The SEC has adopted special disclosure requirements for mark-ups and mark-downs on penny stock transactions. n24 Section 15(g) of the Exchange Act and the rules promulgated thereunder provide the basis for the disclosure requirements applicable to low-priced securities that have been the source of much fraudulent activity. Generally, Rule 15g-3 requires broker-dealers to make certain disclosures to customers regarding quotations and other pricing information relating to the penny stock market. n25 These disclosures must be made both at or before the time of a penny stock transaction and at or before the time that a written confirmation is sent or provided to the customer. Rule 15g-4 generally requires broker-dealers to disclose the compensation they receive in connection with the execution of the penny stock transaction. "Compensation" is defined to include mark-ups that the broker-dealer receives in connection with a principal transaction. n26 Due to the complex definition of penny stock and the numerous transaction exemptions, any questionable transaction needs to be evaluated to determine if such requirements are applicable.

[c] Liability for Failure to Supervise

Section 15(b)(4)(E) of the Exchange Act provides for the imposition of sanctions on a person who has:

[F]ailed reasonably to supervise, with a view to preventing violations of the provisions of such statutes, rules, and regulations, another person who commits such a violation, if such other person is subject to his supervision. n27

Under section 15(b)(4)(E), the SEC may bring actions against broker-dealers for failure to supervise for excessive mark-ups. For example, in *In re W.J. Nolan & Co.*, the SEC sanctioned a broker-dealer and its Chief Executive Officer

(CEO) for, among other things, failing to reasonably supervise the firm's registered representatives with a view to preventing mark-up violations. n28 In its order, the SEC found that the broker-dealer's registered representatives charged excessive mark-ups. n29

Furthermore, firms are required to have procedures in place, even for securities that trade off computerized terminals, which identify personnel entrusted with determining the total mark-up charged the customer based upon prevailing market price, the appropriate range of mark-ups, and the facts to be weighed for each transaction. n30

[3] Guidelines for Determining Whether a Mark-Up Is "Excessive"

[a] General Principles

The determination of whether a mark-up is "excessive" must be conducted on a case-by-case basis. n31 Indeed, a broker-dealer's failure to perform this determination on a case-by-case basis, focusing on the particular facts of a situation, may result in sanctions. n32 In calculating the mark-ups relating to a single customer, individual transactions are probative of the mark-ups, not the average mark-up per customer. n33 In this regard, the fact that a broker-dealer lost money on other transactions for the same clients or that some of the mark-ups paid the firm's costs in other transactions does not justify an excessive mark-up in any one transaction. n34 Furthermore, unreasonable mark-ups may not be justified by excessive expenses or "extraordinary retail sales efforts." n35 In the context of equity securities, the SEC consistently has held that mark-ups in excess of 10% over the prevailing market price are, absent disclosure, fraudulent per se. n36 In certain circumstances, however, mark-ups less than 10% or 5% are unreasonable and mark-ups greater than these figures may be reasonable (for example, a minimum ticket charge). A broker-dealer always has the right to produce evidence to demonstrate that unusual circumstances may justify mark-ups that are higher than ordinarily accepted. n37

[b] Mark-Ups on Equity Securities

As stated above, the SEC and courts consistently have held that, at the least, mark-ups in excess of 10% over the prevailing market price are, absent disclosure, fraudulent per se in the sale of equity securities. n38 Under SRO Mark-Up Policy, mark-ups for equity securities greater than 5% above the prevailing market price are presumed to be unreasonable and thus violative of NASD rules. n39 For certain low-priced securities (that is, penny stocks), the SEC has permitted mark-ups higher than 5%, but the 10% ceiling applies to low-priced securities as well. n40 Therefore, while the SEC and the NASD have been willing to set a ceiling for mark-ups, they have refused to set a floor, below which a mark-up can never be found excessive. n41 There is no safe harbor for mark-ups below 5%.

[c] Mark-Ups on Debt Securities

The SEC and courts consistently have found that mark-ups on debt securities, including municipal securities, generally are expected to be lower than mark-ups on equity securities. n42 SRO Mark-Up Policy, NASD IM-2440-1, states that mark-ups on debt securities usually will be smaller than those on equity securities: "[A] higher percentage of mark-up customarily applies to a common stock transaction than to a bond transaction of the same size." n43

The SEC and SROs rely on both quantitative and qualitative standards when assessing mark-ups on debt securities. Particularly when debt securities are involved, not only may mark-ups over 5% be subject to sanction, mark-ups under 5% may also be subject to sanction in certain circumstances. n44 Nevertheless, some courts have been willing to recognize a limit on the percentage amount of a mark-up that is excessive. The Second Circuit in *Press v. Chemical Investment Services Corp.*, affirmed a lower court summary judgment dismissal on the grounds that the mark-ups involved (1/6 of 1% on six-month straight Treasury bills) were *not excessive as a matter of law*. n45

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.05

§ 5C.05 Frontrunning, Interpositioning, and Trading Ahead

This section describes the potential for certain trading violations--which are regulated most closely by the SROs--to give rise to private claims under the Exchange Act. Private claims, however, rarely are made pursuant to the Exchange Act based on conduct that allegedly constitutes frontrunning, trading ahead of customer orders, interpositioning, or trading ahead of research. Rather, plaintiffs may be more likely to pursue other remedies--such as those stemming from a broker-dealer's agency obligations under state law.

[1] Frontrunning

The SEC relies primarily on the SROs to enforce the prohibition on frontrunning. As a general matter, the SROs define "frontrunning," which they consider inconsistent with just and equitable principles of trade, as "the practice of trading a security while in possession of material, non-public information regarding an imminent block transaction in the same or a related security." n1

Notwithstanding this reliance on the SROs to promulgate and enforce rules against frontrunning, the SEC also has indicated that, in some instances, frontrunning may constitute insider trading in violation of Section 10(b) of the Exchange Act and *Rule 10b-5*. In adopting Rules 10b5-1 and 10b5-2, the SEC commented that *Rule 10b-5* could be implicated if a broker-dealer trades for its own account while in possession of "unusually significant information regarding a customer order." n2 In this context, the SEC provided the following analysis of how the misappropriation theory may apply in this situation:

We believe that ordinary market making does not present insider trading concerns if a customer who places an order with a broker-dealer has an understanding that the broker-dealer may continue to engage in market making while working the order. Thus, a broker-dealer's ordinary market making would not be considered a "misappropriation" of the customer's information because it would not involve trading on the basis of the information in a manner inconsistent with the purpose for which it was given to the broker. *If, however, a broker-dealer engaged in extraordinary trading for its own account when aware of unusually significant information regarding a customer order, it is possible, based on the facts and circumstances, that the broker-dealer would be held liable for insider trading or for front-running as defined by SRO rules.* n3

[a] Possession of Material Non-Public Information

To prevail on a *Rule 10b-5* claim based on a frontrunning violation, the plaintiff would have to show that the broker-dealer traded while in possession of material non-public information. n4 Under *Rule 10b-5*, information is "material" if there is a substantial likelihood a reasonable investor would consider it important in making an investment decision. n5 Similarly, in the context of frontrunning, the SROs generally consider information to be material if it "reasonably can be expected to have an immediate, favorable impact in relation to" the transaction at issue. n6 The SROs' frontrunning policies generally apply to a customer's imminent block transaction. However, the SROs also take the position that a series of smaller transactions may be within the scope of the frontrunning prohibition, if the transactions together reasonably may be expected to have an immediate market impact. n7 In addition, frontrunning may be based upon knowledge of less than all of the terms of the block transaction, "so long as there is knowledge that all of the material terms of the transaction have been or will be agreed upon imminently." n8

A broker-dealer may limit the potential for frontrunning claims by employing information barriers to prevent persons with knowledge of material, non-public information from sharing that information with others within the broker-dealer firm. n9 The degree of information flow among persons within a firm and the timing of the relevant transactions are important aspects of the fact-specific inquiry into whether frontrunning has occurred. n10 Of course, a private plaintiff asserting a violation of *Rule 10b-5* for frontrunning also would have to prove that the broker-dealer acted with scienter. n11 An information barrier may be an important means by which a broker-dealer can show scienter was lacking.

Under the SRO rules, information about a trade is considered "publicly available" when it has been disseminated via the tape or high speed communications line of a last sale reporting system. n12 When a block transaction is executed in a series of executions, it is publicly available only when the entire transaction has been completed and publicly reported. n13

[b] Loss Causation

It may be possible for a frontrunning violation to occur under the SRO rules even if the relevant transactions do not affect the market price of the security. n14 A private plaintiff, however, would need to demonstrate loss causation in order to prevail on a *Rule 10b-5* claim. n15 Thus, the plaintiff would have to show that the broker-dealer's trading on the basis of material non-public information had an impact on the market price and caused the plaintiff to obtain an inferior price.

[c] Intermarket Frontrunning

As noted above, the SROs define frontrunning as trading a security while in possession of material non-public information regarding an imminent transaction in the "same or related" security. For example, frontrunning may involve a stock transaction while in possession of material non-public information regarding an imminent transaction in the same stock, n16 or an option transaction while in possession of such information regarding an imminent option transaction. n17

However, the SROs also have articulated a variety of other possible permutations. For example, trading an option or security future may constitute frontrunning where the relevant imminent transaction involves the underlying security, n18 or vice versa. n19 Frontrunning also may occur if a broker-dealer trades a stock index option when such broker-dealer has knowledge of an imminent transaction in a component security or securities of the index, if that transaction may affect the value of the index. n20 Trading a stock index futures contract or option on a stock index future may cause a violation where the broker-dealer knows of an imminent stock program transaction, or vice versa. n21 Under the Exchange Act, liability for trading a security while in possession of material non-public information also applies to the same conduct involving trading "a put, call, straddle, option, privilege or security-based swap agreement (as defined in section 206B of the Gramm-Leach-Bliley Act) with respect to such security or with respect to a group or index of securities including such security." n22

[2] Trading Ahead of Customer Orders

A broker-dealer may be liable to a customer for trading ahead of the customer's order. Trading ahead, which is prohibited by SRO rules, occurs when a broker-dealer trades for its own account with the knowledge that it holds an unexecuted customer order on the same side of the market that could be executed at the same price. n23 Certain exceptions apply to this general prohibition. n24 This conduct may violate *Rule 10b-5*. n25 Unlike frontrunning, trading ahead does not necessarily involve a customer order that is expected to have a material impact on the market price of the security. Rather, the violation arises out of the broker-dealer's obligation, as the customer's agent, to disclose information the broker-dealer possesses that is relevant to execution of its agency obligation. If the broker-dealer fails to disclose that it will violate its duty of loyalty and trade for its own account prior to executing the customer's trade, it may be withholding information material to the customer's decision to enter into the transaction. n26 Thus, a customer could have a claim against a broker-dealer that trades ahead of the customer's order, and the remedy typically would be the amount of price advantage obtained by the broker-dealer.

Under applicable FINRA policy regarding trading ahead, desks that trade only for proprietary accounts may trade even when the broker-dealer holds customer orders for the same securities, provided the broker-dealer has in place adequate information barriers to prevent the proprietary trading desks from having knowledge of customer orders. n27 The corresponding NYSE rule also allows broker-dealers that implement appropriate procedures to avoid a presumption that the person entering the proprietary trade knew of a customer order. n28 Similarly, adequate information barriers would negate the scienter necessary to maintain a 10b-5 claim.

[3] Interpositioning

Interpositioning, which the SROs consider conduct inconsistent with just and equitable principles of trade, refers to the practice of trading as principal with two customer agency orders (one to buy and one to sell) that should have been matched. By positioning itself between the two orders, the broker-dealer takes additional profit from the trades, while each customer receives a less favorable price than if the orders had been matched.

Interpositioning also may be challenged as fraud under *Rule 10b-5*. n29 For example, in settlements with broker-dealer specialist firms for alleged conduct involving trading ahead and interpositioning, the SEC and the NYSE asserted that individual specialists who filled certain orders by trading on a proprietary basis, rather than matching them with corresponding orders on the other side of the market, violated Section 10(b) and *Rule 10b-5*. The regulators reasoned that "certain specialists at [the broker-dealer firm] engaged in unlawful proprietary trades with *scienter*, violating their implied representations to public customers that they were limiting dealer transactions to those reasonably necessary to maintain a fair and orderly market. In those instances, individual specialists at [the firm] violated Section 10(b) of the Exchange Act and *Rule 10b-5* thereunder." n30 In contrast, the U.S. District Court for the Southern District of New York ruled in a related criminal case against an individual specialist that interpositioning did not constitute fraud without specific evidence to demonstrate that "customers were misled or defrauded or otherwise deceived." n31

According to the SEC and NYSE settlements with the specialist firms, these broker-dealers failed to reasonably supervise the specialists whose conduct violated Section 10(b) and *Rule 10b-5*. n32 The settlements did *not* state that the broker-dealer firms had violated Section 10(b) and *Rule 10b-5*.

Following the settlements, however, shareholders of a broker-dealer's parent asserted claims against one of the specialist firms, LaBranche LLC, and its parent, LaBranche & Co., as well as certain individuals, under *Rule 10b-5*. The plaintiffs argued that certain of the parent company's public filings and press releases were misleading because they failed to disclose that the broker-dealer subsidiary was engaged in interpositioning and trading ahead of customer orders in connection with its specialist operations on the New York Stock Exchange, and that the broker-dealer derived substantial profits from these impermissible trading practices. Thus, the plaintiffs alleged that the defendants' misleading statements caused the parent company's stock price to be artificially inflated. The broker-dealer subsidiary

argued that it could not be held liable for the alleged misstatements of its parent. The district court refused to dismiss the case against the subsidiary, however, reasoning that the relevant information could only have been provided by the subsidiary itself. n33 A similar lawsuit against Van der Moolen Holding NV and Van der Moolen Specialists USA, LLC, was settled in late 2006, with Van der Moolen Holding NV and its liability insurer agreeing to pay \$8 million to a proposed class of holders of the holding company's American Depositary Receipt shares. n34 A separate class action lawsuit involving similar claims is still pending against a group of broker-dealers based on their conduct as NYSE specialists, as well as certain affiliated companies. n35

[4] Trading Ahead of Research

Another problematic trading practice involves trading a security prior to issuing research about that security. This practice is sometimes referred to as trading ahead of research, and the SROs have prohibited it. n36 The practice of purchasing a security prior to recommending it, and then selling the security after the recommendation has caused the price to rise, also has been called scalping. n37

In settled charges against Banc of America Securities LLC ("BAS"), the SEC alleged that BAS failed to maintain adequate policies and procedures to prevent the misuse of material non-public information regarding the firm's research activities, as required by Exchange Act Section 15(f). n38 The settlement stated that the lack of adequate procedures resulted in at least two instances when the firm traded for its proprietary account in advance of releasing research reports about the relevant securities. n39

Although the SEC has taken the position that information relating to anticipated upgrades or downgrades of securities may be material non-public information, n40 it may be difficult for an investor who claims injury as a result of a broker-dealer's trading on research information before its dissemination to demonstrate that the broker-dealer misappropriated its own research information in violation of *Rule 10b-5*. n41 If, however, a broker-dealer issued misleading research with the intent of affecting the value of the subject securities, a subsequent purchaser of the recommended securities may have a 10b-5 claim based on the misrepresentation in the research report. n42 Moreover, if a broker-dealer issuing the research has a proprietary position in the security that is sufficiently large, failure to disclose this fact may render the report misleading. n43

As with frontrunning and trading ahead of customer orders, information barriers and related policies and procedures are an important means by which broker-dealers may prevent the potential for trading ahead of research. Similarly, information barriers are likely to be an important defense in potential private claims asserted in connection with proprietary trading that occurs in advance of research reports.

(n24)Footnote 24. For a more detailed (though not fully updated) discussion of the restrictions under NASD IM-2110-2, NASD Rule 2111, and NYSE Rule 92, see Brandon Becker, Yoon-Young Lee, Christie Farris Oberg, and Imran Javaid, *Restrictions and Obligations of Broker-Dealers Engaged in Proprietary Trading* at 121-38.

(n25)Footnote 25. See *Opper v. Hancock Sec. Corp.*, 250 F. Supp. 668, 673-74 (S.D.N.Y. 1966) (holding broker-dealer liable under New York agency law, as well as Rule 10b-5, for selling securities for its own account before filling the plaintiff customer's sell order for the same security). The *Opper* court did not, however, provide an element-by-element analysis of why the conduct violated Rule 10b-5. See also *United States v. Hunt*, No. 05 CR 395, 2006 U.S. Dist. LEXIS 64887 (S.D.N.Y. Sept. 6, 2006) (refusing to dismiss indictment alleging that NYSE specialist violated Rule 10b-5, because trading ahead and interpositioning could constitute violations of Rule 10b-5(a) and/or (c)); *United States v. Bongiorno*, No. 05 CR 390, 2006 U.S. Dist. LEXIS 24830 (S.D.N.Y. May 1, 2006) (same). These criminal cases and other related litigation followed SEC and NYSE settlements with certain NYSE specialist firms based on allegations stemming from individual specialists' trading. See *infra*.

(n26)Footnote 26. Under NASD Rule 2111, a broker-dealer may not trade ahead of a customer market order or marketable limit order unless it immediately executes the customer order at the same price or better. NASD Rule 2111(b). However, the broker-dealer may negotiate terms and conditions that permit it to trade ahead of or alongside a customer order, with respect to orders that are for institutional accounts or that are for at least 10,000 shares and at least \$100,000, if the broker-dealer discloses and explains the terms and conditions to the customer. See NASD Rule 2111(d); NASD Notice to Members 06-03 (Jan. 2006). The same provision applies to customer limit orders, and FINRA no longer recognizes a safe harbor for market-making firms that fully disclose that they trade ahead of customer limit orders. See *id.* Presumably, however, such disclosure would affect a customer's ability to assert a 10b-5 claim for trading ahead. Similarly, NYSE Rule 92 permits trading ahead or alongside an institutional customer's order in certain circumstances, if the customer has provided its affirmative consent to such trading. See NYSE Rule 92(b).

(n27)Footnote 27. NASD Notice to Members 06-03. NASD Notice to Members 03-74 (Nov. 2003).

(n28)Footnote 28. NYSE Rule 92.10 (stating that knowledge of a customer order is presumed, unless the member firm has "a reasonable system of internal policies and procedures to prevent the misuse of information about customers orders by those responsible for entering such proprietary orders").

(n29)Footnote 29. See, e.g., *Hunt*, 2006 U.S. Dist. LEXIS 64887 (refusing to dismiss indictment alleging that NYSE specialist violated Rule 10b-5, because trading ahead and interpositioning could constitute violations of Rule 10b-5(a) and/or (c)); *Bongiorno*, 2006 U.S. Dist. LEXIS 24830 (same).

(n30)Footnote 30. *In re LaBranche & Co. LLC*, Exchange Act Release No. 49,500, P 3 (Mar. 30, 2004) ("SEC LaBranche Settlement"); *LaBranche & Co. LLC*, NYSE Disciplinary Decision 2004-52, P 6 (Mar. 29, 2004) ("NYSE LaBranche Settlement"). With respect to the scienter requirement, the settlements stated, "The interpositioning conduct by certain [] specialists with respect to certain transactions in the above six stocks evidences scienter." SEC LaBranche Settlement at P 43; NYSE LaBranche Settlement at P 43. Other settlements tracked this analysis and language. See, e.g., *In re Fleet Specialist, Inc.*, Exchange Act Release No. 49,499 (Mar. 30, 2004); *In re Van Der Moolen Specialists USA, LLC*, Exchange Act Release No. 49,502 (Mar. 30, 2004); *In re Spear, Leeds & Kellogg Specialists, LLC*, Exchange Act Release No. 49,501 (Mar. 30, 2004); *Fleet Specialist, Inc.*, NYSE Hearing Panel Decision 04-49 (Mar. 29, 2004); *Van Der Moolen Specialists USA, LLC*, NYSE Hearing Panel Decision 04-50 (Mar. 29, 2004); *Spear, Leeds & Kellogg Specialists, LLC*, NYSE Hearing Panel Decision 04-53 (Mar. 29, 2004). The settlements also described instances of trading ahead of customer orders, but the regulators did not assert that this conduct violated Section 10(b) and Rule 10b-5. See also SEC Press Release 2004-42, Settlement Reached with Five Specialist Firms for Violating Federal Securities Laws and NYSE Regulations (Mar. 30, 2004); SEC Press Release 2004-99, Settlement Reached with Two Specialist Firms for Violating Federal Securities Laws and NYSE Regulations (July 26, 2004).

(n31)Footnote 31. *United States v. Finnerty*, 474 F. Supp. 2d 530, 532 (S.D.N.Y. 2007) (overturning jury's

conviction of defendant for securities fraud). The court reasoned that the prosecution had failed to provide evidence of customer expectations that interpositioning would not occur, and that such expectations were a necessary aspect of proving deception. *Id.* at 538-42 .

(n32)Footnote 32. See SEC LaBranche Settlement at PP 3, 36 (stating that the firm violated NYSE Rule 342 and Exchange Act Section 15(b)(4)(E)); NYSE LaBranche Settlement at P 45 (same). Among other violations, the settlements also stated that the firms violated their specialist obligations under Exchange Act Section 11(b) and Rule 11b-1 to limit their dealings to those reasonably necessary to maintain a fair and orderly market. SEC LaBranche Settlement at P 20; NYSE LaBranche Settlement at P 29.

(n33)Footnote 33. *In re LaBranche Sec. Litig.*, 405 F. Supp. 2d 333 (S.D.N.Y. 2005) . The court ordered the parties in October 2007 to attempt mediation. The court docket for the case includes no further entries since that time. S.D.N.Y. Docket for 1:03-CV-08201, Entry No. 69 (Oct. 15, 2007) (docket current through June 24, 2008).

(n34)Footnote 34. See *In re Van der Moolen Holding N.V. Sec. Litig.*, 405 F.Supp.2d 388 (S.D.N.Y. 2005) (denying motions to dismiss Section 10(b) and Section 20(a) claims against the broker-dealer and its holding company); Van der Moolen Holding NV, Annual Report, at 88 (2006) (describing litigation and settlement).

(n35)Footnote 35. The district court dismissed claims against the NYSE. See *In re NYSE Specialists Sec. Litig.*, 405 F. Supp. 2d 281, 302-08 (S.D.N.Y. 2005) , cert. denied sub nom *California Pub. Employees Ret. Sys. v. NYSE*, 128 S. Ct. 1707 (2008) .

(n36)Footnote 36. See, NASD IM-2110-4 (prohibiting trading ahead of research reports); NYSE Info. Memo 91-08 (Mar. 18, 1991) (stating that it is inconsistent with just and equitable principles of trade to accumulate a position in a security in anticipation of issuing a favorable research report).

(n37)Footnote 37. *SEC v. Capital Gains Research Bureau, Inc.*, 375 U.S. 180, 181 (1963) (interpreting section 204 of Investment Advisors Act).

(n38)Footnote 38. *In re Banc of America Securities LLC*, Exchange Act Release No. 55,466, at 4 (Mar. 14, 2007).

(n39)Footnote 39. *Id.* at 5. The SEC also brought charges under Section 15(c) and Rule 15c1-2(a), alleging that the firm's investment bankers improperly influenced the firm's research analysts and that the firm published research reports that did not accurately reflect the views of its analysts. *Id.* at 12.

(n40)Footnote 40. *Id.* at 4.

(n41)Footnote 41. There have been insider trading claims against individuals, however, for trading on the basis of material, non-public information about pending research that the individuals misappropriated from the broker-dealer. See *SEC v. Guttenberg*, *Litigation Release 20022*, 2007 SEC LEXIS 383 (Mar. 1, 2007) (alleging that Guttenberg, an executive director in a broker-dealer's equity research department, tipped co-defendants about upgrades and downgrades in upcoming research reports, and that these and subsequent tippees traded on this information). A related criminal case also was filed. See *United States v. Guttenberg and Tavdy* No. 07 Cr. 141 (S.D.N.Y. 2007) (denying defendants' motions, including Guttenberg's motion to dismiss). See also *SEC v. Scherer*, *Litigation Release No. 13340*, 1992 SEC LEXIS 1960 (S.D.N.Y. Aug. 20, 1992) (alleging that high yield analyst misappropriated his employer's proprietary information in violation of Section 10(b) and Rule 10(b)-5 by holding an interest in bonds that were the subject of research reports he was preparing).

(n42)Footnote 42. See, e.g. *In re Banc of America Securities LLC*, Exchange Act Release No. 55,466 (where the allegedly fraudulent conduct was the publication of the misleading research reports about three companies, rather than the firm's proprietary transactions prior to releasing research reports about two other companies).

(n43)Footnote 43. See *Zweig v. Hearst Corp.*, 594 F.2d 1261, 1267 (9th Cir. 1979) ; *SEC v. Blavin*, 557 F. Supp. 1304, 1311-12 (E.D. Mich. 1983) . In *SEC v. Blavin*, the court accepted the SEC's contention that an unregistered investment adviser had violated *Rule 10b-5* by failing to disclose in his recommendations that he had purchased large amounts of the stock he was recommending, but the SEC apparently did not contend that he violated the rule in purchasing the stock before issuing the research. In these cases the individual who bought the shares was the same person who wrote the recommendation, and they are to that extent distinguishable from a case in which a research department prepares research and the firm's trader subsequently attempts to profit from the research by buying the shares before the research is published. The NYSE and FINRA rules regarding research reports include, among their various disclosure requirements for research reports, disclosure if the NYSE or FINRA member issuing the research or its affiliates beneficially own 1% or more of any class of common equity securities of the subject company. NYSE Rule 472(k)(1)(i)(c); NASD Rule 2711(h)(1)(B).

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.06

§ 5C.06 Fairness Opinions

[1] In General

A broker-dealer that provides investment banking services may at times provide a fairness opinion at the request of a client company. A fairness opinion typically summarizes a proposed major corporate transaction, such as a merger or acquisition, and states (1) that the broker-dealer has reviewed certain information provided by the company, (2) that it has assumed the accuracy of that information without independent verification and (3) that on the basis of that information the broker-dealer has formed the opinion that the proposed transaction is fair from a financial point of view to the company's stockholders.

A fairness opinion is typically addressed to the company's directors and its principal function is to assist the directors in exercising their business judgment in deciding whether to approve the transaction. There is no statute or rule that specifically requires that a company's board of directors obtain a fairness opinion from a broker-dealer prior to approving a major corporate transaction. Following a 1985 Delaware Supreme Court decision, however, in which the court held that a corporate board had breached its fiduciary duty of care by approving a merger without having sufficient information about the transaction, boards routinely obtain fairness opinions from broker-dealers. n1

Although addressed to a company's board of directors, a fairness opinion also may be provided to stockholders. If the transaction involves a registered distribution of securities, the opinion may be included in the registration statement. n2 If the transaction requires the approval of stockholders, the opinion may be included in the proxy statement soliciting proxies for the stockholder vote. n3 A broker-dealer that issues a fairness opinion may expose itself to liability if shareholders later challenge the fairness of the transaction. A stockholder who believes an opinion that was included in the proxy statement was materially misleading might attempt to assert a claim pursuant to SEC Rule 14a-9. In addition, any person who purchases or sells a security in reliance on the fairness opinion may attempt to assert a claim under *Rule 10b-5*. The potential plaintiffs may include "forced" purchasers or sellers whose securities were automatically converted to cash or other securities pursuant to the relevant corporate transaction. n4 Finally, stockholders may be able to assert a claim pursuant to Section 14(e) for "fraudulent, deceptive or manipulative acts or practices" in connection with tender offers. n5

[2] The Debate about Fairness Opinions' Value

The value of fairness opinions has been hotly contested. Some have reasoned that the lack of a standard definition of

"fairness" calls into question the very premise of the fairness opinion. n6 Various commentators have examined the variability of how broker-dealers determine fairness and value for purposes of fairness opinions. n7

Another aspect of fairness opinions that has received considerable attention is the potential for conflicts of interest in connection with their production. A fairness opinion typically is just one aspect of a broker-dealer's work on a transaction, and some or all of the broker-dealer's compensation may be contingent on the successful completion of the transaction. The broker-dealer also may have an ongoing business relationship with the company. n8 In addition, a broker-dealer may have business interests involving both sides of the transaction. n9 Indeed, some view fairness opinions as nothing more than pricey statements of what a board of directors wants to hear. n10 Others view this critique as overblown and unsupported by empirical evidence. n11

Skepticism towards and criticism of fairness opinion practices, of course, does not necessarily mean that investment banks should be held liable to shareholders for the opinion they write. Judge Easterbrook cautioned in a recent opinion that broker-dealers are fulfilling a market demand and that, even if the cost of fairness opinions exceeds their utility, this conclusion would not be a basis for damages against a broker-dealer that provides a fairness opinion according to market norms. n12 Indeed, for some, the inherent subjectivity in fairness opinions, and the fact that directors rather than shareholders are their intended audience, are reasons to limit broker-dealers' liability. n13

[3] FINRA's Response

To address the concern that public shareholders may lack sufficient information regarding potential conflicts of interest between the broker-dealer authoring a fairness opinion and the recipient company, FINRA implemented a new rule in late 2007. Under new NASD Rule 2290, a FINRA member must make certain disclosures when it provides a fairness opinion that it knows or has reason to know will be provided to a company's shareholders, and a member that provides fairness opinions must have written procedures for their approval. n14

As adopted, new NASD Rule 2290 includes two sets of requirements relating to, respectively, disclosures in fairness opinions and written procedures for the approval of such opinions. The disclosure requirements apply where the member firm knows or has reason to know that the fairness opinion will be provided or described to the company's public shareholders. A firm has reason to know that the fairness opinion will be provided or described to the company's public shareholders if, for example, the structure of the transaction requires a shareholder vote. n15 The rule requires several types of disclosures, some of which are descriptive and others of which are quantitative.

The second part of Rule 2290 requires any member issuing a fairness opinion to have written procedures for their approval. Specifically, these procedures must address two topics. First, they must address the types of transactions and circumstances in which the member will use a fairness committee to approve or issue a fairness opinion. Second, the written procedures must address how the member will determine whether the valuation analyses used in the fairness opinion are appropriate. n16

NASD Rule 2290, of course, does not directly affect Exchange Act liability, which is the focus of this chapter, although it does articulate certain disclosure and procedural standards for a practice otherwise not directly regulated by the SEC or the SROs. n17 On the other hand, claims under the Exchange Act must satisfy the standards under that law's applicable provisions. n18

[4] Applicability of Rule 14a-9

Rule 14a-9 prohibits, in proxy solicitations, any false or misleading statement with respect to a material fact, or omission of any material fact necessary to prevent a statement from being false or misleading. n19 To succeed in a 14a-9 claim, a plaintiff must show that: (1) the proxy statement included a material misrepresentation or omission of fact made by the defendant; (2) the misrepresentation caused injury to the plaintiff; and (3) the proxy solicitation was an

essential link in the completion of the transaction. n20 If the defendant is not the issuer of the proxy statement, the plaintiff must show a substantial connection between the use of the defendant's name and the solicitation effort. n21 Courts have disagreed as to whether, when the only connection between the proxy solicitation and the author of a fairness opinion is the inclusion of the fairness opinion in the proxy statement, a substantial connection exists.

In *Mendell v. Greenberg*, n22 the district court found that the mere inclusion of the fairness opinion in a proxy statement did not result in the financial advisor that wrote the opinion being substantially connected to the solicitation effort. n23 In dismissing the claims against the financial advisor, the *Mendell* court also stated that "the fact that [the financial advisor] may have participated in drafting the proxy statement, as plaintiff alleges, is insufficient to constitute a solicitation." n24

Other courts, however, have held that the inclusion of a fairness opinion in a proxy statement is sufficient to establish a substantial connection to the solicitation. In *Lazzaro v. Manber*, n25 for example, the court declined to dismiss a claim under Section 14(a) against a financial advisor. The joint proxy statement soliciting shareholders' approval for a merger included the advisor's opinion that the merger was fair to the merging company's shareholders. In contrast with *Mendell*, the plaintiffs alleged that the financial advisor, in cooperation with the other defendants, had included knowing misrepresentations in its opinion with the object of obtaining the shareholders' approval. The court reasoned that the term "solicitation" includes any communication to shareholders that is part of a continuous plan intended to end in solicitation and to prepare the way for its success. n26 Other courts, too, have held that a broker-dealer may be held liable under Rule 14a-9 based on the inclusion of its fairness opinion in the proxy statement. n27

[5] Misrepresentation or Omission

A claim under Rule 14a-9, *Rule 10b-5*, or Section 14(e) requires a showing of a false or misleading statement or omission of a material fact. With respect to a statement of opinion, a plaintiff must show both (a) that the defendant did not in fact hold the opinion stated and (b) that an objective basis for the opinion was lacking. n28

In the Supreme Court's decision in *Virginia Bankshares v. Sandberg*, a minority shareholder in a "freeze-out" merger claimed that the directors had disseminated false and misleading proxy materials in violation of Rule 14a-9. The plaintiff challenged as false and misleading the portions of the proxy materials stating that the acquired company's directors believed that the terms of the proposed merger were "fair" to the public shareholders and would provide the shareholders with an opportunity to achieve a "high" value for their shares. n29 The Court rejected the argument that statements of "reasons, opinions or belief" were not misstatements of fact, holding that they were factual (1) as statements that defendants held the opinion stated and (2) as statements about the underlying subject matter of the opinion. The Court nevertheless held that to establish liability, a plaintiff must demonstrate both (1) that the defendant did not in fact hold the asserted opinion or belief and (2) that the statement of opinion or belief was materially false or misleading as to its subject. n30 Proof of one element without the other is insufficient. n31 The standard enunciated in *Virginia Bankshares* has also been applied to *Rule 10b-5* and Section 14(e). n32

Another body of cases has dealt with alleged misrepresentations or omissions concerning the broker-dealer's relationship with the company, its compensation for rendering the opinion, and other facts that might influence the weight that an investor would give to the opinion. n33

In addition to a misrepresentation or omission of fact, a claim under the relevant provisions of the federal securities laws requires a showing that the fact was material. n34 Courts are likely to consider a broker-dealer's conclusion that the transaction is fair to be material. n35

[6] Standard of Liability

While a *Rule 10b-5* claim requires a showing of scienter, there is some uncertainty regarding whether a Rule 14a-9

claim requires scienter or may be based on a negligence standard. In *Virginia Bankshares*, the Supreme Court specifically declined to rule on whether scienter is required under Rule 14a-9. n36

The Third Circuit has applied a negligence standard to 14a-9 claims based on fairness opinions. In *Herskowitz v. Nutri/System, Inc.*, n37 a financial advisor had provided an opinion in which it stated that a leveraged buyout was fair to the stockholders based on an assumption that the then-existing 46% corporate tax rate would prevail for the next five years. The plaintiffs asserted claims pursuant to *Rules 10b-5* and 14a-9. Relying upon its earlier decision in *Eisenberg v. Gagnon*, n38 in which the court held that projections are actionable under the securities laws if "issued without a genuine belief or reasonable basis," the court stated:

Given that the test is intended to identify deviations from the appropriate standard of care in expressions of opinions by professionals "with greater access to information or having a special relationship to investors making use of the information," the more reasonable interpretation of the rule is that it permits recovery when an expert, in making a projection, adopts an assumption which the factfinder concludes was objectively unreasonable in the circumstances. n39

The Third Circuit determined that there was some evidence that selection of the 46% tax rate was unreasonable and held that the district court had erred in granting defendants a directed verdict on this claim. In addition, the court stated that a negligence standard applies to management under Rule 14a-9, and that a broker-dealer knowingly assisting in preparation of proxy materials should be subject to the same standard. n40

While *Virginia Bankshares* precludes liability based on a negligently--but honestly--held opinion, courts have continued to apply a negligence standard to Rule 14a-9 claims. n41 One court, applying a negligence standard to a broker-dealer, reasoned that *Virginia Bankshares* requires a plaintiff to show that a statement of opinion was both subjectively and objectively false, but cautioned that this standard applies only to statements of opinion, stating parenthetically that "any purely factual assertions in the fairness opinion, such as [a broker-dealer's] statements that it reviewed certain materials during its due diligence inquiry, would be held to a negligence standard." n42

A minority of courts have required a showing of scienter for Rule 14a-9 claims. n43 Even if courts require a showing of scienter, however, broker-dealers should be mindful that allegations of conflicts of interest may affect the scienter analysis. In one case, for example, a district court held that plaintiffs had adequately pleaded scienter in a Section 10(b) claim against a broker-dealer that issued a fairness opinion in connection with a merger, where plaintiffs alleged motives for compensation and reputation, along with facts to suggest that the broker-dealer approved an unreasonable exchange ratio according to "various objective metrics." n44

In considering claims against broker-dealers, courts have been mindful of the intended scope of a fairness opinion, both as a matter of general practice and as expressed in the relevant contracts. For example, in *City Partnership Co. v. Lehman Brothers, Inc.*, the district court dismissed a 14a-9 claim against the broker-dealer, stating that "Lehman's actions were consistent with what it saw as its duties under the engagement letter and to the limited partners." n45 In addition, courts tend to approach with skepticism plaintiffs' attempts to hold broker-dealers liable for not subjecting information to closer scrutiny, because the engagement letter typically stipulates that the broker-dealer is to rely on certain information provided by the company. n46

[7] Effect of Disclaimer

As discussed above, a broker-dealer typically agrees to provide a fairness opinion based upon information provided to it by the company requesting the opinion, and the broker-dealer generally is not expected to verify such information. The engagement letter typically states these expectations. FINRA has acknowledged that the contractual terms control and that a member firm has no general obligation to verify the information supplied to it for purposes of preparing a fairness opinion. n47 NASD Rule 2290, which took effect in December 2007, permits the use of a general disclosure to the

effect that the broker-dealer preparing the opinion has relied upon such information without independent verification.
n48

Such disclaimers generally should preclude the imposition of liability on the broker-dealer for relying in good faith on information provided by the company that turns out to be inaccurate. First, a number of courts have held that such a disclaimer has the effect that the broker-dealer has not made any representation concerning the accuracy of the company's information, and therefore cannot be held liable for inaccuracies in that information. n49 Other courts hold that disclaimers require dismissal of misrepresentation claims because the plaintiff could not have justifiably relied on any supposed representation concerning the accuracy of the information covered by the disclaimer. n50

Other decisions indicate, however, that the usual disclaimer in a fairness opinion may not be effective to avoid liability in every case. A disclaimer seems unlikely to afford any protection if the broker-dealer actually knows that the information on which its opinion is based is incorrect. In *Folger Adam Co. v. PMI Industries, Inc.*, the Second Circuit refused to dismiss a claim under *Rule 10b-5* against a broker-dealer that assisted in the preparation of an offering memorandum containing allegedly deceptive projections. n51 The Second Circuit observed that the plaintiff alleged that the broker-dealer had "affirmatively misled" the plaintiff about the accuracy of the projections. n52 In *Kline v. First Western Government Securities, Inc.*, n53 the Third Circuit analyzed the effect of disclaimers in an attorney's tax opinion. The court refused to hold that the disclaimers immunized the law firm from liability under the securities laws, and while observing that "the presence and character of disclaimers has clear relevance to that determination" of reasonable reliance, it also held that the disclaimers did not preclude the plaintiffs from relying on the opinion's description of the underlying transactions. n54

FOOTNOTES:

(n1)Footnote 1. See *Smith v. Van Gorkom*, 488 A.2d 858 (Del. 1985) ; Steven M. Davidoff, Fairness Opinions, 55 AM. U. L. REV. 1557, 1598-1603 (2006) (discussing Delaware courts since *Van Gorkom* as continually treating fairness opinions as "virtually required" in the context of a corporate control transaction and as valuable and reliable in aiding the board of directors in fulfilling its duty of care); Daniel R. Fischel, The Business Judgment Rule and the Trans Union Case, 40 BUS. LAW. 1437, 1453 (1985) (stating that, following the *Van Gorkom* decision, "no firm considering a fundamental corporate change will do so without obtaining a fairness letter"). Throughout this chapter, we use the term "broker-dealer" to refer to a broker-dealer that provides fairness opinions as part of its investment banking services. At times, particularly for consistency with the vocabulary of court opinions we discuss, we also use the terms "financial advisor" and "investment bank" to refer to authors of fairness opinions.

(n2)Footnote 2. Someone who acquires the securities that are the subject of the registration statement and believes the fairness opinion was inaccurate could assert a claim pursuant to Section 11(a)(4) of the Securities Act of 1933 under the standards described elsewhere in this treatise. 2 Matthew Bender's Securities Regulation Series: Federal Securities Act of 1933, ch. 9 (2001). Section 11(a)(4), 15 U.S.C. 77k(a)(4), provides that a person who acquires the security that is the subject of a registration statement may sue "every accountant, engineer, or appraiser, or any person whose profession gives authority to a statement made by him, who has with his consent been named as having prepared or certified any part of the registration statement" if that part of the registration statement "contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein not misleading."

(n3)Footnote 3. For a discussion of the SEC's disclosure requirements applicable to fairness opinions in the context of going private transactions and proxy solicitations, see Davidoff, *supra* note 1 at 1590-94.

(n4)Footnote 4. See *Grace v. Rosenstock*, 228 F.3d 40 (2d Cir. 2000) . In *Grace* the Second Circuit extended to *Rule 10b-5* the Supreme Court's holding that a party may not assert a claim based on an allegedly misleading proxy statement under *Rule 14a-9* if the transaction would have been approved regardless of the accuracy of the proxy statement, see *Virginia Bankshares, Inc. v. Sandberg*, 501 U.S. 1083 (1991) . See 228 F.3d at 48 . The continued

validity of the forced seller doctrine was questioned in *Howe v. Bank for Int'l Settlements*, 194 F. Supp. 2d 6, 26-27 (D. Mass. 2002).

(n6)Footnote 6. See, e.g., Davidoff, *supra* note 1, at 1566-67 (discussing the variability and subjectivity of what constitutes "fairness" for purposes of a fairness opinion, and describing as "startling" the lack of agreement regarding what is "fair"); Charles M. Elson, Fairness Opinions: Are They Fair or Should We Care?, 53 OHIO ST. L.J. 951, 953 (1992) (calling "fairness" a misnomer, and stating that "price acceptability" is a more accurate description of what a fairness opinion considers).

(n7)Footnote 7. Davidoff, 55 AM. U. L. REV. at 1573-85 (also arguing that particular valuation methodologies in turn may suffer from subjectivity and a lack of uniform standards); Elson, *supra* note 6 at 960-64; Lucian Arye Bebchuk & Marcel Kahan, Fairness Opinions: How Fair Are They and What Can Be Done About It?, 1989 DUKE L.J. 27, 29-37 (1989); Steven J. Cleveland, An Economic and Behavioral Analysis of Investment Bankers when Delivering Fairness Opinions, 58 ALA. L. REV. 299, 302-06 (2006). See also William J. Carney, Fairness Opinions: How Fair Are They and Why We Should Do Nothing About It, 70 WASH. U. L.Q. 523, 526-27 (1992) (criticizing Van Gorkom as assuming that stock has an intrinsic value independent of market price).

(n8)Footnote 8. See Davidoff, *supra* note 1 at 1586-87.

(n9)Footnote 9. See *id.* at 1587-88 (describing "stapled financing," in which an investment bank provides a fairness opinion to the board of an acquiree company, and then provides financing for the acquirer to complete the transaction). See also Elson, *supra* note 6 at 965-70 (discussing potential conflicts of interest, and stating that fairness opinions inherently lack objectivity because they are a product investment banks actively seek to sell); Bebchuk and Kahan, *supra* note 7 at 37-45 (also rejecting arguments that reputation concerns and internal procedures and guidelines encourage unbiased opinions).

(n10)Footnote 10. See, e.g., Bernard Black and Reinier Kraakman, Delaware's Takeover Law: The Uncertain Search for Hidden Value, 96 NW. U. L. REV. 521, 556 (2002) ("The uncomfortable truth is that investment banker fairness opinions often say almost whatever their client wants them to, the facts be damned.").

(n11)Footnote 11. One empirical study argues that fairness opinion practices are the product of competitive forces and provide valuable information to investors, and that concerns regarding conflicts of interest are exaggerated. Charles W. Calomiris and Donna M. Hitscherich, Banker Fees and Acquisition Premia for Targets in Cash Tender Offers: Challenges to the Popular Wisdom on Banker Conflicts, 4 J. EMPIRICAL LEGAL STUD. 909 (2007).

(n12)Footnote 12. *The HA2003 Liquidating Trust v. Credit Suisse Secs (USA) LLC*, 517 F.3d 454, 457 (7th Cir. 2008). ("The possibility that judges, regulators, or legislators have caused 'too much demand' for a particular service, inducing firms to buy something worth less than its price, is no reason to mulct the service's provider."). The opinion affirmed a district court's ruling that an investment bank did not act with gross negligence when it provided a company's board of directors with a fairness opinion that relied upon the company's projections, which an auditor determined were unrealistic, because contractual terms required the investment bank to rely upon the company's projections. Judge Easterbrook observed that the plaintiff's brief "reflects a view that fairness opinions are worthless (but expensive) paper." *Id.*

(n13)Footnote 13. See, e.g., Carney, *supra* note 7 at 525 (1992) (arguing that fairness opinions have served an important role in "assuring the continued application of the business judgment rule during an era when it has been under severe attack" and stating that courts and investors should recall that fairness opinions are intended for directors rather than investors, treat fairness opinions as having only limited value, and impose liability only in the event of fraud); Elson, *supra* note 6 (discussing variability in valuation processes, and arguing against application of the tort of

negligent misrepresentation in cases against investment bankers that provide fairness opinions).

(n14)Footnote 14. Exchange Act Release No. 56,645 (Oct. 11, 2007), 72 Fed. Reg. 59,317 (Oct. 19, 2007) (approving new Rule 2290, hereafter "Rule 2290 Adopting Release"); FINRA Regulatory Notice 07-54 (Nov. 2007) (discussing the new rule and announcing an effective date of Dec. 8, 2007).

The rule's origin extends back to 2004, when the NASD solicited comment regarding whether it should propose a new rule to regulate the identification and disclosure of conflicts of interest relating to members' fairness opinions in connection with corporate control transactions. See NASD Notice to Members 04-83 (Nov. 2004). The Notice to Members raised the possibility of a requirement that, when a member provides a fairness opinion to be included in a proxy statement, it disclose a "complete description" of its conflicts of interest (such as whether it has been an advisor on the transaction, and the nature of its compensation in connection with the transaction), as well as the extent to which it relied upon information supplied by a company or its management or independently verified certain information. In addition, the NASD sought comment on whether it should propose requirements to guard against conflicts of interest in connection with fairness opinions, such as the process for approving fairness opinions, the process to determine appropriate valuation analyses, and the process for evaluating the degree to which the amount and nature of the transaction's compensation to individual officers, directors or employees--relative to shareholders' benefits--is a factor in determining fairness. See *id.* As discussed below, the final rule's disclosure requirements are narrower than this early suggestion of a "complete description" of conflicts of interest, and the rule as adopted also does not mandate an evaluation of insiders' compensation relative to shareholders' compensation.

(n15)Footnote 15. See FINRA Regulatory Notice 07-54 (Nov. 2007).

(n16)Footnote 16. NASD Rule 2290(b)(2).

(n17)Footnote 17. There is no express or implied private cause of action based on a violation of Rule 2290. See § 5C.01, *supra*.

Supp. 2d 706, 728 (D. Del. 2000) ("Third Circuit law, however, permits a finding of liability under Rule 14a-9 by those who make material misstatements or omissions in proxy statements, regardless if the defendant is an outside expert that does not benefit from the outcome of the solicitation.").

(n28)Footnote 28. *Virginia Bankshares, Inc. v. Sandberg*, 501 U.S. 1083 (1991) . See also, e.g., *In re AOL Time Warner, Inc. Sec. and "ERISA" Litig.*, 381 F. Supp. 2d 192, 243-44 (S.D.N.Y. 2004) (dismissing claims under Rule 14a-9 and Securities Act §11 against investment bank because plaintiff had not alleged that investment bank did not believe the statements expressed in its fairness opinion).

(n29)Footnote 29. *Virginia Bankshares*, 501 U.S. at 1084-94 .

(n30)Footnote 30. *Virginia Bankshares*, 501 U.S. at 1095-96 .

(n31)Footnote 31. *Id.*; see also *Freedman v. Value Health, Inc.*, 958 F. Supp. 745, 753 (D. Conn. 1997) ; *In re McKesson HBOC, Inc. Secs. Litig.*, 126 F. Supp. 2d 1248, 1265 (N.D. Cal. 2000) ("The teaching of *Virginia Bankshares* is that an opinion is only false if the speaker does not in fact hold that opinion.").

(n32)Footnote 32. See, e.g., *In re Burlington Coat Factory Sec. Litig.*, 114 F.3d 1410, 1428 (3d Cir. 1997) (*Virginia Bankshares* applies to Rule 10b-5 claims); *In re PHLCORP*, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 96,808, at 93,189-93 (S.D.N.Y. 1992) (*Virginia Bankshares* applies to tender offers under Exchange Act § 14(e)); *In re JPMorgan Chase & Co. Sec. Litig.*, No. 06-C-4674, 2007 U.S. Dist LEXIS 93877 (N.D. Ill. Dec. 18, 2007) (applying *Virginia Bankshares* to Section 10(b) fraud claim against investment bank). In *JPMorgan Chase*, the court held that the pleadings had alleged both objective and subjective falsity with respect to the investment bank's fairness opinion, because plaintiffs alleged that the bank endorsed a merger with an unreasonable exchange ratio, and that "JPMSI knew of the unfair ratio but endorsed the merger in an effort to collect compensation and further its own ranking amongst its competitors." *Id.*

(n33)Footnote 33. *Goldstein v. Bear, Stearns & Co.*, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,037 (E.D.N.Y. Aug. 15, 1988), involved an exchange offer by defendant Compact Video to shareholders of defendant Four Star International. The complaint asserted that the broker-dealer that had provided a fairness opinion failed to disclose that it had a prior relationship with the ultimate owner of Compact Video. The court held that whether the relationship "would be a factor in the reasonable investor's decision making process is a question of fact to be decided by a jury." *Id.* at 90,861. See also, e.g., *City Partnership Co. v. Lehman Bros.*, 344 F. Supp. 2d at 1252 (finding that conflicts of interest were adequately disclosed, and that evidence did not indicate potential or actual conflicts affected the fairness opinion); *Maywalt v. Parker & Parsley Petroleum Co.*, 808 F. Supp. 1037, 1057 (S.D.N.Y. 1992) (adequate disclosure of contingent fee arrangement); *Mendell v. Greenberg*, 612 F. Supp. 1543, 1552 n.10 (S.D.N.Y. 1985) (alleged conflict of interest fully and fairly disclosed).

(n34)Footnote 34. An omission is material under Rule 14a-9 if there is a substantial likelihood that a reasonable shareholder would consider it important in deciding how to vote. Put another way, materiality is established when "the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available." *TSC Indus., Inc. v. Northway Inc.*, 426 U.S. 438, 449 (1976) ; accord,

Virginia Bankshares, 501 U.S. 1083, 1090-91 (1991) . The same standard applies to *Rule 10b-5*. See *SEC v. Maio*, 51 F.3d 623, 637 n.17 (7th Cir. 1995) (same standard for both *Rule 10b-5* and § 14(e)); *Kramas v. Security Gas & Oil Inc.*, 672 F.2d 766, 768-69 (9th Cir.) , *cert. denied*, 459 U.S. 1035 (1982) ; *First Eastern Corp. v. Mainwaring*, No. 92 Civ. 1176, 1992 U.S. Dist. LEXIS 16979, *11-12 (E.D. Pa. Nov. 4, 1992) . In order to be material, a misrepresentation or omission need not be "outcome determinative" in the sense that it actually would have caused a reasonable investor to have acted differently. See *Ganino v. Citizens Utils. Co.*, 228 F.3d 154, 162 (2d Cir. 2000) ; *Folger Adam Co. v. PMI Indus., Inc.*, 938 F.2d 1529, 1533 (2d Cir.) , *cert. denied* , 502 U.S. 983 (1991) .

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.07

§ 5C.07 Private Placements

An investor seeking compensation from an underwriter for misrepresentations relating to a securities offering that was registered under the Securities Act of 1933 will normally assert claims pursuant to that Act, n1 but plaintiffs seeking remuneration in unregistered private placements face unique challenges. n2 Because the Supreme Court has held that a writing delivered in connection with a private sale of securities, such as an offering circular or a private placement memorandum, is not a "prospectus" subject to liability under Section 12(a)(2) of the Securities Act, *Rule 10b-5* of the Exchange Act is the most common approach to seeking liability against broker-dealer placement agents or initial purchasers in a private placement transaction. n3 Although such claims are subject to all the requirements discussed elsewhere with respect to *Rule 10b-5* claims in general, n4 they present two distinctive issues relating to (1) whether the purchaser may justifiably rely on the offering circular as a representation by the placement agent or initial purchaser and (2) whether the complaint satisfies the requirements of the Private Securities Litigation Reform Act for pleading scienter. These two issues represent the two main hurdles plaintiffs face when attempting to impose *Rule 10b-5* liability on a broker-dealer in a private placement transaction. The third main issue facing private placement broker-dealers is potential liability under Section 12(a)(2) if a court determines that a private placement had sufficient public aspects to fall under Section 12(a)(2) notwithstanding the Supreme Court's limitation.

[1] The Offering Circular as a Representation by the Placement Agent

The first hurdle facing plaintiffs seeking to impose liability on broker-dealer private placement agents under *Rule 10b-5* is demonstrating misrepresentation in and reliance on the offering circular or the private placement memorandum. Since the Supreme Court held that there is no private right of action for aiding and abetting a violation of *Rule 10b-5*, n5 the pleading and proof of a *Rule 10b-5* claim must satisfy the requirements of the rule with respect to each separate defendant. Since most of the information in an offering circular or private placement memorandum relates to and presumably originates with the issuer, a question may arise concerning whether the offering circular should be regarded as a statement by the initial purchaser or placement agent and whether it was justifiable for the plaintiff to rely on it as such. n6 There are two key cases that address these issues, *Gabriel Capital, L.P. v. NatWest Finance, Inc.* n7 and *GSC Partners CDO Fund v. Washington*. n8 Both of the cases demonstrate the difficulty plaintiffs experience when attempting to impose *Rule 10b-5* liability on broker-dealers engaged in private placement transactions.

In *Gabriel Capital, L.P. v. NatWest Finance, Inc.*, purchasers in a private placement asserted *Rule 10b-5* claims against the placement agents based on a variety of alleged misrepresentations, including alleged misrepresentations in the

offering memorandum. The offering memorandum contained the following disclaimer:

NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, IS MADE BY THE INITIAL PURCHASERS AS TO THE ACCURACY OR COMPLETENESS OF THE INFORMATION SET FORTH HEREIN, AND NOTHING CONTAINED IN THIS OFFERING MEMORANDUM IS, OR SHOULD BE RELIED UPON AS, A PROMISE OR REPRESENTATION, WHETHER AS TO THE PAST OR THE FUTURE. THE INITIAL PURCHASERS DO NOT ASSUME ANY RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF SUCH INFORMATION. n9

The placement agents moved to dismiss on the grounds, *inter alia*, that in light of this disclaimer, the complaint did not properly allege either that they had made a misrepresentation or that the plaintiffs justifiably relied on any such misrepresentation. n10 The district court ruled against them on the first argument solely on the basis that, on its reading, "This disclaimer does not state that the initial purchasers have made no representations; rather, it states that the initial purchasers make no warranty about the accuracy or completeness of the representations." n11 Presumably, it would be possible to draft a disclaimer that would not permit the court to draw such a conclusion. n12 The placement agents also argued on the basis of the disclaimer that the plaintiffs had not properly pleaded justifiable reliance. The court may have believed this argument to have some merit, but it did not rule on it. Instead, it denied the motion to dismiss on the ground that the plaintiffs adequately pleaded justifiable reliance on other alleged misrepresentations by the initial purchasers, outside the placement memorandum. n13

By contrast, in *GSC Partners CDO Fund v. Washington*, n14 the Third Circuit subsequently affirmed the dismissal of a *Rule 10b-5* claim against a placement agent, based on alleged misstatements in the offering circular for a private placement, on the alternate ground that "the plaintiffs have failed to attribute any false statement or omissions to" the placement agent. n15 The Court of Appeals distinguished *Gabriel Capital* by pointing out that in that case "the plaintiffs alleged that the defendants, in addition to being the initial purchasers, also drafted the offering memorandum as well as distributed it during sale pitches" whereas "[t]he plaintiffs here do not allege that [the placement agent] drafted or distributed the circular." n16 The Court of Appeals also noted that unlike the disclaimer in *Gabriel Capital*, which stated that the initial purchasers made "no warranty" concerning the statements in the offering circular, the circular in *GSC* stated that "the initial purchasers made 'no representations' at all." n17

These cases illustrate the uncertainty faced by plaintiffs and defendants alike when involved in actions alleging material misrepresentations or omissions under *Rule 10b-5* against broker-dealer private placement agents.

[2] Pleading Scierter Under the PSLRA

The second issue facing plaintiffs seeking *Rule 10b-5* liability against broker-dealer private placement agents relates to the pleading standards of the Private Securities Litigation Reform Act ("PSLRA"). The PSLRA requires plaintiffs that seek to assert federal securities law claims to "state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind." The "required state of mind" for a *Rule 10b-5* claim is scierter. n18 Some courts have indicated that plaintiffs may "establish this strong inference" that defendants acted with scierter "either (a) by alleging facts to show that defendants had both motive and opportunity to commit fraud, or (b) by alleging facts that constitute strong circumstantial evidence of conscious misbehavior or recklessness." n19

In the context of a private placement, this standard remains high. The broker-dealer's role as placement agent, including the performance of due diligence, is most likely not enough in itself to support the necessary inference because pleading of scierter "may not rest on a bare inference that the defendant 'must have had' knowledge of the facts." n20 Instead, courts have held that a placement agent should be entitled to the benefit of the same principle that protects members of the issuer's management from allegations of scierter based on their presumed access to information concerning the issuer. n21

Courts also have rejected contentions that investors may satisfy the PSLRA's requirements for pleading scienter by alleging a "motive" consisting solely of a placement agent's interest in earning fees from an offering. If such an allegation could sustain the plaintiffs' burden, all underwriters would, by definition, have the requisite mental state to commit securities fraud, rendering the PSLRA's scienter pleading requirement meaningless as applied to underwriter defendants. n22 In fact, the courts have recognized that an underwriter's predominant motivation with respect to the accuracy of disclosures relating to the offering is to ensure that they are accurate, because the enormous liability associated with misleading statements in connection with a securities offering dwarfs the underwriters' compensation for the offering. As the court observed in *Wenger v. Lumisys, Inc.*, "no rational underwriter would market an IPO to customers knowing that the stock would soon decline in value." n23 Courts have similarly found that the failure of a broker-dealer to uncover fraud during due diligence in a private placement transaction alone did not meet the strong inference of scienter standard. n24 These cases demonstrate that meeting the PSLRA standards for pleading, especially in the context of private placements, remains difficult for plaintiffs seeking to impose *Rule 10b-5* liability on broker-dealers and underwriters.

[3] Potential Section 12(a)(2) Liability

Although the Supreme Court held in *Gustafson* that a writing delivered in connection with a private sale of securities, such as an offering circular or a private placement memorandum, is not a "prospectus" subject to liability under Section 12(a)(2) of the Securities Act of 1933, n25 some courts have nevertheless found a way to impose Section 12(a)(2) liability on private placement broker-dealers notwithstanding this limitation. At the same time, it is important to keep in mind that there are many circumstances in which there is no disclosure in connection with a private placement, so private placement broker-dealers are able to escape the risk of Section 12(a)(2) liability altogether. n26

Simultaneous private and public offerings raise especially complex issues, as some courts have held that a private placement occurring concurrently or subsequently to a public offering is not subject to Section 12(a)(2), n27 whereas other courts have considered that a private offering may be "integrated" with the public offering and come under Section 12(a)(2). n28 In *Sloane Overseas Fund Ltd. v. Sapiens Int'l Corp., N.V.* the court imposed Sec. 12(a)(2) liability on a combined Rule 144A private placement to U.S. qualified institutional buyers and Regulation S offering to purchasers outside of the U.S. by emphasizing the role of the Regulation S offering and holding that it constituted a "public offering" due to the "wide distribution" of the offering memorandum. n29 On the other hand, in *Yung v. Lee*, the court refused to impose liability on broker-dealers even though the private placement investor plaintiffs proved that they relied on a fraudulent prospectus provided in a simultaneous public offering. n30

Some commentators have pointed to these decisions to demonstrate that the nature of the offering, rather than the existence of a prospectus, will determine whether or not a distribution is subject to Section 12(a)(2) liability. n31 However, this has resulted in additional complexity as courts have pointed to different factors to determine the private or public nature of the offering. Some courts emphasize the language of the private placement memorandum as evidence of the sellers' intent to retain the private nature of the offering, n32 whereas other courts look to the conduct of the parties, such as the size of the offering or the number of offerees, n33 and yet others simply consider whether the plaintiff alleged that the offering was made pursuant to a "prospectus" or whether the offering was registered. n34

The legal uncertainty of Section 12(a)(2) liability in the context of private placements in close proximity to public offerings has resulted in significant criticism from the securities bar and the academic community. Some commentators have argued that the *Gustafson* decision leaves more questions than answers, casting doubt on its statutory construction methods and citing economic reasons for a contrary outcome. n35 Others have criticized *Gustafson* arguing that even sophisticated investors participating in private placements also need protection from misrepresentations by broker-dealers beyond *Rule 10b-5*. n36 Thus, although *Gustafson* clearly remains the standard in negating the application of Section 12(a)(2) claims in connection with private offering materials, there likely will continue to be a certain degree of uncertainty on this front in the context of contemporaneous private placement transactions and public offerings.

FOOTNOTES:

(n1)Footnote 1. 2 Matthew Bender, *Federal Securities Act of 1933* § 9.02 (Lexis 2007).

(n2)Footnote 2. Some commentators have argued that broker-dealers that work solely as private placement intermediaries should be subject to modified registration requirements or escape registration completely, but these efforts have met with minimal success. *Report and Recommendations of the Task Force on Private Placement Broker-Dealers*, 60 *Bus. Law.* 959, 961-61 (2005); Robert Connolly, *Legitimizing Private Placement Broker-Dealers Who Deal With Private Investment Funds: A Proposal for a New Regulatory Regime and a Limited Exception to Registration*, 40 *J. Marshall L. Rev.* 703, 723-30 (2007).

(n3)Footnote 3. In *Gustafson v. Alloyd Co.*, 513 U.S. 561, 568-69 (1995), the Supreme Court held that a writing delivered in connection with a private sale of securities is not a "prospectus" subject to Section 12(a)(2) of the Securities Act of 1933, 15 U.S.C. § 77l(a)(2) (2007), unless it relates to an offering that was required to be registered under Section 5 of the Act, 15 U.S.C. § 77e (2007), or was exempt under Section 3 of the Act, 15 U.S.C. § 77c (2007).

(n4)Footnote 4. See § 5.04, *supra*.

(n5)Footnote 5. *Cent. Bank v. First Interstate Bank of Denver*, 511 U.S. 164 (1994). For additional discussion of *Rule 10b-5*, see § 5.04, *supra*.

(n6)Footnote 6. To prevail on a *Rule 10b-5* claim the plaintiff must have "justifiably" relied on a misleading statement by the defendant. *Brown v. E.F. Hutton Group, Inc.*, 991 F.2d 1020, 1032 (2d Cir. 1993); *Tracinda Corp. v. Daimlerchrysler A.G.*, 197 F. Supp. 2d 42, 64 (D. Del. 2002).

(n7)Footnote 7. *Gabriel Capital, L.P. v. Natwest Fin., Inc.* 94 F. Supp. 2d 491 (S.D.N.Y. 2000).

(n8)Footnote 8. *GSC Partners CDO Fund v. Washington*, 368 F.3d 228 (3d Cir. 2004).

(n9)Footnote 9. *Gabriel Capital*, 94 F. Supp. 2d at 501-02.

(n10)Footnote 10. When a complaint asserts a *Rule 10b-5* claim based on alleged misrepresentations in a written document like an offering circular, the document is taken into account in deciding a motion to dismiss the complaint. *E.g.*, *In re Burlington Coat Factory Sec. Litig.*, 114 F.3d 1410, 1426 (3d Cir. 1997).

(n11)Footnote 11. *Gabriel Capital*, 94 F. Supp. 2d at 502.

(n12)Footnote 12. In another recent case, *Wafra Leasing Corp. 1999- A-1 v. Prime Capital Corp.*, 192 F. Supp. 2d 852 (N.D. Ill. 2002), the court reached a similar conclusion where a private placement memorandum disclaimed any representations by its agents when it stated that "[n]o person has been authorized to give any information or to make any representations other than those contained in this [private placement memorandum] and, if given or made, such information or representations must not be relied upon." *Id.* at 865-66. The court compared this disclaimer with the disclaimer used in *Gabriel Capital*, which stated "[n]o dealer, salesperson or other person has been authorized [by the note issuer] ... to give any information or to make any representation not contained in this Offering Memorandum." *Gabriel Capital*, 94 F. Supp. 2d at 507. Even though the *Gabriel Capital* disclaimer was narrower than the *Wafra* disclaimer, the court emphasized that a private placement memorandum or a company's agents cannot disclaim their statements no matter its scope. *Id.* In addition, a private placement memorandum cannot disclaim statements made in the memorandum itself. *Wafra Leasing Corp.* 192 F. Supp. 2d 852, 865-66. *But see* *Saltzberg v. TM Sterling/Austin Assoc.*, 45 F.3d 399 (11th Cir.1995) (per curiam) (holding that explicit cautionary language in private placement memorandum rendered alleged misstatements immaterial and made them not actionable under "bespeaks caution" doctrine).

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.08

§ 5C.08 Information Barriers: An Important Defense

Effective information barriers, or "Chinese Walls," can provide an affirmative defense to certain private claims under the Exchange Act--most notably, those involving insider trading. Information barriers generally consist of policies, procedures and controls designed to restrict and monitor the flow of, and access to, information. In the last two decades, Congress, the SEC, and the SROs have encouraged, and even mandated, the use of information barriers within multiservice broker-dealer firms to prevent the misuse of material nonpublic information and to manage potential conflicts of interests. In light of the potential importance of information barriers as a defense to certain of the private claims discussed in this chapter, this section highlights some of the guidance regulators have provided with respect to information barriers, as well as their potential impact on private claims against broker-dealers under the Exchange Act.

[1] Information Barriers in the Context of Insider Trading

In 1984, Congress passed the Insider Trading Sanctions Act ("ITSA"), which sought to give the SEC more power to combat insider trading. n1 The legislative history of the ITSA reveals strong support for the idea that effective information barriers can provide a defense to alleged insider trading violations. The then-Chairman of the SEC stated in a letter to Congress that, "[I]t is ... important to recognize that, under both existing law and the bill, a multiservice firm with an effective Chinese wall [or information barrier] would not be liable for trades effected on one side of the wall, notwithstanding inside information possessed by firm employees on the other side." n2

In 1988, amid several insider trading scandals, Congress passed the Insider Trading and Securities Fraud Enforcement Act ("ITSFEA"), n3 creating Section 15(f) of the Exchange Act which imposed an affirmative duty on broker-dealers to "establish, maintain and enforce written policies and procedures reasonably designed ... to prevent the misuse ... of material, nonpublic information." n4 Section 15(f) requires broker-dealers not only to implement information barriers to prevent the misuse of material, nonpublic information, but also to regularly review and to vigorously enforce the barriers.

Although the ITSFEA does not expressly outline the types of procedures necessary to avoid liability, the House Committee report cited some examples, including: restraining access to files likely to contain material, nonpublic information; providing continuing education programs concerning insider trading regulations; restricting or monitoring trading in securities about which firm employees possess material, nonpublic information; and diligently monitoring trading for firm or individual accounts. n5

The ITSFEA gave the SEC broad authority to adopt rules "reasonably designed to prevent" misuse of information by requiring specific policies and procedures to be adopted by broker-dealers and investment advisers. It also expanded the enforcement power of the SEC by allowing it to seek sanctions against firms who fail to have adequate policies and procedures in place, even if no actual trading violations occur.

[2] Specific Provisions Providing Defenses

[a] Section 21A

ITSFEA amended the Exchange Act to expand the scope of civil penalties and to create a new ground for liability for "controlling persons" who fail to take adequate steps to prevent insider trading. See *15 U.S.C. § 78u-1(a)(1)(B)* (Exchange Act Section 21A(a)(1)(B)). Significantly, however, this expansion of "controlling person" liability was accompanied by a specific Chinese Wall defense:

Limitations on Liability ... Liability of controlling persons. No controlling person shall be subject to a penalty under subsection (a)(1)(B) of this section unless the Commission establishes that ... such controlling person knowingly or recklessly failed to establish, maintain, or enforce any policy or procedure required under section 78o(f) [15(f)] ... and such failure substantially contributed to or permitted the occurrence of the act or acts constituting the violation.

15 U.S.C. § 78u-1(b)(1)(B) (Exchange Act Section 21A(b)(1)(B)). While this defense relates only to controlling person liability for insider trading, it is nonetheless noteworthy for providing an explicit Chinese Wall defense.

[b] Rule 10b5-1

Rule 10b5-1, promulgated in 2000, provides affirmative defenses to violations of *Rule 10b-5*, including a provision that a broker-dealer or other entity may "demonstrate that a purchase or sale of securities is not 'on the basis of' material nonpublic information" if the person making the investment decision was not aware of the information and the broker-dealer or other entity had implemented reasonable policies and procedures to ensure that investment decisions would not be based on such information. n6 In the release accompanying the rule, the SEC noted that a broker-dealer could reduce the risk that the person making the investment decision, such as a trading desk employee, would be aware of material, nonpublic information by "segregat[ing] its personnel and otherwise us[ing] information barriers so that the trader for the firm's proprietary account is not made aware of the material nonpublic information." n7

[c] Tender Offers: Rule 14e-3 and 14e-5

To the extent that Section 14(e) of the Exchange Act may provide a private right of action, the rules under that section also recognize a defense where an effective information barrier exists. n8 Rule 14e-3, promulgated under the Exchange Act by the SEC, prohibits any person from trading on the basis of material, nonpublic information with respect to tender offers. The rule expressly includes a defense for employees of a broker-dealer or other entity so long as those employees are walled off behind an effective information barrier. n9 For the defense to apply, the person making the investment decision must not have known the material, nonpublic information and the broker-dealer must have implemented "one or a combination of policies and procedures, reasonable under the circumstances" to prevent violations of the rule. n10 In the adopting release for Rule 14e-3, the SEC indicated that reasonable procedures may include, but are not limited to, those that restrict the purchase or sale of the security, such as the use of restricted and watch lists, or those that prevent an individual from knowing the material, nonpublic information, such as the implementation of an information barrier. n11

Rule 14e-5 prohibits fraudulent, deceptive or manipulative acts in connection with tender offers for equity securities. n12 Specifically, the rule states that "no covered person n13 may directly or indirectly purchase or arrange to purchase

any subject securities or any related securities except as part of the tender offer." n14 The rule, however, contains an exception for purchases or arrangements to purchase by an affiliate of the dealer-manager as long as certain information barriers are implemented and enforced between the affiliate and the dealer-manager n15

[3] Minimum Elements Required for Information Barriers

Multiservice firms establish information barriers to restrict the flow of material, nonpublic information between employees who regularly acquire or develop such information, such as investment bankers, and employees who buy, sell, or recommend the securities to which the information relates. Although firms must tailor their information barriers to address the specific nature of their businesses, the SEC and the SROs have set forth certain minimum elements necessary to create an effective information barrier.

[a] SEC Regulation

Following the passage of ITSFEA, the SEC's Division of Market Regulation published a report of its review and analysis of broker-dealers' information barrier policies and procedures. n16 Throughout its report, the Division emphasized the importance of a firm's compliance department to the proper functioning of the firm's information barrier, and it outlined the following minimum elements for an adequate information barrier:

- Substantial control, preferably via a compliance department, of relevant interdepartmental communications;
- Reviews of employee trading through the effective use of some combination of watch, restricted and rumor lists;
- Adequate memorialization of information barrier procedures and documentation of all actions taken pursuant to those procedures; and
- Heightened reviews of or restrictions on proprietary trading while the firm is in possession of material, nonpublic information.

[b] SRO Regulation

In June 1991, the NASD and the NYSE issued a Joint Memo on Chinese Wall Policies and Procedures, setting forth the minimum elements necessary to formulate an adequate information barrier. n17 While reiterating that information barriers may vary from firm to firm, the SROs, following guidance from the SEC's 1990 report, set forth the following minimum requirements:

- Information barrier policies and procedures must be "formalized, organized and incorporated within a firm's procedural/policy manuals." Such documentation must be sufficient to allow the recreation of actions taken pursuant to the information barrier procedures, including documentation of policies, analyses and investigations.
- Firms that conduct both investment banking and research or arbitrage activities must maintain some combination of restricted and watch lists and must conduct reviews of proprietary and employee trading in securities appearing on the lists. The SROs set forth specific minimum documentation standards concerning such lists.
- All firms must investigate possible misuses of material, nonpublic information, including any transactions in restricted or watch list securities. In addition, each investigation initiated must be properly

documented.

- Information barriers must include policies and procedures designed to restrict material, nonpublic information only to employees who have a "need to know." These procedures include: policy statements, restrictions on access to records and support systems for sensitive departments, and supervision of all interdepartmental communications ("wall-crossing") involving material, nonpublic information.
- Information barriers must include physical separation of the trading and sales departments from departments that regularly receive confidential information.
- Every firm must establish and maintain adequate training and education programs regarding material, nonpublic information.
- Every firm must require each employee to sign an attestation of his or her knowledge of the insider trading rules and regulations at least once during the course of employment.

Several SROs rules also specifically provide for the use of information barriers to manage potential conflicts of interest in connection with proprietary trading activities. n18

[4] Information Barriers in the Context of Conflicts of Interest

Regulators have also endorsed the use of information barriers to address conflicts of interest. In 1988, the SEC spoke on this issue when a regulated entity was sued for non-disclosure of material nonpublic information when acting in two capacities on the same transaction. In a letter response to the court's request for comment, the SEC's General Counsel acknowledged that the firm had a conflict of interest. n19 He opined, however, that "violations of the federal securities laws stemming from these conflicts can be avoided through the use of well-established preventive policies and procedures, such as Chinese Walls, restricted lists and watch lists." n20

In recent years, concerns about research analysts' activities and perceived conflicts of interest between a firm's investment banking and research activities have prompted action by Congress, the SEC, the SROs, the states, other jurisdictions, and the industry itself. Among the many new research-related requirements are those imposing information barriers and restricting interaction between investment bankers and research analysts. While these requirements do not specifically provide for or relate to potential private claims, they may be relevant to a private claim, particularly an allegation of a misleading recommendation n21

[a] Global Research Analyst Settlements

In April 2003, the SEC and SROs, along with state regulators, announced a global settlement of enforcement actions against ten firms to resolve conflict of interest issues relating to equity research analysts ("Global Research Settlement"). The SEC and SROs alleged that the firms "created or maintained inappropriate influence by investment banking over research analysts, thereby imposing conflicts of interest on research analysts that the firms failed to manage in an adequate or appropriate manner." n22 As part of the Global Research Settlement, the firms agreed to an extensive set of undertakings that impose detailed changes on the firms' equity research and investment banking activities. n23 While the Global Research Settlement is a court-issued injunction and therefore applies only to the settling firms, state regulators and other third parties have looked to its terms to define a set of "best practices" to supplement the SRO Rules. n24

The major provisions regarding structural and organizational separation between investment banking and equity research cover various aspects of the two businesses including the following: n25

- Separate reporting lines for equity research and investment banking within the firm;
- Physical separation between equity research and investment banking;
- Separate dedicated legal/compliance staff;
- Determination of the research budget, research analyst compensation, and research analyst evaluations without input from investment bankers;
- Restrictions on communications between investment bankers and research analysts; and
- Restrictions on research analysts' participation in investment banking activities.

[b] Section 15D of the Exchange Act and SRO Rules

In an effort to "foster greater public confidence in securities research and to protect the objectivity and independence of securities analysts," Congress passed the Sarbanes-Oxley Act, which added a new section 15D to the Exchange Act. n26 Without specifically imposing an "information barrier" requirement on broker-dealers, section 15D requires the SEC and SROs to adopt rules designed to "establish structural and institutional safeguards within registered brokers or dealers to assure that securities analysts are separated by appropriate informational partitions within the firm from the review, pressure, or oversight of those whose involvement in investment banking activities might potentially bias their judgment or supervision." n27

Both before and after the passage of section 15D, the SROs adopted new rules to address equity research analyst conflicts of interest. NASD Rule 2711 and NYSE Rule 472 address an extensive set of equity research analyst and research report issues, including information barriers between research analysts and investment bankers. These rules impose requirements similar to those set forth in the Global Research Settlement.

[5] Effectiveness in Litigation

Information barriers have become an important part of multiservice broker-dealers' internal policies and procedures. However, the effectiveness of information barriers as a defense against private claims is largely untested. There is a surprisingly small number of cases that address the issue of the conflicting duties of a multiservice financial firm and whether an effective Chinese Wall policy would provide a defense against a claim that such duties had been breached.

Arguably, the strongest case for the effectiveness of a Chinese Wall defense is *Connell v. Chase Manhattan Bank National Association*, a state law breach of duty case that predates ITSA and ITSFEA. n28 In *Connell*, a pension fund alleged that it purchased stock in a company based on Chase's positive recommendation even though, at the same time, Chase's investment services department was in possession of negative, nonpublic financial information about the company. The Court denied the pension fund's motion for summary judgment, declining to impute one department's knowledge of the issuer to another. The Court found that the "potential for conflict was foreseen and controlled by the regulations of the SEC and the Comptroller of the Currency" and "[t]he establishment of the 'Chinese Wall,' which resulted in a separation of the knowledge of the investment officers from that of the other departments, was the result." n29

The Ninth Circuit's decision in *Cooper v. Pickett* is also helpful. n30 In *Cooper*, plaintiffs alleged that analysts issued false research reports in light of information known by investment bankers. In considering this question, the court quoted Section 15(f) and then stated: "If [defendants] have established [Chinese Wall] policies and followed them in this case, *they may raise that as a defense*." n31 The court went on to state that there was a question of fact whether such a wall was effective: "The existence of such policies does not, however, preclude plaintiffs from asserting in their

complaint that inside information was misused." n32

In *Nelson v. Craig-Hallum, Inc.*, investors alleged that Craig-Hallum violated Section 10(b) of the Exchange Act and *Rule 10b-5* when it issued misleading statements and recommendations in various research reports regarding one of its investment banking clients at the same time that its investment banking department had material, nonpublic financial information about the client. n33 Although Craig-Hallum moved to dismiss the claim based on its unwritten Chinese Wall procedure that precluded its investment banking division from sharing the information with its research department, the Court refused to dismiss because a material factual dispute existed as to whether the Chinese Wall procedure was followed. The Court raised the question of whether an unwritten Chinese Wall procedure could be a complete defense, and whether it should have been reinforced through the use of a restricted list. n34

Finally, in *Cotton v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, investors alleged that Merrill Lynch violated *Rule 10b-5* when its investment banking division failed to share nonpublic information about an impending merger with the firm's brokerage customers. n35 While the magistrate judge's analysis did not use the vocabulary of the "Chinese Wall," the judge reasoned that the multiservice financial firm was caught in a situation of dual loyalty, *i.e.*, an obligation to its investment banking client to keep confidential information secret and to its retail customers to reveal all it knew. In balancing these two demands, the magistrate judge concluded that plaintiffs had failed to show that Merrill had any duty to tell the confidential information to its retail clients. n36 *Cotton* has been interpreted by some commentators as implicitly endorsing the Chinese Wall defense. n37

(n34)Footnote 34. Note that in *In re Federated Department Stores, Inc., 1991 Bankr. LEXIS 288 at *3 (Bankr. S.D. Ohio. 1991)* , the Bankruptcy Court ruled that Fidelity Management & Research Company would not be violating its duties as an Official Bondholders' Committee member by trading in the securities of the debtors and a non-debtor while the proceeding was pending if it adopted Chinese Wall procedures, among other things, to block its traders from misusing any material, nonpublic information in its possession.

(n35)Footnote 35. 699 F. Supp. 251 (N.D. Okla. 1988) . In addition to acting as an investment banking advisor to a merger, Merrill had also, acting as a broker, executed a sale of the plaintiffs' stock in one company just before the company merged with another (and, after the merger, the price of the stock surged). The plaintiffs alleged that since Merrill was aware of the pending merger, it had a fiduciary duty to pass this information on to its brokerage customers.

(n36)Footnote 36. *Id.* at 256 .

(n37)Footnote 37. *But see* Slade v. Shearson, Hammill & Co., No. 72-Civ. 4779 (RC), 1974 U.S. Dist. LEXIS 13000 (S.D.N.Y. Jan. 2, 1974) (remanding for resolution of factual issues and declining to answer the question of whether a broker-dealer with an information barrier between its retail sales and investment banking departments may solicit transactions in securities with respect to which its investment banking department has material, negative, nonpublic information). The district court had denied the defendants' motion for partial summary judgment and certified the question to the appellate court. Several factors suggest, however, that courts and regulators would not follow *Slade* because it predates Congressional and regulatory endorsement of the use of Chinese Wall procedures to address conflicts of interest at multi-service financial institutions.

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.09

§ 5C.09 Voidness Under Section 29(b)

Section 29(b) provides generally that any contract made in violation of the Exchange Act or any rule or regulation thereunder, as well as any contract whose performance would involve such a violation, is voidable (at the option of the innocent party) against (1) any person who has made or engaged in the performance of the contract and (2) any person, not a party to the contract, who acquires any right under the contract with actual knowledge of the facts resulting in the violation. n1 In order to void a contract under Section 29(b), a plaintiff must show (1) that the contract was illegal or involved a prohibited transaction, (2) that the plaintiff is in contractual privity with the defendant, and (3) that the plaintiff is within the "class of persons the [Exchange] Act was designed to protect." n2 For an agreement to be declared void under Section 29(b) it must be incapable of being performed without violating the securities laws, not merely tangential to a violation of those laws. n3

The distinctive danger that Section 29(b) poses for broker-dealers is that if an entity whose business requires it to register as a broker-dealer under Section 15 fails to do so, every contract it enters into in the course of that business may be voidable at the option of the other party. n4 Section 15 of the Exchange Act requires any non-exempt person who acts as a "broker" or "dealer" to register with the SEC. n5 No properly advised company will make the mistake of failing to register before engaging in traditional broker-dealer activities like acting as a broker or market maker in stocks and bonds. However, the evolution of new markets and new ways of doing business can create traps for the unwary. n6

For example, questions have arisen concerning whether an operator of a website designed to facilitate communications among registered broker-dealers, between registered broker-dealers and their customers, or otherwise between buyers and sellers of securities, is itself required to register as a broker-dealer. In responses to requests for no-action letters, the SEC staff has provided some guidance concerning the limits with which a website's operations must comply to avoid the need for registration, and has concluded in several cases that the operator of such a website would be required to register. n7 This raises the possibility that transactions effected through an unregistered website might be voidable under Section 29(b).

FOOTNOTES:

(n1)Footnote 1. 15 U.S.C. § 78cc(b). Section 29(b) also is discussed in *Section 5.03[2][c] supra*. Although the statute uses the word "void," the courts read Section 29(b) to render a contract "merely voidable at the option of the innocent party." See, e.g., *Berkeley Inv. Group, Ltd. v. Colkitt*, 455 F.3d 195, 205 (3d Cir. 2006) (quoting *Mills v. Elec. Auto-Lite Co.*, 396 U.S. 375, 387-88 (1970)).

(n2)Footnote 2. See *Regional Props., Inc. v. Fin. Real Estate Consulting Co.*, 678 F.2d 552, 559 (5th Cir. 1982) (quoting *Eastside Church of Christ v. Nat'l Plan, Inc.*, 391 F.2d 357, 362 (5th Cir. 1968)) .

(n3)Footnote 3. See, e.g., *Berkeley Inv. Group*, 455 F.3d at 206-07 (contract requiring seller of convertible debentures to convert them into unregistered shares of stock was not subject to rescission based on allegation that buyer's downstream securities transactions would violate securities laws).

(n4)Footnote 4. See *Lawrence v. Richman Group of Conn., LLC*, 407 F. Supp. 2d 385, 389 (D. Conn. 2005) , aff'd, 2006 U.S. App. LEXIS 25613 (2d. Cir. 2006) (stockbroker could not sue syndicator for breach of mutual exclusivity marketing contract because syndicator was not a properly registered securities broker or dealer and therefore marketing contract was unenforceable under Section 29(b)); *Couldock & Bohan, Inc. v. Societe Generale Secs Corp.*, 93 F. Supp. 2d 220, 232 (D. Conn. 2000) (improperly unregistered broker-dealer could not sue clearing broker for breach of clearing agreement, which was unenforceable under § 29(b)).

(n5)Footnote 5. A "broker" is defined under the Exchange Act as "any person engaged in the business of effecting transactions in securities for the account of others." 15 U.S.C. § 78c(a)(4)(A). A "dealer" is defined as "any person engaged in the business of buying and selling securities for such person's own account," but only if the person does so "as a part of a regular business." 15 U.S.C. § 78c(a)(5)(A)-(B). The definition of a dealer would literally apply to an investor who supported himself by investing in the stock market, but the courts typically have distinguished such "traders" from dealers, whose characteristic attributes include transacting with a regular clientele, transacting in substantial part directly with investors rather than with other dealers or through exchange members, and holding themselves out to the public as being engaged in dealer activities. See Louis Loss & Joel Seligman, *Fundamentals of Securities Regulation* 812-15 (5th ed. 2004). Banks are excluded from the definitions of "broker" and "dealer" if they only engage in certain enumerated securities-related activities. See 15 U.S.C. §§ 78c(a)(4)(B)-(D), 78c(a)(5)(C); *Definitions of Terms and Exemptions Relating to the "Broker" Exceptions for Banks*, Exchange Act Release No. 56501, 72 Fed. Reg. 56,514 (Oct. 3, 2007) . In addition, a contract with a bank that has failed to register properly as a broker under the Exchange Act is not void or voidable under Section 29(b) when the bank acted in good faith, had reasonable policies and procedures in effect to comply with registration requirements and the violation did not cause significant harm, financial loss or cost to the person seeking to void the contract. Exchange Act Release No. 56501, 72 Fed. Reg. at 56,546.

(n6)Footnote 6. A firm that is unsure whether it must register may request an informal administrative interpretation from the SEC staff. 17 C.F.R. § 202.2.

(n7)Footnote 7. See, e.g., *Swiss American Securities, Inc.*, SEC No-Action Letter, 2002 SEC No-Act. LEXIS 597 (June 4, 2002); *BondGlobe, Inc.*, SEC No-Action Letter, 2001 SEC No-Act. LEXIS 140 (Feb. 6, 2001); *MuniAuction, Inc.*, SEC No-Action Letter, 2000 SEC No-Act. LEXIS 359 (Mar. 13, 2000); *Charles Schwab & Co.*, SEC No-Action Letter, 1996 SEC No-Act. LEXIS 976 (Nov. 27, 1996).

* This chapter was prepared by partners in the Broker-Dealer Group of Wilmer Cutler Pickering Hale and Dorr LLP ("WilmerHale"). CHAPTER SA-6 Special Update to Chapter 6 -- Market Manipulation *

2- Federal Securities Exchange Act of 1934

Regulators, legislators and the media continue to focus on the issue of market manipulation. This Special Update highlights some of the recent developments in the law of market manipulation under the Federal Securities Exchange Act of 1934, which will be addressed in the next update of the Chapter.

Following rapid and dramatic fluctuations in the equity markets, and the sale of Bear Stearns and the failure of Lehman Brothers, regulators launched a number of investigations into possible market manipulation. and @_)_and_footnotes(n2);.vk n1 A particular focus of these investigations is whether short sellers spread false rumors about certain issuers to drive down the price of those issuers' securities. Although the regulators have announced no charges arising out of these investigations, they have continued to seek additional information from market participants and have served additional "waves" of subpoenas in connection with these investigations.

The market fluctuations of 2008 also lead to a series of rules and regulations imposing unprecedented limitations on short selling. The SEC adopted a new anti-fraud rule expressly aimed at abusive short selling, and eliminated the market-maker exception to Regulation SHO. and @_)_and_footnotes(n3);.vk n2 For a period of twenty days in September-October 2008, the SEC imposed an outright ban on short selling the securities of 799 specified financial firms. and @_)_and_footnotes(n4);.vk n3 A temporary rule was adopted in late 2008 imposing a hard "T+3 close out requirement," mandating that short sellers and their broker-dealers deliver securities and close out the short sale transaction by the close of business on the settlement date, three days after the transaction date. and @_)_and_footnotes(n5);.vk n4 The SEC adopted as a final rule the hard "T+3 close out requirement" on July 27, 2009 and @_)_and_footnotes(n6);.vk n5. Also in late 2008, the SEC adopted a temporary rule requiring that institutional investment managers who manage accounts with an aggregate value of \$100 million per year file a "Form SH" report on a weekly basis reporting to the SEC on short sale activity and positions. and @_)_and_footnotes(n7);.vk n6 Although the rule expired on August 1, 2009, without being renewed or extended, the SEC identified new efforts underway to "substantially increase the public availability of short sale-related information" including by increased reporting by the self-regulatory organizations. and @_)_and_footnotes(n8);.vk n7 Three specific initiatives identified by the SEC are:

- Daily publication by the SRO's of aggregate short-selling volume in individual equities;
- Publication by the SRO's of individual short sale transactions on a one-month delayed basis; and

2- Federal Securities Exchange Act of 1934

- Publication by the SEC on a twice monthly basis of data on "fails to deliver."

The SEC also announced it will host a roundtable on September 30, 2009, to further consider disclosure of individual short sale positions, as well as issues related to securities lending and pre-borrowing.
n8

One area of particular media attention has been the "uptick" rule. Prior to June 2007, Rule 10a-1 imposed a "price test" on short selling.
n9 In a declining market, no short sale could be executed at a price at or below the last reported sale. Following the market fluctuations of 2008, there have been repeated cries in the media, and by some legislators, for reinstatement of the uptick rule.
n10 Indeed, certain legislators wrote to SEC Chair Schapiro to communicate that if the SEC does not regulate in this area then legislation will be enacted to address the perceived short sale abuses.
n11

On April 10, 2009, the SEC published a release seeking comment on two alternatives for reinstating short sale price restrictions, and three versions of a possible "circuit breaker" rule which would impose restrictions only upon a significant intra-day price decline in a stock and only for the impacted stock.
n12

- The "Modified Uptick Rule" would limit short selling to the price above the current bid in a declining market, and at or above the current bid in a rising market. While the former uptick rule focused on the last reported *sale* price, the Modified Uptick looks at the current national best bid ("NBB"). If the last differently priced NBB was higher than the current NBB--in other words, if the market is declining--then short sale orders could only be displayed or executed if they are higher than the current NBB. If the market is rising, then short sale orders could be displayed or executed if they are equal to the current NBB.

- The "Uptick Rule" would reinstate former SEC Rule 10a-1. In a declining market, short sales would be limited to a price above the last reported sale. In a rising market, short sales would be limited to a price at or above the last reported sale.

- The "Circuit Breaker Halt Rule" would be triggered by a 10% or more decrease in the price of a covered security from the price of the previous day's last reported trade, and would prohibit selling short the covered security for the remainder of the trading day.

- The "Circuit Breaker Modified Uptick Rule" also would be triggered by a 10% or more decrease in the price of a covered security from the price of the previous day's last reported trade, and would require adherence to the "Modified Uptick Rule" for that covered security for the remainder of the trading day.

- The "Circuit Breaker Uptick Rule" also would be triggered by a 10% or more decrease in the price of a covered security from the price of the previous day's last reported trade, and would require adherence to the "Uptick Rule" for that covered security for the remainder of the trading day.

In addition to the range of possible rules described above, the SEC noted the range of possible exemptions to apply to any such rule. The SEC also sought comment with respect to derivative transactions, noting that such transactions would not be subject to the proposed rules. To discuss the proposed rules and exemptions, the SEC held a "Roundtable to Examine Short Sale Price Test and Circuit Breaker Restrictions" on May 5, 2009, involving academics, broker-dealers, public companies, hedge funds and self-regulatory organizations. Comments on the proposed rules were due on June 19, 2009, and the SEC received almost 4,000 unique comment letters.

The SEC announced on August 17, 2009, that it was re-opening the comment period with respect to the proposals, and

highlighted a possible "Alternative Uptick Rule." _and_@_)_and_footnotes(n14);vk n13 Under this rule, short selling would only be allowed at a price above the current national best bid. The Alternative Uptick Rule would not allow short sales to get immediate execution, and therefore would impose a greater restriction on short selling than the prior proposals. The SEC acknowledged that under the Alternative Uptick Rule, the benefits of short selling--market liquidity and pricing efficiency--might be reduced. _and_@_)_and_footnotes(n15);vk n14 The SEC has sought comment on the proposed "Alternative Uptick Rule" by September 21, 2009, and can be expected to adopt some version of an uptick rule and/or circuit breaker test sometime thereafter.

The Chapter on Market Manipulation will be updated over the coming months to address all of these developments in detail, in addition to other developments with respect to market manipulation.

§ 6.03 Government Regulation of Market Manipulation

[1] Regulation Before the Exchange Act

[2] Legislative History of Market Manipulation Provisions of the Exchange Act

[3] Definition of Market Manipulation

[4] Prohibited Practices

[a] Section 9 Generally.

[b] Section 9(a)(1)--Wash Sales and Matched Orders.

[c] Section 9(a)(2)--Manipulative Transactions.

[d] Sections 9(a)(3), (4) & (5)--Touting, Tipster Sheets and Other Misrepresentations.

[e] Section 10(b) and Rules Relevant to Market Manipulation.

[f] Section 15(c)--Brokers and Dealers Engaged in Transactions in Over-the-Counter Markets.

[i] Section 15(c)(1) and Rules Relevant to Market Manipulation.

[ii] Section 15(c)(2) and Rules Relevant to Market Manipulation.

[5] Restricted Practices

[a] Regulation of Distributions: Regulation M.

[i] Rule 101: Activities by Distribution Participants (Underwriters, Brokers, Dealers).

[ii] Rule 102--Activities by Issuers and Selling Securities Holders During a Distribution.

[iii] Rule 103--Nasdaq Passive Market Making.

[b] Regulation of Stabilization Measures: Section 9(a)(6) and Rule 104 of Regulation M.

[i] Rule 104 of Regulation M--Stabilizing and Other Activities in Connection with an Offering.

[c] Regulation of Short Sales: Section 10(a), Old Rules 10a-1, 10a-2, and 3b-3, New Rule 201 of Regulation SHO and Rule 105 of Regulation M.

[i] Rule 3b-3--Definition of "Short Sale".

[ii] 10a-1--Short Sales.

[iii] Rule 10a-2--Requirements for Covering Purchases.

[iv] 10b-21--Naked Short Selling Antifraud Rule.

[v] Rule 105 of Regulation M--Short Selling in Connection with a Public Offering.

[vi] Regulation SHO.

[vii] Short Sale Reporting Requirements.

[d] Regulation of Options: Sections 9(b)-(d) and (g).

[i] Section 9(b) and Rule 9b-1.

[ii] Sections 9(c), 9(d) and 9(g).

[e] Regulation of Practices Affecting Market Volatility: Section 9(h).

[f] Rule 10b-18 Safe Harbor for Issuer Repurchases.

§ 6.04 Remedies for Market Manipulation

[1] Civil Remedies

[a] Section 9(e).

[b] Section 10(b).

[2] Enforcement Remedies

[a] Injunctive Relief.

[b] Cease and Desist Orders.

[c] Profit Disgorgement.

[d] Civil Penalties.

[e] Bar Orders.

[f] Criminal Penalties.

[g] Regulation of Brokers and Dealers.

§ 6.05 SRO Regulation of Market Manipulation

[1] Manipulative Devices

[a] FINRA.

[b] New York Stock Exchange.

[c] AMEX (NYSE Euronext).

[2] Options

§ 6.06 Contemporary Contexts of Market Manipulation

[1] The Financial Crisis of 2008-2009

[a] Government Investigations Into Short Selling.

[b] Rule-Making Regarding Short Selling.

[c] Regulatory Actions Involving PIPE Transactions.

§ 6.01 Introduction

When Congress passed the Securities Exchange Act of 1934 (the "Exchange Act"), it sought to address many of the problems that had contributed to the stock market crash of 1929 by proscribing conduct designed to create fictitious market forces that have an artificial impact on the price of a security. Yet many of the manipulation schemes that existed in 1929 are still a problem today. With advances in technology and the increased popularity of investing in securities, market manipulation has become more widespread than ever before, and the need to address manipulative schemes has become more urgent. In this chapter, we will describe the most common types of manipulation schemes, explain the complex web of rules and regulations governing market manipulation, and discuss contemporary contexts that have made market manipulation such an important issue today.

The Securities and Exchange Commission ("SEC" or "Commission") and self-regulatory organizations ("SROs") have promulgated a wide array of rules and regulations designed to detect and prosecute persons engaged in and profiting from fraudulent practices in the marketplace. These rules and regulations address two types of practices that harm investors--deception and manipulation--both of which were captured in the broad language of Section 10(b) of the Exchange Act, which prohibits "any manipulative or deceptive device or contrivance." n1 Deception generally involves the misrepresentation or omission of a material fact concerning a company, or the improper use of inside information to conduct stock transactions (insider trading). Manipulation generally involves the creation of fictitious market forces for the purpose of artificially impacting the price of a security. There is no neat division between these two categories. For example, in "pump and dump" schemes, stock promoters employ both deception and manipulation by obtaining a significant block of shares in a struggling business, disseminating false information about that stock to create a false picture of buying momentum (and often paying others to recommend the stock), then selling their shares before the stock collapses.

In addition to Section 10(b), which Congress passed to combat fraudulent activities generally, Congress also sought to prohibit manipulative acts on national securities exchanges through Section 9, and to prohibit fraudulent acts by brokers

and dealers in the over-the-counter markets through Section 15(c). Manipulative activities considered to have no redeeming value for the securities market were banned outright. Other activities that were particularly susceptible to manipulation, but perceived as essential to the smooth functioning of the marketplace, were made subject to strict SEC oversight. Thus, for example, the Exchange Act contains provisions that prohibit wash sales and matched orders, which serve no beneficial purpose, while authorizing SEC regulation of transactions designed to stabilize stock prices which, under certain circumstances, may be appropriate, but are prone to abuse.

Market manipulation has proven difficult to police because it continually evolves with developing market trends. In the mid-1980s, enforcement efforts focused on junk bond and other high risk transactions, resulting in a much publicized series of prosecutions against Boyd Jefferies, Ivan Boesky and Michael Milken. In the 1990s, the media for manipulation greatly expanded, as the explosive growth of Internet stock trading was accompanied by widespread dissemination of fraudulent information. At the turn of the twenty-first century, financial fraud cases, such as Enron and WorldCom, involved fraud on a massive scale and attempted to extend primary actor liability to accountants, investment banks, attorneys, and others, who allegedly participated in a scheme to inflate corporate earnings by providing services in connection with complex structured finance transactions and hedging techniques. And in the wake of the 2008-2009 financial crisis that resulted in credit markets seizing up, dramatic falls in the stock market, and the exposing of old fashioned Ponzi schemes on a scale previously unimagined, regulators and courts have found themselves confronted with a wide array of issues relating to market manipulations.

Like the methods of manipulation, the law is always evolving to deal with new cases of market manipulation. As the capital markets continue to evolve, both courts and regulators will be required to apply and adapt the securities laws to new forms of manipulative conduct.

CHAPTER 6 Regulation of Market Manipulation

2-6 Federal Securities Exchange Act of 1934 § 6.02

AUTHOR: Daniel J. Kramer, Marc E. Elovitz, William H. Gussman Daniel J. Kramer is Co-Chair of the Securities Litigation and Enforcement Group of Paul, Weiss, Rifkind, Wharton & Garrison. Marc E. Elovitz is a partner in the Investment Management and Litigation Departments of Schulte Roth & Zabel LLP. William H. Gussman, Jr. is a partner in the Litigation Department of Schulte Roth & Zabel LLP. § 6.02 Common Types of Market Manipulation

There is no shortage of ways to manipulate the securities markets. It is not possible to capture the universe of manipulative devices, and the specific ways in which markets may be manipulated constantly evolves with changes in technology. There are, however, a number of manipulative practices that occur with some degree of regularity. We describe those practices in this section.

[1] Mediums Used to Perpetrate Market Manipulation

The Securities and Exchange Act of 1934 was enacted to respond to manipulative and deceptive practices in the securities market. In the late 1920s and early 1930s, congressional investigations into the securities market exposed an increase in pool operations where investors would fictitiously increase stock prices through a series of well-timed purchases, then unload their holdings on the unsuspecting public before prices dropped. n1

Traditional, non-electronic forms of market manipulation often required a "boiler room" network of promoters and brokers who participated in phone banking and made hundreds of unsolicited calls a day to potential customers. n2 These broker-dealers applied high-pressure tactics, providing inadequate financial information to investors or not cautioning them as to the risk involved in purchasing the stock without such information.

Technologies changed the way that investment information is disseminated and stocks are traded. Now, enormous quantities of financial data, analyses and other information are instantaneously available to millions of people who can quickly trade on that information. Those who seek to manipulate the markets have exploited these developments. n3 An individual stock promoter working from a single computer can create websites and use on-line newsletters, e-mail, blogs, instant messages, and social networking sites to create a false picture of interest in a stock. Because these communications reach a large audience, manipulators can create enormous demand that can dramatically alter stock prices in a short time period. n4 The Internet allows manipulators to retain their anonymity, presenting themselves as

sophisticated stock analysts, or impersonating company officials or famous commentators. n5

While the mediums used to manipulate the market have changed over time, the same general manipulation schemes are consistently perpetrated. These schemes can be broken down into two categories: demand-side and supply-side manipulation.

[2] Demand-Side Manipulation (Purchase of Securities)

Cross Trading and Circular Trading allow brokers to raise stock prices by creating a misleading appearance of increased market activity, or to prevent a decrease in price by keeping sold shares off the market. Cross Trading occurs where a broker arranges for transfers of stock between two customer accounts. n6 Circular trading involves trades that rotate stock through a series of accounts until the initial buyer or seller ends the series as the ultimate seller or buyer respectively. n7 The SEC has enjoined broker-dealers and/or revoked their registrations after reviewing evidence that brokers kept shares off the market by crossing them back and forth between customer accounts or created false market activity by selling shares only to buy them back for the same customers. n8

Domination and Control of Market is a generic term referring to manipulative practices designed to dominate the market in a particular stock and thereby control its price. One of the most common indicia of domination and control is the percentage of transactions in a stock attributable to a particular person or entity. n9 However, domination alone is not unlawful; there must also be proof of manipulation. n10 For example, in *Trane Co. v. O'Connor Securities*, the court denied a corporation's motion to enjoin a securities firm from further trading in the corporation's securities. The court rejected plaintiff's claim that the corporation had dominated and manipulated the sale of plaintiff's stock, reasoning that defendant traded the securities openly and was not involved in any fictitious transactions, and that there was no collapse in the market of that stock once defendant's trading activities subsided. n11 The court concluded that "[i]f what defendants did constituted manipulation within the meaning of [Exchange Act] Section 9(a), most large scale transactions in a single security would be prohibited. That was clearly not the purpose of Congress. It sought to protect the small investor by maintaining a market controlled by natural forces rather than by intervention of artificial manipulative devices which would distort the market to the detriment of the investing public." n12

Courts are more likely to entertain a claim of market manipulation when, in addition to dominating the trading of a particular security, the defendant: kept increasing its bids; n13 was often the highest bidder; n14 could have purchased below the bid price, but instead raised its bid; n15 controlled customer accounts on both the buy-side and the sell-side; n16 or increased its bids even though it could fill buy orders from its inventory. n17

In a recent case regarding manipulation of natural gas futures contracts pricing, a court found that instant messages ("IMs") between two defendants gave rise to a strong inference of scienter to drive up a contract spread price. n18 The defendants argued that the IMs were merely reflections of real-time observations of the market and discussions of how many contracts to purchase and at what price. The court noted that it is difficult to decipher the meanings of IMs because of various abbreviations. However, it was skeptical that instructions, such as "drive out," "push the spread" and "take the spread to certain prices," were merely directions regarding the prices at which trades should be executed. n19

Free Riding occurs when a trader buys securities with the intention of paying only if the stock price rises between the transaction and settlement dates, n20 or buys securities "without sufficient funds to pay for these purchases and then us[es] the proceeds of the sale of that same stock to cover the purchase price." n21 In either case, the purchase order is not a true reflection of market demand for the stock.

Front-Running n22 is "[t]rading a stock, option or future while in possession of non-public information regarding an imminent block transaction that is likely to affect the price of the stock, option or future." n23 One clearly prohibited scenario involves a broker selling or buying stock for its own account before executing its customer's order. In that instance, the broker may receive a more favorable price than its customer, as the broker's transaction may adversely

affect the price of the stock at the time of the customer's transaction. n24

Marking the Close is a means of creating false pressure on the market, in which the manipulator increases or decreases the quoted bid for a security, or purchases or sells stock at or near the close of the market to either increase or decrease the closing price of the security. n25 The closing price is significant because it is the price reported in the press as the final price for that trading session and influences the next day's market. The closing price is also generally used by brokerage firms to set their margin requirements for customers. n26

Painting the Tape is conduct that creates a false picture of increased trading activity through a series of transactions initiated by the manipulator. It refers to a time when stock transactions were recorded on ticker tape and the manipulator created buying activity among nominee accounts at increasingly higher prices, or caused other fictitious transaction reports to appear on the ticker tape. n27 For example, in *Crane Co. v. Westinghouse Air Brake Co.*, American Standard painted the tape in order to defeat the tender offer of its competitor Crane, by driving up the price of Air Brake stock through purchasing a large number of shares on the last day of the tender offer to make Crane's tender offer for Air Brake appear less attractive to Air Brake shareholders, then selling a significant number of shares in private sales to conceal its actions. n28

Parking and Warehousing are often used interchangeably to connote transferring shares to a customer or other broker and holding them there, either to take the shares off the market to reduce supply in order to maintain or raise the stock price, or to conceal the identity of the true owner. Parking often involves the creation of a sham sale where the seller sells stock to a purchaser who holds the stock until it is repurchased at a later date by the seller, with the seller assuming the economic risk. n29 Parking may be used to avoid net capital restrictions by transferring securities outside the brokerage firm, n30 or to raise prices after an initial public offering, by placing stock in nominee accounts and then selling the stock into the market at much higher prices post-initial public offering ("IPO"). n31 It also has been used to hide an underwriter's failure to sell the required number of shares in a "best efforts all or none" offering, by putting stocks in accounts to create a false appearance of sales, with the underwriter eventually repurchasing the stock. n32 The term "warehousing" also is often used in the context of a corporate takeover, where the acquirer purchases more than five percent of the stock of the acquired corporation and keeps the stock with another person or entity to avoid the need to file a schedule 13D, which would alert the target and the market to the buyer's position. n33

Reaching Across the Market entails a broker or dealer "taking out" or purchasing shares at the ask price of other market makers in order to raise the manipulator's bid and inflate the stock price. The manipulator can also sell shares at the bid price of other market makers to depress the stock price. n34

Reducing the Floating Supply n35 is a means of inflating the price of a security by purchasing a sufficient quantity of a company's outstanding shares to place pressure on the buy-side of the market. Manipulators can accomplish this by tying up large blocks of stock, either contractually or by obtaining an option, or refusing to execute customer sell orders. n36

Squeezing the Shorts refers to a variety of techniques designed to drive up stock prices so as to force short sellers to purchase stocks at inflated prices to cover their short sales. Strategies may include calling in shares to force sellers to cover their short positions, n37 or purchasing a large quantity of stock to make fewer shares available to cover short positions. As the stock price rises, those with short positions must post additional margin collateral or buy stock to cover their positions (which further bids up the price of the security). The manipulator then sells the stock at an inflated price to those covering their positions. n38 In *Jeffrey Weissman et al.*, the SEC imposed sanctions against a broker-dealer for manipulating the market through, among other practices, enforcing a no-net-selling policy for Health Professional Inc. ("HPI") stock and asking the clearing agent to call in a large number of HPI shares that had been loaned out, forcing various short sellers to cover their positions. The manipulation resulted in an increase in the stock price of 44% in two and a half weeks. n39

Touting consists of recommending a stock without disclosing the touter's financial interest in the stock. n40 When touting is perpetrated through the Internet, a stock promoter recommends a stock on-line without revealing that he has been compensated for the recommendation. In *Kenneth W. Schilling*, the defendant, president of iBIZ Technology Corp., provided false financial statements to an analyst, and then placed several press releases on the iBIZ website containing hyperlinks to the analyst's report. The release claimed the analyst was independent, when he had been promised company stock in exchange for writing the report. Defendant consented to entry of a permanent injunction against further violations of the antifraud provisions of the federal securities laws, and agreed to pay a civil penalty of \$20,000. n41

In a similar case, defendant James Sheret, Jr. created spam e-mails with a fictitious "AOL Investment Snapshot" banner, recommending stock in fifty-seven thinly traded companies. The e-mails stated that stock prices of the companies had recently increased without disclosing that, in many instances, the price increase was due to Sheret's prior stock purchases. The e-mails spurred wide-scale buying, and Sheret then sold his personal holdings, realizing substantial profits. The SEC filed a complaint charging Sheret with violating Section 10(b) of the Exchange Act. The court entered a permanent injunction and ordered Sheret to disgorge approximately \$378,000 in profits and to pay a civil penalty of \$110,000. The U.S. Attorney for the Southern District of New York also filed a criminal complaint against Sheret, who pled guilty to securities fraud. n42

One of the most consistently sanctioned forms of touting is "scalping," which occurs when a person purchases a security for his own account before recommending that security, then sells the security at a profit upon the rise in the market price following the recommendation. n43 Scalping often occurs when stock manipulators pose as investment advisers on the Internet and simultaneously induce a large number of investors to purchase high risk or otherwise unsuitable stock. n44

Wash Sales and Matched Orders are two of the most common means of creating a false appearance of market activity. n45 A wash sale is a sale of stock where there is no change in beneficial ownership. A matched order entails offsetting orders to buy and sell securities by placing the orders at substantially the same time, for substantially the same price and for substantially the same quantity. n46 For example, in *Edward J. Mawod & Co. v. SEC*, the court affirmed an SEC order revoking the registration of a broker-dealer and its principal for driving up the stock price of a corporation during a three month period from twenty cents to \$10.00 on the basis of trades in which the buyers and sellers were identical, or the buyers and sellers worked together to match trades. As soon as the broker-dealer stopped directing the wash sales and matched orders, the stock price dropped precipitously. n47

[3] Supply-Side Manipulation (Distribution of Securities)

Pump and Dump is a scheme where stock promoters gain a significant block of shares in a struggling business and inflates the stock price to attract investment. When the price reaches a certain level, the promoters sell or dump their shares and the market for that stock collapses. The promoters often pay brokers to recommend the stock. n48

In an Internet "pump and dump" scheme, the manipulator purchases stock, promotes it on-line through false information as to the promoter's investment track record and/or the investment itself, then dumps the stock at a profit before the market correction. In *Jonathan G. Lebed*, a fifteen year old purchased large blocks of micro cap stocks, posted false or misleading messages under multiple fictitious author names, which praised the stock on the Yahoo! Finance message board, then sold the stock as the price rose. n49 Lebed settled with the SEC and disgorged approximately \$273,000 in profits. n50

Yet another scheme attracting media attention involved a false announcement launching "Pinkmonkey," a website service that purportedly could "quickly reach a significant market share" in the study aids market. At the time of the press release, the website already had operated for 14 months, however, and had generated only \$30 in sales. Within one hour of the false release, Pinkmonkey stock climbed from \$1.50 to \$4.375 per share, peaking at \$17 two days later. The

stock plummeted once the company corrected its misrepresentations. Defendant consented to entry of a permanent injunction against further violations of the antifraud provisions of the federal securities laws, and payment of a \$20,000 civil penalty. n51

Distort and Short is a "pump and dump" scheme in reverse. n52 *SEC v. Berliner* is an example of recent distort and short scheme. n53 In that case the SEC alleged that the respondent trader, Paul Berliner, knowingly sent an untrue rumor by instant message to thirty-one market participants and then benefited by shorting the shares of the company at issue. n54 In May 2007, Blackstone agreed to acquire Alliance Data Systems ("ADS") for \$81.75 per share. n55 Then, on November 29, 2007, Berliner sent an instant message to 31 traders and securities professionals stating that ADS's board of directors was meeting to consider a revised proposal from Blackstone to acquire ADS for \$70 per share. n56 The rumor spread through Wall Street and the news media picked up the false story, causing the stock to drop by 17% within 30 minutes after the first instant message and the NYSE to temporarily halt trading. n57 ADS issued a press release denying the rumor, and by the end of the day the stock recovered, n58 but by then over 33,000,000 shares had traded--more than twenty times the previous day's volume. n59 The SEC ultimately obtained a settlement from Berliner consisting of a \$130,000 fine, \$261,229 disgorgement, a permanent injunction and a bar from association with any broker or dealer. n60

An earlier example of a distort and short scheme is *Sean Edward St. Heart*. In that case, defendant posed as a CEO and posted a fictitious message on Yahoo! claiming he was joining twelve other companies in filing a \$20 million lawsuit against NCO Group, Inc. The message caused over a \$200 million drop in NCO Group's market capitalization and a 28% drop in its stock price. St. Heart consented to entry of a permanent injunction against further violations of the antifraud provisions of the federal securities laws, and the SEC waived any monetary penalty based on the defendant's inability to pay. n61

Sham offerings involve misrepresentations over the Internet with respect to initial public offerings or the future profitability of secondary offerings. A stock can be promoted through false announcements of imminent IPOs, including the offer of "free" stock in exchange for an administrative fee or the provision of personal information. n62 In *Web Works Marketing.com, Inc.*, a company claiming to provide extraordinary residential and business long distance telephone service offered free stock to persons who registered on its website, referred others to the site, subscribed to its long distance service or remained a customer for more than six months. Although the website boasted 10,000 to 12,000 satisfied customers and claimed that the company intended to go public and that each share of stock should be worth \$38.40, it had only 35 customers and a gross revenue of \$26. Defendant consented to an order to cease and desist from committing or causing any future violation of Section 10(b) of the Exchange Act and *Rule 10b-5* thereunder. n63 In November 2001, FINRA posted an investor alert regarding faxes, spam and junk e-mail recommending investment in stocks of companies manufacturing defense, anti-terrorism or biological detection products. n64

There also have been offerings involving non-existent stocks, including investments that would seem fairly questionable even if the stocks were real. The SEC has uncovered fictitious sales of interests in eel farms, coconut plantations and projects to explore near earth asteroids. n65

Withholding occurs when the underwriter retains some of the inventory of the stock not sold in an initial public offering to manipulate the price of that stock in the aftermarket. In *Halsey Stuart & Co.*, the SEC found that it constituted a violation of the anti-fraud provisions of the securities laws where the manager of a syndicate formed to underwrite bond issues withheld unsold allotments, and traded heavily in the post-syndicate market, often bidding and paying prices at increasingly higher levels. n66 FINRA Rules require FINRA members to distribute the entire public offering at the offering price, and not to withhold shares for registered representatives or their co-employees or families. As explained in the FINRA alert, the rules are meant to prohibit the underwriters from using such securities to reward persons who can direct future business to members, or from taking advantage of their "insider" position to purchase shares for their own benefit. n67

FOOTNOTES:

(n1)Footnote 1. Norman S. Poser, *Stock Market Manipulation and Corporate Control Transactions*, 40 U. Miami L. Rev. 671, 691-97 (1986). In an early case, *United States v. Brown*, the Second Circuit upheld mail fraud convictions in a case involving a scheme to artificially inflate the price of a stock. 79 F.2d 321, 329 (2d Cir. 1935). In *Brown*, the defendants had formed a "pool" that engaged in wash sales, issued false publicity and made untrue statements about the company's earnings, while bribing brokers, their managers, clerks and other personnel who directly dealt with customers to push the stock onto unsuspecting customers.

(n2)Footnote 2. Marcy Gordon, *States Are Cracking Down On 'Boiler Room' Operations*, Investment Scams Targeted by States, Philadelphia Inquirer, July 24, 1998.

(n3)Footnote 3. The SEC has sought to deal with these challenges in a variety of ways. The SEC formed the Office of Internet Enforcement ("OIE") in July 1998 to administer the Enforcement Division's Internet program. See www.sec.gov/divisions/enforce/internet/enforce.htm (last modified Sept. 12, 2008). OIE also has developed surveillance systems to monitor web sites, message boards and chat groups for violations of securities laws, searching for suspicious phrases such as "get rich quick." See Saul S. Cohen, *Electronic/Internet Compliance*, SF51 ALI-ABA 1, 4 (Jan. 11, 2001). The OIE also oversees Cyberforce, an Internet surveillance group that works with federal agencies, the North American Securities Administration Association and various SROs to coordinate investigations into Internet fraud. See SEC Charges 23 Companies and Individuals in Cases Involving Broad Spectrum of Internet Securities Fraud, SEC Rel. No. 2000-24 (Mar. 1, 2001), available at www.sec.gov/news/headlines/internet5.htm. In addition, the SEC and FBI have formed Operation InvestNet, a nationwide joint project to combat Internet fraud. See Linda C. Quinn, *Securities Regulation and the Use of Electronic Media --Year 2000*, 1243 PLI/CORP. 127, 171 (2001). As of February 2009, the SEC maintains three Twitter feeds, including an "Investor Ed" feed, to publicize its enforcement actions and share other financial news with the public. See http://twitter.com/SEC_Investor_Ed.

(n9)Footnote 9. See, e.g., *Wright v. SEC*, 112 F.2d 89, 92 (2d Cir. 1940) ("Wright's purchases represented 79 per cent of all purchases on the Los Angeles Exchange during the active buying or 'mark-up' phase of his operations ..."); *Sayegh*, 906 F. Supp. at 944 ("During this period, Moore & Schley's trading in ICP accounted for 90% of all NASDAQ volume in ICP ADRs. This trading volume demonstrates Moore & Schley's domination, control and manipulation of the market in ICP.").

(n10)Footnote 10. See *United States v. Mulheren*, 938 F.2d 364, 370-71 (2d Cir. 1991):

While we agree, as a general proposition, that market domination is a factor that supports a manipulation charge, the extent to which an investor controls or dominates the market at any given period of time cannot be viewed in a vacuum. For example, if only ten shares of a stock are bought or sold in a given hour and only by one investor, that investor has created 100 percent of the activity in that

stock in that hour. This alone, however, does not make the investor a manipulator. The percent of domination must be viewed in light of the time period involved and other indicia of manipulation. Gane*, No. 03-61553, 2005 U.S. Dist. LEXIS 607, at *26-27 (S.D. Fla. Jan. 4, 2005) ; *SEC v. Park*, 99 F. Supp. 2d. 889, 900 (N.D. Ill. 2000) .

(n44)Footnote 44. In *SEC v. Lindberg*, Mark Lindberg along with attorneys, stock promoters and financiers worked together to acquire shares of three issuers and then sold those shares after manipulating the prices by organizing "blast" email/fax campaigns about the issuers. *See Complaint*, Civil Action No. 08CV-402CVE SAJ (D. Okla. Jul. 14, 2008). Some of these blasts exploited the devastating effects of Hurricane Katrina by stating: "Katrina means National Storm (NLST) is poised for a massive run up as demand to repair homes skyrockets." During these promotional campaigns, the price and trading volumes significantly increased and Lindberg personally obtained a profit of over \$6 million. The SEC obtained a judgment against Lindberg, permanently enjoining him from future violations and barring him from participating in an offering of penny stock. *See Judgment*, Civil Action No. 08-CV-0402-CVE-SAJ (D. Okla. Jul. 22, 2008).

(n45)Footnote 45. In *SEC v. Georgiou*, the SEC alleged that Georgiou regularly used wash sales and matched trades through nominee trading accounts thereby creating a false appearance of an active and liquid market for the purpose of artificially inflating stock prices. *See Complaint*, Civil Action No. 2:09-cv-00616-MMB (E.D. Penn. Feb. 12, 2009). To conceal his communications coordinating the trades, Georgiou used cell phones, Blackberry Messenger, and disguised email accounts. He also allegedly used the marking-the-close technique and illegal kickbacks to control the trading volume.

(n46)Footnote 46. *See, e.g., In the Matter of Rajan Moondrai, Ex. Act Rel. No. 48260*, 2003 SEC LEXIS 1804, at *3-4 (July 31, 2003) ; *SEC v. Lybrand*, 200 F. Supp. 141, 143 (S.D.N.Y. 1992) ; *Harvey Rubenstein*, Litig. Rel. No. 11,945, 42 SEC Dock. 732, 732-733 (Dec. 20, 1988).

(n47)Footnote 47. *Edward J. Mawod & Co.*, 591 F.2d at 591-92 .

(n48)Footnote 48. *See, e.g., Sunrise Fin., Inc. v. Paine Webber, Inc.*, 4 F. Supp. 2d 1035, 1037 (D. Utah 1998) ; *Vandenberg v. Adler*, No. 98 Civ. 3544, 2000 U.S. Dist. LEXIS 4050, at *24 (S.D.N.Y. Mar. 31, 2000) ; *SEC v. Calvo*, 378 F.3d 1211, 1213-14 (11th Cir. 2004) ; *Glaser v. Enzo Biochem, Inc.*, 303 F. Supp.2d 724, 731 (E.D. Va. 2003) ; *DeMarco v. Robertson Stephens, Inc.*, 318 F. Supp.2d 110, 117 (S.D.N.Y. Jan. 9, 2004) .

(n49)Footnote 49. *Jonathan G. Lebed*, 73 SEC Dock. at 741-42.

(n50)Footnote 50. In another notorious pump and dump case, defendant Gary D. Hoke Jr. created a web page that appeared to be an official Bloomberg News Service page, announcing that a NASDAQ-traded corporation was acquired by an Israeli company. Under an assumed name, Hoke posted a message reporting the acquisition with a link to the fictitious Bloomberg News Service. The publication of the false report caused the market price of the acquired company to increase substantially, then decline drastically once the hoax was exposed. Hoke consented to entry of a permanent injunction against further violations of the antifraud provisions of the federal securities laws. The SEC waived a monetary penalty based on the Hoke's demonstrated inability to pay. Criminal fraud charges also were brought against Hoke, and he pled guilty to violations of *Rule 10b-5*. Hoke was sentenced to five years probation, restitution of approximately \$93,000, and a \$200 fine. *Gary D. Hoke, Jr.*, Litig. Rel. No. 16,266, 70 SEC Dock. 1187, 1187 (Aug. 30, 1999); *United States v. Hoke*, Dock. 99-CR-411-ALL (C.D. Cal.).

(n51)Footnote 51. *SEC v. Pinkmonkey*, Litig. Rel. No. 16,919, 74 SEC Dock. 1068, 1068 (Feb. 28, 2001). Another plot, involving defendant Leszek Zbierajewski, used a false screen name to post a message on the Yahoo! Finance message board that included a doctored press release announcing a fictitious strategic alliance between Bid.com International, Inc. and America Online, Inc. Trading in Bid.com increased dramatically in response to the release, pushing the share price up from \$8.50 to \$9. Zbierajewski consented to entry of a permanent injunction against further violations of the antifraud provisions of the federal securities laws. The SEC waived a monetary penalty based on defendant's demonstrated inability to pay. *Leszek Zbierajewski*, Litig. Rel. No. 16,363, 71 SEC Dock. 217, 217 (Nov. 18, 1999). *See also, SEC v. One or More Unknown Traders in the Common Stock of Certain Issuers*, Complaint, Civil No. 1:07CV00431 (D.D.C. Mar. 6, 2007) (hacking into online brokerage accounts and placing unauthorized trades for defendant's pecuniary benefit); *SEC v. New Energy Corp.*, Litig. Rel. CHAPTER 6 Regulation of Market Manipulation

2-6 Federal Securities Exchange Act of 1934 § 6.03

AUTHOR: Daniel J. Kramer, Marc E. Elovitz, William H. Gussman Daniel J. Kramer is Co-Chair of the Securities Litigation and Enforcement Group of Paul, Weiss, Rifkind, Wharton & Garrison. Marc E. Elovitz is a partner in the Investment Management and Litigation Departments of Schulte Roth & Zabel LLP. William H. Gussman, Jr. is a partner in the Litigation Department of Schulte Roth & Zabel LLP. Edward Altabet, an associate at Schulte Roth and Richard Eisenberg, an associate at Paul Weiss, provided assistance.

§ 6.03 Government Regulation of Market Manipulation

[1] Regulation Before the Exchange Act

The federal government did not comprehensively monitor or regulate market manipulation prior to passage of the Exchange Act in 1934. However, the common law recognized that the manipulation of stock prices was a form of deception and provided a variety of remedies in law and equity. This was based on the view that the securities markets could not prosper unless they reflected true market forces. As one court explained in 1933:

When an outsider, a member of the public, reads the price quotations of a stock listed on an exchange, he is justified in supposing that the quoted stock is an appraisal of the value of the stock due to a series of actual sales between various persons dealing at arm's length in a free and open market on the exchange, and so represents a true chancering [sic] of the market value of that stock thereon under the process of attrition due to supply operating against demand. n1

State courts entertained damages actions on the ground of fraud where there was evidence of price manipulation. For example, the New York State Court of Appeals sustained a private action in fraud and deceit where corporate directors declared a dividend payable out of capital and not out of net profits, as required by state statute, thus giving a false picture of profitability and inducing the purchase of that company's stock. n2 In another pre-Exchange Act case, a New York State appellate court held a bank liable for the actions of an officer who was authorized to sell stock on the bank's behalf and who misrepresented the bid and ask prices of the stock. n3

Courts in pre-Exchange Act cases also held that contracts made for the purpose of manipulating stock prices were voidable and not enforceable between the parties. For example, the Supreme Judicial Court of Massachusetts held that a party to a contract to corner the market in a stock to force short sellers to settle at a higher price could not recover funds expended in pursuit of the contract, as the agreement was illegal and void. n4 Similarly, stock purchases based on price manipulation were held to be fraudulent and subject to rescission. n5

Federal and state governments also found ways to address stock market manipulation, mainly through the Federal Mail Fraud Act and state Blue Sky laws. Several federal circuit courts upheld convictions of market manipulators under the Mail Fraud Act, 18 U.S.C. § 338. In *United States v. Brown*, for example, the Court of Appeals for the Second Circuit upheld the conviction under the Mail Fraud Act of a president of a corporation and his business associates who drove up the stock prices of the corporation by using wash sales, bribing brokers to recommend the stock, and releasing false earning statements. n6

Wash sales and touting also could be prosecuted under various state Blue Sky laws prior to passage of the Exchange Act. n7 False or misleading statements within a prospectus also were considered fraudulent practices falling under most state Blue Sky laws. n8

Pre-Exchange Act jurisprudence, whether based on common law theories of fraud and deceit or statutory provisions regulating fraudulent business and securities practices, reflected the belief that stock prices should represent an accurate picture of the market for that stock. The courts recognized that use of investment pools, wash sales, matched orders and other manipulative devices to impact price skewed that picture to the disadvantage of the investor. Prohibitions against such devices were adopted and expanded under the Exchange Act. Several sections of the Exchange Act, such as 9(a)(2), 10(b) and 15(c), were drafted with broad wording prohibiting manipulative and deceptive devices, empowering the SEC and self-regulatory organizations the flexibility to respond to ever-changing methods of market manipulation.

[2] Legislative History of Market Manipulation Provisions of the Exchange Act

The Securities Act of 1933 and Securities Exchange Act of 1934 were in part a reaction to the speculation and market volatility that led to the stock market crash of 1929. n9 The committee reports supporting that legislation reveal that Congress perceived manipulative devices, in their broadest sense, to be a dangerous source of market instability. For example, the House Report in support of the Exchange Act stated:

[T]he most subtle manipulating device employed in the security markets is not simply the crude form of a wash sale or a matched order. It is the conscious marking up of prices to make investors believe that there is a constantly increasing demand for stocks at higher prices, or the conscious marking down of stocks to make investors believe that an increasing number of investors are selling as prices recede.

There is plenty of room for legitimate speculation in the balancing of investment demand and supply, in the shrewd prognostication of future trends and economic directions; but the accentuation of temporary fluctuations and the deliberate introduction of a mob psychology into the speculative markets by the fanfare of organized manipulation menace the true functioning of the exchanges, upon which the economic well-being of the whole country depends. n10

Congress noted that the exchanges had not sufficiently acknowledged or discouraged the full universe of harmful practices. The Senate Report in support of the Exchange Act found:

The true function of an exchange is to maintain an open market for securities, where supply and demand may freely meet at prices uninfluenced by manipulation and control. In the past this function has been fulfilled most imperfectly. The exposure of the extent and effect of manipulative practices upon organized exchanges was one of the most salutary and important accomplishments of the investigation. Stock exchange representatives have consistently minimized the extent of manipulative activities upon exchanges and, provided there were no technical wash sales or matched orders, they have not regarded manipulative devices in general use as pernicious or violative of the principles of fair, free, and open trading. The tendency has been to belittle reports of manipulative activities as unfounded rumors, unworthy of serious attention. The evidence adduced before the subcommittee has thoroughly discredited

this attitude. n11

Congress erected a two-tiered system to protect investors against market manipulation, prohibiting practices that serve no beneficial purpose and closely monitoring other practices that, while necessary to market efficiency, were often prone to abuse. n12 Thus, wash sales, matched orders and various other transactions that create actual or apparent active trading in a security, or raise or depress the price of a security for the purpose of inducing the purchase or sale of the security, were flatly prohibited under Section 9. At the same time, other practices, which were part of the normal functioning of the markets but prone to manipulation, such as transactions by persons with an interest in the outcome of a stock offering, the pegging, fixing or stabilizing of stock prices, short selling and transactions involving options, were not banned outright but were placed under the watchful eye of the SEC.

[3] Definition of Market Manipulation

The Supreme Court has avoided any bright line test or definition of practices constituting market manipulation. The Court has stated that manipulation "is and was virtually a term of art when used in connection with securities markets. It connotes intentional or willful conduct designed to deceive or defraud investors by controlling or artificially affecting the price of securities." n13 In a later case, the Court added that "[t]he term refers generally to practices, such as wash sales, matched orders, or rigged prices, that are intended to mislead investors by artificially affecting market activity." n14

The SEC also has defined market manipulation broadly. In one proceeding, the Commission wrote: "A manipulation may be accomplished without wash sales, matched orders, or other fictitious devices. Actual buying with the design to create activity, prevent price falls, or raise prices [operates] to distort the character of the market as a reflection of the combined judgment of buyers and sellers and to make of it a stage-managed performance." n15 In another proceeding, the SEC stated, more generally: "In essence, manipulation is the intentional interference with the free forces of supply and demand." n16

Under the Exchange Act, manipulation and fraud are separate forms of dishonest practices that harm investors. While fraud normally involves misstatements or omissions with respect to substantive information concerning a corporation (or non-disclosure of inside information by a fiduciary during a stock transaction), manipulation entails the creation of artificial appearances of market activity. Both have the purpose of inducing a purchase or sale of securities, but a manipulator does so with the express goal of impacting the market price of the security. Thus, whereas an action in fraud under Section 10(b) of the Exchange Act requires a showing of scienter, i.e., commission of a knowingly wrongful act (normally a material misstatement or omission), a manipulation case under Section 9(a) not only requires a showing of scienter, but adds the more specific element of manipulative purpose--normally interpreted by courts as a purpose to induce the purchase or sale of a security in order to raise or depress the market price. n17

Both fraud and manipulation, however, share the theme of misleading the investor through non-disclosure.

Section 10(b)'s general prohibition of practices deemed by the SEC to be 'manipulative'--in this technical sense of artificially affecting market activity in order to mislead investors--is fully consistent with the fundamental purpose of the [Exchange] Act to 'substitute a philosophy of full disclosure for the philosophy of caveat emptor ... ' "Indeed, nondisclosure is usually essential to the success of a manipulative scheme ... No doubt Congress meant to prohibit the full range of ingenious devices that might be used to manipulate securities prices." n18

Some courts have adopted a wider definition of manipulative device or scheme beginning with the Enron debacle and initial public offering class actions described in more detail below. In those actions, the courts broadened the reach of typical securities fraud cases involving the alleged misrepresentation of a corporation's financial condition by corporate insiders, and brought in as primary actors accountants, lawyers, and investment banks underwriting stock issues and disseminating analyst reports, and others, grouping those actors as part of a general manipulative scheme to mislead the

market. Thus, at least some courts now appear to apply the definition of market manipulation to actors who may not be directly responsible for the misrepresentations or omissions at issue, but who are described as being part of a larger pattern of deception artificially influencing stock price. n19 However, more recently some courts have expressed discomfort with this trend. n20

[4] Prohibited Practices

[a] Section 9 Generally. Section 9 is entitled "Prohibition Against Manipulation of Securities Prices," and addresses manipulative activity on the national securities exchanges. n21 It prohibits wash sales and matched orders, n22 manipulative transactions generally, n23 touting, tipster sheets and other misrepresentations on a national securities exchange, n24 and it regulates stabilization measures, n25 options n26 and practices affecting market volatility. n27

Although Section 9 applies solely to stocks listed for trading on a national securities exchange, the SEC and courts traditionally have relied on Section 9 jurisprudence when analyzing manipulation cases in the over-the-counter market under Section 17 of the Securities Act, Section 10(b) of the Exchange Act and *Rule 10b-5* thereunder, and Section 15(c) of the Exchange Act and Rules 15c1-2 et seq. thereunder. n28 It also has been argued that Section 9 applies to manipulation of exchange-registered securities in the over-the-counter market. n29

Unlike the general anti-fraud provisions of the Exchange Act, activity proscribed under Section 9 is not limited to the purchase or sale of a security. n30 Section 9 also is one of the few sections of the federal securities laws that explicitly provides both for SEC enforcement and a private right of action with respect to securities fraud. n31 However, since an implied right of action was found in Section 10(b) of the Exchange Act, Section 10(b) has been more commonly invoked, as its applicability is not formally limited to securities sold on an exchange and does not require proof of manipulative purpose. n32

[b] Section 9(a)(1)--Wash Sales and Matched Orders. Section 9(a)(1) prohibits wash sales and matched orders effected "[f]or the purpose of creating a false or misleading appearance of active trading in any security registered on a national securities exchange, or a false or misleading appearance with respect to the market for any such security ... " n33 The full text reads:

a. It shall be unlawful for any person, directly or indirectly, by the use of the mails or any means or instrumentality of interstate commerce, or of any facility of any national securities exchange, or for any member of a national securities exchange--

1. For the purpose of creating a false or misleading appearance of active trading in any security registered on a national securities exchange, or a false or misleading appearance with respect to the market for any such security,

A. to effect any transaction in such security which involves no change in the beneficial ownership thereof, or

B. to enter an order or orders for the purchase of such security with the knowledge that an order or orders of substantially the same size, at substantially the same time, and at substantially the same price, for the sale of any such security, has been or will be entered by or for the same or different parties, or

C. to enter any order or orders for the sale of any such security with the knowledge that an order or orders of substantially the same size, at substantially the same time, and at substantially the same price, for the purchase of such security, has been or will be entered by or for the same or different parties. n34

The elements of a claim under Section 9(a)(1) are: (1) a wash sale or matched orders in a security; (2) done with scienter; (3) for the purpose of creating a false or misleading appearance of active trading in that security. n35 The scienter and purpose to induce requirements are considered separate state of mind requirements. Scienter involves intent to commit a fraudulent act, while purpose to induce specifically addresses the objective of the fraudulent act, which in the context of Section 9, means purpose to induce the purchase or sale of a security by others. n36 Although manipulative purpose or intent must be shown, intent can be inferred through motive, such as a financial interest in raising or depressing the price of the security. n37

[c] Section 9(a)(2)--Manipulative Transactions. The SEC deemed Section 9(a)(2) "the very heart of the [Exchange Act]." n38 It prohibits manipulative activity on the national securities exchanges. The provision makes it unlawful:

To effect, alone or with one or more other persons, a series of transactions in any security registered on a national securities exchange ... creating actual or apparent active trading in such security, or raising or depressing the price of such security, for the purpose of inducing the purchase or sale of such security by others. n39

Congress included Section 9(a)(2) to outlaw "every ... device used to persuade the public that activity in a security is the reflection of a genuine demand instead of a mirage." n40

The elements of a claim under Section 9(a)(2) are: (1) a series of transactions in any security registered on a national securities exchange creating actual or apparent active trading in such security, or raising or depressing the price of such security; (2) carried out with scienter; (3) for the purpose of inducing the purchase or sale of such security by others. n41

Like the general anti-fraud provision of Section 10(b), the elements of Section 9(a)(2) have been interpreted broadly. The "series of transactions" element can include bids, purchases, sales and short sales, including purchases or sales in small lots. n42 As few as three transactions has been considered a series of transactions under Section 9(a)(2). n43

Instead of pleading a change in stock price, plaintiff can alternatively plead the creation of "actual or apparent active trading." n44 Actual active trading requires activity greater than the security's customary trading volume or price fluctuations. Apparent active trading denotes an artificial appearance of active trading, such as when a broker-dealer induces other broker-dealers to quote the security, or itself places increasingly higher bids. n45 Another method of creating an artificial appearance of activity entails a broker-dealer inducing the purchase of a security by other broker-dealers through the use of nominee accounts or guarantees against loss. n46

To establish the "raising or depressing price of a security" element, there must be proof that the manipulator caused the change in price. n47 A substantial price change is not necessary. n48 Evidence of causation can include "a) price leadership by the manipulator; b) dominion and control of the market for the security; c) reduction in the floating supply of the security and d) the collapse of the market for the security when the manipulator ceases his activity." n49

In *SEC v. Resch-Cassin & Co.*, for example, an underwriter involved in a best efforts, all-or-nothing initial public offering created interest in the stock by promising a certain aftermarket price. n50 The underwriter then induced a number of traders to become market-makers in the stock, making large purchases at increasingly higher bids. The market-makers often purchased at the price offered by the other traders, without negotiating a better price, and the high bidder during a particular period continually raised the bid price, even as it was purchasing below its own quoted price. The lead bidder purchased more shares than the aggregate of all other market-makers during the period in question, enabling it to control the market in that stock. n51 After obtaining an injunction against the underwriter, the SEC obtained an injunction against the market makers working with the underwriter, which the Court upheld, finding ample evidence that the group had dominated and controlled the market of that stock and thereby caused the rise in price. n52

Not every series of transactions that causes a change in market price is necessarily manipulative. The House Report supporting Section 9(a)(2) explained:

Paragraph (2) makes it unlawful to effect any series of transactions in a security. Of course, any extensive purchases or sales are bound to cause changes in the market price of the security. If a person is merely trying to acquire a large block of stock for investment, or desires to dispose of a big holding, his knowledge that in doing so he will affect the market price does not make his action unlawful. His transactions become unlawful only when they are made for the purpose of raising or depressing the market price. n53

Ultimately, the issue in Section 9(a)(2) proceedings is often one of intent. As mentioned above, Section 9 requires a showing of manipulative intent or purpose. n54 Generally, plaintiffs do not have access to direct evidence of purpose, and courts allow proof of intent or purpose to be established by circumstantial evidence of motive combined with evidence that the defendant effectively raised or lowered stock prices. As one court noted, if an individual purchases a large number of shares which drives up the stock price, the question often becomes "the purpose and motive behind such extensive acquisition. And such 'requisite purpose and willfulness is normally inferred from the circumstances of the case.' " n55 This includes analyzing the content of e-mails for evidence of intent or motive. n56

Similarly, the SEC has stated that "[s]ince it is impossible to probe into the depths of a man's mind, it is necessary in the usual case (that is, absent an admission) that the finding of manipulative purpose be based on inferences drawn from circumstantial evidence." n57 At least one court has implied that once the SEC shows circumstantial evidence of a motive to manipulate and a series of transactions resulting in a price change, the burden shifts to the defendant to provide alternate explanations for the transactions. n58

[d] Sections 9(a)(3), (4) & (5)--Touting, Tipster Sheets and Other Misrepresentations. In passing the Exchange Act, Congress was concerned with "touting," where the individual recommending stock does not disclose his financial interest in the transaction and other manipulative devices in connection with recommendations or predictions of stock performance. The Senate investigation that preceded passage of the Exchange Act uncovered many instances of touting:

In one instance a financial writer on a great New York newspaper was discovered to have been a regular participant in the profits of a freelance trader, without obligation except to publicize the stocks of the trader Still other cases were observed where persons were employed to broadcast over the radio, ostensibly as economists tendering gratuitous advice, but in reality as publicity agents of stock-exchange firms. n59

Congress included Sections 9(a)(3), (4) and (5) to ban the inducement to purchase or sell stock when the recommender does not disclose their personal interest in the stock, or makes misleading statements with respect to price predictions or other information regarding that stock. Section 9(a)(3) addresses price predictions made with the purpose of influencing the stock price. It prohibits: (1) a broker, dealer or other person selling, offering to sell, purchasing or offering to purchase; (2) any security registered on a national securities exchange; (3) from inducing the purchase or sale of the security; (4) by circulating stock predictions about future anticipated prices; (5) for the purpose of affecting the stock price. n60

Section 9(a)(4) has an even broader reach, addressing any false or misleading statement for the purpose of inducing the purchase or sale of a security. It prohibits: (1) a broker, dealer or other person selling, offering to sell, purchasing or offering to purchase; (2) any security registered on a national securities exchange; (3) from inducing the purchase or sale of the security; (4) by making any false or misleading statement with respect to any material fact; (5) which the person knew or had reasonable ground to believe was false or misleading. n61 The SEC has invoked Section 9(a)(4) where a broker made misleading or unsubstantiated price predictions to customers as part of a market manipulation scheme.

In Jeffrey Weissman and Martin Weissman, the SEC alleged a scheme whereby Jeffrey Weissman, a broker employed by a market-maker of HPI stock, effected a large price increase through misleading marketing, a no-net-selling policy (i.e., execution of sale orders could not exceed execution of buy orders), and selective placement of buy orders on the American Stock Exchange. n62 Among other misleading marketing techniques, Weissman directed his network of brokers to pursue high-pressure selling tactics and make unsubstantiated price predictions to customers. n63 The SEC charged Weissman with violations of Sections 9(a)(2), 9(a)(4), 10(b) of the Exchange Act, and *Rules 10b-5* and 15c1-2 thereunder, among other provisions. n64

To establish a violation of Section 9(a)(4), the misleading statement must be made directly between a buyer and seller. For example, in *Robbins v. Banner Industries, Inc.*, a stockholder claimed that the corporation had issued stock to the directors without fair consideration, and without disclosing the details of the issuance to shareholders. n65 The court dismissed plaintiff's Section 9(a)(4) claim against the individual defendant who was charged only as an aider and abettor, when plaintiff failed to allege facts constituting a false or misleading statement and did not allege that the individual defendant was either a purchaser or seller of any securities. n66

Section 9(a)(5) addresses touting. It prohibits: (1) any person receiving consideration from a broker, dealer or other person selling, offering to sell, purchasing or offering to purchase; (2) any security registered on a national securities exchange; (3) from inducing the purchase or sale of the security; (4) by circulating stock predictions about future anticipated prices; (5) for the purpose of affecting the stock price. n67

[e] Section 10(b) and Rules Relevant to Market Manipulation. Section 10(b) n68 and *Rule 10b-5* thereunder n69 bar fraud and deception in the purchase or sale of securities whether done face to face, through a national securities exchange or in over-the-counter markets. n70 This section contains a very limited review of Section 10(b) and *Rule 10b-5* within the context of market manipulation. Section 10(b) and *Rule 10b-5* are covered, in depth, in Chapter 5.

The elements of a manipulation claim under Section 10(b) are: (1) fraudulent conduct; (2) in connection with the purchase or sale of securities; (3) through the means or instruments of transportation or communication in interstate commerce or the mails; and (4) with the requisite scienter. n71

To state a market manipulation claim under *Rule 10b-5(a)* or (c), plaintiffs must allege: (1) that they were injured; (2) in connection with the purchase or sale of securities; (3) by relying on a market for securities; (4) controlled or artificially affected by the defendant's deceptive and manipulative conduct; and (5) that the defendant engaged in the manipulative conduct with scienter. n72

There is an implied private right of action under Section 10(b) and *Rule 10b-5*. n73 To bring a private action for damages under 10(b), the plaintiff must be a purchaser or seller of the security at issue, n74 within a time period relevant to the manipulative act. n75 For example, where a corporation moved for a temporary injunction to stop a takeover attempt, claiming that defendant's alleged "buy-me-out-or-face-a-takeover" ultimatum constituted a manipulative and deceptive device under Section 10(b) and *Rule 10b-5*, the court denied plaintiff's request, in part because it deemed it unlikely that plaintiff would prevail on the issue of whether sales of its stock as a defensive measure occurred during the period that defendant allegedly was manipulating the market by amassing plaintiff's stock. n76

Aside from the purchaser or seller restraint, application of Section 10(b) is quite broad, allowing suit by a purchaser or seller of "any security" against "any person" who has used "any manipulative or deceptive device or contrivance," "in connection with" the purchase or sale of a security. n77 Moreover, it is commonly held that Section 10(b) has more lenient evidentiary requirements than its Section 9(a) counterpart. For example, one court has commented that "*Rule 10b-5* require[s] no additional proof of facts creating a higher burden of proof when compared to subsection 9(a)(1), (2) and (6). In fact, *Rule 10b-5* create[s] a lower burden of proof." n78

Significantly, Section 10(b) manipulation claims, unlike claims under Section 9(a), do not include the element of purpose to manipulate. Instead, it is sufficient to show that defendant engaged in a knowingly wrongful act involving a significant risk of effecting the violation that has occurred. n79 For example, one court held that a broker may be liable under Section 10(b) for following a stock promoter's directions to execute stock trades that he knew, or was reckless in not knowing, were manipulative, even if he did not share the promoter's intention to manipulate the price of those stocks, and may simply have sought compensation for his cooperation. n80

After *Tellabs, Inc. v. Makor Issues & Rights, Ltd.*, plaintiffs who seek to bring a claim under Section 10(b) must plead an inference of scienter that is "cogent and at least as compelling as any opposing inference of non-fraudulent intent." n81 This has been interpreted to mean that for allegations of Section 10(b) violations, courts must look at the allegations as a whole, rather than focusing on the sufficiency of particular allegations. n82 This holistic approach likely makes it harder for plaintiffs to allege scienter in market manipulation cases under 10(b). n83

In certain contexts, however, the distinction between the manipulative purpose element of Section 9(a) and the scienter requirement of Section 10(b) may have little practical import. With Section 10(b) pleadings, scienter is often expressed in terms of an inference of fraudulent intent. n84 And, as with the manipulative purpose element of Section 9(a), fraudulent intent can be shown through some combination of evidence of motive and/or manipulative activity. n85

Manipulative acts prosecuted under Section 10(b) and *Rule 10b-5* are also very broad. They include matched orders and wash sales, n86 cross trading and circular trading, n87 painting the tape, n88 domination and control of the market, n89 marking the close, n90 manipulative short selling, n91 undisclosed stabilization, n92 and undisclosed purchase of securities by an underwriter while still participating in a distribution. n93

Plaintiffs bringing a number of large securities fraud class actions since 2002 have also successfully utilized subsections (a) and (c) of *Rule 10b-5* to pursue market manipulation claims against additional categories of actors traditionally sheltered from primary liability under *Central Bank*.

In the 1994 case *Central Bank v. Denver, N.A.*, the Supreme Court held that there was no private cause of action against mere aiders and abettors of section 10(b) violations. n94 Thus, secondary actors, such as lawyers, accountants, investment bankers and others who counseled corporations or facilitated financial transactions were, subsequent to *Central Bank*, generally immune from private suit. *Central Bank*, however, contained the important caveat that

[a]ny person or entity, including a lawyer, accountant, or bank, who employs a manipulative device or makes a material misstatement (or omission) on which a purchaser or seller of securities relies may be liable as a primary violator under 10b-5, assuming *all* of the requirements for primary liability under *Rule 10b-5* are met ... In any complex securities fraud ... there are likely to be multiple violators. n95

Prior to the Enron era, it was difficult to show direct involvement by secondary actors in securities fraud under the traditional basis of a material misstatement or omission. Two basic standards for the primary liability of secondary actors had emerged in such cases: the "bright-line" test followed in the Second, Tenth and Eleventh Circuits, and the "substantial participation" test, followed in the Ninth Circuit. n96 While the "bright-line" test establishes primary liability on the part of secondary actors only when an investor has relied on a misstatement or omission made by and attributable to the defendant at the time of the investment, the "substantial participation" test establishes such liability when the actor "substantially participates" or plays a "significant role" in making the representation, even if it is not publicly attributed to the actor at the time of the investment. n97 Despite the looser standard in the Ninth Circuit, private securities fraud actions against secondary actors were still difficult to maintain post-*Central Bank*. n98

Starting with the Enron motion to dismiss, however, several courts expanded the potential liability of secondary actors through their application of two lesser-used provisions of *Rule 10b-5*, *Rule 10b-5(a)* and (c), to deny motions to dismiss

suits against secondary actors when they are alleged to be an integral part of a broad scheme to deceive investors.

As stated above, *Rule 10b-5* establishes liability under subsection (a) and (c) for any person who, through use of interstate commerce, the mails or any facility of any national securities exchange: "(a) employs any device, scheme, or artifice to defraud," or "(c) engages in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person," in connection with the purchase or sale of any security. n99

In *Enron*, plaintiffs brought suit against the corporation, individual executives, and secondary actors such as accounting firms, law firms and investment banks, claiming that all the defendants had collectively and directly participated in a manipulative scheme to artificially inflate Enron's earnings and conceal its debt using off-balance sheet special purpose entities. In denying the secondary defendants' motion to dismiss and holding that they could be primarily liable under *Rules 10b-5(a)* and (c), the Court reasoned that "[n]ovel or atypical methods [of deception] should not provide immunity from the securities laws." n100

Whereas courts traditionally held liable those directly misstating corporate prospects through misstatements or omissions in such routine issuances as financial statements, prospectuses and road shows, here the court noted allegations that defendant investment banks made loans disguised as trades, participated in a phony IPO, participated in the creation of fraudulent special purpose entities, and contributed to Enron's misleading accounting methods, among other acts. The court noted further allegations that one of the defendant law firms helped create the special purpose entities, drafted sales opinions and drafted false SEC filings and press releases, and that defendant accounting firm violated accounting standards, destroyed documents and participated in Enron's scheme despite knowledge of the fraud. The Court recognized such allegations as falling under a special category:

Market manipulation, employment of a manipulative device, and engaging in manipulative schemes such as a scheme to artificially inflate or deflate stock prices, falsifying records to reflect non-existent profits, and creating and distributing false research reports favorably reviewing a company are other types of conduct prohibited by § 10(b) and *Rule 10b-5* that do not fall within the category of misleading statements and omissions. n101

Other courts continued the trend, acknowledging applications of *Rules 10b-5(a)* and (c) to secondary actors involved in alleged tie-in agreements, undisclosed compensation and analyst conflicts with respect to initial public offerings, n102 the creation of "phantom revenue" through the structuring of transactions to circumvent standard accounting practices, n103 the creation, funding and operating of sham entities to artificially inflate company profits, n104 and the directing and funding by a clearing broker of the introducing broker's sham trades on behalf of investors. n105

The Supreme Court's decision in *Stoneridge Inv. Partners, LLC v. Scientific-Atlanta, Inc.*, however, limited the arsenal available to securities plaintiffs in market manipulation cases. n106 Relying on *Central Bank*, the Court held *Rule 10b-5(a)* and (c) liability can exist only when plaintiffs can prove reliance on the deceptive conduct. n107 This "ensures that, for liability to arise, the 'requisite causal connection between a defendant's misrepresentation and a plaintiff's injury' exists as a predicate for liability." n108 The Court rejected the argument that a presumption of reliance on the deceptive acts exists under *Rule 10b-5(a)* and (c), thereby limiting the possible secondary actors who may be held liable under section 10(b). n109

The *Stoneridge* holding reiterates the notion that Section 10(b) "does not incorporate common-law fraud into federal law," and "should not be interpreted to provide a cause of action against the entire marketplace in which the issuing company operates." n110 Allowing such an expansion under the securities laws, among other things, invites litigation in areas already protected by state law. n111 Furthermore, the Court noted an expansion of the implied private right of action under Section 10(b) is unnecessary considering secondary actors are subject to criminal penalties and civil enforcement by the SEC. n112

This limitation of scheme liability under *Rule 10b-5(a)* and *(c)* significantly affected the Enron litigation. Because those plaintiffs could no longer argue liability existed under 10(b) based on deceptive conduct absent reliance on such conduct by the investors, the *Stoneridge* decision foreclosed much of the litigation arising from the Enron scandal. n113

In addition to *Rule 10b-5*, the SEC promulgated two other rules under Section 10(b) that relate directly to market manipulation, and address the more specific claims of market manipulation of exempt securities and market manipulation by brokers and dealers of over-the-counter securities. Under *Rule 10b-1*, entitled "Prohibition of Use of Manipulative or Deceptive Devices or Contrivances with Respect to Certain Securities Exempted from Registration," n114 plaintiff must show that defendant: (1) employed a manipulative or deceptive device or contrivance as used in Section 10(b); (2) with respect to any security exempted from the operation of Section 12(a); (3) if such act or omission would have been unlawful under Section 9(a) or rules thereunder; (4) through the use of any means or instrumentality of interstate commerce, the mails or any facility of a national securities exchange; (5) in connection with the purchase or sale of any such security. n115

Rule 10b-1 has successfully been used in civil suits alleging market manipulation of exempt securities. In *Box v. Northrop Corp.*, a minority shareholder brought suit, alleging that a merging corporation had been organized solely for the purpose of effecting a scheme to eliminate the minority shareholder's interest, by diluting his holdings and inducing him to sell his exempt shares at a greatly reduced valuation. n116 The court found that these allegations stated a cause of action under Section 10(b) and Rules 10b-1 and 10b-3 thereunder. n117

Rule 10b-3, entitled "Employment of Manipulative and Deceptive Devices by Brokers and Dealers," addresses market manipulation by brokers or dealers of over-the-counter securities. n118 To make out a *Rule 10b-3* claim, plaintiff must show: (1) a broker or dealer; (2) using any means or instrumentality of interstate commerce, the mails or any facility of any national securities exchange; (3) committed any act, practice or course of business defined by the SEC to be a 'manipulative, deceptive, or other fraudulent device or contrivance' for purposes of Section 15(c) of the Exchange Act; (4) in connection with the purchase or sale of any security in the over-the-counter market. n119

The SEC often invokes Sections 10(b) and 15(c) and Rules 10b-3 and 15c1-2 together to address market manipulation generally. For instance, in *U.S. Environmental*, an action brought by the SEC, the Court found violations of sections 10(b) and 15(c) and *Rules 10b-5*, *10b-3* and 15c1-2 thereunder, where a broker established a blind pool, worked with a group of investors to buy the majority of stock in the blind pool, and merged the blind pool with a private company the investors controlled to make it a public company. The broker then effected trades to manipulate the stock of the merged company through wash sales, matched sales, trades involving undisclosed nominees and other manipulative devices to inflate the stock and sell it to the public in the aftermarket. n120 More specifically, *Rule 10b-3* also is used in conjunction with *Rules 10b-5* and 15c1-2 to prosecute the failure of brokers and dealers to disclose a financial interest in recommended stocks, n121 and in conjunction with *Rule 15c1-4* to prosecute the failure to disclose that the dealer is acting as a broker or principal with respect to that stock. n122

[f] Section 15(c)--Brokers and Dealers Engaged in Transactions in Over-the-Counter Markets. Section 15(c) of the Exchange Act is the general provision addressing deception and manipulation by brokers and dealers engaging in securities transactions in the over-the-counter market. n123 The SEC and federal courts apply Sections 15(c)(1) and 15(c)(2), along with Section 10(b), to prohibit the types of manipulative conduct in the over-the-counter market that Section 9(a) prohibits with respect to trading on the securities exchanges. Section 15(c) is interpreted as broadly as Section 9(a) within that context. n124 In *Barrett & Co.*, the SEC reasoned:

We think that there is no reasonable distinction in this respect between manipulation of over-the-counter prices and manipulation of prices on a national securities exchange, and that both are condemned as fraudulent by the Securities Exchange Act, and, in fact, were fraudulent at common law We believe that the Securities Exchange Act contemplates that Section 15(c)(1) affords to the over-the-counter market at least as great a degree of protection against manipulation or attempted control

as is afforded to the exchange market by Section 9(a). n125

The SEC has applied the same reasoning with respect to Section 17(a) of the Securities Act and Section 10(b) of the Exchange Act. n126 Conceptually, both the SEC and the courts base application of Sections 10(b) and 15(c) on nondisclosure to the market of the manipulative activity. n127 However, while Section 10(b) applies to all persons and all securities, and Section 9(a) applies to all persons with respect to securities listed on a national securities exchange, Section 15(c)(1) is limited to brokers and dealers trading securities not listed on a national exchange. Moreover, no private right of action exists under Section 15(c). n128 The legislative history is silent on creation of a private cause of action and courts have uniformly reasoned that such a right would not further the purposes of the statute, since a broader private right already exists under Section 10(b). n129

[i] Section 15(c)(1) and Rules Relevant to Market Manipulation. Section 15(c)(1) prohibits brokers and dealers from inducing or attempting to induce the purchase or sale of any over-the-counter, municipal or government security "by means of any manipulative, deceptive, or other fraudulent device or contrivance" n130 It gives the SEC authority to adopt rules defining the prohibited practices. n131

There are several rules under Section 15(c) that specifically combat broker and dealer market manipulation in the over-the-counter markets. Like *Rule 10b-5*, Rule 15c1-2, entitled "Fraud and Manipulation," is a catch-all provision for manipulative or deceptive devices. n132 That provision defines "manipulative, deceptive or other fraudulent device or contrivance" as used in Section 15(c)(1) as "any untrue statement of a material fact and any omission to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading ... ," but adds that the section is not limited by any specific definitions of the above terms. n133

The SEC has charged violations of Section 15(c)(1), and Rule 15c1-2 thereunder, often in conjunction with Section 10(b) and *Rule 10b-5* thereunder, to address a wide array of conduct. This includes domination and control of the market in a particular stock, n134 artificial raising of prices through misrepresentations, n135 undisclosed stabilization n136 and undisclosed purchase of securities by an underwriter while still participating in a distribution, n137 among other manipulative practices. n138 In recent years, the SEC has increasingly used Section 15(c) to file enforcement actions against mutual fund administrators and broker-dealers for market timing and late trading activities. n139

There are other rules under Section 15(c) which require brokers and dealers to make particular disclosures at or before completion of stock transactions, where failure to make such disclosure is considered price manipulation. In particular, Rule 15c1-5, entitled "Disclosure of Control," obligates brokers and dealers to disclose in writing that they are controlled by, controlling, or under common control with the issuer of the stock involved in the transaction. n140

In *Richard D. Wheeler, Sr. et al.*, the SEC, citing Section 10(b) and *Rule 10b-5* thereunder, and Section 15(c) and Rules 15c1-2 and 15c1-5 thereunder, barred two employees of a broker-dealer from the securities industry, after they allegedly defrauded the public through the sale of two blind pool offerings. n141 The SEC alleged that the corporation that was the subject of one of the blind pool offerings was under the undisclosed control of Ronald D. Wheeler Sr., and that Mr. Wheeler manipulated the price of the security by buying back shares in the aftermarket to the financial benefit of the broker-dealer, dominating and controlling the market and driving up prices through misleading press releases and false SEC filings containing unrealistic sales and earnings estimates. n142

Rule 15c1-6, entitled "Disclosure of Interest in Distribution," obligates written disclosure by a broker or dealer to a customer participating in a distribution of the broker or dealer's own participation, or other financial interest in the distribution. n143 In *Rooney, Pace Inc.*, the SEC accepted an offer of settlement by a broker-dealer after charging it with various violations under the Exchange Act for abuses in connection with three public offerings. n144 With respect to one of the offerings, Rooney, Pace was charged with violation of Rule 15c1-6 for failing to disclose its role as underwriter, as well as with other violations, after it distributed the stock prior to the effective date of the secondary

offering. As a result, Rooney, Pace substantially reduced the supply of the stock publicly available, thereby artificially supporting its price. n145

Finally, Rule 15c1-8, entitled "Sales at the Market," prohibits any representation by a broker or dealer to a customer that the price of a security is "at the market," or a price related to the market, i.e., not a result of market manipulation, unless the broker or dealer has reasonable grounds for that belief. n146 In *Lawrence J. Penna*, the SEC cited a broker-dealer for a violation of Section 15(c) and Rule 15c1-8, among other violations, when it allegedly discovered a scheme among broker-dealers to manipulate the market price of a number of securities to a predetermined target level that was twice that of the offering price. n147 The broker-dealers filled customer orders at the artificial price that had been solicited before the offering and then covered their positions through securities they had previously arranged to purchase at a substantial discount. n148

[ii] Section 15(c)(2) and Rules Relevant to Market Manipulation. Section 15(c)(2) prohibits brokers and dealers from inducing or attempting to induce the purchase or sale of any over-the-counter or municipal security "in connection with which such broker or dealer engages in any fraudulent, deceptive, or manipulative act or practice, or makes any fictitious quotation." n149 It is broader than Section 15(c)(1) in its prohibition of fraudulent, deceptive or manipulative acts or practices that are in connection with the purchase or sale of an over-the-counter or municipal security, and explicitly forbids the entering of a fictitious quotation. n150 Section 15(c)(2) also gives the SEC broad authority to adopt rules to define fraudulent practices and to "prescribe means reasonably designed to prevent ... such acts and practices" n151

Rule 15c2-7 is one such rule relevant to market manipulation. n152 It makes it unlawful for a broker or dealer to furnish quotations for a security to an inter-dealer-quotation system unless there is disclosure, if applicable, of the submission by a correspondent broker-dealer on behalf of another broker-dealer or of any other arrangement between or among broker-dealers, n153 and disclosure of the identity of each broker-dealer participating in such arrangement, among other requirements. n154 For example, in *Paul I. Comi*, the SEC brought enforcement proceedings against a broker-dealer under Rule 15c2-7 when the broker-dealer failed to disclose a profitable arrangement between it and another broker. n155 Comi and the other broker each provided the high bid quotations to the NASDAQ system over a certain period, giving the impression of competition between them, and driving up the price of the stock, when Comi had no customer orders for the stock, but sold its excess inventory at the end of the day back to the other broker at a profit. n156

Another rule under Section 15(c)(2) used to address market manipulation is Rule 15c2-11, which makes it unlawful for any broker or dealer to initiate or resume quotations in a security without maintaining in their records and furnishing to the inter-dealer quotation system information concerning the issuer and certain other matters, unless otherwise exempted. n157 The broker-dealer also must have a reasonable basis to believe the information is accurate and was obtained from a reliable source. n158 Rule 15c2-11 was adopted as a means of curbing activities of brokers and dealers submitting quotations in the pink sheets "without making diligent inquiry concerning the issue or obtaining sufficient information to justify their activity in the security." n159

Rule 15c2-11 has been used to sanction broker-dealers for failing to disclose information concerning issuers that might artificially affect price. In *General Bond & Share Co. v. SEC*, the court upheld the SEC's affirmance of the NASD's ruling that a member firm had violated an NASD Rule by continuing to accept issuer-paid compensation for making a market in a certain security after informing the NASD that it would cease the practice. n160 The court further affirmed the SEC's sanction of the broker-dealer for violation of Rule 15c2-11, among other violations, for failing to maintain in its files certain information concerning the issuer that was "reasonably current" in relation to the day its quotations were submitted. n161

[5] Restricted Practices

When Congress passed the Securities Exchange Act of 1934, it recognized that there were particular trading practices

that, while prone to manipulation, if properly conducted, were necessary for the functioning of healthy and efficient markets. Congress chose to restrict those practices instead of banning them outright. It therefore included provisions in Sections 9 and 10 of the Exchange Act that enable the SEC to oversee restricted practices, such as securities transactions by persons with an interest in a distribution (including stabilization of stock prices), short sales, options trading and practices affecting market volatility.

[a] Regulation of Distributions: Regulation M. The SEC has a long history of regulating the scope of permissible activities of underwriters, broker-dealers, and others participating in the distribution of securities during the course of securities offerings. n162 The goal has been to "prevent participants in a distribution from artificially conditioning the market for the securities in a distribution" and to "protect the integrity of the securities trading market as an independent pricing mechanism during the distribution period." n163 The first rulemaking in this area occurred in 1955, when the SEC adopted Rules 10b-6, 10b-7 and 10b-8 to codify the "principles which historically have been applied in considering questions relating to manipulative activity and stabilization in connection with a distribution." n164

Rule 10b-6 prohibited persons participating in a distribution from "bidding for or purchasing, or inducing others to purchase the securities being distributed, or any security of the same class and series as the security being distributed, or any rights to purchase that security, until they have completed their participation in the distribution." n165 Rule 10b-7, addressing pegging, fixing or stabilizing, regulated "stabilizing for the purpose of facilitating a distribution, and prohibit[ed] any person from making any stabilizing bid or purchase in connection with a distribution except in compliance with that rule. In general, the rule require[d] that such purchases be limited to those necessary to prevent or retard a decline in the open market price of the security, that they be made at price levels restricted as provided in the rule, that purchasers be given notice that the market [was] being stabilized, and that the Commission receive[d] appropriate notice and reports." n166

Rule 10b-8 restricted bids for and purchases of stock rights. It applied in two situations:

(1) when the price of the security underlying the rights [was] being stabilized; or (2) when any syndicate member, dealer-manager, soliciting dealer, or other distribution participant ha[d] purchased rights, as principal, without having sold the underlying securities obtainable upon exercise (*i.e.*, when any member of the syndicate ha[d] a net long position in the underlying security, assuming the exercise of all rights owned by the syndicate members) Rule 10b-8 also limit[ed] the price at which the underlying securities, or securities of the same class and series, [could] be offered or sold during the rights offering. n167

In 1988, the SEC promulgated Rule 10b-21, which was an effort to prevent manipulation by institutional investors by regulating short selling in anticipation of a public offering. n168 Rule 10b-21 prohibited investors from covering short sales of a security that were the subject of a public offering with securities purchased in the offering. n169

Regulation M, entitled, "Manipulative Conduct by Persons with Interest in Outcome of an Offering," was adopted in December 1996 and took effect in March 1997, replacing Rules 10b-6, 10b-6A (NASD passive market making), 10b-7, 10b-8 and 10b-21. n170 Regulation M applies to all distributions, including unregistered distributions. Rule 101 of Regulation M governs the securities transactions of participants in a distribution; Rule 102 governs the transactions of issuers and selling security holders; Rule 103 regulates NASDAQ passive market making; Rule 104 regulates stabilizing and other syndicate activities during a distribution; and Rule 105 codifies former Rule 10b-21 and governs short selling in relation to a public offering. Rule 100 is the definitional section explaining relevant terms. n171 It is important to note that, in addition to Regulation M, the general anti-fraud and anti-manipulation provisions of the federal securities laws, including Section 17(a) of the Securities Act, and Sections 9(a), 10(b) and 15(c) of the Exchange Act, also govern all activities with respect to public offerings. n172

Regulation M was an attempt by the SEC to clarify and streamline regulation of restricted practices, and to relax those restrictions "in cases where either the risk of manipulation is small or the costs of the restrictions are disproportionate to the purposes they serve." n173 The SEC cited significant changes in the securities markets as the impetus for the reconceptualization. It commented that institutional investors had become major participants in securities offerings and that their greater sophistication and bargaining power created strong barriers to manipulation by offering participants. n174

The SEC also noted that secondary markets were more transparent and liquid, making manipulation more detectable. It pointed to the effective real-time surveillance technologies developed by SROs, and the availability of transaction audits, which had lessened the need for regulatory restrictions. The SEC also discussed the growth in the use of shelf-registered offerings, the reduction in rights offerings and globalization of equity and debt offerings as examples of significant changes in securities offerings that necessitated regulatory revisions. n175 The SEC concluded:

These developments have outpaced the current structure of anti-manipulation regulation of securities offerings and have reduced the need for broad prophylactic restrictions. Moreover, the Commission has been advised by market participants that the application of the trading practices rules in the present environment has become needlessly complex and involves substantial compliance costs. n176

The SEC has monitored implementation of Regulation M since its adoption in 1996. In 2004, it proposed amendments to the rule that changed the definition of "restricted" period for purposes of IPOs. n177 The amendments also sought to adjust the average daily trading volume ("ADTV") and public float values for purposes of the definition of "restricted" period under Rule 100(b), actively-traded securities under Rule 101(c)(1) and actively traded reference securities under Rule 102(d)(1) to account for inflation of the dollar since 1996. In response to manipulative activity in the area of IPO allocations, the SEC also proposed a new Rule 106, which would have prohibited distribution participants, issuers and their affiliated purchasers from inducing or accepting any consideration from their customers in addition to the stated offering price of the security. n178 This proposal was meant to counter the practice alleged by the SEC whereby firms expect higher commissions from customers during a "hot IPO" in order to obtain an allocation of those shares, or to "tie" allocation of shares in a "hot IPO" to the purchase of shares, usually from a "cold" offering. n179 While these proposals were not adopted in the 2007 amendments to Rule 105, the SEC responded to increasing manipulative activity by prohibiting entities from covering a short sale with securities purchased from an underwriter or broker dealer participating in the relevant offering on a firm commitment basis. n180

[i] Rule 101: Activities by Distribution Participants (Underwriters, Brokers, Dealers). Rule 101 governs activities by underwriters and other participants in a distribution. It provides, in pertinent part:

... In connection with a distribution of securities, it shall be unlawful for a distribution participant or an affiliated purchaser of such person, directly or indirectly, to bid for, purchase, or attempt to induce any person to bid for or purchase, a covered security during the applicable restricted period; Provided, however, that if a distribution participant or affiliated purchaser is the issuer or selling security holder of the securities subject to the distribution, such person shall be subject to the provisions of [Rule 102], rather than this section. n181

Rule 100 defines distribution participants as "an underwriter, prospective underwriter, broker, dealer, or other person who has agreed to participate or is participating in a distribution." n182 Rule 101 applies only to a "covered security," which is the security that is the subject of a distribution or any security into which it can be converted, exchanged or exercised or which may determine the value of the subject security. n183 The rule also applies only during a restricted period that lasts either one or five business days before the pricing of the offered security and continues until completion of the distribution.

The length of the restricted period depends on the trading volume and public float value of the offered security: under the definition of "restricted period" in Rule 100, for any security with an average daily trading volume ADTV of at least \$100,000 and a public float value of at least \$25 million, the restricted period is the later of one business day prior to determination of the offering price or the date the person becomes a distribution participant, and ending on that person's completion of participation in the distribution. n184 For all other securities, the restricted period begins on the later of five business days prior to determination of the offering price or the date the person becomes a distribution participant and ends on that person's completion of participation in the distribution. n185

There are a number of exemptions from Rule 101, which allow distribution participants and their affiliated purchasers to engage in a variety of activities during the restricted period, including: the routine dissemination of research reports; n186 odd-lot transactions; n187 exercises of options, warrants, rights or any convertible securities; n188 unsolicited transactions; n189 transactions in baskets of securities involving an offered security; n190 and certain transactions involving Rule 144A securities of foreign and domestic issuers. n191 Rule 101 also excepts de minimis transactions, defined as bids that are not accepted or purchases during the restricted period that total less than 2% of the ADTV of the security, provided that the person making the purchases or unaccepted bids has maintained and enforces written policies and procedures designed to achieve compliance with Regulation M. n192

In addition to activity exemptions, there are a variety of securities that are excepted from Rule 101: actively traded securities, defined as securities that have an ADTV value of at least \$1 million, have a public float value of at least \$150 million and are not issued by the distribution participant or an affiliate; n193 investment grade nonconvertible and asset-backed securities; n194 exempted securities under § 3(a)(12) of the Exchange Act; n195 and face-amount certificates, or securities issued by an open-end management investment company or unit investment trust. n196 Rule 101(d) permits the Commission, upon written application or its own motion, to grant an exemption from Rule 101, either unconditionally or on special terms and conditions, to any transaction or class of transaction, any security or class of securities.

The SEC has invoked Rule 101 against brokers allegedly manipulating the market for distributions, or even significant blocks of stock, as part of securities fraud enforcement actions. For example, the SEC settled with two registered representatives who had purchased a significant block of securities at a discount, placed it in their personal accounts and sold it to their customers at market price without disclosing their personal interest or the fact that their customers could have bought the stock directly from them at a lower price. The SEC considered their selling activities a distribution for purposes of Regulation M and violation of Rule 101, as well as section 10(b) and *Rule 10b-5* thereunder, among other violations. n197 In another SEC action under Rule 101, a brokerage settled charges that it had induced certain customers who received allocations of IPOs to place orders for additional shares in the aftermarket, and induced at least one customer to purchase shares in a "cold" IPO with the promise that they would be allocated shares in an upcoming "hot" IPO. n198

[ii] Rule 102--Activities by Issuers and Selling Securities Holders During a Distribution. Rule 102 reads, in pertinent part:

... In connection with a distribution of securities effected by or on behalf of an issuer or selling security holder, it shall be unlawful for such person, or any affiliated purchaser of such person, directly or indirectly, to bid for, purchase, or attempt to induce any person to bid for or purchase, a covered security during the applicable restricted period; Except that, if an affiliated purchaser is a distribution participant, such affiliated purchaser may comply with Rule 101, rather than this section. n199

The SEC distinguished between underwriters (covered by Rule 101) and issuers/securities holders (covered by Rule 102) because it reasoned that issuers and securities holders have a greater interest in an offering, engage in different types of securities transactions and are not monitored by SROs as closely as are member firms. n200 Regulation M therefore contains fewer exceptions under Rule 102 than under Rule 101.

Activities excepted from Rule 102 include: odd lot transactions; n201 repurchases by closed-end investment companies in compliance with Investment Company Act Rule 23c-3; n202 security redemptions by commodity pools or limited partnerships; n203 exercises of options, warrants, rights or any convertible securities; n204 offers to sell or the solicitation of offers to buy; n205 unsolicited purchases; n206 and transactions in Rule 144A securities. n207

Most transactions in connection with dividend reinvestment and stock repurchase plans, including securities distributions made to employees or shareholders of the issuer, are also excluded from Rule 102. n208 Only plan distributions to persons other than employees or shareholders, involving securities obtained directly from the issuer, fall under the rule. n209

There is no general exception for actively-traded securities, as with Rule 101, but reference securities with an ADTV value of at least \$1 million and public float value of at least \$150 million are excepted if they are not issued by the issuer, or affiliate of the issuer, of the offered security. n210 As under Rule 101, Rule 102 exempts investment grade nonconvertible and asset-backed securities; n211 exempted securities under § 3(a)(12) of the Exchange Act; n212 and face-amount certificates or securities issued by an open-end management investment company or unit investment trust. n213 Rule 102(e) contains the identical exemptive authority by the SEC as Rule 101(d). n214

The SEC has also brought enforcement actions against issuers and securities holders under Rule 102. In one such case, the SEC barred from the securities industry brokers who had made misstatements to investors to artificially manipulate the price and demand for securities in the aftermarket so that they could sell their undisclosed holdings at a profit. n215

[iii] Rule 103--Nasdaq Passive Market Making. Because Nasdaq market makers are often distribution participants or their affiliates, regulators have expressed concern that their prohibition from trading during the restricted period would have a negative impact on the market. n216 Nasdaq market makers are therefore permitted to conduct limited trades during the restricted period which could not, for example, amount to price stabilization. n217 This so-called "passive market-making" is also subject to certain notification, identification and disclosure requirements. n218

Rule 103 generally limits a passive market maker's bids and purchases to the highest current independent bid (i.e., a bid by a non-participant in the distribution). n219 The rule limits net purchases of passive market makers to the greater of either 30% of the ADTV of the market maker or 200 shares for less active market makers. n220

Passive market making is prohibited when a stabilizing bid pursuant to Rule 104 is in effect. n221 As with former 10b-6A, passive market-making is prohibited for best efforts and at-the-market offerings. n222

[b] Regulation of Stabilization Measures: Section 9(a)(6) and Rule 104 of Regulation M. The SEC has defined stabilization broadly as "the buying of a security for the limited purpose of preventing or retarding a decline in its open market price in order to facilitate its distribution to the public" n223 Some measure of stock price maintenance is not only accepted, but is an open practice during initial public offerings. Underwriters often inform stockholders in the prospectus that they may effect transactions that stabilize the market price of the stock. Underwriters also often authorize a "representative" underwriter to make purchases and sales on behalf of all the underwriters, which can include efforts at price stabilization, pursuant to an agreement limiting the amount to a fixed percentage of each underwriter's commitment to the entire offering. n224

Section 9(a)(6) of the Exchange Act makes it unlawful to effect any series of transactions for the purchase or sale of any security registered on a national securities exchange for the purpose of pegging, fixing or stabilizing the price of the security in contravention of any rules or regulations of the SEC. n225 In 1939, the SEC promulgated its first rules regulating price-stabilizing activities. The rules permitted such activities, but required notice in the prospectus that the underwriters intended to engage in price stabilization, as well as disclosure through reports of such activity. n226 In

1940, the SEC issued its first release analyzing its policy concerns with respect to the regulation of stabilization activities. n227 The Commission acknowledged that stabilization was considered a form of manipulation, but one that was necessary for the building and maintenance of vibrant capital markets. n228

In 1955, the SEC adopted Rule 10b-7 to regulate stabilization activities. n229 The rule established the price level at which a stabilizing bid could be entered and rules of priority for the execution of independent bids at times when a stabilizing bid had been entered. In addition, the rules regulated the number of stabilizing bids that an underwriting syndicate could enter in any one market at any one time, and the entry of stabilizing bids on markets other than the principal market for the security being stabilized. n230 Rule 10b-7 was replaced in 1996 with Rule 104 of Regulation M.

[i] Rule 104 of Regulation M--Stabilizing and Other Activities in Connection with an Offering. With adoption of Regulation M, the Commission recognized significant changes in the practice of distributions, pointing out the increase in flipping and the shift in stabilizing practices to the aftermarket period. n231 Rule 104 attempted to replace the old trading practice rules with "a more flexible framework for stabilizing transactions." n232

Rule 104 governs stabilizing and certain aftermarket syndicate transactions, including transactions to cover syndicate short positions and penalty bids. n233 Rule 104 reads in pertinent part:

... It shall be unlawful for any person, directly or indirectly, to stabilize, to effect any syndicate covering transaction, or to impose a penalty bid, in connection with an offering of any security, in contravention of the provision of this section ... n234

Under the rule, stabilizing bids may be increased to the level of the highest independent bid in the principal market, or, if the principal market is closed, to the highest independent bid in that market at the previous close, provided that the bid price does not exceed the maximum caps provided in the rule, i.e., the lower of the offering price or the stabilizing bid for the security in the principal market. n235

It is unlawful to place a stabilizing bid in more than one market at the same price and same time. n236 Anyone entering a bid for the purpose of stabilization must notify the market on which the bid is placed and disclose the purpose of the bid to the person to whom the bid is entered (e.g., the specialist or executing broker-dealer). n237 Anyone effecting a syndicate covering transaction or placing or transmitting a penalty bid also must disclose the transaction to the SRO with oversight over the principal market for that security. n238 Public disclosure is not required. n239 Rule 104(k) contains the identical exemptive authority by the SEC as Rules 101 and 102. n240

[c] Regulation of Short Sales: Section 10(a), Old Rules 10a-1, 10a-2, and 3b-3, New Rule 201 of Regulation SHO and Rule 105 of Regulation M. As described above, a short sale is the sale of a security that the seller does not own or that is consummated through the seller borrowing the security. While short selling is not necessarily harmful, concentrated short-selling historically has been used to manipulate the market downward. The SEC responded in 1938 by adopting Rule 10a-1 to restrict short selling in a declining market. n241 More recently, there was an increase in "naked" short selling, n242 which led to calls for updated regulation in this area.

Section 10(a) of the Exchange Act makes it unlawful for any person to effect a short sale or use any stop-loss order in connection with the purchase or sale of a security registered on a national securities exchange, in contravention of any rule or regulation by the SEC. n243 The Commission conducted a study of the effect of concentrated short-selling during the market break of 1937, and in 1938 issued Rule 10a-1 to restrict short selling in a declining market. n244 After the SEC issued related Rules 10a-2 and 3b-3, regulation of short sales remained relatively constant for approximately 60 years, with periodic reviews of its effectiveness. n245

In 1999, the SEC issued a release requesting public comment on the current regulatory system for short sales and

received an overwhelming response. In addition to reviewing those comments and reexamining Rules 10a-1, 10a-2 and 3b-3, the SEC considered recent market changes, including the increase in "naked" short selling, decimalization, the development of securities futures trading and the growing proportion of Nasdaq securities that are traded away from the Nasdaq market, removing them from application of the short sale price test. n246 As a result of that analysis, on October 28, 2003, the SEC released Proposed Rule, Regulation SHO, which it finalized after public comment on July 29, 2004. The Final Rule of Regulation SHO replaced Rule 10a-2 in its entirety, replaced Rule 3b-3 by amending and then integrating it into the definitional section of Regulation SHO, amended Rule 105, the short sale provision of Regulation M, and authorized a pilot program that would test potential amendment or replacement of Rule 10a-1. n247

In June 2007, the SEC amended Regulation SHO to replace Rule 10a-1 with new Rule 201 of Regulation SHO. n248 Specifically, the SEC eliminated any price test that prohibits short selling in a "down" market including the so-called "uptick test." In eliminating the "uptick" test, the SEC also hoped market participants would benefit from increased liquidity and more pricing efficiency. n249 As part of its 2007 amendments, the SEC also eliminated Regulation SHO's grandfather exception (Rule 203(b)(3)(i)). n250 As a result, all fail-to-deliver positions in threshold securities must be closed out within 13 consecutive settlement days regardless of whether any of those days occurred before the security became a threshold security. n251

Furthermore, in the midst of the financial crisis in 2008, the SEC made more changes. Initially, the SEC halted short selling in 799 financial institutions. n252 After issuing an emergency order requiring traders to borrow or arrange to borrow stock before shorting securities of specified financial services companies, the SEC announced three changes to the short sale rules: 1) a hard T+3 close-out requirement; 2) a new anti-fraud rule addressing deceptive conduct in connection with abusive short selling; and 3) elimination of the options market-maker exception to Regulation SHO. n253 The SEC also instituted disclosure requirements whereby investment managers had to submit a Form SH report with the SEC on the first business day of every calendar week immediately following a week in which the manager effected short sales. n254

[i] Rule 3b-3--Definition of "Short Sale". Rule 3b-3 of the Exchange Act contained the definition of "short sale" under the Exchange Act, including for purposes of Rules 10a-1 and 10a-2. n255 The rule defined short sale as "any sale of a security which the seller does not own or any sale which is consummated by the delivery of a security borrowed by, or for the account of, the seller." n256 Under Rule 3b-3(e), a seller of an equity security subject to Rule 10a-1 was obligated to aggregate all positions in that security in order to determine whether the seller maintained a "net long position" in the security. n257

[ii] 10a-1--Short Sales. The now-repealed Rule 10a-1 regulated short selling on a national securities exchange. n258 Generally, the rule established that, except in special circumstances, if an order had been marked "long," the broker was prohibited from making delivery with a borrowed security or delay delivery of the stock. Rule 10a-1 provided that, subject to certain exceptions, short sales of securities covered by the rule could be effected only (1) at a price above the price at which the immediately preceding sale was effected ("plus tick" or "uptick"), or (2) at the last sale price if it was higher than the last different price ("zero-plus tick"). n259 Short sales on minus ticks or zero-minus ticks were not permitted, with narrow exceptions. n260 The applicable price was either the last transaction price reported under an effective transaction reporting plan or on a particular exchange. n261 These rules were collectively referred to as the "tick test." The tick test was established to allow relatively unrestricted short selling in an advancing market, but to prevent short selling at successively lower prices or exhausting all remaining bids at one price level, which would cause successively lower prices, and therefore drive the market price down. n262

Rule 10a-1(c) provided that every order for the sale of a security on a national securities exchange was required to be marked either "long" or "short" to indicate whether the security being sold was owned and deliverable by the seller. n263 There were various exceptions to application of Rule 10a-1, including arbitrage undertaken to profit from a current difference between a convertible security and the underlying common stock; n264 and arbitrage undertaken to profit from a current difference between the price of a security in the United States and its price abroad. n265

Most courts found that there was no private right of action to enforce Rule 10a-1. n266

[iii] Rule 10a-2--Requirements for Covering Purchases. Before it was replaced by Regulation SHO, Rule 10a-2 governed the lending of securities traded on a national securities exchange. n267 The rule provided that, with narrow exceptions, no broker or dealer was permitted to lend any security traded on a national securities exchange or fail to deliver a security on the date of delivery, if such broker or dealer knew or had reasonable grounds to believe that the sale was effected as a long sale. n268

[iv] 10b-21--Naked Short Selling Antifraud Rule. In 2008, the SEC promulgated Rule 10b-21 in response to deceptive conduct in connection with short selling. The new rule overlaps with the SEC's general antifraud rules, and expressly states that it is "not intended to limit, or restrict, the applicability of the general antifraud provisions ... " n269 In finalizing the rule, the SEC noted concerns pertaining to misrepresentations by Regulation SHO's locate requirement and mischaracterization of short sales as long sales. n270 The new rule imposes liability on any seller--including a broker-dealer trading for its own accounts--that makes misrepresentations to broker-dealers, clearing firms, or purchasers in connection with any long or short sale that resulted in a delivery failure. n271 In addition, broker-dealers may be liable for aiding and abetting selling customers that violate the rule. n272 As with 10b-5 liability standards, the SEC must prove that the putative defendant acted with scienter in order to establish a violation. n273

In its release amending the adoption of Rule 10b-21 the SEC notes that a seller could potentially violate Rule 10b-21 by failing to deliver the securities on settlement date and the broker-dealer about the validity of the seller's locate source by failing to contact the purported source to determine whether shares were available. n274 A seller can also violate the rule if it deceives the broker-dealer by contacting the source and learning that it could not borrow sufficient shares for timely delivery. n275 Finally, it may constitute deception under the new rule if a seller contacts a source that has which had sufficient shares for a pre-settlement delivery but fails to instruct the source to deliver the shares in time for settlement which results in the source not delivering the shares and then refuses to deliver shares on settlement date, resulting in a fail to deliver. n276

[v] Rule 105 of Regulation M--Short Selling in Connection with a Public Offering. As originally promulgated, Rule 105, which replaced the 1988 version of Rule 10b-21, prohibited certain short sales from being covered with securities purchased from an underwriter, broker or dealer who is participating in an offering. n277 Rule 105 "is prophylactic and prohibits the conduct irrespective of the short seller's intent." n278 Its purpose is "to promote offering prices that are based upon market prices determined by supply and demand rather than artificial forces." n279 The rule applies during the shorter of the period spanning the initial filing of the registration statement or five business days before pricing of the offered security, until the pricing of the security. n280

Rule 105 originally excepted Rule 415 shelf offerings and offerings that are not conducted on a firm commitment basis (such as all-or-none or best efforts offerings) n281 (see below for amendment of Rule 105(c) under Regulation SHO). Rule 105(d) provides the SEC with the same exemptive authority as established by Rules 101, 102 and 104. n282

Between promulgation of Regulation M and Regulation SHO, the SEC brought enforcement actions under Rule 105, section 10(a) and Rule 10a-1 for short sales during public offerings. For example, in *SEC v. Weitz and Altman*, brokers agreed to settle charges that they made short sales within five days of the pricing of securities offered in fifteen repeat and secondary offerings, and covered their short sales with securities they purchased in the offerings, consenting to disgorgement, prejudgment interest and civil penalties of over \$1 million. n283

In 2007, the SEC adopted several amendments to Rule 105. n284 The amendments were motivated by the SEC's belief that there was widespread use of trading strategies designed to evade the rule. As the SEC explained in the adopting release:

In recent years, the Commission has become aware of non-compliance with Rule 105, and in some

cases, strategies used to disguise Rule 105 violations. In particular, the Commission has become aware of attempts to obfuscate the prohibited covering. Due to continued violations of the rule, including a proliferation of trading strategies and structures attempting to accomplish the economic equivalent of the activity that the rule seeks to prevent, the Commission published proposed amendments to Rule 105 for notice and comment.

The Commission proposed to eliminate the covering requirement in order to end the progression of trading strategies designed to hide activity that violated the rule. In particular, the Commission proposed to make it unlawful for a person to effect a short sale during the Rule 105 restricted period and then purchase, including enter into a contract of sale for, such security in the offering. In effect, the proposal imposed an absolute prohibition against purchasing offered securities in firm commitment offerings by any person that effected a restricted period short sale(s). n285

Therefore, the amendments to Rule 105 did away with the requirement that the SEC prove that the short position was covered using stock acquired in the public offering. Instead, a new bright line rule was established requiring an investor to choose between shorting or participating in the offering. Thus, under the new rule, a person may *either* short an equity security within the restricted period *or* purchase shares in the public offering, but may not do both. n286 In other words, while the old Rule 105 prohibited covering under certain specified circumstances, new Rule 105 prohibits participation in the offering, except under certain specified circumstances. New Rule 105 includes three categories of excepted activity from the short-selling requirements: 1) bona fide purchases; 2) short selling in separate accounts; and 3) short selling by investment companies.

In connection with the first exception, to qualify as a "bona fide purchase," the purchase must be: (a) equivalent in quantity to the amount of the restricted period short sale(s); (b) effected during regular trading hours; (c) reported pursuant to an effective transaction reporting plan; (d) made after the last Rule 105 restricted period short sale; (e) made no later than the business day prior to the day of pricing; and (f) the purchaser must not have effected a short sale within the 30 minutes prior to the close of regular trading hours on the business day prior to the day of pricing. n287 Still, even where these criteria are satisfied, the SEC also will look to the surrounding facts and circumstances to determine whether a purchase is bona fide. The SEC stressed that transactions that are part of a plan or scheme to evade the rule would not be bona fide even if made in technical compliance with the exception. As an example, the SEC referred to transactions that do not include the "economic elements of risk associated with a purchase for value." n288

The second exception permits a purchase of the offered security in an account of a person where such person sold short during the restricted period in a separate account, "if decisions regarding securities transactions for each account are made separately and without coordination of trading or cooperation among or between accounts ... even though the accounts may be affiliated or otherwise related." n289 The SEC enumerated a list of indicia of separate accounts:

- The accounts have separate and distinct investment and trading strategies and objectives;
- Personnel for each account do not coordinate trading among or between the accounts;
- Information barriers separate the accounts, and information about securities positions or investment decisions is not shared between accounts;
- Each account maintains a separate profit and loss statement;
- There is no allocation of securities between or among accounts; and
- Personnel with oversight or managerial responsibility over multiple accounts in a single entity or affiliated entities, and account owners of multiple accounts, do not have authority to execute trades in

individual securities in the accounts and in fact do not execute trades in the accounts, and do not have the authority to pre-approve trading decisions for the accounts and, in fact do not pre-approve trading decisions for the accounts. n290

As with the bona fide purchase exception, the SEC stressed that these conditions are not necessarily determinative. Rather, the entire facts and circumstances must be considered. n291

The third exception relates to registered investment companies, which are already subject to the provisions of the Investment Company Act, which prohibits concerted action between funds in a complex and between different series of the same fund. Section 17(d) of the Investment Company Act and Rule 17d-1 prohibit an affiliated person of a registered investment company, and the affiliates of that affiliated person, acting as principal, from participating in any joint enterprise, or other joint enterprise or arrangement with their affiliated investment company. n292 Under these provisions, an arrangement by which one fund sells short while another affiliated fund intentionally goes long in the same security to cover the short position would generally be the type of coordinated strategy that is prohibited. Accordingly, for registered investment companies, amended Rule 105 provides that "an individual within a fund complex, or a series of a fund, is not prohibited from purchasing the offered security if another fund within the same complex or a different series of the fund sold short during the Rule 105 restricted period." n293

[vi] Regulation SHO. Regulation SHO was issued, among other reasons, to establish a uniform standard for all short sellers to locate securities for borrowing. It modifies the definitions of a short sale and owning a security and it also addresses the problems of naked short selling and extended failure to deliver securities. Regulation SHO replaces Rules 3b-3, Rule 10a-1, and 10a-2 of the Exchange Act. It also amended Rule 105 of Regulation M by eliminating the shelf exception and, in June 2007, shifting Rule 105's focus from covering to with prohibited securities to participation in an offering.

Rule 200 replaces Rule 3b-3, adopting that rule's basic definition of short sale, but broadening the ownership of a security under the definition to include unconditional contracts to purchase securities and securities futures contracts, n294 and amending it to explicitly allow multi-service broker-dealers to aggregate their positions by separate trading units. n295 Under this provision, all sales of equity securities must be marked "long," "short," or "short exempt." n296 It provides that a person owns a security only to the extent that he has a net long position in the security. n297

Rule 200 incorporates the block-positioner exception from Rule 10a-1(e)(13). Under the block-positioner exception, a broker or dealer is considered to own a security, even if it is not net long, if the broker acquired the security while acting as a block positioner and if the broker's short position is the subject of offsetting positions in the course of arbitrage, risk arbitrage or hedging activities. n298 The broker or dealer is also considered to own a security, even if it is not net long, if: (1) he is unwinding an index arbitrage position involving a long basket of stock and one or more short index futures traded on a board of trade or one or more standardized options contracts; and (2) the broker's or dealer's short position is the subject of offsetting positions created in the course of arbitrage, risk arbitrage or hedge activities; and (3) the sale does not occur during a period starting with the time the NYSE Composite Index has declined two or more percent from the close on the previous day and ending with the establishment of the closing value on the next trading day. n299

The SEC has brought enforcement actions against broker-dealers who have allowed their customers to sell securities short while falsely marking their sales "long." For example, in 2007 the SEC brought cease-and-desist proceedings against a subsidiary of Goldman Sachs, alleging that certain customers using the firm's automated trading system unlawfully sold securities short in advance of follow-on and secondary offerings while marking their orders to sell "long," and that the firm's failure to detect and prevent these violations was unreasonable. n300 Although the conduct in question took place before the promulgation of Regulation SHO, the SEC's order required the firm to cease and desist from violations of Rules 200 and 203 of Regulation SHO. n301

Similarly, in *In the Matter of Sandell Asset Management Corp.* the SEC brought cease-and-desist proceedings against

an unregistered investment advisor, Sandell Asset Management ("SAM") and certain of its principals and traders for improper order marking. n302 "SAM established long positions of approximately nine million shares in Hibernia Corporation, a financial holding company, the first half of 2005 in response to an announced business combination between Hibernia and Capital One Financial Corporation." n303 As part of a risk arbitrage transaction, SAM then sold its shares to third parties and entered into swap transactions whereby the fund managed by SAM no longer owned the shares, but retained the economic risk of the loss should the price decline. The combination of Hibernia and Capital One was expected to close on September 1, 2005 and the strategy, if successful, would permit the fund to profit from the difference between the market price for Hibernia shares at the time of the purchase and the higher anticipated deal price at closing. Hurricane Katrina struck on Sunday August 28, 2005, and by Tuesday August 30, 2005, many analysts were concluding the deal would not close as scheduled until Capital One and Hibernia could assess the damage to their assets in New Orleans. On August 31, 2005, SAM began attempting to hedge its risk by shorting Hibernia stock. However, they were unable to locate sufficient stock to borrow. It was determined, incorrectly, and without seeking the advice of either in house or outside counsel, that they could simply mark the sales as "long," thereby "alleviating the need to locate shares to borrow and the trading restrictions of the 'tick test.'" n304 Additional marking violations occurred even after counsel for SAM informed SAM that a number of trades had been mis-marked. Had they correctly marked the shares as "short," the broker-dealer's direct access trading system that SAM was using would have "automatically blocked executions of the trades because of the unavailability of shares to borrow." n305 By the end of August 31, over 3.5 million shares had been mismarked as "long" and over two million shares had been shorted on a down tick or a zero minus tick in violation of the "tick test."

When Regulation SHO was drafted in 2004, implementation of Rule 201 was deferred until evaluation of the results of pilot program created under Rule 202T. Specifically, Rule 202T authorized the SEC to establish a pilot program under which it could exclude designated securities from application of the tick test of Rule 10a-1 and any short sale price test rule of any exchange or national securities association. n306 As of May 2, 2005, the pilot program suspended the short sales price test for a subset of securities from a broad-based index, to study the impact on market quality, price changes caused by short selling, costs imposed by the tick test, and the use of alternative means to establish short positions. n307 In the Preamble to Regulation SHO, the SEC set forth the possible results of the pilot with respect to the new short sale price test under Rule 201: (1) to eliminate a price test for some or all securities; (2) to adopt the uniform bid test with exceptions, and possibly extend that test to securities which are not currently subject to a price test; or (3) to retain the current price tests. n308

Based on the information gathered during the pilot program, the SEC repealed Rule 10a-1 and adopted Rule 201 in 2007. n309 The SEC concluded that existing price test regulation was "inconsistent across markets," "potentially create[d] an unlevel playing field," "allow[ed] for regulatory arbitrage," and failed to "k[ee]p pace with the types of trading systems and strategies currently used in the marketplace." n310 Rule 201 not only eliminates the Rule 10a-1 "tick rule," n311 but also prohibits self-regulatory organizations from having their own "tick rule." n312 Because Rule 201 eliminated all price test restrictions, the SEC also amended Rule 200 to remove the requirement that a broker-dealer mark a sell order of an equity security as "short exempt" if the seller was relying on an exception to the new-defunct price test of Rule 10a-1 or any other price test. n313 However, the SEC confirmed that broker-dealers would, notwithstanding its June 2007 amendments, continue to be required to mark sell orders as either "long" or "short" in compliance with Rule 200. n314

In April 2009, the SEC sought public comment on whether a short sale price test requirement should be re-instituted. n315 The SEC "decided to re-evaluate the issue due to extreme market conditions and the resulting deterioration in investor confidence." n316 On February 24, 2010 the SEC announced a new Rule 201 alternative uptick rule, effective as of May 10, 2010. n317 The alternative uptick rule set forth in Rule 201(b) of Regulation SHO combines a price test and a circuit breaker, "such that when triggered, short selling will be permitted only at a price above the current national best bid." n318 In other words, new Rule 201(b) is a "short sale-related circuit breaker that, if triggered, will impose a restriction on the prices at which securities may be sold ('short sale price test' or 'short sale price test restriction')." n319 Specifically, Rule 201(b) provides that:

(1) trading center shall establish, maintain, and enforce written policies and procedures reasonably designed to:

(i) Prevent the execution or display of a short sale order of a covered security at a price that is less than or equal to the current national best bid if the price of that covered security decreases by 10% or more from the covered security's closing price as determined by the listing market for the covered security as of the end of regular trading hours on the prior day; and

(ii) Impose the requirements of paragraph (b)(1)(i) of this section for the remainder of the day and the following day when a national best bid for the covered security is calculated and disseminated on a current and continuing basis pursuant to an effective national market system plan.

The SEC adopted new Rule 201(b) "because, when triggered, it will prevent short selling, including potentially manipulative or abusive short selling, from driving down further the price of a security that has already experienced a significant intra-day price decline, and will facilitate the ability of long sellers to sell first upon such a decline." n320 According to the SEC, "[t]his approach establishes a narrowly-tailored Rule that will target only those securities experiencing significant intra-day price declines." n321 Rule 201(a)(1) defines "covered security" to mean any "NMS stock" as defined under Rule 600(b)(47) of Regulation NMS. "Thus, Rule 201 will apply to any security or class of securities, except options, for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan. As a result, Rule 201 generally will cover all securities, except options, listed on national securities exchanges whether traded on an exchange or in the OTC market ... [but] will not include non-NMS stocks quoted on the OTC Bulletin Board or elsewhere in the OTC market." n322

According to the SEC, "combining the alternative uptick rule with a circuit breaker will strike the appropriate balance between our goal of preventing short selling, including potentially manipulative or abusive short selling, from being used as a tool to exacerbate a declining market in a security and the need to allow for the continued smooth functioning of the markets, including the provision of liquidity and price efficiency in the markets." n323 At the same time, however, the SEC recognizes "the benefits to the market of legitimate short selling, such as the provision of liquidity and price efficiency. Thus, by imposing a short sale price test restriction only when an individual security is undergoing significant downward price pressure, the short sale price test restrictions of Rule 201 will apply to a limited number of securities, rather than to all securities all the time." n324

There are, however, several exemptions that will permit trading centers to display or execute short sales at or below the national best bid under certain circumstances even when a circuit breaker is in effect. Rule 201(d)(1) exempts a seller who owns the stock but is experiencing a delivery delay. Rule 201(d)(2) exempts a market maker attempting to "offset customer odd-lot order or to liquidate an odd-lot position that changes such broker's or dealer's position by no more than a unit of trading." Rules 201(d)(3) and (d)(4) exempt short sales that are part of domestic or international arbitrage transactions. Rule 201(d)(5)(i)-(ii) exempts an underwriter executing short sales in connection with an "over-allotment" or "lay-off sales" as part of a distribution of securities. Rule 201(d)(6) exempts short sales that facilitate a "riskless principal" trade. And Rule 201(d)(7) exempts transactions involving volume weighted average pricing. Under Rule 201(c), broker dealers routing such orders to trading centers must mark them as "short exempt."

Before addressing the provisions regulating the transaction of short sales, Rule 203 sets forth the requirements for designating and effecting a sale that is "long." If a broker-dealer knows or should know that a sale of an equity security is marked long, the broker-dealer must make delivery when due and cannot use borrowed securities to do so. n325

The requirement does not apply: (1) when there is a loan of a security through the medium of a loan to another broker or

dealer; (2) where the broker or dealer knows or has been reasonably informed by the seller that the seller owns the security and will deliver it to the broker or dealer prior to the scheduled settlement of the transaction and the seller fails to make such delivery; or (3) where an exchange or securities association finds, prior to the loan or arrangement to loan any security for delivery, or failure to deliver, that the sale resulted from a good-faith mistake, the broker-dealer exercised due diligence, and either that requiring a buy-in would result in undue hardship or that the sale had been effected at a permissible price. n326

The rule then focuses on short sale transactions. Broker-dealers, prior to effecting short sales in all equity securities, are required to "locate" securities for borrowing. The rule imposes additional delivery requirements on broker-dealers with a history of failures to deliver. n327

The rule also provides that a broker-dealer cannot accept a short sale order or effect a short sale order for the broker-dealer's own account unless it has (1) borrowed the security, or entered into an arrangement to borrow the security; or (2) has reasonable grounds to believe that the security can be borrowed so that it can be delivered on the date delivery is due. n328 This provision acts as a restriction on "naked" short selling. n329

Rule 203(b) further requires any participant in a clearing agency to take action on all failures to deliver threshold securities within 10 days after the normal settlement date, i.e., for thirteen consecutive settlement days, by closing out the failure to deliver position and purchasing securities of like kind and quantity. n330 There are several exceptions to this obligation. n331 The participant, and any clearing broker, is prohibited from effecting further short sales in the threshold security without borrowing, or entering into a bona-fide arrangement to borrow, the security until the fail to deliver position is closed out. n332

On September 17, 2008, the SEC eliminated the options market-maker exception to Rule 203, which allowed designated options market makers to hedge existing options by selling short the underlying security even if the market maker had no ability to deliver the shorted security on the settlement date. n333 As a result of the elimination of this exception, options market makers had to comply with new interim Rule 204T. n334

In addition to amending Rule 203, the SEC changed the short sale rules with its implementation of Rule 204T. Rule 204T required broker-dealers to deliver the equity securities that are the subject of a long or short sale by the close of business on the third business day after the transaction date or "T+3." If there has been a delivery failure, no later than the beginning of regular trading hours on the next settlement date following T+3, subject to certain exceptions noted below, broker-dealers must either borrow or purchase the subject securities or they are subject to a penalty whereby offending broker-dealers and their clearing firms will be barred from effecting further short sales in the subject security on behalf of any client unless the shares are pre-borrowed. n335 If there is a delivery failure and the clearing firm can document that the failure was in connection with a long position, then it has until the start of trading on the third settlement day following T+3 to close out the position through a buy-in. n336 If there is delivery failure with respect to securities sold pursuant to Rule 144, then the broker-dealer has until the beginning of regular trading hours on the 36th settlement day after T+3 to close out the position through a buy-in. n337

On April 10, 2009, the SEC released proposed amendments to Regulation SHO that sought to impose new restrictions on short sales. Specifically, the SEC proposed restricting short sales either by a modified uptick rule, an uptick rule similar to former Rule 10a-1 or a circuit breaker that would either (i) ban short selling in a particular security for the remainder of the day if there is a severe decline in the price of that security or (ii) impose a short sale price test. A roundtable was held on May 5, 2009 and comments regarding the proposals were encouraged through June 19, 2009.

On July 27, 2009, the SEC adopted Rule 204T. n338 Like the Temporary Rule, the new permanent Rule 204 seeks to enhance the delivery requirements of Regulation SHO by requiring that broker-dealers deliver securities by the settlement date or, if they have not delivered securities by the settlement date, resulting in a fail to deliver, that they immediately purchase or borrow securities to close out the fail to deliver position by no later than the beginning of

regular trading hours on the settlement date following the day they incurred the fail to deliver position. n339 Participants that do not comply with the close-out requirement, and any broker-dealer from which they receive trades for clearance and settlement, will not be able to sell short the security either for itself or for the account of another, unless it has previously arranged to borrow or borrowed the security, until the fail to deliver position is closed out. n340

Rule 204 aims to reduce fails to deliver and address potentially abusive "naked" short selling. Sudden and unexplained declines in prices of equity securities and deterioration of investor confidence served as additional impetus for Rule 204, which serves as a powerful disincentive to those who engage in potentially abusive practices of naked short selling. n341 Analysis conducted by the SEC's Office of Economic Analysis, after the adoption of the close-out requirement under Temporary Rule 204T, showed significant declines in the number of fails to deliver, confirming the Rule's effectiveness. n342

Regulation SHO also amends Rule 105 of Regulation M, "Short Sales in Connection with a Public Offering." n343 Rule 105, described in more detail in the previous section, prohibits pre-pricing short sales, effected within five days of pricing of an offering, from being covered with offering securities acquired from an underwriter or other broker-dealer participating in the offering. The SEC explains that pre-pricing short sales that are covered with offering shares distort the market, as offering prices are normally based on the stock's closing price just prior to pricing for the offering, and short sales during that period that reduce the market price can lower the offering price. n344 Regulation SHO also eliminates the previous exception under Rule 105, which allowed short sales during a restricted period prior to a shelf offering. n345 The SEC explains that shelf offerings have become more common, are often subject to the same marketing efforts as non-shelf-offerings, and therefore should be treated similarly for purposes of the rule. n346

[vii] Short Sale Reporting Requirements. When it issued an emergency ban on short-selling stock of certain financial firms in September 2008, the SEC also promulgated Temporary Rule 10a-3T, which required any issuer filing a Form 13F for the period ended June 30, 2008 to report certain information about short positions in all Section 13(f) securities on a new Form SH. n347 Each issuer was required to file the form electronically and include the number and value of the securities sold short, except for short sales in options, and the opening short, closing short, and gross number of short sales. Originally, this requirement was set to expire on October 2, 2008, but was later extended and remain in place until August 1, 2009. n348

After its adoption of Rule 204, the SEC allowed Rule 10a-3T to expire. n349 In lieu of Rule 10a-3T, the Commission is working with self-regulatory organizations to increase the public availability of short sale-related information. n350 Specifically, self-regulatory organizations will now begin publishing on their websites the aggregate short selling volume in each individual equity security for that day, along with information regarding individual short sale transactions in all exchange-listed equity securities on a one-month delayed basis. n351 The Commission will also enhance publication on its website of fail to deliver data so that fails to deliver information is provided twice per month for all equity securities, regardless of their fail level. n352

[d] Regulation of Options: Sections 9(b)-(d) and (g).

[i] Section 9(b) and Rule 9b-1. The legislative history of the Exchange Act clearly reveals Congress' distrust of options trading. In 1934, Congress found:

The granting of options to pools and syndicates has been found to be at the bottom of most manipulative operations, because the granting of these options permits large-scale manipulations to be conducted with a minimum of financial risk to the manipulators. The bill, therefore, gives the administrative commission power to regulate dealing in options or trading in options. n353

Section 9(b) grants the SEC the authority to regulate stock options. n354 It makes it unlawful for any person, through a national securities exchange, in contravention of any rule or regulation by the SEC, to effect any transaction in connection with a security in which any party to the transaction: acquires any put, call, straddle or other option or

privilege of buying or selling a security without being bound to do so; has, directly or indirectly, any interest in any such put, call, straddle, option or privilege; conducts the transaction for the account of any person who the party has reason to believe has, and who actually has, directly or indirectly, any interest in any such put, call straddle, option or privilege.

The SEC has interpreted Section 9(b) as granting it "plenary authority to regulate all aspects of options trading on exchanges and to assure that such trading occurs in a manner calculated to eliminate the manipulative and fraudulent uses of options." n355 Despite its broad delegation of authority with respect to options, there currently are no SEC rules specifically addressing market manipulation of options. Regulation of options trading has principally become the province of self-regulatory organizations, which have issued numerous rules regulating such practices. n356

There is only one current SEC rule governing options trading generally: Rule 9b-1, promulgated in 1982, which requires an options disclosure document ("ODD") to accompany any options transaction. n357 Rule 9b-1 requires a broker-dealer to file an ODD with the SEC and to furnish the ODD to the customer prior to approving the customer's account for trading in options. n358 The ODD must contain, among other items, a discussion of the mechanics of buying, writing or exercising the option; the risks of trading the option; the market for the option; and a reference to the transaction costs, margin requirements, and tax consequences of options trading. n359

Following adoption of Rule 9b-1, an options disclosure document was prepared jointly by the American Stock Exchange, the Chicago Board Options Exchange, the Pacific Exchange, the Philadelphia Stock Exchange and the Options Clearing Corporation. n360 The Financial Industry Regulatory Authority ("FINRA") n361 and The New York Stock Exchange ("NYSE") have also joined in submitting jointly-prepared ODDs. n362 Individual and joint amendments are made periodically to adapt to the evolving options markets. n363

Several courts have recognized private rights of action under the Exchange Act for improprieties with respect to the options disclosure document. The Court of Appeals for the Fifth Circuit recognized an action under Section 9(e) for failure to provide an options disclosure document, but affirmed the district court's order granting a motion for a directed verdict with respect to plaintiff's Section 9 claim, for failure to plead and prove the violation's effect on the market or on the purchase price, as required under Section 9 claims in other contexts. n364 The United States District Court for the Southern District of New York also entertained a cause of action under Section 10(b) for alleged false and misleading statements in an ODD, but dismissed the count for failure to allege scienter. n365

[ii] Sections 9(c), 9(d) and 9(g). Section 9(c) prohibits members of national securities exchanges from violating SEC rules in connection with endorsing or guaranteeing the performance of puts, calls, straddles, options or privileges in relation to securities that are registered on national securities exchanges. n366 Section 9(d) excludes warrants, rights or convertible securities registered under the Exchange Act from the Section 9 prohibitions with respect to puts, calls, straddles, options and privileges. n367

Section 9(g) makes explicit the scope of the SEC's rule-making power and jurisdiction to regulate transactions involving options. Congress passed the provision in response to a 1982 decision by the United States Court of Appeals for the Seventh Circuit, n368 where the Court found that the Commodities Futures Trading Commission, which had exclusive jurisdiction for regulatory "accounts, agreements ... and transactions involving contracts of sale of a commodity for future delivery," n369 had exclusive jurisdiction to regulate options trading on Government National Mortgage Association pass-through certificates that were backed by mortgages (GNMAs). The Seventh Circuit had noted that, under the Exchange Act, the SEC had the authority to regulate securities, but found that the definition of "security" under the Act did not include the word "option." Congress therefore passed Section 9(g) to preserve the jurisdiction of the SEC over options trading. n370

Section 9(g) grants the SEC the authority to regulate the trading of any put, call, straddle, option or privilege on any security, certificate of deposit, or group or index of securities ... or any put, call, straddle, option or privilege entered

into on a national securities exchange related to foreign currency (but not, with respect to any of the foregoing, an option on a contract for future delivery). n371

[e] Regulation of Practices Affecting Market Volatility: Section 9(h). Section 9(h), which was added by the Market Reform Act of 1990, n372 prohibits or constrains certain trading practices during periods of extraordinary market volatility. It prohibits any act or practice in connection with the purchase or sale of any equity security in contravention of rules or regulations adopted by the Commission to prevent manipulation of price levels of the equity securities market. It also prohibits or constrains, during periods of extraordinary market volatility, any trading practice in connection with the purchase or sale of a security that the Commission determines has previously contributed significantly to extraordinary levels of volatility and is reasonably certain to engender such levels of volatility if not prohibited or constrained. n373

Section 9(h) provides the basis for recent measures curtailing transactions particularly prone to wide market fluctuations. For example, the section was cited as one of the provisions supporting promulgation of proposed Rules 41.1, 41.25(a)(2) and 41.25(b) under the Commodity Exchange Act and Rule 6h-1 under the Exchange Act, which establish certain criteria for listing futures products on national securities exchanges and national securities associations and call for a halt in trading when a regulatory halt is instituted by a national securities exchange or national securities association listing the underlying security. These rules were intended primarily to reduce susceptibility of the futures markets to manipulation of the price of the futures product, or the underlying security or option. n374

[f] Rule 10b-18 Safe Harbor for Issuer Repurchases. Corporations buy back their stock for a variety of purposes, including to facilitate mergers or other corporate reorganizations, provide increased liquidity or earnings per share, support falling stock prices or otherwise raise investor confidence in the stock. However, when an issuer, or an affiliate or agent of the issuer, bids for or repurchases the issuer's own stock in the open market, its activities can be falsely perceived as market interest, thereby raising the specter of market manipulation. Rule 10b-18 represents the SEC's attempt to balance the interest in maintaining a "market that is set by independent market forces and not influenced in any manipulative manner by the issuer or persons closely related to the issuer" with the interest in "avoid[ing] complex and costly restrictions that impinge on the operation of issuer repurchase programs." n375

Rule 10b-18 provides a "safe harbor" from liability for manipulation under Sections 9(a)(2) and 10(b) of the Exchange Act and *Rule 10b-5* thereunder, when an issuer or affiliated purchaser of the issuer bids for or purchases shares of its common stock in compliance with the rule's conditions limiting the time or price at which its Rule 10b-18 bids or purchases are made, the amount of such bids or purchases, and the number of brokers or dealers used. n376 The safe harbor is limited: it protects an issuer from a violation based on the time, price or amount of bids or purchases made, or number of brokers or dealers used, but will not shield it from liability if there is other evidence of manipulative conduct. n377

In November 2003, the SEC issued a rule entitled "Purchases of Certain Equity Securities by the Issuer and Others," which comprised amendments to the 10b-18 safe harbor. n378 The 2003 amended rule clarified and revised certain aspects of the safe harbor in light of recent issues and developments in the securities industry. The 2003 amended rule also adopted amendments to other regulations and forms to require disclosure of all issuer repurchases, with respect to both open market and private transactions, regardless of whether the repurchases are effected under the safe harbor rule. n379 The amendments require issuers to disclose, among other things, the total number of shares repurchased, the average price paid per share, and the number of shares repurchased.

The preliminary notes to the amended rule explain that compliance with Rule 10b-18 is voluntary. n380 In order to gain the protection of the safe harbor, the issuer must comply with all four conditions on a daily basis. n381 Any repurchase outside the safe harbor removes all other repurchases from the safe harbor for that day. n382 The Rule 10b-18 safe harbor is available to issuers and their affiliated purchasers. n383 A "Rule 10b-18 purchase" is defined as a purchase (or any bid or limit order that would effect such purchase) of the issuer's common stock by or for the issuer or an affiliated

purchaser, including riskless principal transactions, so long as the acquisition does not fall under a listed exclusion. n384

On September 18, 2008, the SEC suspended Rule 10b-18 in an effort to provide issuers with a source of liquidity during times of market volatility. n385 Generally, issuers were reluctant to undertake repurchases without the certainty that they would be covered by the safe harbor. n386 As such, the emergency order altered the timing and volume conditions in the safe harbor, which provided issuers with additional flexibility and certainty when executing repurchases in the backdrop of dire market conditions. n387

Prior to the 2008 emergency order suspending and modifying Rule 10b-18, there were four elements that had to be met if an issuer was to rely on the safe harbor. They concern (1) the one broker or dealer requirement; (2) time of purchase; (3) price of purchase; and (4) volume of purchase: n388

(1) One Broker or Dealer--The issuer and its affiliated purchasers may use only one broker or dealer to solicit purchases or to make bids on a single day, n389 but may use more than one broker or dealer if the transaction has not been solicited by or for the issuer. n390 Issuers can effect repurchases through an electronic communication network (ECN) or alternative trading system (ATS) directly to qualify. Issuers cannot use an ECN or ATS directly and a broker-dealer on a single day. n391 This condition is designed to prevent an exaggerated appearance of market interest in the stock.

(2) Time of Purchase--An issuer bid or purchase may not constitute the day's opening transaction for any security reported in the consolidated system. n392 This requirement prevents the issuer from setting the tone for the day's trading by establishing the opening price. n393 Similarly, no issuer purchases can be made within ten minutes before the close of the primary trading session in the principal market for the security or the market where the purchase is effected, for securities with an ADTV value of \$1 million or more and a public float value of \$15 million or more. n394 For all other securities, purchases cannot be made within 30 minutes before the close of the primary trading session in the principal market for the security or the market where the purchase is effected. n395 The distinction is based on the relative liquidity of the security and therefore the likelihood of the issuer's repurchase impacting the closing price, which is the most widely disseminated to investors by the media. n396 The 2002 amended rule also added a provision allowing an issuer to purchase securities after the close of the primary trading session until the last sale prices are reported in the consolidated system, so long as the purchases are not the opening transaction of the session following the close of the primary session and are not effected at a price that exceeds the lower of the closing price of the primary trading session and any lower bids or sale prices subsequently reported in the consolidated system. The issuer may use a different broker or dealer to effect purchases in the aftermarket. n397

(3) Price of Purchase--The bid or price paid by the issuer or its affiliate cannot exceed the highest independent published bid or the last independent transaction, whichever is higher, quoted or reported in the consolidated system. n398 For securities for which bids and prices are not quoted or reported in the consolidated system, the same rule applies for the independent bid or last independent transaction price displayed on any national securities exchange or any inter-dealer quotation system that displays at least two priced quotations for the security. n399 For all other securities, the purchase must be effected at a price no higher than the highest independent bid obtained from three independent dealers. n400 This requirement limits 10b-18 purchases to the prevailing price in order to prevent artificial price increases through issuer stock purchases.

(4) Volume of Purchases--The volume of shares purchased by an issuer or its affiliate on a particular day cannot exceed 25 percent of the ADTV in its security, which includes any block-size purchases when calculating the security's four-week ADTV. n401 The 2002 amended rule also allows issuers to make

one block purchase per week under the safe harbor so long as no other Rule 10b-18 purchases are effected that day and the block purchase is not included in the issuer's calculation of the security's four-week ADTV for purposes of the safe harbor. n402

In 1999, the SEC promulgated an amendment to Rule 10b-18, which loosened 10b-18's time of purchase condition following a market-wide suspension of trading due to extreme market volatility. n403 The SEC intended to encourage issuers to participate in reestablishing equilibrium between buying and selling interests and to facilitate short-term liquidity during severe market downturns. n404 Under the amendment, the time of purchase requirement would not apply from the reopening of trading until the close of trading on the same day as the imposition of the market-wide trading suspension, or at the next day's opening, if the market-wide trading suspension was in effect at the scheduled close of trading. n405 The amendment retained the other Rule 10b-18 conditions governing the manner, price, and volume of market purchases of an issuer's common stock. n406 The 2002 amended rule increased the volume of purchase limitation of the 1999 amendment from 25% of the security's ADTV to 100% for that session. n407

The safe harbor is not available for repurchases during the restricted period under Rule 102 of Regulation M, which specifically forecloses an issuer or affiliated purchaser from bidding for or purchasing shares during the restricted period surrounding a distribution of the company's common stock or a distribution for which the common stock is a reference security. n408 The Regulation M and other specific issuer repurchases are listed as exclusions within the definition of a 10b-18 purchase. They include:

- (1) Purchases by the issuer or an affiliated purchaser during the Regulation M restricted period, *i.e.*, during a distribution period of the issuer's common stock or a distribution for which such common stock is a reference security. n409 Whereas the other exclusions are intended to facilitate issuer repurchases within the specified categories, this exclusion is meant to preclude issuer purchases during distributions.
- (2) Purchases effected by or for an issuer plan by an agent independent of the issuer. n410 The SEC does not consider transactions by agents independent of the issuer attributable to the issuer. n411
- (3) Purchases that represent a fractional interest in a security, evidenced by a script certificate, order form or similar document. n412 The SEC considers these purchases sufficiently *de minimis* that they do not to present a risk of manipulation. n413
- (4) Purchases pursuant to a merger, acquisition, or similar transaction involving a recapitalization. n414 The 2003 amended rule narrows the exclusion so that it now applies to the period from the public announcement until the earlier of the completion of the transaction or the completion of the vote by target shareholders (including during any period where the market price of a security will be a factor in determining the consideration to be paid). n415 The SEC has excluded these transactions because they present less opportunity for manipulation. n416
- (5) Purchases subject to Rule 13e-1 under the Exchange Act. n417 Rule 13e-1 applies to an issuer's purchases of its own stock after a third party has filed a tender offer for its securities. n418 The SEC has excluded these transactions, as they already are subject to other regulatory safeguards. n419
- (6) Purchases pursuant to a tender offer that is subject to Rule 13e-4 under the Exchange Act or specifically exempted therefrom. n420 Rule 13e-4 applies to issuer self-tender offers and was excluded from the safe harbor because such offers are subject to other regulatory safeguards. n421
- (7) Purchases pursuant to a tender offer subject to Section 14(d) of the Exchange Act and the rules and regulations thereunder. n422 Section 14(d) applies to certain tender offers by bidders other than the issuer, and such tenders are likewise excluded from the safe harbor because they are subject to other

regulatory safeguards. n423

The SEC has emphasized that the 10b-18 safe harbor "is not mandatory nor the exclusive means of effecting issuer purchases without manipulating the market." n424 The safe harbor is not necessary, for example, for issuer repurchases that are otherwise permitted, in limited circumstances, by alternate provisions of the Exchange Act. The SEC explicitly provided that there is no presumption of a violation of the anti-manipulation provisions simply because an issuer or affiliated purchaser failed to meet all the conditions under Rule 10b-18. n425 Conversely, for a person or securities for which the safe harbor is not explicitly available, there is no obligation to attempt to conform with the requirements of the safe harbor. n426

In September 2008, the SEC issued an emergency order altering the timing and volume conditions of Rule 10b-18. n427 The purpose of the order was to provide issuers with added flexibility and certainty in light of poor market conditions. Specifically, the SEC was concerned about sudden and unexplained declines in the prices of securities, which decreases confidence without a fundamental underlying basis. n428 Thus, the emergency order (1) suspended the time of purchases condition in paragraphs (b)(2)(i), (b)(2)(ii), and (b)(2)(iii) of the rule; and (2) modified the volume of purchases condition in paragraph (b)(4) so that the amount of 10b-18 purchases must not exceed 100% of the ADTV for the security. n429 The manner and price purchase conditions remain in place.

(n53)Footnote 53. H.R. REP. NO. 73-1383, at 20.

(n54)Footnote 54. *United States v. Minuse*, 114 F.2d 36, 39 (2d Cir. 1940) ("To convict the defendants, it was necessary to prove that they intended to manipulate the stock market. The crossing of orders resulting from active buying and selling without such intention would not violate the law."). In *Trane Co. v. O'Connor Securities*, Trane sought to enjoin O'Connor Securities from any further purchases of Trane securities, under Exchange Act §§ 9(a)(2) and 10(b), among other provisions, as O'Connor had purchased 15% of the outstanding stock in Trane during a nine month period. The Federal District Court for the Southern District of New York denied plaintiff's 9(a)(2) claim on the ground of lack of manipulative purpose:

This level of trading activity undoubtedly affected the price of the stock and induced purchase by others ... [However, defendant] purchased and sold stock through open market channels. There is no evidence that defendants were responsible for any simulated pink sheet activity, nor has there been any evidence of the collapse of the market after O'Connor's active trading subsided ... If what defendants did

constituted manipulation within the meaning of § 9(a), most large scale transactions in a single security would be prohibited. That was clearly not the purpose of Congress. It sought to protect the small investor by maintaining a market controlled by natural forces rather than by intervention of artificial manipulative devices which would distort the market to the detriment of the investing public.

Trane Co., 561 F. Supp. at 304-05.

(n55)Footnote 55. *Seagoing Uniform Corp. v. Texaco, Inc.*, 705 F. Supp. 918, 934 (S.D.N.Y. 1989) , citing *Crane Co. v. Westinghouse Air Brake Co.*, 419 F.2d 787, 794 (2d Cir. 1969) .

(n56)Footnote 56. *U.S. v. Futch*, 278 Fed. Appx. 387, 391-92 (5th Cir. 2008); *U.S. Commodity Futures Trading Com'n v. Johnson*, 408 F.Supp.2d 259, 268-69 (S.D. Tex. 2005) .

(n57)Footnote 57. *The Federal Corp.*, 25 SEC 227, 230 (Jan. 29, 1947) . See also Adrian C. Havill, Initial Decision No. 74, 60 SEC Dock. 310, 316 (Aug. 31, 1995) ("[A]bsent an admission, an inference of manipulative intent may be drawn, and a prima facie case shown when a person with substantial pecuniary interest in achieving a price change engages in the type of market activity proscribed by §§ 9(a)(1) and 9(a)(2).") (citations omitted). For examples of discussion of motivation, see, e.g., *Thornton & Co.*, 28 SEC 208, 223 (July 14, 1948) , *aff'd per curiam sub. nom.*, *Thornton v. SEC*, 171 F.2d 702 (2d Cir. 1948) (lack of satisfactory explanation for series of stock purchases, including wash and matched sales, resulting in rise of stock price, followed by profit from sale of stock); *Resch-Cassin & Co.*, 362 F. Supp. at 977-78 (incentive to artificially raise price to facilitate distribution as underwriter, as well as personal profit motive of individual defendants); *Minuse*, 114 F.2d at 38 (manipulators held options by which they could only profit through rise in stock price); *Stein*, 456 F.2d at 845 (manipulators bought small amounts of stock from different brokers and offered them secret compensation to promote stock); *Crane Co.*, 419 F.2d at 792-94 (motive to defeat competitor's tender offer by increasing the price of the target's stock).

Courts also accept as circumstantial evidence of manipulative purpose evidence of the impact of the manipulative activity. *Pagel, Inc. v. SEC*, 803 F.2d 942, 946 (8th Cir. 1986) ("We believe the Commission could reasonably have inferred from the evidence of price movement, trading activity, and other factors that the manipulation was undertaken for the purpose of securing financial and tax benefits for petitioners and thus was intentional."); *R.J. Koeppe & Co. v. SEC*, 95 F.2d 550, 553 (7th Cir. 1938) ("Not only does the evidence of disinterested witnesses condemn the action and the motive and intent of the defendants, but the transactions themselves, unsupported by oral testimony of witnesses, leave no doubt as to the defendants' intentions."); *R.A. Holman & Co. v. SEC*, 366 F.2d 446, 450 (2d Cir. 1966) ("The record supports the conclusions of the Commission. The interval between purchase by the affiliates and repurchase and sale to the public was so short that it seems likely that it was part of a preconceived plan with manipulative effects ... ").

(n58)Footnote 58. *Alabama Farm Bureau Mut. Casualty Co. v. American Fidelity Life Ins. Co.*, 606 F.2d 602, 616-17 (5th Cir. 1979) . In a 1941 opinion of the General Counsel, the SEC took intent one step further by holding that, in the absence of a satisfactory explanation, an inference of manipulative purpose arises from the mere fact that "one who has purchased stock in a series of transactions and raised its price disposes of the stock before the true effect of his purchases has been dissipated by other market factors." *Thornton & Co.*, 28 SEC at 223 . The General Counsel thus advised that a person who effects a series of transactions for the purpose of later sale at a profit, and whose transactions themselves impact the price of the stock, should not sell that stock until the market impact of those transactions has worn off.

If the broker begins to sell the security at a time when the market still reflects the effects of his activity, the natural inference would be that he had raised the market price for purposes of manipulation. However, where the broker refrains from selling for a sufficient length of time after his purchases so that the market price of the security no longer represents a price for which he is responsible, his failure to take advantage of the market price resulting from his buying would tend to show that he had not caused the rise in market prices for a manipulative purpose.

Opinion of General Counsel Relating to the Anti-Manipulation Provisions of Section 9(a)(2), 10(b) and 15(c)(1) of the Securities Exchange Act of 1934, as well as § 17(a) of the Securities Act of 1933, *Sec. Ex. Act Rel. No. 3056, 1941 SEC LEXIS 1827, at *1 (Oct. 27, 1941)* . However, this appears to be an isolated opinion, which the SEC has not since actively enforced.

(n59)Footnote 59. S. REP. NO. 73-792, at 8.

(n60)Footnote 60. § 9(a)(3) makes it unlawful:

If a dealer or broker, or other person selling or offering for sale or purchasing or offering to purchase the security ... to induce the purchase or sale of any security registered on a national securities exchange ... by the circulation or dissemination in the ordinary course of business of information to the effect that the price of any such security will or is likely to rise or fall because of market operations of any one or more persons conducted for the purpose of raising or depressing the price of such security.

Sec. Ex. Act § 9(a)(3).

(n61)Footnote 61. § 9(a)(4) makes it unlawful:

If a dealer or broker, or the person selling or offering for sale or purchasing or offering to purchase the security ... to make, regarding any security registered on a national securities exchange ... for the purpose of inducing the purchase or sale of such security ... any statement which was at the time and in the light of the circumstances under which it was made, false or misleading with respect to any material fact, and which he knew or had reasonable ground to believe was so false or misleading.

Sec. Ex. Act § 9(a)(4).

(n62)Footnote 62. *Weissman*, 62 SEC Dock. at 2166-67. HPI was thinly traded both on Amex and over-the-counter, and Weissman allegedly was able to direct transactions involving HPI by a number of brokers at his firm, controlling where the shares would be traded. Weissman allegedly increased the price of HPI stock traded on Amex by directing to the Amex buy orders that were large enough to deplete the supply, causing the specialist to increase the offer price. Weissman then allegedly directed that the next trades be executed over-the-counter at the increased Amex price. *Id.* at 2167.

(n67)Footnote 67. § 9(a)(5) makes it unlawful:

For a consideration, received directly or indirectly from a dealer or broker, or other person selling or offering for sale or purchasing or offering to purchase the security ... to induce the purchase of any security registered on a national securities exchange ... by the circulation or dissemination of information to the effect that the price of any such security will or is likely to rise or fall because of the market operations of any one or more persons conducted for the purpose of raising or depressing the price of such security.

Sec. Ex. Act § 9(a)(5).

(n68)Footnote 68. § 10(b) of the Exchange Act (15 U.S.C.A. § 78j(b) (2004)), provides in pertinent part:

It shall be unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce or of the mails, or of any facility of any national securities exchange ...

(b) To use or employ, in connection with the purchase or sale of any security registered on a national securities exchange or any security not so registered ... any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors.

Sec. Ex. Act § 10(b).

(n69)Footnote 69. *Rule 10b-5* (17 CFR § 240.10b-5 (2001)), provides:

It shall be unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce, or of the mails, or of any facility of any national securities exchange,

(a) To employ any device, scheme, or artifice to defraud,

(b) To make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or

(c) To engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person, in connection with the purchase or sale of any security.

(n132)Footnote 132. 17 C.F.R. § 240.15c1-2 (2004) (Rule 15c1-2) provides:

a. The term 'manipulative, deceptive, or other fraudulent device or contrivance,' as used in Section 15(c)(1) of the Act, is hereby defined to include any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person.

b. The term 'manipulative, deceptive, or other fraudulent device or contrivance,' as used in Section 15(c)(1) of the Act, is hereby defined to include any untrue statement of a material fact and any omission to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, which statement or omission is made with knowledge or reasonable grounds to believe that it is untrue or misleading.

c. The scope of this section shall not be limited by any specific definitions of the term 'manipulative, deceptive, or other fraudulent device or contrivance' contained in other rules adopted pursuant to Section 15(c)(1) of the Act.

(n180)Footnote 180. Short Selling in Connection with a Public Offering, Exchange Act Release No. 5206, Fed Sec. L. Rep. (CCH) P 87,940 (Aug. 6, 2007).

(n181)Footnote 181. 17 C.F.R. § 242.101(a) (2004).

(n182)Footnote 182. 17 C.F.R. § 242.100(b) (2004) (definition of "Distribution Participant"), defines "affiliated purchaser" as:

(1) A person acting, directly or indirectly, in concert with a distribution participant, issuer, or selling security holder in connection with the acquisition or distribution of any covered security; or

(2) An affiliate, which may be a separately identifiable department or division of a distribution participant, issuer, or selling security holder, that, directly or indirectly, controls the purchases of any covered security by a distribution participant, issuer, or selling security holder, whose purchases are controlled by any such person, or whose purchases are under common control with any such person; or

(3) An affiliate, which may be a separately identifiable department or division of a distribution participant, issuer, or selling security holder, that regularly purchases securities for its own account or for the account of others, or that recommends or exercises investment discretion with respect to the purchase or sale of securities

Id. (definition of "Affiliated Purchaser"). The definition includes exceptions for affiliates who: maintain and enforce written policies and procedures to prevent the flow of information to or from the affiliate; obtain an annual independent assessment of the operation of such policies and have no officers or employees in common with the distribution participant, issuer or selling security holder that direct, effect or recommend securities transactions; and do not, during the restricted period, act as a market maker (other than as a specialist in compliance with the rules of a national securities exchange) or engage as a broker or dealer in solicited transactions or proprietary trading. *Id.*

(n183)Footnote 183. *Id.* (definitions of "Covered Security" and "Reference Security.")

(n184)Footnote 184. *Id.* (definition of "Restricted Period"). "ADTV" is defined as the worldwide average daily trading volume during the two full calendar months immediately preceding, or any 60 consecutive calendar days ending within the 10 calendar days preceding, the filing of the registration statement; or, if there is no registration statement or if the distribution involves the sale of securities on a delayed basis pursuant to § 230.415 of this chapter, two full calendar months immediately preceding, or any consecutive 60 calendar days ending within the 10 calendar days preceding, the determination of the offering price.

Id. (definition of "ADTV").

(n185)Footnote 185. *Id.*

(n186)Footnote 186. 17 C.F.R. § 242.101(b)(1).

(n187)Footnote 187. 17 C.F.R. § 242.101(b)(3).

(n188)Footnote 188. 17 C.F.R. § 242.101(b)(4).

(n189)Footnote 189. "Unsolicited transactions" are defined as "Unsolicited brokerage transactions; or unsolicited purchases that are not effected from or through a broker or dealer, on a securities exchange, or through an inter-dealer quotation system or electronic communications network." 17 C.F.R. § 242.101(b)(5).

(n190)Footnote 190. "Basket transactions" are defined as bids or purchases in connection with a basket of 20 or more securities in which the security does not comprise more than 5% of the value of the basket purchased or adjustments to a basket as a result of a change in the composition of a standardized index. 17 C.F.R. § 242.101(b)(6).

(n191)Footnote 191. 17 C.F.R. § 242.101(b)(10). 144A is an exemption for the resale of restricted securities. It permits issuers of Rule 144A securities (it does not include securities listed on NASDAQ or a U.S. stock exchange) to privately place a large offering with an institutional investor who can make an unlimited offering to qualified institutional buyers, using a public offering and general solicitation. Rule 144A is available, for instance, for securities listed on a foreign stock exchange and for all debt securities. The SEC has explained the basis for the exemption as follows: "The Commission considers it appropriate to reduce the scope of Rule 101's prophylactic protections in the case of [qualified institutional buyers], because [qualified institutional buyers] have considerable ability to obtain, consider, and analyze market information, and the Commission is not aware of complaints of manipulation in this context." Reg. M Adopting Rel., *supra* n.142, at 1158.

(n192)Footnote 192. 17 C.F.R. § 242.101(b)(7). The December 2004 proposed rules would require firms to create a record of each bid or purchase made under the *de minimis* exception, including specifying the security, the day the restricted period started, the ADTV and the bids or purchases that would otherwise violate Reg M, in order for the SEC and SROs to be able to uncover potential abuse of the exception, or policies and procedures that result in inadequate compliance. 69 Fed. Reg. at 75, 779.

(n193)Footnote 193. 17 C.F.R. § 242.101(c)(1). The SEC explained that "[t]he costs of manipulating such securities generally are high. In addition, because actively-traded securities are widely followed by the investment community, aberrations in price are more likely to be discovered and quickly corrected. Moreover, actively-traded securities are generally traded on exchanges or other organized markets with high levels of transparency and surveillance." Reg. M Adopting Rel., *supra* n.142, at 1153.

(n194)Footnote 194. 17 C.F.R. § 242.101(c)(2). The definition of "asset-backed security" was amended in January 2005 to adopt the meaning contained in 17 C.F.R. § 229.1101.

(n195)Footnote 195. 17 C.F.R. § 242.101(c)(3).

(n196)Footnote 196. 17 C.F.R. § 242.101(c)(4).

(n197)Footnote 197. In the Matter of Harvey M. Burstein and James D. Loeffelbein, Sec. Ex. Act Rel. No. 45715, 77 SEC Dock. 817, 2002 SEC LEXIS 862 (Apr. 9, 2002) .

(n198)Footnote 198. SEC v. J.P. Morgan Sec., Litig. Rel. No. 18385 (D.D.C. Oct. 1, 2003). *See also* In the Matter of Morgan Stanley & Co., Lit. Rel. No. 19050 (Jan. 25, 2005) (settlement of injunctive action regarding Rule 101 violations based on SEC allegations that broker-dealer had induced customers purchasing shares in IPO to place purchase order for additional shares in the aftermarket).

(n199)Footnote 199. 17 C.F.R. § 242.102 (2001).

(n200)Footnote 200. Reg. M Adopting Rel., *supra* n.142, at 1158.

(n201)Footnote 201. 17 C.F.R. § 242.102(b)(1).

(n202)Footnote 202. 17 C.F.R. § 242.102(b)(2).

(n203)Footnote 203. 17 C.F.R. § 242.102(b)(3).

(n204)Footnote 204. 17 C.F.R. § 242.102(b)(4).

(n205)Footnote 205. 17 C.F.R. § 242.102(b)(5).

(n206)Footnote 206. 17 C.F.R. § 242.102(b)(6).

(n207)Footnote 207. 17 C.F.R. § 242.102(b)(7).

(n208)Footnote 208. 17 C.F.R. § 242.102(c). See Reg. M Adopting Rel., *supra* n.142, at 1161-62. "Plan" is defined under Rule 100 as: "[A]ny bonus, profit-sharing, pension, retirement, thrift, savings, incentive, stock purchase, stock option, stock ownership, stock appreciation, dividend reinvestment or similar plan; or any dividend or interest reinvestment plan or employee benefit plan as defined in Rule 405 of this chapter." 17 C.F.R. § 242.100(b).

(n209)Footnote 209. 17 C.F.R. § 242.102(c)(1).

(n210)Footnote 210. 17 C.F.R. § 242.102(d)(1).

(n211)Footnote 211. 17 C.F.R. § 242.102(d)(2).

(n212)Footnote 212. 17 C.F.R. § 242.102(d)(3).

(n213)Footnote 213. 17 C.F.R. § 242.102(d)(4).

(n214)Footnote 214. 17 C.F.R. § 242.102(e).

(n215)Footnote 215. *In the Matter of Fiore, Salmonese, Deceglie and Lavender*, Sec. Ex. Act Rel. No. 48,905, 2003 SEC LEXIS 2916 (Dec. 11, 2003). See also SEC v. Faceprint Global Solutions, Inc., 92 S.E.C. Dock. 1881 (Feb. 8, 2008) (SEC obtained consent judgment disgorging defendants of more than \$1.5 million in profits based on improperly-registered securities offering involving sales to public through nominee accounts that the CEO of the issuer secretly controlled); *In the Matter of Vincent Napolitano*, Sec. Ex. Act Rel. No. 55090 (Jan. 11, 2007) (SEC barred broker who had profited from sale of large blocks of stock in a pump-and-dump scheme from participating in offerings of penny stocks and ordered disgorgement); *In the Matter of Jordan I. Shamah*, Sec. Ex. Act Rel. No. 54341 (Aug. 21, 2006) (same).

(n216)Footnote 216. See Reg. M Proposing Rel., *supra* n.140, at 1164.

(n217)Footnote 217. 17 C.F.R. § 242.103 (2004). The purpose of Rule 103 is to "alleviate special liquidity problems that may exist in the Nasdaq market during the restricted period, when distribution participants or their affiliates that are Nasdaq market makers otherwise must withdraw from the market. In general, exchange-traded securities are not similarly affected because independent specialists are assigned to provide depth and liquidity in listed securities." Reg. M Adopting Rel., *supra* n.142, at 1164.

(n218)Footnote 218. 17 C.F.R. §§ 242.103(b)(5)-(7).

(n219)Footnote 219. Reg. M Adopting Rel., *supra* n.142, at 1164.

(n220)Footnote 220. 17 C.F.R. § 242.103(b)(2). "The 30% ADTV limitation is designed to prevent an amount of purchasing activity that could produce the price effects of stabilization, while generally permitting a level of activity associated with normal market making." Reg. M Adopting Rel., *supra* n.142, at 1164.

(n221)Footnote 221. Reg. M Adopting Rel., *supra* n.142, at 1164.

(n222)Footnote 222. *Id.* at 1166.

(n223)Footnote 223. Statement of the Commission and Commissioner Healy on ' *Pegging, Fixing, and Stabilizing* ' of Security Prices, Sec. Ex. Act Rel. No. 2446, 1940 SEC LEXIS 653, at *5 (Mar. 18, 1940) . The release contains detailed pros and cons regarding stabilization and its effect on market price.

(n224)Footnote 224. See Jonathan A. Shayne & Larry D. Soderquist, *Inefficiency in the Market for Initial Public Offerings*, 48 VAND. L. REV. 965, 977-78 & *Supra* n.7 at § 6.03[1] (May, 1995).

(n225)Footnote 225. 15 U.S.C.A. § 78i(a)(6) (2004) (Sec. Ex. Act § 9(a)(6)). After investigating the effects of stabilization, the Senate Committee on Banking and Currency concluded: "The impropriety of practices such as 'pegging,' or fixing or stabilizing the price of a security received most careful consideration by the committee. The committee recommends that such practices not be abolished by statute but subjected to regulation by the Commission." S. REP. NO. 73-792, at 8-9 (1934).

(n226)Footnote 226. 17 C.F.R. § 240.17a-2 (2004); 17 C.F.R. § 230.426 (2004).

(n227)Footnote 227. Statement of the Commission and Commissioner Healy on ' *Pegging, Fixing, and Stabilizing* ' of Security Prices, 1940 SEC LEXIS 653, at *1 .

(n228)Footnote 228. "The Commission is unanimous in recognizing that stabilizing is a form of manipulation. The statute itself so recognizes. The Commission also agrees that stabilizing in many respects is undesirable." *Id.* at *2 . However, it continued: "Stabilization ... is now an integral part of the American system of fixed-price security distribution." *Id.* at *23.

(n229)Footnote 229. 17 C.F.R. § 10b-7 (repealed 1996). See Sec. Ex. Act Rel. No. 5194 (Aug. 15, 1955).

(n230)Footnote 230. Review of Anti-Manipulation Regulation of Securities Offerings, 56 SEC Dock. at 1315.

(n231)Footnote 231. *Id.* at 1315-16. See also *Friedman v. Salomon Smith Barney, Inc.*, 313 F.3d 796, 802 (2d Cir. 2002) . Flipping occurs when a subscriber (purchaser of shares in an initial public offering) purchases shares, then quickly sells the shares in the secondary market for a profit.

(n232)Footnote 232. Reg. M Adopting Rel., *supra* n.142, at 1141.

(n233)Footnote 233. Penalty bids are used to combat flipping. Underwriters enter a contractual arrangement whereby the underwriting manager reclaims underwriting fees from syndicate members when the securities originally sold by the syndicate member are re-purchased by the manager in connection with the distribution. Penalty bids make it unprofitable for syndicate members to sell public offering shares to retail customers who flip because the syndicate members will have to remit their fees. See also proposed NYSE Rule 470 (IPO Allocations and Distributions) and NASD Rule 2712, both designed to more specifically prohibit certain practices in the allocation and distribution of shares in IPOs. The rules would limit the use of penalty bids. Sec. Ex. Act Rel. No. 50896 (Dec. 28, 2004).

(n234)Footnote 234. 17 C.F.R. § 242.104(a) (2004). See also Rule 17a-2 (Recordkeeping Requirements Relating to Stabilizing Activities--requiring underwriters to maintain information regarding stabilizing activities under Rule 104). 17 C.F.R. § 240.17a-2 (1004).

(n235)Footnote 235. 17 C.F.R. § 242.104(f)(1).

(n236)Footnote 236. 17 C.F.R. § 242.104(d).

(n237)Footnote 237. 17 C.F.R. § 242.104(h)(1).

(n238)Footnote 238. 17 C.F.R. § 242.104(h)(2).

(n239)Footnote 239. *Id.* However, under the December 2004 proposed rules, any person placing a syndicate covering bid would be required to identify or designate it as a syndicating bid wherever it is communicated. 17 C.F.R. § 242.104(h)(2) (proposed rule). The SEC believes such notification would help investors by providing contemporaneous information regarding the market impact of the bid. 69 Fed. Reg. at 75,781-82.

The proposed rule also would add a subparagraph to Rule 104 that would prohibit the assessment of penalty bids as part of an offering and would eliminate the existing references to penalty bids in subparagraph (2) of the rule. 17 C.F.R. § 242.104(a) (proposed rule). The SEC also proposed that Rule 17a-2(c) of the Exchange Act (which requires certain record keeping and notification) and Rule 481(d) (which requires the inclusion of certain information in prospectuses), as well as Item 508(l) of Regulations S-K and S-B (which impose certain disclosure requirements for the "plan of distribution" section of a prospectus) be amended to eliminate all references to penalty bids. *See* 69 Fed. Reg. at 75,783.

(n240)Footnote 240. 17 C.F.R. § 242.104(k) (2004).

(n241)Footnote 241. *See Proposed Rule, Regulation SHO*, 68 Fed. Reg. 62,972, 62,973 (Nov. 6, 2003) .

(n242)Footnote 242. Naked short selling for purposes of the securities regulations is selling short without borrowing the security for delivery.

(n252)Footnote 252. *Emergency Order Pursuant to Section 12(k)(2) of the Securities Exchange Act of 1934 Taking Temporary Action to Respond to Market Developments*, Sec. Ex. Act Rel. No. 58,592 (Sep. 18, 2008).

(n253)Footnote 253. "Naked" Short Selling Anti-Fraud Rule, Exchange Act Release No. 34-58774, Fed. Sec. L. Rep. (CCH) P 88,295 (Oct. 14, 2008).

(n254)Footnote 254. *Disclosure of Short Sales and Short Positions by Institutional Investment Managers*, Exchange Act Release No. 58785, P 88,298 (Oct. 15, 2008).

(n255)Footnote 255. 17 C.F.R. § 240.3b-3 (2004).

(n256)Footnote 256. *Id.* 17 C.F.R. § 240.3b-3 provided:

A person shall be deemed to own a security if (a) he or his agent has title to it; or (b) he has purchased, or has entered into an unconditional contract, binding on both parties thereto, to purchase it but has not yet received it; or (c) he owns a security convertible into or exchangeable for it and has tendered such security for conversion or exchange; or (d) he has an option to purchase or acquire it and has exercised such option; and (e) he has rights or warrants to subscribe to it and has exercised such rights or warrants: *Provided, however*, That a person shall be deemed to own securities only to the extent that he has a net long position in such securities.

Id.

(n257)Footnote 257. See Liquidation of Index Arbitrage Positions, Sec. Ex. Act Rel. No. 27,938, 46 SEC Dock. 105, 105 (Apr. 23, 1990).

(n258)Footnote 258. 17 C.F.R. §§ 240.10a-1 (2004) (Rule 10a-1); 72 Fed. Reg. 36,348-01 (July 6, 2007) . Short sales of securities not registered on an exchange and transactions in securities covered by paragraph (b) that were effected in the over-the-counter market are not subject to the Rule. Short Sales, Sec. Ex. Rel. Act No. 42,037, 70 SEC Dock. 2090, 2092 (Oct. 20, 1999). However, NASD Rule 3350 prohibits short sales by NASD members in Nasdaq National Market System (NMS) securities at or below the current best (inside) bid as shown on the Nasdaq screen when that bid is lower than the previous best (inside) bid (referred to as the "bid test."). See "SRO Regulation of Market Manipulation," § 6.05[1] (below).

(n259)Footnote 259. 17 C.F.R. § 240.10a-1(a); Liquidation of Index Arbitrage Positions, Sec. Ex. Act Rel. No. 27,938, 46 SEC Dock. 105, 105 (April 23, 1990). An example: "[I]f there were two successive sales of a stock at a price of \$100 on an exchange, you may sell short at \$100 only if the third preceding sale was at a price less than \$100. If that third preceding sale was at \$100 or over, you cannot sell short at \$100." *United States v. Mandel*, 296 F. Supp. 1038, 1039 (S.D.N.Y. 1969) .

(n289)Footnote 289. *Id.* at 18-19.

(n290)Footnote 290. *Id.* at 19.

(n291)Footnote 291. One example noted by the SEC of separate accounts that may fit into the exemption would be an adviser providing capital to two private investment funds that are separate legal entities with different accounts and profit and loss statements, and without any coordination of trading or sharing of information or allocating securities between accounts. Other examples of accounts possibly eligible for the "separate accounts" exemption noted by the SEC would be: (a) an individual investor with multiple accounts with full discretionary authority in separate managers; (b) a money manager that provides capital to separate advisers where there is no coordination between the advisers; and (c) black box trading, if each black box is separate. *See* Short Selling in Connection with a Public Offering, Exchange Act Release No. 56206, at 22. The SEC also indicated that it is more likely to view accounts as separate if there are policies and procedures in place to ensure the separateness of the accounts, in addition to regular reviews to make sure that the policies and procedures are updated and implemented.

(n348)Footnote 348. Disclosure of Short Sales and Short Positions by Institutional Investment Managers,

Exchange Act Release No. 58785, P 88,298 (Oct. 15, 2008). In September 2008, the United Kingdom's Financial Services Authority (FSA), introduced a temporary ban on the creation or increase of net short positions in UK financial sector companies and accompanied this with a new disclosure regime for significant short positions. *See* FSA/PN/102/2008, FSA statement on short positions in financial stocks (Sept. 18, 2008) (*available at* <http://www.fsa.gov.uk/pages/Library/Communication/PR/2008/102.shtml>). Following a brief period of consultation in January 2009, the FSA allowed the ban on short sales to lapse, but extended the disclosure regime until June 30, 2009. *See* FSA/PN/009/2009, FSA Confirms extension of short selling disclosure regime (Jan. 14, 2009) (*available at* <http://www.fsa.gov.uk/pages/Library/Communication/PR/2009/009.shtml>). On June 26, 2009, the FSA announced that it was extending the disclosure regime indefinitely. *See* FSA/PN/084/2009, UK short selling disclosure regime extended (June 26, 2009) (*available at* <http://www.fsa.gov.uk/pages/Library/Communication/PR/2009/084.shtml>). The FSA disclosure rule requires disclosure once a net short "position exceeds 0.25% of a company's issued share capital," but further disclosure is only required "if a short position changes by a further 0.1% of issued share capital." FSA/PN/009/2009; *see also* FSA Policy Statement 09/10, Extension of the short selling disclosure obligation, Feedback to CP09/15 (*available at* http://www.fsa.gov.uk/pubs/policy/ps09_10.pdf)

(n383)Footnote 383. *17 C.F.R. § 240.10b-18(a)*; 10b-18 Adopting Rel., *supra* n.247, at 870. An "affiliated purchaser" is "[a] person acting, directly or indirectly, in concert with the issuer for the purpose of acquiring the issuer's securities; or an affiliate who, directly or indirectly, controls the issuer's purchases of such securities, whose purchases are controlled by the issuer or whose purchases are under common control with those of the issuer." *17 C.F.R. § 240.10b-18(a)(3)*. The definition includes an exclusion for brokers, dealers or others effecting a Rule 10b-18 bid or purchase on behalf of the issuer for its account, as well as officers or directors of the issuer participating in the decision to authorize Rule 10b-18 bids or purchases on behalf of the issuer. *Id.*

(n384)Footnote 384. *17 C.F.R. § 240.10b-18(a)(13)*. "Riskless Principal" is defined as "a transaction in which a broker or dealer after having received an order from an issuer to buy its security, buys the security as a principal in the market at the same price to satisfy the issuer's buy order. The issuer's buy order must be effected at the same price per-share at which the broker or dealer bought the shares to satisfy the issuer's buy order, exclusive of any explicitly disclosed markup or markdown, commission equivalent, or other fee. In addition, only the first leg of the transaction, when the broker or dealer buys the security in the market as principal, is reported under the rules of a [SRO] or under the [Exchange Act] ... " *17 C.F.R. § 240.10b-18(a)(12)*. The broker-dealer also must have certain policies and procedures in place that allow the broker-dealer easily to reconstruct the transaction.

In a June 2002 Commission Guidance, the SEC indicated that the Rule 10b-18 safe harbor did not apply to issuer repurchase transactions involving securities futures, including the receipt of the securities underlying the futures. "Commission Guidance on the Application of Certain Provisions of the Securities Act of 1933, the Securities Exchange Act of 1934, and Rules Thereunder to Trading in Security Futures Products," Sec. Ex. Act Rel. No. 46101 (June 21, 2002).

CHAPTER 6 Regulation of Market Manipulation

2-6 Federal Securities Exchange Act of 1934 § 6.04

AUTHOR: Daniel J. Kramer, Marc E. Elovitz, William H. Gussman Daniel J. Kramer is Co-Chair of the Securities Litigation and Enforcement Group of Paul, Weiss, Rifkind, Wharton & Garrison. Marc E. Elovitz is a partner in the Investment Management and Litigation Departments of Schulte Roth & Zabel LLP. William H. Gussman, Jr. is a partner in the Litigation Department of Schulte Roth & Zabel LLP. Edward Altabet, an associate at Schulte Roth and Richard Eisenberg, an associate at Paul Weiss, provided assistance.

§ 6.04 Remedies for Market Manipulation

This section describes the various remedies available to private litigants and the SEC to enforce the anti-manipulation provisions of the Exchange Act and SEC rules and regulations prohibiting manipulative conduct.

[1] Civil Remedies

There are two sections of the Exchange Act--Sections 9(e) and 10(b)--that plaintiffs may use to seek relief for harm caused by market manipulation. In this subsection, we analyze particular evidentiary elements of Sections 9(e) and 10(b) for comparative purposes. For a more detailed description of the substantive elements of each cause of action, please consult §§ 6.03[4][a]-[d] for Section 9(e) and § 6.03[4][e] for Section 10(b).

[a] Section 9(e). As discussed in §§ 6.03[4][a] -[d] above, Section 9 prohibits wash sales, matched orders, touting, tipster sheets and other misrepresentations. n1 It also prohibits general manipulative transactions on national securities exchanges, and regulates stabilization measures, options, and practices affecting market volatility on national securities exchanges. n2 Section 9(e) expressly grants a private right of action for violations of subsections (a), (b) or (c) of Section 9: n3

Any person who willfully participates in any act or transaction in violation of subsection (a), (b), or (c) of this section, shall be liable to any person who shall purchase or sell any security at a price which was affected by such act or transaction, and the person so injured may sue in law or in equity in any court of competent jurisdiction to recover the damages sustained as a result of any such act or transaction ... n4

Following the Sarbanes-Oxley Act of 2002, the statute of limitations for bringing a claim under Section 9(e) is the same "two year/five year" rule applicable to claims under 10(b):

"[A] private right of action that involves a claim of fraud, deceit, manipulation, or contrivance in

contravention of a regulatory requirement concerning the securities laws ... may be brought not later than the earlier of[] (1) 2 years after the discovery of the facts constituting the violation; or (2) 5 years after such violation." n5

When securities are sold on a national securities exchange, private plaintiffs can bring actions under both Sections 9(e) and 10(b), n6 but, Section 9(e) is used less frequently given its narrower applicability and higher pleading burden relative to Section 10(b). n7 Section 9(e) is limited to securities sold on a national securities exchange and requires proof that the plaintiff bought or sold at a price that was affected by the market manipulation. n8 Recovery is therefore limited to damages directly linked to that change in price. n9 Section 9(e) also adds the element of manipulative purpose, not present in 10(b) actions. n10

The Section 9(e) requirement of connecting defendant's manipulative acts to plaintiff's sale or purchase price can be daunting, as there are often intervening factors that impact the market price of a security. n11 For example, in *Chemetron Corp. v. Business Funds, Inc.*, Business Funds, Inc. was held liable under Section 10(b), but not under Section 9(a)(2), when a jury found that Business Funds acquired control of Westec and manipulated the price of Westec stock, which was then sold to Chemetron, in exchange for the stock of a Chemetron subsidiary. n12 The jury found all the elements of a manipulative stock scheme under 10(b), but did not find that the stock scheme "affected" the price Chemetron paid for the Westec stock, a necessary element under Section 9. n13

Plaintiffs suing under Section 9 also must prove that defendant "willfully" participated in the manipulation. n14 The mere act of influencing the market price is not sufficient--plaintiff must show that defendant intended to do so, *i.e.*, had a manipulative purpose. n15 In practice, however, willfulness and manipulative purpose often are inferred from the circumstances of the case, and do not require a separate evidentiary showing. n16 For example, in *Crane Co. v. Westinghouse Air Brake Co.*, the Court of Appeals for the Second Circuit found the requisite manipulative purpose and willfulness under Section 9(e) when a company bought a significant amount of stock of a corporation it wished to acquire, on the expiration date of a competitor's tender offer, thus driving up the price of the stock and fending off the takeover attempt. n17

[b] Section 10(b). Although there is no explicit private right of action under Section 10(b), federal courts have established the availability of a private right of action for securities fraud under Section 10(b) and *Rule 10b-5*. n18 To set forth a private right of action for market manipulation under Section 10(b) and *Rule 10b-5*, a plaintiff must allege: (1) a misrepresentation or omission of a material fact or a scheme by defendant to defraud; (2) in connection with the purchase or sale of securities; (3) made with scienter; (4) that plaintiff relied upon, and (5) which caused plaintiff's injury. n19 As part of the causation requirement, plaintiff must show both transaction causation and loss causation. n20 "Transaction causation" has been described as "the violations in question caused the plaintiff to engage in the transaction." n21 "Loss causation" has been described as "the misrepresentations or omissions caused the harm." n22

It is often difficult to establish the element of causation in market manipulation cases. First, a plaintiff can only establish transaction causation where the stock was purchased *after* the alleged manipulation. In market manipulation cases, a person who buys the stock after the alleged manipulation can establish transaction causation under the "fraud on the market" theory by showing that defendant's manipulative acts interfered with the free forces of the market. n23 Shareholders who bought the stock in question before the alleged manipulation cannot establish the element of transaction causation, because they cannot show that the manipulation caused them to engage in the securities transaction. n24

Second, with respect to loss causation, it may be difficult for a plaintiff to prove that the alleged manipulation was the cause of the change in market price. n25

Plaintiffs have used Section 10(b) and *Rule 10b-5* thereunder to obtain both damages and injunctive relief. For example, in *Crane Co. v. Westinghouse Air Brake Co.* (see above), the Court of Appeals ordered appropriate remedies, including

damages, prospective injunctive relief, and divestiture or separation of Air Brake, as necessary to compensate Crane for its lost merger opportunity. n26

[2] Enforcement Remedies

Section 21 of the Exchange Act establishes a wide array of enforcement remedies for violations of the Exchange Act. Through administrative proceedings or actions brought in federal court, the SEC can obtain injunctions, cease and desist orders, civil penalties, disgorgement of monies fraudulently obtained, and orders barring individuals from serving as directors or officers of public companies. n27 Section 15 establishes enforcement mechanisms against brokers and dealers, n28 which are covered in more detail in Chapter 9. The SEC can also refer matters to the Department of Justice for criminal prosecution. We will briefly review each remedy in the context of market manipulation.

[a] Injunctive Relief. Section 21(d)(1) of the Exchange Act enables the SEC to move before a United States District Court for preliminary and permanent injunctions against a person or persons committing any violation of the securities acts, SEC rules, rules of the national securities exchanges, registered securities associations or registered clearing agencies. n29 That section provides:

Whenever it shall appear to the Commission that any person is engaged or is about to engage in any acts or practices constituting a violation of any provision of this title, the rules or regulations thereunder, the rules of a national securities exchange or registered securities association of which such person is a member or a person associated with a member, the rules of a registered clearing agency in which such person is a participant, or the rules of the Municipal Securities Rulemaking Board, it may in its discretion bring an action in the proper district court of the United States, ... to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted without bond. n30

To obtain injunctive relief, the SEC must demonstrate by a preponderance of the evidence a reasonable likelihood that the defendant will repeat the securities violation. n31 One court explained:

In deciding whether to issue the preliminary injunction the critical question before the Court is whether there is a reasonable expectation that the defendants will thwart the policies of the SEC and Congress as expressed in the '33 and '34 Acts and the rules and regulations promulgated pursuant thereto by engaging in activities proscribed thereby. And the court must also consider the fact that illegal past conduct gives rise to the inference that there is a reasonable likelihood of future violations. n32

The burden then shifts to the defendant, which must show there is no reasonable expectation that it will repeat the illegal activity. n33 For example, the United States District Court for the Southern District of New York granted a preliminary injunction against further violations of the securities laws where defendants issued 10,000 shares of a company's stock in the names of 100 fictitious persons, placed purchase orders with various brokerage firms for over 40,000 shares of company stock with no intention of paying for them, then misrepresented the value of the stock, failed to disclose the true identity of the beneficial owners of the stock and effected sham transactions which involved no change in the beneficial ownership of stock. n34 The court issued the injunction after finding that defendants had not sustained their heavy burden rebutting the inference that there was a reasonable likelihood of future securities law violations. n35

[b] Cease and Desist Orders. In 1990, Congress added to the SEC's enforcement powers by permitting the SEC to issue cease and desist orders after notice and opportunity for hearing. n36 Section 21C of the Exchange Act provides:

If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this chapter, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that

is, was, or would be a cause of the violation, due to an act or omission the person knew or should have known would contribute to such violation to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. n37

Section 21C also permits the SEC to impose conditions on defendants to assure future compliance with the federal securities laws. n38 The SEC may enter temporary cease and desist orders where the securities violation is likely to result in significant dissipation or conversion of assets, significant harm to investors or substantial harm to the public interest, including losses to the Securities Investor Protection Corporation. n39

The SEC's burden for obtaining a cease and desist order is lower than its burden in obtaining injunctive relief. The Commission has stated that "while Congress intended that cease-and-desist orders be forward-looking, like injunctions, it intended that the showing of risk of future violations be significantly less than that required for an injunction." n40 Accordingly, "[a]bsent evidence to the contrary, a finding of a violation raises a sufficient risk of future violation. To put it another way, evidence showing that a respondent violated the law once probably also shows a risk of repetition that merits our ordering him to cease and desist." n41 The SEC need not show scienter to invoke cease and desist authority. n42

The SEC considers the following factors, among others, in determining whether to issue a cease and desist order:

[T]he seriousness of the violation, the isolated or recurrent nature of the violation, the respondent's state of mind, the sincerity of the respondent's assurances against future violations, the respondent's recognition of the wrongful nature of his or her conduct, and the respondent's opportunity to commit future violations ... [W]hether the violation is recent, the degree of harm to investors or the marketplace resulting from the violation, and the remedial function to be served by the cease-and-desist order in the context of any other sanctions being sought in the same proceedings. n43

The SEC issued a cease and desist order where a law school student created a stock recommendation website called "Fast-Trades.com" to manipulate the price of stocks and involved two friends in posting false recommendations on the site after purchasing the stock. The SEC also ordered disgorgement and prejudgment interest, but waived payment upon a finding that the defendants were unable to pay. n44 The cease and desist order may well have reflected the SEC's assessment that there was minimal risk of future violations on the part of these relatively unsophisticated traders.

[c] Profit Disgorgement. Under Section 21(d)(3)(A), the Commission or other appropriate regulatory agency may enter an order requiring an accounting and disgorgement of profits defendant illegally gained, including reasonable interest. n45 Disgorgement is "intended to deter by depriving wrongdoers of any unjust enrichment, thereby making their violations unprofitable." n46 The disgorgement remedy also may be used against persons who did not violate the securities laws, who hold illegally obtained profits, and have no legitimate claim to the proceeds. n47

In determining whether prejudgment interest is appropriate, courts consider: the need to fully compensate the wronged party for actual damages suffered, the fairness and the relative equities of the award, and the remedial purposes of the statute. n48 The proper measure of disgorgement is the full extent of the defendant's actual illegal profit rather than the amount of loss to the investor. n49 The disgorged amount must be "causally connected to the violation, but it need not be figured with exactitude," nor need there be a "precise nexus" between the disgorgement amount and the violation. n50 Joint and several liability is permitted for securities violations, but "no more than the total amount of unlawful profits, plus interest on those amounts, is to be disgorged." n51 The district court also has broad discretion as to whether to grant prejudgment interest and the rate of interest. n52

The court's broad discretion in determining disgorgement and other penalties sought by the SEC was reflected in *SEC v. Rosenfeld*. In that case, defendant, the president, treasurer and director of Synpro Environmental Services, issued his company's stock for no consideration to nominees, then directed them to sell the shares into the market, generating

profits for himself. The court ordered disgorgement of \$1,093,189, the amount of profits generated, and added \$630,386.63 in prejudgment interest by calculating the IRS rate for underpayment of taxes between defendant's last sale and entry of judgment. It further awarded civil penalties in the amount of \$1,093,189. n53 Under Section 308 of the Sarbanes-Oxley Act of 2002, n54 a court can order that the civil penalties imposed become part of the disgorgement fund for the benefit of the victims of securities fraud. n55

[d] Civil Penalties. Under Section 21A, if it appears that a person has violated an SEC rule, regulation or cease and desist order, other than a violation that is subject to a penalty under the Insider Trading Sanctions Act of 1984, the SEC may bring a civil action seeking a civil penalty against the violator. n56 The amount of penalty is discretionary and is determined by whether the violation involved "fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement," or "whether the violation directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons." n57

The courts view civil penalties as a means "[t]o achieve the dual goals of punishment of the individual violator and deterrence of future violations." n58 The legislative history of Section 21(d) indicates that such penalties are necessary because disgorgement merely requires the return of wrongfully obtained profits, it does not result in any actual economic penalty or act as a financial disincentive to engage in securities fraud ... [The] authority to seek or impose substantial monetary penalties, in addition to the disgorgement of profits, is necessary for the deterrence of securities law violations that otherwise may provide great financial returns to the violator. n59

For example, in *SEC v. Poirier*, defendants had engaged in an elaborate pump and dump scheme involving a number of false press releases regarding unregistered stocks, resulting in significant profits for the defendants. The court granted the SEC's request for a \$100,000 civil penalty as to each defendant, finding that "defendants' violations involving fraud and deceit were numerous and ongoing." n60

[e] Bar Orders. Under Section 21(d)(2) of the Exchange Act, where the SEC seeks an injunction or criminal prosecution, the court may prohibit conditionally or unconditionally, permanently or temporarily, any person who has violated Section 10(b) or any rules thereunder, from acting as an officer or director of any issuer that has a class of securities registered under the Exchange Act or any issuer that is required to file periodic reports under the Act, "if the person's conduct demonstrates substantial unfitness to serve as an officer or director of any such issuer." n61

In *Charles O. Huttoe*, defendant, formerly the Chairman and CEO of Systems of Excellence, Inc. (SOE), allegedly artificially inflated the price of SOE securities by issuing materially false press releases about nonexistent multimillion dollar sales of SOE products, filing false periodic reports with the SEC, and bribing individuals to tout SOE stock. As a final part of the scheme, defendant and several cohorts took advantage of the inflated market by dumping their shares. Huttoe settled the SEC action by consenting to an order permanently enjoining him from violating federal securities laws, barring him from acting as an officer and director of a public company, and requiring him to disgorge the monies he derived from the SOE manipulation. n62

[f] Criminal Penalties. Under Section 21(d)(1) of the Exchange Act, "[t]he Commission may transmit such evidence as may be available concerning such acts or practices as may constitute a violation of any provision of this chapter or the rules or regulations thereunder to the Attorney General, who may, in his discretion, institute the necessary criminal proceedings under this chapter." n63 Section 32 of the Exchange Act describes the criminal penalties that may be imposed, including fines of no more than \$1,000,000 or imprisonment of not more than 10 years for individuals, and fines not exceeding \$2,500,000 for entities. n64

It is a criminal offense to "willfully" violate any of the provisions of the Exchange Act. Section 32 establishes that "no person shall be subject to imprisonment under this section for the violation of any rule or regulation if he proves that he had no knowledge of such rule or regulation." n65 Courts have held, however, that " '[a] person can willfully violate an SEC rule even if he does not know of its existence ... ' The prosecution need only establish 'a realization on the

defendant's part that he was doing a wrongful act;' it is necessary ... only that the act be 'wrongful under the securities laws and that the knowingly wrongful act involve a significant risk of effecting the violation.' " n66

The burden prosecutors bear in establishing a criminal violation of the rules proscribing market manipulation is proof beyond a reasonable doubt. Prosecutors must also show willful behavior, which is a heightened form of scienter. Although some courts have stated that the elements of a securities fraud claim remain the same in both criminal and civil cases, at least one commentator has noted that many courts interpret the elements of securities fraud more narrowly in criminal actions in order to align them with the fundamental values of criminal law. n67

The SEC does not have formal guidelines for determining the circumstances under which it will make a criminal referral. It cites a variety of factors: egregiousness of the alleged misconduct; single occasion versus pattern of misconduct; length of time that the misconduct took place; efforts to conceal the substantive violation; impact of the violation; effect of the misconduct on shareholders, clients, the marketplace or the subject entity; magnitude of proof; recidivism; and misrepresentations to the SEC staff. n68 The SEC tends to refer cases for criminal prosecutions in areas which it prioritizes, where blatantly fraudulent conduct impacts or potentially impacts a large number of investors. Thus, market manipulation, micro cap fraud and fraud over the Internet are areas of increased focus, both in the criminal and civil realms. n69

[g] Regulation of Brokers and Dealers. Sections 15(b)(4) and 15(b)(6) of the Exchange Act enable the SEC to enforce the securities laws against broker-dealers and associated persons of the broker-dealers through a variety of mechanisms. n70 The SEC can censure; place limitations on activities, functions and operations; suspend registration for a period not exceeding 12 months; and deny or revoke registration of member firms and their associated persons. On finding that a broker-dealer has engaged in market manipulation, the SEC has invoked section 15(b)(4) to issue injunctions, censure and revoke the registration of broker-dealers, suspend individual brokers and otherwise limit the activities of broker-dealers. For example, the SEC permanently enjoined a broker-dealer on finding that the broker-dealer had engaged in non-bona fide transactions to give the false impression that it had met the required sale of shares in a "best efforts, all-or-none" offering. n71 In another matter, it censured and barred from the securities industry a broker-dealer that had engaged in domination and control of the market, wash sales, matched orders, marking the close and other forms of artificial inflation in the aftermarket of the IPO it underwrote. n72

Under section 15(b)(6), the SEC has barred broker-dealers from engaging in penny stock transactions when they were found to have manipulated the market for penny stock through pump and dump schemes and other forms of artificial inflation of the stock price. n73

CHAPTER 6 Regulation of Market Manipulation

2-6 Federal Securities Exchange Act of 1934 § 6.05

AUTHOR: Daniel J. Kramer, Marc E. Elovitz, William H. Gussman Daniel J. Kramer is Co-Chair of the Securities Litigation and Enforcement Group of Paul, Weiss, Rifkind, Wharton & Garrison. Marc E. Elovitz is a partner in the Investment Management and Litigation Departments of Schulte Roth & Zabel LLP. William H. Gussman, Jr. is a partner in the Litigation Department of Schulte Roth & Zabel LLP. Edward Altabet, an associate at Schulte Roth and Richard Eisenberg, an associate at Paul Weiss, provided assistance.

§ 6.05 SRO Regulation of Market Manipulation

[1] Manipulative Devices

As described in more detail in Chapter Two, self-regulatory organizations have assumed responsibility for the day-to-day monitoring and policing of securities transactions, subject to SEC oversight. The constitution, by-laws and rules of conduct, that are issued by the SROs, and approved by the SEC, regulate the activities of SRO members and are designed to ensure compliance with the federal securities laws. These provisions run the gamut of general standards of conduct, including rules bearing titles such as "Standard of Commercial Honor and Principles of Trade" n1 and "Business Conduct," n2 to general prohibitions against "Manipulative Operations" n3 or "Manipulation," n4 to rules addressing specific violative conduct, such as crossing orders n5 and excessive dealing by members. n6 Many of these rules bear upon manipulation of the securities markets. In disciplinary actions against members, SROs often reference relevant provisions of the securities laws as well as the applicable SRO rules, citing the more specific violations where appropriate. In this section, we highlight a few of the SROs' most salient anti-manipulation provisions.

[a] FINRA. The legislation authorizing the registration of FINRA as a national securities association requires that FINRA's rules be "designed to prevent fraudulent and manipulative acts and practices," among other requirements. n7 The two principle tools for disciplining members who have engaged in market manipulation are FINRA Rules 2010 and 2020.

FINRA Rule 2010, entitled "Standards of Commercial Honor and Principles of Trade," reads simply: "A member, in the conduct of his business, shall observe high standards of commercial honor and just and equitable principles of trade." FINRA Rule 2010 and its predecessor--NASD Rule 2110--have often been cited when a member has manipulated the market price of a security through a mechanism that is not specifically addressed elsewhere in the rules. For example, when a broker at a member firm pre-sold the aftermarket in connection with sales of an initial public offering, he was charged with violating Section 10(b) of the Exchange Act and *Rule 10b-5*, and NASD Rules 2110 and 2120. n8

There are a number of specific prohibitions under FINRA Rule 2010. IM 2110-2 Trading Ahead of Customer Limit Ordersⁿ⁹ and IM 2110-3 Front Running Policyⁿ¹⁰ are anti-manipulation rules prohibiting members from using their informational or transactional advantages to trade ahead of the market, coordinate prices or otherwise impact the market price of a security.ⁿ¹¹

FINRA Rule 2020, entitled "Use of Manipulative, Deceptive or Other Fraudulent Devices," is another all-purpose anti-manipulation rule, which states that "[n]o member shall effect any transaction in, or induce the purchase or sale of, any security by means of any manipulative, deceptive or other fraudulent device or contrivance." The NASD described Rule 2020's predecessor--NASD Rule 2120--as the "equivalent of SEC Rule 10b-5."ⁿ¹²

Rule 2020 has been cited in many instances in which a market maker paints a false picture of market interest in a security. For example, when a broker entered fictitious limit orders and later cancelled them to avoid executing particular customer limit orders as required under IM 2110-2, an NASD hearing panel found the broker had engaged in a manipulative act in violation of both Rule 2010 and Rule 2020.ⁿ¹³ The panel reasoned that the broker had deceived customers expecting limit orders to be honored, and created a false picture of activity because the trades had been reported on the Nasdaq tape prior to cancellation.ⁿ¹⁴

Other disciplinary actions under Rule 2020 have sanctioned brokers for "marking the open" by upticking bids in the pre-opening market in order to minimize losses on impending short positions,ⁿ¹⁵ dominating and controlling the aftermarket in warrants,ⁿ¹⁶ violating Regulation M by unlawfully bidding for and purchasing securities in the secondary market during the restricted period during distribution,ⁿ¹⁷ and failing to disclose the broker's beneficial interest in the majority of a float while engaging in a massive effort to sell and charging excessive mark-ups.ⁿ¹⁸

Four other FINRA rules directly address price manipulation. NASD Rule 2780, "Solicitation of Purchases on an Exchange to Facilitate a Distribution of Securities," forbids any member who is participating in a distribution, or has any other financial interest in the distribution, from compensating or offering to compensate another for soliciting a transaction involving the offering security, other than for the account of the member involved in the compensation arrangement.ⁿ¹⁹ The rule is designed to prevent artificial stimulation of the market for that offering.

NASD Rule 3310, "Publication of Transactions and Quotations," prohibits any member from publishing or circulating any communication which purports to report any transaction as a purchase, sale, bid or ask price unless the member believes that bid, offer or transaction to be bona fide.ⁿ²⁰ When, for example, one broker sold a stock almost exclusively between the firm's inventory and its customers, maintaining a high bid price even as it was long on the stock with a growing inventory, the NASD found that the principals of the broker had violated Rules 2010, 2020 and 3310.ⁿ²¹

Reflecting the regulatory settlements with major investment banks regarding the potential conflicts of interest of research analysts and subsequent SEC rulemaking (*see* "Contemporary Contexts of Market Manipulation," *infra*), the NASD adopted Rule 2711, "Research Analysts and Research Reports," which places restrictions on the relationships and communications among investment banking departments, research departments and the subject companies, and imposes new disclosure requirements on research reports.ⁿ²² More specifically, among other provisions, communications with the public must now disclose any potential conflicts of interest in research reports and public appearances and research department personnel engaged in the preparation of research reports may not be subject to the supervision or control of anyone in the investment banking department.

FINRA Rule 4560, "Short-Interest Reporting," is an OTC counterpart to the SEC's Rule 201 of Regulation SHO, which addresses reporting of short sales of exchange-listed securities.ⁿ²³

[b] New York Stock Exchange. There are also several New York Stock Exchange ("NYSE") rules that forbid specific manipulative activities. Rule 76 prohibits cross orders,ⁿ²⁴ and Rule 77 prohibits offers to buy or sell "on stop"

above or below the market, to buy or sell securities at the close, to buy or sell dividends, to bet upon the course of the market or to buy or sell privileges to receive or deliver securities. n25 Rule 78 prohibits sell and buy orders coupled at the same price. n26

There are a number of other provisions often cited in NYSE disciplinary actions involving market manipulation. Rule 435 prohibits, among other activities, excessive trading by members for an account in which they have an interest, n27 successive transactions by members, n28 manipulative operations n29 and circulation of rumors n30--all commonly used to have an artificial impact on securities prices.

The NYSE has disciplined members under NYSE Rules 435(1) and (3) for marking the close, n31 and for making successive bids and purchases to drive up the price of a security in order to raise and stabilize the stock price and enable execution of a sale with the issuer, n32 and for failing to establish procedures to prevent employees from engaging in market manipulation. n33 The NYSE also has its own short sale rule, Rule 440B, which mirrors Regulation SHO.

Like the NASD, the NYSE also has issued more general rules that allow it to discipline members for acts that do not fit neatly into explicitly prohibited activities. For example, NYSE Rule 476(a) authorizes the NYSE to impose sanctions on members for, among other acts:

- (1) violating any provision of the Securities Exchange Act of 1934 or any rule or regulation thereunder;
- (2) violating any of his or its agreements with the Exchange;
- (3) violating any provision of the Constitution or any Rule adopted by the Board of Directors of the Exchange;
- (4) making a material misstatement to the Exchange;
- (5) fraud or fraudulent acts;
- ***
- (7) acts detrimental to the interest or welfare of the Exchange;
- (8) making a fictitious bid, offer or transaction or giving an order for the purchase or sale of a securities the execution of which would involve no change of beneficial ownership or executing such an order with knowledge of its character; and
- (9) making any purchases or sales or offers of purchase or sale of securities for the purpose of upsetting the equilibrium of the market or bringing about a condition in which prices will not fairly reflect market values, or assisting in making any such purchases or sales with knowledge of such purpose, or being, with such knowledge, a party to or assisting in carrying out any plan or scheme for the making of such purchases or sales or offers of purchase or sale n34

The NYSE has disciplined members under NYSE Rule 476 for making a series of fictitious transactions in order to artificially influence the price of the securities in the firm's favor, n35 trading for accounts in which the member had a financial interest, and using the accounts to trade ahead of customer orders. n36

The NYSE also amended Exchange Rule 472, "Communications with the Public," and Exchange Rule 251, "Reporting Requirements," to reflect the settlements and SEC rulemaking stemming from the issue relating to research analysts and potential conflicts of interest. The amendments substantially mirror the provisions of NASD Rule 2711, described above. In addition, in February 2004 the NYSE proposed, and in December 2004 the SEC approved, Exchange Rule

470, "IPO Allocations and Distributions," which, like NASD Rule 2712, governs the allocation and distribution of initial public offerings and attempts to address alleged abuses such as "laddering" and "tie-ins" additionally highlighted in the regulatory settlements with respect to research analysts and potential conflicts of interest. n37

[c] AMEX (NYSE Euronext). NYSE Euronext, who acquired the American Stock Exchange ("AMEX") in 2008, has a rule that is similar to NYSE's excessive dealing prohibition, n38 as well as a rule that bans attempts to influence the market through rumors. n39 This organization has often disciplined members under general provisions in its constitution requiring members to adhere to "just and equitable principles of trade." n40 For example, the AMEX disciplined a member for marking the close, n41 and for stopping or delaying execution of customer orders in order to increase or maintain the value of securities in its proprietary account. n42

[2] Options

Both Congress and the SEC have perceived options trading to be particularly prone to manipulation. n43 In its report on the securities markets prior to passage of the Exchange Act, the Committee on Banking and Currency listed options as the "indispensable concomitants of every pool operation designed to distribute stock at an increased price," as one basis for authorizing the SEC to regulate options trading. n44 In 1977, after a rapid growth in options trading volume, the SEC undertook a review of possible abuses in the trading and selling of options and in 1979 released a report following investigation of the standardized options markets. n45 The report indicated significant inadequacies in the SRO regulation of options, resulting in a series of SRO rule revisions. n46

Today, SROs that permit options trading have extensive surveillance mechanisms to detect fraudulent and manipulative activities. They also have implemented detailed rules with respect to disclosure and permissible transactions involving options. Position limits (*i.e.*, limits on the number of options contracts that are based on a particular security), and exercise limits (*i.e.*, limits on the number of puts or calls exercised with respect to a particular security), are two mechanisms designed to limit the potential profitability and market impact of options manipulation.

FINRA Rule 2360 n47 addresses options trading. Most disciplinary actions citing this rule, or its NASD predecessors, involve unauthorized trading and suitability issues.

The NYSE also has detailed rules regulating options trading. n48 As with FINRA Rule 2360 and its NASD predecessors, NYSE disciplinary decisions citing violations of the options rules primarily involve unauthorized trading and suitability.

(n1)Footnote 1. NASD Rule 2110.

(n2)Footnote 2. AMEX Rule 16.

(n3)Footnote 3. NYSE Rule 435(4).

(n4)Footnote 4. AMEX Rule 4.

(n5)Footnote 5. NYSE Rule 76.

(n6)Footnote 6. AMEX Rule 3.

(n7)Footnote 7. *15 U.S.C. 78o-3(b)(6)*.

(n8)Footnote 8. "Such [tie-in] arrangements artificially stimulate demand in the aftermarket, the net effect of which is to create the impression of greater aftermarket activity than actually exists Thus, the non-disclosure of this information operated as a fraud upon the market, and the tie-in arrangement amounted to a device or scheme that

perpetuated a fraud upon aftermarket purchasers." *Perles*, 2000 NASD Discip. LEXIS 24, at *36.

(n9)Footnote 9. IM 2110-2 requires member firms acting as market makers to handle their customer limit orders with all due care in order to avoid trading ahead of those limit orders. Market makers handling customer limit orders, whether received from their own customers or from another member, are prohibited from trading at prices equal or superior to that of the limit order without also executing their customer's limit order. NASD IM 2110-2.

(n10)Footnote 10. IM 2110-3 forbids a member or person associated with a member, for an account in which such person has an interest or exercises investment discretion, or for certain customer accounts, to execute an order to buy or sell an option or an underlying security when such person has material, non-public information concerning an imminent block transaction regarding either the underlying security (in the case of the option) or the option overlying that security (in the case of the security), prior to the time information concerning the block transaction has been made publicly available. NASD IM 2110-3.

(n11)Footnote 11. The NASD also brought many actions to enforce former IM-2110-1, which was replaced by NASD Rule 2790 in 2003 (see below), and was designed to prevent members involved in the distribution of hot issues from selling the offering securities other than at the public offering price, and to prevent any sales in which a member or person associated with a member had a beneficial interest. Thus, the NASD disciplined an individual for purchasing shares of a hot issue for an account in which he had an interest while he was registered with a member firm. John M.W. Crute, Jr., Complaint No. C05950018, 1997 NASD Discip. LEXIS 51, at *2-4 (N.A.S.D.R. Aug. 28, 1997). Additionally, IM-2110-1(f) requires any member firm selling hot issues to an investment partnership or corporation to obtain documentation that shows whether any restricted persons have a beneficial interest in the investment partnership or corporation that is purchasing the hot issue. The firm must maintain this documentation for at least three years following the sales. *See, e.g.*, L.H. Alton & Co., Complaint Nos. C01960003, C10960024, 1997 NASD Discip. LEXIS 60, at *15-16 (N.A.S.D.R. Dec. 17, 1997); Equity Sec. Trading Co., Complaint No. C04940053, 1996 NASD Discip. LEXIS 42, at *8-12 (N.A.S.D.R. Oct. 23, 1996).

On October 24, 2003, the SEC approved NASD Rule 2790, "Restrictions on the Purchase and Sale of Initial Equity Public Offerings," to replace IM-2001-1. The rule generally prohibits a member from selling shares in a distribution to restricted persons, *i.e.*, most associated persons of a member, most owners and affiliates of a broker-dealer and certain other classes of persons, such as individuals in a position to provide the member with future business, unless the member meets certain "preconditions for sale." *See also* "Initial Public Offerings (IPO's)," Notice to Members 03-79 (Dec. 2003). Previously, in August 2002, the NASD had proposed NASD Rule 2712, "IPO Allocations and Distributions," which addressed such IPO abuses as "tie-ins," "spinning" and "flipping." "Regulation of IPO Allocations and Distributions," Notice to Members 02-55 (Aug. 2002); *see also* 69 *Fed. Reg.* 77,804 (Dec. 28, 2004). As of the date of this writing, the SEC had not approved the rule.

(n12)Footnote 12. *Perles*, 2000 NASD LEXIS 24, at *30.

(n13)Footnote 13. Michael B. Jawitz, Complaint No. CMS960238, 1999 NASD Discip. LEXIS 24, at *1 (N.A.S.D.R. July 9, 1999), *findings and sanctions sustained* by Sec. Ex. Act Rel. No. 44,357, 75 SEC Dock. 205 (May 29, 2001). To comply with IM-2110-2, the broker-dealer had devised an internal order routing and execution system that automatically executed any existing customer limit order (other than an odd lot) if the firm executed a trade for its proprietary account at a price that would satisfy the limit order. By entering fictitious limit orders at higher prices than the customer limit orders, Jawitz avoided having to execute those limit orders, which negatively would have impacted his positions. *Id.*

(n18)Footnote 18. John Roger Faherty, Complaint No. CMS920005, 1998 NASD Discip. LEXIS 44, at *10-12 (N.A.S.D.R. Oct. 14, 1998). *See also Perles*, 2000 NASD Discip. LEXIS 24, at *28-36 (pre-selling the aftermarket of an initial public offering through tie-in arrangement); *Jawitz*, 1999 NASD Discip. LEXIS 24, at *5-8 (fictitious trade orders).

(n19)Footnote 19. NASD Rule 2780 forbids any member who is participating or otherwise has a financial interest in any distribution, from compensating or offering to compensate any person for soliciting another to purchase any security of the same issuer on a national securities exchange, or for purchasing any security of the same issuer on any such exchange for any account other than the account of the member who has paid or is to pay such compensation; or for selling, offering to sell, inducing an offer to buy such security, or delivering such security after sale, if, in connection with such distribution, such member has compensated or offered to compensate any person for soliciting another to purchase any security of the same issuer on any national securities exchange, or for purchasing any security of the same issuer for any account other than the account of the member who has paid or is to pay such compensation. NASD Rule 2780.

(n20)Footnote 20. IM-3310, Manipulative and Deceptive Quotations, explains that Rule 3310 derives from Rules 2010 and 2020.

(n21)Footnote 21. Michael J. Markowski, Complaint No. CMS920091, 1998 NASD Discip. LEXIS 35, at *46-47 (N.A.S.D.R. July 13, 1998).

(n22)Footnote 22. Rule 2711 went into effect starting July 2002 with certain provisions effective during subsequent dates. While the rule has been periodically amended, its substance remains the same.

(n23)Footnote 23. FINRA Rule 4650 is the modern successor to NASD Rule 3350, which "prohibit[ed] short sales by NASD members in NMS securities at or below the current best (inside) bid as shown on the Nasdaq screen when that bid is lower than the previous best (inside) bid (this is referred to as the 'bid test.')

It contain[ed] certain exemptions, including an exemption for qualified Nasdaq market makers, options market makers, and warrant market makers. Rule 3350 also include[d] exceptions similar to those provided under Rule 10a-1. The NASD also require[d] members to report regularly to the NASD their total short positions in all customer and proprietary firm accounts." Short Sales, Sec. Ex. Act Rel. No. 42,037, 70 SEC Dock. 2090, 2093 (Oct. 20, 1999). NASD Rule 3350 employed a bid test rather than a tick test because Nasdaq trades are not necessarily reported to the tape in chronological order. Self Regulatory Organizations, Sec. Ex. Act Rel. No. 44,497, 75 SEC Dock. 761, 762 (June 29, 2001). IM-3350 further defined and applied many of the short sale provisions, including explanation of exemptions for certain market making activity. In order to qualify for an exemption, one was required to be a "qualified" Nasdaq market maker and must engage in "bona fide" market making activity. NASD Rule 3350.

(n24)Footnote 24. "Crossing Orders" Rule 76: "When a member has an order to buy and an order to sell the same security, he or she shall offer such security at a price which is higher than his or her bid by the minimum variation permitted in such security before making a transaction with himself or herself. All such bids and offers shall be clearly announced to the trading Crowd before the member may proceed with the proposed 'cross' transaction." NYSE Rule 76.

(n25)Footnote 25. "Prohibited Dealings and Activities" Rule 77: "No member shall offer publicly on the Floor: (1) to buy or sell securities 'on stop' above or below the market; (2) to buy or sell securities 'at the close'; (3) to buy or sell dividends; (4) to bet upon the course of the market; or (5) to buy or sell privileges to receive or deliver securities." NYSE Rule 77.

(n26)Footnote 26. "Sell and Buy Orders Coupled at Same Price" Rule 78: "An offer to sell coupled with an offer to buy back at the same or at an advanced price, or the reverse, is a prearranged trade and is prohibited. This rule applies both to transactions in the unit of trading and in lesser and greater amounts." NYSE Rule 78. *See, e.g.,* Joseph M. Peters, Ex. Panel Decision 80-44-45, 1980 NYSE Disc. Action LEXIS 40 (N.Y.S.E. July 25, 1980).

(n27)Footnote 27. NYSE Rule 435(1) Excessive trading by members--prohibiting excessive trading by members for an account in which the member has a financial interest, in view of the financial resources of the member or the market for such security. NYSE Rule 435(1).

(n28)Footnote 28. NYSE Rule 435(3) Successive transactions by members--prohibiting purchases at successively higher prices or sales at successively lower prices for the purpose of creating a false appearance of activity in the stock, or unduly or improperly influencing the price of the security. NYSE Rule 435(3).

(n29)Footnote 29. NYSE Rule 435(4) Manipulative operations--prohibiting directly or indirectly participating in or having any interest in the profits of a manipulative operation or knowingly managing or financing a manipulative operation. NYSE Rule 435(4).

(n30)Footnote 30. NYSE Rule 435(5) Circulation of rumors--prohibiting the circulation of "rumors of a sensational character which might reasonably be expected to affect market conditions on the Exchange." NYSE Rule 435(5).

CHAPTER 6 Regulation of Market Manipulation

2-6 Federal Securities Exchange Act of 1934 § 6.06

AUTHOR: Daniel J. Kramer, Marc E. Elovitz, William H. Gussman Daniel J. Kramer is Co-Chair of the Securities Litigation and Enforcement Group of Paul, Weiss, Rifkind, Wharton & Garrison. Marc E. Elovitz is a partner in the Investment Management and Litigation Departments of Schulte Roth & Zabel LLP. William H. Gussman, Jr. is a partner in the Litigation Department of Schulte Roth & Zabel LLP. Edward Altabet, an associate at Schulte Roth and Richard Eisenberg, an associate at Paul Weiss, provided assistance.

§ 6.06 Contemporary Contexts of Market Manipulation

[1] The Financial Crisis of 2008-2009

In 2008, market manipulation became the focus of unprecedented attention from the media, regulators and legislators. The equity markets experienced rapid and dramatic fluctuations in value. In particular, the price of publicly traded financial company stocks decreased dramatically, and the largest U.S. investment banks ceased doing business, were acquired by bank holding companies, or became bank holding companies themselves. Amidst these market gyrations, some issuers indicated that they believed their stocks were being unfairly attacked by rumor-mongers and short sellers.
n1

In response to the market turmoil, regulators launched a series of investigations and adopted a series of emergency, temporary and permanent rules attempting to address market manipulation. Many of the actions taken by regulators focused on perceived market manipulation by short sellers.

[a] Government Investigations Into Short Selling. After the sale of Bear, Stearns & Co. Inc. ("Bear Stearns") to JPMorgan Chase & Co., the SEC initiated a series of high-profile investigations into market manipulation involving the spreading of false rumors coupled with short selling. n2 During the spring and summer of 2008, rumors circulated regarding Lehman Brothers Holdings Inc. ("Lehman Brothers"), including a forced bankruptcy and sale to Barclays plc. n3 Coupled with these rumors were short bets against the company, which paid off as the stock plummeted, even though the rumors turned out to be wrong.

In July 2008, the SEC issued a series of subpoenas to Wall Street firms regarding potential manipulation of shares in Bear Stearns and Lehman Brothers. n4 State attorneys general and state securities regulators, as well as foreign securities regulators, also announced investigations into short selling and market manipulation. n5

At the same time, the SEC announced that it would investigate short selling by conducting "sweep" examinations of

broker-dealers and investment advisers, with the help of the securities industry's SROs, such as the FINRA and the New York Stock Exchange Regulation, Inc. n6 The SEC later announced that it had approved a formal order of investigation under which hedge fund managers, institutional investors and broker-dealers with significant trading activity in the swaps or securities of financial services companies would be required to disclose their positions under oath and would receive subpoenas requiring the production of additional documents. n7 The New York State Attorney General announced that his office had commenced a "wide-ranging investigation into short selling in the financial market," indicating that the investigation began as the result of complaints alleging false rumors being spread by short sellers. n8

The SEC also filed its "first-ever case against a trader for spreading knowingly false information designed to drive down the price of stock." n9 In *SEC v. Berliner*, the SEC alleged that the respondent trader had sent an untrue rumor by instant message to thirty-one market participants and then benefited by shorting the shares of the company at issue. n10 The SEC alleged that a Wall Street trader started a false rumor related to The Blackstone Group's acquisition of Alliance Data Systems Corp. ("ADS"). n11 In May 2007, Blackstone agreed to acquire ADS for \$81.75 per share. n12 Then, on November 29, 2007, Paul Berliner sent an instant message to thirty-one traders and securities professionals stating that ADS's board of directors was meeting to consider a revised proposal from Blackstone to acquire ADS for \$70 per share. n13 The rumor spread through Wall Street, and the news media picked up the false story shortly afterwards. n14 The rumor caused ADS's stock to plummet: within thirty minutes after Berliner's first instant message, it dropped 17 percent, from \$77 per share to \$63.65, and the NYSE temporarily halted trading in ADS stock. n15 ADS issued a press release denying the rumor, and by the end of the day the stock recovered to \$77. n16 Over 33,000,000 shares of ADS were traded on November 29--more than twenty times the previous day's volume. n17 The SEC ultimately obtained a settlement from Mr. Berliner consisting of a \$130,000 fine, \$261,229 disgorgement, a permanent injunction and a bar from association with any broker or dealer. n18

[b] Rule-Making Regarding Short Selling. In addition to its investigations and enforcement activity, the SEC took an aggressive approach to adopting rules regarding short selling.

By the third quarter of 2008, the SEC had become sufficiently concerned about market volatility--particularly with respect to financial company stocks, and particularly in connection with naked short selling n19--to engage in emergency rule-making. n20 On July 15, 2008, the SEC issued an order heightening the requirement that a trader, prior to entering into a short sale with respect to a particular security, have reason to know that it had shares of the relevant stock available for delivery. n21 Moreover, for the securities of nineteen specified financial companies, the SEC required a trader to borrow the company's shares before shorting them, and deliver the securities on the settlement date. n22 This rule, which was in place between July 21 and August 12, 2008, applied to all market participants, including those otherwise exempted from the "borrow or locate" requirement under the market-maker exception to Regulation SHO.

Although this emergency rule expired on August 12, 2008, the SEC soon resuscitated the rule and significantly expanded it. Effective September 18, 2008, the SEC issued an emergency order making three temporary changes to short sale rules. n23 First, the SEC adopted temporary Rule 204T, which implemented a "hard T+3 close out requirement," mandating that broker-dealers deliver securities that are the subject of a long or short sale by the close of business on the settlement date, three days after the transaction date. n24 Second, the SEC adopted anti-fraud Rule 10b-21, which imposes liability on anyone found to have engaged in deceptive conduct in connection with abusive short selling. n25 Third, the SEC approved a final rule, originally proposed in August 2007, eliminating the options market-maker exception to Regulation SHO. n26 On October 14, 2008, the SEC extended Rule 204T until July 31, 2009, n27 adopted, as a final rule, antifraud Rule 10b-21, n28 and adopted, as final amendments to Regulation SHO, the elimination of the options market maker exemption to the close out requirements. n29 On July 27, 2009, the SEC permanently adopted Rule 204T. n30

On September 19, 2008, the SEC imposed an immediately-effective ban on short sales of publicly traded securities of 799 specified financial firms. n31 The definition of "short sales" included any sale where the seller is net short or flat;

therefore, with respect to boxed positions, a sale of the long side constituted a short sale. n32 The ban lasted twenty days, expiring on October 8, 2008. During that time, it was expanded to include almost 1,000 issuers. n33

Also on September 19, 2008, the SEC issued a companion rule applying to institutional investment managers who manage accounts with an aggregate value of \$100 million per year (i.e. those who are required to file quarterly 13F reports of their holdings). Beginning September 29, 2008, such managers were required to file new Form SH reports on the first business day of a week following a week in which it engaged in short selling. n34 The order contained a de minimis exclusion for short positions less than 0.25% of the class of securities issued and outstanding *and* if the fair market value of the securities was less than \$1,000,000. This short position disclosure rule originally required public disclosure of such positions. But the subsequent rulemaking on the issue changed course and indicated that managers could seek to keep the Form SH filings non-public and that the SEC staff believed that Form SH filings would be protected from disclosure under the Freedom of Information Act. n35 On October 15, 2008, the SEC issued a new rule requiring disclosure of short sales and positions on Form SH until August 1, 2009. n36 Similar bans and disclosure rules were imposed by the Financial Services Authority in the United Kingdom, and by regulators in more than a dozen different countries around the world. n37

On April 10, 2009, after abolishing the almost 70-year-old uptick rule in 2007, the SEC proposed reinstating some form of short sale price restrictions. The SEC commented that "[d]ue to the extreme market conditions that we are currently facing and the resulting deterioration in investor confidence," it is "appropriate at this time to re-evaluate and seek comment on some form of short sale price test restriction." n38 The proposed amendments to Regulation SHO included two possible approaches: (1) a "short sale price test" either based on the national best bid (an uptick rule) or the last sale price (a modified uptick rule), that would apply on a market-wide, permanent basis; or (2) a "circuit breaker" approach that would apply only on a security-specific, temporary basis during severe market declines in that security. n39 With respect to the circuit breaker approach, the SEC proposed two basic alternatives: (1) a "halt" that would temporarily prohibit short selling in a particular security during a steep decline in price, which could operate in place of, or in addition to, a short sale price test rule; or (2) a circuit breaker rule that would trigger a short sale price test rule. n40

The SEC held a roundtable discussion regarding the proposed uptick rule on May 5, 2009. n41 On August 17, 2009, the SEC re-opened the comment period until September 21, 2009, specifically requesting additional feedback regarding an alternative price test that would allow short selling only at a price above the current national best bid. n42

SEC Chairman Mary Shapiro remarked that although the SEC was "not aware of specific empirical evidence that the 2007 elimination of short sale price tests contributed to [the recent] volatility in the U.S. markets, many members of the public have come to associate short selling with that volatility, and with a loss of investor confidence." n43 For example, Morgan Stanley CEO John Mack and former Lehman Brothers CEO Richard Fuld both accused short sellers of attacking their firms. n44 Traders and asset managers, however, say short sellers are being unfairly targeted for the drop in stock prices that occurred as the housing market bubble burst and exposed risky bets by financial institutions. n45

In April 2009, the SEC sought public comment on whether a short sale price test requirement should be re-instituted. n46 The SEC "decided to re-evaluate the issue due to extreme market conditions and the resulting deterioration in investor confidence." n47 On February 24, 2010 the SEC announced a new Rule 201 alternative uptick rule, effective as of May 10, 2010. n48 The alternative uptick rule set forth in Rule 201(b) of Regulation SHO combines a price test and a circuit breaker, "such that when triggered, short selling will be permitted only at a price above the current national best bid." n49 Under Rule 201(b)(1)(i), circuit breakers are triggered when "the price of [a] covered security decreases by 10% or more from the covered security's closing price as determined by the listing market for the covered security as of the end of regular trading hours on the prior day." And under Rule 201(b)(1)(ii) these restrictions are imposed "for the remainder of the day and the following [trading] day."

The SEC adopted, new Rule 201(b) "because, when triggered, it will prevent short selling, including potentially

manipulative or abusive short selling, from driving down further the price of a security that has already experienced a significant intra-day price decline, and will facilitate the ability of long sellers to sell first upon such a decline." n50 The rule seeks to strike a balance between the SEC's goal of preventing abusive short selling and the need to maintain liquid and price-efficient markets. n51 In adopting new Rule 201(b), the SEC acknowledged the benefits to the market of legitimate short selling, as the short sale price test restrictions of Rule 201 will apply only to securities experiencing significant downward price pressure, rather than to all securities all the time. n52

There are, however, several exemptions that will permit trading centers to display or execute short sales at or below the national best bid under certain circumstances even when a circuit breaker is in effect. n53

[c] Regulatory Actions Involving PIPE Transactions. Generally, a private investment in public equity ("PIPE") deal involves the sale of publicly traded securities to private investors in either a registered or unregistered transaction. During and after the credit crisis of 2008-2009, PIPE transactions increased as they provided quick access to capital markets at reasonable costs. Currently, 49% of PIPE investors expect this increase to continue over the next twelve to eighteen months and another 43% project the investment pace will stay at current levels. n54

The SEC has taken a hard stance with respect to investors with knowledge of an upcoming PIPE transaction who short the stock in anticipation of the price drop that likely will occur when stockholders realize their shares have been diluted. For example, in 2005, the SEC filed an enforcement action against Guillaume Pollet for violating antifraud laws by selling short the publicly traded securities of PIPE issuers prior to the close of the PIPE transaction. n55 In certain instances, his short-selling was contrary to specific representations that no short selling or trading in the issuer's securities had taken place. Pollet made at least \$5.75 million in profits. A final settlement was entered permanently enjoining Pollet from violating securities laws and ordering him to pay a civil penalty of \$150,000. n56 The SEC also instituted and settled administrative proceedings against Pollet barring him from association with any broker or dealer. Additionally, Pollet pled guilty to one count of securities fraud brought against him by the U.S. Attorney's Office for the Eastern District of New York. n57 He was sentenced to two months imprisonment, three months of home confinement and three years of supervised release.

More recently, the SEC filed a lawsuit against Brian D. Ladin, a former analyst for Bonanza Capital, Ltd., for violations of Section 10(b), *Rule 10b-5* and Section 17(a). n58 Ladin, after being informed about a PIPE offering, established a short position for Bonanza in the stock of the company making the offering. Ladin then signed a stock purchase agreement in which he represented that Bonanza did not hold a short position. When the PIPE was publicly announced, the stock price declined. The SEC seeks a judgment enjoining Ladin from violating securities laws, ordering him and Bonanza to disgorge ill-gotten gains and ordering Ladin to pay a civil monetary penalty. n59

[2] Alternative Trading Systems and Dark Pools

An Alternative Trading System ("ATS") is generally any organization or system that provides a market place for bringing together purchasers and sellers of securities or otherwise performs the functions of a stock exchange, but does not set rules governing subscribers' conduct, other than trading conduct, and does not discipline subscribers other than by excluding them from trading on the system. n60 Electronic Communication Networks ("ECNs") and other types of ATSs accounted for almost 50% of Nasdaq's value over the past several years.

In December 1998, the SEC adopted Regulation ATS, noting that ATSs have remained largely outside the national market system, yet impact the public securities markets. n61 The SEC further observed the potential for manipulation due to lack of surveillance and regulation of those markets. n62

Under Regulation ATS, alternative trading systems can choose whether to register as national securities exchanges, or to register as broker-dealers and comply with additional requirements under Regulation ATS, depending on their activities and trading volume. The regulation broadens the definition of "exchange" under the Exchange Act to include

any "organization, association, or group of persons [that]: (1) [b]rings together the orders for securities of multiple buyers and sellers; and (2) [u]ses established, non-discretionary methods ... under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade." n63 The rule specifically excludes those systems the SEC believes perform only traditional broker-dealer activities. n64

Regulation ATS requires those alternative trading systems not choosing to register as an exchange to register as a broker-dealer. Depending on the trading volume in any single security, the broker-dealer may also be required to maintain public displays and execution of orders, provide access and charge fees to investors in a non-discriminatory manner and establish procedures to ensure adequate systems capacity, integrity and contingency planning. n65

The SEC also has pursued corporate insiders and investors who have tried to manipulate market price through use of ECNs. The SEC reached a settlement with three officers who drove up the price of their company's stock by dominating the market and maintaining the high bid through use of an ECN, thereby disguising the source of demand. n66 Other enforcement actions have focused on the practice of "spoofing," whereby individual investors place limit orders through ECNs, which impact the National Best Bid or Offer ("NBBO"), then place limit orders on the opposite side of the market through brokers, enabling them to effect more favorable trades. They then cancel or attempt to cancel their initial order. n67

An area of recent attention by the SEC in connection with alternative trading are "dark pools" of liquidity, which are electronic-trading venues that do not display quotations to the public and allow investors, typically large institutions, to trade shares anonymously. n68 Essentially, investors are able to signal an interest in buying or selling a security, but this "indication of interest" or "IOI" is only communicated to a subset of market participants.

Dark pools serve two purposes: (1) enabling high volume trading without affecting the price in the public market; and (2) avoiding information leaks, which prevent investors from getting the best execution of their trades. n69 The concerns are that these trades should be affecting the publicly traded price and that the private nature of dark pools undermines transparency in the marketplace, particularly for individual investors. These concerns are likely to increase as the popularity of dark pools grows. In 2002, there were only about ten dark pools in existence; in contrast, by 2009, there were approximately twenty-nine dark pools operating. n70

Given the growth of dark pools, the SEC has become concerned that their lack of transparency could create a "two-tiered" market that deprives the public of information about stock prices and liquidity because they are "'lit' to a select group of market participants and dark with respect to the rest of the public." n71 Therefore, on October 21, 2009, the SEC voted unanimously to propose three measures: (1) requiring that IOIs be treated like other quotes and subject to the same disclosure rules; (2) lowering the trading volume threshold applicable to ATSs for displaying best-priced orders; and (3) creating the same level of post-trade transparency for dark pools (and other ATSs) that currently exist for registered exchanges, specifically, requiring real-time disclosure of the identity of the dark pool that executed the trade. n72 Public comments are being sought and must be received within 90 days after the proposals' publication in the Federal Register. The SEC Chairman commented that "[t]ransparency is the cornerstone of the U.S. securities market We should never underestimate or take for granted the wide spectrum of benefits that come from transparency Although dark liquidity always has existed in one form or another in the equity market, the Commission must assure that the public markets and non-public trading venues operate within a balanced regulatory framework." n73

2- Federal Securities Exchange Act of 1934

SEC Rulemaking Regarding Amendments to the Rules Governing Cross-Border Tender Offers_and_@_)_and_footnotes(n2);.vk n*

(As of November 24, 2008)

On September 19, 2008, the U.S. Securities and Exchange Commission (the "SEC") published changes to the rules governing cross-border tender offers and business combinations involving foreign private issuers_and_@_)_and_footnotes(n3);.vk n1 The amended rules became effective on December 8, 2008.

The SEC's amendments are intended to expand the scope of exemptions for cross-border transactions involving foreign private issuers from certain tender offer rules and regulations. The amendments will also allow certain non-U.S. institutions to report their share ownership on the less onerous Schedule 13G to the same extent as would be permitted for similar U.S. institutions.

Regulation 14D and Regulation 14E under the Securities and Exchange Act of 1934, as amended (the "Exchange Act"), set forth a complex set of tender offer rules and requirements intended to ensure that all security holders in the context of a tender offer are treated equally and are provided with sufficient time and information in deciding whether or not to participate in the tender offer. The regulation of cross-border tender offers under the U.S. securities laws contains two tiers of exemptions and regulatory relief which are primarily based upon the ownership level by United States shareholders of the foreign target company's securities. The "Tier I" exemptions apply where U.S. holders own no more than 10 percent of the securities of the subject foreign company and exempt such offer from most of the rules and requirements under Regulation 14D and Regulation 14E. The "Tier II" exemptions apply when U.S. holders account for between 10 percent and 40 percent of the foreign target company's share ownership and provide more limited exemptions from certain tender offer regulations.

Under the SEC's new amendments, the underlying Tier I and Tier II exemption structure will remain in place. The amendments instead alter the process by which share ownership calculations are performed for the purposes of determining eligibility and further expand the scope of the exemptions to provide relief from additional regulatory requirements.

2- Federal Securities Exchange Act of 1934

Rule 14d-1 under the Exchange Act will be amended to alter the "look-through" analysis of target record holders to determine levels of U.S. beneficial ownership. Acquirors may now calculate U.S. ownership levels as of any date that is no more than 60 days before and no more than 30 days after public announcement of the offer. Prior rules required calculation as of the thirtieth day prior to the commencement of the offer. In addition, the SEC has abandoned its requirement that holders of more than 10 percent of the subject securities be excluded from the calculation. In the past, the exclusion of 10 percent or greater holders served to significantly inflate the calculated percentage of U.S. holders in the case of target companies whose shares were held by one or more significant shareholders. Lastly, in the case of hostile tender offers or tender offers for which look-through analysis of the subject company's record holders cannot be conducted, the amendments provide an alternative test based upon the average daily trading volume of the target securities in the United States and worldwide.

The SEC's amendments made a number of other modifications and adjustments to the regulatory requirements of cross-border offers designed to reduce conflict between U.S. tender offer regulation and common foreign regulatory structures and market practices, including, among other changes, the following:

- **Withdrawal Rights.** The amendments permit relief from Section 14(d)(5) and Rule 14d-7 withdrawal rights such that the bidder may terminate withdrawal rights at the end of the initial offering period while tendered shares are counted and the offeror determines whether a subsequent offering period will be necessary.
- **Multiple Non-U.S. Offers.** Prior rules permitted a bidder to separate its offer into only two separate offers, a U.S. offer and a non-U.S. offer. The amendments recognize the need of many bidders to comply with multiple non-U.S. jurisdictions by allowing multiple foreign offers to be conducted contemporaneously with the U.S. offer.
- **Tier II Subsequent Offering Periods.** The amendments permit Tier II cross-border offers to extend subsequent offering periods which last beyond 20 business days.
- **Foreign Holders of ADRs.** The amendments permit the inclusion of foreign holders of ADRs within a U.S. offer. In addition, under certain circumstances U.S. holders will be permitted to participate in foreign offers.

The SEC's amendments also modify the treatment of certain foreign entities under Sections 13(d) and 13(g) of the Exchange Act. Under existing Rule 13d-1(b), the class of institutional investors eligible to use Schedule 13G (rather than the more burdensome Schedule 13D) to report their beneficial ownership of registered securities, was limited to investment companies, investment advisors, brokers and dealers which were U.S. institutions registered with the SEC, as well as entities such as insurance companies, banks and pension plans funds which were regulated under the laws of the United States. The SEC's new regulations will permit comparable non-U.S. institutions to report their beneficial ownership of securities on Schedule 13G to the same extent as similar U.S. entities. Foreign institutions desiring to use Schedule 13G must (1) certify that they are subject to a home country regulatory scheme substantially comparable to the regulatory scheme applicable to functionally equivalent U.S. institutions, (2) assert that the subject securities are acquired and held in the ordinary course of business and without the purpose or effect of influencing control over the issuer, and (3) be willing to furnish to the SEC, upon request, information that would otherwise be disclosed in a Schedule 13D filing.

Recent Judicial Interpretations of Section 13(d) of the Exchange Act: Beneficial Ownership and Group Status

In *CSX Corporation v. The Children's Investment Fund Management (UK) LLP*,¹ and *@_and_footnotes(n4);vk n2* the court ruled that The Children's Investment Fund ("TCI") and 3G Capital Partners ("3G"), two activist hedge funds engaged in a proxy contest with CSX, violated Section 13(d) of the Exchange Act by using total return equity swaps

2- Federal Securities Exchange Act of 1934

("TRs")_and_@_)_and_footnotes(n5);vk n3 to secretly acquire beneficial ownership of more than 5 percent of CSX's common shares without properly disclosing such ownership on Schedule 13D. The court held that, pursuant to Rule 13d-3(b) under the Exchange Act, where a party has entered into a TRS arrangement as part of a plan or scheme to evade the reporting requirements of Section 13(d), it is deemed to be the beneficial owner of the shares held by the counterparty to the swap arrangement for the purpose of hedging such company's exposure under the TRS arrangement. As the court's finding was based solely upon the anti-evasion provisions of Rule 13d-3(b), the court's decision did not affirmatively rule that Section 13(d) applies to shares held pursuant to otherwise passive or benign swap or derivative arrangements. Instead, the court specifically applied Section 13(d)'s reporting requirements to instances in which parties have entered into swap or derivative arrangements with the intent of creating a false appearance that there is not a large accumulation of issuer shares which might have a control shifting effect. The court also found that TCI and 3G violated Section 13(d) by acting for months in close coordination with each other but failing to timely disclose their formation of a group on Schedule 13D. The finding that a group had been formed significantly prior to its disclosure by TCI and 3G was based upon a pattern of circumstantial evidence, including a close prior relationship between TCI and 3G, multiple communications discussing CSX and a rough synchronization of the parties' trading in CSX's shares.

In *Roth v. Jennings, and @_)_and_footnotes(n6);vk n4* the Second Circuit further defined what constitutes a group for purposes of determining beneficial ownership of securities under Section 13(d) of the Exchange Act. In *Roth*, the plaintiff, suing derivatively on behalf of Metal Management, Inc. ("MMI"), sought disgorgement of defendant shareholder's "short-swing" (opposite way transactions made within a period of 6 months) profits under Section 16 of the Exchange Act on the grounds that, if its shares were properly aggregated with those of another larger shareholder, the selling shareholder would be categorized as a principal shareholder (a holder of 10 percent or more of an issuer's shares) and be subject to Section 16 of the Exchange Act. Section 16 requires the short-swing profits of directors, officers and 10 percent shareholders to be disgorged to the company. In addition, the rules under Section 16 provides that, solely for the purposes of determining whether a person is a principal shareholder beneficially owning 10 percent or more of an issuer's shares, the term "beneficial owner" means a person who is a beneficial owner pursuant to Section 13(d) of the Exchange Act. The defendant, Jennings, purchased 8.3 percent of MMI's shares through funds supplied by a loan agreement with an existing 14.8 percent shareholder ("EMR"). The plaintiff alleged that Jennings and EMR constituted a group under Section 13(d) because EMR's loan was made for the specific purpose of purchasing MMI shares and because the parties otherwise had an agreement regarding the acquiring, holding or disposing of MMI's shares. Both Jennings and EMR reported their beneficial ownership in Schedule 13D filings which disclosed their respective ownership levels and contained the terms of the loan agreement._and_@_)_and_footnotes(n7);vk n5 In addition, both the Schedule 13D filings and the loan agreement itself specifically disclaimed the existence of any arrangement regarding MMI's shares and disclaimed that Jennings and EMR constituted a group. The court ruled that such formal disclaimers of group status will not serve to preclude a finding that parties had a triggering arrangement regarding an issuer's securities and constitute a group under Section 13(d). The court noted that parties' self serving disclaimers of group status will not, in itself, prove the truth of such an assertion. Under Section 13(d), parties which act with the purpose of acquiring an issuer's shares will have formed a group regardless of their attempts to disclaim such joint action._and_@_)_and_footnotes(n8);vk n6

Conversely, the court in *Litzler v. CC Investments, L.D.C. _and_@_)_and_footnotes(n9);vk n7* found that three hedge funds investing in Data Race, Inc. ("Data Race") had not acted in concert so as to have formed a group._and_@_)_and_footnotes(n10);vk n8 Plaintiff argued that the three funds had formed a group in their acquisitions of Data Race shares because they acted through common counsel in the negotiation and drafting of the acquisition documents. The court found plaintiff's argument to be unconvincing and found that a group had not been formed. The court noted the SEC's position that business considerations, such as cost savings, "that generally lead to cooperative activity characteristic of an institutional placement" are not sufficient to demonstrate that "investors were motivated by a desire to affect control or by some other indicia of concerted activity."_and_@_)_and_footnotes(n11);vk n9 In addition, the court noted that the investing parties had separately conducted their own due diligence review of Data Race, had been separately advised by counsel in making their decision to pursue an investment in Data Race and had not maintained a pre-existing prior relationship.

Chapter 7A, *The Williams Act Amendments -- Controlling Shareholders and Tender Offers*, will be updated in the coming months. The rule amendments and case law developments discussed in this Special Report will be addressed within the updated release of the chapter.

 - [d] Item 4. Proposals by Shareholders.
- [2] Distribution of Information Statement to Shareholders
- [3] Annual Report to Shareholders
- [4] Filing of Information Statement With the Commission
- [5] Obligations of Companies in Facilitating Communications With Shareholders

[6] False or Misleading Statements

§ 7.07 Shareholder Proposals in Proxy Material--Rule 14a-8

[1] Definition of "Proposal"--Rule 14a-8(a)

[2] Eligibility--Rule 14a-8(b)

[3] Number of Proposals--Rule 14a-8(c)

[4] Length of Proposal--Rule 14a-8(d)

[5] Deadline for Submitting Proposal--Rule 14a-8(e)

[6] Failure to Meet Eligibility--Rule 14a-8(f)

[7] Burden of Persuasion--Rule 14a-8(g)

[8] Presentation of Proposal at Meeting--Rule 14a-8(h)

[9] Bases for Excluding Shareholder Proposals--Rule 14a-8(i)

[10] Procedures the Company Must Follow to Exclude Proposals--Rule 14a-8(j)

[11] Whether the Shareholder May Respond to Company Arguments--Rule 14a-8(k)

[12] Information to be Included about Shareholder Proponent--Rule 14a-8(l)

[13] Shareholder Disagreement with Company Statements--Rule 14a-8(m)

§ 7.08 Election Contests

[1] In General--Rule 14a-12(c)

[a] Solicitations Constituting Election Contests.

[b] Definition of "Participant."

[c] Information to Be Included in Proxy Statement of Participants in Proxy Contests.

[i] Persons Making the Solicitation.

[ii] Interest of Certain Persons in Matters to Be Acted Upon.

[iii] Directors and Executive Officers.

[iv] Other Information.

[v] Additional Soliciting Material.

[d] Solicitations Before Furnishing Written Proxy Statement--Rule 14a-12(c).

[e] Filing of Material Used Prior to Furnishing Written Proxy Statement--Rule 14a-12.

[f] Application to Annual Reports--Rule 14a-12(c)(1).

[g] Instructions for Filing--Rule 14a-12.

[h] Use of Reprints or Reproductions--Rule 14a-12(c)(2).

[i] New York and American Stock Exchange Proxy Contest Rules.

[2] The Shareholder List--Rule 14a-7

§ 7.09 Enforcement of the Proxy Rules

[1] Introduction

[2] Administrative Practices and Procedures

[3] Judicial Review of Administrative Action

[4] The Legality of Corporate Actions Accomplished Through Proxy Violations

[a] Is the Action "Void" or "Voidable"?

[b] Remedy in a Merger Case.

[5] Actions for Injunctive Relief

[a] Who May Bring an Action?

[i] The Commission's Right of Action.

[ii] The Private Right of Action.

[iii] Private Parties' Standing.

[b] Equitable Requirements for Injunctive Relief

[i] Commission Actions.

[ii] Private Actions.

[c] Who May Be Liable?

[d] Jurisdiction and Venue.

[i] Pendent Jurisdiction.

[ii] Intrastate Communications.

[e] Transnational Solicitations.

[f] The Requisite Violation--"Materiality"

[i] Violations Not Shown to Be "Material."

[ii] "Material" Violations.

[A] The Judicial Definition of "Materiality."

[B] Is "Materiality" Only Quantitative?

[C] Completeness, Relevance and Prominence of Disclosure.

[D] Disclosure to Whom?

[E] What Is a "Fact"?

[g] The Relevance of Motivation and Belief.

[h] Causation.

[i] Culpability-Negligence Versus Scierter.

[j] Preliminary Relief.

[k] Forms of Relief.

[i] Relief Before the Meeting.

[ii] Relief After the Meeting.

[A] Preconsummation Relief.

[B] Postconsummation Relief.

[iii] Ancillary Relief.

[iv] Injunctions Against Future Violations.

[v] Collateral Estoppel Effect of Decree.

[6] Damage Actions

[a] Causation.

[b] Culpability.

[c] Types and Measures of Damages.

[7] Proxy Solicitations and Rule 10b-5

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934

AUTHOR: Paul G. Hughes Richard McGrath*

Summary of This Chapter

Securities Exchange Act of 1934 ("Exchange Act") Section 14(a) governs the solicitation of proxies and requires companies whose securities are registered pursuant to Section 12 to disclose information to stockholders concerning matters to be acted upon at meetings of stockholders. The proxy rules, collected under the title "Regulation 14A," are supplemented by Schedules 14A and 14B, which set forth the information required to be included in proxy statements, in statements filed by or on behalf of non-issuer participants soliciting proxies, and in information statements required to be distributed when stockholder action is proposed but proxies are not solicited. *See § 7.01 infra.*

Section 14(a) is applicable to any proxy solicitation; Rule 14a-1 defines solicitation. Certain activities are exempt from the proxy rules under Rule 14a-2, including certain solicitations by a broker, bank, or other fiduciary involving securities carried in its own name or in street name and any nonmanagement solicitation of ten or fewer persons. The solicitation of proxies and the transmission of proxy material by exchange members or broker-dealers concerning securities held for their customer's accounts are regulated under Section 14(b) and also by rules of the national stock exchanges. Solicitations may be made prior to the time a written proxy statement is furnished to security holders only under certain conditions. *See § 7.02 infra.*

If the proxy solicitation is made on behalf of the issuer for an annual meeting involving election of directors, the proxy statement must be preceded or accompanied by an annual report containing financial data and other information. *See § 7.03 infra.*

The initial solicitation of proxies must be preceded or accompanied by a written proxy statement containing the information specified in Schedule 14A. Schedule 14A contains twenty-two items requiring disclosure of general information as well as information concerning the specific proposals for shareholder action. The use in a proxy statement of a false or misleading statement with respect to a material fact, or the omission of a material fact necessary to make the statement not false or misleading, is prohibited under Rule 14a-9. The form of the proxy statement is prescribed in Rule 14a-5, and the filing requirements for the proxy statement and any other soliciting material to be furnished to security holders are set forth in Rule 14a-6. *See § 7.04 infra.*

A proxy to be signed by a shareholder must be in a specific form and contain certain required information. *See § 7.05 infra*, which contains a sample form of proxy.

Issuers that do not solicit proxies in connection with a meeting of shareholders or propose to take action on written consent of fewer than all stockholders (if permitted under applicable state law) are required by Exchange Act Section 14(c) to transmit to record holders an information statement pursuant to Regulation 14C, providing substantially equivalent information as if a solicitation were being made. If directors are to be elected at an annual meeting, the issuer must furnish security holders with an annual report either before or at the same time the information statement is furnished. Regulation 14C contains an antifraud provision applicable to information statements. *See § 7.06 infra*.

A shareholder who wants to present a proposal for action at an upcoming stockholders' meeting may have the proposal included in the proxy statement, provided the shareholder complies with the requirements of Rule 14a-8 concerning such matters as eligibility of the proponent, notice and attendance at the meeting by the proponent or the proponent's representative, timeliness, number and length of proposals, and the furnishing to the issuer of a supporting statement. The registrant, however, may omit certain types of proposals and the related supporting statements. These include proposals that are not proper subjects for action under the laws of the issuer's domicile, proposals that would require the issuer to violate other laws or other proxy rules and regulations, proposals that are irrelevant or insignificant with respect to the interests of the issuer or the issuer's security holders as a group, proposals dealing with ordinary business operations, counter proposals, proposals relating to specific amounts of cash or stock dividends and moot, duplicative or previously made proposals. The issuer must follow a prescribed procedure if the issuer determines to omit a shareholder proposal from the proxy statement or to include in the proxy statement a statement in opposition to the shareholder proposal. *See § 7.07 infra*.

Proxy contests involving the election or removal of directors at any annual or special meeting of shareholders are subject to special requirements involving the identity of any "participant" in the contest and the disclosure of certain information regarding each participant in the solicitation outlined in Schedule 14B. A dissident stockholder may communicate views differing from those of the issuer by use of the stockholder list. *See § 7.08 infra*.

There is presently no administrative means available to the Commission to enforce compliance with the proxy and information statement rules. The usual means of dealing with a violation is by an action for injunctive relief in a federal district court. Such an action may be brought either by the Commission or by affected private parties, *i.e.*, dissident shareholders or, in the case of a proxy contest, by the issuer acting by its management against the materials prepared by the dissidents. The Commission may also make an investigation and publish its findings, suspend trading in the security, or take administrative action against persons, such as broker-dealers, who are otherwise subject to its direct discipline under other statutory provisions of the federal securities laws. In addition, it may take action under Rule 2(e) against accountants, attorneys and other experts. In the case of a willful violation, it may refer the matter for criminal prosecution. In addition to injunctive actions, there is the alternative, available to shareholders, of an action for damages to recoup monetary losses caused by violations of the statute and regulations. A federal court may set aside a consummated transaction to correct the effects of a violation, but such relief is rarely given in mergers and similar transactions. *See § 7.09 infra*.

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.01

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.01 Introduction

Section 14(a) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), n1 governs the solicitation of proxies and requires companies whose securities are registered pursuant to Section 12 of the Exchange Act n2 to disclose information to shareholders concerning matters for which proxies are being sought. The proxy rules, collected in Regulation 14A, n3 are supplemented by Schedule 14A, n4 which describes the information required to be included in the proxy statement and in statements filed by or on behalf of non-issuer participants in election contests as well as requirements relating to the form of proxy. Section 14(c) of the Exchange Act, n5 and Regulation 14C n6 and Schedule 14C n7 adopted thereunder, require that a company that proposes to request shareholder action but that is not soliciting proxies must provide substantially the same information as if proxies were being solicited.

[1] The Proxy

In ordinary usage, the word "proxy" n8 may have one of several meanings, including:

- the manner of voting through an agent;
- the grant of authority by a shareholder to another person to vote the shareholder's shares;
- the instrument granting the authority to vote by the shareholder to an agent; or
- the agent (known as a proxy holder) to whom the authority to vote is granted.

The relationship between a shareholder and the person the shareholder chooses to vote his or her shares is a principal-agent relationship; a shareholder will generally be bound by the vote of the designated proxy holder when the proxy holder acts within the scope of the proxy holder's authority. n9 Voting by proxy has become the primary method of shareholder voting in this country, since it allows geographically dispersed shareholders to vote on matters before a meeting without the need to be physically present. n10 The right of shareholders to vote by proxy is specifically recognized under state corporation laws. n11

[2] The Statute--Section 14

One conclusion reached by Congress as the result of the stock market investigations of 1933-1934 was that the machinery of proxy solicitation required extensive regulation to compel disclosure to shareholders of the matters on which their powers of attorney were being sought. n12 After some attempts to codify appropriate rules, Congress chose rather to authorize the Securities and Exchange Commission (the "Commission") to regulate the solicitation of proxies by adopting Section 14 n13 of the Exchange Act. n14

Section 14(a) makes it unlawful for any person, through the use of the mails or by any means of interstate commerce or any facility of a national securities exchange or otherwise, to solicit, or to permit the use of that person's name to solicit proxies concerning any security registered pursuant to Section 12 if the solicitation would contravene Commission rules and regulations.

Section 14(b) makes it unlawful for exchange members and registered broker-dealers, banks and other associations or entities that exercise fiduciary powers, to give or refrain from giving proxies concerning any security registered pursuant to Section 12 or any security issued by an investment company registered under the Investment Company Act of 1940 if the giving or withholding of such proxies would contravene Commission rules and regulations. n15

The primary purpose of Section 14 is to protect the investor by preventing management or others from obtaining authorization for corporate action by means of deceptive or inadequate disclosure. n16 The constitutionality of Section 14 has been upheld. n17

[3] Solicitation

Not all actions that are intended to have an effect on the way a shareholder votes are "solicitations" subject to the requirements of the proxy rules. In the interest of facilitating communications among shareholders about matters of common interest, the Commission exempts certain types of activities from the proxy rules. n18 In general, however, actions that are intended to influence the way shareholders vote and that are accompanied by a request for a proxy are subject to the proxy rules.

[4] The Rules

[a] Regulation 14A. Regulation 14A n19 includes the rules generally applicable to the solicitation of proxies. These rules prescribe the requirements as to the contents of the proxy statement, the contents of the annual report to shareholders required to be distributed no later than the time the proxy material is distributed, the form of proxy that may be used and the filing of materials with the Commission. n20

[b] Schedule 14A. The specific requirements as to information that must be included in proxy material subject to Regulation 14A are contained in Schedule 14A, n21 which includes detailed descriptions of the specific facts that must be included. Responses are needed only to those items of Schedule 14A that are applicable to the matters to be considered at the meeting of shareholders. Following the adoption of integrated disclosure and Regulation S-K, n22 much of the information required under Schedule 14A is determined by reference to various items of Regulation S-K.

[c] Regulation 14C. In the event that a company does not solicit proxies in connection with action by shareholders, the company is nevertheless required under Regulation C n23 to distribute information to the holders of its voting securities in advance of the taking of action. n24 The information statement required to be provided in these circumstances is substantially equivalent to the information that is required under Regulation 14A.

[5] The Documents

In cases where proxies are solicited or where information statements are required, various documents are typically distributed to the shareholders of the company. The documents most typically required are those described below.

[a] The Annual Report to Shareholders. Whether proxies are solicited and therefore a proxy statement is required or an information statement is required because shareholder action is proposed to be taken without the solicitation of proxies, an annual report to shareholders is required under Rule 14a-3. n25 The annual report, providing information with respect to the company's most recent fiscal year, must be provided to the shareholders no later than the time the proxy statement or the information statement is first sent or given. n26 Much of the information required in the annual report to shareholders relates to the financial performance of the company.

[b] The Proxy Statement--Internet Delivery. The proxy statement, containing specific information about the matters to be acted upon at the meeting of shareholders, must be sent if proxies are being solicited to vote shares at the meeting. The information required for proxy statements is specified in Schedule 14A. n27 The proxy delivery rules allow the delivery of a single proxy statement to two or more security holders sharing a single address where the holders have expressly or impliedly consented to such delivery. Separate proxy cards must be provided for each shareholder. n28

The SEC has adopted amendments to the proxy rules mandating that issuers provide shareholders with a proxy statement and annual report via the Internet. Issuers would be required to send physical notice at least 40 days before the meeting directing shareholders to the dedicated Web site hosting the material or alternatively could physically deliver all proxy material to shareholders (before or after 40 days) but also post it on the Web site. Shareholders could request physical delivery of the materials for the meeting and also for all future meetings. n29

[c] The Form of Proxy. Rule 14a-4 n30 prescribes specific requirements concerning the form of proxy that may be used. Of particular importance is the requirement that the form of proxy state how the proxy will be voted if the proxy is signed but no voting instructions are given. n31 Assuming the requirements of this rule are followed, in most cases proxies that are signed but not otherwise marked will be voted in accordance with the recommendation of the board of directors. Unless certain information is provided to stockholders, the ability of the proxy to vote in the exercise of discretionary authority may be limited. n32

[d] The Information Statement. If action is proposed to be taken at a meeting of shareholders or by written consent and proxies are not solicited, Regulation 14C requires that substantially the same information be provided to shareholders as would be required if proxies were solicited. n33

[6] Required Filings

Whether proxy material or information statements are distributed, copies of such materials will need to be filed with the Commission. n34 Under some circumstances, only definitive materials must be filed; in others, preliminary copies will need to be filed. Rule 14a-6(b), which previously required that definitive proxy material be "filed with, or mailed for filing to, the Commission not later than the date such material is first sent or given to any security holders", has been amended effective January 24, 2000 to eliminate the mailing alternative since companies must file electronically. n35

[7] Enforcement

Failure to comply with the requirements of Regulation 14A or Regulation 14C can subject a company or other person to liability as a result of either action instituted by the Commission or private action. n36

[8] Historical Development of Proxy Rules

The 1970's and 1980's saw a heightened awareness on the part of institutional investors, the general public, and the Commission regarding a perceived lack of responsiveness on the part of corporate management to legitimate business and social concerns. n37 In what might be considered the first wave of proxy reform, the Commission in 1978 proposed and adopted rules intended to provide additional information to shareholders about the structure, composition, and functioning of boards of directors, including the existence and functioning of audit, nominating, and compensation

committees, attendance of directors at meetings, economic and personal relationships between directors or nominees and a company or its management, and resignations of directors. n38

The second wave of proxy reform was triggered by a formal announcement in a speech by then Commission Chairman Richard C. Breeden to the Council of Institutional Investors Annual Meeting (Washington, D.C. April 2, 1990) of the commencement of a comprehensive review of the efficacy of the proxy rules in light of significant changes in shareholder demographics that had resulted in a concentration of institutional equity ownership and voting power, and increasing shareholder activism with respect to matters of corporate or partnership governance.

Chairman Breeden's concerns were initially directed to proposals submitted to the Commission by CalPERS (the California Public Employees' Retirement System) and by the United Shareholders' Association and other shareholder organizations that had manifested deep dissatisfaction with existing restrictions on shareholder communications. Almost simultaneously, there was a rising ground swell of criticism in the media concerning current levels of executive compensation, leading to the issuance on June 23, 1992 of two separate sets of proposals, one regarding shareholder communication n39 and one concerning executive compensation. n40

A rising tide of dissatisfaction among institutional stockholders with perceived inadequacies in compensation disclosure has culminated in the adoption in 2006 of far more detailed disclosure requirements, not only as to compensation (including more forthright descriptions of "perks") but also as to transactions between related persons and more far-reaching disclosure of the personal interests of insiders in company activities. n41

Virtually every effort by activists and government to rein in corporate compensation seems to have failed or backfired. Far from restraining increases, disclosure rules imposed by federal regulators in 1993 apparently juiced executives' competitive instincts by revealing what their rivals were making and giving them leverage to negotiate bigger compensation packages, according to a *Wall Street Journal* review of efforts to contain executive pay. n42

[a] 1978 Rulemaking Initiatives. The 1978 reforms to the governance process were launched when the Commission, based on its review of comments and testimony at the corporate governance hearings and its experience in enforcing the securities laws, decided that additional information about the structure, composition and functioning of boards of directors should be made available to shareholders. Accordingly, in 1978, the Commission proposed and adopted rules intended to provide this information to shareholders. n43 The rules required disclosure of the existence and functioning of audit, nominating and compensation committees of the board of directors; attendance of directors at board and committee meetings; certain economic and personal relationships between directors or nominees and a company or its management; and resignation of directors.

In addition, the Commission proposed and adopted a second set of rules that required shareholders to be provided with a form of proxy that indicates whether the proxy is solicited by the company's board of directors; provides a means to vote for director nominees individually; and provides a means to abstain from voting on any matter other than elections to office. n44

The Commission stated that these rulemaking initiatives did not represent a concerted effort to prescribe the composition of boards of directors or influence corporate conduct, but were designed to improve the quality of disclosure to shareholders about the structure, composition and functioning of boards of directors and thereby to enable shareholders to make informed voting decisions in elections of directors. n45

[b] 1992 Rulemaking Initiatives. In October 1992, the Commission adopted far-reaching revisions in the proxy rules regarding executive compensation, as well as a broad exemption for communications among shareholders in the absence of a contested election or other vote. The executive compensation proposals called upon the compensation committee of the reporting company's board of directors to explain the basis for its compensation decisions in the last

fiscal year, the relationship of such compensation to company performance, and a graphic representation of the cumulative return on the company's common stock compared with the S&P 500 stock index and a nationally recognized industry index or peer group over the last five years. n46

In a major revision from prior rules, the 1992 shareholder communications rules exempt shareholder communications by persons who are not requesting proxies and who do not otherwise have a "substantial interest" in the matter being acted upon. The exemption covers the filing and disclosure requirements applicable to proxy material generally. Mere ownership of the company's stock does not constitute a substantial interest. Likewise, a substantial interest would not exist if the benefit to be received would be shared pro rata by shareholders or if the benefit would arise out of a person's employment with the company. Persons owning \$5 million in company stock must file a "Notice of Exempt Solicitation."

The exemption is not available to specified classes of persons. For example, it does not apply to communications by the company or by its officers or directors, nominees for election as directors, or any of their affiliates or associates. Officers and directors who personally finance a communication will, however, be permitted to rely on this exemption. Persons interested in opposing certain extraordinary transactions, such as mergers and sales of assets, are also excluded if an alternative transaction to which such person would be a party will be proposed. Communications by certain 5% shareholders (those whose Schedule 13D indicates an intention to engage in a control transaction or election contest) and investment companies are also not exempt under this provision.

Under the proxy rules as currently in effect and as in effect prior to adoption of the revised rules in 1992, solicitation of ten or fewer persons or the furnishing of proxy voting advice by financial advisors would not require the filing or distribution of proxy material and would be subject only to the antifraud provisions of the proxy rules. n47

A second major shift allows dissident shareholders seeking minority board representation to request proxies to vote for selected management nominees without the consent of those nominees.

The 1992 rules also revised the definition of "solicitation" to exclude public announcements by shareholders of how they intend to vote and their reasons therefor and to permit a solicitation to commence upon the delivery of preliminary proxy material that has been filed with the Commission (assuming that no proxy card is distributed until the filing and distribution of definitive proxy material). "Solicitation" would continue to encompass communications that are accompanied by a proxy card.

[c] 2006 Rulemaking Initiatives. On January 27, 2006 the Commission proposed further revisions in the disclosure rules on executive compensation to remedy shortcomings in the 1992 revisions, as well as rules governing related party transactions, director independence, security ownership and corporate governance. After receiving and considering an overwhelming number of comments (over 20,000), the Commission adopted the bulk of the proposed revisions with the comment that it was building on the strength of the 1992 revisions rather than discarding them. n48

In a speech regarding the proposed rules delivered to the Council of Institutional Investors on March 30, 2006, Commission Chairman Christopher Cox observed:

Executive compensation matters--not only because if moral hazards inherent in these conflicts of interest are unchecked, executives will be paid too much, but also because it can play a valuable role in disciplining management across the board, and in protecting the entire range of shareholder interests.

By restraining executives from self-indulgent behavior--and using salary, bonuses, options, long term benefits, and other financial incentives in very purposeful ways--compensation committees acting on behalf of the shareholders can increase management's incentives to improve corporate performance.

So our purpose in advancing a very aggressive executive compensation rule is very straightforward:

It's to protect and advance the interests of shareholders.

This is the first time in 14 years that the Commission has undertaken significant revisions of its rules for executive compensation. Simply put, our rules are out of date, and it's high time we updated them.

The 2006 executive compensation rules provide that:

- "Principal Executive Officer" and "Principal Financial Officer" compensation must be disclosed regardless of pay level;
- Disclosure of compensation for the three other highest paid executives is required subject to a \$100,000 threshold; the Commission has requested comment on whether disclosure should be required for up to 3 additional employees whose compensation exceeds that of the named executive officers;
- A new compensation discussion and analysis (CD&A) ("filed", not "furnished") describing all material elements of compensation paid to or earned by the named executive officers ("NEOs"), how they were determined, and how they fit into the overall compensation strategy of the company, including whether the company has a policy of timing option grants to the release of material nonpublic information. Subject to a confidentiality exemption, companies must describe any performance targets affecting compensation. n49 According to the Corporate Library, two-thirds of companies listed fuzzy performance targets in their discussion of compensation. "Companies are still failing to disclose the performance hurdles that trigger pay for performance, and that remains a hugely contentious issue for shareholders". Patrick McGurn, Special Counsel, RiskMetrics Group (formerly Institutional Shareholder Services), New York Times, April 6, 2008, page 7.
- A reorganized and expanded summary compensation table ("SCT") reflecting virtually every element of compensation, with a new "total compensation" number for each NEO.
- A new table for the fair value of all equity-based compensation (including stock, restricted stock units, options and stock appreciation rights) valued under FAS123R.
- Tabular and narrative disclosure of post-employment benefits (severance, change of control, deferred compensation, and present value of pension benefits).
- Tabular disclosure of directors' compensation.
- Disclosure of perquisites exceeding \$10,000 in the aggregate.
- Increase in the threshold for reporting related party transactions from \$60,000 to \$120,000, with disclosure of company policies for approval of such transactions. n50
- The traditional compensation committee report has been eliminated, but a new report ("furnished", not "filed") must verify the committee's review and approval of the CD&A.
- Plain English will be mandated for all information provided in response to Items 402, 403, 404 and 407 when required in reports filed under Exchange Act Sections 13(a) or 15(d).
- Unless otherwise provided in an annual report to security holders pursuant to Rule 14(a)-3, a line graph comparing the yearly percentage change in the Company's cumulative total shareholder return on a class of registered common stock with a broad equity market index (the S&P 500 stock index if the

company is in that index), and the cumulative total return of a published industry or line-of-business index, or peer issuers selected in good faith, or issuers with similar market capitalization.

Under the previous rules, disclosure of individual compensation was required for the CEO and the four most highly paid executive officers whose cash compensation exceeded \$100,000. Under the rules adopted in 2006, disclosure is required for the Principal Executive Officer ("PEO") and Principal Financial Officer ("PFO") (or persons acting in a similar capacity), and the three other most highly compensated executive officers whose compensation exceeds \$100,000. Compensation of the Principal Executive Officer and Principal Financial Officer must be disclosed irrespective of the level of compensation.

On December 22, 2006, the SEC announced a substantial liberalization of the rules referred to above governing the SCT and the Director Compensation Table, which it summarized as follows:

- "The dollar values required to be reported in the Stock Awards and Option Awards columns of the Summary Compensation Table and the Director Compensation Table are revised to disclose the compensation cost of those awards, before reflecting forfeitures, over the requisite service period, as described in FAS 123R. Forfeitures are required to be described in accompanying footnotes.
- "The Grants of Plan-Based Awards Table is revised to require disclosure of the grant date fair value of each individual equity award, computed in accordance with FAS 123R, and the Director Compensation Table required under Item 402 of Regulation S-K is revised to require footnote disclosure of the same information.
- "The Grants of Plan-Based Awards Table is revised to require disclosure of any option or stock appreciation right that was repriced or otherwise materially modified during the last completed fiscal year, including the incremental fair value, computed as of the repricing or modification date in accordance with FAS 123R, and the Director Compensation Table required under Item 402 of Regulation S-K is revised to require footnote disclosure of the same incremental fair value information."

n51

The Council of Institutional Investors has termed "questionable" the adoption by the Commission of these latest revisions to the executive compensation disclosure rules n52 without an open meeting or opportunity to comment, although CII strongly supports the Commission's initiative in reforming executive compensation disclosure generally. n53

Discussing the revised rules on disclosing related-person transactions, former Commission Corporation Finance Director John White observed that the Commission had taken a principles-based approach to the new disclosure rules that will require well designed disclosure controls and procedures and that related person disclosure will require information that can only be obtained from the related persons themselves, one source of which is through director and officer questionnaires which may need to be updated to insure that the right questions are covered. He noted that under the new rules even a charitable contribution might under appropriate circumstances be deemed to be a related person transaction. The term "transaction" has broad scope and should not be narrowly interpreted. n54

[d] Electronic Delivery. The SEC in 2007 adopted amendments to the proxy rules making it mandatory that issuers provide shareholders with a proxy statement and annual report via the Internet. n55 The requirement applies to large accelerated filers as defined in Rule 12b 2 (other than investment companies) with respect to proxy solicitations commencing on or after January 1, 2008. Solicitations by other issuers and soliciting parties became subject to the new requirements for solicitations commencing on or after January 1, 2009. Under the new rule a company can proceed in one of two ways:

1. Under the "notice only option", the company would post its proxy materials on a publicly-available internet Web site other than EDGAR. The company would be required to send a Notice of Internet Availability of Proxy Materials at least 40 days before the meeting.

The Notice must be written in plain English and contain a prominent legend that advises shareholders of the date, time, and location of the meeting with information about attending and voting in person; a list of the proxy materials being made available at a specified Web site address; a toll-free phone number, e-mail address and a Web site that shareholders may use to request copies of the proxy materials; any control/identification numbers needed to access the shareholder's proxy card; instructions on how to access the proxy card (but not to execute the proxy without access to the proxy statement); and a clear and impartial description of the matters to be considered at the meeting. The Notice may also contain any information required by state law to constitute a valid notice of the meeting.

The company must send a physical copy of the materials free of charge within three business days after receiving a request from a shareholder. A shareholder may make a permanent election to receive all proxy materials in paper or by e-mail with respect to future proxy solicitations conducted by the company or soliciting person.

Brokers, banks and similar intermediaries must prepare and send their own Notices designed for beneficial shareholders. A beneficial shareholder desiring a paper or e-mail copy of the proxy materials must request one from the intermediary.

A soliciting person other than the company must follow the notice and access model in substantially the same manner as a company. However, its Notice must be sent to shareholders by the later of 40 days before the meeting or ten days after the company filed its proxy materials. It may limit its solicitation to shareholders who have not previously requested paper copies. But if the soliciting person sends a Notice to a shareholder, it must send that shareholder a paper or e-mail copy upon request. It may elect the "notice only option" as to some shareholders and the "full set delivery option" as to others.

After ten days following such notice, the company could send a form of proxy (by e-mail or hard copy) if accompanied by a copy of the original notice.

2. A company may also adopt the "full set delivery option", under which it would physically deliver all proxy material to shareholders but must also post its proxy material on a Web site other than EDGAR. The physical delivery would be accompanied by the same notice required under the "notice only option" or provide the same information in the proxy material, but the 40-day notice period would not apply. n56

The results of the Notice and Access initiative have been disappointing thus far. In a speech by Commissioner Luis A. Aguilar at "The SEC Speaks in 2009" (February 6, 2009), the Commissioner lamented the decline in the shareholder voting in those companies which have adopted the notice and access model, stating:

"As many of you are aware, the number of shareholders who voted through companies using the notice and access model dropped dramatically. Retail investor voting, in particular, plummeted. Some reports indicated less than 5 percent of individual investors voted at meetings held by companies that used e-proxy in late 2007 and early 2008. Other statistics compared the level of participation by the same investors before and after the notice and access model was put in place, and found decreases of over 30% for large investors, and over 60% for smaller investors. For these investors, access clearly didn't equal delivery.

"I recognize that there are significant cost savings to issuers who use e-proxy, but we should make sure that cost savings come without compromising effectiveness and adversely impacting an investor's exercise of their rights. That seems to have happened here, and we need to fix e-Proxy or scrap it."

As Dominic Jones wrote in the Winter 2009 issue of Investor Relationships.com:

"In a recent survey among 1,000 retail investors commissioned by the SEC, fully 57% of investors said they rarely (28%), very rarely (13%) or never (16%) read annual reports when they receive them. For proxy statements, the results were somewhat better, with 44% saying they rarely (21%), very rarely (10%) or never (13%) read proxy statements.

"When it comes to web-based proxy materials, statistics collected by Broadridge during the first year of notice-and-access meetings also present a dismal picture. First, only 1.1% of notice recipients bothered to ask companies to mail them paper documents. Meanwhile, just 0.5% of all recipients viewed the materials when they visited the URL provided in the notices. According to Broadridge, notice-and-access has resulted in a 96% reduction in information access by investors, which arguably has led to greater levels of voting without viewing proxy information."

[e] Institutional Activism. In part as a result of these changes, and in part because of the growing muscle-flexing among institutions that have begun to appreciate the extent of their economic power, control of the public corporation may no longer be considered safely lodged in the hands of management in most cases. The huge increase in shareholdings by institutions has been accompanied by a significant change in the attitudes and degree of activism of trustees and fund managers who once seemed indifferent to involvement in corporate operations. Under the leadership of organizations such as CalPERS, trust and fund managers are calling members of management to account in ways that would have been unheard of only a few years ago. n57 The emergence of this trend could have profound significance for the future of business regulation since it represents a counterweight to movements in favor of federal legislation to curb perceived abuses by management.

Indicative of the new activist approach of institutional investors was the announcement by CalPERS in 1993 that it would combine the use of shareholder proposals to effect corporate governance changes with a vigorous program of direct negotiations with corporate executives. This announcement, following on the heels of CalPERS' successful negotiations with such companies as General Motors, TRW, and Texaco with regard to shareholder proposals relating to director independence, n58 represented a reversal of its decision in 1992 not to put forward shareholder proposals, based on the conclusion that the strategy undermined the fund's bargaining position with target companies.

Latest to join the activist fray are certain hedge funds which are taking positions in companies which they view as undervalued or mismanaged. In a study of Pirate LLC and its founder, Tom Hudson, by Anthony Effinger and Katherine Burton for Bloomberg News, n59 it is stated that: "Hudson is an extreme example of the shareholder activism that's ripped through corporate America since the 1980s. Public pension funds led the way. Then, mutual fund managers charged in. Now, so-called activist hedge fund managers have joined the fray."

A somewhat more charitable view of the Pirate Capital activities was taken by Mark Hulbert in his column "Strategies", n60 making note that Pirate Capital had made a number of proposals to Walter Industries designed to bolster the Company's stock, like spinning off certain of its divisions; that the management of the Company had put into effect many of Pirate Capital's proposals and that the stock price had outperformed that of the average stock in its industry. Hulbert reported on a recent study titled "Hedge Fund Activism, Corporate Governance and Firm Performance" by Brav, Jiang, Partnoy & Thomas. The authors examined nearly 900 instances of hedge fund activism from 2001 through 2005 and found that the stock of the average company targeted outperformed the overall market by 7% over a 4-week period (2 weeks before and 2 weeks after the public announcement of the hedge funds' targeting of the company), that an average target company's stock kept pace with the overall market in the following year and that the average operating performance over the following two years improved markedly.

Several commentators have remonstrated with activists for going too far and imperiling the successful management of a business. Martin Lipton observed:

The key issue for American business is whether the institution of the corporate board of directors, as

we know it today, can cope with shareholder activism and survive as the governing organ of the public corporation. Will the forced migration from director-centric governance to shareholder-centric governance overwhelm American business corporations? The fundamental questions are: (1) whether we will be able to attract qualified and dedicated people to serve as directors and (2) whether directors and the companies they serve will become so risk adverse that they lose the entrepreneurial spirit that has made American business great." n61

Gretchen Morgenson has suggested that such comments are an unjustified overreaction. n62

Institutional Shareholder Services, Inc. ("ISS") has adopted guidelines that it follows in making voting recommendations, based on its client "policy survey", its issues-based advisory roundtables and new policy review and comment. Foremost among its 2007 proxy voting policies are backdating of stock options (ranked by institutional investors as "most problematic" among paid practices). ISS is adopting a case-by-case analysis approach and may recommend withholding votes from compensation committee members depending upon the severity of the practices and the subsequent corrective actions by the Board. Majority voting in director elections gained in 2006 as more than 180 companies adopted new election policies and bylaws. At more than 85 companies the average level of support for it increased to 49%, compared to 44% at more than 55 company meetings in 2005. Given the strong level of shareholder support, ISS will generally support precatory and binding resolutions to change bylaws to stipulate that directors need to be elected with an affirmative majority of votes cast, where not in conflict with state law. Proposals should allow for plurality voting when there are more nominees than Board seats. ISS is updating its poor pay practices policy and may recommend a vote to withhold from the compensation committee where it identifies poor pay practices, and even withhold from the entire Board if the full Board was involved in and contributed to egregious compensation problems. n63

The American Federation of State, County and Municipal Employees ("AFSCME") submitted proposals for non-binding shareholder votes on executive compensation packages to eight companies in 2006, receiving over 40% affirmative votes (but less than a majority) at two companies; it plans to submit such proposals to numerous companies in 2007. The United Brotherhood of Carpenters and Joiners intends to submit at least 80 proposals requesting that executive bonuses be tied to peer performance. CalPERS is pressing for shareholder approval for companies to enter into executive severance agreements which would pay out more than 2.99 times the executive's base salary and bonus. Shareholder activists are hostile generally to classified boards and would like to see universal declassification. (Over half of companies in the S&P 1500 Composite Index or listed on the NYSE have staggered boards.) n64 A consortium of large institutional pension funds representing \$3.4 trillion in invested assets internationally have urged the SEC to allow shareholders access to the proxy for resolutions relating to the director electoral process. The SEC, in reaction to the Second Circuit's reversal of the Commission's no-action position allowing AIG to omit a shareholder access proposal n65 has announced that it will address the proxy access issue by new rule-making soon. Signatories to the letter to the Commission included California State Teachers Retirement System, London Pensions Fund Authority, PGGM in the Netherlands, and the Ontario Teachers Pension Fund. n66 Business Roundtable President John J. Castellani, in announcing opposition to any such rule changes, has raised the possibility of a lawsuit challenging the Commission's authority if the Commission does adopt a proxy access rule. n67

[f] State Law. While, in general, state law is superseded when it conflicts with the requirements of Section 14(a), such pre-emption may not be without its exceptions. In *Newcastle Partners, L.P. v. Vesta Insurance Group, Inc.*, n68 the Delaware Court of Chancery held that the defendant was obligated under Section 211(c) of the Delaware General Corporation Law to hold an annual meeting within thirteen months of its last Annual Meeting despite the fact that it was prohibited under Rules 14c-2 and 14c-3 promulgated under the Securities Exchange Act of 1934 from holding its annual meeting because the company did not have audited financials on file with the SEC. The Court stated that the state law requirement is not preempted by the Federal Rules, primarily on the ground that in the broader sense the state and federal laws are basically compatible. The Court noted:

None of Vesta's shareholders have had the opportunity to vote their shares in 18 months, and Vesta cannot provide reliable guidance on when the audited financial statements required to prepare an annual report may become available. Few circumstances could be more consistent with the federal law's purpose of protecting the shareholder's franchise than this Court's Order directing that Vesta's shareholders be allowed to vote and, if they choose, to replace one or more of the directors standing for re-election. The Court also notes that its Order is consistent with the important policies underlying the internal affairs doctrine that the power of the state of incorporation to mandate stockholder meetings in appropriate circumstances not be lightly overturned. n69

Interpreting a Florida statute, the Delaware Chancery Court ruled that a majority shareholder may have breached its fiduciary duty of disclosure in a freeze-out merger by giving minority shareholders only the 10-day minimum statutory notice of the meeting, where the ten days included only four business days (over the July 4 holidays). In denying a Motion to Dismiss, the Court held that the defendant may have breached its duty of candor even assuming the truthfulness of the proxy materials. *Berger v. Intelident Solutions, Int'l.*, n70

The Court stated:

Where a controlling stockholder purposefully manipulates the timing of the proxy process in a cash-out merger so as to preclude a minority stockholder from enjoying any realistic opportunity to exercise his statutory appraisal rights, a breach of the duty of disclosure occurs. Such a breach, as it plainly implicates the procedural fairness of a transaction, is properly addressed in an action outside an appraisal proceeding. n71

The Alaska Supreme Court has ruled in favor of corporate directors who violated the proxy disclosure requirements imposed by Alaska statute where the violations were inadvertent and made in good faith reliance on the advice of competent legal counsel. n72

Delaware has adopted changes to the Delaware General Corporation Law, effective August 1, 2009, permitting (but not requiring) Delaware corporations to adopt bylaws requiring the inclusion of nominees for election to the board of directors which are submitted by stockholders in addition to individuals nominated by the board of directors, subject to such conditions as may be provided in the bylaws, including a requirement as to a minimum level of stock ownership. The new law is summarized in Section 7.04[2][b][i], note 33.

Concerns about the increasingly widening gulf between management and shareholders gave rise to fears of legislative interference in the corporate process:

The estrangement of the public shareholder, so well articulated by Berle and Means [*See infra*] 50 years ago, continues today. Ownership of public companies has become broader and even more dispersed than in 1932. Control has correspondingly become more safely lodged in the hands of management. Although large shareholdings may be more common today than in 1932, they are in the hands of bank trust departments, pension funds, ESOPs, insurance companies and mutual funds. These types of institutions seem paralyzed, like Gulliver in Lilliputia [sic], by the threads of thousands of concerns and restraints which prevent them from seeking an active role in management. Public companies and their managers are thus cut off from the sources of their legitimacy--the corporate owners for whom they act. As the connection grows more tenuous, any mechanism which fosters accountability becomes more important to avoiding the final, unacceptable conclusion that public companies exercise unchecked power in our society. If, rightly or wrongly, that perception becomes accepted as true, society may be expected to react by imposing mandatory restraints on management's discretion.

a preliminary injunction against Parent, who controlled 50.8% of defendant Gold Spring, Inc., and had signed consent resolutions that purported to remove seven board members and thereby take control of Gold Spring. The District Court had granted the preliminary injunction to restrain Parent's takeover on the ground that Parent failed to file and disseminate a proxy statement before his group could sign the consent resolutions. Parent claimed in opposition that because he had solicited 10 or fewer shareholders to join the takeover, he was exempt from the proxy statement requirement of § 14(a)-3. The appeals court vacated the injunction effective 90 days after its decision and remanded to the District Court to provide the District Court with an opportunity to determine facts which would support the preliminary injunction, stating that the plaintiff must show as an "irreducible minimum" a "fair chance of success on the merits."

(n48)Footnote 48. Executive Compensation and Related Person Disclosures, Sec. Act. Rel. No. 33-8732A, Sec. Exch. Act Rel. 34-54302A, 17 Fed.Reg. 35158 -53266 (Sept. 8, 2006), effective November 7, 2006 for proxy filings related to fiscal years ending on or after December 15, 2006.

(n49)Footnote 49. In a speech before the 27th Annual Ray Garrett Jr. Corporate and Securities Law Institute on May 7, 2007, John White, then Director, Division of Corporation Finance of the SEC, agreed with critics that some companies appear to be incorrectly relying on the confidentiality exemption in providing disclosure about performance targets for executive compensation, and that some other companies may simply be failing to make the required disclosure. Companies which rely on the confidentiality exemption also in many cases are failing to provide investors with an adequate sense of how hard the targets are to achieve or how likely it is they will be met (even though the targets are not disclosed). Further rule making in this area, according to White, is very possible. Other areas being looked at in response to criticism are the use of negative numbers in reporting under the new tables; disclosures regarding the role of the CEO, with specific reference to specific activities by the CEO vis-a-vis the compensation committee; and disclosure about perquisites, where the new rules appear to be having a significant impact on the amount of disclosure currently as compared with prior years. He announced that the Commission has initiated a "review project" that will analyze compliance with the new rules which will be released in the fall of 2007. Director White followed this with a speech delivered to the American Bar Association Committee on Federal Regulation of Securities on August 14, 2007, in which he outlined the Commission's agenda for 2007, re-emphasizing his concerns about the adequacy of disclosure of executive compensation and performance targets, and the importance of the Commission's alternate proposals on shareholder director nominations, discussed in § 7.07, *infra*. In a speech given on March 23, 2007, before a corporate governance seminar at the University of Southern California's Marshall School of Business, then SEC Chairman Christopher Cox noted that "alarm bells are ringing" as the Staff is seeing examples of "over lawyering" that are leading to 30 to 40 page executive compensation sections in proxy statements, particularly the lack of adherence to a plain English standard in writing the sections.

(n50)Footnote 50. For smaller reporting companies, formerly known as small business issuers, Regulation S-K requires disclosure if the amount involved exceeds the lesser of \$120,000 or 1% of the average of the small business issuer's total assets at year end for the last three completed fiscal years.

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.02

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.02 Solicitation of Proxies

Section 14(a) n1 is applicable to proxy solicitations in respect of any security (other than an exempted security) registered under the Exchange Act. Rule 14a-1 n2 defines solicitation broadly; however, certain activities are exempt from the proxy rules. Exempt activities under Rule 14a-2 n3 include certain solicitations by a broker or bank involving securities carried in its own name or in street name; solicitations by persons if authority to vote is not sought and a form of proxy is not provided (unless such person falls within one of certain categories of persons); nonmanagement solicitations of ten or fewer persons; and certain solicitations by financial advisors. In addition to the exemptions carved out by Rule 14a-2, the court in *Schiller v. Tower Semiconductor, Ltd.*, n4 affirmed a lower court ruling that the SEC was within its authority in exempting foreign private issuers from the proxy solicitation rules pursuant to Rule 3a12-3.

The solicitation of proxies and the transmission of proxy material by exchange members or broker-dealers concerning securities held for their customers' accounts is regulated under Section 14(b) n5 and under rules issued by the stock exchanges. Solicitations may be made prior to the time a written proxy statement is furnished to security holders only under certain conditions.

[1] Introduction

A "solicitation" is defined in Rule 14a-1 as including:

- a request for a proxy, whether or not the request is accompanied by or included in a form of proxy;
- a request to execute or not to execute, or to revoke, a proxy; and
- the furnishing of a form of proxy or other communication to shareholders under circumstances reasonably calculated to result in the procurement, withholding or revocation of a proxy.

The terms "solicit" and "solicitation," however, do not include the furnishing of a form of proxy to a shareholder upon the unsolicited request of the shareholder, a company's performance of the acts required by Rule 14a-7 n6 (mailing communications for shareholders), the performance by anyone of ministerial acts for a person soliciting a proxy and

certain public statements by shareholders concerning their intended vote. n7

Effective in 1992, the Commission adopted amendments to the proxy rules intended to facilitate communications among shareholders without requiring full compliance with the proxy rules. The principal means of accomplishing this goal were (i) to exclude certain actions from the definition of "solicit" and "solicitation" n8 and (ii) to provide that the proxy rules, other than Rule 14a-6(g) n9 and Rule 14a-9 n10 (the general antifraud rule applicable to proxy solicitations), would not apply to certain solicitations. n11

Effective January 24, 2000, the Commission further liberalized the proxy rules n12 to allow virtually unlimited oral and written communications with shareholders prior to filing of written proxy material so long as such communications are not false or misleading statements within the prohibition of Rule 14a-9 and *Rule 10b-5*, that they do not violate the selective disclosure rules set forth in Regulation FD n13 and, as to written communications, that they meet the requirements of Rule 14a-12 that they identify the participants in the solicitation and describe their interests (or state where such information can be obtained); are not accompanied by a form of proxy; and are filed the same day with the Commission with a prominent legend advising security holders to read the proxy statement. Any written communication to security holders must explain to investors that they can obtain the proxy statement and any other relevant documents free at the Commission's web site and describe which documents are available free from the participants. n14 The Commission makes it clear that the communications are permitted for an unrestricted length of time without a cooling-off period between the end of communications and the filing of proxy material (particularly with respect to merger and acquisition transactions).

Thus, the proxy rules are now intended to apply to oral communications only in a limited sense, in that false or misleading oral solicitations are still prohibited by Rule 14a-9, and written filing instructions relating to personal soliciting materials under Rule 14a-6(c) n15 continue to apply. Whether an oral solicitation not involving an instrumentality of interstate commerce or of a national securities exchange would be constitutionally subject to regulation is another matter. n16 There are, however, no reported decisions nor are there likely to be since the probability of a modern proxy solicitation that avoids all instrumentalities of interstate commerce is remote.

It is sometimes difficult to determine just when the process of solicitation begins. n17 The general rule is that any communication to shareholders that is a "part of a continuous plan ending in solicitation" is within the ambit of the Exchange Act. n18 The Commission has made its own general interpretation quite clear, saying:

Thus, statements made for the purpose of inducing security holders to give, revoke, or withhold a proxy by any person who has solicited or intends to solicit proxies, whether or not such statements are accompanied by an express request to give, revoke or withhold a proxy, may involve a solicitation within the meaning of the regulation, depending upon the particular facts and circumstances. n19

Obviously, this interpretation involves an inquiry into the motives and intent of the person sending out the material.

The sender of soliciting material does not necessarily have to be part of management or opposition. n20 It can be anyone, although an editorial reference in a newspaper is generally not intended to constitute a solicitation. n21 Furthermore, the solicitation may not necessarily be of a proxy to vote, as long as it is part of a soliciting campaign or is designed to affect the voting of shares. n22

It is not always clear whether dissemination of information would constitute a solicitation because it attempts to influence how a shareholder votes. In the view of the Commission, this uncertainty could inhibit shareholders from discussing matters relevant to their interest and the interest of other shareholders since the shareholder would have to choose between the considerable expense of preparing, filing and distributing proxy material meeting the requirements of Schedule 14A n23 or risking liability for having violated the proxy rules. In order to remove "unnecessary government interference in discussions among shareholders of corporate performance and other matters of direct

interest to all shareholders," n24 the Commission has adopted regulations removing from the definition of "solicitation" communications by certain persons and making most of the proxy rules inapplicable to certain types of solicitations. n25

[2] Excepted Activities--Rule 14a-2

Rule 14a-2(a) n26 provides that the proxy rules apply to any solicitation of proxies concerning securities registered pursuant to section 12, except for solicitations:

- by a person concerning securities carried in his or her own name or in the name of such person's nominee (otherwise than as voting trustee) or held in his or her custody provided such person (i) does not get paid, except for reasonable expenses; (ii) furnishes promptly to the person solicited all soliciting material received from any person for that purpose; and (iii) does no more than impartially instruct the beneficial owner to forward a proxy to the person, if any, to whom the beneficial owner wishes to give a proxy or impartially request from the beneficial owner instructions as to the authority to be conferred by the proxy and state that a proxy will be given if no instructions are received by a certain date; n27
- by a person concerning securities that such person beneficially owns; n28
- involved in the offer or sale of a security registered under the Securities Act, unless the securities are to be issued in a transaction specified in Rule 145(a) n29 under the Securities Act; n30
- relating to a plan of reorganization under Chapter 11 of the Bankruptcy Reform Act of 1978, as amended, if made after the entry of an order approving the written disclosure statement concerning the plan of reorganization and after, or concurrently with, the transmittal of such disclosure statement in accordance with the provisions of the Bankruptcy Reform Act of 1978, as amended; n31
- relating to transactions pursuant to Rule 62 under the Public Utility Holding Company Act of 1935; n32 and
- made through the medium of a newspaper advertisement that informs shareholders of a source from which they may obtain copies of a proxy statement, form of proxy and any other soliciting material and does no more than (i) name the company, (ii) state the reason for the advertisement, and (iii) identify the proposal or proposals to be acted upon by shareholders. n33

Rule 14a-2(b) exempts the following from the proxy rules, other than the filing requirements of Rule 14a-6(g) and the antifraud provisions of Rule 14a-9: n34

- certain communications in which the person making the solicitation does not seek the power to act as proxyholder or furnish a form of revocation, abstention, consent or authorization; n35
- any nonmanagement solicitation of 10 or fewer persons; n36 and
- the furnishing of proxy voting advice by any person (the advisor) n37 to any other person with whom the advisor has a business relationship n38 if (i) the advisor renders financial advice in the ordinary course of business; (ii) the advisor discloses to the recipient of the advice any significant relationship the advisor has with the company, any affiliate of the company, or a shareholder proponent of the matter on which the advice is given; and any material interest the advisor has in the matter to which the advice relates; (iii) the advisor is not paid for furnishing the advice by any person other than the recipient of the advice and other persons who receive similar advice under Rule 14a-2(b)(3); and (iv) the advisor is not

furnishing proxy voting advice on behalf of any person soliciting proxies or any participant in an election contest subject to Rule 14a-11; n39 and

- Any solicitation in connection with a limited partnership roll-up transaction as defined in Item 901(c) of Regulation S-K in which the holder of a security that is the subject of a proposed roll-up transaction engages in preliminary communications with other holders of securities that are the subject of the same limited partnership roll-up transaction for the purpose of determining whether to solicit proxies, consents, or authorizations in opposition to the proposed limited partnership roll-up transaction. This exemption does not apply (1) to a security holder who is an affiliate of the registrant or general partner or sponsor; or (2) to a holder of 5% or more of the outstanding securities of a class that is the subject of a proposed roll-up transaction who engages in the business of buying and selling limited partnership interests in the secondary market unless such holder discloses such ownership interest and any relations of the holder to the parties to the transaction or to the transaction itself. If the communication is oral, the disclosure may be oral. Whether written or oral, a notice must be filed with the Commission as required by Rule 14a-6(n) and the Notice of Exempt Preliminary Roll-up Communication. n40

Electronic Shareholder Forums. In February, 2008, the Commission adopted n41 amendments to Rule 14a-2 to clarify that participation in an electronic shareholder forum that could potentially constitute a solicitation subject to the proxy rules is exempt from most of the rules if all of the conditions to the exemption are satisfied. Rule 14a-2b(6) exempts any solicitation which does not seek the power to act as proxy for a shareholder and does not furnish or request a form of revocation, abstention, consent or authorization. The exemption only applies if the solicitation occurs more than sixty (60) days prior to the scheduled meeting date (if the company announces the meeting less than sixty (60) days before the meeting date, the solicitation may not occur more than two (2) days following the announcement). Persons relying on the exemption may make a solicitation of proxies at a later date without threatening the exemption's validity. Any communications that remain available on the forum after the sixty (60) day period must comply with the proxy rules if they constitute a solicitation unless otherwise exempt. The Commission also amended Rule 14A-17 to provide that persons establishing, maintaining or operating such a forum will not be liable under the federal securities laws for any statement or information provided by any other person participating in the forum.

Effective in October 1992, the Commission adopted rules exempting a broad range of activities from the proxy rules. n42 These rules, adopted largely as a result of increasing shareholder activism by institutional investors, n43 exclude from the definition of "solicit" and "solicitation" communications by a shareholder (other than a solicitation exempt under Rule 14a-2) stating how the shareholder intends to vote and the reasons therefor if the communication:

- is made by speeches in public forums, press releases, published or broadcast opinions, statements, or advertisements appearing in a broadcast media, newspaper, magazine or other bona fide publication disseminated on a regular basis;
- is directed to persons to whom the shareholder owes a fiduciary duty in connection with the voting of securities; or
- is made in response to unsolicited requests for additional information with respect to a prior communication described above. n44

Even the provisions of Rule 14a-9, the general antifraud rule applicable to proxy solicitations, would not apply to such communications.

Certain other communications are exempted from the rules requiring preparation and distribution of proxy soliciting material even if the communication is intended to influence how a shareholder will vote. This exemption is available for

any solicitation by or on behalf of any person who (i) does not, at any time during the solicitation, seek directly or indirectly, either on its own or another's behalf, the power to act as proxyholder for a shareholder and (ii) does not furnish or otherwise request, or act on behalf of a person who furnishes or requests, a form of revocation, abstention, consent or authorization. n45 A solicitation exempt under Rule 14a-2(b)(1) is nevertheless subject to the antifraud provisions of Rule 14a-9. In addition, if a solicitation to which Rule 14a-2(b)(1) applies is made by a shareholder who owns securities of the relevant class having a market value of over \$5 million, the shareholder making the solicitation is obligated to file material with the Commission. n46

The exemption provided for in Rule 14a-2(b)(1) for solicitations where the person making the solicitation does not request a form of revocation, abstention, consent or authorization is not available for solicitations made by certain classes of persons. The classes of persons for whom this exemption is not available are:

- the company or an affiliate n47 or associate n48 of the company (other than an officer or director or any person serving in a similar capacity); n49
- an officer or director of the company or any person serving in a similar capacity engaging in a solicitation financed directly or indirectly by the company; n50
- an officer, director, affiliate or associate of a person that is ineligible to rely on the exemption set forth in Rule 14a-2(b)(1) (other than a person specified in Rule 14a-2(b)(1)(i)), or any person serving in a similar capacity; n51
- any nominee for whose election as a director proxies are solicited; n52
- any person soliciting in opposition to a merger, recapitalization, reorganization, sale of assets or other extraordinary transaction recommended or approved by the board of directors of the company who is proposing or intends to propose an alternative transaction to which such person or one of its affiliates is a party; n53
- any person who is required to report beneficial ownership of the company's equity securities on a Schedule 13D, unless such person has filed a Schedule 13D and has not disclosed pursuant to Item 4 thereof an intent, or reserved the right, to engage in a control transaction, or any contested solicitation for the election of directors; n54
- any person who receives compensation from an ineligible person directly related to the solicitation of proxies, other than pursuant to Rule 14a-13; n55
- where the company is registered as an investment company under the Investment Company Act of 1940, n56 an "interested person" of the investment company; n57
- any person who, because of a substantial interest in the subject matter of the solicitation, is likely to receive a benefit from a successful solicitation that would not be shared pro rata by all other holders of the same class of securities, other than a benefit arising from the person's employment with the company; n58 and
- any person acting on behalf of any of the foregoing. n59

[3] Communications With Shareholders

Section 14(b) makes it unlawful for any member of a national securities exchange, or any broker or dealer registered

under the Exchange Act or any bank, association, or other entity that exercises fiduciary powers n60 to give, or to refrain from giving, a proxy, consent, authorization or information statement in respect of any security registered under Section 12 of the Exchange Act n61 or any security issued by a registered investment company and carried for the account of a customer. n62 Amendments to Section 14(b) to assure the dissemination of information to holders of securities registered under the Exchange Act in part resulted from the increasing use of "nominee" or "street name" registrations of securities. n63 To facilitate communications to shareholders and to assure dissemination of proxy material, information statements and annual reports, the Commission adopted Rule 14a-13 and Rule 14c-7, which impose certain obligations on a company with securities registered under the Exchange Act to identify the beneficial owners of securities held in nominee or street name. The Commission has also adopted Rule 14b-1 regulating the dissemination of information to beneficial owners by brokers and dealers and Rule 14b-2 regulating the dissemination of information to beneficial owners by banks, associations and other entities exercising fiduciary powers.

[a] Obligations of Companies in Facilitating Communications With Shareholders--Rule 14a-13. As part of its action to facilitate shareholder communications and to assure dissemination of information to beneficial owners, the Commission adopted Rule 14a-13. n64 Under this rule, if a company knows that any securities entitled to vote at a meeting for which the company intends to solicit proxies (or for which the company intends to solicit written consents or authorizations in lieu of holding a meeting), are held of record by a broker, dealer, voting trustee, bank, association or other entity that exercises fiduciary powers in nominee name or otherwise, the company must inquire of the record holder n65 by first-class mail or equally prompt means, requesting the following information:

- whether other persons are the beneficial owners n66 of the securities to which the solicitation relates and, if so, the number of copies of proxy and other soliciting materials needed to supply the materials to the beneficial owners; n67
- in the case of an annual meeting (or special meeting in lieu of an annual meeting) or written consents in lieu of such meeting, at which directors are to be elected, the number of copies of the annual report to shareholders necessary to supply such report to beneficial owners to whom such reports are to be distributed by such record holder or its nominee and not by the company; n68
- if the record holder has an obligation to provide beneficial owner information to the company n69 or to forward proxy soliciting and other materials, n70 whether the record holder has designated an agent to act on its behalf in fulfilling such obligation and giving the name and address of such agent; n71 and
- whether the record holder holds the company's securities on behalf of a respondent bank n72 and, if so, the name and address of each such respondent bank. n73

At the time the company makes an inquiry pursuant to Rule 14a-13(a)(1), the company must provide certain information to the record holder. The company must indicate to each record holder:

- whether the company intends to distribute its annual report directly to beneficial owners whose names, addresses and securities positions are disclosed by broker-dealers or banks, associations and other entities exercising fiduciary powers pursuant to Rule 14b-1 and Rule 14b-2;
- the record date; n74 and
- at the option of the company, any employee benefit plan established by an affiliate of the company that holds securities of the company that the company elects to treat as exempt employee benefit plan securities. n75

Rule 14a-13(a)(2) provides that within one business day of receipt by the company of a record holder's or respondent

bank's response indicating the names and addresses of its respondent banks, the company must make inquiry of and give notice to each such respondent bank. The contents of the inquiry and notice are the same as those required under Rule 14a-13(a)(1). An inquiry required by Rule 14a-13(a)(1) and (2) shall not cover beneficial owners of exempt employee benefit plan securities. n76

In general, the inquiry required under Rule 14a-13(a)(1) must be made at least 20 business days prior to the record date of the meeting of shareholders. n77 Exceptions to this general rule are:

- if such inquiry is impracticable 20 business days prior to the record date of a special meeting, as many days before the record date of such meeting as is practicable; n78
- if consents or authorizations are solicited, and such inquiry is impracticable 20 business days before the earliest date on which they may be used to effect corporate action, as many days before that date as is practicable; n79 or
- at such later time as the rules of a national securities exchange on which the class of securities in question is listed may permit for good cause shown. n80

If a record holder or respondent bank has informed the company under Rule 14b-1 or Rule 14b-2 that it has designated one or more offices or departments to receive requests for beneficial owner information, the inquiry made pursuant to Rule 14a-13(a)(1) must be made to such offices or departments in order for the inquiry to comply with the rule. n81

The company is required to supply, in a timely manner, n82 each record holder and respondent bank of whom the inquiries required by Rules 14a-13(a)(1) and 14a-13(a)(2) are made with copies of the form of proxy, proxy statement, other proxy soliciting material and annual report. These materials must be supplied in such quantities and assembled in such form and at such place(s) as the record holder or respondent bank may reasonably request in order to send such material to the beneficial owners. n83 Upon the request of any record holder or respondent bank that is supplied with proxy soliciting material or annual reports to be sent to beneficial owners, the company must pay the reasonable expenses of the record holder or respondent bank for completing the mailing of such material to beneficial owners. n84

[b] Obligations of Brokers and Dealers in Facilitating Communications With Shareholders--Rule 14b-1.

Rule 14b-1 n85 requires a registered broker-dealer: n86

(1) to respond, by first-class mail or equally prompt means, no later than seven business days after receiving an inquiry by or on behalf of a company soliciting proxies, consents or authorizations in accordance with Rule 14a-13(a) n87 or distributing an information statement in accordance with Rule 14c-7(a), n88 by providing a search card or otherwise that contains the following:

- (a) a statement of the approximate number of its customers who are beneficial owners n89 holding shares of the company in street name; n90
- (b) a statement of the number of its customers objecting to disclosure of their names, addresses and securities positions, if the company has indicated pursuant to Rule 14a-13(a) or Rule 14c-7(a) that it will distribute its annual report to beneficial owners who have not so objected; n91 and
- (c) the identity of the broker-dealer's agent, if any, for fulfilling its obligations under Rule 14b-1;

(2) to forward to its customers who are beneficial owners of the company's securities, the company's

annual report and proxy material or information statement not later than five business days after receipt of the materials from the company; n92 and

(3) to provide the company at the company's request the names, addresses and securities positions of its customers who are beneficial owners of the company's securities and who have not objected to such disclosure. n93

The date as of which information is to be provided may be any date specified by the company that is no earlier than five business days after receipt of the company's request. Where the broker-dealer employs a designated agent to carry out its obligations under Rule 14b-1, the five business day period runs from the date the agent receives the company's request. n94 Rule 14b-1(b)(2) contains the general obligation for a broker-dealer to forward proxy and other soliciting material, information statements and annual reports to shareholders to its customers who are beneficial owners of the company's securities upon receipt of such materials. The broker-dealer is obligated to forward such materials within five business days of their receipt by the broker-dealer.

There are exceptions to the obligations of a broker-dealer to provide information about beneficial owners pursuant to Rule 14b-1(b)(2). The first exception is that the broker-dealer may not include information in its response pursuant to Rule 14b-1(b)(1) or forward proxies (or in lieu thereof requests for voting instructions), proxy soliciting material, information statements or annual reports to shareholders where the beneficial owners of the securities are owners of exempt employee benefit plan securities. n95

The second exception to the obligations of a broker-dealer under Rule 14b-1(b)(2) is that the broker-dealer need not satisfy its obligations to provide lists of beneficial owners and to forward proxy and other material if the company does not provide assurance that the broker-dealer will be reimbursed for its direct and indirect expenses in performing the functions. n96 Further, a broker-dealer need not forward annual reports to non-objecting beneficial owners if the company informs the broker-dealer that the company will forward that material to those non-objecting beneficial owners identified by the broker-dealer, either directly or through its agent, in a list provided under Rule 14b-1(b)(3). n97

[c] Obligations of Banks, Associations and Other Fiduciaries in Facilitating Communications With Shareholders--Rule 14b-2. Rule 14b-2 n98 regulates the dissemination of proxy soliciting materials and information statements by banks, associations and other entities that exercise fiduciary powers. n99 Important in an understanding of Rule 14b-2 is the term "beneficial owner," which is defined for purposes of Rule 14b-2 as "any person who has or shares, pursuant to an instrument, agreement, or otherwise, the power to vote, or to direct the voting of a security." n100

Rule 14b-2 imposes obligations on a bank with respect to disseminating certain communications to beneficial owners and providing beneficial owner information to companies. Specifically, Rule 14b-2:

(1) requires a bank:

(a) to respond, by first class mail or other equally prompt means, directly to the company, no later than one business day after the date it receives an inquiry under Rule 14a-13(a) or Rule 14c-7(a), indicating the name and address of each of its respondent banks n101 that holds the company's securities on behalf of beneficial owners, if any; and

(b) to respond, by first class mail or other equally prompt means, directly to the company no later than seven business days after the date it receives an inquiry made in accordance with Rule 14a-13(a) or Rule 14c-7(a), by indicating, by means of a search card or otherwise:

(i) the approximate number of customers of the bank who are beneficial owners of the

company's securities that are held of record by the bank or its nominee; n102

(ii) if the company has indicated that it will distribute the annual report to shareholders to beneficial owners of its shares whose names, addresses and securities positions are disclosed pursuant to Rule 14b-2(b)(1)(ii); and

(iii) the number of beneficial owners of the company's securities who have not objected to disclosure of their names, addresses and securities positions; n103 and

(c) to provide the name of its designated agent, if any, acting on its behalf in fulfilling its obligations under Rule 14b-2(b)(1)(i) and (ii); n104

(2) requires a bank, within five business days after the record date for a meeting of shareholders:

(a) to execute an omnibus proxy, including a power of substitution, in favor of its respondent banks and forward such proxy to the company; n105 and

(b) to furnish a notice to each respondent bank in whose favor an omnibus proxy has been executed that the bank has executed such a proxy, including a power of substitution, in its favor pursuant to Rule 14b-2(b)(2)(i);

(3) requires a bank, upon receipt of proxy cards, proxy statements, other proxy soliciting material, information statements or annual reports to shareholders, to forward such materials to each beneficial owner on whose behalf the bank holds securities, no later than five business days after the date the bank receives such material n106 and, where a proxy is solicited, the bank must forward to the beneficial owner either:

(a) a properly executed proxy; n107 or

(b) a request for voting instructions; n108

(4) requires a bank:

(a) to respond, by first class mail or other equally prompt means, directly to the company, no later than one business day after the date it receives an inquiry made in accordance with Rule 14a-13(b)(1) or Rule 14c-7(b)(1) by indicating the name and address of each of its respondent banks that hold the company's securities on behalf of beneficial owners, if any; n109

(b) through its agent or directly, to provide the company, upon the company's request and within the time specified in Rule 14b-2(b)(4)(iii) with the names, addresses and securities positions, compiled as of a date specified in the company's request that is no earlier than five business days after the date the company's request is received of beneficial owners of the company's securities on whose behalf the bank holds securities; n110 and

(c) through its agent or directly, transmit the data specified in Rule 14b-2(b)(4)(ii) to the company no later than five business days after the date specified by the company. n111

With respect to customer accounts opened on or before December 28, 1986, n112 unless the bank has made a good faith effort to obtain affirmative consent to disclosure of beneficial ownership information, the bank must provide such information as to beneficial owners who do not object to disclosure of the information. n113

There are several exceptions to the requirement that a bank provide beneficial ownership information to a company and disseminate shareholder communications on behalf of a company.

(1) With regard to beneficial owners of exempt employee benefit plan securities, a bank may not:

(a) include information in its response pursuant to Rule 14b-2(b)(1) or forward proxies (or in lieu thereof requests for voting instructions), proxy soliciting material, information statements or annual reports pursuant to Rule 14b-2(b)(3) to such beneficial owners; n114 or

(b) include in its response pursuant to Rules 14b-2(b)(4) or (b)(5) data concerning such beneficial owners. n115

(2) The bank need not satisfy:

(a) its obligations under Rules 14b-2(b)(2) and (b)(3) if the company does not provide assurance of reimbursement of the bank's reasonable expenses, both direct and indirect, incurred in connection with performing the obligations imposed under those rules; n116

(b) its obligations under Rule 14b-2(b)(3) to forward annual reports to consenting and non-objecting beneficial owners identified to the company if the company notifies the record holder bank or respondent bank n117 that the company will mail its annual report to beneficial owners whose names, addresses and securities positions are disclosed.

(3) For purposes of determining the fees that may be charged by the bank to the company for providing beneficial owner information and for disseminating shareholder communications, fees are deemed reasonable if they do not exceed those permitted to be charged by brokers or dealers for reimbursement of their reasonable expenses, both direct and indirect, incurred in connection with their performing corresponding duties under Rules 14b-1(b)(2) and (b)(3).

[4] Solicitations Prior to Furnishing Proxy Statement--Rule 14a-12(a) and (b).

Rule 14a-12(a) and (b) n118 permits a solicitation to be made prior to the time a written proxy statement is furnished to shareholders if the following three conditions are met:

(1) each communication published, sent or given to shareholders must identify the participants in the solicitation n119 and describe their interests, direct or indirect, by security holdings or otherwise, or contain a prominent legend in clear, plain language advising security holders where they can obtain that information;

(2) no form of proxy is furnished to or requested from shareholders prior to the time the written proxy statement is furnished (but if a proxy statement has previously been furnished by the persons involved in the solicitation and it meets the requirements of Regulation 14A, including Rule 14a-3(a), n120 when furnished, the prohibition against furnishing forms of proxy is inapplicable; and

(3) all written communications must contain a prominent legend advising security holders to read the proxy statement when it is available because it contains important information, and must state that the proxy statement and any other relevant documents may be obtained free at the Commission's web site, and describe what documents are available free from participants.

The requirement of sending a written proxy statement meeting the requirements of Regulation 14A "at the earliest practicable date" has been eliminated to avoid the need to file such a statement after a merger has been abandoned prior to filing. n121 The written proxy statement must be sent if and when the proxy is solicited or form of proxy delivered.

If the solicitation relates to an election contest, the further requirements of Rule 14a-12(c) must be complied with. n122

Rule 14a-12(b) specifies that any soliciting material published, sent or given to shareholders prior to the furnishing of a written proxy statement must also be filed with the Commission no later than the date the material is published, sent or given to shareholders. At the same time, three copies of the material must be filed with, or mailed for filing to, each national securities exchange upon which any class of securities of the company is listed and registered. n123

[5] Payment of Compensation in Roll-up Transactions--Rule 14a-15.

Rule 14a-15 prohibits the payment of compensation to any person for soliciting proxies, consents or authorizations directly from security holders in connection with a roll--up transaction if the compensation is based on whether the person solicited either approves or disapproves the proposed roll--up transaction or is contingent on approval or disapproval or completion of the roll--up transaction. This limitation does not apply to finite--life entities that are not limited partnerships, or partnerships whose investors will receive new securities or securities in another entity that are not reported under a transaction reporting plan declared effective before December 17, 1993 by the Commission under Section 11A of the Exchange Act. In addition, this limitation does not apply to partnerships whose investors' securities are reported under a transaction reporting plan declared effective before December 17, 1993 by the Commission under Section 11A of the Exchange Act. n124

(n24)Footnote 24. Sec. Exch. Act Rel. No. 34-31326, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,051, at 83,353 (Oct. 16, 1992).

(n25)Footnote 25. *See* Rule 14a-1(l)(2) and Rule 14a-2(b).

(n26)Footnote 26. 17 C.F.R. § 240.14a-2(a).

(n27)Footnote 27. Rule 14a-2(a)(1)(i)-(iii).

The provision of Rule 14a-2(a)(1)(iii) concerning the record owner's giving impartial instructions does not, however, prevent the record owner from giving requested advice to his or her principal, though the record owner may not give unsolicited advice. "A broker normally is not engaged in solicitation when responding, whether orally or in writing, to an unsolicited request from a customer for advice as to how to vote..." Sec. Exch. Act Rel. No. 34-7208, 3 Fed. Sec. L. Rep. (CCH) P 24,104 (1964).

Rules 450 through 460 of the New York Stock Exchange and Rules 701 through 726 of the American Stock Exchange Company Guide govern the transmission of proxy material by exchange members to beneficial owners.

Notwithstanding the provision in Rule 14a-2(a)(1)(iii), which would permit the record owner to give a proxy if no instructions are received by a specific date, the rules of the New York Stock Exchange and the American Stock Exchange limit the right of a member firm to vote shares which it holds in nominee name without specific instructions. Under Rule 452 of the New York Stock Exchange, a member organization generally may not vote securities that it holds in nominee name without specific instructions from the beneficial owner when the matter to be voted on:

(1) is not submitted to shareholders by means of a proxy statement comparable to that specified in Schedule 14A under the Exchange Act;

(2) is the subject of a counter-solicitation, or is part of a proposal made by a shareholder which is being opposed by management (*i.e.*, a proxy contest);

(3) relates to a merger or consolidation (except when the Company's proposal is to merge with its own wholly owned subsidiary, provided that dissenting shareholders do not have rights of appraisal);

1-7 Federal Securities Exchange Act of 1934 § 7.02

- (4) involves rights of appraisal;
- (5) authorizes mortgaging of property;
- (6) authorizes or creates indebtedness or increases the authorized amount of indebtedness;
- (7) authorizes or creates a preferred stock or increases the authorized amount of an existing preferred stock;
- (8) alters the terms or conditions of existing stock or indebtedness;
- (9) involves waiver or modification of preemptive rights (except when the company's proposal is to waive such rights with respect to shares being offered pursuant to stock option or purchase plans involving the additional issuance of not more than 5% of the company's outstanding common shares);
- (10) changes existing quorum requirements with respect to shareholder meetings;
- (11) alters voting provisions or the proportionate voting power of a class of stock, or the number of its votes per share (except where cumulative voting provisions govern the number of votes per share for election of directors and the company's proposal involves a change in the number of its directors by not more than 10% or not more than one);
- (12) authorizes issuance of stock, or options to purchase stock, to directors, officers or employees in an amount which exceeds 5% of the total amount of the class outstanding;
- (13) authorizes (a) a new profit-sharing or special remuneration plan, or a new retirement plan, the annual cost of which will amount to more than 10% of the company's average annual income before taxes for the preceding five years or (b) the amendment of an existing plan which would bring its cost above 10% of such average annual income before taxes, subject to certain exceptions;
- (14) changes the purposes or powers of a company to an extent which would permit it to change to a materially different line of business and it is the company's stated intention to make such a change;
- (15) authorizes the acquisition of property, assets or a company, where the consideration to be given has a fair value approximating 20% or more of the market value of the company's previously outstanding shares;
- (16) authorizes the sale or other disposition of assets or earning power approximating 20% or more of the company's existing assets or earning power prior to the transaction;
- (17) authorizes a transaction not in the ordinary course of business in which an officer, director or substantial shareholder has a direct or indirect interest; or
- (18) reduces earned surplus by 51% or more, or reduces earned surplus to an amount less than the aggregate of three years' common stock dividends of the company computed at the current dividend rate.

New York Stock Exchange, Supplementary Material to Rule 452. The American Stock Exchange imposes similar requirements on its member organizations. See American Stock Exchange, Commentary to Rule 577.

On February 26, 2009, the New York Stock Exchange filed an amended proposal with the SEC to amend its Rule 452 and Listed Company Manual Rule 402.08, to eliminate brokers' discretion to cast votes for shareholders who don't return voting instructions with respect to the election of directors where there is no proxy contest. The amended rule

would apply to shareholders' meetings held on or after January 1, 2010.

If not approved by the SEC by September 1, 2009, the effective date will be at least 4 months after the date of SEC approval but will not be a date within the first 6 months of a calendar year.

Thus far there appears to have been little public discussion of the impact that adoption of the proposed rule would have on those companies which have adopted the e-proxy notice and access model for shareholder voting, as well as those which have adopted majority voting for election of directors. At a minimum, one would expect such companies to incur substantially greater solicitation expenses in an effort to get out the vote in the face of apparent lethargy by shareholders.

New York Stock Exchange Rules are available at <http://rules.nyse.com/NYSE/NYSE%5FRules/>.

(n28)Footnote 28. Rule 14a-2(a)(2).

The solicitation of an irrevocable proxy in connection with an offer to purchase the security is exempt under this provision. *Mills v. Sarjem Corp.*, 133 F. Supp. 753 (D.N.J. 1955), based on Rule 14a-2(c), predecessor to Rule 14a-2(a)(2); *U.S. Smelting, Refining & Mining Co. v. Clevite Corp.*, Fed. Sec. L. Rep. (CCH) P 92,691 (N.D. Ohio 1968).

(n29)Footnote 29. 17 C.F.R. § 230.145(a).

(n30)Footnote 30. Rule 14a-2(a)(3).

The transactions specified in Rule 145(a) under the Securities Act are transactions where, pursuant to state law or the provisions contained in the company's certificate of incorporation or otherwise, there is submitted to the shareholders a plan or agreement generally involving the substitution or exchange of securities of the company (including a statutory merger or consolidation) or for the transfer of assets in consideration for securities of the transferee.

(n31)Footnote 31. Rule 14a-2(a)(4).

(n32)Footnote 32. Rule 14a-2(a)(5).

Rule 62, 17 C.F.R. § 250.62, under the Public Utility Holding Company Act, 15 U.S.C. § 79 *et seq.*, relates to reorganizations of registered public utility holding companies or subsidiaries thereof where the reorganization is subject to the approval of the Commission or to any other transaction which is or will be the subject of an application or declaration filed with the Commission under the Public Utility Holding Company Act.

(n33)Footnote 33. Rule 14a-2(a)(6).

(n34)Footnote 34. For a discussion of the filing requirements under Rule 14a-6(g), *see* § 7.04[3] *infra*.

For discussion of the antifraud provisions of Rule 14a-9, *see* § 7.04[4] *infra*.

(n35)Footnote 35. Rule 14a-2(b)(1).

This exemption is not available for solicitations made by certain persons. *See* the text accompanying ns. 41-47 *infra* for a more complete description.

(n36)Footnote 36. Rule 14a-2(b)(2).

This exception has been used to legitimize efforts to form a shareholders' committee and would apply to efforts to

form a control group in certain circumstances. The restriction is strictly construed to mean a solicitation by any person or group of persons of 10 persons in the aggregate whether or not they agree to participate in the solicitation.

At least where it is contemplated that other stock will be purchased, such a group is, however, subject to the provisions of Section 13(d)(1), 15 U.S.C. § 78m(d)(1) (requiring any person or group owning more than five percent of the equity securities of a company to file certain information with the Commission). Schedule 13D, required by Rule 13d-1, 17 C.F.R. § 240.13d-1, must also be filed. *Bath Indus., Inc. v. Blot*, 305 F. Supp. 526 (E.D. Wis. 1969), *aff'd*, 427 F.2d 97 (7th Cir. 1970).

The importance of Rule 14a-2(b)(2) exempting nonmanagement solicitations of not more than 10 persons is likely to decrease because of the exemption now contained in Rule 14a-2(b)(1) relating to solicitations where no form of proxy is requested. *See* text accompanying ns. 39-53 *infra* for a discussion of Rule 14a-2(b)(1).

This exception applies to the formation of a third contestant although there is already a proxy contest in progress. *Universal Container Corp. v. Slade*, [1970-1971 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,005 (S.D.N.Y. 1971).

(n37)Footnote 37. The term "advisor" includes financial analysts, investment advisors and broker-dealers. Sec. Exch. Act Rel. No. 34-16356, [1979-1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,358 (1979). *See also* the discussion of Rule 14a-2(a)(1) *supra*.

(n38)Footnote 38. Under ordinary circumstances, the requirements of the proxy rules do not apply to the relationship between a client and his or her attorney or accountant. The proxy rules regulate the conduct only of participants in the solicitation of proxies. Sec. Exch. Act Rel. No. 34-16356, [1979-1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,358, n.11 (1979).

(n39)Footnote 39. Rule 14a-2(b)(3)(i)-(iv).

(n40)Footnote 40. Rule 14a-2(b)(4)(i)-(ii).

For discussion of the requirements of Rule 14a-6, 17 C.F.R. § 240.14a-11, "Filing Requirements" with regard to Notice of Exempt Communications, *see* Section 7.04[3] *infra*.

(n41)Footnote 41. *Electronic Shareholder Forum*, Release 34-57172.

(n42)Footnote 42. Rule 14a-1(l)(2)(iv) and Rule 14a-2(b)(1).

(n43)Footnote 43. Suggestion has been made that the interest of institutional investors in being able to comment publicly on the performance of a company's management without the substantial expense of complying with the proxy rules is the result of the increasing percentage of the securities of public companies owned by institutional investors generally and pension plans in particular. Historically, the response by a shareholder dissatisfied with management's performance would be to sell the securities held. As the percentage of shares owned increases, the ability to sell such shares quickly without disrupting an orderly market decreases.

The effect of this exclusion is to require that activities that meet the requirements of Rule 14a-8(b)(1), but which arguably could be exempt from the definition of "solicitation" under Rule 14a-1(l)(2)(iv) must be treated as an exempt solicitation under Rule 14a-2(b)(1). As a result, such activities would be subject to the filing requirements of Rule 14a-6(g) and the antifraud provisions of Rule 14a-9.

(n44)Footnote 44. Rule 14a-1(l)(2)(iv).

(n45)Footnote 45. Rule 14a-2(b)(1).

(n46)Footnote 46. Rule 14a-6(g). *See § 7.04 infra.*

(n47)Footnote 47. "Affiliate" is defined in Rule 12b-2 as a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the person specified.

(n48)Footnote 48. "Associate" is defined in Rule 14a-1(a). The term associate, used to indicate a relationship with any person, means (1) any corporation or organization (other than the company or a majority owned subsidiary of the company) of which such person is an officer or partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities; (2) any trust or other estate in which such person has a substantial beneficial interest or as to which such person serves as trustee or in a similar fiduciary capacity; and (3) any relative or spouse of such person, or any relative of such spouse, who has the same home as such person or who is a director or officer of the company or any of its parents or subsidiaries.

(n49)Footnote 49. Rule 14a-2(b)(1)(i) under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G.

(n50)Footnote 50. Rule 14a-2(b)(1)(ii).

(n51)Footnote 51. Rule 14a-2(b)(1)(iii). Officers or directors of the company are not disqualified from this exemption because of the parenthetical in Rule 14a-2(b)(1)(iii). However, an officer or director of the company cannot rely on the exemption in Rule 14a-2(b)(1) if the solicitation is financed directly or indirectly by the company. *See* Rule 14a-2(b)(1)(ii).

(n52)Footnote 52. Rule 14a-2(b)(1)(iv).

(n53)Footnote 53. Rule 14a-2(b)(1)(v).

(n54)Footnote 54. Rule 14a-2(b)(1)(vi). For a discussion of the requirements of Schedule 13D, *see* § 7A.02[1][b][i] *infra*.

(n55)Footnote 55. Rule 14a-2(b)(1)(vii). Rule 14a-13, permits a record holder to request reimbursement from the company of the reasonable expenses for completing the mailing of proxy soliciting material to the beneficial owners.

(n56)Footnote 56. 15 U.S.C. § 80a-1 *et seq.*

(n57)Footnote 57. Rule 14a-2(b)(1)(viii). For a discussion of "interested person" of an investment company, *see* Lemke, "The Investment Company Act of 1940," § 83.06[3][a] in A.A. Sommer, Jr., gen. ed., *Securities Law Techniques* (Matthew Bender).

(n58)Footnote 58. Rule 14a-2(b)(1)(ix).

(n59)Footnote 59. Rule 14a-2(b)(1)(x).

(n60)Footnote 60. When Section 14(b) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F, 15 U.S.C. § 78n(b), was amended in 1986 to authorize the Commission to regulate the giving or withholding of proxies, consents and authorizations by banks, associations and other entities exercising fiduciary powers, Section 14(b)(2) was added to the Exchange Act. Section 14(b)(2) provides that the Commission's authority under Section 14(b)(1) with respect to banks may not require the disclosure of the names of beneficial owners of securities in an account held by a bank on December 28, 1986, unless the beneficial owner consents to the disclosure.

However, the exception in Section 14(b)(2) does not apply to a bank which the Commission finds has not made a good faith effort to obtain the consent from such beneficial owners.

(n61)Footnote 61. For a discussion of the requirements for registration of securities under Section 12 of the Exchange Act, *see* § 4.01 *supra*.

(n62)Footnote 62. As amended to 1964, Section 14(b) of the Exchange Act applied only to the giving of proxies, consents or authorizations by members of registered stock exchanges and brokers or dealers who transacted a business in securities through a stock exchange member and applied only to securities registered on a national securities exchange. In 1964, Section 14(b) was amended to apply to any registered broker-dealer. The scope of Section 14(b) was again expanded in 1985 when the Commission's authority to issue regulations was expanded to include any bank, association or other entity that exercises fiduciary powers. (Shareholder Communications Act of 1985, Public Law 99-222, 99 Stat. 1737, § 2.) Finally, in 1990, the Commission's authority to issue regulations was expanded to include securities of a registered investment company. *See* the Shareholder Communications Improvement Act of 1990, Public Law 101-550, 104 Stat. 2721, § 302(a).

(n63)Footnote 63. The Commission's preliminary report on its "Street Name Study" pointed out problems presented by the practice of recording ownership in "street name," or in the name of a bank or other nominee, insofar as that form of registration inhibits shareholder communications:

The principal statutory provision designed to assure the transmission of information from issuers to their shareholders is Section 14. Section 14(a) makes it unlawful to solicit, in contravention of the Commission's rules and regulations, proxies to vote any security registered under Section 12. Section 14(b), which is designed to prevent brokers from unduly influencing corporate affairs, prohibits any broker-dealer from giving or refraining to give, in contravention of the Commission's rules and regulations, proxies with respect to any security registered pursuant to Section 12 and carried for the account of a customer.

In 1974 and 1975, the Commission sought commentary on the effectiveness of the communication process. The number of comments received was not substantial, and unfavorable comments appeared to relate to isolated breakdowns rather than to fundamental disorders.

For example, issuers described instances in which materials for beneficial owners were not requested at all or not requested promptly enough to permit timely transmission and instances in which materials provided to record holders were not transmitted to beneficial owners in a timely manner or were not transmitted at all. Some issuers and the American Society of Corporate Secretaries complained that persons who are not record holders of issuers' securities request sets of materials and bill the issuers for services purportedly performed in forwarding the materials to beneficial owners. Issuers also stated that banks and brokers request reimbursement for costs which often are substantially higher than the costs which issuers incur in direct mailing to shareholders, and one issuer suggested that issuers should not be required to reimburse intermediaries.

Brokers and banks complained that issuers failed to announce record dates early enough to permit proper handling of proxies and annual reports and sometimes failed to respond to requests for materials in a timely manner. Shareholders complained that they had not received issuer mailings or had not received proxies in time to permit them to be voted.

Preliminary Report of the Securities and Exchange Commission on the Practice of Recording the Ownership of Securities in the Records of the Issuer in Other Than the Name of the Beneficial Owner of Such Securities, Pursuant to Section 12(m) of the Securities Exchange Act of 1934, at 16, 17 (Dec. 4, 1975) (footnotes omitted).

(n64)Footnote 64. 17 C.F.R. § 240.14a-13.

(n65)Footnote 65. If the company's list of shareholders indicates that some of its securities are registered in the name of a clearing agency registered pursuant to Section 17A, 15 U.S.C. § 78q-1, of the Exchange Act (*e.g.*, "Cede & Co.," nominee for the Depository Trust Company), the company must also make appropriate inquiry of the clearing agency and thereafter of the participants in such clearing agency, who may hold securities on behalf of a beneficial owner or respondent bank, and must also comply with Rule 14a-1(i) with respect to any such participant. Note 1 to Rule 14a-13(a).

The rules are not clear as to when inquiry must be made of participants in registered clearing agencies. If the inquiry of participants in registered clearing agencies must be made in compliance with the timing requirements of Rule 14a-13(a)(3), the inquiry of the clearing agency, as a practical matter, would need to be made approximately two months before the record date for an annual meeting of shareholders.

(n66)Footnote 66. While neither Rule 14a-1 nor Rule 14a-13 contains a specific definition of "beneficial owner" for purposes of Rule 14a-13, it would be reasonable to assume that the definition in Rule 14b-2(a)(2) should apply. "Beneficial owner" is defined in Rule 14b-2(a)(2) to "include any person who has or shares, pursuant to an instrument, agreement or otherwise, the power to vote, or to direct the voting of a security." Because the purpose of Rules 14a-13 and 14b-2 is to facilitate communication and dissemination of information to beneficial owners, it would seem reasonable that "beneficial owner" for this purpose would not extend to persons who have or share investment power with respect to the securities but who do not have or share voting power.

(n67)Footnote 67. Rule 14a-13(a)(1)(i)(A).

(n68)Footnote 68. Rule 14a-13(a)(1)(i)(B).

(n69)Footnote 69. The obligation of broker-dealers and of banks, associations and other entities that exercise fiduciary powers to provide such information arises under Rule 14b-1(b)(3)(i) and Rule 14b-2(b)(4)(ii), respectively.

(n70)Footnote 70. The obligation of broker-dealers and of banks, associations and other entities that exercise fiduciary powers to transmit proxy soliciting and other materials arises under Rule 14b-1(b)(3)(ii) and Rule 14b-2(b)(e)(iii) respectively.

(n71)Footnote 71. Rule 14a-13(a)(1)(i)(C).

(n72)Footnote 72. "Respondent bank" is defined in Rule 14a-1(k), 17 C.F.R. § 240.14a-1(k), as "any bank, association or other entity that exercises fiduciary powers which holds securities on behalf of beneficial owners and deposits such securities for safekeeping with another bank, association or other entity that exercises fiduciary powers."

(n73)Footnote 73. Rule 14a-13(a)(1)(i)(D).

(n74)Footnote 74. Rule 14a-13(a)(1)(ii)(B).

(n75)Footnote 75. Rule 14a-13(a)(1)(ii)(C), 17 C.F.R. § 240.14a-13(a)(1)(ii)(C).

"Exempt employee benefit plan securities" is defined in Rule 14a-1(d), 17 C.F.R. § 240.14a-1(d), as:

(1) Securities of the company held by an "employee benefit plan," defined in Rule 14a-1(b) as any purchase, savings, option, bonus, appreciation, profit sharing, thrift, incentive, pension or similar plan primarily for employees, directors, trustees or officers (see Rule 14a-1(b)); or

(2) If the notice regarding the current solicitation has been given pursuant to Rule 14a-13(b)(3),

securities of the company held by an employee benefit plan where such plan is established by an affiliate of the company.

Under Rule 14b-1(c)(1) and Rule 14b-2(c)(1)(i), information is not to be provided by broker-dealers or banks with regard to beneficial owners of exempt employee benefit plan securities.

(n76)Footnote 76. Rule 14a-13(a)(2) under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G.

(n77)Footnote 77. Rule 14a-13(a)(3).

(n78)Footnote 78. Rule 14a-13(a)(3)(i).

The exemption in Rule 14a-13(a)(3)(i) applies only to special meetings and not to annual meetings. In scheduling annual meetings and preparing for them, a company should keep in mind that the inquiry required under Rule 14a-13(a)(1) must be made at least 20 business days prior to the record date and is not made in compliance with the rule if made 20 calendar days before the record date.

(n79)Footnote 79. Rule 14a-13(a)(3)(ii).

(n80)Footnote 80. Rule 14a-13(a)(3)(iii).

(n81)Footnote 81. Proviso to Rule 14a-13(a)(3).

(n82)Footnote 82. "Timely manner" is not defined for purposes of this requirement. However, it would be reasonable to assume that, at a minimum, the information would need to be delivered to record holders and respondent banks sufficiently in advance of the meeting that the record holder or respondent bank would have the time allowed to them under applicable rules for forwarding materials to the beneficial owners.

(n83)Footnote 83. Rule 14a-13(a)(4).

(n84)Footnote 84. Rule 14a-13(a)(5).

(n85)Footnote 85. 17 C.F.R. § 240.14b-1.

(n86)Footnote 86. *See* § 3.03 *supra* for a discussion of the requirements for the registration of broker-dealers.

(n87)Footnote 87. *See* § 7.02[3][a] *supra*.

(n88)Footnote 88. *See* § 7.06[4] *infra*.

(n89)Footnote 89. While Rule 14b-1 does not contain a specific definition of "beneficial owner" for purposes of Rule 14b-1 it would be reasonable to assume that the definition in Rule 14b-2(a)(2) should apply. *See* n.60 *supra*.

(n90)Footnote 90. Rule 14b-1(b)(1)(i).

(n91)Footnote 91. Rule 14b-1(b)(1)(ii).

(n92)Footnote 92. Rule 14b-1(b)(2).

(n93)Footnote 93. The information as to names, addresses and securities positions is to be given as of a date specified by the company in its request, provided that the date is no earlier than five business days after the date the company's request is received. *See* Rule 14b-1(b)(3)(i) In addition, the information so requested must be transmitted to

the company no later than five business days after the record date or other date specified by the company. *See* Rule 14b-1(b)(3)(ii).

If the broker or dealer employs a designated agent to act on its behalf in performing its obligations under Rule 14b-2(b)(3), the five business day time period for determining the date as of which the beneficial ownership information is to be compiled is calculated from the date the designated agent receives the company's request. *See* Note 1 to Rule 14b-1(b)(3).

Receipt of the request for information less than five business days before the requested compilation date does not excuse the broker-dealer from providing the information as to names, addresses and securities positions. Rather, the broker-dealer must compile the information as of a date which is no more than five business days after the receipt of the request and must transmit the information no less than five business days after the date of compilation. *See* Note 2 to Rule 14b-1(b)(3).

(n94)Footnote 94. Rule 14b-1(b)(3).

(n95)Footnote 95. Rule 14b-1(c)(1)(i).

"Exempt employee benefit plan securities" is defined in Rule 14a-1(d). *See* n.69 *supra*.

(n96)Footnote 96. Rule 14b-1(c)(2)(i).

(n97)Footnote 97. Under Rule 14b-1(c)(3), "reasonable expenses" may include a surcharge for each set of proxy materials of registered investment companies or of information statements mailed to beneficial owners at the rate of \$0.20 for each such set of proxy materials or information statements in the first year and \$0.185 for each such set of proxy materials or information statements in the second year following December 28, 1986 under paragraphs (b)(2) and (b)(3) of Rule 14b-1. While Rule 14b-1(c)(3) still refers to a permissible surcharge, it would appear that no such surcharge could be imposed now since the two--year period referred to has passed.

(n98)Footnote 98. 17 C.F.R. § 240.14b-2.

(n99)Footnote 99. As used in Rule 14b-2, "banks" is a collective reference to banks, associations and other entities that exercise fiduciary powers. *See* Rule 14b-2(a)(1).

(n100)Footnote 100. Rule 14b-2(a)(2).

Unlike "beneficial owner" as used in other contexts of the federal securities laws, "beneficial owner" for purposes of Rule 14b-2 is established by reference only to the sole or shared voting power over the securities.

If more than one person shares voting power, the provisions of the instrument creating that voting power governs the question of whether consent to disclosure of beneficial owner information has been given. *See* Note 1 to Rule 14b-2(a)(2).

Furthermore, if more than one person shares voting power or if the instrument creating that voting power provides that such power shall be exercised by different persons depending on the nature of the corporate action involved, all persons entitled to exercise such power are deemed beneficial owners. However, only one of the beneficial owners needs to be designated among the beneficial owners to receive proxies or requests for voting instructions, other proxy soliciting material, information statements and annual reports to shareholders, if the person so designated assumes the obligation to disseminate in a timely manner such materials to the other beneficial owners. *See* Note 2 to Rule 14b-2(a)(2). Neither the Rule nor the Note specifies the manner in which the designated person would assume the responsibility to disseminate the materials to the other beneficial owners.

(n101)Footnote 101. "Respondent bank" is defined in Rule 14a-1(k). *See* n.66 *supra*.

(n102)Footnote 102. Rule 14b-2(b)(1)(ii)(A).

(n103)Footnote 103. Rule 14b-2(b)(1)(ii)(B).

A different rule applies with respect to customer accounts opened by a bank on or before December 28, 1986. For such accounts, the bank is obligated to provide the number of beneficial owners of the company's securities who have affirmatively consented to the disclosure of their names, addresses and securities positions.

(n104)Footnote 104. Rule 14b-2(b)(1)(ii)(C).

If a bank or a respondent bank has informed the company that one or more designated offices or departments are to receive inquiries from the company under Rule 14a-13(a) or Rule 14c-7(a), then "receipt" for purposes of the one--and seven-business day requirements of Rule 14b-2(b)(1)(i) and (ii) means receipt by such designated offices or departments.

(n105)Footnote 105. Rule 14b-2(b)(2)(i).

(n106)Footnote 106. Rule 14b-2(b)(3).

(n107)Footnote 107. Any such proxy must (i) indicate the number of securities held by the bank for such beneficial owner; (ii) bear the beneficial owner's account number or other form of identification, together with instructions as to the procedures to vote the securities; (iii) briefly state which other proxies, if any, are required to permit the shares to be voted under the terms of the instrument creating that voting power or applicable state law; and (iv) be accompanied by an envelope addressed to the company or its agent, if not provided by the company.

(n108)Footnote 108. For the purpose of requesting voting instructions, the company's form of proxy may be used provided such proxy is voted in accordance with the instructions received. In addition, the request must be accompanied by an envelope addressed to the record holder bank or respondent bank. *See* Rule 14b-2(b)(3)(ii).

(n109)Footnote 109. Rule 14b-2(b)(4)(i).

(n110)Footnote 110. Rule 14b-2(b)(4)(ii).

(n111)Footnote 111. Rule 14b-2(b)(4)(iii).

If the bank employs a designated agent to act on its behalf in performing the obligations imposed on it by Rule 14b-2(b)(4)(i) and (ii), the five business day time period for determining the date as of which the beneficial owner information is to be compiled is calculated from the date the designated agent receives the company's request. In complying with the company's request for beneficial owner information under Rule 14b-2(b)(4)(ii), a bank need only supply the company with the names, addresses and securities positions of affirmatively consenting and non-objecting beneficial owners. *See* Note 1 to Rule 14b-2(b)(4).

If the bank receives a request from a company less than five business days before the requested compilation date, that fact does not excuse the bank from providing the requested information. However, the information may be compiled as of a date that is no more than five business days after receipt and the bank must transmit the information within five business days after the compilation date. *See* Note 2 to Rule 14b-2(b)(4).

(n112)Footnote 112. The obligation of a bank to provide information in response to an inquiry from a company is different for customer accounts opened on or before December 28, 1986. *See* Rule 14b-2(b)(1)(ii)(B)(1) and Rule 14b-2(b)(4)(ii)(A).

(n113)Footnote 113. Rule 14b-2(b)(5).

A bank will be deemed to have made a "good faith effort to obtain affirmative consent to disclosure of beneficial ownership information" if the bank makes an inquiry: (a) phrased in neutral language explaining the purpose of the disclosure and the limitations on the company's use thereof; (b) either in at least one mailing separate from other account mailings or in repeated mailings; and (c) in a mailing that includes as an enclosure a return card, postage paid. Rule 14b-2(b)(5) does not prescribe the exclusive method for a bank to make such good faith effort; rather, it provides a safe harbor for banks which choose to follow it. However, the rule does not specify what is required for an inquiry to be "phrased in neutral language." Since Rule 14b-2(b)(5)(ii) does not specify the number of mailings required to constitute "repeated mailings," a bank wishing to rely on Rule 14b-2(b)(5) would be prudent in making a separate mailing.

(n114)Footnote 114. Rule 14b-2(c)(1)(i).

(n115)Footnote 115. Rule 14b-2(c)(1)(ii).

(n116)Footnote 116. Rule 14b-2(c)(2)(i).

(n117)Footnote 117. Under Rule 14a-13(c) and Rule 14c-7(c), a company has the right to mail its annual report to shareholders directly to the beneficial owners identified pursuant to Rule 14b-2.

(n118)Footnote 118. 17 C.F.R. § 240.14a-12(a) and (b).

(n119)Footnote 119. The terms "participant" and "participant in a solicitation" are defined in Instruction 3(a) to Item 4 of Schedule 14A to include the following:

- (1) The company;
- (2) Any director of the company and any nominee for whose election as a director proxies are solicited;
- (3) Any committee or group which solicits proxies, any member of such committee or group, and any person whether or not named as a member who, acting alone or with one or more other persons, directly or indirectly, takes the initiative or engages in organizing, directing or arranging for the financing of any such committee or group;
- (4) Any person who finances or joins with another to finance the solicitation of proxies, except persons who contribute not more than \$500 and who are not otherwise participants;
- (5) Any person who lends money or furnishes credit or enters into any other arrangement, pursuant to any contract or understanding with a participant, for the purposes of financing or otherwise inducing the purchase, sale, holding or voting of securities of the company by any participant or other person, in support of or in opposition to a participant; except that such terms do not include a bank or a broker or dealer who, in the ordinary course of business, lends money or executes orders for the purchase or sale of securities and who is not otherwise a participant; and
- (6) Any person who solicits proxies.

Instruction 3(b) to Item 4 of Schedule 14A excludes from the terms "participant" and "participant in a solicitation" the following persons:

- (1) Any person or organization retained or employed by a participant to solicit shareholders and whose

activities are limited to the duties required to be performed in the course of such employment;

(2) Any person who merely transmits proxy soliciting material or performs other ministerial or clerical duties;

(3) Any person employed by a participant in the capacity of attorney, accountant or advertising, public relations or financial adviser, and whose activities are limited to the duties required to be performed in the course of such employment;

(4) Any person regularly employed as an officer or employee of the company or any of its subsidiaries and who is not otherwise a participant; or

(5) Any officer or director of, or any person regularly employed by, any other participant, if such officer, director or employee is otherwise a participant.

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.03

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.03 Annual Report to Shareholders--Rule 14a-3(b); Smaller Reporting Companies

If the proxy solicitation is made on behalf of the issuer for the annual meeting involving election of directors, the material must be preceded or accompanied by n1 an annual report containing certain financial data. n2 Financial statements must be audited unless the corresponding statements included in the company's annual report filed or to be filed with the Commission for the same fiscal years are not required to be audited. n3 The annual report to shareholders, other than small business issuers and registered investment companies, must include the following financial information:

- audited balance sheets as of the end of the two most recent fiscal years and audited statements of income and cash flows for each of the three most recent fiscal years n4 prepared in accordance with Regulation S-X, n5 for the company and its subsidiaries on a consolidated basis;
- supplementary financial information required by Item 302 of Regulation S-K; n6
- information on changes in the disagreements between the company and its accountants concerning accounting and financial disclosure required by Item 304 of Regulation S-K; n7
- selected financial data required by Item 301 of Regulation S-K; n8
- management's discussion and analysis of financial condition and results of operations required by Item 303 of Regulation S-K; n9 and
- the quantitative and qualitative disclosures about market risk required by Item 305 of Regulation S-K. n10

The annual report to shareholders is also required to include the following information:

- a brief description of the general nature and scope of the business of the company and its subsidiaries during the most recent fiscal year; n11

- the company's industry segments, classes of similar products or services, foreign and domestic operations and export sales required by Item 101(b), (c)(1)(i) and (d) of Regulation S-K; n12
- the identity of each of the company's directors and executive officers, the principal occupation or employment of each director or executive officer, and the name and principal business of the organization by which such person is employed; n13 and
- the market price of and dividends on the company's common equity and related shareholder matters required by Item 201 of Regulation S-K. If the report precedes or accompanies a proxy statement or information statement relating to an annual meeting of security holders at which directors are to be elected (or a special meeting or written consents in lieu of such meeting), the performance graph required by Item 201(e) of Regulation S-K. n14

The Commission has provided less stringent disclosure requirements for "smaller reporting companies" (previously referred to as "small business issuers") n15 and changed the eligibility requirements to less than \$75,000,000.00 in public common equity float; where companies cannot calculate that float, eligibility will be based on whether the company had annual revenues of less than \$50,000,000.00 in their last fiscal year. The effect of the amendments is to make the reduced disclosure requirements for smaller companies available to a broader range of companies. The Commission has rescinded Regulation S-B and transferred to disclosure requirements applicable to "smaller reporting companies" to Regulation S-K. n16

Amended Regulation S-K will allow smaller reporting companies to:

- Provide three years rather than five years of business development activities, and not be required to provide segment disclosure under amended Item 101 of Regulation S-K;
- Not provide disclosure required by Items 301 and 302 relating to selected financial data and supplementary financial information;
- Provide more streamlined disclosure for management's discussion and analysis of financial condition and results of operations found in Item 303 by requiring only two years of analysis if the company is presenting only two years of financial statements, instead of the three years currently required of larger companies;
- Provide audited balance sheets, audited statements of income, cash flows and changes in stockholders' equity for each of the last two fiscal years in new Article 8 of Regulation S-X instead of an audited balance sheet as of the end of the last two fiscal years and audited statement of income, cash flows and changes in stockholders' equity for each of the last three fiscal years as required by other parts of Regulation S-X;
- Provide disclosure about the chief executive officer and two other highly compensated executive officers only, rather than the information for the Chief Executive Officer, Chief Financial Officer and three other executive officers required of larger registrants;
- Not provide a Compensation Discussion and Analysis required of larger reporting companies;
- Provide only three of the seven tables (Summary Compensation, Outstanding Equity Awards, and Director Compensation) required of larger reporting companies.

Smaller reporting companies will not be required to provide disclosure regarding the company's policies and procedures for approving related person transactions. They will be required, however, to provide disclosure regarding a transaction where the amount exceeds the lesser of 1% of a smaller company's total assets or \$120,000. They also will be required to provide additional specific information about underwriting discounts and commissions and corporate parents. Additionally, smaller reporting companies will be required to provide disclosure regarding promoters and certain control persons.

Either the company's proxy statement or its annual report to shareholders n17 must contain an undertaking in bold face or other reasonably prominent type face that the company will, upon written request, provide without charge to each person solicited a copy of the company's annual report filed with the Commission on Form 10-K n18 for the most recent fiscal year, including financial statements and financial statement schedules, as well as the name and address of the person to whom written requests are to be directed. n19 The request must contain a good faith representation that, as of the record date for the annual meeting, the person making the request was the beneficial owner of securities entitled to vote at the meeting. n20 If the company prepares an annual report to shareholders that meets all of the disclosure requirements of Form 10-K and files it with the Commission in satisfaction of its Form 10-K filing requirements, n21 the company is not also required to supply a Form 10-K to requesting shareholders who receive a copy of the integrated annual report to shareholders. n22

If the company is a registered investment company, the requirements of Rule 14a-3(b) are substantially different. A registered investment company's annual report need contain only the information required under Rule 14a-3(b)(1) (financial information), Rule 14a-3(b)(3) (supplementary financial information) and Rule 14a-3(b)(4) (information concerning changes in and disagreements with accountants on accounting and financial disclosure). For registered investment companies, the financial statements required by Rule 14a-3(b)(1) are financial statements only for the last fiscal year except for statements of changes in net assets, which are to be filed for the two most recent fiscal years. n23

The annual report to shareholders may be in any form deemed suitable by management. The information required by Rule 14a-3(b)(5) through (b)(10) may be included in an appendix or other separate section of the annual report as long as the attention of shareholders is called to that presentation. n24 Companies are encouraged to use tables, schedules, charts and graphic illustrations to present financial information in an understandable manner. Any presentation of financial information, however, must be consistent with the data in the financial statements contained in the annual report to shareholders, with cross-references to the financial statements and notes where appropriate. n25

The provisions of Rule 14a-3(b) are not applicable to company solicitations made before the financial statements are available if: (i) a solicitation is being made at the time in opposition to management; and (ii) the company's proxy statement includes an undertaking in bold face type to furnish the annual report to shareholders to all persons being solicited at least 20 days before the meeting. n26

If the company knows that securities of any class entitled to vote at a meeting are held of record by a broker, dealer, bank, voting trustee, other fiduciary or nominee, the company must inquire of the record holder, at least 20 business days prior to the record date for the meeting or such later time as the rules of the exchange on which the class of securities is listed may permit for good cause shown, whether other persons are the beneficial owners. If there are other beneficial owners, the inquiry must request information as to the number of copies of the proxy and other soliciting material, including an annual report to shareholders, necessary to supply these documents to the beneficial owners of the securities. n27 The company is then required to supply as many copies as are needed and to pay the record holder's reasonable mailing expenses. n28

In SEC Releases 33-7766 and 33-7912, the Commission adopted amendments to Rule 14a-3 to permit the delivery by issuers and brokers of one annual report and proxy statement (or information statement) to investors who share an address, (referred to by the Commission as "householding"), subject to receipt of express consent, or alternatively, implied consent subject to four conditions:

- (1) the investors must have the same last name, or the person relying on the rule must reasonably believe they are members of the same family;
- (2) at least sixty (60) days before householding begins, each investor must have received written notice (in plain English) with an opportunity to respond regarding the proposed householding, with a statement in bold face type: **"Important Notice Regarding Delivery of Security Holder Documents"** or similar statement, with a toll free telephone number disclosed in the notice, or a reply form accompanying the notice to object to householding;
- (3) the investors must not opt out of householding during this sixty (60) day period; and
- (4) the person relying on the rule must deliver the material to a residential street address or a post office box. n29

Companies which household must also include in their proxy statement or information statement:

- a statement that only one copy is being delivered to the household absent contrary instruction;
- a phone number and mailing address of a point of contact for canceling the householding;
- instructions on how to elect householding; and
- an undertaking to provide an additional copy of the annual report, proxy statement or information statement on request to any security holder who did not receive it.

Separate proxy cards must still be provided to each security holder.

Unless state law requires otherwise, a company is not required to send an annual report or proxy statement to a shareholder if either (i) a proxy statement and an annual report for two consecutive annual meetings, or (ii) all (but at least two) dividend or interest checks during a 12-month period, have been mailed to the shareholder's address and returned undelivered. n30

Seven copies of the annual report to shareholders must be mailed to the Commission when the report is first sent or given to shareholders, or when the preliminary proxy material (or definitive material if preliminary proxy material was not filed) is filed with the Commission pursuant to Rule 14a-6, n31 whichever is later. **The annual report to shareholders is filed for information purposes only and is not a part of the solicitation material. Its contents are not subject to the liability provisions of Section 18 of the Exchange Act, unless the company specifically requests that the annual report be treated as part of the proxy solicitation material or incorporates it in the proxy statement or other report by reference.** n32

FOOTNOTES:

(n1)Footnote 1. It is improper to send the proxy statement by first-class mail and the annual report by fourth-class mail. Sec. Exch. Act Rel. No. 34-7078, Fed. Sec. L. Rep. (CCH) P 24,103 (1963).

See also Ash v. GAF Corp., Fed. Sec. L. Rep. (CCH) P 99,591 (3d Cir. 1983), where, citing the construction given Rule 14a-3(b) by the Commission as well as the rule's purpose and legislative history, the Third Circuit, unlike the district court, held that the mailing of an annual report by third class mail, a few days before sending proxy materials by first class mail, violated Rule 14a-3(b) since it did not reasonably guarantee that the annual report would "accompany or precede" the proxy material. However, the court stated that as a prerequisite to recovery in an action brought under

Section 14(a) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F for violation of Rule 14a-3(b), there must be proof of a violation, injury and a causal connection. In this case, appellant failed to prove that the annual report's late arrival damaged anyone's fundamental right to vote. In fact, there was evidence that appellant never voted at all. Furthermore, there was no proof that the integrity of the uncontested election was impaired by the improper mailing procedure. Rule 14a-3(b)(2)(ii) provides that where the annual report is delivered through an electronic medium, legibility requirements applicable to printed documents, such as type size and fonts, may be satisfied by presenting all information "in a format readily communicated to investors." Similar provisions apply to proxy statements (Rule 14a-5(d)(2)), and information statements (Rule 14c-4(d)).

(n2)Footnote 2. Rule 14a-3(b)(1) under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G.

As to annual meetings for which proxies are not solicited by management (in which case an information statement must be provided), Rule 14c-3 contains substantially the same requirements for furnishing annual reports to shareholders before or at the time the information statement is furnished. *See § 7.06 infra*.

(n3)Footnote 3. Rule 14a-3(b)(1).

(n4)Footnote 4. If a company other than a registered investment company has changed its fiscal year end, financial statements for two years plus a period of nine to twelve months will satisfy the three-year requirement for statements of income and cash flows. Note 2 to Rule 14a-3.

(n5)Footnote 5. 17 C.F.R. Part 210.

The provisions of Article 3 (General Instructions as to Financial Statements), other than Rules 3-03(e), 3-04 and 3-20, and Article 11 (Pro Forma Financial Information) of Regulation S-X are not applicable. Rule 14a-3(b)(1).

A separate report of predecessor accountants about financial statements for any period prior to the most recently completed fiscal year that were examined by them may be omitted from the annual report to shareholders if the company obtains a reissued report for the prior period from the predecessor accountants and the successor accountant states:

- (a) that the financial statements for the prior period were examined by the predecessor accountants;
- (b) the date of the predecessor accountants' report;
- (c) the type of opinion expressed by the predecessor accountants; and
- (d) the reasons for the opinion, if it was not unqualified.

However, the separate report of the predecessor accountant must be filed with the Commission as a financial statement schedule in the company's Form 10-K.

Note 1 to Rule 14a-3(b)(1).

For discussion of Regulation S-X, *see § 4A.01[3][a] supra*.

(n6)Footnote 6. Rule 14a-3(b)(3).

Item 302 of Regulation S-K, reprinted in the Primary Law Sourcebook, Volume D, Section K, "Supplementary

financial information" is discussed in § 4.03[4][b] *supra*.

(n7)Footnote 7. Rule 14a-3(b)(4).

Item 304 of Regulation S-K, "Changes in and disagreements with accountants on accounting and financial disclosure," is discussed in § 4.03[4][d] *supra*.

Disclosure of information concerning changes in and disagreements with accountants on accounting and financial disclosure is not required in an annual report to shareholders prepared in accordance with Rule 14a-3(b) if such information has been previously filed within the meaning of Rule 12b-2. Notwithstanding this general rule, the information required by Item 304(a) of Regulation S-K must be included in proxy material used in connection with a meeting of shareholders at which directors are to be elected or the selection of the company's accountants is to be approved or ratified. See Item 9 of Schedule 14A and Instruction 1 to Item 304 of Regulation S-K.

(n8)Footnote 8. Rule 14a-3(b)(5)(i).

Item 301 of Regulation S-K, "Selected financial data," is discussed in § 4.03[4][a] *supra*.

(n9)Footnote 9. Rule 14a-3(b)(5)(ii).

Item 303 of Regulation S-K, "Management's discussion and analysis of financial condition and results of operations," is discussed in § 4.03[4][c] *supra*.

(n10)Footnote 10. Rule 14a-3(b)(5)(iii).

(n11)Footnote 11. Rule 14a-3(b)(6).

Unlike other parts of Rule 14a-3(b) which refer specifically to corresponding disclosures required under Regulation S-K, Rule 14a-3(b)(6) does not specifically require a narrative description of the company's business which would provide the information required by Item 101(c)(1) of Regulation S-K.

(n12)Footnote 12. Rule 14a-3(b)(7).

Item 101(b), "Financial information about industry segments," (c)(1)(i), "Narrative description of business," and (d) "Financial information about foreign and domestic operations and export sales," of Regulation S-K is discussed in § 4.03[2][a][ii]-[iv] *supra*.

(n13)Footnote 13. Rule 14a-3(b)(8).

The phrase "executive officer" means the president, any vice president in charge of a principal business function, *e.g.*, sales, administration or finance, and any other officer who performs a policy-making function for the company. For these purposes, executive officers of a subsidiary may be deemed executive officers of the company if they perform policy-making functions for the company. Rule 3b-7.

(n14)Footnote 14. Rule 14a-3(b)(9).

Item 201 of Regulation S-K, "Market price of and dividends on the registrant's common equity and related stockholder matters," is discussed in § 4.03[3][a] *supra*.

(n15)Footnote 15. SEC Releases 33-8876, 34-56994 "Smaller Reporting Company Regulatory Relief and Simplification" (effective February 4, 2008).

(n16)Footnote 16. Item 10(f)(1) of Regulation 5-k.

(n17)Footnote 17. Many companies choose to include this undertaking in their proxy statement instead of their annual report to shareholders.

(n18)Footnote 18. The annual report on Form 10-K is discussed in § 4.02[1] *supra*.

(n19)Footnote 19. Rule 14a-3(b)(10).

The company is not required to furnish without charge copies of all exhibits to its Form 10-K if the annual report furnished to shareholders is accompanied by a list of all the exhibits not contained therein and the company indicates that it will furnish any exhibit upon payment of its reasonable expenses in providing the exhibit. *Id.*

(n20)Footnote 20. Note to Rule 14a-3(b)(10).

(n21)Footnote 21. An annual report to shareholders prepared on an integrated basis pursuant to General Instruction H to Form 10-K may be furnished in response to Rule 14a-3. Responses to items on Form 10-K are subject to the liability provisions of Section 18 notwithstanding the provisions of Rule 14a-3(c). Rule 14a-3(d). A company may combine and file annual reports to shareholders with the required information of Form 10-K if: (i) the combined report contains complete answers to all items required by Form 10-K; and (ii) the cover page and required signatures of the Form 10-K are included.

Electronic filers are instructed to file electronically only the portions of the integrated report which are filed in satisfaction of the requirements of the Form 10-K. General Instruction H to Form 10-K.

Section 18(a), discussed in § 5.03 *supra*, imposes civil liability for false or misleading statements contained in any application, report or document filed with the Commission pursuant to the Exchange Act.

(n22)Footnote 22. Rule 14a-3(b)(10).

(n23)Footnote 23. Rule 14a-3(b)(1) and (12).

(n24)Footnote 24. Rule 14a-3(b)(11).

(n25)Footnote 25. Note to Rule 14a-3(b)(11).

(n26)Footnote 26. Rule 14a-3(b)(13).

(n27)Footnote 27. Rule 14a-13, discussed in § 7.02[3] *supra*.

Note that the inquiry must be made a specified time prior to the record date, not the date of the shareholders' meeting. Also note that this requirement is based on business days rather than calendar days.

The company must also inquire of registered clearing agencies and thereafter of participants in such clearing agency whether the agencies or their participants hold securities for any beneficial owner, and, if so, to furnish them the appropriate proxy solicitation materials and annual reports pursuant to Rule 14a-13. Note 1 to Rule 14a-13.

The inquiry must be made by first-class mail or other equally prompt means; companies are exempt from the 20 business-day requirement in the case of special meetings where compliance is impracticable. *See* § 7.02[3] *supra*.

(n28)Footnote 28. Rule 14a-13(a)(4) and (5).

Companies are directed to the requirements of Rule 14b-1, discussed in § 7.02[3][b] *supra*, and applicable exchange rules for a discussion of the obligations of broker-dealers to obtain and promptly forward proxy solicitation materials and annual reports to beneficial owners for whom they hold securities.

(n29)Footnote 29. Rule 14a-3(e).

(n30)Footnote 30. Rule 14a-3(e)(2). A company's obligation to deliver annual reports or proxy statements is reinstated, however, if it obtains the shareholder's current address. *Id.*

(n31)Footnote 31. Rule 14a-6 is discussed in § 7.04[3] *infra*.

(n32)Footnote 32. Rule 14a-3(c)

For a discussion of the liability provisions of Section 18, *see* § 5.03 *supra*.

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.04

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.04 The Proxy Statement

The solicitation of proxies must be preceded or accompanied by a publicly-filed preliminary or definitive written proxy statement containing the information required by Schedule 14A. n1 Schedule 14A contains twenty-two items requiring disclosure of three categories of information: (i) information required regardless of the nature of the action to be taken at the shareholders' meeting; (ii) information required in connection with an annual meeting at which directors are to be elected; and (iii) information required only if specified proposals are to be voted upon by shareholders. The rules contain requirements as to the form of the proxy statement and its filing. The use in a proxy statement of a false or misleading statement with respect to a material fact or the omission of a material fact necessary to make such statement not false or misleading is prohibited.

[1] Content of Proxy Statement--Introduction

Solicitation of proxies is prohibited unless the person solicited has received a publicly-filed preliminary or definitive written proxy statement containing the information set forth in Schedule 14A. n2

The proxy statement must contain the information set forth in Schedule 14A. If a company (or other person) is not soliciting a proxy, reference should be made instead to Section 14(c) under the Exchange Act n3 and the regulations thereunder, which require preparation and dissemination of an information statement in lieu of a proxy statement. n4 Companies that meet the requirements of "smaller reporting companies" as defined in Item 10(f) of Regulation S-K n5 are subject to stringent disclosure requirements n6

Instead of including certain information in the proxy statement, a company may incorporate such information by reference to disclosures contained in other filings with the Commission but only to the extent specifically permitted by the items of Schedule 14A. n7 A company may not incorporate by reference a document that itself incorporates other material by reference or material that, if incorporated by reference, would render the proxy statement incomplete, unclear or confusing.

[2] Content of Proxy Statement--Schedule 14A

Schedule 14A is divided into 22 items; it is an integral part of the proxy rules. All information required by Schedule

14A must be included in the proxy statement, n8 unless incorporated by reference, although it is not necessary that the information appear in the order set forth in the schedule. n9 Information is required to be "clearly presented" and to be divided into groups according to subject matter. n10 Information that cannot be determined until some point in the future is permitted to be disclosed based upon present knowledge and intention. n11 The regulations also contain specific minimum requirements as to type size that must be used in the proxy statement, including any financial information. n12 All proxy statements are required to contain the date by which shareholder proposals for the next annual meeting are required to be received by the company for inclusion in its proxy statement for such meeting. n13 In addition, all proxy material is required to contain a statement of the date on which definitive copies have been or are intended to be released to shareholders. n14

It is not necessary to answer an item of Schedule 14A unless its subject matter is to be presented for a vote at the shareholders' meeting. n15 However, if an item to be voted upon also relates to the subject matter of a different item of Schedule 14A, disclosure under each of the items is required. n16 For example, in the case of a merger, often the transaction involves not only the merger but also the issuance of additional securities and perhaps also a charter amendment. In such case, disclosure under each of the applicable items of Schedule 14A would be required. In this example, disclosure under Item 11 (Authorization or Issuance of Securities Otherwise than for Exchange), Item 14 (Mergers, Consolidations, Acquisitions and Similar Matters) and Item 19 (Amendment of Charter, Bylaws or Other Documents) would be required.

The introductory Notes to Schedule 14A contain additional disclosure and other requirements applicable to proxy statements. If the proxy statement contains a shareholder proposal (i.e., a proposal by a party other than the company), the company is only required to include information with respect to its proposal (although it may choose to include disclosures required by items related to the shareholder's proposal). n17 In addition, the scope of information required about directors or executive officers of a company is also prescribed in the Notes to Schedule 14A. Note C requires that, except as otherwise specifically provided, information be given for all persons who held the applicable position with the company at any time during the period for which information is required to be disclosed in the proxy statement. Information may, however, be excluded for portions of the period during which the individual did not hold such position if the proxy statement so states.

The information to be included in a company's proxy statement can generally be divided into three categories: (i) information required regardless of the nature of the action to be taken at the shareholders' meeting; (ii) information required if action is to be taken regarding the election of directors (the typical annual meeting); and (iii) information required only if specified action is to be voted upon at the meeting.

Preliminary proxy materials, if required, must be filed with the Commission no later than 10 days prior to mailing definitive proxy materials to shareholders. Preliminary filing is not required if the only matters to be acted on are the election of directors; approval of accountants; a shareholder proposal; or the approval of a plan under Item 402 (a)(6)(ii) of Regulation S-K. n18 Companies which have obtained financial assistance from the Federal Government under the TARP program must submit to shareholders at each annual meeting a nonbinding proposal for approval of the company's executive compensation program; in such event, preliminary proxy materials with respect to such action must be filed with the Commission. n19

[a] General. Provisions--Cover Page; Items 1-6, 18, 20, 21. n20 Every proxy statement filed with the Commission is required to contain a cover page in the form specified in Schedule 14A. n21 The first six items of Schedule 14A are required regardless of the nature of the action to be taken at the shareholders' meeting. The items require a company to include in its proxy statement the information set forth below.

Item 1: the date, time and place of the shareholders' meeting, the address of the company's principal executive offices, the approximate date on which the proxy statement and proxy card are first distributed to shareholders and the date by which shareholder proposals intended to be presented at the next annual meeting must be received by the company for

inclusion in its proxy statement and form of proxy for such meeting;

Item 2: a statement as to the revocability of the proxy; n22

Item 3: a brief description of dissenters' appraisal rights if corporate action is proposed to be taken that would give rise to such rights, n23 and a statement as to whether a shareholder's failure to vote against the proposal constitutes a waiver of such rights (and whether a negative vote will be deemed to satisfy any state law notice requirements);

Item 4: disclosure in some detail of who is making the solicitation (*i.e.*, the company or participants in the solicitation), the manner in which it is being made and who is paying for it; n24

Item 5: disclosure of any substantial interest, by ownership of shares or otherwise, n25 of each person who has been a director or executive officer (including nominees) of the company, since the beginning of the last fiscal year, each participant in the solicitation and their associates, n26 in the matters to be acted upon at the meeting other than elections to office; n27

Item 6: (a) for each class of voting securities, a statement of the number of shares outstanding and the number of votes to which each class is entitled, n28

(b) the record date for the meeting, if any (or other criteria that is to determine the holders entitled to vote),

(c) if shareholders have cumulative voting rights with respect to the election of directors, a brief description of such rights, conditions precedent to the exercise thereof, and an indication whether discretionary authority to cumulate votes is being sought,

(d) the information required by Item 403 (security ownership of certain beneficial owners and management) of Regulation S-K, n29 to the extent known by the persons on whose behalf the solicitation is being made, and

(e) if a change in control of the company has occurred since the beginning of its last fiscal year, disclosure of the following: (i) the name of the person who acquired control; (ii) the amount and source of consideration used; (iii) the basis of control; (iv) the date and a description of the transaction resulting in the change of control; (v) the percentage of the voting securities of the company now beneficially owned by the person who acquired control; and (vi) the identity of the person from whom control was assumed. n30

Item 18 of Schedule 14A covers matters being presented at the meeting that are not required to be submitted to a vote of shareholders. If any such action is proposed to be taken, the proxy statement must state the nature of the matter, the reasons for submitting it to a vote and what action the company intends to take if the proposal is defeated.

Item 20 relates to any matter proposed to be submitted at the meeting that is not specifically covered by any of the other items of Schedule 14A. Disclosure of the substance of the matter must be in the same degree of detail as required by the other items of Schedule 14A.

Under Item 21, with respect to each matter submitted for shareholder action, the proxy statement must also include a statement of (i) the vote required for approval or election (other than approval of auditors), and (ii) the method by which votes will be counted, including the effect of abstentions and broker non-votes. n31

[b] Provisions Applicable to Annual Meetings--Items 7, 8 and 9.

The principal item of business conducted at annual meetings of shareholders is the election of directors. If action is to be taken regarding the election of directors, in addition to the information required by Items 1 through 6, 18, 20 and 21,

the disclosures required by Items 7, 8 and 9 of Schedule 14A must be included in the proxy statement.

[i] Item 7. Directors and Executive Officers. Item 7 requires disclosure of information about directors, n32 nominees for director n33 and executive officers. The information required to be disclosed includes their background and experience, transactions with the company and other business relationships involving the company, legal proceedings adverse to the company, and compliance with filing obligations under Section 16(a) under the Exchange Act. n34

Item 7 of Schedule 14A requires that the proxy statement contain the information required by Regulation S-K, n35 as follows:

- (1) Instruction 4 to Item 103 (Legal proceedings) of Regulation S-K with respect to directors and executive officers; n36
- (2) Item 401 (directors, officers, promoters and control persons). n37
- (3) Item 404(a) (transactions with related persons). n38
- (4) Item 404(b) (review, approval or ratification of transactions with related persons). n39
- (5) Item 405 (Compliance with Section 16(a) of the Exchange Act). n40
- (6) Item 407(a) Director Independence.
- (7) Item 407(b) Board meetings and committees.
- (8) Item 407(c) Nominating Committee.
- (9) Item 407(d) Audit Committee.
- (10) Item 407(e) Compensation Committee.
- (11) Item 407(f) Shareholder Communications.

In respect of registered investment companies, additional or different disclosure regarding directors and officers may be required. n41

Item 407(d) of Regulation S-K requires that the audit committee must state in the issuer's proxy statement whether it has (1) reviewed and discussed the audited financial statements with management; (2) discussed with the independent auditors the matters required to be discussed by Statement on Auditing Standards No. 61 as may be modified or supplemented; and (3) received certain disclosures and the letter from the auditors regarding the auditors' independence as required by the Independence Standards Board Standard No. 1, and discussed independence with the auditors. The audit committee must also state whether it has recommended to the board of directors that the audited financial statements be included in the company's annual report on 10-K. Companies would have to disclose whether their audit committee has adopted a written charter and if so to include a copy of it as an appendix to the proxy or information statement at least once every three years. Companies quoted on NASDAQ or listed on the American or New York Stock Exchanges would disclose in their proxy statements certain information regarding any director on the audit committee who is not "independent" as defined in the applicable listing standards (small business issuers would not be required to comply with this requirement). Companies which do not have a separately designated audit committee, or a committee performing similar functions, must provide such information with respect to every member of its board of directors. If

the board of directors decides to appoint a director to the audit committee who is not independent because of exceptional or limited or similar circumstances, the company must disclose the nature of the relationship that makes that individual not independent and the reasons for the board's determination. n42 All other companies, including small business issuers, must disclose whether the members are independent within the definition of the listing standards of the NASD, AMEX or NYSE. The rule creates "safe harbors" for the information required to be disclosed. The name of each member of the Audit Committee (or, in the absence of an audit committee, the board committee performing equivalent functions or the entire board of directors) must appear below the disclosure required by this item.

In *Girard v. Krug International Corp.*, n43 Krug refused to include plaintiff's nominees for Krug's board of directors in its proxy statement on two grounds: (1) notice of nomination did not comply with Krug's Code of Regulations governing nominations to the board, and (2) the notice constituted an "election-related" proposal excludible under the SEC's proxy rules. The district court ruled in plaintiff's favor and issued a temporary injunction against the use of the proxy material on the dual ground that the notice of nomination substantially complied with Krug's Code of Regulations and that failure to include plaintiff's nominees violated Section 14(a) of the Exchange Act. The appeals court reversed, holding that the board's determination that plaintiff's proposal failed to meet the requirements of the Code of Regulations was protected by Ohio's business judgment rule; it therefore determined that it was unnecessary to address the issue of the excludability of the proposal as a "shareholder proposal" but noted that the company would be obligated to comply with the proxy rules including notifying plaintiff of any problems with the proposal, affording an opportunity to correct any defects (unless they are incurable) and filing any reasons for exclusion of the proposal with the SEC.

The Commission has relocated from paragraph (d)(2) of Item 7 to Item 407(c) of Schedule S-K extensive disclosure requirements regarding the nomination process for the election of directors. n44 The rule provides that the issuer state whether it has a standing nominating committee or a committee performing a similar function, and if not, the proxy statement must state specifically why the board of directors deems it appropriate not to have such committee and identify each director who participates in the consideration of director nominees. If the board has a standing nominating committee, the proxy statement must provide the following information:

- (A) If the committee has a charter, describe its material terms and state whether a current copy is available on the company's website; if not available on the website, attach it as an appendix to the proxy statement at least once every three years, and if not attached, state the last year that it was attached;
- (B) If it has no charter, so state;
- (C) If listed on a national securities exchange or NASDAQ, disclose whether the members of the nominating committee are independent as defined in the independence requirements of the applicable listing standards;
- (D) If not a listed company, disclose whether the members of the nominating committee are independent, using a definition set forth in the listing standards of a national securities exchange or NASDAQ, consistent with the standards used for the audit committee of such company;
- (E) If there is a policy to consider candidates recommended by security holders, describe its material terms, including a statement whether the committee will consider candidates recommended by security holders.
- (F) If the issuer has no such policy, state that fact and the basis for the board's view that it is appropriate for the company not to have such a policy;
- (G) If the committee will consider candidates recommended by security holders, describe the procedures to be followed;
- (H) Describe the specific minimum qualifications that the committee feels must be met by a committee-nominated candidate, stating the specific qualities or skills the committee feels are necessary for one or more of the directors to

possess;

(I) Describe the committee's process for identifying and evaluating nominees, including nominees recommended by security holders, and any difference between that process and the process for the committee's own nominees;

(J) For each nominee (other than nominees who are executive officers or directors for re-election) approved by the committee for inclusion on the proxy card, a statement as to which one or more of the following recommended the nominee: security holder, non-management director, CEO, other executive officer, third-party search firm, or other specified source; n45

(K) If any fee is paid to a third party to find or evaluate or assist in finding or evaluating potential nominees, disclose the function performed by each such third party; n46

(L) If at least 120 days prior to release of the proxy statement for the prior year's meeting, the company received a recommended nominee from a holder or group of holders of more than 5% of the voting stock beneficially owned at least one year, identify the candidate and the security holders who recommended him or her and whether the committee chose to name the candidate as a nominee (subject to consent of such parties). n47

Any material changes to the company's nominating procedures should be reported on Forms 10Q or 10K. n48

The Commission has revised paragraph (14) of Item 22 (applicable to registered investment companies) to require funds to specifically identify any separately designated audit committee and nominating committee in addition to any other standing committees of the fund's board of directors, stating, in the case of a nominating committee, whether or not the members of that committee are "interested persons" of the fund as defined in § 2(a)(19) of the Investment Company Act of 1940. The Commission has deleted subparagraph (iv) of paragraph (b)(14) requiring a statement of whether the nominating or similar committee will consider nominees recommended by security holders and, if so, the procedures to be followed. n49

As directed by the Sarbanes-Oxley Act of 2002, the Commission on April 25, 2003 adopted a new rule 10a-3 and amendments to Item 7 and 22 of Schedule 14A to require that each member of a registrant's audit committee be independent in accordance with specified criteria (subject to exemptions therein noted); that the audit committee must be directly responsible for the appointment, compensation, retention and oversight of the work of any registered public accounting firm engaged for the purpose of auditing; that such accounting firm must report directly to the audit committee; and that the audit committee must establish procedures for the receipt, retention and treatment of complaints regarding accounting, internal accounting controls and other auditing matters, including procedures for handling confidential anonymous submissions by employees regarding questionable accounting or auditing matters; each audit committee must have the authority to engage independent counsel and other advisors as is determined necessary; and the registrant must provide appropriate funding for the audit committee.

Item 407(b) of Schedule S-K also requires information about committee meetings and director attendance. Item 407(b)(1) requires disclosure of the total number of meetings (both regular and special) of the board of directors held during the last full fiscal year and requires disclosure of any director who attended fewer than 75 percent of the aggregate number of meetings of the board and of the committees of the board on which that director served.

The Company must describe its policy, if any, with regard to Board members' attendance at annual meetings of security holders, stating the number of Board members who attended the prior year's annual meeting, either in the proxy statement or on the Company's website. n50

[ii] Item 8. Compensation of Directors and Executive Officers. Item 8 of Schedule 14A requires disclosure of the information set forth in Item 402 (Executive compensation) of Regulation S-K. n51 This information must be

furnished if action is to be taken concerning:

- the election of directors;
 - any bonus, profit-sharing or other compensation plan, contract or arrangement in which any director, nominee for election as a director, or executive officer of the company will participate;
 - any pension or retirement plan in which any person listed in the preceding paragraph will participate;
- or
- the grant or extension to any director, nominee for election as a director, or executive officer of the company of any options, warrants or rights to purchase any securities (other than if issued to shareholders on a pro rata basis).

In the case of non-issuer solicitations, the information in response to Item 8 of Schedule 14A need only be furnished for nominees (and their associates) of the persons making the solicitation. n52

In lieu of the information required by Item 402 of Regulation S-K with respect to compensation of directors and executive officers, registered investment companies must instead furnish the information required by Item 22(b)(13) of Schedule 14A. n53

New executive compensation standards are mandated by the American Recovery and Reinvestment Act of 2009 ("ARRA") n54 for companies which have accepted financial assistance from the Federal Government under the TARP program. n55 These mandated standards include:

1. limiting compensation of senior executive officers ("SEO"s) to exclude incentives to take unnecessary and excessive risks;
2. recovery of any bonus, retentions award or incentive compensation paid to an SEO or any of the next 20 most highly compensated employees if based on published earnings, revenues, gains or other criteria later found to be materially inaccurate (the "clawback" requirement);
3. prohibiting golden parachutes to an SEO or any of the next five most highly compensated employees, i.e. *any* payment to an SEO leaving a company for *any* reason except payments for services performed or benefits accrued;
4. prohibiting payment of bonuses, retention awards or incentive compensation except payment of long-term restricted stock that (a), doesn't fully vest until the end of the company's TARP obligation period, (b) does not exceed 1/3 of the recipient's annual salary, and (c) is subject to any other terms the Secretary of the Treasury may impose.

Lesser requirements apply to companies accepting less than \$500 million in TARP assistance. Also, the restrictions do not apply to any written employment contracts executed on or before February 11, 2009.

TARP recipients must establish a Board Compensation Committee of independent directors to review employee compensation plans for compliance with TARP standards (if the company is not registered with the SEC and has received less than \$25 million in TARP assistance, the full Board may make such reviews).

A nonbinding shareholder vote on executive compensation (commonly called "say on pay") is required of all TARP participants.

[iii] Item 9. Independent Public Accountants. Information in response to Item 9, independent public accountants, must be included in a proxy statement when a solicitation is made on behalf of the company and relates to the election of directors or the election, approval or ratification of the company's accountant. n56 Disclosure of information describing the company's relationship with its independent accountant is required.

Item 9(a) requires disclosure of the name of the principal accountant selected or being recommended to shareholders for election, approval or ratification for the current year or, if none has been selected, a brief statement of the reasons why no selection was made. n57 The name of the principal accountant for the prior fiscal year must be disclosed if it is different from the accountant selected or being recommended for the current year or if no accountant has yet been so selected or recommended. Proxy statements are required to disclose whether or not representatives of the principal accountants for both the current year and the most recently completed fiscal year will be present at the shareholders' meeting, and whether or not they will have an opportunity to make a statement and be available to respond to appropriate questions by shareholders. n58

Item 9(d) requires that if a change in accountants has occurred during the company's two most recent fiscal years (or any subsequent interim period), the company must provide the information required by Item 304(a) (Changes in and disagreements with accountants on accounting and financial disclosure) of Regulation S-K. n59

Item 9(e) requires the disclosure of aggregate fees billed in each of the last two fiscal years for (1) Audit Fees, (2) Audit-related Fees, not recorded under Audit Fees, with a description of the nature of the services, (3) Tax Fees (Tax Compliance, Tax Advice and Tax Planning, with a description of the nature of the services), (4) All Other Fees (describing the nature of the services). The company must disclose the Audit Committee's pre-approval policies and procedures, the percentage of services described in each of the above categories that were approved by the Audit Committee, the percentage of hours spent on the principal accountants engagement by other than full-time permanent employees, if greater than 50%, if the company is an investment company, disclosed the aggregate non-audit fees billed to the company's investment advisor and state whether the audit committee has considered whether such payments are compatible with maintaining the principal accountant's independence. n60

[c] Provisions Governing Specific Proposals--Items 10-17, 19.

In addition to the general information required to be included in all proxy statements, Items 10-17 and Item 19 require additional disclosure to be included in a company's proxy statement but only if the action specified in such items is to be voted on at the meeting.

[i] Item 10. Compensation Plans. The information required to be disclosed under Item 10 of Schedule 14A is required if action is proposed to be taken regarding any plan n61 under which cash or noncash compensation may be paid. Item 10(a) is applicable to all plans; Item 10(b) applies to specified types of plans. n62

Item 10(a) requires the company to describe the material features of each plan being acted upon, to identify each class of persons who will be eligible to participate, and to state the approximate number of members of such class and the basis of their participation. n63 Item 10(a) requires the company to disclose, in the specified tabular format, the benefits or amounts that will be received or allocated under each plan being submitted for a vote of shareholders by:

- each of the persons named in the Summary Compensation Table; n64
- all current executive officers as a group;
- all current directors who are not executive officers, as a group; and
- all employees as a group (including current officers who are not executive officers).

If the benefits or amounts cannot be determined, the company must state the benefits or amounts that would have been received or allocated for the company's last fiscal year, had the plan been in effect. n65

If the plan can be amended without shareholder action to increase the cost thereof to the company or to change the allocation of benefits among the persons and groups identified in the table, then a description of the nature of any amendments that can be so made must be included. n66

Information is required to be disclosed under Item 10(b)(1) of Schedule 14A with respect to any pension or retirement plan submitted for shareholder action. With respect to pension or retirement plans, Item 10(b)(1) requires that the proxy statement state the approximate amount necessary to fund the plan with respect to past services, the period over which the amount must be paid and the estimated annual payments required to pay such amount and the estimated annual payment to be made with respect to current services. n67

Item 10(b)(2) applies to a grant or plan submitted for shareholder action involving options, warrants or rights and requires the proxy statement to state:

- the title and amount of securities underlying the options, warrants or rights;
- the prices, expiration dates and other material conditions upon which they may be exercised;
- the consideration received or to be received by the company (or a subsidiary) for the granting or extension of the options, warrants or rights;
- the market value of the underlying securities as of the latest practicable date; and
- in the case of options, the federal income tax consequences of the issuance and exercise thereof, both to the company and to the optionees. n68

The proxy statement must also separately state, if determinable, the number of options received or to be received by: (i) the individuals named in the Summary Compensation Table; (ii) all current executive officers as a group; (iii) all current directors who are not executive officers, as a group; (iv) each nominee for election as a director; (v) associates of any such directors, executive officers or nominees; (vi) other persons who received or will receive five percent of the warrants, rights or options covered by the plan; and (vii) all employees as a group (including current officers who are not executive officers). n69

Item 10(c) applies to plans and other arrangements *not* subject to security holder action, n70 and requires registrants to furnish the information called for by Item 201(d) of Regulation S-K. n71

If information must be included in a proxy statement in response to Item 10, the company is subject to certain additional procedural requirements. At the time definitive proxy material is filed with the Commission, n72 three copies of the plan to be acted upon must be filed with the Commission if the plan is set forth in a written document. n73 In addition, the Commission should be informed on a supplemental basis when the proxy statement is first filed as to when the options, rights or warrants (and the shares called for thereby) will be registered under the Securities Act or, if such registration is not contemplated, the section of the Securities Act or the rule of the Commission under which exemption from registration is claimed and the facts relied upon to make the exemption available. n74

The proper interpretation of the scope of Item 10 was at issue in *Seinfeld v. Gray*, n75 where Boeing Co. submitted to shareholders for approval a proposed compensation plan involving the granting of options which could be settled in cash as well as stock, which might greatly exceed the number of shares to be issued under the plan. The plan specified

the maximum number of shares that could be issued but did not specify the number of options that might be issued, an omission which the plaintiff claimed was materially misleading. The court held that Boeing had satisfied item 10 of Rule 14a-101 by specifying the maximum number of shares that could be issued on exercise of options granted under the plan and made clear in the proxy statement that the number of options which could be settled in cash as well as stock might greatly exceed the number of shares issued.

[ii] Items 11-17 and Item 19. The specific proposals covered by Items 11-17 and Item 19 are ones that can generally be classified as extraordinary corporate actions. The disclosure requirements are detailed and require a close review of any applicable item's provisions. The following is a summary of the proposals governed by Items 11-17 and Item 19; it is not a summary of the requirements of each respective provision.

Items 11 to 17 and Item 19 contain the disclosure requirements if action is to be taken with respect to:

Item 11: authorizing or issuing securities otherwise than for exchange;

Item 12: modifying or exchanging securities;

Item 13: financial and other information if action is to be taken requiring disclosure pursuant to Item 11 or 12 (in such event, the proxy statement is required to contain financial statements required by Regulation S-X, n76 supplementary financial information required by Item 302 of Regulation S-K, n77 management's discussion and analysis of financial condition and results of operations required by Item 303 of Regulation S-K, n78 and information on changes in and disagreements with accountants required by Item 304 of Regulation S-K); n79

Item 14: mergers, consolidations, acquisitions and similar transactions; n80

Item 15: acquiring or disposing of any property;

Item 16: restating any asset, capital or surplus account;

Item 17: any report of the company or of its directors, officers or committees or any minutes of meetings of its shareholders; and

Item 19: any amendment of the company's charter, bylaws or other documents as to which information is not required by the other items of Schedule 14A.

[iii] Disclosure Required of TARP Participants. The SEC has issued guidance to financial firms participating in the Capital Purchase

Program of TARP regarding required proxy statement disclosure concerning that participation, where shareholder approval will be required (SEC Staff Guidance, November 25, 2008).

They should disclose *inter alia*:

- why they are participating in the program
- the status of any application filed
- the material terms of securities and warrants to be issued to the Treasury Department
- how participation will affect common stockholders and holders of senior securities

- whether the Board must be expanded to include Treasury participation
- whether the company must register any securities issued to the Treasury for resale
- the impact of participation on its operations
- the impact on liquidity, capital resources or results of operations if the application is denied
- any revisions to outstanding contracts required in order to comply with restrictions on executive compensation
- a textual discussion of any material effect on its pro-forma financial statements
- discussion of any material effect upon net interest margin, net income available to common shares, and impact on earnings per share.

Further guidance states that a description regarding the above as well as any "Say on Pay" proposal mandated by the American Recovery and Investment Act of 2009 ("ARRA") must be included in any preliminary proxy material filed after February 17, 2009 the date ARRA was enacted into law. n81

[d] Provisions Applicable to Registered Investment Companies--Item 22.

Item 22 was added to Schedule 14A and prescribes specific information which needs to be included in a proxy statement or information statement filed by an investment company registered under the Investment Company Act of 1940.

As of July 2003, investment companies that invest in voting securities are obliged to disclose in their registration statements the policies and procedures they use to determine how to vote proxies relating to securities held in their portfolios. Where the fund has delegated voting responsibility to the investment advisor or other third party, such parties' proxy voting policies and procedures must be described in the fund's registration statement, or a copy of the policies and procedures themselves must be provided. n82

[i] General. Item 22(a)(3) specifies the information generally needed in a proxy statement for a registered investment company. The required information includes

- the name and address of the fund's investment adviser, principal underwriter and Administrator; n83
- if a fund proxy statement solicits a vote on proposals affecting more than one fund or class of securities of the fund (unless the proposal or proposals are the same and affect all fund or class shareholders), a summary of all of the proposals in tabular form indicating which fund or class shareholders are solicited with respect to each proposal; if this table is required, it must appear on one of the first three pages of the proxy statement; n84
- unless the proxy statement is accompanied by a copy of the fund's most recent annual report, a prominent statement that the fund will furnish, without charge, a copy of the annual report and the most recent semi-annual report succeeding the annual report, if any, upon request of a shareholder; n85
- if action is to be taken which would, directly or indirectly, establish a new fee or expense or increase any existing fee or expense to be paid by the fund or its shareholders, a table showing the current and pro

forma fees (with the required examples) using the format prescribed in the appropriate registration form under the Investment Company Act of 1940; n86

- if action is to be taken with respect to the election of directors or the approval of an advisory contract, a description of any purchases or sales of securities of the investment advisor or its Parents, n87 or Subsidiaries n88 of either, since the beginning of the most recently completed fiscal year by any director or nominee for election as a director of the fund. n89

If action is to be taken with respect to any transaction described in Items 11, 12 or 14 of Schedule 14A, a financial data schedule must be included as an exhibit to the proxy statement or information statement filed electronically. n90 If action is to be taken with respect to any transaction described in Item 12, and if the acquiring company or the acquired company is a registered investment company or a business development company as defined by § 2(a)(48) of the Investment Company Act of 1940, new Item 14(d) specifies the information to be included in the proxy statement for that company in lieu of the information specified by paragraph (c) of Item 14.

[iii] Election of Directors. If action is to be taken with respect to the election of directors of the fund, the proxy statement must in addition to the information required by paragraphs (d)(3), (f) and (g) of Item 7 of Schedule 14A: n91

- provide the information required by a table set forth in Item 22(b)(1). n92 If the solicitation is made by a person other than the fund or an investment advisor of the fund, information need only be provided as to the nominees of such person. Information with respect to directors who are or would be "interested persons" within the meaning of Section 2(a)(19) of the Investment Company Act of 1940 must be provided separately from persons who are not or would not be "interested persons," including supplying separate tables for each category. Information need not be given about any director whose term of office does not continue beyond the meeting for which the solicitation is made.

- for each individual listed in column 1 of the table referenced above (other than a person who is not an "interested person"), describe any positions, including as an officer, employee, director, or general partner, held with affiliated persons or principal underwriters of the fund. n93

- describe briefly any arrangement or understanding between any director, nominee for such, officer, or person chosen to become an officer and any other person (naming such person) pursuant to which he or she was or is to be selected as a director, nominee or officer. n94

- describe any positions held by a director or nominee for election as director who is not an "interested person" during the past five years with the fund, or with an investment company having the same investment advisor, principle underwriter, or Sponsoring Insurance Company as the fund, or with an investment advisor, principle underwriter, Sponsoring Insurance Company or affiliated person of the fund, or with any person directly or indirectly controlling, controlled by or under common control with any of such entities. n95

- provide a table showing the dollar range of the equity securities beneficially owned by the director or nominee in the fund and (on an aggregate basis) in any registered investment companies overseen or to be overseen by the director or nominee within the same family of investment companies as the fund, as of the most recent practicable date, specifying such date by footnote or otherwise. n96

- disclose for each director or nominee who is not an "interested person" of the fund a table of information as to each class of securities owned beneficially or of record in an investment advisor, principal underwriter or Sponsoring Insurance Company of the fund or an affiliate of such entities, as of the most recent practicable date (specifying such date) stating the name of the company, title of class,

value of securities and percent of class. n97

Beneficial ownership is determined under Rule 13d-3 or Rule 16a-1(a)(2) of the Exchange Act. The information required by Columns 5 and 6 should be provided for each director (or nominee) and his or her immediate family members.

- unless disclosed under the preceding paragraph, disclose any direct or indirect interest valued at more than \$120,000 of each director or nominee who is not an "interested person" of the fund, or an immediate family member of the director or nominee during the past five years in an investment advisor, principle underwriter, or Sponsoring Insurance Company of the fund or a person other than a registered investment company controlling, controlled by or under common control with any such entity. n98

- describe any direct or indirect interest of a director or nominee who is not an "interested person" of the fund in any transaction or series of similar transactions since the beginning of the last two completed fiscal years of the fund, or in any proposed transaction or series of transactions, involving more than \$120,000 where any of the following persons was or is to be a party: the fund; an officer of the fund; an investment company having the same investment advisor, principle underwriter or Sponsoring Insurance Company as the fund, or which controls, is controlled by or is under common control with any such entity; any officer of such an investment company, an investment advisor, principle underwriter or Sponsoring Insurance Company of the fund, or any officer of any such entity, or any person controlling, controlled by or under common control with any such person or an officer of any such person. n99

- describe briefly any direct or indirect relationship, involving more than \$120,000, of any director or nominee for a director who is not an "interested person" of the fund since the beginning of the last two completed fiscal years of the fund or currently exists or is proposed, with any of the persons specified in the previous item, including (i) payments for property or services to or from such persons, (ii) provision of legal services to any such person, (iii) provision of investment banking services to any such person other than as a participating underwriter in a syndicate, or (iv) any consulting or any other relationship substantially similar to the foregoing. State the amounts involved, including all periodic payments; disclose indirect as well as direct relationships; include interests of immediate family members in determining if the amount exceeds \$120,000; and in the case of an indirect interest, give the information specified by Instruction 7. Payments that involve the rendering of services as a common carrier or public utility at rates or charges fixed in conformity with law or governmental authority, or payments that arise solely from the ownership of securities in which no extra or special benefit is received or routine retail relationships may be excluded. n100

- if an officer of an investment advisor, principle underwriter or Sponsoring Insurance Company of a fund, or an officer of an affiliate of any such entity serves or has served since the beginning of the last two full fiscal years of the fund on the board of directors of a company where a director of the fund or nominee for election as director who is not or would not be an "interested person" of the fund or immediate family member is, or was, since the last two completed fiscal years of the fund, an officer, identify: the company; the individual who serves or has served as a director of the company in the period of service as a director; the investment advisor, principal underwriter or Sponsoring Insurance Company or affiliate thereof and the director of the fund nominee, or immediate family member who is or was an officer of the company; the office held; and the period of holding the office. n101

- provide in tabular form, to the extent practicable, the information required by Items 401(f) and (g), 404(a) and (c) and 405 of Regulation S-K. n102

- describe briefly any material pending legal proceedings, other than ordinary routine litigation

incidental to the fund's business, to which any director or nominee or affiliated person of such director or nominee is a party adverse to the fund or any of its affiliated persons or has a material interest adverse to the fund or any of its affiliated persons. n103

- for all directors and for each of the three highest-paid executive officers that have aggregate compensation from the fund for the most recently completed fiscal year in excess of \$60,000 ("Compensated Persons"), furnish the information required by a table as set forth in Item 22(b)(13) of Schedule 14A. n104

- state whether the fund has a separately designated audit committee, or if not, that the entire board of directors acts as the audit committee. Give the disclosure required by Section 240.10A-3(d) regarding any exemption claim from the listing standards for audit committees. Identify all other standing committees of the board of directors, providing for each a concise statement of its functions, the names of its members, the number of committee meetings held during the last fiscal year, and, if the committee is a nominating or similar committee, whether it will consider nominees recommended by security holders and, if so, the procedures to be followed in submitting recommendations. n105

[iii] Approval of Investment Advisory Contract. If action is to be taken with respect to an investment advisory contract, an investment company must include the following information in the proxy statement or information statement: n106

- Information with respect to the fund's existing investment advisory contract:

- the date of the contract and the date on which it was last submitted to a vote of security holders of the fund, including the purpose of such submission; n107

- a brief description of the terms of the contract, including the rate of compensation of the investment advisor; n108

- the aggregate amount of the investment advisor's fee and the amount and purpose of any other material payments by the fund to the investment advisor, or any affiliated person of the investment advisor, during the last fiscal year of the fund; n109

- if any person is acting as an investment advisor of the fund other than pursuant to a written contract that has been approved by the security holders of the fund, the person must be identified and the nature of the services and arrangements must be described; n110

- a description of any action taken with respect to the investment advisory contract since the beginning of the fund's last fiscal year by the board of directors of the fund (unless a description is provided in response to Item 22(c)(1)(vi)); n111 and

- if an investment advisory contract was terminated or not renewed for any reason, the fund must state the date of such termination or non-renewal, identify the parties involved and describe the circumstances of such termination or non-renewal. n112

- the name, address and principal occupation of the principal executive officer and each director or general partner of the investment advisor; n113

- the names and addresses of all Parents of the investment advisor and the basis of control of the

investment advisor and each Parent by its immediate Parent; n114

- if the investment advisor is a corporation and, if to the knowledge of the persons making the solicitation or the persons on whose behalf the solicitation is made, the identity of any person not named in response to Item 22(c)(3) of Schedule 14A, who owns, of record or beneficially, ten percent or more of the outstanding voting securities of the investment advisor, including the name and address of each such person; n115

- the name of each officer or director of the fund who is an officer, employee, director, general partner or shareholder of the investment advisor; n116

- a brief description and a statement of the approximate amount of, where practicable, any material interest, direct or indirect, of any director of the fund in any material transaction since the beginning of the most recently completed fiscal year, or in any material proposed transactions, to which the investment advisor of the fund, and Parent or Subsidiary of the investment advisor (other than another fund), or any Subsidiary of the Parent of such entities was or is to be a party; n117

- disclosure of any financial condition of the investment advisor that is reasonably likely to impair the financial ability of the advisor to fulfill its commitment to the fund under the proposed investment advisory contract; n118

- a description of the nature of the action to be taken on the investment advisory contract and the reasons therefor, the terms of the contract to be acted upon and, if the action is an amendment to, or a replacement of, an investment advisory contract, the material differences between the current and the proposed contract; n119

- if a change in the investment advisory fee is sought, the following information needs to be included in the proxy statement or the information statement: n120

- the aggregate amount of the investment advisor's fee during the last year; n121

- the amount that the advisor would have received had the proposed fee been in effect; n122 and

- the difference between the aggregate amounts stated in response to Item 22(c)(9)(i) and (ii) of Schedule 14A as a percentage of the amount stated in response to Item 22(c)(9)(i) of Schedule 14A; n123

- if the investment advisor acts as such with respect to any other investment company having a similar investment objective, the identity and size of such other investment company and the rate of the investment advisor's compensation; n124

- a discussion in reasonable detail of the material factors and the conclusions with respect thereto which form the basis for the recommendation of the board of directors that the shareholders approve an investment advisory contract and, if applicable, a discussion of any benefits derived or to be derived by the investment advisor from the relationship with the fund such as soft dollar arrangements by which brokers provide research to the fund or its investment advisor in return for allocating fund brokerage; n125

- a description of any arrangement or understanding made in connection with the proposed investment

advisory contract with respect to the composition of the board of directors of the fund or the investment advisor or with respect to the selection or appointment of any person to any office with either the fund or the investment advisor; n126

- for the most recently completed fiscal year, a statement of (i) the aggregate amount of commissions paid to any Affiliated Broker n127 and (ii) the percentage of the fund's aggregate brokerage commissions paid to any such Affiliated Broker; n128 and

- the amount of any fees paid by the fund to the investment advisor, its affiliated persons or any affiliated person of such person during the most recent fiscal year for services provided to the fund (other than under the investment advisory contract or for brokerage commissions) and a statement as to whether these services will continue to be provided after the investment advisory contract is approved. n129

[iv] Approval of Distribution Plan. If action is to be taken with respect to a Distribution Plan, n130 an investment company must include the following information in the proxy statement or information statement: n131

- a description of the nature of the action to be taken on the Distribution Plan and the reasons therefor, the terms of the Distribution Plan to be acted upon and, if the action is an amendment to, or a replacement, of a Distribution Plan, the material differences between the current and the proposed Distribution Plan; n132

- if the fund has a Distribution Plan in effect:

- the date that the Distribution Plan was adopted and the date of the last amendment, if any; n133

- the persons to whom payments may be made under the Distribution Plan, the rate of the distribution fee and the purposes for which such fee may be used; n134

- the amount of distribution fees paid by the fund pursuant to the plan during its most recent fiscal year, both in the aggregate and as a percentage of the fund's average net assets during the period; n135

- the name of, and the amount of any payments made under the Distribution Plan by the fund during its most recent fiscal year to any person who is an affiliated person of the fund, its investment adviser, principal underwriter or Administrator, an affiliated person of such person, or a person that during the most recent fiscal year received 10% or more of the aggregate amount paid under the Distribution Plan by the fund; n136

- a description of any action taken with respect to the Distribution Plan since the beginning of the fund's most recent fiscal year by the board of directors of the fund; n137 and

- if a Distribution Plan was or is to be terminated or not renewed for any reason, the date or prospective date of such termination or non-renewal, the identity of the parties involved and a description of the circumstances of such termination or non-renewal; n138

- a brief description and statement of the approximate amount of, where practicable, any material interest, direct or indirect, of any director or nominee for election as a director of the fund in any material transactions since the beginning of the most recently completed fiscal year, or in any material proposed

transactions, to which any person identified in response to Item 22(d)(2)(iv) of Schedule 14A was or is to be a party. n139 and

- a discussion in reasonable detail of the material factors and the conclusions with respect thereto which form the basis for the conclusion of the board of directors that there is a reasonable likelihood that the proposed Distribution Plan (or amendment thereto) will benefit the fund and its shareholders. n140

[e] Delivery of Documents to Security Holders Sharing an Address--Item 23. If one annual report or proxy statement is being delivered to two or more security holders who share an address in accordance with § 240.14a-3(e)(1), furnish the following:

- state that only one annual report or proxy statement, as applicable, is being delivered to multiple security holders sharing an address (unless the registrant has received contrary instructions).
- undertake to deliver promptly upon written or oral requests a separate copy of the annual report or proxy statement, as applicable, to a security holder at such address and provide instructions as to how a security holder can notify the registrant that the security holder wishes to receive a separate copy.
- provide the phone number and mailing address to which a security holder can direct a notification to the registrant that the security holder wishes to receive a separate copy in the future.
- provide instructions how security holders sharing an address can request delivery of a single copy of such reports or statements if they are receiving multiple copies. n141

[3] Filing Requirements for Proxy Statements--Rule 14a-6

Rule 14a-6 contains the filing requirements applicable to proxy material to be filed with the Commission. Five preliminary copies of the proxy statement and proxy card must be filed with the Commission at least 10 days before definitive material is sent to shareholders. n142 Preliminary proxy statements, proxy cards and other soliciting material are *not* permitted to be filed where the solicitation relates to a meeting at which the only matters to be acted upon are the following: n143

- the election of directors;
- the election, approval or ratification of accountants;
- a shareholder proposal included under Rule 14a-8; n144 and/or
- the approval or ratification of a plan (as defined in Item 402(a)(7)(ii) of Regulation S--K) or an amendment to a plan.

The prohibition on filing preliminary proxy material does not apply if the company comments on or refers in its own proxy material to a solicitation being made in opposition in connection with the meeting. n145 While Rule 14a-6(a) permits acceleration of the 10-day period upon a showing of good cause, the Division of Corporation Finance will not do so except in the case of opposing solicitations.

In most cases, the filing of preliminary or definitive proxy material does not require the payment of a filing fee. However, if the proxy material involves an acquisition, merger, spin-off, consolidation or proposed sale or other disposition of substantially all the assets of the company, a fee established in accordance with Rule 0-11 under the Exchange Act n146 must be paid. n147

In October 1992, the Commission changed the rules regarding public availability of preliminary proxy material on file with the Commission. Prior to adoption of these rules, preliminary proxy material was not available for public inspection until definitive material was filed with the Commission. Rule 14a-6(e) now permits public inspection of preliminary proxy material unless confidential treatment is obtained or unless the proxy statement relates to a merger, consolidation, acquisition or similar transaction not involving either a going private transaction pursuant to Rule 13e-3 under the Exchange Act n148 or a rollup transaction pursuant to Item 901 of Regulation S-K. n149 The proxy material eligible for confidential treatment is required to be clearly marked as confidential and would be filed in paper format rather than electronically. n150

A company whose preliminary proxy statement has been on file with the Commission for the required 10 days may mail those materials to shareholders without awaiting any notice or comments from the staff of the Division of Corporation Finance. The staff should notify the company, however, prior to the tenth day that the materials have been on file, if the staff has, or will have, comments on the preliminary proxy materials. n151

If the Division of Corporation Finance notifies the company of possible deficiencies in a preliminary proxy statement, the company must amend the material to correct the deficiencies. n152 Unlike the situation resulting under Securities Act Section 8(a), n153 however, filing an amendment will not extend the 10-day period established in Rule 14a-6(a) n154 since it is treated as part of the preliminary proxy statement unless the amendment contains material revisions or material new proposals. If a solicitor amends the proxy material in a timely fashion, the solicitor would not be required to modify the proposed schedule if required changes can be made that bring the material into compliance with the rules and any comments of the Commission.

While there is no provision for administrative action comparable to stop-order proceedings under the Securities Act, n155 the solicitor who refuses to modify proxy material in accordance with the suggestions of a letter of comment may be faced with injunctive proceedings and may be subject to a suit claiming that the proxies, having been obtained without complying with the rules, are invalid. n156

Eight copies of the definitive proxy statement, proxy card and other soliciting material must be filed with the Commission not later than the date such material is first sent to shareholders. The requirement of filing multiple copies and the option of mailing for filing would not apply to filings being made with the Commission since Regulation S--T n157 requires that such material be filed electronically. n158 Three copies are also required to be filed or mailed for filing with each national securities exchange upon which any class of securities of the company is listed and registered. n159 If the definitive proxy material differs from the preliminary proxy material filed with the Commission, two of the copies (or three of the copies in the case of a registered investment company) must be marked to indicate clearly and precisely the changes made from the material previously filed. For filings with the Commission submitted electronically, the changes would be marked as prescribed in the EDGAR Filer Manual. n160

Filing of personal solicitation material, revised proxy material and additional soliciting material is also required. n161

Neither copies of replies to inquiries from shareholders requesting further information, nor copies of communications that request only that proxies already solicited be signed and returned, need be filed pursuant to Rule 14a-6. n162

In respect of rollup transactions (as defined in Item 901(c) of Regulation S-K) n163 that are to be registered on Form S-4 or Form F-4 under the Securities Act, the proxy statement must be distributed to security holders by the earlier of (i) 60 days prior to the date on which the action is proposed to be taken or (ii) the maximum number of days permitted for giving notice under applicable state law. n164

In respect of solicitations by persons owning over \$5 million of the company's securities where authority to act as a proxyholder is not being sought (and assuming certain additional requirements are met), a Notice of Exempt Solicitation

n165 is required to be prepared and filed. n166 The notice is required to contain the name of the company, the name and address of the person submitting the notice, and a copy of all written soliciting materials. n167 Five copies of the notice, together with copies of all written soliciting material, must be filed or mailed for filing with the Commission not later than three days after the written solicitation is sent to any shareholder. The requirement for filing multiple copies and the option of mailing for filing would not apply to filings being made with the Commission since Regulation S--T n168 requires that such material be filed electronically. n169 Three copies must be sent to each national securities exchange on which any class of securities of the company is listed and registered. n170 No fee is required to be paid in connection with the filing of a Notice of Exempt Solicitation. n171 No filings are required by persons engaged in solicitations exempt under Rule 14a-2(b)(1) n172 in connection with oral solicitations (excluding scripts), public speeches, press releases, published or broadcast statements appearing in a broadcast media, newspaper or magazine. n173

Where the solicitation involves a roll--up transaction, and the solicitor both owns 5% or more of the outstanding securities of a class that is the subject of the proposed roll--up transaction and also engages in the business of buying and selling limited partnership interests in the secondary market, the solicitor must furnish or mail to the Commission not later than three days after making, sending or providing an oral or written solicitation to any security holder, five copies of a statement containing the information specified in the Notice of Exempt Preliminary Roll--up Communication. Five copies of any amendment to such statement shall be furnished or mailed to the Commission not later than three days after a communication containing revised material is first made, sent or provided to any security holder. n174 The requirement for filing multiple copies and the option of mailing for filing would not apply to filings being made with the Commission since Regulation S--T n175 requires that such material be filed electronically. n176

Finally, Rule 14a-6 provides that any proxy statement, proxy card or other soliciting material included in a Form N-14, Form S-4 or Form F-4 registration statement under the Securities Act is deemed to satisfy the filing requirements of the Exchange Act. n177 Separate copies are not required to be filed under Section 14(a) n178 if no separate fee is required thereunder. If any additional soliciting material is used after the effective date of the Form N-14, Form S-4 or Form F-4 registration statement, then such material must be filed in accordance with Rule 14a-6. n179

[4] Inaccurate Material In Proxy Statements--Rule 14a-9

A broad prohibition on the use of false or misleading statements comparable to the prohibition contained in Section 10 of the Exchange Act (and the rules adopted thereunder) n180 and Section 17 of the Securities Act n181 is set forth in Rule 14a-9. n182 The prohibition contained in Rule 14a-9 applies to statements included in proxy statements, forms of proxy, notices of meetings and other communications, whether written or oral. n183 Rule 14a-9(a) prohibits solicitation material from including a false or misleading statement with respect to a material fact or the omission of a material fact necessary in order to make the statement not false or misleading. n184

Notwithstanding the fact that the provisions of the proxy rules are not generally applicable to certain types of solicitations, n185 the prohibition contained in Rule 14a-9 nonetheless will apply to the following three types of solicitations:

- solicitations of ten or fewer persons by an entity other than the company;
- proxy voting advice given by a financial adviser in the course of business to a person with whom the adviser has a business relationship; n186 and
- solicitations by persons not seeking authority to act as proxyholder. n187

Rule 14a-9 does not require that all possible facts be disclosed; n188 rather, only those facts material to shareholder action are required to be included in proxy material. n189 The test of materiality established by the Supreme Court in *TSC Industries v. Northway*, n190 is as follows: "[a]n omitted fact is material if there is a substantial likelihood that a

reasonable investor would consider it important in deciding how to vote." n191 Rule 14a-9 does not require that proxy solicitation materials contain perfect disclosure; the appropriate standard is fair accuracy. n192

In *State of New Jersey, et al. v. Sprint Corp., et al.*, n193 the court addressed the issue of whether a corporation has a duty to make full and prompt disclosure of material facts, both favorable and unfavorable, regarding its financial condition. It stated that such disclosure is plainly required where a failure to disclose would render its previously issued projections misleading.

There is no general duty to disclose arising out of the fiduciary relationship between a corporation and its stockholders unless a statute or rule requires disclosure, an insider is trading, or a previous disclosure becomes inaccurate, incomplete or misleading. In the absence of securities fraud claims relating specifically to official reports of financial performance, the mere fact that an individual defendant was the company's chief financial officer is unlikely to be enough to allege control for purposes of attempting to impose controlling person liability under § 20(a) of the Act. A similar conclusion applies as to an individual who is a member of the company's board of directors, with no allegation that the person exerted control or influence over the day-to-day operations of the company. This is not so regardless of whether such individual signed an SEC filing that contains a misleading or fraudulent statement, because it is common sense to presume that a person who signs his name to a report has some measure of control over those who write the report.

In an action based on Sprint's failure to disclose the possibility or inevitability that the employment of the chairman and president of the company would be terminated as a result of their utilizing tax shelters which were subsequently held by the I.R.S. to be improper, the Court observed that, while the alleged nondisclosures did not make the financial statements misleading, it did arguably render misleading a statement in Sprint's proxy statements that "Sprint entered into new employment contracts with Mr. Esrey and Mr. LeMay designed to insure their long-term employment with Sprint," which statements were made at a time when the company was contemplating the termination of both executives.

A defendant corporation is not held to a standard of strict liability; rather, some jurisdictions require knowing, reckless or negligent conduct before a finding of liability under Rule 14a-9 will be made. n194 There is no requirement that proxy solicitation materials state interpretations of facts not shared by the solicitor, n195 contemplated alternative transactions that are merely conjectural, n196 or management's desire to defeat a takeover attempt. n197

Proxy statements need not disclose the underlying motivations of directors or major shareholders as long as all material facts relating to the transaction are adequately stated. n198 Where statements of reasons, opinions or beliefs are given, plaintiffs will be permitted to prove that such statements are knowingly false or misleadingly incomplete in order to state a cause of action under Section 14(a). n199

Certain categories of statements have been proscribed by the Commission in the Note to Rule 14a-9 as examples of statements that, depending on the facts and circumstances, may be misleading within the meaning of Rule 14a-9. The Note to Rule 14a-9 prohibits predictions as to specific future market values, n200 baseless personal attacks, n201 claims made prior to the shareholders' meeting as to the outcome of the vote, n202 and proxy material that does not clearly identify the soliciting party. n203 By contrast, Rule 3b-6 under the Exchange Act n204 permits forward-looking statements in documents filed with the Commission if certain conditions are met. n205

Rule 14a-9(b) provides that the filing of soliciting material or its examination by the Commission shall not be deemed to constitute a finding by the Commission that the material is not false or misleading, that it is accurate and complete, or that the Commission has passed on the merits of any statement contained therein or any matter to be voted upon by shareholders. Statements in proxy material to the contrary are likewise prohibited. n206 Notwithstanding the express provisions of Rule 14a-9(b), the weight and effect to be given by the courts to "clearance" of proxy material by the Commission varies almost from case to case. n207

Whether a given statement is actually false or misleading depends upon the facts and circumstances of the particular case. n208 Even if the proxy statement is misleading, lack of irreparable harm to shareholders may defeat a request for injunctive relief. n209

Whether proxy material violates Rule 14a-9 must be determined in the context in which the statement is made, since misleading implications may arise "not from the words alone, but from the words as seen against the background of all the circumstances existing at the time the statement or question was published." n210 Furthermore, failure to give prominence to important facts and "burying" material adverse information may make a statement misleading. n211 While Rule 14a-9 does not require that either certain words or a certain form of language be used to express a material fact in a proxy statement, "the language used and the position and emphasis given to each statement, however, may be considered in determining whether there has been a fair and candid disclosure of a material fact." n212 In connection with the language used in a proxy statement, a complicated description of a complex transaction would not generally be prohibited by Rule 14a-9. n213

FOOTNOTES:

(n1)Footnote 1. 17 C.F.R. § 240.14a-101.

(n2)Footnote 2. Rule 14a-3(a), under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G, 17 C.F.R. § 240.14a-3(a), states that no solicitation may be made unless a proxy statement containing the information required by Schedule 14A, or a proxy statement included in a registration statement on Form S-4 under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section H or F-4 (or Form N-14 for investment companies) and containing the information required by such form is provided to the person solicited.

This provision is not applicable to certain communications in the form of public speeches, press releases, published or broadcast statements appearing in a broadcast media, newspaper or magazine, or other publication distributed on a regular basis as long as (i) a proxy card is not provided to the shareholder being solicited and (ii) a definitive proxy statement has been filed with the Commission. Rule 14a-3(f), 17 C.F.R. § 240.14a-3(f). *See also* § 7.02 *supra*.

The person preparing the proxy statement should also consult materials other than Schedule 14A, including the following: (i) the rules under Regulation 14A (Rule 14a-1 through Rule 14a-14, 17 C.F.R. § 240.14a-1 through 14a-14); (ii) the introductory Notes to Schedule 14A; and (iii) the definitions contained elsewhere in the Exchange Act, 15 U.S.C. § 78a-78jj, and Regulations, 17 C.F.R. § 240 *et seq.* (e.g., Rule 12b-2, 17 C.F.R. § 240.12b-2).

The failure to answer correctly any item required by Schedule 14A is actionable in a shareholder's derivative action under Rule 14a-3. *Lewis v. Dansker*, 357 F. Supp. 636 (S.D.N.Y. 1973), *modified*, 68 F.R.D. 184 (S.D.N.Y. 1975). However, proof of causation (*i.e.*, that the violation of Rule 14a-3(a), by omitting to provide information required by Schedule 14A, "reasonably could be thought to have effected the outcome of the vote") is essential to establish a violation of § 14(a) and Rule 14a-3(a), 17 C.F.R. § 240.14a-3(a). *Ash v. Brunswick Corp.*, 405 F. Supp. 234, 246 (D. Del. 1975).

See also SEC v. Falstaff Brewing Corp., 629 F.2d 62, 73-74 (D.C. Cir. 1980) (failure to provide in a proxy statement the information required by Schedule 14A, violated Section 14(a), 15 U.S.C. § 78n(a) and Rule 14a-3.

Compare with cases brought under Rule 14a-9, 17 C.F.R. § 240.14a-9; see § 7.09[2] infra.

(n3)Footnote 3. *15 U.S.C. § 78n.*

(n4)Footnote 4. *See § 7.06 infra* for discussion of information statements.

(n5)Footnote 5. 17 C.F.R. § 229 *et seq.* For a discussion of Regulation S-K, *see § 4.03 supra.*

(n6)Footnote 6. For a discussion of disclosure requirements for smaller reporting companies under Item 10(f) of Regulation S-K, *see § 7.03, supra.*

(n7)Footnote 7. Note D to Schedule 14A.

The proxy statement must include on the last page a list of documents incorporated by reference. If material incorporated by reference has not been given to shareholders, the company must include in the proxy statement an undertaking to provide without charge, upon the request of the shareholder, a copy of any material incorporated by reference. The company is not required to provide exhibits to documents incorporated by reference unless those exhibits are specifically incorporated by reference in the proxy statement.

With respect to companies that are filing material electronically with the Commission under the EDGAR system, if the proxy statement incorporates information required by Item 13 or 14 of Schedule 14A by reference to an annual or quarterly report to shareholders, such report (or portion of the report) so incorporated is required to be filed in electronic format with the proxy statement. This provision does not apply to registered investment companies. Note D(4) to Schedule 14A.

(n8)Footnote 8. It is not sufficient merely to provide the specific information explicitly required by Schedule 14A. *Lyman v. Standard Brands, Inc.*, 364 F. Supp. 794 (E.D. Pa. 1973) (although a company's proxy statement complied with requirements of Schedule 14A by disclosing any direct financial interest or any material indirect financial interest its auditors had in the company, the company was still held to the requirements of full disclosure and should have complied with the full and fair disclosure requirements of Rule 14a-9. The existence of Schedule 14A does not restrict the scope of Rule 14a-9, which is designed to prevent management from obtaining authorization for corporate action through deceptive or inadequate disclosure in proxy solicitations).

See also Franchard Corp., Sec. Act Rel. No. 33-4710, Fed. Sec. L. Rep. (CCH) P 74,113 (1964) (stop order proceeding under Securities Act of 1933; registrant failed to disclose encumbrance on controlling person's shares in registration statement and prospectus) (footnotes omitted):

The fact that such disclosures are not required of all issuers and their controlling persons in all cases does not negate their materiality in specific cases. The registration forms promulgated by us are guides intended to assist registrants in discharging their statutory duty of full disclosure. They are not and cannot possibly be exhaustive enumerations of each and every item material to investors in the particular circumstances relevant to a specific offering. The kaleidoscopic variety of economic life precludes any attempt at such an enumeration. The preparation of a registration statement is not satisfied, as registrant's position suggests, by a mechanical process of responding narrowly to the specific items of the applicable registration form. On the contrary, Rule 408 under the Securities Act makes clear to prospective registrants that: "In addition to the information expressly required to be included in a registration statement, there shall be added such further material information, if any, as may be necessary to make the required statements in the light of the circumstances under which they were made, not misleading."

(n9)Footnote 9. Rule 14a-5(a), 17 C.F.R. § 240.14a-5(a).

(n10)Footnote 10. Rule 14a-5(a). This rule also requires appropriate headings to be used and amounts to be stated in figures. Where appropriate, use of tables is encouraged. If disclosure is required of the same information by more than one item of Schedule 14A, the disclosure is not required to be repeated.

Rule 14a-5(c), 17 C.F.R. § 240.14a-5(c), provides that disclosures contained in other proxy soliciting material do not need to be repeated in the proxy statement if the proxy statement contains a clear reference to the place where such information can be found.

(n11)Footnote 11. Rule 14a-5(b), 17 C.F.R. § 240.14a-5(b).

(n12)Footnote 12. Rule 14a-5(d), 17 C.F.R. § 240.14a-5(d).

All printed proxy statements must be in roman type at least as large and as legible as 10-point modern type, except that, to the extent necessary for convenient presentation, financial statements and other tabular data, but not the notes thereto, may be in roman type at least as large and as legible as 8-point modern type. All such type must be leaded at least 2 points. Rule 14a-5-(d)(2)(ii) provides that where the proxy statement is delivered through an electronic medium, legibility requirements applicable to printed documents, such as type size and fonts, may be satisfied by presenting all information "in a format readily communicated to investors." Similar provisions apply to annual reports (Rule 14a-3(b)(2)(ii)), and information statements (Rule 14c-4(d)).

(n13)Footnote 13. Rule 14a-5(e), 17 C.F.R. § 240.14a-5(e).

The date by which proposals are to be received is to be calculated pursuant to Rule 14a-8(a)(3)(i), 17 C.F.R. § 240.14a-8(a)(3)(i), discussed in § 7.07 *infra*.

If the date of the next annual meeting is subsequently advanced by more than 30 calendar days or delayed by more than 90 calendar days from the date of the annual meeting to which the proxy statement relates, the company should, in a timely manner, inform shareholders of the change and the new deadline for shareholder proposals to be received by the company. Rule 14a-5(f), 17 C.F.R. § 240.14a-5(f).

(n14)Footnote 14. Rule 14a-6(a), 17 C.F.R. § 240.14a-6(a).

(n15)Footnote 15. Rule 14a-5(a) provides, in part: "No statement need be made in response to any item or subitem which is inapplicable."

(n16)Footnote 16. Note A to Schedule 14A.

Items 11, 14 and 19 of Schedule 14A are discussed in § 7.04[2][c] *infra*.

(n17)Footnote 17. Note B to Schedule 14A.

(n18)Footnote 18. Rule 14a-6, Rule 14c-5..

(n19)Footnote 19. SEC Guidance dated February 24, 2009.

(n20)Footnote 20. This information need not be included in the proxy statement if it is provided to shareholders in other material furnished to them with or preceding the proxy statement.

If action is to be taken by written consent, the company must also include the date by which the consents are to be submitted, if state law requires a date to be specified, or if the person soliciting proxies intends to set a date.

(n21)Footnote 21. The requirement for a cover page was first adopted by the Commission in February 1993 in the

release adopting rules regarding implementation of the operational EDGAR system. Nevertheless, the requirement for the cover page applies to both electronic and paper filers. Since all issuers obligated to file proxy material with the Commission must file electronically, the rules applicable to paper filers now apply only to issuers that file with agencies other than the Commission (*e.g.*, the Comptroller of the Currency and the Federal Deposit Insurance Corporation). Sec. Exch. Act Rel. No. 34-31905, Fed. Sec. L. Rep. (CCH) P 85,111 (1993).

(n22)Footnote 22. In addition to a statement as to whether or not the shareholder has the right to revoke the proxy, if such right is limited or subject to certain procedures, a description of such limitation or procedures is required by Item 2 of Schedule 14A.

(n23)Footnote 23. If appraisal rights are required to be described in response to Item 3 of Schedule 14A, a description of any state statutory procedures necessary in order to perfect such rights is required. If time constraints are placed on the exercise of such rights, a statement whether the shareholder will be notified of the expiration of the applicable time period is also required.

(n24)Footnote 24. In the case of a solicitation subject to Rule 14a-11, 17 C.F.R. § 240.14a-11 (Special Provisions Applicable to Election Contests, *see* § 7.08 *infra*), additional disclosure must be made of any class of regular employees of the company or any other participant in a solicitation employed to solicit shareholders and the manner and nature of their employment for such purpose, the material features of any contract or arrangement for such solicitation and the parties thereto, and the total amount estimated to be spent and total expenditures to date, in connection with or in furtherance of the solicitation of shareholders and who will bear the cost of solicitation. Item 4(b) of Schedule 14A.

In *Ostergren v. Kirby*, Fed. Sec. L. Rep. (CCH) P 90,820 (N.D. Ohio 1957), and *SEC v. May*, 229 F.2d 123 (2d Cir. 1956) 134 F. Supp. 247 (S.D.N.Y. 1955), injunctions were granted for failure to disclose participants. It does not matter if such participants are technically not members of the committee soliciting proxies if they have been instrumental in organizing it.

Item 4(a)(2) of Schedule 14A, which reads: "[i]f the solicitation is made otherwise than by the registrant, so state and give the names of the persons by whom and on whose behalf it is made," codifies the result of the *May* case, which had previously been an administrative position.

See also SEC v. Henwood, Fed. Sec. L. Rep. (CCH) P 91,125 (S.D. Cal. 1961), *modified and aff'd*, 298 F.2d 641 (9th Cir.), *cert. denied*, 371 U.S. 814 (1962); *Chris-Craft Indus., Inc. v. Independent Stockholders Comm.*, 354 F. Supp. 895 (D. Del. 1973).

"Participant" and "participant in a solicitation" are defined in Instruction 3(a) to Item 4 of Schedule 14A to include the following:

- (1) the company;
- (2) any director of the company and any nominee for whose election as a director proxies are solicited;
- (3) any committee or group which solicits proxies, any member of such committee or group, and any person whether or not named as a member who, acting alone or with one or more other persons, directly or indirectly, takes the initiative or engages in organizing, directing or arranging for the financing of any such committee or group;
- (4) any person who finances or joins with another to finance the solicitation of proxies, except persons who contribute not more than \$500 and who are not otherwise participants;

1-7 Federal Securities Exchange Act of 1934 § 7.04

(5) any person who lends money or furnishes credit or enters into any other arrangement, pursuant to any contract or understanding with a participant, for the purposes of financing or otherwise inducing the purchase, sale, holding or voting of securities of the company by any participant or other person, in support of or in opposition to a participant; except that such terms do not include a bank, broker or dealer who, in the ordinary course of business, lends money or executes orders for the purchase or sale of securities and who is not otherwise a participant; and

(6) any person who solicits proxies.

Instruction 3(b) to Item 4 of Schedule 14A excludes from the terms "participant" and "participant in a solicitation" the following persons:

(1) Any person or organization retained or employed by a participant to solicit security holders and whose activities are limited to the duties required to be performed in the course of such employment;

(2) Any person who merely transmits proxy soliciting material or performs other ministerial or clerical duties;

(3) Any person employed by a participant in the capacity of attorney, accountant or advertising, public relations or financial adviser, and whose activities are limited to the duties required to be performed in the course of such employment;

(4) Any person regularly employed as an officer or employee of the company or any of its subsidiaries and who is not otherwise a participant; or

(5) Any officer or director of, or any person regularly employed by, any other participant, if such officer, director or employee is otherwise a participant.

(n25)Footnote 25. Disclosure is not required under Item 5(a) if the interest arises from ownership of securities of the company if the shareholder receives no extra or special benefit not shared on a pro rata basis by all other shareholders of the same class. Instruction to Item 5(a) of Schedule 14A.

(n26)Footnote 26. An "associate" is defined in Rule 14a-1(a) as:

(1) any corporation or organization (other than the registrant or a majority owned subsidiary of the registrant) of which such person is an officer or partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities; (2) any trust or other estate in which such person has a substantial beneficial interest or as to which such person serves as trustee or in a similar fiduciary capacity; and (3) any relative or spouse of such person, or any relative of such spouse, who has the same home as such person or who is a director or officer of the registrant or any of its parents or subsidiaries.

(n27)Footnote 27. If the solicitation is an election contest subject to Rule 14a-12(c), Item 5(b) requires a brief description of any substantial interest of the participants in any matter to be acted upon at the meeting, and detailed information with respect to each participant, including:

(i) name and business address,

(ii) principal occupation and employment and the name, principal business and address of the employer,

- (iii) criminal convictions, if any, during the past 10 years, with details specified,
- (iv) direct and indirect beneficial ownership of the company's securities,
- (v) amount of any class of equity security owned of record but not beneficially,
- (vi) as to securities purchased or sold within the past two years, the dates and amounts of each purchase or sale,
- (vii) if the purchase price or market value of shares so bought or sold are represented by funds borrowed or otherwise obtained for the purpose of acquiring or holding the securities, the amount of the debt as of the latest practical date if the funds were acquired other than pursuant to a margin account or bank loan in the regular course of business, describing the transaction and the names of the parties,
- (viii) any contracts, arrangements or understandings to which the participant is or was within the past year a party with any person with respect to any securities of the registrant, naming the parties and giving the details thereof,
- (ix) amount of securities owned beneficially, directly or indirectly, by the participant's associates, with the name and address of each,
- (x) amount of each class of securities of any parent or subsidiary of the registrant owned beneficially, directly or indirectly, by the participant,
- (xi) for the participant and his or her associates, the information required by Item 404(a) of Regulation S-K (discussed in § 4.03 [5][d], *supra*),
- (xii) any arrangement or understanding of the participant or any associate with any person with respect to any future employment by the registrant or its affiliates or with respect to any future transactions to which the registrant or any of its affiliates will or may be a party, describing such arrangement and stating the names of the parties thereto.

Item 5(b)(1) of Schedule 14A.

(n28)Footnote 28. For a discussion of certain "street name" issues and the Commission's response thereto under Rules 14b-1, 14b-2, and 14a-13, *see* § 7.02[3] *supra*.

(n29)Footnote 29. Item 403 of Regulation S-K, reprinted in the Primary Law Sourcebook, Volume D, Section K, 17 C.F.R. § 229.403, is discussed in § 4.03[5][c] *supra*. Item 403 was amended by Release 33-8732A to require tabular disclosure of beneficial ownership of each class of securities of the registrant or any of its parents or subsidiaries by directors, nominees, named executive officers, and directors and executive officers as a group.

(n30)Footnote 30. If a bank loan was the source of all or part of the funds used by the person acquiring control, the identity of the bank need not be disclosed provided:

- (1) the person acquiring control has requested confidentiality under Section 13(d)(1)(B) of the Exchange Act, 15 U.S.C. § 78m(d)(1)(B), discussed in § 7A.02[1], n.37 *infra*, at the time of filing; or
- (2) the material indicates that the bank's identity has been omitted and filed separately with the Commission; and
- (3) the loan was made in the ordinary course of business by the bank.

The terms of the loan or pledge obtained by the new control group to acquire control and the names of the lenders and pledgees must be disclosed. Instruction 1 to Item 6(e) of Schedule 14A.

Any arrangement or understanding among members of both the former and new control groups and their associates about election of directors or other matters should also be described. Instruction 2 to Item 6(e) of Schedule 14A.

(n31)Footnote 31. Broker non-votes are unvoted shares held by a nominee for a beneficial owner for which the nominee has not received voting instructions from the beneficial owner or for which the nominee may not exercise discretionary voting power. Sec. Exch. Act Rel. No. 30849, Fed. Sec. L. Rep. (CCH) P 85,002, at 82,838 (1992). The NYSE has proposed that brokers' discretionary voting for directors be abolished. *See* discussion at § 7.02[2], *supra*, m. 27. The proposal has generated concerns about the effect this may have on the ability of directors to obtain majority votes when that requirement has been adopted.

In the release proposing changes to the shareholder communications rules in 1992, the Commission recognized the existence of "diverse state law approaches to proxy tabulation, particularly with respect to abstentions and broker non-votes" and noted that some states permit companies to include in their certificate of incorporation or by-laws a provision which would have the effect of altering the state law approach to tabulation of proxies. Sec. Exch. Act Rel. No. 34-30849, Fed. Sec. L. Rep. (CCH) P 85,002, at 82,838 (1992).

(n32)Footnote 32. Information is required for directors whose term of office will continue after the meeting. Instruction 3 to Item 401(a) of Regulation S-K.

(n33)Footnote 33. In the case of a nonissuer solicitation, information pertaining only to the nominees of such person is required to be furnished. Item 6 of Schedule 14A.

The nominees must have consented to serve if elected, though the consent need not be in writing. Rule 14a-4(d), 17 C.F.R. § 240.14a-4(d).

Delaware has revised its General Corporation Law effective August 1, 2009 to permit corporations to adopt bylaws conferring on shareholders the right to have their own nominees for election to the board included in the corporation's proxy material. The following is the legislative synopsis of new sections 112 and 113:

" New Section 112 clarifies that the bylaws may require that if the corporation solicits proxies with respect to an election of directors, the corporation may be required to include in its proxy materials one or more nominees submitted by stockholders in addition to individuals nominated by the board of directors. Section 112 also identifies a non-exclusive list of conditions that the bylaws may impose on such a right of access to the corporation's proxy materials. In particular, and in the interest of avoiding election contests instituted by stockholders having little or no economic interest in the corporation, Section 112 authorizes the bylaws to prescribe a minimum level of stock ownership as a prerequisite to requiring inclusion of nominees in the corporation's proxy materials. In establishing such a minimum level of stock ownership, the bylaws may define beneficial ownership to take account of ownership of options or other rights in respect of or relating to stock (including rights that derive their value from the market price of the stock). Section 112 also permits the bylaws to limit a right of access according to whether or not a majority of board seats is to be contested, or whether nominations are related to an acquisition of a significant percentage of the corporation's stock. The bylaws may also prescribe any other lawful condition to the exercise of a right of access to the corporation's proxy materials.

" New Section 113 provides that a bylaw may require the corporation to reimburse proxy solicitation expenses incurred by a stockholder. Section 113 also identifies a non-exclusive list of conditions that the bylaws may impose on such a right to reimbursement."

(n57)Footnote 57. Item 9(a) of Schedule 14A.

In cases where the selection of accountants is being voted upon by shareholders but is not required to be submitted for shareholder action, it could be argued that the disclosure required by Item 18 of Schedule 14A would be required in addition to the disclosure required by Item 9 of Schedule 14A. Item 18 of Schedule 14A would require companies to disclose the reasons for submitting the selection of accountants to a vote of shareholders and the action intended to be taken by the company in the event of a negative vote.

(n58)Footnote 58. Item 9(c) of Schedule 14A.

(n59)Footnote 59. Item 304 of Regulation S-K, 17 C.F.R. § 229.304, is discussed in § 4.03[4][d] *supra*. Such disclosure in a proxy statement is required even if such information has been previously disclosed.

(n60)Footnote 60. Item 9(e)(1)-(8).

(n61)Footnote 61. Item 402(a)(6)(ii) of Regulation S-K, 17 C.F.R. § 229.402(a)(6)(ii), states that a plan includes, but is not limited to, "any plan, contract, authorization or arrangement, whether or not set forth in any formal documents A plan may be applicable to one person." This definition applies to Item 10 because of Instruction 1 to Item 10.

(n62)Footnote 62. If action is to be taken requiring disclosure under Item 10, the information prescribed in Item 8 (Compensation of Directors and Executive Officers) must also be included pursuant to Item 8(b), even if directors are not being elected.

(n63)Footnote 63. Item 10(a)(1) of Schedule 14A.

The proxy statement must also contain a statement as to whether or not accountants for the current and prior fiscal years are expected to attend the shareholders' meeting, make a statement if desired and be available to respond to appropriate questions. Item 13(a)(6) of Schedule 14A.

The financial information required by Item 13(a)(1), (2) and (3) may be incorporated by reference if certain conditions are met. Item 13(b) of Schedule 14A.

Item 302, "Supplementary financial information," of Regulation S-K, *17 C.F.R. § 229.302*, is discussed in § 4.03[4][b] *supra*.

Item 303, "Management's discussion and analysis of financial condition and results of operations," of Regulation S-K, *17 C.F.R. § 229.303*, is discussed in § 4.03[4][c] *supra*.

Item 304, "Changes in and disagreements with accountants on accounting and financial disclosure," of Regulation S-K, *17 C.F.R. § 229.304*, is discussed in § 4.03[4][d] *supra*.

(n80)Footnote 80. Item 14 requires proxy statements to include specified information if action is proposed to be taken with respect to "(i) the merger or consolidation of the registrant into or with any other person or of any other person into or with the registrant, (ii) the acquisition by the registrant or any of its security holders of securities of another person, (iii) the acquisition by the registrant of any other going concern business or of the assets thereof, (iv) the sale or other transfer of all or any substantial part of the assets of the registrant, or (v) the liquidation; or dissolution of the registrant" Information must be provided about the transaction, about the business of the company and the other party to the transaction and about the financial condition of the company and the other party to the transaction and pro forma financial information.

(n81)Footnote 81. See Winston & Strawn LLP Briefing, Global Financial Markets (December 2008). The guidance can be found at www.sec.gov/division/corpfin/cffilingguidance.htm.

(n82)Footnote 82. Company Act Release, 68 Fed. Reg. 6564, 6567 ; see discussion in Securities & Commodities Regulation, Vol. 36 No. 11 (June 11, 2003).

(n83)Footnote 83. "Administrator" is defined in Item 22(a)(1)(i) of Schedule 14A as any person or persons who provide significant administrative or business management services to the fund and includes any person that has been or would be identified in response to Item 15(h) of Form N-1A (*17 C.F.R. § 274.11A*).

(n84)Footnote 84. Item 22(a)(3)(ii) of Schedule 14A.

(n85)Footnote 85. Item 22(a)(3)(iii). The proxy statement must also contain the name, address and toll-free telephone number of the person to whom such a request is to be directed (or, if no toll-free telephone number is provided, a postage paid card for requesting the annual report.)

The fund must provide any requested report by first class mail or other means designed to assure prompt delivery, within three business days of the request.

(n86)Footnote 86. Item 22(a)(3)(iv).

For open end-management investment companies, the reference would be Item 3 of Form N-1A (17 C.F.R. § 239.15A). For closed-end management investment companies, the reference would be Item 3 of Form N-2 (17 C.F.R. § 239.14). For separate accounts that offer variable annuity contracts, the reference would be to Item 3 of Form N-3 (17 C.F.R. § 239.17a).

Where approval is sought only for a change in asset breakpoints for a pre-existing fee that would not have increased the fee for the previous year (or have the effect of increasing fees or expenses, but for any other reason would not be reflected in a pro forma fee table), the proxy statement must describe the likely effect of the change in lieu of providing pro forma fee information. Instruction 1 to Item 22(a)(3)(iv) of Schedule 14A.

If a fund offers its shares exclusively to one or more separate accounts and therefore is not required to include a fee table in its prospectus, that fund should nonetheless prepare a table showing current and pro forma expenses and disclose that the table does not reflect separate account expenses, including sales load. Instruction 4 to Item 22(a)(3)(iv) of Schedule 14A.

(n87)Footnote 87. "Parent" is defined in Item 22(a)(1)(vi) of Schedule 14A as "the affiliated person of a specified person who controls the specified person directly or indirectly through one or more intermediaries."

(n88)Footnote 88. "Subsidiary" is defined in Item 22(a)(1)(viii) of Schedule 14A as "an affiliated person of a specified person who is controlled by the specified person directly or indirectly through one or more intermediaries."

(n89)Footnote 89. Item 22(a)(3)(v) of Schedule 14A.

This item requires that the investment company identify the parties, state the consideration, the terms of payment and describe any arrangement or understanding with respect to the composition of the board of directors of the fund or the investment advisor or with respect to the selection or appointment of any person to any office with either such company. Instruction 1 to Item 22(a)(3)(v) of Schedule 14A.

Transactions involving securities in an amount not exceeding one percent of the outstanding securities of any class of the investment advisor or any of its Parents or Subsidiaries may be omitted. Instruction 2 to Item 22(a)(3)(v) of Schedule 14A.

(n90)Footnote 90. Item 22(a)(4) of Schedule 14A.

Any required financial data schedule must be prepared in accordance with the requirements of Rule 483 of Regulation C under the Securities Act (17 C.F.R. § 230.483).

(n91)Footnote 91. Information must be furnished with respect to a prospective investment advisor to the extent applicable. Instruction 1 to Item 22(b) of Schedule 14A.

If the solicitation is being made other than by or on behalf of the fund or by or on behalf of an investment advisor, the information need only be provided as to nominees of the person making the solicitation. Instruction 2 to Item 22(b) of

Schedule 14A.

(n92)Footnote 92. The following is the table specified in Item 22(b)(1):

(1)	(2)	(3)	(4)	(5)	(6)
Name	Position(s) Held With Fund	Term of Office And Length Of Time Served	Principal Oc- cupation(s) During Past 5 Years	Number of Portfolios In Fund Complex Overseen By Director or Nominee For Director	Other Director- ships Held By Director of Nominee For Director

The term "family relationship" means any relationship by blood, marriage, or adoption, not more remote than first cousin. Only persons who have consented to act as a director or officer may be named in response to this item. If there are fewer nominees named than the number fixed by or pursuant to the governing instruments, the reasons must be stated and the proxies cannot be voted for a greater number of persons than the number of nominees named. For each nominee who is an "interested person," describe in a footnote or otherwise the reasons for such classification. The principal business of any company named in column 4 must be stated unless implicit in its name. Include in column (5) the total number of separate portfolios that a nominee for election as director would oversee if elected.

(n93)Footnote 93. Item 22(b)(2) of Schedule 14A.

(n94)Footnote 94. Item 22(b)(3) of Schedule 14A.

(n95)Footnote 95. Item 22(b)(4) of Schedule 14A.

(n96)Footnote 96. Item 22(b)(5) of Schedule 14A. The ranges to be used are: None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, or over \$100,000.

(n97)Footnote 97. The table specified by Item 22(b)(6) appears as follows:

(1)	(2)	(3)	(4)	(5)	(6)
Name of Dir- ector or Nom- inee	Name of Own- ers and Rela- tionships to Director or Nominee	Company	Title of Class	Value of Se- curities	Percent of Class

(n98)Footnote 98. Item 22(b)(7) of Schedule 14A.

(n99)Footnote 99. Item 22(b)(8) of Schedule 14A. State the nature of the interest (and the circumstances requiring it to be described), the approximate dollar amount involved and the approximate dollar amount of the interest where practicable, including all periodic payments. The interest of the person shall be computed without regard to the amount of profit or loss involved. If the transaction involves a purchase or sale of assets, state the cost to the purchaser and, if acquired by the seller within two years, the cost to the seller, describing the method used in determining the purchase or sale price and the name of the person making the determination. Materiality shall be determined on the basis of the significance of the information to investors in light of all the circumstances of the particular case, including the importance of the interest to the person having the interest, the relationships of the parties to the transaction with each other, and the amount involved. No information need be given where the interest arises solely from ownership of

securities of a person specified and the owner receives no extra or special benefit. Transactions include loans, lines of credit and other debt; for debt, indicate the largest aggregate amount of debt outstanding at any time during the period, its nature and the transaction in which it was incurred, the amount outstanding at the latest practicable date and the rate of interest paid or charged.

(n100)Footnote 100. Item 22(b)(9) of Schedule 14A.

(n101)Footnote 101. Item 22(b)(10) of Schedule 14A.

(n102)Footnote 102. Item 22(b)(11) of Schedule 14A. Information provided under Item 22(b)(8) may be omitted here.

(n103)Footnote 103. Item 22(b)(12) of Schedule 14A must include name of court where case is pending, date instituted, principal parties, factual basis alleged for action and relief sought.

(n104)Footnote 104. Item 22(b)(13) of Regulation 14A.

The following is the table specified in Item 22(b)(13):

(1)	(2)	(3)	(4)	(5)
Name	Aggregate	Pension	Estimated	Total
of	Compensation	or	Annual	Compensation
Person,	from	Retirement	Benefits	From Fund
Position	Fund	Benefits	Upon	and Fund
		Accrued	Retirement	Complex
		as Part of		Paid to
		Fund		Directors
		Expenses		

For column (1), indicate, if necessary, the capacity in which the remuneration was received. For Compensated Persons that are directors of the fund, compensation is amounts received for service as a director. Instruction 1 to Item 22(b)(13) of Schedule 14A.

If the fund has not completed its first full fiscal year since its organization, the fund must furnish the information for the current fiscal year, estimating future payments that would be made pursuant to an existing agreement or understanding. The fund must disclose in a footnote to the Compensation Table the period for which the information is provided. Instruction 2 to Item 22(b)(13) of Schedule 14A.

The fund must include in column (2) amounts deferred at the election of the Compensated Person, whether pursuant to a plan established under *Section 401(k) of the Internal Revenue Code* or otherwise, for the fiscal year in which earned. The fund must also disclose in a footnote to the Compensation Table the total amount of deferred compensation (including interest) payable to or accrued for any Compensated Person. Instruction 3 to Item 22(b)(13) of Schedule 14A.

The fund must include in columns (3) and (4) all pension or retirement benefits proposed to be paid under any existing plan in the event of retirement at normal retirement date, directly or indirectly, by the fund or any of its Subsidiaries, or by other companies in the same fund complex as the fund. If retirement benefits are not determinable, column (4) may be omitted. Instruction 4 to Item 22(b)(13) of Schedule 14A.

For any defined benefit or actuarial plan under which benefits are determined primarily by final compensation (or average final compensation) and years of service, the fund must provide the information required in column (4) in a separate table showing estimated annual benefits payable upon retirement (including amounts attributable to any

defined benefit supplementary or excess pension award plans) in specified compensation and years of service classifications. The fund must also disclose the estimated credited years of service for each Compensated Person. Instruction 5 to Item 22(b)(13) of Schedule 14A.

The fund should include in column (5) only aggregate compensation paid to a director for service on the board and other boards of investment companies in the same fund complex specifying the number of such other investment companies. Instruction 6 to Item 22(b)(13) of Schedule 14A.

(n105)Footnote 105. Item 22(b)(14) of Schedule 14A.

(n106)Footnote 106. Item 22(c) of Schedule 14A.

The required information needs to be included with respect to a prospective investment advisor to the extent applicable. Instruction to Item 22(c) of Schedule 14A.

(n107)Footnote 107. Item 22(c)(1)(i) of Schedule 14A.

(n108)Footnote 108. Item 22(c)(1)(ii) of Schedule 14A.

(n109)Footnote 109. Item 22(c)(1)(iii) of Schedule 14A.

(n110)Footnote 110. Item 22(c)(1)(iv) of Schedule 14A.

(n111)Footnote 111. Item 22(c)(1)(v) of Schedule 14A.

(n112)Footnote 112. Item 22(c)(1)(vi) of Schedule 14A.

(n113)Footnote 113. Item 22(c)(2) of Schedule 14A.

If the investment advisor is a partnership with more than ten general partners, the fund must identify (i) the general partners with the five largest economic interests in the partnership and, if different, those general partners comprising the management or executive committee of the partnership or exercising similar authority and (ii) the general partners with significant management responsibilities relating to the fund. Instruction to Item 22(c)(2) of Schedule 14A.

(n114)Footnote 114. Item 22(c)(3) of Schedule 14A.

If any person named in response to Item 22(c)(3) of Schedule 14A is a corporation, the fund must include the percentage of its voting securities owned by its immediate Parent. Instruction 1 to Item 22(c)(3) of Schedule 14A.

If any person named in response to Item 22(c)(3) of Schedule 14A is a partnership, the fund must name the general partners having the three largest percentage interests (computed by whatever method is appropriate in the particular case). Instruction 2 to Item 22(c)(3) of Schedule 14A.

(n115)Footnote 115. Item 22(c)(4) of Schedule 14A.

(n116)Footnote 116. Item 22(c)(5) of Schedule 14A.

As to any officer or director who is not a director or general partner of the investment advisor and who owns securities or has any other material direct or indirect interest in the investment advisor or any other person controlling, controlled by or under common control with the investment advisor, the nature of such interest must be described. Item 22(c)(5) of Schedule 14A.

(n117)Footnote 117. Item 22(c)(6) of Schedule 14A.

The proxy statement or information statement must include the name of each person whose interest in any transaction is described and the nature of the relationship by reason of which such interest is required to be described. Where it is not practicable to state the approximate amount of the interest, the fund must indicate the approximate amount involved in the transaction. Instruction 1 to Item 22(c)(6) of Schedule 14A.

As to any transaction involving the purchase or sale of assets by or to the investment advisor, the proxy statement or information statement must state the cost of the assets to the purchaser and the cost thereof to the seller if acquired by the seller within two years prior to the transaction. Instruction 2 to Item 22(c)(6) of Schedule 14A.

If the interest of any person arises from the position of the person as a partner in a partnership, the proportionate interest of such person in transactions to which the partnership is a party need not be set forth, but the amount involved in the transaction with the partnership must be included. Instruction 3 to Item 22(c)(6).

Item 22(c)(6) of Schedule 14A does not require disclosure of information with respect to any transaction that is not related to the business or operations of the fund and to which neither the fund nor any of its Parents or Subsidiaries is a party. Instruction 4 to Item 22(c)(6) of Schedule 14A.

(n118)Footnote 118. Item 22(c)(7) of Schedule 14A.

(n119)Footnote 119. Item 22(c)(8) of Schedule 14A.

(n120)Footnote 120. Item 22(c)(9) of Schedule 14A.

(n121)Footnote 121. Item 22(c)(9)(i) of Schedule 14A.

(n122)Footnote 122. Item 22(c)(9)(ii) of Schedule 14A.

(n123)Footnote 123. Item 22(c)(9)(iii) of Schedule 14A.

(n124)Footnote 124. Item 22(c)(10) of Schedule 14A.

The proxy statement or information statement must also indicate whether the investment advisor has waived, reduced or otherwise agreed to reduce its compensation under any applicable investment advisory contract.

The information furnished in response to Item 22(c)(10) of Schedule 14A is required to be given in tabular form. Instruction to Item 22(c)(10) of Schedule 14A.

(n125)Footnote 125. Item 22(c)(11) of Schedule 14A.

Conclusory statements or a list of factors will not be considered sufficient disclosure. The discussion should relate the factors to the specific circumstances of the fund and the investment advisory contract for which approval is sought. Instruction to Item 22(c)(11) of Schedule 14A.

(n126)Footnote 126. Item 22(c)(12) of Schedule 14A.

(n127)Footnote 127. "Affiliated Broker" is defined in Item 22(a)(1)(ii) of Schedule 14A as "any broker: (A) That is an affiliated person of the Fund; (B) That is an affiliated person of such person; or (C) An affiliated person of which is an affiliated person of the Fund, its investment adviser, principal underwriter, or Administrator." *17 C.F.R. § 240.14a-101*.

(n128)Footnote 128. Item 22(c)(13) of Schedule 14A.

Each Affiliated Broker must be identified together with the relationships that cause the broker to be an Affiliated Broker. Instruction to Item 22(c)(13) of Schedule 14A.

(n129)Footnote 129. Item 22(c)(14) of Schedule 14A.

(n130)Footnote 130. "Distribution Plan" is defined in Item 22(a)(1)(iii) of Schedule 14A as "a plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940 [*17 C.F.R. § 270.12b-1*]."

(n131)Footnote 131. Information is to be provided on a prospective basis to the extent applicable. Instruction to Item 22(d).

(n132)Footnote 132. Item 22(d)(1) of Schedule 14A.

(n133)Footnote 133. Item 22(d)(2)(i) of Schedule 14A.

(n134)Footnote 134. Item 22(d)(2)(ii) of Schedule 14A.

(n135)Footnote 135. Item 22(d)(2)(iii) of Schedule 14A.

(n136)Footnote 136. Item 22(d)(2)(iv) of Schedule 14A.

(n137)Footnote 137. Item 22(d)(2)(v) of Schedule 14A.

(n138)Footnote 138. Item 22(d)(2)(vi) of Schedule 14A.

(n139)Footnote 139. Item 22(d)(3) of Schedule 14A.

The investment company must include the name of each person whose interest in any transaction is described and the nature of the relationship by reason of which such interest is required to be described. Where it is not practicable to state the approximate amount of the interest, the fund must indicate the approximate amount involved in the transaction. Instruction 1 to Item 22(d)(3) of Schedule 14A.

As to any transaction involving the purchase or sale of assets, the fund must state the cost of the assets to the purchaser and the cost thereof to the seller if acquired by the seller within two years prior to the transaction. Instruction 2 to Item 22(d)(3) of Schedule 14A.

If the interest of any person arises from the position of the person as a partner in a partnership, the proportionate interest of such person in transactions to which the partnership is a party need not be set forth. However, in that case, the fund must state the amount involved in the transaction with the partnership. Instruction 3 to Item 22(d)(3) of Schedule 14A.

No information needs to be given in response to Item 22(d)(3) of Schedule 14A with respect to any transaction that is not related to the business or operations of the fund and to which neither the fund nor any of its Parents or Subsidiaries is a party. Instruction 4 to Item 22(d)(3) of Schedule 14A.

(n140)Footnote 140. Item 22(d)(4) of Schedule 14A. Conclusory statement or a list of factors will not be considered sufficient disclosure. Instruction to Item 22(d)(4).

(n141)Footnote 141. Item 23 of Schedule 14A.

(n142)Footnote 142. Rule 14a-6(a) under the Securities Exchange Act of 1934, reprinted in the Primary Law

Sourcebook, Volume B, Section G.

The 10-day period is computed counting the day of filing of the preliminary material and ending on midnight of the last day of the period. Accordingly, the definitive material may not be sent out until the eleventh day. Rule 14a-6(k), 17 C.F.R. § 240.14a-6(k).

The filing of revised preliminary material does not recommence the 10-day period during which the material must be on file with the Commission, unless the revised material contains material revisions or material new proposals that constitute a fundamental change in the proxy material. Note 1 to Rule 14a-6(a).

If a company incorporates material by reference under Item 13(b) or 14(b) of Schedule 14A (other than an annual report sent to shareholders as required by Rule 14a-3), and the material relates to the same meeting as the proxy statement, the proxy statement must be sent to shareholders at least 20 business days prior to the meeting date. Note D to Schedule 14A.

(n143)Footnote 143. In respect of registered investment companies, different rules apply. No preliminary proxy material may be filed where the only action proposed to be taken is (i) in the case of either a registered investment company or a business development company, a proposal to continue without change any advisory or other agreement which was the subject of a prior solicitation for which proxy material was filed with the Commission and/or (ii) in the case of an open-end registered investment company, a proposal to increase the number of authorized shares.

(n144)Footnote 144. 17 C.F.R. § 240.14a-8. For a discussion of Rule 14a-8, *see* § 7.07 *infra*.

(n145)Footnote 145. Rule 14a-6(a).

A "solicitation in opposition" includes solicitations opposing a proposal that the company supports or supporting a proposal that the company does not expressly support, excluding shareholder proposals. Note 3 to Rule 14a-6(a).

In this case, the company's transmittal letter to the Commission should indicate that the preliminary material is being filed for the sole reason that the company is commenting on or referring to a solicitation in opposition in its proxy materials. Note 4 to Rule 14a-6(a).

(n146)Footnote 146. In general, Rule 0-11 under the Exchange Act, 17 C.F.R. § 240.0-11, requires fees to be paid to the Commission based upon the value of the securities and/or other property involved in the transaction.

(n147)Footnote 147. Rule 14a-6(i), 17 C.F.R. § 240.14a-6(i).

(n148)Footnote 148. 17 C.F.R. § 240.13e-3.

(n149)Footnote 149. 17 C.F.R. § 229.901.

(n150)Footnote 150. Proxy material would be required to be disclosed to federal governmental agencies or departments and to Congress and could be used by the Commission for its own investigatory purposes. Rule 14a-6(e)(2)(ii), 17 C.F.R. § 240.14a-6(e)(2)(ii).

(n151)Footnote 151. The Commission is not required to approve or disapprove proxy material, and a court has no jurisdiction to compel it to do so. *SEC v. Idaho Inv. Corp., Fed. Sec. L. Rep. (CCH) P 92,676* (D. Ida. 1970).

(n152)Footnote 152. Rule 14a-6(h) requires two copies (or three copies in the case of a registered investment company) of the amended material to be marked to show the changes. For filings with the Commission which are submitted electronically, the changes would be marked as prescribed in the EDGAR Filer Manual.

(n153)Footnote 153. 15 U.S.C. § 77h(a). Securities Act § 8(a) provides that if an amendment to a registration statement is filed prior to the effective date of the statement, the registration statement will be deemed to have been filed when the amendment was filed.

(n154)Footnote 154. Rule 14a-6(a) is discussed in n.72 *supra*.

(n155)Footnote 155. 15 U.S.C. § 77h(d). Securities Act § 8(d) permits the Commission to issue a stop order suspending the effectiveness of a registration statement if the Commission finds at any time that it contains an untrue statement of material fact or omits to state a material fact necessary to make the registration statement not misleading.

(n156)Footnote 156. See § 7.09[5] *infra* for a discussion of enforcement of proxy rules by private action.

(n157)Footnote 157. 17 C.F.R. Part 232.

(n158)Footnote 158. Rule 101 of Regulation S--T; 17 C.F.R. § 232.101.

(n159)Footnote 159. Rule 14a-6(b).

(n160)Footnote 160. Rule 14a-6(h), 17 C.F.R. § 240.14a-6(h).

(n161)Footnote 161. Rule 14a-6(b), (c), (h), 17 C.F.R. § 240.14a-6(b), (c), (h).

In respect of personal solicitations, copies of all written instructions or other material which discusses or comments on the merits of any proposal to be acted upon at the meeting and which is furnished to the individuals making the personal solicitation for use in connection with the solicitation is required to be filed with the Commission not later than the date such material is first given to such individuals. Rule 14a-6(c).

In respect of revised proxy material, two of the five copies are required to be filed (three of the five copies for registered investment companies), and must be clearly and precisely marked to indicate the changes thereto. Rule 14a-6(h). For filings with the Commission submitted electronically, the changes would be marked as prescribed in the EDGAR Filer Manual.

In respect of additional soliciting material, copies are required to be filed with the Commission not later than the date first sent to shareholders. Rule 14a-6(b).

(n162)Footnote 162. Rule 14a-6(f), 17 C.F.R. § 240.14a-6(f).

(n182)Footnote 182. 17 C.F.R. § 240.14a-9.

(n183)Footnote 183. Rule 14a-9(a).

(n184)Footnote 184. Rule 14a-9(a), provides as follows:

No solicitation subject to this regulation shall be made by means of any proxy statement, form of proxy, notice of meeting or other communication, written or oral, containing any statement which, at the time and in the light of the circumstances under which it is made, is false or misleading with respect to any material fact, or which omits to state any material fact necessary in order to make the statements therein not false or misleading or necessary to correct any statement in any earlier communication with respect to the solicitation of a proxy for the same meeting or subject matter which has become false or misleading.

See also Mendell v. Greenberg, 927 F.2d 667, 670 (2d Cir. 1990) , modified on other grounds, 938 F.2d 1528 (2d Cir. 1991) , in which the court, citing Rule 14a-9(a), stated that "A proxy statement should honestly, openly and candidly state all the material facts, making no concealment of the proposals it advocates. Unlike poker where a player must conceal his unexposed cards, the object of a proxy statement is to put all one's cards on the table face-up. In this case only some of the cards were exposed; the others were concealed." *Lebhar Friedman, Inc. v. Movielab, Inc.*, Fed. Sec. L. Rep. (CCH) P 93,162 (S.D.N.Y. 1987), in which the court held that the defendant corporation's proxy statement, to be used in connection with a shareholder meeting involving the election of directors, violated Rule 14a-9 because it

omitted recommendations contained in a report by independent counsel that the court considered to be material regarding the capability of the directors. Although the final report was released after the time that the proxy statement had been issued, the defendant directors had received the report and had become aware of its recommendations before the voting date; *Central Foundry Co. v. Gondelman*, 166 F. Supp. 429 (S.D.N.Y.), modified sub nom. *Securities & Exchange Com. v. Central Foundry Co.*, 167 F. Supp. 821 (S.D.N.Y. 1958) (failure to state material facts necessary to make an oral solicitation not false or misleading violated the Exchange Act, 15 U.S.C. § 78a-78jj.)

(n185)Footnote 185. Rule 14a-2(b), 17 C.F.R. § 240.14a-2(b).

(n186)Footnote 186. The adviser may not receive any special commission or remuneration in connection with the furnishing of proxy voting advice from a third party and must disclose any significant relationship with the company (or shareholder proponent) and any material interest in the matter to which the proxy voting advice relates. Rule 14a-2(b)(3), 17 C.F.R. § 240.14a-2(b)(3).

(n187)Footnote 187. See discussion at § 7.02[2] *supra* with respect to exempt solicitations.

(n188)Footnote 188. See *Bolger v. First State Fin. Servs.*, 759 F. Supp. 182, 193 (D.N.J. 1991) (stating that "there is a limit to the amount of disclosure required by section 14(a). Section 14(a) does not require shareholders to be buried in 'an avalanche of trivial information' " (citing *TSC Indus., Inc. v. Northway, Inc.*, 426 U.S. 438, 448-49, 96 S. Ct. 2126, 2132, 48 L. Ed. 2d 757 (1976)); *Perelman v. Pennsylvania Real Estate Inv. Trust*, 432 F. Supp. 1298 (E.D. Pa. 1977), in which the court held that even if certain information omitted from the proxy statement was material, Rule 14a-9, 17 C.F.R. § 240.14a-9, was not violated because the omission of the information did not make the proxy statement false or misleading.

See also *Ash v. Brunswick Corp.*, 405 F. Supp. 234 (D. Del. 1975) (it was not necessary that proxy statement soliciting votes for a stock option plan should advise shareholders of the terms of the plan that would cease to be effective upon the adoption of the new plan, because even if disclosure of the old plan would have been desirable, failure to include disclosures about such plan did not make the proxy statement false or misleading).

(n189)Footnote 189. See *Virginia Bankshares, Inc. v. Sandberg*, 501 U.S. 1083, 111 S. Ct. 2749, 2753, 115 L. Ed. 2d 929 (1991) (holding that a statement of belief by corporate directors about a recommended course of action or why it was recommended may be materially significant since a shareholder would consider it important in deciding how to vote, causing it to fall under Section 14(a)); *Justin Indus., Inc. v. Choctaw Sec., L.P.*, 920 F.2d 262, 267 (5th Cir. 1990) (upon remanding the issue of materiality of failure to disclose amendments to bylaws that made it difficult to remove directors, court stated that changes in the relative power of shareholders and directors "bear a strong semblance of materiality"); *Landy v. Amsterdam*, 815 F.2d 925, 933 (3d Cir. 1987) (holding that failure of proxy statement to disclose the number of shares covered by an investment trust's call option was not a material misrepresentation, where there was no evidence to support the contention that the expired call option had any value to the investment trust); *Allyn Corp. v. Hartford Nat'l Corp.*, Fed. Sec. L. Rep. (CCH) P 98,646 (D. Conn. 1982) (bank involved in a merger misled shareholders with respect to a material fact by presenting an overly optimistic portrait of its financial condition in the proxy materials).

See also *Allen v. Penn Central Co.*, 350 F. Supp. 697 (E.D. Pa. 1972) (shareholder's claim that a proxy statement was incomplete was dismissed; while opposition to the plan by a nominee for director was a material fact, his reasons for opposing the plan need not be included to satisfy Section 14(a)).

See generally Hetzer, *Proxy Regulation: Ensuring Accurate Disclosure Through a Negligence Standard*, 50 *Fordham L. Rev.* 1423 (1982); Herzel & Hagan, *Materiality and the Use of SEC Forms*, 32 *Bus. Law.* 1177 (1977).

(n190)Footnote 190. 426 U.S. 438, 449, 96 S. Ct. 2126, 2133, 48 L. Ed. 2d 757 (1976)

(n191)Footnote 191. For a discussion of the standard for determining materiality under Rule 14a-9, see § 7.09[5][f] *infra*.

Also discussed in § 7.09[2] *infra* are the elements of a private cause of action pursuant to Rule 14a-9.

(n192)Footnote 192. *New England Anti-Vivisection Soc'y, Inc. v. United States Surgical Corp.*, 889 F.2d 1198, 1202 (1st Cir. 1989) (holding that "federal law is satisfied as long as the proxy materials fully and fairly set forth the relevant and material facts from which a reasonable shareholder may draw his own conclusions as to how to vote"); *Lessler v. Little*, 857 F.2d 866, 875, Fed. Sec. L. Rep. (CCH) P 94,020 (1st Cir. 1988) ; *Bolger v. First State Fin. Servs.*, 759 F. Supp. 182, 193 (D.N.J. 1991) ; *Wallerstein v. Primerica Corp.*, 701 F. Supp. 393, 396-97, Fed. Sec. L. Rep. (CCH) P 94,111 (E.D.N.Y. 1988) ; *Kennecott Copper Corp. v. Curtiss-Wright Corp.*, 584 F.2d 1195, 1200, Fed. Sec. L. Rep. (CCH) P 96,565 at pp. 94,355-56 (2d Cir. 1978) (disclosure in a proxy statement that a participant in a contest for corporate control had not made a "detailed study of the consequences" of its program was sufficient to alert shareholders of the lack of a thorough investigation of the matter).

See also *Laurenzano v. Einbender*, 448 F.2d 1, 6 (2d Cir. 1971) .

(n193)Footnote 193. 314 F.Supp. 2d 1119 (U.S.D.C., D.Kan. 2004) .

(n194)Footnote 194. See, e.g., *Gould v. American-Hawaiian S.S. Co.*, 535 F.2d 761, 777-78 (3d Cir. 1976) ; *United Paperworkers Int'l Union v. International Paper Co.*, 801 F. Supp. 1134, 1139-40 (S.D.N.Y. 1992) , modified, *aff'd*, 985 F.2d 1190 (2d Cir. 1993) ; *Bolger v. First State Fin. Servs.*, 759 F. Supp. 182, 193 (D.N.J. 1991) ; *Plant Indus., Inc. v. Bregman*, 490 F. Supp. 265, 269 (S.D.N.Y. 1980) ; *Bertoglio v. Texas International Co.*, 488 F. Supp. 630, 651-52 (D. Del. 1980) .

(n195)Footnote 195. *Unicorp Fin. Corp. v. First Union Real Estate Equity & Mortgage Inv.*, 515 F. Supp. 249, 261 (S.D. Ohio 1981) (proxy statement was not misleading simply because it did not describe what a shareholder believed to be the probable effect of a proposal to disqualify trustees).

(n196)Footnote 196. *Jewelcor, Inc. v. Pearlman*, 397 F. Supp. 221, 247-48 (S.D.N.Y. 1975) (failure of proxy material to disclose that the target company had considered a tender offer for its own stock to combat a threatened takeover did not violate Section 14(a), 15 U.S.C. § 78n(a) or Rule 14a-9, where the contemplated action was one of several alternatives being considered and not a concrete plan being actively implemented).

See also *Keyser v. Commonwealth Nat'l Fin. Corp.*, 644 F. Supp. 1130 (M.D. Pa. 1986) , in which the court denied a motion for summary judgment and failed to enjoin a merger, rejecting the plaintiff's assertion that the defendants had violated Rule 14a-9, *inter alia*, by not disclosing a rival offer. The court held that the rival offer need not be disclosed because it had been withdrawn and was thus no longer available for consideration by the shareholders. The court also stated that disclosure of the rival offer might have been misleading in itself since it was uncertain whether and to what extent it remained a possible avenue for the defendant company.

But cf. 4 L. Loss & J. Seligman, *Securities Regulation*, 2068-2074 (3d ed. 1990 & Supp. 1992) (discussing that "some facts are deemed material even though they concern a prospective and, therefore, contingent event as long as there appears to be a reasonable likelihood of its future occurrence").

(n197)Footnote 197. *Jewelcor, Inc. v. Pearlman*, 397 F. Supp. 221, 247-48 (S.D.N.Y. 1975) (failure of proxy material to state that proposed amendments to certificate of incorporation were designed to combat threatened takeover of target company or entrench its directors in office was not a material omission in violation of Section 14(a), 15 U.S.C. § 78n(a), or Rule 14a-9).

See also *Bertoglio v. Texas International Co.*, 488 F. Supp. 630 (D. Del. 1980) .

(n198)Footnote 198. See *Freer v. Mayer*, 796 F. Supp. 89 (S.D.N.Y. 1992) ("[t]here is no requirement that directors reveal the rationale for a business transaction described in a proxy"); *Wilson v. Great American Indus., Inc.*, 661 F. Supp. 1555, 1566 (N.D.N.Y. 1987) (failure to disclose unsubstantiated opinion of president of housing project's "true value" was not a material omission where shareholders were provided with detailed information on the financial condition of the project from which to draw their own conclusions), *rev'd*, 855 F.2d 987 (2d Cir. 1987) ; *Shapiro v. Belmont Indus., Inc.*, 438 F. Supp. 284 (E.D. Pa. 1977) (proxy statement was not misleading for not informing shareholders of the actual reasons for the resignation of two directors where there was no showing that the directors did not resign for the reasons stated in the proxy statement); *Mendell v. Greenberg*, 927 F.2d 667, 674 (2d Cir. 1990) ; *Lewis v. Potlatch Corp.*, 716 F. Supp. 807, 809 (S.D.N.Y. 1989) .

(n199)Footnote 199. See *Virginia Bankshares, Inc. v. Sandberg*, 501 U.S.1083, 111 S. Ct. 2749, 115 L. Ed. 2d 929 (1991) , in which minority shareholders of the defendant bank challenged representations made by the bank's board regarding the fairness of a proposed merger. The Court held that conclusory statements that the merger was fair were actionable if plaintiffs proved that the board knowingly offered false reasons for its conclusions, stating that under Section 14(a), "a plaintiff is permitted to prove a specific statement of reason knowingly false or materially incomplete, even when stated in conclusory terms." 111 S. Ct. at 2759 .

(n200)Footnote 200. See *Gerstle v. Gamble-Skogmo, Inc.*, 478 F.2d 1281, 1292-93 (2d Cir. 1973) .

See also *Allyn Corp. v. Hartford Nat'l Corp.*, Fed. Sec. L. Rep. (CCH) P 98,646 (D. Conn. 1982), in which a bank involved in a merger misled shareholders by inconsistently describing dividend projections in a transmittal letter to shareholders and in the proxy statement. The message conveyed by each of the two statements was not the same; the transmittal letter was optimistic and confident and the proxy statement was guarded and circumspect.

(n201)Footnote 201. See *United States v. Matthews*, 787 F.2d 38, 46 (2d Cir. 1986) stating that "[t]he SEC disapproves of attacks on character without complete and adequate supporting data, the Commission's position being that such attacks are contrary to the standards of fair disclosure unless they are in fact true."

(n202)Footnote 202. See *Mack v. Mishkin*, 172 F. Supp. 885, 888 (S.D.N.Y. 1959) , *Gould v. American Hawaiian S.S. Co.*, 331 F. Supp. 981, 990-92 (D. Del. 1971) (holding that statement that 64 percent of the shareholders were contractually committed to vote in defendant's favor falsely gave the impression that the election was decided and was therefore actionable under Rule 14a-9).

But see *Management Assistance Inc. v. Edelman*, 584 F. Supp. 1016, 1019-20 (S.D.N.Y. 1984) (holding that a statement that management group will win, which does not claim a present victory but merely predicts what results will be in future, is not proscribed by Rule 14a-9); *Kennecott Copper Corp. v. Curtiss-Wright Corp.*, 449 F. Supp. 951, 960 (S.D.N.Y.), *aff'd in part, rev'd in part*, 584 F.2d 1195 (2d Cir. 1978) , (finding that a prediction of victory at a press conference was "an acceptable exclamation of confidence that would not divert a reasonable shareholder from the task of coolly determining how best to vote his shares in light of the opposing platforms").

(n203)Footnote 203. The Commission withdrew the reference in the Note to Rule 14a-9, to prediction of dividends as an example of a false or misleading statement, however, in connection with the Commission's adoption of a safe harbor for projections made in good faith and with a reasonable basis in filings with the Commission and in annual reports to shareholders. Sec. Exch. Act Rel. No. 15944, Fed. Sec. L. Rep. (CCH) P 82,117 (1979). Regarding the revision of this Note, see 4 L. Loss & J. Seligman, Securities Regulation 2054 n.351 (3d ed. 1990 & Supp. 1992) (citing *Walker v. Action Indus., Inc.*, 802 F.2d 703, 707-10 (4th Cir. 1986) , *cert. denied*, 479 U.S. 1065 (1987) ; *South Coast Servs. Corp. v. Santa Ana Valley Irrigation Co.*, 669 F.2d 1265, 1271-72 n.3 (9th Cir. 1982)) .

In Sec. Exch. Act Rel. No. 16833, Fed. Sec. L. Rep. (CCH) P 24,117 (1980), the Commission presented its views with respect to disclosure in a proxy contest where a principal issue in contention is the liquidation of all or a part of the equity of a company with proceeds to be made available to shareholders. Those sponsoring a proposal often project the

dollar amount per share to be available to shareholders if such proposal is effected. These valuations in proxy soliciting material are appropriate and consonant with Rule 14a-9, when made in good faith and on a reasonable basis and when accompanied by disclosure which facilitates shareholders' understanding of the basis for and the limitations on the projected realization. Where material has been prepared and published by an independent party for purposes other than use in connection with the proxy contest and is offered as support for the valuation, the reasonableness of reliance on the material will be dependent on its original context and purpose, the qualifications of the author, and its currency.

(n204)Footnote 204. 17 C.F.R. § 240.3b-6.

(n205)Footnote 205. A forward-looking statement (as defined) made by a company in a document filed with the Commission, in Part 1 of Form 10-Q or in an annual report to shareholders is deemed not to be fraudulent unless such statement "was made or reaffirmed without a reasonable basis or was disclosed other than in good faith." Rule 3b-6 under the Exchange Act.

For a discussion of Rule 3b-6 with respect to annual reports to shareholders under Rule 14a-3(b) and (c) or Rule 14c-3(a) and (b), 17 C.F.R. § 240.14c-3(a) and (b), *see* § 4.04 *supra*.

(n206)Footnote 206. These provisions of Rule 14a-9(b), 17 C.F.R. § 240.14a-9(b), are consistent with Section 26 of the Exchange Act, 15 U.S.C. § 78z, which makes it unlawful to:

- (1) construe any act or omission by the Commission to mean that the Commission has passed on the merits of or approved a security or transaction;
- (2) consider any Commission action or failure to act upon a statement or report filed with or examined by it as a finding that the report or statement is true and accurate on its face or not false or misleading; or
- (3) represent to a prospective purchaser or seller of a security that the act or omission by the Commission should be construed to mean that the merits of the security or transaction has been approved or be considered as a finding that the statement or report is true and accurate on its face or not false or misleading.

(n207)Footnote 207. The Commission maintains that no inference at all is to be drawn from its clearance of proxy material. *See Klatorin v. Roth*, 353 F.2d 182, 183 (2d Cir. 1965). Furthermore, preparation of the proxy statement in consultation with the staff of the Commission "cannot affect the sufficiency as a matter of law of the allegations of the complaint." *Subin v. Goldsmith*, 224 F.2d 753, 774 (2d Cir.) (Medina, C.J. dissenting in part), *cert. denied*, 350 U.S. 883 (1955).

The opinion in *Millimet v. George F. Fuller Co.*, *Fed. Sec. L. Rep. (CCH) P 91,570*, at 95,156 (S.D.N.Y. 1965) makes the following observation:

Movant Fuller argues that "great deference should be paid" by this court to "clearance" of the Proxy Statement by the Commission (Reply Memorandum, page 7). This argument cannot be accepted. "Clearance" by the Commission, as I understand it, means merely an indication by the Commission that it will take no action under Section 21(e) of the Act (15 U.S.C. P 78u(e)) to enjoin (*sic*) use of the proxy statement. It is specifically provided in Section 26 of the Act (15 U.S.C. § 78z) that failure of the Commission to act shall not be construed to mean any approval. The Commission has apparently taken the position that no inference should be drawn from a failure by it to act. See 2 Loss, Securities Regulation (2d ed.) 953-4. In *J.I. Case Co. v. Borak*, above, the Commission filed a brief *amicus curiae* arguing ..., among other things, that examination by it of proxy material and its failure to object "should have no effect upon a subsequent private suit based upon the material." The Supreme Court appears to

have accepted this argument, for the opinion states (377 U.S. at 432):

The Commission advises that it examines over 2,000 proxy statements annually and each of them must necessarily be expedited. Time does not permit an independent examination of the facts set out in the proxy material and this results in the Commission's acceptance of the representation contained therein at their face value, unless contrary to other material on file with it.

Fed. Sec. L. Rep. (CCH) P 91,570, at 95,156.

Nevertheless, there is a definite inclination in some courts to attribute some significance to such clearance. *See Mack v. Mishkin*, 172 F. Supp. 885, 888 (S.D.N.Y. 1959) :

While I am aware that the action of the Securities and Exchange Commission is in no way binding on the Court, I must give some deference to both their action and inaction in the present case. All of the proxy material, including the press release and the newspaper advertisement, utilized by defendants was in accordance with the generally accepted procedure, submitted to the staff of the Securities and Exchange Commission for prior approval. Presumably, certain changes were required before issuance. I realize that the submission of the material is *ex parte* in nature; nevertheless, the fact that the staff of the Securities and Exchange Commission has presumably approved the issuance of the material must be given some weight. In addition, with full knowledge of all of the facts presented herein, the Securities and Exchange Commission, although it has jurisdiction to bring an action such as brought by plaintiffs, has not.

See also the following cases in which the courts deferred to such clearance:

Second Circuit: General Time Corp. v. Talley Indus., Inc., 283 F. Supp. 832 (S.D.N.Y. 1968) , *rev'd on other grounds*, 403 F.2d 159 (2d Cir. 1968) , *position reiterated in later appeal in same case*, 403 F.2d 159 (2d Cir. 1968) , *cert. denied*, 393 U.S. 1026 (1969) ; *Armour & Co. v. General Host Corp.*, 296 F. Supp. 470 (S.D.N.Y. 1969) ; *Sherman v. Posner*, 266 F. Supp. 871 (S.D.N.Y. 1966) ; *Shvetz v. Industrial Rayon Corp.*, 212 F. Supp. 308 (S.D.N.Y. 1960) ; *Dunn v. Decca Records, Inc.*, 120 F. Supp. 1 (S.D.N.Y. 1954) .

Tenth Circuit: Sunray DX Oil Co. v. Helmerich & Payne, Inc., 398 F.2d 447 (10th Cir. 1968) .

(n208)Footnote 208. *See* 4 L. Loss & J. Seligman, Securities Regulation 2052-85 (3d ed. 1990 & Supp. 1992) for cases and authorities on false and misleading statements under Rule 14a-9.

Second Circuit: Gerstle v. Gamble-Skogmo, Inc., 478 F.2d 1281 (2d Cir. 1973) (proxy statement seeking shareholder approval of a merger was misleading for failing to disclose management's intention of aggressively pursuing a policy of selling the assets of the other company after the merger); *Kennecott Copper Corp. v. Curtiss-Wright Corp.*, 449 F. Supp. 951 (S.D.N.Y.) , *aff'd in part, rev'd in part*, 584 F.2d 1195 (2d Cir. 1978) (statement in proxy material by a participant in a contest for corporate control that it had not made a "detailed study of the consequences" of selling a corporate subsidiary did not mislead shareholders to believe that the feasibility of the proposed sale had been "thoroughly studied").

Ninth Circuit: South Coast Servs. Corp. v. Santa Ana Valley Irrigation Co., 669 F.2d 1265 (9th Cir. 1982) (a company's omission of its board of director's estimates of the fair market value of company property from a proxy statement did not violate Rule 14a-9); *SEC v. American Real Estate Inv. Trust*, 529 F. Supp. 1300 (C.D. Cal. 1982) (proxy solicitations that overstated a company's net worth, inflated the company's growth record, and included an annual report that contained misleading information violated Section 14(a), 15 U.S.C. § 78n(a) and Rule 14a-9).

(n209)Footnote 209. *Bolger v. First State Fin. Servs.*, 759 F. Supp. 182, 191-92 (D.N.J. 1991) (holding that shareholders alleging insufficient disclosure in proxy statements did not show an actual threat of irreparable harm and therefore injunctive relief was denied, where election could be voided and new election ordered, if necessary); *Wetter v. Caesars World, Inc.*, 541 F. Supp. 68 (D.N.J. 1982) (although proxy solicitations for the repurchase of stock from two major shareholders may have been misleading, injunctive relief was denied since any harm caused by the proxies was not irreparable; if the proxies were later found to be defective, the tainted transaction could be set aside and a resolicitation ordered).

(n210)Footnote 210. *SEC v. May*, 134 F. Supp. 247, 252 (S.D.N.Y. 1955) , *aff'd*, 229 F.2d 123 (2d Cir. 1956) . See also 4 L. Loss & J. Seligman, Securities Regulation 2057 n.362, 2052-85 (3d ed. 1990).

(n211)Footnote 211. The court in *Gould v. American-Hawaiian S.S. Co.*, 535 F.2d 761, 774 (3d Cir. 1976) stated as follows:

The defendant-appellants argue, on the other hand, that the facts which were stated in various parts of the documents did constitute an adequate disclosure of the conflicting interests of the three directors in question. While we find ourselves in general accord with Judge Mansfield's statement in *Richland v. Crandall*, 262 F. Supp. 538, 554 (S.D.N.Y. 1967) , that "corporations are not required to address their stockholders as if they were children in kindergarten," we also bear in mind Judge Friendly's admonition in *Gerstle v. Gamble-Skogmo, Inc.*, 478 F.2d 1281, 1297 (2d Cir. 1973) , who, after quoting Judge Mansfield's statement, said that "it is not sufficient that overtones might have been picked up by the sensitive antennae of investment analysts." In the present case many of the statements upon which the defendant-appellants rely are scattered through and rather buried in the lengthy proxy statement. There is nowhere a statement giving emphasis to the conflicts of interest similar to that given to the board's approval of the merger agreement. We conclude that the district court did not err in holding on summary judgment that the proxy materials were materially deficient in this respect. [Footnote omitted.]

See *United States v. Natelli*, 527 F.2d 311 (2d Cir. 1975) , *cert. denied*, 425 U.S. 934 (1976) (criminal conviction for "burying" earnings decrease in financial statements).

(n212)Footnote 212. *Richland v. Crandall*, 262 F. Supp. 538, 554 (S.D.N.Y. 1967) .

(n213)Footnote 213. "[C]orporations are not required to address their stockholders as if they were children in kindergarten." *Id.* See *Harner v. Prudential Sec.*, 785 F. Supp. 626, 641 (E.D. Mich. 1992) (holding, in the related context of actions under Section 10(b) of the Exchange Act, 15 U.S.C. § 78j(b), that defendants were not required to condescend to the plaintiffs, as the law assumes a certain level of comprehension and judgment among investors).

See also *Consolidated Goldfields v. Anglo*, 713 F. Supp. 1457, 1470 (S.D.N.Y. 1989) ; *Shvets v. Industrial Rayon Corp.*, 212 F. Supp. 308 (S.D.N.Y. 1960) .

But see Fed. Sec. L. Rep. (CCH) P 82,236, at p. 85,221 (1982), in which the Commission stated the following in its release proposing Item 404 of Regulation S-K, 17 C.F.R. § 229.404: "To the extent that a proxy statement is overly complicated and difficult to read, it may not effectively perform its intended function of communicating meaningful information to security holders in order that they may make informed voting decisions."

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.05

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.05 Proxy Card

A proxy executed by a shareholder grants authority to a third party, the proxyholder, to vote the shares owned by the shareholder at the shareholders' meeting. The proxy card, or form of proxy, must be in a specific form and contain information required by Rule 14a-4.

A proxy card, or form of proxy, must indicate in bold face type whether or not it is being solicited on behalf of the company's board of directors. If it is not being solicited on behalf of the board of directors, the proxy card must state on whose behalf the solicitation is being made. n1 Many public companies use a computerized form of proxy card when soliciting proxies for shareholder meetings; however, as long as the form of proxy complies with the requirements of Rule 14a-4, it can be in any other form. The rules of the Commission do not regulate the color, size or other attributes of a proxy card. The proxy card must contain a blank space specifically designated for dating the proxy card. n2

The proxy card must "identify clearly and impartially each separate matter intended to be acted upon, whether or not related to or conditioned on the approval of other matters, and whether proposed by the registrant or by security holders." n3

Rule 14a-4(a)(3) and (b)(1) requires that the proxy card provide for a separate vote on each matter presented, whether or not the matter is conditioned upon approval of any other matter to be voted upon at the meeting. n4

In a case of first impression, it has been held that a private right of action exists under each of these rules where the security holder was improperly denied the opportunity to vote on each separate matter for which a proxy was solicited. n5

The proxy card is not required to contain a reference to matters as to which discretionary authority is granted. n6

A proxy card may grant the proxyholder discretion to vote on matters that are not identified in the proxy card. Rule 14a-4(c) specifies the following subjects about which discretionary authority may be granted:

- for an annual meeting of shareholders, if the company did not have notice of the matter at least 45

days before the date on which the company first mailed its proxy materials for the prior year's annual meeting of shareholders (or the date specified by an advance notice provision) and a specific statement to that effect is made in the proxy statement or form of proxy; n7

- in the case in which the company has received timely notice in connection with an annual meeting of shareholders (as determined under Rule 14a-4(c)(1)), if the company includes in its proxy statement advice on the nature of the matter and how the company intends to exercise its discretion to vote on each matter; n8

- for solicitations other than for annual meetings or for solicitations by persons other than the company, matters which the person making the solicitation do not know, a reasonable time before the solicitation, are to be presented at the meeting, if a specific statement to that effect is made in the proxy statement; n9

- approval of the minutes of the prior meeting of shareholders if such approval does not amount to ratification of the action taken at that meeting; n10

- the election of any person to any office for which a bona fide nominee is named in the proxy statement and such nominee is unable to serve or for good cause will not serve; n11

- any proposal omitted from the proxy statement and form of proxy pursuant to Rule 14a-8 or Rule 14a-9; n12 and

- matters incident to the conduct of the meeting. n13

Notwithstanding the general rule that a company may exercise discretion with respect to matters as to which it has received timely notice so long as it includes certain information in its proxy statement, n14 the company may not exercise discretionary authority if the proponent:

- provides the company with a written statement, within the time--frame determined under Rule 14a-4(c)(1), that the proponent intends to deliver a proxy statement and form of proxy to holders of at least the percentage of the company's voting shares required under applicable law to carry the proposal; n15

- includes the same statements in its proxy materials filed with the Commission; n16 and

- immediately after soliciting the percentage of shareholders required to carry the proposal, provides the company with a statement from any solicitor or other person with knowledge that the necessary steps have been taken to deliver a proxy statement and form of proxy to holders of at least the percentage of the company's voting shares required under applicable law to carry the proposal. n17

Discretionary authority may also be granted to the proxyholder to vote on matters that are identified in the proxy card but on which the shareholder has not specified a choice. In such case the proxy card must contain a statement, in bold face type, of how the proxyholder intends to vote the shares in each case. n18

If the meeting relates to an annual or special meeting at which directors are to be elected, Rule 14a-4(b)(2) requires that the names of the nominees be included in the proxy card. In addition, it contains specific requirements relating to the form and content of the proxy card. n19 For example, if the proxy card permits the shareholder to vote for a slate of directors as a group, similar means must be provided for the shareholder to withhold authority to vote for the group. n20 Rule 14a-4(b)(2) also contains specific requirements regarding the method by which a shareholder may withhold

authority to vote for specified nominees. n21 If state law gives legal effect to votes cast against a nominee (as compared to votes that withhold authority to vote for a nominee), then the proxy card must provide a means for the shareholder to vote against the nominee, either in addition to or in lieu of providing a means for the shareholder to withhold authority to vote for such nominee. n22 If, however, the shareholder executes the proxy card but does not withhold authority to vote for a specified nominee it will be deemed to constitute a vote for the election of such nominee, provided that the proxy card so states in bold face type. n23

In general, a proxy card may not confer authority to vote for the election of a person to any office if such person is not named in the proxy statement or such person has not consented to serve if elected. n24 However, the rules permit persons seeking to elect a minority of directors to the board (*i.e.*, dissident shareholders) to solicit authority to vote in favor of selected nominees from management's slate of directors, notwithstanding the fact that such persons are not named in the dissident's proxy statement. n25 In such case, the dissident must (i) seek authority to vote for the entire number of director positions then subject to election, (ii) represent that it will vote for management's nominees other than those named by the dissident, and (iii) provide a means by which the shareholder may withhold authority to vote for any of management's nominees who would be elected to office with the dissident's nominees. n26 The dissident's proxy card and proxy statement must, however, include a statement to the effect that no assurance can be given that management's nominees will serve as directors with the dissident's nominees if elected to the company's board of directors. n27

For all matters other than elections to office, the proxy card is required to contain boxes that may be marked by the shareholder to specify his or her vote. A shareholder is required to be provided with three boxes for each such matter: (i) a box indicating approval; (ii) a box indicating disapproval; and (iii) a box indicating that the shareholder is abstaining from voting on the matter. n28

The rules prohibit companies from soliciting proxies that relate to more than one annual meeting of shareholders, or that relate to a meeting of shareholders that is subsequent to the next scheduled meeting. A proxy card would, however, be valid at a reconvened meeting of shareholders if the originally scheduled meeting were adjourned. n29 Rule 14a-4(d)(4) prohibits a proxy from conferring authority to authorize any action that is not described in the proxy statement, other than action that is taken pursuant to discretionary authority.

The company's proxy statement or proxy card is required to contain a representation that the shares covered by the proxy will be voted and that, if the shareholder specifies a choice on how to vote, the shares will be voted in accordance with such specifications. n30

A proxy card is not permitted to be distributed to shareholders unless the shareholder has previously received (or concurrently receives) a definitive proxy statement that has been filed or mailed for filing with the Commission. n31

A proxy card that contains a simple statement that the company recommends a vote FOR or AGAINST a certain proposal is permitted, but electioneering or obscurative or similar material may not be included. n32

Some proxy cards contain a statement to the effect that any shareholder who wishes to attend the meeting may revoke his proxy and vote in person. The rights and responsibilities of a shareholder who revokes a proxy and wishes to vote in person are subject to state law. n33

An example of a proxy card for an annual meeting of shareholders at which directors are to be elected and ratification of the selection of independent accountants is to be voted upon is set forth below.

SAMPLE PROXY

WHAT FOLLOWS IS NOT AN ACTUAL PROXY

(Side One)**[NAME OF COMPANY]**

**PROXY SOLICITED ON BEHALF OF BOARD OF DIRECTORS
FOR THE ANNUAL MEETING OF SHAREHOLDERS OF
(NAME OF COMPANY)**

TO BE HELD ON _____

The undersigned hereby appoints _____, _____ and _____, and each of them, as proxies for the undersigned with full powers of substitution to vote all shares of the Common Stock of (Name of Company) (the "Company") which the undersigned may be entitled to vote n34 at the Annual Meeting of Shareholders of the Company to be held at (address) at (time) [a.m.] [p.m.], local time, on (date), or at any adjournments thereof as follows:

(TO BE SIGNED AND DATED ON REVERSE SIDE)**SAMPLE PROXY****WHAT FOLLOWS IS NOT AN ACTUAL PROXY****(Side Two)**

THIS PROXY WHEN PROPERLY EXECUTED WILL BE VOTED IN THE MANNER DIRECTED HEREIN BY THE UNDERSIGNED SHAREHOLDER. IF NO DIRECTION IS SPECIFIED, THIS PROXY WILL BE VOTED "FOR" PROPOSALS 1 AND 2 .

1. The election of Directors: [insert names of nominees]

FOR each nominee listed above☐

(except as marked to the contrary below)

WITHHOLD AUTHORITY to vote
for all nominees listed above☐**INSTRUCTION:**

To withhold authority to vote for any individual nominee, write that nominee's name on the space provided below:

2. Proposal to ratify the appointment of [insert name of accounting firm] as independent accountants for the year ending [insert date]

FOR ☐ **AGAINST** ☐ **ABSTAIN** ☐

3. In their discretion the proxies are authorized to vote upon such other business as may properly come before the Annual Meeting of Shareholders or any adjournments thereof.

The undersigned acknowledges receipt of the Notice of Annual Meeting and Proxy Statement.

PLEASE MARK, DATE AND SIGN THIS PROXY AND RETURN IT PROMPTLY IN THE ENCLOSED ENVELOPE.

FOOTNOTES:

(n1)Footnote 1. Rule 14a-4(a)(1) under the Securities Exchange Act of 1934 is reprinted in the Primary Law Sourcebook, Volume B, Section F.

(n2)Footnote 2. Rule 14a-10 prohibits solicitation of an undated or post-dated proxy, and forbids proxy cards which are deemed to be dated subsequent to the date of execution by the shareholder. Rule 14a-4(a)(2). Rule 14a-10 does not specifically invalidate an undated proxy card. If the proxy is not returned properly dated, the postal dating on the returned envelope is probably sufficient to validate it.

(n3)Footnote 3. Rule 14a-4(a)(3).

(n4)Footnote 4. Sec. Exch. Act. Rel. No. 34-31326, Fed. Sec. L. Rep. (CCH) P 85,051, 57 FR 48276 (Oct. 22, 1992) .

While this rule is applied in a rigorous fashion by the SEC, the Commission will entertain exceptions where the application of the rule could involve a serious risk of misunderstanding on the part of the voting shareholder.

Prior to adoption of these rules in 1992, a company was expressly permitted to give the shareholder a single vote on a "group of related matters." Where the company expressly conditioned approval of one matter on approval of another related matter, the matters were not required to be separately set forth in the proxy card.

(n5)Footnote 5. *Koppel v. 4987 Corp.*, 167 F.3d 125 (2d Cir. 1999) .

(n6)Footnote 6. Rule 14a-4(a)(3).

(n7)Footnote 7. Rule 14a-4(c)(1); 17 C.F.R. § 240.14a-4(c)(1). The release adopting amendments to Rule 14a-4 in 1998 makes clear that the requirements of an advance notice by-law provision will take precedence over the 45--day period specified in the Rule. Under certain circumstances, the period determined in accordance with an advance notice period may be shorter than the 45--day period. The 45--day period specified in Rule 14a-4(c)(1) is measured from the date of mailing of the prior year's proxy material whereas advance notice bylaw provisions often specify a period based on the date of the prior year's annual meeting. If the company did not hold an annual meeting during the prior year or if the date of the meeting has changed more than 30 days from the prior year, then notice must have been received a reasonable time before the registrant mails its proxy materials for the current year.

(n8)Footnote 8. Rule 14a-4(c)(2); 17 C.F.R. § 240.14a-4(c)(2). Even if the information specified in Rule 14a-4(c)(2) is included in the company's proxy statement, its ability to exercise discretionary authority with respect to the matters identified may be limited. Such limitations are described below.

(n9)Footnote 9. Rule 14a-4(c)(3); 17 C.F.R. § 240.14a-4(c)(3).

(n10)Footnote 10. Rule 14a-4(c)(4); 17 C.F.R. § 240.14a-4(c)(4).

(n11)Footnote 11. Rule 14a-4(c)(5); 17 C.F.R. § 240.14a-4(c)(5).

(n12)Footnote 12. Rule 14a-4(c)(6); 17 C.F.R. § 240.14a-4(c)(6).

Rule 14a-8, 17 C.F.R. § 240.14a-8, and Rule 14a-9, 17 C.F.R. § 240.14a-9 are discussed below.

(n13)Footnote 13. Rule 14a-4(c)(7); 17 C.F.R. § 240.14a-4(c)(7).

(n14)Footnote 14. Such information is the nature of the matter and how the company intends to exercise its discretion to vote on each matter. Rule 14a-4(c)(2); 17 C.F.R. § 240.14a-4(c)(2).

(n15)Footnote 15. Rule 14a-4(c)(2)(i); 17 C.F.R. § 240.14a-4(c)(2)(i).

(n16)Footnote 16. Rule 14a-4(c)(2)(ii); 17 C.F.R. § 240.14a-4(c)(2)(ii).

The requirements for filing proxy materials with the Commission arise under Rule 14a-6 (17 C.F.R. § 240.14a-6) which is described elsewhere herein.

(n17)Footnote 17. Rule 14a-4(c)(2)(iii); 17 C.F.R. § 240.14a-4(c)(2)(iii).

(n18)Footnote 18. Rule 14a-4(b)(1).

(n19)Footnote 19. The provisions of Rule 14a-4(b)(2) are not applicable to a merger, consolidation or other plan if the election of directors is an integral part thereof. Instruction 1 to Rule 14a-4(b)(2).

(n20)Footnote 20. The rule does not require that the proxy card contain a method by which the shareholder may vote against the slate of directors as a group.

(n21)Footnote 21. The proxy card may provide the following means for shareholders to withhold authority to vote for director-nominees:

(i) a box opposite the name of each nominee which may be marked to indicate that authority to vote for such nominee is withheld; or

(ii) an instruction in bold-face type which indicates that the security holder may withhold authority to vote for any nominee by lining through or otherwise striking out the name of any nominee; or

(iii) designated blank spaces in which the security holder may enter the names of nominees with respect to whom the shareholder chooses to withhold authority to vote; or

(iv) any other similar means, provided that clear instructions are furnished indicating how the security holder may withhold authority to vote for any nominee.

Rule 14a-4(b)(2)(i)-(iv).

(n22)Footnote 22. Instruction 2 to Rule 14a-4(b)(2).

(n23)Footnote 23. Rule 14a-4(b)(2).

(n24)Footnote 24. Rule 14a-4(d)(1) and (4).

(n25)Footnote 25. Prior to amendment of the so-called "bona fide nominee rule" in October 1992, a dissident shareholder's proxy card could not grant authority to the proxyholder to vote for any of management's nominees. If a shareholder cast his or her vote using the dissident's proxy card, such shareholder was effectively barred from voting for any of management's nominees. *See* Sec. Exch. Act Rel. No. 34-31,326, Fed. Sec. L. Rep. (CCH) P 85,051, 57 FR 48276 (Oct. 22, 1992) .

(n26)Footnote 26. Procedurally, this could be accomplished by including the following in the dissident's proxy card: (1) the names of the dissident's nominees; (2) the names of the management nominees whom the dissident will not vote for; (3) a statement that the dissident will vote for the management nominees who are not named; and (4) a method for the shareholder to withhold authority to vote for management's nominees, by including a space in which the shareholder may write the name of such nominee or nominees.

(n27)Footnote 27. Rule 14a-4(d).

(n28)Footnote 28. Rule 14a-4(b)(1).

(n29)Footnote 29. Rule 14a-4(d)(2) and (3). Despite the reference in Rule 14a-4(d)(2) to "the next annual meeting," it should apply to special meetings of shareholders as well. *See* Aranow & Einhorn, *Proxy Contests for Corporate Control* 164 (2d ed. 1968).

(n30)Footnote 30. Rule 14a-4(e).

(n31)Footnote 31. For companies filing with the Commission, the "mailed for filing" option is, as a practical matter, not available because the definitive proxy material must be filed electronically.

Rule 14a-4(f).

Subsection (f) of Rule 14a-4, which was added in October 1992, permits a solicitation of proxies to commence upon delivery to the shareholder of a preliminary, as compared to a definitive, proxy statement. However, no proxy card may be given until the definitive proxy statement is delivered. *See* § 7.02 *supra*.

(n32)Footnote 32. "Among the devices which the Commission will regard as contrary to the section are arguments or recommendations as to the merits of proposals, emphasis upon the management's position beyond the mere statement of the fact that the management favors or opposes a proposal, the use of arrows or any other visual device designed to direct the stockholder's attention to the place on the proxy for voting one way and away from the place for voting the contrary and the switching of boxes in order to procure the result desired by the management." Sec. Exch. Act Rel. No. 4185, Fed. Sec. L. Rep. (CCH) P 24,101, 13 FR 6680 (1948) .

(n33)Footnote 33. *See* 9 Cavitch, *Business Organizations* ch. 110 (Matthew Bender & Co., Inc. 2007).

(n34)Footnote 34. If a company has in effect a dividend reinvestment plan, a proxy card may confer authority to vote the shares allocated to the shareholder's account under the plan. The following may be used for this purpose: (including shares, if any, held on behalf of the undersigned, and indicated on the reverse side hereof, by (name), under the Company's dividend reinvestment plan).

(n35)Footnote 35. For planning purposes, some proxy cards request that the shareholder indicate whether or not

the shareholder intends to attend the annual meeting. In some cases, admission tickets are thereafter mailed to the shareholder and are required for entrance to the annual meeting.

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.06

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.06 Requirements If Proxies Not Solicited--Section 14(c); Regulation 14C

Section 14(c) of the Exchange Act n1 extended the protection of the proxy rules to shareholders in public companies that do not solicit proxies. The general tenor of Section 14(c) was described as follows in the House Committee Report:

[Section 14(c)] would empower the Commission to adopt rules and regulations to require issuers that do not solicit proxies in connection with an annual or other meeting of shareholders to file with the Commission and to transmit to record holders of its registered securities information substantially equivalent to that which would be required to be transmitted if a solicitation were made. The information would be distributed to shareholders prior to the annual or other meeting of shareholders and would pertain to all matters to be voted upon at such meeting as to which disclosure would be required in solicitation materials under the proxy rules. n2

Pursuant to the authority granted to it under Section 14(c), the Commission adopted Regulation 14C, n3 which requires the distribution of an information statement if corporate action by shareholders is proposed to be taken but proxies, consents or authorizations are not to be solicited in accordance with Regulation 14A. n4 The information required to be included in the information statement is substantially the same as the information that would be required in a proxy statement were proxies being solicited. n5 Regulation 14C applies to any company with a class of securities registered under Section 12 of the Exchange Act n6 or that is registered as an investment company under the Investment Company Act of 1940. n7 It is especially important to note that preparation and distribution of an information statement is required whether the action is proposed to be taken (i) at a meeting for which proxies are not solicited or (ii) by written consent or authorization without a meeting.

[1] Contents of the Information Statement--Schedule 14C

Schedule 14C n8 requires disclosure of the four items described below. n9 Rule 14c-4 n10 provides that the information included in an information statement must be clearly presented and divided into appropriate sections with appropriate captions. As in the case of a proxy statement, no statement need be made in response to any item that is inapplicable. n11 Further, any information required to be included in an information statement as to the terms of securities or other subject matter that from a standpoint of practical necessity must be determined in the future may be stated in terms of

present knowledge and intention; subject to this qualification, any information that is not known to the company and that is not reasonably within the power of the company to ascertain or procure may be omitted if a brief statement of the circumstances rendering the information unavailable is made. n12 Technical requirements applicable to information statements are prescribed in Rule 14c-4. n13

[a] Item 1. Information Required by Items of Schedule 14A. In general, Item 1 of Schedule 14C requires a company to furnish as part of the information statement all the information called for by Schedule 14A n14 that would be applicable to any matters to be presented at the meeting if proxies were to be solicited in connection with the meeting. Notwithstanding this general requirement, an information statement need not include the information required by Item 1(c) of Schedule 14A (a statement of the date by which shareholder proposals intended to be presented at the next annual meeting must be received by the company for inclusion in the company's proxy material), Item 2 of Schedule 14A, "Revocability of Proxy," Item 4 of Schedule 14A, "Persons Making the Solicitation," and Item 5 of Schedule 14A, "Interest of Certain Persons in Matters to Be Acted Upon." n15 Notes A, C, D and E to Schedule 14A are also applicable to Schedule 14C. n16

[b] Item 2. Statement That Proxies Are Not Solicited. Item 2 of Schedule 14C requires that the following statement be included on the first page of the information statement in bold-face type: **"We Are Not Asking You for a Proxy and You Are Requested Not To Send Us a Proxy."**

[c] Item 3. Interest of Certain Persons in or Opposition to Matters to Be Acted Upon. Item 3 of Schedule 14C provides for disclosure of any substantial interest, direct or indirect, by security holdings or otherwise, of any person who has been a director or officer n17 of the company at any time since the beginning of the company's last fiscal year, who is a nominee for election as a director or who is an associate n18 of any of them in any matter to be acted upon, other than elections to office. n19 Also, the name of any director of the company who has given written notice to the company that such director intends to oppose any action to be taken by the company at the annual meeting must be disclosed, as well as the action that the director intends to oppose. n20

[d] Item 4. Proposals by Shareholders. Item 4 of Schedule 14C requires that, if any shareholder entitled to vote at the meeting or by written authorization or consent has submitted to the company a reasonable time before the information statement is distributed, n21 a proposal (other than a proposal relating to elections to office) that is accompanied by notice of the shareholder's intention to present the proposal for action at the meeting, the company must include in the information statement a statement to that effect. In addition, the company must identify the proposal and indicate the action proposed to be taken in respect of the proposal by the company at the meeting. n22

[2] Distribution of Information Statement to Shareholders

Unlike Regulation 14A, which does not prescribe any minimum time period prior to a meeting of shareholders when proxy material must be distributed, n23 Regulation 14C contains substantive provisions concerning the timing of distribution. In general, an information statement must be distributed to all shareholders entitled to vote not less than 20 days prior to the date of the meeting; in the case of action proposed to be taken by written authorization or consent, the date of distribution must be at least 20 days prior to the earliest date on which the corporate action may be taken. n24 However, in the case of a "roll-up transaction," n25 the information statement must be distributed no later than the lesser of (i) 60 calendar days prior to the date on which the meeting of shareholders is to be held or action on written consent or authorization is taken and (ii) the maximum number of days permitted for giving notice under applicable state law. n26

Notwithstanding the general rule that an information statement must be delivered to each shareholder entitled to vote, (i) in the case of a class of securities in unregistered or bearer form, the information statement needs to be sent only to those shareholders whose names are known to the company and (ii) no information statement needs to be sent to a shareholder if the company would be excused from delivery of an annual report or a proxy statement under Rule 14a-3(e)(2). n27

[3] Annual Report to Shareholders

If the action to be taken at an annual meeting or by written consent includes the election of directors, the information statement must be preceded or accompanied by an annual report to shareholders. n28 The annual report to shareholders must provide the same information required under Rule 14a-3(b) n29 for annual reports to shareholders delivered at or before the time proxy material is distributed.

Seven copies of the annual report must be mailed to the Commission for its information not later than the date of which the annual report is first sent or given to shareholders or the date on which preliminary copies (or definitive copies, if the filing of preliminary copies is not required) of the information statement are filed with the Commission, whichever date is later. n30

[4] Filing of Information Statement With the Commission

Five preliminary copies of an information statement must be filed with the Commission at least 10 days before definitive copies of the information statement are first sent or given to shareholders. n31 However, a company need not file a preliminary information statement if that statement relates to an annual meeting (or special meeting in lieu of an annual meeting) at which the only matters to be acted upon are:

- the election of directors;
- the election, approval or ratification of accountants;
- a shareholder proposal identified in the company's information statement pursuant to Item 4 of Schedule 14C; n32 and/or
- the approval or ratification of a plan (as defined in Item 402(a)(7)(ii) of Regulation S--K) or an amendment to a plan.

The exclusion from the requirement to file a preliminary information statement does not apply, however, if the company comments upon or refers to a solicitation in opposition to any matter to which the information statement relates. n33

Preliminary information statements are to be marked "Preliminary Copies" and will be immediately available for public inspection unless confidential treatment is obtained. n34 Confidential treatment of preliminary information statements will be accorded if the action to be taken is a matter specified in Item 14 of Schedule 14A n35 (i.e., mergers, consolidations, acquisitions and similar matters) if the material is marked "Confidential, For Use of the Commission Only." n36 However, if the matter to be acted upon is either subject to Rule 13e-3 n37 (a "going-private" transaction) or is a "roll-up" transaction as defined in Item 901(c) of Regulation S-K, n38 confidential treatment will not be given to the preliminary information statement. n39

Eight definitive copies of the information statement must be filed or mailed for filing with the Commission not later than the date it is first given or sent to shareholders and three definitive copies must be filed or mailed for filing with each national securities exchange upon which any security of the company is listed and registered. n40 For companies filing with the Commission, the "mailed for filing" option is, as a practical matter, not available because the definitive information statement must be filed electronically.

If any information statement filed pursuant to the Rule 14c-5 is amended or revised, two of the copies of the amended or revised materials must be marked to indicate clearly and precisely the changes effected therein. n41

At the time either a preliminary information statement or a definitive information statement is filed, the company is

required to indicate, in the case of a preliminary information statement, the date on which the information statement is intended to be released to shareholders or, in the case of a definitive information statement, the date on which the material was released to shareholders or on which it will be released. n42

Whenever an information statement is filed either in preliminary or definitive form, it must be accompanied by a cover sheet containing certain identifying information about the company and the document being filed; this requirement applies both to electronic and paper filers. n43

[5] Obligations of Companies in Facilitating Communications With Shareholders

A company obligated to distribute information statements is also obligated to take steps to provide reasonable assurance that the information statement, and annual report to shareholders, if required, reach the beneficial owners of its shares. These obligations, contained in Rule 14c-7, n44 are virtually the same as a company's obligations under Rule 14a-13, n45 including the obligation to make inquiry of record owners and fiduciaries and providing copies of material to be sent to the beneficial owners.

The only substantive difference between the obligations of a company under Rule 14c-7 and under Rule 14a-13 is that the date by which inquiry must be made by a company planning on distributing an information statement is the earlier of (a) 20 business days prior to the record date for the meeting of shareholders or the record date for written consents in lieu of a meeting or (b) 20 business days prior to the date the information statement is required to be sent or given to shareholders. n46

[6] False or Misleading Statements

Regulation 14C contains a general antifraud provision applicable to information statements. n47 This rule provides that no information statement shall contain any statement that, at the time and in the light of the circumstances under which it is made, is false or misleading with respect to any material fact or that omits to state any material fact necessary in order to make the statements therein not false or misleading. n48 As in the case of proxy statements, the fact that an information statement has been filed with or examined by the Commission is not deemed a finding by the Commission that such material is accurate or complete or not false or misleading. The fact of filing or examination is also not deemed to indicate that the Commission has passed upon the merits of or approved any statement therein. n49

(n7)Footnote 7. 15 U.S.C. § 80a-1 *et seq.*

(n8)Footnote 8. 17 C.F.R. § 240.14c-101.

(n9)Footnote 9. The presentation of information in an information statement is governed by Rule 14c-4 under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G, which is similar to Rule 14a-5(a), (b) and (d). *See § 7.04 supra.*

A Note to Schedule 14C provides that any item, other than Item 4, need be answered only with respect to proposals to be made by the issuer, where that item calls for information concerning any matter to be acted upon at the annual meeting.

(n10)Footnote 10. 17 C.F.R. § 240.14c-4.

(n11)Footnote 11. Rule 14c-4(a).

(n12)Footnote 12. Rule 14c-4(b).

(n13)Footnote 13. These requirements relate to the order of information, the use of tables and figures and the minimum type size. Rule 14c-4(d) provides that where the proxy statement is delivered through an electronic medium, legibility requirements applicable to printed documents such as type size and fonts may be satisfied by presenting all information "in a format readily communicated to investors." Similar provisions apply to proxy statements (Rule 14a-5(d)(2)), and annual reports (Rule 14a-3(b)(2)(ii)).

(n14)Footnote 14. 17 C.F.R. § 240.14a-101. *See § 7.04[2] supra* for a discussion of Schedule 14A.

(n15)Footnote 15. In the case where an information statement is being provided in connection with action proposed to be taken upon written consent or authorization, it would be logical to assume that information corresponding to that required by Schedule 14A would be required in the information statement. For example, Item 1 of Schedule 14A requires disclosure in a proxy statement of the date, time and place of the meeting of shareholders. Since there is no meeting of shareholders if action is taken by written consent or authorization, this information could not be included in an information statement. Nevertheless, corresponding information (*i.e.*, the earliest date on which action is proposed to be taken) should be included.

(n16)Footnote 16. For a discussion of Notes A, C, D and E to Regulation 14A, *see § 7.04 supra.*

(n17)Footnote 17. Unlike other items in Schedule 14A or Regulation S-K, Item 3 of Schedule 14C uses the term "officer" rather than "executive officer." In particular, Item 5(a)(1) of Schedule 14A requires corresponding disclosure in a proxy statement for any person who has been an executive officer of the company at any time since the beginning of the last fiscal year.

(n18)Footnote 18. "Associate" is defined in Rule 14c-1(a) as follows:

The term "associate," used to indicate a relationship with any person, means: (1) any corporation or organization (other than the registrant or a majority owned subsidiary of the registrant) of which such person is an officer or partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities; (2) any trust or other estate in which such person has a substantial beneficial interest or as to which such person serves as trustee or in a similar fiduciary capacity; and (3)

any relative or spouse of such person, or any relative of such spouse, who has the same home as such person or who is a director or officer of the registrant or any of its parents or subsidiaries.

(n19)Footnote 19. Item 3(a) of Schedule 14C.

(n20)Footnote 20. Item 3(b) of Schedule 14C.

While Item 3(b) does not specifically require disclosure of any director who intends to oppose any action to be taken by written consent, it would seem that such information would be equally significant to a shareholder.

(n21)Footnote 21. A company need not respond to Item 4 as to any proposal submitted with respect to an annual meeting if the proposal is submitted less than 60 days in advance of a day corresponding to the date of mailing a proxy statement or information statement in connection with the last annual meeting of shareholders. Instruction 1 to Item 4 of Schedule 14C.

(n22)Footnote 22. Item 4 of Schedule 14C.

In addition, if a company intends to rule a proposal submitted by a shareholder out of order, the Commission must be notified 20 days prior to the date that definitive copies of the information statement are filed with the Commission of that intention accompanied by a statement of the reasons why the proposal is not deemed to be a proper subject for action by shareholders. Instruction 2 to Item 4 of Schedule 14C.

(n23)Footnote 23. In general, the state laws under which a company is incorporated will require that notice be distributed between some minimum and maximum number of days prior to the date of the meeting of shareholders.

(n24)Footnote 24. Rule 14c-2(b).

(n25)Footnote 25. A "roll-up transaction" is defined for these purposes in Item 901(c) of Regulation S-K, 17 C.F.R. § 229.901(c). See § 4.03[10] *supra*.

(n26)Footnote 26. Rule 14c-2(c).

(n27)Footnote 27. Rule 14c-2.

(n28)Footnote 28. Rule 14c-3(a).

(n29)Footnote 29. 17 C.F.R. § 240.14a-3(b).

(n30)Footnote 30. Rule 14c-3(b). Compare Rule 14a-3(c) in the case of a proxy solicitation, discussed in § 7.03 *supra*.

As in the case of annual reports to shareholders provided to the Commission pursuant to Rule 14a-3(c), companies are requested to indicate in a letter to the Commission whether the financial statements in the report reflect a change from the preceding year in any accounting principles or practices or in the method of applying any such principles or practices. Note to Rule 14c-3(b).

(n31)Footnote 31. Rule 14c-5(a).

In computing the 10-day period, the filing date of the preliminary copies (*i.e.*, the date such preliminary copies are received by the Commission) is counted as the first day and the eleventh day is the date on which definitive copies of the information statement may be mailed to shareholders. Rule 14c-5(a).

The filing of a revised preliminary information statement will not recommence the 10-day time period unless the revised material contains material revisions or material new proposal(s) that constitute a fundamental change in the information statement previously filed. Note 1 to Rule 14c-5(a).

(n32)Footnote 32. Rule 14c-5(a).

In this regard, Rule 14c-5(a) should be compared with Rule 14a-6(a). Rule 14a-6(a) provides that registered investment companies need not file preliminary proxy materials with respect to meetings at which a proposal to continue without change any advisory or other contract or agreement that previously has been the subject of a proxy solicitation or a proposal to increase the number of shares authorized to be issued is to be considered.

(n33)Footnote 33. Rule 14c-5(a). For purposes of the exclusion from filing a preliminary information statement, a "solicitation in opposition" includes (i) any solicitation opposing a proposal supported by the company and (ii) any solicitation supporting a proposal that the company does not expressly support, other than a shareholder proposal identified in the company's information statement pursuant to Item 4 of Schedule 14C. The identification of a shareholder proposal in the company's information statement does not constitute a "solicitation in opposition" even if the company opposes the proposal and includes a statement in opposition to such proposal. Note 3 to Rule 14c-5(a).

A company which is filing preliminary copies of an information statement solely because it has comments on or has referred to an opposing solicitation should indicate that fact in the transmittal letter to the Commission. Note 4 to Rule 14c-5(a).

(n34)Footnote 34. Rule 14c-5(d)(1).

(n35)Footnote 35. Rule 14a-101.

(n36)Footnote 36. Rule 14c-5(d)(2)(ii).

Even if the preliminary information statement is not publicly available, the Commission may disclose the information to any department or agency of the United States Government and to the Congress.

(n37)Footnote 37. 17 C.F.R. § 240.13e-3. *See* § 7A.04 *infra*.

(n38)Footnote 38. 17 C.F.R. § 229.901(c). *See* § 4.03[10] *supra*.

(n39)Footnote 39. Rule 14c-5(d)(2)(i).

(n40)Footnote 40. Rule 14c-5(b).

A filing fee is payable only in connection with information statements regarding an acquisition, spinoff, consolidation or proposed sale or other disposition of substantially all the assets of the company. Rule 14c-5(g). If a fee is required, it is calculated pursuant to Rule 0-11. 17 C.F.R. § 240.0-11.

(n41)Footnote 41. Rule 14c-5(e).

For filings with the Commission submitted electronically, the changes would be marked as prescribed in the EDGAR Filer Manual.

(n42)Footnote 42. Rule 14c-5(c).

(n43)Footnote 43. Rule 14c-5(h). The form of the cover page is contained in Schedule 14C.

(n44)Footnote 44. 17 C.F.R. § 240.14c-7.

(n45)Footnote 45. 17 C.F.R. § 240.14a-13. *See also* § 7.02[3] *supra*.

(n46)Footnote 46. Rule 14c-7(a)(3).

(n47)Footnote 47. Rule 14c-6.

(n48)Footnote 48. This prohibition is similar to the prohibition contained in Rule 14a-9 applicable to proxy materials. *See* § 7.09 *infra* for a discussion of Rule 14a-9.

(n49)Footnote 49. Rule 14c-7(b).

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.07

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.07 Shareholder Proposals in Proxy Material--Rule 14a-8

A shareholder who wants to present a proposal for action at an upcoming shareholders' meeting may require the company to include the proposal in its proxy statement, provided the shareholder complies with the requirements of Rule 14a-8 n1 concerning such matters as eligibility of the proponent, proof of beneficial ownership, attendance at the meeting by the proponent or a representative and timeliness. The shareholder-proponent may only submit one proposal and an accompanying supporting statement (limited to an aggregate of 500 words) for inclusion in the proxy materials.

The company, however, may omit certain types of proposals and the related supporting statements. These include the following: (i) proposals that are not proper subjects for shareholder action under the laws of the company's domicile, (ii) proposals that would require the company to violate federal, state or foreign laws, (iii) proposals or supporting statements that are contrary to the Commission's proxy rules and regulations (including Rule 14a-9 n2 regarding false and misleading statements), (iv) proposals that constitute a personal claim or grievance or that are designed to benefit a personal interest not shared with the company's shareholders as a group, (v) proposals that are not significantly related to the company's business, (vi) irrelevant proposals (*i.e.*, beyond the company's power to effectuate), (vii) proposals dealing with ordinary business operations, (viii) proposals relating to an election to office, (ix) counterproposals to proposals made by the company, (x) proposals relating to specific amounts of cash or stock dividends, (xi) moot proposals, (xii) duplicative proposals or (xiii) proposals dealing with substantially the same subject matter as a prior proposal submitted to shareholders. The company must follow a prescribed procedure, including making filings with the Commission and notifying the shareholder-proponent, if it determines to omit a shareholder proposal from the proxy material or to include in the proxy statement a statement in opposition to the shareholder proposal.

After extensive debate and the issuance of two alternative proposals regarding the grant of increased shareholder access to the nomination of directors, the Commission decided (November 28, 2007) to adhere to its existing position that shareholder proposals on the subject of access to the making of board nominations may be excluded under Rule 14a-8 (despite the decision in *AFSCME v. AIG*, *supra*, Section 7.07[9]). *Shareholder Proposals Relating to the Election of Directors*. n3 The alternative proposal would have allowed shareholders owning five percent of the company's outstanding stock for at least one year and eligible to file as a passive investor on Schedule 13G to include in the company's proxy materials a proposal to amend the bylaws mandating procedures to allow shareholders to nominate candidates to the board to the extent permissible under the laws of the state of incorporation as well as the company's

charter and bylaws. n4 The proposal also would have encouraged companies and shareholders to establish or make use of electronic shareholders forums by exempting them from liability for statements or information provided to the forum by any other person. The proposal would also have exempted solicitations (other than solicitation for a proxy, rescission, abstention, consent or authorization) made more than 60 days before the meeting. n5

The Commission early came to the conclusion that any shareholder who wanted to present a matter to fellow shareholders should be able to include the proposal and a supporting statement in the company's proxy material. n6 Rule 14a-8 outlines the requisite steps to be taken if a shareholder wishes to present a proposal for action at an upcoming shareholders' meeting and contains the rules governing when a company may omit the proposal and supporting statement from its proxy material. In 1998, the Commission substantially revised Rule 14a-8 (17 C.F.R. § 240.14a-8) including recasting the entire rule to comply with the Commission's "plain English" initiatives. Rule 14a-8 is now presented in a question and answer format. n7

The success or failure of proposals to be adopted should not necessarily be judged by the actual vote tabulated. Virginia Rosenbaum of the Investor Responsibility Research Center has suggested that shareholder proposals that are withdrawn before ever coming to a vote may be the most highly successful of all, since the withdrawal is often made because the company has agreed to implement the changes sought by the proposal. n8

[1] Definition of "Proposal"--Rule 14a-8(a)

The Commission's response to Question 1 n9 defines what a shareholder proposal is. A shareholder proposal is a recommendation or requirement from a shareholder that the company and/or its board of directors take action, which the shareholder intends to present at a meeting of the company's shareholders. This response states that a shareholder proposal should state as clearly as possible the course of action that the shareholder believes the company should follow. The response informs the shareholder proponent that, if the shareholder's proposal is placed on the company's proxy card, the company must also provide in the form of proxy means for shareholders to specify by boxes a choice between approval or disapproval or abstention. Finally, the response to Question 1 states that "proposal" as used in Rule 14a-8 includes both the proposal and the corresponding statement in support submitted by the proponent.

[2] Eligibility--Rule 14a-8(b)

Question 2 n10 addresses the eligibility requirements for a shareholder to be able to submit a proposal to the company and the way a shareholder demonstrates eligibility to the company.

The response to Question 2 states that, in order to be eligible to submit a proposal, the proponent must have continuously held at least \$2,000 in market value, or 1%, of the company's securities n11 entitled to be voted on the proposal at the meeting for at least one year by the date the shareholder submits the proposal. n12 The response also includes the requirement that the shareholder must continue to hold those securities through the date of the meeting. n13

The response to Question 2 notes that the company can verify a shareholder proponent's eligibility on its own if the proponent owns the requisite number of shares in the proponent's own name. However, if the shares are held in nominee or street name, this response informs the shareholder that there are two ways to establish the shareholder's eligibility to submit a proposal for inclusion in the company's proxy material. The shareholder may:

- submit to the company a written statement from the "record" holder of the shareholder's securities n14 verifying that, at the time the proposal is submitted, the shareholder continuously held the securities for at least one year together with a written statement of the shareholder that the shareholder intends to continue to hold the securities through the date of the meeting of shareholders; n15
- if the shareholder has filed a Schedule 13D, n16 Schedule 13G n17 or a Form 3, n18 Form 4 n19

and/or Form 5 n20 or amendments to those documents or updated forms, reflecting ownership of the shares as of or before the date on which the one-year eligibility period begins, the shareholder can demonstrate eligibility by submitting the following to the company:

- a copy of the schedule and/or form and any subsequent amendments reporting a change in ownership level; n21
- a written statement from the shareholder that the shareholder continuously held the required number of shares for the one-year period as of the date of the shareholder's written statement; n22 and
- a written statement from the shareholder that the shareholder intends to continue ownership of the shares through the date of the company's annual or special meeting. n23

[3] Number of Proposals--Rule 14a-8(c)

The response to Question 3 n24 specifies that a shareholder may submit no more than one proposal to a company for a particular meeting of shareholders. n25

[4] Length of Proposal--Rule 14a-8(d)

The response to Question 4 n26 specifies that the proposal (including both the proposal and any accompanying supporting statement) may not exceed 500 words. n27

[5] Deadline for Submitting Proposal--Rule 14a-8(e)

The response to Question 5 n28 advises a shareholder that there are deadlines which must be met in order for the shareholder's proposal to be included in the company's proxy material. n29

- If the proposal is being submitted for the company's annual meeting, the shareholder can generally find the deadline in the proxy statement for the company's annual meeting held in the prior year. The response also tells a shareholder that, if the company did not hold an annual meeting in the prior year or has changed the date of its meeting for the current year more than 30 days from the prior year's meeting, the shareholder can usually find the deadline in one of the company's quarterly reports on Form 10-Q n30 or 10-QSB n31 or in shareholder reports of an investment company under Rule 30d-1 n32 under the Investment Company Act of 1940. The response further advises shareholders that the shareholder should submit any proposal by means, including electronic means, that permit the shareholder to prove the date of delivery. n33
- If the proposal is submitted for a regularly scheduled annual meeting, the proposal must be received at the company's principal executive offices not less than 120 calendar days before the date of the company's proxy statement released to shareholders in connection with the previous year's annual meeting. The response also notes that, if the company did not hold an annual meeting the previous year, or if the date of the current year's annual meeting has been changed more than 30 days from the date of the previous year's meeting, then the deadline is a reasonable time before the company begins to print and mail its proxy materials. n34
- The response states that a shareholder proposal being submitted for a meeting of shareholders other than a regularly scheduled annual meeting must be submitted a reasonable time before the company begins to print and mail its proxy materials. n35

[6] Failure to Meet Eligibility--Rule 14a-8(f)

The response to Question 6 n36 informs the shareholders of the consequences of failing to meet the eligibility requirements explained in the answers to Questions 1 through 4. These consequences are:

- The Company may exclude the proposal from its proxy material, but only after it has notified the shareholder proponent of the problem and the shareholder proponent has failed adequately to correct it. The response further states that the company must notify the proponent in writing of any procedural or eligibility deficiencies within 14 calendar days of receiving the proposal and of the time-frame for a response from the shareholder. The shareholder response must be postmarked, or transmitted electronically, no later than 14 days from the date the shareholder receives the company's notification. The company need not provide the shareholder notice of a deficiency if the deficiency cannot be remedied. n37
- If the shareholder proponent fails in its promise to hold the required number of securities through the date of the meeting of shareholders, then the company will be permitted to exclude any proposal from that shareholder from its proxy materials for any meeting held in the following two calendar years. n38

[7] Burden of Persuasion--Rule 14a-8(g)

Question 7 n39 asks who has the burden of persuading the Commission or its staff that a shareholder proposal can be excluded. The response is that, except as otherwise noted, the burden is on the company to demonstrate that it is entitled to exclude a proposal.

[8] Presentation of Proposal at Meeting--Rule 14a-8(h)

Question 8 n40 asks whether the shareholder proponent must appear personally at the shareholders' meeting to present the proposal. The Commission's response has three components:

- Either the shareholder proponent, or a representative of the shareholder proponent who is qualified under state law to present the proposal, must attend the meeting to present the proposal. The response also cautions that whether the shareholder proponent attends the meeting or sends a qualified representative, the shareholder proponent or the qualified representative must follow the proper state law procedures for attending the meeting and/or presenting the proposal. n41
- If the company holds its shareholder meeting in whole or in part via electronic media and the company permits the shareholder proponent or the proponent's representative to present the proposal via such media, then the shareholder proponent or qualified representative may appear through electronic media rather than traveling to the meeting to appear in person. n42
- If the shareholder proponent or a qualified representative of the shareholder proponent fails to appear and present the proposal, without good cause, the company will be permitted to exclude all proposals of the shareholder proponent from its proxy materials for any meetings held in the following two calendar years. n43

[9] Bases for Excluding Shareholder Proposals--Rule 14a-8(i)

In response to Question 9 n44 as to the bases on which a company may rely to exclude a shareholder proposal, the Commission identifies 13 bases on which a company can exclude a shareholder proposal. A shareholder proposal can be excluded:

1-7 Federal Securities Exchange Act of 1934 § 7.07

- If the proposal is not a proper subject for action by shareholders under the laws of the jurisdiction of the company's organization; n45
- If the proposal would, if implemented, cause the company to violate any state, federal or foreign law to which it is subject; n46
- If the proposal or supporting statement is contrary to any of the Commission's proxy rules, including Rule 14a-9 which prohibits materially false or misleading statements in proxy soliciting materials; n47
- If the proposal relates to the redress of a personal claim or grievance against the company or any other person, or if it is designed to result in a benefit to the shareholder proponent, or to further a personal interest which is not shared by the other shareholders at large; n48
- If the proposal relates to operations which account for less than 5 percent of the company's total assets at the end of its most recent fiscal year, and for less than 5 percent of its net earnings and gross sales for its most recent fiscal year, and is not otherwise significantly related to the company's business. n49
- If the company would lack the power or authority to implement the proposal; n50
- If the proposal deals with a matter relating to the company's ordinary business operations; n51
- If the proposal relates to an election for membership on the company's board of directors or analogous governing body: n52
- If the proposal directly conflicts with one of the company's own proposals to be submitted to shareholders at the same meeting; n53
- If the company has already substantially implemented the proposal; n54
- If the proposal substantially duplicates another proposal previously submitted to the company by another proponent that will be included in the company's proxy materials for the same meeting; n55
- If the proposal deals with substantially the same subject matter as another proposal or proposals, that has or have been previously included in the company's proxy materials within the preceding five calendar years, n56 a company may exclude from its proxy materials for any meeting held within three calendar years of the last time it was included if the proposal received:
 - Less than 3% of the vote if proposed once within the preceding five calendar years; n57
 - Less than 6% of the vote on its last submission to shareholders if proposed twice previously within the preceding five calendar years; n58 or
 - Less than 10% of the vote on its last submission to shareholders if proposed three times or more previously within the preceding five calendar years; n59 and
- If the proposal relates to specific amounts of cash or stock dividends. n60

The Staff of the Commission has issued a series of Staff Legal Bulletins regarding the basis on which proposals are excludable.

In Staff Legal Bulletin No. 14B, n61 the Staff announced that companies would no longer be allowed to exclude proposals because of deficiencies in a proposal's supporting statement, on the basis of being materially false or misleading. The Staff will not exclude supporting statement language or a proposal itself where the basis of exclusion is alleged to be unsupported factual assertions, or assertions that may be disputed or countered, or assertions that may be interpreted by shareholders in a manner unfavorable to the Company, its directors or officers, or are matters of opinion but not identified as such. The Staff stated that companies should address those objections in their statements of opposition in the proxy statement. This policy does not apply to statements which impugn character, integrity or personal reputation, statements which the Company demonstrates are materially false or misleading, proposals inherently vague or so indefinite that they are incapable of determination as to what is required, and supporting statements containing substantial portions of irrelevant matter.

The Staff of the Commission subsequently released Staff Legal Bulletin No. 14C n62 on the application of Rule 14A-8 to shareholder proposals about director independence and environmental or public health issues.

The Division will allow omission of a proposal requiring a director to maintain independence at all times, on the ground that the Company would lack the power or authority to implement it. A proposal calling for directors to be independent is only includable "if the proposal does not require a director to maintain independence at all times or contains language permitting the company to cure a director's loss of independence."

Regarding environmental or public health issues, a proposal may not be omitted if it focuses on significant social policy issues that "transcend the day-to-day business matters," *e.g.*, if the focus is on the Company minimizing or eliminating harmful operations, the proposal may not be omitted as relating to ordinary business operations.

Staff Legal Bulletin No. 14D addresses proposals that recommend, request or require a board of directors to unilaterally amend the company's articles or certificate of incorporation, and states that such proposals are includable only if they provide that the board of directors "take the steps necessary" to amend the company's charter (such as submit the proposed amendment to a vote of stockholders).

[10] Procedures the Company Must Follow to Exclude Proposals--Rule 14a-8(j)

In response to Question 10, n63 the Commission outlines the procedures which the company must follow if it intends to exclude a shareholder proposal from its proxy materials. These procedures are:

- If the company intends to exclude a proposal from its proxy materials, it must file its reasons with the Commission no later than 80 calendar days before it files its definitive proxy statement and form of proxy with the Commission. The company must simultaneously provide the shareholder proponent with a copy of its submission. The Commission staff may permit the company to make its submission later than 80 days before the company files its definitive proxy statement and form of proxy if the company demonstrates good cause for missing the deadline. n64
- The company must file six paper copies of the following:
 - The proposal; n65
 - An explanation of why the company believes that it may exclude the proposal which should, if possible, refer to the most recent applicable authority, such as prior letters of the Division of Corporation Finance issued under the proxy rules; n66 and

- A supporting opinion of counsel when such reasons are based on matters of state or foreign law. n67

[11] Whether the Shareholder May Respond to Company Arguments--Rule 14a-8(k)

The Commission's response to Question 11 n68 states that the shareholder proponent may, but is not required to, submit a response to the company's arguments for excluding a proposal. The Commission notes that the shareholder proponent should try to submit any response to it, with a copy to the company, as soon as possible after the company makes its submission so that the Commission staff will have time to consider fully that submission before it issues its response. The shareholder proponent should submit six paper copies of any response.

[12] Information to be Included about Shareholder Proponent--Rule 14a-8(l)

In response to Question 12, n69 the Commission states that, if the company includes a shareholder proposal, the proxy statement must include the name and address of the shareholder proponent, as well as the number of the company's voting securities that the shareholder proponent holds. The Commission notes, however, that instead of providing that information, the company may include a statement that it will provide the information to shareholders promptly upon receiving an oral or written request. n70

In the same response, the Commission states that the company is not responsible for the contents of a shareholder proposal or the supporting statement. n71

[13] Shareholder Disagreement with Company Statements--Rule 14a-8(m)

Question 13 n72 poses the question of what a shareholder proponent can do if the proponent believes that the company is including in its proxy statement reasons why it believes shareholders should not vote in favor of the proposal and the shareholder proponent disagrees with some of the company's statements. The Commission's response has three parts:

- The company may elect to include in its proxy statement reasons why it believes shareholders should vote against the proposal. The company is allowed to make arguments reflecting its own point of view, just as the shareholder proponent may express the proponent's point of view in the proposal's supporting statement. n73
- If the shareholder proponent believes that the company's opposition to the proposal contains materially false or misleading statements that may violate the anti-fraud rule, the proponent should promptly send to the Commission's staff and the company a letter explaining the reason for the proponent's view. To the extent possible, the letter should include specific factual information demonstrating the inaccuracy of the company's claims. n74 The Commission also notes that, time permitting, the shareholder proponent may wish to try to work out differences with the company directly before contacting the Commission staff. n75
- The Commission notes that it requires the company to send the shareholder proponent a copy of its statements opposing a shareholder proposal before it mails its proxy materials, so that the shareholder proponent may bring to the Commission's attention any materially false or misleading statements, under the following timeframes:
 - If the Commission's no-action response requires that the shareholder proponent make revisions to the proposal or supporting statement as a condition to requiring the company to include it in its proxy materials, then the company must provide the shareholder

proponent with a copy of its opposition statements no later than five calendar after the company receives a copy of the shareholder proponent's revised proposal; n76 or

■ In all other cases, the company must provide the shareholder proponent with a copy of its opposition statements no later than 30 calendar days before it files definitive copies of its proxy statement and form of proxy with the Commission. n77

The Division of Corporation Finance, *Staff Report on Corporate Accountability: A Re-examination of Rules Relating to Shareholder Communications, Shareholder Participation in Corporate Electoral Process and Corporate Governance Generally*, 96th Cong. 2d Sess. (Comm. Print) (Comm. on Banking, Housing and Urban Affairs of the U.S. Senate) p. 155 (1980) [hereinafter Staff Report] proposed minor changes to Rule 14a-8 to clarify the procedural requirements applicable to proponents and the company in connection with shareholder proposals.

The Staff Report recommended amendments of:

(1) Rule 14a-8(a)(2) under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G, discussed in § 7.07[1] *infra*, to clarify that any person qualified under state law to present a proposal, whether or not the person is also a company shareholder, may represent the proponent at the annual meeting;

(2) Rule 14a-8(b), discussed in § 7.07[2] *infra*, to require disclosure in proxy materials of names, addresses and share holdings of shareholder-proponents; and

(3) Rule 14a-8(a)(4), discussed in § 7.07[1] *infra*, which previously limited the text of a proposal to 300 words and a proponent's supporting statement to 200 words, to permit a proponent to use 500 words, to be divided between the proposal and supporting statements at the proponent's discretion.

Staff Report at 222-23.

In addition, the Staff Report recommended that the shareholder proposal rule be reexamined in light of the Supreme Court's decision in *First National Bank of Boston v. Bellotti*, 435 U.S. 765, 98 S. Ct. 1407, 55 L. Ed. 2d 707 (1978), to clarify the substantive grounds in Rule 14a-8 for excluding proposals under the "not significantly related to the company's business" standard under Rule 14a-8(c)(5) and the "ordinary business" standard under Rule 14a-8(c)(7). In *Bellotti*, the Court held that a Massachusetts statute that prohibited corporate expenditures or contributions intended to influence the vote on any questions submitted to shareholders that have no material connection with the corporate

business was an unconstitutional abridgment of speech protected under the *First Amendment*.

The Staff Report recommended that the Commission issue an interpretative release to clarify and consolidate past positions taken by the Commission on the meaning of the phrase "ordinary business" in Rule 14a-8(c)(7), discussed in § 7.07[3] *infra*. Staff Report at 223.

As to the "not otherwise significantly related to the [issuer's] business" standard under Rule 14a-8(c)(5), discussed in § 7.07[3] *infra*, the Staff Report concluded that, in light of the *Bellotti* decision, the existing proxy rule provisions may not afford an adequate remedy for shareholders seeking to hold their companies accountable for the use of corporate funds for political purposes, such as support of political action committees, contributions to referendum campaigns, and advocacy advertising. *Id.* at 39. Accordingly, the Staff Report recommended that a concept release be issued to consider:

- (1) whether to adopt requirements for disclosure of corporate political activities and expenditures consistent with the procedures of corporate democracy articulated by the Supreme Court in *Bellotti*;
- (2) the role of the shareholder proposal process in meeting the goals and assumptions of corporate democracy as set forth in *Bellotti*;
- (3) the need, if any, for treating shareholder proposals that seek disclosure of corporate political expenditures and activities differently from proposals requesting positive or negative corporate action;
- (4) whether the standards and concepts should be limited to political activities and, if not, what other areas should be included;
- (5) how to define political activities;
- (6) what forms of political contributions and activities should be covered; and
- (7) whether a threshold amount or level of activity would be appropriate and, if so, how to determine that threshold.

Id. at 40, 41.

The Commission, in response to the recommendations of the Staff Report, proposed several technical changes to the shareholder proposal rule in Sec. Exch. Act Rel. No. 34-17517, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,817 (Feb. 5, 1981).

Additionally, as part of the Commission's proxy review program (discussed in § 7.01[5][c] *supra*), the Commission proposed three alternatives for amending Rule 14a-8 involving the following:

- (1) retention of the basic concepts underlying the rule with clarifying revisions to certain of its procedural and other provisions;
- (2) adoption of a supplemental rule that would allow a company, with the approval of shareholders, to adopt its own procedures governing shareholder access to the company's proxy statement; or
- (3) inclusion of any proposal proper under state law and not involving an election of directors, subject to a numerical limit on the number of proposals required to be included in the proxy statement.

Sec. Exch. Act Rel. No. 34-19135, [1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,262 (Oct. 14, 1982).

In 1983, the Commission adopted the first of the three alternatives of proposed amendments to Rule 14a-8, retaining the framework but revising certain procedural provisions of the Rule. Sec. Exch. Act Rel. No. 20091, [1983-1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,417 (Aug. 16, 1983).

The Commission has, in response to the *Bellotti* decision and to the Staff Report recommendations for a clarification of the meaning of the phrase "ordinary business" in Rule 14a-8(c)(7), taken the position that proposals requesting companies to prepare reports on specific aspects of their business that involve matters of ordinary business may be excluded under Rule 14a-8(c)(7), discussed in § 7.07[2][e] *infra*, and made related amendments to Rule 14a-8(c)(5), discussed in § 7.07[2][d] *infra*. Sec. Exch. Act Rel. No. 34-20091, [1983-1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,417 (Aug. 16, 1983).

See also Schwartz & Weiss, *An Assessment of the SEC Shareholder Proposal Rule*, 65 *Geo. L.J.* 635 (1977).

(n7)Footnote 7. In *Roosevelt v. E.I. Du Pont De Nemours & Co.*, 958 *F.2d* 416 (D.C. Cir. 1992), the Court of Appeals for the District of Columbia held that a shareholder has an implied private right of action to sue for inclusion of a shareholder proposal in proxy material. The court found that "[a]ccess to management proxy solicitations to sound out management views and to communicate with other shareholders on matters of major import" is an informational right "appropriately enforced" by a private right of action under Section 14(a) of the Exchange Act, 15 *U.S.C.* § 78n(a). 958 *F.2d* at 421. The court agreed, however, that the shareholder proposal, involving the phasing out of chlorofluorocarbons, involved the ordinary business operations of the company and could be excluded under Rule 14a-8(c)(7). See § 7.09 for a discussion of implied private rights of action under Section 14(a) of the Exchange Act. In Sec. Exch. Act Rel. No. 34-14970, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,645, n.27 (July 18, 1978), the Commission noted that, according to its records, approximately 50 percent of all the shareholder proposals received by companies are included by management in the proxy materials without resort to the Commission's no-action procedures.

(n8)Footnote 8. 18 *BNA Corporate Counsel Weekly*, No. 31, page 248 (August 6, 2003).

(n9)Footnote 9. Rule 14a-8(a); 17 *C.F.R.* § 240.14a-8(a).

(n10)Footnote 10. Rule 14a-8(b); 17 *C.F.R.* § 240.14a-8(b).

(n11)Footnote 11. Security holdings of co-proponents will be aggregated in determining the eligibility for inclusion of a proposal. In determining whether a proponent has held the company's securities having the requisite market value, the value is computed by use of the average of the bid and asked prices of the securities as of a date within 60 days prior to the date the proposal is submitted. Sec. Exch. Act Rel. No. 34-20091, [1983-1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,417 (Aug. 16, 1983).

(n12)Footnote 12. For example, a proponent who owned a security that could be voted on the election of some of the issuer's directors but on no other matters could not submit a proposal relating to the issuer's business activities, since he would not be able to vote on it personally. Sec. Exch. Act Rel. No. 34-12999, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,812, at 87,124 (Nov. 22, 1976).

See *Ruddick Corp.*, SEC No-Action Letter (Nov. 20, 1989) (the staff determined that shares of the employee-proponent held for his account in an employee stock ownership plan for over one year could be counted when determining the minimum stock ownership requirement under former Rule 14a-8(a)(1) (the predecessor to current Rule 14a-8(b)), even though voting power did not attach to the shares until approximately nine months prior to submission of the proposal).

(n13)Footnote 13. Rule 14a-8(b)(1); 17 C.F.R. § 240.14a-8(b)(1).

(n14)Footnote 14. The response indicates that the "record" holder is usually a broker or bank. Rule 14a-8(b)(2); 17 C.F.R. § 240.14a-8(b)(2).

(n15)Footnote 15. Rule 14a-8(b)(2)(i); 17 C.F.R. § 240.14a-8(b)(2)(i).

(n16)Footnote 16. 17 C.F.R. § 240.13d-101.

(n17)Footnote 17. 17 C.F.R. § 240.13d-102.

(n18)Footnote 18. 17 C.F.R. § 249.103.

(n19)Footnote 19. 17 C.F.R. § 249.104.

(n20)Footnote 20. 17 C.F.R. § 249.105.

(n21)Footnote 21. Rule 14a-8(b)(2)(ii)(A); 17 C.F.R. § 240.14a-8(b)(2)(ii)(A).

(n22)Footnote 22. Rule 14a-8(b)(2)(ii)(B); 17 C.F.R. § 240.14a-8(b)(2)(ii)(B).

(n23)Footnote 23. Rule 14a-8(b)(2)(ii)(C); 17 C.F.R. § 240.14a-8(b)(2)(ii)(C).

(n24)Footnote 24. Rule 14a-8(c); 17 C.F.R. § 240.14a-8(c).

(n25)Footnote 25. See Santa Fe Pacific Corp., SEC No-Action Letter (Feb. 17, 1993) (in respect of a proposal requesting that the positions of chairman and chief executive officer not be permitted to be held by the same person and requesting that the chairman be elected from among the company's outside directors, the staff indicated that "the entire submission relates to a by-law amendment to provide new qualifications" for the board chairman, and is not two distinct proposals involving different considerations, as counsel had argued).

(n26)Footnote 26. Rule 14a-8(d); 17 C.F.R. § 240.14a-8(d).

(n27)Footnote 27. The Commission has stated that it:

is aware of the possibility that some proponents may attempt to evade the new limitations through various maneuvers, such as having other persons whose securities they control submit two proposals each in their own names. The Commission wishes to make it clear that such tactics may result in measures such as the granting of requests by the affected managements for a 'no-action' letter concerning the omission from their proxy materials of the proposals at issue.

Sec. Exch. Act Rel. No. 34-12999, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,812, at 87,127 (Nov. 22, 1976) (footnote omitted).

(n28)Footnote 28. Rule 14a-8(e); 17 C.F.R. § 240.14a-8(e).

(n29)Footnote 29. The Commission has stated that:

As a final note to the discussion of the timeliness requirements, the Commission wishes to reiterate a view that its staff has expressed informally on many occasions in the past. That is, changes to a timely submitted proposal or supporting statement may be made by the proponent after the timeliness deadline has passed, provided the changes are minor in nature and do not alter the substance of the proposal. Examples of such changes would be a change in the form of the proposal to bring it into accord with the

requirements of the applicable state law, or a change in the proposal or supporting statement to revise or delete misleading statements contained therein.

The above position has been taken by the Commission and its staff in recognition of the fact that most proponents are not sophisticated in matters of securities law such as Rule 14a-8. Because of their lack of sophistication, such persons frequently are apt to submit proposals that generally comply with the substantive requirements of Rule 14a-8 but nevertheless contain some relatively minor defects that are easily correctable. In such circumstances, the Commission believes the concept of corporate democracy underlying section 14(a) of the Exchange Act is best served by affording such persons the opportunity to correct the defects that have been pointed out to them. Thus, under this view, a proponent may make non-substantive changes to his original submission after the timeliness deadline has passed without being considered to have submitted an entirely new proposal that would be excludable under the timeliness provisions of subparagraph [Rule 14a-8(e)].

Sec. Exch. Act Rel. No. 34-12999, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,812, at 87,127 (Nov. 22, 1976).

(n45)Footnote 45. Rule 14a-8(i)(1); 17 C.F.R. § 240.14a-8(i)(1).

The Staff of the SEC has for the first time certified to the Delaware Supreme Court the question of whether a proposal submitted by AFSCME Employees Pension Plan is valid under Delaware law. The proposal in question would require CA, Inc. to reimburse solicitations by dissidents in an election contest for less than fifty percent of the Board seats if

any of the proposed dissident nominees are elected. While insurgents who win Board control have been able to recover their expenses, the company had opposed the proposal on several grounds, one of which was that the matter was not a proper matter for shareholder action under state law. The Delaware Supreme Court ruled that the proposal was a proper subject for shareholder action under Delaware law but that the proposal if adopted would cause CA to violate Delaware law, in denying to CA's board the ability to perform its fiduciary obligation under Delaware law to determine whether indemnification is proper under Delaware statute. Del. Sup. Ct. No. 329, 2008, decided 7/17/08, modified 8/15/08 on Certification of Questions of Law from the United States Securities and Exchange Commission.

Depending on the subject matter, some proposals are not considered proper under state law if they would be binding on the company if approved by shareholders. The Commission notes, however, that in its experience most proposals that are cast as recommendations or requests that the board of directors take specified action are proper under state law. The Commission will assume that a proposal drafted as a recommendation or suggestion is proper unless the company demonstrates otherwise. Note to Rule 14a-8(i)(1); 17 C.F.R. § 240.14a-8(i)(1).

See Westland Dev. Co., Inc., SEC No-Action Letter (Sept. 10, 1982), in which the staff was unable to conclude that a company could rely upon Rule 14a-8(c)(1) (the predecessor to Rule 14a-8(i)(1)) to omit a proposal requesting a two-thirds vote of the shareholders for the company to alienate certain lands where the proposal involved an important policy matter with which shareholders were properly concerned, was presented in the form of a request, and would not be required to be implemented by the company's board of directors even if the proposal received a majority of the votes cast.

See also Exxon Corp., SEC No-Action Letter (Feb. 28, 1992) (the staff was unable to grant Exxon's no-action request regarding exclusion of a shareholder proposal regarding a bylaw amendment establishing a shareholder advisory committee having the power, among other things, to incur expenses to be paid by the company, based in part on the staff's being "unable to conclude that the applicable state law [New Jersey] prohibits a bylaw for a committee with a charter limited to advising the Company's board").

But see Pennzoil Co., [1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,681 (Mar. 22, 1993), in which the staff would not recommend enforcement action if, pursuant to Rule 14a-8(c)(1) (the predecessor to Rule 14a-8(i)(1)), the company omitted from its proxy material a reformatted shareholder proposal (involving the creation of a shareholder committee with the power to review board activities and to advise the board of shareholder views, and whose activities would be funded by the company) even though the proposal was made precatory and was phrased as a bylaw amendment (an action permitted to shareholders under Delaware law) because "there is a substantial question as to whether, under Delaware law, the directors may adopt a by-law provision that specifies that it may be amended only by shareholders."

"Indeed it has been the Commission's view that mandatory proposals are improper even in those areas in which the state law requires a vote of shareholders--such as charter amendments, recapitalizations, mergers, consolidations, sales of substantially all of the corporate assets, and liquidations--if state law also leaves it to the directors to initiate those procedures." L. Loss & J. Seligman, *Securities Regulation* 2050 (3d ed. 1990 & Supp. 1992). Determining whether or not a proposal is proper under state law can be difficult, and the Commission itself has not always been consistent in its position. *Id.* at 2010. See also *Brooks v. Standard Oil Co.*, 308 F. Supp. 810 (S.D.N.Y. 1969).

In general, the Commission considers that the purpose of state laws "is to place in the directors exclusive authority with respect to the profit-making aspects of the business--the running of the business in all its operational phases--and no more." This leaves in the area of stockholder authority the whole field of the qualification, selection and remuneration of the directors and officers and their accountability and reporting to stockholders." L. Loss & J. Seligman, *supra*, at 2047 n.341 (footnote omitted).

As might be expected, where the subject matter is specifically covered by statute, the proposal may be omitted. *Dyer*

v. SEC, 289 F.2d 242 (8th Cir. 1961) . However, it is common for a state statute simply to provide that "the business of the corporation shall be managed by the board of directors." See, e.g., N.Y. Bus. Corp. L. § 701; 8 Del. Code Ann. § 141(a). State court decisions determining what duties are exclusively assigned to directors, and not proper subjects for shareholder action under Rule 14a-8(i)(1), are relatively rare.

See *Brooks v. Standard Oil Co.*, 308 F. Supp. 810, 814 (S.D.N.Y. 1969) :

The relevant statute reads:

"The business and affairs of a corporation shall be managed by its board, except as in this act or its certificate of incorporation otherwise provided. (*New Jersey Stat.: 14A:6-1.*)"

"Standard Oil's by-laws also provide that 'the business and affairs' of the corporation shall be managed by its board of directors."

"Each party here stresses that the other cannot point to any New Jersey judicial decision that squarely holds that plaintiff's proposal is or is not a proper subject for shareholder action."

(n46)Footnote 46. Rule 14a-8(i)(2); 17 C.F.R. § 240.14a-8(i)(2).

The Commission notes that it will not apply this basis for exclusion to permit exclusion of a proposal on grounds that it would violate foreign law if compliance with the foreign law would result in a violation of any state or federal law.

The Commission has approved exclusion of proposals that governing documents be amended to require directors to be elected by majority vote where the proposed action contravenes state law. Goodyear Tire & Rubber Co. when the proposal would violate Ohio law (38 Sec. Reg. Law Rep. 231 (Feb. 6, 2006)); and PG&E, 38 Sec. Reg. Law Rep. 459 (Mar. 13, 2006) (California law). To the same effect, Goodyear Tire & Rubber Co., SEC No-Action Letter, Avail. Jan. 18, 2006 (proposal would cause company to violate Ohio corporate law).

A proposal which would bar indemnification of directors in respect of any Commission proceeding under the Investment Company Act of 1940 could properly be omitted. Farmer Bros. Co., SEC No-Action Letter (Sept. 26, 2006) (proposal would violate Delaware law).

See Litton Indus., SEC No-Action Letter, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,766 (Sept. 9, 1980) (a company could not rely on Rule 14a-8(c)(2) (the predecessor to Rule 14a-8(i)(2)) to omit a shareholder proposal that sought to limit proxy soliciting expenditures and did not affect shares eligible to be voted or the existing manner in which the proxies were counted, absent a more specific indication of how compliance with the proposal would require the company to violate state law).

But see Niagara Mohawk Power Corp., SEC No-Action Letter (Mar. 11, 1993) (there appeared to be some basis for the view that the shareholder proposal recommending that the company's proxy card be changed to replace the "withhold authority" box in respect of the election of nominees for director with a vote "against" box would violate Rule 14a-4(b)(2) under the Exchange Act).

See also Exxon Corp., SEC No-Action Letter (Dec. 31, 1992) (staff would not recommend enforcement action if a shareholder proposal were omitted based on counsel's opinion that its implementation would violate New Jersey law that prohibits companies from issuing stock with differing voting rights within the same class).

See also Apple Computer, Inc., SEC No-Action Letter (Oct. 15, 1992), which involved a shareholder proposal asking the company to seek qualified women to serve as members of the company's board of directors. The staff would not

recommend enforcement action if the proposal were excluded from the company's proxy material because "there appears to be some basis for [counsel's] opinion that the proposal is discriminatory" in violation of federal law.

See also Citicorp, SEC No-Action Letter, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,520 (Feb. 23, 1978) (management could omit, under Rule 14a-8(c)(2) (the predecessor to Rule 14a-8(i)(2)), a shareholder proposal that would require the bank to violate the rights of its customers to have their transactions with the bank remain confidential; however, if the shareholder-proponent were to amend the proposal to eliminate any request for information pertaining to individual borrowers, then management could no longer rely on Rule 14a-8(c)(2) for the omission).

(n47)Footnote 47. Rule 14a-8(i)(3); 17 C.F.R. § 240.14a-8(i)(3).

For a discussion of Rule 14a-9, *see* § 7.04[4] *supra*; and § 7.09 *infra* .

See Amdahl Corp., SEC No-Action Letter (Mar. 2, 1993) (shareholder proposal requesting that the company take steps to cease sales of products to entities involved in the enforcement or maintenance of apartheid is not vague and indefinite within the meaning of Rule 14a-9).

See also Daniel Green Co., SEC No-Action Letter (Feb. 5, 1993) (proposal requesting search be made for a buyer of the company and a monthly progress report made to a committee comprised of the five largest outside shareholders of the company was not false or misleading under Rule 14a-9).

(n48)Footnote 48. Rule 14a-8(i)(4); 17 C.F.R. § 240.14a-8(i)(4).

In Ford Motor Co., SEC No-Action Letter (Mar. 11, 1993), the staff would not recommend enforcement action if a shareholder proposal were excluded on the grounds that, notwithstanding the language of the proposal (which would require the company to implement an affirmative action plan, including specific hiring and promotional goals for minorities, women, the handicapped and homosexuals), there was some basis for the view that the proposal involved a personal grievance by the proponent against the company, based on a purportedly excessive settlement agreement between Ford and a corporation in which the proponent was an executive officer.

See also General Electric Co., SEC No-Action Letter (Jan. 6, 1993) (enforcement action would not be recommended if a shareholder proposal were excluded, the staff noting that the intent of the proponent in submitting the proposal appeared to be "toward redressing a personal grievance against the Board resulting solely from its decisions to exclude some of the numerous proposals previously submitted by the proponent...").

See also Pyramid Technology Corp., SEC No-Action Letter (Dec. 4, 1992), in which enforcement action would not be recommended if the company excluded a shareholder proposal recommending a policy against entering into agreements with executives and directors for compensation upon a change in control without shareholder approval. Counsel for the company indicated that the proponent was a former employee who alleged that the termination was wrongful and that the motive behind the proposal was to embarrass management and force the demanded settlement. The staff stated that "the proposal, while drafted to address other considerations, appears to involve one in a series of steps relating to the longstanding grievance against the Company by the proponent."

If the proposal is clearly motivated by personal pique of the shareholder, the proposal may be omitted. *Jansky v. Miller*, 474 F.2d 365 (9th Cir. 1973) .

(n49)Footnote 49. Rule 14a-8(i)(5); 17 C.F.R. § 240.14a-8(i)(5).

"It was not the intent of Rule 14a-7 [now Rule 14a-8] to permit stockholders to obtain the consensus of other stockholders with respect to matters which are of a general political, social or economic nature. Other forums exist for

the presentation of such views." Sec. Exch. Act Rel. No. 34-3638, 3 Fed. Sec. L. Rep. (CCH) P 24,102 (1945).

In *Lovenheim v. Iroquois Brands, Ltd.*, [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,995 (D.D.C. 1985), the court enjoined a company from excluding from its proxy statement under Rule 14a-8(c)(5) (the predecessor to Rule 14a-8(i)(5)) a shareholder's proposal for a study of the company's alleged mistreatment of animals involving methods used to force-feed geese for the production of pate de foie gras, since the shareholder showed a likelihood of prevailing on the merits on the issue of whether his proposal was "otherwise significantly related" to the company's business, considering the ethical and social significance of the proposal and its implication on the level of sales. The court noted that although the pate de foie gras accounted for significantly less than five percent of the company's total assets, net earnings and gross sales, the history of Rule 14a-8(c)(5) indicated the Commission's intent to require inclusion of proposals raising policy questions important enough to be considered "significantly related to" a company's business notwithstanding their failure to reach specified economic thresholds.

See also *Bristol-Myers Squibb Co.*, SEC No-Action Letter (Mar. 7, 1991) (the staff did not take a no-action position regarding exclusion of a proposal involving giving money to organizations that "support, counsel or perform abortions," notwithstanding the fact that the rule's economic tests allegedly were not met. "[C]onsidering the social and public policy implications of the subject matter of the proposal (*i.e.*, abortion), the staff is unable to conclude that the proposal is not otherwise significantly related to the registrant's business").

But see *American Tel. & Tel. Co.*, SEC No-Action Letter (Jan. 30, 1992), in which the staff stated that it would not recommend enforcement action be taken if the shareholder proposal were omitted. The proposal involved the phase-out by the company of the sale of its products to Israel because of the way Israel treats Palestinians. The staff noted that "the policy issue raised by the proposal, Israel's treatment of Palestinians, is not significant, and in fact is not related, to the Company's business."

See n. 3 *supra* for a discussion of recommendations by the Staff Report on revisions of the predecessor to Rule 14a-8(i)(5).

(n50)Footnote 50. Rule 14a-8(i)(6); 17 C.F.R. § 240.14a-8(i)(6).

See *New York City Employees' Retirement Sys. v. Brunswick Corp.*, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 96,932 (S.D.N.Y. 1992) (shareholder proposal regarding a national health insurance plan was beyond the power of the company to effectuate and could be excluded from proxy materials.)

See *Metrocare, Inc.*, SEC No-Action Letter, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,337 (May 31, 1977), in which the staff would not recommend enforcement action if the shareholder proposal, involving the liquidation of the company's assets and the appointment of a shareholders' group to administer the distribution of the proceeds of liquidation, were excluded from the company's proxy material. Since the proposal called for the delegation of certain duties to persons not elected as directors in contravention of state law, it was beyond the company's power to effectuate.

(n51)Footnote 51. Rule 14a-8(i)(7); 17 C.F.R. § 240.14a-8(i)(7).

The Commission has stated that it: "is of the view that the provision adopted today can be effective in the future if it is interpreted somewhat more flexibly than in the past. Specifically, the term 'ordinary business operations' has been deemed on occasion to include certain matters which have significant policy, economic or other implications inherent in them. For instance, a proposal that a utility company not construct a proposed nuclear power plant has in the past been considered excludable under former subparagraph (c)(5) [*see* *Potomac Electric Power Co.*, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,294 (Mar. 5, 1976)]. In retrospect, however, it seems apparent that the economic and safety considerations attendant to nuclear power plants are of such magnitude that a determination whether to construct

one is not an 'ordinary' business matter. Accordingly, proposals of that nature, as well as others that have major implications, will in the future be considered beyond the realm of an issuer's ordinary business operations, and future interpretative letters of the Commission's staff will reflect that view." Sec. Exch. Act Rel. No. 34-12999, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,812, at 87,131 (Nov. 27, 1976).

See American Home Prods. Corp., SEC No-Action Letter (Feb. 25, 1993), in which a shareholder proposal asking the company to eliminate animal testing was found by the staff to relate to "the substantial policy issue of the humane treatment of animals in product development and testing."

In Union Pacific Corp., SEC No-Action Letter, [1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,633 (Feb. 5, 1993), the staff did not take a no-action position involving a shareholder proposal recommending that the board implement a program under which shareholders could designate, in proportion to their holdings, the company's charitable contributions. The staff determined that the decision regarding allocation of company funds among charitable donees appears to be "extraordinary in nature and beyond the Company's ordinary business operations." *But see* Pacific Telesis Group, SEC No-Action Letter (Feb. 20, 1992) (shareholder proposal requesting corporate contributions to a particular charity, in this case Planned Parenthood Federation of America, could be excluded on the basis that the proposal involved the ordinary business operations of the company; the staff stated that its position represented "a reconsideration of earlier letters relating to shareholder proposals which requested issuers to commence contributions to a particular charity").

See also Wellman Inc., SEC No-Action Letter (Mar. 6, 1991), in which the staff was unable to give a no-action letter involving a shareholder proposal requiring management to obtain shareholder approval for certain transactions valued over \$100 million because "[a] requirement for shareholder approval of certain extraordinary corporate transactions which are economically significant involves a matter that goes beyond the conduct of the Company's ordinary business operations."

See also Loews Corp., SEC No-Action Letter, [1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,600 (Feb. 22, 1990). According to the staff, a proposal that called on the board of directors to take action leading to the eventual stoppage of the manufacture of tobacco and tobacco products could not be omitted from a proxy statement. The staff's position was that since the public policy issues relating to the tobacco industry were of growing significance, the proposal went beyond the realm of the company's ordinary business.

See also Aetna Life & Casualty Co., SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,705 (Feb. 28, 1991) (insurance company could not exclude a shareholder's proposal requesting that a review committee be established to report on investment policies to reduce the company's investments in cigarette companies; the Division of Corporation Finance stated that the proposal raised issues that involve policy decisions regarding the company's investment policies which are beyond the conduct of its ordinary business operations).

The Division of Corporation Finance has observed in a number of recently issued no-action letters that shareholder proposals relating to compensation of senior executives and directors may no longer be considered matters relating to the conduct of a company's ordinary business operations. See letters reported at Fed. Sec. L. Rep. (CCH) PP 76,101-76,110.

See, e.g., Reebok Int'l Ltd., SEC No-Action Letter, [1991- 1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,131 (Mar. 16, 1992), where the staff determined that shareholder proposals concerning issues of executive compensation could no longer be excluded from proxy materials as matters relating to the ordinary business of the company, due to the wide-spread public debate and the increasing recognition that they raise significant policy issues.

See also Transamerica Corp., SEC No-Action Letter, [1989 - 1990 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,338 (Jan. 10, 1990) (shareholder proposal recommending adoption of a policy prohibiting company from making

"golden parachute" arrangements could not be omitted, assuming certain revisions were made to the proposal; the staff stated that golden parachute arrangements are increasingly seen as raising significant policy issues and, accordingly, differ from ordinary compensation arrangements that generally can be excluded as being related to the conduct of a firm's ordinary business operations).

See also New York State Elec. & Gas Corp., SEC No-Action Letter (Mar. 11, 1993) (prior notice of pay or pension increases for executives and directors); Occidental Petroleum Corp., SEC No-Action Letter (Dec. 22, 1992) (salary ceiling for employees and consultants); Baker Hughes Inc., SEC No-Action Letter (Nov. 20, 1992) (limiting awards to executives under certain benefit plans). In each case, the staff was unable to give a no-action letter if the compensation-related proposal were excluded from the company's proxy material.

In *Cracker Barrel Old Country Store, Inc.*, SEC No-Action Letter, [1992 - 1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,418 (Oct. 13, 1992), *aff'd* by full Commission, *Cracker Barrel Old Country Store, Inc.*, SEC No-Action Letter (1993), the full Commission confirmed the view of the staff, which had reconsidered its prior no-action positions regarding employment-based proposals. The staff's letter stated that "the fact that a shareholder proposal concerning a company's employment policies and practices for the general workforce is tied to a social issue will no longer be viewed as removing the proposal from the realm of ordinary business operations of the registrant." The proposal at issue requested that the company include in the corporate policy statement a policy of nondiscrimination on the basis of sexual orientation.

The staff's response in *Cracker Barrel* represented a change from its prior no-action position involving Rule 14a-8(c)(7) (the predecessor to Rule 14a-8(i)(7)) and employment-related proposals. In general, employment matters concerning a company's work force were excludable, but exceptions were made in cases where the employment-related proposal also raised social policy concerns. Notwithstanding these prior determinations, the staff reconsidered this treatment of employment-related proposals that are tied to social issues, such as discrimination, and decided that "determinations with respect to any such proposals are properly governed by the employment-based nature of the proposal," thus excludable under the ordinary business operations exception.

In the *Cracker Barrel* letter, although enforcement action would not be recommended if the shareholder proposal at issue were excluded from the company's proxy material, the staff reiterated its determination that, "unlike proposals relating to the rank and file work force, proposals concerning senior executive and director compensation are viewed by the Commission as inherently outside the scope of normal or routine practices in the running of the company's operations."

In 1998, at the time it adopted amendments to the shareholder proposal rule, the Commission also announced that it was again reversing its position in *Cracker Barrel* and that future determinations of whether a shareholder proposal comes within the "ordinary business operations" exclusion would be made on a case by case basis.

The staff of the Commission has ruled that proposals may be omitted:

- Allowing the company to omit the names and telephone numbers of the Company's five largest shareholders from a supporting statement for an unopposed proposal to reclassify the Board of the Company, on the ground that the information excluded would not assist shareholders in deciding how to vote on the proposal. *Bob Evans Farms Inc.*, SEC No-Action Letter, June 26, 2006, 38 Sec. Reg. Law Rep. 1221 (July 10, 2006).
- Requiring the New York Times Company to put to a vote whether the company keeps its dual-class structure, and that the roles of chairman and publisher of the company's flagship newspaper be separated. *The New York Times Co.*, SEC No-Action Letter December 2006. Such shareholder activism may come at a stiff price. The proposal was submitted by Hassan Elmasry, a portfolio manager for Morgan Stanley

Investment Management, which owns more than 7% of the New York Times Company's shares. Mr. Elmasry has been pressing for a change in the New York Times Company dual stock structure since June 2005, saying that the current arrangement limits accountability. The members of the Ochs-Sulzberger family control the company through a special class of stock. The family has announced that it is withdrawing most of its personal assets from management by Morgan Stanley, according to Lazaroff, www.bloomberg.com (Feb. 2, 2007) who speculated that it may have been in retaliation against Mr. Elmasry's activism.

- Requiring the Board of Directors to prepare a report on the costs, benefits and impacts of the Sarbanes-Oxley Act. Morgan Stanley, SEC No-Action Letter, Jan. 8, 2007. The staff noted that it would not recommend enforcement action if the proposal were omitted as relating to ordinary business operations.
- Requesting that the Company provide a report on the implications of rising health care expenses. Kohl's Corp., SEC No-Action Letter, Jan. 8, 2007, on the ground that the proposal related to a matter of ordinary business operations, *i.e.*, employee benefits.
- Requiring the Board to create an ethics oversight committee of independent directors to monitor the Company's compliance with applicable laws and regulations and the ES Code of Business Conduct and Ethics. AES Corp., SEC No-Action Letter, Jan. 9, 2007, as dealing with ordinary business operations, *i.e.*, "general conduct of a legal compliance program."
- Requiring H&R Block to cease issuance of high interest loans. H&R Block, Inc., SEC No-Action Letter, Aug. 1, 2006. Proposal could be omitted as relating to ordinary business operations, *i.e.*, credit policies, loan underwriting and customer relations.
- Requiring establishment of the "Office of the Board of Directors" to enable direct communication between non-management directors and shareholders. Converse Technology, Inc., SEC No-Action Letter (Sept. 8, 2003) (proposal deals with ordinary business operations).
- Requiring adoption of a policy to limit the buyback of shares within specified limits. Pfizer Inc., SEC No-Action Letter (Feb. 7, 2003) (ordinary business operations).
- Requiring all options to management and board of directors to be no less than the "highest stock price" and that the options contain a buyback provision. Pfizer Inc., SEC No-Action Letter (Feb. 8, 2003) (vague and indefinite).
- Requiring redemption of all outstanding shares of 4.5% preferred stock. Cleco Corp., SEC No-Action Letter (Jan. 21, 2003) (ordinary business operations).
- Requiring a cap of \$1,000,000 on "salaries and benefits" for officers and directors. General Electric Co., SEC No-Action Letter (Jan. 23, 2003) (vague and indefinite).
- Requiring that the company refrain from making charitable contributions. Bank of America Corp., SEC No-Action Letter (Jan. 23, 2003) (ordinary business operations).
- Requiring amendment to by-laws to require the company to include the name of any person nominated for election to the board by a stockholder owning 3% or more of the company's stock. Citigroup Inc., SEC No-Action Letter (Jan. 31 2003) (relates to an election for membership on board of directors).

1-7 Federal Securities Exchange Act of 1934 § 7.07

- Requiring amendment of certificate of incorporation to reinstate the rights of the shareholders to take action by written consent and to call special meetings. Burlington Resources Inc., SEC No-Action Letter (Feb. 7, 2003) (violation of law; absence of power-authority).
- Requiring adoption of a policy changing outside auditors at least every five years, starting with the next auditing cycle. WGL Holdings, Inc., SEC No-Action Letter (Dec. 6, 2002) (management functions, relating to ordinary business matters).
- Requiring that a decision to adjourn the annual meeting be subject to objection by any shareholder present at the meeting. Walt Disney Co., SEC No-Action Letter (Nov. 29, 2002) (management functions, relating to ordinary business).
- Requiring shareholder approval of all equity compensation plans "other than those that would not result in material potential dilution." Adobe Systems Inc., SEC No-Action Letter (Feb. 1, 2002) (ordinary business operations, *i.e.*, general compensation matters).
- Requiring disassociation from any offensive imagery to the American Indian community in product marketing, advertising, endorsements, sponsorships and promotions. Tootsie Roll Industries Inc., SEC No-Action Letter (Jan. 31, 2002) (ordinary business operations, *i.e.*, the manner in which a company advertises its products).
- Requiring amendment of pension plan to increase retirement benefits. Otter Tail Corp., SEC No-Action Letter (Jan. 15, 2002) (ordinary business operations, *i.e.*, employee benefits).

The staff has required inclusion of proposals:

- A proposal that the Board take the necessary steps to amend bylaws and governing documents to give holders of 10 percent of the outstanding common stock (or the lowest percentage allowed by law above 10%) the power to call special meetings of stockholders. *Burlington Northern Santa Fe Corp.*, SEC No-Action Letter issued 1/12/09.
- A proposal that the Board adopt a policy giving shareholders the opportunity at annual meetings to vote on an advisory resolution to ratify the compensation of the executive officers named in the summary compensation table. The company had argued that the proposal was materially misleading because it was non-binding and provided no actual way to ratify or approve compensation, and that it was excludable under Rule 14a-8 because a request for future votes is not a proper form for a proposal. *Allegheny Energy, Inc.*, *Fed. Sec. Law Rep.* § 79, 754.
- That Coca Cola Co. and Intel Corp. place limits on "remuneration to any of the top five persons named in Management." The Staff advised that the proposals could not be excluded as vague or misleading in reliance on Rule 14a-8(i)(3). Coca Cola Corp., SEC No-Action Letter (Jan. 29, 2007); Intel Corp., SEC No-Action Letter (Jan. 30, 2007).
- That General Electric Co.'s Board establish an independent committee to prepare a report on pay differentials between senior executives and the lowest paid 10% of employees. The Staff stated it was unable to concur that the proposal could be excluded as vague, indefinite or false and misleading under Rule 14a-8-i-3. General Electric Co., SEC No-Action Letter (Jan. 18, 2007).

- A proposal that a company participating in the TARP program impose numerous restrictions on executive compensation in addition to those mandated by the ARRA legislation adopted for TARP participants. *Regions Financial Corporation*, SEC No-action Letter issued 2/5/09.
- A proposal requesting the board to take the steps necessary so that voting requirements in the charter and bylaws calling for greater than a simple majority be changed to a majority of the votes cast for and against related proposals cannot be omitted in reliance on Rule 14a-8(i)(6). *NYSE Euronext*, Fed. Sec. Law Rep. No 2364 (2/11/09).
- That Hewlett Packard's board of directors initiate the appropriate process to amend the company's governance documents to provide that director nominees be elected by the affirmative vote of the majority of votes cast. Hewlett Packard had based its argument on the fact that it had adopted a majority voting policy under which a director who receives a greater number of votes "withheld" from his or her election than votes "for" such election is required to tender his or her resignation for consideration by the company's Nominating and Corporate Governance Committee. *BNA Corporate Counsel Weekly* (Jan. 18, 2006).
- To amend governing documents to require that the Chairman of the Board of Directors serve only in that capacity. *General Motors Corp.*, 38 Sec. Reg. Law Rep. 150 (Jan. 23, 2006).
- That Whole Foods Markets, Inc.'s Board of Directors take steps necessary for a simple majority vote to apply on each issue subject to a stockholder vote. 38 Sec. Reg. Law Rep. 40 (Jan. 2, 2006). To the same effect, *IBM*, 38 Sec. Reg. Law Rep. 228 (Feb. 6, 2006).
- That Honeywell's Board of Directors adopt a policy that a shareholder's vote be required on the amendment of any "golden parachute" or "golden hello" issued in any merger, as a ballot item separate from the merger itself. 38 Sec. Reg. Law Rep. 353 (Feb. 27, 2006).
- That Gannett amend its governing documents to require the directors to be elected by majority vote. 38 Sec. Reg. Law Rep. 150 (1/23/06); similarly, *Hewitt-Packard Co.*, Sec. No-Action Letter (Jan. 23, 2006).
- That Occidental Petroleum Corporation's Board publish annually a scientific report on global warming/cooling. 38 Sec. Reg. Law Rep. 309 (Feb. 20, 2006).
- Computer Associates filed objections with the Commission to a proposal by Harvard Law School Professor Lucian Bebchuk which would mandate unanimous Board action to adopt a poison pill and require a one-year expiration date on any rights plan not approved by stockholders. Computer Associates claimed that the proposal violated Delaware law. In a Delaware court action brought by Professor Bebchuk to declare the proposals valid under Delaware law, the Delaware Chancery Court held that the case was premature but observed that the proposals were not obviously contrary to Delaware law. Computer Associates voluntarily agreed to include the proposals in its proxy material. *Bebchuk v. CA, Inc.*, 902 A.2d 737 (June 22, 2006) (Lamb, Vice Chancellor).
- Requiring the independent directors to prepare a report on the implications of a policy for reducing potential harm from chemical releases. *E.I. DuPont de Nemours & Co.*, SEC No-Action Letter (Feb. 24, 2006) (Staff unable to concur that the proposal relates to ordinary business operations).
- Requiring shareholder approval for future severance agreements with senior executives providing benefits exceeding 2.99 times the sum of the executive's base salary plus bonus. *Emerson Electric Co.*,

SEC No-Action Letter (Oct. 24, 2005).

- Requiring that an investment banking firm be engaged to pursue a sale of the company. Gyrodyne Co. of America, Inc., SEC No-Action Letter (Sept. 26, 2005).
- To retain an investment banker to develop a plan for recapitalization to result in one vote per share for all outstanding company stock. 36.82% of the voting power of the company was controlled through ownership of Class B stock by the chairman of the company. The company argued that the implementation of a recapitalization would be beyond the power of the company or its board of directors to implement in view of such control, a position which was rejected by the Staff. Affiliated Computer Services, Inc., SEC No-Action Letter (Aug. 9, 2005).
- To amend by-laws to require that an independent director who has not served as CEO serve as chairman of the board. Clear Channel Communications Inc., SEC No-Action Letter (March 5, 2003). Tyco International Limited, Fed. Sec. L. Rep. (CCH) P 78,421 (2003).
- Requiring shareholder approval of equity compensation plans that may be used to compensate only senior executive officers and directors; however, proposals that would require shareholder approval for equity compensation plans that also cover the general workforce may be excluded under the ordinary business exemption. SEC's Staff Legal Bulletin No. 14A, Fed. Sec. L. Rep. (CCH) P 60,014A (2002).
- Which urges the board of directors to take the necessary steps to declassify the board so that each director would be elected annually instead of every three years. Starbucks Corp., SEC No-Action Letter (Dec. 12, 2001). Honeywell International Inc., Fed. Sec. L. Rep. (CCH) P 78,433 (2003).
- That shareholder approval be required prior to a board of directors adopting any poison pill, and that any pill then in effect be redeemed or terminated unless approved by shareholders at the next shareholder meeting. UAL Corp., SEC No-Action Letter (Feb. 1, 2002) (includable subject to revision).
- That the board of directors incorporates specific measures for use in awarding performance-based executive compensation related to rebuilding core air transport business following September 11, 2001 attack. UAL Corp., SEC No-Action Letter (Jan. 28, 2002).
- Prohibiting the company's outside auditor from performing other non-audit services for the company. Walt Disney Co., Fed. Sec. L. Rep. (CCH) P 78,221. Motorola Inc., SEC No-Action Letter (Jan. 16, 2002).
- Calling for the elimination of super-majority voting requirements. Honeywell International Inc., SEC No-Action Letter (Oct. 16, 2001) (subject to revision).
- That the company institute a policy of paying dividends. Drexler Technology Corp., SEC No-Action Letter (Aug. 23, 2001) (subject to revision). Sonoma West Holdings Inc., SEC No-Action Letter (Aug. 17, 2000).
- That the board of directors adopt a policy of phasing out the manufacture of PVC-containing or phthalate-containing medical supplies by its subsidiary where safe alternatives are available. Tyco International Ltd., SEC No-Action Letter (Dec. 5, 2002).
- That all future stock option grants to senior executives be performance based. Goldman Sachs Group, Inc., Fed. Sec. L. Rep. (CCH) P 78,429 (2003). Maximus, Inc., Fed. Sec. L. Rep. (CCH) P 78,420

(2003).

- Requiring the company to adopt a policy that senior executives retain a significant percentage of shares acquired through equity compensation programs during employment and to report to shareholders before the next annual meeting. Adobe Systems Inc., Fed. Sec. L. Rep. (CCH) P 78,439 (2003).
- Establishing a cap on total compensation to the CEO in a given year equal to 50 times the average compensation paid to non-exempt employees. Verizon Communications Inc., SEC No-Action Letter (Jan. 24, 2003).
- Requiring shareholder approval for future severance agreements with senior executives providing benefits exceeding 2.9 times the sum of the executives basic salary plus bonus. Raytheon Co., SEC No-Action Letter (Jan. 22, 2003).
- Requiring diversification of the board of directors. ExxonMobil Corp., SEC No-Action Letter (Jan. 22, 2001).
- Limiting the number of stock option grants to executive officers to more than 5% of total options granted in a single year, and aggregate grants to the group of executive officers to no more than 10%. Walt Disney Co., Fed. Sec. L. Rep. (CCH) P 78,033 (2000).
- Requesting that the company endorse a list of principles on human rights for workers in China. Microsoft Corp., SEC No-Action Letter (Sept. 14, 2000).
- Requesting that the board of directors arrange for the prompt sale of the company to the highest bidder. NCH Corp., SEC No-Action Letter (Apr. 27, 2000).
- Requesting that the board of directors take the steps necessary to insure that all directors are elected annually with a 70 percent majority being independent directors. Raytheon Co., SEC No-Action Letter (Mar. 9, 1999).
- Requesting that the board review or amend where applicable the company's standards for international operations and report a summary to shareholders including a description of policies designed to protect human rights, efforts to ensure that the company does not employ children under the age of fifteen, policies to ensure no use of forced labor, and consistent standards for workers' health and safety. RR Donnelley & Sons Co., SEC No-Action Letter (Jan. 14, 1999).
- Calling for a bylaw amendment prohibiting the repricing of stock options below the original strike price without prior approval of company stock holders. General DataComm Industries Inc., SEC No-Action Letter (Dec. 9, 1998).

For additional letters in which the staff was unable to take a no-action position if the shareholder proposal were excluded, see Westinghouse Electric Co., SEC No-Action Letter, [1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,636 (Feb. 3, 1993) (proposal to develop a plan for withdrawal from the nuclear weapons business); Eastman Kodak Co., SEC No-Action Letter (Jan. 30, 1992) (proposal involving eventual cessation from involvement in the production, packaging and marketing of cigarettes); TRW Inc., SEC No-Action Letter (Feb. 12, 1990) (shareholder proposal calling for the establishment of a shareholders' advisory committee to advise the board of directors on shareholders' interests); Eli Lilly & Co., SEC No-Action Letter, [1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,629 (Feb. 25, 1993) (price restraint proposal relates to a "fundamental business strategy with respect to [the company's] pricing policy for

pharmaceutical products"); and Westinghouse Electric Corp., SEC No-Action Letter (Jan. 4, 1993) (CERES principles proposal involving environmental code for corporations involves matters that have "significant policy, economic [and] other implications and involves decisions that are beyond the conduction of the Corporation's ordinary business operations").

Sec. Exch. Act Rel. No. 34-12999, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,812 (Nov. 22, 1976).

"Current staff interpretations of this exclusion emphasize 'ordinary' and attempt to separate matters with major implications from those involving day to day concerns. Typical subjects which have been held to be ordinary business are: conduct of legal matters; management training methods; limitations on selling and administrative expenses and funded debt, providing discounts for shareholders on company products and accounting practices. Matters which have been held not to constitute ordinary business include establishment of special committees to examine major issues and report to shareholders; environmental questions; construction of nuclear power facilities; liquidation of the company and charitable contributions."

"Nonetheless, efforts to make distinctions which carry out the statutory intent continue to be difficult, and additional guidance may be necessary."

Staff Report, n.3 *supra*, at 204-205 (footnotes omitted).

See Roosevelt v. E.I. Du Pont De Nemours & Co., 958 F.2d 416 (D.C. Cir. 1992) , where the court held that issues concerning both the target date of a company's phase-out of an environmentally hazardous product and management reports detailing efforts to find and market environmentally safe substitutes could be excluded from proxy materials since they related to ordinary business operations.

See also Mosinee Paper Corp., SEC No-Action Letter (Feb. 18, 1993), in which the staff would not recommend enforcement action if a shareholder proposal asking the company to implement a dividend reinvestment plan was omitted because it "deals with the determination of methods of raising capital, a fundamental aspect of Mosinee's ordinary business operations."

See also Kmart Corp., SEC No-Action Letter (Feb. 23, 1993) (shareholder proposal requesting the company to refrain from selling reading materials variously described as "soft core porn," "sexually explicit" and "adult" relates to the ordinary business of "the sale of a particular category of products" and, therefore, could be omitted).

In McDonald's Corp., SEC No-Action Letter (Mar. 16, 1993), a shareholder's proposal requesting that corporate facilities, including facilities of new franchisees, become smoke-free, the staff determined that such proposal, involving the management of the place of business, constituted an ordinary business operation of the company.

See also Capital Cities/ABC, Inc., SEC No-Action Letter, [1990 - 1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,690 (Apr. 4, 1991), in which the Commission stated that a shareholder proposal requesting detailed information regarding the composition of the company's work force, employment policies and selection of its television program content may be omitted from the company's proxy materials pursuant to Rule 14a-8(c)(7) (the predecessor of Rule 14a-8(i)(7)) since it involved matters relating to the conduct of the company's ordinary business operations. The Commission reversed the Division of Corporation Finance's position on the proposal, which had stated that inquiries regarding affirmative action involve policy decisions beyond the scope of ordinary business operations.

See also Grimes v. Ohio Edison Co., [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 96,840 (S.D.N.Y. 1992), *aff'd*, 992 F.2d 455 (2d Cir. 1993) , *cert. denied*, 62 U.S.L.W. 3348 (Nov. 15, 1993) . (A shareholder proposal requiring prior shareholder approval for capital or construction expenditures unless the yearly amount of such expenditures was less than the cash dividends paid to shareholders in the previous year was found to relate to the ordinary business

operations of the company. As such, the proposal could be omitted from the proxy materials under Section 14a-8(c)(7)).

See also Austin v. Consolidated Edison Co. of New York, 788 F. Supp. 192 (S.D.N.Y. 1992), where the court found that the issue presented by plaintiffs (whether employees could retire after 30 years of service, regardless of age) was excludable from the company's proxy materials because it was in the ordinary course of business. Since there were other forums of debate, such as collective bargaining, where this particular issue could be raised, a shareholder vote was not the only forum, nor the most effective forum, for this discussion. The court further commented that general compensation issues and pension proposals are often excluded from proxy statements. Therefore, the company was not compelled to include plaintiffs' proposal in the proxy statement.

For additional no-action letters in which enforcement action would not be recommended if the shareholder proposal were excluded from the company's proxy material, *see* Unisys Corp., SEC No-Action Letter (Feb. 19, 1993) (equal employment opportunity in Northern Ireland); Roadway Services Inc., SEC No-Action Letter (Mar. 16, 1993) (minimum pensions); General Electric Co., SEC No-Action Letter (Feb. 2, 1993) (television programming); and International Business Machines Corp., SEC No-Action Letter (Jan. 23, 1992) (benefits to "committed domestic partners" of homosexual employees); Capital Trust, Inc., Fed. Sec. Law Rep. No. 2366 (proposal that the board adopt and disclose a detailed CEO succession plan policy).

(n52)Footnote 52. Rule 14a-8(i)(8); 17 C.F.R. § 240.14a-8(i)(8).

The Second Circuit has overruled the Commission's issuance of a No-Action Letter allowing exclusion of a proposal for the adoption of a bylaw amendment allowing insurgents to submit nominees on Company ballots. *AFSCME v. AIG*, 462 F.3d 121 (2d Cir. 2006). The Court held that a proposal to establish a procedure by bylaw amendment whereby shareholders can propose nominees for election "does not relate to an election within the meaning of [Rule 14a-8(i)(8)] and therefore cannot be excluded from corporate proxy materials under that regulation" citing a 1976 SEC interpretation reflecting the view that the permitted exclusion only applies to proposals dealing with election to an identified Board seat, not election procedures generally.

The Commission then issued two alternative proposals dealing with director nominations by shareholders, one (Sec. Exch. Act Rel. 34 56160) proposing a limited right to propose electoral changes through bylaw amendment by 5% shareholders, and one (Sec. Exch. Act Rel. 34 56161) denying shareholders the right to intervene in the elective process absent an election contest. The Commission in Sec. Exch. Act Rel. 34-56914 adopted the latter alternative. *See* discussion at § 7.07, SHAREHOLDER PROPOSALS-INTRODUCTION, *supra*.

In reviewing developments in the 2007 proxy season at a D.C. bar program on the proxy rules and corporate governance, Ted Yu, Special Counsel in the Division of Corporation Finance Office of Chief Counsel, noted receipt of a number of no action requests to exclude proposals seeking advisory votes on executive pay. The Commission has approved exclusion of proposals on the Compensation Committee report but not on the company's Compensation Disclosure and Analysis discussion in the company's proxy statement. The Commission has allowed exclusion of proposals seeking a vote on whether compensation is too high, too low or just right, but not proposals seeking advisory votes on the summary compensation tables. He noted that many companies attempt to preempt shareholders on advisory votes on compensation proposals by adopting bylaw amendments on majority votes. S.R.L.R. No. 2269 (2007).

In response to a request for a No-Action Letter on exclusion of a proposal to amend bylaws to require that the company include the name of any person nominated for election to the Board by a stockholder who has beneficially owned 3% or more of the company's outstanding common stock for at least two years, the Staff declined to concur or dispute the exclusion, noting that the company's submission relied on certain prior staff interpretations as precedent which ran counter to the *AFSCME v. AIG* case referred to above. The Staff declined to concur or disagree with the company's assumption that a different circuit would have jurisdiction for purposes of the request, and expressed no view on excludability. *Hewlett-Packard Co.*, 2261 Fed. Sec. Law Rep. (January 31, 2007).

In *Rauchman v. Mobil Corp.*, 739 F.2d 205 (6th Cir. 1984), the court held that Rule 14a-8(c)(8) (the predecessor of Rule 14a-8(i)(8), 17 C.F.R. § 240.14a-8(i)(8)), permitted the omission from the proxy statement of a shareholder's proposed bylaw amendment that would have prevented a Saudi Arabian citizen, appointed to the company's board of directors, from running for reelection. Although the court assumed that a private right of action exists under Section 14(a) of the Exchange Act, even when premised on a violation of Rule 14a-8 rather than Rule 14a-9, the court stated that the company properly excluded the shareholder's proposal since it related to an election to office.

(n53)Footnote 53. Rule 14a-8(i)(9); 17 C.F.R. § 240.14a-8(i)(9).

The Commission notes that the company's submission to the Commission relying on this basis for exclusion should specify the points of conflict with the company's proposal. Note to Rule 14a-8(i)(9); 17 C.F.R. § 240.14a-8(i)(9).

See *Chrysler Corp.*, SEC No-Action Letter (Feb. 26, 1993), in which the staff took the position that compliance with the executive compensation disclosure rules adopted in 1992 did not render moot a shareholder proposal requesting the board of directors to review the company's executive compensation policies and report on the review to shareholders. The new rules involved "a discussion of the prior year's compensation, not a discussion of recommendations for changes in existing compensation policy."

See also *Rockwell Int'l Corp.*, SEC No-Action Letter (Dec. 16, 1992) (shareholder proposal requesting that the board of directors create a panel to develop criteria for accepting military contracts may not be excluded as moot because the staff did not believe that the company "substantially implemented the proposal concerning the specific social, ethical and other concerns of defense contracting").

(n54)Footnote 54. Rule 14a-8(i)(10); 17 C.F.R. § 240.14a-8(i)(10).

A proposal rendered moot by the company's action or otherwise may be omitted from the company's proxy materials. The reason for the mootness of the proposal is immaterial; it may be omitted if moot for any reason.

See *Chevron Corp.*, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,706 (Feb. 27, 1991), in which the staff stated that it would not recommend enforcement action if a company omitted a shareholder's proposal regarding environmental policies from its proxy materials. The shareholder's proposal and a company-sponsored proposal also involving environmental policies would present alternative and complementary decisions for shareholders; implementing both would provide ambiguous and inconsistent results.

(n55)Footnote 55. Rule 14a-8(i)(11); 17 C.F.R. § 240.14a-8(i)(11).

It would appear that the rule requires a company to include in its proxy material the first proposal which it receives covering a subject matter, notwithstanding the fact that a later proposal covering the identical or similar subject matter may be better written or more easily understandable by shareholders.

(n56)Footnote 56. "[T]his provision will be considered to be available in the future for the omission of a proposal which, although not substantially the same as any one proposal submitted in a prior year, is composed essentially of the elements of two or more proposals that were submitted for a vote in prior years and failed to receive the percentage of the total vote specified in the rule." Sec. Exch. Act Rel. No. 34-12999, [1976 - 1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,812 (Nov 22, 1976).

In *Newmont Mining Corp.*, SEC No-Action Letter, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,555 (Feb. 21, 1978), the staff was of the opinion that management could not rely on Rule 14a-8(c)(12)(ii) (the predecessor of Rule 14a-8(i)) as a basis for omitting a shareholder proposal from its proxy soliciting material for its 1978 annual meeting where the company inadvertently omitted part of the shareholder's supporting statement from the company's 1977 proxy

material. Furthermore, the proposal did receive more than three percent of the votes cast at the 1976 annual meeting (as required under prior Rule 14a-8(c)(12)(i) in effect at that time) and therefore could not be omitted pursuant to Rule 14a-8(c)(12)(i) (now Rule 14a-8(i)(12)(ii)).

See also E.I. Du Pont De Nemours & Co., SEC No-Action Letter, [1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 81,510 (Dec. 16, 1977) (management could not exclude proposal pursuant to Rule 14a-8(c)(12)(i) (now Rule 14a-8(i)(12)) because 1978 proposal not substantially the same as 1976 proposal).

(n57)Footnote 57. Rule 14a-8(i)(12)(i); 17 C.F.R. § 240.14a-8(i)(12)(i).

(n58)Footnote 58. Rule 14a-8(i)(12)(ii); 17 C.F.R. § 240.14a-8(i)(12)(ii).

(n59)Footnote 59. Rule 14a-8(i)(12)(iii); 17 C.F.R. § 240.14a-8(i)(12)(iii).

(n60)Footnote 60. Rule 14a-8(i)(13); 17 C.F.R. § 240.14a-8(i)(13).

The purpose of this provision is to prevent shareholders from being burdened with a multitude of conflicting proposals on such matters. The problem arises when several proponents independently submit proposals asking that differing amounts of dividends be paid.

(n61)Footnote 61. Sept. 15, 2004.

(n62)Footnote 62. June 28, 2005.

(n63)Footnote 63. Rule 14a-8(j); 17 C.F.R. § 240.14a-8(j).

(n64)Footnote 64. Rule 14a-8(j)(1); 17 C.F.R. § 240.14a-8(j)(1).

(n65)Footnote 65. Rule 14a-8(j)(3)(i); 17 C.F.R. § 240.14a-8(j)(3)(i).

(n66)Footnote 66. Rule 14a-8(j)(3)(ii); 17 C.F.R. § 240.14a-8(j)(3)(ii).

(n67)Footnote 67. Rule 14a-8(j)(3)(iii); 17 C.F.R. § 240.14a-8(j)(3)(iii).

(n68)Footnote 68. Rule 14a-8(k); 17 C.F.R. § 240.14a-8(k).

(n69)Footnote 69. Rule 14a-8(l); 17 C.F.R. § 240.14a-8(l).

(n70)Footnote 70. Rule 14a-8(l)(1); 17 C.F.R. § 240.14a-8(l)(1).

(n71)Footnote 71. Rule 14a-8(l)(2); 17 C.F.R. § 240.14a-8(l)(2).

(n72)Footnote 72. Rule 14a-8(m); 17 C.F.R. § 240.14a-8(m).

(n73)Footnote 73. Rule 14a-8(m)(1); 17 C.F.R. § 240.14a-8(m)(1).

(n74)Footnote 74. In *United Paperworkers Int'l Union v. International Paper Co.*, 985 F.2d 1190 (2d Cir. 1993), the court of appeals held that International Paper Co. materially misrepresented its environmental record in responding to a shareholder proposal requesting adoption of the Valdez principles on environmental responsibility and affirmed that proxy rule violations had occurred. Suit was brought by a shareholder (not the proponent) alleging that the company's statement in opposition included in the 1992 proxy statement (stating that the company had addressed environmental concerns "in an appropriate and timely manner") was misleading by not disclosing that the company had been accused of numerous environmental offenses, had pled guilty to several felonies involving environmental issues, had paid large

finances and had been the target of numerous administrative complaints involving environmental compliance. Although certain environmental disclosures had been included in the company's annual report to shareholders, the court of appeals stated that the "disclosures contained in the annual report failed to cure the materially misleading representations and omissions in the Proxy Statement. The district court properly ruled that the Company had violated § 14(a) and Rule 14a-9." *Id.*; at 1201. The court also ordered the company to include a description of the judgment against it in its 1993 proxy materials.

(n75)Footnote 75. Rule 14a-8(m)(2); 17 C.F.R. § 240.14a-8(m)(2).

It may not be the best corporate policy to adopt a "higgling approach" under Rule 14a-8 given the remote likelihood of shareholder approval. L. Loss & J. Seligman, § 7.04[4], *supra*, at 2050.

"The very opportunity to submit proposals, even of an advisory nature, affords a safety valve for stockholder expression at a price to the registrant that would seem to be relatively slight." *Id.* at 2051.

(n76)Footnote 76. Rule 14a-8(m)(3)(i); 17 C.F.R. § 240.14a-8(m)(3)(i).

(n77)Footnote 77. Rule 14a-8(m)(3)(ii); 17 C.F.R. § 240.14a-8(m)(3)(ii).

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.08

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.08 Election Contests

Proxy contests involving the election or removal of directors at any annual or special meeting of shareholders are subject to special requirements involving reporting and disclosure of the identity of any "participant" in the contest and of the interest of each participant in the matters to be acted upon. A dissident shareholder has certain rights to assure dissemination of the shareholder's proxy material to the company's shareholders. Certain activities by dissident shareholders intended to influence the outcome of elections are exempt from the proxy statement requirements.

[1] In General--Rule 14a-12(c)

If a shareholder determines to solicit n1 proxies or consents for the purpose of opposing a solicitation under Regulation 14A n2 with respect to the election or removal of directors, both sides in the resulting proxy contest become subject to the special provisions of Rule 14a-12(c). n3

[a] Solicitations Constituting Election Contests. Before an election contest can commence, there must be a solicitation subject to Regulation 14A (the "Primary Solicitation") with respect to the election or removal of directors. n4 A solicitation (other than an exempt solicitation) made in opposition to that first solicitation (the "Opposing Solicitation") begins the election contest. In most cases the Primary Solicitation is conducted by the board of directors of the company, and an Opposing Solicitation is conducted by dissident shareholders. Once the Opposing Solicitation has begun, Rule 14a-11 would also apply to any further solicitation by the person or group conducting the Primary Solicitation. Rule 14a-11 would not apply to activities that do not constitute "solicitations" for purposes of Rule 14a-1(l)(2) n5 or to activities that are exempt from Regulation 14A (other than Rule 14a-9) n6 pursuant to Rule 14a-2(b). n7 Rule 14a-11 is not applicable to shareholder proposals not related to the election or removal of directors but would be applicable if a proposal involves any election or removal of directors. n8

[b] Definition of "Participant." Since complete disclosure of the identity of any participant in the contest and of any interest in the election contest is required, the definition of "participant" is central to an understanding of Rule 14a-11. "Participant" for purposes of Item 4 ("Persons Making the Solicitation") and Item 5 ("Interest of Certain Persons in Matters to Be Acted Upon") of Schedule 14A n9 is defined in Instruction 3(a) to Item 4 of Schedule 14A to include any of the following:

- the registrant (*i.e.*, the company whose shareholders are being solicited);
- any director of the company or any nominee for whose election as a director proxies are solicited;
- any committee or group that solicits proxies, any member of such a committee or group, or any person whether or not named as a member of such a committee or group, who, acting alone or with one or more other persons, either directly or indirectly takes the initiative, or engages in organizing, directing or arranging for the financing of any such committee or group; n10
- anyone who contributes more than \$500 to the expense of solicitation; contributors of up to \$500 are not considered to be participants merely because of their donations; n11
- any person who lends money or furnishes credit or enters into any other arrangements, pursuant to any contract or understanding with a participant, for the purpose of financing or otherwise inducing the purchase, sale, holding or voting of shares of the company by any participant or other person, in support of or in opposition to a participant; n12 and
- any person who solicits n13 proxies.

The term "participant" does not include:

- any person or organization retained or employed by a participant to solicit shareholders and whose activities are limited to the duties required by such employment;
- any person who merely transmits proxy soliciting material or performs related ministerial or clerical duties;
- any attorney, accountant, or advertising, public relations or financial adviser employed by a participant and whose activities are limited to the duties required by such employment;
- any person regularly employed as an officer or employee of the company or any of its subsidiaries who is not otherwise a participant; or
- any officer or director of, or any person regularly employed by, any other participant, if the officer, director or employee is not otherwise a participant. n14

In *Chris-Craft Indus., Inc. v. Independent Stockholder's Comm.*, n15 a stockbroker who merely called shareholders to verify that they were actually Chris-Craft shareholders and to inform them that a proxy battle was going on was not a participant.

[c] Information to Be Included in Proxy Statement of Participants in Proxy Contests.

Proxy statements issued by participants in an election contest must contain the information specified in Regulation 14A. n16 Item 4(b), "Persons Making the Solicitation," Item 5(b), "Interest of Certain Persons in Matters to Be Acted Upon," and Item 7, "Directors and Executive Officers," of Schedule 14A contain references to the contents of proxy statements used in election contests.

[i] Persons Making the Solicitation. Item 4(b) of Schedule 14A requires that the following information be included in proxy statements relating to solicitations that are subject to Rule 14a-12(c):

- the identity of the person by whom the solicitation is being made and a description of the methods employed and to be employed to solicit shareholders;
- the manner and nature of employment of any regular employees of the participant who have been or are to be employed to solicit shareholders;
- if specially engaged employees, representatives or other persons have been or are to be employed to solicit shareholders, (i) the material features of any contract or arrangement for such solicitation and the identity of the parties, (ii) the cost or anticipated cost thereof, and (iii) the approximate number of such employees or employees of any other person (naming such person) who will solicit shareholders;
- the total amount estimated to be spent and the total expenditures to date in connection with the solicitation of shareholders;
- the person by whom the cost of the solicitation will be borne; n17 and
- the terms of any settlement between the company and any other participant, including the cost or anticipated cost thereof to the company, if the solicitation is terminated pursuant to a settlement.

[ii] Interest of Certain Persons in Matters to Be Acted Upon. Specific information is required in proxy soliciting material relating to an election contest with respect to the interest of certain persons in the election contest. n18 Any such proxy statement must:

- describe briefly any substantial interest, direct or indirect, by security holdings or otherwise of each participant (other than the company) in any matter to be acted upon at the meeting, and include with respect to each participant n19 the following information or a fair and accurate summary thereof:

(i) the name and business address of the participant;

(ii) the participant's present principal occupation or employment and the name, principal business and address of any corporation or other organization in which such employment is carried on;

(iii) a statement as to whether or not, during the past ten years, the participant has been convicted in a criminal proceeding (excluding traffic violations or similar misdemeanors) and, if so, the dates, nature of conviction, name and location of court, and penalty imposed or other disposition of the case; n20

(iv) the amount of each class of securities of the company that the participant owns beneficially, n21 directly or indirectly;

(v) the amount of each class of securities of the company that the participant owns of record but not beneficially;

(vi) the date on which securities of the company were purchased or sold within the past two years and the amount purchased or sold on each date;

(vii) if any part of the purchase price of any of the securities purchased during the past two years is represented by funds borrowed or otherwise obtained for the purpose of acquiring or holding such securities, a statement to that effect and an indication of the

amount of such indebtedness as of the latest practicable date; n22

(viii) a statement as to whether or not the participant is, or was within the past year, a party to any contract, arrangement or understanding with any person with respect to any securities of the company, including joint ventures, loan or option arrangements, puts or calls, guarantees against loss or guarantees of profit, division of losses or profits, or the giving or withholding of proxies and, if so, the names of the parties to such contracts, arrangements or understandings and the details thereof;

(ix) a statement as to the amount of securities of the company owned beneficially, directly or indirectly, by each of the participant's associates n23 and the name and address of each such associate;

(x) a statement as to amount of each class of securities of any parent or subsidiary of the company that the participant owns beneficially, directly or indirectly;

(xi) the information for the participant and any associate of the participant with respect to transactions with the company required by Item 404(a) of Regulation S-K; n24

(xii) a statement as to whether or not the participant or any associate of the participant has any arrangement or understanding with any person (A) with respect to any future employment by the company or any affiliate of the company or (B) with respect to any future transaction to which the company or any of its affiliates will or may be a party and, if so, a description of each arrangement and understanding and a statement of the names of the parties thereto; and

(xiii) describe any substantial interest, direct or indirect, by security holdings or otherwise, that any person (other than a director or executive officer of the company acting solely in that capacity) who is a party to any arrangement or understanding pursuant to which a nominee for election as director is proposed to be elected has in any matter to be acted upon at the meeting and furnish the information described in [xi] or [xii] above.

[iii] Directors and Executive Officers. A proxy statement used in connection with an election contest must contain the information specified in Item 7 of Schedule 14A n25 with respect to directors and executive officers. However, for soliciting material distributed on behalf of persons other than the company, the information required needs to be furnished only as to the nominees of the persons making the solicitation. n26

[iv] Other Information. While Items 4, 5 and 7 of Schedule 14A specify information to be included in proxy statements used in connection with election contests, Schedule 14A as a whole would apply to such proxy statements. It would seem logical, however, to conclude that only those items relevant to the participant's proxy material should need to be included. n27

[v] Additional Soliciting Material. If the person making the initial solicitation distributes additional proxy soliciting material after the election contest begins, such additional soliciting material would be subject to the requirements of Rule 14a-12(c).

[d] Solicitations Before Furnishing Written Proxy Statement--Rule 14a-12(c). In the context of an election contest, solicitations of proxies are now permitted prior to the furnishing of written proxy material to the shareholders solicited subject to compliance with the general requirements applicable to all other types of solicitations, n28 and subject to compliance with the additional conditions regarding the filing of annual reports and of reprints or

reproductions incorporated in or incorporating references to any soliciting material as outlined in Section 7.08(1)(h) *infra*. n29

[e] Filing of Material Used Prior to Furnishing Written Proxy Statement--Rule 14a-12. If, pursuant to Rule 14a-12, any proxy soliciting material is published, sent or given to shareholders prior to the furnishing of a written proxy statement meeting the requirements of Schedule 14A, such material must be filed with the Commission no later than the date such material is published, sent or given to any shareholder and three copies must be filed with, or mailed for filing to, each national securities exchange upon which any class of securities of the company is listed and registered. n30

The requirement for filing multiple copies and the option of mailing for filing would not apply to proxy soliciting material filed with the Commission since Regulation S--T n31 requires that such material be filed electronically. n32 Any soliciting material filed with the Commission pursuant to Rule 14a-12(b) must include a cover page in the form set forth in Schedule 14A.

[f] Application to Annual Reports--Rule 14a-12(c)(1). If any portion of an annual report distributed by the company as required by Rule 14a-3(b) n33 comments upon or refers to any solicitation subject to Rule 14a-12(c) or to any participant in such solicitation other than the company, such portion of the annual report must be filed electronically with the Commission as proxy material. n34

[g] Instructions for Filing--Rule 14a-12. The provisions of Rule 14a-6(b), (c), (d) and (e) n35 apply, to the extent pertinent, to soliciting material required to be filed pursuant to Rule 14a-12. These rules relate to the filing of definitive proxy statements and other soliciting materials and personal soliciting materials, the release date of materials and the public availability of information. No filing fee is required except in connection with preliminary proxy material involving acquisitions, mergers, spinoffs, consolidations or proposed sales or other dispositions of substantially all of the assets of the company. n36 If the proxy material involves one of the enumerated transactions, a nonrefundable fee determined in accordance with Rule 0-11 n37 is payable when preliminary proxy material is filed. n38

[h] Use of Reprints or Reproductions--Rule 14a-12(c)(2). If any solicitation relating to an election contest includes, in whole or in part, any reprint or reproduction of any previously published materials, the soliciting material must:

- state the name of the author and publication, the date of prior publication and the identity of any person who is quoted without being named in the previously published material; n39
- state whether or not the consent of the author and publication has been obtained to the use of the previously published material, except in the case of a public official document or statement; n40 and
- state the circumstances if any participant using the previously published material, or anyone on the participant's behalf, has paid, directly or indirectly, for the preparation or prior publication of the material or has made or proposes to make any payments or given any other consideration in connection with the publication or republication of the material. n41

[i] New York and American Stock Exchange Proxy Contest Rules. Rules 450 through 460 of the New York Stock Exchange n42 govern the granting of proxies by New York Stock Exchange member organizations for securities held by them but beneficially owned by others. In general, a member organization is required to forward proxy soliciting material to each beneficial owner with a request for voting instructions or a signed proxy indicating the number of shares held for such beneficiary. n43 If a broker does not receive voting instructions from the beneficial owner, the broker nevertheless has authority to vote the shares under certain circumstances. n44 One situation where a member organization may not give a proxy without instructions from the beneficial owner is where the matter to be voted upon "is the subject of a counter-solicitation, or is part of a proposal made by a stockholder which is being

opposed by management (*i.e.*, a contest)." n45

If a discretionary proxy has been given in good faith by the broker before an election contest has begun and thereafter a contest develops, each member organization has the authority to determine whether or not to revoke such discretionary proxies. n46 It should be noted that this policy applies to any matter where a contest develops and not solely to election contests. n47 After a contest has developed, the member organization should not give further proxies without direction from the beneficial owner. n48

No member organization or officers or employees of a member organization may participate in a proxy contest with respect to a company if the member organization specializes in the stock of that company. n49

The American Stock Exchange has similar rules relating to the giving of proxies by member organizations and, in particular, similar rules relating to the responsibilities of member organizations in the event of an election contest. n50

[2] The Shareholder List--Rule 14a-7

It would seem obvious that the ability to succeed in an election contest requires that the participant be able to communicate with the persons entitled to vote the shares. For the company, possession of the shareholder list, together with the obligations of brokers and banks to forward proxy soliciting materials to the beneficial owners, n51 assures that the board of directors will be able to communicate with the shareholders entitled to vote. Participants in an election contest do not have possession of the shareholder list and, in the context of the federal securities laws, n52 must rely on Rule 14a-7 n53 to furnish soliciting material to the company's shareholders. n54

Once a company has determined to solicit proxies or consents in connection with shareholder action, the company has an obligation to assist a shareholder who satisfies certain procedural requirements n55 in distributing soliciting material on behalf of such shareholder. After receiving a request complying with Rule 14a-7(c), the company must either:

- send to the shareholders the requesting shareholder's soliciting material, at the requesting shareholder's expense, reasonably promptly after receiving the shareholder's soliciting materials and payment of the company's reasonable expenses; n56 or
- provide shareholder and beneficial ownership information in the form reasonably requested by the shareholder so the shareholder can mail the material directly. n57

Except in the case of a "going private" transaction subject to Rule 13e-3 n58 or a roll-up transaction as defined in Item 901(c) of Regulation S-K, n59 the company has the choice as to whether it will mail the soliciting material on behalf of the shareholder or provide the ownership information to the shareholder. n60 In the case of a "going private" or roll-up transaction (with limited exceptions), the shareholder can require that the company provide the shareholder list and beneficial ownership information. n61

The company will almost invariably opt to mail the soliciting material on behalf of the shareholder, thereby retaining substantial control over the situation and obtaining advance knowledge of the contents of the material and an opportunity to respond promptly. n62

If a company opts to mail the soliciting material for the dissident shareholders, the dissident group may nevertheless be able to compel the company to furnish it with a shareholders list under the applicable state law. n63

FOOTNOTES:

(n1)Footnote 1. For a discussion of the definition of "solicit" and a description of certain activities, including certain communications by shareholders, which do not constitute a solicitation, see § 7.02[1] and [2] *supra*.

(n2)Footnote 2. 17 C.F.R. § 240.14a-1 *et seq.*

(n3)Footnote 3. 17 C.F.R. § 240.14a-12(c).

The conduct of proxy contests is the subject of a treatise by E. Aranow & H. Einhorn, *Proxy Contests for Corporate Control* (2d ed. 1968). See also K. Eppler & T. Gilroy, *Proxy Contests, Institutional Investor Initiatives, Management Responses* (P.L.I. 1990).

Where a contest for control also involves the purchase of equity securities of the issuer, consideration must also be given to the possible application of Sections 13(d) and 14(d) of the Exchange Act, 15 U.S.C. § 78m(d) and § 78n(d) (requiring certain disclosures by anyone acquiring more than five percent of the equity securities of an issuer). See § 7A.02[1] and § 7A.03[2] *infra*, respectively).

Many of the problems involved in proxy contests, *e.g.*, the propriety of reimbursement to management or an insurgent of expenses incurred, are governed by general corporate law and are not treated in this section.

(n4)Footnote 4. A proxy contest is not started merely by an objection of a stockholder to a proposed corporate action. *Dyer v. SEC*, 266 F.2d 33 (8th Cir.), *cert. denied*, 361 U.S. 835 (1959).

(n5)Footnote 5. 17 C.F.R. § 240.14a-1(l)(2). See § 7.02 *supra* for a discussion of this rule.

(n6)Footnote 6. 17 C.F.R. § 240.14a-9 (the general antifraud rule applicable to proxy material). See § 7.04 *supra* for a discussion of this rule.

(n7)Footnote 7. 17 C.F.R. § 240.14a-2(b). See § 7.02[2] *supra* for a discussion of this rule.

(n8)Footnote 8. See § 7.07 *supra* for a discussion of the obligations of a company under Rule 14a-8 to include proposals of shareholders in proxy materials distributed by the company.

(n9)Footnote 9. 17 C.F.R. § 240.14a-101.

(n10)Footnote 10. This definition, it should be noted, includes any committee, whether formed in support of the company or in opposition. See *Chris-Craft Industries, Inc. v. Independent Stockholders Committee*, 354 F. Supp. 895 (D. Del. 1973) (corporate officer was an active participant under Rule 14a-11 and violated that rule by not filing the required materials).

See also *SEC v. York*, [1981-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 98,271 (S.D. Cal. 1981) (the founder and chairman of a shareholders' protective committee who was also a company director and shareholder was a participant since his name was used in the proxy solicitations); *SEC v. May*, 134 F. Supp. 247 (S.D.N.Y. 1955), *aff'd*, 229 F.2d 123 (2d Cir. 1956) (failure to disclose active participant in proxy statement of shareholders' committee in response to Item 3 [now Item 4] of Schedule 14A violated rules); *SEC v. Henwood*, [1961-1964 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,125 (S.D. Cal. 1961), *modified and aff'd*, 298 F.2d 641 (9th Cir.), *cert. denied*, 371 U.S. 814 (1962).

(n11)Footnote 11. See *Chris-Craft Indus.*, *n.10 supra*, 354 F. Supp. at 908, 909-10 (neither a defendant nor a corporation in which another defendant had a controlling interest were found to be participants, but another party together with his employer contributed \$5,000 to the proxy contest and thereby became participants. That a party's money is returned after a proxy fight is over has no bearing on whether the contribution was made initially, *i.e.*, whether the contributor is a participant).

(n12)Footnote 12. The term "participant," however, does not include a bank, broker or dealer which, in the ordinary course of business, lends money or executes orders for the purchase or sale of securities and which is not otherwise a participant. Schedule 14A, Item 4, Instruction 3(a)(v). *See Chris-Craft Indus., n.10 supra*, 354 F. Supp. at 908 (lender motivated by desire to influence proxy contest in favor of the shareholder's committee was a participant).

See also National Home Prods., Inc. v. Gray, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,752 (D. Del. 1976) (client of a participant in an election contest was not a participant herself within the meaning of the proxy rules by transferring stock to a participant in exchange for a promissory note, prior to the struggle for control of the corporation).

(n13)Footnote 13. For a discussion of the definition of "solicit" and "solicitation" under Rule 14a-1(l), *see* § 7.02 *supra*. Under Rule 14a-2, discussed in § 7.02 *supra*, certain activities which constitute solicitations are nevertheless not subject to the provisions of Rule 14a-12(c). Any person who engages in such activities would, in effect, not be a participant in an election contest. It is not entirely clear whether, if a company solicits proxies and a shareholder thereafter engages in a solicitation exempt from Rule 14a-1, pursuant to Rule 14a-2, the exempt activities of the shareholder would constitute the beginning of an election contest. If it does commence an election contest, subsequent proxy soliciting material of the company would be subject to Rule 14a-12(c).

(n14)Footnote 14. Instruction 3(b) to Item 4 of Schedule 14A. It should be noted that a director of a participant other than the company is not, merely because of that fact, a participant. On the other hand, a director of the company is a participant whether or not his or her election is being contested. *Compare* Instruction 3(a)(ii) with Instruction 3(b)(iv) to Item 4 of Schedule 14A.

(n15)Footnote 15. 354 F. Supp. 895, (D. Del. 1973) .

(n16)Footnote 16. For a discussion of the information generally required to be included in a proxy statement under Regulation 14A, *see* § 7.04 *supra*.

Schedule 14B, which specified the information required to be included in proxy statements relating to election contests, was repealed by the Commission in 1992. At that time, modifications were made to the requirements of Schedule 14A.

(n17)Footnote 17. If the cost is to be borne initially by a person other than the company, the proxy statement must also state whether reimbursement will be sought from the company and, if so, whether the question of such reimbursement will be submitted to a vote of shareholders. Item 4(b)(5) of Schedule 14A.

For solicitations subject to Rule 14a-12(c), costs include fees for attorneys, accountants, public relations or financial advisers, solicitors, advertising, printing, transportation, litigation and other costs incidental to the solicitation. Nevertheless, the company may exclude the amount normally expended by it in the solicitation of proxies for an election of directors in the absence of a contest if a statement to that effect is included in the proxy statement. Instruction 1 to Item 4 of Schedule 14A.

(n18)Footnote 18. Item 5(b) of Schedule 14A.

(n19)Footnote 19. While Item 5(b)(1) of Schedule 14A specifies "each participant," it would be logical to interpret this requirement as meaning only each of the participants who are soliciting proxies with the proxy material in which the interest is being described.

(n20)Footnote 20. Although this item indicates that a participant must state whether or not there has been a conviction, the item goes on to state that a negative answer need not be included. Item 5(b)(1)(iii) of Schedule 14A.

(n21)Footnote 21. The instruction to Item 5 of Schedule 14A states that, for purposes of Item 5, "beneficial

ownership" is determined in accordance with Rule 13d-3, 17 C.F.R. § 240.13d-3. *See § 7A.02[2][b][ii] infra.* As defined in Rule 13d-3, "beneficial ownership" means having sole or shared voting power or sole or shared investment power over the shares in question. This definition of "beneficial ownership" is different from the definition used for reporting ownership for purposes of Section 16 of the Exchange Act. Rule 16a-1, 17 C.F.R. § 240.16a-1 defines "beneficial ownership" in terms of having a direct or indirect pecuniary interest.

(n22)Footnote 22. In addition, if such funds were borrowed or obtained otherwise than pursuant to a margin account or bank loan in the regular course of the business of a bank, broker or dealer, the proxy statement must describe briefly the transaction and state the names of the parties. Item 5(b)(1)(vii) of Schedule 14A.

(n23)Footnote 23. "Associate" is defined in Rule 14a-1(a). *See § 7.04 supra.*

(n24)Footnote 24. 17 C.F.R. § 229.404(a). For a discussion of Item 404(a) of Regulation S-K, 17 C.F.R. § 229.404(a), *see § 4.03[5][d] supra.*

(n25)Footnote 25. For a description of the information required by Item 7 of Schedule 14A, *see § 7.04 supra.*

(n26)Footnote 26. Item 7 of Schedule 14A.

(n27)Footnote 27. For example, if a company proposes to elect directors and to consider the adoption of an option plan at a shareholders' meeting and another participant solicits proxies with respect to the election of directors, the proxy statement of the other participant should not need to include information responding to Item 10 of Schedule 14A ("Compensation Plans").

(n28)Footnote 28. *See generally § 7.02[4], supra.*

(n29)Footnote 29. 17 C.F.R. § 240.14a-12(a) and (b). Rule 14a-12(a) and (b) describes circumstances where solicitations are permitted prior to furnishing a written proxy statement whether or not an election contest is involved. For a discussion of Rule 14a-12(a) and (b), *see § 7.02[4], supra.*

(n30)Footnote 30. Rule 14a-12(b).

(n31)Footnote 31. 17 C.F.R. Part 232.

(n32)Footnote 32. Rule 101 of Regulation S--T, 17 C.F.R. § 232.101.

(n33)Footnote 33. 17 C.F.R. § 240.14a-3(b).

(n34)Footnote 34. Rule 14a-12(c)(1).

(n35)Footnote 35. 17 C.F.R. § 240.14a-6(b), (c), (d) and (e).

Rule 14a-6(b) requires that eight definitive copies of the proxy statement, form of proxy and other soliciting material be filed with the Commission not later than the date such material is first sent or given to any shareholder; and that three copies be filed with, or mailed for filing to, each national securities exchange upon which any class of securities of the company is listed and registered.

Rule 14a-6(c) requires the filing of written instructions or other material to be used in connection with solicitations to be made in whole or in part by personal solicitation.

Rule 14a-6(d) requires that filings of preliminary proxy statements and forms of proxy be accompanied by a statement of the date on which definitive copies are intended to be released to shareholders.

Rule 14a-6(e) concerns the public availability of preliminary proxy statements and forms of proxy.

For a discussion of the provisions of Rule 14a-6, *see* § 7.04 *supra*.

(n36)Footnote 36. Rule 14a-6(i).

(n37)Footnote 37. 17 C.F.R. § 240.0-11.

(n38)Footnote 38. Rule 14a-6(b)(1).

(n39)Footnote 39. Rule 14a-12(c)(2)(i).

(n40)Footnote 40. Rule 14a-12(c)(2)(ii).

(n41)Footnote 41. Rule 14a-12(c)(2)(iii).

(n42)Footnote 42. The Rules are available at <http://rules.nyse.com/NYSE/NYSE%5FRules/>.

(n43)Footnote 43. Rule 451, New York Stock Exchange Rules. This rule applies to brokers, whether or not there is an election contest. The New York Stock Exchange rules would also require a broker to forward materials for any participant in an election contest. In connection with forwarding such materials, a broker is entitled to be reimbursed for its reasonable expenses. Brokers have similar obligations under Rules 14b-1, 17 C.F.R. § 240.14b-1, and 14b-2, 17 C.F.R. § 240.14b-2, which are discussed in § 7.02 *supra*.

(n44)Footnote 44. Rule 452, New York Stock Exchange Rules. The New York Stock Exchange has filed with the SEC a proposal to amend Rule 452 to remove from brokers the authority to vote in uncontested elections for director without instructions from the beneficial owner. See discussion at *Section 7.02 [2], supra*.

(n45)Footnote 45. Supplementary Material to Rule 452, New York Stock Exchange Rules.

(n46)Footnote 46. Supplementary Material to Rule 452, New York Stock Exchange Guide (CCH Internet Service). Since brokers typically will not vote pursuant to their discretionary authority until shortly before the date of the meeting, this situation will not arise frequently.

(n47)Footnote 47. Rule 14a-12(c) applies only to election contests. Counter solicitations on matters other than elections to office would be regulated by the balance of Regulation 14A.

(n48)Footnote 48. Supplementary Material to Rule 452, New York Stock Exchange Guide (CCH Internet Service).

(n49)Footnote 49. Rule 460(a), New York Stock Exchange Guide (CCH Internet Service).

(n50)Footnote 50. Sections 701 through 726 of the American Stock Exchange Guide (especially §§ 720-726, American Stock Exchange Guide (CCH Internet Service).

(n51)Footnote 51. Brokers and banks are obligated to forward proxy soliciting materials to the beneficial owners pursuant to Rule 14b-1 and Rule 14b-2.

(n52)Footnote 52. Under applicable state law, a shareholder wishing to communicate with other shareholders may have the right to access to the shareholder list, but such state law considerations are beyond the scope of this material.

(n53)Footnote 53. 17 C.F.R. § 240.14a-7. For a more complete discussion of Rule 14a-7, *see* § 7.02 *supra*.

(n54)Footnote 54. Once proxy material is provided to brokers and banks either by the company on behalf of a participant or by the participant in accordance with Rule 14a-7, the brokers and banks have obligations to forward such

material to the beneficial owners under Rule 14b-1 or Rule 14b-2.

(n55)Footnote 55. These procedural requirements include providing evidence of ownership and an affidavit to the effect that the shareholder will not use any information provided for any purpose other than solicitation. Rule 14a-7(c). The shareholder is required to reimburse the company for the reasonable expenses incurred by the company in mailing materials for the shareholder or providing a copy of the shareholder list and related material. Rule 14a-7(e).

(n56)Footnote 56. Rule 14a-7(a)(2)(i).

A company did not unduly delay the transmission to shareholders of information required by Rule 14a-7(a) where one day was required for the transfer agent to collect the information and two other days fell on a weekend. *Knapp v. Walden*, 367 F. Supp. 385, 387 (S.D.N.Y. 1973) .

(n57)Footnote 57. Rule 14a-7(a)(2)(ii).

(n58)Footnote 58. 17 C.F.R. § 240.13e-3.

(n59)Footnote 59. 17 C.F.R. § 229.901(c).

(n60)Footnote 60. Rule 14a-7(b).

A shareholder has no standing to demand a list of shareholders if the company desires to take the other alternative. See *Gaudiosi v. Franklin*, 166 F. Supp. 353 (E.D. Pa. 1958) , *aff'd on other grounds sub nom. Gaudiosi v. Mellon*, 269 F.2d 873 (3d Cir.) , *cert. denied*, 361 U.S. 902 (1959) .

Where a dissident shareholder has lawfully obtained a copy of the list of shareholders, Rule 14a-7 does not apply to any communications the dissident may wish to send out independently to the shareholders. *First Surety Corp. v. Community Bank*, 337 F. Supp. 667 (D. Cal. 1971) (dissident shareholder may mail proxy material to shareholders without regard to any time restrictions in Rule 14a-7).

See also *Reserve Life Ins. Co. v. Provident Life Ins. Co.*, 499 F.2d 715 (8th Cir. 1974) , *cert. denied*, 419 U.S. 1107 (1975) (management violated Rule 14a-7 by refusing to furnish assignees of voting trust certificates the names of shareholders except by court order).

(n61)Footnote 61. Rule 14a-7(b). Exceptions are partnerships whose investors will receive new securities or securities in another entity that are not reported under a transaction reporting plan declared effective before December 17, 1993 by the Commission under Section 11A of the Exchange Act; or partnerships whose investors' securities are reported under a transaction reporting plan declared effective before December 17, 1993 by the Commission under Section 11A of the Exchange Act.

(n62)Footnote 62. The company may not include in the same envelope material that it wishes to send out to shareholders, unless the shareholders whose material the company is mailing knows and consents to such inclusion. Sec. Exch. Act Rel. No. 7078, 3 Fed. Sec. L. Rep. (CCH) P 24,103 (1963).

(n63)Footnote 63. It is beyond the scope of this Section to discuss the rights of a shareholder in this situation, such proceeding being only ancillary to the election contest itself.

The rights given by Rule 14a-7 are in addition to any rights given to shareholders to inspect the shareholder list by state law; Rule 14a-7 does not preempt the field. *Alabama Gas Corp. v. Morrow*, 265 Ala. 604, 93 So. 2d 515, *Fed. Sec. L. Rep. (CCH) P 90,806* (1957) ; *Application of Joslyn*, 191 Misc. 512, 78 N.Y.S. 2d 183 (N.Y. Sup. Ct. 1948) , *aff'd*, 273 A.D. 945, 78 N.Y.S.2d 923 (N.Y. App. Div. 1948) .

See also *Wood, Walker & Co. v. Evans*, 300 F. Supp. 171 (D. Colo. 1969) , *aff'd*, 461 F.2d 852 (10th Cir. 1972) (no election between state and federal law; shareholder may pursue right under Rule 14a-7 and then seek to invoke right of inspection under state law).

If a dissident shareholder has violated the federal proxy rules in connection with a state court action, a federal court will enjoin the dissident from further pursuing such action. *Studebaker Corp. v. Gittlin*, 360 F.2d 692 (2d Cir. 1966) (injunction granted; obtaining of shareholder authorizations to compel disclosure of a shareholders list under state law was a solicitation subject to the federal proxy rules, which had been violated in obtaining the authorizations); *Greater Iowa Corp. v. McLendon*, 378 F.2d 783 (8th Cir. 1967) (no preliminary injunction granted but solicitation of membership in a voting trust found to be within the federal proxy rules).

In *Stern v. South Chester Tube Co.*, 390 U.S. 606, 88 S. Ct. 1332, 20 L. Ed. 2d 177 (1968) , it was held that a federal district court has the power to issue proper orders to enforce a stockholder's state-granted right to inspect corporate records. See *Wood, Walker & Co. v. Evans*, *supra*.

CHAPTER 7 Proxy Regulation

1-7 Federal Securities Exchange Act of 1934 § 7.09

AUTHOR: Paul G. Hughes Richard McGrath*

§ 7.09 Enforcement of the Proxy Rules

[1] Introduction

The principal means for attacking violations of the Exchange Act proxy solicitation and related requirements are the means generally available for enforcement of the federal securities laws:

- the Commission's statutory right to seek relief by injunction in a federal district court;
- its statutory right to refer willful violations to the Department of Justice for criminal prosecution; and
- the judicially recognized right of affected shareholders or the issuer (either through its management against insurgents or derivatively by insurgents) to bring a private action.

The private right of action may result in a large award of damages to security holders or, at least in theory, the setting aside of consummated transactions.

The federal securities laws provide for administrative proceedings against certain parties subject to specific Commission regulation, such as broker-dealers, investment advisers and investment companies. n1 The Commission has administrative power to protect the integrity of the securities markets and may suspend trading in any security (other than an "exempted security"). n2 Although suspension of trading would clearly be available to the Commission when defective proxy materials improperly affected the market value of the security, suspension must be invoked with caution because of its detrimental effects on innocent security holders.

In the usual solicitation of proxies, in addition to administrative proceedings, the Commission may pursue a judicial proceeding. Thus, if a recalcitrant party rejects the advice of the Commission or its staff and proposes to distribute defective materials, the Commission may enforce compliance with the proxy rules through an action in the United States district court for an injunction, which has the potential for preventing or correcting much of the injury threatened or inflicted by a proxy violation. The court may, for example, set aside or enjoin the use of improperly obtained proxies, require adjournment of the meeting in question, and require resolicitation of proxies with a corrected proxy statement.

Of course, a court is more willing to grant such pre-meeting or pre-consummation relief than it is to set aside past actions, a task that becomes progressively more problematic as the rights of third parties become more involved. In the case of a merger of two publicly held companies, for example, a court may consider the task of setting aside the transaction as impracticableⁿ³ from both the business aspect (reestablishing the former entities, with their separate management, properties, employees, etc.) and the securities holders' aspect (tracing the changes in ownership since the effective date of the merger, for example). Unlike an antitrust court, which considers *future market effects* of a merger, the judge in a securities case is quite likely to consider an award of damages to be all that is necessary or practicable to correct a past violation.

[2] Administrative Practices and Procedures

Common sense, civility and regard for effective use of judicial and agency resources dictate that, where feasible, a deficiency in proposed proxy materials be dealt with at the administrative level by the staff of the Commission prior to a party's use of the materials, rather than in a district court. The same considerations would appear to be applicable to the resolution of interpretative questions. In addition, the views of the Commission and its staff must be weighed carefully even by parties who consider a given agency interpretation of law to be incorrect; the agency's views will undoubtedly be given weight by the court in any subsequent legal action. The risks of delay and the uncertainty of victory attendant upon litigating the question with the Commission, or with a private party urging a position espoused by the Commission, may dictate accommodation, compromise or withdrawal of the proposed action.

The administrative procedures employed in the context of the proxy rules are generally as follows:

- The "no action" letter procedure permits private parties to determine in advance whether a *proposed* transaction is sufficiently within the limits of the statute and rules to allow the staff to assure the parties involved that it would not recommend that the Commission take enforcement action against the transaction. The staff's position is based solely upon the facts stated in the request; however, a change in the transaction may alter the staff's position. ⁿ⁴

The "no action" procedure is frequently used for determinations under Rule 14a-8: whether a shareholder's proposal may be omitted from management's proxy materials. If the question is resolved against the management's position, it must either include the proposal or face the risk of an injunction action. ⁿ⁵

- Other informal interpretative advice and pre-filing assistance are provided by the staff by telephone and through conferences. ⁿ⁶
- Informal statements of the views of the Commission itself may be available concerning a particular problem, particularly on "matters of substantial importance and when the issues are novel or highly complex." The decision to make such a statement is, however, entirely within the discretion of the Commission. ⁿ⁷
- Proxy statements and information statements and related materials are selectively reviewed by the Division of Corporation Finance. ⁿ⁸ Upon discovery of deficiencies in such materials, the staff will contact the filing party and request that corrections be made. If the filing party refuses to make the indicated corrections, the staff may refer the matter to the Division of Enforcement. ⁿ⁹ Unlike the Securities Act, however, the Exchange Act provides no "stop order" or similar procedure for administrative delay of the use of proxy materials. ⁿ¹⁰ If the Commission determines to stop the solicitation and the issuer refuses to acquiesce in the changes wanted by the staff, the Commission must in most cases bring an action in a United States district court for an injunction.

- The Commission may, pursuant to Exchange Act Section 21(a), make an investigation "to determine whether any person has violated, is violating, or is about to violate" the Act, the Commission's rules or the rules of a self-regulatory agency. The same provision authorizes the agency to publish "information concerning any such violations." n11

- The Commission may summarily suspend trading in the issuer's securities for a period of no more than 10 days pursuant to Exchange Act Section 12(k). n12 The Commission is also authorized to suspend or revoke the *registration* of a security pursuant to Section 12(j) n13 by order, if it finds on the record after notice and opportunity for hearing that the issuer has failed to comply with the Exchange Act or the Commission's rules thereunder. Under either subsection (k) or (j), the Commission's action would prohibit trading in the security by *any* broker, dealer or exchange member in *any* market. As stated, a summary suspension may not exceed 10 days; n14 the more exacting procedure under subsection 12(j) may result in a suspension of registration for not more than 12 months or "revocation." n15 A revocation of registration, or indeed a lengthy suspension, under circumstances that prohibit public trading would have such devastating effects on public security holders that its use may be inappropriate except in the most extreme cases.

- Rule 2(e) administrative proceedings n16 may be directed against accountants, attorneys and other professionals to deny such persons the right to appear or practice before the Commission temporarily or permanently. n17

[3] Judicial Review of Administrative Action

Section 25(a) of the Exchange Act provides for review in a federal Court of Appeals of "a final order of the Commission" upon the written petition of a "person aggrieved." n18 The Securities Act Amendments of 1975 eliminated the former requirement that the person requesting review be a "party" to the proceeding in which the Commission issued the order. That change would appear to permit a security holder, although not a party to the Commission proceedings, to challenge an order of the Commission that involves his or her company, if the security holder meets other standing requirements.

The Commission does not issue an "order" under the proxy or information statement rules in the usual case, thus foreclosing review under Section 25(a). The Court of Appeals for the District of Columbia had held in *Medical Committees for Human Rights v. SEC* n19 that Commission affirmance of a staff "no action" letter under Rule 14a-8 possessed sufficient formality and finality to be considered a final order. That holding is now considered to be questionable, although subsequent decisions of that court have merely distinguished it. n20 In any event, it seems clear that a staff determination is not subject to judicial review if the Commission refuses to review the staff's action; n21 nor is the Commission's refusal to review the staff's action ordinarily subject to attack under Section 25(a). n22

The Exchange Act is clear that the decision not to make an investigation n23 or to bring an action in the district court n24 is within the discretion of the Commission and not subject to judicial review. n25

In sum, there appears to be no basis for judicial review of Commission procedures in a matter under the proxy rules unless there is a formal administrative proceeding held against a broker-dealer or similar registered party, an order suspending trading or affecting the registration of the security, Commission review of a staff position, or a Rule 2(e) proceeding.

[4] The Legality of Corporate Actions Accomplished Through Proxy Violations

As will be made clear in subsequent discussion, n26 violations of the rules concerning solicitation of proxies and

distribution of proxy and information statements are corrected by a variety of remedies available to the Commission, complaining shareholders, and the issuer acting through its management or through a shareholder derivative action.

[a] Is the Action "Void" or "Voidable"? As a preliminary and separate matter, however, it is appropriate to consider the effects of Exchange Act Section 29(b), which on its face *voids* contracts made in violation of the Act or any rule or regulation thereunder as regards the rights of the violator or the rights of a successor in interest of a violator. n27

A literal reading of that provision might appear to require a court to set aside a transaction accomplished through the use of proxies obtained in violation of the proxy rules. n28 Perhaps the most dramatic example is the case of a consummated merger that has been accomplished by voting proxies obtained through the use of a materially false or misleading proxy statement. Does proof of such a violation in a subsequent attack by shareholders require that the merger be set aside? That would appear to be a Draconian result in view of the immense difficulties to all concerned, the judicial burdens involved, the confusion and concern of third parties who have dealings with the surviving corporation, and the real prospect of injury to the corporation's shareholders through the effects on the securities markets.

In reality, however, the judicial approach has been one of reluctance to set aside a consummated merger. The federal courts, by evaluating the totality of the circumstances before deciding to set aside a consummated transaction, have thus adopted the more cautious, and certainly less disruptive, approach that they would evidently take in the absence of Section 29(b) or in the absence of the Commission's power to seek equitable relief. At a very early date, in a Securities Act case, the Supreme Court affirmed the power of a district court to provide various forms of equitable relief to defrauded purchasers even though the Securities Act on its face merely provided for an action for money damages under Section 12(2). n29

The Supreme Court held in *Mills v. Electric Auto-Lite* n30 that the effect of Section 29(b) is to make an agreement *voidable* at the request of "the innocent party." In the case of a merger, there is some difficulty in identifying the innocent party. A complaining minority shareholder who voted against the merger was evidently not deceived by the defective proxy statement. A shareholder who voted for the merger, according to the Court, could only rescind his or her proxy, which would be a futile gesture unless the number of shares held was sufficient to defeat adoption of the agreement of merger by the shareholders. But what if the action is brought in a derivative capacity, in the right of the corporation? The answer there is the same as in the preceding two cases. The question whether to set aside the merger is committed to the discretion of the court, which must determine whether such drastic relief would be "in the best interests of the shareholders as a whole." n31 Section 29(b), then, does not make the contract "void," but merely "voidable," and then only at the urging of the innocent "party." That interpretation is "eminently sensible." n32

[b] Remedy in a Merger Case. Once it is concluded that the choice of a remedy is in the hands of a district court judge, the question becomes far more complicated than a pure question of legality. Much as their counterparts in traditional equity courts have done even when confronted with arguably void transactions, n33 federal judges must weigh all the "equities" in arriving at a decree reasonably adapted to all the circumstances, including the rights of persons other than parties to the litigation. Although the Supreme Court has said that a merger might be set aside in an appropriate case, n34 no decree under the federal securities laws has gone to that extreme.

A court considering a completed corporate combination under the federal securities laws upon the complaint of deceived shareholders views its task as providing relief to the *shareholders whose proxies were solicited*, not subsequent or future shareholders. n35 The determination of that relief will almost always turn on the court's determination of what the plaintiffs and other security holders in a merged corporation, for example, *should* have received for parting with their securities. n36 In all but the most extraordinary case, it appears to be in the best interest of all concerned to reduce *retrospective* relief in a merger-related violation to a question of money, rather than to engage in the monumental task of setting aside a merger. n37

The foregoing considerations emphatically do not mean that the courts will *never* grant retrospective relief other than damages, or that they will not take effective action to *prevent* a merger or other transaction where the effort to accomplish the transaction involves a material violation of the proxy rules. They do mean, however, that the relief will be fashioned by a court to suit the situation. On occasion, the undoing of previously authorized actions may be required; n38 in other instances, postponement of the shareholders' meeting to permit distribution of corrected proxy materials and resolicitation on the basis of the new materials may be all that is warranted. n39

[5] Actions for Injunctive Relief

[a] Who May Bring an Action?

The Commission and private parties have the right to bring actions for injunctive relief of a prospective or retrospective nature for violations of the proxy provisions. n40

[i] The Commission's Right of Action. The Commission's right of action is set forth in Exchange Act Section 21(d):

Wherever it shall appear to the Commission that any person is engaged or is about to engage in any acts or practices constituting a violation ... it may in its discretion bring an action in the proper district court of the United States ... to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted without bond n41

In addition, Section 21(e) grants jurisdiction to the federal district courts "to issue writs of mandamus, injunctions, and orders" commanding compliance with the Exchange Act, the rules, regulations and orders thereunder, and with rules of designated self-regulatory organizations, upon application of the Commission. n42

[ii] The Private Right of Action. The private right of action, which extends to both equitable relief and money damages, was confirmed by the Supreme Court in *J.I. Case v. Borak*, n43 which stated that "federal courts have the power to grant all necessary remedial relief." n44 The real significance of *Borak* lay in its endorsement of retrospective relief, such as an award of damages. Prospective relief had been much more readily approved by the district and appeals courts. n45 The Court's admonition in *Borak* that the federal courts should "be alert to provide such remedies as are necessary to make effective the congressional purpose" was given emphasis in *Mills v. Electric Auto-Lite Co.*, n46 which stated that one possible form of retrospective relief in that case would "include setting aside the merger or granting other equitable relief." n47 Although a court acting under the securities laws is very reluctant to "undo" a consummated merger, n48 the Court's indicated willingness to consider that radical form of relief has been viewed as an *a fortiori* argument to the effect that all lesser forms of relief are authorized where appropriate. n49

The opinion in *Borak* stated that the shareholder's private right of action under Section 14(a) extended to both direct and derivative actions. That statement prompted the lower courts to disavow some previous restrictions. For example, the Second Circuit acknowledged in *Studebaker v. Gittlin* n50 that *Borak* had "clearly overruled" a decision that had refused to recognize an action by an issuer, as represented by its management, where it was alleged that the insurer's stockholders had been solicited by insurgents through a violation of the Commission's rules. n51

[iii] Private Parties' Standing. Although the Supreme Court has not attempted to formulate rules for determining the particular plaintiffs who have standing to prosecute a private action, it is evident that Section 14(a) was designed to protect those who own n52 and hold voting securities. n53 The plaintiff may be a joint owner of the shares, n54 or an equitable owner. n55

A proxy contestant does not have standing to sue under Section 14(a) for false and misleading statements in management's proxy statement where such suit was brought as a disappointed proxy contestant, not as a shareholder. n56 Similarly, in *AMR Corp. v. UAL Corp.*, n57 the U.S. District Court for the Southern District of New York ruled

that American Airlines lacked standing to bring Section 14(a) claims challenging the joint proxy statement issued by Air Wis Services Inc. and VAL Corp. in connection with the proposed merger of the two firms. American alleged that the proxy statement was false and misleading. The court found that American was not attempting to advance the general interests of Air Wis shareholders or to promote its own interests as an Air Wis shareholder, but was simply trying to "bust up" the merger of Air Wis and VAL in order to acquire Air Wis' jet slots. Further, the court said that the denial of standing was appropriate as a "matter of policy" to discourage parties such as American "from simply purchasing a lawsuit, which is exactly what American hoped to do when it bought 100 shares of Air Wis stock."

In *Salomon Brothers Mun. Ptnrs Fund v. Thornton*, n58 the defendant solicited hostile proxies opposing plaintiff's proposed management agreement. When defendant discovered that a quorum for the meeting would be defeated if he failed to appear and vote, he abstained from attending the meeting and so advised the shareholders he represented, all of whom had granted proxies opposing the agreement. Despite SEC rule 14a-4(e) which requires a proxy statement to state that solicited proxies will be voted, the Court refused to grant a mandatory injunction requiring defendant to vote the opposing proxies, declaring that, assuming *arguendo* the refusal to vote violated the statutes, only the shareholders had standing to enforce the rule, not the plaintiff issuer.

By contrast, in *In re AOL Time Warner Sec. & "ERISA" Litig.*, n59 where the parties to a merger issued a joint proxy statement, the officers and directors of one party to the merger may be deemed to have solicited the proxies of the other party to the merger, and an allegation of misstatements by such persons supports the complaint of a 14(a) violation against a motion to dismiss.

Since the harm to the shareholders as a group may be achieved even if *some* shareholders, including the plaintiff, are not deceived or misled by the violation, the better rule would seem to be that the plaintiff's individual response to the violation should not be determinative of his or her right to bring the action. n60 However, there are decisions, particularly in the Ninth Circuit, to the effect that a shareholder plaintiff, even if seeking only remedial relief, is restricted to a derivative action if the plaintiff did not give a proxy. n61 It may be, however, that even if such a rule were to gain acceptance in other circuits, it should be confined to plaintiffs who seek retroactive, as opposed to prospective, relief. n62

[b] Equitable Requirements for Injunctive Relief

[i] Commission Actions. The Commission is not required to demonstrate threatened irreparable harm or the inadequacy of other remedies in order to obtain injunctive relief. n63 In the case of *provisional* relief, the requirement of Section 21(d) of a "proper showing" is met by the establishment of a *prima facie* case. n64

[ii] Private Actions. The private right of action, however, is encumbered with the traditional equity requirements. Thus, a corporate or shareholder plaintiff must demonstrate the existence of threatened irreparable harm "and other usual prerequisites for injunctive relief." n65 In the case of a preliminary injunction, the plaintiff must demonstrate both threatened irreparable injury and probable success on the merits. n66 The court must also determine the balance of hardships. The threatened injury, such as a proposed merger, n67 must be weighed against the hardships to the other side if relief is granted. The latter hardships may be the expense and delay occasioned by a postponement of the meeting, n68 the confusion and uncertainty that may be produced, n69 and the possibility that the shareholders may regard the preliminary decree as an adjudication of wrongdoing. n70

Relief may also be denied because of the plaintiff's laches n71 or unclean hands, n72 or if the matter is moot. n73

[c] Who May Be Liable? Section 14(a) makes it unlawful for "any person ... to solicit or to permit the use of his name to solicit any proxy" in violation of the Commission's rules. The definition of "participant" in a solicitation is discussed elsewhere in this chapter as it bears on the requirements of proxy contests. n74 Apart from the question of who is a "participant," however, there is the problem of the meaning of the statute's terms insofar as it purports to cover a person who "permit[s] the use of his name" in a solicitation. It is too much to say that any mention of one's name in a

proxy statement suffices to justify responsibility for the statement's contents. The Ninth Circuit, in *Yamamoto v. Omiya*, said there must be a "substantial connection between the use of the person's name and the solicitation effort." n75 It found that such a connection did not exist where the defendant appeared in the proxy statement only as the prospective purchaser of the corporation's chief asset, a parcel of land. The court found it very unlikely that the shareholders were influenced by his identity. n76

Persons who are more directly involved with the preparation of the proxy materials or the conduct of the solicitation, such as nominees for positions on an issuer's board, may be held liable, n77 as may directors, including outside directors. n78

In addition, a party to a transaction involving control of the issuer through the issuance of a block of preferred stock has also been held liable under Section 14(a); the court concluded that the defendant's connection with the transaction was "more than substantial." n79

The liability of attorneys as aiders and abettors for the violation of the securities laws by another person was for many years the most prevalent form of claim, until the U.S. Supreme Court held in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.* n80 ("*Central Bank*") that a private cause of action does not exist for aiding and abetting under § 10(b) of the Securities Exchange Act of 1934. n81 Similarly, a majority of courts have concluded that a claim for aiding and abetting liability does not exist under § 11 n82 or § 12 n83 of the Securities Act of 1933. Cases involving claims of liability for aiding and abetting are rare under § 14(a) of the 1934 Act. *Gould v. American Hawaiian Steamship Co.* n84 in dicta stated that "§ 14(a) imposes liability on individuals soliciting proxies, and not on the attorneys or accountants preparing them." However, a later case found liability for materially misleading proxy solicitation materials where the attorney acted "recklessly." n85

Accountants are rarely charged as primary violators of § 14(a) and under the *Central Bank* case appear to share the same immunity as attorneys from aiding and abetting liability in private damage actions. n86

The *Central Bank* case left unanswered the question of whether the SEC has the right to pursue aiding and abetting enforcement actions under § 14(a). Its right to pursue such actions under § 10(b) was confirmed by Congress through the passage of § 104 of the Private Securities Litigation Reform Act of 1995; the wording of that statute appears broad enough to encompass violations of § 14(a). n87

While insulated by *Central Bank* from aider and abettor liability to a private party, attorneys and accountants may still be held primarily liable where their responsibility for the securities law violation is sufficiently significant. n88 Similarly, attorneys have been held primarily liable as controlling persons under § 20 of the 1934 Act as well as under § 15 of the 1933 Act. n89

In *Brown v. Enstar Group Inc.*, n90 the Eleventh Circuit adopted a new three-prong test for "controlling person" liability under Section 20A of the Securities Exchange Act. Kinder-Care Inc. founder and Board Chairman, Perry Mendel, adopted a restructuring plan involving establishment of Kinder-Care Learning Centers Inc. as a wholly-owned subsidiary. Mendel resigned his positions with the parent and became chairman of the subsidiary's board. The parent board, at a meeting not attended by Mendel, approved a rights offering whereby the stock of the subsidiary would be sold to the parent company shareholders. The parent and its successor CEO soon thereafter declared bankruptcy, and Mendel was personally sued by the parent company's shareholders for the parent company's failure to disclose material facts in the prospectus offering the shares. In affirming dismissal of the charges against Mendel, the court stated that a controlling person is liable under Section 20A if: (1) he or she had the power to control the general affairs of the entity at the time of the alleged securities law violation; (2) he or she had the power to control the specific corporate policy that resulted in the primary liability; (3) the controlled person committed a securities law violation. The court found that Mendel did not have the requisite control over the parent company at the time the securities law violations were committed. n91

There is no private liability for failure to make a public disclosure required by the SEC's new fair disclosure rules, Regulation FD, nor would it be a common occurrence for the SEC Division of Enforcement to charge an analyst with aiding and abetting, or causing, an unlawful disclosure by a company, in the absence of some arrangement between a company and an analyst that the analyst will be favored with nonpublic material information. n92

[d] Jurisdiction and Venue.

The Exchange Act grants the federal courts "exclusive jurisdiction of violations" of its provisions and the rules and regulations thereunder and "of all suits in equity and actions at law brought to enforce any liability or duty created by [the Act] or the rules and regulations thereunder." n93 Section 21(d) and (e), which deal with the Commission's right of action, are expressly limited to the federal district courts. Once the action is commenced in a federal district court, the defendant may be served "wherever [he or she] may be found," n94 which permits service outside the United States. n95 The venue provision for civil actions is also "user friendly" from the plaintiff's viewpoint: venue is proper in any district in which an act or transaction constituting a violation occurred, or where the defendant is found, or is an inhabitant, or transacts business. n96

[i] Pendent Jurisdiction. In addition to the federal claims presented by an action under the Exchange Act, the federal courts may, in their discretion, exercise pendent jurisdiction of state law claims, if the federal claim is substantial enough to confer subject matter jurisdiction. n97 The substantiality of the federal claim is usually judged by its ability to withstand a motion to dismiss for failure to state a claim or a motion for summary judgment. n98 The court may lack pendent jurisdiction of state claims against *parties* not subject to the jurisdiction of the court under the federal claim. n99

[ii] Intrastate Communications. It should also be borne in mind that the jurisdictional language in Section 14(a) of the Exchange Act ("use of the mails ... means or instrumentality of interstate commerce or of any facility of a national securities exchange ...") is greater than it seems. The Securities Acts Amendments of 1975 amended the definition of "interstate commerce" in Section 3(a)(17) of the Exchange Act to include *intrastate* use of a telephone or other interstate means of communication, or any interstate instrumentality, or a facility of a securities exchange.

[e] Transnational Solicitations. The solicitation of proxies from outside the United States through the mails, telephone or other means of communication is subject to Section 14, provided the security is registered under Section 12(b) or (g). n100 In the case of an unregistered security, such a transaction may be subject to the general anti-fraud provisions, such as *Rule 10b-5*. n101

The reverse situation, in which only foreign shareholders are injured by a defective solicitation from the United States, is also clearly within the federal jurisdiction, n102 even if the defendants are also foreign citizens. n103

[f] The Requisite Violation--"Materiality"

[i] Violations Not Shown to Be "Material." The statutory authorization for the Commission's action for injunctive relief expressly contemplates actions against a person who "is engaged or is about to engage in acts or practices constituting a violation" of the Act, the Commission's rules, or the rules of self-regulatory organizations, including registered exchanges and the NASD. Thus, the Commission is authorized to proceed against an ongoing or incipient "violation" of the Act or its rules, without an express requirement that the violation be of a substantial character, *i.e.*, that it be "material." The point is relevant because of the controversy concerning the Commission's views on the "qualitative" versus "quantitative" materiality of information n104 about the integrity of an issuer's management. n105 It seems clear that, regardless of a court's views on that controversy, a solicitor of proxies or distributor of an information statement is obligated to abide by the Commission's rules as to information that must be contained in the proxy or information statement, including specific information on such matters as conflicts of interest and criminal convictions. n106 However, as will be seen in subsequent discussion, that is not the end of the matter: an agency request

for an injunction "is an appeal to the sound discretion which guides the determinations of courts of equity." n107 While the continued refusal of a proxy solicitor to comply with an SEC rule is certainly sufficient to justify judicial intervention, n108 the mere existence of a past violation is not, although it is usually possible to glean evidence of the likelihood of future misconduct from the facts of the past violation, i.e. the seriousness of the violation and indications whether the violation was deliberate. n109

Thus, any violation may be sufficient for an enforcement action in particular circumstances. However, the most significant aspect of a violation is the degree to which it threatens the function of Section 14(a) and (c), which is to require that holders of securities be supplied with accurate and complete information. n110 The latter point is important in persuading a court to grant mandatory relief, *e.g.*, a resolicitation of corrected proxy materials.

[ii] "Material" Violations.

The primary function of the proxy provisions is to provide security holders with information. Since the Commission's specific disclosure rules cannot deal with every possible fact that may be of relevance in a given election or transaction, most controversies concerned with the existence of a "violation" arise under the general antifraud provision of the Commission's rules, Rule 14a-9, which speaks in terms of "material" facts. n111

[A] The Judicial Definition of "Materiality." It was not until 1976 that the Supreme Court attempted a definitive statement of the concept of materiality, following what has been referred to as the "Great 'Would-Might' Debate." n112 Originally, the Court, in *Mills v. Electric Auto-Lite Co.*, n113 in the context of a determination of causation, spoke of a "defect ... of such character that it might have been considered important by a reasonable shareholder who was in the process of deciding how to vote." n114 Such a defect was one that had "a significant *propensity* to affect the voting process" n115 Judge Friendly of the Second Circuit soon expressed discomfort with the "might have been" standard, believing that it suggested "somewhat too low a threshold" for the imposition of liability under Rule 14a-9. n116 He thought that particularly so in view of his concurrent ruling that the standard of culpability should be negligence, not scienter, and that very heavy damages may be imposed in a private action. n117 He, therefore, substituted "would" for "might have been," stating that a "standard tending toward probability rather than toward mere possibility is more appropriate" n118

Three years later, Justice Marshall, writing for the Court in *TSC Industries Inc. v. Northway*, agreed that the "might" standard was too low. n119 Justice Marshall wrote:

The general standard of materiality that we think best comports with the policies of Rule 14a-9 is as follows: An omitted fact is material if there is a substantial likelihood that a reasonable shareholder would consider it important in deciding how to vote. This standard is fully consistent with *Mills'* general description of materiality as a requirement that "the defect have a significant *propensity* to affect the voting process." It does not require proof of a substantial likelihood that disclosure of the omitted fact would have caused the reasonable investor to change his vote. What the standard does contemplate is a showing of a substantial likelihood that, under all the circumstances, the omitted fact would have assumed actual significance in the deliberations of the reasonable shareholder. Put another way, there must be a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the "total mix" of information made available. n120

There has been no subsequent judicial definition of "substantial likelihood" or "significantly altered," as used in Justice Marshall's opinion; it seems clear that any attempt to define with certainty these terms, and by extension "materiality," would be futile. n121 The Court in *TSC Industries* enunciated a standard of materiality in "objective" terms addressed solely to the anticipated or surmised effects of a given "fact" on the deliberations of a hypothetical reasonable shareholder. n122 There are indications, however, that other considerations enter the judicial "total mix." Cases involving corporate mismanagement or directorial misconduct that falls short of illegality have tended to be given short

shrift by the courts in Section 14(a) cases. n123

In *Minzer v. Keegan*, n124 the Second Circuit held that a materially misleading omission in a merger-proxy statement will not invalidate a merger if the court concludes as a matter of law that the omitted information "would not have made a reasonable shareholder any less likely to favor the objected-to transaction, and such an omission, *material or not*, could not have caused the injury for which damages are sought" (emphasis supplied). In *Minzer*, Chief Judge Winter, a highly experienced corporate jurist, speaking for a three-judge panel, affirmed dismissal by the district court n125 of an amended complaint which alleged that a proxy statement issued jointly by two parties to a proposed merger was materially misleading in failing to disclose (a) details of a rival offer and management's thwarting of such offer, and (b) that the acquired company's board and management were unduly influenced by offers of future employment and compensation. The complaint further attacked the opinion of Sandler O'Neill, the acquired company's investment bankers, that the merger was "fair from a financial point of view" in the face of a higher rival offer. The court concluded that as a matter of law a reasonable shareholder would not, upon learning of such information, have been induced to vote against the merger; that such a shareholder would have concluded that defeat of the merger would have left the company's shareholders with no deal at all because the shareholder would not have believed that there was a substantial likelihood of a near-term and more favorable merger with the rival bidder after rejection of the acquirer's offer. The court further stated that had the plaintiffs alleged that the premium paid for the acquired bank's shares was substantially below that of comparable transactions, or that the price paid did not adequately reflect the present value of expected future free-cash flows to the stockholders, the plaintiffs' attack on the Sandler O'Neill opinion might have survived the motion to dismiss.

Rosenberg v. Nabors Industries, Inc. n126 quotes with approval the statement in *Minzer* that the definition of materiality in the proxy context "assumes that the omitted information would have influenced a reasonable shareholder against the proposed transaction for which the proxies were sought," n127 a somewhat confusing citation since *Minzer* clearly states that an omission can be material but still may not have caused the injury. The question appears to be more one of causation than of materiality.

In re Fleet/Norstar Securities Litigation n128 involved an attack upon proxy materials for failure to disclose corporate mismanagement in following conservative lending policies and establishing adequate loan loss reserves. The complaint asserted that the proxy materials failed to disclose defendant-directors' failure "to fulfill even their basic functions as corporate fiduciaries and to safeguard Fleet assets." The court held that the complaint at best made out a claim of mismanagement, and followed *Kas v. Financial General Bankshares* n129 in holding that failure to disclose mismanagement is not materially misleading and thus not actionable under Section 14(a).

In *Gaines v. Haughton*, n130 the Ninth Circuit stated that director misconduct that did not inure to the "direct, personal benefit of the directors" n131 or involve certain kinds of illegal conduct, especially conduct involving criminal convictions, need not be disclosed in proxy solicitations. Thus, in the Ninth Circuit's view, director misconduct that does not involve self-dealing or serious illegality is not a material fact within the meaning of the federal securities laws. The court of appeals was concerned with shareholder-plaintiff attempts to gain a federal forum for claims of "corporate mismanagement" that it believed should be addressed to the state courts. The opinion cites *Santa Fe Industries v. Green*, n132 a *Rule 10b-5* damage action, and similar cases n133 for the proposition that the federal securities laws were not intended to promote the "federalization of corporate law." n134 The *Gaines* opinion concedes that "[m]any corporate actions taken by directors in the interest of the corporation might offend and engender controversy among some stockholders." n135 However, it believed that such stockholders should either bring a state action against the "responsible directors" or "if all else fails ... sell or trade their stock." n136

The last quoted remark appears to indicate that the court of appeals is not talking about "materiality" in the same sense as that used by the Supreme Court in *TSC Industries*. n137 If a fact is so significant to a reasonable shareholder that he will sell his shares, the fact is "material" under any standard based upon the perceived effects of the information on the shareholders. The Supreme Court grounded its definition on that basis. *Gaines* is more concerned with barring certain

kinds of allegations from trial in federal court on the grounds of comity and the perceived functions of the federal securities laws than it is with the importance of certain information to shareholders. n138

To force corporate officials to describe otherwise undisclosed misconduct in their proxy material is an instance of compelling people to "undress in public." There may be substantial reasons for the Commission and the courts to "make haste slowly" in imposing such a requirement. n139 Thus the *Gaines* approach may be viewed as an example of judicial restraint in resistance to over-expansion of the disclosure requirements of the securities laws. However, even the court of appeals in *Gaines* takes pains to note that "[t]here are clearly instances of illegal conduct by director-nominees, unrelated to self-dealing, ... which would have to be disclosed, especially if they involved criminal convictions." n140

For example, in *Citron v. Daniell*, n141 a derivative action against officers and directors of United Technologies Corporation, the U.S. District Court for Connecticut concluded that disclosures that United Technologies Inc. was being investigated in connection with its government contracting activities gave adequate notice "that the company might be involved in dealings" that could affect its stock price. The court thus dismissed the plaintiffs' Section 14 allegations. In ruling that claims that the defendants violated Section 14(a) by issuing materially misleading proxy statements must be dismissed, the court pointed out that the government's investigation of the company was revealed in each of United Technologies' annual reports that were referenced in the proxy statements that were alleged to be false and misleading. Rejecting as "absurd" the plaintiff's argument that the defendants should have stated in their annual reports and, in turn, their proxy statements, that they, the board of directors, were taking bribes and engaged in conspiracies, the court said that it "would be unreasonable to require board members to tell the world they are thieves, unless, of course, they have been charged and/or convicted." Here, however, the factual disclosures were "sufficient to put the investing public on notice that the company might be involved in dealings which could, quite possibly, affect the price of the company's stock." n142

A claim against directors and officers for fraudulent misrepresentation in proxy materials survived a motion to dismiss in *In re Meridian Securities Litigation*, n143 despite defendants' plea that the complaint merely alleged mismanagement.

Misstating a company's environmental record in opposing a stockholder proposal for adoption of the "Valdez" principles is actionable under Section 14(a), even though the company could have lawfully remained silent regarding its record. n144

[B] Is "Materiality" Only Quantitative? In Staff Accounting Bulletin No. 99 (issued August 12, 1999, entitled "Materiality"), the SEC addresses the propriety of using quantitative thresholds as "rules of thumb" to assist in the preparation of financial statements, such as a rule suggesting that the misstatement or omission of an item that falls under a 5% threshold is not material in the absence of particularly egregious circumstances, such as self-dealing or misappropriation by senior management. While not objecting to the use of such "rule of thumb" as an initial step in assessing materiality, the staff makes it clear that it provides only a starting point for the analysis. The staff quotes with approval from the FASB's Statement of Financial Accounting Concepts No. 2 as follows:

The omission or misstatement of an item in a financial report is material if, in the light of surrounding circumstances, the magnitude of the item is such that it is probable that the judgment of a reasonable person relying upon the report would have been changed or influenced by the inclusion or correction of the item.

The staff regards this test as substantially identical to the test adopted by the Supreme Court in *TSC Industries v. Northwestern, Inc.*, n145 that a fact is material if there is "a substantial likelihood that the ... fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available." It points out that misstatements of relatively small amounts could have a material effect on financial statements, depending on a number of variables, including:

- whether the misstatement arises from an item capable of precise measurement or whether it arises from an estimate and, if so, the degree of imprecision inherent in the estimate;
- whether the misstatement masks a change in earnings or other trends;
- whether the misstatement hides a failure to meet analysts' consensus expectations for the enterprise;
- whether the misstatement changes a loss into income or vice versa;
- whether the misstatement concerns a segment or other portion of the registrant's business that has been identified as playing a significant role in the registrant's operations or profitability;
- whether the misstatement affects the registrant's compliance with regulatory requirements;
- whether the misstatement affect the registrant's compliance with loan covenants or other contractual requirements;
- whether the misstatement has the effect of increasing management's compensation--for example, by satisfying requirements for the award of bonuses or other forms or incentive compensation; and
- whether the misstatement involves concealment of an unlawful transaction.

The staff adopts the view that while intent of management does not per se render a misstatement material, "it may provide significant evidence of materiality," and that this evidence may be particularly "compelling" where management deliberately misstates items in order to "manage" reported earnings. It goes on to state:

the materiality of a misstatement may turn on where it appears in the financial statements, for example, a misstatement may involve a segment of the registrants' operations. In that instance, in assessing materiality of a misstatement to the financial statements taken as a whole, registrants and their auditors should consider not only the size of the misstatements but also the significance of the segment information to the financial statements taken as a whole. "A misstatement of the revenue and operating profit of a relatively small segment that is represented by management to be important to the future profitability of the entity" is more likely to be material to investors than a misstatement in a segment that management has not identified as especially important. n146

The importance of this issue is highlighted by the significance given by the investing community to analysts' forecasts of company quarterly earnings. A failure to meet the analysts' forecasts, even by a penny, can often have a dramatic impact on a company's stock price (thereby meeting the test of materiality discussed below). One may assume that public companies generally will apply the greatest possible effort and ingenuity to meeting analysts' expectations after watching the carnage wreaked upon their less fortunate brethren, and it would appear to be naive to suppose that some sort of "management" of earnings is not at work in overcoming a shortfall of one or two cents per share. The bottom line would appear to be that, while certain types of "management" of earnings may be tolerated, such as judgmental use of reserves within reasonable parameters, such discretionary management practices must meet the test of reasonableness, and companies may not intentionally falsify their financial statements to overcome even that small gap of one or two cents a share.

Recent cases have indicated that the inquiry is highly fact-sensitive. For example, a district court erred in holding that a misstatement of 1.7% in pre-tax revenues was immaterial as a matter of law, the appeals court rejecting a bright-line "formulaic" approach at the pleading stage, saying materiality is a mixed question of law and fact. n147

A 2% overstatement of assets was held not to be material because of the company's history of very rapid growth, and the court's conclusion that an overstatement would not impact the entire range of information available to the public. n148

On the other hand, a change in a company's debt to equity ratio from the 60% range to the 80% range was material information and the company should have stopped disseminating information regarding its total debt. n149

As early as 1968, Judge McLean was grappling with the concepts of materiality in his landmark opinion in *Escott v. BarChris Construction Corp.*, n150 where he held that a 7% error in reported sales and a 14% error in reported net operating income were not material, stating:

Since no one knows what moves or does not move the mythical "average prudent investor," it comes down to a question of judgment, to be exercised by the trier of fact as best he can in the light of all the circumstances. It is my best judgment that the average prudent investor would not have cared about these errors in the 1960 sales and earnings figures, regrettable though they may be. I therefore find that they were not material within the meaning of Section 11.

Similarly, *Bond Opportunities Fund v. Unilab Corporation*, n151 involved a claim against former directors, an investment banker and others that proxy materials containing false and misleading statements were used in furtherance of a scheme to induce former shareholders to sell their shares at an unfairly low price pursuant to a buyout arising from a merger. The district court held that the plaintiffs failed to meet the pleading standards for fraud under the Private Securities Litigation Reform Act, stating that while the disclosure may not have been perfect, the "total mix" of information provided was sufficiently complete and accurate to allow a shareholder to make an informed decision and the misstatements or omissions alleged could not pass the materiality test. The court further held that the allegations were insufficient to support a claim that the directors were negligent in their failure to disclose material information in the proxy statement.

In *California Public Employees' Retirement System, et al. v. The Chubb Corporation, et al.*, n152 the Third Circuit affirmed the dismissal of an action based in part upon a claim that a proxy statement issued in connection with a proposed merger between Chubb and Executive Risk contained false and misleading statements regarding the financial condition and future performance of Chubb's standard commercial insurance business. The court held that the complaint failed to satisfy the heightened pleading requirements imposed by the Private Securities Litigation Reform Act (PSLRA) n153 by failing to plead with particularity the true facts and "purporting to show how or why the alleged statements were false". The court noted that an action under Section 14(a) does not require any allegation of scienter. Circuit Judge Sloviter, dissenting in part, noted that the proxy statement failed to disclose a material decline in operating results for Chubb's second quarter, which were published subsequent to the issuance of the proxy materials but were known prior to the shareholder vote. The dissent would require a trial of the issue of whether the failure to disclose the disappointing second quarter results was material, relying on *Gould v. American-Hawaiian S.S. Co.*, n154 holding that "the basic test of materiality in a Section 14(a) setting is whether it is probable that a reasonable shareholder would attach importance to the fact falsified, misstated or omitted in determining how to cast his vote on the question involved."

However, in *Shaev v. Saper*, n155 shareholders were asked to vote on a proposed amended executive bonus plan. Reversing a dismissal by the district court, the appeals court found the proxy material misleading in two respects: the proxy statement had erroneously described the Executive Bonus Plan as complying with treasury regulations which make executive compensation in excess of \$1,000,000 deductible only if based on objective performance goals established not later than 90 days after the start of the relevant period of service; and the proxy statement failed to adequately disclose the terms of an earlier bonus plan of which the plan under consideration was an amended version, or even to mention a still earlier plan from which the subsequent plans were derived. The court stated, "to determine the

overall incentive effects, stockholders would have had to read the three documents together, and they did not have them." While the court conceded that a proxy statement need not disclose "the specific business criteria" upon which bonuses are contingent, n156 that regulation did not insulate the board from a claim under Rule 14a-9 for failure to disclose the bonus plan's material terms and general performance goals.

Similarly, where a company solicited proxies for adoption of certain anti-takeover measures without disclosing that the measures were being proposed in order to fight off a takeover threat from an existing shareholder, the court in *ODS Technologies L.P. v. Marshall*, n157 enjoined the shareholder vote until corrective disclosures could be made, the court holding that the failure to disclose the true reason for the proposal was materially misleading, and that a reasonable shareholder would be led to believe that the proposals were "merely routine measures adopted on a clear day and designed to insure continuity and stability." The court granted a preliminary injunction, holding that the plaintiff has firmly established a reasonable likelihood of success on the merits of its claim for a breach of the fiduciary duty of disclosure.

In some cases, courts have found a lack of materiality in a lack of causation. In *Akerman v. Oryx Communications, Inc.*, n158 the court found that a "theoretically material" misstatement was not "materiality in fact" when the company's stock price "actually rose somewhat after public disclosure of the error." n159

Failure to disclose development of a high nicotine tobacco seed was immaterial as a matter of law, as well as failure to disclose a criminal investigation to which the company submitted a guilty plea several months later where there was no evidence the company was aware of the investigation at the time the proxy statement was mailed. n160

Claims that a company's proxy statement falsely held out a director as being a member of the board of a second company were not material. n161 Further, the company had no duty to disclose the potential value of a lost contract where such value would be speculative.

The case of *Seinfeld v. Bartz* n162 presented a claim by a stockholder that a proxy statement soliciting proxies for the approval of stock options granted to outside directors was materially misleading for failing to include the value of option grants to the directors based on the Black-Scholes option pricing model. On appeal from the district court's dismissal of the case for failure to state a claim, the Ninth Circuit confirmed, holding that there is nothing in the proxy rules which requires any specific valuation methodology, of which the Black-Scholes model is just one, and that in any event, neither Item 402(g) of Regulation S-K nor any other provision of Item 402 "expressly requires disclosure of the grant-date value of stock options proposed to be provided to the directors." n163

An allegedly undisclosed (or misdisclosed) fact is to be judged solely by its presently evident *economic* potential or consequences, rather than its significance as an indicator of management's "integrity." If, for example, the greatest part of a company's business is dependent upon contracts obtained through bribery or similar violations of law that would be vigorously prosecuted if detected, that fact would seem to be material to shareholders who were indifferent to the social and moral implications of the conduct, since it would pose a significant risk to their investment in the company's future income. n164 But a hypothetical, prudent, amoral investor may not be at all concerned with bribery or similar conduct that relates only to an insignificant part of the business. n165 The Commission's view has traditionally been that:

[Q]uestionable or illegal payments that are significant in amount or that, although not significant in amount, relate to a significant amount of business, are material and required to be disclosed. n166

The Commission added that repeated questionable or illegal payments not authorized by the board and made "without proper accounting" could be material regardless of other factors if they reflected upon the "quality of management" or raised "questions regarding improper exercise of corporate authority." n167 Furthermore, the Commission believes that authorized payments may be material if they subject the enterprise to quantitatively material risks. n168

The Commission's views concerning materiality in the improper payment context thus have met with a mixed reaction in the courts, the Ninth Circuit having decided that "director misconduct" absent self-dealing or serious illegality is immaterial *as a matter of law*, n169 while the Second Circuit has indicated agreement with the Commission's views. n170 The Commission's views would seem to be soundly grounded to the extent they are based upon readily demonstrable "quantitative materiality," *e.g.*, bribes that (i) are significant in amount, (ii) relate to a significant amount of business, or create significant quantitative risks.

In addition to those instances, the materiality of management self-dealing is beyond dispute. n171 However, disclosure that is *only* concerned with "policy" or the "integrity" or "quality" of corporate leaders, apart from "quantitative materiality," is a much more difficult matter. Although such material may well be of great interest to shareholders, n172 judges feel uneasy passing upon the propriety of corporate policies apart from readily perceived economic risks or insider's self-dealing under the vague terms of an antifraud provision, absent a specific disclosure requirement in the Commission's rules. On the other hand, shareholders, like the owners of any business, are entitled to information concerning "mismanagement" of their business, even if the sole legal means of correcting the underlying problem is an action under state law, and the only efficacious means of providing them with such information in today's corporate world is through federal disclosure requirements. The states have in general confined themselves to authorizing voting by proxy, without requiring that the shareholders be provided with detailed information concerning the directors or transactions for which their proxies are sought. n173 In view of the states' default and the fact that the informational role of federal law is the sole legal requirement that all shareholders be supplied with significant categories of information, it is essential that the federal rules embrace *all* the information needed by shareholders in reaching their decision. The function of federal proxy law is to facilitate the "actual and informed vote of the stockholders." n174

[C] Completeness, Relevance and Prominence of Disclosure. If a Commission rule, *e.g.*, a "line item" of a form, requires a given fact to be disclosed, it must be disclosed in a fashion that is not misleading. For example, if an issuer, in response to a specific requirement, states that its labor relations are "satisfactory," it must add such *other* information as is necessary to prevent that information from being misleading, *e.g.*, that its labor relations are dependent upon bribes to union leaders. n175 The soliciting materials must be complete in their own right; the Supreme Court's resort to the "total mix" description in *TSC Industries v. Northway* n176 presumably does not mean that a proxy solicitor may rely upon information in an opponent's material to fill gaps in his or her own. n177

It is also evident that materiality is not to be judged in a vacuum; a fact is only material if it is of importance to the shareholders' deliberations on the matter to be voted upon. n178

Equally important is the manner and prominence of presentation, *i.e.*, is the information presented in a manner that obscures its significance? For example, if shareholders are advised on pages 2 and 3 of a proxy statement that the board of directors has recommended adoption of an agreement of merger, it is not sufficient to point out on pages 21 and 23 facts that would reveal to a diligent reader that the directors are nominees of the other party to the transaction. n179

[D] Disclosure to Whom? A related consideration is the level of sophistication of the disclosure. In *Gerstle v. Gamble-Skogmo*, n180 Judge Friendly found the "fateful paragraph" there at issue insufficient:

While "corporations are not required to address their stockholders as if they were children in kindergarten," ... it is not sufficient that overtones might have been picked up by the sensitive antennae of investment analysts. n181

The issue has remained unsolved throughout the history of federal securities legislation. The Wheat Report concluded that disclosure must "to the extent possible, [meet] the needs of all who have a stake in the securities markets." n182 That view was adopted in *Feit v. Leasco Data Processing Corp.*, n183 a Securities Act case involving an exchange offer for the securities of an insurance company. The district court in *Feit* held that disclosure must serve the purposes of the average shareholder and the securities professional and the sophisticated investor.

[E] What Is a "Fact"? The identification of a "fact" can be difficult in many situations, particularly where a "mere possibility," which need not be disclosed, n184 must be distinguished from reasonably anticipated future prospects and developments. However, there are limitations to a future-oriented perspective for issuers and professionals who must prepare documents for scrutiny under the securities laws. They must anticipate that the most thorough examination of their efforts will be conducted by a fact-finder in litigation assisted by hindsight. If they paint too optimistic a picture, the legal results may be disastrous. The most famous statement concerning the delicate act of disclosing the likelihood of future developments is contained in *SEC v. Texas Gulf Sulphur*, n185 a *Rule 10b-5* case involving a mineral discovery in Timmins, Ontario, which had not been thoroughly evaluated, but which was undoubtedly significant:

[m]aterial facts include not only information disclosing the earnings and distributions of a company but also those facts which affect the probable future of the company and those which may affect the desire of investors to buy, sell, or hold the company's securities.

In each case, then, whether facts are material within *Rule 10b-5* when the facts relate to a particular event and are undisclosed by those persons who are knowledgeable thereof will depend at any given time upon a balancing of both the indicated probability that the event will occur and the anticipated magnitude of the event in light of the totality of the company activity. n186

A frequent problem is that of distinguishing between a corporation's "plans," which may be material to shareholders and prospective investors, and "just talk," *i.e.*, possibilities for corporate action in such an early, formative stage that no one should attach much significance to them. n187 Where the plans represent the present intention of management, they must be disclosed if relevant to the shareholder's decision, and the shareholder must be given the information needed to make an informed decision whether to engage in the transaction. An illustration is provided by *Gerstle v. Gamble-Skogmo*, n188 in which the Court of Appeals for the Second Circuit found that there was inadequate disclosure of an acquiring company's intent to sell off the assets of the company being acquired. That deficiency was accompanied by the failure to disclose the resale value of the assets, typically not revealed in corporate balance sheets. To that extent, *Gerstle* fits well with prior decisions involving nondisclosure of indications of value in excess of the market price of the stock or the corporation's financial statements. n189 In that connection, Judge Friendly drew a sharp distinction between appraisals of the market value of assets, on the one hand, and "firm offers" from third parties, on the other. He noted the Commission's long-standing opposition to the disclosure of asset appraisals, and refused to find liability on that basis. He thought that a different conclusion might be warranted by the failure to disclose "firm offers," however, stating that such offers, "emanating from outside sources, do not have the potential of overstatement of prospects at the instance of management that has so alarmed the SEC about appraisals." n190

Gerstle, like *Mills* n191 and other cases, involved a transaction in which the acquiring party was on both sides of the transaction through representation in management. In that type of situation, a judicial fact-finder is aware that insiders are often more sensitive to indications of future profits or losses at an earlier date than outsiders. n192

Disagreements among the directors of a merging corporation as to the wisdom of the proposed merger may also be material. In *Gilmartin v. Adobe Resources Corp.*, n193 the chief executive officer and the chief operating officer, both directors, argued against approval of the merger of an oil and gas company with another corporation on the ground that the depressed state of the gas market made it a bad time to sell the company. The court, while noting that two investment banking firms had recommended the merger, and that the two officer-directors had ultimately voted in favor of the transaction, held on a motion for injunctive relief that the omission of the negative views of the two individuals was material to the preferred shareholders (who had a class vote) and that the plaintiff preferred shareholders would probably prevail in their claim that such omission violated the directors' duty of candor to all of the stockholders.

[g] The Relevance of Motivation and Belief. Management's underlying motivation for embarking on a proposed course of action can be as relevant to a shareholder's vote as the course of action itself. In *Mendell v. Greenberg*, n194

the controlling shareholders failed to disclose the need for cash to pay estate taxes that led them to negotiate a merger of Loehmann's, Inc. with a subsidiary of AEA Investors, Inc. in exchange for cash.

In *Virginia Bankshares, Inc. v. Sandberg*, n195 Justice Souter attempted to put to rest uncertainty as to whether a misstatement as to belief could give rise to Section 14(a) liability. The plaintiffs, who were minority stockholders whose vote was not needed under the Virginia statute to validate the merger (but whose vote was nevertheless solicited for reasons of public or shareholder relations), claimed that the statement in the proxy materials that "[t]he Directors voted to accept the proposal because they believe it offers a high value" was false in that the directors did not hold such a belief and therefore could not have voted for the proposal for such a reason. While Justice Souter states clearly that misrepresentations as to motivation or belief may be actionable, he also makes it crystal clear that a statement of motivation or belief without more, *i.e.*, without some misrepresentation as to the subject matter of the belief (in his case, the "fair value" of the shares being "high") is not actionable. Justice Souter stated: "We think that proof of mere disbelief or belief undisclosed should not suffice for liability, under § 14(a), and if nothing more had been required or proven in this case we would reverse for that reason." n196

Justice Scalia in his concurring opinion reinforces this conclusion, stating: "I recognize that the Court's disallowance ... of an action for misrepresentation of belief is entirely contrary to the modern law of torts I have no problem with departing from modern tort law in this regard, because I think the federal cause of action at issue here was never enacted by Congress ... and hence the more narrow we make it (within the bounds of rationality) the more faithful we are to our task." n197 Justice Souter found that underlying misrepresentations as to the subject matter of the misstated beliefs may well have existed, *i.e.*, that the value offered to minority shareholders was not "high," although it did represent a 30 percent premium over market price--in a thin market, as the Court pointed out, and may not have represented a premium over book value. The Court viewed with approval plaintiff's argument that book value should have taken account of unrealized appreciation in the market value of the bank's real estate, a somewhat startling departure from generally accepted accounting principals.

Notwithstanding the Court's finding of a material misrepresentation of a material fact, plaintiff's case failed (by a 5-4 vote) for lack of causation, on the ground that, even if plaintiff (and all other minority shareholders) had voted against the merger, they did not have sufficient votes to prevent the majority shareholder from forcing it through. n198

Expressions of opinion may give rise to claims under 14(a) but the threshold of pleading and proof is high. In *Knollenberg v. Harmonic, Inc.*, n199 plaintiffs failed to adequately plead violation of § 14(a) because statements that the merger was in the best interests of the shareholders were expressions of opinion not shown to be false on the face of the pleadings. PSLRA pleading requirements apply, but lack of reference in 14(a) to "a manipulative device or contrivance" indicates there's no scienter requirement. Negligence is sufficient for both forward and non-forward-looking statements. Statements that the merger was "in the best interests of the shareholders" were expressions of opinion that are only actionable if shown to be false objectively or subjectively. In *In re Textainer Partnership Securities Litigation*, n200 plaintiffs claimed that proxy statements were materially false in soliciting proxies for approval of an asset sale of shipping containers, in failing to disclose that the containers were being sold below market due to a management contract requirement. Dismissing (for the fourth time) for failure to plead with particularity and thereby to meet the heightened pleading requirements of the Private Securities Litigation Reform Act, the court stated that a defendant may only be liable for statements of opinion (in this case, that the price was fair to and in the best interests of the limited partners) only if (1) the speaker did not actually hold the opinion, and (2) the opinion was objectively false or misleading.

The Delaware District Court has declined to rule on the issue of what "state of mind" of the defendant must be pleaded and proved by the plaintiff in a suit attacking the correctness of statements in a proxy statement regarding the deductibility of executive incentive bonuses. n201 Plaintiff contended that a mental state is not required because he sought only an injunction, or alternatively, that only negligence is required to prove a violation of § 14(a). Defendants contended that actual knowledge is required under a safe harbor provision for forward-looking statements. The issue

remains unresolved.

Similarly, a claim of fraudulent misrepresentations in a merger proxy statement could not support a 10b-5 damage action by minority shareholders where the holders of at least 66% of the shares could compel the merger without the minority, causation being lacking to support the action. n202

[h] Causation. The elements of an injunction suit discussed thus far have been concerned with establishing a violation of the federal rules under Section 14(a) or (c) upon the complaint of the Commission or a private party. The need to establish the additional elements of causation and culpability turns on the particular relief sought. n203

The element of causation is not essential in an action that seeks prospective relief. In the context of an active unfinished proxy solicitation, where the purpose of the proceeding is to *prevent* threatened injury through timely prophylaxis, there is no need for the SEC or a private moving party to establish causation, which is concerned with an accomplished injury. n204 In such a case, a finding of a *material* omission or a *material* misstatement is itself a finding that shareholders may be misled and thus presumes a causal connection. n205 Similarly, a failure to include a shareholder's proposal (if the proposal is proper and timely submitted) is itself sufficient to require a resolicitation. n206 *De minimis* violations are a different matter and will not justify the extraordinary relief of an injunction on the motion of a private party, n207 although in an injunction action the Commission is more equal than a private party since it represents the public interest in having the proxy rules obeyed. n208

With respect to accomplished transactions, however, equitable relief under the proxy rules can be granted only if the transaction was "caused" by the asserted violation. In *Weisberg v. Coastal States Gas Corp.*, n209 the district court had dismissed plaintiff's complaint for "lack of transaction causation" where she alleged that there had been a failure to disclose improper payments in connection with the election of directors. The Second Circuit reversed, distinguishing cases in which damages were sought from those in which the plaintiff is attacking the election itself. In the latter case, the proxy solicitation was "an essential link in the accomplishment" of the transaction, *i.e.*, the election. n210 The case was remanded to permit "discovery or other opportunity" to establish the materiality of the alleged omissions. Materiality was the sole question bearing on causation because, under *Mills v. Electric Auto-Lite, Co.*, n211 a showing of materiality is sufficient to establish causation where the proxy solicitation is an "essential link in the accomplishment" of the disputed transaction.

The proof of causation in the context of the adverse effect of misrepresentation on the price of stock has taken a more specific tack. The Supreme Court in a unanimous decision ruled in *Dura Pharmaceuticals, Inc. v. Broudo*, n212 that allegations that defendants' misrepresentations or omissions caused the price of a security to be artificially inflated, standing alone, do not suffice to plead loss causation. The court noted that if the purchaser sells later after the truth makes its way into the marketplace, an initially inflated purchase might mean a later loss, but that is not inevitably so. The plaintiff must tie the disclosure of the new information, or the materialization of the concealed risk, to the subsequent movement of the stock price. This was followed by *In Re Acterna Corp. Securities Litigation*, n213 where the court dismissed a complaint because of a failure to allege a significant stock price decline immediately following the announcement that revealed the fraud to the public. Subsequent cases make clear that the disclosure need not be made by the company but may come from other sources. In *Teamsters Local 445 Freight Division Pension Fund v. Bombardier*, n214 the corrective disclosure may be revealed by some other source, or may simply be a concealed risk that "materializes". Particularly difficult would be the case where the disclosure is accompanied by the announcement of other bad news which is timely made, placing on the plaintiff the heavy burden of isolating the price impact of the omitted or misstated information from the new unfavorable information. n215

The Tenth Circuit in a recent opinion in *In re Williams Securities Litigation* n216 has analyzed in detail the burden imposed on the plaintiff to clearly allocate causation to the corrective disclosures when there are other factors at work unrelated to the fraud or the corrective disclosures which may be deemed to have had an adverse effect on the market price of the security.

The Court stated that "Because loss causation demands that plaintiffs show that their losses were caused by a revelation of the fraud and not some non-compensable cause", the District Court was justified in refusing to allow the issue to be submitted to the jury (even assuming the truth and materiality of the alleged fraudulent statements) and the Court affirmed the granting of summary judgment for the defendants by the District Court.

[i] Culpability-Negligence Versus Scienter. Like causation, the element of culpability (*i.e.*, negligence, recklessness or worse) must be proven separately only with regard to accomplished actions. While lower courts have generally held that mere negligence will support a damage claim under § 14(a), in contrast to actions under § 10(b), the Supreme Court in *Virginia Bankshares, Inc. v. Sandberg*, n217 in noting that the Court in *TSC Industries v. Northway, Inc.* had reserved the question whether scienter was necessary for liability generally under § 14(a), commented: "We reserve it still." n218

Although the Supreme Court treats the issue as still open, a powerful opinion by Judge Richard Posner of the 7th Circuit may have virtually sealed its fate. n219 In Judge Posner's view, a statement in a proxy statement is either misleading or not. Intent has nothing to do with the matter. He states "a proxy solicitation that contains a misleading misrepresentation or omission violates [Section 14 (a)] even if the issuer believed in perfect good faith that there was nothing misleading in the proxy materials," quoting Prosser and Keeton on the Law of Torts: "negligence is conduct, and not a state of mind." n220 In other words, it is totally objective, not subjective. Judge Posner distinguishes the requirement in the Private Securities Litigation Reform Act n221 for pleading a state of mind, stating that it arises only in a securities case in which "the plaintiff may recover money damages only on proof that the defendant acted with a particular state of mind." He states "Section 14 (a) requires proof only that the proxy solicitation was misleading, implying at worst negligence by the issuer," observes that negligence is a failure to come up to the specified standard of care, "whether conscious or even unavoidable (by the particular defendant, who may be below average in his ability to exercise due care)."

The Ninth Circuit has held that negligence is sufficient to support a claim for a violation of § 14(a) for both forward-looking and non-forward-looking statements. Where the misstatement relates to an opinion, a plaintiff must allege particularized facts showing that the opinion was both subjectively and objectively false. n222

In re Real Estate Associates Ltd. Partnership Litigation, n223 involved a complaint by limited partners against the officers and directors of their managing general partner alleging, *inter alia*, that defendants' statements of opinion in a proxy statement were subjectively and objectively false (thereby implicating the speaker's "state of mind"). On a motion to dismiss for failure to state a claim, involving the falsity of a statement of opinion, the Court held that the plaintiff is required to plead the evidentiary facts showing the speaker knew the opinion to be false. "In general, scienter is not required to prove a violation of the rule prohibiting material misstatements and omissions in connection with a proxy solicitation; a showing of negligent conduct will suffice." In any event, allegations that defendants made false and misleading statements in group-published documents were sufficiently particular to plead corporate securities fraud. Similarly, see *State of New Jersey v. Sprint*, 531 F. Supp. 2d 1273 (D. Kan. 2008) .

However, the Second Circuit has imposed a scienter requirement. In *Kalnit v. Eichler*, n224 MediaOne entered into an agreement to be acquired by Comcast for approximately 48 billion dollars and agreed that it would not directly or indirectly solicit any superior offer (although it could accept one within 45 days). Shortly thereafter Hostetter, MediaOne's largest shareholder, expressed his dissatisfaction with the terms of the Comcast agreement and requested that MediaOne release him from an earlier standstill restriction to allow him to develop a superior proposal. MediaOne agreed that Hostetter could speak with third parties about a superior proposal, subject to his agreement not to make a public announcement of his efforts without the written consent of MediaOne's board. Shortly thereafter MediaOne sent its shareholders a proxy statement informing them that a special meeting regarding the proposed merger with Comcast would likely occur, but failing to disclose any of the communications between Hostetter and MediaOne's board of directors. Immediately thereafter Plaintiff sold 1,820 shares at \$65.44 per share. Six days later, AT&T proposed a

merger with MediaOne for 58 billion dollars and Hostetter filed a Schedule 13D with the SEC disclosing that the proposal resulted from his discussions with AT&T. Plaintiff filed a class action complaint on behalf of all shareholders who sold MediaOne securities in ignorance of the AT&T proposal. The trial court dismissed the action because the complaint failed to adequately allege scienter, *i.e.* intent by the defendants to deceive, manipulate or defraud MediaOne shareholders. In confirming dismissal of the complaint, the appeals court distinguished the case from *Buxbaum* n225 and *MCI* n226 on the ground that both of those cases involved affirmative misstatements rather than merely a "failure to disclose [MediaOne's] waiver of a then three year old standstill provision. The recklessness of this behavior is not apparent from the facts alleged by plaintiff." The court stated that "because this case does not present facts indicating a clear duty to disclose, plaintiff's scienter allegations do not provide *strong* circumstantial evidence of conscious misbehavior or recklessness."

In *Tellabs, Inc. v. Makor Issues & Rights, Ltd.* n227 the Supreme Court for the first time addressed the heightened requirements for pleading scienter under the Private Securities Litigation Reform Act of 1995, under which a plaintiff in a case claiming damages for violating *Rule 10b-5* must "state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind." 15 U.S.C. Section 78 u-4 (b) (2). In *Tellabs*, by a vote of eight to one, the Supreme Court rejected the Seventh Circuit's definition of "strong inference" as a "reasonable inference," stating, in an opinion by Justice Ginsburg, that the factual allegations in a securities fraud complaint must create an inference of scienter that "must be more than really plausible or reasonable--it must be cogent and at least as compelling as any opposing inference of non-fraudulent intent." The Supreme Court further held that courts must consider plausible, non-culpable explanations for the defendant's conduct as well as inferences favoring the plaintiff. Upon remand to the Seventh Circuit, the Appellate Court again found in favor of the plaintiff, the court in an opinion by Judge Posner stating that the inferences of non-culpable conduct were "highly implausible" and "very unlikely." n228 In the first case applying the pleading standards subsequent to the *Tellabs* case, the Kansas District Court in granting a preliminary injunction held that a claim brought under Section 14 (a) for misrepresentation under the proxy rules, which in the District Court's view are to be pleaded in negligence and not fraud, was nevertheless subject to the same "strong inference" pleading standard as applied in *Tellabs* to allegations of scienter. *State of New Jersey v. Sprint Corp.*, 531 F. Supp. 2d 1273 (D. Kan. 2008) . On the issue of whether allegations of negligence suffice under Section 14(a) for liability, see the discussion in *Sec. 7.09[5][h]*, *supra*.

When the Commission or a private party seeks to prevent a threatened violation of the proxy rules, the judicial focus concerns whether the threatened conduct would constitute a violation. Once it is established to the court's satisfaction that the conduct would be illegal, it is inconceivable that the court would permit the defendant to accomplish the violation simply because the defendant demonstrated that he or she had acted in good faith.

The question of the defendant's culpability is much less involved in an injunction action than in a private action for damages, except when the court is asked to grant a decree prohibiting similar conduct in the future. In that instance, the defendant's inclination to violate the law may be significant in assessing the need to compel the defendant to avoid other violations in the future. n229

[j] Preliminary Relief. As previously discussed, n230 the Commission has substantial advantages over a private plaintiff in seeking preliminary or permanent injunctive relief, since it need not meet such usual requirements for equitable relief as demonstrating threatened irreparable harm or an unfavorable balance of hardships.

While the Commission appears before the court as a public representative, a private plaintiff usually has a self-interest in the matter under consideration, *e.g.*, as a combatant in a struggle for corporate control. In a private action, a court must be mindful that the grant of a preliminary injunction will be viewed by at least some stockholders as an indication of wrong-doing by the defendants, prior to a trial of the facts. n231 "Courts are understandably reluctant to interfere with an on-going proxy solicitation absent the clearest showing of irreparable harm." n232 To a large extent, the intrusion of a court into the situation tends to defeat the function of preliminary relief, *i.e.*, to preserve the *status quo ante* pending trial on the merits n233 since the action itself will alter the situation. Such considerations become even

more prominent when the application has been made immediately prior to the scheduled shareholders meeting, at the "eleventh hour." n234 Indeed the erroneous intervention of a district court by an "election-eve decision" may subsequently prompt a court of appeals to order a new election to preclude a result attributable to the ill effects of the trial court's decision. n235 A court must also take into consideration such omissions as the plaintiff's failure to adjourn, or to request a stay of, the meeting even though he requests that the defendant's solicitation be stopped. n236

All in all, the federal courts are often very skeptical of charges hurled in a proxy contest, n237 particularly if they believe a disputed matter will be thoroughly "aired" during the solicitation. n238

The presence or absence of action by the Commission can make a great difference. In purely private cases, the court is aware that the proxy statements in a proxy war have, in the usual case, been cleared by the Commission. n239 That the particular controversy has in fact been brought to the Commission's attention prior to clearance is of greater significance, n240 although the Commission's position is not always upheld. n241

In a clear case of material omission or misstatement, however, "the application for a preliminary injunction is the time when relief can best be given." n242 One reason for that view is that the material can often be corrected prior to the shareholders' vote, thereby permitting the shareholders, rather than the courts, to make the decision concerning the transaction in question. n243

[k] Forms of Relief. The specific type of relief that will be granted by a court under the proxy rules is dependent upon the facts of the particular situation and upon the point at which relief is sought. While the Commission may have an easier time than a private party in establishing its case because of its expertise and lack of personal interest, the *form* of the relief, apart from damages, is not dependent on the moving party. It is the defect in the solicitation and its consequences that are the concern of the court. As will be seen, the court is not limited to the most obvious remedy: enjoining the illegal solicitation or use of the proxies illegally solicited. n244

[i] Relief Before the Meeting. Pre-meeting injunctive relief can take the form of an order requiring one or more of the following:

- inclusion of a shareholder's proposal in management's proxy statement; n245
- filing of materials with the Commission; n246
- mailing of a shareholder's proxy material by management; n247
- compelling disclosures in proxy material, or requiring amendments to, and resolicitation of the proxy material; n248 and
- holding of a new meeting after the court sets aside the results of or postpones a prior scheduled meeting. n249

The plaintiff may also seek a prohibitory injunction against the use of proxy materials containing insufficient or misleading disclosure n250 or against the further solicitation of proxies. n251 Since such relief may disfranchise shareholders who have already given proxies, courts should couple such relief with a postponement of the scheduled meeting to permit resolicitation. n252

[ii] Relief After the Meeting.

The question whether relief could be granted to a shareholder after the holding of the meeting for which proxies were solicited was the subject of much uncertainty n253 until the *J.I. Case Co.* decision n254 in 1964. This decision affirmed

the powers of the federal courts to grant whatever remedial relief is required to enforce the proxy rules, including relief based on the laws of the state of incorporation. Such power is not confined to prospective or declaratory relief. n255 In addition to the traditional remedy of an injunction or damages, the Commission or a shareholder plaintiff may seek such ancillary relief as the appointment of nonmanagement directors. Post-meeting relief obtained *before* the consummation of the transaction authorized by the shareholders' vote is at least theoretically more desirable than postconsummation relief. At least in a private action, however, the plaintiff's counsel may not wish to post a required bond or may believe that there is a chance for a larger recovery, and attendant increase in fee, if the transaction is completed. Postconsummation relief presents the court with the alternatives of undoing the transaction, impracticable in many cases, or awarding damages. n256

[A] Preconsummation Relief. If the meeting has been held and the shareholders have approved a proposed transaction n257 or elected directors to the board, n258 the results of the meeting may be set aside and a new meeting ordered upon application to the court with proof of material violation of the proxy rules. n259 Such relief may be denied if the private litigant has failed to promptly seek pre-meeting relief n260 or a substantial period has expired between the date of the shareholder meeting and the date of institution of the suit. n261

The possibility that the court could always set aside the results of a shareholder vote should not be used as a pretense for denying preliminary relief before a meeting. n262 In addition to the unnecessary expense and delay n263 caused by the rescheduling of another shareholder's meeting, the degree of difficulty in obtaining the necessary relief after a post-meeting review increases. n264

It is clear that a court has the power to set aside the results of a shareholder vote and order a new or special election: but under what circumstances will the court exercise this power? In *Ohio Drill and Tool Co. v. Johnson*, n265 the court noted that it could not set aside the election of directors since the corporation, being previously merged into another corporation, no longer existed. Instead, the court awarded damages to shareholders based on their out-of-pocket losses. n266

The case of *Ainslie v. Sandquist* n267 is illustrative of other factors a court may consider before setting aside the results of a shareholder vote. Although the court in *Ainslie* found various violations of the proxy rules, it refused to set aside the results of the shareholders meeting and order a new meeting. The court reasoned that rescheduling a new meeting would be fruitless since defendants possessed sufficient votes to preclude any different result and that the expenses of rescheduling a new meeting when measured against the triviality of the issue to be voted upon would place an unwarranted burden on the corporation.

[B] Postconsummation Relief. As has been discussed, Section 29(b) of the Exchange Act has been interpreted to avoid the conclusion that a merger or other transaction must be set aside merely because the transaction was accomplished through a violation of the Act. n268 Rescission is in fact remote in the case of a merger and difficult in the case of other transactions. n269 Only where rescission of the corporate transaction would be in the best interests of the shareholders will a court exercise its discretion to set aside the transaction and order restitution to return the parties to the *status quo ante*. n270 The difficulty of such a restoration may prove to be the major stumbling block in granting recessionary relief. Although the plaintiff must establish "irreparable harm" and the absence of any "adequate remedy at law" n271 and that the action has been pursued with reasonable dispatch after discovery of the grounds for rescission, n272 final relief may be denied on the grounds that the assets of the surviving and merged corporation are totally commingled, n273 the former corporation n274 or its securities no longer exist, n275 or the task of tracing the shares of the former and merged corporation is impossible. n276

If rescission is impractical, a shareholder may pursue an action for damages if the shareholder has suffered as a result of the consummated transaction. n277

[iii] Ancillary Relief. The courts have fashioned a broad range of remedies for the violations of the securities laws,

including disgorgement of profits, appointment of a receiver or special agent to preserve the assets of a corporation and to ensure compliance with the securities laws, and the imposition of corporate procedures to prevent recurrences of violations. n278

Often, violations of Section 14(a) are caused by management misconduct. In such a case, an independent outside director or directors may be appointed to supervise management compliance with the securities laws, n279 a special counsel representing shareholder interests may be appointed to "investigate and initiate possible removal proceedings against wrongdoers and to conduct a special election of new directors" n280 or the corporation may be required to adopt special corporation policies or procedures. n281 In *Springer v. Jones*, a private enforcement action involving violations of the proxy rules, the following relief was agreed upon as part of a court-approved settlement of the litigation: the appointment of independent outside directors and the utilization of the proxy machinery to ensure their reelection; amendment of the articles of incorporation to require that the board be composed of at least 60 percent independent outside directors; and placement of the appointed directors in voting control of the board's executive committee, as well as the board itself. n282

Attorneys' fees, as a form of relief, may be awarded to a successful litigant but only under limited circumstances. n283 The Supreme Court in *Mills v. Electric Auto-Lite, Co.* n284 approved in principle the right of a litigant to be awarded attorneys' fees upon the establishment of a violation of the securities laws by the corporation or its officials. The subsequent decision by the Court in *Alyeska Pipeline Service v. Wilderness Society* appears to have limited *Mills* to cases in which award of attorneys' fees in a derivative or class action is to be paid by the parties who have benefited from the suit, the corporation or its security holders. n285

In *Boeing Co. v. Van Gemert*, n286 the Supreme Court affirmed the traditional doctrine that a litigant or lawyer who recovers a common fund for the benefit of persons other than himself or his client is entitled to a reasonable attorney's fee from the fund as a whole. In that case, the attorney's fees were assessed against the unclaimed portion of the fund, as well as against the moneys that had been obtained by security holders through proof of their individual claims. In *Smillie v. Park Chemical Co.*, n287 the Sixth Circuit affirmed the award of attorneys' fees absent an award of money damages to the shareholders, since the action was viewed as having conferred a "substantial benefit" on the corporation and its shareholders. Although the case would have justified a fee of \$24,000, the amount was reduced to the value of the benefit, \$10,000.

[iv] Injunctions Against Future Violations. Actions for injunctions under the proxy rules are often brought:

- during the course of the disputed activity (e.g., during a proxy fight), or
- to prevent implementation of, or rescind, corporate action authorized through a defective solicitation.

But often, particularly in Commission actions, it is found that the defendant has been guilty of an accomplished violation. The question then is whether the court will enjoin the defendant from future violations, *i.e.*, violations that may not even be a gleam in the defendant's eye at the moment, but that he or she may subsequently commit. The crucial question for determination by a court with respect to the grant of an injunction against future violations of the proxy provisions is the same as that applied in other areas of the federal securities laws, *i.e.*, whether there is a reasonable likelihood of future violations if the defendant is not enjoined. n288 The Commission or other moving party must establish the likelihood of future violations; n289 proof of past violations is insufficient by itself. n290 Thus, Chief Judge Kaufman of the Second Circuit stated in *SEC v. Management Dynamics*:

Whether the inference that defendant is likely to repeat the wrong is properly drawn, however, depends on the totality of circumstances, and the factors suggesting that the infraction might not have been an isolated occurrence are always relevant. n291

If the moving party meets its burden, the defendant must rebut with a showing that no reasonable likelihood of future violation exists. n292 Mere cessation of past proscribed conduct whether before or after commencement of suit will be insufficient of itself, n293 and, as stated in *SEC v. Management Dynamics*, will be but one factor that the court must evaluate. n294

[v] Collateral Estoppel Effect of Decree. The Supreme Court has held that a decree previously obtained by the Commission could be used offensively by a private party to foreclose the defendant from relitigating the issues decided in the prior injunction action. n295 As noted by the Court, the private party plaintiff could not have had his or her action consolidated with the Commission action over the Commission's objection. n296

[6] Damage Actions

As previously discussed, the Supreme Court's decision in *J.I. Case v. Borak* n297 confirmed the shareholder's private right of action, in both direct and derivative capacities, for violations of Section 14(a), including the right to such retrospective relief as damages. n298 However, an action for damages does not lie when the plaintiff sues as a disappointed proxy contestant rather than as an aggrieved shareholder. n299

The action for damages presents more issues, at least conceptually, than an action for an injunction. That the target of a hostile tender offer may have standing to sue for injunctive relief n300 does not necessarily mean that it has standing to sue for damages n301 under Section 14(a). The plaintiff must establish not only the existence of the violation, n302 but must also address the issues of causation, culpability and valuation. Similarly, in *Koppel v. 4987 Corp.*, n303 it was noted that courts have a strong preference for injunctive relief over damages under § 14(a) lest plaintiffs be encouraged to sit on their claims until after a shareholders' vote hoping to collect damages and attorneys' fees; but *Koppel* goes on to point out that the circumstances may make it impossible (a) to enjoin the prohibited actions, or (b) for a shareholder to recognize the import of a misrepresentation before the vote, thus making damages the only feasible remedy.

[a] Causation. A private party's right of action would be heavily burdened if the plaintiff were required to prove that a given corporate transaction would not have been authorized by the shareholders if a particular proxy violation had not been committed by the defendant. However, the Supreme Court in *Mills v. Electric Auto-Lite* n304 eliminated the need to prove a causal nexus between the material defect and its effect on the actual voting. Finding that such a requirement was inherently impractical, n305 the Court adopted the following test for causation:

Where there has been a finding of materiality, a shareholder has made a sufficient showing of causal relationship between the violation and the injury for which he seeks redress if, as here, he proves that the proxy solicitation itself, rather than the particular defect in the solicitation materials, was an essential link in the accomplishment of the transaction. n306

The Ninth Circuit has stated that *Mills* should be limited to its facts: transactions that require shareholder approval such as mergers and other fundamental corporate changes. n307 The District Court of Delaware ruled in *Ash v. Brunswick Corporation* that a plaintiff is required to show causation to obtain relief for a violation of Rule 14a-3 (i.e., a violation of a "line item" requirement, that does not of necessity require materiality), although not for a violation of Rule 14a-9. n308

The *Mills* decision specifically left open the question of whether there exists any causal relationship when management controls sufficient votes to ensure approval of the transaction without soliciting proxies from the minority shareholders. That question was resolved by *Virginia Bankshares, Inc. v. Sandberg*, n309 in which the Supreme Court, in a decision written by Justice Souter, ruled that minority shareholders whose votes were not needed to authorize a merger failed to show that an allegedly false proxy statement caused them damages compensable under Section 14(a) of the Securities Exchange Act of 1934. Mr. Justice Souter also held separately that knowingly false statements purporting to explain directors' reasons for recommending certain corporate actions may be actionable under Section 14(a), even though the statements are conclusory in form.

The litigation arose out of a May 1987 merger involving First American Bank of Virginia and Virginia Bankshares. Subsequent to the merger, Sandberg brought a suit in the U.S. District Court for Eastern Virginia alleging, among other things, that the two banks and the individual directors violated Section 14(a) by issuing a misleading proxy statement. Sandberg succeeded on her claims at the district court and Fourth Circuit levels. The Supreme Court reversed, concluding that the minority shareholders failed to show causation of damages compensable under Section 14(a) because their votes were not required by state law or by corporate by-law to authorize the merger. Virginia Bankshares owned 85 percent of First American's stock prior to the merger and approximately 2,000 minority shareholders owned the remaining 15 percent.

Justices Kennedy, Marshall, Blackmun and Stevens dissented from the causation portion of Souter's opinion. Stevens and Marshall argued that shareholders should be able to sue under Section 14 whenever materially false and misleading statements are made in proxy statements. The fact that the solicitation of proxies is not required by state law or by the corporation's by-laws does not authorize corporate officers to avoid Section 14's provisions. According to Justice Kennedy, causation is established where the solicitation of proxies is an essential link in completing the transaction, even if the minority lacks sufficient votes to defeat a proposal of management. He noted with approval Sandberg's argument that, had all the material facts been disclosed, the merger proposal would likely have been withdrawn or revised. The stated objective of the controlling shareholder was to have a "friendly" transaction, with a price believed to be "so high, that any reasonable shareholder will accept it." Under the ruling by the majority, however, all such considerations are now irrelevant to a § 14(a) cause of action.

Subsequently, the Northern District of New York in *Wilson v. Great American Industries* n310 held that minority shareholders in a similar situation may have been deprived of their appraisal rights. The court found that *Virginia Bankshares* "expressly left open the question whether shareholders who may have forfeited state law rights in approving a corporate transaction might still have a cause of action under Section 14(a)." Consequently, the court determined that the Supreme Court's decision did not clearly dictate that the plaintiffs in the instant case had no cause of action and therefore did not warrant overturning the lower court's previous decisions.

Following the *Virginia Bankshares* decision, the plaintiffs in *Booth v. Connelly Containers* n311 withdrew their Section 14(a) claim on similar facts and attempted to rely on Section 10(b), claiming defendants deliberately understated CCI's earnings and stock value. The court granted summary judgment to defendants, holding in reliance on *Virginia Bankshares* that plaintiffs failed to show causation since their votes were not needed for the merger.

Similarly, *In re Digital Island Securities Litigation* n312 involved a claim that defendants defrauded the shareholders of Digital Island, the target company, into approving the sale of the company to Cable & Wireless for less than fair value. Cable and Wireless had made a tender offer for Digital Island's shares. After acquiring 80% of the outstanding shares, Cable and Wireless solicited proxies for the approval of a merger with Digital Island in order to cash out the remaining 20%. The plaintiffs alleged that the proxy statement was materially misleading in failing to reference two important contracts that had been entered into by Digital Island prior to the tender offer, and had failed to adequately disclose the terms of employment offers made by Cable & Wireless to Digital Island executives. The plaintiffs claimed that the misleading statements deprived them of the opportunity to seek state appraisal remedies. The court granted a motion to dismiss for failure to state a claim, stating that "to prevail on a claim under Section 14(a), the plaintiffs must demonstrate, among other things, 'that the proxy solicitation itself ... was an essential link in the accomplishment of the transaction.'" n313 In fact the court went on to state "clearly, the proxy statement was not an 'essential link' in effecting the merger, and the plaintiff's Section 14(a) [claim] must fail as a matter of law."

In *Fink v. Weill*, n314 the complaint alleged that the failure of the proxy statement to include a discussion of a series of risky and fraudulent transactions which the company had engaged in with companies that subsequently experienced severe financial difficulties made the proxy statement false and misleading in connection with the election of directors because the directors had caused injury to the bank by allowing it to engage in such transactions. The District Court

dismissed the proxy violation claims, stating that the wrongs complained of were from "improper governance and injury resulting from undisclosed transactions rather than from any particular action taken by shareholders on the basis of the proxy statements." n315

In *In re J.P. Morgan Chase & Co. Shareholder Litigation*, n316 plaintiffs commenced a class action alleging disclosure violations in a merger proxy statement. In the proposed 2004 merger of Bank One with and into J.P. Morgan Chase & Co., shortly before the closing, the New York Times reported that James Dimon, Bank One's CEO, had proposed to do the deal for no premium if he could become the Chief Executive immediately. The merger agreement as ultimately signed provided that Morgan's CEO was to continue as the CEO of the combined enterprise for two years, after which Dimon would become the CEO. The gist of the complaint was that the proxy statement never revealed Dimon's proposal. The stockholder vote was therefore uninformed, and Morgan overpaid for Bank One, causing damages of \$7,000,000,000 to Morgan shareholders. The Delaware Supreme Court, en banc, affirmed the lower court's dismissal of the complaint, holding that the proper remedy was a derivative action for waste, and that a stockholder class cannot rely on a disclosure claim to obtain what essentially are derivative damages. The Court denied plaintiff's request for nominal damages on the basis that there was no cognizant injury to "economic" or "voting" interests. The Court noted that the plaintiffs failed to seek an injunction prior to the closing of the merger which might have led to an order requiring Morgan to amend the proxy statement and re-solicit the stockholders' votes.

[b] Culpability. Before liability attaches, a plaintiff must prove the defendant's culpability for his or her acts. Under the proxy rules, it appears to be firmly established that:

[A]n individual who participates in a solicitation which utilizes materially false or misleading statements is liable if he knew or should have known that the statements were false or misleading. n317

The first case to extensively discuss culpability in a proxy situation was *Gould v. American-Hawaiian Steamship Co.* n318 At issue in that case was whether nonmanagement outside directors n319 should be held liable for material misstatements in proxy statements. The court rejected strict liability as imposing too harsh a standard. n320 The court also refused to draw an analogy to Sections 10(b) and 18 of the Exchange Act, believing scienter would impair a plaintiff's ability to enforce the statutory purposes of Section 14(a) to foster full fair disclosure. n321 The *Gould* court reasoned that since a director as a fiduciary must exercise responsibility n322 to examine proxy statements with reasonable care or due diligence and correct facts that may be misleading or erroneous, negligence would be the more appropriate standard. n323

However, the Court in *Virginia Bankshares, Inc. v. Sandberg* specifically reserved the question whether scienter was necessary for liability generally under Section 14(a). n324

[c] Types and Measures of Damages. The monetary recovery for injury suffered by a shareholder as a result of violations of the proxy rules is limited by Section 28(a) of the Exchange Act as follows:

[N]o person permitted to maintain a suit for damages under the provisions of this title [the Exchange Act] shall recover, through satisfaction of judgment in one or more actions, a total amount in excess of his *actual damages* on account of the act complained of. [Emphasis added.]

Section 28(a) precludes an award of punitive or exemplary damages. n325 In trying to refine the meaning of the term "actual damages," the Supreme Court in *Mills* delineated certain guidelines for granting postconsummation monetary relief:

Monetary relief will, of course, also be a possibility. Where the defect in the proxy solicitation relates to the specific terms of the merger, the district court might appropriately order an accounting to ensure that the shareholders receive the value that was represented as coming to them. On the other hand, where, as here, the misleading aspect of the solicitation did not relate to terms of the merger, monetary

relief might be afforded to the shareholders only if the merger resulted in a reduction of the earnings or earnings potential of their holdings. *In short, damages should be recoverable only to the extent that they can be shown.* If commingling of the assets and operations of the merged companies makes it impossible to establish direct injury from the merger, relief might be predicated on a determination of the fairness of the terms of the merger at the time it was approved. These questions, of course, are for decision in the first instance by the District Court on remand, and our singling out of some of the possibilities is not intended to exclude others. n326

However, the lower courts have not followed these standards with any precision. n327

We read all this as commanding the lower courts to do their best to achieve fair compensation for injured plaintiffs without being too draconian on defendants, at least in a situation where the inadequacy of a proxy statement may lie more in a failure of articulation than in an outright desire to deceive. n328

Since Section 28(a) speaks in terms of "actual damages," the dilemma of the court is not determining whether the defects are "related" or "unrelated" n329 to the transaction in question, but awarding an amount not in excess of the actual loss suffered by the party. n330 In the usual case, courts award as damages amounts representing a diminution in the investment occurring as a result of the defect ("out-of-pocket loss") n331 or they may award a "restitutional measure of damages." n332 In addition to the "out-of-pocket loss," a plaintiff may also recover an amount equal to the loss of a potential profit or other benefit, n333 unless this loss is wholly speculative. n334 Although some courts disagree, the limit is reached when the damages awarded transcend those that can be actually shown, or what the transaction caused the plaintiffs to actually lose. n335

In *Gould v. American-Hawaiian Steamship Co.*, n336 although the defect in the proxy material would not have affected the terms of the merger, plaintiff was held to be entitled to recover damages based on the premium he would have received in the exchange of shares had full disclosure been made. Similarly, in *Gerstle v. Gamble-Skogmo, Inc.*, n337 plaintiff received damages to the extent of the difference in value of the assets of the merged corporation and the value of the preferred stock that the shareholders of the merged company received in the merger. The value of the assets was calculated on the basis of their market value, rather than their balance sheet value, which was severely understated.

[7] Proxy Solicitations and Rule 10b-5

An action cannot be maintained under Section 14(a) if the security in respect of which a proxy is solicited is not registered under Section 12, since the former Section explicitly applies only to such registered securities. A Commission action under Exchange Act Section 21(d), however, is not foreclosed in the case of a merger or like transaction, since the consequent exchange of securities (at least for the shareholders of the "disappearing" corporation) involves the purchase or sale of a security within the meaning of *Rule 10b-5*. n338 This reasoning would also seem to dictate the same result in a private action: the consummation of a merger, consolidation or sale of assets involves the surrender of the disappearing or selling corporation's shares for either a different security or for cash. n339

To proceed under *Rule 10b-5*, the plaintiff must be prepared to plead and prove intentional "manipulation" or "deception," n340 in addition to meeting the "standing" requirement. n341

The Supreme Court has reserved for future decision the question of whether scienter is required in order to sustain a private action under Section 14(a). n342 The cause of action must not rest on asserted mere "mismanagement" or similar grounds traditionally within the province of state law, but must involve failure to disclose a material fact, or false or misleading statements of material facts. n343 *Rule 10b-5* has in fact provided an alternative basis in several cases, n344 and has been the sole grounds in others. n345

The Ninth Circuit in *Knollenberg v. Harmonic, Inc.*, n346 has taken the position that scienter is not required in an action

based on a violation of Securities Exchange Act § 14(a), on the ground that § 14(a) does not contain the reference to "a manipulative device or contrivance" which appears in § 10(b) of that Act.

FOOTNOTES:

(n1)Footnote 1. *See, e.g.*, Section 15(b)(4) of the Exchange Act of 1934, reprinted in the Primary Law sourcebook, Volume B, Section F. 15 U.S.C. § 78o(b)(4); Sections 11(g), 12(g) of the Public Utility Holding Company Act, 15 U.S.C. §§ 79k(g), 79 l(e); Section 20(a) of the Investment Company Act of 1940, 15 U.S.C. § 80a-20(a); Section 203(e)(4), (5) of the Investment Advisers Act of 1940, 15 U.S.C. § 80b-3(e)(4)(5).

Administrative proceedings against brokers, dealers and associated persons are discussed in § 3.03[7] *supra*.

Under the Insider Trading Sanctions Act of 1984, Pub. L. No. 98-376, 98 Stat. 1264 (1984), the Commission was given authority under Section 15(c)(4) of the Exchange Act to bring administrative proceedings against persons who violate Section 14 of the Exchange Act.

(n2)Footnote 2. Suspension of trading is discussed in § 4.01[7] *supra*.

(n3)Footnote 3. *See, e.g.*, *Gerstle v. Gamble-Skogmo, Inc.*, 478 F.2d 1281 (2d Cir. 1973) , *aff'g and modifying* 348 F. Supp. 979 (E.D.N.Y. 1973) . Prior district court opinions are reported in 332 F. Supp. 644 (E.D.N.Y. 1971) ; 298 F. Supp. 66 (E.D.N.Y. 1969) . Both the court of appeals and the district court characterized setting the consummated merger aside as "impossible." 478 F.2d at 1289 (per Friendly, J.); 298 F. Supp. at 100 (per Bartels, J.).

(n4)Footnote 4. "No action" letters are expressions of opinions by the Commission's staff with request to proposed--not consummated--transactions, in response to private requests. Their name derives from the usual form of the letter, *i.e.*, that, based on the facts submitted, the staff will not recommend to the Commission that enforcement action be taken.

"No action" letters are not binding on the Commission but do represent the views of those who work continuously with the federal securities laws.

The positions expressed in response to requests for "no action" letters are not binding on the requesting parties. If a "no action" request has elicited staff opposition to the proposed transaction, the requesting party may proceed in the face of the risk that the staff will recommend that the Commission authorize enforcement proceedings, *e.g.*, a Commission action for an injunction under Section 21(d) of the Exchange Act, 15 U.S.C. § 78u(d).

There are certain questions on which the staff will not respond to "no action" letter requests, including such matters as whether a particular person is an "affiliate" of another person.

(n5)Footnote 5. *See, e.g.*, *SEC v. Transamerica Corp.*, 163 F.2d 511 (3d Cir. 1947) , *cert. denied*, 332 U.S. 847 (1948) .

The procedures for "no action" requests in the context of shareholder proposals are discussed in § 7.07 *supra*.

(n6)Footnote 6. *17 C.F.R. § 202.2. See also 17 C.F.R. § 202.1(d):*

While opinions expressed by members of the staff do not constitute an official expression of the Commission's views, they represent the views of persons who are continuously working with the provisions of the statute involved. And any statement by the director, associate director, assistant director, chief accountant, chief counsel, or chief financial analyst of a division can be relied upon as representing the views of that division... [t]he staff may present such a question to the Commission 'upon request or on its own motion.'

(n7)Footnote 7. *17 C.F.R. § 202.1(d)*. The staff may present such a question to the Commission "upon request or on its own motion." *Id.*

(n8)Footnote 8. *See discussion in § 7.04[3] supra, with respect to the filing and comment procedures.*

(n9)Footnote 9. *17 C.F.R. § 202.3(a):*

[T]he usual practice is to bring the deficiency to the attention of the person who filed the document by letter from the Assistant Director assigned supervision over the particular filing, and to afford a reasonable opportunity to discuss the matter and make the necessary corrections. This informal procedure is not generally employed when the deficiencies appear to stem from careless disregard of the statutes and rules or a deliberate attempt to conceal or mislead or where the Commission deems formal proceedings necessary in the public interest.

(n10)Footnote 10. Section 8(d) of the Securities Act of 1933 ("Securities Act"), *15 U.S.C. § 77h(d)* authorizes the Commission to issue a "stop order suspending the effectiveness of the registration statement" after notice and opportunity for hearing if the registration statement appears to contain any misleading or untrue statement of a material fact or omits a material fact. The "stop order" is lifted when the registration statement has been amended in accordance with the stop order.

As stated in the text, the Securities Act stop order proceeding is not applicable to materials filed under Section 14(a) or 14(c) of the Exchange Act, *15 U.S.C. § 78n(a), (c)*. In the case of a submission of a proposed merger to a vote of shareholders, however, it may be necessary to register the securities being offered under the Securities Act pursuant to Rule 145 under that Act, *17 C.F.R. § 230.145*. The applicable Securities Act registration form may require the incorporation of information required by the Regulation 14A or Regulation 14C proxy and information statement requirements, in which case such material will be subject to the Securities Act. *See Securities Act Form S-4 and Rule 14a-6(k), 17 C.F.R. § 240.14a-6(k)*.

(n11)Footnote 11. *15 U.S.C. § 78u(a)*. *See, e.g., Kukatush Mining Corp. v. SEC, 198 F. Supp. 508 (D.D.C. 1961), aff'd, 309 F.2d 647 (D.C. Cir. 1962) .*

SEC informal and formal investigations are discussed in § 9.02 *infra*. *See generally 17 C.F.R. § 202.5.*

(n12)Footnote 12. *15 U.S.C. § 78 l(k)*. *See, e.g., VTR, Inc., Sec. Exch. Act Rel. Nos. 34-7392 (1965), 34-7894 (1966)*. Section 12(k) is also discussed in § 4.01[6] *supra*.

(n13)Footnote 13. *15 U.S.C. § 78 l(j)*.

(n14)Footnote 14. The Commission may not "roll over" trading suspension orders for the same single set of circumstances. The previous Commission practice of entering consecutive 10-day suspensions based upon the same allegedly improper activity was struck down in *SEC v. Sloan, 436 U.S. 103, 98 S. Ct. 1702, 56 L. Ed. 2d 148 (1978) .*

See § 4.01[6] *supra*.

(n15)Footnote 15. The Commission's powers of suspension and revocation with respect to listed securities are discussed in § 4.01[7] *supra*.

(n16)Footnote 16. 17 C.F.R. § 201.102(e).

(n17)Footnote 17. Rule 2(e) proceedings are discussed in § 9.02[2][a][iii] *infra*.

(n18)Footnote 18. 15 U.S.C. § 78y(a).

(n23)Footnote 23. Section 21(a) of the Exchange Act, 15 U.S.C. § 78u(a).

(n24)Footnote 24. Section 21(e) of the Exchange Act, 15 U.S.C. § 78u(e).

(n25)Footnote 25. *Leighton v. SEC*, 221 F.2d 91 (D.C. Cir. 1955) (per curiam), *cert. denied*, 350 U.S. 825 (1955) (Commission refusal to investigate under Securities Act not reviewable); *Crooker v. SEC*, 161 F.2d 944 (1st Cir. 1947) . *Crooker* held that the court had no power to direct the Commission to institute a "stop order" proceeding under Securities Act Section 8(d).

The Administrative Procedure Act also excepts from judicial review "agency action... committed to agency discretion by law." 5 U.S.C. § 701(a)(2).

See also *SEC v. Howatt*, 525 F.2d 226 (1st Cir. 1975) ; *SEC v. Brigadoon Scotch Distrib. Co.*, 480 F.2d 1047 (2d Cir. 1973) , *cert. denied*, 415 U.S. 915 (1974) ; *Leighton v. SEC*, 221 F.2d 91 (D.C. Cir. 1955) ; *General Motors v. Federal Energy Regulatory Comm'n*, 613 F.2d 939, 944 (D.C. Cir. 1979) ("If an agency considers all the relevant factors so that a court can satisfy itself that the agency has actually exercised its discretion, an agency's decision to refrain from investigation is unreviewable. 'If an agency simply ignores issues whose relevance to the public interest is obvious, the agency's decision may be reversed.' " (citations omitted)).

(n26)Footnote 26. The forms of relief are discussed in § 7.09[5][i] *infra*.

(n27)Footnote 27. 15 U.S.C. § 78cc(b).

(n28)Footnote 28. See, e.g., *Myzel v. Fields*, 386 F.2d 718 (8th Cir. 1967) , *cert. denied*, 390 U.S. 951 (1968) . The question concerned the ability of a jury to award rescission and rescissional damages in a case in which the plaintiffs were defrauded *sellers* in a *Rule 10b-5* case. They sought damages reflecting the increase in value after the sales of their shares to the defendants. The court stated: "Here, neither the jury nor the court was required to rescind the agreement, Section 29(b) of the statute itself declares the sale void, once there is found a violation of *Rule 10b-5*." *Id.* at 742 . Since such a contract is void as a matter of law, the court said, the plaintiff is entitled to restitution of what he sold, or, the defendants having disposed of the stock in question, to an equivalent money judgment, which made the action one at law for money damages.

The context in which the court was deciding the question must, of course, be kept in mind. Neither the reasoning nor

the result in *Myzel* is altered by the rule that Section 29(b) merely gives the injured party the *option* to rescind. It seems clear that profits subsequently made by a purchaser who obtains securities by fraud may be awarded to the plaintiff as damages. See *Janigan v. Taylor*, 344 F.2d 781 (1st Cir. 1965) .

In any event, those questions appear to have been resolved by *Mills v. Electric Auto-Lite*, 396 U.S. 375, 90 S. Ct. 616, 24 L. Ed. 2d 593 (1970) (discussed in text accompanying ns. 29-31 *infra*).

(n29)Footnote 29. *Deckert v. Independence Shares Corp.*, 311 U.S. 282, 61 S. Ct. 229, 85 L. Ed. 189 (1940) . Allegedly defrauded purchasers sought various forms of equitable relief, including an injunction against a third party and appointment of a receiver for the vendor. The trial court initially granted an injunction that prohibited the third party from transferring certain assets of the vendor which it held pending resolution of the litigation, and reserved decision on the appointment of a receiver. The respondents' motions sought to dismiss the bill because it failed to state any cause of action and because the district court lacked jurisdiction. The Court held that these motions were correctly denied: "We think the Securities Act does not restrict purchasers seeking relief under its provisions to a money judgment. On the contrary, the Act as a whole indicates an intention to establish a statutory right which the litigant may enforce in designated courts by such legal and equitable actions or procedures as would normally be available to him."

The landmark decision under the proxy provisions is *J.I. Case v. Borak*, 377 U.S. 426, 84 S. Ct. 1555, 12 L. Ed. 2d 423 (1964) , which determined that both derivative and direct shareholder rights of action exist under the provisions of Section 14(a) notwithstanding Congressional silence on the question. The Court found that "federal courts have the power to grant all necessary remedial relief... ." 377 U.S. at 435, 84 S. Ct. at 1561, 12 L. Ed. 2d at 429 .

(n30)Footnote 30. 396 U.S. 375, 90 S. Ct. 616, 24 L. Ed. 2d 593 (1970) (expanding upon the nature of the remedial relief).

(n31)Footnote 31. 396 U.S. at 388, 90 S. Ct. at 623, 24 L. Ed. 2d at 604 .

(n32)Footnote 32. *Id.*

See *Yamamoto v. Omiya*, 564 F.2d 1319 (9th Cir. 1977) . The Ninth Circuit (Hufstедler, J., dissenting) affirmed the action of the trial court, before trial, in striking plaintiff's prayer for rescission of a sale by the issuer of certain real property allegedly accomplished through defective proxy materials. The majority framed the inquiry on the propriety of the trial court's action as follows: "May a shareholder, either individually or as a representative of the class, obtain a rescission of proxies and avoidance of the sales contract as a matter of right, merely by showing that the proxy materials are materially misleading? To put the question another way, is the sales contract voidable at the instance of a shareholder?" *Id.* at 1323 .

It is suggested, however, that the issue is broader, since the opinion is clear that the plaintiff was also proceeding in a *derivative* capacity, *i.e.*, in the right of the corporation itself. If the issue is whether the corporation may rescind the transaction under Section 29(b)--*i.e.*, as the "innocent party" at whose option the contract is "voidable"--the courts' problems become much more perplexing. And *Mills* is fairly clear on the "right to rescind" by an "innocent party." 396 U.S. at 387-88, 90 S. Ct. at 623, 24 L. Ed. 2d at 603-04 . To cast the issue solely in terms of the right of "a shareholder," as done in *Yamamoto*, is evasive.

In addition, it seems overdone to compare a merger, on the one hand, with the sale of a "parcel of land," on the other. *Yamamoto*, 564 F.2d at 1324 . For example, in the case of a merger, at least one of the corporate entities no longer exists, the shareholders of the merged company no longer hold its shares, the properties, personnel and business relations of the constituent corporations have been "scrambled," and the securities issued in the merger have been traded in the public markets.

Cf. *Lewis v. Byrnes*, 538 F. Supp. 1221, 1226 (S.D.N.Y. 1982) , distinguishing *Yamamoto*: "[Defendant] Korman may

be correct that it is simply too late in the day to declare the Hotel/Casino Acquisitions null and void. It is undoubtedly correct, however, that it is simply too early in the day to make this determination."

(n33)Footnote 33. *See, e.g., Beling v. American Tobacco Co.*, 72 N.J. Eq. 32, 65 A. 725 (1907) . The complainant attacked the legality of a transaction whereby three New Jersey corporations were "merged" into a new company (*i.e.*, the process now known as a "consolidation"). Vice Chancellor Pitney brushed the legalities aside forcefully in view of the immensity of the task that the bill's prayer asked him to assume, *i.e.* unraveling a combination of three companies years after the closing of the transaction. Characterizing the task as "now well-nigh impossible," he refused the relief on that ground, and on the ground of laches.

(n34)Footnote 34. *Mills*, 396 U.S. at 388, 90 S. Ct. at 623, 24 L. Ed. 2d at 604 .

There are precedents under the antitrust laws for divestiture, but very different considerations guide an antitrust court, which must eliminate the *continuing effects* of the violation on the *relevant* market. *See* 1 von Kalinowski, *Antitrust Laws and Trade Regulation*, Desk Edition § 2.04[4][d].

(n35)Footnote 35. *See, e.g., Gerstle v. Gamble-Skogmo, Inc.*, 478 F.2d 1281 (2d Cir. 1973) , *aff'd and modifying* 348 F. Supp. 979 (E.D.N.Y. 1973) . Prior district court opinions are reported in 332 F. Supp. 644 (E.D.N.Y. 1971) ; 298 F. Supp. 66 (E.D.N.Y. 1969) .

(n36)Footnote 36. In *Gerstle*, the district court determined in light of events transpiring after a merger that the proxy statement was materially defective in not disclosing the presolicitation intent of the management to sell many of the merged company's assets after the merger became effective. The shareholders were denied the opportunity to realize substantial profits by retaining their company as a separate entity and causing it to sell the assets. The acquiring company controlled the seller prior to the solicitation. The district court found that the terms of the merger agreement, which were based upon market values of the shares, were unfair. Since the liquidation value of the seller exceeded the value reflected in the market value of its shares, the merger ratio should have been based upon the liquidation values.

The defects alleged and proven are familiar. *See Speed v. Transamerica Corp.*, 99 F. Supp. 808 (D. Del. 1951) . (*Rule 10b-5* case based upon failure of insider purchaser to disclose its intent to "capture" undisclosed increase in value of tobacco inventory.) The court of appeals in *Gerstle* did not rule on the fairness of the merger ratio. The latter opinion was concerned with the failure of the proxy material to disclose the intent to sell assets and awarded damages calculated on the basis of the difference in value between: (1) the preferred stock of the acquiring company distributed to the acquired company's shareholders, and (2) the market value of the assets of the acquired company.

Both the district court, 478 F.2d at 1289 , and the court of appeals, 298 F. Supp. at 100 , in *Gerstle* said that it was "impossible" to set the merger aside.

See § 7.09[5][j][ii][B] *infra*.

(n47)Footnote 47. 396 U.S. at 386, 90 S. Ct. at 622, 24 L. Ed. 2d at 603 .

(n48)Footnote 48. *See* § 7.09[4][a] *supra*.

(n49)Footnote 49. Loss, *Fundamentals of Securities Regulation* 493 (Little, Brown 2d ed. 1988).

(n50)Footnote 50. 360 F.2d 692 (2d Cir. 1966) . This case permitted the issuer's management to challenge insurgents at an early stage in their solicitation, at the time that the insurgents sought access to the shareholders list.

More recent cases have also recognized that preliminary actions may constitute "solicitations" if they are steps in a process that will result in the actual solicitations of proxies. Communication through the media and the financial community of a proposal to "disaggregate" the business of the issuer may be a "solicitation." *Trans World Corp. v. Odyssey Partners*, 561 F. Supp. 1315 (S.D.N.Y. 1983) . *But see Radol v. Thomas*, 534 F. Supp. 1302 (S.D. Ohio 1982) (materials disseminated in "two-tier" tender offer and merger arrangement, at the time of tender offer, were not proxy solicitation material.) *But see Citizens First Bancorp, Inc. v. Harreld*, 559 F. Supp. 867 (W.D. Ky. 1982) .

A Rule 14e-2 statement may also be subject to the proxy rules in a situation in which the management will solicit proxies in respect of a competitive proposal. *Data Probe Acquisition Corp. v. Datatab, Inc.*, 722 F.2d 1 (2d Cir. 1983) , *rev'g*, 568 F. Supp. 1538 (S.D.N.Y. 1983) , *cert. denied*, 465 U.S. 1052 (1984) .

Solicitation of proxies is discussed in § 7.02 *supra*.

(n51)Footnote 51. *Howard v. Furst*, 238 F.2d 790 (2d Cir. 1956) , *cert. denied*, 353 U.S. 937 (1957) .

(n52)Footnote 52. *Cf. Drachman v. Harvey*, 453 F.2d 722 (2d Cir. 1971) . Plaintiffs, whose shares were held in "street name," had standing to sue derivatively under *Rule 10b-5*.

(n53)Footnote 53. A warrant or option holder does not have standing under Section 14(a), *Werfel v. Kramarsky*,

61 F.R.D. 674 (S.D.N.Y. 1974) ; *Wulc v. Gulf & Western Indus., Inc.*, 400 F. Supp. 99 (E.D. Pa. 1975) .

The plaintiff must have owned his shares at the time of the solicitation, *Smillie v. Park Chemical Co.*, 466 F. Supp. 572 (E.D. Mich. 1979) , *aff'd*, 710 F.2d 271 (6th Cir. 1983) . *See also* *Mutual Shares Corp. v. Genesco*, 384 F.2d 540 (2d Cir. 1967) . *But see* *Zell v. Intercapital Income Sec. Inc.*, 459 F. Supp. 819 (N.D. Cal. 1978) , *rev'd*, 675 F.2d 1041 (9th Cir. 1982) (class representative had standing as a shareholder although he held his shares only during the second of two allegedly fraudulent solicitations, where the fraud was allegedly present in both solicitations and the facts he would develop would apply to losses suffered by all investors).

(n54)Footnote 54. *Union P. R. Co. v. Chicago & N.W. Ry. Co.*, 226 F. Supp. 400 (N.D. Ill. 1964) .

(n55)Footnote 55. *Rosenfeld v. Schwitzer Corp.*, 251 F. Supp. 758 (S.D.N.Y. 1966) , *appeal dismissed*, 268 F.2d 192 (2d Cir. 1959) ; *see* *Phillips v. Tobin*, 403 F. Supp. 89 (S.D.N.Y. 1975) .

Since under Rule 14a-7(c) an issuer need not furnish a shareholder's list to a shareholder solicitor, the shareholder has no standing to sue under the proxy rules to gain access to the list. *See* *Gaudiosi v. Franklin*, 166 F. Supp. 353 (E.D. Pa. 1958) , *aff'd on other grounds sub nom. Gaudiosi v. Mellon*, 269 F.2d 873 (3d Cir.) , *cert. denied*, 361 U.S. 902 (1959) ; *see also* § 7.08[2] *supra*. Hence, the shareholder must proceed under state law. *See*, *Week, Walder & Co. v. Evans*, 300 F. Supp. 171 (D. Colo. 1969) . *See also* *Studebaker Corp. v. Gittlin*, 360 F.2d 692 (2d Cir. 1966) (although shareholders had succeeded in obtaining list through state court action, the action was enjoined, as the first step in a solicitation, due to the shareholder's failure to comply with the proxy rules).

In *Duplan Corp. v. Iroquois Indus., Inc.*, [1967-1969 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,318 (W.D.N.Y. Oct. 4, 1968), a disgruntled merger candidate who owned no stock was not permitted to maintain an action for violation of the proxy rules.

In *Union P. R. Co. v. Chicago & N.W. Ry. Co.*, 226 F. Supp. 400 (N.D. Ill. 1964) , the court recognized (as an alternative to its standing as a shareholder) plaintiff's standing as a party to a provisional contract of merger which was to be approved or disapproved at a shareholder's meeting.

In *Reserve Management v. Anchor Daily Income Fund, Inc.*, 459 F. Supp. 597 (S.D.N.Y. 1978) , an investment advisor firm had no standing to bring suit against directors of a mutual fund for nondisclosure in proxy solicitation of the advisor's proposal for assuming management of the fund since the advisor was not a shareholder. In addition, the advisor could not claim standing as an "offeror" under Section 14(e) since its proposals to the directors were not tender offers within the purview of the securities law.

(n56)Footnote 56. *See* *Royal Business Group Inc. v. Realist Inc.*, 933 F.2d 1056 (1st Cir. 1991) , discussed in n.242 *infra*.

(n57)Footnote 57. 781 F. Supp. 292 (S.D.N.Y. 1992) .

(n58)Footnote 58. 410 F. Supp. 2d 330 (S.D.N.Y. 2006) .

(n59)Footnote 59. 381 F. Supp. 2d 192 (S.D.N.Y. 2004) .

(n60)Footnote 60. *Dann v. Studebaker-Packard Corp.*, 288 F.2d 201, 209 (6th Cir. 1961) ; *Gerstle v. Gamble-Skogmo, Inc.*, 298 F. Supp. 66, 96 (S.D.N.Y. 1972) , *modified on other grounds*, 478 F.2d 1281 (2d Cir. 1973) ; *see also* *Greater Iowa Corp. v. McLendon*, 378 F.2d 783, 794 (8th Cir. 1967) ; *Electronic Specialty Co. v. International Controls Corp.*, 295 F. Supp. 1063, 1071 (S.D.N.Y. 1966) , *modified on other grounds*, 409 F.2d 937 (2d Cir. 1969) .

See *Hershfang v. Knotter*, 562 F. Supp. 393 (E.D. Va. 1983), *aff'd*, 725 F.2d 675 (1984) (plaintiff who did not rely on proxy statement had standing under Section 14(a) since the alleged omissions may have caused him damage by misleading other shareholders.) See also *Fradkin v. Ernst*, 98 F.R.D. 478 (N.D. Ohio 1983) (plaintiff had standing as class action representative even though he had not read the proxy statement and had failed to vote against the proposal).

(n61)Footnote 61. *Gaines v. Haughton*, 645 F.2d 761 (9th Cir. 1981), *cert. denied*, 454 U.S. 1145 (1982); *Klaus v. Hi-Shear Corp.*, 528 F.2d 225 (9th Cir. 1975). *Gaines* cited in decisions such as *Piper v. Chris-Craft Indus., Inc.*, 430 U.S. 1, 97 S. Ct. 926, 51 L. Ed. 2d 124 (1977) (defeated tender offeror has no standing under Section 14(e) in an action for damages), and *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 95 S. Ct. 1917, 44 L. Ed. 2d 539 (1975) (only actual purchaser or seller has standing for damages under *Rule 10b-5*). The *Piper* opinion in particular is most emphatic on the point that it was concerned only with the question whether a defeated tender offeror had standing to sue for damages. On the other hand, applications for *equitable* relief involve other considerations; as the Supreme Court noted in *Piper*:

[I]n corporate control contests the stage of preliminary injunctive relief, rather than post-contest lawsuits, "is the time when relief can best be given." Furthermore, awarding damages to parties other than the protected class of shareholders has only a remote, if any, bearing upon implementing the congressional policy of protecting shareholders who must decide whether to tender or retain their stock.

430 U.S. at 42, 97 S. Ct. at 949, 51 L. Ed. 2d at 153 .

The Court specifically noted that it was *not* deciding the question whether "shareholder-offerees, the class protected by § 14(e), have an implied cause of action under § 14(e)" 430 U.S. at n.28. Similarly, *Blue Chip Stamps* held that persons who were not purchasers or sellers had no standing to recover damages under *Rule 10b-5*. The Supreme Court in *Blue Chip Stamps* acknowledged that the decision in *SEC v. National Sec., Inc.*, 393 U.S. 453, 89 S. Ct. 564, 21 L. Ed. 2d 668 (1969) "established that the purchaser-seller rule imposes no limitation on the standing of the S.E.C. to bring actions for injunctive relief under § 10(b) and *Rule 10b-5*." 421 U.S. at 751 n.14, 95 S. Ct. at 1933 n.14, 44 L. Ed. 2d at 558.

Thus it seems that *Piper* and *Blue Chip Stamps* are not persuasive authority in the context of a suit for injunctive relief, as opposed to an action for damages. See *Mobil Corp. v. Marathon Oil Co.*, 669 F.2d 366 (6th Cir. 1981); *Kahan v. Rosenstiel*, 424 F.2d 161 (3d Cir.) , *cert. denied*, 398 U.S. 950 (1970) (private party who is neither a purchaser nor seller but who seeks only injunctive relief, as opposed to money damages for an alleged 10b-5 violation, has standing to sue if he can establish a causal connection between the alleged violations and his injury).

Secondly, those cases are beside the point to the extent that they were concerned with the standing of parties not "of the class for whose *especial* benefit the statute was enacted" *Piper*, 430 U.S. at 37, 97 S. Ct. at 947, 51 L. Ed. 2d at 151 (quoting *Cort v. Ash*, 422 U.S. 66, 95 S. Ct. 2080, 45 L. Ed. 2d 26 (1975)). It is clear that the proxy and information provisions of the Exchange Act were enacted for the benefit of the shareholders of securities registered under Section 12 in the exercise of their corporate voting rights. If the plaintiff alleges that he or she was injured as a shareholder by fraudulent, deceptive or misleading proxy information statement materials in violation of Section 14(a) or (c), he or she would appear to have standing. Unlike the plaintiffs in *Piper* and *Blue Chip Stamps*, the shareholder plaintiff is clearly of the "class intended to be benefitted by Congress." And it seems obvious that *all* shareholders may be damaged by majority action accomplished on the basis of false or misleading information since the vote of the majority will bind all holders of the relevant class.

Moreover, it seems strange that the rule barring undeceived shareholders would prevent action by the most diligent and alert shareholders, leaving the initiative to be taken only by those who are in the worst position to do so, *i.e.*, the "deceived."

Jacobs v. Airlift Int'l, Inc., 440 F. Supp. 540 (S.D. Fla. 1977) followed the rule stated in *Klaus v. Hi-Shear Corp.*, 528 F.2d 225 (9th Cir. 1975) .

See *Leff v. CIP Corp.*, 540 F. Supp. 857 (S.D. Ohio 1982) (both tendering and non-tendering shareholders had standing to sue for violations of Section 14(a).

See *Shapiro v. Midwest Rubber Reclaiming Co.*, 626 F.2d 63 (8th Cir. 1980) , cert. denied, 449 U.S. 1079 (1981) (plaintiffs who had not exchanged their stock in response to allegedly unlawful exchange offer not eligible to represent persons who had tendered).

(n62)Footnote 62. *Tully v. Mott Supermarkets, Inc.*, 540 F.2d 187 (3d Cir. 1976) . In a Rule 10b-5 action, the court held that the *Kahan* exception to the "purchaser-seller" rule, 424 F.2d at 173 , was intended to provide only prophylactic relief, to enjoin deceptive practices that, if continued, would lead to purchases or sales resulting in Rule 10b-5 violations. The court found the exception to be inapplicable to the case before the court "involving a consummated illegal stock transaction." 540 F.2d at 195 .

(n63)Footnote 63. See *SEC v. Management Dynamics, Inc.*, 515 F.2d 801 (2d Cir. 1975) .

(n64)Footnote 64. *SEC v. General Refractories*, 400 F. Supp. 1248, 1254-55 (D.D.C. 1975) .

See also *SEC v. Harwyn Ind.*, 326 F. Supp. 943 (S.D.N.Y. 1971) ; *Securities & Exchange Com. v. Bennett & Co.*, 207 F. Supp. 919 (D.N.J. 1962) (a sufficient prima facie case.)

Requiring a "strong" prima facie case: *SEC v. Boren*, 283 F.2d 312 (2d Cir. 1960) ; *SEC v. Capital Growth*, 391 F. Supp. 593 (S.D.N.Y. 1974) ; *SEC v. Keller Indus. Inc.*, 342 F. Supp. 654 (S.D.N.Y. 1972) ; *SEC v. Globus Int'l Ltd.*, 320 F. Supp. 158 (S.D.N.Y. 1970) .

Some courts have required the same standards of the Commission for provisional relief as in a private action: *SEC v. Century Inv. Transfer Corp.*, [1971-1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,232 (S.D.N.Y. Oct. 5, 1971); *SEC v. Arco Indus.*, [1970-1971 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,921 (S.D.N.Y. Jan. 18, 1971), [1970-1971 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,973 (S.D.N.Y. Mar. 9, 1971); *SEC v. Conglomerates Inc.*, [1967-1969 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,293 (S.D.N.Y. Oct. 23, 1968). Cf. *SEC v. Frank*, 388 F.2d 486 (2d Cir. 1968) .

See 4 L. Loss & J. Seligman, *Securities Regulation* 2111-19 (Little, Brown 3d ed. 1990). Commission injunction actions under Section 21 of the Act are discussed in § 9.02[3] *infra*.

The kinds of proof that the Commission must present varies with the case, *i.e.*, whether there is a serious dispute concerning the facts requiring an evidentiary hearing rather than proceeding on the basis of affidavits and oral argument. See *SEC v. Frank*, 388 F.2d 486, 490-91 (2d Cir. 1968) ; *SEC v. Great American*, 407 F.2d 453 (2d Cir. 1968) , cert. denied, 395 U.S. 920 (1969) ; *SEC v. General Refractories*, 400 F. Supp. 1248 (D.D.C. 1975) .

See generally *Program of the Committee on Federal Regulation of Securities; S.E.C. Civil Injunction Actions*, 30 Bus. Law. 1301 (1975).

(n65)Footnote 65. *Rondeau v. Mosinee Paper Corp.*, 422 U.S. 49, 95 S. Ct. 2069, 45 L. Ed. 2d 12 (1975) . In an action under Section 13(d) of the Exchange Act, the Court read *Mills v. Electric Auto-Lite Co.*, 396 U.S. 375, 90 S. Ct. 616, 24 L. Ed. 2d 593 (1970) , which was concerned with an action under the proxy provisions, as supporting its conclusion that a court's determination concerning the relief to be granted should be made on the basis of "traditional principles." 422 U.S. at 64, 95 S. Ct. at 2079, 45 L. Ed. 2d at 24 .

In *Pantry Pride, Inc. v. Rooney*, 598 F. Supp. 891 (S.D.N.Y. 1984), the court denied the application of plaintiff-directors for injunction against certification of a possible victory by dissidents in a forthcoming proxy fight since the incumbents had not established irreparable harm. The court observed that should the dissidents prevail in the proxy contest under circumstances that violate the securities laws, the court would have the power to set aside the election. Further, if the dissidents won the proxy contest, and then attempted, on behalf of the corporation, to dismiss the action challenging their conduct of the proxy fight, the court could appoint a trustee to continue the action.

The SEC successfully argued in an *amicus* brief filed in *Roosevelt v. E.I. DuPont de Nemours & Co.*, 958 F.2d 416 (D.C. Cir. 1992), that a private right of action exists to enforce a minority shareholder's right to have a proposal included in management's proxy statement under Rule 14a-8, despite the issuance by the SEC's staff of a no-action letter upholding the defendant's right to exclude the shareholder proposal in question as involving a matter relating to the conduct of the defendant's ordinary business operations, *i.e.*, DuPont's timing of its planned phase-out of chlorofluorocarbons as damaging to the ozone layer. However, the court held on the merits that the proposal was properly excluded for the reasons stated.

(n66)Footnote 66. "[A] preliminary injunction should issue only upon a clear showing of either: (1) probable success on the merits and *possible* irreparable injury, or (2) sufficiently serious questions going to the merits to make them a fair ground for litigation *and* a balance of hardships tipping decidedly toward the party requesting the preliminary relief." *Sonesta Int'l Hotels Corp. v. Wellington Assoc.*, 483 F.2d 247, 250 (2d Cir. 1973).

See *Denison Mines Ltd., v. Fibreboard Corp.*, 388 F. Supp. 812 (D. Del. 1974); *Twentieth Century Fox Film Corp. v. Lewis*, 334 F. Supp. 1398 (S.D.N.Y. 1971); *Elgin Nat'l Indus., Inc. v. Chemetron Corp.*, 299 F. Supp. 367 (D. Del. 1969); *Sherman v. Posner*, 266 F. Supp. 871 (S.D.N.Y. 1966); *Kauder v. United Board & Carton Corp.*, 199 F. Supp. 420 (S.D.N.Y. 1961); *Mack v. Mishkin*, 172 F. Supp. 885 (S.D.N.Y. 1959).

See *Reserve Management v. Anchor Daily Income Fund*, 459 F. Supp. 597 (S.D.N.Y. 1978) (preliminary injunction denied); *Kass v. Arden-Mayfair, Inc.*, 431 F. Supp. 1037 (C.D. Cal. 1977) (preliminary injunction denied).

See also *FMC Corp. v. R.P. Scherer Corp.*, 545 F. Supp. 318 (D. Del. 1982), in which a preliminary injunction enjoining a shareholder meeting at which anti-takeover amendments to a target company's certificate of incorporation were to be voted on was denied since irreparable harm would not otherwise ensue, *i.e.*, if the proxy materials soliciting the vote were later found misleading,

(1) the tender-offeror could seek to have the vote voided and the amendments resubmitted for a second vote, and

(2) the target company's shareholders could seek damages if the tender-offeror withdrew its offer and the shareholders were thereby deprived of the opportunity to tender their shares at a premium.

(n67)Footnote 67. See, *e.g.*, *Denison Mines Ltd. v. Fibreboard Corp.*, 388 F. Supp. 812 (D. Del. 1974); *Studebaker Corp. v. Allied Prod. Corp.*, 256 F. Supp. 173 (W.D. Mich. 1966); *Union P. R. Co. v. Chicago & N.W. Ry. Co.*, 226 F. Supp. 400 (N.D. Ill. 1964); *Shvets v. Industrial Rayon Corp.*, 212 F. Supp. 308 (S.D.N.Y. 1960).

In *Denison Mines*, the court, after finding that the plaintiff had established the existence of a violation of Rule 14a-9, granted a preliminary injunction postponing the meeting and ordering a resolicitation. The court found that: "[w]here the transaction is a merger which contemplates integration of the two enterprises, as here, divestiture may well turn out to be an unfeasible remedy; it would at the least be a painful one." 388 F. Supp. at 828. See, *e.g.*, *Allis-Chalmers Mfg. Co. v. White Consol., Inc.*, 414 F.2d 506 (3d Cir. 1969). *Electronic Specialty Co. v. International Controls*, 409 F.2d 937 (2d Cir. 1969).

Accord *Union Pacific R.R. Co. v. Chicago & N.W. Ry. Co.*, 226 F. Supp. at 413 ; see *Mills v. Electric Auto-Lite*, 396 U.S. at 386, 90 S. Ct. at 622, 24 L. Ed. 2d at 603 .

In *Lessler v. Dominion Textile Ltd.*, 411 F. Supp. 40 (S.D.N.Y. 1975) , plaintiff sought a preliminary injunction to postpone the holding of a shareholder's meeting to approve a proposed merger. The court denied the injunction, finding no risk of irreparable injury. The adequacy and ease of the availability of the statutory appraisal rights, coupled with the fact that money damages would adequately compensate the plaintiff, convinced the court that no injunction should be issued.

(n68)Footnote 68. *Denison Mines*, 388 F. Supp. at 828 ; *Twentieth Century Fox Film Corp. v. Lewis*, 334 F. Supp. 1398 (S.D.N.Y. 1971) (preliminary injunction denied); *Elgin National Indus.*, 299 F. Supp. at 374 (preliminary injunction denied); *Studebaker Corp. v. Allied Prod. Corp.*, 256 F. Supp. 173, 189 (W.D. Mich. 1966) (preliminary injunction technically denied but, because proxy materials were misleading, court ordered production of stockholder list, set new record date and new annual meeting date and supervised content of proxy materials); *Union Pacific*, 226 F. Supp. at 413 (preliminary injunction granted); *Dunn v. Decca Records*, 120 F. Supp. 1, 3 (S.D.N.Y. 1954) (preliminary injunction denied).

(n69)Footnote 69. *Dunn*, 120 F. Supp. at 3 .

In *McConnell v. Lucht*, 320 F. Supp. 1162 (S.D.N.Y. 1970) , the court cited the following reasons for denying injunctive relief:

Company-employee relationships have been strained and recruitment of new key personnel has been interfered with due to adverse publicity centering about the proxy fight, and the company's credit rating, it is alleged, is being adversely affected. All these effects would be exacerbated to the point of irreparable injury, if the injunction were granted.

Id. at 1166-67 (footnote omitted).

(n70)Footnote 70. *Jewelcor, Inc. v. Pearlman*, 397 F. Supp. 221 (S.D.N.Y. 1975) . Although plaintiff was likely to prevail on the merits, a preliminary injunction was denied because the shareholders might view a preliminary injunction as a final determination of wrongdoing on the part of the proxy solicitor "and thus thwart any future legitimate efforts by [the proxy solicitor] to form a business combination with [the plaintiff corporation]." *Id.* at 242 .

See also *Wolpert v. First Nat'l Bank of East Islip*, 381 F. Supp. 625 (E.D.N.Y. 1974) (preliminary injunction denied); *Twentieth Century Fox*, 334 F. Supp. at 1402 (preliminary injunction denied); *General Time Corp. v. Talley Indus., Inc.*, 283 F. Supp. 832, 837 (S.D.N.Y.) , *aff'd*, 403 F.2d 159 (2d Cir. 1968) , *cert. denied*, 393 U.S. 1026 (1969) (preliminary injunction denied); *Kauder v. United Board & Carton Corp.*, 199 F. Supp. 420, 424 (S.D.N.Y. 1961) (preliminary injunction denied); *Mack v. Mishkin*, 172 F. Supp. 885, 889 (S.D.N.Y. 1959) (preliminary injunction denied).

(n71)Footnote 71. *Wolpert v. First Nat'l Bank*, 381 F. Supp. 625 (E.D.N.Y. 1974) (preliminary relief denied); *McConnell v. Lucht*, 320 F. Supp. 1162 (S.D.N.Y. 1970) ; *Raffa v. The Mechanics Building Material Co.*, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,535 (E.D.N.Y. Apr. 28, 1976); see generally *Lincoln Mercury Corp. v. Victory Life Ins. Co.*, 375 F. Supp. 112, 115 (D. Kan. 1974) ; *Walpert v. Bart*, 280 F. Supp. 1006, 1016 (D. Md. 1967) , *aff'd*, 390 F.2d 877 (4th Cir. 1968) .

(n72)Footnote 72. *Chris-Craft Indus., Inc. v. Independent Stockholders Comm.*, 354 F. Supp. 895, 921-22 (D. Del. 1973) . The paradox of the doctrine of unclean hands in the proxy environment has not gone unnoticed. *Union Pacific*,

226 F. Supp. at 410 (application of the doctrine would leave "the shareholders unprotected when they have been doubly misled, stultifying the underlying purpose of the national securities laws").

(n73)Footnote 73. See *Dillon v. Berg*, 326 F. Supp. 1214 (D. Del.), *aff'd*, 453 F.2d 876 (3d Cir. 1971). See also *SEC v. Medical Comm. for Human Rights*, 404 U.S. 403, 92 S. Ct. 577, 30 L. Ed. 2d 560 (1972) (less than three percent of voting shareholders supported contested proposals; issue rendered moot); *Isaacs Bros. Co. v. Hibernia Bank*, 481 F.2d 1168 (9th Cir. 1973) (meeting held and proposal included in following year's proxy statement, therefore making injunctive relief or rescheduling meeting unlikely); *Klastorin v. Roth*, 353 F.2d 182 (2d Cir. 1965) (meeting held pending appeal); *Doyle v. Milton*, 73 F. Supp. 281 (S.D.N.Y. 1947) (suit for injunction against solicitation of proxies was held to be moot since by time motion to dismiss was decided transaction approved at shareholder's meeting had progressed to completion).

(n74)Footnote 74. See § 7.08[1][b] *supra*.

See *Chris-Craft Indus., Inc. v. Independent Stockholders Comm.*, 354 F. Supp. 895 (D. Del. 1973).

(n75)Footnote 75. 564 F.2d 1319, 1323 (9th Cir. 1977).

See *Caspary v. Louisiana Land & Exploration Co.*, 579 F. Supp. 1105 (S.D.N.Y. 1983) (director not responsible for advertisement written and paid for by his father).

(n76)Footnote 76. Of course, it would be easy to posit facts in which the identity of the purchaser would be material, *e.g.*, where the prospective purchaser's obligation or stock would be the consideration for the transfer, or the prospective purchaser was a director's son or daughter or business partner.

(n77)Footnote 77. *Chris-Craft*, 354 F. Supp. at 915 :

These nominees held out their names and reputations to shareholders as evidence that the group backing them was the proper choice to run the corporation. Having put their reputations in issue, the nominees cannot divorce themselves from improper actions taken in the proxy battle by the participants acting under the banner of their names. Moreover, since the major object of the proxy contest was to install the nominees into positions where they would ostensibly control the corporation, all participants working for their election are in a sense agents of the nominees, and thus the nominees must be expected to assume some responsibility for the actions of their agents.

(n78)Footnote 78. *Gould v. American-Hawaiian S.S. Co.*, 535 F.2d 761 (3d Cir. 1976).

See also *Lewis v. Dansker*, 68 F.R.D. 184, 195 (S.D.N.Y. 1975) :

(1) Norman Dansker, having signed the proxy statement in question, is individually and directly liable for the R. 14a-3 violation.

(2) Jerome and Raphael Dansker, having been aware of the proxy statement, having had an opportunity to read it as members of the Board of Directors, having been instrumental in its approval by the Board and having been the chief beneficiaries of the resolutions contained therein, are also individually and directly liable for the R. 14a-3 violation, despite the fact that their names do not appear thereon.

But see *Mader v. Armel*, 461 F.2d 1123 (6th Cir. 1972), *cert. denied*, 409 U.S. 1023, *aff'g*, [1970-1971 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,027 (S.D. Jan. 25, Ohio 1971). Cf. *Lanza v. Drexel*, 479 F.2d 1277, 1322 (2d

Cir. 1973) (en banc) (footnote omitted; *Rule 10b-5* action):

We recognize that *participation* by a director in the dissemination of false information reasonably calculated to influence the investing public may subject such a director to liability under the Rule. But it is quite a different matter to hold a director liable in damages for failing to insure that all material, adverse information is conveyed to prospective purchasers of the company's stock absent substantial participation in the concealment or knowledge of it.

(n79)Footnote 79. *SEC v. Falstaff Brewing Corp.*, 629 F.2d 62, 69 (D.C. Cir. 1980) , *cert. denied sub nom. Kalmanovitz v. SEC*, 449 U.S. 1012 (1980) .

See also Lewis v. Byrnes, 538 F. Supp. 1221 (S.D.N.Y. 1982) :

This transaction was more than a cash sale where the purchaser and seller meet, exchange cash for kind, and go their separate ways. The terms of the transaction necessarily entailed a continuing relationship between H&H and Korman. Korman was to become a director, an employee and a debtor of H&H. In these circumstances, it is true for Korman as it was for Kalmanowitz in the *Falstaff* case that "information about him and his plans certainly was material to the shareholder deciding whether to give his proxy to persons supporting the transaction." *S.E.C. v. Falstaff*, *supra*, 629 F.2d at 69 n.8 . Unlike the situation in the *Yamamoto* case, Korman's identity clearly could have been an inducing factor in a shareholder's grant of his proxy. Thus, Korman permitted the use of his name in a manner substantially connected to the proxy solicitation such that, as a matter of law, he may be held liable under § 14(a) for any misstatements contained in the proxy materials.

1414 (1983); Fedders, *Law Enforcement Against Those Who Fail to Disclose Illegal Behavior*, 14 *Sec. Reg. & L. Rep. (BNA)* 2057 (Nov. 26, 1982) ; Branch & Rubright, *Integrity of Management Disclosures Under the Federal Securities Laws*, 37 *Bus. Law.* 1447 (1982); Ferrara, Starr & Steinberg, *Disclosure of Information Bearing on Management Integrity and Competency*, 76 *Nw. U. L. Rev.* 555 (1981).

(n106)Footnote 106. See *United States v. Fields*, 592 F.2d 638 (2d Cir. 1978) , cert. denied, 442 U.S. 917 (1979) (violation of Item 7(f) of Schedule 14A is a violation of Section 14(a)); *Lewis v. Dansker*, [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,141 (S.D.N.Y. Aug. 23, 1973): "In effect, the Danskers' position is that a showing of materiality is prerequisite to a violation of any of the proxy rules or regulations. We find nothing in the language of Section 14(a), Rule 14a-3, or Item 11 of Schedule 14A, the legislative history of those Sections, or the cases decided under those Sections, which requires such a showing."

See also *SEC v. Kalvex Inc.*, 425 F. Supp. 310 (S.D.N.Y. 1975) .

But see *Ash v. GAF Corp.*, 546 F. Supp. 89, 94 (E.D. Pa. 1982) . The court granted defendant's motion for summary judgment in a private action alleging a violation under Rule 14a-3(b) (defendant mailed annual report by third-class mail, proxy material by first-class mail four to five days later). "Assuming arguendo there was a wrong, it was one so trivial that a court cannot redress it. At worst in this situation, it remains a wrong without a private remedy." The Third Circuit affirmed, 723 F.2d 1090 (3d Cir. 1983) . The plaintiff was found to have established a violation; but he had failed to demonstrate injury or an adverse effect on the integrity of the election.

See also *In re Sears, Roebuck & Co. Sec. Litig.*, 792 F. Supp. 977 (E.D. Pa. 1992) , where the court held that the company's failure to disclose in proxy statements that it had been sued under state law for mismanagement and breach of fiduciary duty is not a material omission actionable under Section 14(a) of the Exchange Act. After a restructuring, numerous shareholders sued Sears and its directors, alleging, among other things, a violation of Section 14(a) because of the alleged omission. The case was settled. Sears did not disclose the suit in proxy statements for the next three years. The court found Sears' omission nonmaterial because no fraud, deception or manipulation was alleged in the suits. As such, under *Santa Fe Indus. v. Green*, 430 U.S. 462 (1977) , there was no material omission under Section 14(a). Also, because such information was nonmaterial, it need not have been disclosed under Regulation S-K, Item 103. Moreover, the directors in the earlier suits were not adverse to the company and need not have been included under Item 103.

The question of the relief to be granted in a private suit for a violation of Rule 14a-3(a) after the meeting in question turns upon the plaintiff's ability to show causation. See *Dillon v. Berg*, 326 F. Supp. 1214, 1234-35 n.31 (citing cases), aff'd, 453 F.2d 876 (3d Cir. 1971) . See also *Ash v. Brunswick Corp.*, 405 F. Supp. 234, 247 (D. Del. 1975) ("Notwithstanding this violation of the proxy rules, plaintiff is entitled to no relief without proof of causation--that is that the violation reasonably could be thought to have affected the outcome of the vote.") In a case under Rule 14a-9, the defect must be material by the terms of the Rule and its materiality is sufficient to establish causation under *Mills v. Electric Auto-Lite*, 396 U.S. 375, 90 S. Ct. 616, 24 L. Ed. 2d 593 (1970) . See § 7.09[5][f][ii] and § 7.09[6][a] infra .

(n107)Footnote 107. *Meredith v. City of Winter Haven*, 320 U.S. 228, 235, 64 S. Ct. 7, 11, 88 L. Ed. 9, 13 (1943) , quoted in *Hecht Co. v. Bowles*, 321 U.S. 321, 64 S. Ct. 587, 88 L. Ed. 754 (1944) . (Emergency Price Control Act of 1942).

See discussion in § 7.09[5][h] and § 7.09[5][i] infra .

(n108)Footnote 108. See, e.g., *SEC v. Transamerica Corp.*, 163 F.2d 511 (3d Cir.) , cert. denied, 332 U.S. 847 (1947) , aff'g and modifying, 67 F. Supp. 326 (D. Del. 1946) .

An express refusal of a defendant to comply with an SEC rule would place him or her squarely in the category of those against whom injunctions are granted, i.e., defendants who present the danger of future violations. Cf. *Securities*

& *Exchange Com. v. Mono-Kearsarge Consol. Mining Co.*, 167 F. Supp. 248 (D. Utah 1958) (defendant continued disputed activities after action commenced); *SEC v. Manor Nursing Centers, Inc.*, 340 F. Supp. 913 (S.D.N.Y. 1971), *aff'd*, 458 F.2d 1082 (2d Cir. 1972) (retention of proceeds of fraudulent scheme).

See also *Rondeau v. Mosinee Paper Corp.*, 422 U.S. 49, 95 S. Ct. 2069, 45 L. Ed. 2d 12 (1975) (private action under Williams Act amendments to Exchange Act; an action for an injunction is "designed to deter." Injunction denied where defendant acted in ignorance of the law, complied as soon as he was aware of the requirement, and insufficient harm was shown to justify injunctive relief).

(n109)Footnote 109. See *SEC v. Koracorp Indus., Inc.*, 575 F.2d 692 (9th Cir.), *cert denied sub nom. Helfat v. SEC*, 439 U.S. 953 (1978). The court described the decision whether to issue an injunction as turning on two factors: (1) the character of past conduct, and (2) "the bonafides of the expressed intent to comply." *Id.* at 699 (quoting *United States v. W.T. Grant Co.*, 345 U.S. 629, 633, 73 S. Ct. 894, 898, 97 L. Ed. 1303 (1953)).

(n110)Footnote 110. *J.I. Case v. Borak*, 377 U.S. 426, 431, 84 S. Ct. 1555, 1559, 12 L. Ed. 2d 423, 427 (1964):

The purpose of § 14(a) is to prevent management or others from obtaining authorization for corporate action by means of deceptive or inadequate disclosure in proxy solicitation. The Section stemmed from the congressional belief that "[f]air corporate suffrage is an important right that should attach to every equity security bought on a public exchange." H.R. Rep. No. 1383, 73d Cong. 2d Sess., 13, reprinted in the Primary Law Sourcebook, Volume C, Section I of the 1934 Act. It was intended to "control the conditions under which proxies may be solicited with a view to preventing the recurrence of abuses which... [had] frustrated the free exercise of the voting rights of stockholders." *Id.* at 14. Too often proxies are solicited without explanation to the stockholder of the real nature of the questions for which authority to cast his vote is sought.

Section 14(c), which requires the distribution of information statements by management when proxies are not solicited for any "annual or other" meeting, was added to the statute as part of its Securities Acts Amendments of 1964. Pub. L. No. 88-467, 78 Stat. 565.

(n111)Footnote 111. The Note to Rule 14a-9 states:

NOTE: The following are some examples of what, depending upon particular facts and circumstances, may be misleading within the meaning of this Section.

- (a) Predictions as to specific future market values.
- (b) Material which directly or indirectly impugns character, integrity or personal reputation, or directly or indirectly makes charges concerning improper, illegal or immoral conduct or associations, without factual foundation.
- (c) Failure to so identify a proxy statement, form of proxy and other soliciting material as to clearly distinguish it from the soliciting material of any other person or persons soliciting for the same meeting or subject matter.
- (d) Claims made prior to a meeting regarding the results of a solicitation.

The comparable provision for information statements under Section 14(c) is Rule 14c-6.

Rule 14a-9 is discussed in § 7.04[2] *supra*.

(n120)Footnote 120. *TSC Indus. Inc.*, 426 U.S. at 449 .

(n121)Footnote 121. See Report of the Advisory Committee on Corporate Disclosure to the Securities and Exchange Commission, 95th Cong. 1st Sess. 327 (Nov. 3, 1977):

Although the Committee believes that ideally it would be desirable to have absolute certainty in the application of the materiality concept, it is its view that such a goal is illusory and unrealistic. The materiality concept is judgmental in nature and it is not possible to translate this into a numerical formula. The Committee's advice to the Commission is to avoid this quest for certainty and to continue consideration of materiality on a case-by-case basis as disclosure problems are identified.

The TSC definition of materiality now "appears to be accepted as an all-purpose definition of materiality under the Federal Securities Laws." *SEC v. Steadman*, 967 F.2d 636, 643 (D.C. Cir. 1992) .

(n122)Footnote 122. *TSC Indus. Inc.*, 426 U.S. at 445, 96 S. Ct. at 2130, 48 L. Ed. 2d at 763 : "The question of materiality, it is universally agreed, is an objective one, involving the significance of an omitted or misrepresented fact to a reasonable investor."

See also *Wilson v. Great Am. Indus., Inc.*, 855 F.2d 987 (2d Cir. 1988) (failure of merger proxy statement to disclose unfavorable district court decision awarding substantial damages against merging company and one of its subsidiaries for stripping of assets of another subsidiary to avoid paying its union obligations, and characterizing merging company's management's conduct as highly fraudulent, were material nondisclosures.) Similarly, *In re Sears, Roebuck and Co. Sec. Litig.*, 792 F. Supp. 977 (E.D. Pa. 1992) , found the omission of facts regarding a suit for breach of fiduciary duty and mismanagement to be nonmaterial.

See also *Yabsley v. Conover*, 644 F. Supp. 689 (N.D. Ill. 1986) , in which the court dismissed a claim under Section 14(a) and Rule 14a-9 alleging that misleading proxy material fraudulently induced the plaintiffs to vote against a corporate reorganization, since the reorganization was adopted despite the plaintiffs' negative votes, and as a result they suffered no injury.

See also *Keyser v. Commonwealth Nat'l Fin. Corp.*, 644 F. Supp. 1130 (M.D. Pa. 1986) in which the court held:

(1) that the failure to disclose in a proxy statement seeking shareholder approval of a proposed merger that the issuer had received a merger offer from another party was not material where that offer had been withdrawn; and

(2) that a promise by the offeror that following the merger the issuer's board would remain in place with responsibilities unchanged did not represent a conflict of interest serious enough to require disclosure in the proxy statement, since no wrongful motive was alleged, and only two of the issuer's 15 directors held senior management positions.

See also *Woodward & Lothrop, Inc. v. Schnabel*, 593 F. Supp. 1385 (D.D.C. 1984), in which the alleged misstatements contained in proxy materials were held to reflect only differing opinions and expert calculations concerning a proposed merger, but not gaps in the total mix of information available in violation of Section 14(a).

In *GAF Corp. v. Heyman*, 724 F.2d 727 (2d Cir. 1983), the court held that the failure of an insurgent whose slate decisively won a fiercely contested proxy contest, to disclose in the proxy materials sent to shareholders unadjudicated allegations against him pending family lawsuit in a state court was not a material omission. The Second Circuit did not believe that fuller disclosure of the state action would have had a significant effect on the voting process.

(n123)Footnote 123. See *Gaines v. Haughton*, 645 F.2d 761 (9th Cir. 1981), cert. denied, 454 U.S. 1145 (1982), discussed *infra*.

(n124)Footnote 124. 218 F.3d 144 (2d Cir. 2000), cert. denied, 531 U.S. 1192 (2001).

(n125)Footnote 125. *Minzer v. Keegan*, No. 97-CV-4077, 1997 U.S. Dist. LEXIS 16445 (E.D.N.Y. 1997).

(n126)Footnote 126. Civ. No. H-02-1942 (S.D. Tex 2002).

(n127)Footnote 127. *Minzer*, 218 F.3d 144 at 149.

(n128)Footnote 128. 1991 U.S. Dist. LEXIS 7874, C.A. No. 90-0173B (D.C.R.I. 1991).

(n129)Footnote 129. 796 F.2d 508 (D.C. Cir. 1986). But see *In re Lear Corporation Shareholder Litigation*, 926 A.2d 94 (Del. Ch. 2007) where, in a going private transaction negotiated by the CEO of Lear Corporation with Carl Icahn, the CEO asked the Lear board to change his employment arrangements to allow him to cash in his retirement benefits immediately while negotiating with Icahn to continue to run the company. In a suit by stockholders to enjoin the shareholders' vote on the merger, the Delaware Chancery Court held the proxy materials were deficient in failing to disclose the CEO's request to the board, and it granted a preliminary injunction preventing a vote on the merger until full disclosure was made to the shareholders.

(n130)Footnote 130. 645 F.2d 761 (9th Cir. 1981), cert. denied, 454 U.S. 1145 (1982).

(n131)Footnote 131. *Gaines*, 645 F.2d at 779.

The following cases ruled that failures to disclose breaches of fiduciary duties did not give rise to rights of action under the federal securities laws: *Selk v. St. Paul Ammonia Prods. Inc.*, 597 F.2d 635 (8th Cir. 1979) (failure to characterize transactions as improvident); *Amalgamated Clothing v. J.P. Stevens & Co.*, 475 F. Supp. 328 (S.D.N.Y. 1979) (failure to disclose corporation's alleged policy of thwarting labor laws; matter relates to a questioning of management's business judgment not actionable under Section 14(a)).

See also *Seibert v. Sperry Rand Corp.*, 586 F.2d 949 (2d Cir. 1978) (management not required to disclose that one of

its directors was also director of five separate corporations, one of which allegedly violated labor laws); *Umbriac v. Kaiser*, 467 F. Supp. 548 (D. Nev. 1979) ; *Nemo v. Allen*, 466 F. Supp. 192 (S.D.N.Y. 1979) (no requirement to characterize facts as criminal in nature where shareholders can draw their own conclusions); *Rodman v. Grant Found.*, 460 F. Supp. 1028 (S.D.N.Y. 1978) , *aff'd*, 608 F.2d 64 (2d Cir. 1979) (direct benefit to directors/officers adequately disclosed); *Gans v. Filmways, Inc.*, 453 F. Supp. 1116 (E.D. Pa. 1978) , *aff'd*, 595 F.2d 1212 (3d Cir. 1979) ; *Freedman v. Barrow*, 427 F. Supp. 1129 (S.D.N.Y. 1976) ; *Polin v. Conductron Corp.*, 552 F.2d 797 (8th Cir. 1977) , *cert. denied*, 434 U.S. 857 (1977) ; *Cole v. Schenley Indus., Inc.*, 563 F.2d 35 (2d Cir. 1977) ; *Golub v. PPD Corp.*, 576 F.2d 759 (8th Cir. 1978) (failure to disclose true motivation of management in sale of assets and to properly characterize management bonuses). *Kass v. Arden-Mayfair, Inc.*, 431 F. Supp. 1037 (C.D. Cal. 1977) , held that it was not material to fail to inform shareholders that one of the management's candidates for the board of directors was disciplined by the Commission for alleged violations of the federal securities laws. *See also Goldberger v. Baker*, 442 F. Supp. 659 (S.D.N.Y. 1977) (the proxy rules are not violated because management has allegedly mismanaged the company and the proxy statement does not say so).

(n132)Footnote 132. 430 U.S. 462, 477-80, 97 S. Ct. 1292, 1302-05, 51 L. Ed. 2d 480, 494-96 (1977) .

(n133)Footnote 133. *See Gaines*, 645 F.2d at 779 n.33 .

(n134)Footnote 134. 645 F.2d at 779 . Such judicial rulings have not deterred the SEC's staff from imposing its own requirements on the conduct of shareholder meetings, e.g., requiring the registrant to state in its proxy material that it will not vote proxies in favor of adjournment of a meeting, if the proxies have been voted against the primary proposal.

See also the additional cases cited in n.114 *supra*, which refused to find violations of federal law in the failures of the defendants to disclose breaches of state law fiduciary obligations.

(n135)Footnote 135. 645 F.2d at 778 .

(n136)Footnote 136. 645 F.2d at 779 .

(n137)Footnote 137. *TSC Indus. Inc.*, 426 U.S. at 445 , *supra*.

The *TSC Industries* formulation of "materiality" under the proxy rules has gained acceptance as a standard under the provisions dealing with purchases and sales of securities. *See, e.g., SEC v. MacDonald*, 699 F.2d 47 (1st Cir. 1982) (Rule 10b-5 case); *Healy v. Catalyst Recovery of Pa., Inc.*, 616 F.2d 641 (3d Cir. 1980) (Rule 10b-5 case); *Alton Box Board Co. v. Goldman Sachs & Co.*, 560 F.2d 916 (8th Cir. 1977) .

(n138)Footnote 138. *Compare Gaines v. Haughton*, 645 F.2d 761 (9th Cir. 1981) , *cert. denied*, 454 U.S. 1145 (1982) with *Canfield v. Rapp & Sons, Inc.*, 654 F.2d 459 (7th Cir. 1981) . *Canfield* held that the purchase of all the common stock of an issuer does not involve a "security" within the federal securities laws, because the transaction is merely the purchase of the business. To reach that conclusion, the Seventh Circuit had to reject a literal reading of the federal securities laws, which purport to extend the definition of a "security" to include "any... stock." *Contra Golden v. Garafalo*, 678 F.2d 1139 (2d Cir. 1982) .

The Ninth Circuit's ruling in *Gaines* that director misconduct is never material under the federal securities laws unless it involves self-dealing is a similar judicial inference drawn from the court's perception of the purposes of the federal securities laws. In each case, however, there is an absence of statutory language on which the judge-made limitation may be based. *Canfield* disregarded not only the definition of a "security" in the Securities Act, but also the express applicability of Sections 17 and 12(2) to private, local and small transactions. Similarly, the limitation on the duty to disclose imposed by the *Gaines* court finds no support in the sweeping terms of Section 14(a) and (c) of the Exchange Act. *Canfield* and *Gaines* thus impose limitations on the scope of the federal securities laws through an interpretative

method that is different from that used by the Supreme Court in such decisions as *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 96 S. Ct. 1375, 47 L. Ed. 2d 668 (1976) (language of Section 10(b), limited to manipulative or deceptive device or contrivance, requires scienter); *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 95 S. Ct. 1917, 44 L. Ed. 2d 539 (1975) (none of the express remedies contained in the Securities and Exchange Acts apply by their terms to non-purchasers or non-sellers). Cf. *Aaron v. SEC*, 446 U.S. 680, 100 S. Ct. 1945, 64 L. Ed. 2d 611 (1980) (Section 17(a)(1) of Securities Act requires scienter because language of subsection evinces Congressional intent to proscribe only knowing or intentional misconduct; subsections (2) and (3) of same Section do not require scienter in absence of terms requiring it).

The Supreme Court's reliance on the terms of the statutes in its restrictive interpretations of the securities laws and its willingness to reach the curious bifurcated result in *Aaron* with respect to Section 17(a) suggest that the limitations on the scope of the securities laws imposed by *Gaines* and *Canfield* may eventually be reversed.

(n139)Footnote 139. See Longstreth, *S.E.C. Disclosure Policy Regarding Management Integrity*, 38 *Bus. Law* 1413, 1424 (1983):

[T]he Commission found itself asking directors and officers to disclose illegal and unethical behavior and even intentions. There is no problem with compelling disclosure of such matters where they have economically material consequences. To ask management to recount all illegal actions taken over the past year or illegal intentions for the next will obviously not promote disclosure. As District Judge Pierre Leval said in *Amalgamated Clothing and Textile Workers Union v. J.P. Stevens & Co., Inc.*, [475 F. Supp. 328, 332 (S.D.N.Y. 1979) , vacated, 638 F.2d 7 (2d Cir. 1980)] "it is simply contrary to human nature' to expect management to make such disclosures."

See also *id.* at 1426 (footnotes omitted):

Looking to the future, I do not believe the Commission should require line item disclosure of something that common sense tells us will seldom, if ever, be disclosed. For example, it would be ineffective to require disclosure of all illegal acts committed by management over the past year. Investors would not be informed.

Nor do I believe the Commission should require line item disclosure of the ethical behavior of management. I have tried to write such a rule to elicit management's approach to compliance with laws--a matter on which important differences no doubt exist among companies. How close to the wind do you sail? What role does counsel play in determining whether a particular corporate initiative is legal? These questions and others might be useful to investors. However, what one quickly realizes is that a boilerplate response would immediately result from such a demand, conveying little or nothing of importance to investors.

On the other hand, disclosure of illegal acts may be required in order to answer correctly line items eliciting other corporate information. Returning to the examples mentioned at the outset, a company that describes its labor relations as satisfactory but fails to disclose that the peace it enjoys is built upon bribes paid to labor union officials has omitted a material fact necessary to make the statements not misleading.

As to ethics, it does not seem useful to demand of a director standing for election that he describe how honest he has been or what code of ethics he will bring to his job. No meaningful disclosure is likely to result. However, if, as in one of the examples, an investment company touts the responsible management and financial strength of its investment adviser in proxy materials soliciting shareholder approval of the advisory contract, it becomes necessary, to avoid misleading statements, to disclose that the adviser's parent has some twenty-two major lawsuits against it, alleging breaches of fiduciary duty

and seeking damages equal to twenty-five percent of its consolidated assets.

Similarly, in the example of a management decision to ignore a pollution statute on the basis of a cost-benefit analysis, disclosure of the likelihood and magnitude of the fines, penalties, and other effects of this policy may be necessary, although not economically material in and of themselves, to prevent other required disclosures covering the corporation's business, financial statements, capital expenditures for environmental compliance, or legal proceedings from being misleading. This was the Commission's position in the 1979 administrative proceedings against United States Steel Corporation.

(n140)Footnote 140. *Gaines, n.113 supra*, 645 F.2d at 777 n.24 .

(n141)Footnote 141. 796 F. Supp. 649 (D. Conn. 1992) .

(n142)Footnote 142. *Id.* at 654 .

(n143)Footnote 143. 772 F. Supp. 223 (E.D. Pa. 1991) . In this securities fraud class action, the plaintiffs alleged that the defendants misrepresented and concealed from the investing public the financial condition of Meridian Bancorp, Inc. On motion to dismiss, the court ruled, among other things, that the plaintiffs' complaints under Rule 14a-9 of the Exchange Act are legally sufficient. The court stated that its finding that the allegations were legally sufficient under *Rule 10b-5* establishes their sufficiency under Section 14 because there is no different standard for proxy claims under Rule 14a-9 as opposed to 10b-5. The court further ruled that the defendants' argument that there is no duty to confess mismanagement in proxy materials must fail after the *Virginia Bankshares* decision (discussed in § 7.09[5][g] *infra*). Here the plaintiffs asserted that the proxy materials failed to disclose "the utter failure of the individual defendants and the co-directors to cause Meridian to disseminate reports to the investing public and to file with the SEC documents in full compliance with the federal securities laws, and to continue [sic] to cause the Company to overstate its earnings, assets and net worth by under-reserving for loan losses." The court stated that the plaintiffs alleged that the proxy statement failed to disclose facts that a reasonable shareholder would consider important in deciding how to vote. The court also found that there was sufficient "transaction causation" as there was proof that the proxy solicitation itself, rather than the defect in the solicitation materials, served as an essential link in the accomplishment of the transaction: "where, as here, the harm alleged is the election of corporate directors on the basis of false and misleading proxy statements, the plaintiffs need not prove that the omissions or misstatements decisively affected voting." *Id.* at 229 .

(n144)Footnote 144. *United Paperworkers Int'l Union v. International Paper Co.*, [1992-1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 97,342 (2d Cir. Feb. 12, 1993). The U.S. District Court for the Southern District of New York determined that the response by International Paper Company's board of directors to a shareholder proposal recommending the adoption of the Valdez Principles materially misrepresented the Company's environmental record, thus violating Rule 14a-9. As such, the shareholder's vote rejecting the proposal must be voided and the company's board of directors must resubmit the proposal to a vote at the next annual meeting. The board's response failed to disclose numerous recent or pending actions against it by state and federal environmental authorities, giving the total impression that the Company is a model of environmental rectitude. The board's written response to the shareholder proposal advised that the Company's "environmental conduct code in fact is both more stringent and more industry specific than the Valdez Principles." The district court found this statement misleading in violation of Rule 14a-9 and voided the vote on the proposal. The board was under no duty to discuss its environmental record in responding to the shareholder proposal and could have simply stated that it opposed the proposal. But once the board chose to offer specific representations about the Company's environmental record and policies, it was obligated to portray that record fairly. The court found the requisite transaction causation, stating that the union need only show that the board "knowingly made misleading misstatements or omissions, and that such misstatements or omissions had a *significant propensity* to affect the voting process." The court ordered that the proposal be resubmitted to a vote of shareholders. On appeal, the second circuit affirmed but modified the district court order to the effect that the sponsor of the proposal be permitted to describe the judgment in the proxy statement and to quote from the court's opinion.

See also *In re Sears Roebuck & Co. Sec. Litig.*, 792 F. Supp. 977 (E.D. Pa. 1992) , where the omission from proxy materials of information regarding settlement of an earlier suit for mismanagement was held nonmaterial (discussed in n.93 *supra*).

(n159)Footnote 159. See also the discussion in Davis, *Materiality and SEC Disclosure Filings*, 24 Sec. Reg. L.J. 180 (Summer 1996), where Mr. Davis examines the materiality standard applied by the SEC in cases involving inaccuracies in disclosure filings and finds it to be inconsistent with the meaning of materiality as applied to Section 10(b) liability cases such as *Basic, Inc. v. Levinson*, 485 U.S. 224 (1987) .

Mr. Davis concludes that "[t]he reasonable investor cares about facts that are likely to affect the value of a security, and it is these facts alone that are material. There is no other standard of materiality. A misstatement or omission in a company's disclosure filing with the SEC is material only if it affects (or could reasonably be expected to affect) the market price of the company's securities. The size of the accounting discrepancy is irrelevant if the market has not been deceived... . Only by ascertaining how the market reacted or estimating how it would react can we properly determine if a matter is material." 24 Sec. Reg. L.J. at 198.

(n164)Footnote 164. See *United States v. Stirling*, 571 F.2d 708 (2d Cir.) , cert. denied, 439 U.S. 824 (1978) . In *Stirling*, a prospectus and annual report described labor relations as "satisfactory" and reported that issuer was "the first modular housing manufacturer to sign a national labor contract ... for both in plant production and on-site installation." It failed, however, to mention the issuer's bribery of union officials through stock transactions. The court of appeals said:

The true nature of Homex's labor relations was important to a potential investor. Once Homex decided to make representations concerning its labor relations, it should have described them accurately. Corporate funds were being used improperly to aid in the maintenance of peaceful labor relations, a fact that investors did not know. Knowledge of the true machinations would have given a prudent investor considerable pause--labor relations would not have looked as normal as they were made to appear nor would the corporate financial practices have appeared so sound.

Id. at 729 .

(n165)Footnote 165. See Longstreth, *S.E.C. Disclosure Policy Regarding Management Integrity*, 38 *Bus. Law* at 1418 *supra*:

The *Gaines* case purports to establish a per se rule of immateriality for director misconduct without the element of self-dealing--at least for proxy statements. The opinion seems to rest on the rather cynical assumption that shareholders, in exercising their rights of corporate suffrage, care plenty about a management that is stealing *from* the company, but are concerned not a whit about a management that is stealing *for* the company.

See Branch & Rubright, *Integrity of Management Disclosures Under the Federal Securities Laws*, 37 *Bus. Law*. 1447, 1479-81 (1982) (footnotes omitted):

Meaningful standards for integrity disclosures should ideally be grounded upon "objective, quantitative and uniform" criteria susceptible of meaningful application in different contexts, as one commissioner has correctly observed. Uncertain standards or standards involving ethical or moral judgments regarding illegal or unethical conduct not previously disclosed lack a clear nexus with the financial origins and purposes of the federal securities laws, are inconsistent with a self-policing mechanism of voluntary disclosure, and provide inadequate guidance to counsel on matters of critical importance. Similarly, any *per se* rule, whether it requires disclosure or permits nondisclosure of illegal conduct, is equally inconsistent with the concept of materiality irrevocably embodied in the federal securities laws. Any objective and uniform standard should be grounded upon considerations of financial materiality since the federal securities laws remain primarily concerned with matters of economic consequence to shareholders and investors. In the opinion of the authors, the materiality of senior management misconduct not involving self-dealing or prior criminal convictions should be analyzed within the same framework of financial materiality as any other conduct or circumstances relevant to making or continuing an investment in an enterprise.

In the case of conduct that does not involve self-dealing and which has not been revealed outside of

the corporation, the materiality of such conduct should be determined on the basis of two concurrent factors, both of which are ultimately grounded upon financial materiality. First, is the conduct or are the implications of the conduct directly material from a financial point of view? Second, does the conduct materially impeach the integrity of management in a manner likely to have financially material consequences relevant to the shareholder interests protected by the federal securities laws? The application of each of these factors is discussed separately below.

With regard to direct financial materiality, objective criteria for evaluating the materiality of the conduct should be derived by analogy to the standards of financial materiality applicable to conduct not involving senior management integrity. To the extent that the commission's analysis of the materiality of management misconduct relates such conduct to foreseeable, financially material consequences, the commission's analysis in its *Report on Questionable Payments* is unobjectionable. For example, if the conduct actually subjects material portions of the corporation's business to greater than ordinary risks, the conduct may be material. Similarly, if the conduct has already been revealed and thereby subjects the corporation to significant risks of damaging penalties or prohibitions, the directly foreseeable consequences of the conduct may be material.

In the case of conduct not previously disclosed, there must also be an analysis of the likelihood that the consequences will be realized, which in turn focuses upon an analytical framework analogous to the standards for financial statement disclosure of contingent liabilities. *Financial Accounting Standards Bulletin No. 5* (FASB No. 5), which addresses the scope of disclosures to be made in financial statements regarding contingent liabilities, provides that "[d]isclosure is not required of a loss contingency involving an unasserted claim or assessment when there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment unless it is considered probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable."

(n166)Footnote 166. SEC Report On Questionable and Illegal Corporate Payments and Practices 14-15 (May 1976).

Accord Decker v. Massey-Ferguson, Ltd., 681 F.2d 111, 118 (2d Cir. 1982) (grant of Rule 10b-5 motion to dismiss reversed). *See also SEC v. Jos. Schlitz Brewing Co.*, 452 F. Supp. 824 (E.D. Wis. 1978) (on motion to dismiss Rule 10b-5 and Section 17(a) claims).

(n167)Footnote 167. SEC Report On Questionable and Illegal Corporate Payments and Practices 14-15 (May 1976), *supra*.

(n168)Footnote 168. SEC Report On Questionable and Illegal Corporate Payments and Practices 14-15 (May 1976), *supra*.

For example, public knowledge that a company is making such illegal payments, even of a minor nature, in one foreign country could cause not only expropriation of assets in that country but also a similar reaction or discontinuation of material amounts of business in other countries as well.

The Commission noted that this had in fact occurred in the case of a major oil company.

(n169)Footnote 169. *Compare Gaines v. Haughton*, 645 F.2d 761 (9th Cir. 1981), *cert. denied*, 454 U.S. 1145 (1982), with *Decker v. Massey-Ferguson, Ltd.*, 681 F.2d 111 (2d Cir. 1982). As previously noted, the court in *Gaines* stated that there were clearly instances of illegal conduct by director-nominees unrelated to self-dealing that would have to be disclosed especially if they involved criminal convictions.

(n170)Footnote 170. See *Decker*, 681 F.2d at 118-19 . But cf. *Maldonado v. Flynn*, 597 F.2d 789 (2d Cir. 1979) .

(n171)Footnote 171. *Gaines v. Haughton*, 645 F.2d 761 (9th Cir. 1981) , cert. denied, 454 U.S. 1145 (1982) ; *Maldonado v. Flynn*, 597 F.2d 789 (2d Cir. 1979) ; *Bertoglio v. Texas International Co.*, 488 F. Supp. 630 (D. Del. 1980) . In *Maldonado*, the Second Circuit, per Mansfield, J., addressed plaintiff's claim that the directors violated Section 14(a) by failing to disclose in the proxy materials that they had modified a stock option plan for their own benefit:

Since self-dealing presents opportunities for abuse of a corporate position of trust, the circumstances surrounding corporate transactions in which directors have a personal interest are directly relevant to a determination of whether they are qualified to exercise stewardship of the company. *Goldsholl v. Shapiro*, 417 F. Supp. 1291, 1298-99 (S.D.N.Y. 1976) . For this reason Rule 14a-9 specifically sets out minimum standards for disclosure and, going beyond the Rule, it has been recognized that shareholders are entitled to truthful presentation of factual information 'impugning the honesty, loyalty or competency of directors' in their dealings with the corporation to which they owe a fiduciary duty.

See also *Texas Partners v. Conrock, Inc.*, 685 F.2d 1116 (9th Cir. 1982) , cert. denied, 460 U.S. 1029 (1983) , in which the court held that omissions in a proxy statement proposing antitakeover amendments to an issuer's charter may have been materially misleading.

See also *SEC v. Parklane Hosiery, Inc.*, 558 F.2d 1083 (2d Cir. 1977) , held that the failure of the proxy materials to disclose that the reason that the company was engaging in a "going private" merger was to pay off the personal debts of its principal shareholder was a material nondisclosure.

But see *GAF Corp. v. Heyman*, 724 F.2d 727 (2d Cir. 1983) (failure of dissident shareholder seeking seat on issuer's board to disclose unadjudicated charges of breach of fiduciary duty by family member in unrelated state litigation held not to be material omission).

But see *Berg v. First American Bankshares, Inc.*, 796 F.2d 489 (D.C. Cir. 1986) (failure to report in a proxy statement that a principal shareholder who endorsed a proposed merger intended to use the proceeds from the sale of his shares to provide liquidity needed to settle his estate was not a material omission, since there was no indication that this factor influenced the shareholder's opinion as to the fairness of the price).

Accord *Kas v. Financial Gen. Bankshares*, 796 F.2d 508 (D.C. Cir. 1986) .

(n172)Footnote 172. See Longstreth, 38 Bus. Law at 1423 *supra* (footnotes omitted):

For one given to speculate about the future, it is interesting to ponder where investor notions of materiality may lead the Commission in the years ahead. Over the past two decades, noninsured pension funds, both private and public, have been distinctly the fastest growing group of equity owners in the United States, increasing their share of the aggregate market value for all stocks listed on the New York Stock Exchange from less than five percent in 1960 to 17.7% in 1980. While Peter Drucker appears to have grossly exaggerated the numbers, he is no doubt correct in predicting an acceleration of this trend toward employee ownership of, as he put it, "the means of production." This new group of investors might insist on disclosure different from what we now offer. For example, they might instruct their trustees to insist on satisfactory disclosure as to labor practices, retirement plans, corporate governance, political activities, plant closing and relocation policies or other aspects of the business not considered, today, as sufficiently material to investors to warrant compulsory disclosure.

(n173)Footnote 173. State law on proxy solicitation is barely rudimentary in some respects. Beyond authorization of voting by proxy, which was not permitted under common law absent a bylaw or charter provision, the statutes are silent. They generally do not purport to regulate proxy solicitation and are generally silent on the points of mechanics and information requirements. Eisenberg, *Access to the Corporate Proxy Machinery*, 83 Harv. L. Rev. 1489, 1491-92 (1970). See generally Cavitch, Business Organizations, ch.110 (Matthew Bender).

In the case of the corporations subject to the Exchange Act proxy requirements, that is a particularly troublesome aspect of state law because the proxy solicitation is in fact the functional equivalent of the shareholders meeting in a smaller company. In the large corporation context, the proxy solicitation supplants the shareholders meeting. *Id.* at 1494. In the usual situation, the proxy solicitation has determined the results of the meeting in advance and the effect of the meeting itself is merely to confirm the results of the solicitation.

(n174)Footnote 174. *Mills v. Electric Auto-Lite Co.*, 396 U.S. 375, 381, 90 S. Ct. 616, 620, 24 L. Ed. 2d 593 (1970):

The decision below, by permitting all liability to be foreclosed on the basis of a finding that the merger was fair, would allow the stockholders to be bypassed, at least where the only legal challenge to the merger is a suit for retrospective relief after the merger has been held. A judicial appraisal of the merger's merits could be substituted for the actual and informed vote of the stockholders.

(n175)Footnote 175. *United States v. Stirling*, 571 F.2d 708 (2d Cir.), cert. denied, 439 U.S. 824, 99 S. Ct. 93, 58 L. Ed. 2d 116 (1978).

See *Zell v. Intercapital Income Sec., Inc.*, 675 F.2d 1041 (9th Cir. 1982), in which the court reversed the grant of the defendant's motion for summary judgment because the failure of the proxy statements, which solicited approval by an investment fund's shareholders of investment advisory agreements with an investment manager, to disclose a score of lawsuits charging violations of state and federal laws pending against the parent of the investment manager and the parent's brokerage subsidiary may have been a material omission since there was a substantial likelihood that a reasonable stockholder of the fund would consider the financial condition and quality of the management of the parent and its subsidiary to have actual significance in deciding whether to approve the agreements.

See *SEC v. Savoy Indus., Inc.*, 587 F.2d 1149 (D.C. Cir. 1978); *Trans World Airlines v. Catalano*, [1979-1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) § 97,159 (S.D.N.Y. Oct. 31, 1979).

In *Berg v. First American Bankshares, Inc.*, 796 F.2d 489 (D.C. Cir. 1986), the court observed that where a proxy statement sets forth the factors considered by one of the issuer's principal shareholders in endorsing a proposed merger, there is an obligation to portray them accurately and completely. The court held, however, that there was no material misrepresentation or omission in describing the factors considered by the shareholder.

(n176)Footnote 176. 426 U.S. 438, 96 S. Ct. 2126, 48 L. Ed. 2d 757 (1976), mot. denied, 429 U.S. 810 (1976). See *Spielman v. General Host Corp.*, 538 F.2d 39 (2d Cir. 1976) ("total mix" of communications rendered potentially misleading omission harmless). In *Mills v. Esmark, Inc.*, 544 F. Supp. 1275 (N.D. Ill. 1982), the court held that the description in a proxy statement of a company's employee incentive plan that used net earnings per common share as the measure of awards under the plan was materially misleading because the total mix of information available to shareholders suggested that the plan was intended to compensate the employees for their contribution to long-term corporate growth rather than their contribution to capital gains, even if in isolation the phrase "net earnings per common share," when used to describe long-term growth of the plan, would be deemed by a reasonable investor to include capital gains.

But see *Freedman v. Value Health, Inc.*, Fed. Sec. L. Rep. (CCH) P 91,791 (2d Cir. 2003), which held that the

District Court of Connecticut had properly dismissed a fraud claim on materiality grounds in finding that a prospectus describing a proposed merger had adequately disclosed all material facts; the company was not required to disclose all internal profit projections if the disclosures as a whole were not materially misleading. Claims that the merger partner falsely stated that he had a "thriving" business were "mere puffery" and were likewise not material.

(n177)Footnote 177. *Gladwin v. Medfield Corp.*, 540 F.2d 1266, 1270 (5th Cir. 1976) ; *Kohn v. American Metal Climax, Inc.*, 458 F.2d 255, 265 (3d Cir.) , cert. denied, 409 U.S. 874 (1972) .

But see Kennecott Copper Corp. v. Curtiss-Wright Corp., 584 F.2d 1195 (2d Cir. 1978) (court noted that Kennecott in its own proxy materials, repeating language from Curtiss-Wright material, found no need to clarify certain terms). *See also General Time Corp. v. Talley Indus., Inc.*, 403 F.2d 159, 162 (2d Cir. 1968) , cert. denied, 393 U.S. 1026 (1969) ; *McConnell v. Lucht*, 320 F. Supp. 1162, 1164 (S.D.N.Y. 1970) .

(n178)Footnote 178. *See In re BEA Systems, Inc. Shareholder Litigation*, Del. Ch. No. 3298 (March 26, 2008) where the Delaware Chancery Court refused to enjoin Oracle's cash acquisition of BEA, stating that the omission from BEA's proxy material of elements of BEA's financial advisor's presentation to the BEA board did not make disclosure of such elements mandatory where no showing was made that the board relied on such information or found it reliable.

Similarly, the failure of Morgan Stanley to include in its annual meeting proxy material the fact that the company had received a Wells notice from the SEC was not per se a material omission. *In re Morgan Stanley Derivative Litigation*, No. 05 Civ. 6515 (SDNY March 27, 2008).

In *Markewich v. Adikes*, 422 F. Supp. 1144 (E.D.N.Y. 1976) , the failure of the proxy material to reveal alleged inaccuracies in the company's annual reports and financial statements was held not to be a violation of the proxy rules because the alleged inaccuracies did not relate to the purpose of the proxy solicitation. The court also held that the mere mention of these annual reports and financial statements in the proxy material did not incorporate them by reference into the proxy material.

Cf. Maldonado v. Flynn, 597 F.2d 789 (2d Cir. 1979) : "The prevailing definition of a 'material fact' under Rule 14a-9 presupposes that the rule applies only when shareholders are asked to vote... ." *Cf. Bertoglio v. Texas International Co.*, 488 F. Supp. 630, 650 (D. Del. 1980) .

See also Pavlidis v. New England Patriots Football Club, Inc., 737 F.2d 1227 (1st Cir. 1984) (although a corporate officer's self-dealing would be material in a proxy soliciting votes for the reelection of that officer, it was not material to the question of whether to accept the amount offered for the defendant's stock).

In *Kas v. Financial Gen. Bankshares, Inc.*, 796 F.2d 508 (D.C. Cir. 1986) , the court held that in a proxy statement soliciting shareholder approval of a proposed merger, the dual role of two attorneys who were counsel to the acquiring company and directors of the target company was properly disclosed, despite the failure of the statement to expressly characterize the dual role as a "potential conflict of interest."

(n179)Footnote 179. *Mills v. Electric Autolite Co.*, 403 F.2d 429 (7th Cir. 1968) , vacated on other grounds, 396 U.S. 375 (1970) ; *Gould v. American Hawaiian Steamship Co.*, 331 F. Supp. 981 (D. Del. 1971) , aff'd, 535 F.2d 761 (3d Cir. 1976) ; *Kohn v. American Metal Climax, Inc.*, 322 F. Supp. 1331 (E.D. Pa. 1971) , aff'd, 458 F.2d 255 (3d Cir. 1972) .

But see Smallwood v. Pearl Brewing Co., 489 F.2d 579, 602 (5th Cir.) , cert. denied, 419 U.S. 873 (1974) (footnote omitted):

We have already stated that the information required in a proxy statement is extensive. Difficult decisions must be made as to what information to place toward the beginning and what to place further

toward the end of proxy statements, what to emphasize and what to state more blandly. It is, of course, impossible to emphasize everything, and every fact cannot be contained in the beginning. *DiJulio v. Digicon, Inc.*, 339 F. Supp. 1284, 1290 (D. Md. 1972) . We require those who draw up proxy statements to be fair and sensitive to the needs of shareholders in exercising their rights of corporate suffrage. But we do not require that the writers of proxy statements be clairvoyant. A fact essential for a shareholder decision today may become irrelevant tomorrow, and vice versa. It is enough that proxy statements be complete and not misleading in light of the circumstances existent and reasonably anticipated at the time distributed.

Rep. (CCH) P 99,077 (S.D. Ohio Jan. 17, 1983) (the failure to provide preliminary budget projections from subsidiaries was not a material omission; preliminary figures are purely speculative); *Caspary v. Louisiana Land & Exploration Co.*, 579 F. Supp 1105 (S.D.N.Y. 1983) (failure to disclose predictions of future recovery rates and exploration costs of oil company not material omission).

See also *Pavlidis v. New England Patriots Football Club, Inc.*, 737 F.2d 1227 (1st Cir. 1984) . See also *Basic Inc. v. Levinson*, 485 U.S. 224, 108 S. Ct. 978, 99 L. Ed. 2d 194 (1988) , declaring that the materiality of a contingent event, such as a prospective merger, depends upon a balancing of the indicated probability that the event will occur and the anticipated magnitude of the event.

(n189)Footnote 189. See *Speed v. Transamerica Corp.*, 99 F. Supp. 808 (D. Del. 1955) , *aff'd*, 235 F.2d 369 (3d Cir. 1956) (*Rule 10b-5*; failure by purchaser to reveal appreciated value of tobacco inventory).

See also *United States Smelting, Refining & Mining Co. v. Clevite Corp.*, [1969-1970 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,691 (N.D. Ohio June 17, 1968) (failure to disclose higher offer for merger.)

(n190)Footnote 190. *478 F.2d at 1294-95*. It was not necessary to determine the materiality of the firm offers, however, because of the failure of the acquiror's management to describe its intent "to pursue aggressively the policy of selling" the acquired company's assets. Judge Friendly thus split the question to arrive at the more traditional ground of liability for failure to disclose the defendant's intention to sell the assets upon completion of the merger while knowing of the undisclosed appreciation in value.

(n191)Footnote 191. *Mills v. Electric Auto-Lite Co.*, 396 U.S. 375, 90 S. Ct. 616, 24 L. Ed. 2d 593 (1970), discussed in § 7.09[4][a] and § 7.09[5][f][ii] *supra*.

(n192)Footnote 192. See *Myzel v. Fields*, 386 F.2d 718 (8th Cir. 1967), *cert. denied*, 390 U.S. 951 (1968) (*Rule 10b-5*, purchase by undisclosed insiders); *Janigan v. Taylor*, 344 F.2d 781 (1st Cir.), *cert. denied*, 382 U.S. 879 (1965). A *Rule 10b-5* case, *Janigan* involved purchases by a general manager who stated that business was "about the same": "One month after the stockholders meeting the defendant made an offer himself and the representation in question. Essentially the representation was false because there had been a firming of prices and an increasing backlog of orders such that the first quarter of 1956 could be expected by defendant, due to his detailed knowledge, to show a profit." *344 F.2d at 785*. Furthermore, the court found various changes in practice with respect to pricing of inventory, and actual alterations to conceal an improvement in profits.

Viewed against a background of past fluctuations, we might not find the misrepresentation to be of the importance intimated by the court's opinion. Certainly it could not be claimed that the change presaged the dramatic improvement that occurred subsequently in the company's affairs, or that the defendant could have any thought that it did. On the other hand, even as a new upswing not uncharacteristic of the business, plus some promising overtones, we could not find that as a matter of law the true situation was fairly disclosed, within the heavy requirements of the Act, by the single statement that things were "about the same."

344 F.2d at 785.

(n193)Footnote 193. 1992 Del. Ch. LEXIS 80.

(n194)Footnote 194. [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,819 (2d Cir. Mar. 7, 1991). The court held that "the motivation of a controlling shareholder for favoring a course proposed in a proxy statement must be disclosed when there is a substantial likelihood that its disclosure will have a significant bearing on a reasonable shareholder's assessment of the recommended course of action." Applying this test, the Second Circuit found that the lower court improperly dismissed a Loehmann's shareholder's claim under Section 14(a) of the Securities and Exchange Act that the merger proxy misleadingly failed to disclose that the Loehmann family needed cash to pay estate taxes.

See *Virginia Bankshares, Inc. v. Sandberg*, 501 U.S. 1083, 111 S. Ct. 2749, 115 L. Ed. 2d 929 (1991), holding that knowingly false statements purporting to explain directors' reasons for recommending certain corporate actions may be actionable under Section 14(a), even though the statements are conclusory in form.

But see *Freer v. Mayer*, 796 F. Supp. 89 (S.D.N.Y. 1992), holding that failure to disclose the business purpose for a company's entering into a retirement agreement with its former chief executive officer was not a material omission when all the relevant details of the agreement were disclosed. The court reasoned that, if a shareholder believed the execution of the retirement agreement "was a business decision that reflected poorly on a particular director, he or she could vote against that director's election." However, the court emphasized "the directors were under no duty to disclose

their motives, either pure or unclean, so long as all of the information concerning the deal was revealed in the supplemental proxy... . There is no duty to disclose mere mismanagement."

See also *meVC Draper Fisher Jurvetson Fund I, Inc. v. Millennium Partners, L.P.*, 260 F. Supp. 2d 616 (S.D.N.Y. 2003) where the court held that participants in a proxy fight are not required to reveal in their proxy materials what their strategy will be in the event that they prevail in the proxy fight. Similarly, in *Tracinda Corp. v. DaimlerChrysler AG*, 502 F. 3d 212 (3d Cir. 2007), the Third Circuit affirmed dismissal of proxy fraud claims that the merger of Daimler-Benz AG and Chrysler Corp. was misrepresented as a "merger of equals." The court affirmed the district court's factual finding that the proxy and associated documents contained no material misrepresentations despite the fact that, subsequent to the merger, resignations and changes in the board of directors of the resulting company resulted in control of the company shifting to the prior management of Daimler-Benz. Plaintiffs had alleged that had they known the merger was a takeover rather than a merger of equals, they would have demanded a change in control premium upon consummation of the merger, and that the conclusion of the district court that the corporate governance provisions in the merger agreement applied only until the moment in time when DaimlerChrysler was created rendered the entire proxy solicitation process meaningless. The court observed that a management board perpetually divided between five Daimler-Benz designees and five Chrysler designees is "potentially unworkable and legally flawed. Upon closing, Daimler-Benz and Chrysler merged into one new company, at which point there were no longer two independent companies to make future board membership designations."

(n195)Footnote 195. 501 U.S. 1083, 111 S. Ct. 2749, 115 L. Ed. 2d 929 (1991) .

(n196)Footnote 196. 111 S. Ct. at 2760, *supra*.

A merger proxy statement was held not to be materially misleading in failing to disclose defendant CEO's alleged state of mind that he did not intend to comply with a "no-shop" provision in a merger agreement where it was clear on the face of the provision that the company could be acquired by a third party on payment of a large breakup fee. In re U.S. West, Inc., Securities Litigation, Fed. Sec. L. Rep. (CCH) P 92,429 (3rd Cir. 2003).

(n197)Footnote 197. *Id.* at 2767 (citations omitted).

(n198)Footnote 198. See § 7.09[5][h] *infra*.

The Court specifically refrained from deciding whether an action would have been sustainable had the plaintiff lost a remedy under state law, such as an appraisal right by being induced by a misleading statement to vote in favor of the merger, or a loss of an opportunity to enjoin the transaction under state law, 111 S. Ct. at 2765-66 (citing *Swanson v. American Consumers Indus., Inc.*, 475 F.2d 516 (7th Cir. 1973); *Healey v. Catalyst Recovery of Pennsylvania, Inc.*, 616 F.2d 641, 647-48 (3d Cir. 1980)). Justice Souter pointed out that no appraisal right existed in Virginia for bank mergers in the first place, and that there was no evidence that any state remedy by way of injunctive relief had been lost (dismissing a suggestion by Justice Kennedy that such a state remedy might be lost if Virginia's standard of materiality were different from the federal standard, as having no evidence in the record to support it).

Subsequently, *Howing Co. v. Nationwide Corp.*, 972 F.2d 700 (6th Cir. 1992), held that a Section 13(e) damage action should be sustained based on loss of the state remedy of appraisal, despite a strong dissent claiming that the appraisal remedy had been deliberately abandoned in favor of pursuing the Section 13(e) claim (the court finding that Sections 13(e) and 14(a) are governed by similar rules.) The Sixth Circuit concluded that minority shareholders who lost certain state appraisal rights when they were frozen out in a 1982 "going private" transaction still have valid proxy claims under Section 13(e) of the Exchange Act, even though the majority shareholders did not need any minority votes to meet shareholder approval requirements for the transaction. The court found that the minority shareholders' loss of their state law appraisal remedy in connection with the freeze-out merger satisfied Section 13(e)'s causation requirement.

The dispute started when Nationwide Corp. ("Nationwide") merged in 1982 with one of its parent companies, Nationwide Mutual Ins. Co. ("Nationwide Mutual"). Nationwide Mutual and another company, Nationwide Mutual Fire Ins. Co. ("Nationwide Fire"), together owned 85 percent of Nationwide immediately before the merger. In November 1982, Nationwide's directors approved the freeze-out, which called for Nationwide Mutual and Nationwide Fire to acquire the approximately 15 percent of Nationwide shares still publicly held. Shareholder approval of the transaction required a favorable vote from a simple majority of the shares; hence, with the combined 85 percent ownership of Nationwide's two parents, the outcome of the shareholder vote was a foregone conclusion. After approval of the merger, two Nationwide shareholders brought a class action alleging that Nationwide and Nationwide Mutual violated Section 13(e) and breached their fiduciary duty under state law.

The district court granted summary judgment in favor of the defendants, ruling that the premerger proxy solicitation's compliance with Rule 13e-3 was adequate, and that any omissions were not material. After also ruling that statutory appraisal under Ohio law was the plaintiff's only state law remedy--a remedy they failed to assert--the district court dismissed the complaint. The Sixth Circuit decided that the reasoning and result in *Virginia Bankshares* did not preclude the Nationwide minority shareholders from bringing their Section 13(e) claims. The Nationwide plaintiffs argued that causation should be recognized when a misleading proxy statement induces minority shareholders to forfeit a state law remedy such as appraisal. Agreeing with the plaintiffs, the Sixth Circuit concluded that the Supreme Court in *Virginia Bankshares* did not intend to close the door on the minority shareholders who lacked the power to block a transaction. Thus, loss of a state law remedy can support a Section 13(e) action.

In *Benton Inv. Co. v. Interstate-Johnson Lane Inc.*, 24 *Sec. Reg. & L. Rep. (BNA)* 1552 (M.D. N.C. 1992), the court found that the plaintiff had shown a likelihood of success on its claims that the proxy solicitation was defective because one of two general partners allegedly failed to disclose that removing the other general partner (the plaintiff) from the limited partnership would trigger default provisions in a partnership loan agreement. In a related claim about a second limited partnership, the plaintiff failed to show a likelihood of success where it alleged that the proxies failed to disclose the defendant's financial interest in plaintiff's removal as general partner, misstated the administrative savings that the limited partnership would have as a result of plaintiff's removal, falsely stated that the defendant had certain management experience that it lacked, and falsely stated that the defendant had negotiated first mortgage financing for a shopping mall.

(n203)Footnote 203. For further discussion of causation and culpability, see § 7.09[6] *infra*.

(n204)Footnote 204. Section 21(d) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F, 15 *U.S.C. § 78u(d)*, authorizes a Commission action for an injunction whenever any person "is engaged or is about to engage" in a violation of the Act or the rules and regulations under the Act. See the discussion in § 7.09[5][f][i] *supra*. As previously discussed in § 7.09[5][b][i] *supra*, the Commission is not required to show that irreparable injury is threatened, thus dispensing with even a prospective showing of causation. Although a private party must demonstrate threatened irreparable harm, see § 7.09[5][b][ii] *supra*, to obtain injunctive relief, that is a less burdensome requirement than proving after the fact that a violation caused specific injury. See *Ash v. GAF Corp.*, 723 *F.2d* 1090 (3d Cir. 1983) . There is, moreover, an inclination on the part of the courts to take preventive action in the early stages of a proxy violation, before the court's alternatives are reduced by corporate action. See *Electronic Specialty Co. v. International Controls*, 409 *F.2d* 937 (2d Cir. 1969) (Friendly, J.); *Denison Mines Ltd. v. Fibreboard Corp.*, 388 *F. Supp.* 812 (D. Del. 1974) .

(n205)Footnote 205. See § 7.09[5][f][ii][A] *supra*. As explained in that discussion, the focus of the concept of "materiality" is on the anticipated effects of the fact in question on the deliberations of shareholders.

(n206)Footnote 206. *SEC v. Transamerica Corp.*, 163 F.2d 511 (3d Cir.) , *cert. denied*, 332 U.S. 847 (1947) .

(n207)Footnote 207. See *Ash v. GAF Corp.*, 546 F. Supp. 89, 94 (E.D. Pa. 1982) , *aff'd*, 723 F.2d 1090 (3d Cir. 1983) . GAF had mailed its annual report by third-class mail and its proxy statement five days later by first class mail. Plaintiff Ash complained when the annual report arrived long after the proxy statement, and claimed that GAF failed to comply with the rule requiring that the annual report "precede the proxy solicitation," a complaint that the court rejected as not significant in the absence of evidence that the violation reasonably could be thought to have affected the election. The opinion goes on to state that "courts in this circuit, as well as in other circuits, have rejected the principle that a violation of the rules is sufficient in itself. Something more must be shown: that the integrity of the election was impaired." 546 F. Supp. at 92 .

See § 7.09[5][b][i] *supra*, concerning the Commission's relatively light burden for obtaining relief.

(n208)Footnote 208. Cf. *Hecht Co. v. Bowles*, 321 U.S. 321, 64 S. Ct. 587, 88 L. Ed. 754 (1944) (standards of the public interest, not the requirements of private litigation, determine whether injunction will issue).

(n209)Footnote 209. 609 F.2d 650 (2d Cir. 1979) , *cert. denied*, 445 U.S. 951 (1980) .

(n210)Footnote 210. 609 F.2d at 654 (quoting *Mills v. Electric Auto-Lite Co.*, 396 U.S. 375, 90 S. Ct. 616, 24 L. Ed. 2d 593 (1970)) .

Accord *Gaines v. Haughton*, 645 F.2d 761, 775-76 (9th Cir. 1981) , *cert. denied*, 454 U.S. 1145 (1982) .

In *Sisters of the Precious Blood, Inc. v. Bristol-Myers Co.*, 431 F. Supp. 385 (S.D.N.Y. 1977) , the court held that an issuer's alleged misrepresentations in a proxy statement in connection with its opposition to a shareholder's defeated proposal did not entitle the shareholder to an injunction requiring the issuer to resubmit the proposal to stockholders, since the proposal was precatory and not mandatory. Therefore, even if the proposal, which *requested* the issuer to report to shareholders certain information concerning the sales of one of its product lines, had carried, it would not have bound the corporation to provide the requested report. As a result, plaintiff could not show transaction causation, *i.e.*, that the proxy solicitation and vote resulted in some action by the issuer.

But see Trans World Corp. v. Odyssey Partners, 561 F. Supp. 1315 (S.D.N.Y. 1983) , in which the court, distinguishing *Sisters of the Precious Blood*, declined to dismiss Section 14(a) claims based on the defendants' solicitation of the issuer's shareholders to support a nonbinding resolution requesting the issuer's board of directors to develop a program for splitting the issuer into two separate, independent entities. The court observed that unlike *Sisters of the Precious Blood*, which involved a resolution merely requesting an information report, the present case involved a proposal concerning a change in the management or structure of the corporation, and that substantial shareholder support for the action would exert a substantial influence on management policies.

In *J.I. Case v. Borak*, 377 U.S. 426, 84 S. Ct. 1555, 12 L. Ed. 2d 423 (1964) , the Supreme Court noted:

The Commission advises that it examines 2,000 proxy statements annually and each of them must necessarily be expedited. Time does not permit an independent examination of the facts set out in the proxy material and this results in the Commission's acceptance of the representation contained therein at their face value, unless contrary to other material on file with it.

377 U.S. at 432, 84 S. Ct. at 1560, 12 L. Ed. 2d at 428 .

The transaction at issue in *Borak* occurred prior to 1964, the year in which issuers of over-the-counter securities became subject to the proxy, reporting and short swing insider trading provisions of the Exchange Act, thereby increasing the Commission's burden in reviewing submitted materials. The Commission's Annual Report for the year 1982 states that it handled a record 65,000 full disclosure filings during fiscal year 1982, a 5% increase over the 62,000 handled in fiscal 1981. The most complex filings, including merger proxy statements, were also at record levels.

(n240)Footnote 240. *General Time Corp. v. Talley Indus., Inc.*, 403 F.2d 159, 163 (2d Cir. 1968) , cert. denied, 393 U.S. 1026 (1969) (per Judge Friendly); *Twentieth Century Fox Film*, 334 F. Supp. at 1401-02 ("In this connection, the Court thinks it is significant that the Securities and Exchange Commission, which has these statements before it and is apprised of plaintiff's contentions... has taken no action... ."); *Brooks v. (n242)Footnote 242. *Electronic Specialty Co. v. International Controls*, 409 F.2d 937, 947 (2d Cir. 1969) .

The considerations on a motion for preliminary relief under the proxy rules differ from those on a motion for preliminary relief against a tender offer based on antitrust grounds, which requires that the losing party contemplate prolonged trial of complex facts under the antitrust laws. The attendant delay following the grant of a preliminary injunction on antitrust grounds "spells the almost certain doom of a tender offer." *Missouri Portland Cement Co. v. Cargill, Inc.*, 498 F.2d 851, 870 (2d Cir.) , cert. denied, 419 U.S. 883, 95 S. Ct. 150, 42 L. Ed. 2d 123 (1974) .

See also *FMC Corp. v. R.P. Scherer Corp.*, 545 F. Supp. 318 (D. Del. 1982) , in which a preliminary injunction enjoining a shareholder meeting at which antitakeover amendments to a target company's certificate of incorporation

were to be voted on was denied since irreparable harm would not otherwise ensue, *i.e.*, if the proxy materials soliciting the vote were later found misleading:

(1) the tender-offeror could seek to have the vote voided and the amendments resubmitted for a second vote, and

(2) the target company's shareholders could seek damages if the tender offeror withdrew its offer and the shareholders were thereby deprived of the opportunity to tender their shares at a premium.

See *Steadman Sec. Corp. v. Diebold Venture Capital Corp.*, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,815 (S.D.N.Y. Oct. 20, 1976) (preliminary injunction denied), relying on *Sonesta v. Wellington*, 483 F.2d 247 (2d Cir. 1973), for its two-pronged test.

See also *Camelot Indus. Corp. v. Vista Resources, Inc.*, 535 F. Supp. 1174 (S.D.N.Y. 1982) (where target company

violated Section 14(a) and Rule 14a-9 by falsely stating in proxy statement issued in connection with special shareholders' meeting called to vote on proposed anti-takeover amendments to issuers charter, that it had no knowledge of any planned or threatened takeover, and tender offeror, a controlling shareholder, made false and misleading statements in proxy material opposing the proposed amendments, proper remedy was postponement of the meeting and resubmission by both parties of corrected proxy material).

See also Dynamics Corp. of America v. CTS Corp., 794 F.2d 250 (7th Cir. 1986) , in which the court held that a letter to shareholders and a press release by incumbent directors during a proxy contest, which included an artificially inflated estimate of the value per share of the issuer's stock in the event of a sale of the issuer, were materially misleading. The court enjoined the issuer from voting any proxies it received after publication of the press release, ordered to issuer to send corrective material to shareholders, and enjoined the issuer from any contact with shareholders until the corrective material was received.

See also GAF Corp. v. Heyman, 724 F.2d 727 (S.D.N.Y. 1983) , in which the court reversed the decision of the district court which had voided the proxies of a dissident director elected by the issuer's shareholders, holding that it was immaterial that the dissident had failed to disclose in his proxy statement that he was the defendant in an action alleging his breach of a fiduciary duty in administering a family trust.

Where the defects in the proxy material have been remedied in the material covering a superseding meeting, the court will not interfere. *Schy v. Susquehanna Corp.*, 419 F.2d 1112 (7th Cir. 1970) , *cert. denied*, 400 U.S. 826 (1970) .

(n250)Footnote 250. *See, e.g., Union P. R. Co. v. Chicago & N.W. Ry. Co.*, 226 F. Supp. 400 (N.D. Ill. 1964) ; *Textron, Inc. v. American Woolen Co.*, 122 F. Supp. 305 (D. Mass. 1954) (partial invalidity of proxies).

(n251)Footnote 251. *See, e.g., Studebaker Corp. v. Gittlin*, 360 F.2d 692 (2d Cir. 1966) ; *Coalition to Advocate Pub. Util. Responsibility, Inc. v. Engels*, 364 F. Supp. 1202 (D. Minn. 1973) . *SEC v. O'Hara Re-Election (or Proxy) Committee*, 28 F. Supp. 523 (D. Mass. 1939) .

(n252)Footnote 252. *See, e.g., Newgard v. Electro-Nucleonics*, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,805 (S.D.N.Y. Dec. 7, 1976); *Studebaker Corp. v. Allied Prods. Corp.*, 256 F. Supp. 173 (W.D. Mich. 1966) ; *Union P. R. Co. v. Chicago & N.W. Ry. Co.*, 226 F. Supp. 400 (N.D. Ill. 1964) ; *Central Foundry Co. v. Gondelman*, 166 F. Supp. 429 (S.D.N.Y. 1958) , *modified sub nom. Securities & Exchange Com. v. Central Foundry Co.*, 167 F. Supp. 821 (1958) . *See also General Time Corp. v. Talley Indus., Inc.*, 403 F.2d 159 (2d Cir. 1968) , *cert. denied*, 393 U.S. 1026 (1969) (postponement denied).

In *Mack v. Mishkin*, 172 F. Supp. 885 (S.D.N.Y. 1959) , a preliminary injunction against the use of false and misleading proxies was denied on the grounds that plaintiff had failed to establish a fair probability of success on the merits. An additional reason given for denial of the injunction was the fact that the election results could always be set aside later, a resolicitation ordered and a new election scheduled. *See McConnell v. Lucht*, 320 F. Supp. 1162, 1166 (S.D.N.Y. 1970) ; *Kauder v. United Board & Carton Corp.*, 199 F. Supp. 420, 424 (S.D.N.Y. 1961) ; *see also Steadman Sec. Corp. v. Diebold Venture Capital Corp.*, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 98,815 (S.D.N.Y. Oct. 20, 1976); *but see Union P. R. Co. v. Chicago & N.W. Ry. Co.*, 226 F. Supp. 400 (N.D. Ill. 1964) (rejected this course of action as causing undue expense to the corporation).

(n253)Footnote 253. *See* 9 L. Loss & J. Seligman, *Securities Regulation* 4322 (3d ed. 1992); *see also Dann v. Studebaker-Packard Corp.*, 288 F.2d 201 (6th Cir. 1961) ; *Howard v. Furst*, 238 F.2d 790 (2d Cir. 1956) , *cert. denied*, 353 U.S. 937 (1956) .

Professor Loss has postulated that if courts can grant premeeting and postmeeting relief, they can grant necessary relief, in appropriate cases, *during* the meeting, *i.e.*, to enjoin the inspectors of elections from counting proxies that were unlawfully solicited. 9 L. Loss & J. Seligman, *supra*, at 4322 .

(n254)Footnote 254. 377 U.S. 426, 84 S. Ct. 195, 11 L. Ed. 2d 143 (1964) .

(n255)Footnote 255. In devising retrospective relief, the Supreme Court in *Mills v. Electric Auto-Lite Co.*, 396 U.S. 375, 386, 90 S. Ct. 616, 24 L. Ed. 2d 593, 603 (1970) , noted:

the federal courts should consider the same factors that would govern the relief granted for any similar illegality or fraud. One important factor may be the fairness of the terms of the merger. Possible forms of relief will include setting aside the merger or granting other equitable relief, but, as the Court of Appeals below noted, nothing in the statutory policy requires the court to unscramble a corporate transaction merely because a violation occurred. 403 F.2d 429, 436 . In selecting a remedy, the lower courts should exercise 'the sound discretion which guides the determination of courts of equity' keeping in mind the role of equity as 'the nice adjustment and reconciliation between the public interest and private needs as well as between competing private claims.' *Hecht Co. v. Bowles*, 321 U.S. 321, 329-330 ; 64 S. Ct. 587, 88 L. Ed. 754, 760 (1944) quoting from *Meredith v. Winter Haven*, 320 U.S. 228, 235, 64 S. Ct. 7, 88 L. Ed. 9 (1945) .

396 U.S. at 386, 90 S. Ct. at 622, 24 L. Ed. 2d 603 .

In *Dann v. Studebaker Packard Corp.*, 288 F.2d 201 (6th Cir. 1961) , the court recognized the right of a federal court to enter judgment declaring the validity or invalidity of illegal proxies. *But cf. Browning Debenture v. DASA Corp.*, 524 F.2d 811 (2d Cir. 1975) , where a postmeeting request to declare that a shareholder's meeting was conducted illegally was denied on the ground that declaratory relief, in such an instance, would serve no enforcement purpose. *See Edelman v. Salomon*, 559 F. Supp. 1178 (D. Del. 1983) (charter amendment obtained through violation of the proxy rules decreed void).

See also Pantry Pride Inc. v. Rooney, 598 F. Supp. 891 (S.D.N.Y. 1984) .

(n256)Footnote 256. *Mills v. Electric Autolite Co.*, 396 U.S. at 388, 90 S. Ct. at 623, 24 L. Ed. 2d at 604 : "a determination of what relief should be granted... must hinge on whether setting aside the merger would be in the best interest of the shareholders as a whole. ... [T]he merger should be set aside only if a court of equity concludes from all the circumstances, that it would be equitable to do so."

On remand from the Supreme Court, the Seventh Circuit in *Mills v. Electric Auto-Lite Co.*, 552 F.2d 1239 (7th Cir. 1977) , overturned the district court's award of damages. It supported the lower court's finding that the commingling of assets made it impossible to establish any direct injury resulting from the merger but disagreed with the lower court's determination that the merger terms were unfair at the time the merger took place. The court applied a formula suggested by Professors Brudney and Chirelstein in *Fair Shares in Corporate Mergers and Takeovers*, 88 Harv. L. Rev. 297, 308-09 (1974), and computed that the market value of the stock received by an Auto-Lite shareholder in the merger was higher than both the value of his original holdings, and the market value of the stock received by a Mergenthaler Linotype Co. (the other party to the merger) shareholder whose premerger stock equaled the value of the Auto-Lite shareholder's premerger stock.

Yamamoto v. Omiya, 564 F.2d 1319 (9th Cir. 1977) , upheld a lower court decision, made before trial, that rescission of a contract for the sale of a building was an inappropriate remedy for use of an allegedly misleading proxy statement in soliciting shareholder approval for that sale.

Justice Hufstедler dissented from this part of the opinion on the grounds that there was no authority, either in the case law or the Federal Rules of Civil Procedure, that would allow a court to deny equitable relief before a trial on the merits is held. She cited the following excerpt from *J.I. Case Co. v. Borak*, in her opinion:

Our finding that federal courts have the power to grant all necessary remedial relief [in a securities fraud case] is not to be construed as any indication of what we believe to be the necessary and appropriate relief in this case. We are concerned here only with a determination that federal jurisdiction for the purpose does exist. *Whatever remedy is necessary must await the trial on the merits.*

Id. at 1327 (quoting *J.I. Case Co. v. Borak*, 377 U.S. at 435, 84 S. Ct. at 1561, 12 L. Ed. 2d at 429 (emphasis added)).

The traditional means for questioning the incumbency of directors is the extraordinary writ of quo warranto (supplanted by specific statutory provisions in some states). But the federal courts have long asserted that they have the powers, sitting as chancellors, to rule upon the validity of such matters if they have subject matter jurisdiction. *See Andrews v. Drake*, 83 F.2d 767, 773 (6th Cir. 1936) , *cert. denied*, 299 U.S. 572 (1936) .

(n283)Footnote 283. The rule regarding the award of attorneys' fees is that a litigant is not entitled to collect a reasonable attorneys' fee from the loser. There are five exceptions to this rule:

- (1) the award of attorneys' fees is specifically authorized by statute;
- (2) the trustee of a fund or property may recover attorneys' fees from the fund or property itself;
- (3) a party preserving or recovering a fund for the benefit of others, in addition to himself, may recover attorneys' fees from the fund or property itself or directly from the other parties enjoying the benefit;
- (4) attorneys' fees may be awarded for the "willful disobedience of a court order as part of the fine to be levied on the defendant"; or
- (5) attorneys' fees may be awarded when the losing party has "acted in bad faith, vexatiously, wantonly, or for oppressive reasons."

Alyeska Pipeline Serv. v. Wilderness Society, 421 U.S. 240, 257-59, 95 S. Ct. 1612, 1621-22, 44 L. Ed. 2d 141, 153-54 (1975) .

The Court has the discretion to award attorneys' fees in a civil action pursuant to Section 18(a).

(n286)Footnote 286. 444 U.S. 472, 100 S. Ct. 745, 62 L. Ed. 2d 676 (1980) .

(n287)Footnote 287. 710 F.2d 271 (6th Cir. 1983) . *Smillie* involved alleged proxy violations relating to a stock option plan, which the court refused to rescind, notwithstanding the finding of some violations.

See also *Barton v. Drummond Co.*, 636 F.2d 978 (5th Cir. 1981) . *Barton* held that the abandonment of a "freeze out" merger could be a sufficient benefit to justify an award of attorneys' fees under state law, which it found to be the same as the *Mills* rule.

(n288)Footnote 288. See § 9.02[3] *infra*.

(n289)Footnote 289. *United States v. W. T. Grant Co.*, 345 U.S. 629, 633, 345 U.S. 629, 633, 73 S. Ct. 894, 97 L. Ed. 1303, 1953 *Trade Cas.* (CCH) P67493 (1953) : "[T]he moving party must satisfy the court that relief is needed. The necessary determination is that there exists some cognizable danger of recurrent violation, something more than the mere possibility which serves to keep the case alive."

In *SEC v. Parklane Hosiery*, 422 F. Supp. 477 (S.D.N.Y. 1976), *aff'd*, 558 F.2d 1083 (2d Cir. 1977), the court found material misstatements in proxy statements solicited for the purpose of seeking approval of a merger converting the company to privately owned status. The court denied injunctive relief and the appointment of a special counsel to determine the fair value of defendant's shares, notwithstanding the finding that a violation had occurred. The court found that: (1) no urgency for the relief requested was shown, (2) there were then pending three private actions and a separate appraisal proceeding, (3) the controlling shareholder was merely an investor and his violation was an isolated occurrence, and (4) that no other improprieties were shown.

See also *SEC v. Comstock Tunnel & Drainage*, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,712 (D.D.C. Jan. 9, 1973), where the court found material misstatements in the proxy materials but denied injunctive relief since defendant was willing to resolicit the proxies and not carry out the action approved as the result of the first solicitation. Cf. also *SEC v. Koracorp Ind.*, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,532 (N.D. Cal. Mar. 26, 1976), *rev'd*, 575 F.2d 692 (9th Cir. 1978), *cert. denied sub nom. Helfat v. (n293)Footnote 293. *Id.*; *Hecht v. Bowles*; 321 U.S. 321, 327, 64 S. Ct. 587, 591, 88 L. Ed. 754, 759 (1944); *SEC v. Management Dynamics*, 515 F.2d 801 (2d Cir. 1975); *SEC v. Manor Nursing Centers*, 340 F. Supp. 913 (S.D.N.Y. 1971), *aff'd*, 458 F.2d 1082 (2d Cir. 1972); *SEC v. Texas Gulf Sulphur*, 401 F.2d 833, 849 (2d Cir. 1968) (en banc), *cert. denied sub nom. Coates v. SEC*, 394 U.S. 976 (1969); *SEC v. Boren*, 283 F.2d 312, 314 (2d Cir. 1960); *Culpepper*, 270 F.2d at 243.

(n294)Footnote 294. 515 F.2d at 807. Other factors the court may consider are:

(1) The intent or bad faith of the violator, *Securities & Exchange Com. v. Mono-Kearsarge Consol. Mining Co.*, 167 F. Supp. 248 (D. Utah 1958) (defendant continued unlawful activities even after suit instituted); see also *SEC v. Manor Nursing Centers*, 340 F. Supp. 913 (S.D.N.Y. 1971), *aff'd*, 458 F.2d 1082 (2d Cir. 1972);

(2) the demeanor and cooperation of the violator, *SEC v. Comstock Tunnel & Drainage*, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,712 (D.D.C. Jan. 9, 1973) (defendant willingly corrected proxies and resolicited them);

(3) failure to disclose potential personal gain to violator, *SEC v. Koenig*, 469 F.2d 198 (2d Cir. 1972); see also *SEC v. Manor Nursing Centers*, *supra*; *SEC v. General Refractories*, 400 F. Supp. 1248 (D.D.C. 1975);

(4) previous injunctions or violations, *see, e.g., SEC v. Bangor Punta Corp.*, 331 F. Supp. 1154, 1162 (S.D.N.Y. 1971), *aff'd in part and rev'd in part sub nom. Chris-Craft Indus. v. Piper Aircraft Corp.*, 480 F.2d 341 (2d Cir. 1973), *cert. denied sub nom. SEC v. Bangor Punta Corp.*, 414 U.S. 924 (1973);

(5) defendant is not in a position to violate the law in the future, *SEC v. Parklane Hosiery*, 422 F. Supp. 477 (S.D.N.Y. 1976), *aff'd*, 558 F.2d 1083 (2d Cir. 1977) (defendant merely an investor after transaction in question); or

(6) that the private detriment outweighs any potential benefit to the public, *SEC v. Keller Indus. Inc.*, 342 F. Supp. 654 (S.D.N.Y. 1972).

In *SEC v. American Beef Packers, Inc.*, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 96,079 (D. Neb. May 4, 1977), the court enjoined the former president of a corporation from ever again becoming an officer of that corporation because of his past participation in the distribution of misleading proxy materials unless upon a showing to the court he demonstrates that procedures have been instituted to prevent a recurrence of the violations. An injunction was not entered against the corporation because its new management had not participated in any violations. In *SEC v. Falstaff Brewing Corp.*, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 96,117 (D.D.C. Aug. 1, 1977), *aff'd*, 629 F.2d 62 (D.C. Cir. 1980), *cert. denied sub nom. Kalmanovitz v. SEC*, 449 U.S. 1012 (1980), the court issued a preliminary injunction that prohibited:

(1) the defendant from further use of a proxy statement to solicit proxies; and

(2) the voting of any shares already solicited.

The court found numerous proxy violations and noted that the new management was not sufficiently free from any relation to these violations to justify denying injunctive relief.

(n295)Footnote 295. *Parklane Hosiery Co. v. Shore*, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979).

(n296)Footnote 296. Section 21(g) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F, 15 U.S.C. § 78u(g).

(n297)Footnote 297. 377 U.S. 426, 84 S. Ct. 195, 12 L. Ed. 2d 423 (1964).

(n298)Footnote 298. *See* § 7.09[5][a][ii] *supra*.

(n299)Footnote 299. *Royal Business Group Inc. v. Realist Inc.*, 933 F.2d 1056 (1st Cir. 1991), where Judge Selya stated:

To imply a private right of action in favor of a disappointed proxy contestant seeking to recover damages for an election contest that, in retrospect, it would have preferred not to wage would stretch section 14(a) beyond any reasonable limit. Because the plaintiffs brought suit in their capacity as proxy contestants, and did not initiate suit in their capacity as shareholders, the plaintiffs did not come within the class for whose particular benefit section 14(a) was enacted. Thus, although there is a private right of action under section 14(a) for shareholders, one will not be implied for "regretful proxy contestants."

Here the plaintiff's specific claim arose from its role as a proxy contestant, not from its role as a shareholder. Thus, the relief sought would not serve the statutory purpose of safeguarding the corporate voting process. The court also found

that the plaintiffs failed to establish a causal nexus between their alleged injury and some corporate transaction authorized or defeated as a result of the allegedly false and misleading proxy statements.

See the discussion regarding *Paskowitz v. Wohls*, Md. Spec. App., No. 841, 5/5/03, BNA Corp. Counsel Weekly 5/21/03 p. 161, at § 7.09[5] *supra* .

(n300)Footnote 300. *General Time Corp. v. Talley Indus., Inc.*, 403 F.2d 159, 161 (2d Cir. 1968) , cert. denied, 393 U.S. 1026 (1969) ; *Ameribanc Investors Group v. Zwart*, 706 F. Supp. 1248 (E.D. Va. 1989) .

(n301)Footnote 301. In *Diceon Electronics, Inc. v. Calvary Partners, L.P.*, 772 F. Supp. 859 (D. Del. 1991) , defendants followed up an unsuccessful proxy contest with a tender offer. Plaintiff sought damages and injunctive relief for allegedly false statements made both in proxy materials and in tender offer materials filed by defendants with the SEC. The court dismissed the Section 14(a) claim for damages as being beyond the scope of the implied right of action approved by the Supreme Court in *Borak*, 377 U.S. 426 (1969) (citing *Virginia Bankshares v. Sandberg*, 501 U.S. 1083, 111 S. Ct. 2749, 2761, 115 L. Ed. 2d 929 (1991)) . The contrary decision in *CNW Corp. v. Japonica Partners, L.P.*, 874 F.2d 193 (D. Del. 1990) , was disapproved as contrary to the reasoning in the subsequently decided *Virginia Bankshares* case.

(n302)Footnote 302. See § 7.09[5][a][ii] *supra*.

(n303)Footnote 303. 167 F.3d 125 (2d Cir. 1999) , where the court found both transaction causation and loss causation to support a damage claim. See also *Zemel Family Trust v. Philips Int'l Realty Corp.*, 2000 U.S. Dist. LEXIS 17320 (S.D.N.Y. 2000) , an action for injunctive relief where the court, citing *Gerstle v. Gamble-Skogmo, Inc.*, 478 F.2d 1281, 1298-1301 (2d Cir. 1973) , stated: "[i]n the Second Circuit, a plaintiff may satisfy the *scienter* requirement of 14(a) by showing negligence." Query whether the terms "*scienter*" and "negligence" are not mutually exclusive. Thus, Judge Bartel stated, that "the basis for incorporating *scienter* into a *Rule 10b-5* action does not exist in a *Rule 14a-9* suit" and that "[n]egligence alone either in making a misrepresentation or in failing to disclose a material fact in connection with proxy solicitation is sufficient to warrant recovery." *Gerstle v. Gamble-Skogmo, Inc.*, 298 F. Supp. 66, 97 (E.D.N.Y. 1969) (quoted with approval on appeal).

(n315)Footnote 315. 2005 U.S. Dist. LEXIS 20659, at *18 .

(n316)Footnote 316. C.A. No. 218, 906 A.2d 766, 2006 Del. LEXIS 124 (Del. Mar. 8, 2006) .

(n317)Footnote 317. *Gould v. American Hawaiian S.S. Co.*, 351 F. Supp. 853, 860 (D. Del. 1972) , aff'd, 535 F.2d 761 (3d Cir. 1976) .

Negligence, as the criterion for determining culpability under Section 14(a), appears to be the accepted standard. See *Gerstle v. Gamble-Skogmo, Inc.*, 478 F.2d 1281 (2d Cir. 1973) ; *Del Noce v. Delyar Corp.*, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,670 (S.D.N.Y. 1976); *Berman v. Thomson*, 403 F. Supp. 695 (N.D. Ill. 1975) ; *Chris-Craft Indus., Inc. v. Independent Stockholders Comm.*, 354 F. Supp. 895 (D. Del. 1973) ; *Norte & Co. v. R.L. Huffines*, 304 F. Supp. 1096 (S.D.N.Y. 1968) , aff'd in part and remanded in part, 416 F.2d 1189 (2d Cir. 1969) , cert. denied, 397 U.S. 989 (1970) (dicta); see also *Gruss v. Curtis Publishing Co.*, 534 F.2d 1396 (2d Cir. 1976) , cert. denied, 429 U.S. 887 (1976) .

Adams v. Standard Knitting Mills, 623 F.2d 422 (6th Cir. 1980) , cert. denied, 449 U.S. 1067, 101 S. Ct. 795, 66 L. Ed. 2d 611 (1980) , which held that scienter is required for liability of accountants and other "outsiders." But see *Fradkin v. Ernst*, 571 F. Supp. 829 (N.D. Ohio 1983) (negligence is a sufficient basis when the corporate issuer is the defendant, distinguishing *Adams*).

See also *Herskowitz v. Nutri/System*, 857 F.2d 179 (3d Cir. 1988) , cert. denied, 489 U.S. 1054 (1989) (scienter not required for liability of a bank that gave a fairness opinion in a leveraged buyout).

(n318)Footnote 318. 351 F. Supp. 853 (D. Del. 1972) , aff'd, 535 F.2d 761 (3d Cir. 1976) .

(n319)Footnote 319. *Gould* also recognized that it will not always be a director who is sued. "It should be noted that the liability of any individual defendant is dependent upon his due diligence or exercise of reasonable care, and therefore, the negligence standard embodies a criterion which would permit consideration of the individual's particular position with the corporation and his relationship to the pertinent information held to be erroneously or incompletely stated in the proxy materials." 351 F. Supp. at 865 .

See, e.g. *Chris-Craft Indus. v. Independent Stockholders Comm.*, 354 F. Supp. 895 (D. Del. 1973) (director nominees, although not liable for every incorrect statement in proxy, had duty to verify charges of misstatements made by other participants).

(n320)Footnote 320. *Gould*, 351 F. Supp. at 859 ; see also *Gerstle v. Gamble-Skogmo, Inc.*, 478 F.2d at 1281 , 1300 (2d Cir. 1973).

See also *Shidler v. All American Life & Fin. Corp.*, 775 F.2d 917 (8th Cir. 1985) , *aff'd in part, rev'd in part and remanded sub nom. Nelson v. All American Life & Financial Corp.*, 889 F.2d 141 (8th Cir. 1989) (strict liability not the appropriate standard of liability under Section 14(a) and Rule 14(a-q)).

(n321)Footnote 321. *Gould*, 351 F. Supp. at 861-62 . Cf. *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 96 S. Ct. 1375, 47 L. Ed. 2d 668 (1976) .

"Section 10(b) makes unlawful the use or employment of 'any manipulative or deceptive device or contrivance' in contravention of Commission rules. The words 'manipulative or deceptive' used in conjunction with 'device or contrivance' strongly suggest that § 10(b) was intended to proscribe knowing or intentional misconduct." *Ernst & Ernst*, 425 U.S. at 197, 96 S. Ct. at 1383, 47 L. Ed. 2d at 679 .

The *Gould* court also rejected any analogy to Section 18 of the Exchange Act.

[I]n spite of portions of overlap, §§ 18 and 14(a) involve the regulation of two fundamentally different types of securities activities. Section 18 provides broad coverage for any document filed pursuant to the 1934 Act and subjects an individual to liability to anyone buying or selling a security in reliance on a misleading statement in such a document. Section 14(a) is considerably more limited as it encompasses solely the solicitation of proxies and proxy materials. In light of the Supreme Court's admonitions concerning the paramount necessity to insure the sanctity of the mechanisms of corporate suffrage and for the dissemination of information to shareholders, see *J.L. Case Co. v. Borak*, *supra* , the conclusion that a more demanding standard of conduct might be imposed under § 14(a) than under § 18 is readily acceptable.

351 F. Supp. at 864 .

See also *Gerstle*, 478 F.2d at 1299-1300 .

(n322)Footnote 322. The *Gould* court also noted that Section 14(a) placed primary responsibility for the accuracy of proxy statements on the individuals soliciting the proxies and not on attorneys or accountants who prepared them. 351 F. Supp. at 865, 867 .

In *Adams v. Standard Knitting Mills*, 623 F.2d 422 (6th Cir. 1980) , *cert. denied*, 449 U.S. 1067, 101 S. Ct. 795, 66 L. Ed. 2d 611 (1980) , the Sixth Circuit held that scienter is an element of liability in private actions under Section 14(a) and Rule 14a-9 against accountants and other outsiders. The court of appeals read the Senate Report to the Exchange Act (the "Fletcher Report") as indicating that: "its authors contemplated that 14(a) would be applied only against the knowing or reckless wrongdoing of outsiders." *Id.* at 430 . "The common denominator of all these depictions of the problem is wrongdoing with some degree of knowledge, i.e., scienter; and nowhere, not in the committee reports nor in the House or Senate debates, does it appear that Congress desired to protect the investor against negligence of accountants as well." *Id.*

It is suggested that the *Adams* opinion is guilty of a non sequitur in this instance. As amply illustrated by the legislative history of the Securities Act of 1933, it does *not* follow: (a) from the fact that Congress was exercised about

blatantly misleading and false practices, that (b) it was *only* concerned with intentional or reckless wrongdoing. See Section 11 of the Securities Act, 15 U.S.C. § 77k.

Cf. SEC v. Frank, 388 F.2d 486 (2d Cir. 1968) , where a Commission enforcement action was brought against an attorney for preparing an allegedly misleading offering circular. In its opinion the court stated: "[a] lawyer, no more than others, can escape liability for fraud by closing his eyes to what he saw and could readily understand." *Id.* at 489 .

See also *SEC v. Spectrum, Ltd.*, 489 F.2d 535 (2d Cir. 1973) ; *Wechsler v. Steinberg*, [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,449 (E.D.N.Y. Feb. 13, 1976); *SEC v. National Student Mktg. Corp.*, 402 F. Supp. 641 (D.D.C. 1975) , *aff'd*, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,612 (D.C. Cir. 1976); *SEC v. Century Inv. Transfer Corp.*, [1971-1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,232 (S.D.N.Y. Oct. 5, 1971) (preparation of opinion letters crucial to distribution of unregistered securities is sufficient to find attorney an aider and abettor where statements "go enough beyond being mere mistakes in legal judgment to constitute probable violations of the anti-fraud provisions of the securities laws").

In *H.L. Federman & Co. v. Greenberg*, 405 F. Supp. 1332 (S.D.N.Y. 1975) , allegations that a third-party corporate lender who played an integral part in a transaction for which shareholder approval was obtained was guilty of aiding and abetting in the solicitation of a false and misleading proxy statement in violation of *Rule 10b-5* stated a claim upon which relief could be granted; the complaint alleged that the corporate lender with knowledge that such statements were false and misleading had failed to disclose that fact to shareholders. *But see Beatty v. Bright*, 345 F. Supp. 1188 (S.D. Iowa 1972) (acquiring company not liable under Section 14(a) or 10(b) since facts failed to show that they exercised control over the wording of the merger partner's proxy statement).

(n336)Footnote 336. 535 F.2d 761 (3d Cir. 1976) . See also *Osofsky v. Zipf*, 645 F.2d 107 (2d Cir. 1981) ,

appealed after remand sub nom. Osofsky v. J. Ray McDermott & Co., 725 F.2d 1057 (2d Cir. 1984) , in which the court applied a "benefit-of-the-bargain" measure of damages when a misrepresentation was made in the tender offer and proxy solicitation materials as to the consideration to be forthcoming upon an intended merger since the amount of damages--the difference between what was represented as coming to the security holders and what they actually received--could be determined with certainty.

(n337)Footnote 337. *478 F.2d 1281 (2d Cir. 1973)* .

(n338)Footnote 338. *SEC v. National Sec. Indus.*, 393 U.S. 453, 89 S. Ct. 564, 21 L. Ed. 2d 668 (1969) . For a discussion of civil liability under *Rule 10b-5*, see ch. 5 *supra*.

(n339)Footnote 339. Moreover, Section 3(a)(14) of the Exchange Act defines "sale" and "sell" to "include any contract to sell or otherwise dispose of." Clearly, by adopting a merger or like agreement, the shareholders of the corporation to be merged or consolidated adopt an agreement that results in the disposition of their securities. The same result should obtain in a sale of assets in which the vendor is required by the terms of the agreement with the vendee to liquidate and distribute the consideration received for its assets to its shareholders. Again, the shareholders of the vendor, by approving the agreement, obligate themselves to the disposition of their securities. That analysis should prevail of whether the particular plaintiff voted for or against the transaction, since the action of the required majority is in fact binding on all the shareholders under modern corporation law. The reality is that the modern shareholder obligates himself to be bound by the act of a sufficient majority of his fellow shareholders when he becomes a shareholder.

To make distinctions based on minute or fragments analysis of any part of such fundamental changes in the shareholders' situation when the economic reality is that the former shareholders have in fact bound themselves to the disposition of their securities would seem contrary to the Supreme Court's recent admonition to let the economic realities of a transaction, rather than terminology, guide the interpretative process. *United Housing Found., Inc. v. Forman*, 421 U.S. 837, 95 S. Ct. 2051, 44 L. Ed. 2d 621 (1975) .

The situation of the shareholders in the surviving or vendee corporation is different from those of the selling or disappearing company, at least where the quantity or denomination of their share holdings is not affected by the transaction. But even in such cases, the economic realities of the situation may suggest a closer analysis, *e.g.*, where the corporation is formally the "acquiring" company is in fact being acquired through a shift in control or by being a smaller part of the resulting entity. See, *e.g.* *Farris v. Glen Alden Corp.*, 393 Pa. 427, 143 A.2d 25 (1958) .

CHAPTER 7A The Williams Act Amendments-- Controlling Shareholders and Tender Offers

2-7A Federal Securities Exchange Act of 1934

AUTHOR: Chang-Do Gong This chapter was prepared by Morton A. Pierce and Chang-Do Gong with the assistance of Daniel Hackney. Messrs. Pierce and Gong are partners of Dewey & LeBoeuf LLP. and Mr Hackney is an associate of Dewey & LeBoeuf LLP.

Summary of This Chapter

Prior to the adoption of the Williams Act in 1968, any person or group of persons could gain control of a company in a cash takeover bid without disclosing information about themselves or their plans for the target company. In reaction to this lack of disclosure, Congress enacted the Williams Act, which amended the Securities Exchange Act of 1934, as amended (the "Exchange Act"), by adding Sections 13(d), 13(e), 14(d), 14(e), and 14(f), which compel offerors or bidders to publicly file significant disclosures with Securities and Exchange Commission (the "Commission"). Under the Williams Act, an intricate framework of rules and regulations prevent an offeror from engaging in fraudulent activity in connection with his or her offer. Concurrently, the Williams Act helps to ensure that an offeror discloses adequate and meaningful information about his or her offer to security holders in order to facilitate an informed decision-making process. Moreover, the Williams Act provides for public disclosure of significant accumulations of issuer securities generally. *See infra* § 7A.01.

Depending on the facts and circumstances surrounding the ownership interest, a person or group of persons acquiring "beneficial ownership" of more than five percent of any class of equity security of an issuer must file certain disclosures with the Commission on either a Schedule 13D or the abbreviated Schedule 13G, pursuant to Sections 13(d) or (g) of the Exchange Act. In a filing on Schedule 13D, the acquiring person or group of persons must disclose, among other things, his or her identity, purpose in acquiring the securities, source of funds, and the amount of securities of the issuer held by such person or group of persons as of the date of the filing. Nonetheless, the rules contain exemptions from the filing requirements for any acquisition by means of a registration statement, any acquisition of an equity security by the issuer of such security, and any acquisition that, together with all other acquisitions of that class of security by the same person during the preceding twelve months, does not exceed two percent of that class of security. *See infra* § 7A.02.

If a controlling shareholder fails to make the required disclosures, the Commission may order compliance, and may obtain injunctive relief in federal court if the Commission shows a "reasonable likelihood" that the defendant will commit future violations of the rules. Additionally, violators of these rules may also be subject to private actions for

damages and/or injunctive relief. See *infra* § 7A.02.

According to the Commission, a tender offer is a broad solicitation by a bidder for the purchase of a substantial percentage of equity securities of a subject company which remains open for a limited period of time. While the term "tender offer" has never been defined in statutory provisions or Commission rules, courts generally apply the eight-factor test established in *Wellman v. Dickinson* to determine whether an acquisition program constitutes a tender offer. These factors include whether the transaction: (1) involves an active and widespread solicitation of public shareholders; (2) involves a solicitation made for a substantial percentage of the target company's stock; (3) offers a premium to the prevailing market price; (4) has fixed rather than negotiable terms; (5) is an offer contingent on the tender of a fixed minimum number of shares to be purchased; (6) is only open for a limited period of time; (7) pressures offerees to sell their stock; and (8) is accompanied by public announcement of a purchase program for the target company's securities which precedes or accompanies a rapid accumulation of large amounts of the target company's securities. No single factor is dispositive and courts do not need to conclude that all eight factors are present in order to determine that an acquisition program is a tender offer. See *infra* § 7A.03[1].

During a tender offer, a bidder solicits the subject company's shareholders to tender their shares at a fixed price, which is usually at a premium over the pre-offer market price of the underlying securities. Generally, the offer to purchase is contingent upon the shareholders tendering a particular number of shares in the transaction. The type of consideration received in the transaction determines whether or not the tender offer is a "cash offer" or an "exchange offer." In a "cash offer," the bidder seeks to acquire the target company's stock for cash, whereas in an "exchange offer," the bidder offers to exchange his or her own stock for stock in the target company. See *infra* § 7A.03.

Prior to launching a tender offer, a bidder, who would own more than five percent of a class of equity securities of the target company following successful completion of the tender offer, must file a Schedule TO with the Commission. Then the bidder must deliver a copy of the Schedule TO to the target company, its shareholders and any other bidders that filed a Schedule TO with the Commission relating to a tender offer that has not terminated for the same class of securities of the target company. The Schedule TO must disclose, among other things, the bidder's identity, the amount of the target company's securities sought and the consideration offered, the bidder's source of funds, the purpose(s) of the tender offer, and whether the bidder plans to acquire the target company's shares in order to change the target company's board of directors, divest material assets of the target company, merge with the target company or any of its subsidiaries, or change the target company's capital structure. See *infra* § 7A.03[2][a].

Further, the target company's shareholders must be provided with certain information by the bidder including, among other things, the offering price, the duration of the offer, how securities must be tendered, and the terms under which tendered securities may be withdrawn. The target's shareholders must also be informed of the identity of the bidder and of any person or group of persons soliciting shareholders on the bidder's behalf. Similar information must be furnished to the target company's shareholders by the target company if the target company intends to solicit shareholders in opposition to the tender offer. See *infra* § 7A.03.

In order to reduce the risk of market manipulation and insider trading, a bidder is prohibited from acquiring shares of the target company outside of the offer during the offering period, subject to certain exceptions. See *infra* § 7A.03.

Under Section 14(e), material misstatements or omissions and fraudulent, deceptive or manipulative practices in connection with tender offers are prohibited. A misstatement or omission is "material" if a reasonable shareholder would consider it important in deciding whether or not to tender its shares. A private right of action for violations of Section 14(e) applies not only against the bidder but also against the target company. See *infra* § 7A.03.

In regard to tender offers wherein the issuer seeks to acquire its own shares, either in a "going private" transaction or through an "issuer tender offer," the issuer must provide its shareholders with substantially the same information as would be required from an third party bidder. See *infra* § 7A.04[1].

CHAPTER 7A The Williams Act Amendments-- Controlling Shareholders and Tender Offers

2-7A Federal Securities Exchange Act of 1934 § 7A.01

AUTHOR: Chang-Do Gong This chapter was prepared by Morton A. Pierce and Chang-Do Gong with the assistance of Daniel Hackney. Messrs. Pierce and Gong are partners of Dewey & LeBoeuf LLP. and Mr Hackney is an associate of Dewey & LeBoeuf LLP.

§ 7A.01 Introduction to the Williams Act

On July 29, 1968, Congress enacted legislation known as the "Williams Act," named after its sponsor, Senator Harrison Williams. The Williams Act amended the Exchange Act by adding Sections 13(d), 13(e), 14(d), 14(e), and 14(f), n1 which require offerors or bidders in a tender offer to file significant disclosures with the Commission and provide these disclosures to the target company's shareholders and ultimately the public at large.

Congress enacted the Williams Act in reaction to a growing concern that tender offers and other large stock accumulations were not being adequately regulated under the securities laws. In fact, prior to the adoption of the Williams Act, any person or group of persons could gain control of a company in a cash takeover bid without disclosing pertinent information about themselves, their source of funds, their financial ability to complete the offer, or their future plans for the target company. n2 Even though the securities laws regulated "exchange offers" through the registration of newly issued securities with the Commission under the Securities Act of 1933, as amended (the "Securities Act"), and regulated "proxy contests" challenging an incumbent board of directors under Section 14 of the Exchange Act, n3 cash tender offers were left largely unregulated. n4 This lack of information often led to improper activity by offerors and/or coerced ill-informed decision-making on the part of tendering security holders. Accordingly, the Williams Act was designed to prevent fraudulent activity and enhance disclosure by requiring offerors to provide adequate and meaningful information about their offers to security holders in order to facilitate an informed decision-making process.

One of the most important provisions in the Williams Act is embodied in Section 13(d), which requires, among other things, a person or group of persons acquiring more than five percent ownership of a public issuer to file with the Commission and then send to the issuer a statement containing information about such person or group of persons and the reasons for making the purchase. n5

The Williams Act's other provisions provide for additional regulation and disclosure. For instance, Section 13(e) regulates self-tender offers and the purchases by an issuer of its own securities. n6 Section 14(d) imposes disclosure requirements and substantive restrictions on certain types of tender offers. n7 Section 14(e) is an antifraud provision that applies to statements or conduct in connection with any type of tender offer. n8

Additionally, the Williams Act amendments provide the Commission with rulemaking authority. Through such authority, the Commission promulgated a number of rules immediately following Congress's enactment of the Williams Act. n9 Over the years, the Commission added new rules and made various amendments to the requirements set forth in older rules. n10 In addition, Congress has made various statutory adjustments throughout the years.

A House Report on the Securities Exchange Act Amendments of 1968 (i.e., the "Williams Act") makes it clear that the Williams Act's purpose was neither to encourage nor discourage tender offers, but rather to ensure that stockholders have sufficient information in order to allow them to intelligently decide whether or not to tender their securities. n11

The House Report recognized that while the Williams Act's disclosure requirements may discourage some tender offers, ultimately "this is a small price to pay for investor protection." n12 In fact, except for a brief decline in tender offers directly following the passage of the Williams Act, n13 the disclosure requirements do not appear to have significantly impeded the number of tender offers. n14 However, in conjunction with the state takeover statutes, the Williams Act amendments thoroughly changed the manner and process by which tender offers are launched and executed. n15

(CCH) P 977,581 (July 30, 1968). Such rules include Regulation 13D, Regulation 14D, Rule 13e-1, and Rule 14f-1.

(n10)Footnote 10. See, e.g., Amendments to Beneficial Reporting Requirements, Exchange Act Release No. 34-39538 [1998 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 86,002 (Jan. 12, 1998) (amending Regulation 13D-G).

(n11)Footnote 11. A house committee report described the state of affairs prior to the adoption of the Williams Act thus:

The cash tender offer has advantages over the proxy contest as a means of obtaining control of a

corporation. One such advantage is that by using a cash tender offer the person seeking control can operate in almost complete secrecy. At present, the law does not even require that he disclose his identity, the source of his funds, who his associates are, or what he intends to do if he gains control of the corporation. As a practical matter, unless incumbent management explains its position publicly, the investor is severely limited in obtaining all of the facts on which to base a decision whether to accept or reject the tender offer.

The public shareholder must, therefore, with severely limited information, decide what course of action he should take. He has many alternatives. He can tender all of his shares immediately and hope they are all purchased. However, if the offer is for less than all the outstanding shares, perhaps only a part of them will be taken. In these instances, he will remain a shareholder in the company, under a new management which he has helped to install without knowing whether it will be good or bad for the company.

The shareholder, as another alternative, may wait to see if a better offer develops, but if he tenders late, he runs the risk that none of his shares will be taken. He may also sell his shares in the market or hold them and hope for the best. Without knowledge of who the bidder is and what he plans to do, the shareholder cannot reach an informed decision. He is forced to take a chance. For no matter what he does, he does it without adequate information to enable him to decide rationally what is the best possible course of action. This is precisely the kind of dilemma which our Federal securities laws are designed to prevent.

It was urged during the hearings that takeover bids should not be discouraged because they serve a useful purpose in providing a check on entrenched but inefficient management. It was also recognized that these bids are made for many other reasons, and do not always reflect a desire to improve the management of the company. The bill avoids tipping the balance of regulation either in favor of management or in favor of the person making the takeover bid. It is designed to require full and fair disclosure for the benefit of investors while at the same time providing the offeror and management equal opportunity to fairly present their case. H.R. REP. NO. 90-1711 (1968), *reprinted in* FEDERAL SECURITIES EXCHANGE ACT OF 1934 (A.A. Sommer, Jr., ed., Matthew Bender 1971) 5-806 *et seq.*

(n12)Footnote 12. "While the bill may discourage tender offers or other attempts to acquire control by some who are unwilling to expose themselves to the light of disclosure, the committee believes this is a small price to pay for adequate investor protection. In fact, experience under the Securities Act of 1933 and the Securities Exchange Act of 1934 has amply demonstrated that the disclosure requirements of the Federal securities acts are an aid to legitimate business transactions, not a hindrance." *Id.*

One commentator stated: "The bill will probably have some net deterrent effect on tender offers for a variety of reasons, including: (1) the additional cost of complying with the regulatory process; (2) the extra cost of extending any price increase to earlier tenders; (3) the higher probability of lawsuits over the disclosure of matters--like plans for the target company--which are inherently contingent and subject to change; and (4) the possibility that forced disclosure, *e.g.*, of plans, will raise the price the offeror has to pay to attract shares." Alan R. Bromberg, *The Securities Law of Tender Offers*, 15 N.Y.L. SCH. L. REV. 462, 468 (1969). (footnotes omitted).

(n13)Footnote 13. Robert W. Hamilton, *Some Reflections on Cash Tender Offer Legislation*, 15 N.Y.L. SCH. L. REV. 269, 276 (1969).

(n14)Footnote 14. For instance, according to the Thomson ONE financial news and data network, the number of

significant tender offers in the United States has increased measurably since era of the Williams Act's passage.

(n15)Footnote 15. See Dan H. Reuben & Gary M. Elden, *How to be a Target Company*, 23 N.Y.L. SCH. L. REV. 423 (1978).

CHAPTER 7A The Williams Act Amendments-- Controlling Shareholders and Tender Offers

2-7A Federal Securities Exchange Act of 1934 § 7A.02

AUTHOR: Chang-Do Gong This chapter was prepared by Morton A. Pierce and Chang-Do Gong with the assistance of Daniel Hackney. Messrs. Pierce and Gong are partners of Dewey & LeBoeuf LLP. and Mr Hackney is an associate of Dewey & LeBoeuf LLP.

§ 7A.02 Filings by Five Percent Shareholders

When a person or group of persons, known as a "five percent shareholder," acquires beneficial ownership of more than five percent of any class of equity security of an issuer, it must file a report of beneficial ownership on either Schedule 13D or 13G pursuant to Sections 13(d) or (g) of the Exchange Act with the Commission and provide the issuer with the information required by the report, including the identity of the five percent shareholder, its purpose in acquiring the shares, its source of funds, and the amount of the issuer's shares held by the five percent shareholder as of the date of the report. The rules also contain exemptions from the filing requirements for any acquisition by means of a registration statement, any acquisition of an equity security by the issuer of the security, and any acquisition that, together with all other acquisitions of that class of security by the same person during the preceding twelve months, does not exceed two percent of that class or is otherwise material under the circumstances.

If a five percent shareholder fails to make the disclosures required, the Commission may order compliance, and may obtain injunctive relief in the federal district courts if the Commission shows a "reasonable likelihood" that the defendant will commit future violations.

Additionally, violators of these rules may also be subject to private actions for damages and/or injunctive relief.

[1] The Obligation to File.

[a] Who Must File.

[i] Section 13(d) and Section 13(g). Section 13(d) of the Exchange Act requires any person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a class registered under Section 12 of the Exchange Act (or any equity security of an insurance company that would be required to register under Section 12, except for the exemption in Section 12(g)(2)(G) or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940), is the beneficial owner of more than five percent of such class to file a statement containing the information specified in Section 13(d) (1)(A)-(E) of the Exchange Act and "such additional information, as the Commission may by rules and regulations prescribe as necessary or appropriate in the

public interest or for the protection of investors." n1

Section 13(d)(6) provides certain exemptions from the requirements of Section 13(d), including exemptions for (1) any acquisition by means of a registration statement, n2 *i.e.* stock for stock exchanges registered under the Securities Act, n3 (2) any acquisition, which together with all other acquisitions of that class of security by the same person during the preceding twelve months, does not exceed two percent of that class, and (3) any acquisition of an equity security by the issuer of that security. n4 Section 13(d)(6)(D) allows the Commission to exempt from the filing requirements any acquisition that is not made for the purpose of influencing or controlling the issuer or that is not otherwise within the purposes of Section 13(d). The Commission, under Section 13(d)(5), also has the authority to allow such persons to file a simplified statement.

The Domestic and Foreign Investment Improved Disclosure Act of 1977 n5 added, among other things, Section 13(g) to the Exchange Act. Section 13(g) was designed to ensure that any person or group of persons, who directly or indirectly beneficially owns more than five percent of a class of equity securities specified in Section 13(d)(1) of the Exchange Act would be required to file a beneficial ownership statement with the Commission containing the information required in Section 13(g)(1)(A) and (B) of the Exchange Act.

Section 13(g) is designed to "close the gaps" found in Section 13(d) such that all five percent shareholders will be required to file beneficial ownership reports under Section 13. n6 Unlike Section 13(d), Section 13(g) has no specific statutory exemptions and does not require a recent acquisition of stock to trigger its application. Section 13(g)(5) directs the Commission to take such steps as it deems necessary (1) to achieve centralized reporting of information regarding ownership and (2) to avoid unnecessarily duplicative and burdensome reporting. n7 In order to carry out this mandate, the Commission has integrated all its rules under Section 13(d) and 13(g) into Regulation 13D-G. n8 The Commission has also created Schedule 13G, which provides an abbreviated and less burdensome form of ownership reporting that certain passive and institutional investors may use as an alternative to Schedule 13D. A Schedule 13G may also be filed by persons who made their acquisitions while the issuer was privately held, so long as such filing person does not acquire more than two percent of the issuer's securities in any subsequent 12-month period.

It is noteworthy that every person, who owns more than ten percent of a company registered under Section 12, is required to file reports under Section 16(a) n9 as well as under Section 13. However, these reporting requirements each serve a different function--Section 16(a) is designed to prevent "insiders" from making short-swing or windfall profits, while Sections 13(d) and 13(g) are concerned with the issue of corporate control. n10

Further, Sections 13(d) and 13(g) are both applicable to any partnership, syndicate or other group formed for the purposes of acquiring, holding or disposing of securities of a particular issuer. n11 Thus, if such a group owns more than five percent of the equity securities of an issuer, it may be subject to the reporting requirements of Section 13. Similar to Section 13(d), Section 13(g) allows the Commission to make exemptions from its provisions. n12

[iii] Rule 13d-1. Rule 13d-1 sets forth the specifics of filing Schedules 13D and 13G. Paragraph (a) of Rule 13d-1 directs that a Schedule 13D be filed under the circumstances mandated by Section 13(d)(1), *i.e.*, by any person who through an acquisition of stock becomes the beneficial owner of more than five percent of any class of equity securities registered pursuant to Section 12. However, this does not apply to persons who are exempt from filing under the provisions of Section 13(d)(6). Pursuant to its authority under this subsection, the Commission adopted Rule 13d-6, which exempts persons who own more than five percent of a class of any equity security from reporting an additional acquisition of such security if the additional acquisition is made solely through the exercise of preemptive subscription rights as part of a *pro rata* offering by the issuer to all securityholders of that class. n13

Paragraph (d) of Rule 13d-1 directs that a shorter Schedule 13G be filed for certain exempt investors as well as "Qualified Institutional Investors" and "Passive Investors," as described below.

2-7A Federal Securities Exchange Act of 1934 § 7A.02

Paragraph (b)(1) of Rule 13d-1 uses the authority given to the Commission by Section 13(d)(5) n14--it provides that persons ("Qualified Institutional Investors") who would otherwise be obligated to file a Schedule 13D under Rule 13d-1(a), may in lieu thereof file the shorter Schedule 13G, provided that:

"(i) Such person has acquired such securities in the ordinary course of his business and not with the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to Rule 13d-3(b); and

(ii) Such person is:

(A) A broker or dealer registered under Section 15 of the Exchange Act;

(B) A bank as defined in Section 3(a)(6) of the Exchange Act;

(C) An insurance company as defined in Section 3(a)(19) of the Exchange Act;

(D) An investment company registered under Section 8 of the Investment Company Act of 1940;

(E) Any person registered as an investment adviser under Section 203 of the Investment Advisers Act or under the laws of any state;

(F) An employee benefit plan as defined in Section 3(3) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), that is subject to the provisions of ERISA, or any such plan that is not subject to ERISA that is maintained primarily for the benefit of the employees of a state or local government or instrumentality, or an endowment fund;

(G) A parent holding company or control person, provided the aggregate amount held directly by the parent or control person, and directly and indirectly by their subsidiaries or affiliates that are not persons specified in Rule 13d-1(b)(1)(ii)(A) through (J), does not exceed one percent of the securities of the subject class;

(H) A savings association as defined in Section 3(b) of the Federal Deposit Insurance Act;

(I) A church plan that is excluded from the definition of an investment company under Section 3(c)(14) of the Investment Company Act;

(J) A non-U.S. institution that is the functional equivalent of any of the institutions listed in paragraphs (b)(1)(ii)(A) through (I) of this section, so long as the non-U.S. institution is subject to a regulatory scheme that is substantially comparable to the regulatory scheme applicable to the equivalent U.S. institution; and

(K) A group, provided that all the members are persons specified in Rule 13d-1(b)(1)(ii)(A) through (J); and

(iii) Such person has promptly notified any other person (or group within the meaning of Section 13(d)(3) of the [Exchange] Act) on whose behalf it holds, on a discretionary basis, securities exceeding five percent of the class, of any acquisition or transaction on behalf of such other person which might be reportable by that person under Section 13(d) of the [Exchange] Act. This paragraph only requires notice to the account owner of information which the filing person reasonably should be expected to know and which would advise the account owner of an obligation he may have to file a statement pursuant to Section 13(d) of the [Exchange] Act or an amendment thereto." n15

Furthermore, paragraph (b)(2) of Rule 13d-1 exempts the persons previously mentioned in paragraph (b)(1) from filing a Schedule 13G, if at the end of the calendar year, such persons own less than five percent of the security in question. Since the Schedule 13G filings made pursuant to Rule 13d-1(b)(1) do not have to be filed until after the end of the year in which the acquisition is made, n16 these persons can own more than five percent of an equity security for a limited time without incurring any obligation to report their holdings. However, a Schedule 13G must be filed within ten days after the end of the first month in which such person's beneficial ownership exceeds ten percent of a class of equity securities, n17 and thereafter, an amendment to Schedule 13G must be filed within ten days after the end of any month in which such person's beneficial ownership increases or decreases by more than five percent of that class. n18 If an amendment has been filed reflecting beneficial ownership of five percent or less of that class, then no additional monthly filings of Schedule 13G are required unless the person becomes the owner again of more than five percent of that class of securities and is required to file pursuant to Rule 13d-1. n19

In 1998, the Commission modified Regulation 13D-G to expand the use of Schedule 13G to cover certain passive investors (a "Passive Investor" or collectively, "Passive Investors"). n20 Rule 13d-1(c) provides that a person, who would otherwise be obligated to file a Schedule 13D under Rule 13d-1(a), may file a Schedule 13G instead if they comply with the following requirements set forth in the rule:

"(c) A person who would otherwise be obligated under paragraph (a) of this Rule 13d-1 to file a statement on Schedule 13D may, in lieu thereof, file with the Commission, within 10 days after an acquisition described in paragraph (a) of this Rule 13d-1, a short-form statement on Schedule 13G, provided, that the person:

- (1) Has not acquired the securities with any purpose, or with the effect of, changing or influencing the control of the issuer, or in connection with or as a participant in any transaction having that purpose or effect, including any transaction subject to Rule 13d-3(b);
- (2) Is not a person reporting pursuant to paragraph (b)(1) of this Section 13d-1; and
- (3) is not directly or indirectly the beneficial owner of 20 percent or more of the class."

Essentially, these amendments provide Passive Investors with the ability to file a report disclosing their beneficial ownership on the abbreviated Schedule 13G instead of filing a longer and more complex report on Schedule 13D. According to the rules, a Passive Investor must file a Schedule 13G within ten days after the acquisition of five percent or more of an equity security. n21 In addition, an amendment must also be promptly filed when a Passive Investor's beneficial ownership exceeds ten percent of the class of security and thereafter must be promptly filed upon the Passive Investor's beneficial ownership increasing or decreasing by more than five percent. n22

A person relying on Rule 13d-1(b) or (c) in order to file a Schedule 13G in lieu of a Schedule 13D must continue to meet the applicable requirements of such rules. If such person still owns more than five percent of a class of equity securities, but now has the purpose or effect of influencing or controlling the issuer, n23 or, in the case of a Qualified Institutional Investor, ceases to be one of the persons listed in subparagraph (b)(1)(ii) n24 (reprinted *supra*), or, in the case of a Passive Investor, acquires more than twenty percent of the class of equity securities, then that person becomes subject to Rule 13d-1(a) and must, within ten days, file a Schedule 13D. A person filing a Schedule 13D because the purpose or effect of its securities ownership has changed or, in the case of a Passive Investor, because such investor has acquired more than twenty percent of the class of equity security, cannot, for ten days thereafter, vote these securities or acquire additional securities of the same type. n25 A person filing on Schedule 13G because its shares were acquired prior to the issuer's initial public offering need only convert to Schedule 13D if the filing person acquires more than two percent of the issuer's shares in any 12-month period following issuer's initial public offering.

Whenever two or more persons are required to file with respect to the same securities, n26 they may report jointly on the same schedule if they are all eligible to use that schedule. n27 In conjunction with filing the joint schedule, each

person must provide a written agreement that the joint schedule is filed on behalf of each of them. Anyone who is allowed to file a Schedule 13G may make a joint filing on a Schedule 13D since the latter contains all the information required by the former. However, a person who must use Schedule 13D may not participate in a joint filing on Schedule 13G since such a filing would be incomplete with respect to that person. n28 Accordingly, each person is responsible for the completeness and accuracy of the information concerning himself or herself contained in the joint statement. However, each person is not responsible for the information concerning another person making the joint filing unless that person knows or has reason to believe that such information is inaccurate.

[b] Information Required.

[i] Schedule 13D. n29 Section 13(d)(1) specifies the information that must be contained in a statement filed pursuant to Section 13(d). n30 It also gives the Commission the authority to request additional information that is "in the public interest or for the protection of investors." All of this required information is listed in Schedule 13D of the accompanying regulations.

Schedule 13D's cover page(s) includes, among other things, the name of issuer, the title of class of securities, the CUSIP number, n31 and the name, address and telephone number of the filer or a person authorized to receive notice and communications. As well, a Schedule 13D includes information about the filer of the report and the number of issuer securities held by such filer. It should be noted that if there is more than one filer, each filer is required to list the number of shares held on separate pages. Stylistically, the tabular format of Schedule 13D's cover page helps the Commission, and other readers who may use the report, by providing a summary of the pertinent disclosures contained in the item section of the report. Accordingly, to avoid unnecessary duplication, items on the Schedule 13D may be answered by an appropriate cross-reference to items on the cover page, provided that all of the information required by the item is disclosed.

Schedule 13D requires the following information:

Item 1, "Security and Issuer," calls for the title of the class of securities and the address of the principal executive offices of the issuer.

Item 2, "Identity and Background," requires a corporation, limited or general partnership, syndicate or other group of persons to state its name, the state or other place of its organization, its principal business, the address of its principal office, whether or not it has been convicted in a criminal proceeding (excluding traffic violations or similar misdemeanors) in the past five years, and, if so, the date and nature of the conviction, the name and location of the court, and the disposition of the case, and whether or not it was in the past five years subject to a civil decree, final order, or judgment of a court or administrative body that enjoined future violations of federal or state securities laws or found any violation with respect to such laws and if so, a description of these proceedings and a summary of the terms of the judgment.

A person must state his name, home or business address, occupation, the name, principal business and address of the employer, citizenship, and whether or not he has been subject to any criminal or civil proceedings as described above. n32

Item 3, "Source and Amount of Funds or Other Consideration," calls for the disclosure of the source and amount of funds or other consideration used in making the purchase, including a description of any transaction in which funds were borrowed for this purpose. n33 Where material, such information should also be provided with respect to prior acquisitions not previously reported under Regulation 13D-G. If the securities were not purchased, the method of their acquisition must be described.

Item 4, "Purpose of Transaction," n34 requires a statement of the purpose(s) of acquiring the securities n35 and a

description of any plans that relate to or would result in (1) the acquisition or disposition of additional securities of the issuer; (2) any change in the present board of directors or management of the issuer, including any plans or proposals to change the number or term of directors or to fill any existing vacancies on the board; (3) any merger, reorganization, liquidation or major sale or transfer of assets of the issuer or any of its subsidiaries; (4) changes in the issuer's business or corporate structure, and changes in its capitalization or dividend policy; (5) amending the issuer's charter or bylaws to make takeover of the issuer more difficult; (6) causing a class of the issuer's securities to be delisted from a national securities exchange, or no longer quoted in a system under a registered national securities association; or (7) making a class of the issuer's securities eligible for deregistration by reducing the number of shareholders to less than three hundred. n36 Any action similar to one of those listed above should also be reported.

Item 5, "Interest in Securities of the Issuer," requires that the number and percentage of the class of securities identified in Item 1 beneficially owned by each person named in Item 2 and by each person who is in a "group" with a person named in Item 2, be stated. n37 Those shares that there is a right to acquire must be identified. All transactions in this security effected by the above persons during the past sixty days or the most recent filing on Schedule 13D, whichever is less must be reported. n38 The nature of the securities ownership of the above people, *i.e.*, whether or not the power to vote the stock or direct the vote, dispose of it or direct the disposition, or receive or direct the receipt of dividends is shared with any other person must be explained. The information in Item 2 about such person must be given if he shares in the voting and disposition rights of a class of securities, and his name must be stated if he has the right to receive or direct the receipt of dividends from more than five percent of that class of securities. If applicable, the date on which the reporting person ceased to be a five percent beneficial owner must be stated.

Item 6, "Contracts, Arrangements, Understandings or Relationships With Respect to Securities of the Issuer," requires a description of any contracts, arrangements, understandings or relationships (legal or otherwise) among the persons named in Item 2 and between such persons and any person with respect to any securities of the issuer, including but not limited to transfer or voting of any of the securities, finder's fees, joint ventures, loan or option arrangements, puts or calls, guarantees of profits, division of profits or loss, or the giving or withholding of proxies. The person with whom such contracts, arrangements, understandings or relationships have been entered into must be named. Such information must also be included for any of the securities that are pledged or otherwise subject to a contingency the occurrence of which would give another person voting power or investment power over such securities except that disclosure of standard default and similar provisions contained in loan agreements need not be included. n39

Item 7, "Material to be Filed as Exhibits," requires that the following shall be filed as exhibits: copies of each written agreement relating to the filing of joint acquisition statements as required by Rule 13d-1(k), and copies of all written agreements, contracts, arrangements, understanding, plans or proposals relating to (1) the borrowing of funds to finance the acquisition as disclosed in Item 3; (2) any changes in the issuer as disclosed in Item 4; and (3) any contracts or arrangements with respect to the securities as disclosed in Item 6.

[ii] Schedule 13G. Schedule 13G's cover page also requires the abstraction of pertinent information contained in the items in Schedule 13G into tabular format. This layout allows the Commission to disseminate the information contained in the report to the public with greater ease. The following is a summary of the items contained in Schedule 13G:

Item 1, requires the name of the issuer and the address of its principal executive offices.

Item 2, requires the name, address (the principal business office, or if none, residence) and citizenship of the filing person. It also calls for the title of the class of securities and their CUSIP number.

Item 3, requires a person filing pursuant to Rules 13d-1(b) or 13d-2(b) or (c) to state his classification under those rules.

Item 4, "Ownership" requires that the amount of shares beneficially owned, the percent of the class, and the number of

shares for which there is (1) sole power to vote or to direct the vote, (2) shared power to vote or to direct the vote, (3) sole power to dispose or to direct the disposition of, and (4) shared power to dispose or to direct the disposition of must be stated.

Item 5, "Ownership of Five Percent or Less of Class," should be checked if the person is reporting that he has ceased to be the beneficial owner of more than five percent of a class of equity securities.

Item 6, "Ownership of More Than Five Percent on Behalf of Another Person," states that if any other person has the right to receive or direct the receipt of dividends from, or the proceeds from the sale of, the securities, this fact should be noted. If such person has this power with respect to more than five percent of the class, this person should be identified.

n40

Item 7, "Identification and Classification of the Subsidiary Which Acquired the Security Being Reported on by the Parent Holding Company or Control Person" requires a parent holding company or control person filing this schedule pursuant to Rule 13d-1(c), Rule 13d-1(d) or Rule 13d-1(b)(ii)(G) to attach an exhibit stating the identification of the relevant subsidiary. If the holding company is filing pursuant to Rule 13d-1(b)(ii)(G), this exhibit must also state the Item 3 classification of this subsidiary. n41

Item 8, "Identification and Classification of Members of the Group," states that if a group has filed this schedule pursuant to Rule 13d-1(c), Rule 13d-1(d) or Rule 13d-1(b)(1)(ii)(J), an exhibit must be attached that identifies each member of the group. If the group is filing pursuant to Rule 13d-1(b)(1)(ii)(J), the Item 3 classification of each group member must also be included in this exhibit.

Item 9, "Notice of Dissolution of Group," states that notice of dissolution of a group may be furnished as an exhibit stating the date of dissolution and that all further transactions in the security reported on will be filed, if required, by members of the group, in their individual capacity.

Item 10, "Certifications," requires the signature of the person filing the form after certifying that all the information set forth is true, complete, and correct, to the best of that person's knowledge and belief. An additional certification stating that the securities were acquired not for the purpose of, and not with the effect of, changing or influencing the control of the issuer of the securities must also appear under this item, if the schedule is being filed pursuant to Rule 13d-1(b) or Rule 13d-1(c). Furthermore, any person filing a Schedule 13G pursuant to Rule 13d-1(b) must also certify that the securities were acquired in the ordinary course of business. n42

[c] When and Where to File.

Any person acquiring sufficient stock to trigger the reporting requirements of Section 13(d) must file, within ten days following such acquisition, a Schedule 13D with the Commission (including all related exhibits), n43 and then send a copy of such filing to the issuer at its principal executive office by registered or certified mail and also send a copy of such filing to each national securities exchange where the security is traded. n44

A person filing a Schedule 13G in lieu of Schedule 13D (pursuant to Rule 13d-1(b)(1)) must file, within 45 days following the end of the calendar year in which such person's accumulation of beneficial ownership exceeds five percent but does not exceed ten percent of an issuer's securities, a Schedule 13G n45 (including all related exhibits) with the Commission and send a copy of the filing to the issuer. n46 Amendments to the Schedule 13G (reflecting, among other things, changes in the filing person's levels of beneficial ownership) also need not be filed until forty-five days following the end of the year in which the changes occur. n47 However, should a person's beneficial ownership exceed 10 percent, he or she must file a Schedule 13G within 10 days following the end of the first month in which the person's beneficial ownership exceeds 10 percent of the class and must amend the filing within ten days after the end of any month in which the person's beneficial ownership interest increases or decreases by more than five percent

thereafter. n48 Persons required to file a Schedule 13G pursuant to Rule 13d-1(c) must follow this procedure within ten days following their initial acquisition of over five percent of the issuer's securities but may amend their filing pursuant to the same timing schedule as 13G filers under who have filed under Rule 13d-1(b). n49 When a person becomes ineligible to use Schedule 13G in lieu of Schedule 13D, including due to a change in investment purpose, a Schedule 13D must be filed in the manner previously described within ten days after such change. n50

[d] Filing of Amendments.

Section 13(d)(2) of the Exchange Act states that whenever there is any material change in the facts contained in a statement filed under Section 13(d)(1) "an amendment shall be transmitted to the issuer and the exchange and shall be filed with the Commission, in accordance with such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors." Similarly, Section 13(g)(2) contains identical language with respect to statements filed under Section 13(g). Accordingly, the Commission implemented both of these sections in Rule 13d-2.

Rule 13d-2(a) requires that, after a material change, an amendment to Schedule 13D must be "promptly" n51 filed with the Commission and sent to the issuer at its principal executive office, by registered or certified mail, and to each exchange on which the security is traded. The rule provides no guidance as to what constitutes a "material change," except to state that it includes material increases or decreases in the amount of stock owned, and that an acquisition or disposition of securities of one percent or more of the class is automatically material under the rule. Further, an acquisition or disposition of less than one percent may also be material, depending upon the facts and circumstances of the individual case.

It is noteworthy that the Commission has taken a "no-action" position with respect to whether or not a company that filed a Schedule 13D must amend it to reflect changes amongst its own executive officers that have no effect its ownership of the stock. n52 However, one case held that when a controlling shareholder of an issuer, who was a Schedule 13D filer, made proposals for a merger between the issuer and an affiliate company of the controlling shareholder, this course of action and change of purpose clearly constituted the type of "material change" that must be promptly reported. n53 Additionally, the standard announced by the Supreme Court in *TSC Industries, Inc. v. Northway, Inc.* n54 would likely be applied in any determination of materiality. The Court there stated:

"An omitted fact is material if there is a substantial likelihood that a reasonable shareholder would consider it important in deciding how to vote." n55

In addition the SEC has taken the position that a filing person's "generic disclosure" under Item 4 reserving its right to engage in any of the kinds of actions enumerated in Item 4 must be amended when the security holder has formulated a specific intention with respect to a disclosable matter. n56

Rule 13d-2(b) requires that any person who has filed a Schedule 13G, and is still obligated to do so, must amend the schedule within forty-five days after the end of the calendar year to reflect any changes, as of the end of the calendar year, in the information reported in the previously filed statement. However, no amendment need be filed with respect to a change in the percent of class of securities outstanding previously reported if the change results solely from a change in the aggregate number of securities outstanding. n57

The SEC has taken the position that a shareholder reporting beneficial ownership on Schedule 13D must file an amendment to disclose that its beneficial ownership has fallen below the 5 percent threshold. n58

Finally, if an amendment has been filed reflecting five percent ownership or less, no further amendments are required unless the person thereafter becomes the beneficial owner of more than five percent of the class and therefore must re-file under Rule 13d-1. The SEC has provided guidance regarding the actions and steps which should be taken by

shareholders who have failed to file required amendments to a Schedule 13D in a timely manner. n59

[2] Determining Five Percent Beneficial Ownership of an Equity Security.

In order to determine whether a person must report his or her securities holdings under Section 13(d) or Section 13(g), the following questions must be answered: (1) Is the type of security owned by that person an equity security? (2) If so, how many shares of that class does he or she beneficially own? (3) Did he or she make an acquisition of any of these shares? and (4) What is the total number of outstanding shares of this class to be used for computing his or her percentage ownership? Careful consideration should be given to the answers to these questions, especially when a situation arises where a person will be deemed to beneficially own shares even though he or she is not the record owner of such shares.

[a] What is an "Equity Security"? Section 13(d) of the Exchange Act applies to "any equity security of a class which is registered pursuant to Section 12 of this title, n60 or any equity security of an insurance company which would have been required to be so registered except for the exemption contained in Section 12(g)(2)(G) of this title, or any equity security issued by a closed end investment company registered under the Investment Company Act of 1940...." n61 Additionally, Section 13(g) is applicable to the same types of securities and incorporates by reference the language in Section 13(d). n62 Rule 13d-1(i) defines an "equity security" as any of the above-mentioned types of securities, except that non-voting securities are not equity securities under Rule 13d-1(i)'s definition. However, if a person owns non-voting securities that can be converted into equity securities within sixty days, he will be deemed to own the equity securities. n63

[b] Determination of Beneficial Ownership.

A person does not have to be the record owner of a security in order to be considered its beneficial owner under Section 13(d) or Section 13(g). However, the concept of beneficial ownership under these sections, and Rule 13d-3 promulgated thereunder, differs from the concept of beneficial ownership used under the rules regulating insider trading as well as other aspects of the securities laws, such as Section 16 of the Exchange Act. n64

[i] Groups. One type of indirect ownership arising under Section 13(d) or Section 13(g) is based on Sections 13(d)(3) and 13(g)(3), both of which state the following:

"When two or more persons act as a partnership, limited partnership, syndicate, or other group for the purpose of acquiring, holding, or disposing of securities of an issuer, such syndicate or group shall be deemed a 'person' for the purposes of this subsection."

Thus, each member of a group formed for the purpose of acquiring, holding, or disposing of securities will be deemed to own the aggregate of all such securities beneficially owned by the members of the group. n65

There is only one basic element needed to establish the existence of such a group, which is evidenced in an agreement to act together for one of the above stated purposes. n66 Importantly, a written agreement is not required because such a requirement would defeat the purpose of the statute. n67 However, as the court stated in *Texasgulf, Inc. v. Canada Development Corp* :

"[A] relationship among persons or entities, whether family, personal, or business is insufficient to create a group which is deemed to be a statutory person. There must be agreement to act in concert." n68

In *Texasgulf*, the court strongly rejected the plaintiff's attempt to link the stock purchase of the defendant with those of another company solely because a vice chairman and director of the defendant was president of a company that owned a controlling interest in the other company. n69 Likewise, in *Corenco Corp. v. Schiavone & Sons, Inc.* n70 a defendant-stockbroker would have been paid a finder's fee if the plaintiff acquired the defendant. Even though the

broker and the defendant each owned just under five percent of the plaintiff's stock and allegedly had several meetings during the period when the defendant was acquiring the plaintiff's stock, the Court of Appeals for the Second Circuit held that no group existed. According to the court:

"It is true that Michael Schiavone controlled 4.8 percent of Corenco's outstanding shares. Rubin, [the defendant-stockholder], assuming for present purposes that he exercised sufficient dominion over the three accounts for which he had purchased shares, would have controlled another 4.996 percent. These percentages indicate an acute awareness on the part of both parties of the 5% figure fixed by Section 13(d). However, absent an agreement between them a 'group' would not exist. While it is charged that Rubin met several times with Joel Schiavone during the period of Michael Schiavone's purchases, Judge Ward noted that Rubin's fee depended on Corenco acquiring Schiavone rather than vice versa and that some Corenco stock was actually sold out of the accounts allegedly controlled by Rubin during the period of the supposed conspiracy. Upon this record we cannot conclude that Judge Ward's finding of no agreement or conspiracy was 'clearly erroneous.'" n71

Courts are currently addressing the controversial issue of whether or not ownership of total return equity swaps ("TRSs") n72 (typically arranged between a party and a bank counterparty) triggers beneficial ownership of the underlying security under Section 13(d) of the Exchange Act. Such cases frequently address circumstances in which, absent a Schedule 13D filing, TRSs have been used to acquire a total economic stake in a subject company's voting securities significantly exceeding a five percent level of ownership. It is commonly alleged that some form of collusive relationship existing between the parties to the TRS arrangement may effectively deliver voting power or control over the underlying voting securities to the holder of the derivative security. n73 Such arrangements or understandings, should they exist, would require that the parties to the TRS arrangement be treated as a group under Section 13(d) and, as such, that their beneficial ownership of the issuer's voting securities must be combined for purposes of Section 13(d)'s reporting requirements.

For instance, in *CSX Corporation v. The Children's Investment Fund Management (UK) LLP*, n74 the district court ruled that The Children's Investment Fund ("TCI") and 3G Capital Partners ("3G"), two activist hedge funds engaged in a proxy contest with CSX, violated Section 13(d) of the Exchange Act by using TRSs to secretly acquire beneficial ownership of more than five percent of CSX's common shares without properly disclosing such ownership on Schedule 13D. The court held that, pursuant to Rule 13d-3(b) under the Exchange Act, where a party has entered into a TRS arrangement as part of a plan or scheme to evade the reporting requirements of Section 13(d), it is deemed to be the beneficial owner of the shares held by the counterparty to the swap arrangement for the purpose of hedging such company's exposure under the TRS arrangement. As the court's finding was based solely upon the anti-evasion provisions of Rule 13d-3(b), the court's decision did not affirmatively rule that Section 13(d) applies to shares held pursuant to otherwise passive or benign swap or derivative arrangements. Instead, the court specifically applied Section 13(d)'s reporting requirements to instances in which parties have entered into swap or derivative arrangements with the intent of creating a false appearance that there is not a large accumulation of issuer shares which might have a control shifting effect. The court also found that TCI and 3G violated Section 13(d) by acting for months in close coordination with each other but failing to timely disclose their formation of a group on Schedule 13D. The finding that a group had been formed significantly prior to its disclosure by TCI and 3G was based upon a pattern of circumstantial evidence, including a close prior relationship between TCI and 3G, multiple communications discussing CSX and a rough synchronization of the parties' trading in CSX's shares.

However, when it is obvious that several people are acting together, the courts will not hesitate to find the existence of a group. n75 For instance, in *Financial General Bankshares v. Lance*, n76 the defendants contended "that the facts reflect nothing more than independent purchases of F.G. (Financial General) stock by the four Middle Eastern defendants." The court (for the purpose of deciding a motion for a preliminary injunction) did not agree and noted that (1) two of the American defendants were dissatisfied with Financial General's management; (2) they recommended Financial General's stock as an attractive investment to a manager of a foreign bank for that bank's clients, and there were several

meetings amongst the defendants that included discussions about the foreign bank manager's decision to purchase the plaintiff's stock on behalf of his clients, which was followed by his recommendation of the stock to his clients; (3) the defendants conducted an intense program of open and private market purchases, acquiring nearly twenty percent of the plaintiff's stock within six weeks; and (4) defendant made statements indicating that he represented a group of foreign investors. n77

Over the years, several questions arose as to what constitutes a group under Section 13(d)(3). For instance, when several banks make a joint loan, or refinance an old loan, to a company, the banks will sometimes receive warrants to purchase that company's stock. Once these warrants become exercisable, then the banks will be deemed to own the underlying stock pursuant to Rule 13d-3. n78 Accordingly, an issue arises as to whether these banks will be considered a group under Section 13(d)(3). Initially, the Commission took the view that they were a group, and refused, in two separate instances, to exempt groups of such banks from filing a Schedule 13D where their aggregate beneficial ownership exceeded the five percent threshold, even though in both cases there were no agreements or arrangements between the banks concerning the warrants. n79 However, in 1977, the Commission exempted a group of banks from filing a Schedule 13D provided that the banks had no agreement or arrangement to act in concert with respect to the warrants. n80]

In *Roth v. Jennings*, n81 the Court of Appeals for the Second Circuit set forth to further define what constitutes a group for purposes of determining beneficial ownership of securities under Section 13(d) of the Exchange Act. In *Roth*, the plaintiff, suing derivatively on behalf of Metal Management, Inc. ("MMI"), sought disgorgement of defendant shareholder's "short-swing" (opposite way transactions made within a period of 6 months) profits under Section 16 of the Exchange Act on the grounds that, if its shares were properly aggregated with those of another larger shareholder, the selling shareholder would be categorized as a principal shareholder (a holder of 10 percent or more of an issuer's shares) and be subject to Section 16 of the Exchange Act. Section 16 requires the short-swing profits of directors, officers and 10 percent shareholders to be disgorged to the company. n82 In addition, the rules under Section 16 provides that, solely for the purposes of determining whether a person is a principal shareholder beneficially owning 10 percent or more of an issuer's shares, the term "beneficial owner" means a person who is a beneficial owner pursuant to Section 13(d) of the Exchange Act. n83 The defendant, Jennings, purchased 8.3 percent of MMI's shares through funds supplied by a loan agreement with an existing 14.8 percent shareholder ("EMR"). The plaintiff alleged that Jennings and EMR constituted a group under Section 13(d) because EMR's loan was made for the specific purpose of purchasing MMI shares and because the parties otherwise had an agreement regarding the acquiring, holding or disposing of MMI's shares. Both Jennings and EMR reported their beneficial ownership in Schedule 13D filings which disclosed their respective ownership levels and contained the terms of the loan agreement. n84 In addition, both the Schedule 13D filings and the loan agreement itself specifically disclaimed the existence of any arrangement regarding MMI's shares and disclaimed that Jennings and EMR constituted a group. The court ruled that such formal disclaimers of group status will not serve to preclude a finding that parties had a triggering arrangement regarding an issuer's securities and constitute a group under Section 13(d). The court noted that parties' self serving disclaimers of group status will not, in itself, prove the truth of such an assertion. Under Section 13(d), parties which act with the purpose of acquiring an issuer's shares will have formed a group regardless of their attempts to disclaim such joint action. n85

Another problem to consider is whether or not a group already in control of a corporation falls within the purview of Section 13(d)(3). One early opinion from the Court of Appeals for the Seventh Circuit stated, in dicta, that:

"Our review of the legislative history convinces us that the overriding purpose of Congress in enacting this legislation was *to protect the individual investor* when substantial shareholders or management undertake to acquire shares in a corporation for the purpose of solidifying their own position in a contest over how or by whom the corporation should be managed." n86

However, the Court of Appeals for the Second Circuit noted, in dicta, that:

"Management groups *per se* are not customarily formed for the purpose of 'acquiring, holding, or disposing of securities of [the] issuer' and would not be required to file unless the members conspired to pool their securities interests for one of the stated purposes." n87 (footnote omitted).

The Court of Appeals for the Second Circuit further discussed this issue in its decision in *Corenco Corp. v. Schiavone & Sons, Inc.*, n88 where the defendants claimed that Corenco's management and their affiliates were a group because they pooled their shares for the purpose of defeating the tender offer made by the defendants. The court held that because Section 14(d)(4) of the Exchange Act requires that management make certain disclosures when it advises its shareholders to reject a tender offer, n89 "it would be pointless to superimpose requirements found in another section, which does not deal specifically with management disclosures." n90 Further, the court in *Scott v. Multi-Amp Corp.*, n91 adopted a similar position, holding that a control group that decided to sell all the assets of a corporation and then liquidate it, need not file under Section 13(d), since it had to file proxy materials under Section 14(a) in order to carry out their plan.

Later opinions held that management is subject to Section 13(d) when, in the absence of a tender offer, it forms a group for the purpose of defending its corporate control from an outside group. n92 The Commission has ruled that whenever a Schedule 13D filing management group owning more than five percent of a company's stock acquires additional shares, it must file an amended Schedule 13D, even where each member of the group reported his or her individual acquisition on a Form 4. n93

[ii] Rule 13d-3. Rule 13d-3 sets forth the circumstances under which a person will be considered the beneficial owner of stock for the purposes of Section 13(d) and 13(g). Originally, the rule only applied to persons who could acquire equity securities through the exercise of warrants or options or the conversion of convertible securities. n94 However, the judiciary quickly extended the concept of beneficial ownership to anyone who had voting control of stock, regardless of whether or not that person owned the stock. n95 In accordance, the current Rule 13d-3 adopted this concept and expanded upon it, stating that:

"(a) For the purposes of Sections 13(d) and 13(g) of the [Exchange] Act a beneficial owner of a security includes any person who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise has or shares:

- (1) Voting power which includes the power to vote, or to direct the voting of, such security; and/or
- (2) Investment power which includes the power to dispose, or to direct the disposition of, such security." n96

The right to acquire voting rights or investment power over a security is sufficient for beneficial ownership. Rule 13d-3(d)(1)(i) also provides that a person shall be deemed to be the beneficial owner of a security, subject to the provisions of paragraph (b) of this rule, if that person has the right to acquire beneficial ownership of such security, as defined in Rule 13d-3(a) within 60 days, including but not limited to any right to acquire: (A) through the exercise of any option, warrant or right; (B) through the conversion of a security; (C) pursuant to the power to revoke a trust, discretionary account, or similar arrangement; or (D) pursuant to the automatic termination of a trust, discretionary account or similar arrangement; *provided, however*, any person who acquires a security or power specified in paragraph (A), (B) or (C) above, with the purpose or effect of changing or influencing the control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect, immediately upon such acquisition shall be deemed to be the beneficial owner of the securities which may be acquired through the exercise or conversion of such security or power. Any securities not outstanding which are subject to such options, warrants, rights or conversion privileges shall be deemed to be outstanding for the purpose of computing the percentage of outstanding securities of the class owned by such person but shall not be deemed to be outstanding for the purpose of computing the percentage of the class by any other person.

Rule 13d-3 also contains several exceptions to its provisions. For instance, a member of a national securities exchange can hold securities on behalf of another person without being deemed the beneficial owner of such securities, provided that the member cannot vote the securities, without instruction, on any contested matter that may substantially affect the rights or privileges of the real owner of the securities. n97 Also, an underwriter who acquires securities by participating in a "firm commitment underwriting" n98 registered under the Securities Act is not the beneficial owner of such securities until forty days after the acquisition. n99 Additionally, a person who becomes a pledgee of securities in the ordinary course of business under a written pledge agreement is not deemed to be the beneficial owner of such pledged securities until the pledgee has taken all the formal steps required to declare a default and determines that the power to vote or dispose of the securities will be exercised. This exception is subject to the following provisos: (1) the pledge agreement must be bona fide and not made for the purpose of changing or influencing the control of the issuer; (2) the pledgee is a person eligible to use Schedule 13G as specified in Rule 13d-1(b)(1)(ii), n100 and (3) the pledge agreement, prior to default, does not give the pledgee the power to vote or dispose of the securities, other than the grant of such powers to a registered broker or dealer extending credit subject to "Regulation T" (a regulation promulgated by the Federal Reserve Board regarding the extension of credit extended for the purchase of securities). n101

Importantly, under Rule 13d-3, if any person attempts to evade the reporting requirements of Section 13(d) or 13(g) by divesting himself or herself of beneficial ownership of a security through the use of a trust, power of attorney, proxy, pooling arrangement, or any other contract, arrangement, or device, he or she will be deemed to beneficially own that security under Rule 13d-3(b).

Finally, Rule 13d-4 allows any person to expressly declare, in any filed statement that covers the subject securities, that the filing of such statement is not an admission that the person is the beneficial owner of such securities for the purposes of Section 13(d) or 13(g).

[c] Acquisitions. Section 13(d) is not applicable without an acquisition of stock, n102 whereas Section 13(g) applies to anyone who merely holds five percent or more of an equity security class. n103 The term "acquisition" does not necessarily require the "purchase" of securities. According to Rule 13d-5(a), a person who obtains beneficial ownership of a security is deemed to have acquired the security, whether or not the acquisition was through a purchase. Thus, receiving securities as a gift or inheritance qualifies as an acquisition. Similarly, when an executor or administrator of a decedent's estate obtains beneficial ownership n104 of securities in the subject estate, the executor or administrator will be deemed to have acquired the securities when he or she qualifies under local law to perform his or her duties.

In regard to acquisitions by groups, Rule 13d-5(b)(1) provides that a Section 13(d)(3) group shall be deemed to have acquired beneficial ownership of all equity securities beneficially owned by any of the group members as of the date that the group is formed. This proposition means that a group formed for the purpose of acquiring or holding the securities of an issuer, which owns more than five percent of those securities, will, in the absence of an exemption, be required to file a Schedule 13D regardless of whether or not the group later acquires any additional securities of the issuer. n105

It should be noted that early in the history of the Williams Act, and prior to the adoption of Rule 13d-5 in 1977, this point was the subject of judicial controversy. For instance, in *Bath Industries, Inc. v. Blot*, n106 the Court of Appeals for the Seventh Circuit held that a group was not subject to Section 13(d)(1) unless, after its formation, its members agreed to acquire additional securities. The court adopted this interpretation because it was not the purpose of the Williams Act to protect current management by proscribing "legitimate cooperation among existing shareholders to assert their determination to take over control of management, *absent* an intention to acquire additional shares for the furtherance of such purpose." (emphasis in opinion.) n107

However, in *GAF Corp. v. Milstein*, n108 the Court of Appeals for the Second Circuit disagreed with the conclusion stated in *Bath*. In *Milstein*, Judge Kaufman stated that "the purpose of Section 13(d) is to alert the marketplace to every

large, rapid aggregation or accumulation of securities, regardless of technique employed, which might represent a potential shift in corporate control...." This situation would happen whenever a group holding a sufficiently large block of shares is formed, even if they do not acquire any additional shares. Thus, disclosure of a group's shareholdings should not be dependent upon the group's acquisition of stock after formation.

Milstein focuses on the primary purpose of the Williams Act--the disclosure of stock ownership by a person or group of persons possessing the potential to control or influence a company. *Bath*, on the other hand, places a secondary purpose of the Williams Act in that it should not protect the current management of a company ahead of the primary purpose. Following these two cases, the majority of the subsequent decisions agreed with the holding in *Milstein*, n109 and ultimately, the Commission adopted this holding in Rule 13d-5.

Importantly, paragraph (b)(2) of Rule 13d-5 provides an exception from the group acquisition rule for private placements of stock going directly from the issuer to certain institutions. n110 The rule states that a group shall be deemed not to have acquired any equity securities beneficially owned by its members solely because they acted together to purchase the equity securities directly from an issuer in a transaction not involving a public offering provided that: (1) all the group members are persons specified in Rule 13d-1(b)(1)(ii); n111 (2) each member is making the purchase in the ordinary course of its business, and not for the purpose of influencing or controlling the issuer or avoiding the reporting requirements; and (3) the group acts together only to facilitate the specific purchase involved, and, after the closing date of the private offering, only to conclude ministerial matters directly related to the completion of the offer or sale of the securities.

In *Litzler v. CC Investments, L.D.C.*, n112 the federal court found that three hedge funds simultaneously investing in Data Race, Inc. ("Data Race") had not acted in concert so as to have formed a group. n113 Plaintiff argued that the three funds had formed a group in their acquisitions of Data Race shares because they acted through common counsel in the negotiation and drafting of the acquisition documents. The court found plaintiff's argument to be unconvincing and found that a group had not been formed. The court noted the Commission's position that business considerations, such as cost savings, "that generally lead to cooperative activity characteristic of an institutional placement" are not sufficient to demonstrate that "investors were motivated by a desire to affect control or by some other indicia of concerted activity." n114 In addition, the court noted that the investing parties had separately conducted their own due diligence review of Data Race, had been separately advised by counsel in making their decision to pursue an investment in Data Race and had not maintained a pre-existing prior relationship.

[d] Computing the Percentage of Beneficial Ownership. In order to determine the number of securities beneficially owned by a filer, Section 13(d)(4) instructs that, for any computation under Section 13(d), a class of securities consists of the amount of outstanding securities in that class, exclusive of any securities in that class held by or for the account of the issuer or a subsidiary of the issuer. Section 13(g)(4) is identical to Section 13(d)(4), except that it applies to computations under Section 13(g). To help provide further guidance in this area, the Commission adopted Rule 13d-1(j), which allows for the amount of outstanding equity securities in a class to be obtained from the issuer's most recent quarterly or annual report, or any current report subsequent thereto, filed with the Commission. Nonetheless, a person may not use this number if he or she knows or has reason to believe that it is inaccurate.

Under the rules, if a person is deemed to own securities that are not outstanding, *i.e.*, securities held by or for the issuer, because of his or her right to acquire such securities (by the exercise of any option, warrant, right, or conversion privilege), n115 these securities will be deemed to be outstanding for the purpose of computing that person's percentage of beneficial ownership. However, such securities would not be considered to be outstanding with respect to any other person. n116

Events that occur after an acquisition of five percent of a subject company's equity are irrelevant. In *American Pepsi Cola Bottlers, Inc.* ("APC") n117, for instance, Industrial Capital Corporation ("Industrial") acquired 6.2 percent of APC's stock. Within the ten day filing period after Industrial's acquisition, APC made a public offering of its securities

thereby reducing Industrial's ownership in APC stock to 3.7 percent. The Commission was of the opinion that Industrial was not relieved of its obligations to file a Schedule 13D despite APC's subsequent public offering, pointing out that Industrial had obtained over five percent ownership on the date that it made the acquisition.

According to the beneficial ownership rules (discussed in *supra* Section 7A.02[2][b]), a person determines how many securities he or she owns. Nonetheless, all securities of the same class beneficially owned by a person must be aggregated regardless of the different forms of ownership in which these securities may be held. n118 This broad concept applies to securities deemed to be owned through a convertible security, option, or warrant, even if the warrant is also an equity security and may therefore give rise to a separate obligation to file. n119

[3] Relief for Violation of Section 13(d) and Section 13(g). n120

[a] Actions by the Commission. Under Section 15(c)(4) of the Exchange Act, Congress empowers the Commission to take action against violators of Sections 13 or 14. Accordingly, if the Commission finds, after notice and opportunity for a hearing, any material violation of Sections 13(d) or 13(g), or the rules promulgated thereunder, the Commission may order compliance with such provisions upon such terms and conditions as it specifies. n121 Additionally, such an order may result from a court action brought by the Commission. n122 The Commission may also bring a suit in district court to enjoin future violations of Section 13(d). n123 In order for the court to issue an injunction, the Commission must show a "reasonable likelihood" that the defendant will commit future violations. n124 Even though the Commission does not need to prove that the defendant acted with scienter, n125 proof of previous willful violations of Section 13(d) is usually instrumental in obtaining an injunction. n126 Finally, an unrepentant attitude on the part of the defendant will also influence the court into granting injunctive relief. n127

Some courts even go as far as stating that an issuer, rather the Commission, is in the best position to enforce Section 13(d). According to a decision from the Court of Appeals for Second Circuit, an issuer is in the best position to enforce Section 13(d) because the Commission, in addition to being short on manpower, "does not have the issuer's day to day familiarity with the facts which would enable it to appraise accurately the statements in the Schedule (13D)." n128 This observation comes from the fact that there are a small number of reported cases where the Commission sought to enjoin violations of Section 13(d). Even in these cases, most of them involved purported violations of other reporting requirements, n129 or of the proxy rules. n130

[b] Private Suits

[i] Standing. The issue of whether or not an individual had standing to sue for a violation of Section 13(d) was considered in *Grow Chemical Corp. v. Uran*. n131 In *Grow Chemical* the plaintiff alleged that he purchased stock at a price in excess of what he would have paid had his search through the public filings of the Commission and the American Stock Exchange revealed that the defendant owned more than ten percent of the same class of stock. In rejecting the defendant's motion to dismiss, the court stated that:

"Defendant contends that neither § 13(d) nor § 16(a) is designed for the protection of this plaintiff. It appears to [the court] that if a plaintiff claims that as a purchaser of securities he has been injured as a result of the violation by a defendant of the securities laws, then the plaintiff has stated a claim upon which relief may be granted. Plaintiff is not asserting a general injury to the public. It is asserting an injury involving its stock interest in Guardsman flowing from the defendant's failure to disclose his interest in that very stock in contravention of law." n132

Additionally, the issue of whether or not an issuer had the right to sue for a violation of Section 13(d) has been interpreted by the courts. For instance, in *Bath Industries, Inc. v. Blot*, n133 the Court of Appeals for the Seventh Circuit simply assumed that the right of the issuer to sue for Section 13(d) violations existed without even discussing the point. Following the decision in *Bath*, the Court of Appeals for the Second Circuit specifically established the right of the issuer to sue for Section 13(d) violations in *GAF Corp. v. Milstein*, n134 holding that suits by the issuer were necessary

to effectuate the legislative purpose of the statute. In *Milstein*, the court noted that:

"GAF, as the issuer, unquestionably is in the best position to enforce section 13(d). The statute requires a copy of the statement to be sent by registered mail to the issuer (this provision alone might support the issuer's standing), and the issuer, in the course of constantly monitoring transactions in its stock, better than anyone else will know when there has been a failure to file. *Cf. Comment*, 81 *Harv.L.Rev.* 501, 502 (1967). Moreover, the issuer has not only the resources, but the self-interest so vital to maintaining an injunctive action. See *Electronic Specialty, supra*, at 946. To play upon management's self-interest, of course, raises some threat to Congress's express desire not to tip the scales in favor of incumbent management as against the takeover group. But, this danger can be adequately counteracted, if the district court carefully scrutinizes self-serving management claims allegedly made in the interest of investor protection.

Even if the Commission had the requisite manpower to delve into the details of each Schedule 13D filing, it does not have the issuer's day-to-day familiarity with the facts which would enable it to appraise accurately the statements in the Schedule. An already overburdened Commission staff, taxed with reviewing increased filings under the securities acts, should welcome 'a necessary supplement' to its action.

Nor is it realistic to expect shareholders to deter persons from filing inaccurate statements by resort to the antifraud provisions. Stockholders are generally unaware of the necessary background information to judge the truth or falsity of the statements. Additionally, since the [Exchange] Act does not require the statements to be disseminated to shareholders, they do not have the immediate access of the issuer to the filings."

The court also held that although Section 13(d) did not specifically prohibit a false filing, such a filing could still be challenged under that section. n135 The court reasoned "that the obligation to file *truthful* statements is implicit in the obligation to file with the issuer" n136 because a false filing would subvert the purpose of the statute by misleading investors. It should be noted that the holding in *Milstein* concerning the issue of standing has been subsequently examined by other courts. n137 Furthermore, a district court has held that an individual shareholder has a private right of action for injunctive relief for Section 13(d) violations. In *Bender v. Jordan*, n138 the district court, noting that the Courts of Appeals are in widespread agreement that Section 13(d) creates an implied private right of action for injunctive relief brought by an issuer of securities, held that issuers derive this right of action from their role as representative of the shareholders. The court held that "[b]ecause the foundation for the issuer's standing is its action on behalf of shareholders, a shareholder *a fortiori* has standing to seek injunctive relief." n139

[ii] Injunctive Actions. Traditionally, before a federal court will issue an injunction, the court requires proof that a party will suffer an irreparable harm in the absence of an injunction. n140 The Supreme Court held, in *Rondeau v. Mosinee Paper Corp.*, n141 that this irreparable harm standard, together with the other usual prerequisites for equitable relief, applies to injunctions sought under the Williams Act. In *Rondeau*, a businessman, ("Rondeau"), acquired over five percent of the common stock of Mosinee Paper Corp. ("Mosinee Corp.") through open market purchases. Rondeau was unaware of his obligation to file under Section 13(d) until Mosinee Corp.'s chairman of the board informed him that his purchases had caused problems under the securities law. After consulting with his attorney, Rondeau filed a Schedule 13D with the Commission about three months after it was originally due. The schedule stated that Rondeau intended to obtain control of Mosinee Corp. by making additional acquisitions of its stock, and that, if successful, he would make changes to Mosinee Corp.'s management.

Shortly thereafter, Mosinee Corp. brought a suit against Rondeau, claiming that because Rondeau had violated the beneficial ownership disclosure requirements: (1) shareholders sold stock to him lacking material information; and (2) Mosinee Corp. was not able to properly defend its interests. Mosinee Corp. requested an injunction from the court that

would prohibit Rondeau from acquiring additional shares; from voting or pledging his stock; and order the divestiture of his stock. The district court granted Rondeau's motion for summary judgment since Rondeau's violation was unintentional and Mosinee Corp. could not demonstrate any irreparable harm that resulted from the violation. n142 The Court of Appeals for the Seventh Circuit reversed the district court, holding that Mosinee Corp. was harmed because of the delay it suffered in responding to Rondeau's efforts to take control of the company, and that, in any event, it need not prove irreparable harm as a prerequisite to obtaining injunctive relief since "as issuer of the securities it is in the best position to assure that the filing requirements are being timely and fully complied with and to obtain speedy and forceful remedial relief when necessary." n143 Accordingly, the Court of Appeals for the Seventh Circuit ordered the district court to enjoin Rondeau from further violations of the Williams Act, and from voting the shares purchased between the due date of the Schedule 13D and the date of its filing for a period of five years.

On appeal, the Supreme Court concluded that this injunction served little purpose since Mosinee Corp. had not been harmed by the late filing because Rondeau had not attempted to obtain control over the company. Since Rondeau's Schedule 13D was now on file with the Commission, and there was no evidence to suggest that he would not amend it, Mosinee Corp. and its shareholders would be likely to have the proper information before them regarding any future takeover attempt by Rondeau. Thus, none of the usual reasons for injunctive relief were present since Mosinee Corp. was not facing any irreparable harm and Rondeau was not currently violating Section 13(d), nor was it likely that he would do so in the future. Additionally, shareholders who sold stock to Rondeau between the due date and filing date of the Schedule 13D have an adequate damage remedy at law if they can prove that Rondeau's nondisclosures depressed the price of their stock. n144

The Court also rejected the Court of Appeals' holding that irreparable harm was not a prerequisite to injunctive relief under the Williams Act, noting that:

"Respondent urges, however, that the 'public interest' must be taken into account in considering its claim for relief and relies upon the Court of Appeals' conclusion that it is entitled to an injunction because it 'is in the best position' to insure that the Williams Act is complied with by purchasers of its stock. This argument misconceives, we think, the nature of the litigation. Although neither the availability of a private suit under the Williams Act nor respondent's standing to bring it has been questioned here, this cause of action is not expressly authorized by the statute or its legislative history. Rather, respondent is asserting a so-called implied private right of action established by cases such as *J. I. Case Co. v. Borak*, 377 US 426, 84 S Ct 1555, 12 L. Ed 2d 423 (1964). Of course, we have not hesitated to recognize the power of federal courts to fashion private remedies for securities laws violations when to do so is consistent with the legislative scheme and necessary for the protection of investors as a supplement to enforcement by the [Commission]." (Citations omitted.)

"However, it by no means follows that the plaintiff in such an action is relieved of the burden of establishing the traditional prerequisites of relief. Indeed, our cases hold that quite the contrary is true." n145

The Supreme Court's decision in *Rondeau* halted a trend by the lower courts toward looser standards for granting injunctions under the Williams Act. n146 One of the first cases to grant injunction relief under Section 13(d) was *Bath Industries, Inc. v. Blot*, n147 where the court enjoined the defendants from carrying out a planned takeover because no Schedule 13D had been filed, and the corporation stood to lose a very large contract if the battle for its control was allowed to continue. In *Bath*, the court reasoned that the corporation might well have suffered less of an adverse impact in its efforts to win the contract if the rift in management had been disclosed earlier through the filing of a Schedule 13D. n148

However, several subsequent cases enjoined takeover attempts, where, unlike *Bath*, there was no specific harm alleged to the corporation and its investors, other than the supposed injury they suffered from not possessing the information

contained in Schedule 13D. n149 Since the Supreme Court's decision in *Rondeau*, lower courts no longer presume that a violation of Section 13(d) will cause irreparable harm, and will not prevent a defendant from voting his shares or soliciting proxies unless there is a clear need to do so. In *Gearhart Indus, Inc. v. Smith Int'l, Inc.*, the Court of Appeals for the Fifth Circuit denied a target company's request for preliminary injunctive relief under Section 13(d) since neither a breach of a standstill agreement nor purchases made under cover of misleading filings by the bidder warranted enjoining the tender offer. The court noted that the breach had no misleading effect on investors and the Williams Act's purpose is to benefit investors, not corporate management. Similarly, the misleading purchases harmed only the target company's attempt to resist the takeover rather than harming investors. Moreover, any Section 13(d) violations were ultimately cured in an amended Schedule 13D in which the bidder disclosed its intent to acquire control. Thus, the court held that there was no irreparable harm to justify the issuance of a preliminary injunction. Furthermore, any stockholder who might have sold target company stock on the basis of misleading Section 13(d) filings could be awarded damages and, therefore, enjoining the tender offer on that basis would be an "inappropriate and over-drastic" act. The court also refused to sterilize the bidder's voting rights in shares purchased following the filing of the bidder's misleading Section 13(d) statement and reiterated the Supreme Court's dicta in *Rondeau* that the Williams Act's purpose is to protect shareholders, not to provide a weapon for incumbent management in corporate control struggles. n150

In *Rondeau*, the Court stated that it was not deciding under what circumstances a shareholder currently in violation of Section 13(d) could be enjoined from acquiring more stock, exercising voting rights or launching a takeover bid. n151 Accordingly, courts will generally issue such injunctions in cases in which the requisite irreparable harm has been found through sufficiently pleaded allegations of *continuing* material nondisclosures or inaccurate, incomplete, or misleading statement. n152 Since the purpose of Section 13(d) is to give investors an opportunity to "assess the potential for changes in corporate control and adequately evaluate the company's worth....," n153 depriving them of the information necessary to do this constitutes irreparable harm. A court may grant injunctive relief and require the filing of an amended Schedule 13D where there is a reasonable basis for concluding that the Schedule 13D is "inaccurate, incomplete or misleading in its statement of any of the matters expressly demanded by section 13(d)". n154

Additionally, a current violation is likely to become consequential if it is followed by actions that are designed to influence or control the issuer. Thus, an injunction against such activities does not unduly penalize the offending party if it is to be removed upon the filing of a proper Schedule 13D. n155

Several cases have indicated that an injunction against future violations of Section 13(d) is appropriate in a private action if it can be proved that the defendant is likely to commit such violations. n156 Of course, where a party can prove that he has no further interest in acquiring the issuer's securities, or meddling in its affairs, an injunction is not appropriate, even though the defendant may have committed past violations with respect to that issuer. n157

Subsequent case law has followed the Supreme Court's suggestion in *Rondeau* that the appropriate remedy for shareholders buying or selling stock at a price affected by violations of Section 13(d) is an action for damages, not an injunction. n158

However, in *Bath Industries, Inc. v. Blot*, n159 the Court of Appeals for the Seventh Circuit held that past reliance by investors made it inappropriate to lift an injunction against a takeover attempt until there was a trial on the merits, even if an accurate Schedule 13D was filed before the trial. The court stated:

"If defendant-appellants were in fact required to file statements pursuant to the Williams Act sometime near midsummer of 1969, the filing of 13D Schedules in October, 1969 may well be insufficient to cure the failure to file earlier. The purpose of the filing and notification provisions is to give investors and stockholders the opportunity to assess the insurgents' plans *before* selling or buying stock in the corporation. It additionally gives them the opportunity to hear from incumbent management on the merit or lack of merit of the insurgents' proposals. If the defendant-appellant's late filing is sufficient, then no insurgent group will ever file until news of their existence and plan leaks out and

prompts a law suit. By that time it will be too late to avoid the evils which the Williams Act is designed to eliminate." n160

Allowing the injunction to be lifted upon the filing of a Schedule 13D and an offer of rescission to persons who sold their stock to the defendants without the benefit of proper disclosure could protect the latter class without unnecessarily restricting the defendants and would appear to be preferable to the remedy granted in *Bath*. n161

[iii] Damages. There is no implied private right of action for damages under any of the reporting provisions in Section 13. n162 Any such action must be brought under Section 18 of the Exchange Act, n163 which provides that any person who, in reliance upon a false or misleading statement in a report filed under the Exchange Act, purchases or sells a security at a price affected by that statement may collect damages from the person filing the report, unless the latter had no knowledge that the statement was false or misleading. n164 Further, courts have held that the "forced sale" doctrine developed under *Rule 10b-5* also applies to Section 18. n165 In *Weisman v. Darneille*, a plaintiff-shareholder alleged that the defendants bought six percent of the issuer's stock on the open market because the defendants knew its real value was substantially higher. Then the defendants brought about a liquidation of the issuer by a sale of all its assets followed by redemption of all its stock. As a result, the defendants made a substantial profit from this transaction, and apparently did not divulge their motive for buying this stock in their Schedule 13D. The court refused to dismiss the case for lack of standing and ruled that if the plaintiff was forced to sell his stock as part of a liquidation that was aided by the filing of a fraudulent Schedule 13D, the plaintiff had standing as a "seller" to sue under Section 18. n166

However, other courts have held that a plaintiff who can not prove how his purchase or sale of stock was affected by an alleged violation does not have a valid cause of action. n167 Similarly, in *Dewitt v. American Stock Transfer Co.*, n168 the court ruled that the plaintiff's late filing of a Schedule 13D did not justify the defendant's refusal to transfer his stock because the defendant could not demonstrate how it was injured by the delay in filing.

(n2)Footnote 2. Section 13(d)(6)(A).

(n3)Footnote 3. *See* Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 15348, 16 SEC Docket 228 (Nov. 22, 1978).

(n4)Footnote 4. Section 13(d)(6)(C). The Commission has taken a no-action position with respect to a subsidiary of an issuer that purchased a large block of its parent's stock without filing under Section 13(d). The Commission stated that although such a transaction is not literally within the Section 13(d)(6)(C) exemption, in the absence of unusual circumstances it will not recommend any enforcement action in this situation. *Coronet Investment Co./Transport Life Insurance Co.*, SEC No-Action Letter, 1978 SEC No-Act LEXIS 9171 at *1 (Mar. 27, 1978).

An issuer purchasing its own securities may be subject to Rule 13e-1, *See infra* § 7A.04[1].

See also Old Republic Int'l Corp., SEC No-Action Letter, 1982 SEC No-Act. LEXIS 2577, at *1 (June 30 1982), wherein the Division of Corporation Finance stated that it would not pursue an enforcement action if a subsidiary acquires 10.4 percent of its parents company's stock and then transfers that stock to its wholly-owned subsidiary but does not file a Schedule 13D, when the shares acquired could not be voted and would be treated as held in treasury rather than as outstanding. The Division of Corporation Finance, however, did not necessarily agree that the Section 13(d)(6)(C) exemption is applicable to the acquisition of an issuer's stock by a subsidiary of that issuer. *Id.* at 78,024.

(n5)Footnote 5. Domestic and Foreign Investment Improved Disclosure Act of 1977 of the Foreign Corrupt Practices Act of 1977, Pub. L. No 95-213, 91 Stat. 1498 (1977).

The Domestic and Foreign Investment Improved Disclosure Act of 1977 also added a new Section 13(h) to the Exchange Act directing the Commission to report to Congress within thirty months of the date enactment of Section 13(h) on the effectiveness of the reporting requirements contained in Title II of the Act and on the possibility of changing the five percent threshold used in Section 13(d)(1) and 13(g)(1) of the Exchange Act.

Pursuant to this mandate, the Commission concluded in its report to Congress that the ownership reporting requirements are generally effective, although legislation may still be necessary in certain areas (*e.g.*, in acquisitions during filing periods and in private rights of action). In addition, the report revealed that rule making may be appropriate to help close disclosure gaps in order to make disclosure more meaningful and to lessen the costs and burdens of compliance. The Commission also found that it was not presently feasible or desirable to reduce or modify the five percent reporting threshold in Section 13(d)(1) and (g)(1). Report of the Securities and Exchange Commission on Beneficial Ownership Reporting Requirements Pursuant to Section 13(h) of the Securities Exchange Act of 1934, C.C.H. Fed. Sec. L. Rep. P 82,616 (1980).

(n6)Footnote 6. S. Rep. No. 95-114 at 13 (1977), *reprinted in* The Securities Primary Law Sourcebook, Vol. C § I of the 1934 Act. Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 15348, 16 SEC Docket 228 (Nov. 22, 1978) states:

"Moreover, the legislative history is clear that Section 13(g) was intended to 'supplement the current statutory scheme by providing legislative authority for certain additional disclosure requirements that in some cases could not be imposed administratively.' The principal effect of Section 13(g) is to provide the authority necessary to 'close the gaps' previously described in the disclosure requirements under Section 13(d)." (footnotes omitted).

(n7)Footnote 7. Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 15348, 16 SEC Docket 228 (Nov. 22, 1978) provides:

"Section 13(g)(1) of the Securities Exchange Act of 1934, reprinted in the [Securities Primary Law Sourcebook, Volume B, Section F] taken literally would require disclosure of the prescribed information, as well as that which may be required pursuant to the Commission's general rulemaking authority thereunder, regardless of whether the persons subject thereto are also required to report similar ownership information under other sections of the Exchange Act. Section 13(g)(5), however, directs the Commission to take such steps as are necessary and appropriate in the public interest and for the protection of investors to achieve centralized reporting of the information, to avoid unnecessary duplicative reporting, and to minimize the compliance burden on persons required to report."

(n8)Footnote 8. *See* Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 15348, 16 SEC Docket 228 (Nov. 22, 1978).

(n9)Footnote 9. *See infra* Ch. 8 for a discussion of Section 16(a).

(n10)Footnote 10. Section 16 is a prophylactic provision designed to prevent the use of inside information by certain "insiders" to derive short-swing profits on purchases and sales of the issuer's securities within a six month period. The overriding concern under Section 16 is in regard to the economic incidents of ownership. Section 13(d), in contrast, focuses on the obtainment of voting power and the ability to appoint directors rather than the accumulation of a pecuniary interest in the securities. *See* Filing and Disclosure Requirements Relating to Beneficial Ownership,

Exchange Act Release No. 15348, 16 SEC Docket 228 (Nov. 22, 1978).

(n11)Footnote 11. See Section 13(d)(3); see also Section 13(g)(3).

A person in charge of a takeover group would be subject to liability for the failure of the group to comply with the reporting requirements of Section 13. See, e.g., *SEC v. Savoy Indus., Inc.*, 587 F.2d 1149, C.C.H. Fed. Sec. L. Rep. P 98,295 (D.C. Cir. 1981).

However, in *Pantry Pride, Inc. v. Rooney*, 598 F. Supp. 891, C.C.H. Fed. Sec. L. Rep. P 91,866 (S.D.N.Y. 1984), the court held that an alleged "group" of investors engaged in a proxy contest did not violate Section 13(d) filing requirements although the group held, in the aggregate, more than five percent of an issuer's stock, where the group merely discussed the possibility of a future agreement to vote their shares against the issuer's management in the proxy contest. The group did not control five percent of the stock until an agreement was actually executed.

(n12)Footnote 12. "The Commission may, by rule or order, exempt, in whole or in part, any person or class of persons from any or all of the reporting requirements of this subsection as it deems necessary or appropriate in the public interest or for the protection of investors." Section 13(g)(6).

(n13)Footnote 13. This exemption is also conditioned on compliance with the reporting requirements of Section 16(a), if applicable. Rule 13d-6(c).

(n14)Footnote 14.

"The Commission, by rule or regulation or by order, may permit any person to file in lieu of the statement required by paragraph (1) of this subsection or the rules and regulations thereunder, a notice stating the name of such person, the number of shares of any equity securities subject to paragraph (1) which are owned by him, the date of their acquisition and such other information as the Commission may specify, if it appears to the Commission that such securities were acquired by such person in the ordinary course of his business and were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer nor in connection with or as a participant in any transaction having such purpose or effect." Section 13(d)(5).

(n15)Footnote 15. Rule 13d-1(b)(1).

The intent of subparagraph (b)(1)(ii) is to allow parent holding companies to use short form reporting when the stock holdings of their subsidiaries that are otherwise qualified to use Schedule 13G makes the parent a beneficial owner of more than five percent of a class of equity securities. (See *infra* § 7A.02[2] for a discussion of "beneficial ownership"). A requirement that the parent's direct ownership, together with its non-qualified subsidiaries direct or indirect ownership of a class of securities, not exceed one percent of that class, prevents a parent from setting up a holding company solely for the purpose of avoiding the "long form" report on Schedule 13D, without forcing the parent to use the "long form" report merely because it or one of its non-qualified subsidiaries owns a single share of that class. See Exchange Act Release No. 14910 (1978).

(n16)Footnote 16. See *infra* § 7A.02[1][c].

(n17)Footnote 17. Rule 13d-1(b)(2). The ownership percentages are to be computed on the last day of the month.

(n18)Footnote 18. Rule 13d-2(b).

(n19)Footnote 19. Rule 13d-2(b).

(n25)Footnote 25. Rule 13d-1(e)(2),(f)(2).

(n26)Footnote 26. This can occur if they are beneficial co-owners or members of a group formed for the purpose of holding that security. See *infra* § 7A.02[2][b].

(n27)Footnote 27. Rule 13d-1(k)(1).

(n28)Footnote 28. Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 14692, 16 SEC Docket 228 (Nov. 22, 1978).

(n29)Footnote 29. Previously, Schedule 13D was also the schedule to be filed by tender offerors under Rule 14d-1, until a separate Schedule 14D-1 was adopted in Sec. Exch. Act Rel. No. 34-13787 (1977). See *infra* § 7A.03[2][a].

(n30)Footnote 30. This information is as follows:

"(A) The background, and identity residence, and citizenship of, and the nature of such beneficial ownership by, such person and all other persons by whom or on whose behalf the purchases have been or are to be effected;

(B) The source and amount of the funds or other consideration used or to be used in making the purchases, and if any part of the purchase price or proposed purchase price is represented or is to be represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding, or trading such security, a description of the transaction and the names of the parties thereto, except that where a source of funds is a loan made in the ordinary course of business by a bank, as defined in section 3(a)(6) of this title, if the person filing such statement so requests, the name of the bank shall be made available to the public;

(C) If the purpose of the purchases or prospective purchases is to acquire control of the business of the issuer of the securities, any plans or proposals which such persons may have to liquidate such issuer, to sell its assets to or merge it with any other persons, or to make any other major change in its business or corporate structure;

(D) The number of shares of such security which are beneficially owned, and the number of shares concerning which there is a right to acquire, directly or indirectly, by (i) such person, and (ii) by each associate of such person, giving the background, identity, residence and citizenship of each such associate, and;

(E) Information as to any contracts, arrangements, or understandings with any person with respect to any securities of the issuer, including but not limited to transfer of any of the securities, joint ventures, loan or option arrangements, puts or calls, guaranties of loans, guaranties against loss or guaranties of profits, division of losses or profits, or the giving or withholding of proxies, naming the persons with whom such contracts, arrangements, or understandings have been entered into, and giving the details

thereof."

Section 13(d)(1).

(n31)Footnote 31. CUSIP stands for the "Committee on Uniform Securities Identification Procedures." The disclosure of the CUSIP number assists the Commission in identifying security holders, thereby expediting the processing of their beneficial ownership statements. See Schedule 13D.

(n32)Footnote 32. In *SEC v. Zimmerman*, 407 F. Supp. 623 (D.D.C. 1976) , *aff'd sub nom SEC v. Savoy Indus., Inc.*, 587 F.2d 1149 , C.C.H. Fed. Sec. L. Rep P 96,497 (D.C. Cir. 1978), the court enjoined the defendant, who failed to disclose his membership in a group filing a Schedule 13D, thereby also avoiding disclosure of his previous securities laws violations, from voting any of the shares acquired in the transaction covered by the Schedule 13D.

(n33)Footnote 33. The name of a bank that provided all or any part of these funds in the ordinary course of business shall not be made public if a written request to this effect is sent to the Secretary of the Commission at the time of filing. Section 13(d)(1)(B); Schedule 13D, Item 3.

(n34)Footnote 34. See *Warner Commc'n, Inc. v. Murdoch*, 581 F. Supp. 1482 , C.C.H. Fed. Sec. L. Rep. P 91,435 (D. Del. 1984), where the court held that the existence of a control group formed for the purpose of holding and acquiring corporate stock must be disclosed on Schedule 13D. The court stated that an amendment to the Schedule 13D that discloses allegations of the group's existence is insufficient disclosure. See also *Sea Containers Ltd. v. Stena AB*, 890 F.2d 1205, 1209 (D.C. Cir. 1989) (denying hostile acquirer's motion for a preliminary injunction against target company to amend its 13D disclosure). Furthermore, if the purposes of the group's formation was to deter a hostile takeover this purpose must be disclosed.

(n35)Footnote 35. See *Saunders Leasing Sys., Inc. v. Societe Holding Gray D'Albion*, 507 F. Supp. 627 , C.C.H. Fed. Sec. L. Rep. P 97,881 (N.D. Ala. 1981), where a defendant with an intention of acquiring twenty-five percent of the issuer's stock had to disclose a control purpose on Schedule 13D, although this intention had not taken shape as a fixed plan. See also *Gearhart Indus. v. Smith Int'l., Inc.*, 741 F.2d 707, 726 (5th Cir. 1984) (agreeing with *Saunders*, but denying injunctive relief after acquirer re-filed Schedule 13D to disclose its control interest).

See also *Fin. Fed'n, Inc. v. Ashkenazy*, C.C.H. Fed. Sec. L. Rep. P 91,489 (C.D. Cal. 1983) (total mix of information available was sufficient); *Marshall Field & Co. v. Icahn*, C.C.H. Fed. Sec. L. Rep. P 98,481 (S.D.N.Y. 1982) (temporary restraining order imposed on further acquisition of shares by defendants under a Schedule 13D that not only failed to disclose, but in fact disclaimed, tentative plans by the defendants that would include extraordinary corporate transactions, material sales of assets, and material changes in the target company's business); *Chock Full O'Nuts Corp. v. Finkelstein*, 548 F. Supp. 212, C.C.H. Fed. Sec. L. Rep. P 99,015 (S.D.N.Y. 1982) (the failure of a group of insurgent stockholders to disclose in a Schedule 13D that they acquired their shares with an intent to pressure management to buy them back at a price far in excess of their market value, but who disclosed their intent to wage a proxy contest with management, was not a material omission since any reasonable investor would realize that if offered a sufficient price by management, any stockholder would sell).

If a group owns a potentially controlling share of stock, and collaborates to oust directors, "such situation requires 13D filings...[and] any effort to change or affect control...may be enjoined pending the completion of the required 13D filings, when, however, a corrective filing is made and an adequate opportunity is provided for the information to be digested by shareholders, the corrective injunction should be terminated." *ICN Pharm. v. Khan*, 2 F.3d 484, 489 (2d Cir. 1993) .

A subsequent 13D filing as to the purpose of a transaction admitting a false disclosure or omission in the 13D can cure the filing and render the alleged Section 13D violations moot. But filing an amendment merely disclosing allegations of

falsities and omissions, without actually admitting the charges will not necessarily result in dismissal of the action. *Horsehead Res. Dev. Co. v. B.U.S. Envtl. Serv., Inc.* 916 F. Supp. 305, 309 (S.D.N.Y. 1996) .

(n36)Footnote 36. See Section 12(g)(4), discussed in *supra* § 4.01.

(n37)Footnote 37. *Jewelcor, Inc. v. Pearlman*, 397 F. Supp. 221, 235 (S.D.N.Y. 1975) (holding that it need not be revealed that the securities are being held in a nominee's name under a custody bank account). See also *Hubco Inc. v. Rappaport*, 628 F. Supp. 345, 359 (D.N.J. 1985) ("Section 13(d) does not require disclosure of the fact that stock was held in a nominee's name.").

(n38)Footnote 38. *Instruction*. The description of a transaction required by Item 5(c) shall include, but not necessarily be limited to: (1) the identity of the persons covered by Item 5(c) who effected the transaction; (2) the date of the transaction; (3) the amount of securities involved; (4) the price per share of unit; and (5) where and how the transaction was effected. *Instruction*, Item 5(c), Schedule 13D.

(n39)Footnote 39. *Jewelcor, Inc. v. Pearlman*, 397 F. Supp. 221 (S.D.N.Y. 1975) (holding that a purchaser of securities need not disclose that it has obtained a confidential report about the issuer that is based solely on public information).

(n40)Footnote 40. A listing of the shareholders of a registered investment company or the beneficiaries of an employee benefit plan, pension fund or endowment fund is not required.

(n41)Footnote 41. See Rule 13d-1(b)(1).

(n42)Footnote 42. A Person filing on Schedule 13G because its shares were acquired prior to the issuer's initial public offering need not provide Item 10 certifications.

(n43)Footnote 43. Schedules filed with the Commission pursuant to Section 13 of the Exchange Act must be submitted in electronic format prepared in accordance with the EDGAR Filer Manual. See Rule 101(a)(1)(iii) of Regulation S-T. If such schedule is filed in paper format due to a hardship exemption or continuing hardship exemption pursuant to Rules 201 and 202 of Regulation S-T, the schedule must be filed under cover of Form TH or Form SE, respectively. See Rules 201 and 202 of Regulation S-T. In addition, a Schedule 13D or 13G filed in paper format must include a signed original and five copies of the schedule, including all exhibits. See Rules 13d-101 and 13d-102.

(n44)Footnote 44. Section 13(d)(1); Rule 13d-1(a); Rule 13d-7. See *Nicholson File Co. v. H.K. Porter Co.*, 341 F. Supp 508 (D.R.I. 1972) , where the court held that although a group may have been formed for the purpose of acquiring control of the defendant on or before January 1, 1972, the ten day period first started running on February 25, 1972. Only upon the latter date did the group's plan to acquire the plaintiff's stock become definite enough to disclose. Prior to that time, potential antitrust problems made their plans uncertain, and disclosure would have been premature and potentially misleading.

(n45)Footnote 45. Rule 13d-1(b)(2).

(n46)Footnote 46. Pursuant to § 204.00(B) of the New York Stock Exchange Listed Company Manual as well as § 5005(a)(15) of the Nasdaq Marketplace Rules, the filing of such materials with the Commission on the EDGAR system satisfies the Commission's rules requiring that copies of Section 13 filings be sent to each national securities exchange on which the security is traded.

(n47)Footnote 47. No filing is required at all if the person's beneficial ownership is five percent or less on the last day of the year in which the acquisition is made. See *supra* § 7A.02[1][a][ii].

(n48)Footnote 48. Rule 13d-1(b)(2).

(n49)Footnote 49. Rule 13d-1(c).

(n50)Footnote 50. Rule 13d-1(g).

(n51)Footnote 51. See *Feldman v. Simkins Indus., Inc.*, 679 F.2d 1299, C.C.H. Fed. Sec. L. Rep. P 98,745 (9th Cir. 1982), where the court held that filing a Section 13(d)(2) amendment the first day after sales (which constituted a "material change") were completed and the fourth trading day after the sales had begun, was "prompt" as a matter of law. However, as a matter of good practice, "prompt" is generally considered to be less than four business days.

(n52)Footnote 52. Plantronics, Inc., C.C.H. Fed. Sec. L. Rep. P 80,774 (Div. Corp. Fin. 1976).

(n53)Footnote 53. See, e.g., *Nachman Corp. v. Halfred, Inc.*, C.C.H. Fed. Sec. L. Rep. P 94,455 (N.D. Ill. 1973).

(n54)Footnote 54. 426 U.S. 438, 96 S. Ct. 2126, 48 L. Ed.2d 757 (1976) .

(n55)Footnote 55. 426 U.S. at 449 . *Northway* was a case under the proxy rules, but its materiality standard has been applied in other federal securities law cases. See *Harkavy v. Apparel Indus., Inc.*, 571 F.2d 737 (2d Cir. 1978) . (*Northway* standard used under Rule 10b-5); *Flynn v. Bass Bros. Enter., Inc.*, C.C.H. Fed. Sec. L. Rep. P 96,611 (E.D. Pa. 1978) (*Northway* standard applied under Section 14(e)).

(n56)Footnote 56. Exchange Act Sections 13(d) and 13(g) and Regulation 13D-G Beneficial Ownership Reporting, Compliance and Disclosure Interpretations, Division of Corporation Finance, Securities and Exchange Commission, September 14, 2009 (hereinafter "Section 13(d) Compliance and Disclosure Interpretations").

(n57)Footnote 57. The Commission amended Rule 13d-2(b) to delete the requirement that any person who has filed a Schedule 13G must file an annual amendment to the statement when no changes have occurred in the information contained in the previously filed Schedule 13G. Beneficial Ownership Disclosure Requirements, Exchange Act Release No. 19188, 26 SEC Docket 681 (Oct. 28, 1982).

(n58)Footnote 58. Section 13(d) Compliance and Disclosure Interpretations.

(n59)Footnote 59. The SEC has provided in its Section 13(d) Compliance and Disclosure Interpretations as follows: "Rule 13d-2(a) requires that a security holder amend its Schedule 13D promptly when 'any material changes occur in the facts set forth in the Schedule 13D. If a security holder has failed to timely file any required Schedule 13D amendments, the security holder should immediately amend its Schedule 13D to disclose the required information. If the security holder failed to file multiple amendments to the Schedule 13D when required, it may disclose that information by filing multiple amendments or filing one combined amendment. Regardless of the approach taken, the security holder must ensure that the filings contain the information that it should have disclosed in each required amendment, including the dates and details of each event that necessitated a required amendment. Any of these steps taken by the security holder in these situations will not necessarily affect the determination of liability under the federal securities laws for the failure to promptly file a required amendment to a Schedule 13D."

(n60)Footnote 60. This means securities that are traded on a national securities exchange or that are issued by a company that has over \$1,000,000 in assets and a class of equity securities held by five hundred or more people. See *supra* § 4.01.

(n61)Footnote 61. Section 13(d)(1).

(n62)Footnote 62. Section 13(g)(1).

(n63)Footnote 63. Rule 13d-3(d)(1)(i). ("A person shall be deemed to be the beneficial owner of a security, subject to the provisions of paragraph (b) of this rule, if that person has the right to acquire beneficial ownership of such security, as defined in Rule 13d-3(a) within sixty days, including but not limited to any right to acquire: (A) through the

exercise of any option, warrant or right; (B) through the conversion of a security; (C) pursuant to the power to revoke a trust, discretionary account, or similar arrangement; or (D) pursuant to the automatic termination of a trust, discretionary account or similar arrangement; *provided, however*, any person who acquires a security or power specified in paragraphs (A), (B) or (C) above, with the purpose or effect of changing or influencing the control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect, immediately upon such acquisition shall be deemed to be the beneficial owner of the securities which may be acquired through the exercise or conversion of such security or power. Any securities not outstanding which are subject to such options, warrants, rights or conversion privileges shall be deemed to be outstanding for the purpose of computing the percentage of outstanding securities of the class owned by such person but shall not be deemed to be outstanding for the purpose of computing the percentage of the class by any other person.")

(n64)Footnote 64. *See* Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 15348, 16 SEC Docket 228 (Nov. 22, 1978).

(n65)Footnote 65. A group may meet its filing obligation either jointly or in individual filings by each member of the group. *See supra* § 7A.02[1][a][ii].

(n66)Footnote 66. In *Lane Bryant, Inc. v. Hatleigh Corp.*, C.C.H. Fed. Sec. L. Rep. P 97,529, 97,766 (S.D.N.Y. 1980), the court stated:

"In general, Section 13(d) seems carefully drawn to permit parties seeking to acquire large amounts of shares in a public company to obtain information with relative freedom, to discuss preliminarily the possibility of entering into agreements and to operate with relative freedom until they get to the point where they do in fact decide to make arrangements....By requiring the existence of a 'group,' the law is designed to avoid discouraging and making risky that kind of preliminary activity."

See also *Fin. Fed., Inc. v. Ashkenazy*, C.C.H. Fed. Sec. L. Rep. P 91,489 (C.D. Cal. 1983) (no actual agreement of any kind, either express or implied, to act with any person for the purpose of acquiring, holding, voting or disposing of corporation's stock as a group was found); *Advanced Computer Techniques Corp. v. Lecht*, C.C.H. Fed. Sec. L. Rep. P 98,795 (S.D.N.Y. 1982) (the formation of a group holding more than five percent of an issuer's stock would not trigger an obligation to file Schedule 13D if the group merely offers a slate of candidates for board of directors positions absent a showing that any member of the group had purchased, sold, or intended to trade in the issuer's stock since the decision to offer the slate).

See also *Corenco Corp. v. Schiavone & Sons, Inc.*, 488 F.2d 207, 217-18 (2d Cir. 1973) ; *Texasgulf, Inc. v. Can. Dev. Corp.*, 366 F. Supp. 374, 403 (S.D. Tex. 1973) ; *Twin Fair, Inc. v. Reger*, 394 F. Supp. 156, 160 (W.D.N.Y. 1975) .

(n67)Footnote 67. *Twin Fair, Inc. v. Reger*, 394 F. Supp. 156 (W.D.N.Y. 1975) ; *Water & Wall Ass., Inc. v. Am. Consumer Indus.*, C.C.H. Fed. Sec. L. Rep. P 93,943 (D.N.J. 1973).

(n68)Footnote 68. 366 F. Supp. at 403. (D. Tex 1973); *see also* *Management Assistance, Inc. v. Edelman* 584 F. Supp. 1016, 1019 (S.D.N.Y. 1984) (where the court relied upon the definition of a group set forth in *Texasgulf*); *SEC v. Savoy Indus.*, 587 F.2d 1149, 1162-63 (D.C. Cir. 1978); *Scott v. Multi-Amp Corp.*, 386 F. Supp. 44, 67-68 (D.N.J. 1974) .

(n69)Footnote 69. The court also found that several other defendants were not part of any conspiracy to seize control of the plaintiff. *Id.* at 398-404 .

For an interesting case deciding when a relationship between two parties ripened into a Section 13(d)(3) group, *see* *Universal Container Corp. v. Horwitz*, C.C.H. Fed. Sec. L. Rep. P 96,161 (S.D.N.Y. 1977).

(n70)Footnote 70. *488 F.2d 207* .

(n71)Footnote 71. *Id. at 217-18* .

(n72)Footnote 72. Total return equity swaps are a type of derivative that gives its holder substantially all of the indications of share ownership other than formal voting rights and investment power in the underlying security.

(n73)Footnote 73. Bank counterparties to such swap or derivative arrangements frequently purchase a corresponding interest in the underlying security for the purpose of hedging their exposure.

(n74)Footnote 74. *See CSX Corporation v. The Children's Investment Fund Management (UK) LLP*, 562 F.Supp.2d 511 (S.D.N.Y. 2008) .

(n75)Footnote 75. *See, e.g., General Aircraft v. Lampert*, 556 F.2d 90, 95 (1st Cir. 1977) , where the court stated:

"The evidence upon which the District Court predicated its finding included: the 150,485 shares of GAC common stock were acquired simultaneously in identical transactions (except for amount) by all three appellants; Scuderi's shares were held in Lampert's name from the time of purchase; a single Schedule 13D was filed on behalf of all three appellants and signed by all three; copies of correspondence with GAC from any one appellant were sent to the others. On this record, the District Court could not have concluded other than that the three appellants constituted a 'group' and thus, as a 'person,' were subject to the provisions of Section 13(d)." (footnote omitted).

See also Wellman v. Dickinson, 682 F.2d 355 , C.C.H. Fed. Sec. L. Rep. P 98,731 (2d Cir.1982) (representations made to prospective purchasers and a common desire to profit from a change in corporate control indicated that the defendants were all part of a group that reached an understanding to act in concert to dispose of their securities and thereby aid a third party acquisition of a controlling interest in the corporation).

See also Ozark Air Lines, Inc. v. Cox, 326 F. Supp. 1113 (E.D. Miss. 1971) where there was an agreement, set forth in an exchange of letters, to acquire additional shares of Ozark's stock for the purpose of electing a majority of the Ozark board of directors.

However, *see Transcon Lines v. A.G. Becker, Inc.*, C.C.H. Fed. Sec. L. Rep. P 96,806 (S.D.N.Y. 1979), holding that an individual was not a member of a Section 13(d)(3) group even though he lent assistance to its activities, because he was not a beneficial owner of any of the stock in question and the purpose of Section 13(d)(3) is to prevent a pooling of stock.

Supp. 221, 243-44 (S.D.N.Y. 1975) (stating that the fact that a non-management member was part of the group provided additional support for their conclusion, but that their position would be the same if the group was comprised solely of management members); *Podesta v. Calumet Indus., Inc.*, C.C.H. Fed. Sec. L. Rep. P 96,433 (N.D. Ill. 1978).

See also Warner Commc'n, Inc. v. Murdoch, 581 F. Supp. 1482 , C.C.H. Fed. Sec. L. Rep. P 91,435 (D.Del. 1984), wherein the court stated that Section 13(d)'s disclosure obligations should not apply to management groups *per se*. According to the court, officers and directors are required to disclose beneficial ownership of corporate stock to the Commission. Furthermore, it is common knowledge that management wants to maintain its position and this fact should serve as notice to investors that such a management group exists. The court concluded that Section 13(d) should not be used as a vehicle to circumvent the principle that management is not obligated to disclose an entrenchment plan. However, the court noted that a voting or pooling arrangement between management and third parties constitutes a Section 13(d)(3) group, and must be disclosed in a Schedule 13D statement, since such an arrangement might alter and enlarge the control structure of the corporation beyond what investors would ordinarily presume.

(n93)Footnote 93. *Tony Lama Co.*, SEC No-Action Letter, 1974 SEC No-Act LEXIS 2643. Section 13(d)(6) is discussed in *supra* § 7A.02[1][a][i]. See Transcon Lines v. A.G. Becker, Inc., C.C.H. Fed. Sec. L. Rep. P 96,806 (S.D.N.Y. 1979), where the court held that a person's expectation that someone else would in the future would sell him stock upon his request did not constitute a "right to acquire" stock within Rule 13d-3.

(n95)Footnote 95. *Bath Indus., Inc. v. Blot*, 427 F.2d 97, 112 (7th Cir. 1970) .

(n96)Footnote 96. Rule 13d-3(a). *See also Wellman v. Dickinson*, 682 F.2d 355, C.C.H. Fed. Sec. L. Rep. P 98,731 (2d Cir. 1982) , in which the events in question occurred prior to the effectiveness of Rule 13d-3, where the court held that beneficial ownership is evidenced by the power to dispose of securities, since that power represents a means for effecting changes in corporate control in addition to the possession of voting control.

(n97)Footnote 97. Rule 13d-3(d)(2).

(n98)Footnote 98. In a "firm commitment underwriting," the underwriter agrees to take up any securities that he or she cannot sell.

(n99)Footnote 99. Rule 13d-3(d)(4).

(n100)Footnote 100. Rule 13d-1(b)(1)(ii) includes the following persons:

- "(A) A broker or dealer registered under Section 15 of the Exchange Act;
- (B) A bank as defined in Section 3(a)(6) of the Exchange Act;
- (C) An insurance company as defined in Section 3(a)(19) of the Exchange Act;
- (D) An investment company registered under Section 8 of the Investment Company Act;
- (E) Any person registered as an investment adviser under Section 203 of the Investment Advisers Act of 1940 or under the laws of any state;
- (F) An employee benefit plan as defined in Section 3(3) of the Employee Retirement Income Security Act of 1974, as amended, ("ERISA") that is subject to the provisions of ERISA, or any such plan that is not subject to ERISA that is maintained primarily for the benefit of the employees of a state or local government or instrumentality, or an endowment fund;
- (G) A parent holding company, provided the aggregate amount held directly by the parent, and directly and indirectly by their subsidiaries or affiliates that are not persons specified in Rule 13d-1(b)(ii)(A) through (J), does not exceed one percent of the securities of the subject class;
- (H) A savings association as defined in Section 3(b) of the Federal Deposit Insurance Act;
- (I) A church plan that is excluded from the definition of an investment company under Section 3(c)(14) of the Investment Company Act;
- (J) A non-U.S. institution that is the functional equivalent of any of the institutions listed in paragraphs (b)(1)(ii)(A) through (I) of this section, so long as the non-U.S. institution is subject to a regulatory scheme that is substantially comparable to the regulatory scheme applicable to the equivalent U.S. institution; and
- (K) A group, provided that all the members are persons specified in Rule 13d-1(b)(1)(ii)(A) through (I)...."

(n101)Footnote 101. Rule 13d-3(d)(3).

(n102)Footnote 102. Section 13(d)(1) applies to "any person who, after *acquiring* directly or indirectly the beneficial ownership of any equity security..." (emphasis added). Furthermore, such acquisition, combined with all other acquisitions in the preceding twelve months, must exceed one percent of that class of securities or otherwise be

2-7A Federal Securities Exchange Act of 1934 § 7A.02

"material" under the circumstances, or the acquisition is exempt under Section 13(d)(6)(B) or Rule 13d-2(a).

(n103)Footnote 103. Section 13(g)(1) applies to "any person who *is* directly or indirectly the beneficial owner of more than five percentum of a security...." (emphasis added).

(n104)Footnote 104. See Rule 13d-3, discussed in § 7A.02[2][b].

(n105)Footnote 105. See *supra* § 7A.02[2][b].

(n106)Footnote 106. *Bath Indus. v. Blot*, 427 F.2d 97 (7th Cir. 1970) .

(n107)Footnote 107. *Id. at 109-10* . The court also stated:

"Having all of these aspects of the legislative intent in mind, it is our conclusion that the Act should be interpreted to require compliance with its disclosure provisions when, but only when, any group of stockholders owning more than 10% now 5% of the outstanding shares of the corporation agree to act in concert *to acquire additional shares*.

This construction focuses on the decision on the part of a group owning more than 10% now 5% of a corporation to acquire more shares. Thus it honors the repeated expressions of legislative intent to draft a statute to protect investors rather than to protect current management. It does not proscribe informal discussion among existing shareholders concerning the performance of current management. Nor does it proscribe legitimate cooperation among existing shareholders to assert their determination to take over control of management, *absent* an intention to acquire additional shares for the furtherance of such purpose." *Id.* (emphasis in original).

This opinion was strongly criticized in Comment, *Section 13(d) and Disclosure of Corporation Equity Ownership*, 119 U. Pa. L. Rev. 853 (1971).

(n108)Footnote 108. *GAF Corp.v. Milstein*, 453 F.2d 709, 717 (2d Cir. 1971) , *cert. denied* 406 U.S. 910 (1972) .

(n109)Footnote 109. Cases supporting *Milstein* are: *Texasgulf, Inc. v. Can. Dev. Corp.*, 366 F. Supp. 374 (S.D. Tex. 1973) ; *Twin Fair, Inc. v. Reger*, 394 F. Supp. 156 (W.D.N.Y. 1975) ; *Fin. Gen. Bankshares, Inc. v. Lance*, C.C.H. Fed. Sec. L. Rep. P 96,403 (D.C. Cir. 1978); *Graphic Sci. Inc. v. Int'l Mogul Mines, Ltd.*, 397 F. Supp. 112, 124, n. 35 (D.D.C. 1974) .

Ozark Air Lines v. Cox, 326 F. Supp. 1113 (E.D. Mo. 1971) , expressed a view similar to the one in *Bath* by holding that after a group is formed, it must make an actual acquisition to come within Section 13(d).

(n110)Footnote 110.

"New Rule 13d-5(b)(2) reflects a suggestion by commentators that an exemption from the predecessor of the Rule 13d-5(b) be provided for institutional private placements directly from the issuer. The Commission agrees with the commentators that such transactions are not within the primary scope of Section 13(d)(3). The legislative history of that Section indicates that it was intended primarily to prevent a group of persons seeking to change or influence issuer control from evading the provisions of Section 13(d) because no one individual owned more than five percent of a class of securities. The cooperative activity characteristic of an institutional private placement directly from the issuer generally results from sound business considerations such as cost savings resulting from the use of common counsel and forms, rather than from a desire to affect control of the issuer. Moreover, since the cooperative activity generally ends when the transaction is completed, the information obtained in such a

group filing is of little interest to investors and is available to the issuer." (footnote omitted). Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 14692, 14 SEC Docket 862 (April 21, 1978).

(n111)Footnote 111. See Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 14692, 14 SEC Docket 862 (April 21, 1978).

(n112)Footnote 112. *411 F.Supp.2d 411 (S.D.N.Y. 2006)* .

(n113)Footnote 113. Had the investors been found to be a group, they would have held over 10 percent of Data Race's shares and, as a consequence of their subsequent sales, would have been liable for short-swing profit recovery under Section 16.

(n114)Footnote 114. *Id at 415* .

(n115)Footnote 115. See Rule 13d-3 discussed at *supra* § 7A.02[2][b].

(n118)Footnote 118. Rule 13d-3(c).

(n119)Footnote 119. Rule 13d-3(d)(1)(ii).

(n120)Footnote 120. Since the provisions of Section 13(g) closely parallel those of Section 13(d), the remedies available for a violation of Section 13(g) are similar to those available for a violation of Section 13(d).

(n121)Footnote 121. Section 15(c)(4).

(n122)Footnote 122. See *SEC v. Falstaff Brewing Corp.*, C.C.H. Fed. Sec. L. Rep. P 96,583 (D.D.C. 1978); *SEC v. Zimmerman*, 407 F. Supp. 623 (D.D.C. 1976) , *aff'd sub nom SEC v. Savoy Indus., Inc.*, 587 F.2d 1149 (D.C. Cir. 1978) .

(n123)Footnote 123. Section 21(d).

(n124)Footnote 124. *SEC v. Savoy Indus., Inc.*, 587 F.2d 1149 .

(n125)Footnote 125. *Id. at 1167* .

(n126)Footnote 126. "Having established a violation, we must determine whether the district court erred in entering an injunction against Zimmerman for his violation of Section 13(d)(1) and 13(d)(3). We conclude that there is no error. Where, as here, the [Commission] is not attempting to halt an ongoing violation, 'the ultimate test is whether the defendant's past conduct indicates...that there is a *reasonable likelihood* of further violations in the future.'" (citations omitted).

"Zimmerman's past conduct is highly suggestive of his propensity to commit securities law violations and the likelihood that he will commit such violations in the future. *SEC v. Manor Nursing Centers, Inc.*, 458 F.2d 1082, 1100 (2d Cir. 1972) . His violation was not an isolated incident; he has not demonstrated that he understands his conduct to have been wrongful; and he does not give sufficient assurances against future violations. Furthermore, the nature of the appellant's business activities may

present him with further temptations to violate the law. *SEC v. Universal Major Indus. Corp.*, 546 F.2d 1044, 1048; *SEC v. Management Dynamics, Inc.*, 515 F.2d 801, 807 (2d Cir. 1975) . Under these circumstances, we believe that there is a sufficient probability of a future violation to uphold the district court on this issue. The absence of an express finding on the probability of future violations by the district court does not impair our ability to sustain the district court's injunction where the necessary factors are so obviously present. *Id.* at 807-08 ; *SEC v. Culpepper*, 270 F.2d 241, 250 (2d Cir. 1959) . *Id.* at 1168 ." (footnote omitted).

(n134)Footnote 134. *GAF Corp. v. Milstein*, 453 F.2d 709 (2d Cir. 1971) . The court considered this issue *sua sponte*, as the defendant did not challenge the standing of the issuer.

But see *Woodward & Lothrop, Inc. v. Baron*, C.C.H. Fed. Sec. L. Rep. P 91,534 (D.D.C. 1984), where the court held that an issuer was not the most appropriate party to assert its shareholders' rights under Section 10(b) since individual shareholders were present as plaintiffs in the action. The court stated that no departure from the general rule that purchasers and sellers, but not issuers, are the proper parties to raise Section 10(b) claims were warranted. Any injury that occurred from defendant's manipulation of the market for issuer's stock as a result of withholding material information was indirect at best.

See also *Saunders Leasing Sys., Inc. v. Societe Holding Gray D'Albion*, 507 F. Supp. 627 , C.C.H. Fed. Sec. L. Rep. P 97,881 (N.D. Ala. 1981).

But see *Hanna Mining Co. v. Norcen Energy Resources Ltd.*, C.C.H. Fed. Sec. L. Rep. P 98,878 (N.D. Ohio 1982), where the court, relying upon a narrow exception created by the Court of Appeals for the Second Circuit in *Milstein*, held that a target company has standing to maintain a private right of action for injunctive relief under Section 10(b) and *Rule 10b-5* although the target is not a "purchaser or seller" of securities.

(n135)Footnote 135. 453 F.2d 709, 719-21 (2d Cir. 1971) , cert. denied, 406 U.S. 910 (1972) .

See also *Dan River, Inc. v. Unitex Ltd.*, 624 F.2d 1216, C.C.H. Fed. Sec. L. Rep. P 97,515 (4th Cir. 1980) , holding that it was not sufficient that the defendants had "facially" met the requirements of Section 13(d), since an obligation exists to file a complete and accurate Schedule 13D.

See also *SEC v. Savoy Indus., Inc.*, 587 F.2d 1149, 1165 (D.C. Cir. 1978) .

(n136)Footnote 136. *GAF v. Milstein*, 453 F.2d 709 (2d Cir. 1971) (emphasis in original).

(n137)Footnote 137. *Rondeau v. Mosinee Paper Corp.*, 422 U.S. 49 (1975) ; see also *Gearhart Indus., Inc. v. Smith Int'l, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,667 (5th Cir. 1984) (a private right of action for injunctive relief is available under Section 13(d)).

See also *Kirsch Company v. Bliss & Laughlin Indus., Inc.*, 495 F. Supp. 488 , C.C.H. Fed. Sec. L. Rep. P 97,580 (W.D. Mich. 1980) (private right of action for injunctive relief available to target company under Section 13(d) to require a purchaser to correct all misrepresentations and omissions in its Schedule 13D).

But see *Gateway Indus., Inc. v. Agency Rent A Car, Inc.*, 495 F. Supp. 92 , C.C.H. Fed. Sec. L. Rep. P 97,540 (N.D. Ill. 1980), where the court held that no implied right of action for injunctive relief exists under Section 13(d) for a target company suing on its own behalf or for the benefit of its shareholders. See also *Leff v. CIP Corp.*, 540 F. Supp. 857 , C.C.H. Fed. Sec. L. Rep. P 98,662 (S.D. Ohio 1982), where the court held that no private right of action for injunctive relief could be implied under Section 13(d) since:

- (1) the terms of Section 13(d) do not create any rights but only constitute a reporting requirement;
- (2) the legislative history of Section 13(d) is silent on the question of any private right of action; and
- (3) the enforcement scheme of the Exchange Act indicates that Congress expressly provides remedies elsewhere in the Exchange Act for the violations alleged i.e., Sections 18 and 21.

See also *Liberty Nat'l Ins. Holding Co. v. Charter Co.*, 734 F.2d 545 , C.C.H. Fed. Sec. L. Rep. P 91,539 (11th Cir. 1984), where the Court of Appeals for the Eleventh Circuit held that an issuer alleging that a shareholder violated Section 13(d) by filing a false Schedule 13D did not have an implied right of action under Section 13(d) to seek an injunction requiring the purchaser to divest itself of the issuer's stock. The court stated that investors, not corporations, are the intended beneficiaries of Section 13(d). Furthermore, reviewing the legislative and judicial history of Section 13(d), the court determined that Congress did not intend to provide such a remedy since the primary effect would be detrimental to shareholders. Finally, the court concluded that implying the private remedy sought by the issuer would be inconsistent with the Exchange Act's purpose since it would tip the balance of regulation in favor of management. When it comes to private rights of action seeking damages for violations of Section 13(d), no court has been sympathetic to Liberty National's position. See, e.g., *Hallwood Realty Partners, L.P. v. Gotham Partners, L.P.*, 286 F.3d 613 (2d Cir. 2002) .

(n138)Footnote 138. 439 F. Supp.2d 139 (D.D.C. 2006) .

(n139)Footnote 139. *Id.* at 160 .

(n140)Footnote 140. See e.g., *Gearhart Indus., Inc. v. Smith Int'l, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,667 (5th Cir. 1984), where the court held that since a NYSE delisting may cause irreparable injury to corporate shareholders, injunctive relief may be available depending on the facts. Accordingly, the issue was remanded to the district court to

make a factual determination.

(n148)Footnote 148. See also *Committee for New Management of Butler Aviation v. Widmark*, 335 F. Supp. 146, 155 (E.D.N.Y. 1971) , where the court said:

"Here we are only concerned with admitted statutory violation by a large stockholder, once part of the management of a corporation, who determined on his own to launch a campaign to regain control. In doing so he has clearly plunged the corporation into a costly proxy contest it can ill afford--one which might have been avoided had early disclosure of his plans been made.

If Section 13(d) means anything, plaintiff Dopp should not be permitted to gain advantage from a course of action pursued in clear violation of law. At the very least, consideration of equity demand that Dopp be disenfranchised from voting at the December 14th meeting those shares he acquired after January 4, 1971, in excess of the 2% exemption provided by the Williams Act."

(n149)Footnote 149. *Twin Fair, Inc. v. Reger*, 394 F. Supp. 156, 161 (W.D.N.Y. 1975) ; *Graphic Sci., Inc. v. Int'l. Mogul M. Ltd.*, 397 F. Supp. 112 (D.D.C. 1974) .

(n150)Footnote 150. Noting injunctive overkill, the Fifth Circuit in *Gearhart Industries, Inc. v. Smith International, Inc.* C.C.H. Fed. Sec. L. Rep. P 91,667 (5th Cir. 1984), See also *Edelson v. Ch'ien*, 405 F.3d 620 (7th Cir. 2005) (denying a former outside director shareholder injunctive relief as a remedy for a 13(d) violation).

See also *Energy Ventures, Inc. v. Appalachian Co.*, 587 F. Supp. 734, C.C.H. Fed. Sec. L. Rep. P 91,556 (D. Del. 1984) , the court denied interim injunctive relief under Section 13(d) since, even if an acquiring company's initial Schedule 13D filing failed to disclose an alleged decision to acquire a majority of a target company's common stock to gain control of the target's management and board of directors, a subsequent filing cured any prior nondisclosure.

See also *Lane Bryant, Inc. v. Hatleigh Corp.*, C.C.H. Fed. Sec. L. Rep. P 97,529 (S.D.N.Y. 1980), a target company's request for an injunction preventing the defendant purchasers from voting their stock was denied on the ground that any harm the target's shareholders could sustain was outweighed by the harm the defendants would suffer if deprived of their right to participate in the annual meeting and thereby protect their investment.

See also *University Bank and Trust Co. v. Gladstone*, 574 F. Supp. 1006, C.C.H. Fed. L. Rep. P 99,594 (D. Mass. 1983), the court denied granting an injunction to prevent a purchaser, who allegedly violated Section 13(d) by filing false and misleading statements from voting, selling or otherwise disposing of shares since:

- (1) subsequent amendments stating his intention to take over plaintiff-bank cured any disclosure deficiencies and enabled shareholders to freely vote, sell or retain their shares with full information about the purchaser's intentions; and
- (2) regarding shareholders who had already sold their shares when the alleged deficient filings were in effect, the proper remedy would be an action for damages rather than an injunction.

See also *Condec Corp. v. Farley*, 573 F. Supp. 1382, C.C.H. Fed. Sec. L. Rep. P 99,535 (S.D.N.Y. 1983) (no showing of irreparable harm to warrant preliminary injunctive relief under Section 13(d) since Schedule 13D filings made subsequent to this court action adequately disclosed all relevant facts and information about the defendants' improper use of company pension funds to purchase target company stock); *Treadway Co., Inc. v. Care Corp.*, C.C.H. Fed. Sec. L. Rep. P 97,603 (2d Cir. 1980) (no risk of irreparable injury when the target shareholders had four months to "digest" the corrected deficiencies in the acquiring company's Schedule 13D); *Financial General Bankshares, Inc. v. Lance*, C.C.H. Fed. Sec. L. Rep. P 97,611 (D.D.C. 1980) (no injunctive relief granted for violation of Section 13(d) because the defendant was no longer in a position to cause irreparable harm); *Standard Metals Corp. v. Tomlin*, 503 F. Supp. 586, C.C.H. Fed. Sec. L. Rep. P 97,606 (S.D.N.Y. 1980) (no showing of sufficient possible irreparable harm to warrant preliminary injunction against the defendants); *Ludlow Corp. v. Tyco Labs., Inc.*, C.C.H. Fed. Sec. L. Rep. P 98,383 (D. Mass. 1981) (injunctive relief denied when ambiguity that may have been created by Schedules 13D was dispelled by subsequent unequivocal filings).

But see *Camelot Industries Corp. v. Vista Res., Inc.*, 535 F. Supp. 1174, C.C.H. Fed. Sec. L. Rep. P 98,611 (S.D.N.Y. 1982), the court held that a tender offeror violated Section 13(d) by failing to disclose in its Schedule 13D filing a voting agreement, it had entered into with the target's largest shareholder. Thus, the court enjoined the tender offer with permission to reoffer after compliance with the proxy and disclosure rules.

But see *General Aircraft v. Lampert*, 556 F.2d 90, 97 (1st Cir. 1977), where the court refused to enjoin the defendants from voting their stock because an injunction against soliciting proxies was sufficient relief for their violation absent an imminent contest for control. In its ruling, the court stated that "[i]nvestors are entitled to the legitimate fruits of their investment."

See also *Universal Container Corp. v. Horwitz*, C.C.H. Fed. Sec. L. Rep. P 96,161 (S.D.N.Y. 1977), the court refused to sterilize the defendants' shares for minor violations of Section 13(d), where the parties had a private agreement to neutralize any votes to alter the management of the corporation until the dispute was settled in court.

See also *Financial General Bankshares, Inc. v. Lance*, C.C.H. Fed. Sec. L. Rep. P 96,403 (D.D.C. 1978), where the court refused to order divestiture of stock acquired by the defendants while violating Section 13(d); and a pre-*Rondeau* case, *Scott v. Multi--Amp Corp.*, 386 F. Supp. 44 (D.N.J. 1974), a pre-*Rondeau* case, where no injunction was granted since the violation was committed four years prior, and everyone knew of the defendant's stock acquisitions since they resulted in the defendants taking control of the issuer.

(n160)Footnote 160. *Id.* at 113 . Since the defendants were effectively disenfranchised by this injunction, to preserve the status quo, the court ordered the postponement of the annual shareholders' meeting.

(n161)Footnote 161. *See also* *Marshall Field & Co. v. Icahn*, C.C.H. Fed. Sec. L. Rep. P 98,484 (S.D.N.Y. 1982), where the court stated that the renewal of a temporary restraining order might harm plaintiff shareholders by:

- (1) barring the principal existing bidder from purchasing shares, and
- (2) deterring plaintiff's management from seeking competitive bidders.

The court, however, suggested that the defendant may be subject to:

- (1) an injunction barring the voting of shares acquired, or
- (2) actions for damages or rescission brought by uninformed or misled sellers, resulting from the defendant's acquisition of shares under the original, allegedly fraudulent, Schedule 13D.

P 98,268 (S.D.N.Y. 1981) , where the court permitted an amendment to a complaint to include the addition of a claim under Section 13(d) that the failure of a defendant to disclose in the Schedule 13D the formation of a "group," within the meaning of Section 13(d)(3), for the purpose of acquiring, holding, or disposing of a company's stock, was materially misleading in connection with the plaintiff's sale of the company's stock to the defendants although:

- (1) two presidents of the plaintiff may have known that one defendant was selling the company's stock to another defendant; and
- (2) the Schedule 13D filed by a defendant disclosed that the defendant reserved the right to purchase additional stock, since this knowledge and disclosure did not necessarily mean that the plaintiff knew or should have known of the existence of a "group" that was purchasing stock for resale to the company at a premium.

(n167)Footnote 167. *See* *Wellman v. Dickinson*, 682 F.2d 355, C.C.H. Fed. Sec. L. Rep. P 98,731 (2d Cir. 1982) , where the court denied damages because plaintiffs did not demonstrate that the failure of the defendant-director to file a Schedule 13D denied the plaintiffs the opportunity to share in a premium offered by a corporation attempting to acquire control of the issuer or caused the acquiring corporation to purchase the director's shares. The acquiring corporation was

interested in purchasing the director's shares because the transaction would enable it to acquire a large block of stock expeditiously by dealing with a limited number of individuals).

CHAPTER 7A The Williams Act Amendments-- Controlling Shareholders and Tender Offers

2-7A Federal Securities Exchange Act of 1934 § 7A.03

AUTHOR: Chang-Do Gong This chapter was prepared by Morton A. Pierce and Chang-Do Gong with the assistance of Daniel Hackney. Messrs. Pierce and Gong are partners of Dewey & LeBoeuf LLP. and Mr Hackney is an associate of Dewey & LeBoeuf LLP.

§ 7A.03 Regulation of Tender Offers

There are two types of tender offers, including a cash tender offer and an exchange offer. In a cash tender offer, the bidder seeks to acquire the target company's stock for cash, while in an exchange offer, the bidder offers to exchange its stock for stock in the target company.

Prior to launching a tender offer, a bidder must file a Schedule TO with the Commission and provide a copy of the filing with the target company that discloses, among other things, the bidder's identity, the amount of the target company's securities sought, the consideration offered, the bidder's source of funds, the purpose(s) of the tender offer, and whether the bidder intends on acquiring the target company's shares to change the target company's board of directors, divest the target company of material assets, merge the target company or any of its subsidiaries, or change the target company's capital structure.

Additionally, the target company's shareholders must be provided with information by the bidder that includes the offering price, the duration of the offer, how securities must be tendered, and the terms under which tendered securities may be withdrawn. The target company's shareholders must also be informed of the identity of the bidder and of any persons who may be soliciting shareholders on the bidder's behalf. It should be noted that similar information must be furnished to the target company's shareholders by the target company if the target company intends to solicit shareholders in opposition to the tender offer.

In order to reduce the risk of market manipulation and insider trading, a bidder is prohibited from acquiring shares of the target company during the period of the offer except pursuant to the offer. Accordingly, any person who acquires material nonpublic information concerning a tender offer from the bidder or the target company is prohibited from trading in the target company's stock unless the information is first made public.

Rule 14e-5 prohibits a "covered person" from "directly or indirectly purchas[ing] or arrang[ing] to purchase any subject securities or any related securities except as part of the tender offer" starting from the time of "public announcement" of the offer and lasting until the offer expires. n1 Rule 14e-5 was promulgated by the Commission in order to prevent a

bidder engaged in a tender offer from purchasing securities outside of the tender offer on terms preferable to those offered to security holders tendering their securities through the offer or from securing ownership and control of blocks of the issuer's shares outside of the tender offer process. Rule 14e-5 was further "designed to prevent fraudulent, deceptive or manipulative acts or practices in connection with a tender offer for equity securities." n2

It should be noted, however, that under certain circumstances the Commission will grant "no-action" relief to a "covered person" who makes purchases outside of the tender offer. n3 In fact, Rule 14e-5(d) expressly permits the Commission to grant an exemption, either unconditionally or under specified terms, from Rule 14e-5 "to any transaction or class of transactions or any security or class of securities, or any person or class of persons" upon written application or upon the Commission's own motion. n4

Under Section 14(e) of the Exchange Act, material misstatements or omissions as well as fraudulent, deceptive or manipulative practices in connection with a tender offer are prohibited. A misstatement or omission is "material" if a reasonable shareholder would consider it important in deciding whether or not to tender his or her shares in the offer. There is a private right of action for violations of Section 14(e) not only against the bidder but also against the target company as well, although the statute does not expressly so provide. However, private rights of action for damages are unavailable to a defeated tender offeror.

Tender offers are regulated by the Williams Act amendments to the Exchange Act. The consideration paid by an offeror in a tender offer may be for cash or an exchange of securities in the subject company. Additionally, tender offers may be "hostile," *i.e.*, not recommended by the subject company's board of directors, or "friendly," *i.e.*, recommended by the subject company's board of directors. In a cash tender offer, the offeror will offer to purchase the outstanding shares of the company that it is seeking to acquire (the "target company") in exchange for cash. However, in an exchange offer, the offeror will offer to exchange its own securities for securities in the target company. n5 A "friendly" tender offer is one that is welcomed and perhaps has even been negotiated by the management of the target company and approved by its board of directors, whereas a "hostile" offer is one that is not welcomed by the target company and is often launched by the offeror as a surprise. If an offeror seeks to acquire all of the shares of a target company in a tender offer, but is only partially successful, the offeror will often seek to effectuate a merger at some time after the completion of the tender offer in order to achieve complete ownership of the target company. These transactions are generally known as "two-step" or, in some cases, "multi-step" acquisitions.

Tender offers involve a number of participants. The offeror will usually retain the assistance of expert outside legal counsel, who is well versed and experienced in mergers and acquisitions, to provide advice regarding the many complex federal and state securities, corporate, tax, and antitrust law implications of the transaction. In addition to retaining expert outside legal counsel, an offeror in a tender offer will often require the assistance of many other financial services and banking professionals to help manage and conduct the offer, including, among others: (1) a financial printer, who is relied upon to meet deadlines and keep information found in the offering documents confidential; n6 (2) a proxy solicitation firm, who communicates with shareholders; (3) a depository bank, who receives and provides payment for tendered shares; and (4) an investment bank, who acts as dealer-manager in the transaction. n7 Both the dealer-manager and the offeror's counsel take leading roles in structuring the tender offer by advising the offeror on strategy, tactics, pricing and other matters that often arise during the course of the tender offer. n8

Upon receiving notice of the tender offer, the target company will often need to retain outside expert legal counsel and an investment banker in order to evaluate the adequacy of the offer. Sometimes the target company's investment banker will search for a competing offeror (a so called "White Knight") and will be involved in conducting negotiations with the White Knight. The target company's investment banker and legal counsel are crucial participants in planning the target company's strategic response to the offer regardless of whether or not it is "friendly" or "hostile." n9

[1] What is a "Tender Offer"?

The Williams Act and the various amendments to it do not provide a definition of the term "tender offer." The Commission has avoided formulating a definition "since the dynamic nature of tender offers requires administrative and judicial flexibility in determining what types of transactions should be subject to the [a]ct and [the] [r]egulations." n10 While the term "tender offer" has never been defined in statutory provisions or rules, courts generally apply the eight-factor test established in *Wellman v. Dickinson* n11 to determine whether an acquisition program constitutes a tender offer. These factors include whether the transaction: (1) involves an active and widespread solicitation of public shareholders; (2) involves a solicitation made for a substantial percentage of the target's stock; (3) offers a premium to the prevailing market price; (4) has fixed rather than negotiable terms; (5) is an offer contingent on the tender of a fixed minimum number of shares to be purchased; (6) is only open for a limited period of time; (7) pressures offerees to sell their stock; and (8) is accompanied by public announcement of a purchase program for the target's securities which precedes or accompanies a rapid accumulation of large amounts of the target's securities. No single factor is dispositive and courts do not need to conclude that all eight factors are present in order to determine that an acquisition program is a tender offer. n12

Sections 14(d) and 14(e) were designed to protect the recipients of a conventional tender offer by insuring that they are treated fairly and equally and are not stampeded into accepting the offer. To that end, the Williams Act provides that various disclosures must be made including information about the purpose of the offer, the plans that the bidder has for the target company and other detailed information about the bidder and about the offer. n13 If such disclosure is incomplete, false or misleading, the bidder may be subject to civil liability or injunction or to an enforcement action by the Commission. n14 Further, if a bidder makes a tender offer for less than all of the outstanding equity securities of a class, but a greater number of securities are tendered, then the bidder must pay for the tendered securities *pro rata*, disregarding fractions, according to the number of securities tendered by each security holder during the period in which the offer remains open. n15 If the offering price is raised after the offer has commenced, then the increased price must be paid to all whose tendered shares are purchased. n16 Finally, securities tendered may be withdrawn at any point during which the offer remains open. n17

Additionally, courts hold that the Williams Act applies to methods of acquiring stock other than by a formally announced tender offer. n18 Pre-purchase publicity can make a stock acquisition program equivalent to a tender offer. n19 However, open market purchases made without advance publicity of the buyer's intent are generally not tender offers. n20 Likewise, privately negotiated purchases usually have not been treated as tender offers. n21 One reason is that privately negotiated purchases are frequently made from knowledgeable investors who are unlikely to be pressed into making hasty, uninformed decisions to sell their shares. n22 Open market purchases made immediately before a formal tender offer are not integrated with the subsequent tender if they are within the 5 percent limit which Section 14(d) specifies. n23 But certain actions taken in connection with a tender offer, even if taken prior to commencement of the offer, may be regulated under Sections 14(d) and (e). n24

[2] The Regulatory Scheme.

Section 14(d) of the Exchange Act contains several important requirements and procedures, including:

- (1) It requires a bidder to file certain information with the Securities and Exchange Commission before commencing a tender offer;
- (2) It regulates how solicitation for or against the offer may be conducted; and
- (3) It contains provisions that govern certain terms of the offer itself.

[a] Filing with the Commission. Section 14(d)(1) states that it is unlawful for any person, directly or indirectly,

by use of (i) the mails or other means of interstate commerce or (ii) any facility of a national securities exchange, to make a tender offer for any class of equity security registered under the Exchange Act, n25 if, after completion of the offer, such person would, directly or indirectly, be the beneficial owner of more than 5 percent of such class, unless at the time copies of the tender offer are first published or sent or given to security holders, such person has filed with the Commission a statement containing the information specified in Section 13(d) of the Exchange Act along with such additional information as the Commission may prescribe by rule or regulation. Significantly, Section 14(d) and Regulation 14D, as opposed to Section 14(e) and Regulation 14E, applies to securities registered under the Exchange Act. A copy of the statement must also be sent to the target company.

For the purpose of computing a person's percentage of beneficial ownership of a class of securities, only the outstanding securities of the issuer are counted to determine the total number of shares in that class; securities held by or for the account of the issuer or a subsidiary of the issuer are not included. n26 Rule 14d-1(g)(1) states that the definition of beneficial owner set forth in Rule 13d-3 also applies to Section 14(d). n27 Generally, that definition provides that anyone who has, or shares, the power to vote a security or the power to direct its investment is a beneficial owner of that security. n28 Furthermore, anyone, who through an option, warrant, the power to revoke a trust, or other means, has the right to acquire such beneficial ownership within sixty days, is also deemed to be a beneficial owner of that security. n29 In connection with any inquiry into the question of percentage of beneficial ownership sought by an offeror, the identity of such offeror can also be an issue as Section 14(d), and regulations promulgated thereunder, will require significant disclosure regarding the person or persons on whose behalf an offer is made. n30

Section 14(d)(2)'s standard of group status is identical to Section 13(d)(3); n31 it states that a group acting together for the purpose of acquiring, holding or disposing of securities is to be treated as a single "person" for the purposes of Section 14(d). n32

Section 14(d)(8) provides two exemptions from the provisions of Section 14(d). One is for tender offers, which taken together with all other acquisitions of the same security within the past twelve months, would not result in the acquisition of more than two percent of an issuer's outstanding securities. It is questionable if there are any tender offers small enough to make use of this exemption. The second exemption is for any issuer making a tender offer for its own securities.

Section 14(d)(8) also grants the Commission the authority to exempt, by rule or order, a tender offer from the provisions of Section 14(d), provided that the offer does not have the purpose or effect of changing or influencing the control of the issuer.

The date of commencement of a tender offer is determined by Rule 14d-2. Rule 14d-2(a) provides that a tender offer commences, and thus, the tender offer rules apply, "at 12:01 a.m. on the date when the bidder has first published, sent or given the means to tender to security holders." For purposes of Rule 14d-2, the means to tender includes the transmittal form or a statement regarding how the transmittal form may be obtained.

Further, all written communications that relate to a tender offer beginning with and including the first public announcement of the transaction must be filed on a Schedule TO-C with the Commission on the date the communication is first made. In addition, written communications must contain a legend advising security holders to read the full tender or recommendation statement when it becomes available. n33

The Schedule TO must be filed at the commencement of the tender offer. Rule 14d-3(a) requires that the Schedule TO, including all exhibits, must be filed with the Commission, and that one copy, including all exhibits, must be hand delivered to the target company and to any competing tender offeror that has filed a Schedule TO. A copy of the Schedule TO, including all exhibits, must be mailed first class to each national securities exchange that lists the securities that are the subject of the offer. n34 Additionally, telephone notification of the offer must be given to such exchanges, and the Financial Industry Regulatory Authority ("FINRA"), where applicable. n35 The above steps must be

taken "as soon as practicable on the date of the commencement of the tender offer." n36

Rule 14d-6 establishes specific disclosure requirements for tender offers. A tender offer disseminated by long-form publication must contain the information required by Rule 14d-6(d)(1). n37 A tender offer disseminated by summary publication must contain the information required by Rule 14d-6(a)(2) and the materials to be furnished upon the request of a security holder must comply with Rule 14d-6(d)(1). n38 If a tender offer is made by use of a stockholder's list, the summary advertisement must contain the information required by Rule 14d-6(d) and, the materials published or sent or given to shareholders must comply with Rule 14d-6(d)(1). n39 A tender offer disseminated by any means other than those enumerated must comply with Rule 14d-6(d). n40

Rule 14d-6(d)(1) requires the following information:

- (1) the summary term sheet required by Item 1 of Schedule TO and
- (2) the disclosure required by the remaining Items of Schedule TO for third-party tender offers, except Item 12 of Schedule TO, or a fair and adequate summary thereof.

Rule 14d-6(d)(2) requires the following information:

- (1) the identity of the bidder n41 and the subject company;
- (2) information required by Item 1004(a)(1) of Reg. M-A;
- (3) if the tender offer is for less than an entire class of securities, a statement as to whether the purpose of the offer is to acquire influence or control of the target company;
- (4) a statement that information required by Rule 14d-6(d)(1) is incorporated by reference into the summary advertisement;
- (5) instructions on how to promptly obtain the bidder's tender offer materials, and
- (6) if the offer is made through the use of stockholder lists, a statement that such lists are being requested and that tender offer materials will be mailed to record holders and will be furnished to brokers, banks, and other persons holding securities on behalf of beneficial owners.

In responding to a Schedule TO, the bidder must keep in mind, in addition to the literal requirements of the schedule, that Section 14(e) prohibits the omission of material facts in connection with a tender offer if such omission makes other statements made materially misleading. The Schedule TO calls for the following information n42:

Item 1, "Summary Term Sheet," requires a brief description, in bullet point format, of the essential features of the proposed transaction.

Item 2, "Subject Company Information," requires the name of the target company, the address of its principal executive offices and the title and number of shares outstanding of the class of equity securities being sought. n43 The principal market in which such securities are traded and their high and low sales price on that market for each quarterly period during the past two years must also be stated.

Item 3, "Identity and Background of Filing Person," requires a corporation partnership, limited partnership syndicate or other group to state its name, the state or other place of its organization, its principal business, the address of its principal office, and whether, during the last five years, it has either (i) been convicted in a criminal proceeding, or (ii) was a

party to a civil proceeding of a judicial or administrative body that found a violation of state or federal securities laws, or enjoined it from future violation of such laws. The particulars concerning any such criminal or civil proceeding must be supplied.

A natural person must state his name, citizenship, residence or business address, principal occupation, the address of his employer, employment history for the past five years, and the information described in the preceding paragraph concerning criminal and civil proceedings.

Item 4, "Terms of the Transaction," requires, among other things, a description of the total number and class of securities sought in the offer, the type and amount of consideration offered, the scheduled expiration date, whether a subsequent offering period will be available, whether and how the offer will be extended, the dates before and after which security holders may withdraw tendered securities, the procedures for tendering and withdrawing securities and a brief description of the accounting treatment and financial income tax consequences of the transaction, if material.

Item 5, "Past Contract, Transactions, or Negotiations and Agreements," requires a description of any contacts, negotiations or transactions between the bidder or its subsidiaries and the target company or its affiliates concerning: a merger, consolidation or acquisition, n44 a tender offer or other acquisition of securities, an election of directors, or a sale or other transfer of a material amount of assets. n45

Other contracts, negotiations, and transactions between these parties must be disclosed if they involve an amount equal to one percent or more of the target company's consolidated revenues for the fiscal year in which the transaction occurs. Transactions between the bidder and the executive officers and directors of the target company must be disclosed if the amount involved in the transaction exceeds \$60,000.

Item 6, "Purpose of the Transaction and Plans or Proposals," mandates disclosure of critical information for making a rational investment decision. The bidder must state the purpose(s) of the tender offer and describe any plans that relate to or would result in:

- (1) A merger, reorganization, or liquidation of the target company or any of its subsidiaries;
- (2) A sale of a material part of the assets of the target or any of its subsidiaries;
- (3) Any material change in the capitalization, indebtedness, dividend policy, corporate structure or business of the target company;
- (4) Any change in the present board of directors or management;
- (5) Any other material change in the target company's corporate structure or business;
- (6) Causing a class of the target company's securities to be delisted from a national securities exchange or to lose its trading authorization on an inter-dealer quotation system;
- (7) A class of equity securities of the target company becoming eligible for deregistration under Section 12(g)(4) of the Exchange Act because the number of its holders has been reduced to less than three hundred;

There are only two basic purposes for making a tender offer, including investment and/or control. In a number of cases, the adequacy of the bidder's disclosure concerning his or her intent to take over the target company has been challenged. Generally, if the bidder discloses some intent to exercise control, this will be considered sufficient. n46 Where no intent of taking control is stated, a court may infer this intent from other facts even though successful completion of the tender

offer would not give the bidder a majority of the target company's stock. For example, in *Gulf & Western Industries, Inc. v. Great Atlantic & Pacific Tea Co.*,ⁿ⁴⁷ the Court of Appeals for the Second Circuit held that a tender offer for fifteen percent of A&P's stock (Gulf & Western already held four percent) was made for control purposes, despite Gulf & Western's claim that it was an investment. The court stated that "G&W has a well-established practice of eventually acquiring firms in which it initially purchases only a small percentage of the outstanding shares."ⁿ⁴⁸ The court also noted that the tender offer was the largest commitment in Gulf & Western's history and that Gulf & Western believed that A&P was in need of new management. In *Anaconda Co. v. Crane Co.*,ⁿ⁴⁹ the district court held that the target company had not proven that a tender offer for 22.6 percent of its shares was an attempt to gain control, where the bidder had promised not to acquire more shares, nor to seek representation on the board of directors, for so long as it owned any of the target company's stock acquired in its tender offer.

Over the years, courts dealt with the question of how definite a plan or proposal, or the details of one, must be for its disclosure to be required under Item 6. In the leading case, *Electronic Specialty Co. v. International Controls Corp.*,ⁿ⁵⁰ the bidder stated that it might consider a merger with the target company based on "the relative market prices of their common stock." Judge Friendly ruled that this disclosure was adequate, since the bidder had not shown a firm intention to merge with the target company if it successfully completed its tender offer. He stated:

"It would be as serious an infringement of these regulations to overstate the definiteness of the plans as to understate them."ⁿ⁵¹

Another case held that revealing an intent to merge, without more, was sufficient, despite the existence of potential terms for a merger.ⁿ⁵² The court found that these were hypothetical terms that were submitted to the bidder's bank for illustrative purposes only, stating that:

"In every tender offer looking forward to a combination of the offeror and the target, the offeror conducts analyses to determine the feasibility of the tender plan. While every case must be judged on its own facts, when no specific terms for the combination have been decided upon, reference to *possible* terms, even if so labeled, will not ordinarily provide a basis for informed stockholder judgment and will hold some potential for miscommunication."ⁿ⁵³

Another court considered the absence of any specific plans or proposals to merge to be crucial, and held that disclosing that there was a possibility of a merger was adequate even though the record of the bidding company indicated that it was almost a certainty.ⁿ⁵⁴

Item 7, "Source and Amount of Funds or Other Consideration," requires the bidder to state the source of its funds and the total amount it would need to purchase the maximum number of shares for which the offer is being made.ⁿ⁵⁵ If all, or any part of such funds are, or are expected to be, borrowed, a summary of the loan agreement must be provided. This summary must contain all material terms, including the identity of the parties, the term of the loan, the collateral, and the stated and effective interest rates.

Item 8, "Interest in the Securities of the Subject Company," requires each person named in Item 3 (and each associate and majority owned subsidiary of such person) to state his beneficial ownership, in both numbers and percentage, of any class of securities issued by the target company. Any transaction in such securities by the same people during the past sixty days must also be described.ⁿ⁵⁶ If this information is not available at the time the Schedule TO is initially filed, it may be filed up to three business days after the initial filing.

Item 9, "Persons/Assets, Retained, Employed, Compensated or Used," requires the identification of all persons and classes of persons employed by the bidder, or by any person on the bidder's behalf, to make solicitations in connection with the tender offer. A brief description of the terms of such employment must also be included.

Item 10, "Financial Statements," requires a bidding company (this item does not apply to natural persons) n57 to supply financial information concerning itself, if its financial condition is material to the tender offer.

The bidder is required to provide audited financial statements required to be filed with its annual report under Sections 13 and 15(d) of the Exchange Act, unaudited financial statements required to be included in its most recent quarterly report under the Exchange Act, its ratio of earnings to fixed charges and its book value per share as of the date of the most recent balance sheet presented. In addition, if material, its pro forma information is required disclosing the effects of the transaction.

In the release adopting *Item 10*, the Commission stated that whether financial information concerning the bidder was material depends on the facts and circumstances of the tender offer, including the following: n58

- (1) the terms of the tender offer, particularly those with respect to the amount of securities being sought;
- (2) whether the purpose of the tender offer is to take control of the target company;
- (3) the plans or proposals of the bidder as described in *Item 5* of the Schedule; and
- (4) the ability of the bidder to pay for the securities sought in the tender offer, and to repay any loans made in connection with it, or otherwise.

The release noted that these factors are not exclusive, nor must all be present to make a financial statement material.

However, *Item 10* includes an Instruction, which states that a bidder's financial information is not material when:

- (1) only cash consideration is offered;
- (2) the offer is not subject to any financing condition; and either:
- (3) the bidder is a public reporting company that files reports electronically with the Commission; or
- (4) the offer is for all outstanding securities of the target.

Item 11, "Additional Information," requires disclosure of the following information, if material to a decision by a holder of the securities being sought:

- (1) any present or proposed material contracts, arrangements, understandings or relationships between the bidder of any of its executive officers, directors, controlling persons, or subsidiaries, and the target company or any of its officers, directors, controlling persons or subsidiaries that were not required to be disclosed pursuant to Items 1000 through 1016 of Regulation M-A; n59
- (2) regulatory requirements that must be complied with, or approvals that must be obtained in connection with the tender offer, to the extent known to the bidder after reasonable investigation; n60
- (3) the applicability of the anti-trust laws; n61
- (4) the applicability of the margin requirements of Section 7 of the [Exchange] Act and the rules thereunder; n62
- (5) a brief description of any pending legal proceeding relating to the tender offer, and a copy of any

pleadings, orders, injunctions, or opinions; and

(6) any other information necessary to make the required statements not materially misleading.

Item 12, "Exhibits," requires the bidder to furnish a copy of: (i) all material sent to the security holders in connection with the tender offer; (ii) any loan agreement for financing the offer; (iii) any document containing the terms of any understandings or contracts referred to in Item 1005(e) or Item 1011(1)(i) of Regulation M-A; (iv) any written opinion regarding the tax consequences of the tender offer prepared for the bidder by legal counsel; (v) the prospectus required by Rule 434(b) in an exchange offer where securities of the bidder have been or are to be registered under the [Securities] Act; and (vi) any written instruction or other materials furnished to persons making oral solicitations of security holders on behalf of the bidder.

If any material change occurs in the facts set forth in the Schedule TO, an amended Schedule TO must be promptly filed with the Commission and, one copy must be delivered to the target company and to any exchange and/or FINRA upon which the securities of the target company are approved for listing or approved for quotation. n63

[b] Communications with Shareholders. Section 14(d)(1) gives the Commission the authority to regulate the information contained in any advertisement making a tender offer or request for the tender of a security. n64 Copies of all such materials must be filed with the Commission and sent to the target company no later than the date it is first published or sent or given to any security holder. n65

The initial offer must contain the information specified in Rule 14d-6. n66

Rule 14d-4 sets forth certain standards for the dissemination of tender offers. It should be noted that these standards are not mandatory since tender offers may be disseminated by other means. For tender offers in which the consideration consists solely of cash or securities exempt from registration under Section 3 of the Securities Act, Rule 14d-4(a) states that a tender offer shall be deemed "published or sent or given to security holders" within the meaning of Section 14(d)(1) if the bidder:

- (1) makes adequate newspaper publication of a long-form publication of the tender offer;
- (2) makes adequate newspaper publication of a summary advertisement of the tender offer and mails first class, or otherwise furnishes with reasonable promptness, its tender offer materials to any security holder who requests them; or
- (3) uses stockholder lists and security position listings under Rule 14d-5. n67

A bidder using stockholder lists must also make either long-form or summary publication of the offer, as described above. n68 Depending upon the facts and circumstances, "adequate publication" of a tender offer may require publication in a newspaper of national circulation, or it may only require publication in a metropolitan or regional newspaper. n69 If a tender offer has been disseminated by one of the means specified in Rule 14d-4(a), any material changes in the information contained therein must be disseminated in a manner reasonably designed to inform security holders of such change. n70

Section 14(d)(4) authorizes the Commission to regulate any solicitation or recommendation to security holders regarding the acceptance or rejection of a tender offer. Rule 14d-9 applies to solicitations or recommendations by:

- (1) the target company, or any of its directors, officers, employees, affiliates, or subsidiaries;
- (2) owners of any security issued by the target company, the bidder, or any of their affiliates; or

2-7A Federal Securities Exchange Act of 1934 § 7A.03

(3) any person acting on behalf of the foregoing parties, or on behalf of the bidder by means of a solicitation not filed with the Commission. n71

Rule 14d-9 does not apply to a bidder who has filed a Schedule TO or to advice about a tender offer provided by an attorney, bank, broker, fiduciary, or investment adviser, whose participation in the offer is solely ministerial, if such advice is given to a client who:

- (1) made an unsolicited request for such advice, or
- (2) has a general contract to receive such advice. n72

All parties subject to Rule 14d-9 must file eight copies, including all exhibits, of a Schedule 14D-9 Information Statement with the Commission. The target company or one of its affiliates must also hand deliver a copy of the Schedule 14D-9 to the bidder. Other parties subject to Rule 14d-9 must mail a copy of the schedule to the bidder and to the target company. n73

If a material change occurs in the facts set forth in a Schedule 14D-9, copies of an amended Schedule 14D-9 must be filed in the same manner, and such change must be promptly disclosed and disseminated to security holders. n74

Any solicitation or recommendation about a tender offer must include the name of the person making it and the information required by Items 1 through 8 of Schedule 14D-9 or a fair and adequate summary thereof. n75 However, information provided in a previous solicitation by the same person may be omitted.

Rule 14d-9 does not apply to "stop-look-and-listen" communications from the target company to its security holders that only state that management is considering the tender offer and that, on or before a specified date, within ten business days from the commencement of the tender offer, management will express an opinion on the offer. Until then, security holders should defer deciding whether to accept or reject the offer. n76

Schedule 14D-9 requires the following information:

- (1) the identity of the target company and the class of securities being sought;
- (2) the name and business address of the person filing the statement (the filer) and the identity of the tender offer to which the Schedule 14D-9 relates and the bidder;
- (3) any material agreements, arrangements, or conflict of interest between the filer or its affiliates and the bidder or the target company, or any of their executive officers, directors, or affiliates;
- (4) the nature of the solicitation or if a recommendation, the position of the filer on the tender offer and the reasons therefor and "to the extent known by the filing person after making a reasonable inquiry, whether the filing person or any executive officer, director, affiliate or subsidiary of the filing person currently intends to tender, sell or hold the subject securities that are held of record or beneficially owned by that person"; n77
- (5) the identity of any persons employed or retained by the filer to solicit security holders, and a brief description of the terms of employment or retainer;
- (6) a description of any transaction in the past sixty days by the filer or any of its executive officers, directors, affiliates, or subsidiaries in the securities sought, and, if known, whether any of these persons

intend to tender or retain the securities sought;

(7) if the target company is filing the statement, state whether there are negotiations underway for its merger, reorganization, or recapitalization, the sale of its assets, the acquisition of its securities, acquisitions of securities by it; n78

(8) any additional information necessary to make the required statements not materially misleading; and

(9) a copy of

(a) any written solicitation published or sent to security holders concerning the solicitation or recommendation referred to in (4) above,

(b) any written instruction or other material given to persons making oral solicitations, and

(c) any contract or arrangement referred to in (3) above.

In *Anaconda Co. v. Crane Co.*, n79 Crane proposed a tender offer based on the exchange of securities. Anaconda, without filing a Schedule 14D, issued a press release, stating in part that:

"When Crane does file a registration statement and preliminary prospectus with the S.E.C., Anaconda will be in a position to consider an evaluation of the situation. Until that time it should not be assumed that the Anaconda management is sympathetic to the proposed offer." n80

The court rejected Crane's argument that this was a solicitation against the tender offer and held that it was within the "wait for our advice" exception provided for statements by the issuer. n81

Nonetheless, the antifraud provision of Section 14(e) applies to all communications with shareholders, and a violation of this section can lead to an injunction against the offending party. n82

Under Rule 14d-5, a bidder may request the use of the target company's shareholder list to disseminate its tender offer material. The target company may elect either to turn over its list or to distribute the bidder's tender offer materials to its security holders. n83 Oral notification of the target company's choice must be given within two business days after it receives the request. n84 If the target company conducts the distribution, it must follow the detailed requirements of Rule 14d-5(b). Also, the target company is entitled to a monetary advance from the bidder to cover its mailing costs, and to prompt reimbursement from the bidder for its direct costs that are incidental to compliance with Rule 14d-5(b). n85 These costs are determined under Rule 14d-5(g)(2). If the target company decides to turn over its shareholder list to the bidder, the bidder must use this list solely for the dissemination of its tender offer materials, keep the list confidential, and return the list after the completion of the tender offer without retaining any copy thereof. n86

[c] Controls Over the Terms of the Offer. Rule 14e-1 requires tender offerors to hold tender offers open for not less than twenty business days from the date that the offer is first published, sent or given to security holders, n87 and if the consideration offered or the dealer's soliciting fee to be given in a tender offer is increased, the offer must remain open for at least ten business days from the date the increase is first published, sent or given to security holders. n88

If the offeror extends the tender offer, n89 Rule 14e-1(d) requires the offeror to issue notice of the extension by press release, or other public announcement, and to disclose in the notice the approximate number of securities deposited as of the date of the notice.

Rule 14d-2, in conjunction with Rule 14d-4 and Rule 14d-6 establishes a detailed method for calculating the starting point of a tender offer. Rule 14d-2 establishes the commencement date of a tender offer as the date when the holder "has first published, sent or given the means to tender to security holders." Pre-commencement communications are permitted, however, all written communications related to the tender offer must be filed with the Schedule TO no later than the date of the communication. In addition, the bidder must deliver the first communication that is filed to the target company and any other bidder for the same class of securities. To minimize the potential for dissemination of false offers into the marketplace, Rule 14e-8 prohibits bidders from announcing an offer (1) without an intent to commence the offer within a reasonable time and complete the offer, (2) with the intent to manipulate the price of the bidder or the target company's securities or (3) without a reasonable belief that the bidder will have the means to purchase the securities sought.

Section 14(d)(5) provides that securities deposited pursuant to a tender offer may be withdrawn at any time until seven days after the offer is first published or sent or given to security holders. Unless they have already been accepted, n90 shares may be withdrawn once sixty days has passed from the date of the original offer. Section 14(d)(5) empowers the Commission to alter these provisions by rules or order, either for the public interest or for the protection of investors. Pursuant to this authority, the Commission adopted Rule 14d-7, which entitles a security holder to withdraw tendered securities during the entire period that the tender offer remains open. n91 Further, Rule 14d-7 provides that written notice of the withdrawal specifying the name of the shareholder and the amount of shares being withdrawn must be given to the bidder. A bidder may impose other reasonable conditions, including a signed request for withdrawal accompanied by a signature guarantee, on the release of the securities. n92

After the expiration of the initial tender offer period, and if disclosed sufficiently in advance of the expiration of the initial offer, an offeror may provide for a "subsequent offering period" of between three and twenty business days during which no withdrawal rights are available. A subsequent offering period is only available if the initial offer is for all outstanding securities, all conditions to the initial offer are satisfied or waived, the offeror accepts and promptly pays for all securities tendered during the initial offer, the offeror announces the results of the initial offer by 9:00 a.m. on the next business day following the close of the initial offer period, and the offeror immediately accepts and promptly pays for all securities as they are tendered in the subsequent offering period.

When more shares have been tendered than were requested in the offer, Section 14(d)(6) requires the bidder to accept pro rata shares tendered within ten days after the offer was first published or sent or given to security holders. (Of course, the bidder may elect to, or may have committed itself to, purchase all shares tendered in excess of the amount requested in the offer.) Shares tendered within ten days after notice of an increase in the price of the offer is first published or sent or given to security holders must also be accepted pro rata.

The Commission, by rule, has extended the period during which tender offerors must accept shares pro rata. Rule 14d-8 requires a bidder in an over subscribed partial tender offer to accept securities on a pro rata basis according to the number of securities deposited by each stockholder during the entire period of the tender offer. n93 Since Rule 14e-1 requires that a tender offer remain open for at least twenty business days, the adoption of Rule 14d-8 more than doubles the minimum proration period from the ten calendar days required by Section 14(d)(6). n94

Rule 14e-4 (formerly Rule 10b-4) supplements the pro rata provisions of Sections 14(d)(6). Rule 14e-4 prohibits a person from tendering any security unless he owns or has a right to acquire it at the time of the tender offer. Additionally, a person may not tender securities on behalf of another person unless he or she has possession of the securities or has reason to believe that the other person either owns the securities and will promptly tender them, or has the right to acquire the securities and will do so to the extent necessary to deliver the tendered securities. The purpose of Rule 14e-4 is to prevent the manipulation of the pro rata requirements of a tender offer. n95 In *Bache & Co. v. International Control Corp.*, n96 the court held that a broker who accidentally tendered on behalf of its customers 148 shares more than it was supposed to tender did not violate Rule 10b-4 (now Rule 14e-4), according to the court:

"Rule 10b-4 does not properly apply to such a situation where the error is of such minor proportions and where there is no specific intent to defraud."

Basic contract law applies to tender offers. Thus, a bidder need not accept any shares that are not tendered in accordance with the terms of the offer, as long as those terms comply with Section 14 of the Exchange Act. n97 For instance, in *Indiana National Bank v. Mobil Oil Corp.*, n98 the defendant allowed certain institutions to accept its tender offer by sending a transmittal letter without having to deposit their shares until eight business days after a public announcement by Mobil of the number of shares it would purchase. This announcement was made in the form of a press release. The plaintiff sent the transmittal letter, but failed to deposit the shares in time. The court held that the shares were improperly tendered, and that Mobil did not violate Section 14(d)(6) by refusing to take them up pro rata. The court also held that Mobil's press release was a sufficient public announcement and that Mobil had no obligation to give the plaintiffs individual notice of its release. n99

Section 14(d)(7) requires a bidder which has increased the price of its tender offer to pay that increased price for all shares tendered under the offer, including those shares tendered before the announcement of the price increase. The Commission has adopted Rule 14d-10 (applying to third-party tender offers) and its corollary, Rule 13e-4(f)(8) (applying to issuer self-tenders), commonly referred to as the "Best Price Rule," requiring that:

1. tender offers be open to all holders of the class of securities sought by the offer; n100 and
2. the consideration paid to any security holder for securities tendered in the tender offer be the highest consideration paid to any other security holder for securities tendered in the tender offer. n101

The Best Price Rule has the effect of requiring that the highest price paid to any security holder must also be paid to all other security holders of the same class.

Prior to the amendments to the Best Price Rule released by the Commission in 2006, n102 the Best Price Rule was the subject of much uncertainty, particularly in the context of merger and acquisition transactions. There was a split among federal courts as to whether the Best Price Rule applied to arrangements, usually compensatory in nature, entered into by an offeror in a tender offer and the employees or directors of the subject company in contemplation of an acquisition. n103 Corporate officers and directors of a subject entity are frequently also shareholders who are themselves provided with an opportunity to tender shares in the offer. Their dual status raises the specter that inducements and offers relating to future service by the offeror might be construed as having also been made as an inducement or as consideration for their tendering of shares and support of the offer. Should such payments or compensation paid to directors or employees be deemed to have been made pursuant to the tender offer (or as an inducement to their decision to tender), the resulting obligation to provide equivalent consideration to all tendering shareholders could result in tremendous damages. n104

The amendments promulgated by the Commission in 2006 have clarified that the Best Price Rule applies only with respect to consideration paid for securities tendered in a tender offer. n105 Also, the rule has been amended to add an exemption for amounts paid pursuant to the negotiation, execution or amendment of an employment compensation, severance or other employee benefit arrangement, so long as the amount payable under the arrangement "is being paid or granted as compensation for past services performed, future services to be performed, or future services to be refrained from performing, by the security holder (and matters incidental thereto)" and "is not calculated based on the number of securities tendered or to be tendered in the tender offer by the security holder." n106 This exemption applies to arrangements entered into between any security holder and the bidder or subject company, in the case of a third party tender offer, or the issuer or any affiliate, in the case of an issuer self-tender. n107 In addition, the Commission established a non-exclusive "safe harbor" provision that would allow the compensation committee (or other committee comprised of independent directors) of the bidder's or offeror's board of directors to approve an employment compensation, severance or other employee benefit arrangement and thereby have it deemed to be such an arrangement within the meaning of the exemption described above. n108

Under Rule 14d-10, a tender offeror may offer more than one type of consideration, but security holders must be afforded an equal right to elect among alternative considerations, and the highest consideration of each type paid to any security holder must be paid to any other security holder.

Further, Rule 14d-10 does not prohibit an offeror from excluding security holders from a tender offer in a state where the offeror, after making a good faith effort to comply with state law, is prohibited from making the offer. n109 If the form of consideration offered is prohibited by state law, the offeror may offer an alternative form of consideration in that state without making the alternative consideration available to security holders in other states. n110

The rule provides as well that the Commission may waive its provisions where compliance is not necessary or appropriate in the public interest or for the protection of investors. n111

[d] Conflict Between Federal and State Regulation. When the Williams Act was passed in 1968, only one state, Virginia, had a law regulating tender offers for corporations doing business in the state. n112 Since that time, most other states passed or attempted to pass takeover statutes. n113 Many of the state statutes provided protection for the incumbent management, a feature that is not afforded by the Williams Act. Usually, the state statutes required the bidder to file disclosure documents with the state and send them to the target company before the tender offer. In some cases, the states patterned their disclosure requirements after the Williams Act, while in other cases, the states called for much more detailed information. Often, states are empowered to hold a hearing on the takeover bid before allowing a takeover to proceed. As a result, these hearings can significantly delay the start of the offer. However, a number of states exempt a tender offer from the hearing if the tender offer's acceptance is recommended by the target company's management. n114

The question of whether or not these state statutes are preempted by the Williams Act first arose in *Great Western United Corp. v. Kidwell*. n115 In *Kidwell*, Great Western United launched a tender offer for two million shares of Sunshine Mining and Metal Co.'s common stock. Sunshine's principal executive office and over half its assets were located in Idaho, which meant that Great Western had to comply with the Idaho takeover statute. n116 The court, in summarizing Idaho's takeover statute, stated that:

"Idaho's takeover law required Great Western, among other things, (1) to submit to the Director of the Idaho Department of Finance a pre-effective filing disclosing Great Western's intention to make a tender offer and the terms of the offer; (2) to transmit, at the same time, a copy of that filing to Sunshine; (3) to publish an advertisement describing the intention to make an offer and the proposed material terms; (4) to pay the Idaho registration fee; (5) to participate in a hearing, which would be mandatory if Sunshine requested one; and (6) to delay its tender offer until the final determination of any administrative or injunctive proceeding brought by the Director of Finance for violation of the Idaho takeover law. No time limitation is placed on whether, or when, the director must rule on the effectiveness of a registration statement. The director may summarily delay the effectiveness of an offer if he determines that the registration statement is insufficient. Great Western's offer would not have been subject to these requirements if the terms of the tender offer had been accepted by Sunshine's board of directors." n117

In accordance with Idaho law, Great Western made the pre-tender offer filings, but when the Director of Idaho Department of Finance objected to the adequacy of these filings, Great Western sued to enjoin the application of the Idaho statute. The district court granted relief for Great Western on two separate grounds: (1) the Idaho statute conflicted with the Williams Act and thus, was preempted by it; and (2) the Idaho statute placed an unconstitutional burden on interstate commerce. n118

In upholding the district court's decision on both grounds, the Court of Appeals for the Fifth Circuit noted that the

Williams Act was designed to "avoid tipping the balance of regulation either in favor of management or in favor of the person making the takeover bid." n119 The Idaho statute upset this balance because it automatically delayed any tender offer that was not approved by the target company. A delay is perhaps the most important weapon in fighting a tender offer since it gives the target company time to prepare a lawsuit or find a competing bidder or white knight. Furthermore, under the state statute, the target company can insist on a hearing regarding an unfriendly tender offer, thus allowing further delays. The court also noted that the statute's "regulation of defensive efforts by a target company is significantly weaker than...[its]...regulation of an offeror's activities." n120

In defending the state statute, Idaho argued that these provisions were designed not to prevent tender offers, but rather to give the management of a target company the opportunity to fulfill their fiduciary duties to shareholders by allowing management to study the offer and then take appropriate action. n121 The court responded that even if this was the purpose of the Idaho statute, it still conflicted with the Williams Act. The court stated that:

"Idaho's statute is preempted, because the market approach to investor protection adopted by Congress and the fiduciary approach adopted by Idaho are incompatible ... Congress intended for the investor to evaluate a tender offer; Idaho asks the target company management to make that decision on behalf of the shareholders. (Cite omitted).

When Idaho enacted those ... provisions it hampered an offeror's ability to express and explain its position directly to investors. In doing so, Idaho disrupted the neutrality indispensable for the proper operation of the federal market approach to tender offers regulation. The Idaho takeover statute 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives' of the Williams Act." n122

The court also held that the disclosure required by the Idaho statute was excessive, and could obscure relevant disclosures by placing them in the midst of a mass of irrelevant ones. The court was also concerned that a target company might be able to halt a tender offer because the bidder did not make proper disclosure of some immaterial information.

Therefore, the Court of Appeals for the Fifth Circuit found that the statute burdened interstate commerce by disrupting securities markets through its advance notification provision, discouraging tender offers, and regulating disclosure to shareholders, even if none of them lived in the state. Accordingly, it discounted the value of the statute in protecting local investors. Another state interest advanced by Idaho was the effect corporate management can have on how harmoniously the corporation interacts with the community through such means as charitable contributions, pollution control, and job safety. The court observed that Idaho could enact legislation for this purpose that would have a much smaller impact on interstate commerce.

On appeal, the Supreme Court reversed *Kidwell* on the grounds that venue was improper in Texas district court where the suit was originally brought. n123 However, the issue of federal preemption of state takeover laws was not discussed by the Court.

Nonetheless, in *Edgar v. MITE Corp.*, n124 the Supreme Court held the notice and hearing provisions of the Illinois Business Take-Over Act n125 unconstitutional under the *Commerce Clause of the United States Constitution*. The Court held that the Illinois Act imposed a substantial burden on interstate commerce that outweighed its putative benefits, *i.e.*, the protection of resident shareholders and the regulation of companies incorporated under Illinois law. n126 Unlike other state blue sky laws, the Illinois Act directly regulated transactions that took place not only across state lines, but also wholly outside the state of Illinois. In fact, the Illinois Act did not require that a single shareholder of the target company reside in Illinois for it to apply. The Illinois Act, however, applied to every tender offer for a corporation that met two of the following conditions:

- (1) principal executive office in Illinois;
- (2) organization under Illinois law; or
- (3) at least ten percent of stated capital and paid-in surplus represented in Illinois. n127

The Court concluded that the Illinois Act was invalid under the *Commerce Clause* because it:

- (1) purported to regulate directly and to prohibit interstate commerce, including commerce wholly outside Illinois, and
- (2) burdens interstate commerce excessively in relation to the local interests served by the [Illinois] Act, in particular by allowing the Illinois Secretary of State to block any nationwide tender offer. n128

However, in *CTS Corporation v. Dynamics Corporation of America*, n129 the Supreme Court upheld Indiana's takeover statute. n130

The Court held, by a 6 to 3 vote, that the Indiana statute, which provides that an acquirer of more than 20 percent of shares of an issuer organized in Indiana cannot vote those shares unless he obtains the approval of a majority of all disinterested shareholders, did not conflict with the Williams Act or unduly interfere with the *Commerce Clause*. According to the Court, the Indiana statute was found to be a legitimate attempt to set conditions for acquisitions of control of publicly traded companies incorporated in the state and to protect the interests of shareholders in those companies.

Unlike the statutes considered in *Kidwell* and *MITE*, Indiana's regulatory scheme did not require filing with or approval by the state. Instead, Indiana's statute relies on the processes of corporate democracy. The Indiana statute provides that:

- (1) the acquirer of "control shares" in an Indiana corporation covered by the statute, n131 is not entitled to vote those shares unless the exercise of its voting privileges is approved by a majority of the issuers' shareholders; n132
- (2) the shareholders' determination is made at the next regularly scheduled shareholders' meeting, or at a special meeting. The acquirer can require the issuer's management to convene such a special meeting within 50 days by filing an acquiring persons statement with the issuer and agreeing to pay the expenses of the meeting; n133
- (3) if the shareholders do not vote to restore voting rights, the issuer may, but is not required to redeem the control shares from the acquirer at fair market value; n134 and
- (4) if the acquirer fails to file the acquiring persons statement with the issuer, the issuer may, if its by-laws or articles of incorporation provide, redeem the shares at any time after 60 days after the acquirer's last acquisition. n135

The action in *CTS Corporation* arose when Dynamics Corporation, the owner of 9.6 percent of the stock of an Indiana registered company, CTS Corporation, made a tender offer for another million shares of CTS Corporation, which would have brought Dynamics Corporation's interest to 27.5 percent; and CTS Corporation's board of directors elected to be governed by the new "Control Share Acquisitions Chapter" of the Indiana Business Corporation Law (*Section 23-1-17-3(a) of the Indiana Code* (Supp. 1986)).

In the Court's view, the Indiana law was neither preempted by the Williams Act nor in violation of the *Commerce*

Clause. In disposing of the preemption issue, the Court reviewed the concerns of the *MITE* plurality in regards to the belief that the notice and hearing provisions of the Illinois statute favored management against offerors. Writing for the plurality in *MITE*, Justice White feared that the inevitable delay involved in that procedure could be used by management to communicate its position on the offer to shareholders during a period when access to shareholders was denied to the offeror, and to muster other weapons in an effort to defeat the tender offer. However, in the Court's view, the Indiana statute eliminated those concerns. The Indiana statute, by allowing shareholders to vote as a group, operated on the assumption, implicit in the Williams Act, that independent shareholders faced with tender offers are at a disadvantage. In voting as a group, shareholders would be free to reject a tender offer that they considered contrary to the best interests of the issuer even though individual shareholders might be inclined to accept the offer. The voting procedure, moreover, is structured so that neither management nor the offeror would have an advantage in communicating their position to shareholders.

The Court of Appeals for the Seventh Circuit, in overturning the Indiana statute, expressed concern that the law's effect was to impose a 50-day delay in completing a tender offer that was inconsistent with the 20 business day period provided by the Commission's Rule 14e-1. n136

Nevertheless, the Supreme Court did not share the Court of Appeals' concern. The Court emphasized that the statute merely withheld voting rights, but did not prevent the offer from being completed immediately upon expiration of the 20 business day period. In order to assure that it obtained voting rights on the shares acquired, an offeror could condition its offer upon acquiring those rights. The Court observed that this would be no different, from the common practice of making tender offers contingent on obtaining regulatory approval. Further, even if the Indiana statute imposed some delay beyond the period prescribed by the Commission's Rule 14e-1, only an unreasonable delay would result in preemption. Since the 50-day period selected by Indiana is within the 60-day maximum period established by Congress in the Williams Act, the Court was unwilling to characterize it as unreasonable.

In discussing the argument that the Indiana statute was unconstitutional under the *Commerce Clause of the United States Constitution*, the Court noted that:

"Every State in this country has enacted laws regulating corporate governance. By prohibiting certain transactions, and regulating others, such laws necessarily affect certain aspects of interstate commerce. This necessarily is true with respect to corporations with shareholders in States other than the State of incorporation. Large corporations that are listed on national exchanges, or even regional exchanges, will have shareholders in many states and shares that are traded frequently. The markets that facilitate this national and international participation in ownership of corporations are essential for providing capital not only for new enterprises but also for established companies that need to expand their businesses. This beneficial free market system depends at its core upon the fact that a corporation--except in the rarest situations--is organized under, and governed by, the law of a single jurisdiction, traditionally the corporate law of the State of its incorporation." n137

The fact that the burden of a state regulation falls on some interstate companies does not by itself establish a claim that it discriminates against or unacceptably interferes with interstate commerce. In the Court's view, any impact of the Indiana statute on interstate commerce is consistent with Indiana's legitimate interests in regulating its domestic corporations. Additionally, the Court considered the statute to be non-discriminatory as it had the same effects on tender offers whether or not the offeror is a domiciliary or resident of Indiana. Further, the Court noted, the statute pursued the legitimate objective of protecting the shareholders of Indiana corporations by affording them an opportunity when a takeover offer is made, to decide collectively whether that change would be desirable--a power that may be especially beneficial where a hostile tender offer may coerce shareholders into tendering their shares. Finally, unlike the Illinois statute considered in *MITE*, the Indiana statute applied only to corporations that have a substantial number of shareholders in Indiana. As a result, every application of the statute would affect a substantial number of Indiana residents and Indiana had a legitimate interest in protecting those residents.

In 1988, Delaware enacted Section 203 of the Delaware General Corporation Law, entitled "Business Combinations with Interested Stockholders." n138 This statute provides that a corporation may not engage in any business combination n139 with an "interested stockholder," defined as a party owning 15 percent or more of the outstanding voting stock of the corporation, for a period of three years following the time that such stockholder became an interested stockholder, unless:

- (1) Prior to such time the board of directors approved either the business combination or the transaction which resulted in the stockholder becoming an interested stockholder;
- (2) Upon consummation of the transaction which resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, excluding for purposes of determining the voting stock outstanding those shares owned by directors who are also officers and certain employee stock plans; or
- (3) At or subsequent to such time the business combination is approved by the board of directors and authorized at an annual or special meeting of stockholders by the affirmative vote of at least 66 2/3% of the outstanding voting stock which is not owned by the interested stockholder. n140

The Delaware Business Combination Statute contains an "opt out" feature whereby the statute's restrictions will not apply to any corporation (i) that has expressly elected not to be governed by the statute in its original certificate of incorporation, (ii) that amended its bylaws to opt out of the statute within 90 days of the effective date of the statute, or (iii) the stockholders of which have adopted an amendment opting out of the statute to the certificate of incorporation or bylaws through the affirmative vote of least a majority of shares entitled to vote. n141 The Delaware Business Combination Statute also does not apply in cases in which the corporation has no voting stock listed on a national securities exchange and in a variety of other situations. n142 According to one source, only 8.17% of the publicly traded Delaware corporations it tracked had opted out of the statute as of 2003. n143

Like the Indiana statute at issue in *CTS Corporation*, the Delaware Business Combination Statute has been challenged on the ground that it is preempted by the Williams Act and unconstitutional under the *Commerce Clause of the United States Constitution*. The court in *BNS, Inc. v. Koppers Co.* n144 found that the Delaware statute was not preempted by the Williams Act because it would not have the effect of substantially blocking or impeding hostile acquirers or third party tender offers. n145

The *BNS* court, applying the three-part test outlined in *CTS Corporation*, also found that the Delaware statute was constitutional under the *Commerce Clause* because (1) Section 203 does not discriminate between offerors which are Delaware entities and offerors which are not incorporated in Delaware; (2) the legislation would not have the effect of excessively burdening out-of-state persons and entities; and (3) the Delaware statute both promotes stable corporate relationships and protects shareholders, and in so doing, the statute reflects valid state concerns. n146

The district court in *City Capital Associates v. Interco, Inc.* also held that the statute did not constitute an improper delegation of government authority in violation of the *Due Process Clause of the Fourteenth Amendment* because the ability to opt out of Section 203 merely permitted corporate boards to decide corporate matters over which they already have control under Delaware's General Corporation Law. n147

Contrary to the Supreme Court's decision in *CTS Corporation*, a panel for Court of Appeals for the First Circuit upheld a preliminary injunction against the enforcement of Section 3 of the Massachusetts Take-Over Bid Regulation Act in *Hyde Park Partners, L.P. v. Connolly*, n148 ruling that the Massachusetts takeover statute is likely to be held unenforceable under the *Commerce and Supremacy Clauses of the United States Constitution*. n149 The panel found

that the penalty provision, which imposes a one-year moratorium on making a takeover bid after failure to disclose an intent to control prior to reaching the 5% ownership threshold, is likely to violate the *Commerce Clause*. The panel also concluded that the provision requiring disclosure of intent to gain control before acquisition of 5% of the target company's stock probably violates the *Supremacy Clause*. By depriving a purchaser, intent on acquiring control, of the right to increase his or her stake beyond 5% before disclosing the existence of such toehold by the end of ten days, and by assisting incumbent management by giving more time to prepare defensive maneuvers, the provision, according to the panel, intrudes upon the careful balance struck by Congress between providing disclosure to investors and enabling tender offers. By virtue of excluding "friendly offers" from the definition of takeover bids, the state statute also allows management to opt in or out of coverage, thus providing a powerful weapon in defending against a hostile bid.

Additionally, in *Campeau Corp. v. Federated Department Stores*, the district court held that the Ohio Business Acquisitions Act, which requires foreign businesses to file an "application for approval of an acquisition," but does not impose the same requirement on either similarly situated offerors incorporated in the United States or foreign offerors already having substantial interest in Ohio, is a *per se* violation of the *Commerce Clause*. n150

Further, a Nevada district court enjoined the enforcement of a provision of the Nevada takeover act, concluding that the state law's limitation on the duration of a tender offer is unconstitutional. n151

It should be noted that in a situation where there is a failure to show "irreparable harm," the New York federal courts have refused to grant a preliminary injunction against the operation of the New York "anti-takeover" law. n152 Moreover, federal courts in Delaware hold that the Delaware Business Combination Statute n153 is constitutional. n154

On the contrary, a panel for the Court of Appeals for the Sixth Circuit held Tennessee's takeover laws to be violative of the *Commerce Clause of the United States Constitution* because they significantly deter nationwide tender offers for non-Tennessee companies, which impedes the nationwide market for control of corporations. n155

Finally, a panel of for the Court of Appeals for the Seventh Circuit found the Wisconsin takeover statute to be constitutional under both the Supremacy and the *Commerce Clauses of the United States Constitution*. n156 In its decision, that panel noted that the Wisconsin statute provides that, unless the target company's board of directors agrees to the transaction in advance, the bidder must wait three years after buying the shares to merge with the target company or to acquire more than 5% of the target company's assets. The panel reasoned that the Wisconsin law neither alters any of the procedures associated with the tender offers, which are the subject of federal regulation, nor does it in any way interfere with interstate commerce since, as between intrastate and interstate commerce, it is neutral. Accordingly, the panel noted that although the law "may be folly," it is not unconstitutional.

[3] Remedies for Violation of the Tender Offer Rules

[a] Section 14(e). Section 14(e) of the Exchange Act prohibits any person from making any false statement of material fact, or omitting to state any material fact necessary to make other statements made not misleading, or engaging in any fraudulent, deceptive or manipulative acts or practices, in connection with any tender offer or any solicitation urging acceptance or rejection of a tender offer. Section 14(e) authorizes the Commission to make rules pursuant its provisions. n157

Section 14(e), the anti-fraud provision of the Williams Act amendments, has been the basis of a significant amount of litigation involving tender offers. The language of Section 14(e) is very similar to that of *Rule 10b-5* under Section 10(b) of the Exchange Act. n158 Three important features of Section 14(e) should be noted: (1) its prohibitions apply to *all* tender offers, n159 not merely those subject to the disclosure provisions of the Exchange Act; (2) as discussed *infra*, it is less difficult for a plaintiff to obtain standing to sue under Section 14(e) than under *Rule 10b-5* because the plaintiff need not be a purchaser or seller of securities; n160 and (3) unlike other provisions of the Williams Act, the terms of Section 14(e) are not expressly limited to equity securities. Section 14(e) applies to statements about a tender offer, even

if they are made before its commencement. n161

Electronic Specialty Co. v. International Controls Corp. n162 established that a private cause of action exists under Section 14(e), even though it is not explicitly authorized. In reaching the conclusion that a target company and a non-tendering company had standing, under Sections 14(d) and 14(e) of the Exchange Act, to challenge a tender offer, Judge Friendly, writing for the Court of Appeals for the Second Circuit, stated: n163

"While a non-tenderer suffers no immediate injury from inadequacy of price in the sense that he retains his stock, such inadequacy is likely to have a depressing effect on the market for some time and thus may hurt him if, for one reason or another, he should later find it necessary or desirable to sell. Such depression may also harm the target corporation if it should wish to engage in financing or acquisitions, and a still different potential for harm to the corporation will exist where it is claimed that the offeror has evil designs on its treasury or business plans. The rights of the non-tendering stockholder and the corporation thus seem sufficiently independent to give standing to both under all the provisions added to § 14. (Citations omitted). The hidden question is one of policy with respect to suit by the corporation: Should management be allowed to spread the stockholders' money in resisting a tender offer that may well be advantageous and acceptable to a large majority when a stockholder is free to act in his own behalf and the managers will almost inevitably hold stock in their own account? Militating in favor of an affirmative answer is the very fact of the superior resources of the corporation, which can be vital in this context where remedial action must be speedy and forceful. With the considerations thus in balance we would be reluctant to deny standing when Congress, had it recognized the problems, would very likely have thought the rule already recognized under § 14(a) would apply. Moreover, in cases where management causes the corporation to bring a suit motivated by its own interests and contrary to the best interests of the true owners, shareholders have their usual remedies for waste." n164

It should be noted that a non-tendering shareholder can also be harmed by any plans to loot the target company or to squeeze out the remaining shareholders at an unfair price.

Although there can be little doubt that *Electronic Specialty* would have granted a tendering shareholder the right to sue the bidder for making a misleading statement or omission, the *Electronic Specialty* court did not consider this issue, and it remained unsettled until the companion cases of *Dyer v. Eastern Trust and Banking Co.* n165 and *Emmi v. First Manufacturers National Bank* n166 established this right. Moreover, Section 14(e) can also be used against a target company, if, for example, it fraudulently induces one of its stockholders not to tender his shares. n167

However, there is one participant in a tender offer whose right to relief under Section 14(e) is greatly limited. The Supreme Court, in *Piper v. Chris-Craft Industries, Inc.* n168 held that a defeated tender offeror does not have standing to sue for damages under Section 14(e). In that case, Chris-Craft alleged that it had lost an opportunity to gain control over Piper Aircraft Corp. because a competing tender offeror, Bangor Punta Corp., had committed several violations of Section 14(e). After examining the legislative history of the Williams Act, the Court concluded that its sole purpose was to protect the investors in the target corporation. n169 The Court also concluded that Chris-Craft's status as a major shareholder in Piper was not relevant to the case because the damage it suffered, *i.e.*, the lost opportunity to gain control over Piper, related to its status as a defeated tender offeror rather than to its status as a shareholder. n170 As a tender offeror, Chris-Craft was not an intended beneficiary of the Williams Act n171 and thus, allowing it to recover would be inconsistent with the purposes of the Williams Act, as the Court stated:

"As a disclosure mechanism aimed especially at protecting shareholders of target corporations, the Williams Act cannot consistently be interpreted as conferring a monetary remedy upon regulated parties, particularly where the award would not redound to the direct benefit of the protected class. Although it is correct to say that the \$36 million damages award indirectly benefits those Piper shareholders who became Chris-Craft shareholders when they accepted Chris-Craft's exchange offer, it is equally true that

the damages award injures those Piper shareholders who exchanged their shares for Bangor Punta's stock and who, as Bangor Punta shareholders, would necessarily bear a large part of the burden of any judgment against Bangor Punta." n172

The Court also rejected the idea that allowing a defeated tender offer to recover would significantly deter violations of the Williams Act, noting:

"Nor can we agree that an ever-present threat of damages against a successful contestant in a battle for control will provide significant additional protection for shareholders in general. The deterrent value, if any, of such awards can never be ascertained with precision. More likely, however, is the prospect that shareholders may be prejudiced because some tender offers may never be made if there is a possibility of massive damages claims for what courts subsequently hold to be an actionable violation of § 14(e). Even a contestant who 'wins the battle' for control may well wind up exposed to a costly 'war' in a later and successful defense of its victory. Or at worst--on Chris-Craft's damage theory--the victorious tender offeror or the target corporation might be subject to a large substantive judgment, plus high costs of litigation." (footnote omitted). n173

However, *Piper v. Chris-Craft* does not bar a tender offeror from suing for injunctive relief to halt ongoing violations and to prevent future violations of the Williams Act. Such suits can serve the interests of the shareholders of the target corporation by encouraging a more accurate and complete flow of information to these shareholders. n174

It is noteworthy that the significance of the private right of action under Section 14(e) is underscored by the fact that the Commission very rarely takes action with respect to possible violations of the section. n175

[b] Material Misstatements and Omissions. Finding a material misstatement or omission in connection with a tender offer is perhaps the single most important element in proving a violation of Section 14(e). n176 Thus, materiality is a key concept under Section 14(e), just as it is under *Rule 10b-5*. n177

The Supreme Court, in *TSC Industries, Inc. v. Northway, Inc.* n178 adopted the following standard of materiality in a proxy solicitation case under Section 14(a):

"The general standard of materiality that we think best comports with the policies of Rule 14a-9 is as follows: an omitted fact is material if there is a substantial likelihood that a reasonable shareholder would consider it important in deciding how to vote. This standard is fully consistent with the [*Mills v. Electric Auto-Lite Co.*, 396 U.S. 375 (1970)] general description of materiality as a requirement that 'the defect have a significant *propensity* to effect the voting process.' It does not require proof of a substantial likelihood that disclosure of the omitted fact would have caused the reasonable investor to change his vote. What the standard does contemplate is a showing of a substantial likelihood that, under all the circumstances, the omitted fact would have assumed actual significance in the deliberations of the reasonable shareholder. Put another way, there must be a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available." (footnote omitted). n179

This standard has been applied by the lower federal courts to all types of securities law cases and was held specifically applicable to Section 14(e) in *Flynn v. Bass Brothers Enterprises, Inc.* n180

However, this general standard of materiality is not necessarily applied to tender offers in the same manner as it is to *Rule 10b-5* cases, because in tender offers, both sides frequently have access to the relevant information. In fact, Judge Friendly stated in *Electronic Specialty* that: n181

"Probably there will no more be a perfect tender offer than a perfect trial. Congress intended to

assure basic honesty and fair dealing, not to impose an unrealistic requirement of laboratory conditions that might make the new statute a potent tool for incumbent management to protect its own interests against the desires and welfare of the stockholders. These considerations bear on the kind of judgment to be applied in testing conduct--of both sides--and also on the issue of materiality."

Judge Friendly also held that a company has no duty to correct a misstatement in the press that is not attributable to it.

Nonetheless, where one party's access to the facts is restricted, a tighter standard of materiality may be imposed on the other side. For instance, in *Blanchette v. Providence & Worcester Co.*,ⁿ¹⁸² the court stated that:

"Where one group has complete access to all the relevant facts, where acceptance of the offer will be very much in its interest, and where, as a result, disclosure will be one-sided, management has a heavy burden to insure that disclosure is complete and non-misleading, especially with respect to shareholders whose interests may differ from their own."

This issue can arise where a target company's management cooperates with the bidder to the alleged detriment of the target company's shareholders, as it occurred in *Blanchette*, or where a company makes a tender offer for its own stock.ⁿ¹⁸³

The public or private nature of information can be a crucial factor in deciding whether it must be disclosed. Further, in *Valente v. Pepsico, Inc.*,ⁿ¹⁸⁴ the court held that Pepsico, which was making a tender offer for all outstanding shares of a company in which it held the majority interest, had no duty to reveal the annual earnings per share of that company, since these figures were highlighted in the latter's quarterly and annual reports, and occasionally appeared in the financial pages of major newspapers. Moreover, in *Flynn v. Bass Brothers Enterprises, Inc.*,ⁿ¹⁸⁵ a tender offeror contended that it need not disclose the information in a confidential report about the target company, because it was not an insider. However, the court refused to dismiss the claim, stating that it was "not persuaded at this point that the obligation of disclosure under Section 14(e) is rigidly confined to 'inside' information acquired by reason of the offeror's 'insider' status."ⁿ¹⁸⁶

Additionally, one case indicates that shareholders may also be responsible for certain general knowledge. In *Emhart Corp. v. USM Corp.*, the court held that the target company did not mislead its shareholders by implying that the tender offer was inadequate because it offered a price lower than the book value of the corporation.ⁿ¹⁸⁷ The court stated that "it is well recognized that book value and market value are not identical ... and the recipient of the communication must be held to the knowledge that this is merely an argumentative consideration with respect to value, and by no means necessarily a determinative one."ⁿ¹⁸⁸ However, another court held that (1) a target company misled its shareholders by stating that its stock was equal in value to the sum of all its assets, without explaining that the asset value of the shares only becomes relevant in a liquidation proceeding;ⁿ¹⁸⁹ and (2) the bidder violated Section 14(e) by stating that in the event of a merger after the completion of its offer, dissenting shareholders could receive the fair value of their shares in an appraisal proceeding, but not stating the factors that had to be used under state law in appraising the value of the stock.

Questions may arise as to whether or not a bidder could avoid this problem by not mentioning the appraisal rights. The court in *Valente v. Pepsico, Inc.*ⁿ¹⁹⁰ held that where a bidder stated its intention to merge by buying out the remaining shares at the tender offer price, it must disclose the existence of an appraisal remedy so that shareholders would know that there was an alternative to accepting the tender offer price.

As evidenced by the aforementioned cases, the value of the target company's stock is likely to become a point of contention in an unfriendly tender offer. Information concerning this value is likely to be material. For example, one case stated that a target company may call an offer "inadequate" without even explaining why it is inadequate.ⁿ¹⁹¹ However, the court added that the reasons for the "inadequacy" of the offer were set forth by the management in a

subsequent letter. Additionally, *Emhart Corp. v. USM Corp.* n192 makes it clear that if management questions the adequacy of the offer, it must reveal any inside information it has that tends to contradict this claim.

It should be noted that minority shareholders may remain in the target company even after the conclusion of a successful tender offer. Thus, the plans the bidder has for the future of the target company are material information. n193 In fact, Judge Friendly cautioned that overstating the definiteness of plans is as serious as understating them. n194 Where plans are not definite, it is adequate if the bidder states that it is considering taking certain steps. n195 However, plans for a change in management or a merger are amongst the things that should be disclosed. n196 While a bidder may specifically deny that it plans to merge with the target company, n197 this denial may be considered misleading if the bidder has developed a detailed blueprint for doing so, even if the plan has not received final approval. n198 Since the integrity of the bidder's management can affect the future of the target company, information on this topic may also be material. n199

An issue that has frequently arisen in litigation is whether a possible antitrust violation created by the tender offer has been adequately disclosed. It should be noted that failure to reveal a reasonable possibility of an antitrust violation violates the disclosure and antifraud provision of Section 14 since the existence of such a possibility is likely to lead to an injunction against the tender offer. n200 However, in *Missouri Portland Cement Co. v. Cargill* n201 the court held that where the possibility of an antitrust violation was not clearly apparent at the time of the offer, the bidder did not violate Section 14(e) by failing to disclose this possibility, even though the court found sufficient grounds under the antitrust laws to enjoin the offer. Nonetheless, the court's finding with respect to the existence of an antitrust violation was reversed on appeal. n202

[c] Manipulative or Deceptive Practices. Under Section 14(e) of the Exchange Act, a violation may arise from "fraudulent, deceptive, or manipulative acts or practices," as well as by material misrepresentations and omissions. However, similar provisions of Section 10(b) and *Rule 10b-5* thereunder n203 were restrictively interpreted by the Supreme Court in *Santa Fe Industries, Inc. v. Green*. n204 The Court held that "manipulative or deceptive" conduct under Section 10(b) did not include squeezing minority shareholders out of a corporation at an allegedly unfair price because full disclosure of the information material to the transaction was made, and such a transaction was not by itself "manipulative or deceptive." n205 Shortly after the *Santa Fe* decision, the court in *Altman v. Knight* n206 held that the acquisition of another corporation by the target corporation (even if there was no valid business purpose) was not by itself a manipulative or deceptive act under Section 14(e). In the instant case, the plaintiffs alleged that the sole purpose of the acquisition was to defeat the tender offer so that the incumbent management of the target company could retain power. n207 Similarly, in *Berman v. Gerber Products Co.*, n208 the court held that *Santa Fe* would not permit a shareholder of the target company to sue management under Section 14(e) for opposing a tender offer without a business purpose.

In order to bolster Section 14(e)'s prohibition against manipulative and fraudulent practices, the Commission adopted Rules 14e-1 and 14e-2. Rule 14e-1 defines such practices to include making any tender offer that does not remain open for at least twenty business days; n209 increasing the price of a tender offer without keeping it open for ten business days after the notice of the increase; failing to pay the offered consideration for the tendered shares as soon as reasonably possible after the end of the offer; n210 and extending the length of the offer without giving public notice at least one day after the offer was initially going to expire. n211 Additionally, Rule 14e-2 requires a target company to, no later than ten business days after the commencement of a tender offer, publish, send, or give to its security holders a statement that the target company either recommends acceptance or rejection of the offer, remains neutral to the offer, or is unable to take a position on the offer. n212

Further, Rule 14e-3 is an antifraud rule establishing a "disclose or abstain from trading rule" under the Williams Act. n213 The rule pertains to any person who directly or indirectly acquires material information concerning a tender offer from the person making the tender offer or from the issuer of the securities subject to the tender offer, and the person acquiring the information knows or has reason to know that it is nonpublic. n214 Rule 14e-3 also establishes an

"anti-tipping" rule concerning material, nonpublic information relating to a tender offer, designed to prevent a fraudulent, deceptive, or manipulative act. n215

In addition, Rule 14e-3(a) imposes a duty of disclosure under Section 14(e) upon any person who trades in securities that will be sought or are being sought in a tender offer that another person has taken a substantial step or steps to commence or has commenced. n216 The duty arises if the person who is trading is in possession of material information that he knows or has reason to know is nonpublic and that he acquired directly or indirectly from: n217

- (1) the offering person;
- (2) the issuer of the securities sought or to be sought in the tender offer; or
- (3) any officer, director, partner, employee, or any other person acting on behalf of the offering person or issuer.

Any person subject to Rule 14e-3(a) is prohibited from purchasing or selling, or causing the purchase or sale of, the securities to be sought or being sought in the tender offer, or any other security convertible into or exchangeable for such security, or any option or right to obtain or to dispose of such securities. n218 Liability, however, will not be imposed if within a reasonable time prior to any purchase or sale, the material information and its source are publicly disclosed by a press release or otherwise. n219 The public information may be disclosed by the person who has acquired information subject to the prohibition under the rule, or by another person. n220 If one person makes full and complete disclosure, there is no requirement for duplicative disclosure from a person who would otherwise be required to disclose or abstain from trading. n221

Rule 14e-3(b) contains an exception from the restriction on trading for any person, not a natural person, if the individual making a decision on behalf of that person did not know and did not have access to the material nonpublic information. n222 In addition, for the exception to apply, the institution must show that it had implemented one or more reasonable policies and procedures to ensure that the individuals making the decision would not violate Rule 14e-3(a). These policies and procedures may include but are not limited to:

- (1) those that restrict any purchase, sale, or causing any purchase and sale of any security, and
- (2) those that prevent the individual decision makers from knowing the nonpublic information. n223

The person who is not the natural person, *i.e.*, the multi-service financial institution, carries the burden of proof for both elements of the exception. n224

Rule 14e-3(c) provides two additional exceptions to the restrictions of Rule 14e-3(a):

- (1) for purchases of a security sought in a tender offer by a broker or by another agent on behalf of an offering person; and
- (2) for sales by any person of any security to the offering person.

Rule 14e-3(d) is designed to prevent fraudulent, deceptive, or manipulative acts or practices under Section 14(e). The rule prohibits certain persons from communicating material, nonpublic information relating to a tender offer under circumstances in which it is reasonably foreseeable n225 that the communications likely to result in a violation of Rule 14e-3(a) or Rule 14e-3(d), unless the communication was made to certain other persons.

Persons subject to the anti-tipping rule, *i.e.*, those prohibited from making the communication, include:

(1) the officers, directors, partners, employees, or advisors of the offering person or issuer, or anyone acting on their behalf; or

(2) a tippee of any person mentioned in (1). n226

Rule 14e-3(d) does not apply, however, to communications made in good faith to:

(1) the officers, directors, partners or employees of the offering person or issuer, to its advisors, or to other persons involved in the planning, financing, preparation or execution of the tender offer; or

(2) any person pursuant to a requirement of any statute or rule or regulation promulgated thereunder.

Finally, the person claiming the availability of the exception bears the burden of proof in establishing his or her good faith. n227

[d] Criteria for Injunctive Relief. Many target companies seek preliminary injunctive relief against the bidder under Section 14(e). Such suits have one purpose--to defeat the offer by delaying the offer. Additionally, it is not uncommon for a bidder to seek a preliminary injunction. n228 In *Electronic Specialty Corp. v. International Controls Corp.*, n229 Judge Friendly offered the following statement on the proper use of preliminary injunctive relief in a tender offer dispute:

"We agree with plaintiffs to the extent of believing that the application for a preliminary injunction is the time when relief can best be given. Despite the makeweight argument in the final paragraph of *Symington Wayne, supra*, 383 F.2d 840, 843, on which Judge McLean naturally relied, we think that in administering § 14(d) and (e), district judges would do well to ponder whether, if a violation has been sufficiently proved on an application for a temporary injunction, the opportunity for doing equity is not considerably better then than it will be later on. The court will have a variety of tools usable at that stage. If the filings are defective or the tender offer misleading, the court can require correction, along, of course, with an opportunity to withdraw and an injunction against further solicitation until the period for withdrawal has expired. Since the amount of stock tendered is likely to be smaller at that time, the difficulties with respect to withdrawal described by plaintiffs will at least be less acute than after the offer has been concluded. If the court believes the offeror has improperly depressed the price of the stock before making the offer, it can require rescission and enjoin further solicitation for a period, or allow the offeror the alternative of raising the price for both past and future deposits. We cite these merely as examples; other techniques will doubtless suggest themselves to resourceful judges. On the other hand, we do not mean at all that interlocutory relief should be given lightly. To the contrary, district judges must be vigilant against resort to the courts on trumped-up or trivial grounds as a means for delaying and thereby defeating legitimate tender offers."

In order to obtain preliminary injunctive relief a party must show two things: (1) that there is a substantial probability that a tender offer violation exists; n230 and (2) irreparable harm will occur to that party if the injunction is not issued. n231 In *Rondeau v. Mosinee Paper Co.*, n232 the Supreme Court held that with respect to issuing an injunction under the Williams Act, the "irreparable harm" standard may not be replaced with a weaker one. This applies to both preliminary and permanent injunctions.

Material disclosure violations cause irreparable harm by forcing shareholders to decide whether to accept the tender offer on the basis of faulty information. n233 However, issuing an unconditional preliminary injunction against a tender offer may irreparably harm the bidder, as it might permanently lose its opportunity to acquire the target company. More significantly, an unconditional preliminary injunction may irreparably harm the target company's shareholders by

depriving them of an opportunity to elect to tender their shares into the offer to sell their stock at a profit. Thus, most courts have heeded Judge Friendly's warning in *Electronics Specialty*, and have permitted the tender offer to resume once the bidder has made proper disclosure of the material facts. n234 Further, shareholders who have already tendered their shares will be allowed to withdraw the tendered shares. n235 Nonetheless, preliminary injunctions unconditionally postponing tender offers have been granted in a number of cases where disclosure violations under the securities laws are combined with antitrust violations or violations of other federal statutes. n236 Enjoining a tender offer is inappropriate if the target company has made misleading statements to protect the shareholders. Under those circumstances, the target company should be ordered to make adequate disclosure, as quickly as possible if the offer has already commenced. n237

Target companies have sometimes alleged that they will suffer irreparable harm, if the tender offer is not enjoined, through the loss of business and employee morale. In *Boyetown Burial Casket Co. v. Amedco, Inc.*, n238 the court enjoined a tender offer on this basis. However, the Court of Appeals for the Second Circuit suggested that such claims should be scrutinized carefully. n239

Injunctions can result from harm caused by a violation of Section 14(d). In *Davis v. Emerson Insurance Agency*, n240 the district court enjoined a tender offer that violated the disclosure and the withdrawal rights provisions of Section 14(d) because the offer was likely to reduce the number of shareholders to the point where the stock would be deregistered with the Commission and, as a result, the plaintiff shareholders would suffer irreparable harm.

Whether scienter is a prerequisite to injunctive relief under Section 14(e) was addressed in *SEC v. Wills*. n241 In that case, the district court for the District of Columbia held that the Commission need only prove negligence in an action under Section 14(e). The court reasoned that Section 14(e) is more akin to Section 17(a) of the Securities Act, under which decisions have not required scienter in Commission actions, n242 than it is to Section 10(b) of the Exchange Act. n243 It should be noted that Section 10(b) has a scienter requirement for private damage actions, n244 and for Commission actions. n245 The Supreme Court in *Ernst & Ernst v. Hochfelder* expressly left open the possibility that recklessness satisfied the scienter requirement. Since *Hochfelder*, the circuits have endorsed the notion that recklessness satisfies the scienter requirement. n246

In *Chris-Craft Industries, Inc. v. Piper Aircraft Corp.*, n247 the court held that some form of culpability must be shown in order to establish a violation of Section 14(e) because it was so similar to *Rule 10b-5*. A subsequent case, which held that scienter must be proved in a private injunctive action, summarized *Chris-Craft's* holdings as follows: n248

"With respect to the concept of culpability, intent to defraud is not an essential element of a § 14(e) violation, just as it is not essential in a private action under *Rule 10b-5*. Knowledge of the falsity of the statement or reckless disregard of the truth may be sufficient. Mere negligent conduct is not sufficient."

[e] Private Damage Actions.

[i] Under Section 14(e). To maintain a cause of action under Section 14(e), a private litigant must allege that he or she has been injured as a result of the defendant's violation of that section. He or she must also have standing to sue. n249 As noted earlier, the Supreme Court ruled in *Piper v. Chris-Craft* n250 that a tender offeror does not have standing to sue for damages for a violation of Section 14(e).

Additionally, plaintiffs who cannot prove damages have no cause of action. In *Emmi v. First Manufacturers National Bank*, n251 the court dismissed a claim that, in an exchange offer, the defendant-offeror *overvalued* the assets of the company in which the plaintiff was a shareholder. An issue that often poses harder problems than proof of damages is whether the plaintiff's alleged injury was caused by the defendant's misconduct. n252 To a certain extent, this issue was simplified by the Supreme Court's decision in *Affiliated Ute Citizens v. United States*, n253 where the Court held that reliance is not a necessary element of proof in non-disclosure cases because it is very difficult for the plaintiff to prove

that had he known all the facts, he would have acted differently. Although, *Affiliated Ute* was a *Rule 10b-5* case, its rule has been held applicable to cases under Section 14(e). n254 Further, cases under *Rule 10b-5* have treated the *Affiliated Ute* rule as a presumption that may be rebutted by specific proof that the plaintiff would not have relied upon the undisclosed information had he known it. n255 Accordingly, there is no reason why this presumption would not be rebuttable under Section 14(e) as well. n256

Many questions concerning causation arise from whether the plaintiff lost an opportunity to sell his stock. The court in *Lowenschuss v. Kane* n257 sustained the sufficiency of a complaint alleging that the plaintiffs were injured by being misled by the bidder into tendering their shares, even though these shares were returned to them when the offer was enjoined because by that time the declining market price made it impossible to sell the shares. The court stated that the plaintiffs could recover if they could prove "that they would have sold their shares at a particular price or time if the shares had not been frozen." n258 Further, *Berman v. Gerber Products, Company*. n259 held that a target company that had valid reason to oppose a tender offer, could not be considered responsible for their shareholders' lost opportunity to tender their shares when the bidder withdrew its offer because of the target company's opposition. n260 The court also stated that:

"If defendants misrepresented or omitted material facts in connection with their opposition to the Anderson, Clayton proposal so that plaintiffs were induced to retain their shares in reliance upon the integrity and good judgment of the board of directors, but had they known the truth they would have sold their stock in the rising market, a direct causative link exists between defendants' acts and plaintiffs' investment decision. In short, defendants' efforts with respect to the causation issue have focused exclusively on the shareholders' decision to tender their shares, and are, therefore, unsuccessful in rebutting the presumption of reliance as it relates to the shareholders' decision to sell on the open market." n261

Moreover, in *Petersen v. Federated Development Co.* n262 the court held that the plaintiff's claim that the defendants sent misleading communications to the shareholders that disparaged the value of the tender offer was rejected because the plaintiff never received these communications since he was out of the country during the entire period of the offer and could not have tendered his shares in any event. Additionally, another case held that a plaintiff, who claimed that an exchange offeror broke its agreement to give him the value of his stock option in the shares of the offering company, could not sue under Section 14(e), because the offer was not addressed to him since he had no voting rights. n263

Importantly, several cases have held that the defendant must exhibit some type of culpable behavior in order to hold him or her liable in a private action under Section 14(e). n264 In fact, no cases involving private actions have held that such behavior is not needed. n265 However, intent to defraud is not required under this standard, rather knowledge of the falsity of the statement or reckless disregard of the truth is likely to be sufficient. n266 Perhaps this accounts for the relative infrequency of cases concerning scienter under Section 14(e), since both the bidder and the target company will usually be aware of, or have easy access to, the facts underlying their statements.

[ii] Under Other Provisions of the Exchange Act. A number of plaintiffs have sought relief under *Rule 10b-5* in cases concerning tender offers. n267 The use of *Rule 10b-5* in private actions is discussed elsewhere in this book. n268 However, it should be noted that the "purchase or sale" requirement of *Rule 10b-5* n269 would bar causes of action permissible under Section 14(e). For example, except in unusual circumstances, target companies and their non-tendering shareholders are not considered sellers of stock. Thus, they would not have standing to bring a damage action under *Rule 10b-5*.

In *Piper v. Chris-Craft*, the Supreme Court held that a defeated tender offeror did not have a valid cause of action under *Rule 10b-6*, which is designed to prevent manipulation of securities prices, where the price it paid for the target company's stock was not affected by the competing tender offeror's violation of that Rule. The Court stated:

"At no time has Chris-Craft complained of or even suggested that the price which it paid for Piper shares was influenced by Bangor's 10b-6 violations. Indeed, Chris-Craft does not assert standing as a *Piper shareholder*; on the contrary, it claims damages because, in its view of the case, it lost the opportunity to gain control of Piper by virtue of Bangor's 10b-6 violations. Assuming the correctness of this theory, the fact remains that Rule 10b-6 is not directed at or concerned with contests for corporate control. This technical rule is focused narrowly upon a precise goal--maintaining an orderly market for the distribution of securities free from artificial or manipulative influences. Thus, as the issues have been framed, Chris-Craft did not come to the courts in the posture of hoodwinked investor victimized by market manipulation; its complaint, as we noted, is that it lost a chance to gain control of a corporation, a claim beyond the bounds of the specific concern of Rule 10b-6." (emphasis in opinion). n270

The rationale of this decision soon resulted in a further constriction of a tender offeror's rights. For instance, in *Crane Co. v. American Standard, Inc.*, n271 a defeated tender offeror alleged that the defendant discouraged shareholders from accepting its offer by purchasing the target company's stock, thereby causing the open market price of the stock to rise above the price offered by the plaintiff. A prior proceeding held that the practice violated Section 9(a)(2) of the Exchange Act because Standard had engaged in the transactions raising the price of Westinghouse Air Brake Co. (WABCO) shares "for the purpose of inducing the...sale" of such shares by Crane. Once American Standard and WABCO merged, Crane was forced to sell its shares because of antitrust considerations. n272 However, the court held that Crane could not recover for this violation, because the Supreme Court found in *Piper* that Section 9 was closely linked with Rule 10b-6, the purpose of both being to prevent market manipulation, and that Crane, like Chris-Craft, was not suing as a hoodwinked-investor. Additionally, the court held that Crane could not recover under *Rule 10b-5*.

[A] The Commission's Guidance on Mini-Tender Offers and Limited Partnership Tender Offers

Mini-tender offers are tender offers that will result in an offeror owning less than five percent of a company's stock. Generally, offers are structured in this manner to avoid the extensive filing, disclosure and procedural requirements of Section 14(d) of the Exchange Act and Regulation 14D. n273 Additionally, mini-tenders have become commonplace in the limited partnership context and are becoming increasingly common for corporate securities and shares of closed-end funds. n274

[B] Mini-Tender Offers

While Congress has limited the application of Section 14(d) of the Exchange Act to tender offers that would result in ownership of more than five percent of a class of securities, Section 14(e) of the Exchange Act and Regulation 14E have no such limitation. Accordingly, holders of securities which are subject to mini-tender offers are protected by Section 14(e) and Regulation 14E, which apply to all tender offers including both mini-tender offers and tender offers under Regulation 14D and Rule 13e-4 for any type of security (including debt securities). n275 Section 14(e) is the antifraud provision that prohibits fraudulent, deceptive, and manipulative acts in connection with a tender offer. Regulation 14E provides for the basic procedural protections for all tender offers. n276

Offering documents distributed to security holders in mini-tender offers are usually brief and do not contain a great deal of information. Additionally, the Commission found that mini-tenders are often made at a price below market value and the offering documents that are provided may not disclose this fact to the security holder. n277 Since tender offers from third parties are conventionally launched at a premium to market prices, a lack of disclosure may cause the security holders to be misled. n278 Moreover, the Commission found that some bidders did not adequately disseminate the materials. The Commission further found that offerors often deliver the offering documents to the Depositary Trust Company ("DTC") and will rely on DTC to forward the notice electronically to broker-dealers and banks. As a result, the information sent by broker-dealer or bank participants is often limited and the offering documents may, in some cases, not be sent to a security holder unless he or she requests the documents. n279 Due to these concerns, the

Commission has made several prophylactic recommendations that offerors should employ when drafting disclosure contained within the offering documents, and has made several recommendations regarding dissemination and payment. n280

To avoid "fraudulent, deceptive or manipulative practices" within the meaning of Section 14(e), the Commission has recommended certain disclosures in mini-tender offering documents, including the following: (1) offer price, including whether or not the price is below the market price; (2) potential changes or reductions of the offer price; (3) information regarding reductions caused by any distributions or fees; (4) withdrawal rights and procedures; (5) acceptance of tendered shares on a *pro rata* basis; (6) information regarding any target company recommendation; (7) identity of offeror and its affiliates; (8) plans or proposals regarding future tender offers of the securities of the same target company; (9) ability of the offeror to finance the offer and its source of funds; (10) conditions to the offer; and (11) extensions of the offer. n281

Offerors must use "reasonable efforts" to distribute the information to offerees. The Commission has approved the three methods stated under Rule 14d-4, which include: (1) publishing the offering documents in a newspaper; (2) publishing a summary in a newspaper and then mailing of offering documents to those who request them; or (3) mailing everyone on a shareholder's list. n282 Accordingly, reliance on DTC's distribution network or posting the information on a website is not considered adequate. n283 As for timing of payment, Rule 14e-1(c) states that a bidder in a mini-tender offer must pay for or return shares within three business days following the close of the offer. n284

[C] Tender Offers For Limited Partnership Units

Limited partnership units constitute equity securities under the Exchange Act and accordingly are subject to Regulation 14D and/or Regulation 14E, as applicable. Tender offers for limited partnership units raise significant concerns regarding disclosure. The Commission has observed that limited partnership units are relatively illiquid and as a result unit holders may face difficulties in disposing of their holdings. The Commission observed that the offer price in a tender offer for limited partnership units is often significantly lower than the original purchase price or the fair market value of the units. Additionally, the above-stated concerns are compounded by the fact that, in the eyes of the Commission, many investors in limited partnerships are unsophisticated retail investors. n285

To avoid misleading investors and violating the antifraud provision, n286 the Commission has recommended that offerors make a number of disclosures in connection with tender offers for limited partnership units. The Commission recommended that disclosures include: (1) risk factors (including any valuations of the subject security exceeding the offering price); (2) an offeror's affiliation with the target company; (3) any conflicts of interest; (4) recent market price and trading values; (5) methods used in determining the offer price; (6) third party reports; (7) valuations by the general partner; (8) purpose of the offer and plans for the issuer; (9) partnership property and business information; (10) financial information; (11) tax consequences; (12) transfer or processing fees; and (13) if applicable, that the price may be reduced by any distributions. n287

According to Rule 14e-2, a general partner has an obligation to respond to an offer within ten days following commencement of the offer for limited partnership units. To protect unit holders, the Commission recommended that target partnerships consider making various disclosures in the tender offer documents that are provided to unit holders, including conflicts of interest, valuations by the general partner and third party reports materially related to the transaction. n288

Okla. 1972) , where the court concluded that defendant, who owned 4.86 percent of the outstanding shares of the plaintiff, and purchased an additional 7.2 percent of those shares during a six week period, by "an active and widespread solicitation of public shareholders in person, over the telephone and through the mails ...," had made a "tender offer" within the meaning of

the Williams Act.

See also S-G Securities Co. v. Fuqua Investment Co., C.C.H. Fed. Sec. L. Rep. P 96,750 (D. Mass. 1978), where the court held that defendants' issuance of several press releases outlining their intent to conduct a public buying program for the purposes of gaining control of the issuer generated publicity that "created a risk of the pressure on sellers that the disclosure and remedial tender offer provisions of the Williams Act were designed to prevent."

But see Hanson Trust PLC v. SCM Corp., C.C.H. Fed. Sec. L. Rep. P 92,305 (2d Cir. 1985), where the court held that the purchase by an unsuccessful tender offeror of 25% of the target's stock in one open market purchase and five privately negotiated transactions after it had terminated its tender offer, did not constitute a de facto tender offer. The court observed that application of the tender offer rules must turn on whether the class of persons affected by a given transaction are among those requiring the protection of the Williams Act.

P 96,403, 93,429 (D.D.C. 1978); *D-Z Investment Corp. v. Holloway*, C.C.H. Fed. Sec. L. Rep. P 94,771 (S.D. N.Y. 1974); *Nachman Corp. v. Halfred, Inc.*, C.C.H. Fed. Sec. L. Rep. P 94,455 (N.D. Ill. 1973).

(n22)Footnote 22. *See Kennecott Copper Corp. v. Curtiss Wright Corp.*, 584 F.2d 1195 (2d Cir. 1978) .

(n23)Footnote 23. *See Polinsky v. MCA, Inc.*, 680 F.2d 1286 , C.C.H. Fed. Sec. L. Rep. P 98,761 (9th Cir. 1982), where the court held that purchases made prior to the announcement of a tender offer were not related to the later tender offer because the purchases had none of the indicia associated with tender offers (e.g., there was no pressure exerted on the plaintiffs to sell their stock to the defendant--the plaintiffs voluntarily offered to sell their stock through their broker).

See also Gulf & W. Indus., Inc. v. Great Atlantic & Pacific Tea Company, 356 F. Supp. 1066, 1074 (S.D.N.Y.) , *aff'd* 476 F.2d 687 (2d Cir. 1973) , where the court stated:

This argument is strained at best. It would require the integration of prior market purchases with the amount to be obtained through the tender offer. I find that this not the law. It appears to this Court that the 5 per cent limit included in Section 14(d) permits that amount to be purchased in the open market without regard to any subsequent tender offer. (Footnote omitted.)

Elec. Corp., 425 F. Supp. 1145 (S.D.N.Y. 1977) ; *Anaconda Co. v. Crane Co.*, 411 F. Supp. 1210 (S.D.N.Y. 1975) .

(n25)Footnote 25. Section 14(d)(1) also applies to tender offers for equity securities that do not have to be registered solely because of the exemption contained for certain insurance companies in Section 12(g)(2)(G) of the Exchange Act, and to tender offers for equity securities issued by a closed-end investment company that is registered under the Investment Company Act of 1940.

However, since sinking fund bonds are long-term debt rather than equity securities, the disclosure requirements of Section 14(d) do not apply to a bondholders trustee's letter soliciting the bondholders' approval of a sale of assets that served as part of the collateral for the bonds. *E.H.I. of Florida, Inc. v. Ins. Co. of N. Am.*, C.C.H. Fed. Sec. L. Rep. P 98,019 (3d Cir. 1981).

(n30)Footnote 30. *See also* *Koppers Co., Inc. v. Am. Express Co.*, C.C.H. Fed. Sec. L. Rep. P 95,012 (W.D. Pa. 1988). A target company showed a reasonable likelihood that it could show the parent of a tender offeror to be a "person" on whose behalf a tender offer was being made. As such, the parent company was subject to the Williams Act's disclosure requirements. The court noted that the parent played a central role in the offer as adviser, financier, underwriter and equity partner to the offeror.

(n40)Footnote 40. *See* Rule 14d-6(a)(4).

(n41)Footnote 41. A "bidder" is defined by Rule 14d-1(g)(2) as "any person who makes a tender offer or on whose behalf a tender offer is made." In *MAI Basic Four, Inc. v. Prime Computer, Inc.*, C.C.H. Fed. Sec. L. Rep. P 94,357 (1st Cir. 1969), the court incorporated into the "on whose behalf" language the "group" concept of sections 13(d)(3) and 14(d)(2) of the Exchange Act and held that it could not be said, as a matter of law, that an "active adviser-broker-financier-participant" for the offerors was not a "bidder," though the advisor would own less than a

majority interest in the surviving entity. The advisor had a history of close association and equity sharing with the offeror group, "early and pervasive" participation in the formulation and execution of the tender offer and active involvement throughout it, erstwhile representation on the board of the corporation controlling the sole equity participant in the offeror group, and the advisor created the expectation that it would provide further financing if it could not place \$875 million in junk bonds, the bulk of financing. The court affirmed an injunction against consummation of the offer pending curative disclosure of the advisor's financial condition, identification of all affiliated officers and directors of the advisor and description of its recent share trading.

(n42)Footnote 42. Disclosure required within Schedule TO is now broadly contained within Regulation M-A.

(n43)Footnote 43. This information may be based upon the subject company's most recent filing with the Commission, unless the bidder has reason to believe that such information is not current.

(n44)Footnote 44. The Commission has stated that disclosing plans for a merger subsequent to the completion of the tender offer, using unregistered securities of the acquiring company, does not "jump the gun" in violation of the Securities Act.

Interpretations Concerning the Application of Registration Requirements to Certain Tender Offers and the Application of Tender Offer Provisions to certain Cash Option Mergers, Exchange Act Release No. 14699, 14 SEC Docket 894 (April 24, 1978) states:

"The issue here is whether the acquiring company's disclosure in its tender offer materials of the negotiations with the acquired company and/or the merger agreement, including the material terms of the statutory merger contemplated subsequent to the tender offer, constitutes an 'offer to sell' the securities of the acquiring company to be received by the acquired company's shareholders pursuant to the merger within the meaning of Section 2(3) of the [Securities] Act and Rule 145(a) promulgated thereunder. A finding that such disclosure constitutes an 'offer to sell' leads to the conclusion that the bidder's tender offer violates Section 5(c) of the [Securities] Act if at the time of the tender offer a registration statement for the acquiring company's securities to be exchanged in the merger has not been filed with the Commission.

* * * * *

The disclosure philosophy of the Williams Act is juxtaposed with the 'gun jumping' doctrine under the [Securities] Act. That doctrine was designed to prevent an issuer from conditioning the market by arousing investor interest before a registration statement covering the securities proposed to be offered has been filed. In the Division's [Division of Corporation Finance] view, such a doctrine is inappropriate to apply to a cash tender offer subject to Section 14(d) in which the bidder is seeking to buy the securities of the subject company's security holders. The bidder's concern is purchasing the subject company's securities for cash, not priming the market for a subsequent registered offering of securities. Regardless of the bidder's intent, Schedule TO for compelling policy reasons reflected by the Williams Act requires such information in order to provide full disclosure to investors confronted with an investment decision in the context of a tender offer. In the Division's opinion, to apply the 'gun jumping' doctrine, would not further the policies underlying the [Securities] Act and would be inconsistent with the intention of Schedule TO to require disclosure of information available to the bidder regarding its previous contacts, arrangements or agreement and future plans and proposals with respect to the subject company." (footnotes omitted).

(n45)Footnote 45. See *Emhart Corp. v. U.S.M. Corp.*, 403 F. Supp. 660 (D. Mass. 1975) , where the target company was found to have violated Section 14(d) and 14(e) for stating that the tender offer was inadequate without mentioning past negotiations for its stock by the bidder that tended to show that the bidder's current offer was adequate.

(n55)Footnote 55. See *Ronson Corp. v. Liquifin Aktiengesellschaft*, 483 F.2d 846 (3rd Cir. 1973) , where the court upheld a preliminary injunction against a tender offer partly because the very complicated transactions behind the funding of the offer were not revealed. Subsequent disclosures by Liquifin led to the removal of the injunction. *Ronson Corp. v. Liquifin Aktiengesellschaft*, 370 F. Supp. 597 (D. N.J.) , *aff'd*, 497 F.2d 394 (3d Cir.) , *cert. denied* 419 U.S. 870 (1974) .

See also *IU Int'l. Corp. v. NX Acquisition Corp.*, C.C.H. Fed. Sec. L. Rep P 93,633 (4th Cir. 1988), where a divided panel held that a bidder is not required to know and disclose expected sources and expected terms of financing prior to actual financing of the tender offer. The court stated that the Williams Act does not impose a threshold requirement on what condition financing must be in prior to the commencement of a tender offer; the Williams Act only requires disclosure of the financing arrangements already in place. While the existence of a financing contingency is a material term of an offer and the fact of contingency must be stated, the court said, how the financing will ultimately occur is not essential to an offer. The court noted that the Williams Act is designed to maintain neutrality between the bidder and the target company and concluded that requiring knowledge by the bidder of expected sources and hoped for terms of financing and disclosure of such information would favor target companies and upset this neutrality.

See also Letter from General Counsel Daniel L. Goelzer to the Honorable Leonard B. Sand, United States District Court for the Southern District of New York (March 28, 1988) re: CRTF Corp. v. Federated Department Stores, Inc. and R.H. Macy & Co. v. Campeau Corp., C.C.H. Fed. Sec. L. Rep P 84,224 (stating that where a tender offeror has obtained financing commitments for all or substantially all of the remaining financing that it requires for its offer, that is, in the Commission's view, a material change in the offer and investors must be provided with a minimum of five business days). See Rule 14d-4(c) to consider that change.

(n56)Footnote 56. But see *Broder v. Dane*, 384 F. Supp 1312 (S.D.N.Y. 1974) , where the court held that the failure to report an inter-family purchase of stock occurring twenty months before the purchasers caused the issuer to make a "going private" tender offer, was a material omission of fact in violation of Section 14(e), where the price paid

for the stock in the inter-family purchase was substantially higher than the tender offer price.

(n73)Footnote 73. Rule 14d-9(b).

(n74)Footnote 74. Rule 14d-9(c).

(n75)Footnote 75. Rule 14d-9(d).

See Steinberg v. Pargas, Inc., C.C.H. Fed. Sec. L. Rep. P 91,979 (S.D.N.Y. 1985), where the court held that a target company's failure to report on Schedule 14D-9 the identity of one of several bidders whose proposals were rejected by the target company's board of directors was not a material misstatement or omission of fact, where the identities of other unsuccessful bidders were not disclosed, and the Schedule 14D-9 contained an accurate description of the terms of the successful bid, of each unsuccessful bid, and of the board of director's reasons for recommending the successful bid and rejecting the others. The court based its finding of lack of materiality on plaintiff's failure to show a substantial likelihood that knowledge of the bidder's identity would have been important to a reasonable shareholder in making his decision on how to vote. As well, the court found that the act was designed to insure disclosure; that the target company had met its obligations in that regard; and that the target company's stockholders had the opportunity to reject the Board's recommendation.

(n76)Footnote 76. Rule 14d-9(f).

(n77)Footnote 77. "Conclusory statements such as 'The tender offer is in the best interests of the shareholders' are not considered sufficient disclosure." Item 1012(b) of Regulation M-A.

(n78)Footnote 78. *See* Radol v. Thomas, C.C.H. Fed. Sec. L. Rep. P 92,289 (6th Cir. 1985), where the court held that where a two-tier tender offer was contemplated in which the bidder, if successful, planned to merge the target company into the bidder, the tender offer materials did not constitute solicitations of shareholder consent to the proposed merger and thus were not required to contain all the information required to be included in a proxy statement soliciting shareholder approval of the merger since a tender offer and a subsequent merger are distinct acts to be considered separately.

(n79)Footnote 79. *Anaconda Co. v. Crane Co.*, 411 F. Supp. 1210 (S.D.N.Y. 1975) .

(n80)Footnote 80. *Id.* at 1215 .

(n81)Footnote 81. *Id.* at 1213 .

"This rule was intended to permit the management of a target company to respond immediately to an attempted corporate takeover. The statement issued by Anaconda is bland enough to fit within the meaning of this provision. Crane argues, however, that Anaconda's press release was really an attempt by Anaconda management to communicate the message that Anaconda would oppose the proposed offer and, as such, was a violation of Section 14(d) of the Act in that it constituted a 'solicitation' or 'recommendation.' The only thing that Crane could otherwise request was that Anaconda's management should have included a statement that it was not necessarily opposed to the proposed offer. This type of requirement of the niceties of language is certainly not required in the real world and I find no violation in the August 8 release."

(n82)Footnote 82. *See infra* § 7A.03[3].

(n85)Footnote 85. Rule 14d-5(f)(3)(iii) and (iv).

(n86)Footnote 86. Rule 14d-5(f)(4).

(n87)Footnote 87. Rule 14e-1(a). If the tender offer involves a roll-up as defined in item 901(c) of Reg. S-K and the securities being offered are registered (or authorized to be registered) on Form S-4 or Form F-4, the offer may not be open for less than 60 calendar days from the date the tender offer is first published or sent to security holders.

(n88)Footnote 88. Rule 14e-1(b).

*See Kidder, Peabody & Co., Inc., SEC No-Action Letter, 1986 SEC No-Act. LEXIS 2293, at *1 (May 5, 1986), where the staff took the position that it would not recommend an enforcement action against an issuer under Rules 14e-1(a) or (b) if the issuer does not keep a tender offer for its non-convertible debt securities open for the periods of time required under Rule 14e-1(a) or (b), provided that all securities of that class are included in the offer; the offer is disseminated to all security holders in a manner that gives them a reasonable opportunity to participate in the offer; and the offer is not made in response to any other offer for the issuer's securities.*

*See also Salomon Brothers, Inc., SEC No-Action Letter, 1986 SEC No-Act. LEXIS 2033, at *1 (April 17, 1986), the staff took the position that it would not recommend an enforcement action under Rule 14e-1(a) if an issuer made a tender offer for its non-convertible debt securities without registration, provided the issuer offers to purchase all of the class of debt covered by the tender offer; the offer is made to all holders of that class of debt; the debt-holders are given a reasonable opportunity to participate in the offering, including dissemination of tender offer materials on an expedited basis where the offer is to remain open for less than 10 days; and the tender offer is not made in response to other tender offers for the issuer's securities.*

(n89)Footnote 89. *See Murray v. Hospital Corp. of America, C.C.H. Fed. Sec. L. Rep. P 93,926 (M.D. Tenn. 1988) (extension of an oversubscribed tender offer according to its terms did not violate the Williams Act or rules thereunder).*

(n90)Footnote 90. Section 14(d)(5) does not explicitly state that accepted shares are excluded from the sixty day withdrawal provision, but H.R. Rep. NO. 90-1711 (1968) states that:

"This subsection would give shareholders who tender their shares immediately after the offer is made a short period within which to reconsider. At the other end of the spectrum, it would prevent tendered securities from being tied up indefinitely awaiting a decision by the person making the offer as to whether or not he will purchase them."

(n91)Footnote 91. Rule 14d-7(a).

(n92)Footnote 92. Rule 14d-7(b).

(n93)Footnote 93. Pro Rata Rule, Exchange Act Release No. 19336, 26 SEC Docket 1445 (Dec. 15, 1982).

(n94)Footnote 94. *See Pryor v. U. S. Steel Corp., C.C.H. Fed. Sec. L. Rep. P 92,804 (2d Cir. 1986), where the court held that a shareholder's allegation that a tender offeror had violated Section 14(d)(6) by accepting shares for proration after the proration deadline stated a cause of action. The court observed that in adopting Section 14(d)(6)*

Congress intended to spread any premium for control among all shareholders tendering within the proration period, and that the Congressional purpose would be defeated by permitting particular holders from purchasing a greater than pro rata share.

(n95)Footnote 95. The practice of "hedged tendering," where a person tenders securities and immediately sells some of the securities tendered, however, provides the opportunity to manipulate the pro rata requirements of a tender offer without violating the "short tendering" provisions of Rule 14e-4. For example, X and Y each own 1000 shares of stock, which is the subject of a tender offer. X expects acceptance of tendered shares on a 50 percent pro rata basis. Accordingly, X immediately sells 500 shares after tendering 1000 shares. If X's expectation of 50 percent acceptance is correct, his remaining 500 shares, or 100 percent of the shares he now owns, will be accepted by the tender offeror at the conclusion of the acceptance period. Y will have 500 of his shares accepted and 500 shares returned by the tender offeror. X has hedged the possibility of pro rata acceptance of his shares. Short Tendering of Securities Exchange Act Release No. 18050, 23 SEC Docket 632 (Aug. 21, 1981).

Rule 14e-4 addresses the problem of "hedged tendering" by requiring a person who tenders securities to have a net long position equal to or greater than the amount tendered in the securities or equivalent securities at the time of tender and at the end of the pro rata acceptance period. See Rule 14e-4(b)(1). An equivalent security is defined by the Rule 14e-4(a)(2) as being:

(1) any security (including any option, warrant, or other right to purchase the security), issued by the person whose securities are the subject of the offer, that is immediately convertible into, or exchangeable or exercisable for, a subject security, or

(2) any other right or option (other than a standardized call option) that entitles the holder thereof to acquire a subject security, but only if the holder thereof reasonably believes that the maker or writer of the right or option has title to and possession of the subject security, and upon exercise will promptly deliver the subject security. In the preceding example, Rule 14e-4 will require that X repurchase 500 shares before the pro rata acceptance period expires. In addition, paragraph (c) of Rule 14e-4 provides the Commission with the authority to exempt transactions from the Rule's provisions.

(n96)Footnote 96. *324 F. Supp. 998 at 1004 (S.D.N.Y. 1971)* , *aff'd*, *469 F.2d 696 (2d Cir. 1972)* .

(n97)Footnote 97. *Kroeze v. Chloride Group, Ltd.*, *572 F.2d 1099 (5th Cir. 1978)* .

See also *Brill v. Burlington Northern, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,625 (D.Del. 1984), where tender offers made in December and January were held not to constitute one tender offer with one proration pool since the second offer, made pursuant to an agreement with the target company, was not a continuation of the initial offer but was a separate offer with its own proration pool. The court stated that tender offerors may impose as many conditions or terms as they choose, including conditions concerning time, place and method of acceptance. Therefore as masters of the tender offer, the defendants had the right to terminate the December offer after some of the conditions occurred and to commence a separate and distinct tender offer in January. Furthermore, each tender offer complied with the full range of Williams Act protections, including additional time and proration pools. The court stated that Section 14(d)(6) did not apply to the plaintiff's other two claims involving a contractual severance agreement ("golden parachute") and a stock purchase agreement since the agreements were collateral to the tender offer.

(n98)Footnote 98. *578 F.2d 180 (7th Cir. 1978)* .

(n99)Footnote 99. Compare *Bache & Co. v. Int'l. Controls Corp.*, *324 F. Supp. 998 (S.D.N.Y. 1971)* , where the bidder agreed to give the plaintiff notice of the start of a five day period within which delivery of the shares must be made, and failed to do so. The court held Bache's tender of shares was still timely since the five day period never started

running.

(n111)Footnote 111. Rule 14d-10(e); Rule 14d-10(c). In connection with price, it should also be noted that a joint bid by former rival bidders that reduces the per share price of an offer is permissible. *See Finnegan v. Campeau Corp.*, C.C.H. Fed. Sec. L. Rep. P 95,513 (2d Cir. 1990). The target company shareholder bringing the action alleged that an agreement between bidders who had been in competition with each other constituted a conspiracy in violation of Section 1 of the Sherman Act. The Court of Appeals for the Second Circuit disagreed, explaining that neither the Williams Act nor applicable Commission regulations make any distinction between joint bids made by parties before a battle for control of a target and joint bids made by parties who had been rivals at the outset. Furthermore, it would be difficult to conclude that Congress could have authorized joint bids under the Williams Act and then eliminated that right by authorizing suit against such bidders under the antitrust laws. The court also pointed out that if the antitrust laws were used to invalidate agreements between rival bidders the result would be advantageous to incumbent managements, thus undermining the policy of neutrality which the Williams Act was intended to promote.

(n157)Footnote 157. Regulation 14 E, Unlawful Tender Offer Practices now contains Rules 14e-1 through 14e-8.

The Commission amended the short tendering rule, Rule 10b-4, and re-designated it as Rule 14e-4. The prohibition against multiple tendering to competing partial offers has been deleted. Otherwise no substantive change in the rule's operation is intended by the redesignation. Both short tendering and hedged tendering will continue to be prohibited by Rule 14e-4. *See Prohibited Transactions in Connection with Partial Tender Offers*, Exchange Act Release No. 34-28660, 47 SEC Docket 1054 (Nov. 30 1990).

(n158)Footnote 158. Section 14(e) states:

"It shall be unlawful for any person to make any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, or to engage in any fraudulent, deceptive, or manipulative acts or

practices, in connection with any tender offer or request or invitation for tenders, or any solicitation of security holders in opposition to or in favor of any such offer, request, or invitation. The Commission shall, for the purposes of this subsection, by rules and regulations define, and prescribe means reasonably designed to prevent, such acts and practices as are fraudulent, deceptive, or manipulative."

Rule 10b-5 states:

"It shall be unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce, or of the mails or of any facility of any national securities exchange:

(a) To employ any device, scheme, or artifice to defraud,

(b) To make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or

(c) To engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person,

in connection with the purchase or sale of any security."

Rule 10b-5 is discussed in *supra* § 5.04.

See also *Klaus v. Hi-Shear Corp.*, 528 F.2d 225, 232 (9th Cir. 1975) , where the court stated:

"Although, as the district court found, Klaus was misled to his detriment by Hi-Shear's misrepresentations, and so made a cash tender offer for fewer shares than he in fact needed for majority control, the Court decided in *Rondeau* that the Williams Act was designed to protect cash tender offerees, not offerors. The district court issued its ESOT injunction entirely on the basis of harm to Klaus. We see no possibility that Hi-Shear's misrepresentation resulted in any harm to the cash tender offerees, certainly none that could not be compensated by money damages." See *Rondeau*, 422 U.S. at 59-60, 95 S. Ct. at 2076-77. See also *CRTF Corp. v. Federated Dep't Stores, Inc.* 683 F. Supp. 422 (S.D.N.Y. 1988) and *R.H. Macy & Co., Inc. v. Campeau Corp.*, C.C.H. Fed. Sec. L. Rep. P 93,711 (S.D.N.Y. 1988).

(n175)Footnote 175. See *OKC Corp. v. Williams*, 461 F. Supp. 540 (N.D. Tex. 1978) , where the plaintiff sued the Commission and some of its employees under Section 14(e) for allegedly advising a third party not to make a tender offer for the plaintiffs' stock. According to Section (3)(c):

"No provision of this title shall apply to, or be deemed to include, any executive department or independent establishment of the United States or any lending agency which is wholly owned, directly or indirectly, by the United States, or any officer, agent, or employee of any such department, establishment, or agency, acting in the course of his official duty as such, unless such provision makes specific reference to such department, establishment, or agency."

The court stated:

"All of the individual defendants are officers and employees of the Commission who are being sued for actions taken in the course of their official duties. The mere fact that OKC alleges that these defendants violated the law does not remove them from the protection of Section 3(c). OKC's claim

under Section 14(e) of the Securities Exchange Act is therefore dismissed for failure to state a claim."
OKC Corp. v. Williams, 461 F. Supp. 540, 549 .

(n176)Footnote 176. Instead of proving a material misstatement or omission, a plaintiff may allege the existence of a manipulative, deceptive, or fraudulent act or practice. However, the grounds for such a complaint are very limited.

Although a tender offeror that controlled the target company may have had a duty to disclose a favorable fourth quarter report of the target company, the tender offeror, although an insider, had no duty to wait for the market's reaction to the report before making its tender offer. *Billard v. Rockwell Int'l Corp.*, 526 F. Supp. 218 , C.C.H. Fed. Sec. L. Rep. P 98,358 (S.D.N.Y. 1981).

(n179)Footnote 179. *Id.* at 449, 96 S. Ct. at 2132, 48 L. Ed.2d at 766 .

See *supra* § 7.09[5][f][i] for discussion of *TSC Industries, Inc.* in the context of proxy regulation.

(n180)Footnote 180. *Flynn v. Bass Bros. Enter., Inc.*, C.C.H. Fed. Sec. L. Rep. P 96,611 (E.D. Pa. 1978).

Prior to changes made by the Commission in 1976, although there was a duty to disclose any material fact in connection with a tender offer, as a matter of public policy the inclusion of appraised asset valuations, projections and other "soft information" was not generally required. It was felt that these appraisals lacked a sufficient degree of reliability to merit disclosure. Since 1976 however, the Commission has begun to change its attitude with respect to "forward looking" statements. To give full effect to the changing disclosure laws, the Court of Appeals for the Third Circuit held in *Flynn v. Bass Brothers Enterprises, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,674 (3d.Cir. 1984), that from now on soft information such as asset appraisals must be disclosed with the tender offer in appropriate cases. In ascertaining the duty to disclose, the court must balance the potential aid the information will give shareholders against the potential harm due to unwarranted reliance. Factors that must be considered in making such a determination include:

- (1) the facts on which the information was based;
- (2) the qualification of the experts who prepared the information;
- (3) the purpose for which the information was originally intended;
- (4) the relevance of the information to the stockholders' impending decision;
- (5) the degree of subjectivity or bias reflected in the information's preparation;
- (6) the degree of uniqueness; and
- (7) the availability to the investor of other more reliable sources of information.

In this case, the court discussed the significant developments in disclosure laws since 1976 and decided not to apply

the announced standards retroactively. Evaluating the defendant's conduct by the standards prevailing in 1976, the court determined that the plaintiff failed to demonstrate that the asset evaluations and other reports about the target company were sufficiently material to require their disclosure. Projections were officially linked with *Flynn's* category of "soft information" in *Hoffman Elec., Inc. v. Emerson Elec. Co.*, 754 F. Supp. 1070 (W.D. Pa. 1991) .

While other jurisdictions have followed the Court of Appeals for the Third Circuit's lead in holding that non-disclosure of projections and appraisals can lead to liability, they have differed in their respective approaches to determine whether projections and appraisals are sufficiently material and reliable to be included in the duty to disclose. Note that it has been held in this context that "unreliable information may be held to be immaterial as a matter of law." See *Garcia v. Cordova*, 930 F.2d 826 (10th Cir. 1991) . The Court of Appeals for the Sixth Circuit, for instance, has held in *Radol v. Thomas*, C.C.H. Fed. Sec. L. Rep. P 92,289 (6th Cir. 1985), in which the court held that the test for materiality of an asset appraisal is not merely whether it is *conceivable* that a reasonable shareholder would have deemed it significant but whether there is a substantial *likelihood* that under all the circumstances the appraisal would have assumed actual significance in the deliberations of a reasonable shareholder.

See also a companion case, *Starkman v. Marathon Oil Co.*, C.C.H. Fed. Sec. L. Rep. P 92,290 (6th Cir. 1985) (a tender offer target must disclose projections and asset appraisals based upon predictions regarding future economic and corporate events only if the predictions underlying the appraisal or projection are substantially certain to hold).

See also *Biechele v. Cedar Point, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,829 (6th Cir. 1984), where the Court of Appeals for the Sixth Circuit held that the target of a tender offer was not required to disclose a financial analyst's report on the target prepared fifteen months prior to the tender offer that was used as a "selling document" to induce other bidders to make offers for the target's stock, since the report's financial projections and speculative assumptions were mere predictions of future business success. The Court of Appeals for the Fourth Circuit has held, by contrast, that projections, both in the context of omissions as well as misrepresentations, are not considered material absent an association with a specific "guarantee," or unless they legally constitute fraud. See *Hillson v. Adage, Inc.*, 42 F.3d 204 (4th Cir. 1994) (financial forecast not actionable, as it was neither a guarantee nor "fraud on the market"); *Kas v. First Uniform Corp.*, 857 F. Supp. 481 (E.D. Va. 1994) (projections, unless expressed as guarantees, are "generally not actionable"). The Second Circuit appears as though it may agree. See *e.g.*, *Heil v. Lebow* [1994-1995] Fed. Sec. L. Rep. (CCH) P 98,465 (S.D.N.Y. 1994), *aff'd* 1995 U.S. App. LEXIS 39921 (2d Cir. 1995) ("Statements of opinion that express no guarantee do not support a cause of action under federal securities laws.").

For a more context specific holding, see *SEC v. Tex. Int'l Co.*, 498 F. Supp. 1231 , C.C.H. Fed. Sec. L. Rep. P 97,883 (N.D. Ill. 1980), where the court held that a tender offeror bidding for the stock of a company undergoing bankruptcy reorganization need not disclose the:

- (1) sellers' "ask" prices for the target company's stock, in addition to buyers' "bid" prices, since a shareholder need only be told the price he probably would receive in the current market for his stock and "bid" prices are a more accurate reflection of the current market for the stock;
- (2) Commission valuations of the target company as a going concern, since the valuation set by the reorganization court had been disclosed and the Commission valuation had been rejected or discredited by the reorganization court; and
- (3) speculations on the potential effects of outcomes of pending legal proceedings on the tender offer plan, since the defendants could not have perceived a "reasonable likelihood" that the proceedings would be decided one way or another and the speculations could have confused or misled the shareholders.

The court, however, also held that all aspects of any disparity in treatment between two classes of shareholders

included in a tender offer should be disclosed since the disparity is generally of great importance to the disfavored shareholders. See *SEC v. Tex. Int'l Co.*, 498 F. Supp. at 1250-51, C.C.H. Fed. Sec. L. Rep. at pp. 90,471-72.

For a detailed discussion of the law of disclosure in the realm of forward looking information, projections, appraisals and the like, see generally James Robert Brown, *The Regulation of Corporate Disclosure*, § 6 (Aspen Publishers, third ed. 1998) (Supplemented 2002).

(n181)Footnote 181. *Elec. Specialty Co. v. Int'l Controls Corp.*, 409 F.2d 937, 948 (2d Cir. 1969) . See also *Mo. Portland Cement, Inc., v. Cargill, Inc.*, 498 F.2d 851, 872-73 (2d Cir.) , cert. denied, 419 U.S. 883 (1974) , where Judge Friendly stated that:

"Cargill complained also that MP was guilty of misrepresentation when it cautioned shareholders that if they sold their shares or tendered them to Cargill during the term of the offer, they would lose the 25% stock distributions to shareholders of record on February 7, 1974. It argues that the value of the distribution lay in the declaration of the usual 40cent(s) dividend on the increased number of shares which, as a practical matter, was no different than a 25% increase in the dividend, and that the effect of this action would be reflected in appreciation of the market price, which indeed occurred after the announcement. However, MP's statement was literally true and here again we are not disposed to require parties to a tender fight to conform to standards of sterilization that might be appropriate in other contexts." See *Elec. Specialty Co. v. Int'l Controls Corp.*, 409 F.2d 937, 948 (2d Cir. 1969) .

(n182)Footnote 182. *Blanchette v. Providence & Worcester Co.*, 428 F. Supp. 347, 354 (D. Del. 1977) .

(n183)Footnote 183. See *Broder v. Dane*, 384 F. Supp. 1312, 1318 (S.D.N.Y. 1974) , where the court placed "a heavier burden of disclosure and fair dealing upon a corporation and its insiders" who were making a tender offer for their own stock.

(n184)Footnote 184. *Valente v. Pepsico, Inc.*, 454 F. Supp. 1228, 1243 (D. Del. 1978) . The court quoted the following statement from *Arber v. Essex Wire Corp.*, 490 F.2d 414, 420 (6th Cir.) , cert. denied, 419 U.S. 830, 95 S. Ct. 53, 42 L. Ed.2d 56 (1974) , a Rule 10b-5 case:

"We hold that an insider has no affirmative duty to direct a seller's attention to all routine data commonly found in the statements and books of the corporation, at least where the information is readily available; the outsider has knowledge that it is available and made no inquiry; and the information thus available is not of an unusual or extraordinary nature."

However, Item 9 of Schedule 14D-1 requires the bidder to reveal material financial data about itself. It is not likely that the materiality standard under Item 9 is dependent upon whether the financial data is on the public record.

But see *Fisher v. Plessey Co., Ltd.* 559 F. Supp. 442 ; C.C.H. Fed. Sec. L. Rep. P 99,129 (S.D.N.Y. 1983) (a foreign issuer making a tender offer for the convertible debentures of its wholly-owned United States subsidiary was not relieved of its disclosure duty to American debenture holders simply because its corporate earnings and activities were widely reported in the foreign press; in the absence of any substantial press coverage of the tender offeror's activities in the United States, it could not be presumed that the debenture holders reasonably should have known the information from sources other than the tender offer materials).

(n185)Footnote 185. *Flynn v. Bass Bros. Enter., Inc* C.C.H. Fed.Sec. L. Rep. P 96,611 (E.D. Pa. 1978).

(n186)Footnote 186. *Id.* at P 94,631.

(n187)Footnote 187. *Emhart Corp. v. USM Corp.*, 403 F. Supp. 660 (D. Mass.), later proceeding 1975-2 Trade Cas. (CCH) 60598, 527 F.2d 177 (1st Cir. 1977)..

(n188)Footnote 188. *Id.* at 663

(n189)Footnote 189. *Weeks Dredging & Contracting, Inc. v. Am. Dredging Co.*, 451 F. Supp. 468, 1978-1 Trade Cas. (CCH) P62010 (E.D. Pa. 1978) . In part, the court used the large difference between the stock's asset value of (\$150) and its previous market value (\$19-28) to justify its result.

(n190)Footnote 190. *Valente v. Pepsico, Inc.*, 454 F. Supp. 1228, 1240 (D. Del. 1978) .

"Furthermore, the wording of the tender materials is actually misleading to a reasonable shareholder. Taken alone, the statement that PepsiCo intended to merge Wilson into itself, at which time the remaining holders of common shares would receive \$17.50 per share, would lead a reasonable shareholder to infer wrongly that the only two alternatives open to him were to tender his shares for \$17.50 per share, or to receive the same amount at the time of the merger. In other words, the shareholder appeared to be faced with the choice of '\$17.50 now or \$17.50 later.' It was necessary to disclose the existence of a third alternative, the possibility of appraisal, in order to make the statements made in the tender materials not misleading.

The omitted alternative, an appraisal proceeding, is one which would be of importance to most reasonable shareholders. It is the only alternative which gave shareholders any chance to receive a price greater than the \$17.50 which PepsiCo offered. This alternative would be of considerable importance in the decision of any shareholder who believed, rightly or wrongly, that his shares were worth more than \$17.50. The Court finds that reasonable minds could not differ on the conclusion that, under the circumstances of this case, a reasonable shareholder would consider the appraisal alternative important in deciding whether or not to tender his shares." (footnotes omitted).

See also *Boyertown Burial v. Amedco, Inc.*, 407 F. Supp. 811 (E.D. Pa. 1976) which held that the bidder made insufficient reference to the appraisal rights of the target's shareholders.

(n191)Footnote 191. *Gulf & W. Indus, Inc. v. Great Atl. & Pac. Tea Co.*, 356 F. Supp. 1066, 1071 (S.D.N.Y.) , *aff'd* 476 F.2d 687 (2d Cir. 1973) , where the court noted that:

"It is true that the press release does not set forth the basis on which the management of A & P found that the tender offer price was "inadequate". Contrary to the G & W claim, however, I do not find that this constitutes a false and misleading statement or an omission to state a material fact so as to make the statement false and misleading within the meaning of the Securities Exchange Act of 1934. The term inadequate when used in connection with the price of a stock is a highly subjective one. The price of a stock in the general market is controlled not only by the price-earnings ratios and other such mathematical formulae, but by the intuition or hunch of the buyers and sellers of the stock. Once this element of pricing is exposed it follows necessarily that the adequacy or inadequacy of price is subjective.

In any event, the basis for the opinion of the claimed inadequacy of the tender offer price was spelled out by the management of A & P in its letter to shareholders of February 3, 1973, and released to the press on that day. Accordingly, I find no equity to support G & W's assertion that it is entitled to equitable relief on the basis of the A & P press release of February 2, 1973."

But see *Royal Indus., Inc. v. Monogram Indus., Inc.*, C.C.H. Fed. Sec. L. Rep. P 95,863 (C.D. Cal. 1976), holding

that management has a fiduciary duty to treat its shareholders fairly, and thus, violates Section 14(e) by calling an offer "inadequate" without a reasonable basis. In light of the Supreme Court's rejection of reading corporate law standards into securities law antifraud cases in *Santa Fe Indus., Inc. v. Green*, 430 U.S. 462 (1977) and its belief in not giving an advantage to either the management or the tender offeror, see *Piper v. Chris-Craft*, 430 U.S. 1, 29, 97 S. Ct. 926, 51 L. Ed.2d 124 (1977), it is not likely that a "fiduciary duty" standard of disclosure for the target company's management would now be accepted by the federal courts.

(n192)Footnote 192. *Emhart Corp. v. USM Corp.*, 403 F. Supp. 660. (Management stated that the offer of \$23 per share was "quite inadequate" and an attempt to gain control over USM at "bargain-basement prices." The court held that these statements were made materially misleading by USM's failure to state that several months before the offer they authorized their representatives to negotiate a friendly sale of USM stock at \$25 per share).

Berman v. Gerber Prod., Co., 454 F. Supp. 1310 (W.D. Mich. 1978) (holding that where the management attacked the offer on grounds other than the adequacy of its price, it had no obligation to disclose information that tended to confirm the adequacy of the offering price).

(n193)Footnote 193. For further information on this topic, see the discussion of Schedule 14D-1 in § 7A.03[2][a].

(n194)Footnote 194. *Elec. Specialty Co. v. Int'l Controls Corp.*, 409 F.2d 937, 948 (2d Cir. 1969).

(n195)Footnote 195. *Id.*; *Sunshine Mining Corp. v. Great W. United Corp.*, C.C.H. Fed. Sec. L. Rep. P 96,049 (D. Idaho 1977).

(n196)Footnote 196. These are the two items that come up most frequently in litigation and generally are of the greatest concern to the shareholder. Of course, other plans may be material under Section 14(e) and Schedule 14D-1 requires the disclosure of just about all types of plans.

See *Greenfield v. Heublein, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,642 (3d Cir. 1984), where the Court of Appeals for the Third Circuit held that there was no duty to disclose a preliminary merger agreement since price and structure had not been established and there was no evidence of a mature understanding between negotiating corporations.

See also *Starkman v. Marathon Oil Co.*, C.C.H. Fed. Sec. L. Rep. P 92,290 (6th Cir. 1985) (preliminary merger discussions need not be disclosed; the duty to disclose arises only after an agreement in principle regarding fundamental terms like price and structure has been reached).

(n197)Footnote 197. See *Susquehanna Corp. v. Pan Am. Sulphur Co.*, 423 F.2d 1075, (5th Cir. 1970) (holding that Susquehanna did not violate Section 14(e) by denying the existence of any merger plans or proposals).

(n198)Footnote 198. See *Otis Elevator Co. v. United Tech. Corp.*, 405 F. Supp. 960 (S.D.N.Y. 1975).

(n199)Footnote 199. See *Berman v. Gerber Co., Inc.*, 454 F. Supp. 1310, 1323 (W.D. Mich. 1978), where the court held that:

"The absence of full disclosure pertaining to Anderson, Clayton's management practices would have made it difficult, if not impossible, for Gerber shareholders to reach an informed decision on the proposed tender offer. In its filings and proposed offer, Anderson, Clayton avoided setting forth the facts of the operation in a simple, straight-forward manner. Rather, it sought to camouflage the specific transactions by the continued use of euphemisms, generalizations, and vague, self-serving language that did not enlighten the shareholder about the true nature, scope, and effect of the transactions and of management's involvement therein. Indeed, even the use of the term 'sensitive payment' was deceptive. It was of utmost importance for the Gerber stockholders to be cognizant of the identities of the Anderson, Clayton officials who took part in the foreign payments scheme so that a complete understanding of the

management's integrity could be possible."

(n200)Footnote 200. See *Gulf & W. Indus., Inc. v. Great Atl. & Pac. Tea Co.*, 356 F. Supp. 1066 (S.D.N.Y.) , *aff'd* 476 F. 2d 687 (2d Cir. 1973) ; *Elco Corp. v. Microdot, Inc.*, 360 F. Supp. 741 (D. Del. 1973) . But see *Copperweld Corp. v. Imetal*, 403 F. Supp. 579 (W.D. Pa. 1975) , where the court did not enjoin the offer despite the possibility of an antitrust violation.

(n201)Footnote 201. *Mo. Portland Cement Co. v. Cargill*, 375 F. Supp. 249, 268 (S.D.N.Y. 1973) , where the court stated that:

"Cargill's failure to disclose the possibility of antitrust violations is claimed by Missouri Portland to be a material omission in its Offer to Purchase. The fact that this Court has issued a preliminary injunction against Cargill on the basis of the antitrust issues presented does not mean that we must automatically conclude that Cargill omitted a material fact because it did not state that there was a likelihood of antitrust violations. To hold such would be to impose a hindsight standard that whenever a court concludes that an acquisition violates the antitrust laws, the acquiring company should have included a statement as to the likelihood of antitrust violations in its tender offer statement.

* * * * *

Here, however, it would not have been unreasonable for Cargill's management to have concluded after appropriate inquiry that no substantial antitrust obstacles stood in the way of its acquisition. Therefore, under the circumstances before us, the possibility that the acquisition would result in antitrust violations, a possibility that exists with every merger, need not have been disclosed to Missouri Portland's shareholders."

(n202)Footnote 202. *Missouri Portland Cement Co. v. Cargill, Inc.*, 498 F.2d 851 (2d Cir. 1973) .

(n203)Footnote 203. Section 10(b) provides in relevant part that it is unlawful for any person to use "any manipulative or deceptive device or contrivance" in contravention of Commission rules in connection with the purchase or sale of any security.

(n204)Footnote 204. *Santa Fe Indus., Inc. v. Green*, 430 U.S. 462, 97 S. Ct. 1292, 51 L. Ed.2d 480 (1977) . See *supra* § 5.04 for a further discussion of this case.

(n205)Footnote 205. The Court reached this conclusion by restricting the meaning of the word "manipulative," as follows:

"Manipulation is 'virtually a term of art when used in connection with securities markets.' *Ernst & Ernst*, 425 U.S. at 199, 96 S. Ct., at 1384 . The term refers generally to practices, such as wash sales, matched orders, or rigged prices, that are intended to mislead investors by artificially affecting market activity... No doubt Congress meant to prohibit the full range of ingenious devices that might be used to manipulate securities prices. But we do not think it would have chosen this term of art if it had meant to bring within the scope of Section 10(b) instances of corporate mismanagement such as this, in which the essence of the complaint is that shareholders were treated unfairly by a fiduciary."

Id. at 476-77, 97 S. Ct. at 1302, 51 L. Ed.2d at 493-94.

See also *Feldbaum v. Avon Prod., Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,637 (8th Cir. 1984), where the court held that since there were no allegations of deception in the granting of a lockout option or in the disclosure of the option to shareholders, there was no manipulative device in violation of Section 14(e).

See also *Schreiber v. Burlington N., Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,407 (3d Cir. 1984), where the Court of Appeals for the Third Circuit held that since the Williams Act prohibition against manipulative acts requires some form of deception, such as the omission or misstatement of material facts, the alleged harm suffered as a result of the withdrawal of a tender offer did not violate Section 14(e) since the bidder fully disclosed to the shareholders and general public the acts that allegedly constituted a breach of contract. The failure of a tender offeror that controlled the target company to await the market's reaction to a favorable fourth quarter report of the target company before announcing the tender offer was not a manipulative or deceptive device in violation of Section 14(e). *Billard v. Rockwell Int'l Corp.*, 526 F. Supp. 218, C.C.H. Fed. Sec. L. Rep. P 98,733 (2d Cir. 1982). But see *Atchley v. Qonaar Corp.*, 704 F.2d 355, C.C.H. Fed. Sec. L. Rep. P 99,155 (7th Cir. 1983) (allegation that tender offeror's failure to disclose a scheme to depress the target company's earnings and thereby acquire the target's stock at a reduced price stated a claim under Section 14(e) since the omissions were material to a reasonable person's decision to tender his stock pursuant to the offer (the plaintiffs' complaint was not based solely on a breach of fiduciary duties or corporate mismanagement)).

See *Mobil Corp. v. Marathon Oil Co.*, C.C.H. Fed. Sec. L. Rep. P 98,399 (6th Cir. 1981), where the court defined "manipulation" to mean "an affecting of the market for, or price of, securities by *artificial* means, *i.e.*, means unrelated to the natural forces of supply or demand." *Id.* at p. 92,400. The court held that a "lock-up" option in which a target company granted a white knight an option to purchase a unique and significant asset *i.e.*, an interest in an oil and mineral field referred to by the target as its "crown jewel", which could be exercised only if the white knight did not succeed and a third party gained control of the target company, was a violation of Section 14(e) since the stock option was large enough to serve as an artificial and significant deterrent to competitive bidding for the target company and the bid by the white knight therefore amounted to an artificial ceiling on the value the target company's shareholders could receive for their shares. *Id.* at 92,402-05.

But see *Biechele v. Cedar Point, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,829 (6th Cir. 1984), where the Court of Appeals for the Sixth Circuit distinguished its holding in *Mobil* and held that an "add-on" agreement between a tender offeror and a third party that required the tender offeror to make certain payments to the third party if its offering price exceeded a given figure was not a "manipulative device," since:

- (1) there was no "auction for control" of the target as there was in *Mobil*;
- (2) there was only one bidder, and so the agreement did not have the effect of discouraging any other prospective bidder from entering the market;
- (3) the bidder was not seeking control of the target, its offer being for only 15% of the target's shares; and
- (4) the agreement did not affect the price a third person might be willing to offer for the remaining target stock.

The court also declined to find a "standstill agreement" between the tender offeror and the target to be a manipulative device since:

- (1) the agreement provided no fixed price for future purchases of target stock by the offeror;
- (2) the agreement granted no options to the offeror to purchase target assets or stock;

(3) there were no competing bidders; and

(4) the terms of the agreement would not discourage third party competitive bidders.

See also Radol v. Thomas, C.C.H. Fed. Sec. L. Rep. P 92,289 (6th Cir. 1985), where the court declined to find that a two-tier price structure of a tender offer that was to be followed by a proposed merger, with a disparity in consideration offered to encourage shareholders to tender their shares at the first stage of the transaction, was a manipulative device in connection with the tender offer in the absence of any allegation by the plaintiff of misrepresentation or nondisclosure.

See Unocal Corp. v. Mesa Petroleum Co., 493 A.2d 946, C.C.H. Fed. Sec. L. Rep. P 92,077 (Del. Sup. Ct. 1985) , where in an action brought under Delaware law, the Delaware Supreme Court held that a target company's selective counter offer to purchase its own shares, made for the purpose of defeating a hostile tender offer, which excluded shares held by the hostile tender offeror, was a valid exercise of sound business judgment by the target's board of directors, since the counter offer was made in good faith and after reasonable investigation, which led the directors to conclude that the tender offer was both inadequate and coercive.

See also Data Probe Acquisition Corp. v. Datatab, Inc., 721 F.2d 1 , C.C.H. Fed. Sec. L. Rep. P 99,569 (2d Cir. 1983), where the court held that a "lock-out" option granted by a target company to a bidder while a rival bidder was still active was not a manipulative device in violation of Section 14(e). Absent misrepresentation, an alleged breach of management's fiduciary duty by depriving shareholders of a favorable financial opportunity during a tender offer is not a manipulative act in violation of Section 14(e).

See also Martin Marietta Corp. v. Bendix Corp., 549 F. Supp. 623, C.C.H. Fed. Sec. L. Rep. P 99,191 (D. Md. 1982) , where the court held that a target company's "scorched earth" and "pac-man" counter tender offer designed to inhibit the original tender offeror was not manipulative in violation of Section 14(e) absent misrepresentations or nondisclosures made in connection with the counter offer although the counter offer divested the original tender offeror of any financial benefits from its offer and aborted its attempt to translate a completed tender offer into a successful takeover; the court emphasized that Section 14(e) is solely concerned with disclosure.

See also Whittaker Corp. v. Edgar, 1982-1 Trade Cas. (CCH) 64608, 535 F. Supp. 933 , C.C.H. Fed. Sec. L. Rep. P 98,483 (N.D. Ill.), *aff'd*, 14 B.N.A. Sec. Reg. & L. Rep. 794 (7th Cir. 1982) (target company's sale of a substantial asset, i.e., a subsidiary that accounted for one-third of the target's after-tax earnings, which would cause a hostile tender offeror to withdraw its tender offer, was not a manipulative act in violation of Section 14(e) since the sale did not create an artificial price ceiling the tender offer market for the target's shares).

(n206)Footnote 206. *Altman v. Knight*, 431 F. Supp. 309 (S.D.N.Y. 1977) . *Cf. Vernon J. Rockler & Co. v. Minneapolis Shareholders Co.*, 425 F. Supp. 145 (D. Minn. 1977) .

(n207)Footnote 207. *Cf. Nw. Indus., Inc. v. B.F. Goodrich Co.*, 301 F. Supp. 706 (N.D. Ill. 1969) (holding that a target corporation issuing a substantial block of stock for a proper corporate purpose does not violate Section 14(e) even if the effect is to thwart the tender offer.

See Royal Indus., Inc. v. Monogram Industries, Inc., C.C.H. Fed. Sec. L. Rep. P 95,863 (C.D. Cal. 1976), where the court, prior to the ruling in *Santa Fe*, held that a target company violates Section 14(e) by making an acquisition for the primary purpose of defeating a tender offer. *See also Applied Digital Data Systems, Inc. v. Milgo Elec. Corp.*, 425 F. Supp. 1145 (S.D.N.Y. 1977) .

(n208)Footnote 208. *Berman v. Gerber Prod. Co.*, 454 F. Supp. 1310, 1318 (W.D. Mich. 1978) . *See also A & K R.R. Materials, Inc. v. Green Bay & W.R. Co.* 437 F. Supp. 636 (E.D. Wis. 1977) (holding that it is not manipulative or

deceptive for the target company to refuse to allow the bidder to inspect its shareholder list).

(n209)Footnote 209. The rule provides for 60 days for tender offers involving a roll-up as defined in Item 901(c) of Regulation S-K and if the offered securities are registered on Form S-4 or Form F-4.

(n210)Footnote 210. A bidder electing to offer a subsequent offering period under Rule 14d-11 may, however, pay for securities during the subsequent offering period in accordance with that Rule.

(n211)Footnote 211. See *Raybestos-Manhattan, Inc. v. Hi-Shear Indus., Inc.*, 503 F. Supp. 1122, C.C.H. Fed. Sec. L. Rep. P 97,806 (E.D.N.Y. 1980), where the defendant was held not to have violated Rule 14e-1 when the offer had been open for less than twenty business days due to injunctive orders requested by the plaintiff rather than because of conditions placed on the offer by the defendant.

(n212)Footnote 212. See *Data Probe Acquisition Corp. v. Datatab, Inc.*, 722 F. 2d 1, C.C.H. Fed. Sec. L. Rep. P 99,569 (2d Cir. 1983), where the court held that disclosure of objective, non-misleading factual material in a letter sent by target company management to shareholders regarding rejection of a tender offer fulfilled Rule 14e-2 requirements. Failure to state that management favored an alternative offer on the basis of employment guarantees were not misleading since the employment guarantees had been disclosed through reference to the merger agreement.

Rule 14d-9 governs the sending of this recommendation. See *supra* § 7A.03[2][b].

See also *Newell Co. v. Vt. Am. Corp.*, C.C.H. Fed. Sec. L. Rep. P 94,870 (N.D. Ill. 1989), where the federal district court had pendent jurisdiction of certain state law claims alleging breach of fiduciary duty by a board of directors that had taken several steps to defend against an anticipated tender offer. Various Williams Act claims were also made in the case including a claim of an alleged violation of Rule 14e-2. The court found that the board of directors, with reasonable grounds to anticipate a takeover of the target, had justifiably undertaken various defensive tactics including (1) a stock repurchase program, (2) the structuring of a "friendly" merger, and (3) the amendment of the target's shareholder rights plan.

See also *Endervelt v. Nostalgia Network, Inc.*, C.C.H. Fed. Sec. L. Rep. P 96,249 (Del. Chan. Ct. 1991) (acceptance by board chairman and another director of an offer to buy their stock addressed exclusively to executive officers and directors did not breach their fiduciary duty to shareholders, nor did the offer raise a *Revlon* auction duty).

See *Wheelabrator Tech. Inc. Shareholder Litig.*, C.C.H. Fed. Sec. L. Rep. P 95,489 (Del. Chan. Ct. 1990). (nothing that shareholder ratification of a merger would be a complete defense to a charge that the directors who approved the merger failed to discharge their *Revlon* duty to obtain the best possible transaction).

(n213)Footnote 213. Exchange Act Release No. 17120, C.C.H. Fed. Sec. L. Rep. P 82,646 (1980).

Rule 14e-3 is prospective only and should not be given retroactive effect. See *Moss v. Morgan Stanley, Inc.*, 553 F. Supp. 1347, C.C.H. Fed. Sec. L. Rep. P 99,045 (S.D.N.Y. 1983).

See *Litton Indus., Inc. v. Lehman Bros. Kuhn Loeb Inc.*, C.C.H. Fed. Sec. L. Rep. P 94,345 (S.D.N.Y. 1989) (tender offeror lacks a right of action under Rule 14e-3).

A Study of the Office of the Chief Economist on Pre-bid Activity, 19 B.N.A. Sec. Reg. & L. Rep. 371 (1987), after analyzing a study of 172 successful tender offers between 1981 and 1985, concluded that pre-bid activity is not necessarily an accurate indicator of insider trading. The study points to three factors--media speculation, a bidder's foothold in the target company, and whether the bid is friendly or hostile--as influencing pre-bid activity. However, the study does concede the need for further research on the sources of information about prospective takeovers to determine the ultimate source of pre-takeover bid trading in target stocks. It is important to note that the study reflects only the

views of the Office of the Chief Economist. The Commission has expressed no opinion about the study.

(n214)Footnote 214. Rule 14e-3, applies only in the context of tender offers, but the Commission suggest that persons subject to the provisions of Rule 14e-3, particularly broker-dealers, in following "good business judgment and industry standards," should perform acts and implement procedures beyond the minimum standards required by the Rule. *id.*

See also *U. S. v. Chestman*, 903 F.2d 75 , C.C.H. Fed. Sec. L. Rep. No. 95,214 (2.d Cir. 1990), where the Court of Appeals for the Second Circuit casted doubt on the validity of Rule 14e-3 to the extent that the rule effected an implied repeal of the fiduciary duty requirement in the area of tender offer fraud. In *Chestman* the Court of Appeals for the Second Circuit said that a plain reading of Rule 14e-3 could lead to the conclusion that a defendant in violation of Rule 14e-3 could be guilty of a crime even if fraud, deception or manipulation could not be separately proven. Further, the court said that such an interpretation of the rule would render the rule invalid as an improper exercise of the authority granted to the Commission by Congress. Various Supreme Court precedents, e.g. the *Dirks*, *Ernst & Ernst* and *Chiarella*, according to the court, establish that fraud, as a general matter, requires proof of scienter.

In a subsequent rehearing *en banc*, the Court of Appeals for the Second Circuit upheld Rule 14e-3(a), affirming the conviction of a person who traded the target company's securities in a pending tender offer on the basis of material inside information. The court reasoned that even though the rule does not require breach of a fiduciary duty, it does not affect its validity in view of the broad congressional grant of authority to the Commission to regulate behavior in connection with tender offers. However, *Rule 10b-5* convictions were reversed for lack of breach of a fiduciary duty or its functional equivalent. *United States v. Chestman*, C.C.H. Fed. Sec. L. Rep. P 96,259 (2d Cir. 1991).

(n215)Footnote 215. *U. S. v. Chestman*, C.C.H. Fed. Sec. L. Rep. P 96,259 (2d Cir. 1991).

The Commission adopted Rule 14e-3, in part, because the Supreme Court, in *Chiarella v. U.S.*, 445 U.S. 222, 100 S. Ct. 1108, 63 L. Ed.2d 348 , C.C.H. Fed. Sec. L. Rep. P 97,309 (1980), discussed in § 5.04 *supra*, did not decide whether trading while in possession of material nonpublic information that had been misappropriated or obtained or used by unlawful means is violative of Section 10(b) and *Rule 10b-5*. While the Commission believes that this trading may violate *Rule 10b-5*, no inference should be drawn from the adoption of Rule 14e-3 as to the applicability of Section 10(b) and *Rule 10b-5* to this type of trading. Tender Offers Exchange Act Release No. 17120, 20 SEC Docket 1241 (Sept. 4, 1980).

(n216)Footnote 216. The Commission believes that a substantial step or steps to commence a tender offer occurs upon:

- (1) the voting on a resolution by the offering person's board of directors concerning the tender offer;
- (2) the formulation by the offering person, or the person or persons acting on behalf of the offering person, of a plan or proposal to make a tender offer; or
- (3) the occurrence of those activities that substantially facilitate the tender offer, *e.g.*, arranging financing, preparing or directing tender offer materials, or authorizing negotiations, negotiating or entering into agreements with any person to act as a dealer manager, soliciting dealer, forwarding agent or depository in connection with the tender offer. Release No. 34-17120, 20 SEC Docket 1241 (Sept. 4, 1980).

See *SEC v. Gaspar*, C.C.H. Fed. Sec. L. Rep. P 92,004 (S.D.N.Y. 1985), where the court held that Section 14(e) was applicable to disclosures of non-public information concerning negotiations to take over an oil company even though the negotiations did not proceed to an actual tender offer, if any person has taken a "substantial step" toward making a

tender offer. The court observed that the negotiation stage of a tender offer, prior to the time that a public announcement is made, "is precisely the period of time when insider trading problems arise in the tender offer context...."

See also SEC v. Musella, C.C.H. Fed. Sec. L. Rep. P 99,637 (S.D.N.Y. 1984) (the Commission established a prima facie case under Section 14(e) and Rule 14e-3 where there was trading on the basis of material, nonpublic, misappropriated information by tippees who knew or should have known that the information was improperly obtained and substantial steps had been taken towards commencing tender offers).

See Etshokin v. Texasgulf, Inc., 612 F. Supp. 1220, C.C.H. Fed. Sec. L. Rep. P 92,474 (N.D. Ill. 1985) , where the court held that a party to tender offer negotiations was not obliged under Rule 14e-3 to disclose insider information it possessed with respect to the value of certain assets of the target if the information was not material and would not affect the price of the target's stock.

(n217)Footnote 217. The term "acquired" includes information received as well as information obtained by conversion, misappropriation, and other means.

Rule 14e-3(a) applies prior to the commencement of a tender offer as well as after an offer has commenced. Tender Offers, Exchange Act Release No. 17120, 20 SEC Docket 1241 (Sept. 4, 1980).

(n218)Footnote 218. Under the rule, trading is proscribed only in those securities whose market value has a relationship to the security sought or to be sought in the tender offer. *Id.* note 39.

(n219)Footnote 219. This "disclose or abstain" rule is similar to the approach taken in *SEC v. Tex. Gulf Sulphur Co.*, 401 F.2d 833 (2d Cir. 1968), *cert. denied*, 394 U.S. 976, 89 S. Ct. 1454, 22 L. Ed. 2d 756 (1969), and in the Commission's administrative decision in *Cady, Roberts & Co.*, 40 S.E.C. 907 (1961) , and was cited with approval by the Supreme Court in *Chiarella*, 445 U.S. at 226-30, C.C.H. Fed. Sec. L. Rep. at P 97,099-100. Exchange Act Release No. 17120, C.C.H. Fed. Sec. L. Rep. P 82,646 (1980).

(n220)Footnote 220. Tender Offers, Exchange Act Release No. 17120, 20 SEC Docket 1241 (Sept. 4, 1980).

The Commission does not believe that disclosure prior to trading would justify a breach of a contractual or fiduciary relationship with the offering person or issuer. If either type of relationship exists there may be no other alternative other than abstention from trading that will be both lawful and not in breach of the relationships. Tender Offers, Exchange Act Release No. 17120, 20 SEC Docket 1241 (Sept. 4, 1980).

Disclosure must be made in manner that will fully disseminate the information, including disclosure to a national securities exchange on which the class of securities sought in the tender offer is listed; to the NASD, if the security is authorized for trading in the NASDAQ interdealer quotation system; and to a daily newspaper with a national circulation or a national news service. *Id.*

(n221)Footnote 221. *Id.*

(n222)Footnote 222. This situation may arise, for example, where one department of a multi-service financial institution received material nonpublic information relating to a tender offer while an independent department of the same financial institution made the decision to purchase or sell without knowledge of that information. *Id.*

(n223)Footnote 223. The policies and procedures that are implemented must be reasonable under the facts and circumstances of the institution and that institution's type of business. Tender Offers, Exchange Act Release No. 17120, 20 SEC Docket 1241 (Sept. 4, 1980).

(n224)Footnote 224. *Id.*

After the financial institution had met the initial burden, a person attempting to establish the nonavailability of the exception may attempt to show circumstances under which it would not be reasonable to assume that the individual decisionmaker did not know the information. *Gulf & W. Indus., Inc. v. Great Atl. & Pac. Tea Co.*, 476 F.2d 687 (2d Cir. 1973) .

(n225)Footnote 225. Whether a violation of Rule 14e-3 was "reasonably foreseeable" depends upon such factors as the identity, position, reputation or prior actions of the participants; however, the Rule is not intended to affect casual and innocently motivated social discourse. *Id.*

(n226)Footnote 226. The rule reaches "intermediate tippees" regardless of whether they trade on the information. *Id.*

(n227)Footnote 227. *Id.*

(n228)Footnote 228. See, e.g., *Whittaker Corp. v. Edgar*, 535 F. Supp. 933, C.C.H. Fed. Sec. L. Rep. P 98,483 (N.D. Ill.), *aff'd*, 14 B.N.A. Sec. Reg. & L. Rep. 794 (7th Cir. 1982) (tender offeror has a private cause of action for injunctive relief under Section 14(e) regarding the target company's disposition of its subsidiary).

(n229)Footnote 229. *Elec. Specialty Corp. v. Int'l Controls Corp.*, 409 F.2d 937, 947 (2d Cir. 1969) .

(n230)Footnote 230. *Mo. Portland Cement Co. v. H.K. Porter Co.* 535 F.2d 388 (8th Cir. 1976) ; *Blanchette v. Providence & Worcester Co.*, 428 F. Supp. 347 (D. Del. 1977) .

See also *Union Commerce Corp. v. Huntington Bancshares, Inc.*, 556 F. Supp. 374, C.C.H. Fed. Sec. L. Rep. P 99,213 (N.D. Ohio 1982) (target company was not entitled to a preliminary injunction against a tender offeror since target was unlikely to prevail on the merits on its claim that Section 14(e) was violated by the tender offer's prorating provisions, when the tender offer complied with the requirements of Section 14(d)(6) by prorating the purchase of shares tendered during the first ten days of the tender offer, but allowed the tender offeror to purchase subsequently tendered shares on a first-come, first-served basis).

(n231)Footnote 231. See, e.g., *Energy Ventures, Inc. v. Appalachian Co.*, 587 F. Supp. 734, C.C.H. Fed. Sec. L. Rep. P 91,556 (D. Del. 1984) , where the court held that irreparable harm had not been shown to justify injunctive relief. See also *Southdown, Inc. v. Moore McCormack Resources, Inc.*, C.C.H. Fed. Sec. L. Rep. P 93,792 (S.D. Tex. 1988) (preliminary injunction granted with respect to a target company's poison pill and proposed recapitalization which, in the view of the court, were being used to insure the incumbency of management).

(n232)Footnote 232. *Rondeau v. Mosinee Paper Co.*, 422 U.S. 49, 95 S. Ct. 2069, 45 L. Ed.2d 12 (1975) . See § 7A.02[3][b][ii] for a more detailed discussion of this case. Prior to the Court's holding in *Rondeau*, the Court of Appeals for the Second Circuit adopted an alternative to the irreparable harm requirement:

"The settled rule is that a preliminary injunction should issue only upon a clear showing of either (1) probable success on the merits *and* possible irreparable injury, *or* (2) sufficiently serious questions going to the merits to make them a fair ground for litigation *and* a balance of hardships tipping decidedly toward the party requesting the preliminary relief."

Sonesta Int'l Hotels Corp. v. Wellington Ass., 483 F.2d 247, 250 (2d Cir. 1973) .

(n233)Footnote 233. See *Florida Commercial Banks v. Culverhouse*, C.C.H. Fed. Sec. L. Rep. P 92,321 (11th Cir. 1985), where the court held that a target company has a private right of action under the Williams Act against a bidder to seek corrective disclosure of the bidder's misstatements on Schedules 13D and Schedule TO distributed to the target's

shareholders. In deciding whether to grant the target company a private cause of action against the bidder, the court balanced the likelihood that shareholders would benefit from the availability of the cause of action to the target against the likelihood that shareholders would be harmed by the misuse of the cause of action by management, and concluded that where the remedy sought was corrective disclosure, there was no chance that shareholders would be harmed by the remedy.

See also *Weeks Dredging & Contracting, Inc. v. Am. Dredging Co.*, 451 F. Supp. 468, 1978-1 Trade Cas. (CCH) P 62010 (E.D. Pa. 1978); *Blanchette v. Providence & Worcester Co.*, 428 F. Supp. 347 (D. Del. 1977) .

(n234)Footnote 234. See *Gearhart Indus., Inc. v. Smith Int'l., Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,667 (5th Cir. 1984), where the court held that the proper remedy for a bidder who violated Section 14(e) by stating in his tender offer materials that he had "meritorious defenses" to a patent suit when in fact he had already admitted patent infringement and only damages remained in contention, was injunctive relief until proper disclosure was made.

See *Schmidt v. Enertec Corp.*, 598 F. Supp. 1528, C.C.H. Fed. Sec. L. Rep. P 91,884 (S.D.N.Y. 1984) , where the court refused to enjoin an offer to exchange debentures for preferred stock, since plaintiff-debentureholders failed to show there was no adequate remedy at law for the alleged injury that would result from continuation of the exchange offer without additional disclosure by the defendants. Declining to adopt a "per se rule," the court required a specific showing of irreparable harm since proof of material omissions or misstatements, standing alone, does not satisfy a plaintiff's burden of proving irrevocable injury.

(CCH) P 75025-75; (2d Cir. 1973) ; *Weeks Dredging & Contracting, Inc. v. Am. Dredging Co.*, 451 F. Supp. 468, 1978-1 Trade Cas. (CCH) P 62010 (E.D. Pa. 1978); *Broder v. Dane*, 384 F. Supp. 1312 (S.D.N.Y. 1974) .

See also *Irving Bank Co. v. Bank of New York Co., Inc.*, C.C.H. Fed. Sec. L. Rep. P 93,786 (S.D.N.Y. 1988) (preliminary injunctive relief appropriate in action by target company to compel additional disclosures by offeror).

See also *American Carriers, Inc. v. Baytree Investors, Inc.*, C.C.H. Fed. Sec. L. Rep. P 94,154 (D. Kan. 1988) (tender offeror enjoined from announcing any tender offers unless prior to such announcement offeror corrects past failure to disclose).

(n235)Footnote 235. See *SEC v. Tex. Int'l Co.*, 498 F. Supp. 1231 , C.C.H. Fed. Sec. L. Rep. P 97,883 (N.D. Ill. 1980) (the defendant's failure to file tender offer materials with the Commission, although violating Section 14(d), did not require the defendant to make a full rescission offer to the target company's former shareholders; noncompliance with the filing and reporting requirements of Section 14(d) does not necessarily result in injury or prejudice to investors when the tender offer materials do not contain any fraudulent misrepresentations or omissions).

See also *Corenco Corp. v. Schiavone & Sons, Inc.*, 488 F.2d 207 (2d Cir. 1973) ; *Broder v. Dane*, 384 F. Supp. 1312 (S.D.N.Y. 1974) ; *Cauble v. White*, 360 F. Supp. 1021 (E.D. La. 1963) .

See *Butler Aviation Int'l, Inc., v. Comprehensive Designers, Inc.*, 425 F.2d 842 (2d Cir. 1970) , where Judge Friendly, after admonishing the district court for not examining whether it could have better protected the rights of the target company's shareholders by allowing them to withdraw their shares, rather than by issuing a preliminary injunction against the exchange offer, reluctantly affirmed its decision because the time remaining on the offer was too short to permit the withdrawal procedure. The court stated that the offeror was free to renew the offer upon proper disclosure.

See *Blanchette v. Providence & Worcester Co.*, 428 F. Supp. 347 (D. Del. 1977) , where the court enjoined an exchange offer because of misleading statements by the offeror where 53% of the target company's stock had already

been acquired. The court did not explain why it did not use the less drastic withdrawal remedy.

(n236)Footnote 236. *Gulf & W. Indus., Inc. v. Great Atl. & Pac. Tea Co., Inc.*, 476 F.2d 687 (2d Cir. 1973) (antitrust violation); *Pargas, Inc. v. Empire Gas Corp.*, 423 F. Supp. 199 (D. Md.) , *aff'd*, 546 F.2d 25 (4th Cir. 1976) (antitrust violation); *Boyertown Burial Casket Co. v. Amedco Co.*, 407 F. Supp. 811 (E.D. Pa. 1976) (antitrust violation); *General Host Co. v. Triumph Am., Inc.*, 359 F. Supp. 749 (S.D.N.Y. 1973) (possible violations of the Shipping Act, the Communications Act, and margin requirements of the Exchange Act.)

(n237)Footnote 237. See *Weeks Dredging & Contracting, Inc., v. Am. Dredging Co.*, 451 F. Supp. 468, 1978-1 Trade Cas. (CCH) P 62010 (E.D. Pa. 1978), where the court ordered the target company to transmit to all its shareholders an explanation of certain statements so as to make them not misleading. In *Emhart Corp. v. USM Corp.*, 403 F. Supp. 660 (D. Mass.) , *later proceeding* 527 F.2d 177 (1st Cir. 1975) , the court found that the target company made misleading statements, but ordered no relief, because the offer had already been enjoined on other grounds. Under such circumstances it was meaningless for the court to order that the misleading statements be corrected.

(n238)Footnote 238. *Boyertown Burial Casket Co. v. Amedco, Inc.*, 407 F. Supp. 811, 813 (E.D. Pa. 1976) , where the court stated that:

"Finally, we turn to the issue of irreparable harm. In this case, we are faced with a proposed acquisition of a company which will have far-ranging consequences should immediate relief not be granted. Briefly spoken, the weight of the evidence establishes irreparable harm in the use of executive time spent in resisting the offer, the effect upon salesmen's performance in the market, the lack of customer confidence in Boyertown's future, the obvious effect upon employee morale and like considerations."

(n239)Footnote 239. *Mo. Portland Cement Co. v. Cargill, Inc.* 498 F.2d 851, 869 (2d Cir.) , *cert. denied*, 419 U.S. 883 (1974) , where the court stated that:

"The argument about disruption of the morale of personnel, which has become standard in take-over cases, has a peculiarly hollow ring in this one. A principal motive for Cargill's desire to enter the cement industry by acquiring an established company was its own lack of know-how and the difficulty of obtaining qualified people; there has been no hurling of pejorative epithets about MP's management and expression of the desire to move in another 'team' such as were present with respect to A & P; see 476 F.2d at 696-697 . Furthermore MP's executives had taken extraordinary precautions to protect themselves. Within a few hours after learning of Cargill's impending offer, the chairman of MP had his board approve a seven-year employment contract at \$118,000 a year; earlier in December the Chairman had signed contracts, similar except for amount, with all the other officers." (footnotes omitted).

See also *Murray Ohio Manufacturing Co. v. AB Electrolux*, C.C.H. Fed. Sec. L. Rep. P 93,776 (M.D. Tenn. 1988) (possible plant closing in Tennessee and shift of production overseas would not support preliminary injunction request).

(n242)Footnote 242. See *SEC v. Coven*, 581 F.2d 1020 (2d Cir. 1978) ; *SEC v. Am. Realty Trust*, 586 F.2d 1001 (4th Cir. 1978) ; *SEC v. Savoy Indus., Inc.*, C.C.H. Fed. Sec. L. Rep. P 96,497 (D.D.C. 1978); *SEC v. World Radio Mission*, 544 F.2d 535, 541 n. 10 (1st Cir. 1976) ; *SEC v. Southwest Coal and Energy Co.*, 439 F. Supp. 820 (W.D. La. 1977) .

(n243)Footnote 243. *See, however, SEC v. Tex. Int'l Co.*, 498 F. Supp. 1231, C.C.H. Fed. Sec. L. Rep. P 97,883 (N.D. Ill. 1980), where the court held that Section 14(e) requires the same standard of scienter as applied in Commission injunction actions brought under Section 10(b) *See infra* § 9.03.

But see Caleb & Co. v. E.I. Du Pont de Nemours & Co., 599 F. Supp. 1468, C.C.H. Fed. Sec. L. Rep. P 91,896 (S.D.N.Y. 1984), where the court distinguished between actions brought under Section 14(e) (where proof of scienter is required) and actions under Rule 14e-1(c), and held that proof of scienter was not required to plead a Rule 14e-1(c) violation for failure to meet the obligation of prompt payment. The court stated that the relationship between Section 14(e) and Rule 14e-1(c) (promulgated under Section 14(e)) is not the same as the relationship between Section 10(b) and Rule 10b-5. In the latter case, the Commission, in adopting Rule 10b-5, prohibited fraudulent activity generally, leaving the courts to define what specific practices came within the rule. By contrast, in drafting rules under Section 14(e), the Commission created specific rules and regulations designed to prevent fraud. Therefore Rule 14e-1(c) is an absolute prohibition of certain fraudulent practices, whether scienter was present or not.

"Congress adopted in Section 14(e) the substantive language of the second paragraph of Rule 10b-5 and in so doing accepted the precedential baggage those words have carried over the years."

The court held that under Section 14(e) "some culpability beyond mere negligence is required." *Id.* at 606.

(n248)Footnote 248. *A & K R.R. Materials v. Green Bay & W.R. Co.*, 437 F. Supp. 636, 642 (E.D. Wis. 1977).

(n249)Footnote 249. *See Plaine v. McCabe*, C.C.H. Fed. Sec. L. Rep. P 92,749 (9th Cir. 1986), where the court held that a determination by the California Corporation Commissioner that a tender offer price was in the range of fairness did not preclude recovery of damages by a non-tendering shareholder, since the shareholder may prove injury other than failure to receive a fair price in her Section 14(e) fraud claim, and the measure of damages in a federal action may be different from a damage determination under state law.

See Horowitz v. Pownall, 582 F. Supp. 665, C.C.H. Fed. Sec. L. Rep. P 91,445 (D. Md. 1984), where the court held that a nontendering shareholder filing an action against an opponent of the tender offer must show she was injured as a result of retaining the stock instead of selling it at the premium offered by the tender offeror. The court pointed out that unless the defendant could show that a rise in the stock price was due to its actions, thereby offsetting plaintiff's loss of the tender offeror's premium, the plaintiff could show injury. However, in this case, the price of the stock did not rise to the level of the tender offeror's highest offer until six months after the deal was consummated. Therefore, the nontendering shareholder had a private cause of action under Section 14(e) against the defendant for its failure to

disclose material facts in the Schedule 14D-9 filed in opposition to the tender offer.

(n250)Footnote 250. 430 U.S. 1, 97 S. Ct. 926, 51 L. Ed.2d 124 (1977) . See *supra* § 7A.03[3][a].

(n251)Footnote 251. *Emmi v. First Mfr. Nat'l Bank*, 336 F. Supp. 629 (D. Me. 1971) .

(n252)Footnote 252. See *Valente v. Pepsico, Inc.*, 454 F. Supp. 1228 1246-247 (D. Del. 1978) , where the court refused to dismiss a tender offer claim brought under *Rule 10b-5*:

"In the case of a tender offer, the concept of causation is somewhat complex. A plaintiff must prove not only that a defendant's misstatements or omissions caused shareholders to accept the tender offer ('transaction causation'), but also that the violations caused the injuries of which the plaintiff complains ('loss causation'). (cites omitted). When the tender offer is conducted by a controlling shareholder, and is followed by a merger, the chain of causation becomes even more complex.

* * * * *

Defendants argue that even if it is assumed that shareholders relied on the omissions from the tender materials and that the tender offers would not have succeeded but for the omissions, the plaintiffs still cannot prove a causal connection between the alleged violations and the injuries suffered by the shareholders. This is because PepsiCo could have executed the merger without successful tender offers, or without any tender offers at all, and all minority shareholders would have been forced to surrender their shares at the time of the merger. Defendants argue that when a parent corporation owns enough shares prior to a tender offer to assure approval of a merger with a subsidiary, there can be no showing of a causal relationship, because the tender offer is not an 'essential link in the accomplishment of the transaction.' (cite omitted).

As to the shareholders who elected to accept the tender offer, defendants' argument is faulty. As a result of their acceptance, those shareholders lost at least their right to obtain an appraisal at the time of the subsequent merger. This loss would not have occurred if PepsiCo had executed a merger without prior tender offer." (footnotes omitted).

The court also found it possible that causation might exist with respect to the non-tendering shareholders.

See also *Schreiber v. Burlington Northern, Inc.*, C.C.H. Fed. Sec. L. Rep. P 91,407 (3d Cir. 1984) (bidder's failure to disclose golden parachute benefits offered to target company's executives, and the fact that such benefits persuaded target company's management to approve a second tender offer, were not causally connected to plaintiff-shareholder's injuries that resulted from rescission of an earlier offer).

(n253)Footnote 253. *Affiliated Ute Citizens v. U.S.*, 406 U.S. 128, 92 S. Ct. 1456, 31 L. Ed.2d 741 (1972) .

(n254)Footnote 254. *Zuckerman v. Franz*, 573 F. Supp. 351 , C.C.H. Fed. Sec. L. Rep. P 91,478 (S.D. Fla. 1983); *Chris-Craft Indus., Inc. v. Piper Aircraft Corp.*, 480 F.2d 341 (2d Cir.) , cert. denied, 414 U.S. 910 (1973) ; *Bertozzi v. King Louie Int'l, Inc.*, 420 F. Supp. 1166 (D.R.I. 1976) ; *Berman v. Gerber Prod. Co.*, 454 F. Supp. 1310 (W.D. Mich. 1978) .

(n255)Footnote 255. *Rifkin v. Crow*, 574 F.2d 256 (5th Cir. 1978) . See *supra* § 5.04.

(n256)Footnote 256. In another case, *Hundahl v. United Benefit Life Insurance Co.*, 465 F. Supp. 1349 , C.C.H. Fed. Sec. L. Rep. P 96,815 (N.D. Tex. 1979), the court held that shareholders, who are not misled by the

misrepresentations of a bidder, and consequently do not tender their shares, cannot maintain a claim that they were injured by a loss of value in their stock following the completion of the offer. The court stated that to permit such a suit would violate the spirit of the Supreme Court's decision in *Piper v. Chris-Craft*. This reasoning is questionable. *Electronic Specialty*, 409 F.2d 937, 943 (2d Cir. 1969), long ago established the right of a non-tendering shareholder to sue a successful bidder for the loss of value in his stock. Denying this right because of a non-tendering shareholder's lack of reliance upon the bidder's misrepresentations overlooks: (1) the purpose of proving reliance, i.e. to establish a causal connection between the defendant's misdeeds and the plaintiff's injury, and (2) that such a connection is present if the injury alleged results from a tender offer owing its success to materially misleading statements. It also seems anomalous to use *Piper v. Chris-Craft*, which stressed that Section 14(e) was enacted for the benefit of the shareholder, to support a holding that greatly restricts the rights of shareholders. See also *Vine v. Beneficial Finance Co.*, 374 F.2d 627 (2d Cir.), cert. denied, 389 U.S. 970 (1967), where the court held that reliance was not a necessary element under Rule 10b-5 where the plaintiff alleged that as a result of the defendant's fraud, of which he had knowledge, he was forced to sell his stock.

But see *Osofsky v. J. Ray McDermott & Co., Inc.*, 725 F.2d 1057, C.C.H. Fed. Sec. L. Rep. P 99,656 (2d Cir. 1984) (although a reasonable jury could have found that an acquiring company's tender offer contained misleading statements as to the tender prices, the target company's shareholders failed to show reliance on the statements).

P 97,929 (7th Cir.), cert. denied, 454 U.S. 1092 (1981), where the court held that the shareholders of a target company failed to state a claim under Section 14(e) against the target company and its directors for alleged misrepresentations that:

(1) resulted in the tender offer being withdrawn, denying the plaintiffs the opportunity to tender their shares; and

(2) caused the plaintiffs not to sell their shares in the market, which were rising in value on news of the takeover attempt,

since Section 14(e) does not provide a damages remedy for misrepresentations or omissions if the tender offer is withdrawn before it becomes effective and the shareholders, never having had the opportunity to tender their shares, could not claim reliance on the target management's misstatement.

(n261)Footnote 261. *Berman v. Gerber Prod. Co.*, 454 F. Supp. 1310, 1325 (W.D. Mich. 1978), where the court found no liability on this ground either, since it found that the defendants had not made any material misstatements or omissions.

CHAPTER 7A The Williams Act Amendments-- Controlling Shareholders and Tender Offers

2-7A Federal Securities Exchange Act of 1934 § 7A.04

AUTHOR: Chang-Do Gong This chapter was prepared by Morton A. Pierce and Chang-Do Gong with the assistance of Daniel Hackney. Messrs. Pierce and Gong are partners of Dewey & LeBoeuf LLP. and Mr Hackney is an associate of Dewey & LeBoeuf LLP.

§ 7A.04 Issuer Repurchases, Issuer Self-Traders, and Section 14(f)

Where the issuer seeks to acquire its own shares, either through a "going private" transaction or an issuer tender offer, the issuer must provide its shareholders with substantially the same information as would be required from an outside bidder. n1

Further, if the issuer's directors will be elected other than at a meeting of security holders as a result of a tender offer, or a transaction in which a person acquires more than five percent of a class of the issuer's equity securities, the security holders must be provided with information substantially equivalent to the information that would be required under the proxy rules.

[1] Issuer Purchases of its own Securities--Section 13(e).

The beneficial ownership disclosure requirements of Section 13(d) do not apply to acquisitions of equity security by the issuer of that security. n2 Furthermore, issuers making tender offers for their own securities are exempt from the provisions of Section 14(d), although they are subject to the antifraud provisions of Section 14(e). n3 Section 13(e)(1) authorizes the Commission to regulate the purchase of any equity security by the issuer of such security, provided the issuer has a class of equity securities registered under Section 12 of the Exchange Act, n4 or is a closed-end investment company registered under the Investment Company Act of 1940. The Commission has the authority to define and prescribe fraudulent, deceptive, or manipulative acts or practices. n5 The Commission may also require the issuer to provide information about its purchase(s) to its equity security holders. Section 13(e)(2) states that:

"[A] purchase by or for the issuer, or any person controlling, controlled by, or under common control with the issuer, or a purchase subject to control of the issuer or any such person, shall be deemed to be a purchase by the issuer."

Rule 13e-1, adopted under Section 13(e), provides that an issuer subject to Section 13(e) may not purchase its own equity securities during the period a tender offer for such securities is open, if it has received notice that it is the subject

of a tender offer made under Section 14(d)(1) of the Exchange Act, n6 unless the issuer files a statement containing the following information with the Commission:

- (1) The title and amount of securities to be purchased, the names of the persons or classes of persons from whom, and the market in which, the securities are to be purchased, including the name of any exchange on which the purchase is to be made;
- (2) The purpose for which the purchase is to be made and whether the securities are to be retired, held in the treasury of the issuer or otherwise disposed of, indicating such disposition; and
- (3) The source and amount of funds or other consideration used or to be used in making the purchases, and if any part of the purchase price or proposed purchase price is represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding, or trading the securities, a description of the transaction and the names of the parties thereto;

[a] Going Private Transactions--Rule 13e-3 and Schedule 13E-3. In 1979, the Commission adopted Rule 13e-3 and Schedule 13E-3 to govern going private transactions by issuers of equity securities and their affiliates. n7 Rule 13e-3 and Schedule 13E-3 contain definitions, specific disclosure and dissemination requirements, and particular antifraud provisions with respect to going private transactions. Primarily, the rule focuses on the fairness of the transaction concerning shareholders who are not directly affiliated with the issuer. n8

The application of Rule 13e-3 depends upon three factors: (1) whether the transaction is included within the definition of a Rule 13e-3 transaction; n9 (2) whether an exception from the application of Rule 13e-3 is available; n10 and (3) when no exception is available, whether the equity securities that are the subject of the Rule 13e-3 transaction are of a class that is registered pursuant to Section 12 of the Exchange Act or of a class of an issuer that is required to file periodic reports pursuant to Section 15(d) of the Exchange Act. n11

A "Rule 13e-3 transaction" is defined as any transaction or series of transactions that involve one or more specified transactions n12 that has either a reasonable likelihood or purpose of producing, directly or indirectly, any specified effects. n13 Although these "tests" operate as alternative standards, both may be satisfied in particular instances. However, the "reasonable likelihood" test focuses on the *circumstances* of the issuer or its affiliate(s), while the "purpose" test concentrates on the *reasons* for the transaction (*i.e.*, is the transaction designed to produce a specific result).

Although a Rule 13e-3 transaction or series of transactions may be involved, an exception to the rule may be available. The first exception applies to particular transactions by or on behalf of a person, that occur within one year of the date of termination of a tender offer, in which such person was the bidder and became an affiliate of the issuer as a result of the tender offer, provided that the equal consideration, disclosure, and other requirements of the section are met. n14 The second exception applies to transactions that, among other things, offer an equity security to security holders that is either common stock or has essentially the same attributes as the equity security that is the subject of the Rule 13e-3 transaction. n15 The other exceptions apply to redemptions, calls, or similar purchases of an equity security by an issuer pursuant to specific provisions set forth in the instrument(s) creating or governing that class of equity securities, n16 and certain solicitations by an issuer with respect to a plan of reorganization under Chapter XI of the Bankruptcy Act. n17

Under Rule 13e-3, various filing, disclosure, and dissemination requirements must be satisfied if (i) a Rule 13e-3 transaction exists, (ii) no exception applies, and (iii) the security must be registered pursuant to Section 12 or the issuer must file periodic reports pursuant to Section 15(d). Under the rule, n18 the issuer or the affiliate engaged in a Rule 13e-3 transaction must file a Transaction Statement on Schedule 13E-3. The Schedule sets forth different times for filing the Transaction Statement depending upon the nature of the particular Rule 13e-3 transaction. n19 Regardless of

the transaction involved, the Schedule 13E-3 must be filed with the Commission. Any material change must also be noted by filing with the Commission an amendment on Schedule 13E-3. n20 In addition, a final amendment to the schedule must promptly be filed with the Commission disclosing the result of the Rule 13e-3 transaction. n21

Rule 13e-3(e) governs the information required to be included in the disclosure document furnished to holders of the class of equity securities that is the subject of the transaction. n22 The disclosure provision includes the information required by Items 1 through 6 and 10 through 15 of Schedule 13E-3, or a fair and adequate summary thereof, and the information called for by Items 7, 8 and 9 of Schedule 13E-3 (*i.e.*, the purpose for and fairness of the transaction, and certain reports, opinions, appraisals, and negotiations of special concern to investors). The outside front cover of any disclosure document transmitted to security holders must bear a legend that is written in clear plain English. The legend should state that the transaction has not been approved or disapproved by the Commission, and that the Commission has not judged the merits or fairness of the transaction, or the accuracy or adequacy of the disclosure document. The legend should also state that any representation to the contrary is a criminal offense. n23 In addition, if the Rule 13e-3 transaction involves a registered security offering, the legend required by Item 501(b)(7) of Regulation S-K must also follow the legend requirements discussed above.

Rule 13e-(f) prescribes the methods of, and time limitations on, the dissemination of the information required to be disclosed to the security holders of the class of equity securities that is the subject of the Rule 13e-3 transaction. As mentioned earlier, n24 Schedule 13E-3 established specific disclosure requirements for Rule 13e-3 transactions, and contains the following items:

Item 1, "Summary Term Sheet," requires a brief description, in bullet point format, of the essential features of the proposed transaction.

Item 2, "Subject Company Information," requires the name of the issuer; the address of its principal executive offices; the title of the securities, the amount of securities outstanding; the identity of the principal market in which the securities are traded; dividends paid during the last two years and the possibility of future inability to pay dividends; details of any underwritten public offering of such securities during the past three years if registered under the Securities Act or exempt from registration pursuant to Regulation A; and a description of any purchases of such securities made by the issuer or affiliate since the commencement of the issuer's second full fiscal year preceding the date of this schedule.

Item 3, "Identity and Background of Filing Person," calls for various identification and background information depending upon whether the person filing this statement is the issuer, an affiliate of the issuer that is not a natural person, or an affiliate of the issuer that is a natural person. n25

Item 4, "Terms of the Transaction" necessitates stating the material terms of the Rule 13e-3 transaction, as well as describing any arrangement concerning the transaction that relates to any security holder of the issuer, when such arrangement is not identical to that relating to other security holders of the same class of securities of the issuer.

Item 5, "Past Contracts, Transactions or Negotiations and Agreements," requires an affiliate filing this schedule to briefly state the nature and approximate dollar value of any transaction, or to describe any contacts, negotiations, or other transactions concerning a merger, consolidation, acquisition, tender offer, election of directors, or sale of assets of the issuer or one of its subsidiaries, that have occurred between the issuer and the affiliate since the commencement of the issuer's second full fiscal year preceding the date of the schedule. Similarly, an affiliate must describe any contracts or negotiations referred to above that have been entered into or that have occurred since the commencement of the issuer's second full fiscal year preceding the schedule between any affiliates of the issuer, or between the issuer of any of its affiliates and any person who is unaffiliated with the issuer and who would have a direct interest in such matters. In addition, the filing person must describe any agreement between the filing person and any other person with respect to any securities of the subject company.

Item 6, "Purpose of the Transaction and Plans or Proposals," requires a description of any plan or proposal of the issuer or affiliate regarding activities or transactions that are to occur after the Rule 13e-3 transaction that relate to or would result in certain extraordinary corporate transactions n26 or other material changes in the issuer's obligations, corporate structure, management or assets.

Item 7, "Purposes, Alternatives, Reasons, and Effects," requires a discussion of the purposes for the transaction (including its structure), any alternatives considered instead of the Rule 13d-3 transaction chosen, and the contemplated effects of the transaction on the issuer, its affiliates, unaffiliated security holders and tax consequences. n27

Item 8, "Fairness of the Transaction," requires the issuer or affiliate to state whether it reasonably believes the transaction is fair or unfair to unaffiliated security holders and the factors upon which that belief is based. This item also necessitates statements concerning: (i) whether the transaction is structured so that approval of at least a majority of unaffiliated security holders is required; (ii) whether the majority of nonemployee directors has retained an unaffiliated representative to act solely on behalf of unaffiliated security holders for the purposes of negotiating the terms of the transaction and/or preparing a report concerning the fairness of the transaction; (iii) whether the transaction was approved by a majority of the directors of the issuer who are not employees of the issuer; and (iv) the material factors upon which the belief required to be stated by Item 8 is based. n28

Item 9, "Reports, Opinion, Appraisals and Negotiations," calls for disclosure of any report, opinion, or appraisal by an outside party with respect to the Rule 13e-3 transaction (other than an opinion of counsel) including background information concerning the person responsible for the report and a summary of certain information in the report such as the procedures followed, the findings and recommendations, and any instructions received from, or limitations imposed by, the issuer or affiliate in connection with the report. There must also be a statement to the effect that the report will be available for inspection and copying at the principal executive offices of the issuer or affiliate during its regular business hours by any interested security holder or his representative.

Item 10, "Source and Amounts of Funds or Other Consideration," calls for a statement concerning the source and total amount of the funds to be used in the Rule 13e-3 transaction including expenses (incurred or estimated to be incurred) and the identity, amount, and terms of any loan, the money from which is to be used for the Rule 13e-3 transaction.

Item 11, "Interest in Securities of the Subject Company," requires that, with respect to the class of equity securities to which the Rule 13e-3 transaction relates, the aggregate amount and percentage of securities beneficially owned by the person filing the schedule (except the issuer) be made known. This item also calls for a description of any transaction in the same class of equity securities that was effected during the past sixty days by the issuer or by persons named as beneficial owners.

Item 12, "The Solicitation or Recommendation," would obligate the person filing the schedule, after reasonable inquiry, to disclose the present intention and recommendations of certain prescribed people with regard to the Rule 13e-3 transaction.

Item 13, "Financial Statements," would require (i) certain historical financial information concerning the issuer, and, where material, pro forma data regarding certain effects of the Rule 13e-3 transaction on the issuer's balance sheet; (ii) the issuer's statement of income, earnings per share amounts, and ratio of earning per fixed charges; and (iii) the issuer's book value per share.

Item 14, "Persons/Assets, Retained, Employed, Compensated or Used," requires the identification and description of the purpose for which certain persons or corporate assets are employed by the issuer or the affiliate in connection with the Rule 13e-3 transaction. Additionally, this item requires disclosure and identification of all persons retained by the person filing the schedule (excluding those required to be disclosed by the issuer) including a summary of the material

terms of the employment, retainer or arrangement for compensation.

Item 15, "Additional Information," calls for any additional information as may be necessary to make the statements required by the other items in the schedule, in light of the circumstances under which they are made, not misleading.

Item 16, "Exhibits," requires the filing person to furnish a copy of: (i) all material sent to the security holders in connection with the Rule 13e-3 transaction; (ii) any loan agreement for financing the Rule 13e-3 transaction; (iii) any report or opinion referred to in Items 8 and 9 above; (iv) any document setting for the terms of any agreement referred to in Items 5 and 15 above; (v) a detailed description of security holder's appraisal rights and the procedures for exercising those appraisal rights; and (vi) any written instruction or other materials furnished to persons making oral solicitations of security holders on behalf of the filing person.

[b] Issuer Tender Offers-Rule 13e-4 and Schedule TO. Shortly after the adoption of the "going private" Rule and Schedule discussed *supra*, the Commission announced the adoption of Rule 13e-4 and Schedule 13E-4. n29 Subsequently, Schedule 13E-4 was combined with Schedule 14D-1 into Schedule TO. n30 Both the Rule and the Schedule are designed to regulate tender offers and other exchange offers by certain issuers n31 and their affiliates for their own equity securities. In addition, the rule defines certain fraudulent, deceptive, and manipulative acts or practices in connection with these offers, n32 and prescribes filing, disclosure, disseminations, and other requirements reasonably designed to prevent such acts and practices. n33

Rule 13e-4(c) requires four filings by the issuer or any affiliate subject to its provisions. First, all written communications made by the issuer or affiliate relating to the issuer tender offer, from and including the first public announcement, must be filed with the Commission as soon as practicable on the date of the communication. Second, the Schedule TO must be filed with the Commission by the party subject to the rule prior to, or as soon as practicable on, the date of commencement n34 of the tender offer. n35 Third, any material changes must also be noted by filing with the Commission the amendments to the Schedule TO. n36 Fourth, the person making the tender offer must disclose the results of the tender offer by filing with the Commission a final amendment to the Schedule TO promptly after termination n37 of the tender offer. n38

Rule 13e-4(d) governs the disclosure of certain information in the manner prescribed to the security holders by the issuer or affiliate. The issuer or affiliate must disclose the information required by Items 1 through 11 of Schedule TO (not including Item 12 (exhibits)) or a fair and adequate summary of such information. n39 Furthermore, if any material change occurs in information already disclosed to the security holders, the issuer or affiliate must promptly notify the security holders of the change in a manner reasonably calculated to inform them of such change. n40

The dissemination of the actual tender offer to security holders by the issuer or affiliate may be accomplished by multiple methods. Dissemination of all cash issuer tender offers by *long-form publication* is satisfied by making adequate publication n41 of the information required by Rule 13e-3(d)(1) n42 in a newspaper or newspapers, on the date of commencement of the tender offer. Other cash tender offers may be made by *summary publication* by making adequate publication n43 of certain specified information, n44 and by mailing or otherwise furnishing any material required to be disclosed, together with a transmittal letter to any security holder who requests either a copy of such statement or a transmittal letter. n45 The final method of dissemination is available when *shareholder and other lists* are utilized. This method is accomplished by: (i) mailing the disclosure statement to each security holder whose name appears on the most recent shareholder list of the issuer; (ii) contacting each participant named on the most recent security position listing of any clearing agency within the possession or access of the issuer or affiliate making the tender offer, and making inquiry of each such participant as to the approximate number of beneficial owners of the securities for which the offer is made which are held by the participant; (iii) furnishing to each participant a sufficient number of disclosure statements for transmittal to the beneficial owners; and (iv) agreeing to reimburse promptly each participant for reasonable expenses incurred in forwarding the disclosure statement to the beneficial owners. n46

The provisions concerning the manner in which the tender offer is made, including time limits, withdrawal rights, pro rata acceptance rules, provisions concerning an increase in the consideration offered, payment for the securities, and post tender offer restrictions are all governed by Rule 14e-4(f). n47 Rule 13e-4 requires that an issuer tender offer, unless withdrawn, remain open for at least twenty business days from the date of commencement of the offer, n48 and at least ten business days from the date that notice of an increase or decrease in the percentage of the class of securities being sought or the consideration offered or the dealer's soliciting fee is communicated to security holders. n49 For the purposes of Rule 13e-4(f)(1)(ii), the issuer's acceptance for payment of an additional amount of securities sought in the tender offer not exceeding two percent of the class of securities sought, is not deemed to be an increase. n50

Tendering security holders may withdraw securities tendered at any time during the period that the tender offer remains open n51 and at any time after forty business days from the time the offer commenced. n52 These provisions avoid security holders being "locked in" for an inordinate period of time, and enable them to respond to competing offers.

Rule 13e-4 requires that:

- (1) issuer tender offers be open to all holders of the class of securities sought by the offer, n53 and
- (2) the consideration paid to any security holder in the tender offer be the highest consideration paid to any other security holder. n54

Under Rule 13e-4(f)(10), the issuer may offer more than one type of consideration, but security holders must be afforded an equal right to elect among alternative considerations, and the highest consideration of each type paid to any security holder must be paid to any other security holder.

Further, Rule 13e-4 does not prohibit an issuer from excluding from a tender offer security holders in a state where the issuer, after making a good faith effort to comply with state law, is prohibited from making the offer. n55 If the form of consideration offered is prohibited by state law, the issuer may offer an alternative form of consideration in that state without making the alternative consideration available to security holders in other states. n56

The situation may arise where a greater number of securities are offered than the issuer is prepared to accept. If this situation should occur within ten business days from the commencement of the tender offer, or within ten business days from the date of notice of an increase in consideration being offered to securities holders, the issuer or affiliate must accept the tendered securities as nearly as practicable on a pro rata basis (disregarding fractions). n57 However, in recognition of the conflict between pro rationing and the elimination of odd lots, the rule permits the issuer or affiliate to accept odd lots in full, prior to accepting other securities on a pro rata basis. n58

Rule 13e-4 also contains a "best-price" provision which provides that if the issuer or affiliate making the tender offer increases the consideration being offered after the tender offer is commenced, the increased consideration must be paid to *all* security holders whose tendered securities are accepted for payment. n59

The party making the tender offer must either pay the consideration offered, or return the tendered securities, promptly after termination of the offer. n60

Furthermore, Rule 13e-4 provides for post-tender offer considerations. These prohibit purchases, other than pursuant to the tender offer, by the issuer or affiliate of securities that are the subject of the tender offer of the same class and series, or any right to purchase any such securities, for at least ten business days after termination of the offer. n61

In addition, Rule 13e-4 exempts from its application issuer tender offers to purchase shares from all security holders of the class of securities subject to the tender offer, exclusive of participants in an issuer's stock purchase, dividend reinvestment, or similar plan (as that term is defined in Rule 100 of Regulation M-A) or exclusive of security holders

who do not own their shares as of a specified date determined by the issuer or who own an aggregate of not more than a specified number of shares that is less than one hundred provided that the offer complies with Rule 13e-4(f)(8)(ii) or the consideration paid pursuant to the offer is determined on the basis of a uniformly applied formula based on the market price of the subject security. n62 The rule also exempts issuer tender offers made solely to effect a rescission offer. n63

Rule 13e-4 also does not apply to: (i) calls or redemptions of any security in accordance with the terms and conditions of its governing instruments; n64 (ii) offers to purchase securities evidenced by a scrip certificate, order form or similar document which represents a fractional interest in a share of stock or similar security; n65 (iii) offers to purchase securities pursuant to a statutory procedure for the purchase of dissenting security holders' securities; n66 (iv) any tender offer subject to Section 14(d) of the Exchange Act; n67 (v) offers by closed-end management investment companies to repurchase equity securities pursuant to Rule 23c-3 of the Exchange Act; n68 or (vi) certain cross-border tender offers. n69

Pursuant to the filing requirements discussed earlier, the issuer or affiliate must file a Schedule TO Tender Offer Statement with the Commission. n70 Schedule TO requires disclosure of the following information:

Item 1, "Summary Term Sheet," requires a brief description, in bullet point format, of the essential features of the proposed transaction.

Item 2, "Subject Company Information," requires the name of the issuer; the address of its principal executive offices; the title and amount of securities outstanding of the class of security being sought; and information about the principal market and exchanges where the securities are traded.

Item 3, "Identity and Background of Filing Person," requires the name, address and telephone number of the filing person, and, if the filing person is an affiliate of the subject company, the nature of the affiliation must be disclosed.

Item 4, "Terms of the Transaction," requires, among other things, a description of the total number and class of securities sought in the offer, the type and amount of consideration offered, the scheduled expiration date, whether a subsequent offering period will be available, whether and how the offer will be extended, the dates before and after which security holders may withdraw tendered securities, the procedures for tendering and withdrawing securities and a brief description of the accounting treatment and financial income tax consequences of the transaction, if material. Also required, is a statement whether any securities are to be purchased from any officer, directors or affiliate of the subject company and the details of any such transactions.

Item 5, "Past Contacts, Transactions, Negotiations and Agreements," requires the disclosure of any agreement between the filing person and any other person with respect to any securities of the subject company.

Item 6, "Purpose of the Transaction and Plans or Proposals," necessitates disclosing the purpose(s) for the tender offer, the planned disposition of tendered securities, and any extraordinary corporate transactions n71 or other material changes in the issuer's obligations, corporate structure, management, or assets that would result from the disposition of the tendered securities.

Item 7, "Source and Amount of Funds or Other Consideration," mandates identifying the source and total amount of funds to be used to purchase the maximum number of tendered securities; and, if the source is a loan, a summary of the loan agreement and the arrangements for refinancing or repayment must also be disclosed.

Item 8, "Interest in the Securities of the Subject Company," requires each person named in Item 3 (and each associate and majority owned subsidiary of such person) to state his beneficial ownership, in both numbers and percentage, of any class of securities issued by the subject company. Any transaction in such securities by the same people during the past sixty days must also be described. If this information is not available at the time the Schedule TO is initially filed, it

may be filed up to three business days after the initial filing.

Item 9, "Persons/Assets Retained, Employed, Compensated or Used," provides for the identification of all persons or classes of persons to be retained or compensated by the person filing the statement (or by any person on their behalf) in connection with solicitations of, or recommendations for, the tender offer, as well as the terms of such employment or retainer.

Item 10, "Financial Statements," calls for essentially the same data as Item 13 under Schedule 13E-3.

Item 11, "Additional Information," requires the description of any material information necessary for the security holders to decide whether to sell, tender, or hold the securities being sought. This information includes, but is not limited to, certain contracts or arrangements between the issuer and its executive officers, directors, or affiliates, and any regulatory requirements that must be complied with.

Item 12, "Exhibits," requires furnishing copies of the following:

- (1) Tender offer material provided to security holders by or on behalf of the person filing the Schedule TO concerning the issuer tender offer.
- (2) Any loan agreement mentioned in response to Item 2 of the Schedule.
- (3) Any document containing the terms of any contract, arrangements, understandings or relationships referred to in response to Items 5 or 11 of Schedule TO.
- (4) Any written opinion of legal counsel as to the tax consequences of the issuer tender offer, the opinion having been prepared at the request of, and communicated to, the person filing the Issuer Tender Offer Statement.
- (5) In an exchange offer where securities of the issuer have been or are to be registered under the Securities Act, any prospectus filed with the Commission as part of or in connection with the registration statement.
- (6) If any oral solicitation of security holders is to be made by or on behalf of the person filing the Schedule TO, any written instruction, form, or other material furnished to the persons making the actual oral solicitation for their use, directly or indirectly, in connection with the tender offer.

[c] Limited Tender Offers

The Commission has established a pattern of providing no-action letter relief from the requirements of Rule 13e-4 for certain issuer offers and repurchases possessing limited tender offer characteristics which might otherwise cause them to become subject to Rule 13e-4. While such tender offers may trigger many of the *Wellman* test factors used to establish the existence of a tender offer, n72 the Commission has provided some guidance that illuminates which issuer offers and repurchases may expect to be granted relief.

In a 2006 no-action letter, the Commission granted Westamerica Bancorporation an exemption from Rule 13e-4 for a proposed stock repurchase program designed to allow employees of the company to sell shares of company stock free from charges and brokerage commissions. The Commission granted relief to the proposed buy-back program on the basis that (i) the program would be open solely to current employees of Westamerica who own common stock in the company; (ii) the program would be open during periods of a minimum of 20 business days; (iii) decisions regarding whether to participate in the program and the amount of shares to be tendered would be at the sole discretion of the

employee; (iv) the company would not encourage or discourage participation in the plan; (v) the annual amount of purchases by the company would be limited to a maximum of five percent of the company's total common stock outstanding; (vi) the consideration to be paid pursuant to the program would be determined by a uniformly applied formula based on the market price of the common stock; and (vii) the company would settle with participating employees within the time frame required by Rule 15c6-1 under the Exchange Act. n73

In a separate 2003 no-action letter, the Commission also granted Microsoft Corp. an exemption from Rules 13e-4(f)(8)(i) and (ii) (the all-holders and best price rules) pursuant to Microsoft's planned option purchase program. The Commission permitted Microsoft to terminate withdrawal rights for tendered options at the end of the election period, to exclude certain options and certain option holders from the stock offer transfer program, and to pay holders of certain options less for those options than other options with similar terms. In so doing, the Commission took note specifically of the compensatory objectives of the option transfer program and the level of information that would be available to employees regarding the program. n74

In granting these and other exemptions from Rule 13e-4, the Commission often notes as significant considerations that such programs (i) apply to a relatively small percentage of the issuer's shares (ii) will serve a legitimate employee service or compensation purpose, (iii) offer to repurchase shares at their current market price and without a premium and (iv) are generally not open to the wider body of shareholders or to the investing public. n75

In 2001, the Commission issued an exemptive order for issuer exchange offers that are conducted to reprice employees' stock options. n76 The order exempts these exchange offers from Rules 13e-4(f)(8)(i) and 13e-4(f)(8)(ii) (the all-holders rules and best price rules) so long as the following conditions are met:

1. the issuer is eligible to use Form S-8, the options subject to the exchange offer were issued under an employee benefit plan as defined in Rule 405 under the Securities Act, and the securities offered in the exchange offer will be issued under such an employee benefit plan;
2. the exchange offer is conducted for compensatory purposes;
3. the issuer's offer to purchase discloses the essential features and significance of the exchange offer, including risks that option holders should consider in deciding whether to accept the offer; and
4. except as exempted in the 2001 exemptive order, the issuer complies with Rule 13e-4. n77

[2] Changes in Boards of Directors--Section 14(f)

Section 14(f) of the Exchange Act and accompanying Rule 14f-1 provide that if, pursuant to any arrangement or understanding with a tender offer acquirer, any persons are elected or appointed as directors of an issuer other than at a meeting of the issuer's security holders, and such new directors will constitute a majority of the board, then, not less than 10 days following their taking of office, the issuer must file and distribute to all holders of record who would be entitled to vote at a meeting, proxy material substantially equivalent to the material which would be required under Schedule 14A of Regulation 14A if such appointed persons were nominees for election as directors at an annual meeting of security holders. n78 Section 14(f) contemplates a scenario in which, by prearrangement, an incumbent board resigns en masse following successful completion of a tender offer, thereby delivering immediate control of the board to the acquirer without the formality of holding a board meeting. The purpose of this section is to regulate the use of the authority of directors to fill vacancies by having the entire board resign upon a change of control by requiring the issuer to file with the Commission and transmit to all holders of record entitled to vote, information that is substantially equivalent to the information which would be required by Section 14(a) or 14(c) if the directors were to be elected at a shareholder meeting, before a new director takes office. n79 Generally, Section 14(f) will not apply to hostile takeovers because only friendly or negotiated transactions will contain the "arrangement or understanding" between the offeror

and the incumbent directors contemplated by the section. In negotiated transactions, which do trigger Section 14(f), proxy information required to be delivered to target shareholders will usually be contained within the issuer's Schedule 14D-9 rather than within the acquirer's Schedule TO or any separate issuer filing.

(n2)Footnote 2. Section 13(d)(6)(C). *See supra* § 7A.02.

(n3)Footnote 3. Section 14(d)(8). *See supra* § 7A.03.

(n4)Footnote 4. Registration pursuant to Section 12 of the Exchange Act is discussed in *supra* § 4.01.

(n5)Footnote 5. *See also* Fisher v. Plessey Co., Ltd., C.C.H. Fed. Sec. L. Rep. P 99,246 (S.D.N.Y. 1983), in which the court held that under the Supreme Court's standards in *Cort v. Ash*, an investor has implied a private right of action for damages under Section 13(e) since the statute specifically refers to a group of investors to be protected by its antifraud and disclosure requirements and imposes a duty on issuers or tender offerors to ensure that target investors receive all material information needed to decide whether to tender.

But see Kalmanovitz v. G. Heileman Brewing Co., Inc., 595 F. Supp. 1385, C.C.H. Fed. Sec. L. Rep. P 91,851 (D. Del. 1984) (no private right of action for damages exists either express or implied, under Section 13(e)).

(n6)Footnote 6. *See supra* § 7A.03[2][a].

(n7)Footnote 7. The adoption of Rule 13e-3 and concomitant Schedule 13E-3 was announced in Part 240--General Rules and Regulations, Securities Exchange Act of 1934, Exchange Act Release No. 16075, 17 SEC Docket 1449 (Aug. 2, 1978), effective 30 days after publication in the Federal Register.

(n8)Footnote 8. *See* Woodward & Lothrop, Inc., v. Schnabel, C.C.H. Fed. Sec. L. Rep. P 91,658 (D.D.C. 1984), where the court held that since Rule 13e-3 applies only to transactions by issuers and their affiliates, the filing requirements of the Rule did not apply to a merger transaction involving a non-affiliate. To establish that one issuer is an affiliate of another, a control relationship must be found. Control did not exist in this case because:

(1) the pre-merger agreement lacked any evidence of the alleged affiliate's ability to direct the target company's management or policies;

(2) covenants in the merger agreement preventing the target company from taking any extraordinary action without the alleged affiliate's approval did not rise to the level of control; and

(3) even after acquiring 32% of the target company's outstanding shares, the alleged affiliate still lacked Rule 13e-3 control, as evidenced by the target company Board's continued independence and willingness to develop competing merger offers.

The existence of a merger agreement between two issuers will not make one issuer an affiliate of the other issuer for the purpose of Rule 13e-3 if the merger agreement was the product of arms-length negotiations. *Radol v. Thomas*, 534 F. Supp. 1302, C.C.H. Fed. Sec. L. Rep. P 98,693 (S.D. Ohio 1982) .

See also Howing Co., Inc. v. Nationwide Corp., C.C.H. Fed. Sec. L. Rep. P 94,858 (S.D. Ohio 1989) (Omissions of a

defendant majority shareholder's assessment of book, liquidation, and going concern values from the proxy statement issued in connection with a going private transaction were held not material. Although dissenting shareholders had alleged that the proxy statement violated Rule 13e-3 disclosure requirements, the court found that because all of the omitted values would have resulted in payouts less than the cash out merger price, there was no substantial likelihood that a reasonable shareholder would have considered them important in deciding how to vote on the merger issue).

(n9)Footnote 9. *See* Rule 13e-3(a)(3).

(n10)Footnote 10. *See* Rule 13e-3(g).

(n11)Footnote 11. A Rule 13e-3 transaction by an issuer required to file periodic reports pursuant to Section 15(d) of the Exchange Act (*see supra* § 4.02) or by an affiliate of such issuer for equity securities of the issuer are subject only to the filing, disclosure, and dissemination requirements of the rule.

A Rule 13e-3 transaction by an issuer with a class of equity securities registered pursuant to Section 12 of the Exchange Act (*see supra* § 4.01) or by an affiliate of such an issuer is subject to particular antifraud provisions (*see* Rule 13e-3(b)) as well as the filing, disclosure, and dissemination requirements. These antifraud provisions prohibit fraudulent, deceptive, or manipulative acts or practices in connection with a Rule 13e-3 transaction. Part 240--General Rules and Regulations, Securities Exchange Act of 1934, Exchange Act Release No. 16075, 17 SEC Docket 1449 (Aug. 2, 1979).

(n12)Footnote 12. The transactions referred to are:

"(A) A purchase of any equity security by the issuer of such security or by an affiliate of such issuer;

(B) A tender offer for or request or invitation for tenders of any equity security made by the issuer of such class of securities or by an affiliate of such issuer; or

(C) A solicitation subject to Regulation 14A [§§ 240.14a-1 to 240.14a-103] of any proxy, consent or authorization of, or a distribution subject to Regulation 14C [§§ 240.14c-1 to 14c-101] of information statements to, any equity security holder by the issuer of the class of securities or by an affiliate of such issuer, in connection with: a merger, consolidation, reclassification, recapitalization, reorganization or similar corporate transaction of an issuer or between an issuer (or its subsidiaries) and its affiliate; a sale of substantially all the assets of an issuer to its affiliate or group of affiliates; or a reverse stock split of any class of equity securities of the issuer involving the purchase of fractional interests. Rule 13e-3(a)(3)(i)."

See *Pin v. Texaco, Inc.*, C.C.H. Fed. Sec. L. Rep. P 92,823 (5th Cir. 1986), where the court held that the payment by an issuer of "greenmail" to holders of a large bloc of the issuer's stock, by purchasing their stock at a premium to avert a challenge to the issuer's management, was not an issuer tender offer under Section 13(e) and Rule 13e-4, since:

(1) the offer to purchase was made privately to a very small percentage of the issuer's stockholders;

(2) the selling shareholders were highly sophisticated; and

(3) there was no active or widespread advance publicity or public solicitation.

See also *Am. Can Co.*, 14 B.N.A. Sec. Reg. & L. Rep. 667 (Div. Corp. Fin. 1982), in which the Division of Corporation Finance took the position that Rule 13e-3 did not apply to a two-step, acquisition and merger transaction, noting that:

- (1) there was no prior affiliation between the acquiring company and the issuer;
- (2) the two-step transaction was publicly announced before the initial premerger acquisition of stock;
- (3) the second-step merger would be effected within a relatively short period of time after the first-step premerger acquisition of stock;
- (4) the issuer's board of directors or management would not be altered by the acquiring company before completing the second-step merger;
- (5) the basic terms of the publicly announced merger would not be changed in the final merger agreement; and
- (6) the first-step premerger acquisition of stock and the second-step merger acquisition of stock would be made under an agreement in principle to purchase all of the issuer's company stock at the same price.

(n13)Footnote 13. The effects are:

"(A) Causing any class of equity securities of the issuer which is subject to Section 12(g) or Section 15(d) of the Act to become eligible for termination or registration under Rule 12g-4 or Rule 12h-6, or causing the reporting obligations with respect to such class to become eligible for termination under Rule 12h-6; or suspension under Rule 12h-3 or section 15(d); or

(B) Causing any class of equity securities of the issuer which is either listed on a national securities exchange or authorized to be quoted in an inter-dealer quotation system of a registered national securities association to be neither listed on any national securities exchange nor authorized to be quoted on an inter-dealer quotation system of any registered national securities association."

Rule 13e-3(a)(3)(ii).

See Shamrock Ass. v. Horizon Corp., C.C.H. Fed. Sec. L. Rep. P 92,711 (S.D.N.Y. 1986), where the court held that for purposes of Rule 13e-3(a)(3)(ii)(B) there was a "reasonable likelihood" that an issuer's securities would be delisted where the New York Stock Exchange had commenced delisting proceedings. The court held as well that the mere possibility that the issuer's shares would be listed on another exchange or over-the-counter did not preclude the application of Rule 13e-3 since "the language of the Rule appears to speak in terms of present possibilities not future potentialities."

(n14)Footnote 14. *See* Rule 13e-3(g)(1).

A condition for the availability of the Rule 13e-3(g)(1) exception is that the acquiring entity not change the management of the board of directors or otherwise exercise control of the issuer before the completion of the second step of the transaction, *i.e.*, the merger. *See, e.g.*, *General Steel Indus., Inc. & Lukens Steel Co.*, C.C.H. Fed. Sec. L. Rep. P 77,211 (Div. Corp. Fin. 1982) (since the acquiring corporation installed its representatives on the issuer's board of directors before the merger transaction was completed, the Division of Corporation could not conclude that the Rule 13e-3(g)(1) exception was available).

(n15)Footnote 15. *See* Rule 13e-3(g)(2).

(n16)Footnote 16. *See* Rule 13e-3(g)(4).

(n17)Footnote 17. *See* Rule 13e-3(g)(5).

(n18)Footnote 18. *See* Rule 13e-3(e).

(n19)Footnote 19. *See* General Instruction D to Schedule 13E-3 for the appropriate filing times.

(n20)Footnote 20. *See* Rule 13e-3(d)(2).

(n21)Footnote 21. *See* Rule 13e-3(d)(3).

(n22)Footnote 22. *See* Rule 13e-3(e).

(n23)Footnote 23. *See* Rule 13e-3(e)(i)(iii).

(n24)Footnote 24. *See* Rule 13e-3(d).

(n25)Footnote 25. Such information may include the issuer or affiliate's name; address (or residence); present principal occupation or employment; criminal convictions during the past five years; any civil judgments, decrees, or final orders against the party filing the statement that occurred within the last five years; and citizenship.

(n26)Footnote 26. These extraordinary corporate transactions include mergers, reorganizations or liquidations involving the issuer or one of its subsidiaries.

(n27)Footnote 27. The effects should be described in reasonable detail and should include a discussion of the benefits and detriments of the transaction to the issuer, its affiliate, and unaffiliated shareholders.

(n28)Footnote 28. To minimize boilerplate responses concerning the issue of fairness, Instruction (3) to Item 8(b) specifies that conclusory statements are not considered sufficient disclosure to this Item.

(n29)Footnote 29. The adoption of the Issuer Tender Offer rule and Schedule was announced in Exchange Act Release No. 16112, 66 SEC Docket 67 (Aug. 16, 1979), effective 30 days after publication in the Federal Register.

(n30)Footnote 30. *See* Regulation of Takeovers and Security Holder Communications, Exchange Act Release No. 42055, 70 SEC Docket 2229 (Oct. 22, 1999).

(n31)Footnote 31. As defined in the rule, the term "issuer" means "any issuer which has a class of equity security registered pursuant to Section 12 of the Act, or which is required to file periodic reports pursuant to Section 15(d) of the Act, or which is a closed-end investment company registered under the Investment Company Act of 1940." Rule 13e-4(j)(1).

(n32)Footnote 32. Rule 13e-3(b) states that:

(1) It shall be a fraudulent, deceptive or manipulative act or practice, in connection with a Rule 13e-3 transaction, for an issuer which has a class of equity securities registered pursuant to Section 12 of the Act or which is a closed-end investment company registered under the Investment Company Act of 1940, or an affiliate of such issuer:

(i) To employ any device, scheme or artifice to defraud any person;

(ii) To make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under

which they were made, not misleading; or

(iii) To engage in any act, practice or course of business which operates or would operate as a fraud or deceit upon any person.

(2) As a means reasonably designed to prevent fraudulent, deceptive or manipulative acts or practices in connection with any Rule 13e-3 transaction, it shall be unlawful for an issuer which has a class of equity securities registered pursuant to Section 12 of the Act, or an affiliate of such issuer, to engage directly or indirectly, in a Rule 13e-3 transaction unless:

(i) Such issuer or affiliate complies with the requirements of paragraphs (b), (c), (d), (e) and (f) of this rule; and

(ii) The Rule 13e-3 transaction is not in violation of paragraph (b)(1) of this section.

Paragraphs (d), (e) and (f) refer to the filing, disclosure, and dissemination respectively.

See Lessner v. Casey, C.C.H. Fed. Sec. L. Rep. P 93,932 (E.D. Mich. 1988) (ruling that the allegation that issuer and its presidents did not consider fairness in making a self-tender offer did not state a claim under Rule 13e-4(b)).

(n33)Footnote 33. *See SEC v. Carter Hawley Hale Stores*, C.C.H. Fed. Sec. L. Rep. P 92,038 (9th Cir. 1985), where the Court held that a target company's purchase of over 50 percent of its shares during an attempted takeover by a third party was an issuer repurchase under Rule 13e-1, rather than an issuer tender offer under Rule 13e-4, since the repurchases were made after public announcement, in the open market, at the open market price, without fixed terms, not contingent upon the tender of fixed minimum number of shares, and for the purpose of defeating the pending tender offer. *See also supra* § 7A.03[1].

See Merrill Lynch, Pierce, Fenner and Smith, C.C.H. Fed. Sec. L. Rep. P 78,318 (Div. Mkt. Reg. 1986), where the staff took the position that where an issuer was distributing to its employees certain of the issuer's shares credited to employees' accounts in an employee savings plan, an odd lot program under which a broker-dealer would aggregate odd lot shares of employees, sell them and remit to employees an amount per share equivalent to the average selling price of all odd lot shares on the date of sale constituted an issuer tender offer subject to Rule 13e-4. However, based on representations that the distribution resulted from a court ordered divestiture and was the last such distribution that would be made, the Commission granted an exemption from Rule 13e-4. In the staff's opinion, however, the requirements of Rule 14(e) must be complied with in connection with the offer, including the requirements that the offer remain open for at least twenty days and that each employee be provided with adequate information to determine whether to sell or retain his shares.

See also Capital Cities Commc'n., Inc., C.C.H. Fed. Sec. L. Rep. P 78,320 (Div. Mkt. Reg. 1986), in which the staff took the position that where upon conclusion of a tender offer the target company became a wholly-owned subsidiary of the offeror, and shareholders of the target, as partial payment for their shares, received warrants to purchase the offeror's shares which the offeror agreed to repurchase from warrant holders at a fixed price, the repurchase option covering the warrants may constitute an issuer tender offer subject to Rule 13e-4. The Commission granted an exemption from Rule 13e-4; however, based upon its conclusion that the repurchase option did not appear to present any of the abuses that Rule 13e-4 was designed to prevent, and on the offeror's representation that it would file a registration statement covering the warrants and would distribute copies of the amended registration statement to warrant holders at the time the repurchase option became effective.

For a discussion of a transnational tender offer where the Commission allowed the transaction to go forward with

certain exemptions from Rule 13e-4, *see* Procordia Aktiebolag and Aktiebolaget Volvo, Securities Exchange Act Release No. 34-27671, C.C.H. Fed. Sec. L. Rep. P 84,514 (1990). The transaction was structured as two concurrent offers, one made outside the U.S. and not open to U.S. persons and the other made to U.S. stockholders, with both subject to the same terms and conditions.

(n53)Footnote 53. *See* Rule 13e-4(f)(8)(i).

(n54)Footnote 54. *See* Rule 13e-4(f)(8)(ii).

(n55)Footnote 55. *See* Rule 13e-4(f)(9)(ii).

(n56)Footnote 56. *See* Rule 13e-4(f)(11).

(n57)Footnote 57. *See* Rule 13e-4(f)(3).

(n58)Footnote 58. *See* Rule 13e-4(f)(3)(i).

(n59)Footnote 59. *See* Rule 13e-4(f)(4).

(n60)Footnote 60. *See* Rule 13e-4(f)(5).

(n61)Footnote 61. *See* Rule 13e-4(f)(6)(i). A similar provision applies to tender offers that are exchange offers. *See* Rule 13e-4(f)(6)(ii). In Revlon, Inc., SEC No-Action Letter, 1983 SEC No-Act. LEXIS 2629 at *1 (July 21, 1983), the Division of Market Regulation determined that an issuer could privately purchase shares of its stock immediately after termination of an issuer tender offer involving shares of the same class despite the ten day waiting period requirement of Rule 13e-4 since the private purchases were not likely to result in the manipulative practices contemplated by the Rule.

(n62)Footnote 62. *See* Rule 13e-4(h)(5). *See also* LA-MAN Corp., C.C.H. Fed. Sec. L. Rep. P 78,102 (Div. Mkt. Reg. 1985), where the staff indicated that it would not recommend enforcement action if an issuer failed to file a Schedule 13E-4 or otherwise comply with Rule 13e-4 in connection with an offer to repurchase its shares from shareholders who purchased the shares from the issuer in transactions that may have violated the Securities Act, because:

- (1) the repurchase offer was contingent on sales of the issuer's securities in connection with a public offering reaching a certain minimum level;
- (2) the repurchase offer and the new offering were described in the same prospects; and
- (3) it was unlikely that any securities would be tendered under the repurchase offer.

See also Merrill Lynch, Pierce, Fenner & Smith, Inc., C.C.H. Fed. Sec. L. Rep. P 78,318 (Div. Mkt. Reg. 1986), where the staff granted an exemption from Rule 13e-4 for transactions arising from the court ordered divestiture by American Telephone and Telegraph Company (AT&T) of regional telephone companies. The staff granted the exemption in connection with an odd lot program allowing employees receiving distribution of AT&T and regional telephone company shares from an employee savings plan to sell those shares in the open market at lower transaction costs than generally applicable in odd lot transactions, since the program resulted from the court ordered divestiture, and involved a one-time distribution.

(n67)Footnote 67. *See* Rule 13e-4(h)(4).

(n68)Footnote 68. See Rule 13e-4(h)(7).

(n69)Footnote 69. See Rule 13e-4(h)(8).

(n70)Footnote 70. The filing of Schedule TO must be accompanied by a fee of one-fiftieth of one percent of the value of the securities proposed to be purchased provided that the fee shall be reduced in an amount equal to any fee paid for securities in connection with the proposed transaction under the registration provisions of Securities Act Section 6(b), or the fee paid under Securities Act Section 6(b) shall be reduced in an amount equal to the fee paid with the filing of Schedule TO. See Rule 0-11.

See *Shamrock Holdings, Inc. v. Polaroid Corp.*, C.C.H. Fed. Sec. L. Rep. P 94,370 (D. Del. 1989), where litigation arising from a defensive self-tender offer by defendant Polaroid in the context of a takeover effort by the Shamrock plaintiffs, characterization of the "objective" and the "primary purpose" of the self-tender offer in terms of shareholder investment benefit, adding lastly that the self-tender offer was also a "partial response" to Shamrock's offer, was not materially false and misleading for failure to state that the principal purpose of the self-tender offer was to fend off Shamrock by entrenching Polaroid's management in anticipation of the annual meeting. The court stated that investors were "charged with knowledge" of management's "universal" interest in preserving corporate control, besides which there was "regular media coverage" of Shamrock's continued efforts to take over Polaroid. *Id.* at P 92,439.

CHAPTER 7A The Williams Act Amendments-- Controlling Shareholders and Tender Offers

2-7A Federal Securities Exchange Act of 1934 § 7A.05

AUTHOR: Chang-Do Gong This chapter was prepared by Morton A. Pierce and Chang-Do Gong with the assistance of Daniel Hackney. Messrs. Pierce and Gong are partners of Dewey & LeBoeuf LLP. and Mr Hackney is an associate of Dewey & LeBoeuf LLP.

§ 7A.05 Cross-Border Tender Offers

On September 19, 2008, the Commission published changes to the rules governing cross-border tender offers and business combinations involving foreign private issuers. n1 The amended rules became effective on December 8, 2008.

The Commission's amendments were intended to expand the scope of exemptions for cross-border transactions involving foreign private issuers from certain tender offer rules and regulations. The amendments also allow certain non-U.S. institutions to report their share ownership on Schedule 13G, rather than Schedule 13D, to the same extent as would be permitted for similar U.S. institutions.

Regulation 14D and Regulation 14E under the Exchange Act set forth a complex set of tender offer rules and requirements intended to ensure that all security holders in the context of a tender offer are treated equally and are provided with sufficient time and information in deciding whether or not to participate in the tender offer. The regulation of cross-border tender offers under the U.S. securities laws contains two tiers of exemptions and regulatory relief which are primarily based upon the level of ownership by United States shareholders of the securities of the foreign target company. The "Tier I" exemptions apply where U.S. holders own no more than 10 percent of the securities of the subject foreign company and exempt such offer from most of the rules and requirements under Regulation 14D and Regulation 14E. The "Tier II" exemptions apply when U.S. holders account for between 10 percent and 40 percent of the foreign target company's share ownership and provide more limited exemptions from certain tender offer regulations.

Under the Commission's amendments, the underlying Tier I and Tier II exemption structure remains in place. The amendments instead alter the process by which share ownership calculations are performed for the purposes of determining eligibility and further expand the scope of the exemptions to provide relief from additional regulatory requirements.

Rule 14d-1 under the Exchange Act has been amended to alter the "look-through" analysis of target record holders to determine levels of U.S. beneficial ownership. Acquirers may now calculate U.S. ownership levels as of any date that is

no more than 60 days before and no more than 30 days after public announcement of the offer. Prior rules required calculation as of the 30th day prior to the commencement of the offer. In addition, the Commission has abandoned its requirement that holders of more than 10 percent of the subject securities be excluded from the calculation. In the past, the exclusion of 10 percent or greater holders served to significantly inflate the calculated percentage of U.S. holders in the case of target companies whose shares were held by one or more significant shareholders. Lastly, in the case of hostile tender offers or tender offers for which look-through analysis of the subject company's record holders cannot be conducted, the amendments provide an alternative test based upon the average daily trading volume of the target securities in the United States and worldwide.

The Commission's amendments made a number of other modifications and adjustments to the regulatory requirements of cross-border offers designed to reduce conflict between U.S. tender offer regulation and common foreign regulatory structures and market practices, including, among other changes, the following:

- **Withdrawal Rights.** The amendments permit relief from Section 14(d)(5) and Rule 14d-7 withdrawal rights such that the bidder may terminate withdrawal rights at the end of the initial offering period while tendered shares are counted and the offeror determines whether a subsequent offering period will be necessary.
- **Multiple Non-U.S. Offers.** Prior rules permitted a bidder to separate its offer into only two separate offers, a U.S. offer and a non-U.S. offer. The amendments recognize the need of many bidders to comply with multiple non-U.S. jurisdictions by allowing multiple foreign offers to be conducted contemporaneously with the U.S. offer.
- **Tier II Subsequent Offering Periods.** The amendments permit Tier II cross-border offers to extend subsequent offering periods which last beyond 20 business days.
- **Foreign Holders of ADRs.** The amendments permit the inclusion of foreign holders of ADRs within a U.S. offer. In addition, under certain circumstances U.S. holders will be permitted to participate in foreign offers.

The Commission's amendments also modify the treatment of certain foreign entities under Sections 13(d) and 13(g) of the Exchange Act. Under the earlier Rule 13d-1(b), the class of institutional investors eligible to use Schedule 13G (rather than the more burdensome Schedule 13D) to report their beneficial ownership of registered securities, was limited to investment companies, investment advisors, brokers and dealers which were U.S. institutions registered with the Commission, as well as entities such as insurance companies, banks and pension plans which were regulated under the laws of the United States. The Commission's new regulations permit comparable non-U.S. institutions to report their beneficial ownership of securities on Schedule 13G to the same extent as similar U.S. entities. Foreign institutions desiring to use Schedule 13G must (i) certify that they are subject to a home country regulatory scheme substantially comparable to the regulatory scheme applicable to functionally equivalent U.S. institutions, (ii) assert that the subject securities are acquired and held in the ordinary course of business and without the purpose or effect of influencing control over the issuer, and (iii) be willing to furnish to the Commission, upon request, information that would otherwise be disclosed in a Schedule 13D filing.

CHAPTER SA-8 SPECIAL ALERT TO CHAPTER 8

2- Federal Securities Exchange Act of 1934

SEC Requires Electronic Filing of Section 16(a) Reports_and_@_)_and_footnotes(n2);.vk n*

Rules Mandate Electronic Filing and Website Posting of Change of Beneficial Ownership Reports Required to be Filed by Officers, Directors and Principal Security Holders Pursuant to Section 16(a) of the Exchange Act

On April 24, 2003, the United States Securities and Exchange Commission (the "Commission") adopted rules requiring electronic filing and website posting of forms filed under Section 16(a) of the Securities Exchange Act reporting corporate insiders' ownership and transactions in company securities. These rules implement Section 403 of the Sarbanes-Oxley Act of 2002 and complement the accelerated two-day reporting requirement adopted by the Commission in August 2002. Mandatory electronic filing and website posting requirements become effective on June 30, 2003, a month earlier than required under the Sarbanes-Oxley Act.

Directors, executive officers and 10% owners of a class of securities (collectively, "Insiders") are required to file Forms 3, 4 and 5 ("Section 16 Reports") pursuant to Section 16(a) of the Exchange Act of 1934 and the rules thereunder. Forms 4 generally are required to be filed within two business days after a reportable transaction. Currently, Section 16 Reports can be filed electronically or by paper. The rules adopted today (i) require Insiders to file all Section 16 Reports electronically, and (ii) require issuers to post Section 16 Reports on their websites by the end of the business day following the filing date. A company can satisfy the website posting requirement by linking to filings on the SEC's Edgar database or to other third-party databases if certain conditions are satisfied.

These rules also provide that, effective June 30, 2003:

- The deadline for electronic filing of Section 16 Reports will be extended from 5:30 p.m. Eastern Standard Time on the date on which a Section 16 Report is due to 10:00 p.m. Eastern Standard Time. Thus, if a Form 4 is filed electronically before 10:00 p.m. EST on its due date, it will be treated as timely filed. (This extended filing deadline will not be available for other SEC filings, such as Forms 8-K, 10-K and 10-Q or for registration statements. Although those reports currently can be submitted electronically between 5:30 and 10:00 p.m. EST, they are not deemed to be filed until the next business day.)
- For a period of one year, companies will not be required to report an Insider's late Section 16 Report

2- Federal Securities Exchange Act of 1934

filings in their Forms 10-K or proxy statements, **if** the Section 16 Report is filed only one day late.

- Insiders or issuers who encounter technical difficulties in filing Section 16 Reports will not be able to file a Form TH, which provides an automatic deadline extension, for late Section 16 Reports. Instead, they will need to request that the Commission adjust the filing date under Rule 13 of Regulation S-T if they can demonstrate to the Commission staff that they meet the requirements for an adjusted filing date.

The Commission is developing special features for the EDGAR filing system that will facilitate electronic filing of Section 16 Reports. On March 24, 2003, the Commission established a test system providing an easy, on-line template system for EDGAR filings of Section 16 Reports. Under the new EDGAR filing system for Section 16 Reports, Insiders can type Section 16 transaction data into an on-line template, add any applicable attachments and file the Report. The Commission is currently adjusting this system to reflect comments that have been suggested by trial users. However, we expect that this system will be operational in early May 2003 to make actual electronic filings of Section 16 Reports. From that date until June 30, 2003, Insiders may file Section 16 Reports through the new EDGAR filing system or by making a paper filing. After the June 30, 2003 effective date of today's rules, Insiders will be required to file Section 16 Reports through the new EDGAR filing system. In addition, a number of vendors have announced that they are developing filing programs that will interface with the new EDGAR filing system for Section 16 Reports.

CHAPTER 8 Insider Reporting and Short-Swing Trading

2-8 Federal Securities Exchange Act of 1934 8.syn

AUTHOR: Elliot Cohen Tim Mast Robert M. Carmen Jaime Theriot Marvin G. Pickholz Alan H. Aronson

§ 8.syn Synopsis to Chapter 8: Insider Reporting and Short-Swing Trading

Scope

§ 8.01 Introduction

§ 8.02 Who is an Insider?

[1] Directors and Officers

[a] Directors.

[b] Officers.

[2] Principal Security Holders

[a] Beneficial Ownership For Purposes of Determining 10% Shareholder Status.

[i] Incorporation of Section 13(d) Beneficial Ownership Principles.

[ii] Exclusion of Certain Securities Held by Institutional Investors.

[iii] Attribution of Beneficial Ownership to Group Members.

[iv] 10% Shareholder Status of Trusts, Trustees, Beneficiaries, and Settlers.

[v] Disclaiming Beneficial Ownership.

[b] Determining Percentage of a Class of Equity Securities Registered Under Section 12 For Purposes of Determining 10% Shareholder Status.

[3] Certain Trusts With Insider Trustees Deemed Indirect Insiders

§ 8.03 Reporting Requirements Under Section 16(a)

[1] Section 16(a) Reporting Requirements Generally

[a] Purpose.

[b] Related Statutory Provisions.

[c] Administration.

[2] "Equity Securities of Such Issuer" and "Derivative Securities"

[a] Equity Securities Generally.

[b] Derivative Securities Generally

[i] Introduction.

[ii] Interpretations Limiting Scope of Definition for Policy Reasons.

[iii] "Grandfathering" of Instruments Granted Before May 1, 1991 as Non-Derivative Securities.

[A] The 1991-1996 Exclusions for Certain Cash-Only Rights.

[B] Scope of the Grandfather for Cash-Only Rights.

[c] Scope of General Definition of "Derivative Securities."

[i] Exercisable and Convertible Instruments.

[ii] Instruments With Value Derived From Equity Securities.

[d] Exclusions From the Definition of "Derivative Securities."

[3] Beneficial Ownership

[a] Beneficial Ownership Generally.

[b] Pecuniary Interest.

[c] Family Relationships.

[d] Partnerships.

[e] Corporations.

[f] Trusts

[i] Overview.

[ii] Obligations of Trusts.

[iii] Obligations of Trustees.

[iv] Obligations of Beneficiaries.

[v] Obligations of Settlers.

[vi] Obligations of Remainderpersons.

[g] Performance Fees.

[h] Certain Other Interests.

[4] Forms and Filings

[a] Overview of the Reporting System.

[b] Events Triggering Filings of Forms; Filing Deadlines.

[i] Form 3 Filings.

[ii] Form 4 and Form 5 Filings.

[iii] Transactions Not Required to be Reported.

[iv] Changes to the Reporting Regime under the Sarbanes-Oxley Act of 2002.

[c] Reporting of Transactions Before Becoming an Insider and After Ceasing To Be an Insider; Simultaneous Transactions.

[i] Pre-Insider Transactions.

[ii] Post-Insider Transactions; "Exiting" Insider Disclosures.

[iii] Simultaneous Transactions.

[d] Problem Areas of Form 3, 4, and 5 Reporting.

[e] Filing Procedures.

[i] When to File.

[ii] Supplying Copies of Filed Forms.

[iii] Signatures on Filed Forms.

[iv] Amendments.

[v] Disclaimers.

§ 8.04 Liability for "Short-Swing" Profits Under Section 16(b)

[1] "Who is Subject to Liability?"

[a] Directors and Officers.

[b] Principal Security Holders.

[2] "Purchase and Sale"

[a] Gifts.

[b] Conversions of Securities.

[c] Corporate Recapitalizations and Simplifications.

[d] Transfers of Securities Between Affiliates.

[e] Stock Options.

[f] Corporate Reorganizations.

[g] Tender Offers and Defensive Mergers.

[h] "Forced" Cash Transactions; Sale by Pledgee.

[3] "Any Period of Less Than Six Months"

[a] Time of Purchase or Sale.

[i] Contingent or Conditional Agreements.

[b] Rescissions.

[4] "Profit Realized"

[a] From the Purchase and Sale of Securities.

[i] Prejudgment Interest.

[ii] Dividends.

[iii] Control Premiums.

[b] From the Purchase or Sale of Options.

[5] Procedure

[a] Proper Forum.

[i] Jurisdiction.

[ii] Venue.

[6] Who May Institute an Action?

[7] Defenses; Counterclaims; Settlements

[a] Statute of Limitations.

[b] Demand Upon the Issuer.

[c] Waiver and Estoppel.

[d] Counterclaims.

[e] Settlements.

[8] Attorney's Fees

§ 8.05 Prohibition of "Short Sales" and Restrictions on "Short Sales Against the Box" and Delayed Deliveries--Section 16(c)

[1] "Short Sales"

[2] "Short Sales Against the Box" and Delayed Delivery

[3] Derivative Securities Under Section 16(c)

[a] Status of Acquisitions of Derivative Securities as Sales for Purposes of Section 16(c).

[b] Status of Rights to Acquire Equity Securities as "Ownership" of the Equity Securities for Purposes of Section 16(c).

§ 8.06 Exemptions

[1] Exemption for Stock Splits, Stock Dividends, and Pro Rata Rights Distributions--Rule 16a-9

[2] Exemption for the Reinvestment of Dividends or Interest--Rule 16a-11

[3] Exemption for Transactions Pursuant to Domestic Relations Orders--Rule 16a-12

[4] Exemption for Changes in the Form of Beneficial Ownership--Rule 16a-13

[5] Temporary Exemption for Executors and Administrators of Estates--Rule 16a-2(d)

[6] Section 16(a) and 16(b) Exemptions for Transactions by Market Professionals

[a] Exemption of Certain Transactions Effected in Connection With a Distribution--Rule 16a-7.

[b] Exemption for Odd-Lot Dealers--Rule 16a-5.

[7] Reporting Deferral for Small Transactions--Rule 16a-6

[8] Exemptions for Regulated Entities

[a] Exemption for Certain Transactions by Investment Companies--Rule 16b-1(a).

[b] Exemption for Certain Transactions by Public Utility Holding Companies and Their Subsidiaries--Rule 16b-1(b).

[9] Exemptions for Transactions Between an Issuer and Its Officers and Directors--Rule 16b-3

[a] Background of Rule 16b-3.

[b] Four Broad Categories of Exemptions.

[i] Look-Back Exemption for "Discretionary Transactions."

[ii] Blanket Exemption for Tax-Conditioned Plans.

[iii] Multiple Exemptions for Acquisitions from and Dispositions to the Company.

[A] Non-Employee Directors.

[B] Satisfying the Advance Approval Requirements.

[C] Operation of the Exemptions for Acquisitions and Dispositions.

[D] Applicability to Mergers.

[c] Elimination of Old Rule 16b-3 Plan Requirements.

[d] Elimination of Old Rule 16b-3 Exemptions.

[e] Repeal of the Exemption for Cash-Only Rights.

[10] Exemption for Directors and Officers for the Acquisition of a Security by Redemption--Rule 16b-4

[11] Exemption for Transactions Relating to Bona Fide Gifts and Inheritance--Rule 16b-5

[12] Exemptions for Certain Exercises, Conversions, and Dispositions of Derivative Securities

[13] Exemptions for Certain Mergers, Reclassifications, and Consolidations--Rule 16b-7

[14] Exemption for Deposits or Withdrawals Under Voting Trusts or Deposit Agreements--Rule 16b-8

[15] Section 16(b) Exemption for Securities Acquired in Connection With a Debt Previously Contracted

[16] Exemption for Market Makers--Section 16(d)

[17] Exemption for Certain Foreign Issuers--Rule 3a12-3

[18] Exemption for Arbitrage Transactions--Section 16(e)

[19] Exemptions from Section 16(c)

[a] Exemption for Certain Transactions by Brokers--Rule 16c-1.

[b] Exemption from Section 16(c) of Certain Transactions Effected in Connection With a Distribution--Rule 16c-2.

[c] Exemption for Sales of Securities to be Acquired--Rule 16c-3.

[d] Exemption for Possible Short Sales Relating to Fully-Hedged Derivative Securities Transactions--Rule 16c-4.

CHAPTER 8 Insider Reporting and Short-Swing Trading

2-8 Federal Securities Exchange Act of 1934

AUTHOR: Elliot Cohen Tim Mast Robert M. Carmen Jaime Theriot Marvin G. Pickholz Alan H. Aronson

Summary of This Chapter

Exchange Act Section 16 was enacted to curb the abuse of inside information by corporate insiders. In general, Section 16 sets forth disclosure requirements for corporate insiders, imposes strict liability for the profits realized by insiders' short-swing trading, prohibits short sales by corporate insiders, and provides various exemptions from these provisions. See § 8.01 *infra*.

The provisions of Section 16 apply to the corporate insider, defined as a person or entity that is the beneficial owner of more than ten percent of any equity security registered under Exchange Act Section 12, or a director or officer of the issuer of any equity security registered under Exchange Act Section 12. Persons or entities that may be considered insiders under Section 16 include corporations, trusts (treated as a separate entity for this purpose), trustees, beneficiaries, and settlors thereof, partnerships, individual partners, and limited liability companies. See § 8.02 *infra*.

Insiders are required to file public reports detailing their holdings and transactions in the equity securities of their corporations. Initial reports of securities beneficially owned (including information as to puts, calls, options, and other rights or obligations) are made on Form 3. Certain changes in beneficial ownership of such securities are required to be reported promptly on Form 4. Previously unreported transactions and a narrow class of transactions that are exempt from current reporting on Form 4 are reportable on a year end Form 5. Failure to disclose the required information can result in civil or criminal proceedings. See § 8.03 *infra*. In addition, issuers must disclose the names of delinquent filers and other information in proxy statements relating to annual meetings of shareholders and in the Annual Report on Form 10-K (or Form 10-KSB).

An insider is subject to liability under Section 16(b) for profits realized from the purchase and sale, or sale and purchase, of any equity security of the issuer within any period of less than six months. A voluntary cash-for-stock transaction constitutes a purchase or sale for purposes of Section 16(b), but more exotic exchanges and changes in ownership interests may also be subject to Section 16(b). An issuer may bring an action under Section 16(b) to recover profits realized by an insider's short-swing trades; or, if the issuer declines to bring suit or does not diligently prosecute a Section 16(b) action, any security holder of that issuer may institute an action on behalf of the issuer. Section 16(b)

imposes strict liability on insiders who violate its provisions, if the statutory terms are met. Unless an exemption takes a transaction out of the scope of Section 16(b), no defenses are available to the insiders except for the running of the statute of limitations. See §§ 8.04 and 8.06 *infra*.

Under Section 16(c), an insider is prohibited from engaging in 'short sales' (selling equity securities of his company that he does not own at the time of sale). An insider who sells a security must deliver the security within a specified time, unless the required delivery would cause undue inconvenience or expense. See § 8.05 *infra*.

The Commission has exempted from all or some of the provisions of Section 16 certain transactions. Transactions exempted from both Section 16(a) reporting and Section 16(b) liability include certain transactions arising from a pro rata stock split, stock dividend, or rights distribution, acquisitions under dividend or interest reinvestment plans, or under certain tax-qualified employee benefit plans, transactions pursuant to divorce decrees, dispositions upon expiration of a call option, certain pre-insider transactions, transactions by fiduciaries during the 12 months after appointment involving securities held by an estate, certain transactions by dealers and underwriters in connection with a distribution, and odd-lot transactions by an odd-lot dealer (also exempted from Section 16(c)). Certain small acquisitions are exempted from the requirement that they be reported currently on a Form 4 under Section 16(a), but such transactions are reportable on the year-end Form 5 and remain subject to potential Section 16(b) liability. Certain transactions between an issuer and its officers and directors (including transactions under employee benefit plans that do not satisfy the tax-qualified plan exemption) and transactions involving exercises and conversions of options and other derivative securities are exempt from potential Section 16(b) liability, but nevertheless must be reported on a Form 4. Certain transactions exempted only from Section 16(b) liability and not from Section 16(a) reporting include certain transactions by registered investment companies, registered public utility holding companies, and companies subject to the Interstate Commerce Act, certain issuer redemptions, bona fide gift and inheritance transactions, and dispositions of derivative securities where no value is received, certain transactions resulting from mergers and related transactions between a parent company and a subsidiary at least 85%-owned by the parent, certain transactions relating to the deposit of securities in or withdrawal of securities from a voting trust, and acquisitions in connection with a debt previously contracted. In addition, Section 16 provides an exemption for market makers and foreign and domestic arbitrage transactions, and the Commission has adopted a complete exemption for the securities of certain foreign issuers. Exemptions from Section 16(c)'s short-sale prohibition are also provided for brokers acting in an agency capacity, dealers participating in a distribution, sales of 'when-issued' or 'when-distributed' securities, and fully-hedged short sales resulting from transactions in put and call options. See § 8.06 *infra*.

CHAPTER 8 Insider Reporting and Short-Swing Trading

2-8 Federal Securities Exchange Act of 1934 § 8.01

AUTHOR: Elliot Cohen Tim Mast Robert M. Carmen Jaime Theriot Marvin G. Pickholz Alan H. Aronson

§ 8.01 Introduction

Exchange Act Section 16 was enacted to curb the abuse of inside information by corporate insiders. In general, Section 16 sets forth disclosure requirements for corporate insiders, imposes strict liability for the profits realized by insiders' short-swing trading, prohibits short sales by corporate insiders, and provides various exemptions from these provisions.

Section 16 was enacted, and later amended, in response to a history of abuse of inside information by corporate insiders. n1 The types of short-swing transactions that prompted the enactment of Section 16 included:

- (1) transactions in which insiders, with advance knowledge of information that would produce a rise in the market price of their company's stock, bought company stock at current market prices and then sold when publication of the information caused the anticipated rise in the price of the stock;
- (2) transactions in which insiders, with advance knowledge of information that would depress the market price of their company's stock, sold their stock at current market prices and then purchased company stock when publication of the information caused the anticipated depressing effect in the price of the stock; and
- (3) manipulation by insiders of the market price of their company's stock by causing their company to pursue financial policies calculated to produce sudden fluctuations in market prices and then timing their purchases and sales of company stock accordingly. n2

Congress sought to curb insider trading abuses by:

- (1) encouraging the maintenance of proper fiduciary standards by insiders through the publication of the holdings and transactions of insiders in the securities of their corporations; and
- (2) imposing strict liability for the profits realized by insiders from matching purchases and sales or sales and purchases of their corporations' securities within a period of less than six months. n3

In addition, the modifications to Section 16(a) mandated under the Sarbanes-Oxley Act of 2002 were effectuated to make information available to all investors on a more timely basis to increase market transparency and to enhance market efficiency and liquidity. n4

The disclosure requirements for corporate insiders are set forth in Section 16(a) and require the filing of statements of beneficial ownership of an issuer's equity securities. n5 Section 16(b) creates an action for the recovery of profits realized from an insider's short-swing trading. n6 Section 16(c) prohibits a corporate insider from engaging in 'short sales.' n7 Section 16(d) and Section 16(e), and rules promulgated under Section 16, however, provide various exemptions to these provisions. n8

During 1991, the Commission adopted major amendments to its rules and forms under Section 16. n9 The 1991 Section 16 rules generally became effective on May 1, 1991, except that, for transactions under employee benefit plans, issuers could continue to rely on exemptions from short-swing profits liability under the old rules during a "phase-in period." The phase-in period lasted until November 1, 1996, when further rule revisions (primarily relating to employee benefit plan transactions) became fully effective. See § 8.06[7] *infra*. The 1991 Rules represented the first comprehensive revision of the Section 16 rules ever. The principal revisions to the rules were as follows: (i) definitions of who are officers and ten-percent shareholders subject to Section 16 are set forth, (ii) broader definitions of securities "beneficially owned" are set forth, thus expanding reporting and potential liability, (iii) a tiered reporting scheme, under which some transactions were reported annually on the specially created Form 5, was established, (iv) in an effort to reduce noncompliance with the Section 16(a) reporting requirements, issuers are required to name in proxy statements and Form 10-Ks (or Form 10-KSBs, if applicable) insiders who have been delinquent in their Section 16 filings, (v) acquisitions of options and other 'derivative securities' (as defined) are treated as 'purchases' of the underlying equity securities for purposes of Section 16(b), which makes it clear that transactions in standardized options are subject to Section 16 reporting and liability, (vi) most exercises of options and other derivative securities are exempted from Section 16(b) liability because, in the SEC's view, such transactions lack the potential for speculative abuse, and (vii) the exemptions for employee benefit plans and other transactions between an issuer and its officers and directors were revised and simplified, a development taken even further through additional amendments to Rule 16b-3 that were adopted in 1996.

Changes in the reporting system under Section 16(a) resulted from amendments to the statute adopted in 2002. While always an element of Section 16, the requirements under Section 16(a) that insiders report their transactions through reports filed with the Commission has taken on increasing significance in recent years, as officers' and directors' access to company stock has increased through equity compensation arrangements and investors' interests in information on such transactions has increased. These trends, together with perceived abuses of the reporting system, culminated with the adoption of amendments to Section 16(a) as part of the Sarbanes-Oxley Act of 2002. Under those amendments, Forms 4 are generally required to be filed within two business days of the triggering transaction and electronic filing and company website disclosures of such filings was mandated.

Section 16(b) is a "crude rule-of-thumb" n10 developed to prevent the unfair use of inside information, with predictability and certainty, by prohibiting all short-swing trading by an insider within a period of less than six months. Section 16(b) has been criticized for not requiring proof that an insider intended to use or actually knew of inside information in engaging in short-swing trades. n11 However, Section 16(b) reflects a Congressional belief that the unfair use of inside information could be effectively curbed only by the imposition of strict liability for short-swing transactions. n12 Section 16(b) is not arbitrary, however, liability may be imposed upon an innocent violator of its provisions but not upon a manipulator of inside information who intentionally times transactions to avoid liability.

The intention of Congress in enacting Section 16(b) was to create limited areas of clear and unambiguous liability for engaging in certain transactions. n13 In practice, however, the objective and mechanical nature of Section 16(b) continues to be defined by the courts. Some courts have inquired into whether a particular transaction provided the opportunity for the abuse of inside information that Section 16(b) seeks to prevent before determining whether the

requirements of the section should be applied to those transactions, while others have attempted to expand the scope of some of its terms to encompass perceived potential abuses of the type Section 16 was intended to address. n14 As a result, counsel may be uncertain as to his client's liability under Section 16(b) for engaging, or planning to engage, in a particular transaction. This uncertainty as to Section 16's applicability is contrary to the intention of Congress.

Short-swing trading not only comes within the purview of Section 16(b), but could also involve a violation of Exchange Act Section 10(b) and *Rule 10b-5* promulgated thereunder, which provide a remedy for the employment of any manipulative or deceptive device or contrivance "in connection with the purchase or sale of a security." n15 Moreover, some state courts have held that insiders who trade for their own benefit on the basis of inside information are deemed to have breached their corporate fiduciary duty and may be held accountable to the corporation for any profits received. n16

The adoption of a corporate policy imposing restrictions on trading in the securities of the corporation by insiders helps to eliminate an insider's risk of incurring liability for short-swing trading. The New York Stock Exchange Company Manual makes the following observations, among others, regarding insiders' purchases and sales of stock:

- (1) One appropriate method of purchase might be a periodic investment program where the directors or officers make regular purchases under an established program administered by a broker and where the timing of purchases is outside the control of the individual.
- (2) It would also seem appropriate for officials to buy or sell stock in their companies for a 30-day period commencing one week after the annual report has been mailed to shareholders and otherwise broadly circulated (provided, of course, that the annual report has adequately covered important corporate developments and that no new undisclosed developments occur within that period).
- (3) Transactions may also be appropriate under the following circumstances, provided that prior to making a purchase or sale a director or officer contacts the chief executive officer of the company to be sure there are no important developments pending which need to be made public before an insider could properly participate in the market--
 - (a) Following a release of quarterly results, which includes adequate comment on new developments during the period.
 - (b) Following the wide dissemination of information on the status of the company and current results. For example, transactions may be appropriate after a proxy statement or prospectus which gives such information in connection with a merger or new financing.
 - (c) At those times when there is relative stability in the company's operations and the market for its securities. Under these circumstances, timing of transactions may be relatively less important. Of course such periods of relative stability will vary greatly from time to time and will also depend to a large extent on the nature of the industry or the company.
- (4) Where a development of major importance is expected to reach the appropriate time for announcement within the next few months, transactions by directors and officers should be avoided.
- (5) Corporate officials should wait until after the release of earnings, dividends, or other important developments have appeared in the press before making a purchase or sale. This permits the news to be widely disseminated and negates the inference that officials had an inside advantage. Similarly, transactions just prior to important press releases should be avoided. n17

FOOTNOTES:

(n1)Footnote 1. Among the most vicious practices unearthed at the hearings before the subcommittee was the flagrant betrayal of their fiduciary duties by directors and officers of corporations who used their position of trust and the confidential information which came to them in such positions, to aid them in their market activities. Closely allied to this type of abuse was the unscrupulous employment of inside information by large stockholders who, while not directors and officers, exercised sufficient control over the destinies of their companies to enable them to acquire and profit by information not available to others. (n12)Footnote 12. "The corporate official and director has his problems and they are not just problems of his business. He has to worry about his responsibilities as a fiduciary-at times he has been called a trustee. He must conduct his business under complex rules in many areas which require nice judgments and subtle distinctions as to appropriate and inappropriate action. As to short-term trading, however, Section 16(b) relieves him of that worry. There is little need to make judgments. Section 16(b) is about as subtle as a sledge hammer, and perhaps this is why people tend to get a little emotional about it. It doesn't leave much room for argument. Therein, in part, lies its virtue. The clamor for certainty is pretty well satisfied in this section of the law. It does not make short-swing trading illegal. It does not prohibit. It merely says that if you trade, pay over the profit. It speaks with an eloquence not often misunderstood.' CHAPTER 8 Insider Reporting and Short-Swing Trading

2-8 Federal Securities Exchange Act of 1934 § 8.02

AUTHOR: Elliot Cohen Tim Mast Robert M. Carmen Jaime Theriot Marvin G. Pickholz Alan H. Aronson

§ 8.02 Who is an Insider?

The provisions of Section 16 apply to the corporate insider, i.e., a person or entity who is a beneficial owner of more than ten percent of any equity security registered under Exchange Act Section 12 or a director or officer of the issuer of any equity security registered under Exchange Act Section 12.

Section 16(a)'s reporting requirements, Section 16(b)'s short-swing profits liability provisions, and Section 16(c)'s prohibition of short sales apply to a person or entity that is:

- (1) directly or indirectly the beneficial owner n1 of
 - (a) more than ten percent n2 of
 - (b) any class n3 of any equity security n4
 - (c) other than an exempted security n5
 - (d) registered under Section 12 of the Exchange Act, n6
- (2) a director n7 of the issuer of any equity security (other than an exempted security) registered under Section 12 of the Exchange Act, or
- (3) an officer n8 of the issuer of equity security (other than an exempted security) registered under Section 12 of the Exchange Act. n9

Among the persons or entities that may be considered to be insiders under Section 16 are corporations, n10 persons in control of corporations, n11 trusts n12 and the trustees, settlors, and beneficiaries thereof, n13 partnerships, n14 individual partners, n15 and others, including limited liability companies. n16

[1] Directors and Officers

A primary aim of Congress in enacting Section 16 was to deter and to prevent individuals who, because of their corporate position, have access to confidential information from using such information to engage in profitable securities transactions. n17

[a] Directors. The term "director" is defined by Section 3(a)(7) of the Exchange Act to mean a director of a corporation or a person performing similar functions with respect to any incorporated or unincorporated organization.

Because the term director encompasses persons performing similar functions, it would appear to encompass trustees of business trusts, members of committees issuing certificates of deposit, and trustees of voting trusts. n18 In addition, the Commission staff takes the position that general partners of a limited partnership which has equity securities registered under Exchange Act Section 12 perform the functions of directors with respect to the publicly held limited partnership. n19

Advisory or emeritus directors will be considered a director under Commission and staff interpretations if such persons are "invited to attend board meetings of the issuer to assist in policy formation and, therefore, ... have access to material, non-public information." n20 The Commission has suggested, however, that honorary directors usually are not deemed to be directors under this test, while advisory and emeritus directors generally are (even though they do not vote as directors). n21

A person or entity that has authorized an individual to serve on the board of directors of an issuer may also be deemed to be a "director" of that issuer for purposes of Section 16. The individual actually serving as director is deemed to have been "deputized" by the other person or entity, so that the deputizing person or entity is deemed also to be a director. As a result, transactions by the deputizing person or entity are subject to potential short-swing profits liability under Section 16(b). n22

Although the standards for determining whether a director has been "deputized" are somewhat unclear, a finding of deputization under Section 16(b) generally rests on a showing that:

- (1) the deputizing entity intended the director to act as its representative on the board of directors of the issuer; and
- (2) the transactions of the deputizing entity in the issuer's equity securities were made with the advice of the deputizing entity's deputy and this advice was based on the deputy's knowledge of inside information about the second corporation. n23

The Commission has also stated that a director for the purposes of Section 16(a) includes a person who has the power by agreement or otherwise to designate another to be a director of a corporation because that person is likely to have access to inside information by reason of his relationship to the designated director. n24 Other than reaffirming this position, the Commission did not attempt to codify the law of deputization in the 1991 Section 16 rules. n25

The Commission staff will no longer express a view on the factual question of whether a particular person is a director for the purposes of Section 16(a), n26 leaving the determination to the issuer, and ultimately to courts.

[b] Officers. Effective May 1, 1991, the Commission adopted a new definition of the term "officer" for purposes of Section 16. n27 Under Rule 16a-1(f), the term "officer" includes (i) an issuer's president, (ii) any vice president in charge of a principal business unit, division or function (such as sales, administration, or finance), (iii) the principal accounting officer (or, if none, controller) and principal financial officer, and (iv) any other person (including an officer of a parent or subsidiary) who performs for the issuer a policy-making function that is significant.

The Rule 16a-1(f) definition of "officer" is essentially the same as the definition of "executive officer" in existing Exchange Act Rule 3b-7, except that the principal accounting officer (or controller) and principal financial officer are specifically included as "officers" under Rule 16a-1(f). n28 Issuers already must include beneficial ownership information for this "executive officer" group in their proxy statements pursuant to Item 403 of Regulation S-K and identify "executive officers" in their Annual Reports on Form 10-K pursuant to Item 401(b) of Regulation S-K. Indeed, a note to Rule 16a-1(f) sets forth a "presumption" that "executive officers" identified pursuant to Item 401(b) of Regulation S-K are also "officers" for purposes of the Rule 16a-1(f) definition. n29

Rule 16a-1(f)'s definition of the term officer in effect sets forth three ways for a person to qualify as an officer. First, certain persons are deemed to be officers based primarily upon their title, including a president, principal accounting officer (or controller) and principal financial officer. Second, certain vice presidents of the issuer are deemed to be "officers" if they are in charge of a principal business unit, division or function (such as sales, administration, or finance). Third, any other person who performs a significant policy-making function is an officer. n30

The new definition of "officer" under Rule 16a-1(f) that became effective May 1, 1991, resulted in some persons being deemed to be Section 16 officers for the first time, and others ceasing to be subject to Section 16. n31

An officer of the issuer's parent or a subsidiary may be deemed a Section 16 "officer" of the issuer if the person has a significant policy-making function. n32 The Commission has also taken the position that, for purposes of Section 16, an assistant to an officer will not be considered an officer if he regularly performs only routine administrative duties rather than significant policy-making functions. n33 In addition, an assistant who performs some of the duties of his superior will not be considered to be an officer if those duties are performed under the supervision of the officer he assists. n34 If, however, the assistant regularly performs a substantial part of the duties of his chief, he may be considered to be an officer under Section 16. n35

If an issuer is a limited partnership, limited liability company, or a trust, officers or employees of any general partner, managing member, or trustee who perform policy-making functions for the issuer are deemed officers of the issuer. n36

Significantly, the definition of the term "officer" (as well as other definitions under the 1991 rules) apply for purposes of Section 16(b) as well as Section 16(a). n37 This raises a question as to the continuing validity of holdings in the prior cases that have examined who is an "officer" for purposes of Section 16(b). It appears, however, that the Commission's focus on "policy-making" functions is generally consistent with the prior cases.

The courts, in determining liability under Section 16(b), had generally looked to the relationship of an individual with the issuer to determine whether the individual would have access to the type of inside information the abuse of which Section 16 seeks to prevent. The judicial trend had been to avoid the automatic imposition of Section 16(b) liability simply because an individual had a title listed in Rule 3b-2. n38

The courts had also attempted to prevent the intentional structuring of corporate offices through the formalities of titles to avoid Section 16(b) liability. In *Colby v. Klune*, n39 the court, on appeal, found that the trial court improperly granted summary judgment because there was an issue of fact as to whether defendant, a "production manager" was an officer of the corporation. The court refused to be limited by the labeling of functions or the corporate bylaws' definition of the position. n40

For the purposes of determining liability under Section 16(b), the courts had made factual inquiries, beyond the fact that a person has a title and therefore nominally possesses officer status, to determine whether access to inside information actually accompanies the position. This was especially true with respect to vice presidents, some of whom may possess few of the executive responsibilities suggested by their titles. In *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Livingston*, n41 the court stated that the title of vice president "does no more than raise an inference that the person who holds the title has the executive duties and the opportunities for confidential information that the title implies." n42 The

case involved an account executive whose honorary promotion pursuant to a company program for rewarding outstanding executives did not change the nature of his work or access to inside information. The court concluded that the defendant was not an officer for the purposes of Section 16(b), because liability under Section 16(b) did not follow from a person's title, but rather was based on "the existence of a relationship with the corporation that makes it more probable than not that the individual has access to insider information." n43

Although Rule 16a-1(f) changed the focus of the inquiry to the specific tests set forth in the Rule, particularly "policy-making," the Commission made it clear that the Rule was intended to codify the principles developed by the courts. n44 Accordingly, some cases pre-dating the 1991 Rules should continue to provide guidance as to the meaning of the term "officer" under Section 16.

The staff will not give advice in response to questions of whether a particular person is an officer under Rule 16a-1(f), stating that the determination is to be made by the issuer and its counsel. n45

[2] Principal Security Holders

In addition to directors and officers of an issuer, every individual who directly or indirectly is the beneficial owner of more than ten percent of any registered class of equity security of an issuer is considered to be an insider who is subject to the provisions of Section 16. n46 Congress included stockholders with significant beneficial stock ownership within the coverage of Section 16 since they "exercised sufficient control over the destinies of their companies to enable them to acquire and profit by information not available to others." n47

In adopting the new Section 16 rules in 1991, the Commission radically altered the method by which a person's status as a 10% shareholder is determined. Under the new rules, a person becomes a 10% shareholder subject to Section 16 if he becomes a beneficial owner of more than 10% of an outstanding class of equity securities under the "beneficial ownership" rules under Section 13(d) of the Exchange Act, subject to certain limited exceptions for institutional shareholders. n48 Reliance on the Section 13(d) rules defining beneficial ownership, which focus on a security holder's ability to influence or control an issuer as a result of equity ownership, is appropriate, the Commission reasoned, because Congress intended Section 16 "to reach those persons who could be presumed to have access to inside information because of their interest in the issuer's securities." n49

It is crucial to understand that the Section 13(d) rules are used only to determine who has the *status* of a 10% shareholder subject to Section 16. A person who has such status, like a person who is a director or officer, is a Section 16 insider who must file Forms 3, 4, and 5 to report "beneficial ownership" and changes in "beneficial ownership" of equity securities of the issuer under Section 16(a). For purposes of determining the securities holdings to be disclosed on such reports -- indeed, for all purposes under Section 16 other than determining who is a 10% shareholder -- the Section 13(d) concepts of "beneficial ownership" are irrelevant. Rather, "beneficial ownership" for these other Section 16 purposes, as defined under Rule 16a-1(a)(2), depends on the insider having or sharing a direct or indirect "pecuniary interest" in equity securities, a definition much closer to the historic interpretation of the term "beneficial ownership" under Section 16. n50

This dual definition of "beneficial ownership" can result in some anomalies, because a person may have Section 13(d) beneficial ownership over more than ten percent of an outstanding class, and therefore be a Section 16 insider, and yet have reportable beneficial ownership (in the "pecuniary interest" sense) over fewer or no shares. n51 For example, a trustee could have voting or dispositive power over securities held in trust so that he would be deemed a 10% shareholder (unless he qualifies for one of the exceptions under Rule 16a-1(a)(1), as discussed below). Such trustee would not be deemed a "beneficial owner" of trust securities for reporting purposes if he did not have a "pecuniary interest" in such shares. n52 In such case, the trustee would have to file an initial Form 3, indicating on such Form that he is a "10% Owner" (in Box 5 on the Form), but he would not list any of the trust securities in Table I and Table II of the Form. n53 Exceptions under Rule 16a-1(a)(1), however, prevent many institutional investors who have voting or

dispositive power in securities held for others from being deemed 10% shareholders, as discussed below. n54

[a] Beneficial Ownership For Purposes of Determining 10% Shareholder Status.

[i] Incorporation of Section 13(d) Beneficial Ownership Principles. As noted above, Rule 16a-1(a)(1) provides that, solely for purposes of determining whether a person has insider status as a 10% shareholder, the term "beneficial owner" under Section 16 means any person who is deemed a beneficial owner pursuant to Section 13(d) of the Exchange Act and the rules thereunder, subject to certain exceptions. Prior to adoption of Rule 16a-1(a)(1) in 1991, the Commission had not formally defined terms relating to "beneficial ownership" for Section 16 purposes, and no clear distinction was made between "beneficial ownership" for purposes of determining who is a 10% shareholder and "beneficial ownership" for other Section 16 purposes. n55

Under Section 13(d), a person is a "beneficial owner" of equity securities as to which he directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise, has or shares voting power or investment power. n56 A person is also deemed to beneficially own equity securities if he has a right to acquire voting or investment power over such equity securities within 60 days through exercise of an option, warrant, or right or conversion of a security, pursuant to the power to revoke a trust, discretionary account, or similar arrangement, or pursuant to the automatic termination of a trust, discretionary account, or similar arrangement. n57 In addition, if a person becomes a member of a "group" for purposes of Section 13(d) through an agreement to act together with others for the purpose of acquiring, holding, voting or disposing of equity securities of an issuer, such person is deemed to beneficially own equity securities that are held by other group members and are subject to such agreement. n58

Although the rules under Section 13(d) have evolved over the years since the 1968 enactment of Section 13(d), application of the Section 13(d) rules under Section 16 poses a number of difficulties. First, the Section 13(d) rules deliberately use broad language applicable to a wide range of arrangements and relationships in order to promote the filing of Schedules 13D and 13G, disclosing securities holdings that could affect control of an issuer. Under Rule 16a-1(a)(1), these same broad rules now dictate whether a person is subject to potential strict liability for short-swing transactions under Section 16(b). Arguably, rules that impose strict liability should be drafted more narrowly than rules that promote disclosure. Second, litigation involving the rules under Section 13(d) has, in the past, generally been limited to issues relating to corporate control contests, with "beneficial ownership" issues only occasionally being of central importance. Technical issues regarding "beneficial ownership" have now become a more significant focus of litigation because the imposition of potential short-swing profits liability on would-be 10% shareholders will turn on such issues. In fact, most litigation over the Section 13(d) standard of beneficial ownership occurs in the context of Section 16(b) claims. Finally, determining who is a 10% shareholder under Section 13(d) rules may cause the transaction that results in a person becoming a 10% shareholder being treated as a separate event from a Section 16 purchase, subjecting the purchase to possible short-swing profits liability. n59

[ii] Exclusion of Certain Securities Held by Institutional Investors. Rule 16a-1(a)(1) provides an exclusion for certain equity securities held by specified institutional investors, so that, even though such securities are deemed to be "beneficially owned" for purposes of Section 13(d), n60 they are not deemed to be "beneficially owned" for purposes of the 10% shareholder calculation. n61 The exclusion applies to the same institutional investors that are eligible to file a short-form Schedule 13G in lieu of a Schedule 13D under Rule 13d-1(b)(1). n62 In this regard, the Commission staff has interpreted Rule 16a-1(a)(1) in a manner consistent with past interpretations under Rule 13d-1(b)(1), making the exclusion available to certain foreign institutions who control eligible institutions that do not otherwise qualify under the literal terms of the Rule. n63 The exclusion under Rule 16a-1(a)(1), like eligibility to file the short-form Schedule 13G under Rule 13d-1(b)(1), is available only if the equity securities were acquired "without the purpose or effect of changing or influencing control of the issuer," n64 or engaging in any arrangement having the purpose or effect of divesting such person of beneficial ownership as part of a plan or scheme to evade reporting requirements. n65

An institutional investor eligible to file the short-form Schedule 13G under Rule 13d-1(b)(1) may not, in determining its

status as a 10% shareholder under Rule 16a-1(a)(1), exclude all equity securities of the issuer that it beneficially owns, but may only exclude equity securities "held for the benefit of third parties or in customer or fiduciary accounts in the ordinary course of business." n66 In other words, certain equity securities holdings of institutional investors are not excluded under Rule 16a-1(a)(1) even though they are reportable on a short-form Schedule 13G. For example, securities held by a broker-dealer or investment adviser in its own investment or proprietary account or by an insurance company in its general account would be reportable on the short-form Schedule 13G but probably could not be excluded from that institution's beneficial ownership under Rule 16a-1(a)(1). But, the Commission and its staff have concluded that equity securities held in the following ways are eligible to be excluded under Rule 16a-1(a)(1):

- (1) in an insurance company's "separate accounts," in which assets are segregated for the exclusive benefit of specified customers; n67
- (2) as portfolio securities held by mutual funds or most other registered investment companies; n68
- (3) as portfolio securities held by an endowment fund for the benefit of the organization for which the fund was created; and n69
- (4) as portfolio securities held by a master trust that serves as a funding vehicle for defined benefit pension plans subject to ERISA. n70

[iii] Attribution of Beneficial Ownership to Group Members. As noted above, each member of a Section 13(d) group is, for purposes of Rule 16a-1(a)(1), deemed to beneficially own the shares beneficially owned by the group. n71 This position effectively overrules a number of court rulings that members of a group that held more than 10% of an outstanding class of equity securities are not, due to such group membership, deemed to be subject to Section 16 as 10% shareholders, if such members did not have a pecuniary interest in other group members' shares. n72 In a departure from the Section 13(d) rules relating to groups, the Commission does not treat the group itself as a separate entity subject to Section 16, so no separate Form 3, 4, or 5 filing by the group is required. n73 Rather, for purposes of determining whether the individual member is a 10% shareholder, the equity securities beneficially owned by the group must be included in calculating the number of shares beneficially owned by any individual member. n74

Attribution of beneficial ownership of group shares to individual group members for purposes of the 10% shareholder calculation may result in a greater number of Section 16 insiders in some circumstances. Because the test for whether a group has been created--whether two or more persons have entered into any agreement to act together for the purpose of acquiring, voting, holding, or disposing of equity securities--is very broad, a party to a shareholder agreement, a voting trust, or even a standstill agreement will run the risk of becoming a Section 16 insider if the group's beneficial ownership (plus any separate beneficial ownership) exceeds ten percent of an outstanding class. n75 The Commission staff has taken the position, based on the particular facts presented, that an individual is not deemed to be a member of a group where he became subject to the agreement relating to shares not as a result of his voluntary act. n76

Although equity securities beneficially owned by a group are attributed to individual members for purposes of the 10% shareholder calculation, a group member who is deemed to be an insider would report, on any Form 3, 4, or 5, beneficial ownership of, and transactions relating to, only equity securities in which he has a "pecuniary interest." n77

[iv] 10% Shareholder Status of Trusts, Trustees, Beneficiaries, and Settlor. Although for most purposes a trust is not treated as a legal entity, Rule 16a-8(a)(1) n78 treats a trust as an entity that can beneficially own the shares held in the trust. n79 Accordingly, a trust can become subject to Section 16 as a distinct 10% shareholder, with Form 3, 4, and 5 filing obligations separate from the obligations of any trustee, settlor, or beneficiary of the trust. n80

The beneficial ownership rules under Section 13(d), as modified under Rule 16a-1(a)(1), apply for purposes of determining whether a trust is a 10% shareholder. n81 In this regard, the exclusion under Rule 16a-1(a)(1) for employee

benefit plans or pension funds subject to ERISA is available to a trust holding assets for such a plan. n82 The Rule 16a-1(a)(1) exclusion provides that equity securities that would otherwise be attributed to a plan and its related trust will not be counted for purposes of determining whether such plan or trust is a 10% shareholder if the securities are allocated to plan participants where participants have voting power. n83 As in the case of the Rule 16a-1(a)(1) exclusion for other kinds of institutional investors, the exclusion is available to plans and trusts only if the issuer's equity securities were acquired by the plan or trust without the purpose or effect of changing or influencing control of the issuer or engaging in an arrangement intended to evade the reporting requirements. n84

In addition to the Section 16 obligations that may be imposed on a trust as an entity, a trustee that has or shares voting or dispositive power over equity securities held in trust must include such equity securities with other equity securities he beneficially owns (in the Section 13(d) sense) in determining whether he is a 10% shareholder under Rule 16a-1(a)(1). n85 Of course, a trustee that is an institutional investor eligible for the exclusion under Rule 16a-1(a)(1) would be able to exclude the trust shares in determining whether it is a 10% shareholder, if the requirements of the exclusion are met. n86 The Commission and its staff have suggested that an individual who is one of several trustees will be attributed beneficial ownership (in the Section 13(d) sense) of trust securities for purposes of Rules 16a-8(a)(2) and 16a-1(a)(1), but this position appears to be at odds with the staff's prior interpretation of the Section 13(d) rules. n87

Beneficiaries and settlors of a trust are deemed to beneficially own securities held in the trust, for purposes of determining their status as 10% shareholders, if they have voting or dispositive power or otherwise have beneficial ownership of such shares under the Section 13(d) rules, except to the extent the Rule 16a-1(a)(1) exclusion might apply to an institutional investor. n88 In addition, Rule 16a-8(a)(2)(ii) attributes beneficial ownership of trust shares to a settlor that has the power to revoke the trust without the consent of another person. n89

[v] Disclaiming Beneficial Ownership. A person filing a Form 3, 4, or 5 may state that the filing shall not be deemed an admission that such person is, for purposes of Section 16, or otherwise, the beneficial owner of any equity securities of the issuer. n90

[b] Determining Percentage of a Class of Equity Securities Registered Under Section 12 For Purposes of Determining 10% Shareholder Status. For purposes of determining whether the equity securities beneficially owned by a person constitute more than ten percent of an outstanding class of equity securities, in order to determine whether such person is a 10% shareholder subject to Section 16, the rules under Section 13(d) apply. n91

Significantly, under the Section 13(d) rules, the term "equity security" is narrower than under the Section 16 rules, because securities that would otherwise constitute equity securities but which do not carry the right to vote are not deemed to be a separate class of equity securities for Section 13(d) purposes. n92

As discussed above, a right to acquire equity securities that is exercisable within 60 days (or, if the right is acquired in a transaction having a control purpose or effect, exercisable at any time) constitutes beneficial ownership of the equity securities that could be acquired. n93 The reference to a 13(d) standard to determine beneficial ownership represented a significant departure from the standard that beneficial ownership for Section 16 purposes derived only if a person derived a pecuniary benefit from such ownership. n94 Moreover, potential liability under Section 16(b) has been broadened because these definitions, unlike the former rules, apply for purposes of determining who is subject to Section 16(b) as well as Section 16(a). n95

Accordingly, a holder of more than ten percent of an outstanding class of Section 12-registered convertible debentures convertible (within 60 days) into less than ten percent of an outstanding class of Section 12-registered common stock would not be subject to Section 16 as a 10% shareholder, assuming no other holdings of the common stock. n96 If such person held convertible debentures (whether or not Section 12-registered) convertible (within 60 days) into an amount of Section 12-registered stock that, by itself or together with his other beneficial ownership of such common stock, would constitute more than ten percent of the outstanding class of common stock, such person would be subject to

Section 16 as a 10% shareholder (with respect to the common stock). n97 If a person beneficially owns a convertible security that is itself a Section 12-registered equity security, such as a convertible preferred stock carrying voting rights, n98 such person would be a 10% shareholder, if his holdings of preferred stock constituted more than ten percent of the outstanding class of preferred stock or if the amount of common stock he could acquire upon conversion of the preferred stock, by itself or together with his other beneficial ownership of such common stock, would constitute more than ten percent of the outstanding class of common stock. n99

To compute the percentage of an outstanding class of equity securities a person beneficially owns, any equity securities such person is deemed to beneficially own because the person could acquire them upon exercise of a right to acquire (including a conversion privilege) are added to the number of equity securities outstanding, but equity securities that would be issued upon exercise of rights to acquire held by other persons are not added to the number of equity securities outstanding. n100 To determine the amount of outstanding securities of a class of equity securities, a person may rely on information set forth in the issuer's most recent quarterly report on Form 10-Q (or Form 10-QSB), annual report on Form 10-K (or Form 10-KSB), and current report on Form 8-K filed with the Commission, unless the person knows or has reason to believe that the information contained therein is inaccurate. n101

Questions can also arise as to what constitutes a "class" of equity securities, such as in cases involving multiple series of voting preferred stock or multiple classes of common stock. n102 Section 12(g)(5) of the Exchange Act defines the term "class" to include for Section 12(g) purposes.

all securities of an issuer which are of substantially similar character and the holders of which enjoy substantially similar rights and privileges. n103

The Commission has taken the position that two series of registered preferred stock that differ only with respect to dividend rate and redemption price would be treated as part of a single class for purposes of determining whether a person is a 10% shareholder. n104 The staff has taken the position that separate classes of common stock that carry different voting rights will each be considered to be a distinct class, and in a number of cases, courts have held that securities with similar voting and other rights are to be treated as different "classes" for purposes of Section 16. n105

Whether equity securities are registered under Section 12 of the Exchange Act is an objective question. n106 The requirements of Section 16 apply at any time after such registration, even if the issuer may have voluntarily registered the class of equity it was not in fact required to do so. n107

[3] Certain Trusts With Insider Trustees Deemed Indirect Insiders

From February 1991 until August 1996, a SEC rule provided that, in certain circumstances, a trust could be subject to Section 16 even if not a beneficial owner of 10% of an outstanding class of equity securities. This rule was repealed in 1996, largely because it only resulted in duplicative reporting. n108 Prior to its repeal, former Rule 16a-8 (a)(1)(ii) subjected a trust to Section 16, if the following conditions existed:

- (1) the trustee of the trust was a director, officer, or 10% shareholder subject to Section 16; n109
- (2) the trustee exercised or shared investment control over the issuer's equity securities held by the trust;
and
- (3) either the trustee or a member of the trustee's immediate family had a pecuniary interest in the issuer's securities held by the trust. n110

Under this rule, the trust was treated as a distinct entity, separate from the insider trustee, even though any Form 3, 4, or 5 would have been signed by the insider trustee on behalf of the trust. n111

Rule 16a-8(a)(1)(ii) contained two exceptions. First, a trust would not be subject to Section 16 if the trustee was an entity or person that in the ordinary course of business acted as a trustee and was an entity or person specified under Rule 16a-1(a)(i)-(viii).ⁿ¹¹² Second, a trust would not be subject to Section 16 if the trustee was an officer or director of the issuer serving as trustee for the issuer's employee benefit plan trust.ⁿ¹¹³

FOOTNOTES:

(n1)Footnote 1. The definition of beneficial ownership for these purposes is discussed in § 8.02[2][a] *infra*.

(n2)Footnote 2. Determination of the more than ten percent beneficial ownership requirement is discussed in § 8.02[2][b] *infra*.

(n3)Footnote 3. The definition of class is discussed in § 8.02[2][b] *infra*.

(n4)Footnote 4. The definition of equity security for these purposes is discussed in § 8.02[2][b] *infra*.

(n5)Footnote 5. The term "exempted security" includes government securities, municipal securities, certain common and collective investment funds of banks, and other securities, including securities exempted by the Commission. See Exch. Act § 3(a)(12); Rules 3a12-1 through 3a12-10. In most cases, securities that are "exempted securities" would not, in any event, come within the definition of "equity securities" for purposes of determining status as a 10% shareholder subject to Section 16. The one exception to this can arise in the case of securities of certain foreign issuers, exempt under Rule 3a12-3, discussed in § 8.06[17] *infra*.

(n6)Footnote 6. Registration of securities under Section 12 of the Exchange Act is discussed in § 4.01 *supra*.

(n7)Footnote 7. The definition of a director is discussed in § 8.02[1][a] *infra*.

(n8)Footnote 8. The definition of an officer is discussed in § 8.02[1][b] *infra*.

(n9)Footnote 9. Exch. Act §§ 16(a)-(c).

Pursuant to Section 30(h) of the Investment Company Act of 1940, the provisions of Section 16 of the Exchange Act also apply to direct or indirect beneficial owners of more than ten percent of any class of outstanding securities, other than short term paper, issued by a registered closed-end investment company, officers and directors of that company, and members of an advisory board, investment advisors, or affiliates of an investment adviser of the registered closed-end investment company.

Section 17 of the Public Utility Holding Company Act of 1935 is substantially identical to Section 16 of the Exchange Act although its applicability is limited to directors or officers of a registered public utility holding company. Section 17 is, however, broader than Section 16 in that it applies to transactions by those directors and officers in any securities, rather than to just equity securities, of the holding company or any subsidiary of the holding company.

The rules promulgated under Section 16(a) of the Exchange Act apply to persons filing reports under Rule 30f-1(a) of the Investment Company Act, see Rule 30h-1, 17 C.F.R. § 270.30h-1, and Rule 72(a) of the Public Utility Holding Company Act, see Rule 72, 17 C.F.R. § 250.72.

(n11)Footnote 11. See § 8.02[2][a] *infra*.

(n12)Footnote 12. See §§ 8.02[2][a][iv] and 8.02[3] *infra* .

(n13)Footnote 13. See § 8.02[2][a][iv] *infra*.

(n14)Footnote 14. See § 8.02[2] *infra*.

(n15)Footnote 15. See § 8.02[2] *infra*.

(n16)Footnote 16. See § 8.02[2] *infra*.

(n17)Footnote 17. "Among the most vicious practices unearthed at the hearings before the Subcommittee was the flagrant betrayal of their fiduciary duties by directors and officers of corporations who used their positions of trust and the confidential information which came to them in such positions, to aid them in their market activities." S. Rep. No. 1455, 73d Cong., 2d Sess. 55 (1934).

(n18)Footnote 18. Cook & Feldman, *Insider Trading Under the Securities Exchange Act*, 66 Harv. L. Rev. 385, 400 (1953).

(n19)Footnote 19. See Integrated Resources American Insured Mortgage Investors--Series 85, SEC No-Action Letter (available March 25, 1986). In that interpretive letter, the staff stated that, in its view, even a general partner that was disabled by contract from participating in the management of the issuer was a Section 16 insider. See *id*. Similarly, managing members of limited liability companies or trustees of business trusts may be considered the equivalent of corporate directors.

(n20)Footnote 20. Exch. Act Rel. No. 34-26,333, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,343 at 89,602 (Dec. 2, 1988). The staff further indicated that the determination as to whether a particular advisory, emeritus or honorary director should be treated as a director under Section 16 would be dependent on such person's underlying responsibilities, privileges and access to insider information. *Id*. In the Adopting Release, *supra* at note 9, the Commission stated that the new Rules do not change prior staff interpretations, which are set out in Exch. Act Rel. No. 34-18,114. Fed. Sec. L. Rep. (CCH) P 26,062, at 19,063-6 (Sept. 23, 1981) (question 2), and that a person's title would not be determinative as to whether such person was a director for Section 16 purposes.

(n21)Footnote 21. Exch. Act Rel. No. 34-26,333, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,343, at 89,601 (Dec. 2, 1988). Compare Associated Madison Cos., Inc., SEC No-Action Letter, [1971-1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 78,705, at 80,728 (Jan. 7, 1972) (members of advisory council, who did not attend board meetings and who had no voice in management decisions, not deemed directors) with Fort Worth National Corporation, SEC No-Action Letter, [1971-1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 78,309, at 80,728 (July 8, 1971) (members of advisory board, who attended board meetings to assist in the formulation of company policy, deemed directors).

(n22)Footnote 22. The application of the concept of deputization for the imposition of Section 16(b) liability was recognized by the Supreme Court in *Blau v. Lehman*, 368 U.S. 403 (1962), although the Court in *Blau* held that the defendant-partnership was not liable.

(n23)Footnote 23. In *Feder v. Martin Marietta Corp.*, 406 F.2d 260 (2d Cir. 1969), *cert. denied*, 396 U.S. 1036 (1970), the court concluded that the president of the defendant corporation, who had been asked to join the board of directors of the issuer and who then received regular reports on the issuer's progress while at the same time supervising the defendant's investments, was a deputy of the defendant.

See also *Blau v. Lehman*, 368 U.S. 403, 82 S.Ct. 451, 7 L.Ed. 2d 403 (1962) (director of issuer who was a partner of defendant-partnership not deemed a deputy of the defendant-partnership where transactions in issuer securities by the defendant-partnership were made independently and without the specific knowledge of the partner); *Rattner v. Lehman*,

193 F.2d 564 (2d Cir. 1952) (defendant-partnership not liable under Section 16(b) where its transactions in issuer securities were made without any advice or concurrence from the defendant's partner sitting on the board of the issuer); *Marquette Cement Mfg. Co. v. Andreas*, 239 F. Supp. 962 (S.D.N.Y. 1965) (a corporation whose stock was held in trusts of which the defendant was trustee was not liable for transactions in the plaintiff's stock resulting in profits to the corporation made by the defendant-trustee while a director of the issuer); *Lasker v. Pyle-National Co.*, [1964-1966 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,684 at 95,499 (S.D.N.Y. 1966) (underwriter not deemed to be a director merely because one of its general partners was also a director of the issuer).

(n24)Footnote 24. Exch. Act Rel. No. 34-18,114, Fed. Sec. L. Rep. (CCH) P 26,062, at 19,063-7 (Sept. 23, 1981) (question 3). Thus, if Company X and Company Y enter into a loan agreement whereby Company X is expressly given the right to designate a person to serve on the board of directors of Company Y, and Company X subsequently designates its vice president to sit on Company Y's board of directors, Company X may be deemed to be a director of Company Y for the purposes of Section 16(a). *Id.* Smaller, less seasoned issuers commonly agree to contractual terms allowing lenders or underwriters to designate directors, raising these Section 16 issues for the lender or underwriter. *See Roth v. Parseus L.L.C.*, 2006 U.S. Dist. LEXIS 52321 (S.D.N.Y. July 28, 2006) (deputization found where Board representatives gave deputizing entity access to inside information); *see also, Segen v. CDR-Cookie Acquisitions, L.L.C.*, 2006 U.S. Dist. LEXIS 3053 (S.D.N.Y. Jan 4, 2006) (defendants found to be directors by deputization when right to appoint three directors was exercised).

Exch. Act Rel. No. 34-28,869 [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,251, n.27 (Feb. 8, 1991); Exch. Act Rel. No. 34-26,333, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,343, at 89,602 (Dec. 2, 1988).

(n25)Footnote 25. The Commission affirmed that this interpretation remains valid under the Section 16 rules adopted in 1991. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,251 n.27 (Feb. 8, 1991).

(n26)Footnote 26. Exch. Act Rel. No. 34-18,114, Fed. Sec. L. Rep. (CCH) P 26,062, at 19,063-6 (Sept. 23, 1981).

(n27)Footnote 27. Rule 16a-1(f). *See* Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,251 (Feb. 8, 1991).

The term "officer" is not defined in the Exchange Act. Prior to the effectiveness of Rule 16a-1(f), the definition of the term officer under Exchange Act Rule 3b-2 applied for purposes of Section 16. Rule 3b-2 defines an officer as a president, vice president, secretary, treasurer or principal financial officer, comptroller or principal accounting officer of an issuer, whether incorporated or unincorporated, or any other persons who routinely perform functions corresponding to those performed by the specifically mentioned individuals.

(n28)Footnote 28. As a practical matter, the class of "officers" for purposes of Section 16 typically includes the same officers who are treated as "affiliates" for purposes of Rule 144 under the Securities Act of 1933, as amended.

(n29)Footnote 29. Thus, except to the extent that certain persons are not deemed to be Rule 3b-7 "executive officers," an issuer's "executive officers" and Section 16 "officers" should be identical.

(n30)Footnote 30. The determination of whether a given vice president's duties put him or her in charge of a principal business unit, division, or function, or whether a person has significant policy-making function, involves factual determinations. A determination on these questions by the issuer's board of directors, which assigns functions of the officers to begin with, should be entitled to a presumption of validity. *See* Rule 16a-1(f) (Note).

(n31)Footnote 31. *See* Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,251 (Feb. 8, 1991). Any person who was deemed to be an "officer" for the first time under this definition

was required to file a Form 3 on or before May 1, 1991. Such a person, however, was not required to report transactions that occurred during the six months before May 1, 1991, and was not subject to short-swing profits liability with respect to such transactions. *See* Exch. Act Rel. No. 234-8,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,275-76 (Feb. 8, 1991). The old requirements for Section 16 insiders to report transactions that occurred before they became insiders were deleted under the 1991 rules, except in the case of a person's becoming a Section 16 insider due to the issuer's first registration of a class of equity securities under Section 12 of the 1934 Act. *See* Rule 16a-2(a).

A person who ceased being a Section 16 officer as a result of the 1991 definitions (an "exiting" insider) was not required to file Forms 4 to report transactions occurring on or after May 1, 1991. The Commission staff took the position that exiting insiders are not subject to Section 16(b) liability with respect to transactions following the effectiveness of the 1991 Rules. *See* Bryan, Cave, McPheeters & McRoberts, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,679, at 78,087 (Apr. 25, 1991); Joseph A. Grundfest, et al., SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. P 79,678, at 78,085 (Apr. 25, 1991).

(n32)Footnote 32. Rule 16a-1(f). *See* Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,281 (Feb. 8, 1991) (revised response to question 1(b)); Exch. Act Rel. No. 18,114, Fed. Sec. L. Rep. (CCH) P 26,062, at 19,063-5-19,063-6 (Sept. 23, 1981) (question 1).

Under prior law, one court had concluded that Section 16(b) does not permit the recovery of short-swing profits where the defendant was an officer of the wholly owned subsidiary of the issuer and was not functioning as an officer of the issuer. *Lee Nat'l Corp. v. Segur*, 281 F. Supp. 851 (E.D. Pa. 1968).

See also Associated Bank & Services Inc., SEC No-Action Letter, Fed. Sec. L. Rep. (CCH) P 78, 334 (June 23, 1971) (officers and directors of subsidiary banks, wholly owned by the issuer, did not have to file Section 16(a) reports because they served administrative functions rather than having policy-making responsibilities; the Commission's staff stated, however, that this position should not be construed as a determination that officers and directors of subsidiary banks are not subject to Section 16(a)).

(n33)Footnote 33. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,281 (Feb. 8, 1991) (revised response to question 1(a)); Exch. Act Rel. No. 18,114, Fed. Sec. L. Rep. (CCH) P 26,062, at 19,063-5-19,063-6 (Sept. 23, 1981).

(n34)Footnote 34. *Id.* *See also* the opinion of the General Counsel of the Commission, Sec. Exch. Act Rel. No. 34-2,687, Fed. Sec. L. Rep. (CCH) P 26,058 (1940), stating that an assistant who performs the duties of an officer during the temporary absence or brief vacation of the officer was not an officer under the Exchange Act.

(n35)Footnote 35. Exch. Act Rel. No. 34-18,114, Fed. Sec. L. Rep. (CCH) P 26,062, at 19,063-6-19,063-7 (Sept. 23, 1981).

(n36)Footnote 36. Rule 16a-1(f). Presumably, this rule applies only if such policy-making functions are "significant," as with officers of corporate entities.

(n37)Footnote 37. *Compare Colby v. Klune*, 178 F.2d 872 (2d Cir. 1949) (concluding that definition of the term "officer" not limited by Rule 3b-2 for purposes of Section 16(b)).

(n38)Footnote 38. *See C.R.A Realty Corp. v. Crotty*, 878 F.2d 562 (2d Cir. 1989), in which the court held that a vice-president was not a company "officer" for the purposes of the Exchange Act's short swing trading provisions since, despite his title, his actual functions were of a middle management employee with no access to the company's financial or operational plans. The court added that the actual functions of an employee and not his corporate title determine status as an 'officer' within the purview of Section 16(b), a position endorsed by the Commission under the 1991 Rules.

Exch. Act Rel. No. 28,869 [1990 - 1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709 at 81,251 (Feb. 6, 1991).

Sloan*, 486 F.2d 340 (4th Cir. 1973), *cert. denied*, 419 U.S. 873 (1974) (vice president with mere staff functions and routine administrative chores not an officer under Section 16(b)); *Schimmel v. Goldman*, 57 F.R.D. 481 (S.D.N.Y. 1973) (vice president may raise issue as to whether he was an officer for purposes of Section 16(b) notwithstanding his having filed reports as an officer pursuant to Section 16(a)); *Morales v. Holiday Inns, Inc.*, 366 F. Supp. 760 (S.D.N.Y. 1973) (vice president who was "Director of Inn Operations" was in a position to acquire inside information); *Selas Corp. of America v. Voogd*, 365 F. Supp. 1268 (E.D. Pa. 1973) (executive vice president for international operations who was the chief operating officer of the most important section of the company's business and was one of the most active members on its executive committee liable under Section 16(b)).

(n44)Footnote 44. See Exch. Act Rel. No. 34-27,148, [1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,439, at 80,383-80,384 (Aug. 18, 1989).

(n45)Footnote 45. Exch. Act Rel. No. 34-18,114, Fed. Sec. L. Rep. (CCH) P 26,062, at 19,063-6 (Sept. 23, 1981); American Bar Association Joint Committee on Employee Benefits, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,719, at 78,252 (July 3, 1991) (declining to express a view on whether a general counsel constitutes an officer under Rule 16a-1).

The staff's position that the issuer and its counsel must make the determination, as well as the Note to Rule 16a-1(f) giving presumptive deference to the Board's determination of executive officer status, present a potential conflict with the fact that obligations under Section 16 fall on the director or officer, not on the issuer and its counsel. The issuer and its counsel, however, also have legal responsibility in shaping the issuer's disclosure under Item 405 of Regulation S-K of any delinquency by a director, officer, or 10% shareholder in complying with such person's reporting obligations under Section 16(a). As a practical matter, officers often look to the issuer for guidance on whether they are subject to Section 16. Regardless, the filing of Section 16 reports does not preclude a person from later challenging their status under Section 16, *Schimmel v. Goldman*, *supra* 8.02[1].

(n46)Footnote 46. Section 16(a)-(c).

(n47)Footnote 47. S. Rep. No. 1455, 73d Cong., 2d Sess., 55 (1934).

(n48)Footnote 48. Rule 16a-1(a)(1). *See* Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,252-53 (Feb. 8, 1991).

The rules defining "beneficial ownership" under Section 13(d) are discussed in §§ 7A.02[2] *supra*.

(n49)Footnote 49. Exch. Act Rel. No. 34-26,333, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,343, at 89,602-89,603 (Dec. 2, 1988).

(n50)Footnote 50. *See* Rule 16a-1(a)(1) (Section 13(d) tests apply "solely for purposes of determining whether a person is a beneficial owner of more than ten percent of any class of equity securities registered pursuant to Section 12"); Rule 16a-1(a)(2) (pecuniary interest tests apply "[o]ther than for purposes of determining whether a person is a beneficial owner of more than ten percent of any class of equity securities registered pursuant to Section 12").

(n51)Footnote 51. *See* Rule 16a-1(a)(1), Note.

(n52)Footnote 52. *See* Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254-81,256 (Feb. 8, 1991). *See also id.* at 81,254 (persons deemed 10% shareholders as a result of membership in a group holding 10% of a registered class of equity securities report beneficial ownership of shares in which they have a pecuniary interest on Forms 3, 4, and 5).

(n53)Footnote 53. If the trustee did not beneficially own (in Rule 16a-1(a)(2)'s "pecuniary interest" sense) any other equity securities of the issuer, the trustee would still be required to file the Form 3, but it should state that no securities are beneficially owned. If the trustee did beneficially own (in Rule 16a-1(a)(2)'s "pecuniary interest" sense) equity securities outside of the trust, his Form 3 would have to report beneficial ownership of such equity securities.

(n54)Footnote 54. *See* § 8.02[a][ii], *infra*.

(n55)Footnote 55. *See* Exch. Act Rel. No. 34-26,333, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,343, at 89,602 (Dec. 2, 1988); Exch. Act Rel. No. 18,114, Fed. Sect. L. Rep. (CCH) P 26,062, at 19,063-7 & n.17 (Sept. 23, 1981).

Prior to adoption of new Rule 16a-1(a), some, but not all, courts applied the same standards for purposes of determining whether a person was a 10% shareholder and for purposes of attributing purchases and sales of equity securities to an insider for purposes of Section 16(b). *See, e.g.,* Whittaker v. Whittaker Corp., 639 F.2d 516 (9th Cir. 1981); Whiting v. Dow Chemical Co., 523 F.2d 680 (2d Cir. 1975). *But see* CBI Industries, Inc. v. Horton, 682 F.2d 643 (7th Cir. 1982)(court concluded that fact that old Rule 16a-8 attributed "beneficial ownership" of trust securities to trustee where trust beneficiary was an immediate family member was irrelevant in determining whether profits were realized by the trustee for stock purchases made by the trust within six months of sales made by the trustee, because the purpose of Rule 16a-8 was limited to determination of insider status as a 10% shareholder and trustee was in any event an insider by virtue of his being a director).

(n56)Footnote 56. Rule 13d-3(a). "Voting power" includes the power to vote, or to direct the voting of, a security, and "investment power" includes the power to dispose, or direct the disposition, of a security. *Id.*

(n57)Footnote 57. Rule 13d-3(d)(1). Significantly, such a right to acquire (except for the automatic termination of a trust, discretionary account, or similar arrangement) will represent beneficial ownership even if not exercisable within 60 days *if* it was acquired with the purpose or effect of changing or influencing the control of the issuer or in connection with or as a participant in a transaction having such purpose or effect. *Id.*

In a significant interpretation, the staff took the position that a right to acquire shares at a future date upon conversion of preferred stock, where the amount of shares would be based on the extent to which their market price was less than \$6.00 at the determination date, would not represent beneficial ownership, for purposes of Rule 16a-1(a)(1), of any of

the shares that might potentially be acquired until the amount of shares would become fixed at the determination date. See Realty South Investors, Inc., SEC No-Action Letter, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,219, at 76,817 (June 17, 1992). The staff apparently reasoned that, even during the 60-day period (as specified under Rule 13d-3(d)(1)) prior to the specified determination date, there could be no certainty as to the number of shares that could be acquired, if any, so no quantifiable right to acquire the shares existed. However, the underlying preferred stock and the acquisition of a put equivalent security related to the initial strike price was reportable.

A related issue is whether a right to acquire shares that is subject to significant conditions or contingencies that are outside of the control of the person who is to acquire the shares does not represent a right to acquire, for purposes of Rules 16a-1(a)(1) and 13d-3(d)(1), until such conditions or contingencies are eliminated. The Commission staff has confirmed this view in private telephone interpretations, but has not published an interpretive letter clearly stating the conclusion. The staff has, however, taken the view that, for reporting purposes, a right to acquire that is subject to conditions other than the passage of time, continued employment, or changes in the market value of the securities does not constitute a "derivative security" that carries beneficial ownership of the underlying securities. See, e.g., Certilman Balin Adler & Hyman, SEC No-Action Letter, [1991-1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,144, at 79,338 (Apr. 20, 1992), discussed in § 8.03[2][c][i] & [ii] *infra*. Presumably, the staff will reach the same conclusion for purposes of Rules 16a-1(a)(1) and 13d-3(d)(1). See *Levner v. Prince Bin Talal Bin Abdulaziz Al Saud*, 61 F. 3d 8 (2d Cir. 1995) (affirming decision of no beneficial ownership where conversion of preferred stock was contingent upon Federal Reserve Board approval).

(n58)Footnote 58. Section 13(d)(3); Rule 13d-5(b). In a departure from the Section 13(d) and 13(g) rules, the "group" is not itself viewed as a separate person subject to Section 16. Instead, the members of the group are viewed as having beneficial ownership of all shares beneficially owned by other group members and subject to the agreement that creates the group. See Exch. Act Rel. No. 28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254, n.54 (Feb. 8, 1991).

(n59)Footnote 59. Rule 16a-2(c) states that the transaction that results in a person becoming a 10% shareholder is not subject to Section 16 (assuming the person was not otherwise subject to Section 16). This Rule in effect codifies the Supreme Court's holding in *Foremost-McKesson, Inc. v. Provident Securities Co.*, 423 U.S. 232 (1976). If, however, under new Rule 16a-1(a)(1) a person enters an agreement to acquire more than ten percent of an outstanding class of securities and obtains an irrevocable proxy giving him voting power over such securities, such person would then become a 10% shareholder. If the agreement represents a right to acquire securities at an exercise price that is not fixed, the "purchase" of the equity security under Rule 16b-6(a) (or acquisition of beneficial ownership under Rule 16a-1(a)(2)) may not occur until such contingencies are eliminated. Under these circumstances, it is unclear whether Rule 16a-2(c) and *Foremost-McKesson* would protect the entire transaction from Section 16(b), or whether there would be deemed to be a "purchase" subject to potential Section 16(b) liability.

(n60)Footnote 60. The rules under Section 13(d) provide other exclusions that may, in specified circumstances, prevent institutional investors from being deemed "beneficial owners" of securities for Section 13(d) purposes, which exclusions would have the same effect for purposes of determining status as a 10% shareholder under Section 16(a). See, e.g., Rule 13d-3(d)(2) (national securities exchange member firm not deemed beneficial owner of shares solely because of power to vote shares held for customers for which no voting instructions received); Rule 13d-3(d)(4) (underwriters acquiring securities in good faith in firm commitment underwriting registered under the Securities Act of 1933, as amended, not deemed beneficial owner of shares for forty days after acquisition); Rule 13d-3(d)(3) (certain pledgees not deemed beneficial owners until there is a default and the ability to exercise power to vote or dispose of pledged shares); Rule 13d-5(b)(2) (group not deemed to have acquired beneficial ownership solely by virtue of concerted action in connection with private placement by issuer if certain conditions met).

(n61)Footnote 61. See Exch. Act Rel. No. 28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,253 (Feb. 8, 1991); Exch. Act Rel. No. 34-27,148, [1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,439, at 80,385 (Aug. 18, 1989).

(n62)Footnote 62. As amended in 1998 in connection with amendments to Regulation 13D-G, those institutional investors are as follows:

- (1) A broker or dealer registered under Section 15 of the Exchange Act;
- (2) A bank as defined in Section 3(a)(6) of the Exchange Act;
- (3) An insurance company as defined in Section 3(a)(19) of the Exchange Act;
- (4) An investment company registered under Section 8 of the Investment Company Act of 1940;
- (5) An investment adviser registered under Section 203 of the Investment Advisers Act of 1940;
- (6) An employee benefit plan which is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") or any such plan that is not subject to ERISA that is maintained primarily for the benefit of state or local government employees, or an endowment fund;
- (7) A parent holding company or controlling person (including an individual), provided the aggregate amount of equity securities held directly by the parent or control person, and directly and indirectly by its subsidiaries and affiliates that are not persons specified in (1) through (6) above, or in (8) or (9) below, does not exceed one percent of the securities of the subject class;
- (8) A savings association as defined in Section 3(b) of the Federal Deposit Insurance Act;
- (9) A church plan, excluded from the definition of "investment company" under Section 3(c)(14) of the Investment Company Act of 1940; and
- (10) A group, all the members of which are persons specified in (1) through (9) above.

The Commission staff has confirmed that a trust holding securities for an employee benefit plan or pension fund subject to ERISA may be eligible for the Rule 16a-1(a)(1) exclusion, even if the trustee is not itself an institution that is eligible for the exclusion. See American Bar Association Joint Committee on Employee Benefits, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,719, at 78,252 (July 3, 1991). However, Section 16 continues to apply to greater than 10% beneficial owners who did not acquire such securities with the purpose or effect of changing or influencing the control of the issuer, even though the Commission adopted amendments to the Section 13(d) rules allowing such persons to file on Schedule 13G instead of on Schedule 13D. Exch. Act Rel. No. 39,538 (Jan. 12, 1998).

(n63)Footnote 63. See Invesco MIM PLC, SEC No-Action Letter (available Sept. 17, 1992); CS Holding, SEC No-Action Letter, [1991-1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,070, at 79,072 (Jan. 16, 1992).

In *CS Holding* Group, a group of foreign banks, broker-dealers, investment advisers, and an insurance company sought relief from Schedule 13D filing obligations. Such entities were similar to the type of entities eligible under Rule 13d-1(b)(1) to file a Schedule 13G in lieu of Schedule 13D, but were not eligible to use the Schedule 13G because Rule 13d-1(b)(1) (like the exclusion under Rule 16a-1(a)(1)) is available only to institutions subject to regulatory oversight under United States federal and state law. The staff advised the CS Holding Group that it would not recommend enforcement action if members of the group reported beneficial ownership of more than 5% of an outstanding class of

registered equity securities (a "subject class") on Schedule 13G rather than Schedule 13D. The staff's no-action relief was conditioned on the following: (1) the aggregate holdings of group members that were not institutions of the kind eligible for the exemption under Rule 13d-1(b) could not exceed one percent of the subject class; (2) the acquisition of shares could not have been made for the purpose of or with the effect of changing or influencing the control of the issuer; and (3) CS Holding Group undertook to furnish and make available to the Commission information to verify the foregoing, and material that would otherwise be disclosed or filed had a Schedule 13D been filed.

Although such relief has been consistently granted by the staff in the past, *see, e.g.*, Prudential Corp., SEC No-Action Letter (available July 5, 1991); Goldman Sachs Equity Securities (U.K.), Limited, SEC No-Action Letter (available Mar. 6, 1991); Hamblin Watsa Investment Counsel Ltd., SEC No-Action Letter (available Sept. 21, 1993); Mitsubishi UFJ Financial Group, Inc. and Designated Subsidiaries, SEC No-Action Letter (available Jan. 23, 2006); Burns Fry Cos., SEC No-Action Letter (available Dec. 4, 1990), it appears to be necessary for any foreign entity or group wishing to rely on this position under Rule 13d-1(b)(1) to obtain its own no-action letter. This is because only no-action relief has been granted under Rule 13d-1(b)(1), and such relief has been conditioned upon the making of an explicit undertaking to the staff.

In *CS Holding Group*, the staff also concluded, as an interpretive matter, that a foreign entity permitted to file a Schedule 13G under Rule 13d-1(b)(1) in reliance on the staff's no-action position would likewise qualify for the exclusion under Rule 16a-1(a)(1).

Prior to 1998, individuals who controlled eligible institutions were not eligible for the exclusion under the terms of Rule 16a-1(a)(1). However, consistent with its interpretations under Rule 13d-1(b)(1), the Commission staff typically granted no-action relief to such individuals to allow them, subject to certain conditions, to rely on the institutional investor exclusion under Rule 16a-1(a)(1). Edward C. Johnson 3d, SEC No-Action Letter [1991 Transfer Binder], Fed. Sec. L. Rep. (CCH) P 79,767 (Aug. 20, 1991); Warren E. Buffet and Berkshire Hathaway, Inc., SEC No-Action Letter [1986-1987 Transfer Binder], Fed. Sec. L. Rep. (CCH) (Dec. 18, 1987); *but see* Mario J. Gabelli, SEC No-Action Letter [1990-1991 Transfer Binder], Fed. Sec. L. Rep. (CCH) §79,682 (Apr. 30, 1991) (denying availability of exclusion). In 1998, such individuals were added to the list of persons eligible to rely on the exclusion, provided such individuals are not seeking to acquire or influence control of the issuer and own less than 20% of the class of securities. Exch. Act Rel. No. 34-39,538 (Jan. 12, 1998).

(n64)Footnote 64. There is, unfortunately, little guidance available on when an institutional investor's holdings of more than 10% of an outstanding class will be deemed to have the "purpose or effect of changing or influencing control of the issuer." In *American Bar Association Joint Committee on Employee Benefits*, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,719, at 78,252 (July 3, 1991), the staff did not state that an employee benefit plan's holding of more than 50% of an issuer's voting securities would, in all cases, be deemed to have the effect of "influencing control" of an issuer, although it would seem obvious that such a substantial holding would have that effect. The staff did point out, however, that a control purpose or effect may exist even if the amount held represents less than 50% of an issuer's voting securities. *See id.*

See Exch. Act Rel. No. 34-26,598, [1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,410, at 80,070 (Mar. 6, 1989). In that release, the Commission proposed that any person, including an institutional investor otherwise eligible to file a short-form Schedule 13G, be required to file a Schedule 13D upon reaching a beneficial ownership threshold of 20% of an outstanding class. When the Commission subsequently adopted this proposal, it stated: "[T]he Commission does not intend these new rules to create a presumption that beneficial ownership of 20 percent or more indicates control or a control person." Exch. Act Rel. No. 34-39,538 at N. 20 (Jan. 12, 1998).

The staff has also taken the position that even a gradual accumulation of securities to a level greater than 10% of an outstanding class may be deemed to involve acquisitions having the purpose or effect of changing or influencing control, although no particular acquisition, viewed in isolation, might appear to have such a purpose or effect. *See*

Hewitt Associates, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,688, at 78,114 (May 1, 1991).

(n65)Footnote 65. Although Rule 16a-1(a)(1) merely refers to Rule 13d-3(b), the exclusion may not be available where securities are acquired in transactions undertaken as part of a scheme to evade reporting obligations under Section 16(a).

(n66)Footnote 66. Rule 16a-1(a)(1).

In the case of an employee benefit plan subject to ERISA, equity securities may be excluded only if they are "allocated to plan participants where participants have voting power." Rule 16a-1(a)(1). This pass-through voting requirement applies only to a defined contribution plan holding equity securities of an employer that sponsors the plan, and does not apply to a defined benefit pension plan. See Master Pension Trust of AT&T, SEC No-Action Letter, [1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,641, at 77,719 (June 30, 1993). It appears from this interpretive letter that, in the case of a defined benefit pension plan, there need be no pass-through voting with respect to equity securities of an issuer that is a plan sponsor in order to qualify for exclusion under Rule 16a-1(a)(1).

(n67)Footnote 67. Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,253, n.39 (Feb. 8, 1991).

(n68)Footnote 68. Mario J. Gabelli, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,682, at 78,096 (Apr. 30, 1991). This interpretive position does not apply to "employees securities companies" as defined under the Investment Company Act of 1940. See *id* at 78,098-9.

(n69)Footnote 69. Harvard University, SEC No-Action Letter, [1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,228, at 76,849 (July 8, 1992).

(n70)Footnote 70. Master Pension Trust of AT&T, SEC No-Action Letter, [1993 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,641, at 77,719 (June 30, 1993). In this interpretive letter, the staff focused on the fact that the master trust did not exercise day-to-day investment control with respect to securities purchases and sales and that no single investment manager had investment responsibility for more than 4% of the assets. It is unclear whether these facts are determinative with respect to the conclusion that the trust's portfolio securities are held "for the benefit of third parties or in customer or fiduciary accounts."

(n71)Footnote 71. See *Roth v. Jennings*, 489 F.3d 499, 508 (2d Cir. 2007) (stating that if two or more persons acted as a "group," then they must be treated as a single person, and "each person in the group 'shall be deemed to be the beneficial owner' of all equity securities of that issuer beneficially owned by any 'member of that group'" (citing 15 U.S.C. § 78m(d)(3) and 17 C.F.R. § 240.13d-5(b)(1)); Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254 (Feb. 8, 1991). See generally Section 13(d)(3); Rule 13d-5(b).

(n72)Footnote 72. See *Mayer v. Chesapeake Insurance Co., Ltd.*, 877 F.2d 1154 (2d Cir. 1989), *cert. denied*, 493 U.S. 1021 (1990); *Morales v. Quintel Entertainment, Inc.*, 249 F.3d 115 (2d Cir. 2001); *C.R.A. Realty Corp. v. Goodyear Tire & Rubber Co.*, 705 F. Supp. 972 (S.D.N.Y. 1989); *Rothenberg v. Jacobs*, [1988-1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,199 at 91,735 (S.D.N.Y. 1989).

(n73)Footnote 73. Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254, n.54 (Feb. 8, 1991).

(n74)Footnote 74. See *id*. Of course, the number of shares beneficially owned by a given individual that are also included in the group's beneficial ownership should not be double counted when determining whether such individual is a 10% shareholder.

(n75)Footnote 75. See Rule 13d-5(b).

(n76)Footnote 76. The Taylor Voting Trust, SEC No-Action Letter, [1991-1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,051, at 79,000 (Jan. 3, 1992) (beneficiaries of voting trust not deemed to be members of a Section 13(d) group solely because of their beneficiary status, where (i) the trust was organized by an agreement between persons other than the beneficiaries, (ii) the beneficiaries were not parties to that agreement; and (iii) the beneficiaries cannot continue to hold shares withdrawn from the trust); Alex Brown Incorporated, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,725, at 78,264 (July 22, 1991) (employees subject to voting agreement as condition of employment not deemed to be members of a group where (i) participation in such agreement is solely because of status as employees and essentially involuntary, (ii) terminated employees are no longer subject to the agreement, and (iii) each employee's individual beneficial ownership is, in most cases, less than one percent of the outstanding class). See also Morgan Stanley Group Inc., SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,681, at 78,091 (Apr. 30, 1991). In the *Alex Brown Incorporated* and *Morgan Stanley Group Inc.* interpretive letters, the staff expressed the view that the facts and circumstances presented were "unique," and that only different facts might give rise to another result.

(n77)Footnote 77. See Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254 & n.53 (Feb. 8, 1991).

(n78)Footnote 78. In adopting Rule 16a-8(a)(1), the Commission implied that the new Rule simply carried forward the requirements of old Rule 16a-8(c). See Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254-55 (Feb. 8, 1991). In fact, the new Rule greatly expands the burden on trusts. Old Rule 16a-8(c) required a trust to file reports under Section 16(a) if it "held" more than 10% of an outstanding class of equity security. The Rule did not deem the trust to be a "beneficial owner" of the securities it "held," so a trust was free to defend any claim that it was liable for short-swing profits by asserting that it was not subject to Section 16(b) because it was not a 10% beneficial owner. Indeed, in adopting old Rule 16a-8(c), the Commission had recognized this distinction, stating that the imposition of a filing requirement on trusts should not give rise to any presumption that transaction by trusts were subject to potential Section 16(b) liability. See Exch. Act Rel. No. 34-4801 (1953). In contrast, a trust may be deemed a "beneficial owner" under new Rule 16a-1(a)(1), and to be subject to Section 16 for all purposes, including potential Section 16(b) liability, under Rules 16a-8(a) and (d). See Exch Act Rel. No 34-37,260 (1996).

(n79)Footnote 79. In Proskauer Rose Goetz & Mendelsohn, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,683, at 78,099 (Apr. 30, 1991), inquiring counsel argued that, under the Section 13(d) rules, trusts had not in the past been regarded as distinct entities having Schedule 13D and 13G filing obligations apart from the obligations of trustees or others who have voting or dispositive power over trust shares. The staff concluded, however, that a trust is deemed to be a distinct "beneficial owner" under Section 13(d), and therefore may be subject to Section 16 as an entity separate from its trustee under Rules 16a-8(a) and 16a-1(a)(1).

(n80)Footnote 80. See Rule 16a-8(a); See Exch. Act Rel. No. 34-37,260 (1996); SEC Exch. Act Rel. No. 28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254-55 (Feb. 8, 1991); Proskauer Rose Goetz & Mendelsohn, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,683, at 78,099 (Apr. 30, 1991). For a time, the 1991 rules provided that a trust could be subject to Section 16 (with certain exceptions) if a trustee of the trust is a Section 16 insider, the trustee exercises or shares investment control over issuer securities in the trust, and the insider trustee or a member of his immediate family has a pecuniary interest in the issuer's securities held by the trust. But this Rule 16a-8(a)(1)(ii) was repealed in 1996, largely because it resulted in duplicative reporting by trusts and trustees in the family trust context. See § 8.02[3], *infra*.

(n81)Footnote 81. See Rule 16a-8(a)(1); Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254-55 (Feb. 8, 1991).

In Chandler Trust No. 2, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,750, at 78,389 (Aug. 14, 1991) the staff took the position that, in the case of a trust that included a number of subtrusts, the securities held in the subtrusts would be aggregated for purposes of determining whether the trust was a 10% shareholder, and no separate analysis of the holdings of each subtrust was required. The staff, in reaching its conclusion, noted the fact that both voting and dispositive power with respect to the issuer shares held directly or indirectly by the trust must be exercised by the trustees as a body, without regard to the subtrust involved, and that the securities held in the subtrusts remain in the trust.

(n82)Footnote 82. See American Bar Association Joint Committee on Employee Benefits, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,719, at 78,252 (July 3, 1991). The exclusion is available to such a plan trust even if the trustee is not a person eligible for the exclusion under Rule 16a-1(a)(1), provided, among other things, the securities are allocated to plan participants and voting power is passed through to participants. See *id.*

(n83)Footnote 83. See Rule 16a-8 (b)(1). The exclusion for plans and related trusts is narrower than the exclusion available to other institutional investors under Rule 16a-1(a)(1) for securities held for the benefit of third parties or in customer or fiduciary accounts in the ordinary course of business. See Rule 16a-1(a)(1). The limitation of the exclusion to allocated shares reflects the view of the Commission staff (based on the view of the Department of Labor) that a trustee's fiduciary obligations under ERISA override express provisions of a plan, so that, even if the plan provides for "pass-through" voting by plan participants as to *unallocated* shares, the trustee in fact retains voting power with respect to such shares. Exch. Act Rel. No. 28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,253, n.42 (Feb. 8, 1991); Rio Grande Industries, Inc., SEC No-Action Letter (available Apr. 5, 1989) (trustee is the beneficial owner where trustee has voting and investment power over unallocated shares); Merchants National Bank & Trust Company, SEC No-Action Letter (available June 24, 1991).

In Cigna Corp., SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,747, at 78,381 (Aug. 6, 1991), the staff concluded that issuer securities held in the trust holding the portfolio of an ERISA qualified defined benefit plan that allocated cash balances to participants rather than issuer securities are deemed to be unallocated for purposes of Rule 16a-1(a)(1). Thus, such securities would not be excluded under the Rule 16a-1(a)(1) exclusion. Cf. Hewitt Associates, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,688, at 78,113 (May 1, 1991) (trustees of defined contribution plans are assumed to have investment control over unallocated shares).

(n84)Footnote 84. See *id.* For a discussion of this requirement, see § 8.02[2][a][ii], *supra*.

(n85)Footnote 85. Rule 16a-8(a)(2). Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254 (Feb. 8, 1991). Conversely, if trustees do not have or share voting or investment power, they will not be deemed beneficial owners of securities held in the trust. See The Taylor Voting Trust, SEC No-Action Letter, [1991-1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,051, at 79,000 (Jan. 3, 1992).

A trustee of an ERISA trust apparently is viewed by the Commission as having a "residual and overriding" voting or investment control--and thus beneficial ownership--over shares not allocated to trust beneficiaries (plan participants), even if the plan and trust's provisions do not confer such explicit powers on the trustee, as a result of the stringent fiduciary duties imposed under ERISA. Exch. Act Rel. No. 28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,253, n.42 (Feb. 8, 1991). In contrast, in the case of allocated shares, explicit plan provisions vesting voting and investment powers in participants rather than the trustee are not overridden by ERISA fiduciary duties, in the Commission's view. See *id.* While these positions are consistent with staff interpretations under Section 13(d), as stated in Rio Grande Industries, Inc., SEC No-Action Letter (available Apr. 5, 1989), the Commission has allowed for more lenient treatment in the case of allocated shares that are generally subject to participant control but which, in cases in which participants fail to give instructions to a trustee, may be voted by the trustee. *Id.* Under Rule 16a-1(a)(1), such shares will not be deemed beneficially owned by the trustee if limited voting or dispositive power becomes exercisable by the trustee, but such trustee will still be deemed to beneficially own such shares for other purposes under Rule 13d-3. See *id.*; American Bar Association Joint Committee on Employee Benefits, SEC No-Action

Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,719, at 78,252 (July 3, 1991).

(n86)Footnote 86. See Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254-55 (Feb. 8, 1991); Proskauer Rose Goetz & Mendelsohn, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,683, at 78,099 (Apr. 30, 1991). Securities held in trust should normally qualify as securities "held for the benefit of third parties or in customer or fiduciary accounts in the ordinary course of business" for purposes of Rule 16a-1(a)(1). As noted above, even if the trustee may exclude the trust securities in calculating whether it is a 10% shareholder, if the trustee has voting or investment control over those shares the trust itself will have to count such shares toward its beneficial ownership unless it qualifies for the narrow exclusion for employee benefit plan trusts subject to ERISA.

For a discussion of the Rule 16a-1(a)(1) exclusion, see § 8.02[2][a][ii] *supra*.

(n87)Footnote 87. Compare American Bar Association Joint Committee on Employee Benefits, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,719, at 78,252 (July 3, 1991) with Chandler Trust No. 2, SEC No-Action Letter, [1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,750, at 78,389 (Aug. 14, 1991) and Chandler Trust No. 2 (Aug. 14, 1991) with Southland Corp., SEC No-Action Letter (available Aug. 10, 1987). It may still be possible for the staff to reconcile these positions. In *Southland Corp.*, the staff concluded that an individual who, together with four others, served as the trustee of a trust was not a beneficial owner of trust securities under Rule 13d-3 in view of the fact that a majority of the five trustees was required for investment decisions, and that none of the individuals could act alone to vote or dispose of trust securities. In *American Bar Association Joint Committee on Employee Benefits*, the staff concluded that an individual trustee is attributed beneficial ownership to the extent he has or shares voting or dispositive power. In private discussions, the staff has affirmed that it continues to adhere to its position in *Southland Corp.* that an individual trustee who does not have the power to act alone with respect to voting or disposing of trust securities, but rather such decisions require the consent of three or more individuals, is not deemed to have or share voting or dispositive power over the trust securities.

(n88)Footnote 88. See Rule 16a-8(a)(2).

(n89)Footnote 89. An employer-registrant would not be deemed to be a ten percent beneficial owner where, subject to the provisions of ERISA, the employer-registrant as the settlor has the right to revoke the trust. See Hewitt Associates, SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,688, at 78,114 (May 1, 1991).

(n90)Footnote 90. Rule 16a-1(a)(4).

(n91)Footnote 91. See Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,252-53 (Feb. 8, 1991).

(n92)Footnote 92. See Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,252-53, n.36 (Feb. 8, 1991).

The term "equity security" is defined under Section 3(a)(11) and Rule 3a11-1 of the Exchange Act. See § 4.01 *supra*.

(n93)Footnote 93. See Rule 13d-3(d)(1). See also Rule 16a-4(a) (derivative securities deemed to be the same class of equity securities as the underlying equity securities).

(n94)Footnote 94. See old Rule 16a-2(b).

Nevertheless, with reference to derivative securities, the Commission noted that the approach under the Section 13(d) rules and Rule 16a-4(a) essentially codifies the holding in *Chemical Fund, Inc. v. Xerox Corp.*, 377 F.2d 107 (2d Cir. 1967). Exch. Act Rel. No. 28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,252-53, n.36

(Feb. 8, 1991). In *Chemical Fund, Inc. v. Xerox*, the defendant held more than ten percent of a corporation's non-voting convertible debentures, but the conversion of such debentures would have given the defendant not more than 2.72 percent of the corporation's common stock. The court held that the defendant was not liable under Section 16(b) because a hypothetical conversion of the debentures would not result in the defendant becoming a more than ten percent common stockholder. 377 F.2d at 110-11. In addition, the court held that the debentures were not a class of equity securities because a holder had no standing beyond that of a creditor entitled to specified payments of interest at specified intervals, would not be familiar with the day-to-day workings of the corporation and therefore would be unlikely to receive inside information, unlike a holder of more than ten percent of the voting stock of the company. *Id.*

Cf. American Standard, Inc. v. Crane Co., 346 F. Supp. 1153, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 93,551 (S.D.N.Y. 1972), *rev'd on other grounds*, 510 F.2d 1043, [1974-1975 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,924 (2d Cir. 1974), *cert. denied*. 421 U.S. 1000 (1975) (court relied on the "hypothetical conversion" test adopted in *Chemical Fund* to hold that trading in preferred stock that could have been converted into more than ten percent of the common stock of the issuer was subject to Section 16(b)); *Simon v. Sunasco, Inc.*, [1969-1970 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,547 (S.D.N.Y. 1970) (holder of unregistered "special stock" with voting rights presently convertible into more than ten percent of a company's registered common stock subject to liability under Section 16(b) as a more than ten percent holder of a registered equity security of an issuer).

Notably, the Commission itself had not acquiesced in the decision in *Chemical Fund v. Xerox Corp.*, but limited its applicability to a determination of liability for short-swing profits under Section 16(b), and not for reporting purposes under Section 16(a). Thus, under the old Section 16 rules, a person owning more than ten percent of a class of registered convertible debentures was required to file ownership reports under Section 16(a) even though upon conversion he would own less than ten percent of the class of underlying equity securities. *See* Sec. Exch. Act Rel. No. 34-8202, 1967 SEC LEXIS 112 (Dec. 6, 1967). *See also* Sec. Exch. Act Rel. No. 34-18,114, Fed. Sec. L. Rep. P 26,062, at 19,063-16, n. 57 (Sept. 23, 1981).

(n95)Footnote 95. Rule 16a-1 (introductory text).

This implicitly overrules *Colan v. Monumental Corp.*, 713 F.2d 330 (7th Cir. 1983). In that case, the owners of options to purchase stock who may have been more than 10% "beneficial owners" for purposes of the reporting requirements of Section 16(a) were deemed not to be such "beneficial owners" for purposes of the short-swing trading prohibitions of Section 16(b), because, in the courts view, a contractual right to acquire stock in the future does not provide access to inside information and the potential for speculative abuse that Section 16(b) is meant to curb. *See also* *Seinfeld v. Hospital Corp. of America*, 685 F. Supp 1057 (N.D. Ill. 1988) (option holder may be deemed beneficial owners of underlying stock if option holder acquires access to inside information and influence).

(n96)Footnote 96. Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,252-53, n.36 (Feb. 8, 1991).

(n97)Footnote 97. *See id.*

(n98)Footnote 98. Non-voting preferred stock would not constitute an equity security for purposes of determining whether a person is a 10% shareholder under Rule 16a-1(a)(1). *See* Rule 13d-3(d)(1).

(n99)Footnote 99. *See id.*

(n100)Footnote 100. Rule 13d-3(d)(1)(i). For example, Issuer A has outstanding a registered class of 100,000 shares of common stock, and a class of warrants exercisable for 10,000 shares of common stock. Ms. Smith directly owns 9,000 shares of common stock (and is a beneficial owner thereof), and holds warrants exercisable within 60 days for 1,800 shares of common stock (representing beneficial ownership of the 1,800 underlying shares of common stock). To calculate Ms. Smith's percentage of beneficial ownership, she must divide the number of shares she beneficially

owns, 10,800 (consisting of the 9,000 owned directly and the 1,800 that she has the right to acquire), by the number of shares deemed to be outstanding, 101,800 (consisting of the 100,000 actually outstanding and the 1,800 issuable upon exercise of Ms. Smith's warrants). Thus, Ms. Smith's percentage of beneficial ownership is 10.6%, so she is subject to Section 16 as a 10% shareholder. Significantly, shares that persons other than Ms. Smith can acquire by exercise of the warrants are not added to the number of shares outstanding (the denominator).

(n101)Footnote 101. Rule 13d-1(j). Of course, a person may seek more up-to-date information directly from the issuer. However, the ability to obtain such information may be limited as a result, in part, of Regulation FD; although the accelerated filing requirements under the Form 8-K rules may render any such attempt moot. If the number of share outstanding is reduced through an issuer repurchase or otherwise, resulting in an increase in a holder's percentage of beneficial ownership from less than ten percent to more than ten percent, such person will not become subject to Section 16 as a 10% shareholder until the issuer files a quarterly, annual, or current report setting forth the number of securities outstanding that would permit the holder to determine that the holder is a 10% shareholder, even if in fact that person's beneficial ownership exceeded ten percent of the outstanding class at an earlier date. *C.R.A. Realty Corp. v. Enron Corp.*, 842 F. Supp. 88 (S.D.N.Y. 1994)

(n102)Footnote 102. The conclusion that ownership of a right to acquire an equity security can constitute beneficial ownership of the underlying equity security, as provided in Rule 13d-3(d)(1), is reinforced by Rule 16a-4(a), which provides that a derivative security and the underlying equity security shall be deemed to be the same class of equity securities.

(n103)Footnote 103. See *Shaffer v. Dickstein & Co., L.P.* 1996 U.S. Dist. LEXIS 4009 (S.D.N.Y. 1996) (definition of class under Section 12(g)(5) does not apply when calculating beneficial ownership under Section 16).

(n104)Footnote 104. See Sec. Exch. Act Rel. No. 34-18,114, Fed. Sec. L. Rep. P 26,062, at 19,063-15 (Sept. 23, 1981) (question 36). The Commission implicitly confirmed that this interpretation was unaffected by the adoption of the new Section 16 rules in 1991. Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,281 (Feb. 8, 1991).

In *Ellerin v. Massachusetts Mutual Life Insurance Co.*, 270 F.2d 259 (2d Cir. 1959), the court held that two series of preferred stock, although differing as to dividend rights, redemption prices, sinking fund accumulation rights, dates of issuance, nevertheless constituted a single class for purposes of determining whether the owner was a 10% shareholder subject to Section 16. Each of the series of preferred stock carried no voting rights, except that holders of a given series had a right to vote, as a series, if the rights or preferences of that series would be adversely affected. The Commission took the position, in that case, that the series constituted separate classes, but it has apparently abandoned that view since the time of that case.

(n105)Footnote 105. See Crawford & Co., SEC No-Action Letter, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,673, at 78,079 (Apr. 19, 1991). The staff refused to take a position, however, on whether the classes would be considered distinct for purposes of Section 16(b). Thus, although a beneficial owner of more than ten percent of either class would be considered an insider, he is faced with uncertainty whether his sales of one class could be matched with purchases of the other within six months.

The staff had taken a similar position, under the old Section 16 rules, that classes of common stock with different voting rights would be viewed as distinct classes for reporting purposes. See *Turner Broadcasting System, Inc.* SEC No-Action Letter (available) (Feb. 6, 1990).

See *Morales v. New Valley Corp.*, 936 F. Supp. 119 (S.D.N.Y. 1996) (Class B convertible preferred shares that voted with Class A preferred shares on most issues were deemed not substantially similar and treated as a separate class); *Shaffer v. Dickstein & Co., L.P.*, 1996 U.S. Dist. LEXIS 4009 (S.D.N.Y. 1996) (convertible preferred a separate class from common stock although "substantially similar" as to voting and dividend rights.)

(n106)Footnote 106. For a discussion of the circumstances in which registration under Section 12 is required, see § 4.01 *supra*.

(n107)Footnote 107. Indeed, a transaction by an insider prior to registration under Section 12 may be matched with a transaction that occurs after registration but within six months of the earlier transaction. See Rule 16a-2(a). Note, however that a holder of securities not registered under Section 12 is not subject to Section 16, even though the issuer has another class of equity registered under Section 12 (provided, of course, that the ownership of the unregistered class does not give rise to beneficial ownership of the registered class.)

(n108)Footnote 108. Rule 16 a-8(a)(1)(ii) was repealed in Exchange Act Rel. No. 34-37260. According to one SEC staff member, the purpose of the rule was to reverse *CBI Industries v. Horton*, 682 F.2d 643 (7th Cir. 1982), in which trust transactions were not attributed to an insider who was co-trustee of a trust of which the insider's adult sons were beneficiaries because the insider had no duty to support the sons.

(n109)Footnote 109. A trust did not become subject to Section 16 under Rule 16a-8(a)(1)(ii) due to the fact that a trustee is a 10% shareholder and thus an insider if the trustee would not be a 10% shareholder but for his beneficial ownership of the securities held by the trust resulting from his service as trustee. See *Kirkland & Ellis, SEC No-Action, [1991-1992 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 76,139, at 79,366 (Mar. 26, 1992)*. Such trustee would, however, apparently still be deemed a 10% shareholder subject to Section 16.

(n110)Footnote 110. The term "immediate family" means any child, stepchild, grandchild, parent, stepparent, grandparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law, and includes adoptive relationships. Rule 16a-1(e). Significantly, although the presumption that an insider beneficially owns equity securities held by family members under Rule 16a-1(a)(2) is limited to family members who share the same household as the insider, this limitation does not apply under Rule 16a-8.

(n111)Footnote 111. Sec. Exch. Act Rel. No. 34-28,869, [1990-1991 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,709, at 81,254-56 (Feb. 8, 1991).

(n112)Footnote 112. Rule 16a-8(a)(1)(ii)(A). This exception was probably of only limited usefulness, however, because such persons or entities normally would become subject to Section 16 not as directors or officers, but as 10% shareholders. The exclusion under Rule 16a-1(a)(1) generally should allow such persons or entities to exclude shares held in trusts when calculating whether they are 10% shareholders, and thereby avoid becoming Section 16 insiders in the first place. Of course, this exception to Rule 16a-8 will be needed only if the trustee is otherwise deemed an insider.

(n113)Footnote 113. Rule 16a-8(a)(1)(ii)(B).

CHAPTER 8 Insider Reporting and Short-Swing Trading

2-8 Federal Securities Exchange Act of 1934 § 8.03

AUTHOR: Elliot Cohen Tim Mast Robert M. Carmen Jaime Theriot Marvin G. Pickholz Alan H. Aronson

§ 8.03 Reporting Requirements Under Section 16(a)

Insiders are required to file reports with the Commission, which are publicly available, detailing their beneficial ownership of equity securities of the issuer, and changes in such beneficial ownership. Reporting is required for all equity securities of the issuer, including options and other rights to acquire or dispose of equity securities that come within the definition of "derivative securities." Initial reports are filed on Form 3 at the time a person first becomes an insider or the issuer first registers a class of equity securities under Exchange Act Section 12. Changes in beneficial ownership that are not exempt from liability or that are exempt from liability under Rule 16b-3 (transactions between issuers and officers or directors) or Rule 16b-6 (exercises or conversions of derivative securities) must be reported on Form 4. In 2002, in response to perceived abuses in insiders' trading activity and recognition of investors' interest in such transactions, Congress mandated that these transactions generally be reported within two (2) business days. Gifts and several other narrow categories of transactions that are exempt from Section 16(b) must be reported on a year-end Form 5, unless earlier reported voluntarily on a Form 4. The year-end Form 5 must also report prior failures to file required Forms 3, 4, or 5. Failure to disclose required information can result in civil or criminal proceedings. In addition, delinquent or late filers must be disclosed in an issuer's annual report and proxy statement.

[1] Section 16(a) Reporting Requirements Generally

Exchange Act Section 16(a) and the rules thereunder require every person who is a Section 16 insider n1 to file with the Commission an "Initial Statement of Beneficial Ownership of Securities" on Form 3 at the time such person first becomes subject to Section 16(a), and to thereafter file a "Statement of Changes in Beneficial Ownership" on Form 4 or an "Annual Statement of Changes in Beneficial Ownership" on Form 5 to report any changes in such person's beneficial ownership of the issuer's equity securities. n2

In addition to introducing the Form 5 filing requirement, the Commission's complete revision of the rules under Section 16 in 1991 introduced significant new definitions and requirements relating to reporting under Section 16(a). The most far-reaching of these changes are rules defining the term "equity securities of such issuer" to include options, convertible securities, and other rights relating to equity securities, discussed in *Section 8.03[2]* below, and rules defining the concept of when an insider is deemed the "beneficial owner" of equity securities, discussed in *Section 8.03[3]* below. Further, in 2002, pursuant to the Sarbanes-Oxley Act of 2002, Section 16 and the rules thereunder were

amended such that transactions required to be reported on Form 4 must now be filed within two business days after the date of the transaction. n3 Prior to the 2002 amendments, a Form 4 was required to be filed only on or before the tenth day of the month following the month in which the transaction was effected. Additionally, as a result of the 2002 amendments, certain transactions once eligible for deferred reporting on Form 5 must now be reported on Form 4. n4

[a] Purpose. Section 16(a) was intended by Congress to require complete publicity as to the security holdings and transactions of anyone in a position of control in a corporation, in order to discourage abuse of insider information and encourage the maintenance of proper fiduciary standards. n5 Congress also sought to provide information to public investors concerning purchases and sales by insiders that might indicate such insiders' private opinions of the issuer's prospects. n6 In operation, reports filed under Section 16(a) have come to be used as a means to identify transactions that give rise to short-swing profits liability under Section 16(b) n7 and violations of other provisions of the Exchange Act and rules thereunder relating to abuse of inside information and market manipulation, n8 and for analysts and investors "to detect early warning signs of trouble or positive trends" with respect to a given issuer or group of issuers. n9 To increase the visibility of this information, in 2003 the Commission under a mandate from Congress implemented a mandatory electronic filing system for Section 16 reports and required companies with websites to post copies of their insiders' filings. n10

[b] Related Statutory Provisions. Other statutes impose reporting requirements substantially the same as those under Section 16(a). For example, Section 17(a) of the Public Utility Holding Company Act of 1935, as amended, requires directors and officers (but not ten-percent shareholders) of holding companies registered under the Holding Company Act to file the same general reports as are required under Exchange Act Section 16(a). n11 Likewise, with respect to closed-end investment companies registered under the Investment Company Act of 1940, as amended, Section 30(h) of that Act requires directors, officers, beneficial owners of more than ten percent of any outstanding class of securities (other than short-term paper) of such issuer, members of an advisory board, investment advisers, and affiliated persons of investment advisers of such issuer to file the reports required by Exchange Act Section 16(a). n12 Filings under these provisions are made on Forms 3, 4, and 5 and are generally subject to the rules under the Exchange Act. n13 In addition, state laws regulating insurance companies impose reporting requirements that closely parallel those of Section 16(a). n14

[c] Administration. While the Commission administers Section 16(a) with respect to insiders of non-bank issuers, Exchange Act Section 12(i) confers administrative and enforcement authority with respect to securities issued by banks and savings associations with respect to Section 16 upon four different federal banking agencies depending upon the nature of the banks. These agencies are the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Office of Thrift Supervision. The regulations of each of these agencies incorporate the Commission's Section 16 rules and forms. n15

[2] "Equity Securities of Such Issuer" and "Derivative Securities"

[a] Equity Securities Generally. Section 16(a) requires that insiders of an issuer that has a class of equity securities registered under Exchange Act Section 12 report beneficial ownership of "equity securities of such issuer," and changes in such beneficial ownership. This means that an insider's Forms 3, 4 and 5 must report beneficial ownership with respect to all equity securities of the issuer, not just those equity securities that are registered under Section 12. n16

Exchange Act Section 3(a)(11) defines the term "equity security" broadly, as follows:

The term 'equity security' means any stock or similar security; or any security future on any such security; or any security convertible, with or without consideration, into such a security, or carrying any warrant or right to subscribe to or purchase such a security; or any such warrant or right; or any other security which the Commission shall deem to be of similar nature and consider necessary or appropriate, by such rules and regulations as it may prescribe in the public interest or for the protection of investors,

to treat as an equity security.

As authorized by Section 3(a)(11), the Commission has expanded the definition of "equity security." In Rule 3a11-1 under the Exchange Act, the term "equity security" is defined to include any limited partnership interest, interest in a joint venture, certificate of interest in a business trust, certificate of interest or participation in any profit sharing agreement, preorganization certificate or subscription, transferable share, voting trust certificate or certificate of deposit for an equity security, and securities convertible into, and warrants and other rights to acquire, such equity securities.

Rule 3a11-1 also defines as an "equity security" any "put, call, straddle, or other option or privilege of buying such a security from or selling [such a] security to another without being bound to do so." This definition, adopted in 1973, n17 clearly treats a right to acquire or dispose of equity securities as a kind of equity security.

An issue existed under the pre-1991 Section 16 rules as to whether an option contract, conferring a right to acquire or dispose of the issuer's equity securities, was an equity security "of such issuer" if the person obligated under such option (the "writer") was not the issuer but was instead a third party. n18 The Commission and its staff had historically taken the position that an insider was obligated to report beneficial ownership of such options and rights to acquire. n19 This position was apparently based on the theory that transactions in such options and rights effected a change in "beneficial ownership" of the underlying equity securities. There was no question but that such underlying equity securities were equity securities "of such issuer."

To eliminate any question in this regard, the Section 16 rules adopted by the Commission in 1991 includes the following definition:

The term "equity security of such issuer" shall mean any equity security or derivative security relating to an issuer, whether or not issued by that issuer.

Rule 16a-1(d). The meaning of the term "derivative security" is discussed in *Section 8.03[2][b]* below.

In adopting Rule 16a-1(d), the Commission appears to have been more concerned with assuring that transactions in options and other rights within the meaning of the term "derivative securities" could give rise to potential liability under Section 16(b) than with promoting reporting under Section 16(a). As noted above, such transactions generally had been reportable under the pre-1991 version of Rule 16a-6(a), and the Commission could have easily broadened the reporting requirements of that Rule without defining derivative securities to be "equity securities of such issuer." n20 But, despite the fact that such transactions were reportable as changes in beneficial ownership of the underlying shares, the courts had generally not treated transactions in options and other rights to acquire equity securities as "purchases" and "sales" of the underlying equity securities that could give rise to Section 16(b) liability. n21 The Commission, by defining derivative securities to be "equity securities of the issuer" under Rule 16a-1(d), has created the potential for Section 16(b) matching of "purchases" and "sales" of options and other derivative securities without regard to whether such transactions effected "purchases" and "sales" of the underlying equity securities. n22

One issue, not clearly addressed as yet by the Commission or its staff, is whether a right to acquire that is not a "derivative security" might separately come within the definition of "equity security." n23 The issue is likely to arise in the case of instruments excluded from being deemed "derivative securities" under the several exclusions contained in Rule 16a-1(c). n24 The definition of the term "derivative securities" is apparently intended to be broader than the provisions of Section 3(a)(11) and Rule 3a11-1 that would cause rights to acquire to be deemed "equity securities," so any instrument specifically excluded from being a derivative security under paragraphs (1) through (6) of Rule 16a-1(c) probably should be viewed as not being an equity security, either.

The Commission staff has also addressed questions as to where to draw the line between derivative securities and equity securities. For example, an insider may need to determine whether an award under an executive compensation plan

providing for the delivery of common stock at a specified future date is a derivative security reportable on Table II of Forms 3, 4, and 5 or instead is an equity security reportable on Table I of such Forms. n25 Initially, the Commission staff expressed the view that such an award should be viewed as beneficial ownership of the actual common stock reportable on Table I (like a restricted stock award), even though the common stock would not be issued and delivered to the insider for several years, and in the mean time the insider had no rights to vote, receive dividends on, or transfer the shares. n26 Subsequently, the Commission staff appeared to soften this position, permitting awards of this type to be reported as either beneficial ownership of actual shares or beneficial ownership of a derivative security. n27

[b] Derivative Securities Generally

[i] Introduction. As noted above, the Section 16 rules adopted in 1991 defined the term "equity security of such issuer" to include any "derivative security" relating to the issuer. n28 The new rules also included, as Rule 16a-1(c), a broad definition of the term "derivative securities."

The definition of the term "derivative securities" adds a great deal of complexity to reporting and liability issues under Section 16. Most of the Commission's explanation of its rationale for the new definition and other requirements relating to derivative securities focused on exchange-traded options, which the Commission recognized as having potential for insider abuse. n29 Unfortunately, the new rules apply equally to insiders' awards and rights under employee benefit plans which, while not historically viewed as being useful for short-swing speculation, appear to be far more commonly held by insiders than exchange-traded options. Even though the situation was alleviated somewhat by the Commission's revisions in 1996 expanding and simplifying the rules exempting employee benefit plan transactions and other transactions between issuers and officers or directors, the scope of the derivative security concept continues to significantly impact employee benefit plan design.

Rule 16a-1(c)'s broad definition of "derivative securities" contains two distinct parts, which require separate analysis. First, in the beginning portion of the Rule (before the numbered subsections), the Rule sets out a broad, general definition of "derivative securities," listing several types of rights and instruments that can qualify as derivative securities. Second, in paragraphs (1) to (7) under the Rule, rights and instruments that may come within the general definition but which are *excluded* from being deemed derivative securities are listed. n30

As discussed below, the breadth of Rule 16a-1(c)'s definition is such that great caution must be exercised when an insider deals in rights related to shares. In particular, rights under employee benefit plans that relate to equity securities of the issuer must be analyzed to determine whether a derivative security is present. n31 Similarly, any rights created under contracts entered into by insiders, whether or not those rights are denominated by a name commonly recognized to be a derivative security (such as options or conversion rights), must be analyzed to determine if the rights constitute a derivative security. n32 Significantly, not only is an insider deemed to acquire a derivative security when the instrument in question gives the insider the right to exercise or convert, but the insider may be deemed to have a transaction in a derivative security when he is a party to an instrument that obligates him to acquire or dispose of equity securities, even though the insider does not control the exercise or conversion of the instrument. n33 For example, an insider who writes a call option, and thus is obligated to sell equity securities upon exercise of the option by the optionee, is deemed to have had a transaction in a derivative security. Similarly, an insider may be deemed to have engaged in a derivative security transaction, and thus a purchase or sale, with rights that are settled only for cash and that never involve the issuance of common stock.

In this regard, the rules and forms can be very confusing, largely because the distinction between a derivative security and a derivative security "position" is poorly explained. The notion of a derivative security "position" is woven into the rules in order to classify *transactions* in derivative securities as purchases or sales, mainly for purposes of assigning liabilities under Section 16(b). Thus, a "call equivalent position" means that the insider's rights relating to a derivative security will become more valuable to him as the value of the underlying equity security *increases*. n34 Conversely, a "put equivalent position" means that the insider's rights relating to a derivative security will become more valuable to
