twelve months), or revoke the registration of any broker or dealer, or any person associated with a broker or dealer, if it finds that after a properly noticed hearing, the individual has committed any of the violations specified in the Exchange Act n100 and that the sanction n101 is in the public interest. The violations which trigger the Commission's disciplinary authority include:

- an act of willfully making or causing to be made any false or misleading statement or omission of any material facts in any application for registration or report to the Commission; n102
- any criminal conviction within ten years preceding the filing of an application for registration, or any time thereafter, for any felony or misdemeanor:
- involving the purchase or sale of any security, taking a false oath, making a false report, bribery, perjury, burglary, or conspiracy to commit any such offense; n103
- arising out of the conduct of a business of a broker, dealer, government securities broker, government securities dealer, investment adviser, municipal securities dealer, bank, insurance company, fiduciary or person or entity required to be registered under the Commodity Exchange Act ("CEA"); n104
- involving larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; n105 or
- involving the violation of § 152 (bankruptcy: concealment of assets, false oaths or claims and bribery), § 1341 (mail frauds: frauds and swindles), § 1342 (mail frauds: fictitious name or address), § 1343 (mail frauds: fraud by wire, radio or television) of Title 18, U.S.C., or Ch. 25 (counterfeiting and forgery), or Ch. 47 (fraud and false statements) of Title 18, U.S.C., or a substantially equivalent foreign statute. n106
- a temporary or permanent ban from acting in various capacities related to the securities field, including engaging in any practice in connection with any activity as an investment adviser, underwriter, broker, dealer, municipal securities dealer, government securities broker, government securities dealer, transfer agent or person or entity registered under the CEA, or an affiliated person or employee of any investment company, bank entity or person registered under such Act, or insurance company, or in connection with the purchase or sale of any security; n107
- willful violation of certain federal securities laws, n108 or the CEA, the rules and regulations thereunder, or the rules of the MSRB, or inability to comply with any such provisions; n109
- willful aiding, abetting, counselling, commanding, inducing, or procuring violations by any other person of federal securities laws, or the CEA, the rules and regulations thereunder, or the rules of the MSRB, or failing reasonably to supervise another person who commits such a violation, with a view to preventing violations, if such other person is subject to his supervision; n110
- being subject to a Commission order or injunction pursuant to Section 15(b)(6). n111

[b] Grounds for Sanctioning Associated Persons. All persons associated with (or seeking to become associated with) brokers or dealers are subject to the penalties previously enumerated for brokers and dealers. n112 The Commission is empowered to censure, limit, or bar anyone from associating with a broker or dealer should it find that such measures further the public interest. n113 Notice and opportunity to be heard by the prospective associate of a broker or dealer is required. n114

[c] Suspension and Revocation of Registration. The Commission may, by order, suspend any registration under Section 15(b) pending its final determination on whether the registration should be revoked. n115 To suspend the registration, it must appear to the Commission, after a properly noticed hearing, that suspension is necessary or appropriate for furtherance of the public interest or for the protection of investors. n116 Should revocation be justified, the Commission will make a final determination at the end of the suspension period. Section 15(b)(4) permits suspensions of up to twelve months subject to the Commission's discretion. n117

[d] Cancellation of Registration. If the Commission finds that a registrant or applicant is no longer in existence or has ceased to do business as a broker or dealer, it may cancel the application or registration of the broker or dealer. n118 A registrant may not, however, avoid or nullify revocation proceedings by corporate dissolution or by withdrawal of registration. n119 The purpose of the cancellation provision is merely to enable the Commission to get rid of "dead wood" in its files. n120

[9] Readmission

The Commission may grant applications for readmission to regular securities activities for individuals or firms it has previously barred pursuant to its statutory authority. n121 To have the disqualification lifted, the applicant must make a showing satisfactory to the Commission that, in the light of changed circumstances, re-entry into the securities business would be consistent with the public interest. n122 The application for readmission is made by filing a copy of the Commission order imposing the bar, the appropriate readmission form, providing an update of all information, and a written statement from a prospective employer describing the terms and conditions of proposed employment and supervision of the applicant, the qualifications and background of the proposed supervisor(s), the disciplinary history of the office of proposed employment, and the names of any other associated persons who have been previously barred. n123 These documents must be filed as exhibits to an affidavit addressing the following factors:

- the period of time that has elapsed since the disqualification was entered;
- the applicant's attempt to undo any injury resulting from his prior misconduct, such as restitution;
- the applicant's compliance with the disqualification order;
- the applicant's employment during the period subsequent to the entry of the order;
- the capacity or position in which the applicant proposes to be associated;
- the manner and extent of supervision to be exercised over the applicant and, where applicable, by such applicant;
- any relevant courses, seminars or other actions completed by the applicant subsequent to the bar, to prepare for return to the securities business; and
- any other information material to the application. n124

Additionally, the Commission will consider the nature of the findings that resulted in the bar, and will not consider any

application that attempts to re-argue or collaterally attack those findings. n125

Where the applicant is also subject to the rules of a self-regulatory organization, approval for readmission by that organization is required as well, pursuant to Rule 19h-1. n126 The Commission will not consider a readmission application if another application to a self-regulating organization is pending at the same time. However, if the Commission application is filed first and granted, it may be used as a basis for application for readmission to the organization. n127

(n5)Footnote 5. *See 17 C.F.R. § 240.15b1-1*.

(n6)Footnote 6. In 1982, the Commission adopted Rule 15b2-2, which authorizes and directs self-regulatory organizations to conduct the inspections of newly registered brokers and dealers required by the Act. *See Exch. Act Rel. No. 34-18,556* [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,109 (Mar. 10, 1982).

(n7)Footnote 7. These include daily records describing all securities transactions, including receipt and disbursement of funds, the identities of buyers and sellers, and the name and type of securities, *17 C.F.R. § 240.17a-3*; quarterly financial reports that must be filed with the Commission, *17 C.F.R. § 240.17a-5*; and the preparation of balance sheets for customers, *17 C.F.R. § 240.17a-5*.

(n8)Footnote 8. *See 15 U.S.C. § 78o(c)(3)*. These requirements are discussed in § 3.04 *infra*.

(n9)Footnote 9. *See 15 U.S.C. § 78q(f)(2)*.

(n10)Footnote 10. *See SEC v. Howard J. Hansen*, [1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,426 (Apr. 6, 1984) (substantial likelihood existed that unregistered broker with history of securities law violations would continue to violate laws, thereby warranting an injunction).

(n11)Footnote 11. *See, e.g., In re Assurance Inv. Co.*, [1964-1966 Transfer Binder] Fed. Sec. L. Rep. (CCH) P

77,337 (Apr. 15, 1966) (revoking registration of broker-dealer for engaging in securities transactions prior to registration date).

(n12)Footnote 12. *See, e.g., United States v. Queen*, 4 F.3d 925 (10th Cir. 1993) (salesman's nonregistration as a broker warranted increased criminal penalties for wire fraud violations).

(n13)Footnote 13. In some cases, courts have ordered the rescission of transactions facilitated by unregistered brokers. *See, e.g., Eastside Church of Christ v. Nat'l Plan, Inc.*, 391 F.2d 357 (5th Cir. 1968) .

Contracts entered into by a broker who has failed to register will be subject to rescission under Section 29(b), 15 U.S.C. § 78cc(b), if the party seeking rescission is in privity with the broker and is in the class of persons that the Exchange Act was designed to protect. *See Reg'l Properties, Inc. v. Fin. & Real Estate Consulting Co.*, 678 F.2d 552 (5th Cir. 1982) .

Civil liability under *Rule 10b-5* is discussed in § 5.04 *infra*.

(n14)Footnote 14. "Banks" include banking institutions organized under the laws of the United States, member banks of the Federal Reserve System, or any other banking institution, whether incorporated or not, doing business under the laws of any State or of the United States, a substantial portion of which consists of receiving deposits or exercising a fiduciary power similar to those permitted to national banks. 15 U.S.C. § 78c(a)(6). Gramm-Leach-Bliley integrated the securities activities of banks within the federal securities regulatory scheme. *See, e.g.,* Section 15(j) of the Exchange Act, effective May 12, 2001.

(n15)Footnote 15. www.sec.gov/divisions/marketreg/bdguide.htm (April 24, 2008). Questions concerning broker-dealer registration have often arisen in circumstances where an issuer of securities elects to distribute securities through its officers, directors, or other personnel in lieu of a registered broker or dealer. This method of distribution is frequently employed by promoters of tax-sheltered interests such as real estate syndications or oil and gas drilling programs. In such cases, the Exchange Act has customarily been interpreted to not require the issuer itself to register as either a broker or dealer because the issuer is not itself deemed to be in the business of effecting transactions for the account of others or in the general business of buying and selling securities for its own account. *See* 43 SEC Ann. Rep. 147 (1977). For example, Rule 15a-6 under the Exchange Act permits a broker-dealer operating outside the United States (*i.e.*, a non-US broker-dealer) to conduct certain activities in the United States and with U.S. persons without Commission registration or affiliation with a Commission-registered broker-dealer. In particular, pursuant to Rule 15a-6, a non-US broker-dealer may (i) effect "unsolicited" securities transactions with U.S. persons, (ii) solicit and effect securities transactions for specified categories of counterparties, and (iii) subject to certain conditions, provide research to certain large institutional investors. *See* Rule 15a-6(a)(1),(2) and (4). However, as a practical matter, solicitation has traditionally been viewed quite broadly by the Commission and would generally include any action intended to induce securities transactions, develop goodwill or make the non-US broker-dealer known in the United States. *See* Exch. Rel. No. 34-27017 (July 11, 1989) at note 103.

A related issue is identifying whether particular employees of an issuer are themselves subject to registration requirements for brokers and dealers. Various SEC no-action letters have shaped the criteria commonly applied in this regard. Such factors have included whether or not the persons acting on the issuer's behalf are employees or an independent contractors; whether they receive a salary or a commission-type pay; whether they perform other non-securities-related functions, and whether the involvement is one-time only or ongoing. *See, e.g.,* Wilson & Sons Energy, SEC No-Action Letter, SEC No Act. LEXIS 2845 (1982) (publicly available Sept. 11, 1982) (reviewing criteria for identifying employees subject to registration requirements).

In 1985, the Commission adopted Rule 3a4-1 to provide direction on which persons who distribute securities on an issuer's behalf need register as brokers or dealers. *See* Exch. Act Rel. No. 34-22,172 [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,792 (June 27, 1985). The rule establishes a "safe harbor" within which persons associated with

an issuer will not be deemed to be brokers, as long as these persons are not subject to disqualification based upon securities act violations, do not receive commissions based upon sales, and are associated with a registered broker-dealer. *See* 17 C.F.R. § 240.3a4-1(a)(1)-(3). Generally, an associated person of the issuer may avail himself or herself of this safe harbor in one of three ways:

- by limiting activities to certain kinds of transactions which do not evoke the same need for protection as broker-dealer activities, such as offers and sales made through a registered broker-dealer or to financial institutions and their intermediaries;
- by being a *bona fide* employee meeting criteria, such as performance of duties other than selling securities, and limiting the frequency of such sales to once a year; or
- by engaging only in passive involvement, such as administrative or clerical functions. 17 C.F.R. § 240.3a4-1(a)(4).

Cf. Grayson, Burger & Co., SEC No-Action Letter, [1987-1988 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 78,520 (June 11, 1987) which found that a brokerage firm's corporate partners and individual shareholder employees who formed and controlled the corporate partners would not have to register as broker-dealers because of representation that, *inter alia*, neither the corporate partners nor the shareholder employees would engage in any securities business outside the firm; all securities transactions would be effected solely by the firm and not by a corporate partner; all books and records would be maintained solely by the firm; and the firm would be liable for the acts of each shareholder employee arising from any of the firm's securities transactions.

(n43)Footnote 43. 15 U.S.C. § 78q(f)(2).

(n44)Footnote 44. 15 U.S.C. § 78q(f)(2).

(n45)Footnote 45. See 17 C.F.R. § 240.17f-2 (1993).

(n46)Footnote 46. See § 3.03[3][b] *infra*.

(n47)Footnote 47. See Exch. Act Rel. No. 34-18,645 [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,205

(Apr. 14, 1982) at Part II(B)(3).

(n48)Footnote 48. Exch. Act Rel. No. 34-18,645.

(n49)Footnote 49. *See 17 C.F.R. § 240.17f-2 (1993).*

(n50)Footnote 50. This is satisfied by preparation of a current statement entitled "Notice Pursuant to Rule 17f-2" which contains such information as the names of all persons for whom exemption is claimed, their duties, and security measures in effect. *See 17 C.F.R. § 240.17f-2(e)(1)(1993).*

A copy of the notice must be kept at both the organization's principal office and the office actually employing the person for whom exemption is claimed. The notice need not be filed with the Commission or reviewed by it, although it must be made available upon request for inspection by either the Commission, an appropriate regulatory authority, or other designated authority. *See Rule 17f-2(e)(2); 17 C.F.R. § 240.17f-2(e)(2)(1993).*

(n51)Footnote 51. The Act defines a transfer agent as one who engages in the following on behalf of an issuer of securities or on behalf of itself as an issuer:

- countersigning securities upon issuance;
- monitoring the issuance of securities with a view to preventing unauthorized issuance;
- registering the transfer of securities;
- exchanging or converting securities; or
- transferring record ownership of securities by bookkeeping entry without physical issuance of securities certificates.

See 15 U.S.C. § 78c(a)(25).

(n52)Footnote 52. *15 U.S.C. § 78c(a)(25).*

(n53)Footnote 53. Item 11 of Form BD pertains to any history of court or regulatory agency disciplinary action against the applicant taken in connection with investment activities or failures to disclose information to any regulatory agency.

(n54)Footnote 54. Persons who qualify for the first permissive exemptions, such as outside directors or partners, are not subject to the insurance and bonding requirements. *See Exch. Act Rel. No. 34-19,268 [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,280 (Nov. 18, 1982).*

(n55)Footnote 55. A factor indicating lack of good faith might be the failure to ensure that persons required to be fingerprinted do not purposefully create impediments to the production of legible fingerprints. Exch. Act Rel. No. 34-18,645 [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,205 (Apr. 14, 1982).

(n56)Footnote 56. *17 C.F.R. § 240.17f-2(a)(1)(i)-(iv) (1993).*

(n57)Footnote 57. *Rule 17f-2(a)(2), 17 C.F.R. § 240.17f-2(a)(2) (1993).*

(n58)Footnote 58. Rule 17f-2(d) is discussed in § 3.03[3][d] *infra*. Rule 17f-2(b), however, cannot be used to satisfy the fingerprinting requirements of Section 17(f)(2) if the state or federal agency does not disclose any record of

conviction or arrest uncovered as a result of its fingerprinting process. The rule is also inapplicable to persons whose fingerprint cards were submitted to the FBI in connection with other employment. Exch. Act Rel. No. 34-18,645 [1981-1982 Transfer Binder] Fed. Sec. L. Rep (CCH) P 83,205 (Apr. 14, 1982).

(n59)Footnote 59. Every substitute record should state:

- the name of the person whose fingerprint card was submitted to the Attorney General;
- the name of the organization that submitted the fingerprint card;
- the name of the person or organization that rolled the fingerprints;
- the date the fingerprints were rolled; and
- the date the fingerprint card was submitted to the Attorney General. *Id.*

(n60)Footnote 60. Rule 17f-2(d)(1); 17 C.F.R. § 240.17f2(d).

(n61)Footnote 61. Rule 17f-2(d)(1); 17 C.F.R. § 240.17f2(d).

(n62)Footnote 62. *Id.* A self-regulatory organization that is also the designated examining authority for the subject organization may provide for the storage and maintenance of records required to be kept under Rule 17f-2(d)(1) on behalf of the subject organization, provided that:

- the organization has filed a fingerprinting plan that has been declared effective by the Commission;
- the records are subject at any time, or from time to time, to reasonable periodic, special, or other examinations by representatives of the Commission; and
- the self-regulating organization (SRO) furnishes the Commission, upon demand, at either the principal office or at the regional office, copies of the records.

Rule 17f-2(d)(2); 15 U.S.C. § 78q(f)(2).

(n63)Footnote 63. Rule 17f-2(d)(3); 17 C.F.R. § 240.17f2(d).

(n64)Footnote 64. Section 3(a)(12) of the Act includes a lengthy list of exempted securities which includes: government securities; interests in common trust funds maintained by banks for collective investment and reinvestment of assets for which the bank is trustee, administrator, executor or guardian; securities arising from contracts issued by insurance companies in connection with pension or profit-sharing plans meeting the qualifications set forth in the Internal Revenue Code (26 U.S.C. § 401 (1994)); and any other security which the Commission may designate as exempt. *See* 15 U.S.C. § 78c(a)(12).

(n65)Footnote 65. *See* 15 U.S.C. § 78o(a)(2). Such exemptions must be consistent with the public interest and investor safety.

(n66)Footnote 66. This follows naturally from the registration requirement's express coverage of those engaging in *interstate* securities activities. *See* 15 U.S.C. § 78o(a)(1).

(n67)Footnote 67. The exemption does not, however, appear to preclude a state from investigating or bringing an

enforcement proceeding against an exempt person for fraud, deceit or unlawful conduct in connection with a securities transaction. *See* Section 18(c) of the Securities Act. The Conference Committee expressly noted that the new section preserved state authority to protect investors pursuant to state antifraud laws. H.R. Rep. No. 104-622 (June 17, 1996).

(n68)Footnote 69. *Ibid.*

(n69)Footnote 70. Securities Exchange Act Release No. 27017, 54. Fed. Reg. 30013 (August 15, 1999).

(n70)Footnote 71. *See* 15 U.S.C. § 78o(a)(1). *See also* § 3.03[1] at n.3 *supra*.

(n71)Footnote 72. *See* Rule 15a-2, 17 C.F.R. § 240.15a-2 (1993).

(n72)Footnote 73. Rule 15a-4 contains a 45-day exemption for members of a national securities exchange to continue transactions in that exchange when they become disassociated from a registered broker or dealer and who have filed Form BD themselves, are in compliance with all rules applicable to registered brokers and dealers, and are members of an exchange which has filed a statement with the Commission which attests that it has reviewed their application and does not believe grounds exist which may result in denial of the member's application. *See* Exch. Act Rel. No. 34-12,372 [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,467 (Apr. 26, 1976).

(n73)Footnote 74. *See* Rule 15a-5, 17 C.F.R. § 240.15a-5 (1993). Under the rule, the securities activities of the non-bank lenders must be limited to buying and selling for their own account only those securities for which the lender receives a note evidencing loans to small businesses qualifying under the Small Business Administration's (SBA) guaranteed loan program, and sells the portion guaranteed by the SBA.

The purpose of this exemption is to facilitate participation by qualified lending institutions in the SBA's guaranteed loan program by exempting such institutions from regulatory requirements in light of the SBA's intended encouragement of a secondary market in the guaranteed portion of those loans. Rule 15a-5, therefore, represents an effort by the Commission to reduce duplicative regulation which might frustrate the goals of the SBA. Exch. Act Rel. No. 34-12,967 [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,806 (Nov. 11, 1976).

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 § 3.04

AUTHOR: W. Reece Bader

§ 3.04 Post-registration Recordkeeping and Reporting Requirements

When a broker-dealer becomes registered with the Commission under Section 15(b), it becomes subject to record maintenance, record preservation, and reporting requirements under the Exchange Act. SEC rules govern these recordkeeping requirements, and the SEC may inspect the records and discipline broker-dealers and their associates for any violations.

The statutory provisions governing registered broker-dealers' recordkeeping and reporting requirements under the Exchange Act are as follows:

- Section 17(a)(1) authorizes the SEC to tell registered broker-dealers what books and records they must keep and preserve and what reports they must make and disseminate.
- Section 17(b) sets forth the Commission's power to examine (through its representatives) all records the registered broker-dealers are required to keep. n1
- Section 17(e)(1) requires registered broker-dealers to file annual financial condition reports with the Commission and provide financial condition statements to each customer.
- Section 17(e)(2) allows the Commission to specify the form and content of the financial statement filings required by section 17(e)(1).

The Commission has issued rules requiring registered broker-dealers to maintain and preserve records and make and disseminate reports. n2 These rules are based on the Commission's findings of what is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Exchange Act. n3 For example, one of the Exchange Act's purposes, as set forth in Section 2 of the Act, is the perfecting of the mechanisms of national market systems for securities, the clearance and settlement of securities transactions, and the safeguarding of related securities and funds--a purpose obviously furthered by broker-dealer recordkeeping.

Recent amendments to Section 15(h) of the Exchange Act give further weight to the Commission's rules by prohibiting states from imposing recordkeeping requirements inconsistent with those imposed by the Commission. In return, the Commission is obligated to consult periodically with state officials with respect to the state regulatory scheme, but does not require the Commission to change or conform its regulatory framework in response to state regulators.

A registered broker-dealer who disobeys the post-registration recordkeeping and reporting requirements can face injunctive action or administrative proceedings by the Commission. ⁿ⁴ However, the Supreme Court held in *Touche Ross & Co. v. Redington* ⁿ⁵ that the Section 17(a) recordkeeping and reporting requirements do not create an implied cause of action for damages in favor of anyone (*i.e.* private parties). ⁿ⁶

[1] Recordkeeping Requirement

The Commission keeps track of securities transactions by registered broker-dealers through its Section 17 authority, granted by Congress, to prescribe what books and records registered broker-dealers must keep and preserve and to set forth how long they should be preserved. Though these recordkeeping requirements may seem to be dry technicalities, the SEC has described them as "a keystone of the surveillance of brokers and dealers by our staff and by the securities industry's self-regulatory bodies." ⁿ⁷ Clearly, the recordkeeping requirements are not to be taken lightly. ⁿ⁸

Rule 17a-3, one of the rules adopted pursuant to this authority, sets forth what books and records must be made and kept current by registered broker-dealers, exchange members transacting a business in securities directly with nonmembers, and broker-dealers transacting a business in securities through exchange members. ⁿ⁹ The records Rule 17a-3 covers include (in the numbering used in the rule):

- (1) Records related to inflow or outflow of cash or securities, specifically, records of original entry (*e.g.*, blotters) containing itemized daily records of all securities transactions, receipts and deliveries of securities (including certificate numbers), receipts and disbursements of cash, and all other debits and credits. The records must show the account involved, name and amount of securities, unit and aggregate purchase/sale prices, trade date, and name of purchaser, seller, recipient, or deliverer.
- (2) Ledgers or other records reflecting all assets, liabilities, income, expense, and capital accounts.
- (3) Customer ledger accounts, specifically, ledger accounts or other records itemizing all purchases, sales, receipts, deliveries of securities and commodities, and other debits and credits. The ledger accounts must list these transactions separately for each cash and margin account of every customer as well as those of the broker-dealer and its partners.
- (4) Ledgers or other records showing securities currently in transfer, dividends and interest received, loans and borrowings of securities and money, the collateral for money loans, securities failed to receive or deliver, stock record differences (that is, all long and short securities record differences found after the examination, count, verification, and comparison required by Rules 17a-5 and 17a-13), and repurchase and reverse repurchase agreements.
- (5) Ledgers showing long and short positions carried as of the clearance dates by the broker-dealer, its partners, its customers, or others, and related information.
- (6) Customer-transaction memoranda of brokerage orders (whether executed or not) showing the terms and conditions, time of entry, price, general description, and any modification or cancellation of each brokerage order or other instruction given or received for any securities sale or purchase. Orders based on a broker-dealer or employee's discretionary power should be noted. The rule defines "instruction" to include internal instructions among broker-dealer partners and employees, and "time of entry" as time of

1-3 Federal Securities Exchange Act of 1934 § 3.04

the instruction's transmission for execution (or, if no transmission, time of receipt).

(7) Transaction memoranda of purchases and sales for the broker-dealer's account, showing the price and (as feasible) time of execution. If the transaction is with a customer who is not a broker-dealer, the broker-dealer must prepare a memorandum of each order received, showing its time of receipt, terms and conditions, and the account to which it was entered.

(8) Copies of purchase and sale confirmations (including repurchase and reverse repurchase agreements) and of notices of all other debits or credits for cash, securities, or other items for the accounts of customers and partners.

(9) Customer cards showing the name and address of cash and margin accounts' beneficial owner, and, for margin accounts, bearing the owner's signature. The card must also show whether the beneficial owner objects to the disclosure of its identity (*e.g.*, for proxy solicitations). n10

(10) Options market transactions in which the broker-dealer has a direct or indirect interest or has granted or guaranteed an option. This includes puts, calls, spreads, and straddles, and must at least show an identification of the security and the number of units involved.

(11) Records of the proof of trial balances of all ledger accounts, and of computations of aggregate indebtedness and net capital as of the trial balance date, pursuant to Rule 15c3-1. These trial balances and computations must be made monthly. Of course, any broker-dealer benefiting unconditionally from the exemptions of Rule 15c3-1(b)(1) and (3) need not make the Rule 15c3-1 computations. Equally sensibly, members of any exchange exempted by Rule 15c3-1(b)(2) should make aggregate indebtedness and net capital computations according to the capital rules of an exchange listed in the rule and to which the member belongs.

(12) An employment application or questionnaire for each associated person (defined in the rule to include partners, officers, directors, sales agents, traders, managers, or any employee handling funds, securities or soliciting transactions or accounts). The questionnaire or application must be approved in writing by an authorized representative of the broker-dealer, and must contain exhaustive minimum information listed in the rule. n11 The broker-dealer can satisfy this requirement by maintaining a copy of the registration application it filed on the associated person's behalf with FINRA or one of six listed exchanges.

(13) Records required to be maintained pursuant to Rule 17f-2(d) and (e), relating to fingerprinting.

(14) Copies of all Forms X-17F-1A filed under Rule 17f-1 for the reporting of and inquiry about missing, lost, counterfeit, or stolen securities. The broker-dealer must also maintain copies of all agreements among reporting institutions relating to registration or other aspects of Rule 17f-1, as well as all confirmations or other information received from the SEC or a designee as a result of inquiry.

(15) Records required pursuant to paragraph (e) of Rule 17f-2.

(16) Records relating to any internal broker-dealer system of which such a broker-dealer is the sponsor, including records of customers with access to internal broker-dealer systems, daily summaries of trading in such systems, and time-sequenced transaction records.

(17) Basic customer information which identifies the customer and their investment objectives. n12

[a] Exemptions. Paragraph (b) of Rule 17a-3 lists a few exemptions to the record maintenance requirements. Exchange members or broker-dealers who transact securities business through members, and registered broker-dealers need not make or keep the records of transactions cleared for them if such records would customarily be made and kept by a clearing broker-dealer under 17a-3 and 17a-4, as long as the clearing broker-dealer satisfies some net capital requirements specified in Rule 17a-3(b)(1).

Similarly, for transactions cleared for them by a bank, exchange members, broker-dealers who transact securities business through members, and registered broker-dealers need not make or keep the type of records that would customarily be kept by a clearing broker-dealer. However, the member or broker-dealer has to get an agreement in writing from the bank that the records, although made and kept by the bank, are the property of the member or broker-dealer. The bank must also file with the SEC a promise that the bank will make the records available, or even furnish them to the SEC, for examination. The form of this undertaking is specified in the rule at paragraph (b)(2). The rule further notes that the ultimate responsibility for seeing that records are accurately maintained and preserved remains with the member or broker-dealer.

The recordkeeping requirements do not apply to exchange member or registered broker-dealer transactions in U.S. Tax Savings Notes, U.S. Defense Savings Stamps, or U.S. Defense Savings Bonds, Series E, F, and G, which are all exempted by Rule 17a-3(c). Rule 17a-3(d) exempts cash transactions of \$100.00 or less involving only subscription rights or warrants expiring within 90 days after their issuance.

Municipal securities broker-dealers can satisfy the Rule 17a-3 and 17a-4 recordkeeping requirements for municipal securities transactions by complying with MSRB Rule G-8. Otherwise, municipal securities broker-dealers would be subject to at least two sets of recordkeeping rules.

Though nonresident broker-dealers are subject to section 17(a) recordkeeping requirements, they need not keep the records inside the United States, if they undertake to provide the records to the SEC upon request. ⁿ¹³ Otherwise, under Rule 17a-7(a), a nonresident broker-dealer who has not filed such an undertaking must file a written notice with its application for registration specifying the address within the United States where the records are located.

[b] Other Section 17 Recordkeeping Requirements. Rule 17a-2 specifies the records to be maintained by anyone engaging in "stabilizing" activities. "Stabilizing," also referred to as pegging or fixing, is the practice of facilitating the distribution of a security by trading in it. ⁿ¹⁴

Rule 17a-8 requires broker-dealers to file reports and make and preserve records specified in Treasury regulations promulgated under the Currency and Foreign Transactions Reporting Act of 1970, ⁿ¹⁵ as amended by the USA Patriot Act. These Treasury regulations require broker-dealers to file three reports:

- a report with the Internal Revenue Service of any currency transaction exceeding \$10,000; ⁿ¹⁶
- a report with the Commissioner of Customs when a person exports or imports currency or monetary instruments worth over \$10,000; ⁿ¹⁷ and
- for persons subject to United States jurisdiction, a report with the Treasury regarding any financial interest in or authority over a securities, bank, or other financial account in a foreign country. ⁿ¹⁸ These broad obligations relating to anti-money laundering laws also require broker-dealers to implement extensive, written anti-money laundering compliance programs. The programs must be designed reasonably to detect and cause reporting of suspicious transactions and achieve compliance with the law and regulations.

The Treasury regulations also require a broker-dealer to maintain for a period of five years:

- a record of its customers' taxpayer identification numbers;
- a copy of each document granting authority over a customer's account;
- the records described in Rule 17a-3(a)(1)-(9); and
- a record of any transaction exceeding \$10,000 to or from a person, account, or place outside the United States n19

Other records that financial institutions, defined in the Treasury regulations to include broker-dealers, must make and preserve for five years are specified in the regulations. For, example, financial institutions must preserve records of extensions of credit in excess of \$10,000. n20

If the Treasury regulations and Rule 17a-4 have different required lengths of preservation, Rule 17a-8 states that broker-dealers must retain the records for the longer period of time.

[2] Record Preservation Requirement

Rule 17a-4 tells registered broker-dealers how long they must preserve the books and records they are required to maintain under Rule 17a-3 and other documents listed in Rule 17a-4. Each of the rule's provisions assist the Commission's goal of ensuring its access for specified periods to the records required to be maintained under Rule 17a-3. The records listed in Rule 17a-3(1)-(3) and (5) must be preserved for at least six years, the first two years in an easily accessible place. n21

The broker-dealer must also preserve the books and records specified in Rule 17a-3(a)(4), (6)-(10) for at least three years, the first two years in an accessible place. Other records the broker-dealer must preserve for at least three years (the first two years in an easily accessible place) include:

- checkbooks, bank statements, cancelled checks, and cash reconciliations;
- bills receivable or payable;
- originals of communications received and copies of communications sent, including inter-office memoranda and communications;
- trial balances, computations of aggregate indebtedness and net capital as of trial balance date (and related working papers), financial statements, branch office reconciliations, and internal audit working papers;
- guarantees of accounts, powers of attorney, and resolutions authorizing agents to act on behalf of a corporation;
- written agreements;
- detailed reports prepared as of the audit date on the FOCUS Report (Form X-17A-5), Part II or IIA and in the annual financial statements required by Rule 17a-5; n22 and
- records required under Rule 15c3-3(d)(4). n23

Paragraph (c) of Rule 17a-4 requires a broker-dealer to preserve, for at least six years after a customer's account closes, all account cards or records concerning the terms and conditions for the opening and maintenance of the customer's account. Under Rule 17a-4(d), broker-dealers must preserve all partnership articles (or, if a corporation, all articles of incorporation or charter, minute books, and stock certificate books) for the life of the enterprise and any successor enterprise.

The required length of preservation under Rule 17a-4(e) for the records required by Rule 17a-3(a)(12), concerning broker-dealer associated persons, is at least three years after the termination of the associated person's employment or other connection with the broker-dealer. Rule 17a-4(e) also requires the broker-dealer to preserve the information required by Rule 17a-3(a)(13) (concerning records of required fingerprinting under Rule 17f-2(d)) for at least three years after the termination of the associated person's employment or association with the broker or dealer. If the firm has claimed an exemption under Rule 17f-2 from any of that rule's fingerprinting requirements, Rule 17a-4(e) requires it to preserve the records specified under 17a-3(a)(15) (the records specified in Rule 17f-2(e)) for the life of the enterprise.

Rule 17a-4(e) also requires that Form X-17F-1A information be preserved in an easily accessible place for three years. Form X-17F-1A records, concerning required reporting of missing, lost, counterfeit, or stolen securities and the confirmations of inquiry under Rule 17f-1, must be maintained by broker-dealers under Rule 17a-3(a)(14).

All of these Rule 17a-3 and 17a-4 records may be maintained and preserved in microfilm, electronic storage media or hard copy. In 1997, the SEC amended Rule 17a-4(f) to permit records to be stored by electronic media, including images of handwritten documents. n24 Recognizing the ever-changing nature of technology, the SEC established a flexible definition for approved electronic media storage mechanisms that approves of any mode of electronic storage that meets the SEC's goals. n25 Finally, in its 1997 update approving of electronic media storage methods, the SEC also addressed for the first time, storage requirements of electronic communications such as e-mail. The Commission noted that broker-dealers utilize e-mail both for business and non-business purposes. n26 The SEC, thus, requires that broker-dealers retain records of e-mail and internet communications, including inter-office communication, which relate to the broker-dealer's "business as such." n27 Furthermore, Rule 17a-4(f) requires that a broker-dealer using microfilm or an electronic storage medium have readily available at all times appropriate equipment for SEC examination of the records and to arrange storage records so that any particular record can be immediately located. In addition, broker-dealers must maintain up-to-date duplicates of the microfilm or electronic record, to be provided to the Commission on request, and store these extra copies separately for the required preservation time. n28 The Commission has recently published its views on the operation of its rule permitting storage of records in electronic form and guidance on how the storage requirements are consistent with the Electronic Signatures in Global and National Commerce Act of 2000. n29

Preservation requirements continue even if a broker-dealer no longer transacts business in securities directly with nonmembers or through exchange members, or ceases to be registered under Section 15. n30 Rule 17a-4(g) provides that such a broker-dealer still must preserve the records it was required to preserve while subject to Rule 17a-4 for the remainder of the Rule 17a-4 prescribed period.

Municipal securities broker-dealers may satisfy Rule 17a-4's record preservation requirement through compliance with MSRB recordkeeping and preservation requirements, set forth in Rules G-8 and G-9.

Even external recordkeeping services, such as outside service bureaus, depositories, and banks not operating under Rule 17a-3(b)(2), used by broker-dealers for the preparation and maintenance of records, face some record preservation responsibilities. Such organizations must file with the Commission a written undertaking specifying that:

- the records prepared or maintained for a broker-dealer are the property of that broker-dealer;
- the records will be surrendered immediately upon the broker-dealer's request; n31

- the records are available for examination at any time by the Commission and its designees; n32
- true, correct, complete, and current hard copies of the records will be promptly furnished upon request to the Commission or its designees.

The form of the undertaking is specified in Rule 17a-4(i). It must be in writing, in a form acceptable to the Commission, and signed by a duly authorized person. Commission access to the books and records must be allowed "at any time or from time to time during [the outside entity's] business hours." The undertaking must be made directly in favor of the Commission and not as a separate agreement between the service bureau and the broker-dealer, though it may incorporate the substance of such an agreement.

In determining who must file an undertaking with the Commission, it is immaterial that a service bureau merely prepares but does not "maintain" broker-dealer records, or that the hard copy of the record is given to the broker-dealer while the service bureau only retains tapes or disks. n33 Since records may not always be available at the offices of the broker-dealer, Rule 17a-4(i) requires that the undertaking be filed by all service bureaus that prepare *or* maintain the records, whether as hard copy or in other media. The undertaking ensures the records' availability for Commission examination under all circumstances.

Rule 17a-4(i) provides that, despite the above provisions ensuring Commission access to records possessed by outside entities, a broker-dealer is still responsible under Rules 17a-3 and 17a-4 to prepare, maintain, and preserve records regardless of any agreement with an outside entity.

Finally, Rule 17a-4(j) requires broker-dealers, upon reasonable request, to furnish SEC staff promptly with legible copies of the records required to be maintained and preserved.

[3] Inspection of Records

Accompanying the Section 17(a) record maintenance and preservation requirement is the Section 17(b) provision authorizing the Commission to examine the records. Section 17(b) provides that all records required to be made or kept are subject at any time to reasonable examinations by SEC representatives. The Commission's examination authority under Section 17(b) is statutorily self-executing. The Commission need not, as a precondition to inspection of records, issue rules requiring people covered by Section 17(a) to keep such records. n34 Moreover, Commission authority to examine broker-dealer records includes the authority to make or require copies of the records.

Section 17(b) empowers the Commission to examine records on any reasonable basis (periodic, special, or other) the Commission considers necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Exchange Act. n35

In addition, Section 17(b) authorizes the Commission to examine even records of entities for which it is not the appropriate regulatory agency (*e.g.*, a bank that is a municipal securities dealer). To do so, the Commission must first notify and consult with the appropriate regulatory agency (*e.g.*, a federal banking agency) concerning the feasibility and desirability of coordinating, to the maximum extent practicable, the Commission's examination with any examination proposed or planned by the regulatory agency itself. This notice-and-consultation requirement does not mean that the Commission must obtain agency approval or wait for the agency to conduct an examination before the Commission conducts its own, nor is it to be construed to limit or in any way affect the Commission's power to examine or otherwise inspect and investigate such a person. Rather, the requirement is designed to minimize the regulatory burdens or duplication to which broker-dealers that are banks may be subject. n36

The Senate Committee on Banking, Housing and Urban Affairs expected that the Commission would generally conduct

examinations of, for example, bank municipal securities dealers simultaneously with examination by federal bank authorities. However, Congress did not limit the Commission's power to examine bank operations by restricting it to such joint occasions. The Committee emphasized that "[s]hould the Commission find it necessary for the proper performance of its responsibilities under this section, it may conduct an examination at any time after consultation with the bank agency without waiting for the appropriate regulatory agency to conduct an examination and without waiting for approval." n37

[4] Reporting Requirements: Rule 17a-5 Financial Reports

Section 17(a)(1) grants the Commission broad authority to require registered broker-dealers to make and disseminate whatever reports the Commission prescribes as necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Exchange Act. Section 17(e) requires registered broker-dealers to file annually with the Commission certified balance sheets and income statements and other information concerning their financial condition as required. Section 17(e) also authorizes the Commission to prescribe the form and content of these required financial statements and the accounting standards to be followed in their preparation.

Reports pursuant to Sections 17(a) and (e), along with inspections and other information, enable the Commission to ensure broker-dealer compliance with the net capital rule. The net capital rule is the principal regulatory device the Commission uses to monitor the financial condition of broker-dealers and to protect customers from the risks involved in leaving cash and securities with broker-dealers. n38

The SEC adopted Rule 17a-5 to implement the Section 17(a) and (e) reporting requirements. n39 In early 1998, the SEC proposed a temporary amendment to Rule 17a-5 to require certain broker-dealers to file reports relating to Year 2000 compliance. The amendment was proposed in response to concerns from Congress regarding Year 2000 compliance both in general and as it relates to the securities industry. n40 In addition, the Commission adopted Form BD-Y2K for broker-dealers to utilize in supplying the required information to the Commission regarding their Year 2000 compliance. All broker-dealers were required to file Form BD-Y2K in accordance with Rule 17a-5 by April 30, 1999 (as of March 15, 1999). The Commission also issued Form X-17A-5 (the "FOCUS" Report Form) for use in connection with the Rule 17a-5 reporting requirements. The FOCUS (Financial and Operational Combined Uniform Single) Report is the basic financial and operational report required of broker-dealers subject to Rule 15c3-1 minimum net capital requirements. It was adopted by the Commission in 1975 in an effort to consolidate and simplify the then duplicative and unnecessarily burdensome reporting requirements imposed by self-regulatory organizations and the Commission. n41 Though current plans filed by eight national exchanges to file information on behalf of their member firms have more or less obviated broker-dealer filing of FOCUS reports directly with the SEC, the provisions still merit review. n42

[a] Form X-17A-5: The FOCUS Report (Periodic Financial Reports).

The FOCUS reporting system (Form X-17A-5) simplifies the reporting obligations of all broker-dealers subject to Rule 15c3-1 net capital requirements by superseding the existing and often uncoordinated reporting systems of the Commission and self-regulatory organizations and replacing them with an integrated reporting system based upon general-purpose financial statements. The FOCUS Report is structured on "layering": the complexity of the broker-dealer's business determines the amount and frequency of filing of required information. The Report contains three parts--Part I, the Monthly Report, Parts II and IIA, the Quarterly Report, and Part III, the Annual Audited Report--and Schedule I.

[i] Part I: Monthly Report. Part I of Form X-17A-5 is filed monthly, under Rule 17a-5(a)(2), by broker-dealers who clear transactions or carry customer accounts. Part I contains 40 key indicators of financial condition structured to facilitate a trend analysis of the indicators over a calendar year. n43 An SEC interpretive release described Part I as:

[A] summary report containing key financial and operational information consisting of core line items for all broker-dealers and supplementary items for small broker-dealers. These line items will provide regulators with timely information needed for the continued viability of the present-day early warning system. This part is designed so that the trend for a full year in any of the line items is shown on a horizontal line on the report. n44

Under Rule 17a-5(a), every registered broker-dealer who clears transactions or carries customer accounts must file Part I of the FOCUS Report (Form X-17A-5) monthly, within ten business days after the end of each month. n45 Broker-dealers who neither clear transactions nor carry customer accounts are not required to file the Part I monthly report.

[ii] Parts II and IIA: The Quarterly Report. Part II of the FOCUS Report is a general-purpose financial and operational report designed to obtain essential regulatory information quarterly from broker-dealers who clear transactions or carry customer accounts. n46

Part IIA, an abbreviated version of Part II, is available under Rule 17a-5(a) to broker-dealers who neither clear transactions nor carry customer accounts but introduce their customers' business to other brokers and dealers on a fully disclosed basis. Broker-dealers subject to the requirements of Rule 15c3-1(a)(2) and (3) must also file Part IIA. n47 However, Parts II and IIA must be filed monthly by broker-dealers not clearing or carrying customer accounts and brokers and dealers subject to Rule 15c3-1(a)(2) and (3) if they have received written notices pursuant to Rule 17a-5(a)(2)(iv) that they have exceeded the parameters of financial and operational condition set by the self-regulators. n48

If the broker dealer has not received a written notice pursuant to Rule 17a-5(a)(2)(iv) that it exceeded the parameters of financial and operational condition it must file Part II every quarter. n49 Part II must be filed within 17 business days after the end of the calendar quarter and, if the date of the annual audited financial statements does not coincide with the calendar quarter, within 17 business days of that date.

Broker-dealers who neither clear transactions nor carry customer accounts are not required to file the Part I monthly report. They must, however, file Part IIA of the FOCUS Report quarterly, subject to the same deadlines as Part II filings, that is, within 17 business days after the end of the calendar quarter and within 17 business days after the annual financial statements' audit date, if it differs from the calendar quarter. If broker-dealers using Part IIA rather than Part II exceed the financial and operational condition parameters, they must file Part IIA monthly rather than quarterly. n50 The FINRA also generally requires new non-clearing member firms to file Part IIA monthly for the first six months of their membership. FINRA may also require backup information (*e.g.*, bank statements) during this initial period.

Broker-dealers subject to Rule 17a-5(a) monthly or quarterly reporting requirements must file Schedules I and II of Form X-17A-5 with their FOCUS Report for the calendar quarter ending December 31 of each year. n51

[iii] Part III: The Annual Audited Report. Part III of the FOCUS Report contains a facing page calling for information concerning the registrant's identity and that of the independent public accountant whose opinion is contained in the annual report. Part III also contains an oath or affirmation that, to the registrant's best knowledge and belief, the accompanying financial statements and supporting schedules are true and correct. Attached to Part III are the audited financial statements required by Rule 17a-5(d). n52

[iv] Schedule I. The FOCUS Report also contains Schedule I, a calendar-year unconsolidated report that must be filed by all registrants as a supplement to the regular fourth quarter Part II or IIA of Form X-17A-5 within 17 business days of the end of the quarter.

Brokers and dealers exempt from the Rule 17a-5(a)(2)(i)-(iii) filing requirements must submit an annual report that

contains the facing page, balance sheet, and Revenue Expense Statement from Part IIA and Schedule I of Form X-17A-5 within 17 business days after the close of the calendar year.

The execution page of the form requires the broker-dealer to state: the registrant's SEC file number; the period covered by the report; what part of the form is being filed; the full name and address of the registrant's principal place of business; the name and telephone number of a person to contact concerning the report; and identification of the independent public accountant whose opinion is contained in the report.

[v] Exemptions, Extensions, and Alternatives to Filing. Rule 17a-5(a)(5) allows the SEC, through its regional administrators, to grant or deny broker-dealer requests for extensions of time to file Parts I, II, and IIA of the form. n53 Extensions of time or exemptions from Rule 17a-5 requirements may be granted on the Commission's own motion or on written request from any national securities exchange, any broker-dealer, or FINRA. The extension or exemption may specify terms and conditions, or may be unconditional.

A broker-dealer may satisfy Rule 17a-5(a)(2) reporting requirements without filing Form X-17A-5 if the broker-dealer's national securities exchange or registered securities association maintains records containing the information required by Form X-17A-5 about the broker-dealer under a plan approved by the Commission, and, pursuant to the plan, sends the Commission a copy of the applicable broker-dealer-related parts of the form. n54 The member firms' direct filing requirement with the Commission was eliminated when the Commission approved the plans of eight self-regulatory organizations to collect the Rule 17a-5 required monthly and quarterly reports directly from their members. n55

Until 1983, Section 15(b)(8) required registered broker-dealers who were not members of FINRA or any national securities exchange to file "SECO" (SEC Only) forms with the Commission. Public Law No. 98-38 repealed former section 15(b)(8) in 1983, in effect requiring all registered broker-dealers to belong to FINRA or an exchange. This virtually eliminated the filing of FOCUS reports with the Commission.

[b] Report of Termination of Membership Interest. Registered broker-dealers who cease to be members in good standing of a national securities exchange or national security association must report the termination of their membership interest to the Commission. n56 Within two business days after the termination of their membership interest, they must file Part II or IIA of the FOCUS Report (Form X-17A-5). Registered broker-dealers who were clearing or carrying firms at the time of termination and had not received notice that they had exceeded the safe parameters of financial and operational condition must file Part II. Those who did not clear transactions or carry customer accounts as of termination must file Part IIA.

The report must be filed at the Commission's Washington, D.C. office or with the regional office. n57 *The report must include the broker-dealer's oath or affirmation that, to its best knowledge and belief, the information contained in the report is true and correct.*

An exchange or association that causes a member broker-dealer to cease being in good standing, or an exchange that learns of any action by the member or any other person that causes the member broker-dealer to cease being in good standing, is required under Rule 17a-5(b) to notify the SEC of the event and surrounding circumstances. The exchange or association must also notify the broker-dealer of its obligation to report the termination of membership interest.

A broker-dealer required to report the termination of its membership interest in a self-regulatory organization other than its designated examining authority may request an exemption by submitting a written request to the Commission not later than five business days before the termination date. Rule 17a-5(b)(6) provides that the request for exemption must indicate whether the broker-dealer is in violation of the applicable requirements under Rule 15c3-1 or 15c3-3; state whether the broker-dealer is experiencing any significant financial, operational, or recordkeeping problems; affirm the broker-dealer's compliance with applicable SEC and self-regulatory organization rules; and describe in detail the reasons for the requested exemption.

[c] Annual Financial Statements for Customers. Section 17(e) of the Exchange Act requires registered broker-dealers to send their customers annually a certified balance sheet and other financial statements and information, as the Commission prescribes by rule under section 17(a), concerning the broker-dealer's financial condition. Specifically, Rule 17a-5(c) prescribes the form and content of statements to be furnished to customers by all registered broker-dealers required to file an annual audited financial statement. n58 However, certain brokers or dealers need not furnish any customer statements if they engage in any of the limited activities listed in Rule 17a-5(c)(1). n59

Within 105 days after the date of the audited financial statements required by Rule 17a-5(d), Rule 17a-5(c)(2) requires that the broker-dealer furnish the following audited statements to its customers (as well as to the SEC, the regional office, the FINRA, and each exchange of which it is a member).

First, the broker-dealer must furnish a balance sheet, accompanied by appropriate notes and prepared in accordance with generally accepted accounting principles, and (if the Rule 17a-5(d) financial statements must be certified) audited.

Second, a footnote indicating its net capital and required net capital under Rule 15c3-1, and including summary financial statements of subsidiaries consolidated pursuant to Appendix C of Rule 15c3-1, where material, and the effect of the subsidiaries on the actual and required net capital of the broker-dealer must be provided.

Third, the broker-dealer must provide a notice that a copy of material inadequacies (if any) for the most recent annual audit report commented upon by the independent public accountant pursuant to Rule 17a-5(g) and (h) and Rule 17a-11(d) is currently available for customer inspection at the SEC's Washington, D.C. office and the regional office. n60

Finally, a statement that its Statement of Financial Condition for the most recent annual audit report pursuant to Rule 17a-5 is similarly available for inspection must be furnished.

In addition, Rule 17a-5(c)(3) states that, six months after the date of the audited statements mentioned above, unaudited statements of the balance sheet and the footnote indicating the broker-dealer's actual and required net capital computed in accordance with Rule 15c3-1 must be furnished (within 65 days of its preparation) to the broker-dealer's customers (as well as to the SEC, the regional office, and each national securities exchange or registered securities association of which it is a member).

[d] Annual Audited Financial Statements.

Section 17(e)(1) requires registered broker-dealers to annually file, with the Commission, a balance sheet and income statement, prepared on a calendar or fiscal year basis and certified by an independent public accountant, as well as other financial data and information concerning their financial condition. The SEC may require the other financial statements and financial condition information to be certified as well.

Rule 17a-5(d) states that any annual audited financial statements filed on a calendar or fiscal year basis must be audited by an independent public accountant. n61 Rule 17a-5(e) requires the auditor to give its opinion concerning the financial statements. Rule 17a-5(g) through (m) further governs audit objectives, the extent and timing of audit procedures, general provisions of the accountant's reports, accountant's report on material inadequacies, the use of certain statements filed with the SEC, and the granting of extensions and exemptions, and requires broker-dealers to notify the SEC of changes in their fiscal year.

If a broker-dealer files a Rule 17a-5(d) statement without an accountant's opinion, it must describe in the oath of affirmation required under Rule 17a-5(e) the facts and circumstances supporting an exemption from the requirement that Rule 17a-5(d) financial statements and schedules be supported by an accountant's opinion. However, the financial statements need not be audited if the broker-dealer engages in a limited securities business. n62

Broker-dealers required to file an annual report under Rule 17a-5(d) must file an additional Part II or IIA of Form X-17A-5 (as applicable) as of the date of the annual report if the date does not coincide with a calendar quarter. This fifth filing allows the annual report to be integrated into the surveillance programs of the Commission and the self-regulators. n63

Some broker-dealers receive an exemption from the annual filing of audited financial statements. Under Section 17(e)(1)(C), the SEC may exempt, conditionally or unconditionally, any class of broker-dealers from the annual financial reporting requirements. For example, Rule 17a-5(d) states that a successor broker-dealer need not file an annual report the year of its succession if its predecessor filed a report that year. Another 17a-5(d) exemption exists for exchange members who transacted business in securities solely with or for other exchange members without carrying margin accounts, credit balances, or securities for customers (as "customer" is defined in Rule 17a-5(c)(4)).

[i] Contents of the Annual Report. Section 17(e)(2) authorizes the SEC to prescribe the form and content of required financial statement filings and the accounting principles and standards to be used in their preparation. Through Rule 17a-5(d)(2), the Commission requires annual reports to include the following financial data:

- Statement of Financial Condition, in a format and on a basis consistent with the total reported on the Statement of Financial Condition in Part II or IIA of the FOCUS Report (Form X-17A-5);
- Statement of Income (Loss);
- Statement of Cash Flows;
- Statement of Changes in Stockholders', Partners', or Sole Proprietor's Equity; and
- Statement of Changes in Liabilities Subordinated to Claims of General Creditors.

If the Statement of Financial Condition is not consolidated, Rule 17a-5(d)(2) requires a summary of financial data (including assets, liabilities, and net worth or stockholders' equity) for subsidiaries not consolidated in the FOCUS Report (Form X-17A-5) Part II or IIA Statement of Financial Condition to be included in the notes to the consolidated statement of financial condition reported on by the independent public accountant.

The annual report must also include, according to Rule 17a-5(d)(3), the following supporting Schedules from Part II or IIA of Form X-17A-5:

- Computation of Net Capital under Rule 15c3-1
- Computation for Determination of the Reserve Requirements under Exhibit A of Rule 15c3-3
- Information Relating to the Possession or Control Requirements under Rule 15c3-3

In addition, if differences exist between the audited report and the corresponding unaudited one, a reconciliation must be provided pursuant to Rule 17a-5(d)(4) of the Computation of Net Capital and Computation for Determination of Reserve Requirements mentioned above. If no differences exist, the broker-dealer must file a statement to that effect. Rule 17a-5(e)(2) and (4) require the broker-dealer to file additional material attesting to the truth and correctness of the financial statements and reporting on the broker-dealer's status in the Securities Investor Protection Corporation. n64

[iii] Accountant-Related Reports. A broker-dealer must initially file a Rule 17a-5(f)(2) statement within 30 days of its effective date of registration as broker-dealer. The statement, indicating that the broker-dealer has secured a

contractual commitment from an independent accountant to conduct the broker-dealer's annual audit, must be filed with the SEC, the regional office, and the examining authority. In addition, unless the agreement provides for an ongoing relationship beyond a specific year's audit, broker-dealers subject to the Rule 17a-5(d) annual reporting requirement must file by December 10 of each year a statement of an agreement (dated no later than December 1) with an independent public accountant to conduct the annual audit during the following calendar year. Rule 17a-5(f)(2) sets forth the specific information that the statements must contain, such as name and address of broker-dealer and accountant and audit year covered by the agreement.

A broker-dealer must file a similar notice within fifteen days with the Commission, its regional office, and the examining authority in the following situations: if a new accountant is engaged without notice to the existing accountant; if the accountant terminated is one whose opinion covered the most recent financial filings or who was engaged to give an opinion covering statements to be filed; or if the accountant terminates such an engagement.

Even broker-dealers who are exempt from the annual audit reporting requirement must nevertheless file a Rule 17a-5(f)(2) notice indicating the date on which the unaudited report will be prepared.

[iii] Filing of Annual Report. Rule 17a-5(d)(5) requires that the annual report must be filed within 60 days after the date of the financial statements. The audited annual financial statements must be reported as of the same fixed or determinable date each year, unless the Commission approves a change of date. If the new report date will not be more than fifteen months from the former report date, Regional Administrators may grant a broker-dealer's request to change its annual audited report filing date. Under Rule 17a-5(d), filing is accomplished at the Commission's Washington, D.C. office, the regional office, and the principal office of the broker-dealer's examining authority. Copies of the annual report must be provided to the broker-dealer's self-regulatory organizations.

All financial statements and schedules must be filed publicly except those bound separately in accordance with Rule 17a-5(e)(3). Under Rule 17a-5(e)(3), all statements filed pursuant to Rule 17a-5(d) are public. However, if the Statement of Financial Condition is in a format consistent with Part II or IIA of Form X-17A-5 and is bound separately from the balance of the annual audited financial statements filed, the balance of the annual audited financial statements is deemed confidential. This provision, however, is not intended to impinge upon any national securities association or exchange rules allowing a member broker-dealer's customers to request and receive from the member broker-dealer information relative to its financial condition. The SEC, under Rule 17a-5(l), may grant extensions of time for the filing of annual reports, as well as exemptions from any of the Rule 17a-5 requirements.

[5] Special Reports

[a] Report of Revenue and Expenses. Broker-dealers exempted from filing monthly and quarterly FOCUS reports under Rule 17a-5(a) are required under Rule 17a-10 to file with the Commission, within 17 business days after the close of the calendar year, the Facing Page, a Statement of Income (Loss) and a balance sheet from Part IIA as well as Schedule I from Form X-17A-5 for the calendar year.

Broker-dealers who are subject to the Rule 17a-5(a) monthly and quarterly filing requirements must submit Schedule I of Form X-17A-5 with the form for the calendar quarter ending December 31 of each year, as required by Rule 17a-10(a)(2).

Under Rule 17a-10(b), a member of an exchange or a registered securities association need not file a report of income and expenses if the organization maintains records containing the information required by Form X-17A-5 for the member and transmits a copy to the Commission, pursuant to an effective plan approved by the Commission under the rule. Thus, as with FOCUS Reports, most broker-dealers do not file Reports of Revenue and Expenses directly with the SEC. If a member broker-dealer is also a member of FINRA and one or more exchanges, the plan may provide that only one specified institution need file the plan on behalf of the member.

Reports of income and expenses are confidential, under Rule 17a-10(c). The rule also provides at paragraph (d) that a broker-dealer who cannot file the annual report of income and expenses within the specified time without undue hardship may apply, before the due date, to the Commission's principal office for an extension of time. The applicant must give reasons for the requested extension and agree to file the report on or before the new due date, which may not be more than sixty days after the close of the calendar year for which the report is to be made.

[b] Reports of Financial or Records Problems (Telegraphic Notice Requirement). Broker-dealers are required under Rule 17a-11 to give the SEC telegraphic notice of any net capital or recordkeeping violations. Failure to do so exposes a broker-dealer to disciplinary action. ⁿ⁶⁵ For example, under Rule 17a-11(b), a broker-dealer subject to the Rule 15c3-1 net capital requirements who has less than the required minimum capital, or fails to meet the Rule 15c3-1(d) debt-equity ratio requirement for more than 90 days, must give telegraphic notice on the day the problem arises to the SEC describing the condition that exists, and must file Part II or Part IIA of the FOCUS Report (Form X-17A-5) within 24 hours. ⁿ⁶⁶

The net capital rule permits a broker-dealer's aggregate indebtedness to be as high as 15 times its net capital. However, under Rule 17a-11(c)(1), if at any time the broker-dealer's aggregate indebtedness exceeds 12 times its net capital, or if its total net capital is less than 120% of the minimum net capital amount required, the broker-dealer enters the "early warning" phase and must file Part II or IIA of the FOCUS Report (Form X-17A-5) within fifteen calendar days after every month, until it has made three consecutive monthly filings showing that its ratio of aggregate indebtedness to net capital is less than 12-to-1 and its net capital has not fallen below 120% of the required amount.

Similarly, Rule 17a-11(c)(2) states that, if the net capital of a broker-dealer using the alternate net capital computation pursuant to Rule 15c3-1(e) is ever less than 5% of its aggregate debit items computed in accordance with Rule 15c3-3's Exhibit A (Formula for the Determination of Reserve Requirements), or its total net capital is less than 120% of the minimum required net capital, the broker-dealer must file Part II or IIA of the FOCUS Report (Form X-17A-5) within fifteen calendar days after the end of each month, until three consecutive monthly reports do not show either of these problems.

If a broker-dealer is carrying the account of a specialist or market maker operating pursuant to Rule 15c3-1(a)(6), and the specialist or market maker fails to make timely deposit of collateral with the broker-dealer as prescribed in that rule, Rule 17a-11(c)(3) requires the carrying broker-dealer to give immediate telegraphic notice of that failure to the SEC's principal and regional offices and the broker-dealer's and specialist's or market maker's designated examining authority.

Likewise, under Rule 17a-11(c), a member, broker, or dealer subject to Rule 15c3-1(c)(2)(x)(F)(3), (x)(B)(1) or 15c3-1d(c)(2) fails to comply with those provisions' financial responsibility standards, the member, broker, or dealer must immediately give notice of the event as specified in those provisions. Rule 17a-11(c) further provides that, if the repayment obligations of a broker-dealer under its subordination agreements scheduled to become due within six months would cause its aggregate indebtedness to exceed 12 times its net capital, or its net capital to be less than 120% of the required minimum, or, in the case of a broker-dealer using the alternate net capital computation of Rule 15c3-1(c), if its net capital has to be less than 5% of aggregate debit items pursuant to Rule 15c3-3 or (if it is also a registered futures commission merchant) less than 7% of the funds required to be segregated under the Commodity Exchange Act, it must immediately notify its examining authority.

Rule 17a-11(d) states that, if a broker-dealer subject to Rule 17a-3 fails to keep current any of the records specified in that rule, it must give immediate telegraphic notice of the deficiency to the SEC, and within 48 hours of the telegram notify the SEC what steps are being taken to correct the situation.

If a broker-dealer discovers or is notified by an independent auditor that a "material inadequacy" as defined in Rule 17a-5(g) exists in its accounting system, controls, or procedures, Rule 17a-11(e) requires it to give telegraphic notice of

this fact to the SEC within 24 hours of the discovery, and within 48 hours notify the SEC what has been done to correct the situation.

Similarly, if a national securities exchange or association learns that a member broker-dealer has failed to file a telegraphic notice or report required by a provision of Rule 17a-11, the organization must immediately report that failure to the SEC's principal and regional office and to the broker-dealer's examining authority.

[c] Quarterly Security Counts. Rule 17a-13 subjects exchange members who transact a business in securities directly with or for non-exchange members, nonmembers who transact a business in securities through exchange members, and broker-dealers registered under Section 15 of the Act to quarterly security counts. Rule 17a-13(a) exempts certain dealers and brokers. n67 Rule 17a-13(b) requires those members or broker-dealers subject to this requirement to perform the following at least once per calendar quarter:

- physically examine and count all securities held (both firm and customer securities), including those subject to repurchase and reverse repurchase agreements;
- account for all securities in transfer, in transit, pledged, loaned, borrowed, deposited, failed to receive, failed to deliver, subject to repurchase or reverse repurchase agreements, or otherwise not physically held by the broker-dealer but subject to its control or direction, by examination and comparison of the supporting detail records with the appropriate ledger control accounts;
- verify all the securities listed above, where the securities have been in that status for more than 30 days;
- compare the results of the count and verification with the firm's records; and
- record the unresolved differences in the broker-dealer's books and records, including a description of the security and date of comparison, in a security count difference account within seven business days.

The quarterly examinations, counts, verifications, and comparisons must be made, under Rule 17a-13(b), between two and four months apart. The SEC permits cyclical counts under Rule 17a-13(c), provided the exercise does not extend beyond one calendar quarter-year.

Rule 17a-13(d) states that the quarterly examinations, counts, verifications, and comparisons must be conducted and supervised by persons not normally responsible for handling securities or making or preserving the subject records. The security count difference account is subject to the Commission's record maintenance requirements under Rule 17a-3(a)(4), and, under Rule 17a-4(a), must be preserved for at least six years, the first two years in an accessible place.

If a broker-dealer can satisfy the SEC that no public interest and investor protection purposes of the Exchange Act will be served to subject it to the quarterly security count requirement because of some appropriate reason (*e.g.*, the special nature of its business, or safeguards it has established for the protection of customers' funds and securities), Rule 17a-13(e) allows the Commission to grant the broker-dealer's written request to be exempt from the Rule 17a-13 requirement.

[d] Reporting of Currency and Foreign Transactions. Rule 17a-8 requires registered broker-dealers subject to the Currency and Foreign Transactions Reporting Act of 1970 to comply with related reporting and recordkeeping rules.

[e] OFAC Requirements Broker-dealers also have the duty to comply with the sanctions programs administered by the Treasury Department's Office of Foreign Assets Control ("OFAC"). n68 These sanctions are separate and distinct from anti-money laundering requirements, involve strict liability and provide no safe-harbors. While not a defense, a

well implemented compliance program will be considered in assessing a penalty. In particular, screening of all new accounts, existing accounts and client relationships against the OFAC lists is prudent for any broker-dealer.

[f] Business Continuity Planning In 2003 the Commission, Federal Reserve Board and Comptroller of the Currency published an interagency White Paper emphasizing the need for business continuity planning in the event of wide-scale disruption. n69 Subsequently the Commission, NYSE and NASD (now FINRA) adopted similar policies and rules. n70

[6] Certifications

On July 24, 2002, preceding the passage of the Sarbanes-Oxley Act ("Sarbanes-Oxley"), the Commission proposed Regulation Analyst Certification ("AC"). n71 "Regulation AC is intended to complement existing SRO rules governing research analyst conflicts of interest, including Rule 277 of the National Association of Securities Dealers, Inc. and Rule 472 of the New York Stock Exchange, Inc." Regulation AC, as adopted, requires brokers and dealers that publish, circulate or provide research reports to make certain clear and prominent certifications. In particular, they must certify that the report accurately reflects their personal views and whether any portion of their compensation is related to the views and recommendations contained in the report. The regulation also requires broker-dealers to make and keep certain records related to public appearances by research analysts. "Regulation AC requires each research analyst who is primarily responsible for the preparation of the content of a research report to execute two types of certifications: (a) individual research report certifications; and (b) quarterly public appearance certifications."

FOOTNOTES:

(n1)Footnote 1. 15 U.S.C. § 78q(a), (b). Section 17(g), 15 U.S.C. § 78q(g), gives the Federal Reserve Board a similar power to examine records kept by those broker-dealers engaged in extensions of credit and subject to the rules and regulations issued by the Federal Reserve System's Board of Governors under the Exchange Act. The Exchange Act is reprinted in the Primary Law Sourcebook, Volume B, Section F (Matthew Bender).

(n2)Footnote 2. Note that "records" are statutorily defined in § 3(a)(37), 15 U.S.C. § 78c(a)(37), to include "accounts, correspondence, memorandums, tapes, discs, papers, books, and other documents or transcribed information of any type, whether expressed in ordinary or machine language." The statutory definition appears to include electronic mail, though the SEC has not addressed this issue.

(n3)Footnote 3. This statutory purpose is set forth in § 17(a)(1). For a Supreme Court discussion of the intent of § 17(a), see *Touche Ross & Co. v. Redington*, 442 U.S. 560 (1979), in which the Court held that § 17 does not imply a private right of action.

(n4)Footnote 4. See, e.g., *Whiteside & Co., Inc., v. SEC*, Fifth Circuit Court of Appeals No. 88-4921, [1989-1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,720 (July 24, 1989) (broker-dealer fined for violations of recordkeeping and reporting requirements); *United States v. Bednar*, 728 F.2d 1043 (8th Cir. 1984) (broker-dealer sentenced to five years imprisonment and \$1,000 fine for backdating account card in violation of § 17(a)(1) and Rule 17a-3(9)); *Sinclair v. SEC*, 444 F.2d 399 (2d Cir. 1971) (broker-dealer's order clerk permanently barred from association with any broker or dealer for violation of § 17(a) recordkeeping requirements); *Bradford v. SEC*, 278 F.2d 566, (9th Cir. 1960) (action to enjoin broker's transaction for alleged failure to keep required books and records); *United States v. Regan*, 713 F. Supp. 629 (S.D.N.Y. 1989) (upholding charges for conspiracy to violate recordkeeping requirements); *United States v. Sloan*, 389 F. Supp. 526 (S.D.N.Y. 1975) (false entries in books and records); *In re the Application of James Michael Brown*, Exch. Act Rel. No. 34-31,223, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,408, (Sept. 24, 1992) (brokerage firm and president censured and fined \$2,500, despite firm's inactivity, for violations of reporting and recordkeeping requirements); *In re the Application of Peter R. Schellenbach*, Exch. Act Rel. No. 34-30,030, [1991-1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,902 (Dec. 4, 1991) (principal of brokerage firm censured, fined \$50,000, suspended for sixty days from association with any FINRA member, and barred from acting in any principal, supervisory, or managerial capacity for any FINRA member for violations of recordkeeping and reporting requirements).

through scheme to conceal net capital deficiencies); *In re* the Applications of W.N. Whelen & Co., Inc. and William N. Whelen, Jr., Exch. Act Rel. No. 34-28,390, [1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,620 (Aug. 28, 1990) (broker-dealer and its president censured and fined and president temporarily suspended from association with any FINRA member for violations of reporting requirements); *In re* the Application of Charles L. Campbell, Exch. Act Rel. No. 34-26,510, [1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,601 (Feb. 1, 1989) (brokerage firm president held personally responsible for firm's violation of reporting requirements and censured, fined, and barred from association with FINRA members in any principal capacity); *In re* the Application of David R. Williams, Exch. Act Rel. No. 34-21,788, [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,747 (Feb. 26, 1985) (broker barred from SEC association for three months for aiding and abetting violation of § 17(a)); *In re* Frank W. Humphrys, Exch. Act Rel. No. 34-21,991, [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,768 (Apr. 26, 1985) (back-office supervisor censured for aiding and abetting violation of recordkeeping requirements); *In re* the Application of Lowell H. Listrom & Company, Inc., and Lowell H. Listrom, Exch. Act Rel. No. 34-22,689, [1985-1986 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,946 (Dec. 5, 1985) (broker-dealer and firm censured and fined for violations of Rules 17a-2, 17a-3(11), 17a-5, 17f-1(c), among others).

Under § 15(b)(4)(D), 15 U.S.C. § 78o(b)(4)(D), the Commission may take action against a broker or dealer, including suspending or revoking its registration, for a willful violation of the Exchange Act or the SEC rules or regulations thereunder (*e.g.*, § 17 and related rules and regulations). Similarly, the SEC may sanction any person associated with a broker-dealer under § 15(b)(6) for willfully violating the Exchange Act or related rules or regulations.

(n5)Footnote 5. 442 U.S. 560, 99 S. Ct. 2479, 61 L. Ed. 2d 82 (1979) .

(n6)Footnote 6. In finding that no private or public right of action for damages existed, the Court noted Congress' silence on the question, pointed out that neighboring sections of the Act, *i.e.*, § 16(b) and § 18 (a), explicitly grants private causes of action while § 17(a) does not, and emphasized the exclusive nature of § 18 as remedy for misstatements in reports filed with the Commission. *Touche Ross & Co.*, 442 U.S. at 568-75 .

(n7)Footnote 7. *In re* the Application of David R. Williams, Exch. Act Rel. No. 34-21,788, [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,747 (Feb. 26, 1985).

(n8)Footnote 8. Notwithstanding the state regulatory bar in Section 15(h)(1) of the Exchange Act, a state probably can require a broker-dealer to retain certain records in state, where a state regulator may access them. 142 Cong. Rec. S12094 (daily ed. Oct. 1, 1996 (statement by Sen. Dodd)).

(n9)Footnote 9. Rule 17a-3, reprinted in the Securities Primary Law Sourcebook, Volume B, Section G (Matthew Bender), generally "represents a codification of bookkeeping practices now followed by many exchange firms and over-the-counter brokers and dealers in that it specifies the various items of information required to be reflected in the firm's books. The rule does not, however, require that books and records be kept in any prescribed form or type of book, ledger, or card system. Nor does the rule regulate accounting practices." Regulation T and SEC Rules, NASD Manual (CCH).

Though data required by Rule 17a-3 can be derived from other records, this fact does not relieve a broker-dealer of its obligation to maintain the records specified by the rule. *See, e.g., In re* Frank W. Humphrys, Exch. Act Rel. No. 34-21,991, [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,768 (Apr. 26, 1985); *In re* Voss & Co., Inc., Exch. Act Rel. No. 34-18,028, *Fed. Sec. L. Rep. (CCH) P 83,021* (Aug. 11, 1981).

(n10)Footnote 10. A broker-dealer employee who causes his or her employer to violate this subsection faces liability as an aider and abettor of the employer's violation. *See, e.g., In re* David R. Williams, Exch. Act Rel. No. 34-21,788, *Fed. Sec. L. Rep. (CCH) P 83,747* (Feb. 26, 1985) (employee suspended from association with any broker-dealer for three months for falsifying addresses on customer account cards so that customers could purchase securities not registered for sale in their state of residence).

(n11)Footnote 11. Required information includes: the associated person's name, address, social security number; starting date of affiliation with broker-dealer; date of birth; complete and consecutive statement of all business associations (part-time or full-time) for the previous decade; record of any denial of membership or registration; disciplinary action taken or sanction imposed by any federal or state agency or any national securities exchange or association (including any finding of violation of the law or cause of disciplinary action); record of any denial, suspension, expulsion, or revocation of membership or registration of any member, broker, or dealer with whom the person was associated at the time; record of any permanent or temporary injunction entered against the person or any member, broker, or dealer with whom the person was associated at the time; record of any arrest or indictment for any felony, or for any misdemeanor related to securities, commodities, banking, insurance, or real estate, fraud, false statements or omissions, wrongful taking of property or bribery, forgery, counterfeiting or extortion, and the disposition of such an arrest or indictment; and a record of any other name or names the person has been known by or has used.

(n12)Footnote 12. This new rule was added in 2001, effective in May of 2003, and also requires that broker-dealers furnish this information to their customers periodically for review. In May of 2003, the Commission also published interpretive guidance as to some of the October 2001 amendments. See SEC Interpretive Rel. No. 34-47910.

(n13)Footnote 13. Rule 17a-7(c)(3) defines "nonresident broker or dealer" as, for individuals, a person residing, or having a principal place of business, in any place not subject to the jurisdiction of the United States; for corporations, an entity incorporated, or having its principal place of business, in any place not subject to the jurisdiction of United States; and for partnerships or other unincorporated organizations or associations, one having its principal place of business in any place not subject to United States jurisdiction.

To be eligible for this provision, the nonresident broker-dealer must be registered with the Commission or have filed its application for registration. In addition, it must have filed an undertaking pursuant to Rule 17a-7(b), in a form acceptable to the Commission and signed by a duly authorized representative, to submit, on demand and at its own expense, to the Commission's principal or regional office (as it specifies), any or all of the books and records under its control. The rule provides that the nonresident broker-dealer must be able to furnish the information within 14 days after the Commission's written demand. Of course, the undertaking will not be in effect when the nonresident broker or dealer is maintaining the books and records in the United States and has filed a written notice specifying the address of the place where they are kept, as required by rule 17a-7(a).

See *In re Cochran Murray & Wisener, Inc.*, SEC No-Action Letter, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,640 (May 1, 1978) (no-action position allowing the maintenance of broker-dealer's books and records at its nonresident parent company's main offices outside the United States, in compliance with Rules 17a-3 and 17a-4).

(n14)Footnote 14. See Rule 10b-7 for provisions governing the practice of stabilizing.

(n15)Footnote 15. 31 U.S.C. § 5311 *et seq.* The regulations are set forth in C.F.R. Part 103.

(n16)Footnote 16. 31 C.F.R. § 103.22.

(n17)Footnote 17. 31 C.F.R. §§ 103.23, 103.25(b) and (c).

(n18)Footnote 18. 31 C.F.R. § 103.24.

(n19)Footnote 19. 31 C.F.R. §§ 103.35, 103.36.

(n20)Footnote 20. 31 C.F.R. §§ 103.33(a), 103.36.

(n21)Footnote 21. Included are records of information listed in Rule 17a-4(b)(8)(i)-(xv) concerning, *e.g.*, money balance and position, long or short, in customer and non-customer accounts; amount of secured demand note; aged fails to deliver requiring a charge in the computation of net capital pursuant to Rule 15c3-1; possession or control

requirements under Rule 15c3-3 reported on the schedule in Part II or IIA of Form X-17A-5; and other schedules specifically prescribed by the Commission and necessary to support the information required by Rule 17a-5.

(n22)Footnote 22. *See* § 3.04[4][a] *infra*.

(n23)Footnote 23. Rule 17a-4(b)(9). The requirement that broker-dealers subject to Rule 15c3-3 maintain a current and detailed description of the procedures they use to comply with Rule 15c3-3 is consistent with the FOCUS reporting system.

Rule 15c3-3(d)(4) requires broker-dealers subject to Rule 15c3-3 with respect to physical possession or control of fully paid and excess margin securities to prepare and maintain a detailed description of the procedures they follow to comply with the Rule 15c3-3 possession or control requirements.

(n24)Footnote 24. 17 C.F.R. § 240.17a(4)(f); Exch. Act Rel. No. 34-38,245, pp. 7-8 (Feb. 5, 1997). The rule prohibits electronic retention of written acknowledgments from customers related to penny stocks required by Rules 15g-2 and 15g-9. *See* Exch. Act Rel. No. 34-38245 at p. 15.

(n25)Footnote 25. Exch. Act Rel. No. 34-38,245 at p. 7. Pursuant to Rule 17a-4(f), any electronic storage medium may be used so long as the following requirements are met: (1) the media must preserve records exclusively in a non-rewritable, non-erasable format; (2) the media must verify automatically the quality and accuracy of the recording process; (3) the media must serialize and time-date the records for the required retention period; and (4) the media must have the capacity to readily download indexes and records preserved to any medium required by the SEC or self-regulatory organizations of which the member, broker or dealer is a member. *See* Rule 17a-4(f)(2)(ii).

(n26)Footnote 26. Exch. Act Rel. No. 34-38,245 at pp. 16-17.

(n27)Footnote 27. Exch. Act Rel. No. 34-38245 at p. 17.

(n28)Footnote 28. *See* Equitable Life Assurance Soc'y, SEC No-Action Letter, [1974-75 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,926 (Div. Mkt. Reg. 1974) (no-action position taken by Commission staff allowing the maintenance of customer confirmation forms as required by Rule 17a-4(b)(1) in hard copy on a computer printout).

(n29)Footnote 29. *See* SEC Interpretive Releases Numbers 34-47806 and 34-44238.

(n30)Footnote 30. *See, e.g., In re the Application of James Michael Brown*, Exch. Act Rel. No. 34-31223, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,048, (Sept. 23, 1992) (brokerage firm and president censured and fined \$2,500, despite firm's inactivity, for violations of reporting and recordkeeping requirements).

(n31)Footnote 31. The SEC does not allow production of the records to the broker-dealer to be conditioned on payment of the outside service bureau's fees and charges. *See* Exch. Act Rel. No. 34-13,962 [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,302 (Sept. 15, 1977), effective January 1, 1978 (provision ensures SEC access to records and furthers SEC and examining authority in performing oversight responsibilities and protecting customers).

(n32)Footnote 32. The Commission's right of examination is independent of the records' availability at the broker-dealer's office or prior notification of the broker-dealer. *See* Exch. Act Rel. No. 34-13,962, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,302 (Sept. 15, 1977). The Release explains that, although the Commission intends generally to conduct examinations at service bureaus only where broker-dealer records are not otherwise available, the service bureau's undertaking is made directly in favor of the Commission and the Commission is not required to order the service bureau records through the broker-dealer.

The Release also defines "designee" to include a trustee appointed for a broker or dealer by the SIPC, a court-appointed receiver, a self-regulatory organization, or the examining authority designated to inspect the

broker-dealer for compliance with financial responsibility rules under Rule 17d-1 and the Securities Investor Protection Act of 1970.

(n33)Footnote 33. Exch. Act Rel. No. 34-13,962, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,302 (1977).

(n34)Footnote 34. Legislative history supports this proposition. *See* R. Rep. No. 75, 94th Cong., 1st Sess. 120 (1975), reprinted in the Primary Law Sourcebook, Volume C, Section I (Matthew Bender). Of course, the Commission has issued rules requiring recordkeeping and preservation, as discussed in § 3.04[2] *supra*.

(n35)Footnote 35. One source for the statutory purposes of the Exchange Act is § 2 of the Act, 15 U.S.C. § 78b.

(n36)Footnote 36. S. Rep. No. 75, 94th Cong., 1st Sess. 120 (1975), reprinted in the Securities Primary Law Sourcebook, Volume C. Section I (Matthew Bender).

(n37)Footnote 37. *Id.*

(n38)Footnote 38. *See, e.g.*, Study of Unsafe and Unsound Practices of Brokers and Dealers, Report and Recommendations of the Securities and Exchange Commission, H.R. Doc. No. 231, 92d Cong., 2d Sess. 7-8, 15, 22, 24 (1971); Exch. Act Rel. No. 34-11,497, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,212 (June 26, 1975).

(n39)Footnote 39. *See* Exch. Act Rel. No. 34-11,935, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,375 (Dec. 17, 1975).

(n40)Footnote 40. *See* Exch. Act Rel. No. 34-39,724 (Mar. 5, 1998). Subsequent thereto, the self-regulatory organizations also adopted rules to deal with the Y2K issue. *See, e.g.*, NYSE Rule 437 ("Participation in Year 2000 Testing"), adopted December, 1998.

(n41)Footnote 41. The FOCUS Report was adopted in Exch. Act Rel. No. 34-11,935, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,375 (Dec. 17, 1975).

(n42)Footnote 42. *See* Exch. Act Rel. No. 34-11,935, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,375 (Dec. 17, 1975).

(n43)Footnote 43. *See id.* Some of the forty key indicators included are subordinated loans and secured demand notes; starting and ending ownership equity; income, expenses and profit (loss) for the month; certain adjustments to capital; added charges from customer and non-customer securities and commodities accounts; operational deductions from net capital; non-allowable assets; proprietary charges on commodities; other charges and deductions; haircuts on securities positions; net capital before and after haircuts; capital scheduled for withdrawal within six months and net capital after such withdrawals; total equity subordinations; aggregate indebtedness; minimum capital requirement; net capital ratios; Rule 15c3-3 reserves; Commodity Exchange Act segregation requirements; proprietary positions in long and short securities and commodities; security and commodity concentrations; total tickets; aged fails; total fails; equity markets; clearing agency balances; unrestricted cash; customers' accounts; and securities borrowed.

(n44)Footnote 44. *Id.* at 86,003.

(n45)Footnote 45. The FINRA requires member firms whose customers' accounts are introduced, on a fully disclosed basis, to and carried by another firm that also clears all the transactions to file Part I monthly, despite the fact that such firms are not themselves clearing or carrying.

(n46)Footnote 46. The following financial statements and schedules are contained in Part II of Form X-17A-5:

(1) Statement of Financial Condition

- (2) Computation of Net Capital and Aggregate Indebtedness
- (3) Statement of Income (Loss)
- (4) Statement of Changes in Ownership Equity
- (5) Statement of Changes in Liabilities Subordinated to Claims of General Creditors
- (6) Computation for Determination of Reserve Requirements under Rule 15c3-3
- (7) Form 1-FR-Schedule of Segregation Requirements (under the Commodities Exchange Act)
- (8) Capital Scheduled for Withdrawal Within Six Months
- (9) Financial and Operational Data.

The financial statements and schedules contained in Part IIA include:

- (1) Statement of Financial Condition for Noncarrying, Nonclearing and Certain Other Brokers or Dealers
- (2) Computation of Net Capital and Aggregate Indebtedness
- (3) Statement of Income (Loss)
- (4) Statement of Changes in Ownership Equity
- (5) Statement of Changes in Liabilities Subordinated to General Creditors
- (6) Schedule of Details of Total Capital and Subordinated Capital Maturing or Proposed to be Withdrawn Within the Next Six Months.

(n47)Footnote 47. Rule 17a-5(a)(2)(ii); Exch. Act Rel. No. 34-11935, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,375 (Dec. 17, 1975).

(n48)Footnote 48. In addition to the information listed below, Part II or IIA requires the broker-dealer to indicate whether the report is being filed pursuant to Rule 17a-5(a) or (b) or for some other reason (*e.g.*, upon special request by the broker-dealer's designated examining authority). Other required information includes the name, SEC number, firm identification number, address of principal place of business, period covered by and names of subsidiaries consolidated in the report, whether the registrant carries its own customer accounts, and whether the registrant is filing an audited report.

The FINRA requires member firms whose customers' accounts are introduced on a fully disclosed basis to and carried by another firm that also clears all the transactions to file Part I monthly, despite the fact that such firms are neither clearing nor carrying. Practically speaking, all FINRA member firms except those qualifying under Rule 15c3-1(a)(3) must file Part I monthly.

The term "self-regulators" includes the SEC as well as the broker-dealer's designated examining authority.

"Examining authority" refers to a national securities exchange or registered securities association to which the broker-dealer belongs, or, if the broker-dealer is a member of more than one self-regulatory organization, the organization the Commission designates as the broker-dealer's examining authority, or, if the broker-dealer is not a member of any self-regulatory organization, the Commission's Regional Office for the region where the broker-dealer has its principal place of business. General Instructions, Parts II and IIA, Form X-17A-5.

(n49)Footnote 49. Rule 17a-5(a)(2)(iv) provides that broker-dealers who have received written notice from the Commission or the examining authority designated under § 17(d) that they have exceeded the financial and operational condition parameters must file monthly (or as otherwise specified) Part II or IIA of Form X-17A-5, as well as any other financial or operational information the Commission or the examining authority requires.

(n50)Footnote 50. Exch. Act Rel. No. 34-11935, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,375 (Dec. 17, 1975).

(n51)Footnote 51. Rule 17a-10(a)(2). There is also an annual filing requirement under Rule 17a-10(a)(1) for broker-dealers exempted from the Rule 17a-5 filing requirements.

(n52)Footnote 52. *See* § 3.04[4][c]-[d] *infra* for discussion of the required audited financial statements.

(n53)Footnote 53. The SEC has proposed amendments to Rule 17a-5 that would shift to designated examining authorities the responsibility for granting extensions of time for broker-dealers to file FOCUS reports and audited financial reports and for approving changes of the date as of which audited financial reports must be filed. The proposed amendments would not, however, alter the Division of Market Regulation's authority to grant requests for extensions of time or for exemptions from the provisions of Rule 17a-5 when it deems appropriate. *See* Exch. Act Rel. No. 34-31897, [1992-1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,114 (Feb. 22, 1993).

(n54)Footnote 54. The plan may permit the information about a broker-dealer who is a member of more than one exchange, or of one or more exchanges and the FINRA, to be submitted by one specified exchange or the FINRA. A plan filed with the Commission is not effective unless the Commission so declares. In declaring any plan effective, the Commission may impose additional terms and conditions, including time limitations within which various parts of Form X-17A-5 must be filed, as it deems necessary or appropriate in the public interest, for the protection of investors, or to carry out its duties and responsibilities under the Exchange Act. *See* Rule 17a-5(a)(4).

(n55)Footnote 55. The eight organizations are the American Stock Exchange, the Boston Stock Exchange, the Chicago Board Options Exchange, the Midwest Stock Exchange, the NASD, the NYSE, the Pacific Stock Exchange, and the PBW Stock Exchange. Exch. Act Rel. No. 34-11935, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,375 (Dec. 17, 1975).

The Commission simultaneously approved plan modifications and new plans filed by eight self-regulatory organizations pursuant to paragraph (b) of Rule 7a-10, effective January 1, 1976, to dispense with a separate filing under Rule 17a-10 with the Commission. The Commission also approved modifications of plans in effect by the NASD and the NYSE pursuant to Rule 17a-20 to dispense with a separate filing with the Commission of the reports required by Rule 17a-20.

(n56)Footnote 56. "Membership interest" includes full membership, allied membership, associated membership, floor privileges, and any other interest that entitles a broker-dealer to exercise any privilege on an exchange or with an association. Rule 17a-5(b)(3).

Under Rule 17a-5(b)(4), a broker or dealer is deemed to have ceased to be a member in good standing of an exchange when it has resigned, withdrawn, or been suspended or expelled from a membership interest in the exchange, or has directly or through any associated person sold (or agreed to sell) a membership interest that would result in the

termination of its membership interest in the exchange.

(n57)Footnote 57. "Regional office," as used here, refers to the regional office for the region in which the broker-dealer's principal place of business is located. The Regional Offices are listed in Appendix 1A *supra* .

(n58)Footnote 58. Rule 17a-5(c)(4) defines "customer" to exclude, for purposes of Rule 17a-5(c), another broker or dealer exempt by Rule 17a-5(c)(1); a general, special, or limited partner, director, or officer of the broker-dealer; and any person to the extent that he/she has a claim for property or funds which, by contract, agreement, understanding, or operation of law, are part of the broker-dealer's capital or are subordinated to the broker-dealer's creditors' claims, for or with whom the broker-dealer has effected a securities transaction in a particular month (either before the balance sheet date, or after it if the month in which the statement is sent). "Customer" does include any person for whom the broker-dealer holds securities for safekeeping or as collateral, or for whom the broker-dealer carries a free credit balance in the month in which customers are determined under Rule 17a-5(c), as well as anyone not excluded by the above list.

In Cahill Gorden & Reindel, SEC No-Action Letter, [1983-1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 77,541 (Aug. 23, 1983), in response to a request for interpretation of when a person is deemed a customer under Rule 17a-5(c)(4) for purposes of furnishing customer statements as required by Rule 17a-5(c)(1), the Division stated that broker-dealers may choose any of the following dates when determining who is a customer entitled to receive a financial statement:

- the month of the balance sheet date, if it is at month end;
- the 30-day period preceding the balance sheet date, if not at month end;
- any month following the balance sheet date, if it is the month in which the statements are mailed and the mailing date is at month end; or
- the 30-day period preceding the mailing date, if the date the statements are being mailed is not at month end.

(n59)Footnote 59. The Rule 17a-5(c)(1) exception applies to:

- an introducing broker-dealer who forwards all of its customer transactions on a fully disclosed basis to a clearing broker-dealer who keeps books and records of the transactions and receives the customers' funds and securities promptly from the introducing broker-dealer;
- a broker-dealer who promptly forwards subscriptions for securities to the issuer, underwriter, or other distributor of the securities and who does not otherwise hold funds or securities for or owe money or securities to customers;
- a broker-dealer who sells and redeems redeemable shares of registered investment companies, solicits share accounts of savings and loans associations in the manner contemplated by the \$2,500 minimum net capital requirement of Rule 15c3-1, or offers to extend credit to or participate in arranging a loan for a customer to purchase insurance concerning the sale of redeemable shares of registered investment companies; or
- a broker-dealer exempt from the provisions of Rule 17a-13 concerning quarterly security counts.

(n60)Footnote 60. Rule 17a-5(g) prescribes general audit objectives to be followed in the preparation of annual financial statements, and states that the audit be made in accordance with generally accepted auditing standards. The scope of the audit must be sufficient to detect material inadequacies, as defined in Rule 17a-5(g)(3), in the accounting system, internal accounting control, procedures for safeguarding securities, and obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by Rule 15c3-3.

Rule 17a-5(h) permits the independent public accountant to exercise its professional judgment concerning the extent and timing of audit procedures. The accountant must inform the SEC of material inadequacies discovered in the course of the audit or interim work that the broker-dealer has not reported promptly or accurately to the Commission.

The Commission has the authority, under § 17a-5(e)(2), to prescribe the form and content of financial statements filed pursuant to the Exchange Act and to prescribe the accounting principles and accounting standards used in the preparation of the financial statements. In addition to Rules 17a-5(g) and (h), Rule 17a-5(e) governs the nature and form of the annual audited financial statements, Rule 17a-5(f) concerns the qualification of accountants, including their independence, Rule 17a-5(i) sets forth the general requirements for the accountant's reports; and Rule 17a-5(j) governs the accountant's report on material inadequacies.

(n61)Footnote 61. Rule 17a-5(f) requires accountants to be independent (in accordance with the provisions of Rules 2-01(b) and (b) of Regulation S-X (17 C.F.R. Part 210)), as well as duly registered and in good standing.

(n62)Footnote 62. Under Rule 17a-5(e), Rule 17a-5(d) financial statements need not be audited if, since the previous financial statements or reports filed under Rules 15b1-2 or 17a-5, (1) the broker-dealer's securities business has been limited to acting as an issuer's broker (agent) in soliciting subscriptions for securities and promptly transmitting all funds and securities received to the issuer without otherwise holding funds or securities or owing money or securities to customers; or (2) the broker-dealer's securities business has been limited to buying and selling evidences of indebtedness secured by mortgage, deed, trust, or other lien upon real estate or leasehold interests, and the broker-dealer does not carry any margin account, credit balance, or security for any securities customer.

(n63)Footnote 63. Exch. Act Rel. No. 34-11,935, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,375 (Dec. 17, 1975).

(n64)Footnote 64. Rule 17a-5(e)(2) requires the broker-dealer to attach to the report an oath or affirmation that, to its best knowledge and belief, neither it nor any partner, officer, or director (as the case may be) has any proprietary interest in any customer account, and the financial statements and schedules are true and correct. If the broker-dealer is a sole proprietorship, the oath or affirmation must be made by the proprietor; if a partnership, by a general partner; or, if a corporation, by a duly authorized officer. Rule 17a-5(e)(4) requires the broker-dealer to file with the report a supplemental report (covered by the opinion of the independent accountant, if required under Rule 17a-5(e)(1)) concerning the status of the broker-dealer's membership in the Securities Investor Protection Corporation.

(n65)Footnote 65. *See, e.g., In re the Applications of W.N. Whelen & Co., Inc. and William N. Whelen, Jr.*, Exch. Act Rel. No. 34-28,390 [1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,620 (Aug. 28, 1990) (brokerage firm and president sanctioned for net capital deficiency and telegraphic notice violation); *In re Charles L. Campbell*, Exch. Act Rel. No. 34-26,510, [1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,601 (Feb. 1, 1989) (brokerage firm sanctioned for net capital deficiency and telegraphic notice violation).

(n66)Footnote 66. The SEC has proposed to eliminate the requirement that broker-dealers file a FOCUS report after a net capital deficiency. *See Exch. Act Rel. No. 34-31,355, Fed. Sec. L. Rep. (CCH) P 85,055* (Oct. 26, 1992).

(n67)Footnote 67. Rule 17a-13 exempts from its provisions broker-dealers:

- who limit their dealer (principal) transactions to the purchase, sale, and redemption of redeemable

shares of registered investment companies;

- whose transactions as broker (agent) are limited to
 - the sale and redemption of redeemable securities of registered investment companies or interests or participations in an insurance company separate account,
 - the solicitation of accounts for federally insured savings and loans associations, and
 - the sale of securities for customer accounts for funds to be immediately reinvested in redeemable securities of registered investment companies; and
- who promptly transmit all funds and securities and hold no customer funds or securities. Rule 17a-13(a)(1)-(3).

In addition, under Rule 17a-13(a)(3), the quarterly security count requirement does not apply to insurance companies that register as broker-dealers solely because they purchase and sell securities on behalf of their general and separate accounts as part of the insurance business, if they otherwise meet the three above conditions.

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 § 3.05

AUTHOR: W. Reece Bader

§ 3.05 FINRA (Formerly NASD)

One purpose of the Exchange Act is to regulate the conduct of brokers and dealers and persons associated with them through direct SEC control and through self-regulation by industry groups with appropriate SEC oversight. n1 The Exchange Act permits self-regulatory organizations to add to investor protection through supervision and discipline of member brokers and dealers and persons associated with them. n2 The addition of Section 15A to the Exchange Act in 1938 extended self-regulation in the securities industry to the over-the-counter ("OTC") securities market. n3 Section 15A governs registration with the Commission of national securities associations, representing organizations of over-the-counter brokers and dealers, established primarily to provide a medium for self-regulation in the OTC market comparable to that provided by securities exchanges in the listed market. n4

The Financial Industry Regulatory Authority ("FINRA") is the sole registered self-regulatory organization of OTC brokers and dealers. FINRA's predecessor became qualified on August 7, 1939 after applying to the Commission for registration under Section 15A(a) and filing papers that conformed with the requirements of Section 15A(b). n5 The objects of the FINRA are best stated in the organization's certificate of incorporation, the third article of which provides:

(1) To promote through cooperative effort the investment banking and securities business, to standardize its principles and practices, to promote therein high standards of commercial honor, and to encourage and promote among members observance of Federal and State securities laws;

(2) To provide a medium through which its membership may be enabled to confer, consult, and cooperate with governmental and other agencies in the solution of problems affecting investors, the public, and the investment banking and securities business;

(3) To adopt, administer and enforce rules of fair practice and rules to prevent fraudulent and manipulative acts and practices, and in general to promote just and equitable principles of trade for the protection of investors;

(4) To promote self-discipline among members, and to investigate and adjust grievances between the public and members and between members;

(5) To establish, and to register with the Securities and Exchange Commission as, a national securities association pursuant to Section 15A of the Securities Exchange Act of 1934, as amended, and thereby to provide a medium for effectuating the purposes of said section;

(6) To transact business and to purchase, hold, own, lease, mortgage, sell and convey any and all property, real and personal, necessary, convenient, or useful for the purposes of the Corporation;

The objects and purposes specified in the foregoing clauses shall, except where otherwise expressed, in nowise be limited or restricted by reference to, or inference from, the terms of any other clause in this certificate of incorporation, but the objects and purposes specified in each of the foregoing clauses of this article shall be regarded as independent objects and purposes. n6

In January 1996, in response to the 1995 NASD Select Committee on Structure and Governance recommendations, n7 the FINRA created two independent operating subsidiaries, NASD Regulation, Inc. ("NASDR") and the Nasdaq Stock Market, Inc. ("Nasdaq"). FINRA delegated to NASDR responsibility for regulation of broker/dealer professional activities. Nasdaq continues to be primarily responsible for operation of The Nasdaq Stock Market. n8 As the Select Committee noted, FINRA's "existing governance structure ... blurs the distinction between the broker-dealer profession and overseeing the Nasdaq stock market. Both missions are thereby deserved." n9 Accordingly, while the Select Committee recognized that the two broad functions should not be totally divorced, it concluded that "regulation of the broker-dealer profession should otherwise be separated from and performed independently of regulation of the Nasdaq and other OTC markets." n10 While each subsidiary has its own governing board and staff, the FINRA retains authority to review all policies and decisions of both subsidiaries, thereby "ensuring that the Association's statutory and self-regulatory obligations and functions are fulfilled." n11 In November 1997, the SEC approved a further reorganization to the corporate structure of FINRA designed to streamline the operations of FINRA while at the same time increase the level of accountability to the public. Under the reorganization, the number of members of its governing boards was reduced, and the structure was changed so that the subsidiary boards consists entirely of people who serve as governors on the FINRA Board. In addition, each board is balanced between "Public," "Non-Industry," and "Industry" members. Finally, the SEC approved amendments to FINRA's Delegation Plan to allow for FINRA to act more quickly and efficiently in response to time-sensitive matters. n12

The mission of FINRA is to "regulate securities markets for the ultimate benefit and protection of the investor." n13 FINRA responsibilities include:

- establishing rules and regulations for FINRA members, including fees and membership requirements;
- arbitration of disputes among and between FINRA members, associated persons, and customers;
- regulation of public and private sale or distribution of securities including underwriting arrangements and compensation;
- establishing policies for clearance and settlement of securities transactions;
- review of FINRA member advertising practices;
- administration, interpretation and enforcement of FINRA rules;
- administration and enforcement of Municipal Securities Rulemaking Board ("MSRB") rules and federal securities laws;

1-3 Federal Securities Exchange Act of 1934 § 3.05

- establishing standards of proof for violations and sanctions imposed on FINRA members and associated persons in connection with disciplinary actions;
- administration of FINRA enforcement and disciplinary programs including investigation, adjudication of cases and the imposition of fines and other sanctions; and
- operation of the Central Registration Depository ("CRD").

Nasdaq, as a registered securities association, is responsible for:

- operation of the Nasdaq Stock Market and automated systems supporting the Nasdaq Stock market and other markets or systems for non-Nasdaq securities;
- maintenance of a telecommunications network infrastructure linking market participants;
- providing to FINRA information required to operate the surveillance audit trail;
- development and adoption of rule changes applicable to collection, processing, and dissemination of quotation and transaction information for securities traded on the Nasdaq Stock Market, on other markets operated by the Nasdaq Stock Market, in the market for securities listed on a registered exchange, and in the over-the-counter market, to establish trading practices for these securities;
- through the development of rules, policies, interpretations and procedures to maintain and enhance the integrity, fairness, efficiency, and competitiveness of the Nasdaq Stock Market and other markets operated by the Nasdaq Stock Market; and
- acting as a Securities Information Processor for quotations and transaction information related to securities traded on the Nasdaq Stock Market and other markets operated by the Nasdaq Stock Market.

[1] Qualification and Admission of Members and Associated Persons

Any registered broker, dealer, or municipal securities broker or dealer, or government securities broker or dealer that meets prescribed standards of training, experience, competence, and conduct, and who is authorized to and regularly transacts business in any branch of the investment banking or securities business within the United States, is eligible for membership in the FINRA. n14 An application for membership in the FINRA is filed on the same Form BD used for registration as a broker-dealer with the SEC. n15 The application must be duly signed and contain a membership agreement. When filed with FINRA, this form must be accompanied by a letter stating whether waiver of the two-principal requirement or exemption from the financial and operations principal requirement is requested. The applicant must agree to abide by applicable rules, pay its dues and other assessments, keep its Form BD up to date, and waive certain claims against the FINRA and its personnel. The application must also be accompanied by a statement of financial condition showing compliance with Rule 15c3-1, n16 two FINRA assessment reports, an application on Form U-4 for registration of each principal and representative, and a fingerprint card for each individual required by Rule 17f-2 to be fingerprinted. In addition, fees must be submitted for membership, as well as for each required examination and each fingerprint card. A fee must be submitted for membership, as well as for each U-4, each required examination and each fingerprint card. In addition, a fee must be submitted for registration of each branch office. n17

FINRA has authority to impose restrictions on admissions to or continued membership in the FINRA. n18 The FINRA has adopted two standards governing qualifications of persons associated with members: one for principals and the

other for registered representatives.

[a] Registration of Principals. The FINRA requires each member broker-dealer, except sole proprietors, to have at least two registered principals and, in addition, depending on its business, a Financial and Operations Principal and a Registered Options Principal ("ROP").ⁿ¹⁹ The two-principal requirement may be waived if FINRA finds waiver appropriate, generally on the basis of the small size of the member's operations.ⁿ²⁰ The registration of a Financial and Operations Principal can be waived if the firm complies with paragraph (a)(2) or (b)(1)(iii) of Rule 15c3-1.ⁿ²¹

A ROP is required if the firm does option business with the public. The firm must designate a Senior Registration Option Principal ("SROP") and a Compliance Registered Options Principal ("CROP") in accordance with the provisions of Rule 2860(b)(20) of the NASD Conduct Rules.ⁿ²² All principals, including sole proprietors, officers, partners, office managers, and corporate directors of a member who actively engage in the management of the member's investment banking or securities business must be registered.ⁿ²³ Every principal must pass a written Qualification Examination for Principals appropriate to his or her principal classification before registration is effective.ⁿ²⁴

[b] Registration of Representatives. All non-management personnel engaged in sales of securities, including persons associated with a member who are designated as representatives, must be registered and pass a Qualification Examination for Registered Representatives before their registration becomes effective.ⁿ²⁵

[2] Conduct Rules

The FINRA has adopted detailed rules for supervising activities of its members under the authority given it by Securities Exchange Act Section 15A(b)(6), which requires observation by its members and associated persons of members of "high standards of commercial honor and just and equitable principles of trade in the conduct of their business."ⁿ²⁶ The principles of business conduct contained in the FINRA Conduct Rules reflect a codification of statutory provisions, court decisions, administrative proceedings, and SEC rules and interpretations.ⁿ²⁷ FINRA applies its rules on just and equitable principles of trade to failures by members and associated persons to follow the Conduct Rules as well as its Uniform Practice Code.ⁿ²⁸ and to breaches to trade contracts.ⁿ²⁹ Most recently, for example, the SEC approved amendments to the rules to attempt to ensure that members of the public have a fair chance to purchase "hot issue" securities.ⁿ³⁰ The Conduct Rules also apply to measures designed primarily to prevent or aid in the detection of abuses that may not always represent general principles of proper business conduct. Such measures include FINRA rules concerning hypothecation and lending of securities, payments to employees and others, and margin maintenance and various filing and recordkeeping requirements.ⁿ³¹

Violations of the Conduct Rules are grounds for disciplinary proceedings.ⁿ³² Such proceedings do not violate the *Fourteenth Amendment* and are proper to supplement the oversight power of the Commission.ⁿ³³ However, the Ninth Circuit Court of Appeals has found no implied private cause of action for violation of the FINRA Conduct Rules.ⁿ³⁴ In mid-1998, FINRA proposed rules that would authorize FINRA to initiate temporary cease-and-desist proceedings to combat serious rule violations, particularly those that raise concerns of investor protection. The rule proposal has generated significant opposition from the securities industry.ⁿ³⁵

[3] Investigative Powers

[a] Internal Procedures. The Report of the NASD Select Committee on Structure and Governance, dated September 15, 1995, was the culmination of nearly a year of review of the FINRA operations and included numerous recommendations with respect to the FINRA's enforcement program and disciplinary procedures.

After appropriate notice and opportunity for public comment,ⁿ³⁶ these changes became effective on August 7, 1997.ⁿ³⁷ In the new NASDR Rule 9100 series, procedural enhancements were made to the rules. These enhancements include requirements for service and notice, a rule prohibiting ex parte communications, the separation of prosecutorial and adjudicatory functions, and rules related to conduct of counsel and withdrawal of counsel. Some of the new rules

are very specific. Rule 9136 describes in detail the specifications for formatting pleadings.

Under the 9200 series rules, the manner in which disciplinary proceedings are conducted has changed dramatically. In the past, most disciplinary actions were initiated by the local District Business Conduct Committee ("DBCC") or the Market Regulation Committee. Proceedings held before the DBCC with a right of review by the National Business Conduct Committee ("NBCC"). NBCC determinations were reviewable by the FINRA Board, followed by SEC review under Section 15A(h)(3) of the Securities Exchange Act. n38

The earlier criticisms n39 as well as the Select Committee Report have resulted in an entirely new system. A disciplinary proceeding will first be investigated by the Department of Enforcement of FINRA, and a complaint will be initiated by them. n40 The matter will be heard by a Hearing Panel n41 composed of a Hearing Officer, who will be a professional FINRA staff person and two other panelists, either from the DBCC or current or former members of disciplinary panels, the NBCC, one of the FINRA's corporate boards, or in limited cases a current or former member of the Market Regulation Committee. n42

Other rules provide procedural enhancements by way of prehearing procedures, discovery, summary disposition and settlement procedures. n43

Finally, the Acceptance, Waiver and Consent form of settlement is preserved and enhanced. n44

The appellate process is also changed in the 9300 Series Rules. Although much is retained, including the usual chain of appeal to the NBCC, the Board and the SEC, the Department of Enforcement now has the unlimited right of appeal. n45 The FINRA Board may also call a disciplinary proceeding for review. n46

[b] Surveillance of Brokers and Dealers. Brokers and dealers who are members of the FINRA are subject to surveillance by NASDR, including on-site inspections. FINRA members who engage in a general securities business are subject to a minimum on-site routine examination each year.

Under agreements with most stock exchanges, including the New York and American Stock Exchanges, FINRA has regulatory responsibility for on-site examinations of certain firms that are joint FINRA/exchange members. FINRA also has a joint examination program with the New York Stock Exchange to save members the unnecessary burden of being examined separately for their activities in OTC and listed securities. Section 17(i) of the Exchange Act, added in 1996, requires the Commission to work with FINRA, as well as the exchanges, to eliminate duplication in the routine examination process by coordinating examinations. The section requires the self regulatory organizations to share information, including customer complaints, examination results, and other "non-public regulatory information." While each regulatory authority retains the right to conduct an examination for cause, the intent of the new law is to promote cooperation in regulatory oversight.

During a routine examination, a member's books and records are examined for currency and accuracy. Sales practices are reviewed to determine fairness in dealings with customers concerning the suitability of recommendations, best execution, and mark-ups. Market making and underwriting activities, activities in bonds, municipal securities, market fund shares, options, tax shelters, and variable contracts are examined. The inspection also covers compliance with the anti-fraud provisions of the Exchange Act, registration requirements of the Securities Act, disclosure of capacity requirements, and advertising rules.

The District Business Conduct Committees review the examination reports prepared by FINRA staff, conduct hearings, and impose penalties ranging from a warning to expulsion of a broker or dealer from the FINRA and the barring of an individual from association with FINRA members. All penalties imposed by the District Business Conduct Committees are reviewed by the NBCC, which may modify them. FINRA penalties may be appealed to the Commission and, ultimately, to a United States Court of Appeals. n47

[4] Arbitration

FINRA sponsors an arbitration forum for the resolution of disputes that involve public customers, broker-dealers, or persons associated with broker-dealers. All FINRA arbitration procedures are governed by the NASDR Code of Arbitration Procedure. n48

In 1996, a blue-ribbon panel, appointed by the FINRA Board, issued a report on the FINRA arbitration process. The Arbitration Policy Task Force n49 made numerous recommendations regarding changes in procedure and improvements to the system. Since then NASD Dispute Resolution Inc.'s National Arbitration and Mediation Committee, as well as its full time dispute resolution staff have proposed numerous changes in the Code of Arbitration Procedure, including early appointment of arbitrators, an enhanced mediation program, improved arbitrator training, as well as procedural rules regarding eligibility of claims, punitive damages and discovery. Most of the changes have been approved.

In 2007, the FINRA arbitration forum merged with the NYSE arbitration forum. Nearly all securities arbitrations are now conducted under the auspices of FINRA Dispute Resolution. Cases filed with the NYSE prior to July 31, 2007 are administered by former NYSE staff now employed by FINRA using NYSE rules. Existing FINRA cases are now administered under three sets of rules: customer code, member code and a mediation code.

FOOTNOTES:

(n1)Footnote 1. See S. Rep. No. 379, 88th Cong., 1st Sess. 1-106 (1963), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

Self-regulatory organizations exercise governmental-type powers in carrying out their responsibilities under the Exchange Act. They do so in basically three ways: imposing a disciplinary sanction, broadly defined, on a member or person affiliated with a member; denying membership to an applicant; and requiring members to cease doing business entirely or in specified ways with a particular nonmember or with respect to a particular security. S. Rep. No. 75, 94th Cong., 1st Sess. 24-25 (1975), reprinted in the Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

(n2)Footnote 2. For example, Sections 6(b)(7) and 6(d) of the 1934 Act, reprinted in the Securities Primary Law Sourcebook, Volume B, Section F (Matthew Bender), require that the rules of an exchange provide for the disciplining of its members and that the rules be adequate to insure fair dealing and to protect investors. 15 U.S.C. § 78f(b)(7) and (d).

(n3)Footnote 3. 15 U.S.C. § 78o-3. This is the Maloney Act, named after the late Senator Maloney of Connecticut, its sponsor. Actually, only one such association has ever been formed--the National Association of Securities Dealers, Inc. Any other result was not expected by Congress. Section 15A was radically amended in 1964 to conform to other changes, particularly those affecting broker-dealer proceedings and sanctions. Section 15A was amended again in the Securities Acts Amendments of 1975.

(n15)Footnote 15. Form BD, Uniform application for registration as a broker or dealer, reprinted in the Securities Primary Law Sourcebook, Volume B, Section H (Matthew Bender), is discussed in § 3.03 *supra*.

(n16)Footnote 16. Failure of a member to register an employee who is required to be registered is ground for expulsion, censure, bar from association with another FINRA member, or revocation of his or her registration. *See, e.g., In re Donald W. Collins*, Exch. Act Rel. No. 34-12,823 (1976) (member employed salesmen not properly registered with FINRA).

Exemptions from the registration requirements apply to clerical and ministerial personnel; nominal corporate officers; limited partners; and associated persons whose functions are limited solely to transactions on an exchange and who are registered with the exchange, transactions in exempted securities, and commodity transactions. Rule 1060, NASD By-Laws, NASD Manual (CCH).

Schedule A, NASD By-Laws, NASD Manual (CCH) Sections 1-2, provides for the specified assessments and fees.

The FINRA uses gross income assessment levy as a means to provide for equitable allocation of dues among its members. *Id.* Sec. 1(c), NASD Manual (CCH).

(n17)Footnote 17. The term "branch office" is defined in Art. I, Sec. (d), NASD By-Laws, NASD Manual (CCH).

(n18)Footnote 18. Art. III, Sec. 2, NASD By-Laws, NASD Manual (CCH).

(n19)Footnote 19. Rule 1021(e)(1), Rule 1022(b)(1) and Rule 1022(f)(1), NASD By-Laws, NASD Manual (CCH). One individual can be registered in several capacities.

(n20)Footnote 20. Rule 1021(e)(2), NASD By-Laws, NASD Manual (CCH).

(n21)Footnote 21. Rule 1022(b)(4), NASD By-Laws, NASD Manual (CCH).

(n22)Footnote 22. Rule 1022(f)(1), NASD By-Laws, NASD Manual (CCH).

(n23)Footnote 23. Rule 1022(a)(1), NASD By-Laws, NASD Manual (CCH).

The managerial functions may include supervision, solicitation, conduct of business, or the training of persons associated with a member to function as a supervisor or engage in solicitations. *Id.*

(n24)Footnote 24. Rule 1021(a), NASD By-Laws, NASD Manual (CCH). A person associated with a member as a registered representative, discussed in § 3.05 *infra*, whose duties change so as to require registration in any principal classification has 90 calendar days following the change in his or her duties to pass the appropriate Qualification Examination for Principals. *Id.*, Rule 1021(d)(1).

A principal whose most recent registration as principal has been terminated for two or more years immediately preceding the date of receipt by the FINRA of a new application must pass an examination for principal classification before the registration becomes effective. *Id.* Rule 1021(c).

In addition, FINRA administers the uniform securities agent state law examination under a joint program with the North American Securities Administrators Association. This test is accepted by almost all the states. NASD 1986 Ann. Rep. 11.

(n25)Footnote 25. Rule 1031(a), (b), NASD By-Laws, NASD Manual (CCH).

A "representative" is a person associated with a member, including assistant officers other than principals, who is engaged in the investment banking or securities business for the member. *Id.* Rule 1031(b). If the most recent registration of a representative has been terminated for two or more years immediately preceding the filing of a new application, he or she must pass a Qualification Examination for Representatives before the application becomes effective. *Id.* Rule 1031(c).

In *Exchange Servs., Inc. v. SEC*, 797 F.2d 188 (4th Cir. 1986), the court, affirming a SEC order, held that a discount brokerage firm's order-takers who executed trades but did not perform market-making or advisory role of full service brokers, must register with FINRA and pass the examination required of broker-dealers' representatives. Although they were not permitted to solicit orders or make recommendations, their extensive contact with the public made their qualification and registration matters of public interest.

(n26)Footnote 26. Conduct Rules, Rule 2110, NASD Manual (CCH).

On principles of trade and standards of commercial honor, the SEC has stated:

"Just and equitable principles of trade" and "high standards of commercial honor," however, are not phrases which originated in the Act or the Commission's rule but rather are concepts which have long characterized the level of professional integrity expected of persons in the securities business. Moreover, they are evolving standards of ethical conduct about as old as the securities business itself, which have grown in breadth and with increasing definition over the years. They therefore cannot be considered apart from their historical development.

The concepts predate the federal securities laws by many years. As early as 1848 the Chicago Board of Trade announced one of its purposes to be to "inculcate principles of justice and equity in trade." By 1900 the constitution of nearly every stock exchange, including the New York Stock Exchange, provided that its purposes were "to furnish members with facilities for trading and to maintain high standards of commercial honor and integrity among its members and to promote and inculcate just and equitable principles of trade and business."

Section 6(b) of the Exchange Act has provided since 1934 that:

No registration [of a national securities exchange] shall be granted or remain in force unless the rules of the exchange include provision for the expulsion, suspension or disciplining of a member for conduct or proceeding inconsistent with just and equitable principles of trade, and declare that the willful violation of any provisions of this title or any rule or regulation thereunder shall be considered conduct or proceeding inconsistent with just and equitable principles of trade.

In 1938, in the Maloney Act amendments to the Act, Congress sought to create a type of regulation for the over-the-counter markets similar to that provided by the exchanges for their members. In

furtherance of this purpose, it chose the media of registered national securities associations. Testifying at the hearings preceding the passage of the Maloney Act former SEC Commissioner Mathews stated: "An association of this sort, if it is successful, must be able to control those practices of its members which, in the language of the stock exchange rule, are inconsistent with just and equitable principles of trading."

Thus, the concept of just and equitable principles of trade in the regulatory pattern adopted for those doing business in the over-the-counter markets has been embodied in both Section 15A of the Act and in the rules of the NASD, the only association registered under that section. Section 15A(b)(8) [currently Section 15A(b)(6)] of the Act provides that an association shall not be registered unless it appears to the Commission that, among other things, "the rules of the association are designed ... to promote just and equitable principles of trade." Rule 2110 of the NASD Conduct Rules, which was adopted pursuant to Section 15A(b)(8), reflects both of the concepts here involved: "A member, in the conduct of his business, shall observe high standards of commercial honor and just and equitable principles of trade."

* * *

Since its inception in 1939 the NASD has been the principal catalyst in the development of the scope and meaning of just and equitable principles of trade and high standards of commercial honor for the over-the-counter markets. There have been a number of avenues through which this development has occurred, including adoption by the Association of rules of fair practice, promulgation by the Board of Governors, through its powers to administer and interpret NASD Rules, of statements of policy, guidelines and interpretations, and case by case adjudication in Association disciplinary actions. The particular avenue utilized has depended in large measure on the nature of the regulatory problem concerned as well as other factors. In general, rules have been adopted where the principles of business conduct could be stated in general or reasonably specific terms. For the most part, these rules codified settled standards of behavior or embodied new standards or requirements designed to prevent recognized abuses. Promulgation of statements of policy, interpretations and guidelines regarding the implementation of existing rules has normally been the vehicle used (1) where the basic or underlying principles have been established (*e.g.*, by rules) or have, over a period of time, been generally understood as appropriate norms of conduct and (2) where the enunciation of specific, detailed rules was unnecessary or impractical but (3) where the Board of Governors nevertheless considered it desirable to inform the membership of the guidelines... as they developed and evolved, that were being or would be applied by the Board and operating committees in administering such norms. Finally, the evolutionary development of business ethics has occurred through the disciplinary route where conduct recognized as patently contrary to professional standards has been found, but where, for example, the applicable norms previously were not or could not readily be reduced to written rules or guidelines.

There have been many examples throughout the NASD's history of the use of each of the approaches or avenues described above. However, it is important to bear in mind that in all phases of NASD regulatory activity with regard to the development of the concepts of business ethics here involved, the Commission has played an active role both in formulation of standards and in supervising their implementation. The Commission, as part of the Congressional design for "cooperative regulation" of the over-the-counter markets, has been an active participant with the NASD in the development of the concepts of "just and equitable principles of trade" and "high standards of commercial honor." Just as the courts have recognized for some time that the limits of fraud cannot be precisely defined and accordingly have interpreted the anti-fraud provisions as general proscriptions against myriad forms of deception and manipulation, so too "just and equitable principles of trade" is a standard of great elasticity intended to circumscribe a wide variety of conduct which may operate as an injustice to investors or other participants in the market place.

Exch. Act Rel. No. 34-9420, 4 Fed. Sec. L. Rep. (CCH) P 25,592, at 18,575-78 (Dec. 20, 1971) .

(n28)Footnote 28. Business practices relating to such matters as the confirmation, settlement, or closing out of securities transactions, as codified in the NASD's Conduct Rules and its Uniform Practice Code, are an expression of the customs and usages of the trade that must be followed in transactions among NASD members or between members and nonmembers. *Exch. Act Rel. No. 34-9420, 4 Fed. Sec. L. Rep. (CCH) P 25,592 (Dec. 20, 1971).*

For provisions of the NASD Uniform Practice Code, see Rules 11000-11800, NASD Manual (CCH).

See also In re Application of E.F. Hutton & Co., Inc., Exch. Act Rel. No. 34-25,887, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,303 (July 6, 1988), in which the SEC affirmed the FINRA's findings that when brokerage firm competed with a customer by selling stock for its own account at prices equal to or higher than the price of the customer's limit order, the brokerage firm violated FINRA rules requiring "high standards of commercial honor and just and equitable principles of trade."

See also In re the Application of Charles D. Tom, Exch. Act Rel. No. 34-31,081, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,030 (Aug. 24, 1992), in which the SEC affirmed the FINRA's censure and one-year suspension of a securities salesman who effected transactions in a discretionary account without written authorization from the customers. The SEC held that the salesman violated the NASD's Rules of Fair Practice).

In In re Michael D. Borth, Exch. Act Rel. No. 34-31,602, [1992-1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,106 (Dec. 16, 1992), the SEC upheld FINRA findings that a registered representative and a branch manager violated the NASD Rules of Fair Practice and "substantially undermined" the FINRA's ability to carry out its self-regulatory functions when they neglected their responsibility to respond to the FINRA's requests for information concerning commission payment practices and customer complaints. Neither the belief that the information was no longer needed nor brokerage firm policy that responses be made by legal counsel excused the individuals' failure to provide the requested information.

See also In re Thomas G. Kibler, [1992-1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,130 (Feb 23, 1993). Sanctions were properly levied against a former registered representative of a brokerage firm who violated the NASD's Rules of Fair Practice. The representative who entered transactions for the purchase of a company's common stock in three customer accounts without the customer's authorization was properly sanctioned. The representative claimed that he engaged in this practice because he was directed to do so by his employer. The SEC stated that evidence was not given to support these accusations, and even if it were, a registered representative cannot excuse unauthorized trading on the grounds that it was directed by the representative's employer.

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 § 3.06

AUTHOR: W. Reece Bader

§ 3.06 Municipal Securities Dealers and Brokers

Before 1975, the SEC had little to do with municipal securities. Municipal brokers and dealers were not subject to the registration requirements of Sections 15(a)(1) and 15A(f) of the Exchange Act and Section 202(a)(11)(E) of the Advisers Act, and municipal securities themselves were exempted from registration under the 1933 Act. In 1975, Section 15B was added to the Exchange Act, requiring all municipal dealers including banks to register with the SEC. n1 In addition, the Municipal Securities Rulemaking Board ("MSRB") was established by Congress to promulgate rules governing the municipal securities industry, subject to oversight by the Commission. n2

The 1975 amendments did not change the fact that municipal securities are exempt from the substantive requirements of the federal securities laws, except for the general anti-fraud provisions of the Securities Act and the Exchange Act. Most significantly, this means that state and local governments are not subject to the registration and disclosure requirements of the Securities Act of 1933. n3 Also, the Securities Acts Amendments did not affect the exemptions for issuers of municipal securities. n4

In 1994, the SEC issued three releases stating its interpretive views regarding disclosure in the municipal securities market. n5 As part of these releases, the SEC proposed amendments to Rule 15c2-12 under the Securities Exchange Act of 1934. n6 Rule 15c2-12 was adopted by the SEC in 1989 to prevent fraud in the municipal securities market by enhancing the quality, timing, and dissemination of disclosure in connection with the offer or sale of municipal securities. n7

The amendments n8 to Rule 15c2-12 became effective in mid-1995 and on January 1, 1996. They include a requirement that a participating underwriter cannot purchase or sell municipal securities in connection with an offering unless the participating underwriter has reasonably determined that the issuer has contracted in the trust indenture or bond resolution to provide to municipal securities repositories annual current information about the issuer and each "significant obligor," including audited financial statements and pertinent operating information. In addition, as revised, the rule makes it unlawful for a participating underwriter to recommend the purchase or sale of a municipal security without having reviewed the information the issuer has undertaken to provide.

In addition, in 1995 the MSRB rules regarding the prohibition of political contributions by brokers, dealers and

municipal securities dealers to issuers and officials of issuers became effective. n9

[1] Definitions

[a] Municipal Securities Dealer. A municipal securities dealer is a person engaged in the business of buying and selling municipal securities for his or her own account through a broker or otherwise. n10 A bank (or its separately identifiable department or division) n11 may be a municipal securities dealer if it is engaged in the business of buying and selling municipal securities for its own account, other than in a fiduciary capacity, through a broker or otherwise. n12 If a bank is engaged in the business of buying and selling municipal securities for its own account through a separately identifiable department or division, however, the department or division rather than the bank itself is deemed to be the municipal securities dealer required to register with the Commission pursuant to Section 15B. n13

MSRB Rule G-1 defines the phrase "separately identifiable department or division of a bank" for purposes of Section 3(a)(30) of the Exchange Act as that unit of a bank conducting all municipal securities dealer activities, of the bank, provided that the unit is under the direct supervision of a designated officer responsible for the daily conduct of the bank's municipal securities dealer activities, including the supervision of all bank employees engaged in the performance of such activities. In addition, such activities must be separately maintained in, or extractable from, the facilities of either the unit itself or the bank, all records relating to the bank's municipal securities dealer activities, if the records are so maintained or otherwise accessible to permit independent examination thereof and subject to enforcement of applicable provisions of the Exchange Act, the rules and regulations thereunder, and the rules of the MSRB. n14

Types of activities of a bank or a separately identifiable department or division of a bank that constitute municipal securities dealer activities for purposes of MSRB Rule G-1 include:

- underwriting, trading and sales of municipal securities;
- financial advisory and consultant services for issuers in connection with the issuance of municipal securities;
- processing and clearance activities with respect to municipal securities;
- research and investment advice with respect to municipal securities, insofar as the advice relates to activities enumerated in paragraphs (1) and (2) above;
- activities involving communication, directly or indirectly, with public investors in municipal securities, insofar as such activities relate to paragraphs (1) and (2) above; and
- maintenance of records pertaining to activities described in paragraphs (1) through (5) above. n15

The directors and senior officers of the bank may from time to time set broad policy guidelines for the bank that are not directly related to the daily conduct of the bank's municipal securities dealer transactions without subjecting the unit of the bank conducting business as a separately identifiable department or division to a disqualification or requiring that the directors or officers be deemed part of the unit. n16 Even though a bank's municipal securities dealer activities may be conducted in several geographic, organizational or operational units of the bank, that, in itself, would not preclude a finding that the bank has a separately identifiable department or division for purposes of MSRB Rule G-1, as long as all the units are clearly identifiable and each of the units meets the requirements of subparagraphs (a)(1) and (2) of the rule. n17 For purposes of the rule, all the geographic, organizational or operational units of a bank are considered in the aggregate as the separately identifiable department or division of the bank. n18

Neither any person who transacts municipal securities business for his or her own account, either individually or in

some fiduciary capacity, but does so not as a part of a regular business, n19 nor a bank that buys and sells municipal securities for its own account, but engages in the municipal securities transaction only in a fiduciary capacity, are considered municipal securities dealers. n20

[b] Municipal Securities Broker. A municipal securities broker is a broker engaged in the business of effecting transactions in municipal securities for the account of others. n21 A person associated with a municipal securities dealer that is a bank or a division or department of a bank is any person directly engaged in the management, direction, supervision, or performance of a bank's municipal securities activities with respect to municipal securities, and any person directly or indirectly controlling the municipal securities activities or controlled by the municipal securities dealer in connection with the activities. n22

Generally, the municipal securities industry consists of securities firms (dealers) that buy and sell municipal securities for their own account; banks (bank dealers) that buy and sell municipal securities for their own trading account; and brokers (bond brokers) who act only as agents for buyers and sellers of municipal securities and do not buy or sell municipal securities for their own account. n23

[2] Regulatory Environment Prior to 1975

Prior to the Securities Acts Amendments of 1975, trading in municipal securities and the qualifications and conduct of municipal securities professionals were exempt from regulation by the Commission. n24 In fact, Section 3(a)(12) of the Exchange Act included municipal securities in the definition of an "exempted security." Consequently, banks, brokers and dealers trading exclusively in municipal securities were not required to register with the Commission. Subsection (f) of Section 15A of the Act, which governs the establishment of national securities associations, specified that nothing in the section "shall be construed to apply with respect to any transaction by a broker or dealer in any exempted security." n25 In addition, Section 17(a), which authorized the Commission to prescribe recordkeeping and reporting requirements, applied only to brokers and dealers registered with the Commission. Therefore, neither the Commission nor the FINRA had authority to prescribe for municipal securities professionals rules and regulations governing such matters as registration, professional qualifications, recordkeeping and reporting, financial responsibility to safeguard customer funds and securities and impose minimum capital standards, or just and equitable principles of trade.

Municipal securities professionals, including banks, were, however, subject to Section 10(b) of the Act. Section 10(b) prohibits the use of manipulative or deceptive devices or contrivances in the purchase or sale of any security in violation of Commission rules. In addition, they were subject to Section 15(c)(1) of the Act, which precludes brokers and dealers (whether or not registered with the Commission) from effecting any transaction in or inducing the purchase or sale of any security (exempt or not) in the over-the-counter market by means of any manipulative, deceptive, or other fraudulent device or contrivance, as defined by the Commission. n26

Nonetheless, Commission control of trading in municipal securities and the conduct of municipal securities professionals was limited to only *post hoc* enforcement of the anti-fraud prohibitions under the various federal securities laws. The absence of effective regulation reflected both an historical concern that the costs of regulation would be borne by state and local issuers of municipal securities and a belief that self-regulation by sophisticated municipal securities institutions would provide adequate protection for investors. n27

[3] Nature of Abuses in the Trading Markets for Municipal Securities Prior to 1975

Although the municipal securities markets generally performed their debt financing functions for state and local governments and other municipal agencies with commendable efficiency and integrity, fraud actions brought against municipal securities professionals during the early 1970s indicated that unwary investors were often exposed to illegal trading practices. n28

The pattern of professional misconduct that justified federal regulation of the municipal securities business included "unconscionable markups, churning of customers' accounts, misrepresentations concerning the nature and value of municipal securities, disregard of suitability standards, and scandalous high-pressure sales techniques." n29 Absent additional statutory authority, the reputable and forward-looking firms in the municipal securities industry and the Commission appeared unable to halt such fraudulent trading practices.

The Securities Acts Amendments of 1975 were intended to prevent the pattern of abuses, provide a suitable regulatory framework that would respond to the needs of the industry, and protect the interests of investors and governmental issuers in healthy and efficient municipal securities markets. n30

[4] Changes Effected by the Securities Acts Amendments of 1975

The Securities Acts Amendments of 1975 n31 subjected municipal securities professionals to essentially the same regulatory scheme applicable to other securities activities, by amending the Exchange Act in various respects. n32

First, municipal securities were excised from the Exchange Act's definition of "exempted securities" for purposes of several provisions of the Act, n33 with the result that, for the first time, brokers and dealers engaged exclusively in a municipal securities business became subject to the registration requirements of Section 15(a). n34 In addition, Section 15B was added to the Securities Exchange Act of 1934. Section 15B provides for the registration of municipal securities dealers (including banks or their separately identifiable departments or divisions acting as dealers), and creates the MSRB with authority to adopt rules governing trading in municipal securities and activities of municipal securities brokers and municipal securities dealers subject to Commission oversight. n35

Further, new definitions for municipal securities professionals were added to Sections 3(a) (30), (31), and (32). Sections 15(c)(1) and 15(c)(2) (concerning manipulative, deceptive, and fraudulent acts, practices, devices and contrivances) were amended to grant the Commission rulemaking authority over municipal securities dealers (including banks) that use the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any municipal security in the over-the-counter market or on any exchange of which it is not a member. n36 Finally, Section 17 was amended to give the Commission the authority to prescribe records to be maintained and reports to be disseminated by municipal securities dealers and the MSRB. n37

Additionally, the 1975 Amendments subject, for the first time, brokers and dealers who transact business in municipal securities to all existing rules under Sections 15(c)(2) and 15(c)(3) of the Exchange Act with respect to their municipal securities transactions. n38 Since Commission rules under Section 15(c)(3) currently apply only to brokers and dealers, however, banks and their separately identifiable departments or divisions fall outside the scope of such rules. n39 Commission rules under Section 15(c)(2) can apply to banks that are municipal securities dealers but do not, except for Rule 15c2-4 concerning the transmission or maintenance of payments received in connection with underwritings. n40

Rules adopted pursuant to Sections 10(b) and 15(c)(1), previously applicable to transactions in municipal securities effected by brokers and dealers, continue to apply after the 1975 Amendments. These rules also apply to banks (or separately identifiable departments or divisions of banks) that are municipal securities dealers as a result of the 1975 Amendments. n41

[a] Registration of Municipal Securities Dealers.

Unless exempted by the Commission under its broad exemptive authority in Section 15B(a)(4), a municipal securities dealer not registered as a broker or dealer under Section 15 of the Exchange Act must register with the Commission under Section 15B n42 before engaging in a municipal securities business. n43 Persons already registered with the Commission as a broker or dealer pursuant to Section 15 because of their general securities business need not re-register

under Section 15B with respect to their municipal securities business. n44

Acts, practices, or courses of business of registered brokers or dealers prohibited by other provisions of the Exchange Act in connection with the use of the mails or any means or instrumentality of interstate commerce are equally prohibited if performed by a registered municipal securities dealer or any person acting on behalf of the municipal securities dealer, regardless of any use of the jurisdictional means in connection with the act, practice, or course of business. Acts or practices prohibited by Section 5, which governs transactions on unregistered national securities exchanges, and paragraph (1) of Section 15B(a), are excepted from this requirement. n45

Only municipal securities dealers that are banks or separately identifiable departments or divisions thereof, and municipal securities dealers that are engaged in an exclusively intrastate business but utilizing jurisdictional means are subject to registration under Section 15B. All non-bank municipal securities dealers and brokers must register under Section 15. n46

The Commission may, by rule or order, upon its own motion or upon application, conditionally or unconditionally exempt any broker, dealer, or municipal securities dealer or any class thereof from the registration requirements, rules or regulations under Section 15B, if the Commission finds that the exemption is consistent with the public interest, the protection of investors, and the purposes of the Act. n47

[i] Application for Registration under Section 15B.

A municipal securities dealer subject to registration under Section 15B registers with the Commission by filing an application for registration containing such information and documents about the municipal securities dealer and any persons associated with him or her and in such form as the Commission may, by rule, prescribe as necessary or appropriate in the public interest or for the protection of investors. n48 Within 45 days of the date of filing the application (or within a longer period to which the applicant consents), the Commission must either grant the application or institute proceedings to determine whether registration should be denied. n49

The Commission must grant the registration if it finds that the municipal securities dealer has satisfied all the registration requirements. The application for registration must be denied, however, if the Commission makes no such finding, or upon a finding that if the applicant is registered, the registration would otherwise be subject to suspension or revocation pursuant to Section 15B(c). n50

[A] Banks--Form MSD. Regulation 15B(a)(2)-1 requires a municipal securities dealer that is a bank or a separately identifiable department or division of a bank to apply for registration under Section 15B(a) with the Commission on Form MSD. n51 A statement of financial condition need not be filed with the application. n52 If the applicant is a department or division of a bank, the application is deemed to have been made by the bank on behalf of the applicant. n53 A registrant whose registration is either currently effective or pending may update the registration or application on Form MSD. n54

Form MSD contains twelve items and the following three schedules:

- Schedule A, used to respond to Item 5 (persons who manage the applicant's municipal securities dealer activities) and Item 7 (whether any person who manages the applicant's municipal securities dealer activities has ever been sanctioned by the SEC, a court, or a self-regulatory organization);
- Schedule B, used to respond to Item 6 (control persons of the applicant's municipal securities dealer activities); and
- Schedule C, used to respond to Item 9 (services performed by persons other than the applicant with

respect to the applicant's municipal securities dealer activities, Item 10 (whether the applicant maintains a municipal securities investment portfolio or buys and sells municipal securities in a fiduciary capacity or as agent for customers), and Item 12 (identification of Schedule C of each geographic, organizational, and operational unit of the bank of which the applicant is a part and a description of the recordkeeping and preservation procedure relating to the applicant's municipal securities dealer activities).

Certain persons named in response to Item 5 of Form MSD who are required to complete a separate Schedule A may file in lieu thereof Form MSD-4, "Uniform Application for a Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Securities Dealer." n55 The information called for by Form MSD-4 is substantially the same as that required by Schedule A. Every bank municipal securities dealer must file a Form MSD-4 with the appropriate regulatory agency on behalf of each principal or associated representative. Applicants must still complete a Schedule A for any disciplined personnel named in response to Item 7 of Form MSD even if the persons involved have also completed a Form MSD-4, since Schedule A solicits additional disciplinary information not available on Form MSD-4.

If the applicant is a department or division of a bank, information concerning the applicant must be given in response to Items 2(a) and 2(b) of Form MSD. Information with respect to the bank of which the applicant is a part must be given in response to Item 2(d) of Form MSD. n56

Information contained in Form MSD must be updated or amended periodically when the information becomes incomplete or inaccurate. When any item is amended, all other items on the page being amended must be answered in full. n57 An amendment filed under Rule 15B(a)(2)-1(b) constitutes a report within the meaning of Sections 17 and 32(a) of the Exchange Act. n58

[B] Subsidiaries of Banks--Form BD. Municipal securities dealers that are subsidiaries of banks or of bank holding companies are required to register with the Commission under Section 15 of the Exchange Act, rather than Section 15B, on Form BD. n59

[C] Intrastate Non-bank Municipal Securities Dealers--Form BD. Rule 15B(a)(2)-2 requires a non-bank municipal securities dealer whose business is exclusively intrastate to register with the Commission on Form BD. n60 The applicant must file a statement with the Commission indicating that he is applying for registration as an intrastate dealer. In addition, a statement of financial condition setting forth the nature and amount of assets, liabilities, and net worth concerning the applicant must be filed with the application. n61

[ii] Registration of Successors and Fiduciaries. In the event that a municipal securities dealer succeeds to and continues the business of a registered municipal securities dealer, the registration of the predecessor shall be deemed to remain effective as the registration of the successor if the successor, within 30 days after such succession, files an application for registration. A bank or a separately identifiable department or division of a bank files on Form MSD. Any other municipal securities dealer files on Form BD, and the predecessor files a notice of withdrawal from registration on Form MSDW or Form BDW. n62 The predecessor's registration is deemed to remain effective as the registration of the successor for 45 days after the application for registration on Form MSD or Form BD is filed. n63

A fiduciary (including any executor, administrator, guardian, conservator, assignee for the benefit of creditors, receiver, trustee in insolvency or bankruptcy) or other fiduciary appointed or qualified by order, judgment or decree of a court of competent jurisdiction, who continues the business of a registered municipal securities dealer, must file a statement setting forth the information about the fiduciary required by Form MSD or Form BD within 30 days after entering upon the performance of the duties. n64 The registration of a municipal securities dealer is deemed to be the registration of the fiduciary upon the filing of the information statement with the Commission within the prescribed period. n65

The Government Securities Act of 1986 n66 added Section 15C to the Act that requires the registration of certain

government securities brokers and dealers that were not required to be registered under prior law. While Section 15B requires the registration of brokers and dealers of municipal securities, Section 15C extends the registration requirement to brokers and dealers trading in United States government securities, certain securities issued or guaranteed by corporations in which the United States government has a direct or indirect interest, and certain securities issued or guaranteed by corporations designated by statute to be exempt securities within the meaning of the laws administered by the Commission.

Section 15C grants authority to the Secretary of the Treasury to adopt rules regarding financial responsibility; custody and use of customers' securities; the transfer and control of government securities in repurchase transactions; financial statements; recordkeeping; and exemption from registration. The enforcement of the rules is the responsibility of the Commission as to currently registered brokers and dealers and those brokers and dealers required to register under Section 15C. The enforcement of the rules as to primary dealers, banks and other institutions specified by Section 15C is the responsibility of other appropriate regulatory agencies.

The Commission has adopted rules under Section 15C. n67 Under Rule 15Cal-1, every government securities broker and dealer (other than financial institutions) registered under Sections 15 or 15B of the Act is required to notify the Commission on Form BD that it is a government securities broker or dealer. A broker or dealer that plans to begin government securities activities must file notice with the Commission on or before the date that it begins such activities, n68 and must notify the Commission on Form BD within 30 days after it has ceased to act as a government securities broker or dealer. n69

[b] Withdrawal from Registration. Section 15B(c)(3) permits any registered municipal securities dealer, upon such terms and conditions as the Commission deems necessary in the public interest or for the protection of investors, to withdraw from registration by filing a written notice of withdrawal with the Commission. n70

The notice of withdrawal from registration as a municipal securities dealer pursuant to Section 15B(c) and Rule 15Bc3-1 thereunder is filed on Form MSDW, in the case of a bank or a separately identifiable department or division of a bank, or Form BDW in the case of any other municipal securities dealer. n71

Form MSDW requires the registrant to indicate whether it is a bank or department or division of a bank n72 and to state: its full name; any separate name under which municipal securities dealer activities are conducted; and the address of the principal place of business and telephone number of the registrant, bank, or department or division of a bank. n73

In addition, the registrant must state whether it owes any money or securities to any customer, broker, dealer, or municipal securities dealer in connection with its activities as a municipal securities dealer. n74 If the answer is in the affirmative, the registrant must specify: the amount of money owed; the market value of securities owed; and the arrangements made for payment thereof. n75 If the registrant is a party to any legal action or proceeding n76 or there are unsatisfied judgments or liens against the registrant, the registrant must provide complete information as to each. n77

The name and address of the person having custody or possession of the registrant's books and records pertaining to its municipal securities dealer activities and the address of the place where the books and records are preserved must also be reported. n78 The registrant must also undertake to make the books and records he or she is required to preserve available for examination by authorized representatives of the Commission, and to authorize the person having custody of the books and records to make them available. n79

Form MSDW must be signed in the name of the registrant by a principal officer of the registrant, bank or department or division of a bank, who is duly authorized to sign the form, and is directly engaged in the management, direction, or supervision of the registrant's municipal securities dealer activities. n80 One signed original and one signed copy (both duly executed with a manual signature) of the form must be filed with the Commission at its Washington D.C. office

before registration as a municipal securities dealer may be terminated. n81 The registrant must retain an exact copy of the form and file an original signed copy with its appropriate regulatory agency. n82 Registrants that are banks or departments or divisions of banks (including national banks and banks operating under the Code of Law of the District of Columbia), must file the original signed copy of Form MSDW with the Federal Reserve Board in Washington D.C. or with the FDIC, if the registrants are banks insured by the FDIC and not members of the Federal Reserve System. n83

The notice on Form MSDW or Form BDW generally becomes effective on the 60th day after the filing with the Commission or within such shorter time as the Commission may determine. n84

The Commission may, however, impose terms or conditions on the withdrawal. If a notice of withdrawal from registration is filed at any time after the date of issuance of a Commission order instituting proceedings under Section 15B(c) to censure, place limitations on the activities, functions or operations of, or suspend or revoke the registration of, the municipal securities dealer, or if, prior to the effective date of the notice of withdrawal, the Commission institutes any of the above proceedings or a proceeding to impose terms or conditions on the withdrawal, the notice of withdrawal will not become effective except at a time and on terms and conditions as the Commission deems necessary or appropriate in the public interest or for the protection of investors. n85

[c] Suspension, Revocation, and Cancellation of Registration; Readmission. Under Section 15B(c)(3) and (4) the Commission has the authority to impose sanctions, including censure; placing limitations on activities, functions, or operations; suspension for a period not exceeding twelve months; revocation of registration; and barring association with a municipal securities dealer on any municipal securities dealer or any person associated or seeking association with a municipal securities dealer on the grounds of acts or omissions, convictions, or injunctions specified in Section 15(b)(4). n86

The Commission, pending final determination whether to revoke a registration, may suspend registration if the suspension appears to the Commission, after notice and opportunity for hearing, to be necessary or appropriate in the public interest or for the protection of investors. n87 Further, if the Commission finds that a registered municipal securities dealer is no longer in existence or has ceased to do business as a municipal securities dealer, the Commission may cancel the registration of the municipal securities dealer. n88

The Commission may grant applications for readmission to the municipal securities business or some aspect thereof. n89

[d] Cooperation and Consultation in Inspection and Enforcement. Because the Securities Acts Amendments of 1975 enlarge the scope of the Exchange Act to encompass certain functions of banks with respect to securities, the statutory scheme has been modified to provide for administration and inspection, and, in certain instances, the imposition of sanctions and responsibility for other matters by the federal bank regulatory agencies. The Act uses the concept of "appropriate regulatory agency" as a means of allocating such functions between the Commission and the banking agencies. The allocation is contained in the definition in Section 3(a)(34):

(A) When used with respect to a municipal securities dealer:

(i) the Comptroller of the Currency, in the case of a national bank or a bank operating under the Code of Law for the District of Columbia, or a subsidiary or a department or division of any such bank;

(ii) the Board of Governors of the Federal Reserve System, in the case of a State member bank of the Federal Reserve System, a subsidiary or a department or division thereof, a bank holding company, a subsidiary of a bank holding company which is a bank other than a bank specified in clause (i) or (iii) of this subparagraph, or a subsidiary or a department or division of such subsidiary;

1-3 Federal Securities Exchange Act of 1934 § 3.06

(iii) the Federal Deposit Insurance Corporation, in the case of a bank insured by the Federal Deposit Insurance Corporation (other than a member of the Federal Reserve System), or a subsidiary or department or division thereof; and

(iv) the Commission in the case of all other municipal securities dealers.

The primary inspection and enforcement authority over municipal securities dealers that are banks is vested directly in the bank regulatory agencies. n90 In addition, bank regulatory agencies may compel bank municipal securities dealers under Section 8 of the Federal Deposit Insurance Act (FDIC) n91 to comply with Sections 15B and 17 of the Exchange Act, and rules of the Commission and the MSRB concerning municipal securities dealers, persons associated with municipal securities dealers, and transactions in municipal securities. n92 In addition, any violations of the provisions specified in Section 15(b)(4) in the case of municipal securities dealers under Section 15B(c)(2) and in the case of persons associated with municipal securities dealers under Section 15B(c)(4) constitute grounds for issuance of an order under Section 8(b) or 8(c) of the Federal Deposit Insurance Act. The customers of the municipal securities dealer are deemed to be "depositors" within the meaning of Section 8(c) of the FDIC. n93

Although the Commission has no review authority over enforcement actions by bank regulatory agencies as it does over FINRA actions, it has authority to institute an independent action against any municipal securities dealer that is a bank. n94

Prior to the entry of an order of investigation or the commencement of any proceedings against any municipal securities dealer or a person associated with a municipal securities dealer for violation of any provision of Section 15B(c), rules of the MSRB, or rules and regulations of the Commission pertaining to municipal securities dealers, associated persons thereof, or transactions in municipal securities, the Commission or the appropriate federal bank agency must:

- give notice to the other entity of the identity of the municipal securities dealer or person associated with the municipal securities dealer and the nature of and basis for the proposed action; and
- consult with such other entity concerning the effect of the proposed action on the protection of investors and the feasibility and desirability of coordinating the action with any proceeding or proposed proceeding by the other entity against the same municipal securities dealer or associated person. n95

The coordination requirements applicable to the Commission and the federal bank agencies are intended to avoid unnecessary regulatory duplication or undue regulatory burdens. However, the requirement of prior consultation does not in any way impair or limit the power of the Commission to investigate or commence proceedings against any municipal securities dealer or person associated with any municipal securities dealer. n96

Examinations as to professional qualifications and standards under Section 15B are administered by:

- a registered securities association, in the case of municipal securities brokers and municipal securities dealers that are members of the FINRA; and
- the appropriate federal bank agency for any municipal securities broker or municipal securities dealer, in the case of all other municipal securities brokers and municipal securities dealers. n97

To foster coordinated enforcement and assure an efficient and uniform regulatory structure, the agencies that inspect and enforce compliance by municipal securities dealers, including the FINRA, the Commission and the federal bank regulatory agencies, are required to exchange examination and inspection reports and related data. n98 In addition, the Commission must, upon request, furnish to the MSRB copies of examination reports made or received by the

Commission. n99

[5] Continuing Disclosure and Political Contributions

In the early 1990's, a series of events contributed to significant changes in the regulation of brokers and dealers in the municipal securities business. In 1989, in response to what was deemed to be delay in the dissemination of information in connection with primary municipal offerings, the SEC adopted Rule 15c2-12 n100 regarding underwriter obligations for official statements. The SEC continued to review municipal market disclosure and, in 1993, released its *Staff Report on the Municipal Securities Market*, regarding the need for improved disclosure practices in the municipal market. The Staff Report served as the basis for the SEC's decision to amend Rule 15c2-12 in significant respects, effective in 1995. n101

At the same time, through news items, SEC investigations and some questionable municipal securities offerings, the "pay for play" abuses in the municipal market became the subject of public scrutiny. As a result the MSRB adopted Rule G-37, subsequently approved by the SEC, n102 relating to the linkage between political contributions and municipal securities business. In late 1993 and 1994 other initiatives by the MSRB served to heighten the regulatory climate for the municipal securities industry. n103

In addition, the SEC created a special municipal securities group within its enforcement division and initiated extensive enforcement activity beginning in 1995 and continuing, directed specifically at alleged fraudulent conduct in the relationships between municipal issuers and the professionals underwriters, financial advisers, investment providers, bond counsel who advise them.

[a] Continuing Disclosure under Rule 15c2-12.

Issuers and other obligated persons are subject to the SEC's continuing disclosure rules for offerings of municipal securities in a principal amount of \$1 million or more that are sold on or after July 3, 1995, unless an exemption applies. n104 The amendments to SEC Rule 15c2-12 requiring continuing disclosure are directed at underwriters for jurisdictional reasons, but the burden of compliance will be on state and local government issuers and other obligated persons.

Rule 15c2-12, after the effective date, prohibits broker-dealers who participate in primary market offerings of municipal securities (participating underwriters) from acting as underwriters of municipal securities, in a principal amount of \$1 million or more, unless the participating underwriter has reasonably determined that the issuer of the municipal securities or an obligated person has undertaken to provide the marketplace with the required ongoing information. The exemptions, in addition to the \$1 million threshold, are described below.

There are five documents or types of documents that must include language addressing the requirements of the 1994 amendments to Rule 15c2-12:

- the preliminary and final official statements;
- the bond purchase agreement, underwriting agreement or notice of sale;
- the trust indenture, bond resolution or bond ordinance;
- the disclosure agreement;
- the annual report or notice of a material event; and the SEC 2000 Interpretive Release.

[i] Preliminary and Final Official Statements.

The 1994 amendments to Rule 15c2-12 prohibit participating underwriters from "purchasing or selling" municipal securities subject to the rule unless there is a written agreement or contract obligating issuers or other obligated persons to provide the required continuing disclosure. The SEC uses the words "purchasing or selling" to mean that the written agreement or contract must be executed at the time of closing. n105

Participating underwriters are also required by Rule 15c2-12 to obtain and review an official statement that an issuer deems final prior to "bidding for" or "offering" municipal securities subject to the rule. The SEC uses these terms to refer to the date bids are submitted in an advertised sale and the date the securities are "offered" through the mailing of a preliminary official statement in a negotiated sale. n106 The SEC has further stated that it expects participating underwriters to review the official statement "with a view to ascertaining that it contains information satisfying the definition of a final official statement in Rule 15c2-12." n107

The 1994 amendments to Rule 15c2-12 contain a new definition of a final official statement that has substantive requirements related to continuing disclosure. A final official statement is defined as a document that includes a description of the contractual undertakings for continuing disclosure required of issuers and other obligated persons. However, an official statement deemed final must be reviewed by the participating underwriter prior to the date of submitting bids in an advertised sale or distributing a preliminary official statement in a negotiated sale if the preliminary official statement is part of an offering. Since the "deemed final" official statement must contain all the information in a final official statement other than pricing information, the preliminary official statement will generally be required to include a description of the contractual undertakings for continuing disclosure.

The underwriter must determine what information will be subject to annual continuing disclosure. It must first identify the obligated persons and then analyze what information *about those persons* is financial information and operating data. n108 There may be information in an official statement that is financial or operational, but if it does not relate to the finances or operations of an obligated person it is not subject to the continuing disclosure rules.

[A] Obligated Persons. An obligated person is defined by two tests. First, an obligated person is a person committed by contract or other arrangement to support payment of all or a part of the debt service obligation on the municipal securities. The second test limits ongoing disclosure to those persons for which the issuer and underwriters determine it is necessary to provide financial information or operating data under the antifraud standards applicable to the final official statement. If there is no information in the official statement about a person (unless the financing is for an undetermined pool for which a special rule applies), no updating is required.

[B] Financial Information. The SEC has limited the continuing disclosure requirement to "annual financial information," a term defined as "financial information or operating data." The term "financial information" is described in the Release as the type of information that is provided in the financial statements of a corporation subject to generally accepted accounting principles. Nonetheless, the Release recognizes that many governments do not report their financial information in the form of a corporate balance sheet, income statement or changes in fund balances. In view of the comments received by the SEC in proposing continuing disclosure, the 1994 amendments do not adopt the earlier draft that would mandate audited financial statements on an annual basis with respect to each issuer or obligated person. Instead, the 1994 amendments continue to require annual financial information, which may be unaudited, and may, where appropriate and consistent with the presentation in the final official statement, be other than full financial statements.

[C] Operating Data. The operating data required to be provided annually, like the financial information, is the operating data that is set forth in the official statement.

[ii] The Bond Purchase Agreement, Underwriting Agreement or Notice of Sale. The 1994 Amendments to Rule 15c2-12 do not allow a participating underwriter to close a financing unless the required contractual undertakings

have been executed. As described above, the participating underwriter is also required to review, as part of its due diligence, the summary of the contractual undertakings in an official statement deemed final (presumably the preliminary official statement) prior to bidding in an advertised sale or offering in a negotiated sale.

The third obligation for participating underwriters is that at the time of sale they must be assured that the contractual undertakings will be executed at or before closing. The 1994 amendments require the participating underwriter to determine, prior to the sale date, that the issuer or one or more obligated persons will undertake in a written contract for the benefit of the holders of the securities to provide the following four categories of continuing disclosure:

- annual financial information updating the quantitative financial information and operating data set forth in the final official statement related to each obligated person;
- audited financial statements for each obligated person, when and if available;
- in a timely manner, the occurrence of any one or more of eleven specified events, if material; and
- in a timely manner, notice of the failure of any person making an undertaking to provide the required annual financial information. This requirement is described in the Release as being satisfied by a covenant in the bond purchase agreement or underwriting agreement or notice of sale signed by the persons who will be making the contractual undertakings that the required continuing disclosure will be made.

For a participating underwriter there are three key dates for purposes of rule compliance. Prior to bidding on an advertised sale or offering municipal securities by a preliminary official statement in a negotiated sale, the participating underwriter must review a deemed final (usually the preliminary) official statement to determine that there is an adequate description of the continuing disclosure obligations. The participating underwriter must assure itself that if the issuer and other obligated persons fulfill the undertakings described, the requirements of Rule 15c2-12 will be met. This may usefully be viewed as a specific due diligence procedure dictated by the SEC.

On the date an award is made in an advertised sale, or the sale date in a negotiated sale, the participating underwriter should be the beneficiary of contractual obligations evidencing that the contractual undertakings necessary to satisfy the continuing disclosure obligations of the issuer and other obligated persons will be executed at or prior to the closing. The covenant to the participating underwriter should be worded so that it is clear the participating underwriter can refuse to close if the continuing disclosure undertakings are not executed.

Finally, on the closing date, the participating underwriter must be satisfied that contractual undertakings have been executed sufficient for compliance with Rule 15c2-12.

[iii] The Trust Indenture, Bond Resolution and Bond Ordinance. The 1994 amendments to Rule 15c2-12 require the contractual undertakings for continuing disclosure to be in a written agreement or contract for the benefit of the holders of the municipal securities being offered. The necessary provision in the trust indenture, bond resolution or bond ordinance should be a simple agreement that the issuer (and the trustee) will agree to comply with the continuing disclosure agreement, which can be accomplished by incorporating the continuing disclosure agreement by reference into the trust indenture, bond resolution or bond ordinance.

[iv] The Continuing Disclosure Agreement. The continuing disclosure agreement is at the heart of the system of documentation necessary to implement the amendments to Rule 15c2-12. It is the document that will determine whether the participating underwriter is able to close the financing.

The continuing disclosure agreement will list the items from the official statement that will be updated and identify the

issuer or an obligated person as responsible for the item in an annual report. The continuing disclosure agreement creates a set of instructions for "line item" annual reporting similar to the line item instructions of the SEC for reporting companies subject to the reporting system of the 1934 Act. Unlike the corporate reporting system that has the same line item reporting requirements for all 10-Q and 10-K (quarterly and annual) corporate reports, the system under Rule 15c2-12 provides for different line item requirements for each financing as determined by the official statement. The financial information and operating data about the issuer or an obligated person, which is reflected in the continuing disclosure agreement as items for annual updating, creates, in effect, a line item regulatory system for each financing. The theory of Rule 15c2-12 is that public finance disclosure varies enormously and it would be unworkable for the SEC to impose the same line item disclosure requirements for each financing. Therefore, what is determined to be material in the official statement by those drafting the official statement provides the line items for continuing disclosure.

The 1994 amendments to Rule 15c2-12 also require that the continuing disclosure agreement specify, in reasonable detail, the accounting principles pursuant to which financial statements will be prepared, and whether financial statements will be audited. If audited financial statements are not submitted as part of the annual financial information, then when and if available, audited financial statements must be submitted by each obligated person subject to the annual reporting requirements.

The continuing disclosure agreement must specify the date by which the annual financial information for the preceding fiscal year will be provided identifying the repositories to which it will be provided. As a practical matter, issuers and obligated persons who have their financial statements audited each year will select a date after the anticipated receipt of the audit report for the submission of the Rule 15c2-12 annual report.

In addition to the annual disclosure of quantitative financial information and operating data, the 1994 amendments require an undertaking to disclose, "in a timely manner," the occurrence of any of eleven specific events. These events are required to be disclosed when they occur to prevent trading in the secondary market based on lack of information about events most likely to affect prices. This requirement should not be misconstrued by issuers, underwriters and their lawyers as requiring the timely disclosure of all material information. General securities law concepts do not require the disclosure of material information unless there is a duty to disclose. The 1994 amendments create a duty to disclose only if one or more of the eleven specifically enumerated events occur, n109 and, except in limited circumstances in which the parties decide to add to the list an item that would be particularly important in a financing, the continuing disclosure agreement should not be drafted to expand the disclosure responsibility beyond what is required.

[v] The Annual Report or Notice of Material Events. The formatting of the annual report is not specified in Rule 15c2-12. Some guidance can be gleaned from the format of the annual 10-K in the corporate reporting system. The cover should identify the person submitting the report and enough information derived from the cover of the final official statement to clearly identify the financing being covered by the annual report. It must be remembered that the annual report relates to issues of securities, not the issuers of securities. Some issuers, however, may have numerous financings with clearly identical categories of financial information and operating data. These issuers may consider a single annual report for several issues. The cover to the annual report should reference each issue being included, and the person preparing the annual report should still refer to each continuing disclosure agreement to be certain there is compliance with each.

The annual report and the notice of material events are statements that, under federal securities law, are expected to reach investors and the trading markets. As such, they are subject to the standard of care required by the antifraud rules of federal securities law. This has been expressed quite bluntly by the SEC with respect to other municipal statements as follows:

A municipal issuer may not be subject to the mandated continuous reporting requirements of the Exchange Act, but when it releases information to the public that is reasonably expected to reach investors and the trading markets, those disclosures are subject to the antifraud provisions. The fact that

they are not published for purposes of informing the securities markets does not alter the mandate that they not violate antifraud proscriptions. Those statements are a principal source of significant, current, information about the issuer of the security, and thus reasonably can be expected to reach investors and the trading market. n110

Rule 15c2-12 also requires the annual report and audited financial statements, if separately filed, to be submitted to each nationally recognized municipal securities information repository n111 and to the appropriate state information depository, if any.

In contrast, notices of material events, as well as notices of a failure by an issuer or other obligated person to provide annual reports are to be filed either with each repository or the MSRB, and the appropriate state information depository. These notices may be filed with the MSRB rather than the repositories if it is considered useful to assure prompt and wide disclosure.

[vi] Exemptions. The continuing disclosure requirements, like the information dissemination requirements, do not apply to a primary offering of municipal securities in authorized denominations of \$100,000 or more, in any of the following three circumstances:

- The municipal securities are sold to no more than 35 persons each of whom the participating underwriter reasonably believes (i) has such knowledge and experience in financial and business matters to evaluate the merits and risks of the investment and (ii) is not purchasing for more than one account or with a view to distributing.
- The municipal securities have a maturity of nine months or less.
- At the option of the holder, the municipal securities may be tendered to an issuer at least as frequently as every nine months.

There is also a separate small issuer exemption to the continuing disclosure requirements. The requirements do not apply if at the date of closing:

- no obligated person will be an obligated person with respect to more than \$10,000,000 in aggregate amount of outstanding municipal securities, including the offered securities and excluding municipal securities that were offered in a transaction exempt as described immediately above;
- an issuer of municipal securities or obligated person has undertaken, either individually or in combination with other issuers of municipal securities or obligated persons, in a written agreement or contract for the benefit of holders of such municipal securities, to provide: (1) upon request to any person or at least annually to the appropriate state information depository, if any, financial information or operating data regarding each obligated person for which financial information or operating data is presented in the final official statement, as specified in the undertaking, which financial information and operating data shall include, at a minimum, that financial information and operating data which is customarily prepared by such obligated person and is publicly available; and (2) in a timely manner, to each nationally recognized municipal securities information repository or to the MSRB, and to the appropriate state information depository, if any, notice of the eleven events described above; and
- the final official statement identifies by name, address, and telephone number the persons from which the foregoing information, data, and notices can be obtained.

It will be noted that this exemption requires more specificity in the final official statement than does the general rule

regarding the source of information.

[vii] The SEC Interpretive Release. In its May 4, 2000 Interpretative Release Use of Electronic Media, n112 the SEC paid some attention to municipal disclosure issues. In effect, municipal securities underwriters may rely on issuers to identify which documents placed on or connected to the issuers Web site can be considered preliminary or official statements. The use of hyperlinks, however, creates an automatic situation: hyperlinks in an official statement which electronically link to documents outside the site are part of the official statement.

[b] MSRB Rule G-37: Prohibiting "Pay for Play." To curb the abuses created by the making of political contributions in return for municipal securities business ("pay for play"), the MSRB adopted Rule G-37 in 1994. n113 Rule G-37 prohibits a broker, dealer or municipal securities dealer (an "underwriting firm") from engaging in municipal securities business with an issuer within two years after any contribution to an official of the issuer made by such underwriting firm, any municipal finance professional associated with such underwriting firm, or any political action committee controlled by the underwriting firm. n114

Municipal securities business is defined to include:

- the purchase of a primary offering of municipal securities from the issuer in a negotiated underwriting;
- the offer or sale of a primary offering of municipal securities in a private placement;
- the provision of financial advisory services with respect to a primary offering of municipal securities; or
- the provision of remarketing agent services (on other than competitive bid basis) with respect to a primary offering of municipal securities. n115

The inclusion of financial advisory and consultant services in the definition of municipal securities business emphasizes that the rule includes firms that are in the advisory and consulting business even if the firm does not underwrite municipal securities. Nevertheless, it should also be recognized that the prohibition of the rule extends to brokers, dealers and municipal securities dealers, the entities within the jurisdictional rulemaking power of the MSRB. If a consulting firm is not a broker, dealer or municipal securities dealer, such as feasibility firms, engineering firms and accounting firms that are not broker-dealers, the rule is not applicable.

Rule G-37 does not prohibit contributions made by municipal finance professionals to officials of the issuer for whom such municipal finance professionals were entitled to vote *and* were not in excess of \$250 in the aggregate to each official of the issuer per election. n116

The rule applies to those firms which are brokers, dealers and municipal securities dealers. The term "broker, dealer and municipal securities dealer" *does not* include its "associated persons." n117 As defined in the Securities Exchange Act of 1934, an associated person of a broker, dealer and municipal securities dealer would include any corporate entity that directly or indirectly controls, is controlled by, or is under common control with such broker or dealer. Therefore, provided that such entities do not intend to engage in the municipal securities business, parent corporations, subsidiaries and affiliated corporations of a broker, dealer or municipal securities dealer, are not affected by the prohibition on campaign contributions. In a Notice of Interpretation issued by the MSRB in mid-1998, the MSRB answered a question regarding the application of Rule G-37 in a merger situation. n118 The specific question posed involved a person who worked for a dealer in a non-municipal finance position and made a political contribution. The dealer was then acquired and the contributor assumed a municipal finance position in the new company. The MSRB stated that under the letter of G-37, the new company would be subject to the restrictions imposed by the rule. However, the MSRB went on to state

that the regulatory agency (*e.g.* FINRA) overseeing the broker-dealer should seriously consider granting an exemption to the rule in such circumstances.

Rule G-37 applies to the following four categories of individuals:

(1) Any person associated with an underwriting firm who is primarily engaged in "municipal securities representative activities." A municipal securities representative's activities must include one or more of the following:

- (a) underwriting, trading or sales of municipal securities;
- (b) financial advisory or consultant services for issuers in connection with the issuance of municipal securities;
- (c) research or investment advice with respect to municipal securities; or
- (d) any other activities which involve communication, directly or indirectly, with public investors in municipal securities.

A municipal securities representative does not include persons whose responsibilities involve the management, direction or supervision of municipal finance activities or the supervision of sales to and purchases from customers of municipal securities. In addition, persons whose functions are solely clerical or ministerial are not municipal securities representatives.

(2) Any person associated with an underwriting firm who solicits municipal securities business.

(3) Any direct supervisor of the persons identified in (1) and (2) up through and including, in the case of a broker, dealer or municipal securities dealer other than a bank dealer, the Chief Executive Officer or similarly situated official, and in the case of a bank dealer, the officer or officers designated by the board of directors of the bank as responsible for the day-to-day conduct of the bank's municipal securities dealer activities.

(4) Any member of the broker, dealer or municipal securities dealer (or, in the case of a bank dealer, the separately identifiable department or division of the bank) executive or management committee or similarly situated officials, if any. n119

Officials covered by the rule include an incumbent, a candidate, or a successful candidate for elective office, where the office of such person is directly or indirectly responsible for, or can influence the outcome of, the hiring of an underwriting firm for municipal securities business.

Rule G-37 clearly attempts to cover not only cash contributions to political campaigns, but loans and in-kind contributions as well. Thus, the term "contribution" is defined in the rule to mean any gift, subscription, loan, advance, or deposit of money or *anything of value*. n120 The contribution must be made, however, for any of the following purposes: influencing any election for federal, state or local office; the payment of debt incurred in connection with any such election; or transition or inaugural expenses incurred by the successful candidate for state or local office.

Contributions are covered when directed not only to the official, but also to any election committee for such person. Likewise, contributions are covered when directed not only to the office that the official then holds, but also to any other office the official may then be seeking, whether federal or state.

The rule does not limit volunteer work for a candidate, and if the candidate is a person for whom the municipal finance professional is entitled to vote, expenditures can be made that might constitute contributions if they are within the \$250 limitation. However, if the municipal finance professional were to seek reimbursement from the underwriting firm for such expenditures, the underwriting firm would be in violation of the contribution rule since there is no \$250 exception available to the underwriting firm.

Moreover, no underwriting firm nor any municipal finance professional may solicit any person or any political action committee to make any contribution, or shall coordinate any contributions, to an official of an issuer with which the underwriting firm is engaging or is seeking to engage in municipal securities business. n121 Violation of the solicitation or bundling provisions results in an immediate violation of the rule with the likelihood that the appropriate regulatory authority will implement statutory enforcement procedures. Unlike the contribution rule, the solicitation and bundling rule has no *de minimis* exception for municipal finance professionals acting on behalf of officials for whom they are entitled to vote.

In 1995, the District of Columbia Circuit Court of Appeals dismissed a dealer's constitutional challenge to the G-37 provisions. n122 Since then the MSRB and SEC have taken an active enforcement posture with respect to Rule G-37. Municipal securities dealers have been fined and barred from municipal business for extended periods of time in certain geographical areas for violations of Rule G-37. n123 In late 1997, the SEC refused to grant Morgan Stanley a Rule G-37 exemption that had been denied by the FINRA. Specifically, the SEC determined it did not have jurisdiction to review an exemption denial. While Section 19(d) states that the SEC can review any final disciplinary sanctions, the SEC held that the Rule 37 disqualification occurred automatically. Consequently, neither the triggering of Rule 37, nor the exemption denial, could be categorized as a disciplinary sanction subject to review. n124

On December 18, 1999, the MSRB filed with the Commission certain proposed amendments related to Rules G-37 and G-38. The Commission approved the amendments on February 8, 1999 which did the following: 1) exempted brokers, dealers, and municipal securities dealers who were not engaged in the municipal securities business for a period of at least two years from the G-37 disclosure requirements and related G-38 record-keeping requirements; 2) required those invoking such an exemption to disclose certain political contributions and payments in the preceding two-year period; 3) codified the submission exemption for Forms G-37/G-38 which had previously been recognized for dealers with no information to report in a calendar quarter; and 4) made technical and clarifying amendments to Rules G-37 and G-38.

[6] The Municipal Securities Rulemaking Board

[a] Creation and Composition. The Securities Acts Amendments of 1975 authorized the Commission to establish a new, but limited, self-regulatory organization, the MSRB, within 120 days after the enactment of the 1975 Amendments. n125 Pursuant to that authority, the Commission appointed the initial 15 members of the MSRB for two-year terms, n126 ending on September 4, 1977. n127 The MSRB's members include five public representatives (not associated with any broker, dealer, or municipal securities dealer), five broker-dealer representatives, and five bank representatives. n128 Since 1979, the term of one-third of the 15 members expires each year. A Nominating Committee, including the five members whose terms are due to expire, nominates three candidates for each of the five impending vacancies. The MSRB then selects one of the three names for each vacancy. Additional candidates may be nominated by vote of 20% of the MSRB. Vacancies are filled by the MSRB, which may also remove members by a two-thirds vote (including at least one vote from each of the public, broker-dealer and bank categories) for violation of the Act or rules or other misconduct.

The operation and administration of the MSRB are the responsibility of the MSRB. n129 No member, other than a public representative elected to fill a vacancy, who has served for less than 18 months, may succeed himself in office, and no broker-dealer or bank representative may be succeeded in office by any person associated with the municipal securities broker or municipal securities dealer with whom the member was associated at the end of his term of office. n130

The MSRB is not a membership organization like an exchange or the FINRA, nor does it have any inspection or enforcement powers. Inspection and enforcement of activities of all persons engaged in the municipal securities business is the responsibility of the FINRA, the federal bank regulatory agencies, and the Commission. n131

[b] Minimum Requirements for MSRB Rules. The MSRB has primary rulemaking authority (subject to Commission oversight) over transactions in municipal securities by brokers, dealers, and municipal securities dealers. Specifically, the MSRB may adopt rules, limited only by the requirement that they "effect the purposes of [the Exchange Act] with respect to transactions in municipal securities effected by brokers, dealers, and municipal securities dealers." n132 Such rules, at a minimum, must contain provisions including:

- standards of operational capability, training, experience and competence; n133
- fair procedures for the nomination and election of members of the MSRB and fair representation of municipal securities dealers and brokers; n134
- prevention of fraud and manipulation and the promotion of just and equitable principles of trade; n135
- fostering cooperation with persons who regulate, clear, settle or facilitate securities transactions or who process information regarding transactions; n136
- removing impediments to, and perfecting, a free and open market and generally protecting investors; n137
- periodic examination of municipal securities dealers and brokers in a manner designed to prevent unnecessary duplication or regulatory burden; n138
- the form and content of quotations concerning municipal securities distributed or published by municipal securities brokers or dealers or persons associated with such brokers or dealers; n139
- the persons to whom quotations are to be supplied; n140
- the records to be kept by municipal securities dealers and brokers; n141
- definition of the term "separately identifiable department or division" as used in Section 3(a)(30) in connection with banks; n142
- operation and administration of the MSRB; n143
- fees payable by municipal securities dealers and brokers to defray the costs of administering and operating the MSRB; n144 and
- the terms and conditions under which a municipal securities dealer may sell, or is prohibited from selling, part of a new issue of municipal securities to a "municipal securities investment portfolio" during the underwriting period. n145

The rules of the MSRB may not permit: unfair discrimination between customers, issuers, municipal securities dealers and brokers; n146 the fixing of minimum profits or the imposition of schedules fixing commissions or other fees; n147 the regulation of matters not related, the purposes of the Act or the Rules thereunder, or the administration of the

MSRB; n148 the arbitration of claims; n149 and the imposition of any burden on competition not necessary or appropriate to further the Act's purposes. n150 A broker, dealer, or municipal securities dealer cannot use the mails or interstate commerce to effect any transactions in any municipal security in contravention of MSRB Rules. n151

The Commission and the MSRB cannot require any issuer of municipal securities, directly or indirectly through a purchaser or prospective purchaser of municipal securities from the issuer, to file with the Commission or the MSRB any application, report, or document concerning the issuance, sale, or distribution of the securities. n152 Additionally, the MSRB may not require an issuer, directly or indirectly through a municipal securities broker or municipal securities dealer, to furnish to the MSRB or to a purchaser or prospective purchaser of municipal securities from the issuer any application, report, document, or information concerning the issuer. n153 However, the MSRB may require municipal securities brokers and municipal securities dealers, but not the issuer, to furnish to the MSRB or to purchasers or prospective purchasers of municipal securities, applications, reports, documents, and information concerning the issuer thereof that is generally available from a source other than the issuer. n154

[c] Commission Authority over MSRB Members and Employees. Section 15B(c)(8) empowers the Commission to remove from office or censure any MSRB member or employee if, after notice and opportunity for hearing, the Commission finds that the member or employee has willfully violated any provision of Section 15B, the rules and regulations thereunder, or the rules of the MSRB, n155 or abused his or her authority. n156

[d] Compliance Examinations and Availability of Examination Reports. The Commission, the FINRA, and the appropriate regulatory agencies are authorized to conduct periodic examinations of municipal securities brokers and dealers to determine compliance with the Exchange Act, the rules and regulations thereunder, and the MSRB Rules. n157 MSRB Rule G-16 provides that municipal securities brokers and municipal securities dealers must be examined in accordance with Section 15B(c)(7) at least once every two years.

Rule 15Bc7-1, adopted pursuant to Section 15B(c)(7), permits the establishment of a system for making available to the MSRB copies of reports of compliance examinations of municipal securities brokers and municipal securities dealers made by the Commission or furnished to the Commission by other appropriate regulatory agencies pursuant to Section 17(c)(3) n158 or the FINRA pursuant to Section 15B(c)(7)(B).

The information made available to the MSRB must not identify the municipal securities broker, municipal securities dealer, or associated person that is the subject of the examination report. n159 The MSRB is required to establish, by rule, procedures to maintain the confidentiality of all examination information furnished under the rule. n160

Under Rule 15Bc7-1, the Commission must, upon written request, furnish to the MSRB copies of examination reports of municipal securities brokers and municipal securities dealers made by the Commission or received from a federal bank agency under Section 17(c)(3) or from the FINRA under Section 15B(c)(7)(B). n161

Within 60 days of every six month period ending May 31 and November 30, each appropriate regulatory agency and the FINRA must submit two copies of a form containing composite statistical and analytical information to the Commission summarizing the compliance examinations made during the preceding six month period. n162 The Commission is obligated to supply one copy of the form to the MSRB. n163 The purpose behind this rule is to provide a mechanism for a continuous source of current information to the MSRB so that it could determine the need for additional rulemaking. n164

The information supplied to the MSRB on the form must include the following:

- the report period; n165
- the number of examinations that formed the basis of the report and, of these examinations, the

number that were routine, special, and financial/operational; n166

- with respect to a bank agency, the number of examinations that formed the basis of the report of bank dealers and the number of examinations of separately identifiable departments or divisions of banks effecting municipal securities transactions; n167

- indications of the violations of each MSRB rule found in examinations that formed the basis for the report; n168

- any comments concerning any questionable practices relating to municipal securities activities, whether or not covered by provisions of the Exchange Act and the rules and regulations thereunder, including the rules of the MSRB; n169

- descriptions of any significant or recurring customer complaints relating to municipal securities activities they received during the report period or by municipal securities dealers during the 12 month period preceding the examination; n170

- description of any novel issues or interpretations arising under the rules of the MSRB; n171

- description of any changes to existing rules of the MSRB or additional rules that would improve the regulatory scheme for municipal securities professionals or assist in the enforcement of the MSRB's rules. n172

Copies of any examination reports and separate forms furnished to the Commission by each appropriate regulatory agency and the FINRA must be maintained in a nonpublic file. n173

[7] Yield Burning

In 1998, the SEC increased its efforts to eliminate the illegal practice of "yield burning." Yield burning occurs when an open-market dealer of Treasury securities sells the securities to municipal bond issuers at above-market prices. The dealer then keeps the difference between the actual price and the market-price as profit according to the SEC. *Rule 10b-5* of the Federal Securities Exchange Act of 1934 prohibits securities fraud. In selling securities at above-market prices, the dealer violates *Rule 10b-5*. Under the *Internal Revenue Code 1.148-5*, if the yield of the Treasury securities at market price exceeds the yield of the bonds, the municipal bond issuers must refund the excess profit to the federal government. Consequently, dealers have engaged in yield burning so that they may keep the profit. While the bond issuers get the same net yield on the securities regardless of who retains the profit, if the securities are excessively marked up, the IRS may determine that the bonds for which the securities were purchased do not qualify for tax-exempt status.

During the first half of 1998, the SEC instituted three major actions against dealers accused of yield burning. In the first matter, filed in federal court in Arizona in January 1998, the SEC charged Dain Rauscher Inc., Rauscher Pierce Refsnes, Inc. and certain officers the companies with making a "secret" and unreasonable profit in connection with the sale of Treasury securities to the State of Arizona. Among the central issues in this case are how a fair mark-up is determined and what level of scienter with respect to the alleged unreasonableness of the mark-up is required in order to assign liability to a dealer. An initial motion to dismiss was denied in August 1998. The case was settled in April 2000. Rauscher paid \$13 million in disgorgement, a \$100,000 fine and agreed to cease and desist from future yield burning practices. n174

In April 1998, the SEC instituted proceedings against Meridian Securities and its successor, CoreStates Capital Markets for adding excessive mark-ups to Treasury securities being sold to municipalities in Pennsylvania and West Virginia.

The case was settled for \$3.8 million shortly after the proceedings had begun. In June 1998, the City of New Orleans initiated a yield burning complaint against Smith Barney, Inc. and BT Alex Brown, Inc. Notably, unlike the Rauscher and CoreStates complaints, this case was initiated by the municipality and not the SEC. New Orleans opened its investigation of the transactions after the SEC subpoenaed records from the city and the IRS determined that Smith Barney and Alex Brown had excessively marked up the securities. Other enforcement actions were settled in 1999, including actions against BT Alex Brown, Lazard Freres JMS Associates and individual investment bankers. On April 6, 2000 the SEC also announced global settlements with seventeen firms involving payments of nearly \$150,000,000. n175 Another global settlement with eight municipal firms occurred in August, 2000, leaving only a few remaining actions.

FOOTNOTES:

(n1)Footnote 1. S. Rep. No. 75, 94th Cong., 1st Sess. 45 (1975), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

(n2)Footnote 2. The Senate Banking, Housing and Urban Affairs Committee summarized the need for legislation in its legislative report:

The Committee feels that the lack of federal regulation governing the qualifications and conduct of municipal securities professionals, and the trading market for municipal securities, has encouraged the proliferation of fraudulent trading practices resulting in substantial losses to public investors ... Fraud actions against municipal securities professionals during the last four years reveal that unwary investors are often exposed to sharp and illegal practices. During that period the Commission brought seven injunctive actions, involving over 72 defendants, to halt fraudulent municipal securities trading practices. Perusal of the commission's complaints in these actions (summarized in Commission Litigation Release Nos. 5583 and 5584 (Oct. 26, 1972), 6005 (Aug. 2, 1973), 6032 (Aug. 22, 1973), 6451 (July 24, 1974), 6575 (Nov. 6, 1974), and 6733 (Feb. 13, 1975)) reveals a disturbing pattern of professional misconduct by a significant number of broker-dealers. This pattern is characterized by unconscionable markups, churning of customers' accounts, misrepresentations concerning the nature and value of municipal securities, disregard of suitability standards, and scandalous high-pressure sales techniques. The selling practices of these firms involved all the characteristics of the classic "boiler room" operation. These practices are intended to induce hasty investment decisions with respect to securities unfamiliar to potential customers. Furthermore, it appears that certain firms exerted extraordinary pressures on their salesmen to increase sales without regard to the welfare of the firm's customers. In some instances, bonds have been promoted as general obligations of the issuer whereas, in fact, they have been revenue bonds, sometimes in default.

S. Rep. No. 75, 94th Cong., 1st Sess. 38, 43 (1975).

(n3)Footnote 3. *See* S. Rep. No. 75, 94th Cong., 1st Sess. 44-45 (1975). A unique quality of municipal securities is their tax-free nature; interest on municipal securities is not subject to federal income tax. Unlike corporate securities that are relatively homogeneous within major categories (*e.g.*, common stocks, preferred stocks, debentures, or warrants), municipal bonds constitute a highly individualized type of securities. S. Rep. No. 75, 94th Cong., 1st Sess. 38 (1975).

The term "municipal bonds" embraces a multi-faceted, complex array of state and local public debt, including securities that are general obligations of the issuer, backed by the "full faith and credit" of the issuing government to the extent of its powers of taxation; revenue bonds, payment of which is secured only by funds generated by use of the facility financed by the proceeds of the bond issue; or special assessment and industrial revenue bonds. *Id.*

(n18)Footnote 18. *Id.*

(n19)Footnote 19. Section 3(a)(30)(A).

(n20)Footnote 20. Section 3(a)(30)(B).

(n21)Footnote 21. Section 3(a)(31).

(n22)Footnote 22. Section 3(a)(32). The category "person associated with a municipal securities dealer" in Section 3(a)(32) added by the 1975 Amendments, is subject to the Commission's disciplinary sanctions. S. Rep. No. 75, 94th Cong., 1st Sess. 45 (1975), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

(n23)Footnote 23. S. Rep. No. 75, 94th Cong., 1st Sess. 38, 39 (1975). As of 1975, approximately four times as

many nonbanks were engaged in municipal securities business as there were banks. *Id. at 39*. Prior to 1960, individuals were the largest identifiable portion of purchasers of municipal securities. Other principal purchasers were commercial banks and fire and casualty companies. Since 1960, commercial banks have replaced individuals as the biggest purchasers of municipal bonds. *Id. at 41*. Between 1960 and 1974, the dollar amount of municipal securities outstanding grew from \$70.8 billion to \$207 billion. Of the total bonds outstanding in 1974, households owned approximately \$62.3 billion while commercial banks owned \$99.8 billion. *Id.*

(n24)Footnote 24. *Id. at 42*.

(n25)Footnote 25. *Id.*

(n26)Footnote 26. *Id. at 42-43 (1975)*. Rules adopted pursuant to Section 15(c)(1) have always applied to municipal securities transactions effected by brokers and dealers (but not by banks or their separately identifiable departments or divisions acting as dealers), since Section 15(c)(1) does not (and did not prior to 1975) expressly exclude transactions in exempted securities, as do Section 15(c)(2), which prohibits brokers and dealers from engaging in fraudulent, deceptive or manipulative acts or practices or making of fictitious quotations, and Section 15(c)(3), which precludes brokers and dealers from acting in violation of Commission rules and regulations regarding financial responsibility and related practices. *See Ch. 6 infra*. The rules under the Securities Exchange Act of 1934 are reprinted in the Primary Law Sourcebook, Volume B, Section G (Matthew Bender).

Prior to 1975, Commission rules under Section 15(c)(1) could not reach the conduct of banks that were municipal securities dealers because they were specifically exempted from the Exchange Act's definitions of broker or dealer. S. Rep. No. 75, 94th Cong., 1st Sess. 43 (1975).

(n27)Footnote 27. *Id.*

(n28)Footnote 28. *Id. at 43*.

(n32)Footnote 32. S. Rep. No. 75, 94th Cong., 1st Sess. 43 (1975).

(n33)Footnote 33. Section 3(a)(12) was amended, effective December 1, 1975, to provide, *inter alia*, that municipal securities shall not be deemed to be "exempted securities" for purposes of certain sections of the Act.

(n34)Footnote 34. Brokers and dealers already registered with the Commission because of their general securities business were not required to re-register. S. Rep. No. 75, 94th Cong., 1st Sess. 45 (1975).

(n35)Footnote 35. The result of the 1975 Amendments was to create certain areas in which the MSRB and the Commission have concurrent jurisdiction over municipal securities activities. The MSRB, however, is intended to be the primary medium for regulating the municipal securities industry and the Commission is required to give the MSRB ample opportunity to develop responsible rules for the industry. S. Rep. No. 75, 94th Cong., 1st Sess. 48 (1975).

(n36)Footnote 36. The 1975 Amendments expanded the Commission's rulemaking authority under Sections 15(c)(1) and (2) with respect to municipal securities professionals and transactions in municipal securities. S. Rep. No. 75, 94th Cong., 1st Sess. 50 (1975).

(n37)Footnote 37. Section 17(a), as amended in 1975, subjects the Municipal Securities Rulemaking Board and registered municipal securities dealers to the recordkeeping and reporting requirements already applicable to securities exchanges, members, brokers, dealers, and securities associations. Records of the MSRB and municipal securities dealers are subject to periodic, special, and other examinations by the Commission and, in the case of municipal securities dealers for whom the Commission is not the appropriate regulatory agency, such as banks, by the appropriate federal regulatory agency. Where the Commission is not the appropriate regulatory agency, it must give notice to and consult with the other agency prior to a proposed Commission examination to avoid unnecessary regulatory duplication or undue regulatory burdens. The requirement of prior consultation, however, does not in any way impair the power of the Commission to examine any municipal securities dealer. Section 17(b).

Municipal securities dealers for whom the Commission is not the appropriate regulatory agency must file with the appropriate regulatory agency for such municipal securities dealer applications, notices, proposals, reports, or documents filed with the Commission by reason of being a municipal securities dealer; and file with the Commission similar documents filed with the appropriate regulatory agency by reason of being a municipal securities dealer. Section 17(c)(1).

Section 17(c)(1) requires the Municipal Securities Rulemaking Board to file with the Comptroller of the Currency, the Federal Reserve Board, and the Federal Deposit Insurance Corporation (FDIC) (*i.e.*, the "appropriate regulatory agencies" for municipal securities dealers as enumerated in Section 3(a)(34)(A)) copies of every proposed rule change filed with the Commission under Section 19(b) of the Exchange Act.

The Comptroller of the Currency (in the case of national banks or banks operating under the Code of Law for the District of Columbia), the Federal Reserve Board, and the FDIC are the appropriate regulatory agencies for municipal securities dealers that are banks or separately identifiable departments or divisions of banks regulated by those agencies. The Commission is the appropriate regulatory agency for municipal securities brokers and the remaining municipal securities dealers (non-banks). Section 3(a)(34)(A).

The appropriate regulatory agency for a municipal securities dealer must file with the Commission a notice of the commencement of proceedings and a copy of any order entered against the municipal securities dealer. Section 17(c)(2). If the Commission initiates a proceeding against a municipal securities dealer for whom it is not the appropriate regulatory agency, the Commission, in turn, must file the prescribed notice with and transmit a copy of any order entered in connection therewith to the appropriate regulatory agency. *Id.*

The Commission and the appropriate regulatory agency must notify the other of, make a report of, and, upon request, furnish to the other a copy of the report of, any examination conducted by either of the municipal securities dealer and any data received concerning the examination. Section 17(c)(3).

(n38)Footnote 38. Municipal securities are no longer "exempted securities" for this purpose under Section 3(a)(12) of the Exchange Act.

The 1975 Amendments amended Section 15(c)(3) to require the Commission to establish minimum financial responsibility requirements for *all* brokers and dealers not later than September 1, 1975. While subjecting brokers and dealers who effect transactions in municipal securities to Commission financial responsibility regulation, Congress realized that the unique structure of the municipal securities industry may require regulation different from that applicable to other members of the securities industry. In particular, Congress cautioned that "it may not be appropriate to apply the existing net capital rules to firms that are solely brokers in municipal securities, whose only customers are

professional securities dealers and banks. The limited risks in this form of business may justify less stringent rules without danger to the public." S. Rep. No. 75, 94th Cong., 1st Sess. 48 (1975).

(n39)Footnote 39. Banks are not normally brokers or dealers under the Exchange Act.

(n40)Footnote 40. The application of Rule 15c2-4, providing significant protections to issuers and purchasers in "best-efforts" and "all-or-none" offerings, to bank municipal securities dealers was announced in Exch. Act Rel. No. 34-12,468, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,544 (May 20, 1976).

(n58)Footnote 58. Rule 15B(a)(2)-1(c). Section 32(a) prescribes criminal penalties for willful violations of the Exchange Act, including willfully and knowingly making a false or misleading statement of a material fact in a report required to be filed under the Exchange Act or the rules and regulations thereunder.

(n59)Footnote 59. Exch. Act Rel. No. 34-11,742, [1976-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,312 (Oct 15, 1975).

Subsidiaries of banks and of bank holding companies that are dealers in municipal securities meet the definition of a "dealer" under Section 3(a)(5) and are subject to Rules 15b1-1 and 15b1-2. Note that a non-bank municipal securities dealer that registers under Section 15 automatically becomes subject to assessments by the SIPC.

(n60)Footnote 60. Municipal securities brokers must register under Section 12 on Form BD. Form BD, the standard registration form for brokers and dealers is discussed at § 3.03[2][a] *supra*.

(n61)Footnote 61. Rule 15B(a)(2)-2(b) requires each applicant to file with the application for registration the statements listed in paragraphs (a) through (d) of Rule 15b1-2. The statements of financial condition and intrastate dealer status are deemed part of the application for registration. Rule 15Ba2-2(b). Amendments to the application must be made on Form BD. Rule 15Ba2-2(c). Amendments must constitute a report within the meaning of Sections 17 and 32(a) of the Act. Rule 15Ba2-2(d).

Persons associated with non-bank municipal securities dealers are subject to Commission control pursuant to Section 3(a)(18) defining "persons associated with a broker or dealer."

(n126)Footnote 126. Members currently serve terms lasting three years.

(n127)Footnote 127. *Id.* The selection of the initial membership of the MSRB was announced in Exch. Act Rel.

No. 34-11,635, [1974-1975 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,291 (Sept 5, 1975).

(n128)Footnote 128. Section 15B(b)(1). This section permits a person under common control with, or indirectly controlling, a broker, dealer or municipal securities dealer to be a public member. Rule A-3(a)(i)-(iii), MSRB Manual (CCH) P 3011.

Two closely related principles guided the Committee on Banking, Housing and Urban Affairs in establishing the MSRB:

The first principle, emanating from the legislative background of the Maloney Act of 1938, is that of a democratic organization. ... The second principle is what has been customarily called the "businessperson's judgment." The need to raise the level of conduct in the municipal securities business to a highly professionalized plane can, in the Committee's view, best be met through ethical standards adopted by individuals actually engaged in the business rather than through rigid proscriptions imposed by "outsiders." S. Rep. No. 75, 94th Cong., 1st Sess. 46 (1975).

(n129)Footnote 129. MSRB Rule A-2, MSRB Manual (CCH) P 3006.

(n130)Footnote 130. Rule A-3(c)(i), MSRB Manual (CCH) P 3011.

(n131)Footnote 131. S. Rep. No. 75, 94th Cong., 1st Sess. 47 (1975). See MSRB Rule G-16, MSRB Manual (CCH) P 3576.

(n132)Footnote 132. Section 15B(b)(2) of the Exchange Act.

(n133)Footnote 133. Section 15B(b)(2)(A). See MSRB Rule G-3, MSRB Manual (CCH) P 3511 which, *inter alia*, requires qualification of and prescribes examinations for Municipal Securities Principals and Representatives and Financial Operations Principals.

The MSRB may classify municipal securities dealers, to establish qualifications standards under Section 15B(b)(2)(A), by types of business done, nature of securities other than municipal securities sold, and character of business organization. Section 15B(b)(A)(i). The MSRB may also classify municipal securities brokers and persons associated with municipal securities brokers and municipal securities dealers; specify what standard is applicable to any class; require entry standards, including tests for persons in any class; and require that persons in any class other than municipal securities brokers, municipal securities dealers and partners, officers, and supervisory employees thereof be qualified solely on the basis of compliance with the standards of training and such other qualifications as the MSRB finds appropriate. Section 15B(b)(2)(A)(i)-(iv). The MSRB has interpreted Rule G-3 to prohibit solicitation of orders by clerical or other personnel (including appointees) not qualified as Municipal Securities Principals to solicit public customers. MSRB Manual (CCH) P 3511 at 3509-2-3509-3.

(n134)Footnote 134. Section 15B(b)(2)(B). See MSRB Rule A-3(c), MSRB Manual (CCH) P 3011.

The MSRB rules may specify that term members may serve or provide for an increase in the number of members constituting the entire MSRB membership, provided the total number is an odd number. Section 15B(b)(2)(B).

(n135)Footnote 135. Section 15B(b)(2)(C). See MSRB Rule G-12, MSRB Manual (CCH) P 3556, prescribing uniform practices with respect to settlements, confirmations, comparisons, delivery of securities, and other business dealings. See also MSRB Rule G-2B, MSRB Manual (CCH) P 3611, governing performance of financial advisory services by municipal securities dealers.

See The MSRB's fair practice rules, MSRB Rules G-13, and G-17 through G-33, MSRB Manual (CCH) PP 3561,

3581-3661. *See also* MSRB Manual (CCH) P 10,030.

(n136)Footnote 136. *Id.*

(n137)Footnote 137. *Id.*

(n138)Footnote 138. Section 15B(b)(2)(E).

See MSRB Rule G-16, MSRB Manual (CCH) P 3576, which provides for an examination of each municipal securities broker and municipal securities dealer at least once every 2 years by the FINRA or the appropriate regulatory agency in accordance with Section 15B(c)(7).

(n139)Footnote 139. Section 15B(b)(2)(F). *See* MSRB Rule G-13, MSRB Manual (CCH) P 3561. The MSRB rules relating to quotations are designed to produce fair and informative quotations, prevent fictitious or misleading quotations, and promote orderly procedures for collecting, distributing and publishing quotations. Section 15B(b)(2)(F).

(n140)Footnote 140. *Id.*

(n141)Footnote 141. This requirement includes the periods during which the records must be preserved. Section 15B(b)(2)(G).

See MSRB Rule G-8, MSRB Manual (CCH) P 3536 (what records must be made); Rule G-9, MSRB Manual (CCH) P 3541 (preservation of records).

Municipal securities brokers and municipal securities dealers that are *not* banks and are in compliance with Rules 17a-3 and 17a-4 are deemed in compliance with MSRB Rules G-8 and G-9. MSRB Rule G-8(f) (with the proviso that certain information concerning customers and syndicate transactions be maintained in any event); MSRB Rule G-9(g).

Municipal securities brokers and dealers that comply with MSRB Rules G-8 and G-9 in connection with transactions in municipal securities are deemed in compliance with the Commission's recordkeeping and record preservation requirements. *See* Rules 17a-3(e) and Rule 17a-4(h).

Registered municipal securities dealers that are banks satisfy the recordkeeping and record preservation requirements to which they are subject under Section 17(a) by complying with MSRB Rules G-8 and G-9. A municipal securities broker is required to designate one or more qualified principals as responsible for the recordkeeping required by Rules G-8 and G-9, MSRB Rule G-10, MSRB Manual (CCH) P 3546.

(n142)Footnote 142. Section 15B(b)(2)(H). *See* § 3.06[1] *supra* for the MSRB Rule G-1 definition.

(n143)Footnote 143. This includes the selection of a chairperson from members of the MSRB, compensation of members, and appointment and compensation of employees, attorneys and consultants. Section 15B(b)(2)(I).

See MSRB Rules A-1-A-11, MSRB Manual (CCH) PP 3001-3051.

(n144)Footnote 144. Section 15B(b)(2)(J). *See* MSRB Rule A-14, MSRB Manual (CCH) P 3066 (annual fee); Rule A-13, MSRB Manual (CCH) P 3061 (underwriting assessment); Rule A-12, MSRB Manual (CCH) P 3056 (initial fee); Rule A-7, MSRB Manual (CCH) P 3031 (assessments for costs and expenses of MSRB operation and administration); Rule A-16, MSRB Manual (CCH) P 3077 (arbitration fees and deposits).

(n145)Footnote 145. Section 15B(b)(2)(K).

See MSRB Rule G-11, MSRB Manual (CCH) P 3551. The MSRB was given the power under Section 15B(b)(2)(K)

to adopt rules to establish the terms and conditions under which a municipal securities dealer may sell a new issue during the underwriting period to a "municipal securities investment portfolio." A municipal securities investment portfolio is defined in Section 3(a)(33) as "all municipal securities held for investment and not for sale as part of a regular business by a municipal securities dealer or by a person, directly or indirectly, controlling, controlled by, or under common control with a municipal securities dealer."

The rulemaking power granted to the MSRB by Section 15B(b)(2)(K) was designed to prevent the application of the FINRA's Board of Governors "Free-Riding and Withholding" interpretation (which prohibits the sale of a "hot issue" to an account of any member or any person associated with a member) to municipal bond offerings:

Application of this interpretation to municipal bond offerings could in certain circumstances prohibit the portfolio department of a bank which was a municipal securities dealer from buying municipal bonds being distributed during the underwriting period. Because of the significance of bank investment portfolio buying, however, the Committee believes that such a prohibition could adversely affect the ability of the municipalities to obtain the lowest possible rate of interest on their bonds.

S. Rep. No. 75, 94th Cong., 1st Sess. 49 (1975).

(n146)Footnote 146. Section 15B(b)(2)(C).

(n147)Footnote 147. Section 15B(b)(2)(C).

(n148)Footnote 148. Section 15B(b)(2)(C).

(n149)Footnote 149. Although arbitration was permitted by Rule G-35, since 1996 the MSRB has no longer maintained an arbitration forum.

(n175)Footnote 175. *See, e.g., In re* Goldman, Sachs & Co., SEC Release 42636 (April 6, 2000).

See Grandon v. Merrill Lynch & Co., Inc., No. 97cv9027, 1998 U.S. App. LEXIS 13027, at *15 (2d Cir. June 19, 1998). In *Grandon*, the court held that broker-dealers must disclose to municipal bond issuers when markups are excessive. The court further held that the issue of whether a markup is excessive must be determined on a case-by-case basis. According to the MSRB, the relevant factors include: (1) the judgment of the broker-dealer regarding the fair market value at the time of the transaction; (2) the expense involved in completing the transaction; (3) the fact that the broker-dealer is entitled to a profit; (4) "the total dollar amount of the transaction;" (5) "the availability of the security in the market;" (6) "the price or yield of the security;" and (7) "the nature of the professional's business." *Id.*

CHAPTER 3 Regulation of Brokers and Dealers

1-3 Federal Securities Exchange Act of 1934 § 3.07

AUTHOR: W. Reece Bader

§ 3.07 Government Securities Brokers and Dealers

Prior to 1986, broker-dealers who dealt only in government securities were exempt from registration under Section 15(a) of the Exchange Act. n1 After the collapse of several government securities firms in the 1980s and the resulting major losses to customers, n2 the need for regulation of government securities brokers and dealers became apparent. Since many of the government securities customers were financial institutions, these losses had a domino effect that led to an interruption of business in important segments of the economy. n3 At the same time that the need for regulation became apparent, Congress also became aware of the special nature of the government securities market, the cornerstone of U.S. fiscal and monetary policy. n4

The size of the government securities market dwarfs the market for corporate debt and equity securities. According to a House of Representatives Energy and Commerce Committee Report issued in 1985, the U.S. government securities market is the largest securities market in the world. "Through this market, the U.S. government raises more than \$200 billion of new funds each year and refinances hundreds of billions more of maturing debt, raising an average of \$4 billion a day." n5

Because of the special character of this market and its crucial importance to the economy, Congress chose not to subject government securities brokers and dealers to the same regulation as other brokers and dealers under Section 15 of the Exchange Act. Instead, it enacted the Government Securities Act of 1986 ("GSA"), n6 which added a completely new Section 15C to the Exchange Act.

Exchange Act section 3(a)(42) defines "government securities" to mean:

- (A) direct obligations of, or obligations guaranteed as to principal or interest by, the United States;
- (B) securities which are issued or guaranteed by corporations in which the United States has a direct or indirect interest and which are designated by the Secretary of the Treasury for exemption as necessary or appropriate in the public interest or for the protection of investors;
- (C) securities issued or guaranteed as to principal or interest by any corporation the securities of which

are designated, by statute specifically naming such corporation, to constitute exempt securities for purposes of the federal securities laws; and

(D) for purposes of Section 15C of the Exchange Act (with respect to registration of government securities brokers and dealers) and Section 17A (with respect to securities transfer agents and clearing agencies), n7 any put, call, straddle, option or privilege on a security described in clauses (A), (B) or (C) above, that (i) is not traded on a national securities exchange and (ii) is not one for which quotations are disseminated through an automated quotation system operated by a national securities association. n8

A "government securities broker" is defined in Exchange Act Section 3(a)(43) of the Exchange Act to include a person regularly engaged n9 in the business of effecting transactions in government securities for the account of others, but does not include:

- a corporation which is the issuer of securities described in clauses (B) and (C) of Section 3(a)(42); n10 or
- a person registered with the Commodity Futures Trading Commission ("CFTC"), any contract market designated by the CFTC, such contract market's affiliated n11 clearing organization, or any floor trader on such contract market, solely because such person effects transactions in government securities that the SEC, after consultation with the CFTC, n12 has determined by rule or order to be solely incidental to such person's futures-related business. n13

A "government securities dealer" is defined in Exchange Act Section 3(a)(44) to mean any person engaged in the business of buying and selling government securities for his own account, through a broker or otherwise, but does not include:

- any person insofar as he buys or sells such securities for his own account, either individually or in some fiduciary capacity, but not as part of a regular business;
- an issuer of government securities as defined in clauses (B) and (C) of Section 3(a)(42);
- any bank, unless the bank is engaged in the business of buying and selling government securities for its own account other than in a fiduciary capacity, through a broker or otherwise; or
- any person registered with the CFTC, any contract market designated by the CFTC, such contract market's affiliated clearing organization, or any floor trader on such contract market, solely because such person effects transactions in government securities that the Commission, after consultation with the CFTC, has determined by rule or order to be incidental to such person's futures related business.

Pursuant to the direction implicit in Section 3(a)(43)(B) and (D), the SEC consulted with the CFTC and adopted Rules 3a43-1 and 3a44-1. These rules identify activities "incidental" to futures-related business, the performance of which would not subject futures commission merchants and other persons subject to CFTC jurisdiction to registration as government securities brokers or dealers. n14

Rule 3a43-1 exempts a futures commission merchant from registering as a government securities broker or dealer, provided the futures commission merchant maintains all funds and securities involved in government securities transactions in a customer segregation account subject to the CFTC's rules. n15 In addition, the futures commission

merchant may not advertise that it is in the business of effecting government securities transactions, and the transactions in which it engages would have to be unsolicited. n16 Subject to these limitations, the following kinds of agency transactions in government securities by a futures commission merchant are deemed to be "incidental" to the futures business:

- transactions to effect delivery pursuant to a futures contract; n17
- transactions for risk reduction or arbitrage of existing or contemporaneously created positions in futures or options on futures; n18
- transactions for the investment of margin and excess funds related to futures or options on futures subject to CFTC jurisdiction which meet any of the following criteria: the transaction is in a Treasury security having a maturity at the time of the transaction of less than 93 days; n19 or the transaction generates no monetary profit for the FCM in excess of the cost of executing the transaction; n20 or the transaction is unsolicited and the total revenues of the FCM from this type of transaction do not exceed 2% of its total commission revenues. n21

In addition, Rule 3a43-1 covers transactions effected on either a principal or agency basis in which a futures commission merchant simultaneously buys (or sells) a futures contract with a customer and effects an offsetting or closing transaction with the customer in the underlying government security. n22

The SEC also adopted Rule 3a44-1 to exempt six types of principal transactions by certain CFTC regulated persons. n23 In order to come under this rule, the CFTC regulated person effecting the transactions may not advertise that it is a government securities dealer but could solicit particular transactions. n24 The categories are:

- Sale or purchase of government securities to effect delivery pursuant to a futures contract; n25
- exchange of futures for physical transactions with a CFTC-regulated person, or a registered government securities dealer, or one that has given notice to the SEC pursuant to Section 15C(a); n26
- transactions (including repurchase agreements and reverse repurchase agreements) involving segregated customer funds and securities, or funds and securities held by a clearing organization with a government securities broker or dealer which has registered or given notice under Section 15C(a) or a bank; n27
- transactions for risk reduction or arbitrage of existing or contemporaneously created positions in futures or options on futures with a registered government securities broker or dealer or one that has filed notice pursuant to Section 15C(a), or a CFTC-regulated person; n28
- repurchase and reverse repurchase agreement transactions between a futures commission merchant and another CFTC-regulated person (both acting in a proprietary capacity), and a contemporaneous offsetting transaction between the FCM and a registered government securities broker or dealer or one that has given notice pursuant to Section 15C(a), or a CFTC-regulated person acting in a proprietary capacity; n29 and
- other transactions exempted by the SEC. n30

The GSA gives the Secretary of the Treasury authority to exempt any government securities broker or dealer from

registration if the Secretary finds that such exemption is consistent with the public interest. n31 Pursuant to this authority, entities whose activities fall within one or more of the following categories have been exempted from registration under Section 15C(a)(5):

- Organizations that handle United States Savings Bond transactions; n32
- depository institutions that submit tenders for the account of customers for purchase on original issue of U.S. Treasury securities on a fully disclosed basis; n33
- financial institutions that do not hold themselves out as a government securities broker, *or* that engage in fewer than 500 solicited government securities transactions per year, *or* that engage in such transactions through "networking" arrangements with one or more government securities dealers; n34
- financial institutions that engage only in the following kinds of dealer transactions: (i) sales or purchases in a fiduciary capacity; and (ii) sales and purchases pursuant to repurchase and reverse-repurchase agreements, n35
- corporate credit unions whose only government securities dealer activities are the sale and purchase, pursuant to repurchase and reverse-repurchase agreements, of government securities to or from other credit unions; n36 and
- branches or agencies of foreign banks, if all the customers with which they do government securities transactions are foreign governments or their agencies, and other persons who are not U.S. citizens or residents or, in the case of entities, have their principal place of business outside the United States. n37

[1] Registration of Government Securities Dealers

The GSA makes it unlawful for a government securities broker or dealer to make or induce or attempt to induce a transaction in a government security unless it is a "registered broker-dealer," a "financial institution," or registered under the GSA. n38

[a] Registered Broker-Dealers. This category includes all persons registered under Sections 15 and 15B of the Exchange Act. n39 A registered broker or dealer acting as a government securities broker or dealer is required to file a written notice to this effect with the SEC, its "appropriate regulatory agency." n40 Item 13 of Form BD constitutes the required form of written notice from registered broker-dealers. n41 A registered broker-dealer that ceases to act as a government securities broker or dealer must file an amendment to Form BD giving an affirmative answer to Item 13B. n42

[b] Financial Institutions. This category of government securities brokers and government securities dealers is defined in Section 3(a)(46) to mean banks (as defined in Section 3(a)(6)), foreign banks (as such term is used in the International Banking Act of 1978), and savings associations (as defined in section 3(b) of the Federal Deposit Insurance Act) the deposits of which are insured by the Federal Deposit Insurance Corporation. Their respective "appropriate regulatory agencies" are defined in Section 3(a)(34)(G)(i) through (v).

Each of these financial institutions is required to file a notice on Form G-FIN when it begins acting as a government securities broker and/or dealer and Form G-FINW, when it ceases acting in this capacity. n43

[c] All Others. All other government securities brokers and government securities dealers are required to register with the SEC. n44 The procedure for registration is similar to registration under Section 15. n45 Form BD is the required form of application. n46 Within 45 days of the filing of the application, the SEC must grant registration or institute proceedings to determine whether registration should be denied. The proceedings must be concluded within

120 days of filing the application for registration (subject to a 90-day extension for good cause). n47

The provisions of Rule 15Ca2-3, which establishes procedures for registration of a successor to a government securities broker or dealer, are substantially identical with the provisions of Rule 15b1-3 which relates to successors to registered broker-dealers. n48 Rule 15Ca2-4, which establishes procedures for the registration of a fiduciary of a registered government securities broker, is substantially identical to Rule 15b1-4. Each deems the registration of the type of person in question to be the registration of any executor, administrator, guardian, conservator, assignee for the benefit of creditors, receiver, trustee in insolvency or bankruptcy, or other duly appointed fiduciary for such person, provided the fiduciary files a Form BD with the SEC within 30 days after entering upon the performance of its duties. Rule 15Ca2-5 requires a consent to service of process by any nonresident government securities broker or dealer and is substantially identical with Rule 15b1-5 which is applicable to nonresident broker-dealers registered under Section 15. Rule 15Cc1-1 prescribes the filing of Form BDW n49 for withdrawal from registration as a government securities broker or dealer.

[2] Suspension, Revocation and Cancellation of Registration

The SEC is given authority to censure, limit the activities of, suspend for up to 12 months, or revoke the registration of a government securities broker or dealer that is required to register under Section 15C(a)(1)(A), if the SEC finds that the government securities broker or dealer, or any person associated with it: n50

- has willfully made or caused to be made a false or misleading statement, or omitted any material fact required to be stated, in an application or report required to be filed with the SEC or any other appropriate regulatory agency, or in any proceeding before the SEC with respect to registration; n51

- has been convicted of any felony, misdemeanor or a substantially equivalent crime within 10 years which the SEC finds involves the purchase or sale of any security, the taking of a false oath, the making of a false report, bribery, perjury, burglary, or conspiracy to commit any of the foregoing offenses; or arises out of the conduct of the business of a broker, dealer, municipal securities dealer, government securities broker, government securities dealer, investment advisor, bank, insurance company, fiduciary, or any entity registered under the CEA; involves the larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; or involves violation of federal wire or mail fraud statutes (§§ 152, 1341, 1342 or 1343, or ch. 25 or 47 of 18 U.S.C.); n52

- is permanently or temporarily enjoined from acting as an investment advisor, underwriter, broker, dealer, entity or person (or as an employee thereof) required to be registered under the CEA, municipal securities dealer, government securities dealer or government securities broker; or as an employee or affiliated person of any investment company, bank, or insurance company; or from engaging in any conduct or practice in connection with any such activity or in connection with the purchase or sale of any security; n53

- has willfully violated, or is unable to comply with, any provision of the Securities Act of 1933, the Investment Advisors Act of 1940, the Investment Company Act of 1940, the CEA, the Exchange Act, or the rules and regulations under any of such statutes, or the rules of the MSRB, n54 or has aided or abetted, or failed to reasonably supervise another person who is subject to his or her supervision and who commits such violations; n55

- is subject to an order of the SEC entered pursuant to Section 15(b)(6); n56 or

- has been found by a foreign financial regulatory authority to have filed a false or misleading statement in a registration report; violated any foreign statute or regulation regarding transactions in

securities; or aided or abetted, or failed to reasonably supervise another person who commits such violations. n57

The SEC can also impose sanctions directly upon, or limit the activities of, persons associated, or seeking to become associated, with a government securities broker or dealer on the same grounds as it can base an action against the government securities broker or dealer. n58 The government securities broker or dealer is prohibited from employing or being associated with such disqualified persons without the approval of the appropriate regulatory agency. n59

Financial institutions and brokers and dealers registered under Sections 15 and 15B, but not required to be registered under Section 15C(a)(1)(A), and their associated persons, are subject to the same sanctions described above. However, in each case, the appropriate regulatory agency (which, in the case of financial institutions is not the SEC) is authorized to make the appropriate findings and impose the sanctions. n60 In addition, such appropriate regulatory agencies may, where applicable, enforce the provisions of the GSA under Section 8 of the Federal Deposit Insurance Act, n61 Section 5 of the Home Owners' Loan Act of 1933, n62 or Section 407 of the National Housing Act. n63

The SEC has focused increased attention on violative activities affecting the government securities market. In an action against Salomon, Inc., the SEC claimed that Salomon repeatedly submitted false bids in auctions for U.S. Treasury securities, allowing Salomon to circumvent U.S. Treasury Department limitations on obtaining such securities. n64 Salomon consented to the entry of an order requiring it to pay \$290 million and enjoining it from submitting these false bids.

Related administrative proceedings were also instituted against Salomon Brothers, Inc. n65 and three senior members of management of Salomon Brothers, Inc. including its chairman and CEO and its General Counsel. n66 The Commission alleged that senior management was aware that a managing director of the firm had submitted a false bid in an auction of U.S. Treasury securities and took no action to investigate the matter or to discipline the managing director. The defendants consented to an entry of an order barring the former chairman and chief executive officer from holding the positions of chairman or chief executive officer with any regulated entity and suspending the other two executives for a period of three to six months. All three executives were required to pay civil penalties.

[3] Relationships among Regulators under the Government Securities Act

The legislative process that led to the passage of the GSA involved consideration of various alternatives about which existing, or possibly newly created, agencies should have authority to implement the new statute. n67 These debates were heightened by the fact that many entities governed by the new law were already subject to regulation by one or more government agencies with wide-ranging goals, such as the safety and soundness of the banking system, the effectuation of federal fiscal and monetary policies, the financing of public debt, the protection of customers and depositors, and, to the extent that foreign financial institutions are affected, international economic policy. The resolution of this debate is reflected in several provisions of the GSA that divide or limit roles of various agencies.

The Secretary of the Treasury has the authority to create exemptions from the GSA for particular government securities brokers and government securities dealers or classes thereof. n68 The Secretary also has plenary rulemaking authority under the GSA, subject only to the duty to consult with and consider the views of the SEC and the Board of Governors of the Federal Reserve System, except in emergency situations. n69 Moreover, the SEC does not have authority to interfere with the enforcement of the GSA with respect to entities for which it is not the appropriate regulatory authority, although it continues to have authority to enforce other provisions of the federal securities laws against such entities. n70 Under regulations adopted by the Secretary of the Treasury governing interpretation of the GSA, the Department of the Treasury retains authority to enforce, interpret and grant exemptions, but interpretations by the SEC and its staff, including no-action positions, and by the other designated examining authorities, of SEC regulations adopted by reference in the Treasury's regulations, are given the same weight as interpretations of regulations that are solely those of the SEC. However, if the Treasury issues a contradictory interpretation it "understands that the

Commission will give that interpretation appropriate deference." n71

Finally, those government securities brokers and government securities dealers that are required to register with the SEC under Section 15C(a)(1)(A) are, like broker-dealers registered under Section 15, n72 required to be members of a national securities exchange or a national securities association registered under Section 15A. n73 The only national securities association registered under Section 15A is the FINRA. n74

Effective June 5, 1987, the FINRA amended Article III, Section 35(c) of its Rules of Fair Practice to extend certain of its requirements with respect to filing and review of advertisements to government securities. n75 In addition, Form U-4, the personnel form required to be filed by members of the FINRA or associated persons of such broker-dealers, has been amended to be used for applications for registration of a Government Securities Representative or Government Securities Principal. n76 No examination is required in connection with these registrations. All member firms, whether registered with the SEC under Section 15 or Section 15C, that act as brokers or dealers in government securities, are required to file Form BD. n77

[4] Capital Requirements
