1 Taxation of Securities Transactions Statement on Fair Use

Statement on Fair Use

RELEASE NO. 63 August 2010

LexisNexis Matthew Bender recognizes the balance that must be achieved between the operation of the fair use doctrine, whose basis is to avoid the rigid application of the copyright statute, and the protection of the creative rights and economic interests of authors, publishers and other copyright holders.

We are also aware of the countervailing forces that exist between the ever greater technological advances for making both print and electronic copies and the reduction in the value of copyrighted works that must result from a consistent and pervasive reliance on these new copying technologies. It is LexisNexis Matthew Bender's position that if the "progress of science and useful arts" is promoted by granting copyright protection to authors, such progress may well be impeded if copyright protection is diminished in the name of fair use. (See Nimmer on Copyright § 13.05[E][1].) This holds true whether the parameters of the fair use doctrine are considered in either the print or the electronic environment as it is the integrity of the copyright that is at issue, not the media under which the protected work may become available. Therefore, the fair use guidelines we propose apply equally to our print and electronic information, and apply, within §§ 107 and 108 of the Copyright Act, regardless of the professional status of the user.

Our draft guidelines would allow for the copying of limited materials, which would include synopses and tables of contents, primary source and government materials that may have a minimal amount of editorial enhancements, individual forms to aid in the drafting of applications and pleadings, and miscellaneous pages from any of our newsletters, treatises and practice guides. This copying would be permitted provided it is performed for internal use and solely for the purpose of facilitating individual research or for creating documents produced in the course of the user's professional practice, and the original from which the copy is made has been purchased or licensed as part of the user's existing in-house collection.

LexisNexis Matthew Bender fully supports educational awareness programs designed to increase the public's recognition of its fair use rights. We also support the operation of collective licensing organizations with regard to our print and electronic information.

No copyright is claimed in the text of statutes, regulation, and excerpts from court opinions quoted within this work.

1 Taxation of Securities Transactions Preface

Preface

What should be the scope of a book concerned with the taxation of securities transactions? This was the question I asked myself when I began the preparation of this manuscript. The conclusion I reached was that the work must be many things. It must be a book concerned, among other things, with the basic rules of taxing gains and losses from dispositions of property; with the relationship of shareholder and corporation, and of debt holder and obligor; with the provisions governing employee stock options; with the tax consequences that attend a distribution of securities to a beneficiary or partner; and with the treatment of transactions in foreign securities by United States citizens and in domestic securities by foreign persons. On the other hand, since its thrust is the taxation of securities transactions, it cannot be a treatise on, say, capital gains and losses, the taxation of shareholders and corporations, or employee compensation. It is hoped, however, that it does reach the intended goal—a comprehensive treatment of the income taxation of securities.

This book would not have been possible without the assistance of Alan L. Aronson, Thomas M. Dailey, and Edward S. Wactlar, students at the Syracuse University College of Law; David S. Good, James A. Robbins, and Ray L. Steele, students at the University of Iowa College of Law; and Patricia Hamblin, my secretary during my visiting year at the University of Iowa.

Special thanks must go to Claudine Harris. She assumed the difficult task of preparing the index.

Finally, words cannot fully acknowledge the role that my wife, Suzanne, played in this entire endeavor. She typed the manuscript, commented on its content, prepared the table of cases and statutory references, and put up with me from the first word until the last.

What's New

1 Taxation of Securities Transactions Scope

Scope

HIGHLIGHTS

Release 63 August 2010

Taxation of Securities Transactions is an essential publication covering all the vital issues and creative planning opportunities in this field.

This publication has been fully updated to keep you abreast of recent federal court decisions and IRS rulings and releases affecting the taxation of securities transactions.

Andrew W. Singer continues the coverage of new developments in the field of taxation of securities transactions with this Release Number 63. Topics covered include:

The Economic Substance Doctrine. Congress codified and clarified the economic substance doctrine by adding *IRC Section 7701(o)* to the IRC in 2010. (See updated § 1.02A for a detailed discussion.)

Specific Exceptions to Capital Gain or Loss Treatment. Although it is generally true that a transaction meeting the requisites for capital gain or loss, i.e., a sale or exchange of a capital asset, will qualify for such treatment, there are a number of situations wherein this does not obtain. For the most part, the exceptions are decreed by specific provision in the Code, but on occasion the result has come about solely through judicial determination. (See newly revised material in § 2.07 for a detailed discussion.)

Direct Pay Tax Credit Bonds--*IRC Section 6431*. In 2010, Congress amended *IRC Section 6431* to give issuers of most qualified tax credit bonds the option, previously available only to issuers of Build America and certain recovery zone bonds, of having their interest costs paid directly by the federal government in lieu of allowing federal tax credits to bondholders. (See new § 17.02[12][g] for a complete discussion.)

Bonds With Original Issue Discount. The tax treatment of original issue discount or "OID," which arises when

the issuer of a debt instrument accepts less than the instrument's face value at maturity as the issue price. It is thus distinguishable from market discount, which arises when a debt instrument is issued at par but thereafter sells on the open market at less than par due to independent market forces. Newly revised Section 17.03 briefly reviews the meaning of terms used in the Code's OID provisions (*IRC Sections 1271-1275*), and examines the tax treatment of OID. (See newly revised § 17.02.)

CHAPTER 1 Gains and Losses From the Disposition of Property

1-1 Taxation of Securities Transactions 1.syn

§ 1.syn Synopsis to Chapter 1: Gains and Losses From the Disposition of Property

§ 1.01 Introduction

§ 1.02 The Elements of Gain or Loss--The Taxable Event

[1] The Realization Requirement--A Brief Overview.

[2] Sales as Taxable Events.

[a] Rescissions, Reformations, and Repurchases.

[3] Other Dispositions.

[a] Exchanges.

[i] In General.

[ii] Modifications of Debt Instruments.

[b] Gifts and Bargain Sales.

[c] Transfers of Appreciated Property to Charity.

[d] Transfers to a Spouse or Former Spouse.

§ 1.02A The Elements of Gain or Loss--Non-Events: Sham and Other Tax-Avoidance Transactions

[1] The Economic Substance Doctrine: Statement and Purposes.

[a] Foundations of the Economic Substance Doctrine--The Landmark Supreme Court Decisions.

[b] Statements of the Doctrine in Modern Decisions.

- [2] Indicia of Presence or Lack of Economic Significance.
- [3] The Role of Subjective Intent and Business Purpose.
- [4] Pre-Codification Tax Consequences of a Determination That Transaction Lacks Economic Substance.
- [5] Codification and Clarification of the Economic Substance Doctrine.
- [6] Penalty for Engaging in Transactions Lacking Economic Substance.

§ 1.03 The Elements of Gain or Loss--The Amount Realized

- [1] General Rule.
- [2] Special Situations.
 - [a] Inability to Value the Amount Realized.
 - [b] Disposition of Property Subject to Liabilities.
 - [c] Disposition of Property in Satisfaction of an Obligation.
- [3] Effect of the Taxpayer's Method of Accounting on the Amount Realized.

§ 1.04 The Elements of Gain or Loss--Basis

- [1] Cost Basis.
 - [a] Assumption of Seller's Liabilities.
 - [b] Basis of Property Acquired at a Cost in Excess of Fair Market Value.
 - [c] Basis of Property Acquired at a Cost Less Than Fair Market Value.
 - [d] Basis of Property Acquired in an Exchange.
 - [e] Basis of Property Constituting Income or Deduction Items.
- [2] Basis of Property Acquired Before March 1, 1913.
- [3] Basis of Property Acquired by Gift.
 - [a] The General Rule.
 - [b] Appreciated Property Acquired by Political Organizations.
- [4] Basis of Property Acquired From a Decedent.
 - [a] Ascertaining the Basis--The Presumption as to Fair Market Value.

- [5] Adjustments to Basis.
- [6] Multi-Unit Property--The Need for Allocation of Basis.
- [7] Allocation of Basis in Part-Sale, Part-Gift to Charity.
- [8] Disposition of Less than the Whole--The Need to Identify the Securities Sold.
 - [a] The First-In, First-Out Default Method.
 - [b] The "Adequate Identification" Method.
 - [i] Identification Through Actual Delivery.
 - [ii] Identification by Broker's Confirmation.
 - [iii] Identification by Fiduciaries.
 - [c] The Average Cost Method.
 - [i] Eligibility For the Average Cost Method.
 - [ii] Computation of Basis and Holding Period.
- [9] Information Reporting of Securities Transactions By Brokers.
 - § 1.05 The Elements of Gain or Loss--Recognition
- [1] The Loss Deduction.
 - [a] Tax Treatment of Losses Incurred in a Fraudulent Investment Scheme.
- [2] Installment Sales.
 - [a] The Installment Method of Accounting.
 - [b] Disposition of Installment Obligations.

CHAPTER 1 Gains and Losses From the Disposition of Property

1-1 Taxation of Securities Transactions § 1.01

§ 1.01 Introduction

Gross income includes "gains derived from dealings in property,"ⁿ¹ and securities are property. Any consideration of the tax aspects of transactions involving securities must therefore start with an understanding of the manner in which gains (and losses, as well) from the disposition of property are measured. As this book is concerned with the taxation of securities transactions, any discussion of rules, problems, and issues having relevance only to property other than securities has been eliminated.ⁿ²

FOOTNOTES:

(n1)Footnote 1. *IRC § 61(a)(3)*.

(n2)Footnote 2. A comprehensive discussion of sales and other dispositions of property can be found in Rabkin & Johnson, *Federal Income, Gift and Estate Taxation*.

CHAPTER 1 Gains and Losses From the Disposition of Property

1-1 Taxation of Securities Transactions § 1.02

§ 1.02 The Elements of Gain or Loss--The Taxable Event

[1] The Realization Requirement--A Brief Overview.

Neither appreciation nor depreciation in the value of an investment has income tax significance until it is "realized" in a sale or other disposition. There must be a realization of the gain, a "severance of the gain from capital," before appreciation becomes taxable gain.ⁿ¹ Although the Supreme Court has retreated from the view expressed in *Eisner v Macomber* that realization is a Constitutional requirement,ⁿ² as a general rule the income tax statute still requires realization via a taxable event as a prerequisite to gain recognition.ⁿ³ Congress can of course depart in specific instances from a realization requirement that is statutory rather than constitutional, but it has done so only infrequently and in limited circumstances.ⁿ⁴

Gain is normally includible as income in the year realized,ⁿ⁵ unless it is realized in a transaction that qualifies for deferral of gain or loss under one of the Internal Revenue Code's nonrecognition provisions.ⁿ⁶ A loss is correspondingly deductible in the year it is realized in a sale or other disposition; in addition, a loss may be deducted without a sale if, as the result of some identifiable event, the investment becomes worthless.ⁿ⁷ Gain is measured by the excess of the amount realized (usually, the sales price) over the adjusted basis of the investment (typically, cost); conversely, a loss is incurred to the extent the taxpayer's adjusted basis exceeds the amount realized.ⁿ⁸

Investment gains are typically taxed at a maximum capital gains tax rate, currently 15 percent if the investment has been held for more than one year.ⁿ⁹ Capital losses are generally deductible only from capital gains, although a limited amount of up to \$3,000 per year may be deducted from other income.ⁿ¹⁰ Unused capital losses may be carried forward indefinitely, subject to the same limitations.ⁿ¹¹

The Code does not define a taxable event, but *IRC Section 1001(a)*, which contains instructions for calculating realized gains and losses, clearly infers that such gains and losses must arise out of a "sale or other disposition of property." Sales are of course the most common type of taxable event. Other dispositions of property may also be taxable events, as *IRC Section 1001(a)* clearly indicates, but many common dispositions of property have been excluded from the category of taxable events by longstanding administrative practice. These include gratuitous transfers of property, such as gifts and bequests,ⁿ¹² and transfers of less than full ownership in the property, such as a mortgage or pledge of property for the limited purpose of allowing the property to serve as security for a loan,ⁿ¹³ or a lease or license carved out of the ownership interest and conveyed to a third party.ⁿ¹⁴

A loss can be realized as the result of a sale or other disposition of property, but if property becomes worthless a loss may also be realized by any event that establishes the fact and fixes the amount of the loss with respect to the property.ⁿ¹⁵ For example, the holder of stock or securities in a foreign company whose assets are seized or expropriated by its home country is entitled as a result of that expropriation to claim a worthless stock or bad debt deduction without having to go through the formality of a selling the stock or securities for a nominal price.ⁿ¹⁶

[2] Sales as Taxable Events.

"A sale, in the ordinary sense of the word, is a transfer of property for a fixed price in money or its equivalent ... "n1 Since "sale" is not defined in the Internal Revenue Code, courts will use its ordinary meaning in determining whether a given transaction is a taxable event for purposes of *IRC Section 1001* unless doing so "would lead to absurd results ... or ... thwart the obvious purpose of the statute."ⁿ²

A sale can take place for tax purposes without the passage of legal title as long as beneficial ownership passes to the purchaser.ⁿ³ In *Miami Nat'l Bank*, the Tax Court recognized a sale of stock for tax purposes even though title did not pass and the stock sold remained in a "subordinated securities account" held by the seller's broker.ⁿ⁴ The subordination agreement gave the seller's broker legal title to the stock, possession of the physical stock certificates, and the right to hypothecate the stock under certain circumstances. On the other hand, the broker continued to recognize the seller as the true owner of the stock in the monthly statements it sent him, and the seller had the right to receive dividends on the stock, to vote the stock, to reacquire the stock by substituting cash or readily marketable securities of equivalent value, and to file a claim against the broker for the proceeds of any shares sold out of the subordination account.ⁿ⁵ The Tax Court found that the seller's retained rights amounted to beneficial ownership of the stock, and that the seller's transfer of those rights to the purchaser (*i.e.*, beneficial ownership) resulted in a sale of the stock for tax purposes.ⁿ⁶

Moreover, passage of legal title does not necessarily guarantee that a "sale" has taken place for federal income tax purposes. For example, the transfer of title to real property from mortgagor to mortgagee as security for a loan is not a "sale, in the ordinary sense of the word" nor is it treated as such for federal income tax purposes.ⁿ⁷ The Supreme Court has observed that:

"[T]axation is not so much concerned with the refinements of title as it is with actual command over the property taxed--the actual benefit for which the tax is paid." *Corliss v Bowers*, 281 U.S. 378 (1930) . In a number of cases, the Court has refused to permit the transfer of formal legal title to shift the incidence of taxation attributable to ownership of property where the transferor continues to retain significant control over the property transferred. [Citations omitted]. In applying this doctrine of substance over form, the Court has looked to the objective economic realities of a transaction rather than to the particular form the parties employed."ⁿ⁸

Following the substance over form principle, the Internal Revenue Service and the courts disregard formal sales as "shams," regardless of whether legal title passes to the purchaser, when excessively high and unrealistic purchase prices, paid largely if not exclusively with nonrecourse indebtedness, make it unlikely that the purchaser will ever acquire an economically significant interest in the property.ⁿ⁹ Conversely, a lease may be reclassified as a sale for tax purposes, despite the lack of a title transfer, when indicia such as the lessee's option to renew the lease at the end of its term for a nominal rent for the remainder of the property's useful life show that the lessee, as a matter of economic substance, is the purchaser of the property.ⁿ¹⁰

There is, however, a limit to how far the Government may go in disregarding or reclassifying a transaction cast in the form of a sale. In many cases there will be more than one path leading to substantially the same economic objective, and the paths may have different tax consequences. Substance over form does not give the Government a license to put the

taxpayer on a path different from the one he chose simply because another path leads to the same economic result but produces more tax.ⁿ¹¹

The Supreme Court has limited substance over form's role to requiring that there be some economic significance to the taxpayer's choice of form beyond the tax benefits derived from using it.ⁿ¹² The Court found that the economic substance requirement was met in *Frank Lyon Co v US*,ⁿ¹³ where a bank, after initially planning to obtain long-term financing for its headquarters building, decided instead to sell the building to the taxpayer and lease it back for a 25-year primary lease term. The taxpayer/purchaser made a \$500,000 down payment and obtained a \$7,140,000 mortgage loan to fund the purchase price. The initial 25 year lease term was the same as the term of the taxpayer's mortgage loan. Rents under the primary lease equaled exactly the amounts taxpayer needed to make principal and interest payments on its mortgage. After expiration of the primary lease, the bank held options to renew the lease for an additional 40 years at rentals calculated to provide the taxpayer with a return of its \$500,000 down payment with interest compounded at 6 percent per annum. Alternatively, the bank held options to repurchase the building at various times at option prices similarly calculated to return taxpayer's \$500,000 down payment with 6 percent interest. In the event the building was destroyed or condemned, the taxpayer's share of any award was limited to a return of its \$500,000 down payment with 6 percent interest; any excess belonged to the bank.

The Supreme Court refused to disregard the sale and leaseback and reclassify the transaction as a secured loan of \$500,000 from taxpayer to the bank at 6 percent interest as the Government urged because the parties' choice of the sale-and-leaseback route had economic consequences the Court could not ignore. As a result of casting the transaction as a sale-and-leaseback rather than a secured loan, the taxpayer was required to incur the substantial mortgage indebtedness necessary to acquire the building, which impacted the taxpayer's balance sheet and limited its ability to obtain financing for other business needs.ⁿ¹⁴ Moreover, the Government's proposal to treat the bank's sale to the taxpayer as though it never happened ignored the real world risk that the taxpayer could lose its \$500,000 down payment if, as the building's actual owner, it was unable to find new tenants or a purchaser for the building once the bank's 25-year primary lease expired. To be sure, its investment would be recovered with interest if the bank exercised its options to renew the lease and/or reacquire the building, but though the taxpayer may have contemplated this outcome it had not reserved a legal right to require the bank to exercise those options. Noting the "many contingencies" affecting the probability that the options would be exercised, "including variations in the value of real estate, in the cost of money, and in the capital structure of [the bank],"ⁿ¹⁵ and stressing the trial court's findings that the option prices were "negotiated at arm's length," and "represented fair estimates of market value," the Supreme Court refused to assume that the bank was bound to exercise its options after the primary lease expired.ⁿ¹⁶

In *Commr v Brown*,ⁿ¹⁷ another landmark Supreme Court case, the taxpayers, owners of a closely held corporation that operated a lumber mill, sold their stock in the corporation to a tax-exempt charitable organization for a \$1.3 million nonrecourse note. The note was payable solely out of the earnings of the corporation's lumber business and secured by its assets. Pursuant to the agreement of sale, the charity immediately liquidated the corporation and leased its lumber mill assets for five years to a newly formed corporation owned by the sellers' attorneys, which continued to operate the business with the same assets and the same personnel as before the sale. The new corporation paid rent to the charity equal to 80 percent of its operating profit, and the charity in turn paid 90 percent of the rent to the former shareholders to amortize the \$1.3 million purchase price of their stock.

The Internal Revenue Service argued that the shareholders' sale lacked economic substance because the sellers did not transfer the economic risks of ownership to the charity, which made no cash investment and assumed no personal liability to pay the purchase price of the stock. The Supreme Court, however, ruled that risk-shifting was not an essential element of a sale.

"To require a sale for tax purposes to be to a financially responsible buyer who undertakes to pay the purchase price from sources other than the earnings of the assets sold or to make a substantial down payment seems to us at odds with commercial practice and common understanding of what constitutes a

sale. The term 'sale' is used a great many times in the Internal Revenue Code and a wide variety of tax results hinge on the occurrence of a 'sale.' To accept the Commissioner's definition of sale would have wide ramifications which we are not prepared to visit upon taxpayers, absent congressional guidance in this direction."¹⁸

Although *Lyon* and *Brown* give tax planners a fairly wide berth, the Internal Revenue Service will continue to challenge sales that more closely resemble a loan, a lease, or other type of transaction. Each case must be resolved on the basis of its particular facts and circumstances.¹⁹ Factors bearing on whether a transaction is a "sale" for tax purposes include: (1) whether legal title passes; (2) how the parties treat the transaction; (3) whether an equity was acquired in the property; (4) whether the contract creates a present obligation on the seller to execute and deliver a deed and a present obligation on the purchaser to make payments; (5) whether the right of possession is vested in the purchaser; (6) which party pays the property taxes; (7) which party bears the risk of loss or damage to the property; and (8) which party receives the profits from the operation and sale of the property.²⁰ However, the relevant factors and the weight to be attached to each can vary with the circumstances involved.²¹

[a] Rescissions, Reformations, and Repurchases.

An option to rescind a sale and restore the *status quo ante* will not, of itself, prevent realization of gain or loss by the seller unless the option is actually exercised before the end of the taxable year.²² The seller's obligation to report a gain even though it may be rescinded and he may ultimately be required to return the sale price is rooted in the claim of right doctrine: as long as the seller has an unrestricted right to the sale proceeds he is required to report the gain as income, notwithstanding the possibility that he may later be called upon to return it.²³

If a right of rescission is actually exercised, and the exercise occurs before the end of the taxable year in which the sale was made, the original sale will be disregarded for federal income tax purposes.²⁴ There must be an actual return of the property and a refund of the purchase price or an unconditional commitment to do so before the end of the taxable year. Where a seller of stock brought suit against the purchaser before the end of the taxable year of sale seeking rescission of the sale on grounds, *inter alia*, of fraud, but the seller continued to hold the purchaser's funds, and the purchaser denied the fraud allegations and contested the lawsuit, the seller's obligation to report gain realized on the sale of the stock was unaffected by his filing of the lawsuit in the taxable year of sale.²⁵ If the sale is rescinded in a year subsequent to the year of sale, the seller remains obligated to report gain or loss in the year of sale, and has no right to re-open or amend the earlier year's return.²⁶ This result is compelled by the annual accounting principle: the rule that "each taxable year is a separate unit for tax accounting purposes" and the income for each year must be determined using the facts as they exist at the end of that year.²⁷ If the seller reacquires property sold earlier in the same taxable year, his basis in the reacquired property is the same as it was immediately before the sale; this follows from the fact that the sale itself is disregarded for tax purposes. If, however, the rescission occurs in a subsequent taxable year, the seller's basis in the reacquired property will be the property's sale price, the amount the seller received for the property and subsequently refunded to the purchaser.²⁸

The same rules apply to a sale declared void by judicial decree, where a state court determines that a mistake was made and retroactively reforms the instrument of sale to conform it to the parties' true intent. In *Davis v US*,²⁹ the taxpayers intended to make gifts of stock to their sons, although the sons were to pay any gift taxes. They asked an executive with their company to draft the necessary documents and he, misunderstanding their intent, drafted the documents as sales contracts rather than gifts. The mistake was discovered and a state court decree reforming the sale documents to effect gifts rather than sales was obtained prior to the end of the taxable year. The Court, finding that the taxpayers had intended to make gifts of the stock, gave effect to the state court's decree, because "the reformation was made in the same taxable year as the original transaction to correct a mistake contrary to the taxpayer's intent."³⁰

If the seller has an option to reacquire the property sold at a price other than the original sales price, but not a right to

rescind, neither the existence of the option nor its later exercise should affect the original sale.ⁿ³¹ Of course, if the seller is legally or economically compelled to exercise the option, then it is not an option at all and the sale will be reclassified or disregarded.ⁿ³² Absent evidence of legal or economic compulsion, courts treat the option as an independent transaction even if it appears likely (though not certain) to be exercised.ⁿ³³

[3] Other Dispositions.

The term "other dispositions" in *IRC Section 1001(a)* signifies Congress' intent to take account of gain or loss derived in any type of transaction in property, unless specifically excluded, whether or not the transaction is considered a sale.ⁿ¹ For example, dispositions involving the retirement of debt instruments through payment by the issuer are common realization events but are not "sales" as that term is usually understood,ⁿ² although for reasons related to the special treatment of capital gains and losses Congress has legislatively declared that such dispositions are to be treated as sales or exchanges for federal income tax purposes.ⁿ³

Any transfer of property subject to indebtedness, whether the indebtedness is recourse or nonrecourse, is a taxable "disposition" of the property if the transfer is not otherwise taxable as a sale, as when encumbered property is surrendered in payment of a debt, or transferred to a third party as a gift. The "amount realized" by the transferor in such a disposition is the amount of the debt.ⁿ⁴

The remainder of this section considers the unique tax issues raised by transactions in property, frequently involving securities, that are not sales but are taxable "dispositions" within the meaning of *IRC Section 1001* in which gain or loss may be realized. These include exchanges in which the property received is "materially different" from the property given up; so-called "bargain sales" in which the transferor receives less than fair market value for transferred property, dispositions of appreciated property to charity, where Congress has effectively required gain recognition in certain instances by disallowing a charitable contribution deduction rather than including the gain in income, and the disposition of property to a spouse, or to a former spouse in a property settlement incident to a divorce, which the courts originally viewed as a taxable event but Congress has legislatively treated, for most purposes, as a nontaxable gift.

[a] Exchanges.

[i] In General.

An exchange has been distinguished from a sale on the ground that the consideration for the latter is expressed in terms of money, "while in an exchange property is transferred in return for other property without the intervention of money."ⁿ⁵ The distinction may have relevance in determining whether a specific nonrecognition provision of the Code will be applicable in a given case,ⁿ⁶ but not for purposes of realization of gain or loss. Since the receipt of new and different property constitutes the requisite severance of gain from capital, most exchanges, like sales, result in a realization of gain or loss.ⁿ⁷

The regulations under *IRC Section 1001* provide that an exchange will not be treated as a taxable event if the property received does not differ "materially either in kind or in extent" from the property given up.ⁿ⁸ The Supreme Court gave a surprisingly technical interpretation of "material difference" in *Cottage Savings Ass'n v Commr*,ⁿ⁹ holding that the regulations are satisfied by any exchange of properties representing "legally distinct entitlements" even though the properties are economic substitutes. The Court ruled that an exchange between two savings banks of participating interests in different but economically equivalent mortgage portfolios were "materially different" within the meaning of the regulations because the obligors and the homes that secured the mortgage loans were different in each of the portfolios. In view of the distinct legal entitlements embodied in each portfolio, the fact that the regulatory agency having jurisdiction over the banks considered the portfolios "substantially identical" from an economic standpoint and on that ground permitted the banks to disregard losses sustained in such portfolio exchanges for financial reporting purposes was not controlling. The bank's financially unrecognized losses were therefore allowed as realized and

deductible losses for tax purposes.ⁿ¹⁰

[ii] Modifications of Debt Instruments.

Not long after the Supreme Court decided *Cottage Savings*, the Treasury Department proposed and subsequently finalized regulations,ⁿ¹¹ dealing with the materiality issue in the context of a modification of a debt instrument; whether a change in the bond's terms, such as its maturity date or interest rate, results in a materially different security justifying treatment of the modification as a taxable exchange.ⁿ¹² Although intended to address taxpayer uncertainty regarding the materiality standard after *Cottage Savings*, they do not apply to exchanges of debt instruments between holders,ⁿ¹³ the type of transaction before the Supreme Court in *Cottage Savings*. Neither do the regulations address the tax consequences of modifications in financial instruments other than debt instruments, or modifications in contracts generally.ⁿ¹⁴

The regulations are notable in two respects. First, they make any "significant modification" in the terms of a debt instrument a realization event--a "deemed exchange"--which triggers recognition of gain or loss (unless protected by one of the Code's nonrecognition provisions), whether or not there has been a physical exchange of debt instruments between the issuer and the holder.ⁿ¹⁵ Second, the regulations mostly distinguish taxable material from nontaxable immaterial modifications by weighing the economic significance of the modifications, rather than rigidly adhering to the "distinct legal entitlement" standard followed in *Cottage Savings*.ⁿ¹⁶

A change in a debt instrument cannot trigger a realization event unless it first meets the definition of a "modification": "any alteration ... of a legal right or obligation of the issuer or a holder of a debt instrument whether ... expressed in a written or oral agreement or inferred from the conduct of the parties or otherwise."ⁿ¹⁷ The purpose of the modification gateway is to insure that (with a few exceptions) there is truly a new agreement between the parties before testing to determine the "significance" of the difference between the old and new agreements and whether it potentially triggers realization of gain or loss. Thus, the unilateral action of one party, such as an issuer's failure to perform an obligation required under the terms of the debt instrument, does not qualify as a "modification" unless the other party expressly or impliedly acquiesces in the changed performance.ⁿ¹⁸ Nor, by definition, is there a *new* agreement if a change in terms occurs automatically by operation of the terms of the original debt instrument.ⁿ¹⁹

However, certain types of alterations are considered so fundamental that they are classified as "modifications" which must be tested for "significance" even though the alterations result from the operation of the original terms of the debt instrument. The exceptions to the general rule are: (1) alterations that result in a substitution of a new obligor or the addition or deletion of a co-obligor;ⁿ²⁰ (2) alterations that change the nature of the instrument from a recourse to a nonrecourse obligation, or vice-versa;ⁿ²¹ and (3) alterations that result in the debt instrument becoming something other than debt for federal income tax purposes.ⁿ²²

Further, if an alteration results from the exercise of an option in the original terms of the debt instrument that effectively requires both parties to agree to the alteration before it becomes effective, the alteration is essentially a new agreement between the parties. Accordingly, the regulations provide that an alteration resulting from the exercise of an option contained in the original terms of the debt instrument will nevertheless be treated as a "modification" unless the option qualifies as a "unilateral option".ⁿ²³ To so qualify it must meet three tests: (1) its exercise must not require the consent or approval of (i) the other party, (including a party related to the other party within the meaning of *IRC Sections 267(b)* or *707(b)(1)*), (ii) a court or (iii) an arbitrator;ⁿ²⁴ (2) at the time the option is exercised or as a result of its exercise, the other party must not have a right to alter or terminate the instrument or to put the instrument to a person related to the issuer;ⁿ²⁵ and (3) if exercise of the option requires payment of consideration, it must be (as of the debt instrument's issue date) either a de minimis amount, a specified amount, or an amount based on a formula that uses objective financial information (as defined in *Treasury Regulation Section 1.446-3(c)(4)(ii)*).ⁿ²⁶ Moreover, even if the option qualifies as a "unilateral option," if its exercise by a holder of a debt instrument results in a deferral of or reduction in any scheduled payment of principal or interest, that alteration will be considered a "modification" which must be tested

for "significance."ⁿ²⁷

An alteration that falls within the definition of a "modification" does not trigger a "deemed exchange" unless it is considered a "significant modification." The next operative part of the regulations, *Treasury Regulation Section 1.1001-3(e)*, contains several bright-line tests for distinguishing significant from insignificant modifications in various situations.

(1) Significant change in yield. A modification to a debt instrument other than a contingent payment instrument is regarded as significant if it has the effect of changing the yield of the instrument by more than the greater of (a) 1/4 of one percent (25 basis points) or (b) 5 percent of the annual yield of the unmodified instrument.ⁿ²⁸

(2) Changes in Timing of Payments. A modification that changes the timing of payments is "significant" if it results in a "material deferral" of the payments. "Materiality" depends on all the facts and circumstances, including the length of the deferral, the original term of the instrument, the amounts deferred, and the time period between modification and actual deferral.ⁿ²⁹ However, the regulations do provide an objective safe harbor: if all deferred payments are unconditionally payable no later than the end of a defined safe harbor period, the deferral will not be considered "material." The safe harbor period begins on the due date of the first deferred payment and ends either five years later, or after the expiration of 50 percent of the original term of the instrument, whichever period is shorter.ⁿ³⁰ Deferrals longer than the safe harbor period may still be shown not to be "material" under the facts and circumstances test.

(3) Substitution of New Obligor on a Recourse Debt Instrument. The substitution of a new obligor on a recourse debt instrument is, ordinarily, an automatic "significant modification."ⁿ³¹ However, in the following three circumstances, contrary to the general rule, the substitution of a new obligor on a recourse debt instrument will not be deemed a "significant" modification.

(i) **Section 381(a) transactions.** The substitution of a new obligor is not a "significant" modification if, in a transaction to which *IRC Section 381(a)* applies, (a) the acquiring corporation (within the meaning of *IRC Section 381*) becomes the new obligor; (b) the transaction does not result in a "change in payment expectations"; as defined below, and (c) the transaction does not result in any "significant alteration" to the terms of the debt instrument.ⁿ³²

A "change in payment expectations" occurs if, as a result of a modification, there is either a "substantial enhancement" or a "substantial impairment" of the obligor's "capacity" to meet the payment obligations under the debt instrument. There is a "substantial enhancement" if the obligor's capacity was "primarily speculative" prior to the modification and is "adequate" thereafter; a "substantial impairment" is the reverse.ⁿ³³ An obligor's "capacity" includes any source for payment, including collateral, guarantees, or other credit enhancement.ⁿ³⁴

There is a "significant alteration" if the transaction causes the terms of the debt instrument to trigger a modification that would have been considered "significant" under the regulations had it resulted from a new agreement of the parties rather by operation of the terms of the instrument.ⁿ³⁵ Suppose, for example, that under the terms of a debt instrument the interest rate is reset annually keyed to an objective index. If the rate is reset pursuant to this provision after an acquiring corporation in a Section 381(a) transaction is substituted as a new obligor, and the debt instrument's yield changes beyond the limits

allowed in *Treasury Regulation Section 1.1001-3(e)(2)*, the yield change is not a "significant alteration" because the alteration was not caused by the acquisition transaction.ⁿ³⁶ On the other hand, a "significant alteration" could occur if a significant change in yield results from a provision in the debt instrument (eg, one requiring a change from a fixed to a variable interest rate) that becomes operative only in the event of an assumption of the debt by a new obligor.ⁿ³⁷

(ii) **Acquisitions of Substantially All the Assets of the Original Obligor.** The substitution of a new obligor is not a "significant" modification if the new obligor (a) acquires substantially all of the assets of the original obligor, (b) the transaction does not result in a change in payment expectations, as defined above, and (c) the transaction does not result in any "significant alteration" to the terms of the debt instrument as defined above.ⁿ³⁸

(iii) **Tax-Exempt Bonds.** The substitution of a new obligor on a tax-exempt bond will not be treated as a "significant" modification if the new obligor is a related entity to the original obligor (as defined in *IRC Section 168(h)(4)(A)*) and the collateral securing the instrument continues to include the original collateral.ⁿ³⁹

(4) Substitution of a New Obligor on Nonrecourse Debt Instrument. Since the holder of a nonrecourse debt obligation agrees to look solely to the collateral for payment, the regulations do not regard the substitution of a new obligor as "significant."ⁿ⁴⁰

(5) Addition or Deletion of Co-Obligor. The addition or deletion of a co-obligor on any debt instrument is a "significant" modification only if it results in a "change in payment expectations," as defined above.ⁿ⁴¹

(6) Change in Security or Credit Enhancement. A modification that releases, substitutes, adds or otherwise substantially alters the collateral for, a guarantee on, or other form of credit enhancement for a **nonrecourse** debt instrument is always "significant" unless (1) it involves a substitution of collateral and the collateral is either fungible or of a type where the particular units pledged are unimportant (for example, government securities or financial instruments of a particular type or rating); or (2) it involves a substitution of one commercially available credit enhancement contract for a similar one; or (3) property securing the nonrecourse debt instrument is improved.ⁿ⁴² However, a modification releasing, substituting, adding or otherwise substantially altering collateral or a guarantee or other form of credit enhancement for a **recourse** debt instrument is only considered "significant" if it results in a "change in payment expectations."ⁿ⁴³ For example, if an issuer of a recourse obligation agrees with a holder to substitute for an existing letter of credit a letter of credit from a second bank with a higher credit rating, the modification is not "significant" if the issuer's capacity to meet payment obligations is not dependent on the letter of credit. The substitution of the new letter of credit would be "significant" if the obligor's capacity is dependent on the letter of credit and the substitution substantially enhances that capacity from primarily speculative to adequate.ⁿ⁴⁴

(7) Change in the Priority of Debt. A modification that changes the priority of a debt instrument relative to other debt of the issuer will not be deemed "significant" unless there is a "change in payment expectations."ⁿ⁴⁵

(8) Changes in the Nature of a Debt Instrument. A modification of a debt instrument is "significant" if it changes a debt instrument into an instrument or property right that is not debt for federal income tax purposes,ⁿ⁴⁶ or changes the nature of a debt instrument from recourse to nonrecourse or vice-versa.ⁿ⁴⁷

There are two exceptions to this rule. First, a defeasance of a tax-exempt bond is not a "significant" modification even though the issuer is released from any liability to make payments if (1) the defeasance occurs by operation of the terms of the original bond and (2) the issuer places in trust government securities or tax-exempt government bonds that are reasonably expected to provide interest and principal payments sufficient to satisfy the payment obligations under the bond.ⁿ⁴⁸ Second, a change from recourse to nonrecourse is not a "significant" modification if (1) the debt instrument continues to be secured only by the original collateral and (2) the modification does not result in a "change in payment expectations" as defined above.ⁿ⁴⁹

(9) Accounting or Financial Covenants. A modification that adds, deletes, or alters customary accounting or financial covenants is not considered "significant."ⁿ⁵⁰

If the significance of a modification cannot be judged under one of the specific rules described above, it must be tested under the general "economic significance" rule: "A modification is a significant modification only if, based on all facts and circumstances, the legal rights or obligations that are altered and the degree to which they are altered are economically significant."ⁿ⁵¹ For purposes of applying this general rule, all modifications, other than those found "not significant" under one of the specific tests described above, are considered collectively, so that a series of such modifications may be economically significant when considered together although each modification, if considered alone, would not be economically significant.ⁿ⁵²

The following rules of application are to be used in determining whether a modification is "significant" under all the tests (including the economic significance test) prescribed in *Treasury Regulation Section 1.1001-3(e)*:

(1) If a modification is potentially "significant" under more than one rule, it must be tested under each such rule before it can finally be determined to be "not significant."ⁿ⁵³ For example, a modification of a fixed rate debt instrument which defers annual interest payments until maturity must be tested for significance under both the change in yield test and the deferral of scheduled payments test.ⁿ⁵⁴

(2) If a modification otherwise covered by a specific rule becomes effective only upon the occurrence of a substantial contingency, the modification is tested under the general "economic significance" rule rather than the specific rule normally applicable to modifications of that type.ⁿ⁵⁵ Moreover, if any modification that would ordinarily be tested for significance under rules governing changes in obligors, changes in security or debt priority, or changes in the nature of a debt instrument, becomes effective on a substantially deferred basis (whether or not subject to a contingency), the significance of the modification must be determined under the general "economic significance" test rather than any of those specific rules.ⁿ⁵⁶

(3) When the rules applicable to modifications causing changes in yield, changes in timing of payments, changes in obligors or changes in security (including debt priority) prescribe a degree of change that constitutes a significant modification under that rule, a change of the same type but to a lesser degree is not a significant modification.ⁿ⁵⁷ Likewise, if a rule provides that a modification that results in a change in payment expectations is a "significant modification," any modification that does not result in a change of payment expectations is not a "significant modification."ⁿ⁵⁸

(4) Modifications have a cumulative effect. Earlier modifications are combined with later ones if their combined effect creates a "significant modification."ⁿ⁵⁹ However, in testing for the significance of a change in yield, any prior modification occurring more than 5 years before the date of the modification being tested is disregarded.ⁿ⁶⁰

(5) Modifications of different terms of a debt instrument, none of which separately would be a significant modification under the specific rules, cannot be combined to create a significant modification.ⁿ⁶¹ For example, a change in yield that is not a significant modification under *Treasury Regulation Section 1.1001-3(e)(2)* and a substitution of collateral that is not a significant modification under *Treasury Regulation Section 1.1001-3(e)(4)(iv)*, cannot together result in a significant modification. However, although the significance of each modification is tested independently, in testing a particular modification it is assumed that all other simultaneous modifications have already occurred.ⁿ⁶²

Under *Rev Proc 2001-21*,ⁿ⁶³ the issuer of a debt instrument and one or more holders may make an election under certain circumstances to treat a substitution of new for old debt instruments as a realization event even though there is no "significant modification" of terms in the new and old debt instruments within the meaning of *Treasury Regulation Section 1.1001-3*. The holder realizes gain or loss by reason of the election, but such gain or loss is not recognized on the holder's return in the year of the debt substitution. Instead, the holder takes as its basis in the new debt its adjusted basis in the old debt and the holding period for the new debt includes the holding period for the old debt.ⁿ⁶⁴

[b] Gifts and Bargain Sales.

Suppose a taxpayer owns 1,000 shares of publicly traded stock for which he paid \$1 per share but which have since doubled in value to \$2 per share. Desiring to make a gift of the appreciation to his daughter, he considers selling half of his shares on the market to recover his initial \$1,000 investment (500 shares x \$2 per share), and giving the remaining shares to his daughter. In that case, however, he will owe tax on a \$500 gain (\$1,000 realized on the sale less his \$500 cost basis in 500 shares), and fail to accomplish his goal of recovering his original \$1,000 investment.

This was the problem facing the taxpayer in *Fincke v Commr*.ⁿ⁶⁵ The solution: merge the sale and gift transactions into a single "bargain sale" transaction in which all 1,000 shares are transferred to the daughter at a bargain price of \$1 per share (taxpayer's cost). The taxpayer recovers his \$1,000 investment, free of tax, and his daughter receives a gift of the \$1,000 appreciation in value.ⁿ⁶⁶ Approving this technique, the Board of Tax Appeals (predecessor of today's United States Tax Court) held that "where property has been transferred for a substantial consideration which is less than its market value... such transfers constitute bona fide sales coupled with a gift to the extent of the excess of the market value of the property over the selling price."ⁿ⁶⁷

The key to the happy tax result was the Board's decision to calculate gain on the bargain sale using the taxpayer's artificially low "sales price" as the "amount realized," representing only a fraction of its actual value, but deducting therefrom the taxpayer's full basis in the property, allocating no portion of basis to the gift.ⁿ⁶⁸ An alternative approach would have been to apportion the taxpayer's basis between the sale and gift components of the transaction and allow only a proportionate amount of basis to be deducted from the bargain sale proceeds. *IRC Section 1011(b)* requires such apportionment when a taxpayer makes a bargain sale to charity,ⁿ⁶⁹ but in the case of non-charitable donees the recovery of basis rule applied in *Fincke* has been adopted by regulation.ⁿ⁷⁰

Unlike *Fincke*, it is not always obvious that a donor is entering a bargain sale transaction; realization principles can make this a trap for the unwary. A donor may owe tax as a result of a transaction in which he receives no cash or other tangible property but makes a gift of property subject to a mortgage or other secured indebtedness. There is a part sale in these circumstances because the mortgage indebtedness is an "amount realized" as a consequence of the transfer of the property. The donor pays tax on the amount, if any, by which the secured debt exceeds his basis in the property, regardless of whether he is personally liable to repay the debt or whether the donee assumes the indebtedness.ⁿ⁷¹

For a time, it appeared that a transfer of property subject to an obligation to pay the federal gift taxes owed by the donor as a result of making the gift might prove an exception to the rule. The Tax Court and two courts of appeal held that the donor realizes no economic benefit from the donee's payment of gift taxes, and that the donor's intent is simply to make a "net gift" of the property less the taxes imposed on the transfer.ⁿ⁷² The issue reached the Supreme Court in *Diedrich*

v Commr,ⁿ⁷³ which rejected the "net gift" theory. The Court concluded that the donee's assumption of the donor's personal obligation to pay gift tax was similar to the employer's assumption of an employee's income tax liability in *Old Colony Tr Co v Commr*.ⁿ⁷⁴ In both cases, an economic benefit is conferred on the debtor equal to the amount of taxes paid by a third party on his behalf, and that benefit is properly taxable to him. The donor's intent that gift taxes be offset against the value of the gift changes neither the economic benefit bestowed by the donee's payment of those gift taxes nor the donor's obligation to pay income taxes on the value of the benefit.ⁿ⁷⁵

[c] Transfers of Appreciated Property to Charity.

As a general rule, a taxpayer is entitled to deduct from income the fair market value of property contributed to charity, including its value in excess of the taxpayer's basis.ⁿ⁷⁶ The taxpayer does not realize gain as a result of the disposition, even if the transfer is made in satisfaction of a fixed dollar pledge to the charity.ⁿ⁷⁷ The combination of a deduction for the full value of appreciated property and escape from tax on the gain has made charitable contributions of appreciated securities and other property a popular method of charitable giving, but Congress, the Internal Revenue Service and the courts have created several exceptions that limit the use and abuse of this technique.

IRC Section 170(b)(1)(C) imposes a special limitation on the amount that may be deducted currently with respect to donations of "capital gain property"; i.e., capital assets which, if sold at fair market value at the time of the contribution, would generate long-term capital gain.ⁿ⁷⁸ The deduction for the value of capital gain property contributed during the year is limited to 30 percent of the taxpayer's adjusted gross income ("AGI") for the year.ⁿ⁷⁹ If the fair market value of capital gain property contributed by the taxpayer during the year exceeds the capital gain property limitation for that year, the excess can be carried forward to the following five taxable years, but remains subject to the capital gains property limitation in each subsequent year.ⁿ⁸⁰ Alternatively, the taxpayer may elect to forego permanently any deduction for the unrealized capital gain component of the value of capital gain property and thereby avoid application of the capital gain property limitation to the remaining value of such property.ⁿ⁸¹

If appreciated property is not capital gain property, i.e., if sold at its fair market value, gain on its sale would not be long-term capital gain, *IRC Section 170(e)(1)(A)* simply disallows a charitable contribution deduction for the entire value of the property in excess of basis. Thus, a donation of appreciated stock held for 12 months or less is deductible, after applying *IRC Section 170(e)(1)(A)*, only to the extent of the taxpayer's basis in the stock.

IRC Section 170(e)(1)(A) may actually reduce the taxpayer's charitable contribution deduction to zero when "section 306 stock" is donated to charity because, under *IRC Section 306(a)*, the entire proceeds from the sale of such stock may be taxed as "ordinary income."ⁿ⁸² In general, Section 306 stock is preferred stock received as a nontaxable stock dividendⁿ⁸³ (sometimes referred to as a "preferred stock bailout") and the proceeds from its sale or other disposition are taxable as "ordinary income" to the extent the recipient shareholder would have had taxable dividend income had the issuing corporation distributed cash equal to the fair market value of the preferred instead of the stock. Unless the Section 306 stock has appreciated beyond its "dividend" value, therefore, *IRC Section 170(e)(1)(A)* will reduce the deduction allowable for a gift of such stock to zero.ⁿ⁸⁴

Does *IRC Section 170(e)(1)(A)* disallow a charitable contribution deduction for the dividend component of section 306 stock under the temporary tax regime established by Title III of the Jobs and Growth Tax Relief Reconciliation Act of 2003 ("JGTRRA")? JGTRRA generally taxes qualified dividend income ("QDI") and long-term capital gains at the same favorable tax rates.ⁿ⁸⁵ Moreover, JGTRRA treats the "dividend" portion of the proceeds from the sale or other disposition of Section 306 stock as a dividend includible in QDI and taxable at long-term capital gain rates.ⁿ⁸⁶ Technically, a gift of Section 306 stock remains subject to *IRC Section 170(e)(1)(A)* since, if sold, its proceeds are classified as a dividend and "not long-term capital gain."ⁿ⁸⁷ On the other hand, the Congressional purpose for permanently disallowing a charitable contribution deduction under *IRC Section 170(e)(1)(A)* disappears as long as dividends (including income from the disposition of Section 306 stock which is treated as dividends) are taxable at the same rates as long-term capital gains. The question has not yet arisen and may become moot if, in accordance with their

"sunset" provisions, JGTRRA rules and rates are repealed as scheduled for taxable years beginning after December 31, 2010.ⁿ⁸⁸

Another statutory limitation on the charitable contribution deduction for appreciated property applies when such property is donated to or for the use of certain private foundations. With such a private foundation donee, the charitable contribution deduction for appreciated property is limited to the donor's basis even though the unrealized appreciation would have been taxable as long-term capital gain had the property been sold.ⁿ⁸⁹ However, this provision will not apply if the appreciated property is "qualified appreciated stock;" *i.e.*, publicly traded stock for which "market quotations are readily available on an established securities market."ⁿ⁹⁰

A final statutory rule that limits the tax benefit of contributing appreciated property to charity is the special apportionment of basis rule applicable in bargain sales to charity, which increases the amount of gain subject to tax in such sales.ⁿ⁹¹

When a taxpayer makes a bargain sale of appreciated property to charity, he must of course deduct the value of the money or other property received from the charity from the value of the property transferred to the charity in determining the amount of the charitable contribution deduction. A line of cases related to "bargain sales" holds that a charitable contribution deduction may be denied entirely if instead of receiving cash or tangible property the donor receives "substantial benefits" from the charity beyond those available to the general public.ⁿ⁹² Indeed, when the donor receives a substantial benefit from the charity in exchange for transferred property, the contribution of property is not considered a "gift" at all unless the donor can prove that the fair market value of the transferred property exceeds the value of the substantial benefit received.

"Where in return for a transfer a taxpayer receives something patently of more than nominal value from the transferee (whether economic or other), a benefit which other members of the public do not receive, a presumption arises that the transfer from taxpayer to the government or charity was not a gift or at least not a gift in its entirety. An identifiable benefit presumptively provides a *quid pro quo* for the transfer. Where a transaction has an "inherently reciprocal nature" when looked at in its entirety, there is no debate that the entire value of the donor's property which was transferred may not be deducted ... [citations omitted]"ⁿ⁹³

Individual shareholders in a closely held corporation may be reluctant to donate their corporation's appreciated shares to a charity, despite the favorable tax consequences of such gifts, because of concerns about interference with their control over the corporation or the assertion of minority shareholder rights. These concerns can be overcome if the donated shares are immediately redeemed by their closely held corporation from the charity for cash or other corporate property, in which case the shareholder may obtain a charitable contribution deduction for the appreciated value of his donated shares without giving up (except for a brief period) ownership or control of the corporation's stock.ⁿ⁹⁴ The Internal Revenue Service tried to collapse such donation/redemption transactions under the step transaction doctrine,ⁿ⁹⁵ treating the shareholder as if his stock had first been redeemed by the corporation (with the proceeds taxed to the shareholder as a dividend) and the proceeds then contributed by him to the charity. However, the courts refused to integrate the gift and redemption transactions when the charity was under no legal obligation to redeem the donated shares.ⁿ⁹⁶ The Service finally gave up in *Rev Rul 78-197*,ⁿ⁹⁷ where it acquiesced in *Palmer v Commr*, agreed to follow *Grove*, *Behrend*, and *Carrington*, and announced that henceforth it would only treat the proceeds of a redemption of stock donated to charity as income to the donor "if the donee is legally bound, or can be compelled by the corporation, to surrender the shares for redemption."

Nevertheless, the Court of Appeals for the Second Circuit resurrected the Service's step transaction argument in *Blake v Commr*.ⁿ⁹⁸ The taxpayer in that case, in a variation on the donation/redemption theme, donated publicly traded stock to a charitable organization, which immediately sold the stock and used the proceeds to purchase the taxpayer's yacht. The Court of Appeals, affirming the Tax Court's decision,ⁿ⁹⁹ accepted the Commissioner's invitation to apply the step

transaction doctrine.ⁿ¹⁰⁰ The Court found that an "understanding" between the charity and the taxpayer that the charity would sell the stock donated to it by the taxpayer and use the proceeds to purchase taxpayer's yacht created, under principles of promissory estoppel, a legal obligation on the part of the charity to do so.ⁿ¹⁰¹ Disagreeing with *Palmer* and Rev Rul 78-197, the Court also said that the parties' "expectation" that the yacht purchase would follow the stock donation was sufficient to satisfy the requirements of the step transaction doctrine even if the charity had no legal obligation to purchase the yacht.ⁿ¹⁰² Notwithstanding *Blake*, however, the Tax Court views the Government as estopped by *Rev Rul 78-197* from applying the step transaction doctrine in charitable donation/redemption or donation/sale cases if the donee is not *legally* bound to redeem or sell the gifted stock.ⁿ¹⁰³

Gifts of appreciated stock or securities in anticipation of an impending corporate distribution may be attacked under the assignment of income doctrine if not propitiously timed. In *Ferguson v Commr*,ⁿ¹⁰⁴ the taxpayers' rights as shareholders to receive a fixed dollar price per share under a merger agreement were deemed to have "matured" by the time they gave their shares to charity. As a result the merger price paid to the charities in exchange for the donated shares was included in the income of the donor shareholders as taxable gain to the extent the proceeds exceeded their basis in the donated shares.ⁿ¹⁰⁵ In *Kinsey v Commr*,ⁿ¹⁰⁶ *Jones v US*,ⁿ¹⁰⁷ and *Allen v Commr*,ⁿ¹⁰⁸ the assignment of income doctrine was similarly applied when stock was donated to charity after a plan of liquidation had been adopted by the corporation; in each case the donor was held taxable on the liquidation proceeds.

[d] Transfers to a Spouse or Former Spouse.

While most transfers of property between spouses during marriage are probably nontaxable gifts, donative intent is clearly lacking in property settlements incident to the dissolution of a marriage.ⁿ¹⁰⁹ In *US v Davis*, the Supreme Court held that a transferor spouse realized taxable gain in a transfer of appreciated stock to his former spouse, measured by the difference between the stock's fair market value and his basis in the stock.ⁿ¹¹⁰

Although the Supreme Court's decision in *Davis* accorded with recognized tax principles, Congress found the result unsatisfactory for several reasons.ⁿ¹¹¹ A principal concern was that it treated similarly situated taxpayers differently depending on the laws of the state in which they happened to reside. A transfer of property in a marriage settlement could be taxable if state law gave the transferee spouse only inchoate marital rights in the property transferred (as in *Davis*), but nontaxable if state law made the spouses co-owners of property acquired during marriage, as in community property and certain common law jurisdictions.ⁿ¹¹² Congress also questioned the appropriateness of imposing federal income taxes on a transfer of property between spouses when tax law generally treats spouses as an economic unit (eg, transfers of property between spouses are exempt from gift taxes). *Davis* represented a trap for the unwary, since most taxpayers did not expect an intrafamily transfer to have income tax consequences. Perhaps worse, *Davis* allowed tax considerations to intrude upon private decisions "with respect to relations between spouses."ⁿ¹¹³

To achieve uniformity of application of the tax laws in this area and to make federal income taxes less intrusive in a divorce, Congress enacted *IRC Section 1041*, treating transfers of property between spouses (or, if made incident to a divorce, between former spouses) as gifts in most respects. In general, no gain or loss is recognized by the transferor on an intermarital transfer, *IRC Section 1041(a)*, but there are a few statutory exceptions and qualifications to the nonrecognition rule.

First, if the transferee is a "former spouse," the transfer must be "incident to a divorce." This requires either that (1) the transfer be made within one year after the marriage ceases, or (2) the transfer be related to the cessation of the marriage.ⁿ¹¹⁴ The regulations include a safe harbor under which any transfer made pursuant to a divorce or separation instrument not more than 6 years after cessation of the marriage is deemed "related to the cessation of the marriage."ⁿ¹¹⁵ A later transfer, or one not made pursuant to a divorce or separation instrument, is presumed not related to the cessation of the marriage, but the presumption is rebuttable.ⁿ¹¹⁶

Second, *IRC Section 1041* does not apply if the transferee spouse is a nonresident alien.ⁿ¹¹⁷

Third, if property is transferred to a trust for the benefit of a spouse (but not if it is transferred directly to the spouse), the transferor is required to recognize gain to the extent that liabilities assumed by the transferee plus any other liabilities to which the property is subject exceed the transferor's basis in the property.ⁿ¹¹⁸

The transferee spouse takes a basis equal to the basis of the property in the hands of the transferor, as though it were received by gift.ⁿ¹¹⁹ Unlike a gift, however, a transferee spouse is not required to use the fair market value of the property at the time of the transfer as its basis for purposes of determining loss on a subsequent sale when the transferor's adjusted basis is greater than such fair market value (i.e., the transferee can deduct the transferor's built-in loss).ⁿ¹²⁰ Furthermore, again unlike a gift, the transferee spouse may not increase the carryover basis prescribed in *IRC Section 1041(b)(2)* by the amount of cash or other consideration the transferee is required to give up in the marital exchange.ⁿ¹²¹

The Internal Revenue Service and the courts have generally given *IRC § 1041* a liberal reading in accord with its remedial purposes. The Internal Revenue Service has ruled that section 1041 trumps the assignment of income doctrine; thus, a transferor spouse is not taxable on a transfer of her interest in nonqualified stock options and deferred compensation plans to a transferee spouse, either at the time of the transfer or when the stock options are exercised and deferred compensation is actually paid.ⁿ¹²² The tax burden is shifted to the transferee spouse, who must pay tax on the exercise of the stock option under *IRC Section 83*, and tax on receipt of deferred compensation under *IRC Section 61*, as though the transferee rather than the transferor had performed the services. The Service analogizes the position of the transferee spouse in these circumstances to that of a non-earning spouse in a community property state, whose entitlement to a share of the earning spouse's compensation has long been held to require attribution of that share of the compensation to the non-earning spouse for federal income tax purposes notwithstanding the assignment of income doctrine.ⁿ¹²³

There are, however, a few specific Code provisions that the Service believes are not trumped by *IRC Section 1041*. In Rev Rul 87-112,ⁿ¹²⁴ the Service ruled that a cash basis taxpayer was required to recognize income under *IRC Section 454* and *Treasury Regulation Section 1.454-1(a)* upon the transfer of US savings bonds to a spouse, in an amount equal to the accrued but unreported interest on the bonds from the date of issuance to the date of the transfer.ⁿ¹²⁵ In Private Letter Rule 8820086 the Service, relying on the principle of statutory construction that a specific provision prevails over a general one, held that *IRC Section 1041* does not apply to the transfer of an interest in an IRA because the taxation of transfers of such interests is governed specifically by *IRC Section 408(d)(6)*. Since that provision limits nonrecognition treatment when an interest in an IRA is transferred to a spouse or former spouse to transfers "under a divorce or separation instrument..." it would be inconsistent with Congressional intent to allow transfers of IRAs not made under divorce or separation instruments to enjoy nonrecognition under Section 1041. Finally, *IRC Section 453B(g)* also overrides *IRC Section 1041* to a limited extent. Although that paragraph excepts transfers "described in subsection (a) of section 1041" from the general rule taxing dispositions of installment obligations, there is an exception to the exception if the Section 1041(a) transfer is a "transfer in trust." Accordingly, gain realized on a transfer of an installment obligation to a spouse is taxable under *IRC Section 453B(g)* if the transfer is made in trust.

Temporary regulations under *IRC Section 1041* provide that a transfer of property to a third party "on behalf of" a spouse or former spouse may also qualify for nonrecognition treatment if: (1) the transfer to a third party is required by a divorce or separation instrument, or (2) the transfer to a third party is requested in writing by the other spouse (or former spouse), or (3) the transferor receives a written consent or ratification of the transfer to a third party from the other spouse or former spouse.ⁿ¹²⁶ If a third party transfer does qualify, the regulations deem that the property is transferred first to the transferor's spouse or former spouse in a tax-free transaction under section 1041, and then by that spouse to the third party in a transaction to which section 1041 does not apply.ⁿ¹²⁷ For example, if pursuant to a divorce decree or separation agreement H transfers appreciated stock to his spouse W's creditor to discharge W's debt to the creditor, the regulations treat the transaction as though H actually transferred the property to W in a tax-free transaction to which Section 1041 applies (and in which W inherits H's adjusted basis in the stock), and W then

transfers the stock to the creditor in a transaction to which Section 1041 does not apply, triggering gain or loss to W equal to the difference between the amount realized (debt discharged) and H's basis in the stock.ⁿ¹²⁸

The third party rule was soon invoked by taxpayers seeking to bring divorce-related stock redemptions within the ambit of *IRC Section 1041*.ⁿ¹²⁹ If the redeeming spouse was successful in demonstrating that she transferred her stock to the family corporation "on behalf of" the spouse who was the remaining shareholder, she would pay no tax on any gain realized in the transaction under *IRC Section 1041* and the remaining shareholder/spouse, treated as the deemed transferor of the stock to the family corporation by *Temporary Treasury Regulation Section 1.1041-1T*, Q&A 9, would be taxed on the entire redemption proceeds as a constructive dividend to the extent of the corporation's earnings and profits.ⁿ¹³⁰

The courts, however, had a difficult time reconciling *Temporary Treasury Regulation Section 1.1041-1T*, Q&A 9 with existing corporate tax doctrine that prohibited charging a remaining shareholder with receipt of a constructive dividend as a result of a complete redemption of another shareholder's stock unless the remaining shareholder had a pre-existing "primary and unconditional obligation" to purchase the redeemed shares from the redeeming shareholder which was satisfied by the corporation's redemption.ⁿ¹³¹ If the court construed the "on behalf of" language in *Temporary Treasury Regulation Section 1.1041-1T*, Q&A 9 consistently with this doctrine, the transferor spouse would be denied the benefits of *IRC Section 1041* unless she could show that the remaining shareholder/spouse had a primary and unconditional obligation to purchase her stock which was satisfied by the family corporation's redemption of that stock. On the other hand, if the court construed the "on behalf of" language more expansively to give effect to the remedial purposes of *IRC Section 1041*, allowing it to apply whenever the corporate redemption was made pursuant to a judicial decree or spousal agreement even though the remaining shareholder never had a "primary and unconditional obligation" personally to purchase the redeemed stock, the remaining stockholder would either have to suffer a constructive dividend where similarly situated shareholders (outside the divorce context) would not, or the court would have to ignore the constructive transfer provision of *Temporary Treasury Regulation Section 1.1041-1T*, Q&A 9 and allow gain on the redeemed shares to escape tax forever.ⁿ¹³²

A few years after *Arnes* was decided, a majority of the Tax Court in *Read v Commr*,ⁿ¹³³ in one of six opinions filed in the case, held that the words "on behalf of" in *Temporary Treasury Regulation Section 1.1041-1T*, Q&A 9 should be given their "common, ordinary meaning;" that the "primary and unconditional obligation" standard was too restrictive to fit that meaning; and, using the Webster's Dictionary definition, that the standard to be applied is whether the transferor spouse, in redeeming his or her shares, acted "in the interest of" or "as a representative of" the remaining shareholder/spouse.ⁿ¹³⁴ The majority opinion found that this standard was met where all of the wife's shares in the family corporation were redeemed pursuant to a divorce decree that gave the husband the option of either acquiring the shares personally or having the corporation (or its ESOP plan) redeem them, and pursuant to the decree the husband elected to have the corporation redeem the shares. In these circumstances, the directed transfer of his spouse's shares to their corporation was "in his interest" or made "as his representative," and the transferor spouse was entitled to nonrecognition of gain realized in the redemption under *IRC Section 1041*. The Tax Court majority indicated that it did not find the "primary and unconditional obligation" standard to be an appropriate one to apply to "any case involving a corporate redemption in a divorce setting," but since the husband had stipulated that he would accept constructive dividend treatment if the Tax Court found that his wife had transferred her shares on his behalf, that issue was not controverted.ⁿ¹³⁵

Not long after the decision in *Read*, Treasury and the Internal Revenue Service adopted new regulations that removed corporate redemptions from the purview of *Temporary Regulation Section 1.1041-1T*, Q&A 9, and prescribed new rules for determining the tax consequences of a divorce-related redemption.ⁿ¹³⁶ The most striking change made by the regulations allows the spouses (or former spouses), if they can agree, to determine with certainty whether the transferor or the nontransferor spouse pays tax on the redemption transfer, without regard to whether the transfer of stock to the family corporation is made "on behalf of" the nontransferor spouse or satisfies a "primary and unconditional" obligation of the nontransferor spouse to purchase the transferor's stock.ⁿ¹³⁷ The spouses' agreement must be contained in a

divorce or separation instrument or other valid written agreement between the spouses which expressly provides (1) the manner in which the spouses elect that the transaction be taxed (either as a taxable redemption by the transferor spouse with no tax consequences to the nontransferor spouse, or a nontaxable redemption but a constructive distribution of the redemption proceeds to the nontransferor spouse); and (2) that the instrument or agreement supersedes any other instrument or agreement concerning the purchase, sale, redemption or other disposition of the stock that is the subject of the redemption. The divorce or separation instrument must be effective, or the valid written agreement must be executed by the parties, before the date on which a return for the year in which the redemption occurred, (but not later than the due date (including extensions) of the return) is filed by the transferor spouse (if the parties elect to make the transferor spouse taxable) or the nontransferor spouse (if the parties elect to make the nontransferor spouse taxable.) There is no requirement that the instrument or agreement, or any form of election, be filed with the return.ⁿ¹³⁸

If the spouses cannot agree, the regulations provide that the transferor spouse is taxable on gain realized in the redemption (*i.e.*, *IRC Section 1041* does not apply) unless, "under applicable tax law," the nontransferor spouse is deemed to have received a constructive distribution from the corporation as a result of the transfer. The preamble to the regulations makes clear that the Treasury considers the "primary and unconditional obligation" standard to be the "applicable tax law" for this purpose.ⁿ¹³⁹ If the remaining stockholder had a primary and unconditional obligation to purchase the redeemed stock, the same constructive transfer rule as that found in *Temporary Treasury Regulation Section 1.1041-1T*, Q&A 9 will apply: the transferor spouse is deemed to have transferred her stock to the nontransferor spouse in a transaction protected by *IRC Section 1041*, and the nontransferor spouse is deemed to re-transfer the stock to the corporation in exchange for the redemption proceeds, which will normally be treated as a constructive dividend to the extent of the corporation's earnings and profits.

(n2)Footnote 2. *Helvering v Bruun*, 309 US 461 at 469 (1940) ; *Helvering v Horst*, 311 US 112 at 115-116 (1940) (the rule that income is not taxable until realized is "founded on administrative convenience").

(n3)Footnote 3. See *IRC § 61(a)* (income includes gains "derived from *dealings* in property" (emphasis added)).

(n4)Footnote 4. One example is the mark-to-market provisions of *IRC §§ 1256 and 475*. See § 18.05.

(n5)Footnote 5. Interpreting a pre-16th Amendment income tax act, the Supreme Court once took the position that a statute that taxed "income" on an annual basis could not reach any part of a gain realized in the current year that accrued in prior years. *Grey v Darlington*, 82 US (15 Wall) 63 (1872) . Although the current income tax is not subject to that limitation, see *Merchants Loan & Trust Company v Smietanka*, 255 US 509 (1921) , the fact that tax rates on capital gains are lower than rates applicable to other income is sometimes justified as compensating for the "bunching of income" effect of taxing the entire gain when realized. See Blum, "A Handy Summary of the Capital Gains Arguments," 35 Taxes 247 (1957).

(n6)Footnote 6. For investors in stocks and securities, the most important nonrecognition provisions are those dealing with exchanges pursuant to corporate reorganizations. See Ch 8. The installment method of accounting, under which gain is recognized ratably as installment payments are received, is another important exception to the "year realized" rule. See *IRC § 453*, discussed at § 1.05[2].

(n7)Footnote 7. See *IRC § 165(g)* (If any security (including corporate stock) becomes worthless during the taxable year, the security is treated as disposed of in a sale or exchange of a capital asset on the last day of the taxable year.) See discussion at § 1.05[1].

1-1 Taxation of Securities Transactions § 1.02

(n9)Footnote 9. *IRC § 1(h)(1)(c)*. A limited amount of such capital gains may be taxable at a 0 percent tax rate, *i.e.*, they are tax-exempt, depending on the taxpayer's filing status and amount of other income. *IRC § 1(h)(1)(B)*. By contrast, the top rate bracket for ordinary income is currently 35 percent. *IRC § 1(a)*. The 15 percent maximum capital gains rate applicable to most long-term capital gains does not apply to gains from the sale of "collectibles," "qualified small business stock," or "unrecaptured section 1250 gain," which are subject to maximum capital gains tax rates of 28 percent, 28 percent, and 25 percent, respectively. *IRC § 1(h)(1)(D) and (E)*. The taxation of capital gains, including rates of tax, is discussed in detail in Ch 2.

(n10)Footnote 10. *IRC § 1211*.

(n11)Footnote 11. *IRC § 1212*.

(n12)Footnote 12. See Rev Rul 55-410, 1955-1 CB 297. While a bequest by a testator of specific property is not taxable to the testator or his estate, if the testator leaves a fixed dollar legacy or other form of pecuniary bequest and his estate satisfies the fixed dollar legacy with property distributed from the estate, any gain or loss that accrued with respect to the property between the date of death and date of distribution must be recognized on the estate's return. *Treas Reg § 1.661(a)-2(f)*; *Kenan v Commr*, 114 F2d 217 (2nd Cir 1940) ; *Suisman v Eaton*, 15 F Supp 113 (D Conn 1935) , *aff'd* 83 F2d 1019 (2nd Cir) , *cert denied* 299 US 573 ; *Rev Rul 60-87*, 1960-1 CB 286 .

(n13)Footnote 13. *Woodsam Assoc, Inc v Commr*, 198 F2d 357 (2nd Cir 1952) .

(n14)Footnote 14. *Bell Intercontinental Corp v US*, 381 F2d 1004 (Ct Cl 1967) .

(n15)Footnote 15. *SS White Dental Mfg Co v US*, 274 US 398 (1928) ; *IRC § 165(g)*.

(n16)Footnote 16. *Id.*

(n17)Footnote 1. *Commr v Brown*, 380 US 563, 571 (1965) . The Supreme Court was quoting from *Iowa v McFarland*, 110 US 471 (1883) , a case which held that the transfer of public land to soldiers as an enlistment bonus was not a "sale" of the land for purposes of a statute that granted to certain states, when they were admitted to the Union, 5 percent of the proceeds from federal "sales" of public lands within their borders. The conclusion that a transfer of property for services is not ordinarily regarded as a "sale" is probably still valid today, although such transfers are nevertheless taxable events under the "other disposition" language of *IRC § 1001(a)*. See *United States v General Shoe Corp*, 282 F2d 9 (6th Cir 1960) ; *International Freighting Corp v Commr*, 135 F2d 310 (2nd Cir 1943) ("delivery of shares ... [as compensation for services] constituted a disposition in exchange for a valid consideration ... "(emphasis added)). However, the quoted definition is on shakier ground in limiting the common understanding of "sales" to transfers for a *fixed* price. At least today, a transfer of property for a partially or wholly contingent sales price is commonly understood to be a "sale," for tax and other purposes. See *Allen v Commr*, *TC Memo 1975-39* and cases cited therein (Supreme Court in *Brown* did not mean to imply, even in dictum, that a contingent price sales price was not within the commonly understood meaning of a sale).

(n18)Footnote 2. *Id.*

(n19)Footnote 3. *Miami Nat'l Bank v Commr*, 67 TC 793 (1977) . See also *Boykin v Commr*, 344 F2d 889 (5th Cir 1965) ; *Rev Rul 54-607*, 1954-2 CB 177 .

(n20)Footnote 4. The seller intended to make a present transfer of the stock at the closing, but the stock actually remained in the dealer's subordinated securities account for almost 2 1/2 years after the sale before the shares were physically transferred to the purchaser.

(n21)Footnote 5. Since the seller's claim would be for the stock's value on the date sold rather than the date the stock was placed in the subordinated securities account, the seller would enjoy the benefit of any subsequent

appreciation or bear the burden of any decrease in the stock's value. *Miami Nat'l Bank v Commr*, 67 TC at 801 .

(n22)Footnote 6. The taxpayer in *Miami Nat'l Bank* was neither the seller nor the purchaser but the issuer of the stock in dispute. The ultimate question for decision was whether the taxpayer/issuer was entitled to file consolidated tax returns with its parent company, the purchaser of the stock in the above transaction. In order to file consolidated returns with the taxpayer the parent had to "own directly" at least 80 percent of its voting stock, see *IRC § 1502(a)(2)*, and to meet the 80 percent requirement the parent needed to include in its stock ownership the stock acquired from the seller which physically remained with the seller's broker in the subordinated securities account during the taxable years in issue. The Tax Court's holding that seller had transferred beneficial ownership in the stock to the taxpayer's parent, and therefore "sold" the stock to the taxpayer's parent, allowed the taxpayer and its parent to file consolidated returns in those years.

(n23)Footnote 7. See, eg, *United National Corp v Commr*, 33 BTA 790, 794 (1935) , *nonacq* 1936-1 CB 47 : "It is an established doctrine that a court of equity will treat a deed, absolute in form, as a mortgage, when it is executed as security for a loan of money. That court looks beyond the terms of the instrument to the real transaction; and when that is shown to be one of security, and not of sale, it will give effect to the actual contract of the parties." (Quoting from the Supreme Court's decision in *Peugh v Davis*, 96 US 332).

(n24)Footnote 8. *Frank Lyon Co v US*, 435 US 561, 572-73 (1978) .

(n25)Footnote 9. See, eg, *Coleman v Commr*, 16 F3d 821 (7th Cir 1994) ; *Grodts & McKay Realty, Inc v Commr*, 77 TC 1221 (1981) . In such cases, the purchaser is attempting to acquire not property but tax benefits.

(n26)Footnote 10. *Starr v Commr*, 274 F2d 294 (9th Cir 1959) . The property leased in *Starr*, a sprinkler system installed in a building owned by the lessee, "was tailor-made for...[that] specific piece of property," and would have a "negligible" value to the lessor in the unlikely event it were ever removed from the building, which lent further support to the conclusion that the purported lease of the sprinkler system was, in substance, a sale. 274 F2d at 295 .

(n27)Footnote 11. See *Commr v First Security Bank of Utah*, 405 US 394, 398 (n 4) (1972), quoting Learned Hand's famous dictum in *Commr v Newman*, 159 F2d 848, 850-851 (2nd Cir 1947) (dissenting opinion): "Over and over again courts have said that there is nothing sinister in so arranging one's affairs as to keep taxes as low as possible. Everybody does so, rich or poor; and all do right, for nobody owes any public duty to pay more than the law demands: taxes are enforced exactions, not voluntary contributions. To demand more in the name of morals is mere cant."

(n28)Footnote 12. For a fuller discussion of the economic substance doctrine, see § 1.02A below.

(n29)Footnote 13. 435 US 561 (1978) .

(n30)Footnote 14. The Court thought it significant that state and federal bank regulators rejected the bank's original plan to self-finance the headquarters building because the regulators feared that such indebtedness on the bank's books would impair its capital. The fact that the bank regulators approved the sale-and-leaseback scheme was indicative of a real economic difference between a direct loan and a sale-and-leaseback financing arrangement in these circumstances. 435 US at 564 .

(n31)Footnote 15. 435 US at 579-80 .

(n32)Footnote 16. In general, an unexercised option to reacquire property sold will not defeat a completed sale for tax purposes unless the option holder is legally bound or economically compelled to exercise the option. See discussion at § 1.02[1][b] below.

Frank Lyon Co was distinguished, and a purported sale was reclassified as a loan, in *Schering-Plough Corp v US*, 2009 US Dist LEXIS 77467 at *104-109 (DNJ August 28, 2009) .

(n33)Footnote 17. *380 US 563 (1965)* .

(n34)Footnote 18. *380 US at 575* . The Commissioner originally argued before the Tax Court that there was no "sale" at all for tax purposes (including *IRC § 1001(a)*), but later conceded that position and in the Supreme Court argued that even if a bootstrap sale could be considered a sale giving rise to gain or loss under *IRC § 1001*, it was not a "sale or exchange" within the meaning of the capital gains provisions (*IRC § 1222(3)*); therefore, although the sellers may have realized gain it was taxable as ordinary income and not at preferential long-term capital gains rates. As the quotation in the text above indicates, the Supreme Court drew no distinction between the meaning of "sale" in *IRC §§ 1001 and 1222*, at least with regard to the role of risk-shifting.

(n35)Footnote 19. *Frank Lyon v US 435 US at 581, n 16* . The trial court makes the determination of what the facts and circumstances are subject to a "clearly erroneous" standard of appellate review, but whether those facts do or do not support classification of the transaction as a "sale" for tax purposes is a question of law subject to *de novo* appellate review.

(n36)Footnote 20. *Grodt & McKay Realty, Inc v Commr, 77 TC 1221, 1237* .

(n37)Footnote 21. In *Torres v Commr, 88 TC 702 (1987)* , the Tax Court found that half the factors listed in *Grodt & McKay*, which involved a purported sale of cattle, had "little relevance" to a sale-and-leaseback of office equipment. *88 TC at 721* . Of greater importance in *Torres* were: (1) whether the office equipment had a useful life significantly in excess of the leaseback term; (2) whether there was a purchase option exercisable by the lessee at less than fair market value; (3) whether any renewal rental at the end of the leaseback term was set at fair market rent; and (4) whether there was a reasonable possibility that the owner of the property could recoup his investment in the property from the income producing potential and residual value of the property at the expiration of the lease. *Id. In Miami Nat'l Bank v Commr, 67 TC 793 (1977)* , involving a sale of corporate stock, the relevant factors taken into account in deciding whether the stock had been sold for federal income tax purposes included legal title, possession, right to vote, right to receive dividends, the right of a third party bailee to sell the stock and the right to redeem the stock from the bailee by substituting cash or other collateral.

(n38)Footnote 22. See *Hope v Commr, 55 TC 1020 (1971)* , *affd 471 F2d 738 (3rd Cir 1973)* ; *Schultz v Commr, 59 TC 559 (1973)* ; *Hutcheson v Commr, TC Memo 1996-127* ; *Robinson v Commr, TC Memo 1973-242* ; *Rev Rul 80-58, 1980-1 CB 181* . A right of rescission may arise as a matter of law, eg, the right of an innocent party to rescind the sale upon discovery of fraud or misrepresentation, see *Hope v Commr, 55 TC 1020 (1971)* , *affd 471 F2d 738 (3rd Cir 1973)* , or be acquired under the terms of the contract. See *Rev Rul 80-58, 1980-1 CB 181* (sale of land made conditional on buyer being able to obtain rezoning of property); *Robinson v Commr, TC Memo 1973-242* (buyer given unconditional option or "put" for approximately 18 months after the sale to tender stock back to seller for original sales price plus interest).

(n39)Footnote 23. See *James v US, 366 US 213, 219-20 (1961)* ; *Schultz v Commr, 59 TC at 564* .

(n40)Footnote 24. See *Rev Rul 80-58, 1980-1 CB 181* .

(n41)Footnote 25. *Hope v Commr, 55 TC 1020 (1971)* , *affd 471 F2d 738 (3rd Cir 1973)* .

(n42)Footnote 26. *Rev Rul 80-58, 1980-1 CB 181* . See also *Hope v Commr, 55 TC 1020 (1971)* , *affd 471 F2d 738 (3rd Cir 1973)* ; *Schultz v Commr, 59 TC 559 (1973)* ; *Hutcheson v Commr, TC Memo 1996-127* .

(n43)Footnote 27. *Security Flour Mills Co v Commr, 321 US 281 (1944)* .

(n44)Footnote 28. *Rev Rul 80-58, 1980-1 CB 181* .

(n45)Footnote 29. *378 F Supp 579 (ND Tex 1974)* .

1-1 Taxation of Securities Transactions § 1.02

(n46)Footnote 30. *378 F Supp at 582* . On the other hand, as in rescission cases, federal courts have refused to give reformation decrees retroactive effect to prior taxable years. *Van Den Wymelenberg v US*, 397 F2d 443, 445 (7th Cir 1968) ("not even judicial reformation can operate to change the federal tax consequences of a completed transaction"); *American Nurseryman Pub Co v Commr*, 75 TC 271 (1980) .

(n47)Footnote 31. See *Fisher v Commr*, 30 BTA 433 (1934) . Note, however, that where, as in *Fisher*, the seller sells stock at a loss but acquires an option to reacquire the same or "substantially identical" stock, the statutory "wash sale" provisions, *IRC § 1091*, may result in the disallowance of a deduction for any realized loss.

(n48)Footnote 32. See *United National Corp v Commr*, 33 BTA 790 (1935) , *nonacq 1936-1 CB 47* , where the Board of Tax Appeals, applying the substance over form doctrine for the benefit of the taxpayer, reclassified the seller's "sale" of stock as a loan because the seller not only had an option to repurchase the stock sold but could be (and was) legally compelled by the purchaser to repurchase it. Despite casting the transaction in the form of a sale and initially reporting the transaction in that manner on their books and tax returns, the parties intended the transaction to be a secured loan. The loan was repaid and the stocks returned within 2 months of the original transaction, in the same taxable year. The Board distinguished true option cases like *Fisher v Commr*, 30 BTA 433 (1934) , on the ground that the seller in *United National* had not merely the right but the *obligation* to reacquire the subject matter of the sale.

(n49)Footnote 33. See *Thompson v Commr*, 66 TC 1024, 1048 (1976) , *affd on other grounds 631 F2d 642 (9th Cir 1980)* , *cert denied 452 US 961* , where the Tax Court refused to hold that a seller's extremely favorable option to repurchase negated a sale even though the Court found it "difficult to believe that anyone in the position of a true beneficial owner [i.e., the purchaser], seeking to maximize potential gain, would enter into an agreement such as [the purchaser's option agreement with seller]."

(n50)Footnote 1. See *Herbert's Estate v Commr*, 139 F2d 756 (3d Cir 1943) , *cert denied 322 US 752 (1944)* .

(n51)Footnote 2. *Herbert's Estate v Commr*, 139 F2d 756 (3d Cir 1943) (retirement of a note through payment is a taxable disposition even though not a "sale"); *Long v Commr*, 96 F2d 270 (9th Cir 1938) , *cert denied 305 US 616 (1938)* (charging off debt as "worthless" is a disposition for purposes of federal tax law).

(n52)Footnote 3. *IRC §§ 1271(a)* (amounts received on retirement of a debt instrument considered "received in exchange therefor") and 165(g) ("sale or exchange" treatment upon worthlessness of a security that is a capital asset).

(n58)Footnote 9. *499 US 554, 560-561 (1991)* .

(n59)Footnote 10. The Court relied on its early "realization" decisions in *US v Phellis, 257 US 156 (1921)* , *Marr v*

1-1 Taxation of Securities Transactions § 1.02

US, 268 US 536 (1925) , and *Weiss v Stearn*, 265 US 242 (1924) , the progenitors of the Treasury regulation in question. In *Phellis* and *Marr* the Court found no material difference between stock received and stock given up pursuant to a reorganization involving the reincorporation of the same business in the same state, and therefore found nontaxable a shareholder's exchange of shares in the old corporation for shares in the new reincorporated entity. In *Weiss v Stern*, on the other hand, the reincorporation occurred in a different state, giving the reincorporated entity legal rights and powers different in some respects from those of the old corporation. This legal distinction, though without economic significance in terms of the value of the shares of the old and new corporations, was deemed sufficient in *Weiss v Stearn* to make the shares of the old and reincorporated entities "materially different" which justified treating the exchange as a taxable event in which gain or loss had to be recognized.

(n60)Footnote 11. *Treas Reg § 1.1001-3*.

(n61)Footnote 12. The *Cottage Savings* regulations were proposed on December 2, 1992, 57 FR 57034 , and adopted by TD 8675 , 61 FR 32926 , on June 26, 1996.

(n62)Footnote 13. See *Treas Reg § 1.1001-3(a)(1)*.

(n63)Footnote 14. See TD 8675 , 61 FR at 39927; Peaslee, "Modifications of Nondebt Financial Instruments as Deemed Exchanges," 95 *Tax Notes* 737 (Apr 29, 2002).

(n64)Footnote 15. *Treas Reg § 1.1001-3(b)*. The Internal Revenue Service and the courts applied the "material difference" test in *Treas Reg § 1001-1* many times prior to the issuance of the *Cottage Savings* regulations, but usually in the context of a physical exchange by a holder of the debt instrument for another instrument issued by the same obligor. See, eg, *Motor Products Corp v Commr*, 47 BTA 983 (1942) , *affd* 143 F2d 449 (6th Cir 1944) (extended maturity date on debenture received did not make it "materially different" from debenture given up); *Girard Trust Co v US*, 69 F Supp 874 (ED Pa 1946) , *affd* 166 F2d 773 (3rd Cir 1948) (change in both maturity date and interest rate in debentures received represented a "material difference" from debentures of the same obligor that were given up); *Mutual Savings & Loan Co v Commr*, 184 F2d 161 (5th Cir 1950) (exchange of defaulted municipal bonds for refunding bonds of same municipality containing changes in interest rate, maturity date and sinking fund was not a taxable event; it did not create a "new indebtedness" because the municipality did not have the legal right to issue new indebtedness under state law without authorization by the electorate). In *Rev Rul 73-160, 1973-1 CB 365* , the Internal Revenue Service held that the "material difference" test could also be applied when a change is made to the terms of an existing debt instrument other than by the issuance of a new instrument. ("The income tax liability resulting from a particular transaction involving a change in the terms of outstanding securities is not controlled entirely by the mechanical means used for the accomplishment of the change.") Although a strong "substance over form" case can be made for the "deemed exchange" approach, it has yet to be tested in court.

(n65)Footnote 16. See *Treas Reg § 1.1001-3(e)*. The regulations' emphasis on the economic significance of the modifications is mostly beneficial to taxpayers, but in some instances can produce a taxable event where none existed under prior law. Compare *Treas Reg §§ 1.1001-3(e)(2)* and (3) (change in yield or deferral of maturity date can be a "significant" modification triggering a "deemed exchange") with *Rev Rul 73-160, 1973-1 CB 365* ("mere extension of the maturity date" is not a "material" difference); *West Mo Power Co v Commr*, 18 TC 105 (1952) , *acq* 1952-2 CB 3 ; *Motor Products Corp v Commr*, 47 BTA 983 (1942) , *affd* 143 F2d 449 (6th Cir 1944) ; *City Bank Farmers Tr Co v Hoey*, 52 F Supp 665 (SDNY 1942) , *affd per curiam*, 138 F2d 1023 (2nd Cir 1943) .

(n66)Footnote 17. *Treas Reg § 1.1001-3(c)(1)(i)*.

(n67)Footnote 18. *Treas Reg § 1.1001-3(c)(4)(i)*. The regulations provide that a holder's temporary forbearance from exercising default rights promptly after the issuer's failure to perform will not be regarded as such an acquiescence provided (1) there is no written or oral agreement to alter other terms of the instrument, and (2) the forbearance does not last beyond (a) two years following the issuer's failure to perform, plus (b) any additional period in which the parties are

conducting good faith negotiations or the issuer is in a title 11 or similar bankruptcy case. *Treas Reg* § 1.1001-3(c)(4)(ii).

(n68)Footnote 19. *Treas Reg* § 1.1001-3(c)(1)(ii). Thus, a change in interest rate is a modification of the instrument if accomplished by agreement between the issuer and the holder after the debt instrument is issued, but not if the rate is changed pursuant to a provision in the debt instrument that automatically resets the interest rate annually based on the value of an index. *Treas Reg* § 1.1001-3(c)(1)(ii).

(n69)Footnote 20. *Treas Reg* § 1.1001-3(c)(2)(i).

(n70)Footnote 21. *Id.*

(n71)Footnote 22. *Treas Reg* § 1.1001-3(c)(2)(ii). The conversion of a debt instrument into equity of the issuer pursuant to an option granted to the holder by the original terms of the instrument is not subject to this rule, however, nor is it subject to the exception discussed below regarding alterations made pursuant to an option granted by the terms of a debt instrument.

(n72)Footnote 23. *Treas Reg* § 1.1001-3(c)(2)(iii)(A).

(n73)Footnote 24. *Treas Reg* § 1.1001-3(c)(3)(ii).

(n74)Footnote 25. *Treas Reg* § 1.1001-3(c)(3)(i).

(n75)Footnote 26. *Treas Reg* § 1.1001-3(c)(2)(iii).

(n76)Footnote 27. *Treas Reg* § 1.1001-3(c)(2)(iii)(B).

(n77)Footnote 28. *Treas Reg* § 1.1001-3(e)(2).

(n78)Footnote 29. *Treas Reg* § 1.1001-3(e)(3)(i).

(n79)Footnote 30. *Treas Reg* § 1.1001-3(e)(3)(ii). If a modification results in a deferral that is shorter than the full "five year or 50 percent of original term" safe harbor period, the unused portion may be used as a safe harbor for any subsequent deferral of payments on the instrument.

(n80)Footnote 31. *Treas Reg* § 1.1001-3(e)(4)(i). The regulations specify that a Section 338 election following a qualified stock purchase of an issuer's stock is not regarded as a "substitution of a new obligor," *Treas Reg* § 1.1001-3(e)(4)(i)(F). Similarly, the filing of a petition in a title 11 or similar case will not be treated as the substitution of a new obligor. *Treas Reg* § 1.1001-3(e)(4)(i)(G).

(n81)Footnote 32. *Treas Reg* § 1.1001-3(e)(4)(i)(B).

(n82)Footnote 33. *Treas Reg* § 1.1001-3(e)(4)(vi)(A).

(n83)Footnote 34. *Treas Reg* § 1.1001-3(e)(4)(vi)(B).

(n84)Footnote 35. *Treas Reg* § 1.1001-3(e)(4)(i)(E).

(n85)Footnote 36. *Treas Reg* § 1.1001-3(g), Ex 7.

(n86)Footnote 37. Cf *Treas Reg* § 1.1001-3(g), Ex 5.

(n87)Footnote 38. *Treas Reg* § 1.1001-3(e)(4)(i)(C).

(n88)Footnote 39. *Treas Reg § 1.1001-3(e)(4)(i)(D)*.

(n89)Footnote 40. *Treas Reg § 1.1001-3(e)(4)(ii)*.

(n90)Footnote 41. *Treas Reg § 1.1001-3(e)(4)(iii)*. The regulations warn that if the addition or deletion is part of a transaction or series of transactions that results in the substitution of a new obligor, the entire transaction must be tested for "significance" under the regulations dealing with a substitution of a new obligor, as discussed in paragraphs (3) and (4) above.

(n91)Footnote 42. *Treas Reg § 1.1001-3(e)(4)(iv)(B)*.

(n92)Footnote 43. *Treas Reg § 1.1001-3(e)(4)(iv)(A)*.

(n93)Footnote 44. *Treas Reg § 1.1001-3(g)*, Ex 8.

(n94)Footnote 45. *Treas Reg § 1.1001-3(e)(4)(v)*.

(n95)Footnote 46. *Treas Reg § 1.1001-3(e)(5)(i)*. In making a determination as to whether a modification changes debt to equity for tax purposes, any deterioration in the financial condition of the obligor between the issue date of the instrument and the date of the modification will not be taken into account unless, in connection with the modification, a new obligor is substituted or added or an existing obligor is removed. *Id.* Proposed regulations clarify that a decrease in the fair market value of a debt instrument is not taken into account for purposes of determining whether modified debt is not debt for federal income tax purposes to the extent that the decrease is attributable to the deterioration in the financial condition of the obligor and not to a modification of the terms of the instrument. *Prop Treas Reg § 1.1001-3(f)(7)*. Thus, if a debt instrument is significantly modified, and the issue price of the modified debt instrument is determined under *Treas Reg § 1.1273-2(b)* or *(c)* (relating to a fair market value issue price for publicly traded debt), any increase in the modified debt instrument's yield that is attributable to the new issue price generally is not taken into account to determine whether the modified instrument is debt or some other property right for federal income tax purposes. However, any portion of the increased yield that is not attributable to a deterioration in the financial condition of the issuer, such as a change in market interest rates, is taken into account. Notice of Proposed Rulemaking, REG-106750-10, 75 FR 31736, 31737 (June 4, 2010) .

(n96)Footnote 47. *Treas Reg § 1.1001-3(e)(5)(ii)*. If an instrument is not either substantially all recourse or substantially all nonrecourse before and after a modification, and there is a modification that affects the classification of the debt as recourse or nonrecourse, the modification must be tested under the catch-all "economic significance" test.

(n97)Footnote 48. *Treas Reg § 1.1001-3(e)(5)(ii)(B)(1)*.

(n98)Footnote 49. *Treas Reg § 1.1001-3(e)(5)(ii)(B)(2)*. The debt instrument will be considered "secured only by the original collateral" even if some of the units of the original collateral are or have been replaced by other units of the same or similar type and value if the original collateral is fungible or otherwise of a type where the particular units pledged are unimportant. *Id.* See also *Treas Reg § 1.1001-3(e)(4)(iv)(B)*.

(n99)Footnote 50. *Treas Reg § 1.1001-3(e)(6)*.

(n100)Footnote 51. *Treas Reg § 1.1001-3(e)(1)*.

(n101)Footnote 52. *Id.*

(n102)Footnote 53. *Treas Reg § 1.1001-3(f)(1)(i)*.

(n103)Footnote 54. See *Treas Reg § 1.1001-3(g)*, Ex 4. *Treas Reg § 1.1001-3(g)*, Ex 1 provides another example. Suppose a holder pays an issuer consideration to waive a right in the debt instrument to call the bond. Since the holder's

payment changes the bond's yield, the modification must be tested for significance under the change of yield test (change of more than 25 basis points or 5 percent of original yield). This, however, only tests the significance of the modification's impact on bond yield, not the significance of the modification itself (relinquishment of the call right). If the modification passes the change of yield test, the deletion of the call right still needs to be tested before it can be concluded that the modification is "not significant." Since no specific rule tests the significance of the deletion of a call right, the general "economic significance" test must also be applied.

(n104)Footnote 55. *Treas Reg § 1.1001-3(f)(1)(ii)*. Modifications in accounting and financial covenants are never considered "significant," however, whether or not they are subject to a contingency. *Id.*

(n105)Footnote 56. *Treas Reg § 1.1001-3(f)(1)(iii)*.

(n106)Footnote 57. *Treas Reg § 1.1001-3(f)(2)*. Thus, if a change in interest rates causes a change in yield rates of less than 25 basis points, it is not a "significant modification" under the changes in yield rule.

(n107)Footnote 58. *Id.*

(n108)Footnote 59. *Treas Reg § 1.1001-3(f)(3)*.

(n109)Footnote 60. *Id.*

(n110)Footnote 61. *Treas Reg § 1.1001-3(f)(4)*.

(n111)Footnote 62. *Id.*

(n112)Footnote 63. 2001-1 CB 742 , modifying *Rev Proc 99-18*, 1999-1 CB 736 .

(n113)Footnote 64. The purpose of the election is to facilitate the consolidation of debt instruments from two or more outstanding debt issues into a single new issue by allowing for uniform original issue discount (OID) among the new debt instruments issued in the consolidation. In the absence of such an election, the exchange of new debt for more than one outstanding issue of old debt could cause different debt instruments in the new issue to have different amounts of OID under *Treas Reg § 1.1275-2(j)*, depending on the terms of each old debt issue for which the new debt is substituted. As a result, the new debt might not be fungible. See *Rev Proc 99-18*, 1999-1 CB 736 , §§ 1 and 2.06.

(n114)Footnote 65. 39 BTA 510 (1939) , *nonacq* 1939-1 CB 47 , *nonacq withdrawn and acq substituted* 1939-2 CB 12 .

(n115)Footnote 66. The donees in *Fincke* (which actually included the taxpayer's wife and several daughters) sold their "bargain sale" stock a few days after the purchase, thus shifting the taxable gain to their (presumably) lower tax brackets. The Board of Tax Appeals was aware that the taxpayer "deliberately refrained from selling this stock on the market [himself,] which would have resulted in [his] realizing a large profit... and subjecting himself to income tax on that profit" but said the taxpayer was not obligated to accomplish his goals by following the route that produced the highest tax. "The income tax consequences of [the taxpayer's] acts depend upon what was actually done, not upon what might have been done." 37 BTA at 514 .

(n116)Footnote 67. 37 BTA at 514 .

(n117)Footnote 68. See generally Cohen, "Apportioning Basis: Partial Sales, Bargain Sales and the Realization Principle," 34 *San Diego L Rev* 1693 (1997).

(n118)Footnote 69. See text at § 1.04[7].

(n119)Footnote 70. See *Treas Reg § 1.1001-1(e)*: "Where a transfer of property is in part a sale and in part a gift,

the transferor has a gain *to the extent that the amount realized by him exceeds his adjusted basis in the property*" (emphasis added). The section 1001 regulations further provide that the transferor cannot realize a loss in a part sale, part gift transaction, i.e., if the bargain sale price is less than both the value and the basis of the property, the donor reports neither gain nor loss. *Treas Reg § 1.1001-1(e)*; see also *Treas Reg § 1015-4* (for purposes of determining loss, basis of property acquired by the transferee in a bargain sale may not exceed the fair market value of the property at the time of the transaction).

(n120)Footnote 71. *Treas Reg § 1.1011-2(a)(3)*; *Ebben v Commr*, 783 F2d 906 (9th Cir 1986) ; *Johnson v Commr*, 59 TC 791 (1973) , *affd* 495 F2d 1079 (6th Cir 1974) , *cert denied* 419 US 1040 .

(n121)Footnote 72. See *Turner v Commr*, 49 TC 356 (1968) , *affd per curiam*, 410 F2d 752 (6th Cir 1969) ; *Hirst v Commr*, 572 F2d 427 (4th Cir 1978) , *aff'g* 63 TC 307 .

(n122)Footnote 73. 457 US 191 (1982) .

(n123)Footnote 74. 279 US 716 (1929) .

(n124)Footnote 75. The Supreme Court also invoked the substance over form principle: " ... [H]ad the donors sold a portion of the stock immediately before the gift transfer in order to raise funds to pay the expected gift tax, a taxable gain would have been realized. 26 USC § 1001. The fact that the gift tax obligation was discharged by way of a conditional gift rather than from funds derived from a pregift sale does not alter the underlying benefit to the donors." 457 US at 198 . Significantly, however, the Supreme Court did not tax the donors as though they had taken the pregift sale route. Instead, the Supreme Court calculated the donor's taxable gain using the same return of basis method applied in *Fincke* and *Treas Reg § 1.1001-1(e)*: "gain thus derived ... [when the donee assumes the donor's liability for gift tax]" is "the gift tax liability less the donor's adjusted basis in the [gifted] property." 457 US at 198-199 .

(n125)Footnote 76. See *IRC § 170(a)*; *Treas Reg § 170-1(c)*.

(n126)Footnote 77. *Rev Rul 55-410*, 1955-1 CB 297 ; *accord: Wekesser v Commr*, *TC Memo 1976-214* ; *Rev Rul 64-240*, 1964-2 CB 172 . Although a charitable pledge can often be enforced against the donor as a personal debt under state law, see *Taft v Commr*, 304 US 351 (1938) , the Internal Revenue Service in *Rev Rul 55-410* held that it would be "inconsistent" to treat a transfer of property to charity in satisfaction of a pledge as a "contribution or gift," as it is required to do by statute, "and at the same time treat the transfer as a satisfaction of a debt with the tax consequences that would ordinarily follow from the use of appreciated property ... to pay a debt." Accordingly, a charitable pledge is not considered a debt for federal income tax purposes. See *Rev Rul 64-240*, 1964-2 CB 172 .

(n127)Footnote 78. *IRC § 170(b)(1)(C)(iv)*. For example, appreciated stocks and securities held for more than one year would generally be "capital gain property."

(n128)Footnote 79. For purposes of *IRC § 170*, AGI is calculated without taking loss carrybacks into account and is referred to as the taxpayer's "contribution base." *IRC § 170(b)(1)(G)*. A separate special limitation is applied to capital gain property contributed to certain private foundations, the value of which may only be deducted currently to the extent it does not exceed 20 percent of the taxpayer's AGI. See *IRC § 170(b)(1)(D)*.

(n129)Footnote 80. See *IRC § 170(b)(1)(C)(ii)*; *Treas Reg § 1.170A-10(b)(1)(ii)*.

(n130)Footnote 81. *IRC § 170(b)(1)(C)(iii)*. The election applies to all of the taxpayer's contributions of capital gain property made during the taxable year, as well as to carryovers to that year of the unused portion of deductions for capital gain property contributed in prior years (for which no such election was made). In that case the carryovers must be recalculated (and may be reduced to zero) as if an election to forego a deduction for unrealized appreciation had been made in the year the property was originally contributed to charity, although charitable contribution deductions actually claimed in respect of the property in prior years will not be disturbed. *Treas Reg § 1.170A-8(d)(2)*.

(n131)Footnote 82. See *Pescosolido v Commr*, 883 F2d 187 (1st Cir 1989) , *aff'g* 91 TC 52 (1988) ; *Bialo v Commr*, 88 TC 1132 (1987) .

(n132)Footnote 83. See *IRC* § 305.

(n133)Footnote 84. For a detailed analysis of *IRC* § 306, see Ch 7.

(n134)Footnote 85. *IRC* §§ 1(h)(1), 1(h)(3)(B), and 1(h)(11).

(n135)Footnote 86. *IRC* § 306(a)(1)(D).

(n136)Footnote 87. For the same reason, Section 306 stock could not be "capital gain property" the contribution of which is subject to a special limitation on current deductibility but not permanent disallowance. See *IRC* § 170(b)(1)(C).

(n137)Footnote 88. See § 102, Tax Increase Prevention and Reconciliation Act of 2005, Pub L No 109-222, 120 Stat 345, 346 (2006).

(n138)Footnote 89. *IRC* § 170(e)(1)(B)(ii).

(n139)Footnote 90. See *IRC* § 170(e)(5)(A) and (B). If the amount of a corporation's stock donated by a donor and members of his family (within the meaning of *IRC* § 267(c)(4)) exceeds, on a cumulative basis, 10 percent (in value) of all of the corporation's outstanding stock, the excess will not be considered "qualified appreciated stock." *IRC* § 170(e)(5)(C).

(n140)Footnote 91. See *IRC* § 1011(b). See also § 1.04[7].

(n141)Footnote 92. The rule applies to contributions of cash as well as appreciated property. See *Hernandez v Commr*, 490 US 680 (1989) (cash payments to Church of Scientology for "training" and "auditing" in Church principles not deductible because of substantial benefit to donor); *Sklar v Commr*, 549 F3d 1252 (9th Cir 2008) (tuition payments for instruction in beliefs of Orthodox Jewish religion for donor's children nondeductible for same reason). See also *US v American Bar Endowment*, 477 US 105 (1986) .

(n142)Footnote 93. *Transamerica Corp v US*, 902 F2d 1540, 1544 (Fed Cir 1990) (transfer by taxpayer movie studio of its library of old movies on highly flammable and fragile nitrate film stock to the Library of Congress in return for Library's commitment to care for and store the film and make preservation copies, giving the taxpayer access to the originals and the exclusive right to commercially exploit the copies even after its copyrights expired, held not a charitable gift). See also *Ottawa Silica Co v US*, 699 F2d 1124 (Fed Cir 1983) (contribution of land to local government for use as a public school site was not deductible when the government agreed to build access roads to the school site that significantly enhanced the value of adjoining parcels owned by the taxpayer); *Singer Co v US*, 449 F2d 413 (Ct Cl 1971) (difference between usual retail price and discounted price at which taxpayer sold its sewing machines to public and parochial schools was not a charitable contribution because the taxpayer made the discounted sales to enlarge its future potential market for sewing machines). Not surprisingly given the difficulty of valuing the intangible benefits, none of the taxpayers in these cases was able to show that the property contributed had a value in excess of the benefits received. Quere whether the Government might have argued in these cases that the "substantial benefit" derived by the taxpayers constituted an "amount realized" under *IRC* § 1001 and charged the taxpayers with taxable gain equal to the difference between the property's basis and its fair market value, the presumed value of the benefits received. See *US v Davis*, 370 US 65 (1962) ; *US v General Shoe Corp*, 282 F2d 9 (6th Cir 1960) ; *International Freightling Corp v Commr*, 135 F2d 310 (2nd Cir 1943) and text at § 1.02[4][c]. The taxpayers might then argue that the fair market value of the property was deductible as an "ordinary and necessary" expense of the business under *IRC* § 162, *cf. Marquis v Commr*, 49 TC 695 (1968) , but on the facts it is more likely that the outlay would be considered capital in nature, and therefore not currently deductible.

(n143)Footnote 94. See *Palmer v Commr*, 62 TC 684 (1974) , *affd on other grounds* 523 F2d 1308 (8th Cir 1975) ; *Grove v Commr*, 490 F2d 241 (2nd Cir 1973) ; *Behrend v US*, 1972 US App LEXIS 6282 (4th Cir 1972) ; *Carrington v Commr*, 476 F2d 704 (5th Cir 1973) ; *Sheppard v US*, 361 F2d 972 (Ct Cl 1966) .

(n144)Footnote 95. The step transaction doctrine, as the Tax Court explained in *Palmer*, is applied "[W]here a taxpayer has embarked on a series of transactions that are in substance a single, unitary, or indivisible transaction, [in which case] the courts have disregarded the intermediary steps and have given credence only to the completed transaction." 62 TC at 692 . However, "Transactions that are challenged as intermediary steps of an integrated transaction are disregarded only when found to be so interdependent that the legal relations created by one transaction would have been fruitless without the completion of the series. *Id.*

(n145)Footnote 96. See *Palmer v Commr*, 62 TC 684 (1974) , *affd on other grounds* 523 F2d 1308 (8th Cir 1975) ; *Grove v Commr*, 490 F2d 241 (2nd Cir 1973) ; *Behrend v US*, 1972 US App LEXIS 6282 (4th Cir 1972) ; *Carrington v Commr*, 476 F2d 704 (5th Cir 1973) ; *Sheppard v US*, 361 F2d 972 (Ct Cl 1966) .

(n146)Footnote 97. 1978-1 CB 83 .

(n147)Footnote 98. 697 F2d 473 (2nd Cir 1982) .

(n148)Footnote 99. TC Memo 1981-579 .

(n149)Footnote 100. The Court treated the charity as having sold the appreciated stock on the taxpayer's behalf, thus making him taxable on the gain, and the taxpayer as having donated his yacht to the charity, for which he was entitled to a charitable contribution deduction equal to the yacht's actual fair market value.

(n150)Footnote 101. 697 F2d at 477-478.

(n151)Footnote 102. The Court observed that the charity was well aware that it would be jeopardizing further contributions, from this taxpayer and others, if it disregarded taxpayer's "reasonable" expectations. "Where there is, as here, an expectation on the part of the donor that is reasonable, with an advance understanding that the donee charity will purchase the asset with the proceeds of the donated stock, the transaction will be looked at as a unitary one. A wooden view that would require legal enforceability of an understanding or obligation to purchase the asset contemplated to be donated *ab initio* is not what the tax law contemplates. At least, this circuit will not take it to do so." 697 F2d at 480-481.

(n152)Footnote 103. *Rauenhorst v Commr*, 119 TC 157, 173 (2002) .

(n153)Footnote 104. 108 TC 244 (1997) , *affd* 174 F3d 997 (9th Cir 1999) .

(n154)Footnote 105. In *Ferguson*, the Tax Court held that the right to receive merger proceeds matured not only before the merger was actually accomplished but before it was formally approved. The critical event was the tender to the acquiring corporation of a sufficient number of shares (a majority) to insure shareholder approval of the merger. It was at that point that the court found the shareholders' right to the merger's share price had matured, notwithstanding remaining obstacles that the Court termed "remote" and "hypothetical." *Ferguson v Commr*, 108 TC at 257 . See also *Hudspeth v US*, 471 F2d 275 (8th Cir 1972) and *Estate of Applestein v Commr*, 80 TC 331 (1983) (donors taxed on merger proceeds received by charitable donees of their stock).

(n155)Footnote 106. 477 F2d 1058 (2nd Cir 1972) .

(n156)Footnote 107. 531 F2d 1343 (6th Cir 1983) .

(n157)Footnote 108. 66 TC 340 (1976) .

(n158)Footnote 109. See *US v Davis*, 370 US 65, 69 (n 6) (1962) (dismissing the possibility of gift treatment for transfers in marital property settlements as "completely unrealistic.")

(n159)Footnote 110. Virtually every lower court that considered the issue concluded that a transfer of property to a spouse or former spouse in exchange for the relinquishment by the transferee spouse of inchoate marital rights was a taxable event. *US v Davis*, 370 US at 67-68. The issue reached the Supreme Court because of a split of authority as to whether the transaction nevertheless escaped tax because the transferee spouse's inchoate marital rights could not be valued. The Supreme Court resolved the issue by applying the principle that the values of "two properties exchanged in an arm's length transaction are either equal in fact, or are presumed to be equal." *Philadelphia Park Amusement Co v US*, 126 F Supp 184,189 (Ct Cl 1954). Thus, the fair market value of inchoate marital rights received by the transferor was presumed equal to the fair market value of the stock given up; the difference between that fair market value and the stock's basis was a taxable gain to the transferor.

(n160)Footnote 111. See HR Rpt No 98-432, 1491-1492 (1984).

(n161)Footnote 112. A division or partition of community or jointly owned property is not a taxable event. See *Yonadi v Commr*, 21 F3d 1292 (3d Cir 1994); *Carrieres v Commr*, 64 TC 959 (1975), *affd per curiam* 552 F2d 1350 (9th Cir 1977); *Rev Rul 75-551*, 1975-2 CB 292; *Rev Rul 56-437*, 1956-2 CB 507.

(n162)Footnote 113. HR Rpt No 98-432,1491-1492. Congress was also concerned that the Government could be whipsawed under *Davis* if the transferor spouse, out of ignorance of the law or otherwise, failed to report gain on the transfer of property to his spouse and the transferee, probably years later, claimed a stepped-up basis on a subsequent sale of the property (to which she was entitled under *Davis*) when it was too late to go after the transferor.

(n163)Footnote 114. *IRC § 1041(c)*. See *Young v Commr*, 240 F3d 369 (4th Cir 2001) (transfer of land to a former spouse in payment of promissory note given to her several years before as part of a property settlement agreement resolving all "claims arising out of the marital relationship" was "related to the cessation of the marriage" and therefore "incident to a divorce.")

(n164)Footnote 115. *Temp Treas Reg § 1.1041-1T*, Q&A 7.

(n165)Footnote 116. *Id.*

(n166)Footnote 117. *IRC § 1041(d)*.

(n167)Footnote 118. *IRC § 1041(e)*.

(n168)Footnote 119. *IRC § 1041(b)(1)* provides that for purposes of subtitle A (Income Taxes) of the Internal Revenue Code, the property transferred shall be considered as acquired by the transferee by gift. *IRC § 1041(b)(2)* goes on to provide that the basis of the transferee in the acquired property shall be the adjusted basis of the transferor.

(n169)Footnote 120. See *Temp Treas Reg §§ 1.1041-1T*, Q&A 11 and compare *IRC § 1015(a)*.

(n170)Footnote 121. *Temp Treas Reg § 1.1041-1T*, Q&A 11; *Godlewski v Commr*, 90 TC 200 (1988). But see *Rev Rul 87-112*, 1987-2 CB 207, where a transferee of US savings bonds in a section 1041 transfer was permitted to increase her basis in transferred bonds by the amount of accrued interest that the transferor was required to recognize as income under *IRC § 454*. Furthermore, even though a transferee who pays consideration in the form of personal debt for property received in a section 1041 transfer may not use the amount of the debt to increase her basis in the property, *Temp Treas Reg § 1.1041-1T*, Q&A 11, the Internal Revenue Service and the Tax Court permit the transferee to deduct interest on the debt if the property acquired from the transferor spouse was investment property, the transferee's residence, or other property described in *IRC § 163(h)(2)*. *Notice 88-74*, 1988-2 CB 385; *Seymour v Commr*, 109 TC 279 (1997); *Armacost v Commr*, TC Memo 1998-150.

(n171)Footnote 122. *Rev Rul 2002-22, 2002-1 CB 849* .

(n172)Footnote 123. See *Poe v Seaborn, 282 US 101 (1930)* . But cf *Balding v Commr, 98 TC 368 (1992)* (cash payments received by transferee spouse in exchange for relinquishment of rights in earning spouse's military pension were shielded from taxation to the non-earning spouse by *IRC § 1041*).

(n173)Footnote 124. *1987-2 CB 207* .

(n174)Footnote 125. The Service used the assignment of income doctrine to help justify its conclusion in *Rev Rul 87-112* , reasoning which it later repudiated in *Rev Rul 2002-22* , without repudiating the result in *Rev Rul 87-112* .

(n175)Footnote 126. *Temp Treas Reg § 1.1041-1T, Q&A 9*.

(n176)Footnote 127. *Id.*

(n177)Footnote 128. But where a former spouse sold her separate property to a third party to raise funds with which to pay a debt owed to her ex-husband as required by their property settlement agreement, the transfer was not made "on behalf of" the ex-husband and she was not entitled to nonrecognition treatment under *Temp Treas Reg § 1.1041-1T, Q&A 9* and *IRC § 1041*. *Ingham v US, 167 F3d 1240 (9th Cir 1999)* .

(n178)Footnote 129. A threshold issue is whether an arm's length sale of stock for cash or other consideration that does not include inchoate marital rights like those in *US v Davis, 370 US 65 (1962)* , can ever be within the scope of *IRC § 1041*. The temporary regulations, echoing the section's legislative history, answer that question in the affirmative; all transfers of property between spouses (or former spouses if incident to a divorce) are within the scope of *IRC § 1041* and must be treated as gifts, even if the transaction is simply a bona fide sale in which no inchoate marital rights are exchanged. See HR Rept. 98-432 (Part 2), 1491-1492 (1984) ("the nonrecognition rule applies whether the transfer is for the relinquishment of marital rights, for cash or other property * * * or for other consideration"); *Temp Treas Reg § 1.1041-1T, Q&A 11* ("Even if the transfer is a bona fide sale, the transferee does not acquire a basis in the transferred property equal to the transferee's cost (the fair market value)." (Q&A 11)). See also *Godlewski v Commr, 90 TC 200 (1988)* . Accordingly, a spouse's sale of property to a third party corporation "on behalf of" the other spouse, if qualified under *Temp Treas Reg § 1.1041-1T, Q&A 9*, should qualify for nonrecognition under *IRC § 1041*.

(n179)Footnote 130. See *IRC §§ 301 and 302*.

(n180)Footnote 131. The "primary and unconditional obligation" standard is discussed in the text at § 5.02[4].

(n181)Footnote 132. The "no-tax" solution is effectively though unintentionally what occurred in the first of the divorce-related corporate redemption cases to reach the courts. In *Arnes v US, 981 F2d 456 (9th Cir 1992)* , the Court of Appeals for the Ninth Circuit, which had only the transferor spouse (the wife) before it, held that her transfer of stock to the family corporation in exchange for cash was made "on behalf of" her husband, the remaining shareholder and was therefore nontaxable under *IRC § 1041*. For purposes of *Temp Treas Reg § 1.1041-1T, Q&A 9*, the Court said, an "obligation" of the husband had been satisfied by the redemption of the wife's stock because he had entered into an agreement with her, incorporated into the divorce decree, in which he had not only obtained her commitment to sell her stock to the corporation but had agreed to personally guarantee a note to be issued by the corporation in the exchange. When the husband's tax liability came before the Tax Court on the same facts, however, a majority held that the husband could not be charged with a constructive dividend because he never had a personal obligation, and certainly not a "primary and unconditional obligation," to purchase the redeemed stock as required by existing corporate tax doctrine. *Arnes v Commr, 102 TC 522 (1994)* . The two cases were like ships passing in the night: the Ninth Circuit decision applied *Temp Treas Reg § 1.1041-1T, Q&A 9* without considering or distinguishing any of the cases following the "primary and unconditional obligation" standard, and the Tax Court majority relied exclusively on the "primary and unconditional obligation" cases, making no reference to *Temp Treas Reg § 1.1041-1T, Q&A 9* except to note in a footnote that the Court expressed no opinion on the interpretation of its "on behalf of" language in determining the

applicability of *IRC § 1041* to the redeeming shareholder. *Arnes v Commr*, 102 TC at n. 3.

(n182)Footnote 133. *114 TC 14 (2000)* .

(n183)Footnote 134. Accord: *Craven v US*, 215 F3d 1201 (11th Cir 2000) .

(n184)Footnote 135. See *Read v Commr*, 114 TC at 58 .

(n185)Footnote 136. See *Treas Reg § 1.1041-2*, adopted by *TD 9035*, 68 FR 1534 (January 13, 2003). Since the Tax Court's decision in *Read v Commr*, was based on *Temp Treas Reg § 1.1041-1T*, Q&A 9, that decision no longer applies to divorce-related corporate redemptions occurring on or after January 13, 2003 (the effective date of the new regulations), though it presumably continues to apply to spousal transfers to third parties other than those involving corporate redemptions which are still governed by *Temp Treas Reg § 1.1041-1T*, Q&A 9.

(n186)Footnote 137. *Treas Reg § 1.1041-2(c)*.

(n187)Footnote 138. See *TD 9035* , 68 FR at 1535.

(n188)Footnote 139. See *TD 9035* , 68 FR at 1535. The regulations thus adopt the reasoning of the Tax Court in *Arnes v Commr*, 102 TC 522 (1994) , and reject the separate standard for constructive dividends in divorce-related redemptions in *Read v Commr*, 114 TC 14 (2000) .

Taxation of Securities Transactions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

CHAPTER 1 Gains and Losses From the Disposition of Property

1-1 Taxation of Securities Transactions § 1.02A

§ 1.02A The Elements of Gain or Loss--Non-Events: Sham and Other Tax-Avoidance Transactions

[1] The Economic Substance Doctrine: Statement and Purposes.

Understanding the taxation of securities transactions requires knowledge of the applicable statutory rules of the Internal Revenue Code, certainly, but also of judge-made law, the so-called common law of federal taxation, that has developed over the years as a gloss on the statutory provisions. Application of the various judicial doctrines--substance over form, step transaction, sham transaction, business purpose, and economic substance--can produce results that are very different from what might be predicted from looking at the Internal Revenue Code alone. Securities transactions are not the only targets of these judicial doctrines but, perhaps because of their protean nature, securities transactions have often been at the center of their development.

This section will examine in particular the economic substance doctrine, which polices the often murky line between legitimate tax planning and tax avoidance.ⁿ¹ The previous discussion of the term "sale" in the context of the realization requirement showed that the Internal Revenue Service and the courts may invoke the substance over form doctrine to disregard the "sale" label put on a transaction by the parties (or, conversely, ignore a "lease" or "loan" label on a transaction that is really a sale) and reclassify the transaction in accordance with its true nature.ⁿ² If a transaction falls on the tax avoidance side of the economic substance line, however, it is neither fish nor fowl, and realization is no longer an issue.ⁿ³ A loss claimed by the taxpayer with respect to the transaction will be disallowed as though the transaction had never occurred.ⁿ⁴ A transaction that fails the economic substance test is, at least for realization purposes, a non-event.

Although Congress codified and clarified the economic substance doctrine by adding *IRC Section 7701(o)* to the IRC in 2010, knowledge of the judge-made law leading up to *IRC Section 7701(o)* remains essential to understanding and applying that provision. This section will therefore look first at the three Supreme Court cases that are generally regarded as providing the foundation for the economic substance doctrine. It will then review the various ways in which more recent lower court decisions have refined the economic substance doctrine, including the objective and subjective criteria applied to determine whether a transaction has economic substance. Finally, this section will consider the consequences, before and after codification, of applying the economic substance doctrine to a transaction, including the automatic penalty for engaging in a transaction lacking economic substance that was added as part of the codification package.

[a] Foundations of the Economic Substance Doctrine--The Landmark Supreme Court Decisions.

Clearly the bellwether case in the development of the substance over form and economic substance doctrines, and frequently cited by the courts to the present day, is the Supreme Court's 1935 decision in *Gregory v Helvering*.ⁿ⁵ The taxpayer in that case, an individual, owned all the stock of United Mortgage Corporation, which in turn held valuable shares of stock in the Monitor Securities Corporation. The taxpayer wished to acquire the Monitor shares for the purpose of reselling them individually to a prospective purchaser but to do so directly would have required United Mortgage to pay her a dividend of the Monitor shares taxable as ordinary income. Instead, she acquired the Monitor shares through a more complicated process: first, she caused a new corporation, Averill, to be formed; second, United Mortgage transferred the Monitor shares to Averill in exchange for Averill's issuance of all of its stock to United Mortgage's sole stockholder, the taxpayer; and third, taxpayer liquidated Averill, receiving the desired Monitor shares as a liquidating distribution and immediately reselling the shares to a third party. Following this route, taxpayer paid capital gains tax on the gain realized on the liquidating distribution instead of paying ordinary income tax on a dividend equal to the full value of the Monitor shares (to the extent of United Mortgage's earnings and profits).

The issue in *Gregory* was whether the second of the three steps taken by the taxpayer qualified as a tax-free reorganization. Under the income tax statute in force at that time, a reorganization was defined as any transfer by a corporation of all or part of its assets to another corporation if immediately after the transfer the transferor or its stockholders or both are in control of the corporation to which the assets are transferred.ⁿ⁶ No one disputed that step two literally complied with that definition; the question was whether the transaction was sufficient to warrant tax-free reorganization treatment.

The taxpayer's argument, repeated countless times over the years (and accepted by the Board of Tax Appeals, the trial court below),ⁿ⁷ was that since every element of the statutory definition had been satisfied, "the motive of the taxpayer ... to escape payment of a tax will not alter the result or make unlawful what the statute allows."ⁿ⁸ The Supreme Court's response, which has likewise become part of the mantra invoked in almost every economic substance case since *Gregory*, was first to acknowledge that "The legal right of a taxpayer to decrease the amount of what otherwise would be his taxes, or altogether avoid them, by means which the law permits, cannot be doubted."ⁿ⁹ "But," said the Court, "the question for determination is whether what was done, apart from the tax motive, was the thing the statute intended."ⁿ¹⁰ The purpose of the reorganization statute is to facilitate transactions implementing a legitimate plan of reorganization of a corporate business, while what happened in this case was "the consummation of a preconceived plan, not to reorganize a business or any part of a business, but to transfer a parcel of corporate shares" to the taxpayer.ⁿ¹¹ Accordingly, "the rule which excludes from consideration the motive of tax avoidance is not pertinent to the situation, because the transaction upon its face lies outside the plain intent of the statute. To hold otherwise would be to exalt artifice above reality and to deprive the statutory provision in question of all serious purpose."ⁿ¹²

A securities transaction was also involved in a second significant Supreme Court case, *Higgins v Smith*.ⁿ¹³ The Court there decided that a sale of securities by a taxpayer to his wholly owned corporation should be disregarded for "realization of loss" purposes because the taxpayer's control over his corporation allowed him to exercise the same dominion and control over the securities after the sale as before.ⁿ¹⁴ Although the treatment of losses in transactions between related parties is now dealt with principally by *section 267 of the Internal Revenue Code*,ⁿ¹⁵ the language of the *Higgins v Smith* opinion continues to resonate in the economic substance doctrine:ⁿ¹⁶

"[*Gregory v Helvering* ... gives support to the natural conclusion that transactions, which do not vary control or change the flow of economic benefits, are to be dismissed from consideration.

* * *

The Government may look at actualities and upon determination that the form employed for doing business or carrying out the challenged tax event is unreal or a sham may sustain or disregard the effect of the fiction as best serves the purposes of the tax statute. To hold otherwise would permit the schemes

of taxpayers to supersede legislation in the determination of the time and manner of taxation."ⁿ¹⁷

Finally, in the third significant Supreme Court decision, *Frank Lyon Co v US*,ⁿ¹⁸ the Supreme Court placed limits on the ability of the Government and the courts to re-characterize or disregard tax-motivated transactions. The Court reviewed the sale and leaseback of a building in which the seller-lessee, through various contractual provisions and options, retained most of the significant attributes of ownership (including, as a practical matter, the right to future appreciation in value), while the purchaser-lessor was limited to a fixed (though apparently arm's length) return on the relatively small cash investment it made in the transaction, in addition to the significant tax benefits it derived from the transaction.ⁿ¹⁹ The Court decided that the transaction affected the economic positions of both parties in non-trivial ways,ⁿ²⁰ and that this gave the transaction the economic substance necessary to be respected for tax purposes.

"In short, we hold that where, as here, there is a genuine multiple-party transaction with economic substance which is compelled or encouraged by business or regulatory realities, is imbued with tax-independent considerations, and is not shaped solely by tax-avoidance features that have meaningless labels attached, the Government should honor the allocation of rights and duties effectuated by the parties."ⁿ²¹

[b] Statements of the Doctrine in Modern Decisions.

A few years after *Lyon*, the Tax Court derived from that decision "a two-pronged inquiry" for determining when it is permissible to disregard a transaction for tax purposes.ⁿ²² "To treat a transaction as a sham, the court must find that the taxpayer was motivated by no business purposes other than obtaining tax benefits in entering the transaction, and that the transaction has no economic substance because no reasonable possibility of a profit exists."ⁿ²³ This "two-pronged inquiry," adopted by the Court of Appeals for the Fourth Circuit in affirming the Tax Court's decision, has become the point of departure for subsequent expressions of the economic substance doctrine by the courts.

The economic substance doctrine as stated in *Rice's Toyota World* implies that an initial determination that the taxpayer had some business purpose for engaging in a transaction would require that a transaction be respected for tax purposes even if, objectively viewed, it had no non-tax significance. Other courts have interpreted *Lyon* differently and uniformly reject that position.ⁿ²⁴ To the contrary, "[t]he majority view ... is that a lack of [objective] economic substance is sufficient to invalidate the transaction regardless of whether the taxpayer has motives other than tax avoidance."ⁿ²⁵ Even courts that believe the taxpayer's subjective motives, as well as objective indicia of economic significance, should always be examined reject a "rigid two-step analysis" like that prescribed in *Rice's Toyota World*; such courts view objective economic significance and subjective motives not as "discrete prongs" of a two-pronged test "but rather ... [as] related factors both of which inform the analysis of whether the transaction had sufficient substance, apart from its tax consequences, to be respected for tax purposes."ⁿ²⁶

As a practical matter, objective and subjective tests of economic significance normally reinforce each other and come to the same conclusion. A court that is unable to find non-tax significance in a transaction is unlikely to give credence to a taxpayer's claim that the transaction was motivated by a business purpose, just as a court that finds objective evidence of non-tax significance is unlikely to disregard a transaction on the ground that the transaction was tax motivated.ⁿ²⁷ No matter how the test is expressed, "the presence or absence of economic substance for Federal tax purposes is determined by a fact-specific inquiry on a case-by-case basis."ⁿ²⁸ Of greater importance, therefore, are the indicia or factors considered by the courts in the fact-specific inquiry as to whether a transaction either possesses, or lacks, economic substance.

[2] Indicia of Presence or Lack of Economic Significance.

The surest indicator that a transaction has economic significance is its potential to make a profit without taking income taxes into account. If a transaction is under economic substance scrutiny the chances are that it did not actually make a

profit, but the inquiry is made as of the time the transaction was entered into rather than with 20/20 hindsight.ⁿ¹ The question under the objective test, however, is not whether the taxpayer expected to make a profit when the transaction was entered into, but whether a reasonable, prudent investor could have had such an expectation.ⁿ²

Although a reasonable or prudent investor standard is used, courts take into account the taxpayer's actual conduct (and that of other parties to the transaction) to ascertain the true parameters of the transaction and determine whether, under all the circumstances, a reasonable possibility of profit existed.ⁿ³ In *James v Commissioner*, joint ventures in which the taxpayer was a participant purchased computers from a promoter which arranged for the computers to be leased to various business users. Although this is a common type of business transaction often entered into for economic as well as tax reasons,ⁿ⁴ the actual conduct of the joint ventures made it unlikely if not impossible for the transactions to make a profit: the ventures paid inflated purchase prices for the computers in order to increase their participants' investment credit and depreciation deductions, using nonrecourse notes to facilitate early withdrawal from the transaction when these short-term tax benefits had been achieved; the ventures agreed to contractual provisions and acquiesced in unauthorized conduct by the promoter that stripped away all positive cash flow to the ventures during the terms of the computer leases; and the ventures agreed to pay an exorbitant remarketing fee to the promoter if it successfully sold or released the computers at the conclusion of the leases, making it impossible for the ventures to realize any economic benefit from the computers' residual value to earn an overall profit on the transaction.ⁿ⁵

Similarly, if the asserted profitability of a transaction depends on the possibility of the taxpayer or another party taking some voluntary action in the future that would be a "drastic departure" from its past conduct, the court will disregard that possibility. In *James*, the taxpayer argued that the promoter's exorbitant remarketing fee should not be taken into account because the ventures could avoid the fee by using another broker to sell or re-lease the computers (assuming, in one case, that the promoter voluntarily gave up its right of first refusal to broker the deal). The court rejected that argument, finding "little reason to believe" that either the ventures or the promoter "would have stood guard to ensure that the joint venture saved money [on the brokerage fee] at the expense of" the promoter when such action would have been dramatically inconsistent with the actual conduct of the parties throughout the rest of the transaction. Similarly, in *Dow Chemical Co v US*,ⁿ⁶ although the taxpayer conceded that its corporate-owned life insurance contract would be cash-flow negative during its first several years, it claimed it planned to make significant cash infusions midway into the policy that would create a substantial inside build-up over the remainder of the policy term resulting in an overall profit over the entire life of the contract. The taxpayer had no contractual obligation to make these cash infusions, however, and "considering that ... [the taxpayer] had...made no similar cash infusions, [and that] such additional spending would be a drastic departure from the taxpayer's past conduct,"ⁿ⁷ the court of appeals held that the trial court erred when it took the possibility of such cash infusions into account in assessing the policy's potential long-term profitability.

The inquiry into potential profitability is limited to the specific transaction that gave rise to the tax benefits in question. Even actual profits earned by the taxpayer in collateral or related transactions which did not directly produce the challenged tax benefits are excluded from consideration.ⁿ⁸ In *Klamath*, for example, the court disregarded partnership profits made in transactions involving property purchased with partners' cash contributions since the questioned tax benefits resulted exclusively from transactions involving partner contributions of high-basis property financed by "sham" bank loans to the partners. In *ACM Partnership*, the court similarly ignored profits earned on partnership sales of securities for cash because it was the partnership's contingent installment sales of securities that produced the challenged tax benefits.

Further, no significance is attached to the possibility that a transaction, designed to produce substantial tax benefits, might or did incidentally produce economic profits of a relatively nominal amount.ⁿ⁹ This is particularly so when the court is convinced that the taxpayer or promoter of the transaction sought merely to create the appearance of profit potential to better defend against an attack under the economic substance doctrine.ⁿ¹⁰

Potential profitability does not, of course, take into account projected savings in the taxpayer's federal income taxes, but

should foreign income taxes also be excluded from consideration? The taxpayers in *IES Industries, Inc v USn11* and *Compaq Computer Corp and Subsidiaries v Commr,n12* concededly looking for capital losses to offset against their substantial capital gains, entered into "dividend stripping" transactions that produced guaranteed short-term capital losses while nevertheless, it was contended, generating an overall pre-tax profit. The transactions involved American Depository Receipts ("ADRs") representing stock in foreign corporations the dividends on which were reduced by foreign withholding taxes equal to 15 percent of the dividends paid. US taxpayers could offset the amount of these foreign withholding taxes against their US tax liability through foreign tax credits, but some holders of ADRs were tax-exempt entities, such as pension funds, that could not make use of foreign tax credits. In the transactions at issue, a tax-exempt organization would temporarily loan its ADRs to a counterparty which sold them to the US taxpayer *cum-dividend* (that is, shortly before the date on which shareholders of record would be entitled to a previously declared dividend (the "record date")), and immediately thereafter re-purchased the ADRs from the US taxpayer *ex-dividend* (that is, effective as of a settlement date occurring after the record date, when the purchaser of the ADR was no longer entitled to receive the declared dividend.) The US taxpayer's sale back to the counterparty always produced a short-term capital loss substantially equal to the amount of the dividend (less withholding taxes) since the "*cum-dividend*" price paid for the ADR reflected the holder's right to receive the dividend while the "*ex-dividend*" price received for the ADR did not.ⁿ¹³ The US taxpayer received the dividend (net of withholding taxes) and reported it on its federal income tax return ("grossed-up" by the amount of the withholding taxes), using the foreign tax credit to offset US tax liability created by such dividend income.

The taxpayer's calculation of its pre-tax profit on the ADR transactions treated the portion of the dividend used to pay foreign income taxes as part of the income generated by the transaction, while ignoring the negative cash flow that resulted from the withholding of foreign taxes at the source. In *Compaq*, for example, as a result of the ADR transactions the taxpayer actually received dividends of \$19.2 million net of withholding taxes of \$3.3 million, but the taxpayer contended that for purposes of calculating pre-tax profit the dividends should be "grossed up" by the amount of the withholding taxes, producing gross income of \$22.5 million. Deducting from that figure the short-term capital losses sustained in the ADR transactions of \$19.1 million, and a further \$1.5 million in transaction costs, still left a net profit to the taxpayer of \$1.9 million. If the transaction were viewed strictly on a cash flow basis, as the Government contended was appropriate, subtracting the \$3.3 million of foreign income taxes withheld produced a \$1.4 million loss rather than a \$1.9 million profit.

The appellate courts in *Compaq* and *IES Industries* both agreed with the taxpayer that foreign income taxes owed by the recipient of a dividend belong in the recipient's income whether the taxes are withheld at the source or paid at the end of the year, just as federal income taxes withheld at the source from the wages of an employee must be included as wages on the employee's return.ⁿ¹⁴ Neither court discussed the further question of whether the foreign taxes should then be deducted as an expense of the transaction, apparently assuming that both foreign and domestic income taxes should be left out of the calculation of pre-tax profit.

As sometimes happens when the Internal Revenue Service believes taxpayers are reducing their taxes by exploiting a "loophole" in the tax law, Congress responded to the ADR strategy without waiting for a judicial resolution, changing the law for future transactions while leaving the courts to deal with the tax treatment of similar transactions occurring before the effective date of the new statute.ⁿ¹⁵ Typically, neither the Tax Court, which found the ADR transactions lacking in economic substance, nor the appellate courts, which held that the ADR transactions possessed economic substance, drew any inference from the remedial legislation, either from the fact that Congress saw a "problem" requiring correction or from the fact that Congress chose not to apply its solution retroactively.ⁿ¹⁶ Unless Congress provides expressly to the contrary, courts commonly examine pre-effective date transactions under the economic substance and other judicial doctrines without regard to how Congress decided to treat similar future transactions.ⁿ¹⁷

Although potential profitability is the issue most commonly examined under the objective test,ⁿ¹⁸ courts may also look to other indicia of economic substance, such as whether the transaction affected the taxpayer's "net economic position, legal relations, or non-tax business interests."ⁿ¹⁹ *Frank Lyon Co.* is often cited in support of the importance of such

factors; the Supreme Court there viewed the genuine indebtedness incurred by the taxpayer to an unrelated party, which restricted its ability to borrow funds to meet the needs of its business, as one of the grounds for respecting the transaction for tax purposes.ⁿ²⁰ *Frank Lyon* was followed in *United Parcel Service of America, Inc v Commr*,ⁿ²¹ (hereafter "*UPS*"), where the taxpayer's delivery service business was restructured to shift the company's liability to shippers for damaged packages to an unrelated third party insurer, which reinsured the liability with a foreign insurer owned by the taxpayer's employee-stockholders. Finding that the transaction passed the economic substance test, the court of appeals in *UPS* analogized the taxpayer's insurance policy to the loan in *Frank Lyon*: the taxpayer incurred an obligation to pay premiums to an unrelated insurer, thereby giving up the right to use that stream of income to pay other expenses, or capital improvements, or dividends. "And even if the odds of losing money on the policy were slim," said the court, "the insurer had assumed liability for the losses of the ... [taxpayer's] ... shippers, again a genuine obligation."ⁿ²²

A factor often cited as exposing a transaction's lack of economic substance is the production of artificial losses far exceeding the taxpayer's actual investment.ⁿ²³ As Judge Easterbrook noted with wry understatement in *Cemco Investors, LLC v US*,ⁿ²⁴ "[a] transaction with an out-of-pocket cost of \$6,000 and no risk beyond that expense, while generating a tax loss of \$3.6 million, is the sort of thing that the Internal Revenue Service frowns on." Other factors indicating the lack of economic substance include: a "fleeting and economically inconsequential" investment;ⁿ²⁵ a departure in some significant respect from standard industry practice;ⁿ²⁶ marketing of the transaction as a tax-driven investment;ⁿ²⁷ and structuring on non-arm's length terms.ⁿ²⁸

[3] The Role of Subjective Intent and Business Purpose.

The "majority view" of the economic substance doctrine, it will be recalled, holds that inquiry into the taxpayer's motivation is unnecessary when a transaction lacks objective economic substance. It is only when a transaction has met the objective test that a court may inquire into whether it was "solely tax motivated." If the court finds that the taxpayer fails that subjective test, theoretically the transaction may be disregarded even though it possesses non-tax significance.

The possibility is, however, more theoretical than real. There should rarely, if ever, be a case in which a taxpayer who has engaged in a transaction with non-tax significance fails the subjective test. Under *Gregory v Helvering*, taxpayers have the right to structure legitimate transactions in ways that minimize or avoid entirely taxes that might otherwise be imposed. Given that a transaction has objective non-tax significance, the taxpayer's tax avoidance motives should be protected by *Gregory*.

The case law bears out this prediction. In *UPS*, the taxpayer restructured its package delivery business so that its liability for damaged packages, instead of being self-insured as in the past, was insured with a third party insurer, which in turn reinsured its liability with a foreign insurer owned by the taxpayer's employee-stockholders. The court of appeals for the Eleventh Circuit held that the transaction changed the taxpayer's economic position sufficiently to pass the objective economic substance testⁿ¹ but, following the "majority view," observed that the transaction could still be disregarded "if tax avoidance displaced any business purpose."ⁿ² However, it went on to define "business purpose" in such a manner that the taxpayer could hardly fail to pass the subjective test.

[T]he tax court's narrow notion of "business purpose"--which is admittedly implied by the phrase's plain language--stretches the economic-substance doctrine farther than it has been stretched. A "business purpose" does not mean a reason for a transaction that is free of tax considerations. Rather, a transaction has a "business purpose," when we are talking about a going concern like UPS, as long as it figures in a bona fide, profit-seeking business. ... This concept of "business purpose" is a necessary corollary to the venerable axiom that tax-planning is permissible. See *Gregory v. Helvering* ... ").ⁿ³

The transaction had no impact on the taxpayer's business, which "continued to operate after its reconfiguration much as before." The taxpayer's "initial and sole reason for the scheme in question," was to structure its business in such a way

1-1 Taxation of Securities Transactions § 1.02A

as to permit a deduction for otherwise nondeductible contingent liabilities with respect to packages that would become damaged in transit.ⁿ⁴ Nevertheless, had the taxpayer in *UPS* selected this structure when it initially set up its business the economic substance issue presumably would never have arisen. To the court of appeals, the situation was no different in principle from a corporate taxpayer's decision to finance its business with debt rather than equity because the cost of financing (interest versus dividends) is tax-deductible with debt but not with equity. "There may be no tax-independent reason for a taxpayer to choose between these different ways of financing the business, but it does not mean that the taxpayer lacks a 'business purpose.'" ⁿ⁵ The court of appeals held that the taxpayer passed the subjective test because "the transaction under challenge here simply altered the form of an existing, bona fide business, and this case therefore falls in with those that find an adequate business purpose to neutralize any tax-avoidance motive."ⁿ⁶

Similarly in *IES Industries* and *Compaq*, once the courts of appeal found that the ADR transactions in those cases earned a pre-tax profit,ⁿ⁷ it followed that the taxpayers' motives, which clearly included tax savings, necessarily fell on the legitimate tax planning rather than the tax avoidance side of the line.ⁿ⁸ Indeed, the court of appeals candidly observed in *Compaq* that had the taxpayer not had a sizeable capital gain against which to offset the capital losses generated by the ADR transactions, the transactions would not have made economic sense on an after-tax basis. "A sensible taxpayer would have engaged in such a transaction only if it had a capital gain against which to offset the capital losses that the taxpayer knew would result from the transaction. All this is unremarkable and is no evidence that Compaq had an impermissible motive."ⁿ⁹

Finally, the Supreme Court's decision in *Cottage Savings Ass'n v Comm'r*ⁿ¹⁰ makes clear that where real economic losses are involved, tax savings motives regarding the realization of such losses are simply irrelevant.ⁿ¹¹ The taxpayer bank in that case entered into an exchange with another bank of economically equivalent but legally distinct mortgage portfolios that had economically depreciated in value, a transaction that was designed solely to enable both banks to claim losses on their portfolios for tax purposes while avoiding recognition of the losses for accounting and financial statement purposes. The Supreme Court did not find the tax motivation significant. It held that since the exchange involved "materially different" properties the resulting losses could be deducted. Although the court of appeals below had disallowed the losses on economic substance grounds, the Government offered only a "minimal defense" of that position and the Supreme Court summarily dismissed it.ⁿ¹²

Conversely, even under *Rice's Toyota World*, where a subjective tax avoidance motive is supposedly a prerequisite to finding that a transaction lacks economic substance, a transaction viewed objectively as having no non-tax significance will not be respected for tax purposes simply because the taxpayer asserts a business purpose for entering it. The Fourth Circuit, in decisions following *Rice's Toyota World*, has clarified that that a taxpayer's "mere assertion" of subjective belief in the profit opportunity from a transaction "particularly in the face of strong objective evidence that the taxpayer would incur a loss, cannot by itself establish that the transaction was not a sham [T]he ultimate determination of whether an activity is engaged in for profit is to be made ... by reference to objective standards."ⁿ¹³ Stated differently, actions speak louder than words.

The reality, then, regardless of the jurisdiction, is that while manifestations of a taxpayer's subjective intent will often be relevant to the determination of whether a transaction has economic substance, seldom if ever will subjective intent be determinative one way or the other. As the court of appeals for the Federal Circuit (a "majority view" jurisdiction) said in *Coltec Industries, Inc.*: "While the taxpayer's subjective motivation may be pertinent to the existence of a tax avoidance purpose, all courts have looked to the objective reality of the transaction in assessing its economic substance."ⁿ¹⁴

Factors objectively indicating the absence of a profit motive include the fact that the transaction was marketed as a tax-saving vehicle,ⁿ¹⁵ the fact that the taxpayer's investigation of the investment was cursory or non-existent,ⁿ¹⁶ and the fact that the taxpayer's conduct demonstrated indifference to economic profitability or was actually inconsistent with the business purpose asserted as the justification for entering the transaction.ⁿ¹⁷ The taxpayer's willingness to pay large fees or incur significant transaction costs to enter transactions with little or no profit potential, or to forego alternative

opportunities to realize its profit and other goals with significantly less risk and lower costs, are also indicative of a tax avoidance motive.ⁿ¹⁸ Where the taxpayer advances business purpose arguments other than profitability, these will be examined on a case-by-case basis.ⁿ¹⁹

[4] Pre-Codification Tax Consequences of a Determination That Transaction Lacks Economic Substance.

In general, "if a transaction is devoid of economic substance ... it simply is not recognized for federal taxation purposes, for better or for worse. This denial of recognition means that a sham transaction, devoid of economic substance, cannot be the basis for a deductible loss."ⁿ¹ Conversely, any income reported by the taxpayer as a result of a sham transaction is likewise disregarded, and tax paid on such income is refundable.ⁿ²

The court of appeals for the Fourth Circuit departed from this general rule to allow expense deductions with respect to what it considered separable economically substantive elements of an otherwise sham transaction.ⁿ³ In *Rice's Toyota World*, the court determined that the taxpayer's purchase of computers pursuant to a sale and leaseback transaction was a sham, in part because the taxpayer had used nonrecourse indebtedness to pay an inflated purchase price which it never intended to pay in full. However, the taxpayer had also given the promoter its recourse note on which it made an initial cash payment. The taxpayer treated the recourse note as part of the purchase price of the computer, but the Tax Court found that the note actually represented the promoter's fee for initiating and managing the deal. The Tax Court disallowed a deduction for the taxpayer's cash payment on the recourse note on the ground that the expenses of entering a sham transaction were nondeductible since the taxpayer incurred them not to make a profit but to purchase tax savings.ⁿ⁴ On appeal, however, the Fourth Circuit court of appeals allowed the taxpayer to deduct interest on the recourse note, holding that "under *Frank Lyon* ⁿ⁵ the court may not ignore transactions that have economic substance [i.e., the genuine indebtedness represented by the recourse note] even if the motive for the transaction is to avoid taxes."ⁿ⁶

The court of appeals for the Third Circuit followed *Rice's Toyota World* in recognizing that deductions for economically real losses and expenses may be appropriate even though incurred in connection with a sham transaction,ⁿ⁷ although it disagreed with the Fourth Circuit's conclusion that the recourse indebtedness in that case, which by the Fourth Circuit's "own description, had no non-tax consequences and served no non-tax purposes" should be "considered economically substantive even if it was separable from the central aspects of the underlying sham."ⁿ⁸

In *ACM Partnership*, the taxpayer acquired "LIBOR Notes" pursuant to what the court of appeals regarded as a sham transaction designed to artificially increase the basis of the LIBOR Notes so as to produce artificial, non-economic losses on their sale.ⁿ⁹ However, the taxpayer's sales of the LIBOR Notes also produced real economic losses, in part, because a decline in interest rates directly affected the value of the notes during the period in which they were held. The Tax Court, while taxing the interest income received on the LIBOR Notes, denied any deduction for the losses realized by the taxpayer on the sale of the Notes, including that portion that represented a real economic loss due to the decline in interest rates.ⁿ¹⁰ The court of appeals found it "clear that the income and loss aspects of the LIBOR Notes must be treated consistently with one another," and went on to hold that the real economic losses incurred on the sale the Notes should be recognized. "[T]he LIBOR notes, although not intended to serve non-tax purposes, had significant non-tax economic effects, consisting of several million dollars in actual economic losses [E]ven where a transaction is not intended to serve business purposes, it may give rise to a deduction to the extent that it has objective economic consequences apart from tax benefits."ⁿ¹¹

In *Klamath Strategic Investment Fund v US*,ⁿ¹² the court of appeals for the Fifth Circuit reviewed a District Court decision that disallowed losses claimed by the taxpayer on the sale of foreign currency distributed to him by an investment partnership because the losses lacked economic substance. The foreign currency's basis had been artificially inflated through the use of "loans" made to the taxpayer which the District Court disregarded as economic shams since the borrower was prohibited from ever removing the loan funds from the lender's possession. The only purpose of the loans was to inflate the basis of the taxpayer's interest in the investment partnership which in turn inflated the basis of

the foreign currency distributed by the partnership to the taxpayer, ultimately producing losses the taxpayer could use to avoid tax on a substantial amount of legal fees he had received. The District Court allowed the taxpayer to deduct interest actually paid on the loans because the loans were genuine indebtedness owed to an unrelated third party. Furthermore, finding that the taxpayer invested in the partnership in the belief that it would make a profit trading in foreign currency, the District Court allowed the taxpayer to deduct management and other fees paid to the promoter and managing partner of the investment partnership.

The Fifth Circuit, after affirming the District Court's disallowance of the claimed foreign currency losses on economic substance grounds, reversed the District Court's allowance of an interest deduction, holding that since the Court had properly found the "loans" to be fictitious, what was paid to the bank could not have been interest on "indebtedness" as required by section 163 of the Code. Further, said the court, "the overall transaction must have economic substance in order to show genuine indebtedness, otherwise 'every tax shelter ... could qualify for an interest expense deduction as long as there was a real creditor in the transaction that demanded repayment.' "n13

The court of appeals likewise reversed the District Court's decision to allow the taxpayer to deduct management fees and other operating expenses of the investment partnership. Observing that such expenses were deductible under *section 212 of the Internal Revenue Code* only if incurred in a profit-seeking enterprise, the court of appeals did not directly challenge the District Court's finding that the taxpayer had a profit objective but held that it was the partnership's objective, not the taxpayer's, that was critical. Since the partnership agreement committed the management of the partnership exclusively to the promoter, the taxpayer's profit objective was irrelevant to the deductibility of the expenses in question.

The Fifth Circuit's reasoning was more roundabout but ultimately came to the same conclusion as the rule routinely followed by the Tax Court: a transaction lacking in economic substance cannot be the basis for a deductible expense.ⁿ¹⁴ In short, notwithstanding *Rice's Toyota World*, it is unlikely that a taxpayer will be able to salvage interest or operating expense deductions (including a deduction for promoters' fees) out of a transaction disregarded for purposes of realizing gain or loss under the economic substance doctrine. On the other hand, as in *ACM Partnership* or *Coltec*, if a real and severable economic loss is incurred in or associated with such a disregarded transaction, courts seem disinclined to penalize the taxpayer for having suffered it in the context of, or even as a result of having entered, a transaction that otherwise lacked any non-tax significance.

[5] Codification and Clarification of the Economic Substance Doctrine.

To promote consistency in the courts' application of the economic substance doctrine, Congress codified and clarified its basic principles in *IRC Section 7701(o)*.ⁿ¹ The new subsection affirms the appropriateness of an administrative or judicial inquiry into the "economic substance" or "business purpose" of a transaction even though the tax benefits claimed by reason of the transaction appear to be allowable under the literal terms of the Internal Revenue Code.ⁿ² Once such an inquiry is justified by the Internal Revenue Service or the courts, *IRC Section 7701(o)* prescribes a set of rules to help the courts in deciding whether the transaction has "economic substance" and therefore qualifies for the tax benefits in issue.

IRC Section 7701(o)(1) begins by apparently returning the economic substance doctrine to a "two-pronged inquiry" similar to that posited in *Rice's Toyota World, Inc v Commr*.ⁿ³

"A transactionⁿ⁴ is treated as having economic substance only if--

(A) the transaction changes in a meaningful way (apart from Federal income tax effects) the taxpayer's economic position, and

(B) the taxpayer has a substantial purpose (apart from Federal income tax effects) for entering into such

transaction."

Unlike *Rice's Toyota World's* statement of the doctrine, which could be interpreted as allowing a taxpayer to avoid its application by showing *either* a subjective business purpose *or* an objectively reasonable possibility that the transaction would be profitable, under *IRC Section 7701(o)(1)* that the taxpayer must show *both*. It is insufficient, moreover, for the taxpayer merely to show any business purpose; the business purpose must be a "substantial" one.ⁿ⁶

IRC Section 7701(o) goes on to provide specific rules implementing these two tests. For purposes of both, a transaction has a potential for profit only if "the present value of the reasonably expected pre-tax profit from the transaction is substantial in relation to the present value of the expected tax benefits that would be allowed if the transaction were respected."ⁿ⁷ Furthermore, *IRC Section 7701(o)(3)* provides that the tax savings ("Federal income tax effect") taken into account must include savings of not only Federal income taxes but State and local income taxes related thereto, a rule that appears to be without precedent in any pre-codification decision.

IRC Section 7701(o)(2)(B) addresses two issues relevant to the calculation of pre-tax profit. First, legal and accounting fees and other transaction expenses must be deducted for this purpose, a proposition that has never been thought debatable. Secondly, the subsection addresses but does not resolve the more controversial issue of whether foreign income taxes should be treated as an expense of a transaction or, like domestic income taxes, should be ignored as irrelevant to a calculation of "pre-tax" profit.ⁿ⁸ The issue is left to the Treasury and Internal Revenue Service to resolve in regulations.ⁿ⁹

Demonstrating a transaction's potential profitability may not be the only way to prove that a transaction changed the taxpayer's economic position "in a meaningful way." This statement of the objective test leaves room for argument that a transaction with a significant legal or accounting impact on the parties may bring about a meaningful change in economic position, as in *Frank Lyon Co v US*.ⁿ¹⁰ Nor is the result in *Lyon* inconsistent with *IRC Section 7701(o)(4)*, which provides that, for purposes of the subjective test, achieving a financial accounting benefit may not be taken into account as a non-tax purpose for entering a transaction if the origin of the accounting benefit is a reduction in Federal income tax.ⁿ¹¹ The factor in *Lyon* that was thought to give economic substance to the transaction was a diminution in the taxpayer's borrowing capacity as a result of the mortgage liability the taxpayer was required to show on its balance sheet. Not only was this not a "financial accounting benefit" to the taxpayer, the accounting detriment to the taxpayer did not originate with a reduction in the taxpayer's Federal income tax.

Still, taxpayers in pre-codification cases have enjoyed little success relying solely on *Lyon*-type changes in economic position without also showing a reasonable expectation of profit, and the result is unlikely to be different after codification. The only significant pre-codification case in which the taxpayer was able to prevail on a *Lyon*-based argument was the *UPS* decision,ⁿ¹² where the taxpayer restructured an existing business in a way that lowered its tax burden but also involved undertaking and altering enforceable legal relationships with unrelated parties. The decision of the Court of Appeals for the Ninth Circuit was deeply influenced by the fact that the transaction in *UPS* was typical (apart, perhaps, from its sophistication) of the type of garden-variety tax planning in which taxpayers and their advisors engage every day due to the fact that "the Code treats lots of categories of economically similar behavior differently."ⁿ¹³ The Technical Explanation of the provisions of *IRC Section 7701(o)* prepared by the staff of the Joint Committee on Taxation suggests that Congress did not intend to inject the economic substance doctrine into the sphere of such legitimate tax planning.

"The provision [*IRC Section 7701(o)*] is not intended to alter the tax treatment of certain basic business transactions that, under longstanding judicial and administrative practice are respected, merely because the choice between meaningful economic alternatives is largely or entirely based on comparative tax advantages. Among these basic transactions are (1) the choice between capitalizing a business enterprise with debt or equity; (2) a US person's choice between utilizing a foreign corporation or a domestic corporation to make a foreign investment; (3) the choice to enter a transaction or series of

transactions that constitute a corporate organization or reorganization under subchapter C; and (4) the choice to utilize a related-party entity in a transaction, provided that the arm's length standard of section of section 482 and other applicable concepts are satisfied"n14

[6] Penalty for Engaging in Transactions Lacking Economic Substance.

In a dramatic step towards stopping the "raid on the Treasury" by taxpayers who cross the line between tax planning and tax avoidance, Congress imposed a penalty equal to 20 percent of any underpayment of tax that results from engaging in a transaction "lacking economic substance (within the meaning of section 7701(o)) or failing to meet the requirements of any similar rule of law."n1 The penalty increases to 40 percent if the "relevant facts" regarding the transaction are not disclosed in the taxpayer's return or on a statement attached to the return.n2 The penalty also applies to claims for refund to the extent the amount claimed is excessive because it is attributable to one or more transactions lacking economic substance.n3

Once an understatement in income tax has been determined as the result of a finding that a transaction engaged in by the taxpayer lacked economic substance, imposition of the penalty is automatic. Other civil tax penalties imposed in various circumstances by the Internal Revenue Code⁴ ordinarily allow the taxpayer to escape the penalty by showing "reasonable cause" for the taxpayer's position,n5 frequently in the form of a legal opinion or advice from a tax professional supporting that position.n6 However, this defense will not be available to taxpayers subject to the penalty for entering transactions lacking economic substance.n7

FOOTNOTES:

(n1)Footnote 1. It should be kept in mind, however, that the substance over form, step transaction, sham transaction, business purpose, and economic substance doctrines overlap, and that courts sometimes use them interchangeably. See *Rogers v US*, 281 F3d 1108, 1115-1118 (10th Cir 2002) (differences between doctrines "not vast" and described by commentators as "fairly gossamer" and "closely related.") The *Rogers* court concluded that "substance over form" is mainly concerned with properly characterizing transactions for federal tax purposes (for example, whether a sale is really a loan), while the issue in economic substance cases is whether the transaction should be disregarded for tax purposes because its economic effects are either nonexistent or relatively insignificant in relation to the comparatively large tax benefits it is intended to achieve. See also Hariton, Sorting Out the Tangle of Economic Substance, 52 Tax Lawyer 235, 238-239 (1999); Dept of the Treasury, The Problem of Corporate Tax Shelters: Discussion, Analysis and Legislative Proposals, 46-58 (1999).

(n2)Footnote 2. See § 1.02[2].

(n3)Footnote 3. Just as courts may disregard the label placed on a transaction by the parties, they may also disregard the words of the Internal Revenue Code in cases where the literal text would produce a result inconsistent with Congressional intent. See *Coltec Industries, Inc v US*, 454 F3d 1340, 1354 (Fed Cir 2006) , *cert denied* 549 US 1206 (2007) (economic substance doctrine is applicable "where the literal terms of a statute can undermine the ultimate purpose of the statute."). Such cases, which are sometimes referred to as "economic shams" because the transactions, though real, make no sense from an economic standpoint without regard to their tax saving objective, constitute one major branch of the economic substance doctrine. The other major branch centers around "factual shams," in which it is unnecessary for the court to inquire into the purpose of the statutory provision which gives rise to the hoped-for tax benefit because, on close examination, the transaction is not real at all, or not what it is represented to be. See, *eg*, *Southgate Master Fund, LLC v US*, 651 F Supp 2d 596 (ND Tex 2009) , where the court found that a contribution of property to a partnership, and the partnership itself, were factual shams because the partner never relinquished control over the property he supposedly contributed to the partnership and thus never realized the losses he claimed with respect to the partnership.

(n4)Footnote 4. See *Rose v Commr*, 868 F2d 851, 853 (6th Cir 1989) : "This court will not inquire into whether a ... [transaction satisfies the tests for deductibility under *IRC* § 165] until it determines that the transaction is bona fide

and not a sham ... "

Although many transactions disregarded as shams under the economic substance doctrine involve attempts to deduct artificial losses under *IRC* § 165, the doctrine is not limited to that Code provision. See, eg, *Knetsch v US*, 364 US 361 (1960) (interest deduction disallowed under *IRC* § 163 because transaction giving rise to interest payment was a sham). See also § 19.05[a][1].

(n5)Footnote 5. 293 US 465 (1935) .

(n6)Footnote 6. Section 112(i)(1) of the Revenue Act of 1928, c 852, 45 Stat 791, 818. Under Section 112(g) of the 1928 Act, the distribution of Averill stock to the taxpayer was tax-free, rather than a dividend, only if made in pursuance of a plan of "reorganization" as that term was defined in Section 112(i)(1).

(n7)Footnote 7. 27 BTA 223 (1932) .

(n8)Footnote 8. 293 US at 468-469 .

(n9)Footnote 9. 293 US at 469 .

(n10)Footnote 10. *Id.* The Court resolved the question by "putting aside ... the question of motive ... and fixing the character of the proceeding by what actually occurred." 293 US at 469 . As will be seen, the role of taxpayers' motives in the application of the economic substance doctrine has been a matter of some debate. See § 1.02A[1][b] below.

(n11)Footnote 11. *Ibid.* 293 US at 470 . Judge Learned Hand, an eminent jurist, wrote the opinion for the Court of Appeals for the Second Circuit that the Supreme Court affirmed. *Helvering v Gregory*, 69 F2d 809 (2d Cir 1934) . His response to the taxpayer's argument has also been repeated many times since: "[I]t does not follow that Congress meant to cover such a transaction, not even though the facts answer the dictionary definitions of each term used in the statutory definition [The meaning of a sentence may be more than that of the separate words, as a melody is more than the notes, and no degree of particularity can ever obviate recourse to the setting in which all appear, and which all collectively create. The purpose of the section is plain enough; men engaged in enterprises--industrial, commercial, financial, or any other--might wish to consolidate, or divide, to add to, or subtract from, their holdings. Such transactions were not to be considered as "realizing" any profit, because the collective interests still remained in solution. But the underlying presupposition is plain that the readjustment shall be undertaken for reasons germane to the conduct of the venture in hand, not as an ephemeral incident, egregious to its prosecution. To dodge the shareholders' taxes is not one of the transactions contemplated as corporate 'reorganizations.'" 69 F2d at 811 .

(n12)Footnote 12. In his notice of deficiency, the Commissioner determined that the transfer of the Monitor shares from United Mortgage to Averill, the issuance of Averill's shares to the taxpayer and the distribution of the Monitor shares to the taxpayer in the complete liquidation of Averill were all "nullities" and should therefore be disregarded, and that United Mortgage should be deemed to have transferred the Monitor shares directly to the taxpayer as a dividend. The Court of Appeals found that these steps were real and could not be disregarded, but since the transactions did not constitute a "reorganization" within the meaning of the statute, the result, properly analyzed, was that the receipt of the Averill shares by the taxpayer was the taxable event. "The Averill Corporation had a juristic personality, whatever the purpose of its organization; the transfer passed title to the Monitor shares and the taxpayer became a shareholder in the transferee. All these steps were real, and their only defect was that they were not what the statute means by a 'reorganization,' because the transactions were no part of the conduct of the business of either or both companies; so viewed they were a sham, though all the proceedings had their usual effect. But the result is the same whether the tax be calculated as the Commissioner calculated it, or upon the value of the Averill shares as a dividend" 69 F2d at 811. Although, as the Court of Appeals noted, the differences in approach made no difference to the result in *Gregory*, (the Supreme Court's opinion makes no mention of the issue), later cases have found that the collateral tax consequences of a transaction challenged under the economic substance doctrine can be affected depending on whether a step in the

transaction is a complete "sham" or should be disregarded only for purposes of applying a particular statutory provision. See § 1.02A[4], *infra*.

(n13)Footnote 13. 308 US 473 (1940) .

(n14)Footnote 14. 308 US at 476 ("There is not enough of substance in such a sale finally to determine a loss.").

(n15)Footnote 15. However, *Higgins v Smith* has been invoked to disallow a loss under IRC § 165 where an identity of economic interest was demonstrated in the relationship of the parties to the transaction, even though that relationship was not one described in IRC § 267. *Scully v US*, 840 F2d 478 (7th Cir 1988) . See § 2.07[4] for a discussion of the provisions of IRC § 267. See also IRC § 707(b) (disallowing losses claimed in transactions between partnerships and related parties).

(n17)Footnote 17. 308 US at 477 .

(n18)Footnote 18. 435 US 561 (1978) .

(n19)Footnote 19. The facts in *Frank Lyon* are recited in greater detail at § 1.02[2], *supra* .

(n20)Footnote 20. For example, the seller, a bank, was able to build a new headquarters building that bank regulators had not allowed it to self-finance, and the purchaser, the taxpayer, by taking out a loan in its own name with third party lenders had committed its credit to the transaction and was less able to obtain financing for other business needs.

(n21)Footnote 21. 435 US at 583-584 .

(n22)Footnote 22. See *Rice's Toyota World, Inc v Commr*, 752 F2d 89 (4th Cir 1985) , *aff'g* 81 TC 184 (1983) .

(n23)Footnote 23. *Rice's Toyota World, Inc v Commr*, 752 F2d at 91-92 .

(n24)Footnote 24. See *Coltec Industries, Inc v US*, 454 F3d 1340, 1355 (n 14) (Fed Cir 2006) , *cert denied* 549 US 1206 (2007) ("We think that the rule adopted by the Fourth Circuit ... is not consistent with the Supreme Court's pronouncements in cases such as *Frank Lyon*."); *Klamath Strategic Investment Fund v US*, 568 F3d 537, 544 (5th Cir 2009) ("The [Supreme] Court [in *Frank Lyon*] set up a multifactor test for when a transaction must be honored as legitimate for tax purposes, with factors including whether the transaction (1) has economic substance compelled by business or regulatory realities, (2) is imbued with tax-independent considerations, and (3) is not shaped totally by tax-avoidance features. See *Frank Lyon*, 435 US at 583-84 . Importantly, these factors are phrased in the conjunctive, meaning that the absence of any one of them will render the transaction void for tax purposes. Thus, if a transaction lacks economic substance compelled by business or regulatory realities, the transaction must be disregarded even if the taxpayers profess a genuine business purpose without tax-avoidance motivations.")

(n25)Footnote 25. See *Klamath Strategic Investment Fund v US*, 568 F3d at 544 . Other decisions adopting that view include *Dow Chemical Co v US*, 435 F3d 594, 599 (6th Cir 2006) , *cert denied* 549 US 1205 (2007) ("If ... the court determines that the transaction is a sham, the entire transaction is disallowed for federal tax purposes, and the [subjective] inquiry is never made"); *United Parcel Service of America, Inc v Commr*, 254 F3d 1014, 1018 (n 4) (11th Cir 2001) ("*Rice's Toyota World*, unlike [*Kirchman v Commr*, 862 F2d 1486 (11th Cir 1989)] , requires a tax avoidance purpose as well as a lack of substance; *Kirchman* explicitly refuses to examine subjective intent if the transaction lacks economic effects"); and *Coltec Industries, Inc v US*, 454 F3d at 1354 ("a lack of economic substance

1-1 Taxation of Securities Transactions § 1.02A

is sufficient to disqualify the transaction without proof that the taxpayer's sole motive is tax avoidance").

(n26)Footnote 26. *ACM Partnership v Commr*, 157 F3d 231, 247 (3d Cir 1998) , cert denied, 526 US 1017 (1999) . See also *James v Commr*, 899 F2d 905, 908-909 (10th Cir 1990) ("The better approach, in our view, holds that 'the consideration of business purpose and economic substance are simply more precise factors to consider in the [determination of] whether the transaction had any practical economic effects other than the creation of income tax losses,' " quoting *Sochin v Commr*, 843 F2d 351, 354 (9th Cir 1988) , cert denied 488 US 824 (1988) .

(n27)Footnote 27. See the discussion of the subjective test in § 1.02A[2][d] below.

(n28)Footnote 28. *New Phoenix Sunrise Corp v Commr*, 132 TC 161, 175 (2009) , citing *Frank Lyon Co v US*, 435 US at 584 . In accordance with the general rule that the burden of proof is on the taxpayer to show that he does not owe taxes asserted by the Internal Revenue Service, the burden of proving that a transaction disregarded by the Service has economic substance is on the taxpayer. See, eg, *Coltec Industries Inc v US*, 454 F3d at 1355 . In some cases, however, the taxpayer may be able to shift the burden of proof to the Government. See *IRC § 7491*; *Southgate Master Fund, LLC v US*, 651 F Supp 2d 596, 648-651 (ND Tex 2009) .

(n29)Footnote 1. *Southgate Master Fund, LLC v US*, 651 F Supp 2d 596, 655 (ND Tex 2009) .

(n30)Footnote 2. *Gilman v Commr*, 933 F2d 143, 148 (2d Cir 1991) cert denied 502 US 1031 (1992) (Tax Court properly gauged potential profitability from standpoint of a prudent investor); *Friedman v Commr*, 869 F2d 785, 793 (4th Cir 1989) ; *Long-Term Capital Holdings, LP v US*, 330 F Supp 2d 122 (D Conn 2004) , aff'd 150 Fed Appx 40 (2d Cir 2005) .

Some transactions may span several years and involve a future stream of income as well as future cash outlays. In such cases, the court may (and normally should) discount future receipts and expenditures to present value using an appropriate discount rate. See *ACM Partnership v Commr*, 157 F3d at 259-260 .

(n31)Footnote 3. In other words, the economic substance doctrine may be applied to disregard superficially "real" transactions, capable of producing economic profit, when they are employed as part of a scheme or strategy that minimizes or eliminates their profit potential in order to produce tax benefits. Such was the case in *Sheldon v Commr*, 94 TC 738 (1990) where partnerships employed T-bill repurchase agreements ("repos") to implement a strategy that minimized or eliminated the profit potential of the repos in order to reliably create interest deductions that deferred income tax on partners' income until an offsetting amount of revenue was realized in the following year. The Tax Court rejected the Government's argument that the repos themselves were "sham" transactions, see 94 TC at 753-758 , but found that the repos nevertheless lacked economic substance as employed by the partnerships. "The transactions were intentionally and cleverly structured to be and are real, but are without substance within the meaning of established case precedent. The transactions occurred at yearend to create deferral for tax purposes irrespective of whether they resulted in gain or loss, which, as structured, were destined to be de minimis in amount." *Sheldon v Commr*, 94 TC at 769 (footnote omitted).

(n32)Footnote 4. See, eg, *Torres v Commr*, 88 TC 702 (1987) .

(n33)Footnote 5. *James v Commr*, 899 F2d at 911-912 . See also *Rice's Toyota World, Inc v Commr*, where, on similar facts, the court held that the purchase of a computer pursuant to a sale and leaseback arrangement was a sham because the taxpayer's conduct consistently demonstrated indifference to the economic (as opposed to tax) consequences of the transaction. Although there was a theoretically possible profit if the taxpayer saw the transaction through to completion, since the taxpayer "paid so obviously inflated a purchase price for the computer and financed the purchase mainly with nonrecourse debt, it was properly inferable by the tax court that [the taxpayer] intended to abandon the transaction down the road by walking away from the nonrecourse note balance before the transaction ran its stated course... . The inference is amply supportable that this intended course of conduct explains ... [the taxpayer's]

apparent lack of concern with residual value or profitability of the transaction apart from tax benefits." 752 F2d at 93 .

The courts' analyses in both these cases seems clearly to conflate objective and subjective factors. Although *Rice's Toyota World's* analysis was performed under the subjective or "business purpose" prong of the Fourth Circuit's two-part test, the court also imported that analysis into the objective test, in which it relied upon the critical inference that potential profit that might have been achieved if the transaction were seen through to its conclusion was illusory because the taxpayer intended to walk away from the transaction well before that time. *Rice's Toyota World, Inc v Commr*, 752 F2d at 95 . The Tax Court's decision in *James* was also made under the *Rice's Toyota World* two-pronged test, 87 TC 905 (1986) , but the Court of Appeals for the Tenth Circuit, in affirming the Tax Court, stated that "the better approach" is to consider both subjective and objective considerations as factors in a single overall analysis of whether a transaction has economic substance. *James v Commr*, 899 F2d at 908-909; note 26, *supra*.

(n34)Footnote 6. 435 F3d 594 (6th Cir 2006) , cert denied 549 US 1205 (2007) .

(n35)Footnote 7. 435 F3d at 602 .

(n36)Footnote 8. See *Klamath Strategic Investment Fund v US*, 568 F3d at 545 ; *Coltec Industries, Inc v US*, 454 F3d at 1356-1357 ; *ACM Partnership v Commr*, 157 F3d at 260 ; *James v Commr*, 899 F2d at 910 (transactions lacking economic substance "cannot be legitimized merely because they were on the periphery of some legitimate transactions"); *Southgate Master Fund, LLC v US*, 651 F Supp 2d 596.

(n37)Footnote 9. *ACM Partnership v Commr*, 157 F3d at 258 . See also *Sheldon v Commr*, 94 TC 738, 768 (1990) ("The potential for "gain," ... is infinitesimally nominal and vastly insignificant when considered in comparison with the claimed deductions.") Profits produced inadvertently, contrary to the parties' expectations, are likewise disregarded. See *Internal Revenue Service v CM Holdings, Inc*, 301 F3d 96 (3d Cir 2002) . In *CM Holdings*, the parties to a corporate-owned life insurance policy crafted its terms with the intent that the taxpayer would experience neither mortality gains nor losses. The fact that the taxpayer nevertheless experienced mortality gains was not viewed as evidence of profit potential in the transaction, particularly when the insurer immediately amended the terms of the policy to enable it to recoup those gains (mortality losses to the insurer) and ensure that they would not recur in the future. 301 F3d at 104-105 .

(n38)Footnote 10. See *Sheldon v Commr*, 94 TC at 738 : "Clearly, ... [the promoters' and taxpayer's] expertise permitted them to structure these deals using real transactions (with one exception). The fact that they permitted open positions for limited periods of time was obviously not for the objective of gain, but to formulate the appearance of potential for gain or loss. If the transactions had been fully offset, straddled, or hedged to obviate the possibility of any loss or gain, the form of the transaction could have been more readily attacked by ... [the Internal Revenue Service]." See also *Schering-Plough Corp v US*, 2009 US Dist LEXIS 77467 at *129-130 where the taxpayer assumed interest rate risk it could easily have avoided on the advice of its tax counsel to bolster its defense against an economic substance attack on the transaction. "Any interest rate risk exposure ... was purposely inflicted and does not create objective economic effects."

(n39)Footnote 11. 253 F3d 350 (8th Cir 2001) (hereafter, *IES Industries*).

(n40)Footnote 12. 277 F3d 778 (5th Cir 2001) (hereafter *Compaq*), reversing 113 TC 214 (1999) (hereafter, *Compaq-Tax Court*).

(n41)Footnote 13. According to the Tax Court, the taxpayer took steps to "eliminate all economic risks and influences from outside market forces on the purchases and sales in the ADR transaction." *Compaq-Tax Court*, 113 TC 214, 219 (1999) (ultimate findings of fact). The Court of Appeals, reversing the Tax Court, said that "Although, as the Tax Court found, the parties attempted to minimize the risks incident to the transaction, those risks did exist and were not by any means insignificant." *Compaq*, 277 F3d at 787 .

(n42)Footnote 14. See *Compaq*, 277 F3d at 783 ; *IES Industries*, 253 F3d at 354 .

(n43)Footnote 15. See *IRC § 901(k)*. To deal with the ADR strategy, Congress amended *section 901 of the Internal Revenue Code* to provide, on a prospective basis, that a foreign tax credit will not be allowed with respect to taxes withheld at the source from foreign dividends unless the taxpayer has held the stock (or ADR) on which the dividends were paid for at least 16 days of a prescribed 30-day period, including the dividend record date.

(n44)Footnote 16. See *Compaq-Tax Court*, 113 TC at 225-226 ("A transaction does not avoid economic substance scrutiny because the transaction predates a statute targeting the specific abuse."); *Compaq*, 277 F3d at 788 ; *IES Industries*, 253 F3d at 356 (n 5) . When Congress enacts remedial legislation with prospective effect, it is not uncommon for committee reports or other legislative history to include language to the effect that no inference is intended as to the proper tax treatment of similar transactions under the pre-existing law. Such language was included in the committee reports explaining the provisions of *IRC § 901(k)*. See S. Rept. 105-33, 175, 177 (1997), quoted in *Compaq-Tax Court*, 113 TC at 225 .

(n45)Footnote 17. See *Knetsch v Commr*, 364 US 361, 367 (1960) ; *Winn-Dixie v Commr*, 254 F3d 1313, 1316 (11th Cir. 2001) ; *IRS v CM Holdings, Inc*, 301 F3d at 106 ; *Southgate Master Fund, LLC v US*, 651 F Supp 2d 596, 652-653 (ND Tex 2009) ; *Sheldon v Commr*, 94 TC at 766 .

(n46)Footnote 18. Potential profitability, though often critically important, may be insufficient to establish that a transaction has economic substance if the court concludes that the taxpayer could have made the same profit in a less risky transaction, especially when the taxpayer's willingness to use a riskier structure is explicable only by an overriding goal to save taxes. See *ACM Partnership v Commr*, 157 F3d at 258 (n 2) ; *Schering-Plough Corp v US*, 2009 US Dist LEXIS at 149 .

(n47)Footnote 19. See *ACM Partnership v Commr*, 157 F3d at 248 (n 31) . However, a change in net economic position does not include a change which results from and assumes the legitimacy of the tax-saving transaction under examination. In *Schering-Plough Corp v US*, the court dismissed as "circular" reasoning the taxpayer's contention that its receipt of \$728 million dollars from the repatriation of earnings of its foreign subsidiary constituted a significant change in its economic position when the transaction which made it possible for the taxpayer to receive those earnings "tax-free" was the same transaction whose economic substance was being questioned. "[The taxpayer] would have the Court believe that the very tax-sheltered money it repatriated can itself provide the objective economic effect it seeks to prove. The repatriated funds in themselves do not constitute an appreciable economic effect any more than shifting money from one pocket to another ... " *Schering-Plough Corp v US*, 2009 US Dist LEXIS at *129 .

(n48)Footnote 20. *Frank Lyon Co v US*, 435 US at 582-583 . The Supreme Court also attached significance to the transaction because of its impact on parties other than the taxpayer. The seller-lessee in the sale and leaseback transaction, a bank, was able to build a new headquarters building that would have been blocked by regulatory and financial problems had the transaction been structured differently. This led the Third Circuit to surmise, in *IRS v CM Holdings, Inc*, 301 F3d at 107 (n 8), that a transaction might have economic substance under *Frank Lyon*, or at least be "more palatable to the IRS," if the other party to the transaction was required to pay tax on income as a result of the deduction of an expense by the taxpayer. In the case before it, where the taxpayer claimed interest deductions on policy loans used to finance premiums on a corporate-owned life insurance contract, the insurer on the other side of the transaction was required to take the interest into income but paid minimal tax because the interest was offset it with additions to reserves under the policy. The minimal tax consequences to the insurer were deemed insufficient to give economic substance to the policy.

(n49)Footnote 21. 254 F3d 1014, 1018 (11th Cir 2001) .

(n50)Footnote 22. *Id.* The fact that the parties in *Frank Lyon* were unrelated has been used to distinguish that case from transactions between related parties. See *Coltec Industries, Inc v US*, 454 F3d at 1357 (*Frank Lyon*, which

involved a "genuine multiple-party transaction" itself distinguished more "familial" arrangements; indeed, "arrangements with subsidiaries that do not affect the economic interest of independent third parties deserve particularly close scrutiny." See also *Schering-Plough Corp v US*, 2009 US Dist LEXIS 77467 at *108 .

(n51)Footnote 23. See *Jade Trading, LLC v US*, 80 Fed Cl 11, 14 (2007) , *aff'd* on economic substance issue, *rev'd and vacated on other grounds*, 598 F3d 1372 (Fed Cir 2010) ("A final indicium of the lack of economic substance here, while not dispositive in and of itself, is the highly disproportionate tax advantage to the underlying monetary outlay--the tax loss ... \$14.9 million, was roughly 65 times greater than [the] \$225,002 financial commitment ... " See also *New Phoenix Sunrise Corp v Commr*, 132 TC 161, 182 ("We note at the outset that ... [none of the participants in the transaction] suffered a \$10 million economic loss during 2001. The loss claimed ... was purely fictional."). *Kornman & Assoc Inc v US*, 527 F3d 443 (5th Cir 2008) involved a transaction similar to the transactions in *Jade Trading* and *New Phoenix Sunrise*; a \$102.6 million loss was claimed on the taxpayer's tax return although it suffered an economic loss of only \$200,000. The court did not apply the economic substance doctrine in that case, however, choosing instead disallow the loss by accepting the Government's interpretation of a statutory provision "in a manner that prevents a taxpayer from deducting non-economic losses." *Id* at 456 (n 11).

(n52)Footnote 24. 515 F3d 749, 751 (7th Cir 2008) .

(n53)Footnote 25. *ACM Partnership v Commr*, 157 F3d at 250 . On the other hand, a long-term arrangement cannot "sanctify a transaction that lacks economic substance." *Internal Revenue Service v CM Holdings, Inc*, 301 F3d at 104 .

(n54)Footnote 26. *Internal Revenue Service v CM Holdings, Inc*, 301 F3d at 108 .

(n63)Footnote 7. See discussion in § 1.02A[2], *supra*.

(n64)Footnote 8. See *IES Industries, Inc v US*, 253 F3d at 356 ("The fact that IES took advantage of duly enacted tax laws in conducting the ADR trades does not convert the transactions into shams for tax purposes.")

(n65)Footnote 9. *Compaq Computer Corp and Subsidiaries v Commr*, 277 F3d at 787 (n 8) .

(n66)Footnote 10. 499 US 554 (1991) . *Cottage Savings* is discussed at § 1.02[3][a][i], *supra*.

(n67)Footnote 11. See *ACM Partnership v Commr*, 157 F3d at 254 (n 44) .

(n68)Footnote 12. *499 US at 568* . The fact that actual economic losses had been sustained with respect to the portfolios exchanged in *Cottage Savings* of course distinguishes that case from transactions found to lack economic substance under the objective test. See, eg, *ACM Partnership v Commr*, *157 F3d at 251-252* : "[T]he disposition in *Cottage Savings* precipitated the realization of actual economic losses arising from a long-term, economically significant investment, while the disposition in this case was without economic effect as it merely terminated a fleeting and economically inconsequential investment, effectively returning ... [the taxpayer] to the same economic position it had occupied before the ... acquisition [of its investment] 24 days earlier."

(n69)Footnote 13. *Hines v US*, *912 F2d 736, 740 (4th Cir 1990)* ; *Black & Decker Corp*, *436 F3d 431,443 (4th Cir 2006)* . "[W]hile it is important to examine both the subjective motivations of the taxpayer and the objective reasonableness of the investment, in both instances our inquiry is directed to the same question: whether the transaction contained economic substance aside from the tax consequences." *Hines v US*, *912 F2d at 739* ; *Black & Decker Corp v US*, *436 F3d at 441* .

(n70)Footnote 14. *Coltec Industries, Inc v US*, *454 F3d 1340, 1356 (Fed Cir 2006)*, *cert denied*, *549 US 1206 (2007)*.

(n71)Footnote 15. See n 55, *supra*.

(n72)Footnote 16. See, eg, *Rice's Toyota World v Commr*, *752 F2d at 92* (taxpayer did not "seriously evaluate" whether computer purchased in sale and leaseback transaction would have sufficient residual value to allow taxpayer to make a profit on the transaction; its principal officer "knew virtually nothing" about computers and failed to obtain an objective expert appraisal); *ACM Partnership v Commr*, *157 F3d at 257* ("ACM's lack of regard for the relative costs and benefits of the contemplated transaction and its failure to conduct a contemporaneous profitability analysis support the Tax Court's conclusion that ACM's transactions were not designed or reasonably anticipated to yield a pre-tax profit ..."); *Pasternak v Commr*, *990 F2d 893, 903 (6th Cir 1993)* (taxpayers' "complete indifference to the risks involved" demonstrated by fact that they "invested in [recordings] of artists they had never heard of, without listening to the master recordings prior to investing, and without even inquiring whether a reliable independent evaluation of profit potential had ever been made."). But see *Southgate Master Fund, LLC v US*, *651 F Supp 2d 596, 655 (ND Tex 2009)* , where the District Court found that the taxpayer's relatively brief due diligence did not support an inference of indifference to profitability since the properties involved, distressed loans, were worth only pennies on the dollar. A more thorough but costly investigation would have eliminated much of its profit potential, and was in any case impractical given that this was a "relatively time-sensitive" transaction.

(n73)Footnote 17. See *ACM Partnership v Commr*, *157 F3d at 254-256* .; *James v Commr*, *899 F2d at 910-1 911* (taxpayers "did not exercise the care that would be expected from owners of multimillion dollar computer systems"); *Rice's Toyota World v Commr*.

(n74)Footnote 18. See *ACM Partnership v Commr*, *157 F3d at 258*, n 52 (court may consider, in its analysis of whether there was a profit motive behind the taxpayer's transactions, that the transaction under examination "involved substantial transaction costs, entailed significant risks ... , and compared unfavorably to the higher profitability and lower risk of ... cash deposit accounts which [the taxpayer] affirmatively relinquished [in order] to pursue ... [its tax avoidance] strategy."); *Schering-Plough Corp v US*, *2009 US Dist LEXIS 77467*, at *132 (taxpayer's willingness to spend \$35 million on advisory fees and transaction costs to accomplish transaction with little or no profit potential is "persuasive" of tax avoidance motivation.)

(n75)Footnote 19. *Coltec Industries, Inc v US* , is illustrative. In that case, Garlock, a member of an affiliated group of corporations headed by Coltec, contributed a \$375 million note to Garrison, another member of the group, plus all the stock of its subsidiary, Anchor, in exchange for Garrison's assumption of Garlock's contingent asbestos liabilities, expected ultimately to require the expenditure of \$375 million, plus shares of Garrison's stock. Garrison also agreed to manage the asbestos liabilities of both Garlock and Anchor, although it did not assume Anchor's contingent asbestos

liabilities. Garlock immediately made a pre-arranged sale of the Garrison stock it acquired in this transaction to third parties outside the group for \$500 thousand, claiming a basis in the Garrison stock of \$375 million (taking into account its basis in the \$375 million note transferred to Garrison but not the \$375 million of contingent liabilities assumed by Garrison in the transaction) and a capital loss of \$374.5 million. When the Internal Revenue Service challenged the economic substance of the note for asbestos liabilities plus stock transaction, the parent company of the group, Coltec, argued that the transaction had two business purposes: first, it made Coltec a more attractive acquisition target because concentrating management of the asbestos liabilities in a single corporation showed prospective investors it was taking positive steps to manage its asbestos problem; and second, inserting Garrison into the picture protected Coltec from the possibility that asbestos claimants could "pierce the corporate veil" and hold Coltec responsible for Garlock's and Anchor's liabilities.

The court of appeals rejected the first purpose because it focused on the wrong transaction: it was not Garrison's assumption of managerial responsibility for Garlock and Anchor's asbestos liabilities that was in issue, but Garrison's assumption of Garlock's liabilities. It was not essential that Garrison assume Garlock's asbestos liabilities in order to manage them, as was demonstrated by the fact that Garrison managed, but did not assume, Anchor's asbestos liabilities. The Court dismissed the second asserted purpose because it was simply untrue that inserting Garrison into the picture and having it assume Garlock's liabilities decreased the risk of a claimant's piercing Garlock's or Anchor's corporate veil. As a matter of law, Garrison's assumption of Garlock's liabilities affected only relations between members of the affiliated group, not the rights of third party claimants against them. Although Coltec and Garlock executives testified that they believed Garrison's assumption gave them an advantage in dealing with insurance carriers and claimants, their subjective views could not outweigh the reality that the transaction did not affect the rights of third parties outside the group. "[E]conomic substance is measured from an objective, reasonable viewpoint, not by the subjective views of taxpayer's corporate officers." 454 F3d at 1359 .

A third asserted business purpose of the transaction, involving the subsequent sale of Garrison stock to Coltec's outside legal counsel to incentivize their performance in asbestos-related litigation, was disregarded because it was too distant in time from and would not have played any role in the taxpayer's decision to undertake the transaction. Cf *ACM Partnership v Commr*, 57 F3d at 257 (n 31) (taxpayer's expert's report on the potential profitability of a transaction, prepared in the context of litigation with the IRS and which "had not entered into [the taxpayer's] calculations at the outset" of the transaction, may be disregarded by the court, quoting *Goldstein v Commr*, 364 F2d 734, 740 (2d Cir 1966)) .

In *Coltec Industries, Inc v US*, *454 F3d 1340, 1360 (Fed Cir 2006)*, cert denied *549 US 1206 (2007)*, the court of appeals for the Federal Circuit remanded to the Court of Federal Claims to determine whether a genuine economic loss had been incurred as a part of a transaction otherwise lacking in economic substance. The taxpayer had contributed a \$375 million note and offsetting contingent liabilities of equal value, plus other consideration including tangible assets worth approximately \$4 million, in exchange for stock in an affiliated corporation, which it immediately sold to third parties for \$500,000. Although the taxpayer claimed a basis in the stock sold of \$379 million (including its basis in the note but excluding any reduction in basis for the liabilities assumed by the issuing corporation), the court of appeals reduced its basis to \$4 million after disregarding as a sham the contribution of the note and offsetting liabilities. The court remanded the case to the Court of Federal Claims to determine whether the taxpayer was entitled to claim a capital loss equal to the difference between the amount it received for the stock, \$500,000, and the basis of the stock sold as recalculated to eliminate the effect of the sham transaction.

(n87)Footnote 12. *568 F3d 537 (5th Cir 2009)*.

(n88)Footnote 13. *Klamath Strategic Investment Fund v US*, *568 F3d at 550* (quoting from the Tax Court's opinion in *Winn-Dixie Stores, Inc v Commr*, *113 TC 254, 279 (1999)*, *aff'd 254 F3d 1313 (11th Cir 2001)*). See also *Lee v Commr*, *155 F3d 584, 587 (2d Cir 1998)*, where the court of appeals for the Second Circuit rejected, on similar grounds, the taxpayer's attempt to obtain an interest deduction on a genuine recourse loan incurred as part of a transaction lacking economic substance: "To adopt ... [taxpayer's position] would be to permit every shelter, no matter how transparently sham, to qualify for an interest expense deduction as long as the money used to finance the not-for-profit transactions involved were borrowed from a lender--any commercial bank would do--that demanded repayment."

(n89)Footnote 14. *Winn-Dixie Stores, Inc v Commr*, *113 TC at 294*, quoted in *Klamath Strategic Investment Fund v US*, *568 F3d at 549*. See also *New Phoenix Sunrise Corp and Subs v Commr*, *132 TC 161 (2009)* for a more recent application of this principle by the Tax Court.

(n90)Footnote 1. *IRC § 7701(o)* was added by § 1409 of the Health Care and Education Affordability Reconciliation Act of 2010 (Pub L No 111-152) (hereafter, the "Reconciliation Act of 2010.") Its provisions are effective with respect to transactions entered into after the date of enactment, March 30, 2010.

(n91)Footnote 2. *IRC § 7701(o)(5)(A)* defines the term "economic substance doctrine" as "the common law doctrine under which tax benefits under subtitle A [containing the income tax provisions of the Internal Revenue Code] with respect to a transaction are not allowable if the transaction does not have economic substance or lacks a business purpose." *IRC § 7701(o)(5)(C)* goes on to provide that "the determination of whether the economic substance doctrine is relevant to a transaction shall be made in the same manner as if this subsection had never been enacted."

(n92)Footnote 3. *Rice's Toyota World, Inc v Commr*, *752 F2d 89 (4th Cir 1985)*, *aff'g 81 TC 184 (1983)*.

(n93)Footnote 4. The term "transaction" can include a series of transactions. *IRC § 7701(o)(5)(D)*.

(n94)Footnote 6. *IRC § 7701(o)(1)(B)*.

(n95)Footnote 7. *IRC § 7701(o)(2)(A)*. Despite the statute's initial statement of the economic substance doctrine as a "two part inquiry" per *Rice's Toyota World*, the test of *IRC § 7701(o)(2)(A)* reflects the approach taken by more recent decisions under pre-codification law that the subjective and objective tests are not "discrete prongs ... but rather ... related factors both of which inform the analysis" See, eg, *ACM Partnership v Commr*, *157 F3d 231, 247, cert*

denied, 526 US 1017 (1999). See also § 1.02A[1][b], fn 26, *supra*, and accompanying text.

(n96)Footnote 8. See *Compaq Computer Corp and Subsidiaries v Commr*, 277 F3d 778 (5th Cir 2001) ; *IES Industries, Inc v US*, 253 F3d 350 (8th Cir 2001) . The issue in those cases was put somewhat differently: whether the taxpayer could include in anticipated pre-tax profit the portion of foreign dividends withheld to pay foreign income taxes imposed on the dividend income. See § 1.02A[2], *supra*.

(n97)Footnote 9. Since the statute directs the issuance of regulations ("the Secretary shall issue regulations") that require foreign taxes to be treated as expenses for purposes of calculating pre-tax profit "in appropriate cases," it is difficult to understand how the Joint Committee can conclude that "there is no intention to restrict the ability of the courts to consider the appropriate treatment of foreign taxes in particular cases, as under present law," Technical Explanation, p. 155 (n 357); that seems precisely what the statute is intended to do, once Treasury exercises its authority by issuing the contemplated regulations.

(n98)Footnote 10. 435 US 561 (1978) . The taxpayer did demonstrate potential if minimal profitability in *Lyon*. However, the sales/leaseback transaction between the seller/lessee bank and the purchaser/lessor taxpayer was respected in part because the off-balance sheet financing technique enabled the bank to finance the construction of a headquarters building that would not otherwise have received required governmental approvals, while the taxpayer, which was required to show the mortgage financing as a liability on its balance sheet, was restricted in its ability to obtain credit for other business needs. Pre-codification economic substance cases have observed that the parties in *Lyon* were unrelated, and have refused to accord the same significance to alleged changes in economic position resulting from transactions between related parties. *Coltec Industries, Inc v US*, 454 F3d 1340, 1357 (Fed Cir 2006), *cert denied*, 549 US 1206 (2007); *Schering-Plough Corp v US*, 2009 US Dist LEXIS 77467 at *108 (DNJ 2009) . See § 1.02A[a][2], fn 50.

(n99)Footnote 11. IRC § 7704(o)(4) is consistent with pre-codification cases such as *Wells Fargo & Co and Subsidiaries v US*, 91 Fed Cl 35, 84 (2010) and *Am Elec Power, Inc v US*, 136 F Supp 2d 762, 791-792 (SD Ohio 2001) . Taxpayers have generally been unsuccessful in their attempts to bootstrap their way to a showing of potential profitability or business purpose by relying on the very tax savings their right to which has been challenged under the economic substance doctrine. "If a legitimate business purpose for the use of the tax savings 'were sufficient to breathe substance into a transaction whose only purpose is to reduce taxes, [then] every sham tax-shelter device might succeed.' " *Am Elec Power, Inc v US*, 136 F Supp 2d at 791-792 , quoting *Winn-Dixie Stores, Inc v Commr*, 113 TC 254, 287 (1999) , *aff'd* 254 F3d 1313 (11th Cir 2001) .

(n100)Footnote 12. *United Parcel Service of America, Inc v Commr*, 254 F3d 1014, 1018 (11th Cir 2001) , discussed in § 1.02A[2], *supra*.

(n101)Footnote 13. *United Parcel Service of America, Inc v Commr*, 254 F3d 1014, 1019 (11th Cir 2001) .

(n102)Footnote 14. Joint Committee on Taxation, *Technical Explanation of the Revenue Provisions of the "Reconciliation Act of 2010," as amended, in combination with the "Patient Protection and Affordable Care Act"* (JCX-18-10), March 21, 2010, (hereafter, "Technical Explanation") pp 152-153. The Technical Explanation was released shortly before final passage of the legislation adding IRC § 7701(o) to the Code, giving it some claim to authority as part of the provision's legislative history. Cf *Alfaro v Commr*, 349 F3d 225, 230 (5th Cir 2003) . The courts usually treat Joint Committee explanations deferentially, even when, as in the case of the Joint Committee's so-called "Blue Books," they are not part of the legislative history because they are published as guides to major tax legislation after the legislation has been enacted. *Alfaro v Commr*, 349 F3d 225, 230 , fns 18-19 (5th Cir 2003).

(n103)Footnote 1. IRC § 6662(b)(6). "Similar rules of law" which overlap the economic substance doctrine and may also trigger the IRC § 6662(b)(6) penalty, include the substance over form, step transaction, sham transaction, and business purpose doctrines. See IRC § 1.02A[1], fn 1. The differences between these doctrines have been described as "not vast" and "fairly gossamer." See *Rogers v US*, 281 F3d 1108, 1115-1118 (10th Cir 2002) .

(n104)Footnote 2. See *IRC § 6662(i)*. Disclosure in an amended return will avoid the 40 percent penalty provided the amended return is filed before the taxpayer is notified by the Internal Revenue Service that his return for the year in which the transaction occurred is being audited, or such other date as may be specified by regulation.

(n105)Footnote 3. *IRC § 6676(c)*.

(n106)Footnote 4. In addition to the economic substance penalty, *IRC § 6662* imposes penalties on underpayments of tax attributable to (1) negligence or disregard of rules or regulations, (2) a substantial understatement of income tax, (3) a substantial valuation misstatement, (4) a substantial overstatement of pension liabilities, (5) a substantial estate or gift tax valuation understatement, and (6) an undisclosed foreign financial asset understatement. Additionally, *IRC § 6662A* imposes penalties on reportable transaction understatements; in general, understatements of tax resulting from transactions specifically required by Treasury regulations to be disclosed because of their potential for tax avoidance or evasion, as well as transactions substantially similar to those specifically required to be disclosed (see *IRC § 6707A*). Finally, *IRC § 6663* imposes a civil tax penalty for underpayments due to fraud.

(n107)Footnote 5. See *IRC §§ 6664(c)* and *(d)*. The reasonable cause exception is qualified considerably, however, and may be inapplicable entirely, in certain cases involving penalties on reportable transaction understatements under *IRC § 6662A* (in general, understatements due to transactions which have been determined by the Treasury as having a potential for tax avoidance or evasion).

(n108)Footnote 6. See *US v Boyle, 469 US 241, 251 (1985)*.

(n109)Footnote 7. *IRC § 6664(c)(2)*.

CHAPTER 1 Gains and Losses From the Disposition of Property

1-1 Taxation of Securities Transactions § 1.03

§ 1.03 The Elements of Gain or Loss--The Amount Realized

[1] General Rule.

Once it is concluded that a transaction results in the realization of gain or loss, it becomes necessary to determine the amount of that gain or loss. The statutory formula for computing gain is expressed in terms of the excess of the amount realized over the adjusted basis. For loss, it is the excess of basis over amount realized.ⁿ¹

The first term of the formula, amount realized, is defined as "the sum of money received plus the fair market value of the property (other than money) received."ⁿ² While the statutory definition appears to require an amount realized equal to the gross receipts of the sale without any reduction whatsoever, it is clear that expenses, such as brokerage commissions incurred in connection with the sale, are to be deducted from the gross proceeds to arrive at the amount realized.ⁿ³

In determining the amount realized, it is important to distinguish between payments on account of the purchase price and those which, although made contemporaneously, represent something other than the consideration for the transfer.ⁿ⁴ A second concern, present when the receipt consists of property other than cash, is the correct date for ascertaining the fair market value of such property. Generally, one simply looks at the value at the closing date, for that is the time when both physical possession and legal title are transferred. However there are instances when one must depart from this general rule. For example, in *Herbert J. Inv. Co. v. United States*,ⁿ⁵ the proper valuation date was held to be the date on which the purchaser took control of the assets and assumed all of the risks and benefits of the business. The delay in final closing was caused by the need for regulatory agency approval, a condition which the court viewed as a mere formality.ⁿ⁶

[2] Special Situations.

The normal sale provides no obstacle in determining the amount realized on the transaction. The total consideration is paid in cash at the time of the sale, the expenses of sale are known, and computing the amount realized becomes a mere arithmetic exercise. But when the disposition assumes a form different from the normal sale, the determination is not quite as simple.

[a] Inability to Value the Amount Realized. What is the amount realized in the year of disposition when a taxpayer sells property in exchange for the purchaser's promise to make payments over a period of years, the total

amount of payments being dependent on contingencies whose final resolution must await some future date? The first case to consider the problem was *Burnet v. Logan*,ⁿ¹ in which the consideration received by the taxpayer consisted of cash plus a share of a per-ton royalty for iron ore to be obtained in the future by the purchaser of the stock. The contingency related to the royalty payments, since the amount of ore which the purchaser was entitled to receive was not fixed, nor were there any minimum or maximum limits within which production had to fall. The Commissioner ruled that the purchaser's royalty-payment obligation had an ascertainable fair market value on the date of sale. The taxpayer claimed it did not and, for this reason, she should not be required to include any amount in gross income until she had recovered an amount equal to her basis for the stock. The Supreme Court held that since the promise of future payments could not be foretold with fair certainty, the promise had no ascertainable fair market value, and the amount realized in the year of disposition could not be computed. Therefore, no amount would be includable in gross income in the year of sale or any subsequent year until the taxpayer had received a complete return of capital, i.e., recovered her basis in the stock.

The Service has not wavered from the position asserted by the Commissioner in *Logan*. It maintains that "fair market value of property is a question of fact, but only in rare and extraordinary cases will property be considered to have no fair market value."ⁿ² Although the Commissioner continues to press his contention that the *Burnet v. Logan* doctrine should be limited to rare situations, courts have been loath to sustain his claim of ascertainable value when the contingencies affecting payment are such that any estimate of value must rest on surmise and speculation.ⁿ³

What are the consequences of a finding that a transaction is "open" (the value of the contingent payment contract cannot be ascertained) rather than "closed"? If the transaction is held to be "open," the taxpayer will first treat payments received as a return of capital, and apply the same against his basis in the property sold until that basis has been completely recovered.ⁿ⁴ Any additional payments will constitute realized gain in the year such payments are received. Two major benefits accrue from a finding that a transaction is "open." First, gain is reportable in the year payments are received and not in the year of sale, a year in which the funds necessary for the payment of tax may not be available. Second, if the property sold was a capital asset in the hands of the taxpayer, all of the reportable gain will be capital gain.ⁿ⁵

If the transaction is deemed "closed" in the year of sale, the taxpayer will realize gain or loss, as the case may be, in that year. The taxpayer will not realize any additional income until he has recovered an amount equal to the value placed upon the right to receive the contingent payments. Any excess payments will produce ordinary income, and not capital gain, even if the original sale involved a capital asset, since the additional gain does not result from a sale or exchange, a requisite for capital gains treatment.ⁿ⁶ If the estimate was too high so that total receipts are less than the originally ascribed value, a loss is realized in the last year that payments are received. However, no judicial decision or administrative ruling has ever considered whether the loss is an ordinary loss (because of the lack of the requisite sale or exchange), or a capital loss (on the theory that the loss relates back to the original sale).ⁿ⁷

The Installment Sales Revision Act of 1980 expanded the category of deferred payment sales which can be reported under the installment method to include sales for a contingent price. Because of this, in the opinion of Congress:

"[I]n the future there should be little incentive to devise convoluted forms of deferred payment obligations to attempt to obtain deferred reporting. In any event, the effect of the new rules is to reduce substantially the justification for treating transactions as 'open' and permitting the use of the cost-recovery method sanctioned by *Burnet v. Logan*, 283 U.S. 404 (1931)."ⁿ⁸

If the entire consideration due the transferor is received in the year of disposition, but the amount realized is still incapable of being valued, *Burnet v. Logan* does not apply. Instead the transferor is presumed to realize an amount equal to the value of the property transferred.ⁿ⁹ This rule is grounded on the assumption that persons dealing at arm's length will bargain for and receive equivalent value in an exchange.

[b] Disposition of Property Subject to Liabilities. If a taxpayer sells property encumbered by a mortgage or other liability, and the buyer expressly assumes the liability or takes the property subject to it, the amount of such liability is included in the amount realized.ⁿ¹⁰ This result obtains in the instance where the liability is attached to the property when originally purchased by the seller, as well as where the encumbrance results from a subsequent borrowing by the seller.ⁿ¹¹

[c] Disposition of Property in Satisfaction of an Obligation. The borrowing of money does not result in the realization of gain since the concomitant obligation to repay acts as a complete offset to the "amount realized." Repayment of the principal amount of the debt will likewise produce no income unless the borrower chooses to satisfy his obligation not with a cash payment, but by transferring property to the lender. In such event, gain will be realized to the extent that the amount realized exceeds the taxpayer's basis in the property.ⁿ¹²

If the value of the property transferred is equal to the obligation to be satisfied, it matters not whether the value of property or the amount of the obligation determines the amount realized, since the result must be the same in both instances. Say, however, that a taxpayer transfers property having a basis of \$50,000, and a value of \$75,000, in complete satisfaction of a debt of \$100,000. If the determinant of amount realized is the value of the property, the gain is \$25,000. If the amount of the debt controls, it is \$50,000. The latter result is more logical, for the transaction can now be viewed as a sale with the consideration received being the original loan proceeds. This is the result the courts always reached when the taxpayer was personally liable on the debt,ⁿ¹³ whether the transfer was of property which secured the debt or of property which did not, and whether the disposition was voluntary or involuntary.ⁿ¹⁴ However, while the Service pressed for an identical result when the debt was nonrecourse,ⁿ¹⁵ the courts were not in agreement until the Supreme Court resolved the issue in favor of the government's position.ⁿ¹⁶

In *Aizawa v Commr*,ⁿ¹⁷ property secured by recourse indebtedness was sold at foreclosure for a price less than the amount of the debt, leaving a deficiency judgment against the debtor. The Government argued that, after *Tufts*, the "amount realized" on a transfer of encumbered property is always, at a minimum, the amount of the mortgage indebtedness to which it is subject. The Tax Court, rejecting the Government's argument, held that the "amount realized" by the taxpayers was the foreclosure sales price, which the Court assumed in the absence of evidence to the contrary was equivalent to the property's fair market value. *Tufts* is inapplicable to a transfer of property encumbered by a recourse (as opposed to a nonrecourse) mortgage because the debtor remains liable to repay any deficiency (that is, the difference between the mortgage indebtedness and the foreclosure sale price).ⁿ¹⁸

Moreover, if the lender accepts property with a value less than the recourse indebtedness in complete satisfaction of the debt, or as satisfying indebtedness greater than the value of the property to any extent, the difference between the amount of debt discharged and the fair market value of the property surrendered constitutes income from discharge of indebtedness under *IRC Section 61(a)(12)*, not gain or loss from the sale or disposition of the property under *IRC Section 61(a)(3)*.ⁿ¹⁹ Likewise, when encumbered property with a value less than the unpaid indebtedness on the mortgage is surrendered in full satisfaction of the debt, the taxpayer may not claim the entire difference between the amount of the debt and the value of the property as income from discharge of indebtedness subject to *IRC § 108* since, to the extent of the difference, if any, between the fair market value of the property and its basis, income or loss is attributable to the disposition of the property and not to cancellation of debt.ⁿ²⁰

[3] Effect of the Taxpayer's Method of Accounting on the Amount Realized.

When property is held for resale to customers, the time of inclusion in income depends upon the method of accounting utilized by the taxpayer. If the taxpayer is on the accrual method, the inclusion criterion is the existence of an unconditional right to payment.ⁿ¹ Thus, if property is sold on open account, the seller must include in income the face amount of the debt, rather than its fair market value, at the time the unconditional right to payment arises.ⁿ² If the seller is a cash basis taxpayer, the receivable becomes includable only when the same can be held to be the equivalent of cash.ⁿ³ While cash equivalence can often be found if the amount due is evidenced by a negotiable note, it is rare for any

other types of receivables, such as open accounts receivable, contract rights to payment, and nonnegotiable notes, to constitute income prior to actual payment.ⁿ⁴

Should the same rules apply to a casual or isolated sale? The problem may be illustrated by the following:

Example:

Suppose a taxpayer sells property which he had not held for resale for \$20,000, receiving \$10,000 in cash, and the buyer's nonnegotiable demand note for the balance, the note having a fair market value of \$8,000. If accounting methods are a factor in determining the amount realized, an accrual method taxpayer would report an amount realized of \$20,000. On the other hand, since a nonnegotiable note is usually deemed to be only evidence of the debt and not the equivalent of cash, the cash basis taxpayer's amount realized would be \$10,000. If, however, accounting methods play no role in the determination of the amount realized in a casual sale, the cash received combined with the fair market value of the note would make an amount realized of \$18,000.

The statutory definition of amount realized, namely, money and the fair market value of other property received,ⁿ⁵ would seem to preclude any difference in result turning upon the method of accounting employed by the taxpayer. As construed by the Tax Court, however, an accrual basis taxpayer is required to treat an unconditional right to receive money as the equivalent of "money" for purposes of *IRC Section 1001(b)* while a cash basis taxpayer is not required to do so unless evidence of the right received is actually the equivalent of cash.ⁿ⁶

The Tax Court's position regarding accrual basis taxpayers was further explained in *Nestle Holdings, Inc v Commr.*ⁿ⁷ The accrual basis taxpayer in that case made a bulk sale of inventory of a discontinued line of products in exchange for the purchaser's long- and short-term promissory notes and preferred stock having a "mandatory" redemption price of \$15 million. In reporting a loss on the sale in its tax return, the taxpayer included the short-term promissory note at face value in computing the "amount realized" but the long-term note and the preferred stock were discounted to fair market value. Before the Tax Court, the taxpayer conceded that the long-term note should also have been included at face value in computing the "amount realized,"ⁿ⁸ but argued that, under *IRC Section 1011(b)*, the preferred stock had been properly included at fair market value. The Commissioner, maintaining the position taken in *Rev Rul 79-292*,ⁿ⁹ insisted that taxpayer's accrual method of accounting and *IRC Section 451* took precedence over the "fair market value" standard of *IRC Section 1001(b)* and that the preferred should have been valued at its mandatory redemption price. The ruling, the Commissioner reminded the Court, merely followed the Tax Court's own prior decisions in *First Savings & Loan* and *Western Oaks Building Corporation* cases.ⁿ¹⁰

The Tax Court found the earlier cases distinguishable because they involved evidences of indebtedness rather than preferred stock. "The essence of these cases is that, under section 1001(b), 'an accrual basis taxpayer does not treat an unconditional right to receive money as property received, but rather as money received to the full extent of the face value of the right' ... [Citation Omitted]"ⁿ¹¹ However, unlike an evidence of indebtedness, which unconditionally confers a right to receive a payment of money in the future regardless of the financial condition of the obligor, preferred stock can only be redeemed if the issuer has adequate capital or equity on the date of the redemption. Since the preferred stock did not give the taxpayer an unrestricted right to income that it was required to accrue,ⁿ¹² the preferred stock was appropriately taken into account as "property (other than money)" for purposes of *IRC Section 1011(b)* at its fair market value.ⁿ¹³

In *Brown v. Commissioner*,ⁿ¹⁴ an accrual basis taxpayer was required to include the face amount of a note in the amount realized on sale of a part interest in his business. The taxpayer argued that the note had no fair market value, and therefore, should not form any part of the amount realized in the year of sale. The Tax Court dismissed this contention on the ground that the argument had no merit when the taxpayer kept his records on the accrual method.ⁿ¹⁵

While the taxpayer in *Brown* was penalized because of the accounting method he utilized, cash basis taxpayers reap a benefit when their contention that a nonnegotiable note or contract right does not constitute the equivalent of cash and should not be added to the amount realized is upheld.ⁿ¹⁶ The effect is to defer a portion of the gain from the year of sale to the year of payment even though the transaction is closed.

The problem of cash equivalence no longer poses a problem when the obligation is received as consideration for the sale of property. The 1980 change in the installment method mandates the deferral of the reporting of income until actual payment is received.ⁿ¹⁷

The transaction will not be "open" if the property transferred to the buyer is capable of valuation; the amount realized will be the fair market value of the transferred property. See, eg, *Ltr Rul 9034002* .

(n9)Footnote 3. See, eg, *Steen v US*, 509 F2d 1398 (9th Cir 1975) ; *Dorsey v Commr*, 49 TC 606 (1968) . Taxpayers have generally been successful in claiming that the promise has no ascertainable value in the case of a transfer to an individual in exchange for his promise to pay the transferor an annuity. *Commr v Estate of Kann*, 174 F2d 357 (3d Cir 1949) ; *Stern v Commr*, TC Memo 1992-374 ; *Lloyd v Commr*, 33 BTA 903 (1936) , *acq* 1950-2 CB 3 . A transfer of stock in exchange for a promise to pay a private annuity resulted in the realization of gain in *Estate of Bell v Commr*, 60 TC 469 (1973) . The difference in result stemmed from the fact that the agreement provided for the stock to be placed in escrow and for a cognovit judgment in case of default. This removed any uncertainty as to whether the payments would be made.

In *McCormac v US*, 424 F2d 607 (Ct Cl 1970) , the court rejected the taxpayer's claim of an "open" transaction when the expert witness called by the taxpayer was able to place a value on the amount realized.

(n10)Footnote 4. If the total payments received under the contract are less than the taxpayer's basis in the property sold, the loss will be realized in the last payment year.

If the deferred payments do not bear interest or bear insufficient interest, a portion of each payment received may be deemed imputed interest. See Ch 2.

(n11)Footnote 5. See Ch 2.

(n12)Footnote 6. *IRC § 1222; Osenbach v Commr, 198 F2d 235 (4th Cir 1952)* .

(n13)Footnote 7. The relation-back theory is based on *Arrowsmith v Commr, 344 US 6 (1952)* . See § 2.03[3], *infra*.

(n14)Footnote 8. S Rep No 96-1000, 96th Cong, 2d Sess 24 (1980). The subject of installment sales is *covered in § 1.05[2], infra* .

If the transaction is such that the price is truly contingent and unascertainable and cannot fit within the installment sales provisions, the details of the transaction should be set forth in a statement annexed to the return for the year of sale. This will preclude application of an extended period of limitations on assessment. *IRC § 6501(e)(1)(A)(ii)*.

(n15)Footnote 9. *US v Davis, 370 US 65 (1962)* (transfer of property pursuant to divorce settlement in satisfaction of all marital obligations of husband to wife); *Philadelphia Park Amusement Co v US, 126 F Supp 184 (Ct Cl 1954)* (transfer of property in exchange for extension of franchise).

The Fifth Circuit, in *Bar L Ranch, Inc v Phinney, 426 F2d 995 (5th Cir 1970)* , held that the district court erred when it failed to take cognizance of the value of the property transferred in determining the value of the property received.

(n16)Footnote 10. *Crane v Commr, 331 US 1 (1947)* ; *Parker v Delaney, 186 F2d 455 (1st Cir 1950)* . The amount realized on the sale or other disposition of property that secures a recourse liability does not include any amount treated as discharge of indebtedness income. *Reg § 1.1001-2(a)(2)*.

(n17)Footnote 11. *Woodsam Associates, Inc v Commr, 198 F2d 357 (2d Cir 1952)* .

(n18)Footnote 12. *US v Davis, 370 US 65 (1962)* ; *Kenan v Commr, 114 F2d 217 (2d Cir 1940)* . A disposition occurs and income is realized by the lender if he receives property having a value in excess of the amount due. *Est of Herbert v Commr, 139 F2d 756 (3d Cir 1943)* , *cert denied 322 US 752 (1944)* ; *Elverson Corp v Helvering, 122 F2d 295 (2d Cir 1941)* .

The Tax Court has held that there is no amount realized when a taxpayer transfers property in discharge of a debt owed to the transferee by another. See, eg, *Friedland v Commr, TC Memo 2001-236* .

A recognized loss results whenever the transferred property has a basis that exceeds the amount of the discharged debt. *Rev Rul 76-111, 1976-1 CB 214* .

(n19)Footnote 13. *Parker v Delaney, 186 F2d 455 (1st Cir 1950)* ; *Lutz & Schram Co v Commr, 1 TC 682 (1943)* .

The Ninth Circuit has taken the position that there is no amount realized if the taxpayer remains personally liable on the debt after the transfer. *Jackson v Commr, 708 F2d 1402 (9th Cir 1983)* .

(n20)Footnote 14. *R O'Dell & Sons, Inc v Commr, 169 F2d 247 (3d Cir 1948)* (involuntary transfer of property securing obligation); *Pender v Commr, 110 F2d 477 (4th Cir 1940)* (voluntary transfer of encumbered property); *Suisman v Eaton, 15 F Supp 113 (D Conn 1935)* , *affd 83 F2d 1019 (2d Cir 1936)* , *cert denied 299 US 573* (voluntary transfer of property in kind to satisfy a bequest).

(n21)Footnote 15. *Reg § 1.1001-2(a)(1), (4)(i)*; *Rev Rul 78-164, 1978-1 CB 264* ; *Rev Rul 76-111, 1976-1 CB 214* .

(n22)Footnote 16. *Commr v Tufts*, 461 US 300 (1983) . Evidence of the conflict can be seen by comparing *Millar v Commr*, 67 TC 656 (1977) , *affd* 577 F2d 212 (3d Cir 1978) , *cert denied* 439 US 1046 , using the balance of the debt as the amount realized with *Tufts v Commr*, 651 F2d 1058 (5th Cir 1981) , limiting gain to the difference between basis and fair market value. The source of the difference was dictum contained in a footnote in the opinion in *Crane v Commr*, 331 US 1 (1947) , where the Supreme Court observed that

"Obviously, if the value of the property is less than the amount of the mortgage, a mortgagor who is not personally liable cannot realize a benefit equal to the mortgage."

The *Tufts* case is discussed in Geier, "Tufts and the Evolution of Debt-Discharge Theory," 1 *Fla Tax Rev* 115 (1992).

According to the Tax Court, a taxpayer realizes cancellation of indebtedness income in a year that stock securing a nonrecourse debt becomes worthless. *Carlin v Commr*, TC Memo 1988-79 .

(n23)Footnote 17. 99 TC 197 (1992) , *affd without published opinion*, 29 F3d 630 (1994) .

(n24)Footnote 18. "The language of the Supreme Court [in *Tufts*], which suggests that fair market value is irrelevant where that value is less than the amount of the unpaid mortgage principal ... was directed to the situation where that mortgage obligation was discharged--a situation which does not obtain [where the lender still has recourse against the borrower personally, as in the case of a recourse debt]." 99 TC at 201 .

(n25)Footnote 19. See *Frazier v Commr*, 111 TC 243 (1998) , where the Tax Court found that the price bid on foreclosed property and credited against the mortgage indebtedness by the lender exceeded the property's fair market value. The Court used the lower fair market value rather than the foreclosure sale price as the "amount realized" for purposes of computing the property owner's gain or loss on the sale of the property at foreclosure. The difference between the property's fair market value and the greater amount bid by the lender was treated as discharge of indebtedness income, excluded from the taxpayer's income by the provisions of IRC § 108. *Frazier v Commr*, 111 TC at 249 ; see also *Gehl v Commr*, 102 TC 784 (1994) , *affd without published opinion* 50 F3d 12 (8th Cir 1995) . Both *Frazier* and *Gehl* relied on *Treas Reg* §§ 1.1001-2(a)(2) and 1.1002-2(c), Ex 8, which provide that "the amount realized on a sale or other disposition of property that secures a recourse liability does not include amounts that are (or would be if realized and recognized) income from the discharge of indebtedness under IRC § 61(a)(12)."

(n26)Footnote 20. *Frazier v Commr*, 111 TC 243 (1998) ; *Gehl v Commr*, 102 TC 784 (1994) ; *Danenburg v Commr*, 73 TC 370 (1979) ; *Estate of Delman v Commr*, 73 TC 15 (1979) .

CHAPTER 1 Gains and Losses From the Disposition of Property

1-1 Taxation of Securities Transactions § 1.04

§ 1.04 The Elements of Gain or Loss--Basis

We have seen that, under the statutory formula, the amount realized must be reduced by that portion which represents a return of capital to the taxpayer. The basis provisions of the Code serve to measure the amount which must be recovered before gain can be realized.

[1] Cost Basis.

IRC Section 1012 sets forth the general rule that, unless the Code specifically provides otherwise, the basis of property is its cost. Three of the exceptions to the general rule, the basis of property acquired before March 1, 1913, the basis of property acquired by gift, and the basis of property acquired from a decedent will be covered in this chapter. Other exceptions, insofar as they relate to securities, will be discussed in connection with the transactions to which they relate.

The Regulations define cost as "the amount paid for ... property in cash or other property."ⁿ¹ The usual form of acquisition calling for a cost basis is an outright purchase for cash, but the cost basis provisions of *IRC Section 1012* are applicable when property is acquired other than by a normal cash purchase and the Code does not specifically provide some other manner of determining basis.

[a] Assumption of Seller's Liabilities. It will be recalled that the seller of property must include in his amount realized, the amount of any liabilities which the purchaser expressly assumes, or to which the property remains subject after the conveyance. The coin has two sides, for the purchaser includes the indebtedness in his basis for the property,ⁿ² even if he undertakes no personal liability with respect to the indebtedness,ⁿ³ unless the liability is so speculative, contingent, or indefinite that it cannot be determined with any reasonable accuracy that the liability will ever be paid. In the latter event, no amount is added to basis until such time as the liability becomes fixed and absolute, and capable of determination with some degree of certainty.ⁿ⁴

It is important to note that basis is affected only if the liability is assumed as part of the transaction or attaches to the property at the time of purchase. A subsequent borrowing, even one in which the property is pledged as security, will not increase the basis of the property, although the unpaid balance of the indebtedness will enter into the amount realized on a subsequent sale if the buyer assumes the liability or takes the property subject to it.ⁿ⁵

[b] Basis of Property Acquired at a Cost in Excess of Fair Market Value. If a taxpayer purchases stock for \$12,000 at a time when the value of the stock is \$10,000, should the basis of the stock be \$12,000, the price actually

paid, or \$10,000, the fair market value on the date of acquisition? There would appear to be no room for choice, since \$12,000 is the cost of the stock as measured by the amount paid in cash,ⁿ⁶ and if the only reason for payment of the higher price is the acquisition of the property, basis will be actual cost.ⁿ⁷

If, however, special factors other than the acquisition of the property contribute to the excess price, the basis will be the value of the property, and not actual cost. For example, in *Pennsylvania Indemnity Co. v. Commissioner*,ⁿ⁸ securities worth \$420,000 were purchased by a parent from its wholly owned subsidiary at a cost of some \$250,000 more than value and then immediately sold for an amount equal to value. The subsidiary's financial standing had previously been impaired by a decrease in the value of its assets of approximately \$250,000. The Third Circuit held the basis to be \$420,000, and likened the transaction to "the old story of a father making good the loss of his son's business and starting him again with an unimpaired capital."ⁿ⁹

A reversal of the normal roles assumed by taxpayer and Government occurred in *Lewis & Taylor, Inc v. Commissioner*.ⁿ¹⁰ The transaction in question involved the purchase of stock by a corporation from the estate of a deceased shareholder-employee. As originally written, the agreement called for a purchase price of \$17,500. As amended, it fixed the price of \$10,000 and characterized the balance as a payment of deferred employment compensation. The corporation sought a deduction for this payment under *IRC Section 162(a)(1)*; the Commissioner argued that it represented part of the amount paid for the stock. The Ninth Circuit upheld the taxpayer by focusing on the fact that the \$10,000 purchase price mirrored the value of the stock at the time of purchase and, therefore, was reflective of economic reality.

[c] Basis of Property Acquired at a Cost Less Than Fair Market Value. If parties to a transaction deal at arm's length, then the fact that a purchaser may have made a good deal and paid less for the property than it was worth should have no effect on the general cost basis rule.ⁿ¹¹ However, as in the case of an excess price, special factors may account for the disparate purchase price. For example, if property worth \$1,000 is sold for \$800, the seller intending the \$200 difference to be a gift to the purchaser, the actual purchase price will not be the sole determinant of basis, for the basis rules pertaining to gifts must also be taken into account.ⁿ¹²

[d] Basis of Property Acquired in an Exchange. The basis of property acquired in a taxable exchange is its fair market value at the time of transfer.ⁿ¹³ The consequence of this rule is that the basis of the new property equals the adjusted basis of the property given up, increased by the amount of any gain, or decreased by the amount of any loss, produced by the exchange.

When the property to be valued consists of stock or securities traded on an exchange or in some other public market, the mean exchange price (the average of the high and low quoted prices) furnishes the most accurate and most readily ascertainable measure of fair market value.ⁿ¹⁴ This general rule is predicated on the existence of a market, of supply and demand, and of sellers and buyers. In addition, market price can be an index of value only when the property to be valued is substantially similar to the property traded in the market. If the market reflects only limited or forced sales,ⁿ¹⁵ or if the stock is subject to restrictions on alienation,ⁿ¹⁶ the stock may have to be valued at a discount. On the other hand, an upward adjustment in value may be required because acquisition of stock carries with it certain extras such as control.ⁿ¹⁷ Yet, even when circumstances warrant a departure from the general rule, market price is often the point of departure.

Where the fair market value of the acquired property cannot be ascertained, its basis will be determined by reference to the value of the property transferred, since the properties exchanged in an arm's-length transaction are presumed to be of equal value. In the rare situation where neither the property transferred nor that received can be valued, the basis of the property transferred should carry over and become the basis of the property acquired.ⁿ¹⁸

[e] Basis of Property Constituting Income or Deduction Items. If a taxpayer receives property under circumstances requiring its value to be included in gross income, eg, as compensation for services, the basis of the

property is the amount so included.ⁿ¹⁹ This is a logical extension of the principles governing the basis of property acquired in a taxable exchange, the services rendered being viewed as the property transferred.

The reverse situation, the acquisition of property giving rise to an immediate deduction (such as a business taxpayer's purchase of property having a useful life of less than one year) produces a zero basis. The rationale here is that the taxpayer recovers his cost in the property through the allowance of the deduction.

[2] Basis of Property Acquired Before March 1, 1913.

IRC Section 1053 provides the basis rules for property acquired prior to March 1, 1913 (the effective date of the first income tax legislation enacted after ratification of the *Sixteenth Amendment*). The basis for the purpose of computing gain is either the basis as determined under the applicable provision of the Code (cost, etc.), or the fair market value of the property on March 1, 1913, whichever is greater. The basis for computing loss is determined solely in accordance with the regular basis rules of the Code, without any consideration of the March 1, 1913 value.ⁿ¹ It is readily apparent that if the value of the property on March 1, 1913 was greater than the cost of the property, the property can have two bases, one to compute gain, and the other, loss. Consequently, a taxable disposition of the property may produce a "no-man's land" in which neither gain nor loss is realized, the amount realized being less than the basis for determining gain, but more than the basis for determining loss.

[3] Basis of Property Acquired by Gift.

[a] The General Rule. We have previously seen that generally a gift of appreciated property does not produce realizable gain for the donor. It is manifest that if the fair market value of the property at the time of the gift became the donee's basis for the property, the increase in value from the date of the donor's acquisition to the time of gift would forever be eliminated from the computation of gain.ⁿ¹ The rules of *IRC Section 1015(a)* no longer permit this result, calling instead for a "substituted basis," i.e., the donee must take the basis that the property had in the hands of the donor.ⁿ² If the donor himself acquired the property by gift, the basis must be traced back to his donor, or the last person who did not acquire the property by gift.

The donee's basis for determining loss will differ from his basis for determining gain whenever the donor's basis for the property exceeds its fair market value at the time of the gift. In such event, the basis for loss purposes is its fair market value,ⁿ³ thereby removing the decrease in value to the time of the gift from the determination of loss. As in the case of property acquired prior to March 1, 1913, the end result of different bases for gain and loss may be a transaction producing neither taxable gain nor loss.

The basis determined under *IRC Section 1015(a)* is then adjusted by increasing it in an amount equal to the gift tax paid with respect to the gift.ⁿ⁴ In the case of property acquired on or after September 2, 1958, the basis cannot be increased above the fair market value of the property at the time of the gift.ⁿ⁵ Where property was acquired before September 2, 1958, an adjustment is allowed only if the property was still held on that date, with the increase in basis limited to the amount by which the fair market value at the time of the gift exceeded the donor's basis in the property at that time.ⁿ⁶

The formula for determining the amount of gift tax paid with respect to the gifts made before 1977 is:

$$\frac{\text{amount of the gift}}{\text{total taxable gifts for the year}} \times \text{total gift tax paid}^{\text{n7}}$$

The "amount of the gift" is the value of the gift less the total of any exclusion or deduction allowed by reason of *IRC Section 2503(b)* (annual exclusion), *IRC Section 2522* (charitable deduction), and *IRC Section 2523* (marital deduction). The amount of "total taxable gifts for the year," is the same as shown on the gift tax return except that any deduction then allowed by *IRC Section 2521* (specific exemption) is not taken into account.ⁿ⁸

Example:

Assume that in a year after 1958, but before 1977, a donor, who never made any taxable gifts, made two outright gifts, one a gift to A of securities having a basis of \$20,000 and a value of \$23,000, and the other a cash gift to B of \$33,000. Since the donor could then claim an annual exclusion of \$3,000 for each of the gifts,⁹ as well as a specific exemption of \$30,000, the taxable gifts for the year amounted to \$20,000 and the gift tax to \$1,200. The resulting increase in the basis of the securities given to A was \$480.¹⁰

In the case of gifts made after December 31, 1976, the adjustment is limited to the amount of gift tax paid with respect to the net appreciation in the value of the gift, and the applicable formula becomes:¹¹

$$\frac{\text{Net appreciation in value of gift}}{\text{Amount of gift}} \times \text{Total Gift Tax Paid}$$

The net appreciation in value is the amount by which the fair market value of the gift exceeds the donor's adjusted basis.¹²

A variation in the gift basis rules occurs when property is acquired in a transaction which is in part a sale and in part a gift. The basis for determining gain, excluding any increase for gift taxes paid with respect to the gift, is the amount paid by the transferee or the adjusted basis of the property in the hands of the transferor, whichever is greater. The basis for loss purposes is either the same as the basis for gain or the fair market value of the property at the time of transfer, whichever is less.¹³ For example, suppose a father sells stock having a basis of \$3,000 and worth \$10,000 at the time of the transaction to his son for \$5,000, intending the difference between purchase price and value as a gift. Without considering the amount of gift tax paid, the basis of the stock in the son's hands for both gain and loss purposes will be \$5,000. If the father's basis for the stock had been \$6,000, the son would employ that figure as his basis since it is greater than the amount paid by him for the stock.

The threshold question is: When is property acquired by gift? Does the gift tax requirement, that consideration be measurable in terms of "money or money's worth,"¹⁴ control this determination? In the usual transfer falling within the scope of the gift tax, no consideration flows to the transferor so that the transaction can be labeled a gift for income tax basis purposes. However, because of the restricted definition of consideration found in the gift tax, a transfer may give rise to gift tax liability and yet may not be considered a gift under the income tax. An example of such a situation is found in *Farid-es-Sultaneh v. Commissioner*,¹⁵ where the Second Circuit was called upon to decide the basis of stock acquired in exchange for a release of marital and support rights. The court held that for income tax purposes, the release constituted consideration for the transfer of stock, and therefore the stock was acquired by purchase and not by gift. The court could find nothing that required an income tax definition of consideration coextensive with that obtaining under the gift tax.

Neither the rule of *Farid-es-Sultaneh* nor the provisions of *IRC Section 1015* apply to transfers of property between spouses after July 18, 1984 (or December 31, 1983, if both parties elect). Pursuant to *IRC Section 1041(b)*, a transfer of property to a spouse, or to a former spouse incident to a divorce, is treated as a gift by the transferee, whose basis in the property is always the adjusted basis of the transferor.¹⁶

[b] Appreciated Property Acquired by Political Organizations. It will be remembered that a gift of appreciated property to a political organization constitutes a taxable event resulting in the realization and recognition of gain by the transferor. Because of this, the circumstances dictate, and *IRC Section 84(b)* provides, that the basis of the contributed property in the hands of the transferee organization is "the same as it would be in the hands of the transferor, increased by the amount of gain recognized to the transferor, by reason of such transfer." Put more simply, the transferee's basis is equal to fair market value of the property on the date of contribution.

[4] Basis of Property Acquired From a Decedent.

Logic would seem to dictate that because a transfer of property at death is not treated as a realizable event, a person receiving property from a decedent should employ the same substituted basis as the donee of a gift. However, such is not the case, for *IRC Section 1014* provides that property acquired from such a decedent takes a basis equal to the value thereof at the time of death, or if the alternate valuation is elected, the value at the applicable valuation date.ⁿ¹ Thus, any increase or decrease in value occurring during the period the property was held by the decedent is forever removed from income taxation. (The Tax Reform Act of 1976 contained a set of carryover basis rules which, to some extent, would have placed the person acquiring property from a decedent in the same position as an inter vivos donee. Dissatisfaction with the legislation led, first, to a postponement of the effective date of the rules and, then, to their repeal.)

IRC Section 1014(a) applies not only to property actually owned by the decedent at death and acquired by bequest, devise, or inheritance, but also to other property which must be included in the decedent's gross estate for estate tax purposes, namely:

- (1) Inter vivos transfers of property in trust where the decedent retained (a) the right to income for life and (b) the power to revoke, alter, amend, or terminate the trust;ⁿ²
- (2) Property passing under the decedent's testamentary exercise of a general power of appointment;ⁿ³
- (3) Property which represents the surviving spouse's one half share of community property held by the decedent and his surviving spouse, if at least one half of the entire community property interest was includable in the decedent's gross estate;ⁿ⁴
- (4) Property acquired from the decedent by reason of death, form of ownership, or other conditionsⁿ⁵ (this brings property acquired by the surviving tenant of a joint tenancy within the ambit of *IRC Section 1014(a)*).ⁿ⁶

One proviso attends inter vivos transfers considered as property acquired from a decedent by *IRC Section 1014(b)*. If the person acquiring the property disposed of it prior to the decedent's death, the fair market value-basis rule of *IRC Section 1014(a)* is no longer applicable and basis must be determined in accordance with some other applicable provision of the Code.ⁿ⁷

An important exception to the application of *IRC Section 1014*, found in subsection (c), affects the treatment of items denominated income in respect of a decedent.ⁿ⁸ The effect of *IRC Section 1014(c)* can be illustrated in the following manner. Suppose a cash basis taxpayer died on April 1, 1989, owning corporate bonds which pay interest on July 1 and January 1. Because of the decedent's method of accounting, the interest accruing from January 1, 1989, to the date of death is not includable in income for the taxable year ending on the date of his death or any prior taxable year.ⁿ⁹ By definition, the amount of accrued interest is income in respect of a decedent,ⁿ¹⁰ and, when received, is properly includable in income by the person acquiring the right to receive the same from the decedent.ⁿ¹¹ If the basis of the right to receive the accrued interest was controlled by *IRC Section 1014(a)*, the basis would, in most cases, be equal to the amount accrued at death. Subsequent payment of that amount would give rise to a recovery of basis and never enter the recipient's gross income. This would, in essence, serve to nullify the provisions of *IRC Section 691*. *IRC Section 1014(c)* prevents this resultⁿ¹² by denying income in respect of a decedent a basis equal to fair market value. The effect is to require a carryover of the decedent's basis in the interest, usually zero.

A second exception concerns stock and securities in foreign personal holding companies acquired from a decedent by bequest or inheritance before January 1, 2005. Here the basis will be fair market value at the decedent's death or the basis in the decedent's hands, whichever is lower.ⁿ¹³

IRC Section 1014(d) contains a third exception, applicable to stock in a Domestic International Sales Corporation. The basis of such stock was set at fair market value reduced by the amount of gain that would have been treated as ordinary income under *IRC Section 995(c)* had the decedent sold the stock on the applicable valuation date.

A final exception, found in *IRC Section 1014(e)* and applicable to persons dying after 1981, denies a step-up in basis for appreciated property that is acquired by gift by the decedent within one year of death and then passes from the decedent to the donor or the donor's spouse.ⁿ¹⁴ The stated rule also applies to a sale of appreciated property by the estate of the decedent or by a trust of which the decedent was the grantor, to the extent that the donor or the donor's spouse is entitled to the proceeds from such sale. A question that is not entirely resolved is the applicability of *IRC Section 1014(e)* to the situation where the decedent transfers appreciated property to a trust that includes as a beneficiary the donor or the donor's spouse. Ultimately this is something that may be resolved on a case-by-case basis, depending on the power that the donor or the donor's spouse has over the trust. Notably, *IRC Section 1014(e)* does not expressly include indirect or beneficial transfers to the donor or the donor's spouse.

[a] Ascertaining the Basis--The Presumption as to Fair Market Value. The Regulations provide that the value of property as reported on the federal estate tax return will be deemed its fair market value for the purposes of *IRC Section 1014(a)*.ⁿ¹⁵ If no return is required to be filed, then the values returned for state death tax purposes control. While the Regulations appear not to permit any deviation from estate tax values, the Commissioner has ruled that, for basis purposes, the values appraised for estate tax purposes are not conclusive, but merely presumptive, and may be rebutted by clear and convincing evidence.ⁿ¹⁶

The major problem a taxpayer faces when asserting a valuation other than that reported for estate tax purposes is obviously one of proof. Assuming this burden can be met, the taxpayer will probably encounter the Government's second line of defense, viz., that he is estopped from claiming a different value.ⁿ¹⁷ The likelihood of this contention being raised is increased if the taxpayer is the person who filed the estate tax return containing the original determination of fair market value. As valid as the defense may appear to be, it has not always been successful.ⁿ¹⁸

[5] Adjustments to Basis.

The previous discussion concerning basis has focused mainly on what might be termed "unadjusted basis,"ⁿ¹ However, the statutory formula for computing gain or loss is cast in terms of "adjusted basis,"ⁿ² defined by *IRC Section 1011* as "basis [determined under the applicable provisions of the Code] adjusted as provided in *IRC Section 1016*." The purpose of these adjustments is to insure that the thrust of basis, a return of capital, occurs only once with respect to any particular item of property. So, if the property is of the type which is subject to depreciation, the allowance of a deduction for depreciation itself is considered a recovery of capital, and, accordingly, the basis of the property must be reduced by an amount equal to the deduction.ⁿ³

While most required adjustments result in a decrease in basis, an adjustment upward is called for when an expenditure is properly chargeable to capital accountⁿ⁴ and not currently deductible, as for example, the expense of litigation to settle title to property.ⁿ⁵ By adding the amount of the expenditure to basis, ultimate cost recovery is achieved. Adjustments affecting the basis of securities are spread throughout the Code. These will be detailed when the transaction triggering the adjustment is discussed.

[6] Multi-Unit Property--The Need for Allocation of Basis.

When a taxpayer sells part of a group of securities (or any other property) in a single transaction, gain or loss on the part sold must be separately computed and cannot be deferred until disposition of all of the property.ⁿ¹ This requires an apportionment of the basis of the whole to the part sold and the part retained. If the property consists of multiple units of the same property (eg, 100 shares of one class of stock of a single corporation), the allocation is made by spreading the

basis equally over the total number of units. If the original purchase encompassed different kinds of property, the allocation is based on relative fair market values of the component properties at the date of acquisition.ⁿ² Applying these rules, if 100 shares of common stock and a like number of preferred are purchased in a single transaction for \$7,000, the common having a value of \$5,000, and the preferred a value of \$2,000, the basis of each share of common will be \$50, and of each preferred share, \$20.

If there is no reasonable method of allocating the basis of a multi-unit property among its constituent parts because the fair market value of one or more of those parts cannot be readily ascertained, a variant of the "open transaction" doctrine will allow the taxpayer to recover his basis in the entire property before recognizing gain on the sale of any unit.ⁿ³ Correspondingly, under the same circumstances, a taxpayer may not recognize loss on the sale of any unit until the entire multi-unit property has been sold or becomes worthless.ⁿ⁴

[7] Allocation of Basis in Part-Sale, Part-Gift to Charity.

The general rule when appreciated property is transferred for less than its fair market value, and the transferor intends to make a gift to the transferee of the difference between the property's fair market value and the sales price, is to allocate the taxpayer's entire basis in the property to the "sale" element of the transaction, allowing the transferor to recover the property's basis before recognizing gain on the transfer.ⁿ¹ This rule is advantageous to the transferor, at least when compared to the alternative of selling the property for fair market value to a third party, paying tax on the entire appreciation in value (including the portion to be given away), and then making a gift of the cash remaining (after payment of the tax) to the donee.

Congress decided that, when the transferor receives a charitable contribution deduction for the appreciation in value that is given away, the taxpayer should not be able to escape tax on that portion of the gain that would have been recognized had the noncontributed portion of the property been sold.ⁿ² Under *IRC Section 1011(b)*, therefore--

"If a deduction is allowable under Section 170 (relating to charitable contributions) by reason of a sale, then the adjusted basis for determining the gain from such sale shall be that portion of the adjusted basis which bears the same ratio to the adjusted basis as the amount realized bears to the fair market value of the property."

The difference in tax consequences is illustrated by the following example.

Example:

A sells X Company stock held for more than one year to a public charity. The stock has an adjusted basis of \$5,000 and fair market value of \$10,000, but is sold to the charity for \$5,000. A has made a charitable gift of \$5,000, the difference between the \$10,000 fair market value of the stock and the \$5,000 sale proceeds. A is entitled a charitable contribution deduction, assuming none of the limitations on the deduction are applicable,ⁿ³ of \$5,000 (\$10,000 value of stock less \$5,000 received in exchange for the stock). In determining taxable gain on the bargain sale of the X Company stock, A deducts that portion of the stock's basis deemed allocable to the portion of the stock sold from the \$5,000 amount realized. That portion is calculated under *IRC Section 1011(b)* as follows: \$5,000 (total basis) x (\$5,000 (the amount realized from sale of the stock)/\$10,000 (the actual fair market value of the stock)) = \$5,000 x 50% = \$2,500. A must therefore recognize gain of \$2,500 (\$5,000 "sale price" less \$2,500 allocable basis). The remaining \$2,500 of basis is allocated to the portion of the stock A contributed to charity. Under the "general rule" applicable to noncharitable gifts, by contrast, A's gain on the bargain sale would have been zero (\$5,000 amount realized less \$5,000 basis).

The allocation of basis requirement in *IRC Section 1101(b)* applies only if "a deduction is allowable under *[IRC] Section 170* ... by reason of a sale." In some cases, a bargain sale may not result in a

charitable contribution deduction in the year of sale because, for example, the taxpayer has already exceeded the limitations on the charitable contribution for the taxable year in which the bargain sale occurs. However, a deduction for the contribution is "allowable" for purpose of making *IRC Section 1011(b)* operative if the contribution can be carried over and deducted in a subsequent taxable year under *IRC Section 170(b)(1)(D)(ii)* or *IRC Section 170(d)*, or the deduction is postponed to a subsequent taxable year by *IRC Section 170(a)(3)* (concerning contributions of future interests in tangible personal property),ⁿ⁴ even though the carryover is in fact never useable prior to its expiration.ⁿ⁵ The regulation's stance on this issue (as opposed, for example, to adopting a "wait and see" position in which the allocation of basis rule is applied retroactively if a charitable contribution deduction is actually allowed in a future year) was deemed reasonable by the Tax Court in light of the fact that the contribution carryforward period is five years, while the statute of limitations period for assessments and refunds is generally only three years.ⁿ⁶

Another issue raised by the "allowable" language is best described by an illustration. Suppose the facts are the same as those in the Example above except that the X Company stock sold by A to a public charity had been held by A for one year or less. Under *IRC Section 170(e)(1)(A)*, no charitable contribution deduction is allowable to the extent that the donated property has appreciated in value (over the donor's basis) and the appreciation in value would have been taxable as "other than long-term capital gain" had the property been sold by the donor at its fair market value. Viewing A's gift as consisting solely of the appreciation (over A's cost) in the value of his X Company stock, his charitable contribution would be nondeductible under *IRC Section 170(e)*. *IRC Section 1101(b)* would therefore be inapplicable as well since no deduction would be allowable with respect to the bargain sale, and A's entire \$5,000 basis in the X Company stock could be used to offset the \$5,000 received from the public charity, leaving A with zero gain on the bargain sale.

The above view of the transaction assumes that, by selling the X Company stock to charity at cost, A could, for tax purposes, allocate all of his short-term capital gain (appreciation above cost) to the charity. An alternative perspective, adopting the theory of *IRC Section 1011(b)* itself, is that both A's basis and the implicit short-term gain should be allocated between the sale and gift elements of the bargain sale transaction before determining its tax consequences. Adopting that view, A's donation to charity consists of 50% (\$5,000 sales price/\$10,000 fair market value) of A's \$5,000 basis in the X Company stock, and 50% of the \$5,000 short-term capital gain. This view leaves A with a deductible charitable contribution of \$2,500 for the gift of one-half of his cost basis, and a nondeductible charitable contribution for the gift of half of the unrealized short-term capital gain. A would then be required to recognize gain on the sale element of the transaction in the amount of \$2,500, since only half of his \$5,000 basis would be available under *IRC Section 1101(b)* to offset the \$5,000 cash payment received from the charity.ⁿ⁷

The Treasury and Internal Revenue Service initially took the position in regulations that the appreciation in the value of the gifted property should be allocated entirely to the gift to charity to the extent that such appreciation did not exceed the value of the gift, but these regulations were declared invalid by the Tax Court,ⁿ⁸ after which they were amended to take the alternative "pro rata allocation" position. The regulations under *IRC Section 1101(b)* now provide that--

"In ascertaining whether or not a charitable contributions deduction is allowable under section 170 for the taxable year ... the amount by which *the contributed portion of the property* must be reduced under section 170(e)(1) is the amount determined by taking into account the amount of gain which would have been ordinary income or long-term capital gain if *the contributed portion of the property* had been sold by the donor at its fair market value at the time of the sale or exchange." (Emphasis added).ⁿ⁹

[8] Disposition of Less than the Whole--The Need to Identify the Securities Sold.

A person who purchases more than one block of a specific security at different prices, and then sells all of his holdings in a single transaction, encounters no difficulty in computing the gain or loss realized on the transaction. However, if only a part of the total investment is sold, it becomes necessary to identify the lot from which the securities were sold in order to fix gain or loss. Identification is also important in determining the holding period of the securities, and thus whether capital gain or loss is long-or short-term.ⁿ¹

[a] The First-In, First-Out Default Method. If the taxpayer is unable adequately to identify the lot from which the securities were sold, regulations provide that the sale is deemed to be of those securities acquired first,ⁿ² irrespective of the manner in which the securities were acquiredⁿ³ or the time at which the securities were placed in a particular account.ⁿ⁴

There are, however, certain instances in which the earliest-acquired securities in a total holding will not be considered the ones sold. If the securities are held in a number of depositories or accounts, and the taxpayer can identify the depository or account from which delivery has been made, the first-in, first-out rule will be applied solely with respect to the securities in the particular depository.ⁿ⁵ In addition, if it can be shown that it would have been impossible to sell the first-acquired securities, as the same were held as collateral, these securities can be disregarded when applying the first-in, first-out rule.ⁿ⁶

Normally, the date of purchase or actual acquisition by the taxpayer is the controlling date for purposes of the first-in, first-out rule, but this is not always so. Securities acquired by specific bequest from a decedent are deemed acquired on the date of death, even if distribution is delayed.ⁿ⁷ Securities acquired in satisfaction of a residuary legacy are subject to one of two relation-back rules. If the taxpayer receives securities which the decedent owned, the applicable date is the date of death; if he receives securities purchased by the executor, it is the date of purchase.ⁿ⁸ Stock acquired by reason of a stock dividend or stock split should be considered as acquired on the same date as the stock with respect to which the dividend or split is made.

Interesting treatment is afforded stock acquired through the exercise of rights. The time of acquisition is the date of exercise. However, if rights issued with respect to different lots of stock are exercised at the same time, any sale of less than the total shares of stock so acquired is treated as having been made from stock acquired through the exercise of rights issued in respect of the earliest-acquired lots.ⁿ⁹

[b] The "Adequate Identification" Method.

The first-in, first-out rule will not be applied if the lot from which the stock is sold is adequately identified by the taxpayer.ⁿ¹⁰ Effective identification may be achieved in a number of ways, but it is clear that the absence of adequately kept records showing acquisition dates and prices, and, where feasible, certificate numbers, will severely hamper, if not render impossible, adequate identification.

[i] Identification Through Actual Delivery.

Proper identification is effected when it is shown that a particular certificate representing shares of stock purchased on a certain day, at a certain price, is delivered to the transferee in settlement of the transaction.ⁿ¹¹ Except as discussed below, certificate-delivery identification will govern the transaction even though the taxpayer intended to sell a different lot, and so instructed his broker.ⁿ¹²

[ii] Identification by Broker's Confirmation.

Where the taxpayer sells or transfers stock left in the custody of a broker or other agent, adequate identification is achieved if the taxpayer specifies to the custodian the particular lot from which the stock is to be sold or transferred and,

within a reasonable time thereafter, receives from the custodian written confirmation of these instructions.ⁿ¹³ The regulations currently require that the taxpayer's specification be made at the time of the sale or transfer, but this requirement will be deemed satisfied as long as lot identification is made by the time the shares are delivered to the purchaser.ⁿ¹⁴

When identification is made by broker confirmation the taxpayer's intention prevails; unlike identification by actual delivery, a mistake in delivery on the part of the taxpayer's broker or other agent will not affect the result.ⁿ¹⁵ Identification by broker confirmation is equally acceptable for isolated sales of stock, sales made pursuant to a systematic plan of liquidation,ⁿ¹⁶ sales of stock held in margin accounts,ⁿ¹⁷ and sales of bonds.ⁿ¹⁸ When the taxpayer sells or transfers a "book-entry security," *i.e.*, certain government securities issued in the form of an entry made on the records of a Federal Reserve Bank,ⁿ¹⁹ adequate identification by broker confirmation requires written instructions from the taxpayer (as well as a written confirmation) and the specification of a unique lot number, determined in accordance with a prescribed procedure, that identifies the lot containing the securities being sold or transferred.ⁿ²⁰

[iii] Identification by Fiduciaries.

A trustee, executor, or administrator can make adequate identification of stock not held by a custodian if, at the time of a sale or distribution, the fiduciary specifies in writing, in the books and records of the trust or estate, the particular stock sold or distributed.ⁿ²¹ Where stock is distributed to a beneficiary rather than sold, the fiduciary has the additional requirement of furnishing the distributee with a written document indicating the particular stock distributed to him.ⁿ²² Stock so identified will be considered the stock sold, transferred or distributed even though stock certificates from a different lot are actually delivered to the purchaser, transferee, or distributee.ⁿ²³

[c] The Average Cost Method.

Regulations currently allow a taxpayer who sells less than all his stock in a regulated investment company (sometimes called a "RIC" or "mutual fund")ⁿ²⁴ to determine the basis of the shares sold under the average cost method. In general, average cost is determined by dividing the aggregate basis of the taxpayer's shares in the RIC by the aggregate number of shares held. The average cost so determined is then multiplied by the number of shares sold to arrive at the aggregate basis of those shares.ⁿ²⁵

The 2008 amendments to *Section 1012 of the Internal Revenue Code*ⁿ²⁶ make important changes to these rules. Beginning in 2011, the average cost method may be used to determine the basis not only of RIC stock but, in addition, any corporate stock acquired after December 31, 2010 in connection with a dividend reinvestment plan ("DRP").ⁿ²⁷ Second, average basis for any eligible stock must be elected on an account-by-account basis beginning January 1, 2012.ⁿ²⁸ Finally, in the absence of an election to the contrary, the average basis of shares of any RIC or DRP stock acquired before January 1, 2012 must be determined separately from RIC or DRP shares acquired after that date, whether or not such shares are held in separate accounts.ⁿ²⁹

The Treasury Department and Internal Revenue Service have proposed changes to the average cost regulations to reflect the 2008 amendments to Section 1012 (the "proposed regulations").ⁿ³⁰ The provisions of the current regulations as well as the proposed regulations are discussed below.

[i] Eligibility For the Average Cost Method.

In permitting the use of the average cost method for stock in a regulated investment company, current regulations prescribe four requirements: (1) the RIC shares must be left by the taxpayer in a custodial account maintained for the acquisition or redemption of RIC shares;ⁿ³¹ (2) the shares must have been purchased or otherwise acquired at different

1-1 Taxation of Securities Transactions § 1.04

prices or bases;ⁿ³² (3) the account in which the shares are held must not contain shares acquired by gift if the basis of the gifted shares in the hands of the donor exceeds the fair market value of such shares at the time of gift unless the taxpayer files a statement electing to use such fair market value as the basis of the gifted shares in computing average basis;ⁿ³³ and (4) the taxpayer must file an election to use the average cost method in an income tax return (including a timely filed amended return) for the first taxable year for which the taxpayer desires the election to apply, which election may only be revoked with the Commissioner's prior written consent.ⁿ³⁴

Under the 2008 amendments to *IRC Section 1012*, and the proposed regulations interpreting those amendments, the basis of corporate stock acquired after December 31, 2010 in connection with a dividend reinvestment plan ("DRP") may also be determined under the average cost method.ⁿ³⁵ A DRP is statutorily defined as an arrangement under which dividends are reinvested in stock identical to the stock with respect to which the dividends were paid.ⁿ³⁶ The proposed regulations further require that the arrangement or plan be in writing and that at least 10 percent of every dividend be reinvested in identical stock.ⁿ³⁷ A DRP is allowed to hold stock on which no dividends have ever been declared or paid as well as stock on which the issuer has ceased paying dividends, may reinvest a different percentage of dividends with respect to different stocks, and may be administered either by the issuer of the stock or by a non-issuer.ⁿ³⁸ Apart from these definitional provisions, the proposed regulations treat DRP stock acquired after December 31, 2010 in the same manner as RIC stock.ⁿ³⁹

Beginning in 2012, the 2008 amendments and the proposed regulations change the rules for electing and calculating the average cost of RIC and DRP shares that are "covered securities" as defined in *Section 6045(g)(3)* of the Code. In general, covered securities include shares in a RIC or DRP purchased in a brokerage or other custodial account on or after January 1, 2012, regarding which the broker or custodian is responsible for reporting to the Internal Revenue Service the taxpayer's adjusted basis, gain or loss, and holding period when the shares are sold.ⁿ⁴⁰

To assure that brokers have the information necessary to calculate the taxpayer's basis and holding period when RIC or DRP "covered securities" are sold or otherwise transferred, the proposed regulations provide that the taxpayer's election to use average cost must be made by notifying the broker or other custodian of the account in which the shares are held that the taxpayer desires to use the average cost method with respect to such shares.ⁿ⁴¹ The notice must be in writing but can be given "by any reasonable means."ⁿ⁴² The average cost election is effective only for sales or other dispositions occurring in the account after the taxpayer provides such notification and applies only to identical RIC or DRP stock in the particular account for which the election is made.ⁿ⁴³ An election to use the average cost method for RIC or DRP shares in one account neither requires nor allows the taxpayer to use the average cost method for shares of identical RIC or DRP stock held in a different account; a separate election must be made for each account in which RIC or DRP stock is held.ⁿ⁴⁴ Thus, if a taxpayer notifies Broker A of her election to use the average cost method to determine the basis of eligible covered securities in the account, but thereafter transfers the securities to an account with Broker B, the election filed with Broker A is of no further effect and the taxpayer's right to use the average cost method with respect to those securities depends on her filing a similar notification with Broker B prior to sale.ⁿ⁴⁵

Shares of stock in a RIC or DRP acquired prior to January 1, 2012, and shares considered noncovered securities for any other reason, are treated as if held in a separate account from shares of identical RIC or DRP stock acquired on or after January 1, 2012 that meet the definition of covered securities.ⁿ⁴⁶ The taxpayer may still elect to use the average basis method for all RIC shares or DRP shares acquired after December 31, 2010, whether the shares are covered or noncovered securities, but an election to use average basis for noncovered securities will not apply to shares of identical stock in the same account classified as covered securities, and vice-versa.ⁿ⁴⁷ Moreover, if separate elections are made for covered and noncovered securities, the average bases covered and noncovered securities must be computed separately.ⁿ⁴⁸

An irrevocable "single account election" can be made to treat all shares of identical RIC or DRP stock in an account as covered securities, requiring that the broker report adjusted basis and holding period information on the sale of every share of the RIC's or DRP's stock in the account, regardless of date of purchase.ⁿ⁴⁹ The single account election cannot

be made by the taxpayer, however. It can only be made by the RIC or DRP which maintains the account or accounts in which the taxpayer's stock is held, or by the broker which holds RIC or DRP stock as a nominee for the taxpayer,ⁿ⁵⁰ by "clearly noting it [the election] on its books and records."ⁿ⁵¹ The election may be made at any time, may be made for one or more taxpayers for which the RIC, DRP or broker maintains an account, and for one or more stocks held for a given taxpayer.ⁿ⁵² The single account election applies to all identical shares of RIC or DRP stock for which the taxpayer elects to use the average cost method, but only if the electing RIC, DRP or broker has accurate basis information with respect to all such stock.ⁿ⁵³

The proposed regulations provide that a taxpayer who makes an election to use the average cost method may revoke that election with retroactive effect by so notifying the custodian of the account, by any reasonable means, within one year after the election is made (or a longer period if the period is extended by the custodian or other agent), but only if no stock covered by the election has been sold out of the account prior to the notification of revocation.ⁿ⁵⁴ Once RIC or DRP covered securities have been sold out of the account, any change from the average cost method elected for that account is a change in method of accounting that can only be prospective in effect, and requires the consent of the Commissioner under prescribed procedures.ⁿ⁵⁵

[ii] Computation of Basis and Holding Period.

The average cost regulations currently permit the taxpayer to choose either of two methods of determining the average cost of a share of stock. Under the "double-category method," all shares in an account at the time of each sale or transfer of stock are divided into two categories, one for shares then having a holding period of more than one year (the "more-than-one-year" category), and the other for all shares having a holding period of one year or less (the "one-year-or-less" category).ⁿ⁵⁶ The taxpayer is allowed to specify the category out of which shares are sold, and the basis of each share in that category is then computed by dividing the aggregate basis of all shares in that category by the number of shares in the same category.ⁿ⁵⁷ The determination of average basis under the second method, the "single-category method," is made without regard to the holding period of the shares involved. Instead, average basis is computed by aggregating the cost or other basis of all shares in the account at the time of transfer or sale, and then dividing such total basis by the number of shares in the account.ⁿ⁵⁸ While taxpayers are permitted to use different average cost methods for different RICs, the regulations require that the same method be used with respect to all of the taxpayer's accounts that hold shares in the same RIC.ⁿ⁵⁹

The proposed regulations would eliminate the double-category method, leaving the single-category method as the only valid method for determining average cost.ⁿ⁶⁰ Taxpayers presently using the double-category method would be required to switch to the single-category method in calculating the basis of shares sold, exchanged or otherwise disposed of after the date the proposed regulations are published as final regulations in the Federal Register.ⁿ⁶¹ Further, taxpayers holding stock of the same RIC (or DRP) in more than one account are no longer required to use average costing in all such accounts or none; average cost may be elected for RIC stock held in one account but not for stock in the same RIC held in a different account.ⁿ⁶²

Under the single-category method, the holding period of shares sold is determined under the first-in, first-out method.ⁿ⁶³ The proposed regulations apply the same methodology.ⁿ⁶⁴ Thus, if an account holding shares of identical RIC stock contains 100 shares held for more than one year and 100 shares held for one year or less, and the taxpayer sells 50 of the shares, all 50 would be deemed to have been held for more than one year.ⁿ⁶⁵

Example 1 illustrates the application of the proposed regulations in a number of different circumstances. The first demonstrates the consequences of electing the average cost method for stock enrolled a dividend reinvestment plan and later selling other shares in the same company that have not been enrolled in the plan.

Example 1:

T, a taxpayer, acquires 100 shares of H Company stock at \$15 per share on February 1, 2011, and enrolls

the shares in a dividend reinvestment plan administered by D. T elects to use the average cost method for the H Company shares. D later acquires an additional 100 shares of H Company stock on T's behalf on April 1, 2011, at \$10 per share, but does not enroll that stock in the dividend reinvestment plan. On December 1, 2011, D sells the 100 shares of H Company stock not enrolled in the dividend reinvestment plan on T's behalf for \$12 per share.

The basis of the 100 non-enrolled shares of H Company sold on December 1, 2011 is determined using their \$10 per share actual cost. T's profit is \$2 per share (\$12 selling price less \$10 basis) or \$200. A taxpayer's election to use the average cost method for RIC or DRP shares sold before January 1, 2012 ordinarily requires that identical stock held by the taxpayer in other accounts be taken into account in calculating the average basis of the shares sold.ⁿ⁶⁶ However, shares of stock enrolled in a DRP are not considered "identical" to shares in the same company that are not held in a DRP.ⁿ⁶⁷ Since the enrolled and unenrolled shares of H Company stock are not "identical," T may not average their acquisition costs when calculating the basis of the H Company stock sold on December 1, 2011.ⁿ⁶⁸

Example 2 demonstrates the application of the proposed average cost regulations when a taxpayer holds shares of stock in a RIC (or shares that were acquired in connection with a DRP) and such shares consist of both covered and noncovered securities in the same account.

Example 2:

T, a taxpayer, acquires 100 shares of J Company stock at \$15 per share on February 1, 2011 and enrolls the shares in a dividend reinvestment plan administered by E. T elects to use the average cost method to determine the basis of the J Company shares. On February 1, 2012, T purchases an additional 100 shares of J Company stock at \$10 per share and adds them to the dividend reinvestment plan account with E. On March 1, 2012, on T's instructions, E sells 100 of the J Company shares held in the plan for \$12 per share. At settlement, E delivers the certificate for the 100 J Company shares purchased by T on February 1, 2011.

The basis of the J Company shares sold on March 1, 2012 is \$15 per share, the cost of the 100 share lot acquired on February 1, 2011. T has a long-term capital loss of \$3 per share (\$12-\$15) or \$300. The cost basis of the 100 shares purchased on February 1, 2011 for \$15 per share cannot be averaged with the 100 shares purchased on February 1, 2012 for \$10 per share because the former are noncovered securities, acquired before January 1, 2012, while the latter are covered securities acquired on or after January 1, 2012.ⁿ⁶⁹ The average cost method may not be used to average the costs of noncovered securities and covered securities in the same fund or plan unless the broker or other custodian makes a single account election, which E has not done in this case.ⁿ⁷⁰ Since E delivered the certificate for the 100 J Company shares acquired on February 1, 2011 to close the sale, the basis of the 100 shares sold is \$15 per share under the actual delivery method.ⁿ⁷¹

Had E made a single account election to treat all J Company shares in T's account as covered securities regardless of their date of acquisition,ⁿ⁷² each share of J Company stock would receive an average basis of \$12.50 per share $((\$1500 + \$1000) = \$2500 / 200 \text{ shares} = \$12.50)$, and, under the first-in, first-out holding period rule, the J Company shares sold would be deemed to come from the 100 share purchase made on February 1, 2011. T would then have a long-term capital loss of \$50 on the March 1, 2012 sale $(\$12 \text{ sale price less } \$12.50 \text{ basis per share} = \$-.50 \text{ loss multiplied by } 100 \text{ shares})$.ⁿ⁷³

The final three examples illustrate the calculation of a moving average cost and the effect of a revocation or termination of an average cost election.

Example 3:

1-1 Taxation of Securities Transactions § 1.04

On February 1, 2012, Taxpayer T enters into an agreement with custodian F establishing an account for the periodic acquisition of shares of R Company, a regulated investment company, and elects to determine the basis of R Company shares using the average cost method. F acquires R Company stock for F's account, and sells R Company stock at T's direction, on the following dates and amounts.

DATE	TRANSACTION	QUANTITY	PRICE PER SHARE	TOTAL COST
March 1, 2012	PURCHASE	100 shares	\$140 per share	\$14,000
July 1, 2012	PURCHASE	100 shares	\$100 per share	10,000
March 3, 2013	SALE	100 shares	\$120 per share	12,000
June 1, 2013	PURCHASE	100 shares	\$90 per share	9,000
August 1, 2013	SALE	150 shares	\$120 per share	18,000

The 100 shares of R Company sold on March 3, 2013 have an average cost of \$120 per share (total basis of R Company stock in account-\$24,000-divided by 200 shares held equals \$120 per share). Since T received \$120 per share for the 100 shares sold on March 3, there is neither gain nor loss on the sale. The 100 shares sold are deemed to come from the 100 share lot acquired on March 1, 2012 under the first-in, first-out holding period rule. The 100 shares of R Company remaining in T's account, all of which were acquired on July 1, 2012, now have an average basis of \$120 per share. The \$100 per share actual cost of those shares is now irrelevant.

The average cost basis of each of the 150 shares of R Company stock sold on August 1, 2013 is \$105 per share, calculated as follows: There are 200 shares of R Company stock in the account immediately prior to the August 1, 2013 sale. Of these, 100 shares were purchased on July 1, 2012 for \$100 per share but, after the March 3, 2013 sale, have an average basis of \$120 per share, or a total basis of \$12,000. The remaining 100 shares of R Company stock acquired on June 1, 2013 at a cost of \$90 per share have a basis of \$9,000. The total basis of the 200 shares of R Company stock in T's account on August 1, 2013 is therefore \$21,000 (\$12,000+\$9,000), which when divided by the 200 shares held in the account yields a new average basis of \$105 per share. Since T received \$120 per share for the 150 shares sold on August 1, 2013, T's total gain on the sale is \$2,250 (\$120-\$105 = \$15 gain x 150 shares). \$1,500 of that gain is deemed made on the sale of the 100 share lot acquired on July 1, 2012, and is therefore long-term capital gain. The remaining \$750 gain is deemed made on the sale of 50 shares out of the 100 share lot acquired on April 1, 2013, and is short-term capital gain.

Example 4:

The facts are the same as Example 3 except that, on January 29, 2013, T validly revokes his February 1, 2012 election to determine the basis of R Company stock using average cost, and notifies F to determine the basis of such stock using the first-in, first-out method. The basis of the 100 shares sold on March 3, 2012 is therefore determined as though the average cost method had never been elected. Under the first-in, first-out method elected by T, the shares sold are those purchased on March 1, 2012 at a cost of \$140 per share, resulting in a long-term capital loss of \$20 per share (\$120-\$140) or \$2,000.ⁿ⁷⁴ The 150 shares sold on August 1, 2013 for \$120 per share would be deemed to come first, from the 100 share lot purchased on July 1, 2012 for \$100 per share, producing a long-term capital gain of \$20 per share (\$120-\$100) or \$2,000 (100 shares x \$20), and second, from the sale of 50 of the 100 shares purchased by T two months earlier, on June 1, 2013, for \$90 per share, resulting in short-term gain of \$30 per share (\$120-\$90) or a total short-term capital gain of \$1,500 (50 shares x \$30). Note that the proposed regulations do not preclude T from re-electing the average cost method of determining the basis of the R Company stock at any time after revoking the original election, but the new election can only be made effective prospectively.ⁿ⁷⁵

Example 5:

The facts are the same as Example 3 except that, on March 15, 2013, T changes from the average cost method to the first-in, first-out method of determining the basis of R Company stock in his account with F. T cannot revoke the average cost method election retroactively since R Company stock has already been sold out of the account on March 1, 2013 (and the one-year revocation period has expired without extension by F), but T can still change from the average cost method to another permissible method for future sales of R Company stock with the consent of the Commissioner. For purposes of applying the newly elected first-in, first-out method, stock in the account keeps the same basis immediately after the change it had under the average cost method immediately before the change.ⁿ⁷⁶

The 200 shares of R Company stock in T's account immediately before the sale of 150 shares on August 1, 2013 come from two different lots: 100 shares attributable to a purchase on July 1, 2012 at \$100 per share, and 100 shares acquired on June 1, 2013, at \$90 per share. The 100 shares attributable to the July 1, 2012 purchase had a basis under the average cost method, immediately prior to T's March 15, 2013 change in method, of \$120 per share (see Example 1 above); accordingly, for purposes of applying the newly elected first-in, first-out method, the basis of each of those shares remains \$120.ⁿ⁷⁷ The basis of the 100 shares purchased on June 1, 2013, after the change in method, is their actual cost, \$90 per share. Therefore, the basis of the 150 shares of R Company stock sold by T on August 1, 2013 is determined under the first-in, first-out method as follows: 100 shares are sold out of the lot acquired on July 1, 2012 at an average basis of \$120 per share, and the remaining 50 shares are sold out of the 100-share lot acquired on June 1, 2013, which has a cost basis of \$90 per share. Since the August 1, 2013 sale is executed at a sales price of \$120 per share, the first-in first out method produces no gain or loss on the sale of 100 shares out of the July 1, 2012 lot ($\$120 - \$120 = 0$), and a \$1,500 short-term capital gain on the sale of 50 shares out of the June 1, 2013 lot ($\$120 - \$90 = \$30 \times 50 \text{ shares} = \$1,500$).

[9] Information Reporting of Securities Transactions By Brokers.

Since 1983, securities brokers have been required to file information returns with the Internal Revenue Service reporting the gross proceeds from each sale of securities effected by the broker on behalf of a customer along with the customer's name, address, taxpayer identification number, and date of sale.ⁿ¹ Each customer is entitled to receive a written statement from the broker containing the information provided to the Internal Revenue Service no later than February 15 of the year following the year in which the sale occurred.ⁿ²

Beginning in 2011, Section 403 of the Energy Improvement and Extension Act of 2008ⁿ³ requires brokers presently obligated to report the gross proceeds from the sale of customer securities to also report, in connection with every sale of "covered securities," the adjusted basis of the securities sold and whether gain or loss on the sale was long-term or short-term.ⁿ⁴ In general, the term "covered securities" initially refers to shares of corporate stock purchased in an account on or after January 1, 2011.ⁿ⁵ Stock in a regulated investment company (mutual fund) and corporate stock acquired in connection with a dividend reinvestment plan are exceptions to this rule and will not be considered "covered securities" unless purchased on or after January 1, 2012.ⁿ⁶ Other types of securities, (including notes, bonds, debentures and other evidence of indebtedness, commodity contracts, and derivatives), will be classified as "covered securities" subject to the new reporting rules if purchased on or after January 1, 2013.ⁿ⁷

If the broker's customer sells covered securities that were acquired through a sale transaction in the same account, the broker calculates the stock's initial basis by using the total amount paid by the customer or credited against the customer's account for the stock sold, increased by commissions and transfer taxes related to its acquisition.ⁿ⁸ If the covered securities are shares in a regulated investment company or stock acquired in connection with a dividend reinvestment plan, and the owner has elected to use the average cost method of determining basis (or the owner has not designated any method of determining basis and the broker uses the average cost method as its "default method" for such securities), initial basis is determined using the average basis of all identical shares in the account.ⁿ⁹

In determining adjustments to initial basis, the broker is required to take into account organizational actions of the issuer affecting the basis of the security (*e.g.*, stock splits, mergers and acquisitions), but only if such actions have been reported by the issuer as prescribed by *IRC Section 6045B* and the regulations thereunder.ⁿ¹⁰ Otherwise, the broker is not required to consider the effect on basis of transactions, elections or events occurring outside the account,ⁿ¹¹ though it is permitted to take account of outside transactions in calculating adjusted basis and holding period if it chooses to do so.ⁿ¹²

Example 1:

The "wash sale" provisions of *IRC Section 1091*, discussed in detail at § 2.07[3], *infra*, provide that if stock is sold at a loss and substantially identical stock is purchased within 30 days before or 30 days after the sale date, the loss is disallowed and the basis of the repurchased stock equals the basis of the stock sold at a loss, adjusted for any difference between the purchase price of the stock sold and the purchase price of the repurchased stock. So, if T purchases 100 shares of C Company stock for \$1,000 on February 1, 2011, sells those shares on March 1, 2011 for \$900; and repurchases 100 identical shares for \$950 on March 15, 2011, the \$100 loss on the March 1 sale is disallowed and the 100 shares repurchased on March 15 receive a basis of \$1,050 (\$1,000 basis of shares sold on March 1, 2011 plus \$50 difference between \$900 cost of shares sold on March 1 and \$950 cost of shares repurchased on March 15, 2011). If the 100 repurchased shares are sold on July 1, 2011 for \$1,000, and there are no further repurchases, T recognizes a \$50 loss at that time (\$1,000 proceeds less \$1,050 adjusted basis).

Suppose that the original 100 share lot of C Company stock was purchased and sold in T's account with broker F, while the repurchase and later sale of 100 identical shares were made in T's account with broker G. Whether or not F has knowledge of T's repurchase of identical stock in an account with G within 30 days of the March 1 sale, F's Form 1099B may report a \$100 short-term capital loss on the March 1, 2011 sale based solely on F's own account records.ⁿ¹³ T would be responsible for reporting the transaction correctly on his return for the year.ⁿ¹⁴ Similarly, G's Form 1099B for the July 1, 2011 sale of the stock, prepared consistently with its account records, would show gross proceeds of \$1,000 and an adjusted basis of \$950, producing a short-term capital gain on the sale of \$50. G can report the transaction in that manner even if T provides G with complete information regarding the transactions in the account with F that implicate the wash sale provisions. However, either F or G is permitted (but not required) to use relevant information from outside the account in preparing Form 1099B so long as they do not know and have no reason to know that the outside information is incorrect. Thus, using the information obtained from T, G may report an adjusted basis of \$1,050 for the C Company shares sold by T on July 1 (\$1,000 carryover basis of T's original 100 share lot + \$50 increase in the purchase price of the repurchased stock) instead of the \$950 cost basis in its own account records, which, when compared with gross proceeds of \$1,000, produces a \$50 loss rather than a \$50 gain on the July 1 sale.ⁿ¹⁵

Example 2:

The facts are the same as in Example 1, except that T has two accounts with G, Account A and Account B; the 100 shares of C Company stock sold on March 1, 2011 are purchased as well as sold in Account A; and the repurchase of 100 shares of identical C Company stock on March 15, 2011 and the sale of those shares on July 1, 2011 take place in Account B. G may report the adjusted basis of the 100 C Company shares sold out of Account B on July 1, 2011 without regard to the wash sale provisions since the sale that triggered those provisions was made in Account A.ⁿ¹⁶ G may instead choose to apply the wash sale rules to the July 1, 2011 sale as though the sale and repurchase transactions took place in the same account, in which case G may recalculate the basis of the 100 C Company shares in accordance with the wash sale provisions.ⁿ¹⁷

Example 3:

The facts are the same as in Example 1 except that all of T's purchases and sales of C Company's stock take place in a single account with G. In these circumstances, where all the transactions affecting the basis of the C Company stock sold on July 1, 2011 have taken place in the same account, G is required to take the March 1 sale and March 15 repurchase into account in reporting the adjusted basis of the C Company stock sold on July 1; in addition, G must report the loss disallowed under *IRC Section 1091* as well as the gross proceeds and adjusted basis of the C Company stock sold on March 1.ⁿ¹⁸

Brokers are not required to report the adjusted basis and holding period of "noncovered securities" (for example, corporate stock acquired in the customer's account prior to January 1, 2011), regardless of when they are sold.ⁿ¹⁹ Further, if the broker's customer was an "exempt recipient" within the meaning of *Section 1.6045-1(d)(3)* of the Regulationsⁿ²⁰ at the time securities were acquired but the customer loses its exempt recipient status before the securities are sold, the securities are treated as "noncovered securities" and the broker need not report their adjusted basis or holding period on the information return that will be required when the securities are sold.ⁿ²¹ In either case, if the broker does not report adjusted basis and holding period information it is instructed to indicate on the information return that the reported sale is a sale of noncovered securities.ⁿ²² Once again, the proposed regulations allow a broker to volunteer adjusted basis and holding period information on returns relating to sales of noncovered securities even though not required to do so, and provide that in such circumstances penaltiesⁿ²³ will not be imposed for a failure to report basis and holding period information correctly as long as the broker has indicated on the information return that the reported sale is a sale of a noncovered security.ⁿ²⁴

If a broker sells securities acquired in the customer's account through a non-sale transfer, the broker will have to look outside its account records for information concerning the securities' initial basis and holding period. The mechanism provided by the statute for supplying this information is a transfer statement, which the transferor must prepare and provide to the receiving broker no later than 15 days after the settlement date of the transfer, provided the transferee is a broker and the transfer is effected by another broker, a professional custodian of securities or any issuer of securities.ⁿ²⁵ If the securities transferred are covered securities, the transferor must calculate the adjusted basis and holding period of the transferred securities in the same manner as a broker selling securities on behalf of a customer, except that the transferor need not take into account the effect on the basis of the transferred securities of organizational actions reported on issuer statements pursuant to *IRC Section 6045B*.ⁿ²⁶ If the transferred securities are noncovered securities,ⁿ²⁷ adjusted basis and holding period need not be included in the transfer statement, but other information regarding the transfer must still be supplied and the transfer statement must indicate that the securities transferred are noncovered securities.ⁿ²⁸

What if a broker receives securities on behalf of a customer in a non-sale transfer but does not receive the transfer statement required by *IRC Section 6045A*? Once the due date for receipt of the transfer statement has past and the broker has not received such a statement, or has received an incomplete statement, the broker is required to notify the transferor and request a complete statement. This request need not be made more than once. If a complete transfer statement is not received after making the request, the broker may treat the transferred securities as noncovered securities when they are sold. If the broker subsequently receives a complete transfer statement after the sale indicating that the securities sold were "covered securities," the broker must file a corrected Form 1099-B, if necessary, within 30 days of receiving the transfer statement.ⁿ²⁹

Additional information must be included in the transfer statement when securities are transferred pursuant to an inheritance. The transfer statement must indicate that the transfer consists of an inherited security, report the date of death as the original acquisition date, and report adjusted basis according to instructions or valuations provided by an authorized representative of the estate.ⁿ³⁰ If an authorized

1-1 Taxation of Securities Transactions § 1.04

estate representative does not provide such instructions or valuations at the time the transfer of the securities is requested, the transferor must ask for such instructions or valuations before preparing the transfer statement, but need not ask more than once.ⁿ³¹ If no instructions or valuations are forthcoming from the estate the transferor may prepare the transfer statement without information as to date of death or basis as though the securities transferred were noncovered securities, but must still identify the transferred securities as inherited securities.ⁿ³²

When a non-sale transfer of securities from one account to another effects a change in ownership other than by reason of inheritance, the transfer statement must indicate that the securities are gifts, report the date of the gift and the fair market value of the securities on that date, and report the adjusted basis and original acquisition date as equal to the donor's adjusted basis and original acquisition date.ⁿ³³ However, the date of the gift need not be reported if it is not known to the transferor (no further inquiries are required), and the fair market value of the securities on the date of the gift need not be reported if such fair market value is neither known nor reasonably ascertainable at the time the transfer statement is prepared. If the gift securities are subsequently transferred to a different account of the donee in a non-sale transaction, the transfer statement prepared for the latter transfer must include the information regarding the gift found in the original transfer statement as well as any information regarding date of gift and fair market value of the securities known to the second transferor that was not included in the original transfer statement.ⁿ³⁴

While a short sale of securities is literally a "sale" and would normally require the selling broker to file an information return, information regarding the adjusted basis and holding period of the securities sold cannot be determined, and therefore cannot be reported, until the short sale is closed by the customer's delivery of securities to cover the short sale.ⁿ³⁵ Brokers originally were required to file an information return in the year the short sale was effected, when only the gross proceeds of sale had to be reported on the return. Under the new reporting rules, if the short sale is entered into on or after January 1, 2010, brokers are instructed to defer filing an information return until the year the short sale is closed.ⁿ³⁶ Whether the broker is required to report adjusted basis and holding period depends on whether the customer uses "covered securities" or "noncovered securities" to close the short sale.ⁿ³⁷ Further, since a short sale is not considered closed for tax purposes by the short seller's delivery to the broker of securities borrowed from another person,ⁿ³⁸ no information return is required at such time.ⁿ³⁹ If the borrowed securities are transferred to the short seller's account by a second broker, the latter must provide a transfer statement notifying the original broker that the transferred securities have been borrowed. The original broker is then required to furnish a statement to the transferor which includes, among other information, the date of the short sale and the gross proceeds of the sale. The transferor broker becomes responsible for filing an information return with the Internal Revenue Service, using in part the information received from the original broker, when it receives securities from the customer in a transaction that finally closes the short sale for tax purposes.ⁿ⁴⁰

Example:

On December 20, 2010, T opens a short sale of corporate stock (not stock in a regulated investment company or acquired in connection with a dividend reinvestment plan) in an account with broker B1. T satisfies his obligation to B1 by borrowing the same quantity of identical stock in the same corporation from broker B2 and having B2 transfer the stock into T's account with B1 on January 20, 2011. T purchases identical corporate stock on March 1, 2011 in his account with B2 which he uses to satisfy his obligation to B2, closing the short sale. B2 is required to furnish B1 with a transfer statement indicating that the stock transferred into T's account with B1 on January 20, 2011, was borrowed from B2. B1 is required to furnish a statement to B2 reporting the gross proceeds from T's December 20, 2010 short sale, the date the short sale was opened, the CUSIP number of the stock T borrowed from B1 to open the short sale, the date B2 initiated the transfer of stock as reported on B2's transfer statement, and the name

and contact information of B1, B2 and T. Since the short sale was effected on or after January 1, 2010, the information return with respect to the short sale is to be filed with the Internal Revenue Service in the year that T closes the short sale (2011), not the year the short sale is effected (2010). Moreover, the return is filed by B2, not B1, since T covered the short sale by delivering securities to B2 in an account with B2. Finally, B2 must include in the information return the adjusted basis and holding period of the stock used by T to close the short sale (in addition to the date of the short sale and the gross proceeds of sale, as determined by the statement previously furnished to B2 by B1). The stock used by T to close the short sale is a "covered security" since it is corporate stock (other than regulated investment company or dividend reinvestment plan stock) acquired on or after January 1, 2011. Had T used stock purchased prior to January 1, 2011 to cover the short sale, on the other hand, the stock would have been a "noncovered security" and B2 would not be required to report basis and holding period information, even though the short sale was covered after January 1, 2011.ⁿ⁴¹

FOOTNOTES:

(n1)Footnote 1. *Treas Reg § 1.1012-1(a)*. If a debt instrument is issued in exchange for property, the cost of the property that is attributable to the debt instrument is the issue price of the debt instrument as determined under *Treas Reg § 1.1273-2(b)* or *Treas Reg § 1.1274-2(b)*, whichever is applicable. If, however, the issue price of the debt instrument is determined under *IRC § 1273(b)(4)*, the cost of the property attributable to that debt instrument is its stated principal amount reduced by any unstated interest (as determined under *IRC § 483*). *Treas Reg § 1.1012-1(g)*.

If a tax-exempt contingent payment debt instrument, or a tax-exempt variable rate instrument that provides for interest-based or revenue-based payments, is issued for property, the cost of the property that is attributable to the obligation is the sum of the present values of the noncontingent payments. *Treas Reg § 1.1012-1(g)(2)*.

(n20)Footnote 1. *Reg § 1.1053-1(b)*.

(n21)Footnote 1. This is the result if the gift was made prior to Jan 1, 1921. *IRC § 1015(c)*.

(n22)Footnote 2. In *Taft v Bowers*, 278 US 470 (1929) , the Supreme Court denied the taxpayer's contention that it was unconstitutional for the donee to be taxed on the increase in value during the period the property was held by the donor.

The burden of proving the donor's basis rests with the taxpayer. *Gibson v Commr*, TC Memo 1981-240 ; *Hamilton v Commr*, TC Memo 1974-310 .

(n23)Footnote 3. *IRC § 1015(a)*.

(n24)Footnote 4. *IRC § 1015(d)*. No increase is permitted if gift taxes due were not paid. *Church v Commr*, TC Memo 1978-295 .

(n25)Footnote 5. *IRC § 1015(d)(1)(A)*.

(n26)Footnote 6. *IRC § 1015(d)(1)(B)*. The basis is adjusted as of September 2, 1958.

(n27)Footnote 7. The "total gift tax paid" is the amount of tax due as per the gift tax return on which the gift is reported. *IRC § 1015(d)(2)*.

(n28)Footnote 8. *IRC § 1015(d)(2)*; *Reg § 1.1015-5(b)*. The specific exemption was repealed effective Jan 1, 1977.

(n29)Footnote 9. For gifts made after 1981, the annual exclusion is \$10,000.

(n30)Footnote 10. The amount of the gift was \$20,000 (total gift of \$23,000 less \$3,000 annual exclusion), and the

amount of total taxable gifts for the year without deducting the specific exemption, \$50,000. Substituting these values in the formula we find:

$$\begin{array}{r} \$20,000 \\ \$50,000 \end{array} \times \$1,200 = \$480$$

Determination of gift tax paid with respect to the gift becomes more complex when a donee receives more than one gift of property from the same donor in the same year. See *Reg § 1.1015-5(b)* and the examples contained therein.

(n31)Footnote 11. *IRC § 1015(d)(6)(A)*.

(n32)Footnote 12. *IRC § 1015(d)(6)(B)*.

(n33)Footnote 13. *Reg § 1.1015-4(a)*.

(n34)Footnote 14. *IRC § 2512(b)*.

(n35)Footnote 15. *160 F2d 812 (2d Cir 1947)*.

(n36)Footnote 16. *IRC § 1015(e)* states that the basis of property obtained in a transfer between spouses governed by *IRC § 1041* is to be determined under *IRC § 1041(b)(2)* and not *IRC § 1015*. An important difference in result occurs when the transferred property has a fair market value less than the transferor's basis. Under *IRC § 1015*, the transferee's basis for determining loss is the fair market value of the property on the date of transfer; the basis for determining gain is the transferor's basis. Under *IRC § 1041*, the transferor's basis becomes the transferee's basis for all purposes.

(n37)Footnote 1. *IRC § 2032* is the provision which presently allows the alternate valuation election. If application of the special valuation rule of *IRC § 2032A* (relating to certain real property owned by the decedent) is elected, the basis of the property is that value.

The Economic Growth and Tax Relief Reconciliation Act of 2001 ("EGTRRA") Pub L No 107-16, which repealed the federal estate tax for the individuals who die in the year 2010 only, also created a limited stepped-up basis for such decedents. Under *IRC § 1022(b)*, for individuals who die in 2010, the maximum step-up in basis is generally \$1.3 million, or \$3 million in the case of a bequest to a surviving spouse or to a qualified terminable interest property trust for the benefit of the surviving spouse. These rules should be watched closely for future legislative changes relative to federal taxation of estates.

The basis of property subject to an option exercisable only after the optionee's death is determined under *IRC § 1014(a)*, taking into account the existence of the option on the property. *Rev Rul 71-265, 1971-1 CB 223*.

(n38)Footnote 2. *IRC § 1014(b)(2), (3)*.

(n39)Footnote 3. *IRC § 1014(b)(4)*.

(n40)Footnote 4. *IRC § 1014(b)(6)*.

(n41)Footnote 5. *IRC § 1014(b)(9)*. The provision does not apply to "annuities described in section 72," but only if the annuity was purchased on or after Oct 21, 1979. *IRC § 1014(b)(9)(A)*; *Rev Rul 79-335, 1979-2 CB 292*. A deferred variable annuity contract acquired after Oct 21, 1979 in a tax-free exchange for an annuity purchased before that date is not entitled to a step-up in basis. *Rev Rul 85-139, 1985-2 CB 29*; *Ltr Rul 9346002*; *Ltr Rul 9245035*.

A surviving joint tenant can claim a stepped-up basis to the extent that the subject property was includable in the estate of the deceased joint tenant. For property acquired before 1977 (the effective date of *IRC § 2040(b)*), the amount

includable is a function of the portion of the total consideration furnished by the decedent in the acquisition of the property. Thus, if the decedent furnished all of the consideration, all of the property is includable and the step up in basis applies to the entire property. For years governed by *IRC § 2040(b)*, the 50-percent inclusion rule for qualified joint interests limits the application of *IRC § 1014* to one half of the property; the balance of the property retains its original basis. See *Gallenstein v US*, 68 AFTR2d 91-5721 (ED Ky 1991) , *affd* 975 F2d 286 (6th Cir 1992) ; *Hahn v Commr*, 110 TC 140 (1998) . The Service has acquiesced in *Hahn* and will no longer litigate that *IRC § 2040(b)(1)* applies to joint interests created before Jan 1, 1977, where the deceased joint tenant died after Dec 31, 1981.

Foreign property inherited by a US resident from a nonresident alien is entitled to a basis equal to its fair market value at the decedent's death even though the property is not includable in the decedent's federal estate tax return. *IRC § 1014(b)(9)* has no application to foreign situs property owned by a nonresident alien that is acquired from a decedent by a means described in any other paragraph of *IRC § 1014(b)*. *Rev Rul 84-139, 1984-1 CB 168* .

(n42)Footnote 6. An audit of a decedent's federal estate tax return produced an increase in the gross estate to reflect the value of an interest in stock transferred to a trust in contemplation of death. A contest of the issue resulted in a settlement of the additional tax due. The settlement was not based on a compromise of the fair market value of the stock, nor was it based on the exclusion of specific shares of stock. However, it did have the effect of excluding a portion of each share of stock held by the trust from the gross estate. Accordingly, only the portion of each share of stock that generated additional estate tax liability could take a basis equal to fair market value. The portion of each share that did not produce any additional estate tax would resume a basis determined under either *IRC § 1012* (cost basis), or *IRC § 1015* (basis of property acquired by gift). *Rev Rul 72-441, 1972-2 CB 465* .

(n43)Footnote 7. *IRC § 1014(a)*.

(n44)Footnote 8. An important consequence of this rule is that gain on installment obligations held by a decedent is income in respect of a decedent and that the person succeeding to the decedent's interest in the obligations does not receive a stepped-up basis in them. *IRC § 691(a)(4)*; *Holt v US*, 39 Fed Cl 525 (1997) .

(n45)Footnote 9. *Reg § 1.451-1(a)* (1957).

(n46)Footnote 10. *Reg § 1.691(a)-1(b)* (1957).

(n47)Footnote 11. *IRC § 691(a)*.

(n48)Footnote 12. The deduction of any estate tax attributable to the item included in the recipient's gross income is permitted by *IRC § 691(c)*. Congress considered this a substitute for *IRC § 1014(a)* treatment. S Rep No 1622, 83d Cong, 2d Sess, 107 (1954).

(n49)Footnote 13. *IRC § 1014(b)(5)*. The same rule applies to marketable passive foreign investment stock for which a mark-to-market election is in effect. *IRC § 1296(i)*. The mark-to-market election is discussed in § 20.05A[2].

There is also no step-up if stock or securities are acquired in a manner that would normally call for application of *IRC § 1014(b)(9)*. *IRC § 1014(b)(9)(B)*.

IRC § 1014(b)(5) applies whether or not the income of the foreign personal holding company was included in income by a US taxpayer. *Ltr Rul 9110019* .

(n50)Footnote 14. The legislative history underlying *IRC § 1014(e)* expresses Congress' concern that an individual could transfer appreciated property to a family member immediately prior to the family member's death anticipating that, on the family member's death, the individual would receive the property back by devise or bequest. Under the circumstances, there is little substance to the initial transfer, because of the short period of time between the two transfers. H Rep No 201, 97th Cong, 1st Sess 188 (1981). See also *Ltr Rul 9308002* .

(n51)Footnote 15. *Treas Reg § 1.1014-3(a)*.

The value of an asset was overstated on the estate tax return of a decedent. No estate tax was due because of the taking of the marital deduction. The beneficiary adopted the inflated value as the basis of the asset for income tax purposes. Held, such action can subject the beneficiary to the penalty for valuation overstatements prescribed by *IRC § 6662*. *Rev Rul 85-75, 1985-1 CB 376* . At the time of the ruling, the applicable provision was *IRC § 6659*.

A husband and wife residing in a community property state held treasury bonds that could be redeemed at par in payment of federal estate taxes. If so used, the bonds must be included in the decedent's gross estate at their par value. However, since the bonds were community property, only-one half of the total holding could be used to pay estate taxes; the other half was deemed owned by the surviving spouse. The proper measure of basis for the half deemed owned by the surviving spouse was fair market value at the time of the husband's death. *Neuhoff v Commr, 75 TC 36 (1980)* , *affd 669 F2d 291 (5th Cir 1982)* ; *Rev Rul 76-68, 1976-1 CB 216* .

(n52)Footnote 16. *Rev Rul 54-97, 1954-1 CB 113* . The courts had arrived at this position prior to the Service's ruling. Eg, *Rogers v Commr, 31 BTA 994 (1935)* , *affd 107 F2d 394 (2d Cir 1939)* .

(n53)Footnote 17. *Hess v US, 537 F2d 457 (Ct Cl 1976)* , *cert denied 430 US 931* ; *McMillan v US, 1964-2 USTC P 9720 (SD W Va 1964)* . The objection actually rests on some duty of consistency since the element of reliance required by the doctrine of estoppel is lacking. *Beltzer v US, 495 F2d 211 (8th Cir 1974)* (Commissioner correctly invoked doctrines of quasi-estopped and duty of consistency); *Alamo Natl Bank v Commr, 95 F2d 622 (5th Cir 1938)* .

The duty of consistency was applied in *Janis v Commr, 461 F3d 1080 (9[th] Cir 2006)* , to require the taxpayers to use, as the basis for property acquired from the decedent, the fair market value of the property as reported for estate tax purposes. The executors of the estate had employed the concept of "blockage" to reduce the value of the property for estate tax purposes. They sought to use the value of the property without reduction of the discount as the basis for gain, but were rebuffed in that attempt. The Second Circuit reached the same result in the case of another beneficiary of the estate. *Janis v Commr, 469 F3d 256 (2d Cir 2006)* .

In *Shook v US, 713 F2d 662 (11th Cir 1983)* , estoppel was not extended to an estate beneficiary who merely indicated approval of an executor's handling of the estate; the executor had total control and the beneficiary none. Facts similar to *Shook* can be found in *TAM 199933001* .

(n54)Footnote 18. *Rogers v Commr, 31 BTA 994 (1935)* , *affd 107 F2d 394 (2d Cir 1939)* ; *Northport Shores, Inc v Commr, 31 BTA 1013 (1935)* , *nonacq 1935-1 CB 34* . See also *Ford v US, 276 F2d 17 (Ct Cl 1960)* .

(n55)Footnote 1. An exception is the increase in basis on account of gift tax paid. *IRC § 1015(d)*. This is deemed an adjustment to basis. *IRC § 1015(d)(4)*.

(n56)Footnote 2. *IRC § 1001(a)*.

(n57)Footnote 3. *IRC § 1016(a)(2)*.

(n58)Footnote 4. *IRC § 1016(a)(1)*; *Treas Reg § 1.1016-2(a)*.

(n59)Footnote 5. *IRC § 263*; *Reg § 1.263(a)-2(c)*; *Berger v Commr, 1954 TC Memo Lexis 287* , *affd per curiam 234 F2d 959 (2d Cir 1956)* . *Prop Treas Reg 1.263(a)-2(d)(2)*.

(n60)Footnote 1. *Reg § 1.61-6(a)*.

(n61)Footnote 2. *Id*, Examples (1) and (2).

(n62)Footnote 3. See *Fisher v US*, 82 Fed Cl 780 (2008) , which collects the cases and traces the history of this branch of the open transaction doctrine.

In *Piper v Commr*, 5 TC 1104 (1945) , acq 1946-1 CB 4 , the taxpayer acquired a package of stock and warrants in a reorganization exchange, and later sold the warrants for less than the basis of the stock given up in the exchange. Holding that the taxpayer realized no gain on the sale of the warrants, the Court said: "Where there is no market value, as is the situation with respect to the warrants, there is no practical basis upon which an allocation can be made and the taxpayer is entitled to recover his entire original basis before gain or loss will be recognized." 5 TC at 1111-1112 .

The text at § 1.03[2][a] discusses the open transaction doctrine as applied to the "amount realized" side of the gain or loss equation when property received in a sale or exchange has no readily ascertainable fair market value.

(n63)Footnote 4. See *Pierce v US*, 49 F Supp 324 (Ct Cl 1943) ; *Orvilletta v Commr*, 47 BTA 10 (1942) . The property at issue in *Pierce* and *Orvilletta* was "stapled stock"--i.e., stock in two corporations that could not be purchased separately but only as part of a unit consisting of one share in each of the corporations. Subsequent to the taxpayer's acquisition of the stapled units, the restrictions on separate sales were removed and the taxpayer sold stock in one of the corporations. Since there was no market for the shares of either corporation alone when the taxpayer acquired the multi-unit property, the courts found it "impossible to determine separate cost bases for the component parts of the inseparable units of...stock...Thus, [taxpayers] can only compute the gain or loss after the disposition of both parts of the unit..." *Orvilletta v Commr*, 47 BTA at 15 .

(n64)Footnote 1. *Treas Reg* § 1.1001-1(e); § 1.02[3][b], *supra* .

(n65)Footnote 2. See *Estate of Bullard v Commr*, 87 TC 261, 273-281 (1986) , which gives a full account of the legislative history of *IRC* § 1011(b). Cf § 1.02[6], *supra* (when part of a multi-unit property is sold, gain or loss on the sale of the portion disposed of must be calculated by allocating basis between the sold and retained portions of the property).

(n66)Footnote 3. Some of those limitations are reviewed in § 1.02[3][c], *supra* .

(n67)Footnote 4. *Treas Reg* § 1.1011-2(a)(2).

(n68)Footnote 5. *Treas Reg* § 1.1011-2(a)(2); *Hodgdon v Commr*, 98 TC 424 (1992) .

(n69)Footnote 6. *Hodgdon v Commr*, 98 TC 424, 432-434 (1992) .

(n70)Footnote 7. It is apparent that the two approaches will often arrive at the same net tax result. However, the two alternatives can also produce different tax results; for example, when A has otherwise unusable capital losses against which to offset the short-term capital gain that results from the alternative view. When a taxpayer makes a bargain sale of property to a private nonoperating foundation, unrealized long-term capital gains reduce the charitable contribution deduction on a dollar-for-dollar basis, see *IRC* § 170(e)(1)(B), so increasing the amount allowable as a charitable contribution deduction at the cost of recognizing additional capital gain under the alternative view could well be a good trade-off. See *Estate of Bullard v Commr*, 87 TC 261 (1986) (where the taxpayer successfully argued for the alternative view, resulting in an increase in capital gains resulting from the application of the allocation of basis rules in *IRC* § 1011(b) which was more advantageous in the taxpayer's circumstances than complete disallowance of a charitable contribution deduction and recognition of capital gain by reason of *IRC* § 1011(b)).

(n71)Footnote 8. *Estate of Bullard v Commr*, 87 TC 261 (1986) . A majority of the Tax Court found the original regulations "unreasonable" because, in the Court's view, they were inconsistent with *IRC* § 1011(b) and its legislative history, producing "arbitrary and capricious" results. "If, for example, the amount of the contribution (excess of fair market value over sales price) is \$1 more than the section 170(e)(1) amount [the amount of gain that would exactly offset the charitable contribution deduction if the transaction were viewed as a whole], the regulations prescribe the

proper basis and gain allocations between the contributed and sold portions of the property. If the sales price is increased by \$1, however, (in which case section 170(e)(1) as interpreted by the regulations reduces the contribution to zero), the distortion occurs in full. Certainly this is an "arbitrary and capricious" effect, and Congress could not have intended that such insignificant economic differences would result in such dramatic differences in tax liability." *Estate of Bullard v Commr*, 87 TC 261, 280-281 .

(n72)Footnote 9. *Treas Reg* § 1.1011-2(a)(1). See also *Treas Reg* § 1.170A-4(c)(2)(i).

(n73)Footnote 1. Beginning January 1, 2011, brokers previously required to report to the Internal Revenue Service the gross proceeds from sales of stock by their customers are also required to report the adjusted basis of the stock sold and whether gain or loss on the sale is long-term or short-term. See *IRC* § 6045(g); § 1.04[9], *infra* . The Energy Improvement and Extension Act of 2008, which amended *IRC* § 6045 to impose the new basis and holding period reporting requirements, also changed certain of the substantive basis rules so that brokers could more easily comply with the new reporting requirements, especially when the customer sells less than all of his holdings in a specific security. The changes to the basis rules made by the 2008 Act are discussed in this § 1.04[8], where they are sometimes referred to as the "2008 amendments."

(n74)Footnote 2. *Treas Reg* § 1.1012-1(c)(1); *Prop Treas Reg* 1.1012-1(c)(1). Although the Regulation refers to stock, it is expressly made applicable to bonds by *Treas Reg* § 1.1012-1(c)(6). It applies as well to "when issued" securities, *IT* 3858, 1947-2 CB 71, and to noncertificate shares. *Hall v Commr*, 92 TC 1027 (1989) . An attack on the validity of the Regulation was rejected in *Joseph Gann, Inc v Commr*, 701 F2d 3 (1st Cir 1983), *cert denied* 464 US 821.

(n75)Footnote 3. *Curtis v Helvering*, 101 F2d 40 (2d Cir 1939) (shares acquired by gift prior to the purchase of additional shares of the same security were the ones charged under the first-in, first-out rule). *Cf Helvering v Campbell*, 313 US 15 (1941) .

(n76)Footnote 4. *Forrester v Commr*, 32 BTA 745 (1935) .

(n77)Footnote 5. See *IRC* § 1012(c)(1) which, as amended by The Energy Improvement and Extension Act of 2008, explicitly provides that "the basis conventions prescribed by the regulations," including the first-in, first-out rule, "shall be applied on an account by account basis." See also *Bancitaly Corp v Commr*, 34 BTA 494, 507-508 (1936) . Compare *Canelo v Commr*, 41 BTA 713, 729-730 (1940) , where the taxpayer maintained a number of separate margin accounts with the same broker who combined the accounts for the purpose of applying the first-in, first-out rule because the broker had combined the accounts for the purpose of computing margin requirements, and the taxpayer "himself treated the several accounts ... as if they constituted but one single account". By frequently transferring securities and credit balances from one account to another the accounts had to be considered as one for the purpose of applying the first-in, first-out rule. *Canelo v Commr*, 41 BTA 713 (1940) .

(n78)Footnote 6. *GCM* 8426, IX-2 CB 92 (1930). See also *Millikan v Commr*, 83 F2d 213 (2d Cir 1936) . A deposit of shares in escrow under an agreement constituting an assignment of shares is a transfer of those shares for purposes of the first-in, first-out rule. *Malkan v Commr*, 54 TC 1305 (1970), *acq* 1971-1 CB 3.

(n79)Footnote 7. *Helvering v Campbell*, 313 US 15 (1941) .

(n80)Footnote 8. *Id*; *Helvering v Gambrill*, 313 US 11 (1941) .

(n81)Footnote 9. *GCM* 11743, XII-2 CB 31 (1933).

(n82)Footnote 10. *Treas Reg* § 1.1012-1(c)(1); *Prop Treas Reg* § 1.1012-1(c)(1). See also *Rev Rul* 72-415, 1972-2 CB 463 , prescribing a procedure for adequately identifying shares sold when the taxpayer holds shares acquired in more than one lot at different times or for different prices.

(n83)Footnote 11. *Treas Reg § 1.1012-1(c)(2)*. A numerical matching of shares purchased and sold is not the equivalent of actual delivery. *Beran v Commr, TC Memo 1980-119*.

(n84)Footnote 12. *Ibid.* The Supreme Court reached this result in *Davidson v Commr, 305 US 44 (1938)*. The taxpayer in that case instructed his broker to sell, and a bank holding the stock to deliver, shares which he had purchased in 1929 at an approximate cost of \$50 a share. The bank erred and delivered shares which had been acquired in earlier years for about \$4 a share. The Court, in holding that the actual fact of delivery controlled over the taxpayer's intention, denied the taxpayer's contention that an adequate identification was achieved by his instructions to the broker and bank, and that the bank's mistake should in no way change the result. In contrast, the taxpayer in *Kluger Associates, Inc v Commr, 69 TC 925 (1978), affd 617 F2d 323 (2d Cir 1980)*, was required to use the first-in, first-out method when the certificate delivered did not represent the shares identified as sold by the taxpayer.

(n85)Footnote 13. *Treas Reg § 1.1012-1(c)(3)(i)*. Similarly, adequate identification will be achieved when a taxpayer holds a single stock certificate representing stock from different lots and sells a part of the stock represented by the certificate through a broker or other agent, if the taxpayer specifies to the broker or other agent the particular stock to be sold and receives a written confirmation of such specification from the broker or other agent within a reasonable time thereafter. *Treas Reg § 1.1012-1(c)(3)(ii)*. If the taxpayer does not sell through a broker but deals directly with the purchaser, adequate identification is made if the taxpayer maintains his own written record of the particular stock he intended to sell. *Id.* Where the transfer is of a "book-entry security," i.e., certain government securities issued in the form of an entry made on the records of a Federal Reserve Bank, proper identification is made by specifying the unique lot number which the taxpayer has assigned to the lot containing the securities being transferred. *Treas Reg § 1.1012-1(c)(7)*.

(n86)Footnote 14. In *Rev Rul 67-436, 1967-2 CB 266*, the Internal Revenue Service held that an adequate identification made by the taxpayer at the time of delivery, occurring within four days of the date of sale, timely satisfied the requirement that identification of the stock sold be made at the time of sale or transfer. Treasury and the Internal Revenue Service have proposed adding a new paragraph (8) to *Treas Reg § 1.1012-1(c)* that would make explicit (consistently with *Rev Rul 67-436*, which would become obsolete) that an identification is timely if the taxpayer identifies the lot from which the shares are sold or transferred no later than the earlier of the settlement date or the time for settlement required by SEC rules. *Prop Treas Reg § 1.1012-1(c)(8)*. A standing order or instruction for the specific identification of stock would also be treated as a timely specification. In addition, *Prop Treas Reg § 1.1012-1(c)(9)* clarifies that a written confirmation of the taxpayer's instructions from a broker or other custodian can be made in electronic format. The proposed regulations, like the current regulations, do not specify a particular mode by which the taxpayer's instructions should be conveyed to the custodian; communication can be made orally, in writing, or by any other reasonable method. See Dept of the Treasury, "Basis Reporting by Securities Brokers and Basis Determination for Stock; Proposed Rules," *74 Fed Reg 67010*.

(n87)Footnote 15. *Treas Reg § 1.1012-1(c)(3)(i)*.

(n88)Footnote 16. *Rev Rul 61-97, 1961-1 CB 394*.

(n89)Footnote 17. *Helvering v Rankin, 295 US 123 (1935)*.

(n90)Footnote 18. *Treas Reg § 1.1012-1(c)(6)*.

(n91)Footnote 19. See *Treas Reg § 1.1012-1(c)(7)(iii)(a)*; *Prop Treas Reg § 1.1012-1(c)(7)(iii)(a)*.

(n92)Footnote 20. To adequately identify lots from which book-entry securities are sold, the taxpayer must assign lot numbers in numerical sequence to successive purchases of securities of the same loan title (series) and maturity date, although securities of the same loan title (series) and maturity date which are purchased at the same price on the same date may be included within the same lot. *Treas Reg § 1.1012-1(c)(7)(i)*. The unique lot number from which the securities are sold may be specified either in the taxpayer's written instructions or, in the case of a taxpayer in whose

name the book entry by the Federal Reserve Bank is made, in a list of lot numbers with respect to all book-entry securities on the books of the Federal Reserve Bank sold or transferred on that date by the taxpayer, provided such list is mailed to or received by the Federal Reserve Bank on or before its next business day. *Id.* The requirement that the taxpayer receive a written confirmation is satisfied if the taxpayer is furnished with a written advice of transaction by the Federal Reserve Bank or the person through whom the taxpayer sells or transfers the securities, which advice must specify the amount and description of the securities sold or transferred and the date of the transaction. *Treas Reg § 1.1012-1(c)(7)(ii)(a); Prop Treas Reg § 1.1012-1(c)(7)(ii).*

(n93)Footnote 21. *Treas Reg § 1.1012-1(c)(4)(i).* Proposed regulations clarify that when the trust or estate's stock is sold through a broker or other agent, the trustee, executor or administrator may adequately identify the lot from which the shares are sold by using the broker's confirmation method. *Prop Treas Reg § 1.1012-1(c)(4)(i)(c).*

(n94)Footnote 22. *Treas Reg § 1.1012(c)(4)(ii).*

(n95)Footnote 23. *Treas Reg § 1.1012(c)(4).*

(n96)Footnote 24. A "regulated investment company" is defined for this purpose as any domestic corporation (other than a personal holding company as defined in *IRC § 542*) which meets the limitations of *IRC § 851(b)* and *Treas Reg § 1.851-2*, and which is registered at all times during the taxable year under the Investment Company Act of 1940. *Treas Reg § 1.1012-1(e)(5).* Regulated investment companies are the subject of Ch 12.

(n97)Footnote 25. *Treas Reg § 1.1012-1(e)(1).*

(n98)Footnote 26. See fn 1, *supra*.

(n99)Footnote 27. See *IRC § 1012(d).*

(n100)Footnote 28. See *IRC § 1012(c)(1).*

(n101)Footnote 29. See *IRC § 1012(c)(2).*

(n102)Footnote 30. See Dept of the Treasury, "Basis Reporting by Securities Brokers and Basis Determination for Stock; Proposed Rules," 74 *Fed Reg* 67010, 67025-67029 (Dec 17, 2009) .

(n103)Footnote 31. *Treas Reg § 1.1012-1(e)(1)(i)(a).*

(n104)Footnote 32. *Treas Reg § 1.1012-1(e)(1)(i)(b).*

(n105)Footnote 33. *Treas Reg § 1.1012-1(e)(1)(ii).*

(n106)Footnote 34. *Treas Reg § 1.1012-1(e)(6).* The taxpayer's election to use average cost applies to all of the taxpayer's shares in the RIC, whether held in a single account or separate accounts. It does not, however, apply to accounts in which the taxpayer holds shares of gifted RIC stock the basis of which was greater than the stock's fair market value at the time of the gift, unless the taxpayer has filed a statement agreeing to use the lower fair market value as the gifted stock's basis in calculating average cost. See *Treas Reg § 1.1012-1(e)(1)(ii).*

(n107)Footnote 35. Stock acquired "in connection with" a DRP includes not only stock purchased with reinvested dividends but also the initial purchase of stock in the DRP, transfers of identical stock into the DRP, and additional periodic purchases of identical stock in the DRP. See *IRC § 1012(d)(4)(B); Prop Treas Reg § 1012-1(e)(6)(ii).*

(n108)Footnote 36. *IRC § 1012(d)(4)(A).* The proposed regulations define "identical stock" as stock having the same Committee on Uniform Security Identification Procedures ("CUSIP") number. *Prop Treas Reg § 1.1012-1(e)(4).* Dividends declared before or pending a merger, consolidation, spinoff or similar corporate action and subsequently paid

and reinvested in shares of stock in the successor entity or entities are considered reinvested in identical stock even though the CUSIP number of the successor entity's stock may be different. *Prop Treas Reg § 1.1012-1(e)(6)(iii)*. On the other hand, shares of corporate stock in a dividend reinvestment plan are not "identical" to shares of stock in the same corporation that are not in a dividend reinvestment plan, even though both have the same CUSIP number. *Prop Treas Reg § 1.1012-1(e)(4)*.

(n109)Footnote 37. *Prop Treas Reg § 1.1012-1(e)(6)(i)*.

(n110)Footnote 38. *Prop Treas Reg § 1.1012-1(e)(6)(i)*.

(n111)Footnote 39. Thus, to be eligible to use the average cost method, shares of stock acquired in connection with a DRP, like RIC stock, must be left in an account with a custodian or agent, *Prop Treas Reg § 1.1012-1(e)(1)(i)*, the account must contain identical stock acquired at different prices or bases, *Prop Treas Reg § 1.1012-1(e)(1)(ii)*, the account may not include gifted stock the basis of which in the hands of the donor is higher than its fair market value at the time of the gift unless the taxpayer files a statement agreeing to use the lower fair market value as the gifted stock's basis, *Prop Treas Reg § 1.1012-1(e)(8)*; and the taxpayer must make an election to apply the average cost method in the manner specified in the proposed regulations. See *Prop Treas Reg § 1.1012-1(e)(9)*. If the taxpayer withdraws from a DRP, or the plan administrator terminates the plan, the basis of each share of stock received by the taxpayer from the DRP will be the same as the average cost basis of such stock immediately before the withdrawal or termination, but the distributed stock is no longer considered acquired in connection with a dividend reinvestment plan and the taxpayer may not continue to use the average cost method with respect to such stock. *Prop Treas Reg §§ 1.1012-1(e)(6)(iv)* and *1.1012-1(e)(7)(v)*.

(n112)Footnote 40. Under *IRC § 6045(g)(3)*, a "covered security" is defined as any "specified security" acquired on or after the "applicable date" if the security was (1) acquired through a transaction in the account in which such security is held or (2) was a covered security in another account and was transferred into the account in which it is presently held with a statement providing details regarding the customer's basis and holding period in the security. A "specified security" means, among other things, any share of stock in a corporation, *IRC § 6045(g)(3)(B)(i)*, including a share of stock in a RIC or stock acquired in connection with a DRP. Although the "applicable date" for most corporate stock is January 1, 2011, in the case of any stock "for which an average basis is permissible" (namely, RIC and DRP stock), the applicable date is deferred to January 1, 2012. *IRC § 6045(g)(3)(C)(ii)*. The proposed regulations merely restate the statutory definition of a "covered security," see *Prop Treas Reg 1.6045-1(a)(15)*, but in addition define a "noncovered security" as a security that is not a "covered security." *Prop Treas Reg 1.6045-1(a)(16)*. RIC or DRP stock, although acquired by the taxpayer in an account on or after January 1, 2012, could nevertheless be a noncovered security under certain circumstances; namely, if the stock was transferred from another account in which the stock was a "noncovered security," or the stock was transferred from another account unaccompanied by a statement, ordinarily required by *IRC § 6045A*, containing the adjusted basis and holding period of the stock. See *Prop Treas Reg § 1.6045-1(a)(15)(iv)* and *Treas Reg § 1.1012-1(e)(10)(iv)*, Example 5.

(n113)Footnote 41. *Prop Treas Reg § 1.1012-1(e)(9)(i)*. For RIC or DRP shares that are covered securities, this replaces the previous procedure under which an election to use average cost is made by filing a statement with the taxpayer's return for the year in which the election first applies. However, the proposed regulations continue to require that the election to use the average cost method be made with the taxpayer's income tax return if the RIC or DRP stock to which the election relates is a noncovered security. *Prop Treas Reg § 1.1012-1(e)(9)(ii)*.

(n114)Footnote 42. *Prop Treas Reg § 1.1012-1(e)(9)(i)*.

(n115)Footnote 43. *Prop Treas Reg § 1.1012-1(e)(9)(i)*. If, for example, a taxpayer holds shares of two different RICs in the same account, the broker may be notified to use average cost to determine basis in the shares of one of the RICs and a different method of determining the basis of shares in the other RIC. *Prop Treas Reg § 1.1012-1(e)(10)(iv)*, Example 2.

(n116)Footnote 44. A taxpayer may use the average cost method for RIC or DRP stock in one account and a different basis determination method for identical stock in a different account, even if both accounts are held with the same broker. *Prop Treas Reg § 1.1012-1(e)(10)(i)*; *Prop Treas Reg § 1.1012-1(e)(10)(iv)*, Example 1. This contrasts with the current rule that an election to use average cost for RIC or DRP stock in one account applies as well to all other accounts in which identical stock is held, a rule the proposed regulations would continue to apply, however, to RIC or DRP shares sold or otherwise disposed of before January 1, 2012. *Prop Treas Reg § 1.1012-1(e)(10)(ii)*.

(n117)Footnote 45. See *Prop Treas Reg § 1.1012-1(e)(2)(ii)*. If the taxpayer does not validly elect a method for determining the basis of RIC or DRP stock held in a brokerage or other custodial account before selling such stock from the account, basis will be determined using the broker's default method. *Prop Treas Reg § 1.1012-1(e)(2)(i)*. Accordingly, if in the above example Broker B uses first-in, first-out as its default method, and does not receive notification to use average cost or another method for determining the basis of the transferred RIC or DRP shares, the basis of those shares will be determined under Broker B's first-in, first-out default method and not under the average cost method that the taxpayer elected when the shares were held by Broker A. Note that while, in the absence of taxpayer instructions to the contrary, brokers must use the first-in, first-out method as their default method for purposes of determining the basis of most customer securities, in the case of stock for which the average cost method of determining basis is permissible (viz, RIC or DRP stock), brokers may choose any permissible method as the default method, including average cost. See *IRC § 6045(g)(2)(B)(i)(I)* and *(II)*; *Prop Treas Reg § 1.1012-1(c)(1)*.

(n118)Footnote 46. Suppose, for example, that on March 1, 2014, a taxpayer transfers inherited stock in a RIC to a brokerage account in which the taxpayer also holds shares in the same RIC that were purchased in the account on or after January 1, 2012. Since inherited stock is not "acquired through a transaction in the account in which such security is held," *IRC § 6045(g)(3)(A)(i)*, the inherited RIC shares are noncovered securities that are deemed held in a separate account from the purchased RIC shares which are covered securities. See *Prop Treas Reg § 1.1012-1(e)(10)(iv)*, Example 5.

(n119)Footnote 47. Recall that the procedure for electing the average cost method is different depending on whether the RIC or DRP shares are noncovered securities (election made with tax return) or covered securities (election made by notifying broker). See *Prop Treas Reg §§ 1.1012-1(e)(9)(i)* and *(ii)*; n 43, *supra*.

(n120)Footnote 48. See *Prop Treas Reg § 1.1012-1(e)(10)(iv)*, Example 4.

(n121)Footnote 49. *IRC § 1012(c)(2)(B)*; *Prop Treas Reg § 1.1012-1(e)(11)*. The single account election may be made at any time. *Prop Treas Reg § 1.1012-1(e)(11)(iv)*. Once made, the single account election applies to all identical stock the taxpayer later acquires in the same account that is a covered security. *Prop Treas Reg § 1.1012-1(e)(11)(iii)*. However, if identical stock that is a noncovered security (for example, inherited stock) is subsequently transferred into the account, it will be treated as held in a separate account unless the RIC, DRP or broker makes another single account election to treat such stock as a covered security. See *Prop Treas Reg §§ 1.1012-1(e)(11)(iii)* and *1.1012-1(e)(11)(vi)*, Example 4.

(n122)Footnote 50. *Prop Treas Reg § 1.1012-1(e)(11)(i)*. The taxpayer must be notified by the RIC, DRP or broker making the single account election that the election has been made and that, as a consequence, all identical RIC or DRP stock in the account will be treated as covered securities regardless of when acquired. *Prop Treas Reg § 1.1012-1(e)(11)(v)*. The taxpayer has the right to receive a copy of the books and records maintained by the RIC, DRP or broker which reflect that a single account election has been made with respect to his account. *Prop Treas Reg § 1.1012-1(e)(11)(iv)*.

(n123)Footnote 51. *Prop Treas Reg § 1.1012-1(e)(11)(iv)*. The books and records must reflect the date of the election; the taxpayer's name, account number, and taxpayer identification number, the stock subject to the election, and the taxpayer's basis in the stock.

(n124)Footnote 52. *Prop Treas Reg §§ 1.1012-1(e)(11)(ii) and (iv).*

(n125)Footnote 53. *Prop Treas Reg §§ 1.1012-1(e)(11)(i) and (ii).* Stock for which accurate basis information is unavailable may not be included in the single account election and must be treated as held in a separate account. *Prop Treas Reg § 1.1012-1(e)(11)(ii).*

(n126)Footnote 54. *Prop Treas Reg § 1.1012-1(e)(9)(iii).*

(n127)Footnote 55. *Prop Treas Reg § 1.1012-1(e)(9)(iv).*

(n128)Footnote 56. *Treas Reg § 1.1012-1(e)(3)(i).*

(n129)Footnote 57. *Treas Reg § 1.1012-1(e)(3)(ii).*

(n130)Footnote 58. *Treas Reg § 1.1012-1(e)(4)(i).*

(n131)Footnote 59. *Treas Reg § 1.1012-1(e)(2).*

(n132)Footnote 60. The Explanation given in the preface to the proposed regulations states that elimination of the double category method resulted from public comments that the method was "not widely used" and could create "problems ... when shares are transferred between accounts that use different methods." See Dept of the Treasury, "Basis Reporting by Securities Brokers and Basis Determination for Stock; Proposed Rules," *supra*, 74 *Fed Reg* at 67016.

(n133)Footnote 61. *Prop Treas Reg § 1.1012-1(e)(7)(iii).*

(n134)Footnote 62. See *Prop Treas Reg § 1.1012-1(e)(10)(i)*. However, the taxpayer must apply *IRC § 1091* and the associated regulations (dealing with wash sales of substantially identical securities (see § 2.07[3] *infra*)) in computing average basis regardless of whether the stock or other security disposed of and the stock acquired are in the same account or in different accounts. By contrast, in applying the basis reporting rules imposed on brokers by the 2008 amendments to *IRC § 6045(g)*, the wash sale provisions need not be taken into account by the broker unless the transactions occur in the same account with respect to identical securities. *IRC § 6045(g)(2)(B)(ii).*

(n135)Footnote 63. *Treas Reg § 1.1012-1(e)(4)(ii).*

(n136)Footnote 64. *Prop Treas Reg § 1.1012-1(e)(7)(ii).*

(n137)Footnote 65. *Id.*

(n138)Footnote 66. *Prop Treas Reg § 1.1012-1(e)(10)(ii).*

(n139)Footnote 67. *Prop Treas Reg § 1.1012-1(e)(4).*

(n140)Footnote 68. *Prop Treas Reg § 1.1012-1(e)(7)(vi)*, Example 1.

(n141)Footnote 69. *Prop Treas Reg § 1.1012-1(e)(10)(iii).*

(n142)Footnote 70. *IRC § 1012(c)(2)(A).*

(n143)Footnote 71. See § 1.04[7][b][i], *supra*.

(n144)Footnote 72. *Prop Treas Reg § 1.1012-1(e)(11)(i).*

(n145)Footnote 73. *Prop Treas Reg § 1.1012-1(e)(7)(ii).*

(n146)Footnote 74. See *Prop Treas Reg* §§ 1.1012-1(e)(9)(iii) and *Prop Treas Reg* § 1.1012-1(e)(9)(v), Example.

(n147)Footnote 75. See *Prop Treas Reg* § 1.1012-1(e)(9)(i)(average basis election may be made "at any time," effective for sales occurring after notification of the broker or other agent); Dept of the Treasury, "Basis Reporting by Securities Brokers and Basis Determination for Stock; Proposed Rules," *supra*, 74 *Fed Reg* at 67017 ("The proposed regulations do not limit the number of times or frequency a taxpayer may change basis determination methods.")

(n148)Footnote 76. *Prop Treas Reg* § 1.1012-1(e)(7)(v).

(n149)Footnote 77. See *Prop Treas Reg* § 1.1012-1(e)(7)(vi), Example 3.

(n150)Footnote 1. Sales executed on behalf of certain customers, notably corporations and tax-exempt organizations, are exempt from the information reporting requirements. *Treas Reg* § 1.6045-1(c)(3).

(n151)Footnote 2. *IRC* § 6045(b). The customer statement may be a copy of the Form 1099-B prepared by the broker for the Internal Revenue Service. *Treas Reg* § 1.6045-1(k).

(n152)Footnote 3. Div B of Pub L No 110-343, 122 *Stat* 3765 (2008). Div B of Pub L No 110-343, 122 *Stat* 3765 (2008). Div B of Pub L No 110-343, 122 *Stat* 3765 (2008).

(n153)Footnote 4. See *IRC* § 6045(g). The Treasury Department and Internal Revenue Service have published proposed regulations that interpret the new statutory provisions. See Dept of the Treasury, "Basis Reporting by Securities Brokers and Basis Determination for Stock; Proposed Rules," 74 *Fed Reg* 67010 *et seq* (Dec 17, 2009).

(n154)Footnote 5. *IRC* § 6045(g)(3)(C)(i).

(n155)Footnote 6. *IRC* § 6045(g)(3)(C)(i) and (ii). These two exceptions are specially treated because, unlike other corporate stock, their adjusted basis may be determined under the average cost method described in § 1.04[7][c], *supra*.

(n156)Footnote 7. *IRC* §§ 6045(g)(3)(C)(iii). Certain transactions involving options for which information reporting has not previously been required will become subject to reporting requirements and be regarded as "covered securities" with respect to transactions entered into on or after January 1, 2013. See *IRC* § 6045(h).

(n157)Footnote 8. *Prop Treas Reg* § 1.6045-1(d)(6). Alternatively, a broker may, but is not required to, take commissions into account in determining gross proceeds, provided the treatment chosen is consistent with the manner in which the broker keeps its books. *Treas Reg* § 1.6045-1(d)(5); *Prop Treas Reg* § 1.6045-1(d)(5); *Prop Treas Reg* § 1.6045-1(d)(6)(i) and (ii).

(n158)Footnote 9. *Prop Treas Reg* § 1.6045-1(d)(6)(v).

(n159)Footnote 10. *Prop Treas Reg* § 1.6045-1(d)(6)(i). Issuers are required by *IRC* § 6045B to file an "issuer return" with the Internal Revenue Service in the event they take an organizational action that affects the basis of their securities, including information as to the quantitative effect of the action on basis expressed either as an adjustment per share or as a percentage of old basis. *Prop Treas Reg* § 1.6045B-1(a)(1) The issuer must also provide "issuer statements" with the same information to each holder of record of the affected security (or the holder's nominee, if any). *Prop Treas Reg* § 1.6045B-1(b)(1). The return is required within 45 days of the date of the organizational action (or, if earlier, January 15 of the year following the year in which the action is taken) and statements must be furnished to holders or their nominees by January 15 of the year following the year of the organizational action. *Prop Treas Reg* §§ 1.6045B-1(a)(2) and 1.6045B-1(b)(2). Alternatively, an issuer may satisfy both the issuer return and issuer statement requirements by posting the required information by the due date of the issuer return in an area of its primary public Web site dedicated to this purpose and keeping the information accessible to the public. *Prop Treas Reg* §§

1.6045B-1(a)(3) and 1.6045B-1(b)(4).

(n160)Footnote 11. *Prop Treas Reg § 1.6045-1(d)(6)(i)*. Thus, the proposed regulations provide that a broker need not apply the wash sale rules under *IRC § 1091* in determining the adjusted basis of the securities sold unless all of the transactions triggering the application of the wash sale rules occur in the same account, and the identical security is traded in all such transactions. (see *Prop Treas Reg § 1.6045-1(d)(6)(iii)*, discussed in the Examples below).

(n161)Footnote 12. The proposed regulations not only permit a broker voluntarily to take into account outside information from the customer or third parties in calculating adjusted basis, they protect the broker from penalties in the event such information proves to be incorrect so long as the broker neither knows nor has reason to know that the information is incorrect. *Prop Treas Reg § 1.6045(d)(2)(iv)(B)*. The proposed regulations also make clear that when a customer maintains two or more accounts with the same broker, the broker is only required to take into account information derived from the account in which the sale transaction takes place, although in accordance with the rule stated above outside information from the customer's other accounts may be taken into account at the broker's option. *Prop Treas Reg § 1.6045(d)(2)(iv)(B)*.

(n162)Footnote 13. See *IRC § 6045(g)(2)(B)(ii)* (for purposes of information reporting, broker should determine adjusted basis of securities sold without regard to section 1091 unless the transactions "occur in the same account with respect to identical securities"). Requiring that the securities be "identical" is more restrictive than the terms of *IRC § 1091* itself, which only requires that the securities be "substantially identical." See *IRC § 1091(a)*. See also *Prop Treas Reg § 1.6045-1(d)(7)(ii)*.

(n163)Footnote 14. Given that the adjusted basis and holding period reported by brokers on Form 1099-B may not reflect transactions, elections or events that affect basis but occur outside the account in which the customer's securities are sold, it is clear that their customers cannot rely exclusively on those statements in reporting gain or loss from the sale of securities on their own tax returns. The preface to the proposed regulations warns that "The instructions to the tax return will inform taxpayers of their duty to verify the information reported by brokers and to adjust the reported information when necessary to reflect the taxpayer's current information." Dept of the Treasury, "Basis Reporting by Securities Brokers and Basis Determination for Stock; Proposed Rules," 74 *Fed Reg* 67010, 67014 (Dec 17, 2009) .

(n164)Footnote 15. See *Prop Treas Reg § 1.6045-1(d)(6)(iii)*; *Prop Treas Reg § 1.6045(d)(2)(iv)(B)*. G must also report the \$100 loss disallowed on the March 1 transaction in its Form 1099-B for the July 1, 2011 sale.

(n165)Footnote 16. *Prop Treas Reg § 1.6045-1(d)(6)(iii)*; *Prop Treas Reg § 1.6045-1(d)(6)(vi)*, Example 4.

(n166)Footnote 17. *Prop Treas Reg § 1.6045-1(d)(6)(iii)*. As in Example 2, G would be required to show both the recalculated basis of the repurchased C Company stock and the loss disallowed by *IRC § 1091* on the March 1 sale of the original C Company stock on the Form 1099-B filed with respect to the July 1 sale.

(n167)Footnote 18. *Prop Treas Reg § 1.6045-1(d)(6)(iii)*; *Prop Treas Reg § 1.6045-1(d)(6)(vi)*, Example 3.

(n168)Footnote 19. "Noncovered securities" are defined in the proposed regulations as securities that are not "covered securities." *Prop Treas Reg § 1.6045-1(a)(16)*.

(n169)Footnote 20. *Treas Reg § 1.6045-1(d)(3)* lists several categories of "exempt recipients," including corporations, tax-exempt organizations and individual retirement plans, the sales transactions of which need not be reported by brokers under *IRC § 6045*.

(n170)Footnote 21. *Prop Treas Reg § 1.6045-1(d)(2)(iii)*.

(n171)Footnote 22. *Id.* See also *Prop Treas Reg § 1.6045-1(d)(2)(vi)*, Example 1.

(n172)Footnote 23. See *IRC* §§ 6721 and 6722, and in particular *IRC* § 6722(b)(2).

(n173)Footnote 24. *Prop Treas Reg* § 1.6045-1(d)(2)(iii).

(n174)Footnote 25. The obligation to supply a transfer statement is imposed by a new provision, *IRC* § 6045A, which leaves to the Treasury and Internal Revenue Service the task of filling in the necessary details, such as defining the persons (in addition to brokers) who are subject to the obligation to provide transfer statements and prescribing the contents of such statements. See *Prop Treas Reg* § 1.6045A-1. The proposed regulations designate brokers, professional custodians and issuers of securities, and their agents, as "applicable persons" subject to an obligation to provide transfer statements in connection with transfers of covered securities on behalf of others, but specifically exclude from that category the beneficial owner of the transferred securities, any governmental unit with respect to escheated securities, and any person that acts solely as a clearing organization with respect to the transfer. *Prop Treas Reg* § 1.6045A-1(a)(3). The proposed regulations also clarify that the 15 day period allowed to "applicable persons" in which to provide the required transfer statement begins after the date of settlement for the transfer. *Prop Treas Reg* § 1.6045A-1(a)(5). Finally, while the transfer statement must generally be in writing, the transferor and the receiving broker are allowed to agree upon a different format or method of conveying the required information (*e.g.*, electronic data transfer) prior to the transfer of the securities. *Prop Treas Reg* § 1.6045A-1(a)(2). If the transfer occurs between accounts at the same entity or affiliated entities, a transfer statement is deemed to have been furnished and received when the necessary information is incorporated into the records for the recipient account. *Prop Treas Reg* § 1.6045A-1(a)(2).

(n175)Footnote 26. *Prop Treas Reg* § 1.6045A-1(b)(1)(vii). The transferor may take information from issuer statements into account in calculating basis if it chooses to do so, but the transfer statement must then include the identifying number of the last issuer statement taken into account to indicate that the organizational action identified and all relevant prior organizational actions reported by the issuer are reflected on the transfer statement; in addition, the transfer statement must also describe any other organizational actions reflected on the transfer statement that were not derived from an issuer statement. *Id.*

(n176)Footnote 27. If the transferor acquired the securities on behalf of a customer that was an exempt recipient at the time of the acquisition but subsequently lost its exempt recipient status, the transferor may treat such securities as noncovered securities as long as the transferor indicates that they are noncovered securities on the transfer statement. *Prop Treas Reg* § 1.6045A-1(b)(2).

(n177)Footnote 28. *Prop Treas Reg* § 1.6045A-1(b)(1). Whether covered or noncovered securities are transferred, a transfer statement must include: the date the statement is furnished; the name, address and telephone number of the person furnishing the statement; the name, address and telephone number of the broker receiving custody of the securities; the name, address, telephone number, taxpayer identification number and account number of the beneficial owner(s) of the security before and (if different) after the transfer; the quantity of shares or units transferred, the Committee on Uniform Security Identification Procedures (CUSIP) number (or other security identifier number), the security symbol (if applicable), the lot numbers (if applicable), and the classification (such as stock or debt) of the securities transferred; the date the transfer was initiated, and the settlement date of the transfer. Moreover, as is the case with brokers that file information returns with respect to sales of noncovered securities, a transferor having knowledge of the adjusted basis or holding period of transferred noncovered securities may voluntarily include such information in its transfer statement and receive comparable protection from penalties for incorrect information so as long as the transfer statement indicates that the transferred securities are noncovered securities. Compare *Prop Treas Reg* § 1.6045A-1(b)(2) and *Prop Treas Reg* § 1.6045-1(d)(2)(iii).

(n178)Footnote 29. *Prop Treas Reg* § 1.6045-1(d)(2)(v). Similarly, a broker must file a corrected Form 1099-B if it does not receive a complete issuer statement under *IRC* § 6045B until after it has filed Form 1099-B with respect to a sale of covered securities. The corrected return must be filed within 30 days after the complete issuer statement is received by the broker. *Prop Treas Reg* § 1.6045-1(d)(2)(v).

(n179)Footnote 30. *Prop Treas Reg § 1.6045A-1(b)(3)(i)*. Note that this provision does not apply to securities transferred from a decedent or decedent's estate to a customer account in satisfaction of a cash legacy. *Prop Treas Reg § 1.6045A-1(b)(3)(iii)*. The proposed regulations treat this as a standard non-sale transfer, though for income tax purposes the estate may be taxable on any appreciation in the value of the securities between the date of death and date of distribution of the securities. See *Treas Reg § 1.661(a)-2(f)*; § 1.02[1], n. 12, *supra*.

(n180)Footnote 31. *Prop Treas Reg § 1.6045A-1(b)(3)(ii)*.

(n181)Footnote 32. *Prop Treas Reg § 1.6045A-1(b)(3)(ii)*.

(n182)Footnote 33. *Prop Treas Reg § 1.6045A-1(b)(4)(i)*. The transferred securities need not be identified as a gift if the transfer is between persons for whom gift-related basis adjustments are inapplicable or to a transfer between accounts that share at least one common owner. *Prop Treas Reg § 1.6045A-1(b)(4)(i)*.

(n183)Footnote 34. *Prop Treas Reg § 1.6045A-1(b)(4)(ii)*.

(n184)Footnote 35. See Chapter 10 for a description of a short sale of securities and the substantive tax treatment of such sales.

(n185)Footnote 36. *IRC § 6045(g)(5)*; *Prop Treas Reg § 1.6045-1(c)(2)(xi)*. The return is to be made without regard to the constructive sale rule in *IRC § 1259* (see § 10.02[2], *infra*) and, if the short sale remains open, without regard to *IRC § 1233(h)* (short sale of property that becomes substantially worthless). *Prop Treas Reg § 1.6045-1(c)(2)(xi)*.

(n186)Footnote 37. See *Prop Treas Reg §§ 1.6045-1(c)(2)(xi)(A)* and *(B)*. As noted above, corporate stock will generally be a "covered security" if purchased on or after January 1, 2011. See text at n 5, *supra*.

Taxation of Securities Transactions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

CHAPTER 1 Gains and Losses From the Disposition of Property

1-1 Taxation of Securities Transactions § 1.05

§ 1.05 The Elements of Gain or Loss--Recognition

After computing the gain or loss realized, the final step requires a determination of the portion of the gain or loss which must be recognized. *IRC Section 1001(c)* calls for recognition of the entire amount of gain or loss realized unless nonrecognition is specifically mandated by the Code.ⁿ¹

An interesting question is whether *IRC Section 1033*, permitting elective nonrecognition of gain from involuntary conversions of property, can apply to forced sales of stock. The authorities are in agreement that it cannot.ⁿ²

Recognition of gain automatically requires its inclusion in gross income, since, in the first instance, all realized gains are includable under *IRC Section 61(a)*. While recognition of loss is necessary before a loss deduction can be claimed under *IRC Section 165*, the mere fact that a loss is recognized under *IRC Section 1001(c)* does not itself insure deductibility. Thus, unless a loss deduction is initially permitted by *IRC Section 165*, the question of loss recognition is unimportant.

[1] The Loss Deduction.

The Code provides that "there shall be allowed as a deduction any loss sustained during the taxable year and not compensated for by insurance or otherwise."ⁿ¹ The broad allowance provision is limited, in the case of individuals, to three situations:

- (1) losses incurred in a trade or business,ⁿ²
- (2) losses incurred in a transaction entered into for profit,ⁿ³ and
- (3) certain casualty losses.ⁿ⁴

It is well settled that mere investment in stocks or other securities, no matter how extensive, does not constitute the conduct of a trade or business.ⁿ⁵ However, as a general rule, the purchase of securities is a transaction entered into for profit,ⁿ⁶ and it matters not whether the profit sought is income in the form of interest or dividends, or gain to be realized on a resale of the property. Normally, then, a loss realized on an actual investment in securities will qualify for deduction under *IRC Section 165(c)(2)*,ⁿ⁷ subject possibly to the limitations imposed on the deduction of capital

losses.ⁿ⁸ Technical compliance with the requirements of the Internal Revenue Code will not ensure deductibility of a loss, however, if the transaction giving rise to the loss does not have economic substance.ⁿ⁹

In *New Phoenix Sunrise Corp and Subs v Commr*,ⁿ¹⁰ the Tax Court invoked the economic substance doctrine to disregard a series of transactions culminating in the taxpayer claiming a \$10 million capital loss on the sale of publicly traded stock that had been purchased a few days before for approximately \$150,000. Following a tax strategy known as "BLISS," (Basis Leveraged Investment Swap Spread), the taxpayer had purchased offsetting long and short foreign currency option contracts, contributed the contracts to a newly formed partnership, claimed a \$10 million basis in the partnership by taking into account the amount paid for the long option without deducting the contingent liability assumed by the partnership on the short contract, had the partnership acquire publicly traded stock worth a fraction of his outside basis (\$150,000) and then distribute the stock to him in liquidation, and immediately sold the stock at approximately the same price the partnership had paid for it, claiming a substantial "loss" equal to the difference between his \$10 million inflated basis in the partnership and the sales price (\$150,000) of the stock.ⁿ¹¹ The Tax Court's conclusion that the transactions giving rise to the \$10 million loss had been a sham without economic substance rested primarily on the following factors:

(1) The taxpayer did not suffer an economic loss equal to the claimed tax loss of \$10 million. Its net investment in foreign currency option contracts it later contributed to a newly formed partnership totaled only \$131,500, the difference between premiums paid and premiums received on the long and short arms of the swap. Although the partnership paid about \$150,000 for the publicly traded stock it later distributed to the taxpayer, almost the entire amount was recovered when taxpayer immediately sold the stock. Thus, "the [\$10 million] loss claimed as a result of the stepped-up basis in the ... [stock] was purely fictional."

(2) The taxpayer had no realistic possibility of earning a profit on the foreign currency swap. The bank theoretically responsible for making a payment to the taxpayer on the long arm of the swap in the event the foreign currency's "spot rate" on the date designated in the contract was within a specified range, called a "sweet spot," was also the calculation agent that determined what the spot rate would be. The spot rate is actually a range of market rates made up of various prices at which market makers offer to buy or sell the currency, and on any given day would typically be significantly wider than the extremely narrow "sweet spot," defined in the taxpayer's contract. Therefore, the bank could (and, assuming it acted rationally, would) legally avoid the taxpayer's sweet spot simply by designating as the spot rate for the designated day a legitimate market rate outside the sweet spot's narrow range.ⁿ¹²

(3) The use of a partnership in the transactions served no business purpose but rather highlighted the transaction's sole purpose of tax avoidance. The partnership was used only for tax reasons; to give the taxpayer a step-up in basis for stock distributed from the partnership by exploiting the "loophole" the designers of taxpayer's strategy thought had been created by *Helmer v Commr*.ⁿ¹³ "Absent the benefit of the claimed tax loss, there was nothing but a cash flow that was negative for all relevant periods--the 'hallmark[] of an economic sham ... ' "ⁿ¹⁴

Since the Tax Court ruled that the transactions in *New Phoenix* should be disregarded because they lacked economic substance, it followed that fees paid by the taxpayer to the promoter of the tax shelter were likewise not deductible.ⁿ¹⁵ Moreover, the legal opinion letter received by the taxpayer affirming the validity of the transactions for tax purposes did not in this instance protect the taxpayer from valuation misstatement and negligence penaltiesⁿ¹⁶ because the lawyer issuing the opinion was not acting as an independent professional advisor but as a self-interested promoter of the tax shelter.ⁿ¹⁷ In addition, the Internal Revenue Service had put all taxpayers on notice well before the taxpayer entered into the transactions at issue that it considered the rationale of tax shelters such as the one entered into by the taxpayer to be erroneous and intended to challenge them.ⁿ¹⁸

[a] Tax Treatment of Losses Incurred in a Fraudulent Investment Scheme.

Rev Rul 2009-9,ⁿ¹⁹ provides an extensive analysis of the tax consequences of losses suffered by investors in financial swindles such as Ponzi schemes.ⁿ²⁰ The ruling considered a taxpayer, an individual, who opened an investment account with B, a swindler who held himself out to the public as an investment advisor and securities broker. The taxpayer contributed \$100x to the account in Year 1 and gave B a power of attorney enabling B to purchase and sell securities on the taxpayer's behalf. Over the next 8 years, B periodically issued account statements to the taxpayer reporting purchases and sales of securities purportedly made in the taxpayer's investment account, as well as purported income from interest, dividends and capital gains of \$10x per year in Years 2 through 7. The taxpayer reported the income on his tax returns, made an additional cash contribution of \$20x in Year 3, and received a distribution from B of \$30x in Year 7. The taxpayer learned in Year 8 that B's purported investment advisory and brokerage activity was in fact a fraudulent arrangement and that B had only a small fraction of the funds reported on the account statements issued to the taxpayer and other investors. B had been operating a classic "Ponzi" scheme by taking money from investors and converting most of it to his own use, maintaining the credibility of the scheme by occasionally making payments of purported income or principal to investors who requested them using funds provided by other investors to do so.

The Service ruled that the taxpayer could deduct as a theft loss, in the year the theft was discovered, not only the money the taxpayer gave B to invest (\$100x plus \$20x) but the fictitious income the taxpayer reported in Years 2-7 (a total of \$60x), reduced by the funds returned to the taxpayer (\$30x) and by any claim for reimbursement for which the taxpayer had a reasonable prospect of recovery. The loss is deductible as an ordinary rather than a capital loss, and since it was incurred in connection with a transaction entered into for profit, the deduction is not subject to the limitations ordinarily imposed on personal casualty losses, on miscellaneous itemized deductions, and on total itemized deductions. Moreover, if the deduction for the theft loss in the year of discovery exceeds the taxpayer's net income (before the deduction), the theft loss creates a net operating loss that may be carried back to as many as 5 preceding taxable years.

Each of these points bears further elaboration.

(1) Theft loss. A "theft" for tax purposes is not limited to robberies and burglaries; "the word 'theft' is not ... a technical word of art with a narrowly defined meaning but is, on the contrary, a word of general and broad connotation, intended to cover and covering any criminal appropriation of another's property to the use of the taker, particularly including theft by swindling, false pretenses, and any other form of guile ... [W]hether a loss from theft occurs ... depends upon the law of the jurisdiction where it was sustained ..."ⁿ²¹ The Service's conclusion that the loss sustained by the taxpayer in *Rev Rul 2009-9* was a "theft loss," based on the unstated but undoubtedly justified assumption that B's activities constituted criminal appropriations of taxpayer's funds under the laws of the jurisdiction in which they occurred, came well within existing law as expressed in *Bromberg* and similar cases and rulings.ⁿ²²

The term "theft" is not infinitely elastic, however, and not every securities law violation will be encompassed by it. In *Bellis v Commr*,ⁿ²³ an investor claimed a theft loss on the worthlessness of stock he had acquired from a seller who had not obtained a permit to sell the securities as required by state law. The seller was strictly liable for criminal sanctions as well as civil liability for failing to obtain the required permit. The Tax Court held that violation of the law did not make taxpayer's loss a "theft" loss for tax purposes since the offense did not require that the wrongdoer have a specific intent to fraudulently acquire the taxpayer's money or property, nor could the Tax Court find that any such intent was actually present in the case before it. Similarly, when a taxpayer purchased securities on the open market in reliance upon fraudulent statements made by directors and officers of the corporation that issued the securities, a subsequent loss of value or worthlessness of the securities was not a "theft loss" under state law (nor, therefore, for federal income tax purposes) because the perpetrators of the fraud neither intended to nor had actually taken any cash or other property from the taxpayer.ⁿ²⁴

Further, the courts have not been sympathetic with "theft loss" claims made by taxpayers who invested money in tax shelters and were disappointed when the IRS and the courts held that the expected tax benefits were illusory.ⁿ²⁵ Even in tax shelter cases, however, a taxpayer may be allowed a theft loss deduction if the promoter misrepresented the facts regarding the tax shelter and in reliance on those misrepresentations the taxpayer made an investment she would not otherwise have made.

"In allowing a deduction for 'theft' losses Congress did not distinguish between losses sustained by the naive or greedy from those suffered by others. Indeed gullibility or cupidity of the victim is often the crucial factor that enables the swindler to succeed in his fraud The point is that [the investors] bargained for a transaction in which there would be real purchases of bonds or notes, so that they would be entitled to argue for their claimed tax benefit on the basis of a record involving real bonds or notes. Thus, instead of getting what they now refer to as a "quality facade," they obtained from [the promoter] what they quite properly characterize as a thoroughly useless "fake, counterfeit facade." And they paid their money for this "fake, counterfeit facade" only because they were taken in by [the promoter's] false representations. We hold that they were the victims of a swindle, and are entitled, as the statute is now written, to a deduction in respect of the moneys that they paid out in reliance upon [the promoter's] false representations."ⁿ²⁶

(2) Fictitious Income. In contrast to the well established basis for the Service's ruling that loss of money in a Ponzi scheme is a theft loss, the Service's conclusion that the fictitious income the taxpayer had reported in prior years was part of the loss was unprecedented and indeed the Service cited no authority for it. Normally, the remedy for having mistakenly reported income, even when the mistake was caused by the fraudulent activity of another, is to file an amended return or claim for refund recalculating the tax due for the year(s) without the amount that was erroneously included in income.ⁿ²⁷

However, because of the length of time the Ponzi scheme continued, the taxpayer in *Rev Rul 2009-9* found that some of the years in which fictitious income had been reported were closed by the statute of limitations by the time the scheme was discovered. The Service rejected the taxpayer's arguments that those years should be effectively re-opened under the claim of right statuteⁿ²⁸ or the mitigation provisions,ⁿ²⁹ apparently deciding that allowing a theft loss deduction for the mistakenly reported income would be less incongruous with the intent and language of the Code. Given that neither the fictitious income reported nor the taxes erroneously paid by the taxpayer were appropriated by B, however, the Service's decision to include the fictitious income in the taxpayer's theft loss, however generous, seems questionable.ⁿ³⁰

(3) Tax Consequences of Treating a Loss as a Theft Loss. The advantages to the taxpayer of treating a loss as a theft loss, though noncontroversial, are worth reviewing because of their significance not only for money lost in Ponzi schemes but in cases where an individual taxpayer holds real but worthless or nearly worthless stock or securities and there is at least a possibility of showing that the taxpayer's loss was due to someone's fraud. Such a showing will:

- First, change the character of the loss from a capital loss, deductible only from capital gains and up to \$3,000 of ordinary income per year,ⁿ³¹ into a fully deductible loss that is not subject to the capital loss limitations. Ordinarily, losses resulting from the worthlessness of securities owned by an individual as an investment are treated as losses from the sale or exchange of a capital asset incurred on the last day of the year in which they become worthless.ⁿ³² In the case of loans made to individuals other than in the course of the taxpayer's trade or business, worthlessness results in the loss being treated as

a short-term capital loss incurred during the year.ⁿ³³ However, if the taxpayer can show that the stock or security was acquired, or the loan made, because of misrepresentations or other fraud committed by the seller (or borrower), the loss becomes one incurred as a result of theft and not by reason of the sale or exchange of a capital asset.ⁿ³⁴

- Second, allow the taxpayer to carry back the loss as a net "operating loss," to the extent it exceeds other taxable income, to preceding taxable years, thereby obtaining immediate tax relief rather than having to wait until future years to carry over the excess loss. The key provision here is *IRC Section 172 (d)(4)(C)*, which treats casualty and theft losses as attributable to a trade or business, whether or not such losses were actually sustained in a trade or business. That in turn allows a noncorporate taxpayer to include the theft loss in a net operating loss (NOL), and exempts the loss from the normal limitation that nonbusiness losses of noncorporate taxpayers are deductible only to the extent of nonbusiness income.ⁿ³⁵ As a general rule, an NOL may be carried back 2 years and carried forward 20, but the carryback period is increased to 3 years to the extent the NOL is attributable to a casualty or theft.ⁿ³⁶ Furthermore, if the NOL arises in a taxable year beginning or ending in 2008, and is incurred by an "eligible small business"ⁿ³⁷ that "business" may elect either a 3, 4 or 5-year carryback period.ⁿ³⁸ The Service ruled that a taxpayer who suffers a loss in a Ponzi scheme would be treated as a "business" (a sole proprietorship) for purposes of this temporary provision and, if the gross receipts test were met, the taxpayer could make the election to carry the theft loss back for as many as 5 taxable years.

- Third, avoid a number of limitations to which itemized deductions for individuals are normally subject. As Rev Rul 2009-9 points out, none of those limitations apply to a theft loss connected with a Ponzi scheme or other fraudulently-induced investment. Thus, neither the \$500 deductible with respect to personal casualty losses (including theft losses) (\$100 for taxable years beginning after December 31, 2009),ⁿ³⁹ nor the limitation that only net personal casualty losses in excess of 10 percent of adjusted gross income are deductible,ⁿ⁴⁰ are applicable to a theft loss incurred in connection with a transaction entered into for profit within the meaning of *IRC Section 165(c)(2)*. Further, all casualty losses, not just those associated with transactions entered into for profit, are exempt from the 2 percent of adjusted gross income floor on miscellaneous itemized deductions,ⁿ⁴¹ and the overall limit on itemized deductions imposed by *IRC Section 68*.

(4) Reasonable Chance of Recovery. Although *IRC Section 165(e)* provides that a theft loss is deductible in the taxable year in which the taxpayer discovers the loss, if there exists in that year a claim for reimbursement with respect to which there is a reasonable prospect of recovery, no portion of the loss for which reimbursement may be received is considered sustained (or will be recognized) until the taxable year in which it can be ascertained with reasonable certainty whether or not reimbursement will be received.ⁿ⁴² This puts the taxpayer with a theft loss and some possibility of recovery of the loss at hazard with respect to the amount that may deducted and, more importantly, the appropriate year in which the deduction can be taken.ⁿ⁴³

More often, and not surprisingly, taxpayers tend to be pessimistic about their prospects of recovery when determining the proper year in which to claim a deduction for their losses.ⁿ⁴⁴ Equally unsurprising, the Internal Revenue Service will often challenge the deduction of the full amount of the loss in the year of discovery if the taxpayer is actively pursuing a claim for recovery in litigation.ⁿ⁴⁵ As might also be expected, notwithstanding courts' continuing insistence that the reasonableness of the prospect of recovery must be judged with foresight (as of the end of the year in which the loss was claimed) rather than hindsight, the results of the taxpayer's recovery litigation will often influence the outcome

of the Service's challenge.ⁿ⁴⁶

The Service took a welcome step towards resolving this dilemma for taxpayers, at least those that are victims of Ponzi schemes, by giving them the option of following a procedure that protects against audit adjustments challenging the year in which their theft losses are properly deductible.ⁿ⁴⁷

Rev Proc 2009-20 applies to a "qualified loss" incurred by a "qualified investor." As defined in *Rev Proc 2009-20*, these terms require that:

- (a) The taxpayer's loss must have been suffered as the result of a "specified fraudulent arrangement." This is "an arrangement in which a party (the lead figure) receives cash or property from investors; purports to earn income for the investors; reports income amounts to the investors that are partially or wholly fictitious; makes payments, if any, of purported income or principal to some investors from amounts that other investors invested in the fraudulent arrangement; and appropriates some or all of the investors' cash or property."ⁿ⁴⁸ specified fraudulent arrangement (SFA) must involve the commission of fraud, embezzlement, or a similar state or federal crime that is considered "theft" for federal income tax purposes.ⁿ⁴⁹
- (b) There must have been federal or state action taken against the lead figure in the SFA (or one of the lead figures, if more than one) in which (a) a lead figure was charged in a state or federal indictment or information (not withdrawn or dismissed) with the commission of fraud, embezzlement or a similar crime, or (b) a lead figure was the subject of a state or federal complaint (not withdrawn or dismissed) alleging such a crime, and either (i) the complaint alleged an admission of the crime by such figure or the execution of an affidavit by such figure admitting the crime or (ii) a receiver or trustee was appointed with respect to the arrangement or assets of the arrangement were frozen.ⁿ⁵⁰ The "discovery year" with respect to any qualified investor, i.e., the year in which the qualified loss must be deducted, is the taxable year of the investor in which the indictment, information, or complaint was filed.ⁿ⁵¹
- (c) The taxpayer must be a US person as defined in *IRC Section 7701(a)(30)* who generally qualifies to deduct the theft loss under *IRC Section 165* and *Treasury Regulation Section 1.165-8*.
- (d) The taxpayer must have transferred cash or property to an SFA.ⁿ⁵²
- (e) The taxpayer must not have had actual knowledge of the fraudulent nature of the SFA prior to it becoming known to the general public.ⁿ⁵³
- (f) The SFA in which the taxpayer incurred the theft loss must not have been a tax shelter within the meaning of *IRC Section 6662(d)(2)(C)(ii)*.ⁿ⁵⁴

If these requirements are satisfied, the revenue procedure will apply to a theft loss deduction that is equal to the taxpayer's "qualified investment" after making the adjustments required by *Rev Proc 2009-20*, Section 5.02 (as discussed below). The taxpayer's "qualified investment" in an SFA is:

- (i) The total amount of cash, or the basis of property, invested in the SFA in all years; plus
- (ii) The total amount of net income with respect to the SFA that, consistent with information received from the SFA, the qualified investor included in income for federal tax purposes for all taxable years prior to the "discovery year," including taxable years for which a refund is barred by the statute of limitations; less

(iii) The total amount of cash or property that the qualified investor withdrew in all years from the SFA (whether as income or principal).ⁿ⁵⁵

The taxpayer must make both of the following adjustments to "qualified investment" in calculating the "theft loss" deduction to become entitled to the benefits of the revenue procedure.

(1) As a concession to the IRS for not challenging the year of the deduction (whether or not the taxpayer has claims on which there is a reasonable prospect of recovery of all or part of the loss), the taxpayer must reduce the otherwise allowable deduction by multiplying the "qualified investment" in the SFA by (a) 95 percent, if the taxpayer is not pursuing any potential third-party recovery, or (b) 75 percent, if the taxpayer is pursuing or intends to pursue any potential third party recovery.ⁿ⁵⁶ "Potential third-party recovery" means all actual or potential claims for recovery of a qualified loss, as of the last day of the discovery year, against any person other than a member of the SFA's responsible group, the issuer of an insurance policy covering the qualified loss or a guarantor under a similar contractual arrangement, or the Securities Investor Protection Corporation (SIPC) or similar entity.ⁿ⁵⁷ Thus, a taxpayer pursuing a valid and collectible claim against the leading figure or other member of the responsible group is entitled to claim a deduction equal to 95 percent of qualified investment, regardless of the size of the claim or the probability of a recovery.ⁿ⁵⁸

(2) The taxpayer must deduct from the qualified investment as reduced above (1) any actual recoveries made in the discovery year and (2) any potential recoveries under insurance policies in the name of the qualified investor, contractual arrangements other than insurance that guaranteed or otherwise protected against loss of the qualified investment, and any amounts payable by the SIPC as advances for customer claims under *15 USC Section 78fff-3(a)* (the Securities Investor Protection Act of 1970) or by a similar entity under a similar provision.

Finally, a taxpayer wishing to rely on *Rev Proc 2009-20* must mark " *Revenue Procedure 2009-20* " at the top of Form 4684, Casualties and Thefts, which is filed as part of the taxpayer's return for the discovery year, and complete and sign a statement, prescribed in Appendix A to *Rev Proc 2009-20* , to be attached to the taxpayer's timely filed (including extensions) federal income tax return for the discovery year. In executing the statement, the taxpayer agrees--

- (1) Not to deduct in the discovery year any amount of the theft loss in excess of the deduction permitted by Section 5 of *Rev Proc 2009-20* ;
- (2) Not to file returns or amended returns to exclude or recharacterize income reported with respect to the investment arrangement in taxable years preceding the discovery year;
- (3) Not to apply the alternative computation in *IRC Section 1341* with respect to the theft loss deduction allowed by *Rev Proc 2009-20* ;
- (4) Not to apply the doctrine of equitable recoupment or the mitigation provisions in *IRC Sections 1311-1314* with respect to income from the investment arrangement that was reported in taxable years that are otherwise barred by the period of limitations on filing a claim for refund under *IRC Section 6511*.

A taxpayer eligible to utilize the safe harbor provided by *Rev Proc 2009-20* but who chooses not to do so "is subject to all of the generally applicable provisions governing the deductibility of losses under § 165."ⁿ⁵⁹ As a practical matter, this means that the taxpayer, if audited, will have to "establish that no claim for reimbursement of any portion of the loss exists with respect to which there is a reasonable prospect of recovery in the taxable year in which the taxpayer claims the loss."ⁿ⁶⁰ The taxpayer can still rely, however, on all the legal interpretations of the Code made by the

Service in *Rev Rul 2009-9*, including the ruling that allows a victim of a Ponzi scheme to claim as part of the theft loss any fictitious income reported to him as part of the scheme and included in gross income on his federal income tax return(s) for prior years, including closed years.ⁿ⁶¹

[2] Installment Sales.

[a] The Installment Method of Accounting. *IRC Section 453(a)* provides for automatic installment reporting of gain by a cash method or an accrual method taxpayerⁿ¹ (unless the taxpayer elects otherwise)ⁿ² whenever at least one payment is to be received after the close of the taxable year in which the disposition occurs.ⁿ³ (However, any ordinary income produced by the depreciation recapture provisions of *IRC Sections 1245* and *1250* must be recognized in the year of sale.)ⁿ⁴ Sales on revolving credit plans and sales of stock or securities that are traded on an established securities market cannot qualify for installment reporting.ⁿ⁵

Installment reporting is also not available for dealer dispositions.ⁿ⁶ A dealer disposition is defined as any disposition of personal property by a person who regularly sells personal property on the installment plan or any disposition of real property held by the taxpayer for sale to customers in the ordinary course of business.ⁿ⁷ A dealer disposition does not include a disposition on the installment plan of property used or produced in the trade or business of farming as defined in *IRC Section 2032A(e)(4)* or *2032(A)(e)(5)*.ⁿ⁸ If the taxpayer so elects, it also does not include a disposition in the ordinary course of the taxpayer's trade or business to an individual of (1) a timeshare right to use, or a timeshare ownership interest in, residential real property for not more than six weeks a year, or a right to use specified campgrounds for recreational purposes, or (2) any residential lot, but only if the taxpayer or a related person is not to make any improvements to the lot.ⁿ⁹ The election will not apply if the installment obligation is guaranteed by a person other than an individual.

Carrying charges or interest with respect to the excepted dispositions that are added on the books of the seller to the established cash selling price are included in the total contract price of the property. If not so treated, any payments received are first applied against such carrying charges and interest.ⁿ¹⁰

If a taxpayer makes an election with respect to a disposition of a timeshare or residential lot, the taxpayer's tax liability for any year in which payments are received is increased by interest charged on the tax deferred as a result of the installment method.ⁿ¹¹ The amount of interest is determined on the tax for the taxable year attributable to the payments received during the year on the installment obligation, for the period beginning with the date of sale and ending on the date payment is received, by using the applicable federal rate under *IRC Section 1274* (without regard to *IRC Section 1274(d)(2)*) in effect at the time of the sale compounded semiannually.ⁿ¹² The tax attributable to receipt of the payment is determined without regard to the interest charge. No interest is computed for any payment received in the year of disposition of the property from which the installment obligation arises.

The crucial factor in the operation of the installment method can be found in *IRC Section 453(f)(3)*, which provides that "the term 'payment' does not include the receipt of evidences of indebtedness of the person acquiring the property (whether or not payment of such indebtedness is guaranteed by another person)."ⁿ¹³

The installment method effectively defers the inclusion in income of gain from the sale until the year of actual receipt of payment. The gain which must be reported in such year is that proportion of the payment received which the gross profit to be realized bears to the total contract price.ⁿ¹⁴ This may be illustrated as follows:

Example:

Assume a taxpayer sells property having a basis of \$5,000 for \$10,000, the buyer paying \$2,000 in the year of sale and agreeing to pay the balance in two equal installments, the first due one year from the date of sale, and the other one year later. The gross profit to be realized from the transaction is \$5,000 (\$10,000 selling price less \$5,000 basis). The total contract price here equals the selling price of

\$10,000¹⁵ making the gain ratio 50 percent (\$5,000 gain/\$10,000 contract price). Therefore, unless the taxpayer elects otherwise, in the year of sale, \$1,000 of the \$2,000 payment will be includable in gross income. As installments are received, the taxpayer will include one half of each payment in his income for the year of receipt. When the consideration is fully paid, the taxpayer will have reported the total gain realized on the transaction, and excluded an amount equal to his basis.

A reduction in the selling price in a year subsequent to the year of sale requires a corresponding reduction in the amount of income to be reported in the future. The reduction is effected by adjusting the percentage of profit to be reported on the remaining installments. This is determined by (1) recomputing total gross profit using the adjusted sales price, (2) subtracting the profit previously reported, and (3) spreading the remainder evenly over the remaining installments.¹⁶ If the reduction is greater than the unreported income, a loss is allowed in the year of reduction. By way of illustration:

Example 1:

Taxpayer sold property with a basis of \$10,000 for \$20,000 under an arrangement calling for the payment of \$5,000 in the year of sale and \$3,000 in each of the succeeding five years. After \$8,000 had been paid, the buyer and seller agreed to reduce the total price to \$18,000 and the remaining installments to \$2,500 each. The profit anticipated originally was \$10,000; the reduction changed that figure to \$8,000. The installments paid prior to the adjustment produced reportable gain of \$4,000, leaving a balance of \$4,000 to be reported as the remaining installments were received.

Example 2:

Assume the same facts as in Example 1, except that the reduction in price is to \$16,000 and that it takes place after \$17,000 has been received by the seller. The reduction results in a loss of \$1,000.

Two important limitations on the use of the installment method can be found in *IRC Section 453A* governing the treatment of installment obligations arising from a disposition of property used in the taxpayer's trade or business or property held for the production of rental income, if the sales price of the property exceeds \$150,000.¹⁷ Installment obligations arising from the disposition of property used in the trade or business of farming (as defined in *IRC Section 2032A(e)(4)* or *2032A(e)(5)*) are not subject to these rules. An exception is also provided for installment obligations arising out of the disposition of certain timeshares and residential lots, but the interest provisions of *IRC Section 453(l)(3)* will apply.

The first consequence of the *IRC Section 453A(c)* rules is the imposition of an interest charge on the deferred tax liability with respect to the obligation.¹⁸ If an installment obligation is outstanding at the close of any taxable year, and the face amount of all such obligations that arose during, and are outstanding at, the close of the taxable year exceeds \$5 million, the taxpayer's tax liability for the year is increased in an amount equal to the product of the applicable percentage of the deferred tax liability with respect to such obligation multiplied by the underpayment rate in effect under *IRC Section 6621(a)(2)* for the month within which the taxable year ends. The deferred tax liability is the amount of gain that has not been recognized with respect to the obligation as of the close of the taxable year multiplied by the maximum rate of tax in effect under *IRC Section 1* (noncorporate taxpayers), or *IRC Section 11* (corporate taxpayers). (If the gain to be recognized will be long-term capital gain, the maximum rate is the capital gain rate under *IRC Section 1(h)* (noncorporate taxpayers) or *IRC Section 1201* (corporate taxpayers)). The applicable percentage is determined by dividing the aggregate face amount of nondealer property installment obligations outstanding at the close of the taxable year in excess of \$5 million by the aggregate face amount of such obligations. The Treasury is authorized to prescribe such regulations as may be necessary to carry out the purposes of the interest charge rule including regulations that address the treatment of contingent payments, short taxable years, and pass-through entities.

The second consequence is the pledging rule of *IRC Section 453A(d)*. If any installment obligation arising from the disposition of property is pledged as direct security for the payment of principal or interest on any indebtedness, the net proceeds of the secured indebtedness (gross loan proceeds less the direct expenses of obtaining the loan) are treated as a

payment received on the installment obligation as of the later of the time the indebtedness is secured or the proceeds of the indebtedness are received by the taxpayer. Gain is recognized in an amount equal to the product of the net loan proceeds and the gross profit ratio applicable to the installment obligation.ⁿ¹⁹

Receipt of payments on the obligation subsequent to the pledge generally will not result in the recognition of additional gain, except to the extent that the gain that would otherwise be recognized on account of the payments exceeds the gain recognized as a result of the pledge. The rule relating to the nonrecognition of gain from subsequent payments applies whether or not such payments are used to pay any portion of the secured debt. The total amount of gain that can be recognized on an obligation as a result of the pledge rule and actual payments cannot exceed the total gain from the installment sale.

It has long been the rule that a transfer of property for like-kind property and cash payments in the future can qualify both for nonrecognition treatment for that portion of the gain attributable to the like-kind property and for installment reporting with respect to the cash payments.ⁿ²⁰ (The gain eligible for installment reporting is the total gain realized on the transaction less the portion eligible for nonrecognition.) Under *IRC Section 453(f)(6)* the value of the nonrecognition propertyⁿ²¹ is excluded from the total contract price and the payments received. The taxpayer's basis in the property transferred will first be allocated to the like-kind property received (but not in excess of its fair market value) and any remaining basis will be used to determine the gross profit ratio. The result is evidenced by the following example:

Example:

A taxpayer exchanges property with a basis of \$400,000 for like-kind property worth \$200,000 and an installment obligation of \$800,000, \$100,000 of which is payable in the taxable year of sale with the balance payable in the succeeding taxable year. Application of *IRC Section 453(f)(6)* limits the contract price to the amount of the installment obligation of \$800,000, which produces a gross profit of \$600,000 (\$800,000 contract price less \$200,000 of basis remaining after allocating \$200,000 to the like-kind property) and a gross profit ratio of 75 percent to be applied solely to the actual cash payments received. This creates a reportable gain of \$75,000 in the year of sale and \$525,000 in the succeeding year.

Suppose that a corporation sells its assets on an installment basis as part of a plan of liquidation and then distributes the installment obligation to the shareholders. Absent a special provision, the installment obligation would have to be taken into account as part of the amount realized by the shareholders on the liquidation. However, *IRC Section 453(h)* allows the shareholders to defer the reporting of the gain attributable to the installment obligation until payments on it are received, if the corporation acquired the obligation in a sale or exchange during the 12-month period beginning on the date of adoption of the plan of liquidation and the liquidation is completed during the period.ⁿ²² If liquidation distributions are received by a shareholder in more than one taxable year, the shareholder must, upon completion of the liquidation, redetermine the shareholder's gain from the liquidation by allocating the shareholder's basis in the stock of the corporation over all payments received by the shareholder.ⁿ²³

The regulations require that the installment obligation be a qualifying installment obligation; an evidence of indebtedness that is payable on demand or readily tradable cannot be a qualifying installment obligation.ⁿ²⁴ As a general rule, the nature of the assets sold by, and the tax consequences to, the selling corporation do not affect whether an installment obligation is a qualifying installment obligation.ⁿ²⁵ Excepted from this last stated rule is any installment obligation derived from a transaction where the obligor and shareholder are related persons, from the sale of inventory, or from certain tax avoidance transactions.

The shareholder receiving the qualified installment obligation must be a qualifying shareholder, defined as a shareholder subject to *IRC Section 331* with respect to the liquidating distribution.ⁿ²⁶ Thus, a creditor that receives a distribution from a liquidating corporation, in exchange for the creditor's claim, is not a qualifying shareholder.

Generally, a qualifying shareholder treats a qualifying installment obligation, for all purposes of the Code, as if the obligation is received by the shareholder from the person issuing the obligation in exchange for all of the shareholder's stock in the liquidating corporation.ⁿ²⁷ In order to test whether there is any original issue discount, the shareholder treats the obligation as newly issued on the date of distribution with an issue price equal to the sum of the adjusted issue price on the date of distribution and the amount of any qualified stated interest that has accrued prior to the distribution but is not payable until after the distribution.ⁿ²⁸ If the installment obligation is a variable rate debt instrument, the shareholder uses the equivalent fixed rate debt instrument constructed for the qualifying installment obligation as of the date the obligation was issued to the liquidating corporation to determine the accruals of original issue discount, if any, and interest on the obligation.ⁿ²⁹

All amounts distributed or treated as distributed to the shareholder incident to the liquidation, including cash, the issue price of qualifying installment obligations, and the fair market value of other property (including obligations that are not qualifying installment obligations) are considered as having been received by the shareholder as the selling price for the shareholder's stock in the liquidating corporation.ⁿ³⁰ An election not to report on the installment method an installment obligation received in the liquidation applies to all distributions received in the liquidation.

If, in the course, of a liquidation a shareholder assumes secured or unsecured liabilities of the liquidating corporation, or receives property from the corporation subject to liabilities (including any tax liabilities incurred by the corporation on the distribution), the liabilities do not reduce the amounts received in computing the selling price, but are added to the shareholder's basis in the stock of the liquidating corporation.ⁿ³¹ The additions to basis do not affect the shareholder's holding period for the stock.

The rule of *IRC Section 453(h)* does not extend to installment obligations received by the corporation on the sale of its inventory assets unless the sale is in the form of a bulk sale.ⁿ³² Nor can gain be deferred when the installment obligation is derived from the sale of depreciable property by the corporation to the distributee shareholder's spouse, to a trust in which the shareholder or his spouse is a beneficiary (unless the beneficiary's interest is a remote contingent interest as defined in *IRC Section 318(a)(3)(B)(i)*), or to a controlled entity.ⁿ³³ The following are controlled entities for this purpose: a corporation or partnership that is 50 percent owned by the distributee, his spouse, or both; two corporations that are members of the same controlled group; a corporation and a partnership if the same persons own more than 50 percent in value of the outstanding stock of the corporation and more than 50 percent of the capital interest or profits interest in the partnership; an S corporation and another S corporation if the same persons own more than 50 percent in value of the outstanding stock of each corporation; and an S corporation and a C corporation if the same persons own more than 50 percent in value of the outstanding stock of each corporation.ⁿ³⁴ In addition, if the corporation's assets are sold to a related party in a transaction not of the type described in the preceding sentence, and the purchaser then disposes of the assets, the related party disposition rules described below will apply to the shareholder who received the related party's obligation as a liquidating distribution.ⁿ³⁵ Finally, an installment obligation acquired by a liquidating corporation attributable to the sale of "covered property" is not a qualifying obligation if the corporation is formed or availed of for a principal purpose of avoiding *IRC Section 453(b)(2)* (relating to dealer dispositions and certain other dispositions of personal property), *IRC Section 453(i)* (relating to sales of property subject to recapture), or *IRC Section 453(k)* (relating to dispositions under a revolving credit plan or securities traded on an established securities market) through the use of a party bearing a relationship, either directly or indirectly, described in *IRC Section 267(b)* to any shareholder of the corporation.ⁿ³⁶

A significant expansion of the availability of installment reporting can be found in the enactment of *IRC Section 453(j)* which mandates the adoption of regulations "providing for ratable basis recovery in transactions where the gross profit or the total contract price (or both) cannot be readily ascertained."

According to those regulations, a contingent payment sale must be reported on the installment method unless the taxpayer elects to report all of the gain in accordance with the taxpayer's normal method of accounting.ⁿ³⁷ A contingent

payment sale is defined as one in which the aggregate selling price cannot be determined by the close of the taxable year in which the sale occurs. Excluded from the scope of contingent payment sales are any transactions with respect to which the installment obligation represents, under applicable principles of tax law, a retained interest in the property that is the subject of the transaction, an interest in a joint venture or a partnership, an equity interest in a corporation, or similar transactions, regardless of the existence of a stated maximum selling price or a fixed payment term.

For sales in which there is a stated maximum selling price, the portion of each payment reportable as income will be computed on the basis of a gross profit ratio determined by reference to the stated maximum selling price. A contingent payment sale is treated as having a stated maximum selling price if, under the terms of the agreement, the maximum amount of sale proceeds receivable by the taxpayer can be determined as of the end of the year in which the sale occurs.ⁿ³⁸ The stated maximum selling price is determined by assuming that all of the contingencies contemplated by the agreement are met or otherwise resolved in a manner that will maximize the selling price and accelerate payment to the earliest dates permitted under the agreement.ⁿ³⁹

If the contingent price sale agreement contains an adequate amount of stated interest, and such stated interest is payable in addition to the amounts otherwise payable under the agreement, the stated interest is not part of the contingent selling price.ⁿ⁴⁰ If there is unstated interest, the amount of unstated interest determined under *IRC Section 483* or *IRC Section 1274* is deducted from the initially determined stated maximum selling price and the reduced price used to determine the gross profit ratio and the amount of includable gain. For each year after the year of sale, the stated maximum selling price must be recomputed, taking into account all events that have occurred and assuming that all amounts that may become payable under the agreement will be paid on the earliest dates permitted under the agreement.

Example:

Assume that a taxpayer sells stock with a basis of \$250,000 to a buyer who agrees to pay a fixed percentage of the gross sales, but not more than \$200,000, in each of the next five years. Assume further that the contract provides for an adequate amount of stated interest that is paid in addition to the contingent payments. Since the largest price that can be paid to the seller during the term of the contract is \$1 million (five payments of \$200,000), the amount of income to be returned is determined by using that figure as the total contract price. This produces a potential gain of \$750,000 (\$1 million less \$250,000 basis) and a gross profit ratio of 75 percent to be applied to each payment.

The stated maximum selling price, as initially determined, is treated as the selling price unless and until the maximum amount is reduced pursuant to the terms of the agreement, by subsequent amendment, or by a payment recharacterization where there is unstated interest. When the maximum amount is subsequently reduced, the gross profit ratio will be recomputed with respect to payments received in or after the taxable year in which the reduction event occurs.ⁿ⁴¹ If there is more income to be earned for the transaction even with the price reduced, the taxpayer will report reduced income with respect to each installment payment received in the taxable year of adjustment and succeeding taxable years. If the reduction in the maximum selling price yields a total recomputed income that is less than the amount of income reported from installment payments received in previous taxable years, the excess of the earlier reported income over the total recomputed income is deductible as a loss in the adjustment year.

The transaction may be structured in such a way that the selling price is indefinite and no maximum can be determined. In such case, if the price is payable over a fixed period of time, the seller's basis in the property is recoverable ratably over the fixed period.ⁿ⁴² In making the allocation, it is not relevant whether the buyer is required to pay adequate stated interest. However, if the terms of the agreement incorporate an arithmetic component that is not identical for all taxable years, basis must be allocated among the taxable years to accord with that component, unless, taking into account all of the payment terms of the agreement, it is inappropriate to presume that payments under the contract are likely to accord with the variable component. If, in any taxable year, no payment is received or the amount of the payment (exclusive of interest) is less than the basis allocated to that taxable year, no loss deduction will be allowed unless the year is the final payment year or the obligation is determined to be worthless. When the loss is not allowed, the unrecovered portion of

the basis allocated to the taxable year is carried forward to the next succeeding taxable year.

Example 1:

A sells property to B for 10 percent of the property's gross yield for each of the next five years. A's basis in the property is \$10 million. If A receives payments (exclusive of interest) as shown in the following table, he will allocate basis and report gain as follows:

Year	Payment	Basis Recovered	Gain
1	\$2,600,000	\$2,000,000	\$600,000
2	\$3,000,000	\$2,000,000	\$1,000,000
3	\$2,800,000	\$2,000,000	\$800,000
4	\$3,600,000	\$2,000,000	\$1,600,000
5	\$4,200,000	\$2,000,000	\$2,200,000

The \$10 million basis was allocated equally to the five-year period during which payments were to be received because there was no way to determine a stated maximum selling price.

If the payment in year 1 had been only \$1,800,000 and the installment obligation was not found to be worthless, no loss would be allowed and the \$200,000 in unrecovered basis would be carried to year 2 to produce a gain in that year of \$800,000.

Example 2:

C owns all of the stock of X Corporation. He sells the stock, having a basis of \$200,000, to D, who agrees to make four payments based on the net profits of X as follows: 40 percent of the net profits in year 1, 30 percent in year 2, 20 percent in year 3, and 10 percent in year 4. C's basis is allocated to each of the four years as follows: \$80,000 to year 1, \$60,000 to year 2, \$40,000 to year 3, and \$20,000 to year 4.

Example 3:

Assume the same facts as in Example 2, except that the agreement calls for the following fixed installment payments: no payment in year 1, \$200,000 in year 2, \$400,000 in year 3, \$600,000 in year 4, and \$800,000 in year 5. Because of the fixed payment schedule, it is inappropriate to presume that the payments accord with the variable component. Thus, C will be required to allocate \$40,000 of basis to each of the five taxable years.

If there is neither a stated maximum selling price nor a fixed period, the transaction will be scrutinized to see if a sale has realistically occurred, or whether, in economic effect, the payments received are in the nature of rent or royalty income.⁴³ If the arrangement is found to qualify as a sale, the taxpayer's basis is recovered in equal annual installments over a period of 15 years commencing with the date of sale. However, if no payment is received during the taxable year or the payment is less than the allocated basis, no deduction is allowed unless the obligation has become worthless. The unrecovered basis is reallocated in level amounts over the balance of the 15-year term. Any basis not recovered at the end of the 15th year is carried forward from year to year until recovered or until the payment obligation is found to be worthless.

The rules for recovery of basis in contingent sales focus on the payment terms of the contingent selling price agreement. However, there are instances in which failure to take account of the nature or productivity of the property sold may be expected to result in distortion of the taxpayer's income over time (eg, when the property is depreciable property normally eligible for depreciation on the income forecast method, or is depletable property normally eligible for cost

depletion in which total future production must be estimated, and payments under the agreement are based upon receipts or units produced by or from the property). In such case, the taxpayer's basis may be recovered by using an income forecast method.ⁿ⁴⁴

The normal basis recovery rules could prove inadequate in a given case. If the taxpayer can demonstrate that application of the normal rules will substantially and inappropriately defer recovery of basis, an alternative method of basis recovery can be used.ⁿ⁴⁵ The Service can employ an alternative method if the usual rules will accelerate the recovery of basis.ⁿ⁴⁶

Interest payable by the purchaser does not form part of the selling price. However, if the imputed interest provisions of *IRC Section 483* or the original issue discount rules of *IRC Section 1274* become applicable, the total contract price for the purposes of computing gross profit becomes the stated selling price reduced by the amount of unstated interest.ⁿ⁴⁷

What constitutes a payment? Clearly, the delivery of cash by the purchaser to the seller is not the only manner in which a payment can be made. Thus, payment has been found where a purchaser cancelled a debt due it by the seller,ⁿ⁴⁸ where promissory notes of a party other than the purchaser were delivered to the seller,ⁿ⁴⁹ where the purchaser paid the seller's legal expenses--the parties considering such expenses part of the selling price,ⁿ⁵⁰ as well as where a dividend declared on stock was applied against the purchase price of the stock,ⁿ⁵¹ and where 80 percent of the purchase price was paid to an irrevocable trust from which the seller was entitled to receive all of the income and up to 20 percent of the corpus annually.ⁿ⁵² On the other hand, an assumption of the seller's liabilities does not constitute a paymentⁿ⁵³ unless the indebtedness assumed exceeds the basis of the property sold.ⁿ⁵⁴

In the normal installment sale, the advantage of deferred income reporting is offset by the uncertainty of payment by the purchaser at the time specified in the installment obligation. The detriment of possible default could be eliminated if a sale made in the installment mode to a family member, who resold the property shortly thereafter for cash, could qualify as an installment sale with gain recognized only when payments are received by the initial seller. Generally, there would be little or no gain on the resale, since the selling price would approximate, if not equal, the related party's basis (the price fixed in the installment sale contract).

The described scheme met with a measure of success under the statutory framework that existed before the Installment Sales Revision Act of 1980. The critical inquiry was whether the seller directly or indirectly controlled the proceeds or possessed the economic benefit therefrom.ⁿ⁵⁵ Thus, a sale to an independent trustee of a trust for the benefit of the seller's family passed muster,ⁿ⁵⁶ while one to the seller's son who was obligated to resell, invest the proceeds, and hold the reinvestment in escrow, did not.ⁿ⁵⁷

Under *IRC Section 453(e)*, added by the 1980 amendment, a disposition by a related installment buyer will trigger the recognition of gain by the initial seller, based on his gross profit ratio, to the extent the amount realized on the second disposition exceeds actual payments made under the installment sale (whether made before the second disposition or thereafter, but in the same taxable year).ⁿ⁵⁸ Once an initial seller is required to accelerate the recognition of gain by reason of a second disposition,ⁿ⁵⁹ subsequent payments received by the initial seller are recovered tax-free until they equal the amount realized on the resale.ⁿ⁶⁰

For these purposes, a related person means "a person whose stock would be attributed under section 318(a) ... to the person first disposing of the property, or ... a person who bears a relationship described in section 267(b) to the person first disposing of the property."ⁿ⁶¹ Thus, an installment sale is a contender for *IRC Section 453(e)* treatment if made, for example, to the spouse or to a child, grandchild, sibling or parent of the initial seller, to a corporation in which the initial seller owns, directly or indirectly, 50 percent or more in value of the stock, to a partnership in which the seller is a partner, or to an estate or trust under which the seller is a beneficiary. A sale to an aunt or uncle would not be affected by *IRC Section 453(e)*; they are not part of a taxpayer's "family" as defined by either *IRC Section 318(a)(1)*, or *IRC Section 267(c)(4)*. Presumably, the ability to defer recognition of gain on an installment sale to an aunt or uncle, or to

any other collateral relative other than a sibling, followed by a resale, will continue to be determined under the control or enjoyment test developed by the courts.ⁿ⁶²

A special period of limitations is imposed in the case of property other than marketable securities. (A marketable security is one for which, as of the date of disposition, there was a market on an established securities market or otherwise.)ⁿ⁶³ For such property the resale rule applies only if the second disposition occurs within two years of the initial installment sale.ⁿ⁶⁴ The running of the two-year period is suspended for any period during which the related party's risk of loss with respect to the property is substantially diminished by the holding of a "put" with respect to such property (or similar property), the holding by another person of a right to acquire the property, a short sale or other transaction.ⁿ⁶⁵ For marketable securities, the resale rule applies without time limit for dispositions made before the installment obligation is satisfied.

There are several exceptions to the application of the foregoing rules. A reacquisition of stock by the issuing corporation in a nonliquidating sale is not treated as a first disposition.ⁿ⁶⁶ Further, there is no acceleration of gain when the second disposition results from a compulsory or involuntary conversion provided the first disposition occurred before the threat or imminence of the conversion.ⁿ⁶⁷ Also excepted is any transfer made after the death of the initial seller or the related buyer.ⁿ⁶⁸ Finally, there will be no triggering of gain if it is established to the satisfaction of the Service that none of the dispositions had as one of its principal purposes the avoidance of federal income taxes.ⁿ⁶⁹

IRC Section 453(g) prescribes a special rule for installment sales of depreciable property by the seller to a trust in which the seller or his spouse is a beneficiary (unless the beneficiary's interest is a remote contingent interest as defined in *IRC Section 318(a)(3)(B)(i)*), or to a controlled entity as described above.ⁿ⁷⁰ Here, installment treatment is denied and all payments to be received are treated as received in the year of sale (effectively placing the seller on the accrual method), unless it is established to the satisfaction of the Service that the sale did not have as one of its principal purposes the avoidance of federal income taxes. The term "payments to be received" includes the aggregate amount of all payments that are not contingent, and the fair market value of any payments that are contingent as to amount.ⁿ⁷¹ In the case of payments that are contingent as to amount, but as to which a fair market value cannot be reasonably ascertained, the basis of the property sold is recovered ratably, and the purchaser cannot increase the basis of any property acquired in the sale by any amount before such time as the seller includes the amount in income.

[b] Disposition of Installment Obligations. If the taxpayer sells or otherwise disposes of the installment obligation received by him, or if the obligation is satisfied at other than its face value, gain or loss is recognized in the year of disposition or satisfaction.ⁿ⁷² If the disposition takes the form of a sale or exchange, the amount of gain or loss is the difference between the amount realized on the disposition and the basis of the obligation (face value of the obligation less the total amount of income which would have been received had the obligation been satisfied in full by the obligor).ⁿ⁷³

Example:

Assume that the taxpayer sells stock having a basis of \$4,000 for \$10,000, of which \$2,000 is payable in cash at the time of sale with the balance payable in equal annual installments (with sufficient interest to avoid invoking *IRC Section 483*). Eight months after the sale, and before receipt of any installment payments, the notes representing the future installments are sold for \$6,000. The gain on the disposition of the installment obligation is determined as follows:

(1) *Determining the basis of the obligation*

Selling price of stock	\$10,000
Basis of stock	4,000
Gross profit	\$6,000
Proportion of each payment includable in income (\$6,000 gross profit/\$10,000 total contract price)	60%

Face value of notes	\$8,000
Total income which would have been returnable had notes been satisfied in full (60% of \$8,000)	4,800
Basis of obligation	\$3,200
(2) <i>Computing the gain from the disposition</i>	
Amount realized	\$6,000
Basis of the obligation	3,200
Gain realized on the disposition	\$2,800

The gain or loss will be considered as resulting from the sale or exchange of the property with respect to which the obligation was originally received.ⁿ⁷⁴ Thus, the character of the gain will depend solely on whether the underlying asset was a capital asset and the holding period computed solely by reference to the length of time the original property was held.ⁿ⁷⁵

If the disposition is not a sale or exchange, gain is measured by the difference between the fair market value of the obligation and its basis. At issue may be the question whether the transaction should be governed by *IRC Section 453B(a)(1)* (sale or exchange of installment obligations), or *IRC Section 453B(a)(2)* (other disposition of installment obligations). This would be important if the value of the obligation and the amount realized on its disposition were not the same.ⁿ⁷⁶

A number of actual dispositions are excepted from the provisions of *IRC Section 453B*. The disposition of an obligation at death does not trigger immediate gain.ⁿ⁷⁷ Rather, the income which would have been returned by the decedent is considered income in respect of a decedent, includable by the person succeeding to the right to collect the obligation.ⁿ⁷⁸

Outright transfers of installment obligations between spouses or incident to a divorce are not gain-producing dispositions if the transfer comes within the terms of *IRC Section 1041*; the same tax treatment that would have applied to the transferor had the obligation not been transferred applies to the transferee.ⁿ⁷⁹ Gain is recognized if the transfer is in trust.ⁿ⁸⁰

The disposition of installment obligations as part of the complete liquidation of a subsidiary by a parent is exempt from the general rule of *IRC Section 453B*, provided the basis of the property acquired by the parent is determined by reference to the basis in the hands of the subsidiary.ⁿ⁸¹ If the parent uses the provisions of *IRC Section 338* to obtain a stepped-up basis for the acquired property,ⁿ⁸² gain must then be recognized.

In general, *IRC Section 453B* does not require the recognition of gain or loss by an S corporation that distributes an installment obligation in complete liquidation if receipt of the obligation is nontaxable pursuant to *IRC Section 453(h)*. However, this does not exempt the corporation from any gain imposed by Subchapter S.ⁿ⁸³

The regulations provide a further exception for dispositions which are part of transactions afforded nonrecognition treatment by some provision of the Code.ⁿ⁸⁴ However, the provision must be viewed with caution, for its language is decidedly broader than its application. For example, if a transfer to a corporation is sheltered from taxation by *IRC Section 351*, a disposition of an installment obligation in connection therewith should fall under the nonrecognition umbrella. Generally it will, but, if the debtor is also the transferee corporation and the holder of the obligation exchanges it for stock in the corporation, the Service considers the disposition to be a taxable event.ⁿ⁸⁵ The rationale given for this result is that the exchange of the obligation for the stock works a satisfaction of the obligation at other than face value.

A gift of an installment obligation is a disposition that produces gain for the donor,ⁿ⁸⁶ as is a conveyance of an installment obligation to an irrevocable trust.ⁿ⁸⁷ However, no gain will result upon the transfer of an installment obligation to a trust if the taxpayer retains the right to revoke the trust and revest the corpus in himself.ⁿ⁸⁸

The cancellation of an installment obligation is a disposition on which the seller will recognize gain equal to the difference between the fair market value of the obligation and its basis.ⁿ⁸⁹ On the other hand, a surrender of an installment obligation for one containing identical terms is not a gain-producing disposition, but merely a change in the type of security.ⁿ⁹⁰

Finally, the transfer of an installment obligation to a life insurance company is subject to its own special rule and exception. In general, the transfer will require recognition of gain notwithstanding any provision of the Code granting nonrecognition to transfers to such companies.ⁿ⁹¹ The exception comes into play if the life insurance company elects to treat the remaining gain as investment income as payments are received.ⁿ⁹²

(n8)Footnote 6. *Weir v Commr*, 109 F2d 996 (3d Cir 1940). Libin, "Transactions Entered Into For Profit,' 'Regular Trade or Business,' and/or 'Investment': Some Distinctions and Differences," *NYU 27th Inst on Fed Tax* 1209 (1969). The question whether a transaction is entered into for profit is apparently one of intention, so that loss deductions have been disallowed where the taxpayer knew that the stock could never yield profit. *Dresser v US*, 55 F2d 499 (Ct Cl 1932), *cert denied* 287 US 635 (1932); *Paine v Commr*, 102 F2d 110 (1st Cir 1939).

(n9)Footnote 7. No loss was allowed in *Grey v Commr*, *TC Memo 1974-2*, *affd in an unpublished opinion* (5th Cir 1974), when it was found that the taxpayer's alleged ownership of the stock in question was a mere facade to conceal the identity of the true owner.

The loss must result from an identifiable transaction. A mere decline in the value of property does not suffice. See, eg, *Snyder v US*, 83 AFTR2d 99-397 (Fed Cir 1999).

(n10)Footnote 8. See Ch 2.

(n11)Footnote 9. See *Rose v Commr*, 868 F2d 851, 853 (6th Cir 1989): "This court will not inquire into whether a

transaction's primary objective was for the production of income or to make a profit, until it determines that the transaction is bona fide and not a sham ... The proper standard in determining if a transaction is a sham is whether the transaction has any practicable economic effects other than the creation of income tax losses ... A taxpayer's subjective business purpose and the transaction's objective economic substance may be relevant to this inquiry." For a fuller discussion of the economic substance doctrine, see § 1.02A, *supra* .

(n12)Footnote 10. 132 TC 161 (2009) .

(n13)Footnote 11. BLISS and similar investment strategies relied on a Tax Court Memorandum decision, *Helmer v Commissioner*, TC Memo 1975-160 , for the proposition that the potential liability created by the writer of an option contract, because of its contingent nature, could not be taken into account in calculating either the amount realized on a contribution of the contract to the partnership or deducted from the taxpayer's basis in its partnership interest. The IRS alerted taxpayers that tax shelters relying on *Helmer*, such as the one acquired by the taxpayer in *New Phoenix*, would be challenged by the Service, and that the liability represented by the short contract should reduce the taxpayer's outside basis in the partnership under IRC § 752. See Notice 2000-44, 2002-2 CB 255 . This position was ultimately adopted in *Treas Reg* § 1.752-6(b)(2), which became effective retroactively after the taxpayer in *New Phoenix* executed its BLISS transaction. The Tax Court in *New Phoenix* found it unnecessary to decide whether *Helmer v Commr* was good law prior to adoption of the amended IRC § 752 regulations because, under the sham transaction doctrine, even if BLISS technically complied with the tax law, such technical compliance is irrelevant to deductibility of the loss if the underlying transaction is devoid of economic reality. See also *Jade Trading, LLC v US*, 80 Fed Cl 11 (2007) .

BLISS produced anything but for its promoters and those who paid them to employ the strategy. In *New Phoenix*, the taxpayer not only failed to obtain the tax benefit it sought, it was also denied a deduction for the substantial promoter's fees it paid and, additionally, was required to pay a 40 percent valuation misstatement penalty on account of the artificial inflation of its basis in the publicly traded stock. See IRC § 6662(h). The promoter, a nationally known law firm, was driven out of business by liabilities to clients who subscribed to the scheme, while the tax lawyer responsible, who employed the scheme to avoid his own tax liabilities, was also hit with tax deficiencies, interest and 40 percent valuation misstatement penalties. See *Cemco Investors LLC v US*, 515 F3d 749 (7th Cir 2008) .

(n14)Footnote 12. The taxpayer's option contracts with the bank provided that neither party owed a fiduciary duty to the other.

(n15)Footnote 13. TC Memo 1975-160 .

(n16)Footnote 14. *New Phoenix Sunrise Corp and Subs v Commr*, 132 TC 161, 185 (2009) ; quoting *Dow Chem Co v US*, 435 F3d 594, 602 (6th Cir 2006) and *Am Elec Power Co v US*, 326 F3d 737, 742 (6th Cir 2003) . See also *Southgate Master Fund, LLC v US*, 651 F Supp 2d 596 (ND Tex 2009) (partnership disregarded as a sham where only purpose was to create high outside basis for taxpayer, who made an illusory contribution to the partnership of assets over which he continued to have complete control, including the sole right to any appreciation in the assets' value).

(n17)Footnote 15. *Winn-Dixie Stores, Inc & Subs v Commr*, 113 TC 254, 294 (1999) , *affd* 254 F3d 1313 (11th Cir 2001) ; *Brown v Commr*, 85 TC 968, 1000 (1985) , *affd* sub nom *Sochin v Commr*, 843 F2d 351 (9th Cir 1988) . Since the taxpayer in *New Phoenix* was a corporation, it was not subject to IRC § 165(c)'s requirement that deductible losses of individuals are limited to those incurred either in a trade or business or a transaction entered into for profit (or a casualty loss). See *International Trading Co v Commr* 484 F2d 707 (7th Cir 1973) , *reversing* 57 TC 455 (1971) (In *International Trading*, the Tax Court held in a court-reviewed opinion that although there was no express limitation on the deductibility of corporate losses comparable to IRC § 165(c), IRC § 165 should be read to include an implicit requirement that corporate losses, to be deductible, must be incurred in a trade or business. Calling this judicial legislation, the Court of Appeals reversed and allowed the taxpayer corporation to deduct a loss on sale of nonbusiness property used exclusively for the benefit of its shareholders.) Since the corporation in *New Phoenix* did not incur a real loss, however, it was not necessary for the Tax Court to revisit the issue in *International Trading*, *supra*. See *Rose v*

Commr, 868 F2d 851, 853 (6th Cir 1989) . Cf *Silver Brand Clothes, Inc v US*, 404 F Supp 721 (SD WVa 1975) .

(n18)Footnote 16. See *IRC* § 6664(c)(1) ("No penalty shall be imposed under section 6662 * * * with respect to any portion of an underpayment [of tax] if it is shown that there was a reasonable cause for such portion and that the taxpayer acted in good faith with respect to such portion."). See also *US v Boyle*, 469 US 241, 251 (1985) ("When an accountant or attorney advises a taxpayer on a matter of tax law, such as whether a liability exists, it is reasonable for the taxpayer to rely on that advice.")

(n19)Footnote 17. See also *Maguire Partners-Master Invs, LLC v US*, 2009 US Dist LEXIS 8361, 8369 (CD Cal 2009) . Indeed, the attorney who normally provided legal advice to the taxpayer in *New Phoenix* had expressed serious reservations about the validity of the transactions.

(n20)Footnote 18. See Notice 2000-44, 2002-2 CB 255 .

(n21)Footnote 19. 2009-1 CB 735 .

(n22)Footnote 20. The ruling was prompted by widely reported fraudulent investment schemes perpetrated by confessed swindler Bernard Madoff and others that claimed hundreds if not thousands of victims. See Rev Proc 2009-20, 2009-14 IRB 749 , § 2.01, discussed *infra*; Coder and Young, "IRS Issues Guidance on Losses for Madoff Victims," 122 *Tax Notes* 1422 (March 23, 2009).

(n25)Footnote 23. 61 TC 354 (1973) , *aff'd* 540 F2d 448 (9th Cir 1974) .

(n26)Footnote 24. See *Paine v Commissioner*, 63 TC 736 (1975) , *aff'd without published opinion*, 523 F2d 1053 (5th Cir 1975) ; *MTS International, Inc v Commr*, 169 F3d 1018, 1022 (6th Cir 1999) ; *Marr v Commr*, TC Memo 1995-250 ; *Rev Rul* 77-17, 1977-1 CB 44 ; Chief Counsel Advice Memorandum 200811016 (June 22, 2007). See also *IRS Notice* 2004-27, 2004-1 CB 782 (in which the Service notified taxpayers that it intended to disallow theft loss deductions (and possibly impose penalties under *IRC* § 6662) if such deductions were claimed with respect to open market purchases of stock that subsequently declined in value due to a disclosure of accounting fraud or other illegal misconduct by officers or directors of the corporation that issued the stock.)

(n27)Footnote 25. See *Estate of Melcher v Commr*, 476 F2d 398 (9th Cir 1973) ; *Marine v Commr*, 92 TC 958, 978 (1989) , *aff'd without opinion*, 921 F2d 280 (9th Cir 1991) , *cert denied* 502 US 819 (1991) ("Petitioners received exactly what they bargained for--title to a ... building ... and claims to tax deductions greatly exceeding their cash investment"); *Viehweg v Commr*, 90 TC 1248 (1988) ; *West v Commr*, 88 TC 152 (1987) ; *McCullough v Commr*, TC Memo 1990-653 .

(n28)Footnote 26. See *Nichols v Commr*, 43 TC 842, 886 (1965) , *nonacq* 1970-2 CB xvii and *Rev Rul* 70-333, 1970-1 CB 38 . On the other hand, a theft loss may not be allowed, even if misrepresentations were made, if the taxpayer's conduct demonstrated a "complete indifference to the economic realities" of the transaction (including indifference to the reality of the misrepresented facts). See *Doyle v Commr*, TC Memo 1989-465 . The taxpayer, in other words, must demonstrate actual reliance on false statements to establish a theft loss.

(n29)Footnote 27. See, eg, *Harlan v US*, 160 Ct Cl 209 (1963) (corporation in receivership may recover taxes paid on fraudulently inflated income reported by former owners and managers to allow them to pay dividends on Class A stock and thereby prevent Class A shareholders from obtaining voting control.)

(n30)Footnote 28. See *IRC § 1341* which applies when a taxpayer is required to return an amount that was included in income in a prior year because it appeared that the taxpayer had an unrestricted right to it. The Service found *IRC § 1341* inapplicable because the taxpayer was not required to restore the fictitious income he reported.)

(n31)Footnote 29. *IRC §§ 1311-1314* provides that under enumerated circumstances either the taxpayer or the Service may effectively re-open a closed year to prevent the other party from maintaining inconsistent positions in the open and closed years. The Service concluded that its position allowing the taxpayer a theft loss for the fictitious income in the year of discovery was not inconsistent with its position that the fictitious income was properly reported in the prior years the taxpayer sought to re-open.

(n32)Footnote 30. Legislative relief, perhaps giving taxpayers an extended or unlimited right to recover prior years' taxes on income erroneously overstated due to another's fraud (analogous to the Service's unlimited right to recover understatements of income due to taxpayer fraud, see *IRC § 6501(c)(1)* and (2)), would seem a preferable solution. Whether or not Congress acts, however, it is unlikely that it would change *Rev Rul 2009-9* retroactively. Cf Section 1261 of Title I of Division B of the American Recovery and Reinvestment Act of 2009, Pub L No 111-5, 123 Stat 115 (2009) (making legislative findings that *IRS Notice 2008-83, 2008-2 CB 905*, was "not authorize[d]" and "inconsistent with the congressional intent" yet still refusing to overrule the Notice retroactively "as taxpayers should generally be able to rely on guidance issued by the Secretary of the Treasury." *Notice 2008-83*, issued during the "financial meltdown" of 2008, had declared that banks undergoing an "ownership change" would not be subject to the disallowance of built-in losses under *IRC § 382(h)* with respect to losses on their loans or bad debts.)

(n33)Footnote 31. See *IRC § 1211(b)*, discussed in § 2.06[2][b].

(n34)Footnote 32. *IRC § 165(g)(1)*.

(n35)Footnote 33. *IRC § 166(d)*.

(n36)Footnote 34. See *First Chicago Corp v Commr, TC Memo 1995-109*, where the taxpayer was able not only to transform a capital into an ordinary loss in this fashion, but to accelerate recognition of the loss in doing so.

(n37)Footnote 35. *IRC § 172(d)(4)*.

(n38)Footnote 36. *IRC § 172(b)(1)(F)*.

(n39)Footnote 37. An "eligible small business" for purposes of this provision means any corporation, partnership or sole proprietorship with average annual gross receipts, calculated using a 3 year moving average for all prior years in which it has been in existence, of \$15 million or less. See *IRC §§ 172(b)(1)(H)(iv), 172(b)(1)(F)(iii), and 448(c)*.

(n40)Footnote 38. *IRC § 172(b)(1)(H)*.

(n41)Footnote 39. *IRC § 165(h)(1)*.

(n42)Footnote 40. *IRC § 165(h)(2)*.

(n43)Footnote 41. *IRC § 67*.

(n44)Footnote 42. See *Treas Reg §§ 1.165-8(a)(2)* and *1.165-1(d)(2)*. This longstanding regulation, of undoubted validity, is merely a corollary of the general principle that before any loss may be claimed as a deduction, it must be evidenced by a closed and completed transaction. *US v White Dental Co, 274 US 398, 401 (1927)*; *Boehm v Commr, 326 US 287, 291 (1945)*. "One of the essential inquiries under the 'closed transaction' concept has been whether, in the year the deduction is sought, there existed a substantial possibility that the alleged losses could be recouped by actions against responsible third parties or otherwise." *Ramsay Scarlett and Company, Inc v Commr, 61 TC 795, 807 (1974)*.

(n45)Footnote 43. An example of this dilemma can be found in *Estate of Scofield v Commr*, 266 F2d 154 (6th Cir 1959) , reversing 25 TC 774 (1956) , in which the Tax Court held that the taxpayer had unreasonably delayed claiming an embezzlement loss, first discovered in 1935, until claims against the embezzlers and various third parties were finally resolved, for the most part unsuccessfully, in 1948. At that point the taxpayer was barred from claiming the loss because the year in which the Tax Court thought it should have been claimed, 1935, was by then barred by the statute of limitations. The Court of Appeals for the Sixth Circuit reversed the Tax Court, however, holding that "the only fair test is foresight, not hindsight," and finding the Tax Court's decision had been "clearly erroneous" because the Court of Appeals believed it was made mostly with the benefit of the latter. *Estate of Scofield v Commr*, 266 F2d at 163 .

(n46)Footnote 44. Taxpayers that deduct the entire theft loss in the year of discovery must take any subsequent recovery of the loss into income under the tax benefit rule, to the extent the earlier loss deduction reduced the taxpayer's income tax. See *IRC § 111*; *Treas Reg § 1.165-1(d)(2)(iii)*; *Rev Rul 2009-9* .

(n47)Footnote 45. The Service now apparently agrees with the Court of Appeals in *Estate of Scofield v Commr*, 266 F2d at 159 that "Normally where a taxpayer is in good faith willing to go to the trouble and expense of instituting suit to recoup a...loss, there is as a matter of fact sufficient chance of at least part recovery to justify that taxpayer in deferring a claim of a loss deduction ... until the litigation in question is concluded." But compare *Parmelee Transp Co v US*, 173 Ct Cl 139, 154 (1965) : "The mere existence of a 'possible' claim or pending litigation will not alone warrant postponing loss recognition ... Where the stakes are ... high, a suit may be '100 percent justified' even though the probability of recovery is miniscule ... Analyzing the rule in percentage terms, we would consider a 40 to 50 percent chance of recovery as being 'reasonable.' A lawsuit might well be justified by a 10 percent chance."

(n48)Footnote 46. See, eg, *Vincentini v Commr*, TC Memo 2008-271 .

(n49)Footnote 47. See *Rev Proc 2009-20* , § 5. In addition, the procedure will protect a taxpayer who follows it from audit adjustments challenging the classification of a loss incurred by a victim of a Ponzi scheme as a "theft loss," or challenging the methodology prescribed in the procedure for calculating the amount of the loss. *Rev Proc 2009-20* , § 5. The revenue procedure does not purport to protect the taxpayer from challenges to the factual foundation for the deduction: i.e., whether the taxpayer actually suffered a loss, or the amounts the taxpayer invested or recovered in the fraudulent scheme.

(n50)Footnote 48. *Rev Proc 2009-20* , § 4.01.

(n51)Footnote 49. *Rev Proc 2009-20* , § 4.02(1).

(n52)Footnote 50. *Rev Proc 2009-20* , § 4.02(2).

(n53)Footnote 51. *Rev Proc 2009-20* , § 4.04.

(n54)Footnote 52. *Rev Proc 2009-20* , § 4.03(4). This does not include cash or property transferred by the taxpayer to a fund or other entity (separate from the investor for federal income tax purposes) which invested in the SFA, although the fund or entity itself may be entitled to a deduction that is within the scope of the revenue procedure. *Rev Proc 2009-20* , § 4.04(4).

(n55)Footnote 53. *Rev Proc 2009-20* , § 4.03(2).

(n56)Footnote 54. *Rev Proc 2009-20* , § 4.03(3).

(n57)Footnote 55. *Rev Proc 2009-20* , § 4.06(1). The revenue procedure specifically provides that "qualified investment" does not include any of the following: (1) amounts borrowed from the "responsible group" to the extent the borrowed amounts were not repaid by the time the theft was discovered; (2) fees paid to the "responsible group" that were deducted for federal income tax purposes; (3) amounts reported to the qualified investor by the SFA as taxable

1-1 Taxation of Securities Transactions § 1.05

income that were not included the investor's gross income; or (4) cash or property that the qualified investor invested in a fund or entity which used the cash or property to invest in the SFA. The "responsible group" with respect to an SFA consists of (a) the individual(s) who conducted the SFA, (b) any investment vehicle or other entity that conducted the SFA, including employees, officers or directors, (c) a liquidation, receivership, bankruptcy or similar estate established to recover assets for the benefit of investors and creditors of the SFA, and (d) parties that are subject to claims brought on behalf of such estates. *Rev Proc 2009-20* , § 4.05.

(n58)Footnote 56. *Rev Proc 2009-20* , § 5.02(1).

(n59)Footnote 57. *Rev Proc 2009-20* , §§ 4.10, 4.08 and 4.09.

(n60)Footnote 58. A qualified investor may have income or become entitled to an additional deduction in a year subsequent to the discovery year depending on the actual amount of the loss eventually recovered. *Rev Proc 2009-20* , § 5.03. Although the Service does not say so expressly, presumably the taxpayer will eventually be allowed to recover the 5 percent or 25 percent reduction in the theft loss deduction made pursuant to *Rev Proc 2009-20* , § 5.02(1) by claiming a deduction for that amount in the earliest taxable year in which it becomes clear that no further recoveries will be made (eg, all claims are either abandoned, settled, or otherwise concluded), and the actual loss sustained is greater than the 95 percent or 75 percent claimed in the discovery year pursuant to the revenue procedure. Nothing in *Rev Proc 2009-20* (including the representations the taxpayer is required to make in a statement attached to the return filed for the discovery year (see *Rev Proc 2009-20* , § 6.02, discussed *infra*)) is inconsistent with claiming such an additional deduction in a year subsequent to the discovery year.

(n61)Footnote 59. *Rev Proc 2009-20* , § 8.01.

(n62)Footnote 60. *Id.*

(n63)Footnote 61. *Rev Proc 2009-20* , § 8.02.

(n64)Footnote 1. Installment reporting of losses is not permitted. *Martin v Commr*, 61 F2d 942 (2d Cir 1932) .

A partnership can use the installment method even though one of the partners has a basis in the property greater than the partner's share of the amount realized. That partner will report the entire loss in the year of sale. *Rev Rul 79-92*, 1979-1 CB 180 .

Because of the gain deferral, no bad debt deduction is allowed if the buyer defaults on the installment obligation. *Lombard v Commr*, TC Memo 1994-154 .

(n65)Footnote 2. *IRC § 453(d)(1)*. The election must be made on or before the due date (including extensions) for the filing of the return for the taxable year in which the disposition occurs. *IRC § 453(d)(2)*; *Bolton v Commr*, 92 TC 303 (1989) . The filing of a return reporting all of the gain from the transaction in the year of sale is an effective election out of the installment method. *Temp Reg § 15A.453-1(d)(3)(i)*. Once made, the election can be revoked only with consent. *IRC § 453(d)(3)*.

Permission to revoke an election not to use the installment method was approved in *Ltr Rul 9345027* . The taxpayer's tax return preparer did not realize that the sale was an installment sale, and the revocation was not motivated by a tax avoidance purpose.

The Service will not allow a taxpayer to make a late election out of the installment method if the failure to elect within the prescribed period was due to a change of mind or change of law. See, eg, *Ltr Rul 9413019* . The Service may do so, however, if, after considering all of the relevant facts, a taxpayer's intention to timely elect out of the installment method is thwarted by a mistake and the taxpayer makes a timely effort to correct the mistake. *Rev Rul 90-46*, 1990-1 CB 107 .

See also *Ltr Rul 9218012*, *Ltr Rul 9213003* and *Ltr Rul 9118013*. A late election out of the installment method has been allowed where the delay was due to the failure of a tax return preparer to complete the return on time after assurances that it would be ready by the due date. *Ltr Rul 9145015*.

Effect of election. The Tax Court has concluded that the essence of the election-out procedure requires the taxpayer to report the full amount of the income from an installment sale on the return for the year of sale. *Estate of Wilkinson v Commr, TC Memo 1993-463*.

A cash basis taxpayer electing not to use the installment method will treat as an amount realized in the taxable year of sale the fair market value of the installment obligation. For an accrual method taxpayer eligible to use the installment method, the total amount payable under the obligation is an amount realized in the year of sale. *Temp Reg § 15A.453-1(d)(2)(ii)(A)*.

(n66)Footnote 3. *IRC § 453(b)(1)*.

The Service has ruled that a nonresident alien, who sold property to an unrelated foreign taxpayer and then became a US citizen, does not have to include in income payments received after the seller became a citizen; the taxpayer is deemed to have elected not to report the sale on the installment method. *Ltr Rul 8708002*. The exclusion from income does not extend to interest income received after the taxpayer becomes a resident alien or citizen. *Ltr Rul 9412008*.

(n67)Footnote 4. *IRC § 453(i)*.

(n68)Footnote 5. *IRC § 453(k)(1), (2)(A)*; *Rev Rul 93-84, 1993-2 CB 225*. Regulations can prescribe the extent to which sales of property (other than stock or securities) of a kind regularly traded on an established market will not qualify for the installment method. *IRC § 453(k)(2)(B)*.

See *PLR 9306001* and *PLR 9306003* for examples of the application of *IRC § 453(k)(2)(A)* to stock that is not traded on an established market but is convertible into stock that is.

The prohibition of *IRC § 453(k)(2)(A)* does not extend to unregistered shares of a publicly traded corporation. The shares are restricted from sale on the public market. See, eg, *Ltr Rul 9803022*.

The Service can provide for the application of this rule for transactions in which the rule otherwise would be avoided through the use of related parties, pass-through entities, or intermediaries.

(n69)Footnote 6. *IRC § 453(b)(2)*.

(n70)Footnote 7. *IRC § 453(l)(1)*.

(n71)Footnote 8. *IRC § 453(l)(2)(A)*.

(n72)Footnote 9. *IRC § 453(l)(2)(B)*.

(n73)Footnote 10. *IRC § 453(l)(2)(C)*.

(n74)Footnote 11. *IRC § 453(l)(3)(A)*.

(n75)Footnote 12. *IRC § 453(l)(3)(B)*. The interest is treated as interest for purposes of any interest deduction allowable to the taxpayer for the taxable year. *IRC § 453(l)(3)(C)*.

(n76)Footnote 13. One exception to the general rule regarding evidences of indebtedness is to be found in *IRC § 453(f)(4)* and (5), which treats readily tradable registered or coupon bonds and debt instruments payable on demand as

something other than evidences of indebtedness issued by a purchaser, making the receipt of such instruments a payment. An instrument is deemed to be readily tradable if steps necessary to create a market for it are taken at the time of issuance (or later, if taken pursuant to an expressed or implied agreement or understanding that existed at the time of issuance). *Treas Reg § 15a.453-1(e)(4)(A)*.

An obligation that is not readily tradable but is convertible into publicly traded stock is deemed to be traded on an established securities market if it can be converted without a substantial discount. A substantial discount exists if the stock or obligation into which the installment obligation is convertible is less than 80 percent of the value of the original obligation (determined by taking into account all relevant factors). A substantial discount also exists if the conversion privilege cannot be exercised within a period of one year from the date the obligation is issued. *Treas Reg § 15a.453-1(e)(5)*.

The determination of whether an instrument is payable on demand is a question of state law. *Champy v Commr, TC Memo 1994-355*.

An installment note secured by a standby letter of credit, even one that is collateralized with cash, is not a payment. *Treas Reg § 15a.453-1(b)(5), Ex (7)*.

(n77)Footnote 14. *IRC § 453(c)*. In determining total contract price, that portion of the consideration received in the form of notes or other evidences of indebtedness is taken into account at face value and not fair market value. *Mason v US, 365 F Supp 670 (ND Ill 1973), affd 513 F2d 25 (7th Cir 1975)*.

(n78)Footnote 15. The selling price and contract price will normally be the same. One exception is the sale of mortgaged property, where the total contract price will include the amount of the mortgage only to the extent that it exceeds the basis for the property. *Treas Reg § 1.453-4(c)*.

(n79)Footnote 16. *Jerpe v Commr, 45 BTA 199 (1941), acq 1942-1 CB 9; Rev Rul 72-570, 1972-2 CB 241*. The modification is not considered to be a disposition of an installment obligation.

(n80)Footnote 17. All sales or exchanges that are part of the same transaction or a series of related transactions are treated as one sale or exchange. *IRC § 453A(b)(5)*.

(n81)Footnote 18. Hanna & Olchyk, "Interest Under Section 453A(c): Is It or Isn't It?" *56 Tax Notes 1345 (1992)*.

(n82)Footnote 19. A payment is treated as directly secured by an interest in an installment obligation to the extent an arrangement allows the taxpayer to satisfy all or a portion of the indebtedness with the installment obligation.

(n83)Footnote 20. *Rev Rul 65-155, 1965-1 CB 356*.

(n84)Footnote 21. The provision covers like-kind exchanges (*IRC § 1031*), exchanges of certain insurance policies (*IRC § 1035*), exchanges of stock in the same corporation (*IRC § 1036*, discussed in § 8.07[2]), exchanges of US obligations (*IRC § 1037*, see § 8.07[3]), and to reorganization exchanges governed by *IRC § 356(a)* to the extent the transaction is not treated as a dividend (see § 8.03[1][c][ii]).

(n85)Footnote 22. For this purpose, installment obligations received by an 80-percent controlled subsidiary on the sale of its assets as part of a complete liquidation are treated as acquired by the controlling shareholder. *IRC § 453(h)(1)(E)*.

(n86)Footnote 23. *IRC § 453(h)(2)*.

(n87)Footnote 24. *Treas Reg § 1.453-11(c)(1)*.

(n88)Footnote 25. *Treas Reg § 1.453-11(c)(2)*.

(n89)Footnote 26. *Treas Reg § 1.453-11(b)*.

(n90)Footnote 27. *Treas Reg § 1.453-11(a)(2)(i)*. There is a specific exception for transactions described in *IRC § 453(h)(1)(C)*, where the obligor and the shareholder are related persons.

(n91)Footnote 28. *Treas Reg § 1.453-11(a)(2)(ii)(A)*. The adjusted issue price of the obligation is determined under *Treas Reg § 1.1275-1(b)*. The term "qualified stated interest" is defined in *Treas Reg § 1.1273-1(c)*. Both provisions are discussed in § 17.02A[1].

If the installment obligation is a debt instrument that has unstated interest under *IRC § 483*, the adjusted issue price of the obligation is determined under *Reg §§ 1.446-2(c)* and *(d)*. *IRC § 483* is the subject of § 2.07[1][a].

(n92)Footnote 29. *Treas Reg § 1.453-11(a)(2)(ii)(B)*. See § 17.02A[2][d] for a discussion of variable rate debt instruments.

(n93)Footnote 30. *Treas Reg § 1.453-11(a)(3)*.

(n94)Footnote 31. *Treas Reg § 1.453-11(a)(4)*.

(n95)Footnote 32. *IRC § 453(h)(1)(B)*.

(n96)Footnote 33. *IRC §§ 453(h)(1)(C), 1239(b)*.

(n97)Footnote 34. *IRC § 1239(c)(1)*.

(n98)Footnote 35. *IRC § 453(h)(1)(D)*.

(n99)Footnote 36. *Reg § 1.453-11(c)(5)*.

(n100)Footnote 37. *Treas Reg § 15a.453-1(c)(1)*.

An installment sale calling for payment in foreign currency is a contingent payment sale. Basis is recovered in the same manner as if the agreement provided for payment in United States dollars. *Treas Reg § 15a.453-1(c)(5)*.

An attempt to use the contingent payment sale regulations to secure a tax advantage failed in *ACM Partnership v Commr*, 157 F3d 231 (3d Cir 1998), cert denied, 526 US 1017 (1999) when the transaction was found to lack economic substance. See discussion at § 1.02A[2], *supra*.

The Tax Court initially followed *ACM Partnership* in *Saba Partnership v Commr*, TC Memo 1999-359, but the Court of Appeals for the District of Columbia remanded the case to the Tax Court with instructions to determine whether the tax losses sought by the taxpayer-partners should be disallowed on the ground that the partnerships in *Saba*, like the partnership in *ASA Investerings Partnership v Commr*, 201 F3d 505 (DC Cir 2000), were shams incapable of generating deductible tax losses. *Saba Partnership v Commr*, 273 F3d 1135 (DC Cir 2001). On remand, the Tax Court held that there was no meaningful distinction between the partnerships involved in *Saba* and the one determined to be a sham in *ASA*. The court further held that the partnerships were not organized or operated for a nontax business purpose. *Saba Partnership v Commr* (Supplemental Memorandum Opinion), TC Memo 2003-31.

(n101)Footnote 38. *Treas Reg § 15a.453-1(c)(2)(i)*.

(n102)Footnote 39. A prepayment provision in an otherwise contingent selling price transaction is not a contingency as contemplated by the regulations. Leon H. *Perlin, Inc v Commr*, TC Memo 1993-79.

(n103)Footnote 40. *Treas Reg § 15a.453-1(c)(2)(ii)*.

(n104)Footnote 41. *Treas Reg § 15a.453-1(c)(2)(i)*.

(n105)Footnote 42. *Treas Reg § 15a.453-1(c)(3)(i)*.

(n106)Footnote 43. *Treas Reg § 15a.453-1(c)(4)*.

(n107)Footnote 44. *Treas Reg § 15a.453-1(c)(6)(i)*.

(n108)Footnote 45. *Treas Reg § 15a.453-1(c)(7)(ii)*. The taxpayer must show that the alternative method is a reasonable method of ratably recovering basis, and that, under the method, it is reasonable to conclude that over time the taxpayer will recover basis at a rate twice as fast as the rate at which basis would have been recovered under the otherwise applicable normal basis recovery rule.

An example of the use of an alternative method of basis recovery can be found in *Ltr Rul 9647035*, where 85 percent of the total reasonably expected to be received over a six-year period (including the year of sale) was received as a cash payment on the closing date. The Service concluded that the normal basis recovery rules would substantially and inappropriately defer recovery of basis and, therefore, permitted the taxpayer to allocate 85 percent of the total basis to the year of sale. The remaining basis would be recovered ratably over each year of the five-year contingent payment period. See also *PLR 200036014*, *PLR 199949041* and *PLR 9811039*.

(n109)Footnote 46. *Treas Reg § 15a.453-1(c)(7)(iii)*.

(n110)Footnote 47. *Treas Reg § 1.453-1(b)(2)*; *Temp Reg § 15A.453-1(b)(2)(iii)*; *Robinson v Commr*, 439 F2d 767 (8th Cir 1971). See § 2.07[1][a], *infra*, for a discussion of the operation of *IRC § 483*, and § 17.02[4][c][i], *infra*, for a discussion of *IRC § 1274*.

(n111)Footnote 48. *Riss v Commr*, 368 F2d 965 (10th Cir 1966); *Rev Rul 76-398*, 1976-2 CB 130; *Rev Rul 71-515*, 1971-2 CB 222.

(n112)Footnote 49. *Freeman v Commr*, 303 F2d 580 (8th Cir 1962), *affg* 36 TC 779 (1961).

(n113)Footnote 50. *Wagegro Corp v Commr*, 38 BTA 1225 (1938), *acq* 1939-1 CB 36; *Rev Rul 76-109*, 1976-1 CB 125; *Rev Rul 73-555*, 1973-2 CB 159.

(n114)Footnote 51. *Funsten v Commr*, 44 BTA 1166 (1941), *acq* 1941-2 CB 5. Prior to the sale the purchasers were assured that substantial dividends would be paid in the year of sale and that these dividends would serve as the down payment.

(n115)Footnote 52. *Rev Rul 71-352*, 1971-2 CB 221.

(n116)Footnote 53. *Rev Rul 76-483*, 1976-2 CB 131; *Rev Rul 71-543*, 1971-2 CB 223.

(n117)Footnote 54. *Amsler v Commr*, 39 TC 458 (1962). Where mortgaged property is sold, payment arises only to the extent that the amount assumed exceeds the basis of the property. *Treas Reg § 1.453-4(c)*.

An issue that arose in connection with the former 30 percent year-of-sale maximum was whether the purchaser's payment of any assumed liabilities in the year of sale was to be considered a part of the payments made to the seller in that year. The Tax Court was of the opinion that a payment resulted. *Irwin v Commr*, 45 TC 544 (1966), *revd* 390 F2d 91 (5th Cir 1968); *Horneff v Commr*, 50 TC 63 (1968), *vacated and remanded* 24 AFTR 2d 69-5593 (3d Cir 1969). The Fifth and Ninth Circuits reached the contrary conclusion. *Irwin v Commr*, 390 F2d 91 (5th Cir 1968); *US v Marshall*, 357 F2d 294 (9th Cir 1966). The Internal Revenue took the same position, but held that it did not extend to

situations in which it was evident that the liabilities were incurred for the purpose of avoiding the 30 percent limitation. *Rev Rul 76-109, 1976-1 CB 125* ; *Rev Rul 73-555, 1973-2 CB 159* .

(n118)Footnote 55. The test was developed in *Rushing v Commr, 441 F2d 593 (5th Cir 1971)* .

(n119)Footnote 56. *Rushing v Commr, 441 F2d 593 (5th Cir 1971)* ; *Goodman v Commr, 74 TC 684 (1980)* ; *Roberts v Commr, 71 TC 311 (1978)* ; *affd 643 F2d 654 (9th Cir 1981)* ; *Pityo v Commr, 70 TC 225 (1978)* .

In *Nye v US, 407 F Supp 1345 (MDNC 1975)* , a wife sold stock to her husband who immediately resold the shares. The wife's election of the installment method was upheld over the argument that the husband was merely the wife's agent. The court found an independent purpose in the husband's need to use the proceeds to finance one of his own investments.

(n120)Footnote 57. *Lustgarten v Commr, 71 TC 303 (1978)* , *affd per curiam 639 F2d 1208 (5th Cir 1981)* ; see also *Rev Rul 73-536, 1973-2 CB 158* ; *Rev Rul 73-451, 1973-2 CB 158* ; *Rev Rul 73-157, 1973-1 CB 213* . A sale by a husband to his wife failed to qualify when the court found that the transaction served no purpose other than tax avoidance. *Wrenn v Commr, 67 TC 576 (1976)* .

X, a stock corporation was merged into Y, a mutual savings and loan association. The shareholders of X received cash and certificates of deposit with varying maturity dates. The certificates were subject to restrictions on withdrawal and could not be redeemed prior to the maturity dates. The Service held, in a technical advice, that the transaction did not qualify for installment reporting. The purchase of the certificates of deposit by Y was substantially equivalent to the creation of an escrow for the benefit of the X shareholders. *Ltr Rul 8622002* .

(n121)Footnote 58. *IRC § 453(e)(1), (3)*. The period for assessing a deficiency in tax with respect to a first disposition (to the extent attributable to a resale) does not expire until two years after the date that the initial seller furnishes a notice that the resale has occurred. *IRC § 453(e)(8)*.

The liquidation of a related corporation that purchased stock of another corporation from the taxpayer has the effect of a second disposition for purposes of *IRC § 453(e)*. *Shelton v Commr, 105 TC 114 (1995)* .

(n122)Footnote 59. No matter what the form of disposition any portion of the amount realized attributable to improvements made by the related party is not taken into account. S Rep No 96-1000, 96th Cong, 2d Sess 15 (1980).

(n123)Footnote 60. *IRC § 453(e)(5)*.

(n124)Footnote 61. *IRC § 453(f)(1)*. The option attribution rule of *IRC § 318(a)(4)* is not applicable.

(n125)Footnote 62. The legislative history indicates that the presence of statutory rules will not prevent the Internal Revenue Service from asserting the proper tax treatment of any transaction that is a sham. S Rep No. 96-1000, 96th Cong, 2d Sess 15, 17 (1980).

(n126)Footnote 63. *IRC § 453(f)(2)*.

(n127)Footnote 64. *IRC § 453(e)(2)(A)*.

(n128)Footnote 65. *IRC § 453(e)(2)(B)*. For this purpose a typical close corporation's shareholders' agreement is not to be taken into account. In addition, the holding of an option is not to be considered to have the effect of a substantially diminished risk of loss of the option purchase price is to be determined with reference to the fair market value of the property at the time the option is exercised. S Rep No 96-1000, 96th Cong, 2d Sess 15 (1980).

A cash sale of all of the assets of a corporation whose stock had been sold by the taxpayer to a related corporate

purchaser substantially diminished the purchaser's risk of loss of the stock and suspended the running of the two-year period in *Shelton v Commr*, 105 TC 114 (1995) . The amount received on the sale of the assets was approximately twice as much as the amount due on the installment sale.

(n129)Footnote 66. *IRC § 453(e)(6)(A)*. This recognizes the fact that gain from the sale of a corporation's treasury stock is nontaxable, so that the corporation's basis in the stock is irrelevant. S Rep No 96-1000, 96th Cong, 2d Sess 15 (1980).

(n130)Footnote 67. *IRC § 453(e)(6)(B)*.

(n131)Footnote 68. *IRC § 453(e)(6)(C)*. Generally, it is intended that this exception will apply after the death of either spouse when the spouses hold their interests in the installment obligation or the purchased property as community property or as equal undivided joint interests. S Rep No 96-1000, 96th Cong, 2d Sess 15, 16 (1980).

(n132)Footnote 69. *IRC § 453(e)(7)*. According to Congress, the exception should not apply if the resale terms would permit significant deferral of recognition of gain from the first sale when proceeds from the resale are collected sooner. S Rep No 96-1000, 96th Cong, 2d Sess 15 (1980).

The Tax Court treats the issue as analogous to the exception provided by *IRC § 306(b)(4)* for the disposition or redemption of Section 306 stock. *Tecumseh Corrugated Box Co v Commr*, 94 TC 360 (1990) , *affd* 932 F2d 526 (6th Cir 1991) . See Ch 7.

(n133)Footnote 70. *IRC § 1239(b)*. Indirect ownership is determined under the attribution rules of *IRC §§ 267, 1239(c)(2)*.

IRC § 453(g) also applies to a transaction between two or more partnerships in which the same persons own, directly or indirectly, more than 50 percent of the capital or profits interests. *IRC § 453(g)(3)*.

According to the legislative history, the special rule will not apply in the case of a sale between husband and wife if at the time of the installment sale, they are legally separated, or if the installment sale occurs pursuant to a settlement in a proceeding which culminates in a decree of divorce or separate maintenance. In addition, the rule will be inapplicable if no significant tax deferral benefits will be derived from the sale. S Rep No 96-1000, 96th Cong, 2d Sess 15, 17 (1980).

(n134)Footnote 71. *IRC § 453(f)(8)*.

(n135)Footnote 72. *IRC § 453B(a)*. See generally Emory, "Disposition of Installment Obligations: Income Deferral, 'Thou Art Lost and Gone Forever,' " 54 *Iowa L Rev* 945 (1969).

IRC § 453B(a) does not preclude a bad debt deduction under *IRC § 166*, if the debt becomes worthless. *American Offshore, Inc v Commr*, 97 TC 579 (1991) .

The substitution of a new obligor on an installment obligation and an increase in the interest rate thereon is not a satisfaction or disposition of the obligation within the meaning of *IRC § 453B(a)*. *Rev Rul 82-122, 1982-1 CB 80* . The same holds true where the terms of the installment note were modified to defer payment dates and increase the rate of interest. *Rev Rul 68-419, 1968-2 CB 196* .

A substantial increase in the face amount of a note in exchange for the waiver of a right to convert the note into stock of the obligor materially alters the rights of the obligee and constitutes a disposition of the obligation. *Rev Rul 82-188, 1982-2 CB 90* . See also *Ltr Rul 9238005* , where a change in form of the collateral securing the note from stock of a corporation into cash and cash equivalents was held not to be a disposition of the note but, rather, a payment on the note.

A corporation transferred property to a related corporation in return for an installment note. Sometime later, the transferor was liquidated into the transferee and the note extinguished. Although the documents relating to the transfer characterized the transaction as a sale, the Tax Court found that it was a contribution to the capital of an undercapitalized corporation. Thus, the extinguishment of the debt was not a disposition of an installment obligation that produced gain. *LDS, Inc v Commr, TC Memo 1986-293* .

(n136)Footnote 73. *IRC § 453B(a)*.

(n137)Footnote 74. *IRC § 453B(a)*.

(n138)Footnote 75. *Rogers Estate v Commr, 143 F2d 695 (2d Cir 1944)* , *cert denied 323 US 780* .

(n139)Footnote 76. See, eg, *Dessauer v Commr, 449 F2d 562 (8th Cir 1971)* .

(n140)Footnote 77. *IRC § 453B(c)*.

(n141)Footnote 78. *IRC § 691(a)(4)*.

(n142)Footnote 79. *IRC § 453B(g)*.

(n143)Footnote 80. *IRC § 453B(g)*.

(n144)Footnote 81. *IRC § 453B(d)(1)*.

(n145)Footnote 82. See Ch 6.

(n146)Footnote 83. *IRC § 453B(h)*.

(n147)Footnote 84. *Treas Reg § 1.453-9(c)(2)*.

(n148)Footnote 85. *Rev Rul 73-423, 1973-2 CB 161* ; cf *Rev Rul 72-264, 1972-1 CB 131* .

(n149)Footnote 86. *Rev Rul 79-371, 1979-2 CB 294* . The basis of the obligation in the hands of the donee will be increased by the amount of such gain. If the fair market value and the face value of the obligation are equal, there is no room for an adjustment for gift taxes paid with respect to the gift.

(n150)Footnote 87. *Legg v Commr, 57 TC 164 (1972)* , *affd per curiam 469 F2d 1179 (9th Cir 1974)* ; *Rev Rul 76-530, 1976-2 CB 132* .

(n151)Footnote 88. *Rev Rul 76-100, 1976-1 CB 123* ; *Rev Rul 74-613, 1974-2 CB 153* .

(n152)Footnote 89. *IRC § 453B(f)(1)*. If the obligor and obligee are related persons as defined in *IRC § 453(f)(1)*, the fair market value of the obligation cannot be treated as being less than its face value. *IRC § 453B(f)(2)*.

If an installment obligation is transmitted by bequest, devise or inheritance to the obligor or is canceled by a decedent's personal representative, the cancellation will be treated as a transfer by the estate. *IRC § 691(a)(5)(A)*. In the absence of some act of cancellation under local law, the disposition will be deemed to have occurred when the administration of the estate is concluded. If the obligation is held by someone other than the decedent, say a trust, the cancellation will be treated as a transfer by that person immediately after the death of the decedent.

Promissory notes given as part of an installment sale provided for their cancellation if the obligee died before all of the payments were made. The seller's life expectancy at the time of sale exceeded the 20-year payment period, but death

ensued shortly after the transaction. A majority of the Tax Court, in *Estate of Frane v Commr*, 98 TC 341 (1992) , held that the installment obligations were canceled within the meaning of *IRC § 453B(f)*. In so doing, the court rejected the taxpayer's argument that the contingency of death rendered the total price to be paid for the stock contingent, to the end that the seller's death did not work a cancellation of the obligations but rather served to fix the ultimate purchase price. The court also held that the income was reportable on the decedent's final return. The Eighth Circuit agreed that *IRC § 453B(f)* applied to the cancellation, but treated the income as income in respect of a decedent under *§ 691(a)(5)*. The appellate opinion can be found at 998 F2d 567 (8th Cir 1993) .

An open question is whether a cancellation of indebtedness that is treated as a purchase price adjustment under *IRC § 108(e)(5)* is a transaction that requires recognition of gain by the holder of the obligation.

If an installment obligation becomes unenforceable, it will be treated as if it were canceled. *IRC §§ 453B(f)(1), 691(a)(5)(C)*.

An installment obligation provided that all sums due on the note were automatically cancelled at the holder's death. The cancellation produces gain for the estate of the decedent; the gain is treated as income in respect of a decedent. *Rev Rul 86-72, 1986-1 CB 253* .

(n153)Footnote 90. *Rev Rul 74-157, 1974-1 CB 115* .

A liquidating corporation set up several liquidating trusts to distribute corporate assets. Assets transferred to the trust included two installment notes. To minimize the risk of default, the note obligors proposed to modify the terms of the notes to allow payments on the notes with property equal in value to the cash payments required. The former corporate shareholders also proposed allowing the note holders to surrender the notes in exchange for new notes, with the exception that the principal amount and security would be apportioned among separate notes issued, and the maturity dates extended. The Service held, in *Ltr Rul 9819043* , that the rights of the note holders would not be materially altered, resulting in the conclusion that there would not be a disposition of an installment obligation.

(n154)Footnote 91. *IRC § 453B(e)(1)*.

(n155)Footnote 92. *IRC § 453B(e)(2)*.

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions 2.syn

§ 2.syn Synopsis to Chapter 2: Capital Gains and Losses

§ 2.01 Introduction

§ 2.02 The Elements of Capital Gain or Loss

§ 2.03 The Sale or Exchange Requirement

[1] When Is a Disposition a Sale or Exchange.

[a] Transfers in Satisfaction of a Claim.

[i] From the Standpoint of the Transferor or Debtor.

[ii] From the Standpoint of the Transferee or Creditor.

[b] Liquidated Damages and Other Compromise Settlements.

[2] Statutory Specification of Sale or Exchange.

[3] Correlation With a Prior Transaction.

§ 2.04 The Capital Asset Requirement

[1] The Statutory Definition.

[2] Judicial Gloss on the Definition of Capital Asset.

[a] Transactions Related to the Taxpayer's Business Activity--The Corn Products Doctrine.

[b] Anticipatory Assignment of Income--The "Sale" of Ordinary Income.

[i] Sale of Stock and Right to Dividend.

[ii] Sale of Bonds With Interest Accrued.

§ 2.05 Holding Period

[1] Measuring the Holding Period of a Capital Asset.

[a] The Mechanics of Measurement.

[b] Fixing the Beginning and End of the Period.

[i] Securities Traded on an Exchange.

[ii] Escrow Transactions.

[2] Holding Period in Specific Situations.

[a] Property Received From a Decedent.

[b] Tacking--Acquiring an Added Holding Period.

[i] Property Acquired by Gift.

[ii] Property Acquired in a Tax-Free Exchange.

[iii] Property Acquired Through the Exercise of an Option or Rights.

[iv] Qualified Small Business Stock Acquired in a Rollover.

[v] Securities Acquired in Satisfaction of a Securities Futures Contract.

§ 2.06 Computing Capital Gains and Losses

[1] Definitions.

[a] Net Long-Term Capital Gain or Loss.

[b] Net Short-Term Capital Gain or Loss.

[c] Net Capital Gain and Net Capital Loss.

[2] The Noncorporate Taxpayer.

[a] Treatment of Capital Gains.

[i] In General.

[ii] Gain on Sale or Exchange of Qualified Small Business Stock.

[iii] Gain on Sale or Exchange of DC Zone Asset.

- [iv] Renewal Community Capital Gain.

- [v] Gain on Rollover of Empowerment Zone Investments.

- [b] Treatment of Capital Losses.

- [i] Limiting the Deduction.

- [ii] Capital Loss Carryover.

- [3] The Corporate Taxpayer.

- [a] Treatment of Capital Gains.

- [i] In General.

- [ii] Gain on Sale or Exchange of DC Zone Asset.

- [b] Treatment of Capital Losses.

- [i] Limiting the Deduction.

- [ii] Capital Loss Carryover.

§ 2.07 Specific Exceptions to Capital Gain or Loss Treatment

- [1] Imputed Interest.

- [a] The Judicial and Administrative Background.

- [b] The Statutory Framework.

- [c] Testing for and Measuring Imputed Interest in Debt-Financed Sales and Exchanges.

- [i] The OID Rules (*IRC Sections 1271-1275*).

- [ii] The Test Rate.

- [iii] Applying the Test Rate to Debt Instruments with Stated Interest Unconditionally Payable at a Single, Fixed Rate.

- [iv] Applying the Test Rate to Debt Instruments when Stated Interest is Not at a Single, Fixed Rate.

- [v] Applying the Test Rate when Imputed Interest is Determined Under *IRC Section 483*.

- [vi] Transactions Exempt from Imputed Interest Reclassification.

- [2] Transactions Producing Ordinary Loss.

[a] Small Business Investment Company Stock.

[b] Losses Incurred by Small Business Investment Companies.

[c] Losses on Small Business Corporation Stock.

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions § 2.01

§ 2.01 Introduction

The preceding chapter was concerned with the manner in which gains and losses from the sale or other disposition of property are ascertained. Once that task is completed, the relevant inquiry turns to the character of such gain.

Congress long considered a certain type of gain, long-term capital gain, worthy of special treatment. Taxation of such gain at rates different from those imposed on ordinary income or other manner of gain commenced with passage of the Revenue Act of 1921.ⁿ¹ The purpose of the legislation was to stimulate sales of capital assets which Congress found seriously retarded by the fact that gains accruing over a period of years were taxed in a lump sum in the year of disposition.ⁿ² Although avoidance of the effects of bunched income continues to be one of the arguments advanced for the continued lower rates for capital gains,ⁿ³ it is by no means the sole reason given to justify such treatment.ⁿ⁴

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions § 2.02

§ 2.02 The Elements of Capital Gain or Loss

In determining the amount of gain or loss realized upon a taxable disposition of property, no consideration need be given to the form of the transaction, the nature of the asset disposed of, or the length of time the asset was held by the taxpayer. Once the transaction is found to be one in which gain or loss is realized, the only questions, aside from that of recognition of gain, revolve around the amount realized and basis. When the inquiry shifts from the determination of the amount of gain or loss to one concerning the character of that gain or loss, the statutory definition of capital gains and losses makes necessary a consideration of the nature of the transaction (whether a sale or exchange, or some other form of disposition), the nature of the asset involved in the transaction (whether capital or noncapital), and the period for which the asset was held by the taxpayer (whether long-term or short-term). A discussion of each of these requirements follows.

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions § 2.03

§ 2.03 The Sale or Exchange Requirement

The first requisite of capital gains and losses is that the transaction from which they arise be a sale or exchange. Unless the particular disposition can be so characterized, any gain or loss realized thereon will be taxed at ordinary income rates.ⁿ¹ The problem attending this ingredient of the statutory definition is that while the Code specifically prescribes sale or exchange treatment for certain dispositions which might not otherwise be considered such, the Code does not provide a definition of sale or exchange. The role of classifying transactions has therefore been relegated to the courts, and it is to judicial decision that we must look to determine the content of the term "sale or exchange."

[1] When Is a Disposition a Sale or Exchange.

In deciding that an amount received from an insurance company as compensation for a loss did not derive from the sale or exchange of the destroyed property, the Supreme Court remarked: "[T]he language in the Revenue Act ... is to be given its ordinary meaning, and the words 'sale' and 'exchange' are not to be read any differently."ⁿ¹

Ordinarily, a sale implies a transfer of property for a monetary consideration; and exchange differs only in that the consideration received takes the form of a reciprocal transfer of property other than money. But merely casting the transaction in a sale or exchange mold will not suffice. The form of the transaction must reflect its substance, and if that is not a sale or exchange, capital gains treatment will not be available. Application of this principle is well illustrated by the Tax Court's decision in *Hilton v. Commissioner*.ⁿ² The taxpayer, holder of a \$175,000 note with a low basis, sought to convert the ordinary income which would result from collection in the normal course into capital gain by selling the note to a bank for \$175,000. However, the bank was not permitted by law to lend more than \$100,000. The taxpayer and the bank attempted to circumvent the restriction by arranging for the debtor, a corporation controlled by the taxpayer, to pay \$75,000 to the bank immediately after the purchase. The taxpayer characterized the transaction as a sale of a capital asset for \$175,000. The Commissioner determined that the supposed sale was no more than payment of the note by the debtor, so that any gain realized was ordinary income. The Tax Court found a middle ground--a sale to the extent of \$100,000, with the additional \$75,000 being payment of the note by the debtor to the original holder.

The Tax Court originally held that a gratuitous transfer or surrender of shares to the issuing corporation was not a sale or exchange, and allowed the surrendering shareholder an ordinary loss deduction.ⁿ³ The court reversed its position in *Frantz v. Commissioner*,ⁿ⁴ and disallowed the loss on the ground that it was not authorized by any provision of the Code. Instead, it treated the transaction as a contribution to capital that increased the basis of the taxpayer's remaining

stock. The Sixth Circuit disagreed with that view in *Fink v. Commissioner*,ⁿ⁵ and adopted a fragmented approach rather than a unitary approach to stock ownership to hold that the taxpayers suffered a reduction in their proportionate ownership rights, and, thus, an immediately deductible loss. (The fragmented approach treats every share of stock as a separate investment.) The Supreme Court reversed, and determined that the rule governing contributions to capital applied.ⁿ⁶ It is important to note that *Fink* involved dominant shareholders who did not lose control by reason of the surrender.ⁿ⁷ The Court expressly reserved opinion as to whether a surrender that causes the shareholder to lose control is immediately deductible.ⁿ⁸

Can there be a sale without any shift of risk to the buyer? This was the issue presented to the Supreme Court in *Commissioner v. Brown*,ⁿ⁹ where stock in a closely held corporation was sold to a tax-exempt organization for \$1,300,000, payable within ten years out of the earnings of the company's assets. The agreement between the parties further provided that immediately after transfer the corporation would be liquidated and its assets leased to a new corporation formed and wholly owned by the attorneys for the sellers. The stipulated rental was equal to 80 percent of the new enterprise's operating profit; the payment by the charity to the sellers was fixed at 90 percent of that amount. The purchaser did not have to pay any interest, nor was it obliged to make any payments except from the rental income. If the payments failed to total \$250,000 over any two consecutive years, the sellers could declare the balance due and foreclose on the mortgages securing the assets.

The Commissioner first argued that the transaction (a "boot-strap" sale) lacked economic substance and therefore was a sham.ⁿ¹⁰ He abandoned this contention after the Tax Court found that there had been considerable good faith bargaining at arm's length, and switched his attack to a claim that the transaction did not have the substance of a sale for capital gain purposes because the entire risk of the transaction remained on the sellers.

The Court rejected risk shifting as an essential element of a sale and went on to hold that the transaction in question was a sale. Support for this was found in the basic definition of sale and in the reasonableness of the purchase price in light of the earnings and net worth of the corporation.ⁿ¹¹

With the general principles in mind, we turn to a consideration of some specific situations in which the sale or exchange issue has been posed. Once again, the focus will be on those situations having relevance to the taxation of securities transactions.

[a] Transfers in Satisfaction of a Claim.

[i] From the Standpoint of the Transferor or Debtor. We have previously seen that a transfer of property in satisfaction of a claim against the transferor is a disposition in which gain or loss is realized. We did not, however, determine whether that taxable disposition constitutes an exchange, and that now becomes the relevant inquiry.

In *Kenan v. Commissioner*,ⁿ¹² the Second Circuit placed the "exchange" label on a transfer of appreciated property by a trust to a beneficiary in satisfaction of a fixed obligation due the latter under the terms of the trust indenture. The decision seems, in part, to be based upon equitable considerations. The taxpayer (here the trust) would certainly have been entitled to claim capital gains treatment if it had sold the property and then delivered the proceeds to the beneficiary. The court thought it "extraordinary that the exercise by the trustees of the option to deliver to the legatee securities, rather than cash, should be thought to result in an increased deficiency of enormous proportions."ⁿ¹³

In *Kenan*, the distribution was a mere distribution in kind, i.e., the property transferred did not secure the obligation satisfied. Such dispositions will almost always satisfy the sale and exchange requirement of *IRC Section 1222*.ⁿ¹⁴ But does the same rule obtain when the property transferred secures the debt? The answer to this question depends on the answers to two others: (1) the nature of the transfer, and (2) the nature of the taxpayer's liability.

If the encumbered property is sold as part of a proceeding by the creditor to foreclose his lien, the transfer has

consistently been held to constitute a sale or exchange by the debtor, and hence, the realization by him of capital gain or loss.ⁿ¹⁵ In this regard, whether the debtor be personally liable on the debt or not is unimportant; the result is the same in either case.ⁿ¹⁶

Once the nature of the transfer shifts from involuntary to voluntary, the issue of personal as opposed to nonpersonal liability becomes important. If the obligor is personally liable, then his voluntary transfer of property in discharge of his obligation will be found to be a sale or exchange.ⁿ¹⁷ But where there is no personal liability, so that no consideration is received by the debtor in exchange for his transfer, the courts have generally held that the requisite sale or exchange is absent.ⁿ¹⁸ However, if in addition to the discharge of the debt, the taxpayer were to receive some form of consideration, such as cash, the entire transaction would be deemed an exchange producing capital gain or loss.ⁿ¹⁹

[ii] From the Standpoint of the Transferee or Creditor. Suppose a taxpayer holding a \$10,000 debt obligation collects only \$5,000 of the debt from the debtor. Does he treat his \$5,000 as an ordinary loss or as a capital loss? The general rule insofar as the creditor is concerned, is that payment of the debt by his debtor is not a sale or exchange transaction.ⁿ²⁰ The reasoning of the courts is best illustrated by this language of the Tax Court:

"[I]n their day-to-day transactions, neither businessmen nor lawyers would call the settlement of a judgment a sale; we can see no reason to apply a strained interpretation to the transaction before us."ⁿ²¹

The transaction before the Tax Court was the settlement of a judgment by payment of \$21,150 to persons who had purchased it from the original judgment creditor for an amount less than that paid in settlement. The gain was, therefore, ordinary and not capital.

The underlying premise, that payment does not produce a transfer by the creditor, prevents the finding of a sale or exchange even where the creditor receives property rather than cash in satisfaction of the debt.ⁿ²² That the transaction would be a sale or exchange from the standpoint of the debtor is of no moment.

[b] Liquidated Damages and Other Compromise Settlements. A contract for the sale of stock or other property may often contain a provision calling for the payment of liquidated damages by the purchaser if he should default in performing his part of the bargain. If the breach occurs and the stipulated damages are paid, the seller realizes ordinary income and not capital gains, since the damages would be acquired without the consummation of a sale or exchange. Even a later sale of the property will not infuse the prior transaction with the necessary ingredient of sale or exchange.ⁿ²³

This does not mean that every settlement under a contract of sale will be relegated to the status of ordinary income.ⁿ²⁴ The payments received may qualify for capital gains treatment if the settlement itself takes the form of a sale. This was just the situation presented in *McKean v. Commissioner*.ⁿ²⁵ Under the agreement in that case, the taxpayer advanced money to another in return for which he was to receive an interest in certain stock to be acquired by the other person. After the agreement was breached by the other party's failure to deliver the stock to the taxpayer, the latter commenced an action to compel its delivery. The suit was settled by a cash payment to the taxpayer in exchange for his relinquishment of any interest in the stock. The Tax Court held that this settlement constituted a sale for capital gains purposes. The theory underlying the decision is that while the taxpayer might not have had actual or record title to the property, he did have an economic or equitable interest therein. This rendered the lack of actual physical possession of the stock immaterial.

The settlement producing the compromise payment is issue in *Victor E. Gidwitz Family Trust v. Commissioner*.ⁿ²⁶ was not cast as a sale. Nevertheless, the result was capital gains, not ordinary income. In so decreeing, the Tax Court looked at the nature of the lawsuit which ended in the settlement and payment and saw that it was grounded on the inadequacy of the consideration received by the taxpayer in a merger. The compromise represented additional payment for the original exchange of the taxpayer's shares in the merged corporation.

[2] Statutory Specification of Sale or Exchange.

Congress has determined that certain transactions, which would otherwise fail to qualify as capital transactions for lack of a sale or exchange, should not fall outside the ambit of the capital gain and loss provisions solely for that reason. This action is, in part, an attempt to prevent dissimilar tax consequences in economically similar situations.ⁿ¹ For example, absent a statutory provision to the contrary, retirement of a bond at maturity yields ordinary income, while any gain produced by a sale of that same bond would be taxed at preferential capital gains rates (assuming the bond to be a capital asset in the hands of the bondholder). Equality of result has been achieved through legislative fiat. *IRC Section 1271(a)(1)* deems retirement at maturity an exchange. Conversely, the security-holder who suffered a loss when his securities became worthless would have the advantage of an ordinary loss, and, thus, an offset against ordinary income, while one who realized the same quantum of loss through a sale would be forced to treat his loss as a capital loss. Congress has eliminated this disparity by treating the worthless security loss "as a loss from [a] sale or exchange."ⁿ²

The needed ingredient of sale or exchange has been specifically prescribed for transactions other than those just mentioned. Particularly relevant in connection with the taxation of securities transactions are *IRC Section 301* (nondividend distributions exceeding the taxpayer's basis for his stock); *IRC Sections 302 and 303* (distributions in redemption of stock); and *IRC Section 331* (liquidating distributions). Full coverage of these provisions will be found in the discussion of the transactions to which they relate.

[3] Correlation With a Prior Transaction.

A cardinal principle in the administration of the tax laws is that each taxable year is a separate and distinct unit for tax accounting purposes. This would seem to dictate that each transaction be characterized as capital or ordinary solely by reference to the facts which occur in the year of disposition, and, in general, this is the case. However, on occasion, a transaction taking place in one year may be so related to another, which occurred in a prior year, that the same characterization should be applied to both transactions. In such event, the subsequent transaction will take its character from the earlier one.

Application of this doctrine of relation back is well illustrated by the leading case of *Arrowsmith v. Commissioner*.ⁿ¹ In that case, the taxpayers were required to satisfy a judgment against a corporation whose assets they had received upon the liquidation of the corporation in an earlier year. The Supreme Court denied the taxpayer's claim that the payment gave rise to an ordinary loss deduction, the requisite sale or exchange not being present, and held instead that payment of the judgment in this instance produced a capital loss. The decision was grounded on the fact that the taxpayers' liability was imposed solely because they were transferees of the corporate assets, and that had the corporate liability been satisfied prior to liquidation, the amount of the liquidating distribution and, hence, the gain realized therefrom would have been less. Since the gain occasioned by the liquidation was capital,ⁿ² the Court was of the opinion that the loss should be of a similar nature.

Like reasoning has produced like results. Thus, the Fifth Circuit required a taxpayer that had previously charged off notes as worthless, thereby securing an ordinary deduction, to treat gain realized on a later sale of those notes as ordinary income.ⁿ³ The court reasoned that

"To permit the bank to reduce its ordinary income by the amount of the loss in the first instance, thus gaining a maximum tax advantage on that basis, and then permit it to treat the amount later recovered on the notes as capital gain, taxable on a much lower basis than ordinary income, would afford the taxpayer a tax advantage on the transaction not contemplated by the income tax laws."ⁿ⁴

For some reason, application of the relation-back doctrine has generally produced adverse tax consequences for the taxpayer; gains produced by sales are taxed at ordinary income rates, while payments producing losses in nonsale situations become capital losses.ⁿ⁵ The taxpayer's problem is nowise better pointed up than in the case of a "closed"

contingent consideration sale, i.e., one in which a year-of-sale value is placed upon the right to receive future payments. If the amount actually received exceeds the ascribed value, the excess payment produces ordinary income because of the lack of a sale or exchange.ⁿ⁶ A consistent approach would require that an ultimate loss be afforded the same treatment. However, it has been suggested that a capital loss would result on the theory that the original gain was overstated.ⁿ⁷

An interesting application of the *Arrowsmith* doctrine is presented by *Mitchell v. Commissioner*,ⁿ⁸ where a repayment of "insider" profits,ⁿ⁹ commonly deductible as an ordinary and necessary business expense, was held to give rise to a capital loss. The taxpayer had originally sold his employer's stock at a gain; his "insider" transaction was the purchase of new shares at a lesser price pursuant to the exercise of a restricted stock option. The Sixth Circuit recognized that the taxpayer's repayment was made for business purposes. Nevertheless, the court held that the payment had its inception in the original sale of the employer's stock since, without that sale, there would have been no violation of the "insider" rules.

A contrary view was taken by the Tax Court in *Anderson v. Commissioner*,ⁿ¹⁰ where the taxpayer was allowed to claim the repayment of "insider" profits as an ordinary and necessary business expense. The court rejected the notion that the case was governed by *Mitchell* and concluded that the application of *Arrowsmith* should be limited to situations in which the later transaction is so integrally related to the earlier one that the two must be considered as parts of a unified whole. The Seventh Circuit reversed.ⁿ¹¹ It found the 16(b) payments to be integrally related to the original sale by characterizing the payments as an adjustment of the sales price.

During the period between original decision and reversal by the appellate court, the Tax Court was presented with the same issue in *Cummings v. Commissioner*.ⁿ¹² The court relied on its holding in *Anderson* to reach the result that the taxpayer in *Cummings* was entitled to an ordinary loss deduction.

Following the reversal, the Commissioner asked the Tax Court to reconsider and revise its opinion in *Cummings*. The court refused to do so, holding once again that there was no integral relationship between the sale of the stock and the payment to the corporation.ⁿ¹³ Of importance to the court was the fact that the payment was made without any determination that the taxpayer had violated Section 16(b). This led the Tax Court to the conclusion that the taxpayer had undertaken repayment in order to protect his business reputation.ⁿ¹⁴

The Second Circuit reversed and treated the repayment as a long-term capital loss.ⁿ¹⁵ In the opinion of the majority of the court, the nexus between the Section 16(b) repayment and the earlier gain made *Arrowsmith* applicable. In addition, the court believed that the policy underlying the insider profit rule would be defeated if insiders could reap a tax advantage by enjoying the low capital gains rate on realized gains while obtaining a deduction against ordinary income when they surrendered those gains in satisfaction of a Section 16(b) liability.

Judge Smith concurred in result but not in the rationale of the majority opinion. He would have disallowed the ordinary deduction but not have treated the repayment as a long-term capital loss. Instead, he would have added the repayment to the basis of the repurchased shares. Judge Smith believed that the holding of the majority was proper where the Section 16(b) violation was produced by a purchase and then a sale which resulted in the realization of gain, but did not think that such should be the rule where the violation resulted from a sale and then a repurchase at an amount less than the sale proceeds.

(n17)Footnote 16. *Commr v Abramson*, 124 F2d 416 (2d Cir 1942) ; *Millar v Commr*, TC Memo 1975-113 , *vacated and remanded* 540 F2d 184 (3d Cir 1976) ; *Rev Rul* 74-301, 1974-1 CB 196 . The remand in *Millar* was for the purpose of having the Tax Court determine whether the initial advance was a loan or a gift. This eliminated any need for the Third Circuit to address the taxpayer's argument that no income results from the foreclosure of property securing a nonrecourse obligation when the property has zero value. The appellate court suggested that the lower court treat this issue if it found the original advance to be a debt. On remand, the Tax Court characterized the advance as a nonrecourse loan and then went on to hold that the taxpayer had gain to the extent the extinguished debt exceeded the adjusted basis of the surrendered stock. In the opinion of the Tax Court, the value of the property was not a factor. However, the court went on to say that it believed the stock to have some value, at least to the one who obtained the stock on foreclosure, because he thereby became sole stockholder of a Subchapter S corporation and would be able to deduct losses which were anticipated. The decision on remand is reported at 67 TC 656 (1977) . The Third Circuit affirmed the decision on remand. 577 F2d 212 (3d Cir 1978) , *cert denied* 439 US 1046 (1978) .

(n18)Footnote 17. *Commr v Green*, 126 F2d 70 (3d Cir 1942) .

(n19)Footnote 18. *Polin v Commr*, 114 F2d 174 (3d Cir 1940) ; *Stokes v Commr*, 124 F2d 335 (3d Cir 1941) ; but cf *Lutz & Schramm Co v Commr*, 1 TC 682 (1943) , *nonacq* 1943 CB 35 , where the Commissioner never put in issue the question of capital gains versus ordinary income.

The voluntary transfer of property to a mortgagee by a mortgagor, who was not personally liable and whose adjusted basis in the property exceeded the amount of the debt, was held to be a sale yielding a capital loss in *Rev Rul 78-164*, 1978-1 CB 264 . In the Service's opinion, there was no warrant for a difference in tax treatment based upon the distinction between voluntary and involuntary conveyances.

(n28)Footnote 1. Other reasons have produced statutory sales or exchanges. For example, the desirability of predictable results motivated the mechanical exchange criteria for stock redemptions contained in *IRC* § 302(b). HR Rep No 1337, 83d Cong, 2d Sess, 35 (1954).

(n29)Footnote 2. *IRC* § 165(g). The legislative history of the predecessor of this section can be found in HR Rep No 1860, 75th Cong, 3d Sess, 18-19 (1938).

(n30)Footnote 1. 344 US 6 (1952) . A shareholder of a liquidated corporation incurred a loss when required to make a payment on behalf of the corporation in a year subsequent to the liquidation. Applying *Arrowsmith*, the Service held that the shareholder could claim the amount paid as a capital loss, and to the extent the amount was included in

income in a prior year, compute his tax liability for the year of payment under *IRC § 1341* (the "claim of right" provision). *Rev Rul 78-25, 1978-1 CB 270* .

The *Arrowsmith* doctrine was employed in *Rev Rul 79-278, § 2.03[1], supra* , to characterize a settlement recovery in an action based on a violation of federal securities laws as a short-term capital gain. The taxpayer had realized a short-term capital loss on an earlier sale of stock issued by the defendant.

A recovery of losses was treated as long-term capital gain in *Ltr Rul 200724012* . The original losses were long-term losses.

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions § 2.04

§ 2.04 The Capital Asset Requirement

[1] The Statutory Definition.

Unlike the term "sale or exchange" the second member of the capital gain or loss equation, capital asset, is defined in the Code. In the words of *IRC Section 1221(a)*, "the term 'capital asset' means property held by the taxpayer (whether or not connected with his trade or business)" with certain specified exceptions which include (1) inventory, stock in trade, or property held primarily for sale to customers, and (2) accounts or notes receivable acquired in the ordinary course of business for services or from the sale of inventory or like property.ⁿ¹

The major issue posed by the statutory language centers on the meaning of the word "primarily" in the phrase, "held primarily for sale to customers." Is the word to be given its dictionary meaning, "principally" or "chiefly," or is the content of the term more nearly akin to "substantially"? Prior to 1966, the problem was often presented by so-called dual purpose cases. For example, a taxpayer constructs housing units which he intends to hold for rental purposes. After some length of time, he decides to sell the property and does so in single parcel units. Resolution of the question of capital gains versus ordinary income depends on a determination of the purpose for which the property was held, whether investment or sale to customers. Courts subscribing to the dual purpose doctrineⁿ² were quick to hold that the property could not qualify as a capital asset if one of the essential or substantial purposes, though not the chief purpose, for holding the property was resale to customers. The contrary view was simply that "we find nothing in the statutes as a whole which manifests any intent on the part of Congress to give the word 'primarily' any meaning different from its plain, usual and well-understood meaning."ⁿ³ The Supreme Court finally rejected the dual purpose test, when it held, in *Malat v. Riddell*,ⁿ⁴ that, "as used in § 1221(1), 'primarily' means 'of first importance' or 'principally.'"ⁿ⁵

The importance of *IRC Section 1221(a)(1)* and the *Malat* case in the area of securities transactions is to be found in the difference in treatment afforded dealers and traders. The dealer, since he holds securities for resale to customers, realizes ordinary income on such sales. The trader, even though he may be engaged in the business of buying and selling securities, is insulated from ordinary income treatment since he has no "customers."ⁿ⁶

Two new exclusions relevant to the taxation of securities transactions were added by the Tax Relief Extension Act. The first, *IRC Section 1221(a)(6)*, excludes from capital asset treatment any commodities derivative financial instrument held by a commodities derivatives dealer, unless (a) it is established to the satisfaction of the Service that the instrument has no connection to the activities of the dealer as a dealer, and (b) the instrument is clearly identified in the dealer's

records as having no such connection before the close of the day on which it was acquired, originated, or entered into (or such other time as regulations prescribe).ⁿ⁷

A commodities derivatives dealer is a person who regularly offers to enter into, assume, offset, assign, or terminate positions in commodities derivative financial instruments with customers in the ordinary course of a trade or business.ⁿ⁸ A commodities derivative financial instrument is defined as any contract or financial instrument with respect to commodities, the value or settlement price of which is calculated by or determined by reference to a specified index.ⁿ⁹ Excluded from the definition of commodities derivative financial instrument is (1) any share of stock in a corporation, (2) a beneficial interest in a partnership or trust, (3) a note, bond, debenture, or other evidence of indebtedness, or (4) any Section 1256 contract.ⁿ¹⁰

The second new exclusion, *IRC Section 1221(a)(7)*, relates to any hedging transaction that is clearly identified as such before the close of the day on which it was acquired, originated, or entered into (or such other time as regulations prescribe).ⁿ¹¹ For this purpose, a hedging transaction is any transaction entered into by the taxpayer in the normal course of the taxpayer's trade or business primarily (i) to manage risk of price changes or currency fluctuations with respect to ordinary property that is held or to be held by the taxpayer, (ii) to manage risk of interest rate or price changes or currency fluctuations with respect to borrowings made or to be made, or ordinary obligations incurred or to be incurred, by the taxpayer, or (iii) to manage such other risks that may be prescribed in regulations.ⁿ¹² Notwithstanding *IRC Section 1221(a)(7)*, the Service is directed to prescribe regulations to properly characterize any income, gain, expense or loss arising from a transaction that is a hedging transaction that was not identified as such, or that was so identified but is not a hedging transaction.ⁿ¹³

The Service is required to prescribe regulations that are appropriate to carry out the purposes of the new exclusions in the case of transactions involving related parties.ⁿ¹⁴

[2] Judicial Gloss on the Definition of Capital Asset.

Are all assets held by the taxpayer capital assets unless some specific statutory provision excepts them from such classification? The language of *IRC Section 1221(a)*, namely, "'capital asset' means property held by the taxpayer ... but does not include [listed exceptions]" would seem to indicate an affirmative answer to the foregoing question. Furthermore, the regulations lend strong support to this conclusion by stating, "the term 'capital asset' includes all classes of property not specifically excluded by section 1221."ⁿ¹ Notwithstanding statutory and administrative language to the contrary, the courts have on occasion removed the sale or exchange of an asset, on its face a capital asset, from the scope of capital gains on the ground that Congress did not intend preferential treatment for such transactions.ⁿ²

[a] Transactions Related to the Taxpayer's Business Activity--The Corn Products Doctrine. Seemingly apparent capital assets have not been afforded capital status when the reason for the investment in the assets is very closely related to the profit-making operations of the taxpayer. The factual situation is exemplified by the leading case of *Corn Products Refining Co. v. Commissioner*,ⁿ³ wherein the taxpayer, attempting to insure future deliveries at favorable prices, would purchase commodity futures, take delivery of only those contracts it required for its operations, and sell the remainder. The taxpayer claimed that the transactions in futures were separate from its manufacturing operation, that the futures were capital assets, and that therefore any gain or loss derived from their sale should be characterized as capital gain or loss. The Supreme Court held to the contrary, stating:

"Admittedly, petitioner's corn futures do not come within the literal language of the exceptions set out in [Section 1221]. They were not stock in trade, actual inventory, property held for sale to customers or depreciable property used in a trade or business. But the capital-asset provision of [Section 1221] must not be so broadly applied as to defeat rather than further the purpose of Congress. ... Since this section is an exception from the normal tax requirements of the Internal Revenue Code, the definition of a capital asset must be narrowly applied and its exclusions interpreted broadly."ⁿ⁴

For many years, lower courts experienced great difficulty with the Supreme Court's decision in *Corn Products* for, while clearly cutting down the definition of capital asset in transactions integrally related to the gain seeking activity of the taxpayer, it did not set down any criteria for distinguishing business connected purchases from purchases that are not. The effect was to make those courts focus their attention on the taxpayer's motive or purpose in purchasing and holding the asset, and then use this as a foundation for the decision as to the character of the asset. The results may be illustrated by reference to cases involving the purchase of stock or other securities by a taxpayer in order to insure a continued supply of supplies or materials needed in the taxpayer's business, where the courts had been fairly uniform in holding that "stock purchased in the ordinary course of business *where the only purpose is to insure a vital source of inventory* is not a capital asset."ⁿ⁵ Where a substantial investment interest was found, the stock remained within the capital asset sphere, even if the more dominant motive in acquiring the stock may have been source-of-supply or business oriented.ⁿ⁶

The motive test employed by courts in determining capital asset status was held to be irrelevant in *Arkansas Best Corp. v. Commissioner*.ⁿ⁷ An asset will be a capital asset unless it is related to one of the exclusions specified in *IRC Section 1221(a)*. *Corn Products* is still good law, but only for the narrow proposition that hedging transactions that are an integral part of a business' inventory-purchase system fall within the inventory exclusion of *IRC Section 1221(a)(1)*.ⁿ⁸

The holding of *Arkansas Best* is not limited to the inventory exception, although the Service advanced such a position in *Federal National Mortgage Association v. Commissioner*.^{n8.1} Federal National Mortgage Association ("FNMA") was established to provide liquidity to the secondary market for home mortgages. Accordingly, FNMA purchased residential mortgages from mortgage lenders using funds derived from indebtedness issued to the public. The principal factor in determining FNMA's profit or loss was the spread between the average net yield of its mortgage portfolio and the average cost of its outstanding debt.

The manner in which FNMA conducted its business subjected it to the risk that interest rates would rise on the money it had to borrow (interest rate risk). This risk arose in part because the duration of FNMA's portfolio exceeded that of its liabilities. Thus, FNMA faced the risk that its spread would erode when it refunded its debt in carrying its low-yield, long-term mortgages (refinancing risk). One of the ways in which FNMA attempted to manage its interest rate risk was through a hedging program. Each hedge had a direct relationship to an anticipated debenture issuance or to debt issued to purchase mortgages that were subject to commitments; FNMA did not hedge every debenture issuance or mortgage commitments in the years in issue. Because interest rates declined in those years, FNMA suffered hedging losses far in excess of hedging gains. The gains were reported as ordinary income and the losses were claimed as ordinary losses.

After finding that the transactions entered into by FNMA were hedges, the Tax Court was called upon to determine the proper tax treatment of the hedging losses under *IRC Section 1221* (i.e., whether the loss was the consequence of the sale or exchange of a capital asset and, therefore, subject to the limitation on the deduction of capital losses provided in *IRC Section 1211(a)*). In more specific terms, FNMA could prevail only if it could show that the property used in the hedges was excepted from capital treatment under one of the exclusions in *IRC Section 1221*.

FNMA made several arguments in favor of ordinary treatment of its hedging transactions even though the hedges did not fit under any literal application of the statutory exceptions to capital asset treatment found in *IRC Section 1221*. It asserted first that such transactions constituted a nonstatutory exception to capital treatment. Second, it argued that the hedging losses were substitutes for interest expense. Next, it contended that the hedging transactions were an integral part of the system by which FNMA purchased and held mortgages. FNMA's final principal argument was that Congress had implicitly codified ordinary treatment for business hedging gains and losses.

The Commissioner's argument was simple. The property used as hedges had to be treated as capital assets in light of *Arkansas Best*. The hedge positions were property and did not come within any of the exceptions of *IRC Section 1221*. Moreover, she argued that *Arkansas Best* stood for the proposition that property that does not literally come within any

statutory exclusion in *IRC Section 1221* can qualify for ordinary treatment only if (1) it is an integral part of the taxpayer's inventory purchase system, and (2) is capable of treatment as a substitute for inventory.

The Tax Court declined to consider any issue other than whether the hedging transactions were an integral part of the system by which FNMA purchased and held mortgages. It recognized that, while the Supreme Court in *Arkansas Best* concluded that *Corn Products* involved the inventory exception, there was nothing in the *Corn Products* opinion that precluded ordinary treatment for gains and losses that were integrally related to other exceptions in *IRC Section 1221*.

The Tax Court determined that the mortgage notes held by FNMA were notes receivable within the meaning of *IRC Section 1221(a)(4)*, and the hedging transactions in connection with their acquisition were substitutes for the mortgage notes. It concluded that to the extent the mortgages fell within the statutory exception to capital asset treatment specified in *IRC Section 1221(a)(4)*, the taxpayer could rely on the general reasoning of *Arkansas Best* to obtain ordinary treatment for the hedges relating to those assets.

In 1994, the Service issued regulations holding that property that is part of a hedging transaction is not a capital asset; the approach taken in the regulations has been codified generally by the adoption of *IRC § 1221(a)(7)*, discussed in the preceding section.

Regulations governing transactions covered by *IRC Section 1221(a)(7)* were issued in 2002.^{n8,2} The regulations also govern the character of gain or loss from a short sale or option that is part of a hedging transaction.ⁿ⁹ The regulations are exclusive, that is, gain or loss on property, a short sale, or an option is ordinary on the grounds that the property, short sale, or option serves a hedging function *only* if it is part of a hedging transaction as defined in the regulations.ⁿ¹⁰

A "hedging transaction" is a transaction that a taxpayer enters into in the normal course of the taxpayer's trade or business primarily: (i) to manage risk of price changes or currency fluctuations with respect to ordinary property that is held or to be held by the taxpayer, (ii) to manage risk of interest rate or price changes or currency fluctuations with respect to borrowings made or to be made, or ordinary obligations incurred or to be incurred, by the taxpayer, or (iii) to manage such other risks as the Service may prescribe in regulations.ⁿ¹¹ To enter into a hedging transaction, the taxpayer must have risk when all of its operations are considered, that is, there must be risk on a "macro" basis.ⁿ¹² Nonetheless, a hedge of a single asset or liability will be respected if the hedge reduces the risk attributable to the item or items being hedged and if the hedge is reasonably expected to reduce the overall risk of the taxpayer's operations.ⁿ¹³ If a taxpayer hedges particular assets or liabilities, or groups of assets or liabilities, and the hedge is undertaken as part of a program to reduce the overall risk of the taxpayer's operations, the taxpayer need not show that the hedge reduces its overall risk.ⁿ¹⁴

The regulations recognize that a transaction that economically converts a price from a fixed price to a floating price may reduce risk and be a hedging transaction.ⁿ¹⁵ A transaction that economically converts an interest rate from a fixed rate to a floating rate or from a floating rate to a fixed rate manages risk.^{n15.1} In addition, a written option--a written call option with respect to assets held by a taxpayer, or a written put option with respect to assets to be acquired by a taxpayer--may also reduce risk and be a hedging transaction.ⁿ¹⁶ Finally, a transaction that is entered into primarily to counteract or reverse all or part of the risk reduction effected by one or more hedging transactions will be treated as a hedging transaction.ⁿ¹⁷

The fact that a taxpayer frequently enters into and terminates positions is not relevant in determining whether the transactions are hedging transactions.ⁿ¹⁸ For example, a taxpayer hedging the risk associated with an asset or liability may frequently establish and terminate positions that hedge that risk, depending on the extent the taxpayer wants to be hedged. By the same token, if a taxpayer maintains its level of risk exposure by entering into and terminating a large number of transactions in a single day, the transactions may still qualify as hedging transactions.

If a transaction is not a hedging transaction as defined in the Code and regulations, gain or loss from the transaction is

not made ordinary on the grounds that property involved in the transaction is a surrogate for a noncapital asset, that the transaction serves as insurance against a business risk, that the transaction serves a hedging function, or that the transaction serves a similar function or purpose.ⁿ¹⁹

A hedging transaction also includes a transaction that reduces an aggregate risk of interest rate changes, price changes, and/or currency fluctuations only if all of the risk, or all but *de minimis* amount of the risk, is with respect to ordinary property, ordinary obligations, or borrowings.ⁿ²⁰

Except as otherwise determined in published guidance or private letter ruling, the purchase or sale of a debt instrument, an equity security, or an annuity contract is not a hedging transaction even if the transaction limits or reduces the taxpayer's risk with respect to ordinary property, borrowings, or ordinary obligations.ⁿ²¹ In addition, the Commissioner may determine in published guidance that other transactions are not hedging transactions. Furthermore, the Commissioner may, by published guidance, determine that hedging transactions include transactions entered into to manage risks other than interest rate or price changes or currency fluctuations.^{n21.1}

For purposes of the hedging transaction rules, a transaction is entered into in the normal course of a taxpayer's trade or business if it is in furtherance of that trade or business.ⁿ²² This rule applies even if the risk to be managed relates to the expansion of an existing business or the acquisition of a new trade or business.

A taxpayer that enters into a hedging transaction (including recycling an existing hedge) must identify the transaction as a hedging transaction before the close of the day on which the taxpayer enters into the transaction (same-day identification) and must identify what is being hedged not more than 35 days after the hedging transaction (substantially contemporaneous identification).ⁿ²³ The identification must be made on, and retained as part of, the taxpayer's books and records, and must specify the item, items, or aggregate risk that is being hedged.ⁿ²⁴ In addition, the identification of certain hedging transactions must include the following information:

- (1) If the hedging transaction relates to inventory held or to be held by the taxpayer, the identification must specify the type or class of inventory to which the transaction relates. If the hedging transaction relates to specific purchases or sales, the identification must also include the expected dates of the purchase or sales and the amounts to be purchased or sold.ⁿ²⁵
- (2) If the hedging transaction relates to accruals or payments under an issue of existing debt of the taxpayer, the identification must specify the issue, and if the hedge is for less than the full adjusted issue price or full term of the debt, the identification must specify the amount or period to which the hedging relates.ⁿ²⁶
- (3) If the hedging transaction relates to the expected issuance of debt by the taxpayer or to accruals or payments under debt that is expected to be issued by the taxpayer, the identification must specify the following information: the expected date of issuance of the debt; the expected maturity or maturities; the total expected issue price of the issue; and the expected interest provisions. If the hedge is for less than the entire expected issue price of the debt or the full expected term of the debt, the identification must also include the amount or the term being hedged. The identification may indicate a range of dates, terms, and amounts, rather than specific dates, terms, or amounts.ⁿ²⁷ For example, a taxpayer might identify a transaction as hedging the yield on an anticipated issuance of fixed rate debt during the second half of its fiscal year, with the anticipated amount of the debt between \$75 million and \$125 million, and an anticipated term of 20 to 30 years.
- (4) If the hedging transaction relates to assets to be acquired by the taxpayer, the identification must specify the expected date of acquisition and quantity to be acquired.ⁿ²⁸

(5) If a transaction hedges aggregate risk, the identification must include a description of the risk being hedged and of the hedging program under which the hedging transaction was entered.ⁿ²⁹ This requirement may be met by placing in the taxpayer's records a description of the hedging program and by establishing a system under which individual transactions are identified as being entered pursuant to the program.ⁿ³⁰

The presence or absence of an identification must be unambiguous. The identification of a hedging transaction for financial accounting or regulatory purposes does not satisfy this requirement unless the taxpayer's books and records indicate that the identification is also being made for tax purposes. The taxpayer may indicate that individual hedging transactions, or a class or classes of hedging transactions, that are identified for financial accounting or regulatory purposes are also being identified as hedging transactions for purposes of the tax regulations.ⁿ³¹

The taxpayer can separately and explicitly make each identification, or, as long as the identification is unambiguous, establish a system under which the identification is indicated by the type of transaction or by the manner in which the transaction is consummated or recorded.ⁿ³² An identification under this system is made at the later of the time that the system is established or the time that the transaction satisfies the terms of the system by being entered into, or by being consummated or recorded, in the designated fashion. These rules can be illustrated by the following examples:

- (1) A taxpayer can make an identification by designating a hedging transaction for (or by placing it in) an account that has been identified as containing only hedges of a specified item (or of specified items or specified aggregate risk).
- (2) A taxpayer can make an identification by including and retaining in its books and records a statement that designates all future transactions in a specified derivative product as hedges of a specified item, items, or risk.
- (3) A taxpayer can make an identification by placing a designated mark on a record of the transaction (eg, trading ticket, purchase order, or trade confirmation) or by using a designated form or a record that contains a designated legend.ⁿ³³

If the taxpayer identifies a transaction as a hedging transaction, the identification is binding with respect to gain, whether or not all of the identification requirements are satisfied.ⁿ³⁴ Thus, gain from that transaction is ordinary income. If the transaction is not in fact a hedging transaction, the character of loss is determined without reference to whether the transaction is a surrogate for a noncapital asset, serves as insurance against a business risk, serves a hedging function, or serves a similar function or purpose.ⁿ³⁵ In other words, the taxpayer's identification of the transaction as a hedging transaction does not itself make loss from the transaction ordinary. If the taxpayer identifies a transaction as a hedging transaction, the character of the gain is determined as if the transaction had not been identified as such if (a) the transaction is not a hedging transaction, (b) the identification of the transaction as a hedging transaction was due to inadvertent error, and (c) all of the taxpayer's transactions in all open years are being treated on either original or, if necessary, amended returns, as transactions that are not hedging transactions.ⁿ³⁶

Conversely, the absence of an identification that meets the requirements set forth generally above *is* binding and establishes that a transaction is not a hedging transaction. This means that, as a general rule, the character of gain or loss is determined without reference to whether the transaction is a surrogate for a noncapital asset, serves as insurance against a business risk, serves a hedging function, or serves a similar function or purpose.ⁿ³⁷ However, the taxpayer may treat gain or loss from the transaction as ordinary income or loss if: (a) the transaction is in fact a hedging transaction; (b) the failure to identify the transaction was due to inadvertent error; and (c) all of the taxpayer's hedging transactions in all open years are being treated on either original or, if necessary, amended returns as hedging transactions.ⁿ³⁸

If a taxpayer does not make an identification that satisfies the identification requirements of the regulations, but the taxpayer has no reasonable basis for treating the gain as other than a hedging transaction, gain from the transaction is ordinary.ⁿ³⁹ The reasonableness of the taxpayer's failure to identify the transaction is determined by considering the nature of the transaction as well as the taxpayer's treatment of the transaction for financial accounting or other purposes and the taxpayer's identification of similar transactions as hedging transactions.

The method of accounting used for a hedging transaction must clearly reflect the taxpayer's income.ⁿ⁴⁰ To clearly reflect income, the method used must match the timing of income, deduction, gain, or loss from the hedging transaction with the timing of income, deduction, gain, or loss from the item or items being hedged.

A taxpayer is generally permitted to choose a method of accounting for a particular type of hedging transaction that clearly reflects the taxpayer's income from that type of transaction.ⁿ⁴¹ However, there are guidelines for determining whether a taxpayer's method of accounting with respect to certain hedging transactions meets the clear reflection requirement, namely:

(1) The method of accounting for hedges of aggregate risk must comply with the matching requirements described above.ⁿ⁴² Even though a taxpayer may not be able to associate the hedging transaction with any particular item being hedged, the timing of income, deduction, gain, or loss from the hedging transaction must be matched with the aggregate income, deduction, gain, or loss from the items being hedged.ⁿ⁴³ The following method may be appropriate for taking into account income, deduction, gain or loss from hedges of aggregate risk: (a) The hedging transactions are marked to market at regular intervals for which the taxpayer has the necessary data, but no less frequently than quarterly, and (b) the income, deduction, gain, or loss attributable to the realization or periodic marking to market of hedging transactions is taken into account over the period for which the hedging transactions are intended to reduce risk.ⁿ⁴⁴

(2) In the case of a transaction that hedges an item that is marked to market under the taxpayer's method of accounting, marking the hedge to market clearly reflects income.ⁿ⁴⁵

(3) If a hedging transaction hedges purchases of inventory, gain or loss on the hedging transaction may be taken into account in the same period that it would be taken into account if the gain or loss were treated as an element of the cost of inventory.ⁿ⁴⁶ A transaction that hedges sales of inventory may be accounted for by treating the realized gain or loss on the hedging transaction as if it were an element of the sales price of the inventory. If a hedge is associated with a particular purchase or sales transaction, the gain or loss on the hedge may be taken into account when it would be taken into account if it were an element of the cost incurred in, or sales proceeds from, that transaction. As with hedges of aggregate risk, however, a taxpayer may not be able to associate hedges of inventory purchases or sales with particular purchase or sales transactions. In order to match the timing of aggregate income, deduction, gain, or loss from the hedge with the timing of aggregate income, deduction, gain, or loss from the hedged purchases or sales, it may be appropriate for a taxpayer to account for its hedging transactions by marking to market in the way described above for hedges of aggregate risk, except that the gain or loss that is spread to each period is taken into account when it would be if it were an element of cost incurred (purchase hedges), or an element of proceeds from the sales made (sales hedges), during that period.

Simpler, less precise methods maybe used in appropriate cases where the clear reflection requirement is satisfied.ⁿ⁴⁷ For example: (a) Taking into account realized gains and losses on both hedges of inventory purchases and inventory sales when they would be taken into account if the gains and losses were elements of inventory cost in the period realized may clearly reflect income in some situations, but does not clearly reflect income for a taxpayer that uses the last-in, first-out (LIFO) method of accounting for the

inventory; and (b) marking hedging transactions to market with resulting gain or loss taken into account immediately may clearly reflect income even though the inventory that is being hedged is not marked to market, but only if the inventory is not accounted for under either the LIFO method or the lower-of-cost-or-market method and only if items are held in inventory for short periods of time.

(4) Gain or loss from a transaction that hedges a debt instrument issued or to be issued by a taxpayer, or a debt instrument held or to be held by a taxpayer, must be accounted for by reference to the terms of the debt instrument and the period or periods to which the hedge relates. A hedge of an instrument that provides for interest to be paid at a fixed rate or a qualified floating rate, for example, generally is accounted for using constant yield principles. Thus, assuming that a fixed rate or qualified floating rate instrument remains outstanding, hedging gain or loss is taken into account in the same periods in which it would be taken into account if it adjusted the yield of the instrument over the term to which the hedge relates. For example, gain or loss realized on a transaction that hedged an anticipated borrowing for its entire term is accounted for, for clear reflection purposes, as if it decreased or increased the issue price of the debt instrument.ⁿ⁴⁸

(5) If a notional principal contract hedges a debt instrument, the method of accounting prescribed by the regulations for periodic payments described in *Regulations Section 1.446-3(e)* and for nonperiodic payments described in *Regulations Section 1.446-3(f)(2)(iii)* and (v) will clearly reflect the taxpayer's income.ⁿ⁴⁹ The methods described in *Regulations Section 1.446-3(f)(2)(ii)* and (iv), however, generally do not clearly reflect income in that situation.

(6) If a taxpayer hedges an item and disposes of, or terminates its interest in, the item but does not dispose of or terminate the hedge within a reasonable period, the taxpayer must appropriately match the built-in gain or loss on the hedging transaction to the gain or loss on the disposed or terminated item.ⁿ⁵⁰ To meet this requirement, the taxpayer may mark the hedge to market on the date it disposes of the hedged item. If the taxpayer intends to dispose of the hedging transaction within a reasonable period (generally seven days), however, it may be appropriate to match the realized gain or loss on the hedging transaction with the gain or loss on the disposed item. If the taxpayer intends to dispose of the hedging transaction within a reasonable period and the hedging transaction is not actually disposed of within that period, the taxpayer must match the gain or loss on the hedge at the end of the period with the gain or loss on the disposed item.

(7) If a taxpayer enters into a hedging transaction by recycling a hedge of a particular hedged item to serve as a hedge of a different item, the taxpayer must match the built-in gain or loss at the time of the recycling to the gain or loss on the original hedged item, items or aggregate risk.ⁿ⁵¹ Income, deduction, gain, or loss attributable to the period after the recycling must be matched to the new hedged item, items, or aggregate risk according to the general clear reflection of income principles contained in *Regulations Section 1.446-4(b)*, discussed above.

(8) If a taxpayer enters into a hedging transaction to reduce risk with respect to an anticipated asset acquisition, debt issuance, or obligation, and the anticipated transaction is not consummated, any income, deduction, gain, or loss from the hedging transaction is taken into account when realized.ⁿ⁵² A taxpayer consummates a transaction for purposes of the preceding sentence upon the occurrence (within a reasonable interval around the expected time of the anticipated transaction) of either the anticipated transaction or a different but similar transaction for which the hedge serves to reasonably reduce risk.

The accounting regulations impose additional recordkeeping requirements. The books and records maintained by the taxpayer must contain a description of the accounting method used for each type of hedging transaction and the

description must be sufficient to show how the clear reflection requirement is satisfied.ⁿ⁵³ In addition to the identification requirement of *Regulations Section 1.1221-2(e)* described above, the books and records maintained by the taxpayer must contain whatever more specific identification with respect to a transaction that is necessary to verify the method of accounting used by the taxpayer for the transaction.ⁿ⁵⁴ This additional identification may relate to the hedging transaction or to the item, items, or aggregate risk being hedged.

The Service has issued regulations relating to the character and timing of gain or loss when one member of a consolidated group hedges the risk of another member or enters into a hedge with another member. As a general rule, the regulations adopt a single-entity approach to consolidated groups, applying the hedging rules to a member's transactions that hedge the risk of other members of the same consolidated group. In other words, the risk of one member of a consolidated group is treated as the risk of the other members, as if all of the members of the group were divisions of a single corporation.ⁿ⁵⁵ Thus, if any member of the consolidated group enters into a transaction with an unrelated party that hedges the risk of another member of the group, the transaction potentially qualifies as a hedging transaction.ⁿ⁵⁶ Under the general rule, intercompany transactions are not hedging transactions because they are treated as transactions between divisions of a single corporation and therefore do not reduce the risk of the group.ⁿ⁵⁷

A consolidated group can elect separate-entity treatment of its hedges.ⁿ⁵⁸ If the group makes such an election, the following rules apply:

- (1) the risk of one member is not treated as the risk of other members; and
- (2) an intercompany transaction or obligation is a hedging transaction with respect to a member of a consolidated group if, and only if:
 - (a) the position of the member in the intercompany transaction or obligation would qualify as a hedging transaction with respect to that member if it had entered into the transaction with an unrelated party, and
 - (b) the position of the other member (the marking member) in the transaction is marked to market under the marking member's method of accounting.ⁿ⁵⁹

An intercompany transaction or obligation that is a hedging transaction because it meets the requirements set forth in the preceding sentence, is treated as follows:

- (1) neither the hedging transaction nor any intercompany obligation with respect to that transaction is treated as an intercompany transaction or obligation for purposes of *IRC Section 1502* and the regulations thereunder; and
- (2) the character of the marking member's gain or loss from the transaction is ordinary.ⁿ⁶⁰

The separate-entity election must be made in a separate statement that is filed with the group's consolidated return for the taxable year that includes the first date for which the election is to apply.ⁿ⁶¹ The statement must specify that the election is being made and must indicate the date the election is to be effective. The election applies to all transactions entered into after the effective date. The election cannot be revoked without the consent of the Service.

If a member of a consolidated group hedges the risk of another member under the general rule relating to hedging transactions by consolidated group members, the member entering into the hedging transaction with a third party must identify the transaction as a hedging transaction before the close of the day on which the member enters into the transaction.ⁿ⁶² The member must also identify the item, items, or aggregate risk that is being hedged, even if the item, items, or aggregate risk relates primarily or entirely to other members of the group.ⁿ⁶³ If the members of the group use

intercompany transactions or obligations to transfer risk within the group, the latter requirement may be met by identifying the intercompany transactions or obligations as hedges or hedged items, as appropriate. Because identification of intercompany transactions as a hedge serves solely to identify the hedged item, the identification is timely if met within 35 days after entering into the hedging transaction.ⁿ⁶⁴ Thus, if a member transfers risk in an intercompany transaction, it may identify both its position in that transaction and the item, items, or aggregate risk being hedged. The member that hedges risk outside the group may identify both its position with the third party and its position in the intercompany transaction.

If a consolidated group makes the separate entity election, each member of the group must satisfy identification requirements as though it were not a member of a consolidated group.

The regulations also provide rules with respect to the effects of identification and nonidentification. If a group is under the general rule, the rules of *Regulations Section 1.1221-2(g)* apply to a hedging transaction, but not to intercompany transactions.ⁿ⁶⁵ If a group makes a separate-entity election, the rules of *Regulations Section 1.1221-2(g)* are extended to intercompany transactions that are treated as hedging transactions.ⁿ⁶⁶

If a consolidated group is under the general rule, the timing of income, deduction, gain, or loss must be matched with the timing of income, deduction, gain, or loss from the item or items being hedged rather than with an intercompany transaction.ⁿ⁶⁷ If a consolidated group makes a separate-entity election, each member of the group must account for its hedging transactions (including intercompany transactions that are treated as hedging transactions) in a manner that clearly reflects income without regard to the fact that the taxpayer is a member of a consolidated group.ⁿ⁶⁸

[b] Anticipatory Assignment of Income--The "Sale" of Ordinary Income.

[i] Sale of Stock and Right to Dividend. In the absence of a contrary statutory provision, dividends are includable in the taxpayer's gross income as ordinary income.ⁿ⁶⁹ Can the taxpayer convert the character of income from ordinary to capital merely by selling the underlying stock prior to the time fixed for payment of the dividend? The question cannot be answered without first resolving the question of the taxpayer's right to the dividend at the time of sale. If the sale takes place before the time at which the seller becomes entitled to the dividend (usually the record date), the dividend will not constitute ordinary income to the taxpayer even though the amount received is enhanced by a sum equal to the anticipated dividend.ⁿ⁷⁰ On the other hand, once the taxpayer has succeeded to the right to receive the dividend, he cannot avoid its inclusion in gross income, and any attempt to dispose of his right of receipt through a sale of the stock will fail to change this result.ⁿ⁷¹

[ii] Sale of Bonds With Interest Accrued. The sale price of an interest-bearing bond sold between interest dates normally includes the interest accrued since the last payment date. As in the case of a stock sale, the mere fact that a sale of a capital asset has taken place will not permit the portion of the price attributable to interest to be reported as anything other than ordinary income, even where the seller is a cash basis taxpayer.ⁿ⁷² The balance of the price will constitute the amount realized for the purpose of determining gain or loss from the sale.

FOOTNOTES:

(n1)Footnote 1. Prior to the Economic Recovery Tax Act of 1981, noninterest-bearing government bonds issued at a discount and payable at a fixed maturity date not exceeding one year from issuance were also excluded from the category of capital assets. In *Dial v Commr*, 968 F2d 898 (9th Cir 1992), the taxpayer could not rely on that provision for years prior to 1981 because he traded Treasury bill futures contracts and not the underlying obligations.

(n21)Footnote 7. 485 US 212 (1988) . Source-of-supply cases were not the only ones influenced by *Corn Products*. See, eg, *Schlumberger Technology Corp v US*, 443 F2d 1115 (5th Cir 1971) (stock acquired in order to obtain specialized expertise necessary to computerize taxpayer's business and to aid it in finding markets for its business); *Steadman v Commr*, 424 F2d 1 (6th Cir) , *cert denied*, 400 US 869 (purchase of shares by attorney to protect position as

general counsel); *Union Pacific RR v US*, 524 F2d 1343 (Ct Cl 1975) , *cert denied*, 429 US 827 (corporation's holding in other lines not equity invested capital); *Waterman, Largen & Co v US*, 419 F2d 845 (Ct Cl 1969) , *cert denied*, 400 US 869 (commission agent's purchase of supplier's stock in anticipation of grant of exclusive agency); *Irwin v US*, 401 F Supp 547 (ED La 1975) (purchase only to give sufficient interest in corporation to become attorney for corporation); *Grant v US*, 399 F Supp 79 (ED Ark 1975) (stock in tractor company acquired to obtain benefits and privileges for taxpayer's farming business); *Hagan v US*, 221 F Supp 248 (WD Ark 1963) (purchase of customer's stock in return for agreement by customer to purchase exclusively from taxpayer).

(n22)Footnote 8. See *Dial v Commr*, 968 F2d 898 (9th Cir 1992) , denying an ordinary loss on the sale of Treasury bill futures which the taxpayer claimed were part of hedging transactions; the court held that the statutory exception from capital asset status of any obligation of the US did not apply to such futures.

The taxpayer, in *Pike v US*, 88 F3d 54 (1st Cir 1996) , *cert denied*, 117 S Ct 691 , bought large blocks of stock in various banking institutions in the belief that he could establish a major bank holding company in which others would invest. He sold those shares after their value declined and attempted to claim an ordinary loss on the ground that the stock was the raw material with which he was building the holding company and, thus, sufficient to qualify for the inventory exception. The court rejected this theory and limited the taxpayer to capital loss treatment.

An agricultural cooperative that sold petroleum products to farmers was one of the shareholders in a corporation established to operate an oil refinery. The refinery corporation failed and became bankrupt. The cooperative claimed an ordinary loss on its investment in the refinery. The court found that the transaction was not closely related to the cooperative's inventory-purchase system. In so doing, the court rejected the taxpayer's argument that *Arkansas Best Corp v Commr* did not overrule the source of supply cases decided after *Corn Products. Cenex, Inc v US*, 156 F3d 1377 (Fed Cir 1998) , *cert denied*, 525 US 1146 .

(n23)Footnote 8.1. 100 TC 541 (1993) . In *Davis v Commr*, 119 TC 1 (2002) , the Tax Court held that the right to receive future lottery payments was not a capital asset so that a taxpayer who assigned a right to receive a portion of certain future lottery payments in exchange for a lump sum received ordinary income. The Tax Court adhered to this position in *Clopton v Commr*, TC Memo 2004-95 , *Simpson v Commr*, 2003-155, *Johns v Commr*, 2003-140, and *Boehme v Commr*, TC Memo 2003-81 . The court stated in *Clopton* that it did not have to consider what the result would be if the person who bought the right to the lottery prize then sold it to a third party.

The Ninth Circuit agrees that the sale by the lottery winner produces ordinary income. *US v Maginnis*, 356 F3d 1179 (9th Cir 2004) .

(n24)Footnote 8.2. *Treas Reg § 1.1221-2(a)(1)*. The hedging transaction regulations do not apply to gain or loss realized on an *IRC § 988* transaction as defined in *IRC § 988(c)(1)* or to any qualified fund as defined in *IRC § 988(c)(1)(E)(2)* (see § 20.09, *infra*). *Treas Reg § 1.1221-2(a)(4)*. The regulations are effective March 20, 2002. However, the Service will not challenge any transaction entered into on or after Dec 17, 1999, and before March 20, 2002, that satisfies the provisions of the 1994 regulations or of the 2002 regulations.

(n25)Footnote 9. *Treas Reg § 1.1221-2(a)(2)*.

(n26)Footnote 10. *Treas Reg § 1.1221-2(a)(3)*.

(n27)Footnote 11. *Treas Reg § 1.1221-2(b)*. A transaction that is entered into to reduce a taxpayer's risk manages the taxpayer's risk. *Treas Reg § 1.1221-2(d)(1)(i)*.

If a transaction satisfies the definition of a hedging transaction in *IRC § 1221(b)(2)(A)* and *Treas Reg § 1.1221-2(b)*, the taxpayer must account for the transaction using a method of accounting that is permissible under *Treas Reg § 1.116-4*, even if the taxpayer fails to identify the transaction under *Treas Reg §§ 1.1221-2(f)* and *1.446-4(d)(2)*. If a

taxpayer has used a method of accounting for a type of hedging transaction but, under *Treas Reg* § 1.446-4, that method is impermissible for those transactions, the taxpayer must obtain the Commissioner's consent before changing to a permitted method of accounting. *Rev Rul* 2003-127, 2003-2 CB 1245 .

(n28)Footnote 12. *Treas Reg* § 1.1221-2(d)(1)(ii)(A). Whether a transaction reduces a taxpayer's risk is determined based on all of the facts and circumstances surrounding a taxpayer's business. Whether a transaction manages a taxpayer's risk may be determined on a business unit by business unit basis, provided that the business unit is within a single entity or consolidated return group that adopts the single-entity approach. In general, a taxpayer's hedging strategies and policies as reflected in the taxpayer's minutes or other records are evidence of whether particular transactions reduce the taxpayer's risk. *Treas Reg* § 1.1221-2(c)(4)(i).

A taxpayer may hedge all or any portion of its risk for all or any part of the period during which it is exposed to risk. *Treas Reg* § 1.1221-2(d)(7).

A taxpayer may enter into a hedging transaction by using a position that was a hedge of one asset or liability to hedge another asset or liability (recycling). *Treas Reg* § 1.1221-2(d)(2).

(n29)Footnote 13. *Treas Reg* § 1.1221-2(d)(1)(ii)(A).

(n30)Footnote 14. *Treas Reg* § 1.1221-2(d)(1)(ii)(A).

(n31)Footnote 15. *Treas Reg* § 1.1221-2(d)(1)(iv).

(n32)Footnote 15.1. *Treas Reg* § 1.1221-2(d)(2).

(n33)Footnote 16. *Treas Reg* § 1.1221-2(d)(1)(iii).

(n34)Footnote 17. *Treas Reg* § 1.1221-2(d)(3). For example, if a written option is used to reduce or eliminate the risk reduction obtained from another position such as a purchased option, it may be part of a hedging transaction.

(n35)Footnote 18. *Treas Reg* § 1.1221-2(d)(7)(ii).

(n36)Footnote 19. *Treas Reg* § 1.1221-2(a)(3).

(n37)Footnote 20. *Treas Reg* § 1.1221-2(c)(3).

(n38)Footnote 21. *Treas Reg* § 1.1221-2(c)(5)(i).

(N39)Footnote 21.1. *Treas Reg* § 1.1221-2(d)(7).

(n40)Footnote 22. *Treas Reg* § 1.1221-2(c)(1).

(n41)Footnote 23. *Treas Reg* § 1.1221-2(f)(1), (2). Any identification for purposes of the mark-to-market rules for straddles under *IRC* § 1256(e)(2)(C) is also an identification for purposes of the hedging transaction rules. *Treas Reg* § 1.1221-2(f)(6).

If a transaction satisfies the definition of a hedging transaction in *IRC* § 1221(b)(2)(A) and *Treas Reg* § 1.1221-2(b), the taxpayer must account for the transaction using a method of accounting that is permissible under *Treas Reg* § 1.116-4, even if the taxpayer fails to identify the transaction under *Treas Reg* §§ 1.1221-2(f) and 1.446-4(d)(2). *Rev Rul* 2003-127, 2003-52 IRB 1245 .

(n42)Footnote 24. *Treas Reg* § 1.1221-2(f)(2)(i), (4)(i). Identification of an item being hedged generally involves identifying a transaction that creates risk, and the type of risk that the transaction involves. For example, if the taxpayer

is hedging the price risk with respect to its June purchases of corn inventory, the transaction being hedged is the June purchase of corn and the risk is price movements in the market where the taxpayer buys its corn.

(n43)Footnote 25. *Treas Reg § 1.1221-2(f)(3)(ii)*.

(n44)Footnote 26. *Treas Reg § 1.1221-2(f)(3)(iii)(A)*.

(n45)Footnote 27. *Treas Reg § 1.1221-2(f)(3)(iii)(B)*.

(n46)Footnote 28. *Treas Reg § 1.1221-2(f)(3)(i)*.

(n47)Footnote 29. *Treas Reg § 1.1221-2(f)(3)(iv)(A)*.

(n48)Footnote 30. *Treas Reg § 1.1221-2(f)(3)(iv)(B)*. A description of a hedging program must include an identification of the type of risk being hedged, a description of the type of items giving rise to the risk being aggregated, and sufficient additional information to demonstrate that the program is designed to reduce aggregate risk of the type identified. If the program contains controls on speculation (eg, program limits), the description of the hedging program must also explain how the controls are established, communicated, and implemented.

(n49)Footnote 31. *Treas Reg § 1.1221-2(f)(4)(ii)*.

(n50)Footnote 32. *Treas Reg § 1.1221-2(f)(4)(iii)*.

(n51)Footnote 33. *Treas Reg § 1.1221-2(f)(4)(iv)*.

(n52)Footnote 34. *Treas Reg § 1.1221-2(g)(1)(i)*.

(n53)Footnote 35. *Treas Reg § 1.1221-2(g)(1)(i)*.

(n54)Footnote 36. *Treas Reg § 1.1221-2(g)(1)(ii)*.

(n55)Footnote 37. *Treas Reg § 1.1221-2(g)(2)(i)*.

(n56)Footnote 38. *Treas Reg § 1.1221-2(g)(2)(ii)*.

(n57)Footnote 39. *Treas Reg § 1.1221-2(g)(2)(iii)*.

(n58)Footnote 40. *Treas Reg § 1.446-4(b)*. A taxpayer is not required to account for hedging transactions under the rules set forth in the regulations for any trade or business in which the cash receipts and disbursements method of accounting is used or in which *Treas Reg § 1.471-6* is used for inventory valuations, if, for all prior years ending on or after the date of final regulations, the taxpayer met the \$5 million gross receipts test of *IRC § 448(c)* (or would have met that test if the taxpayer were a corporation or partnership). *Treas Reg § 1.446-4(a)(1)*. (Under the \$5 million gross receipts test of *IRC § 448(c)* for any prior year, a partnership's or corporation's average annual gross receipts for the 3-taxable-year period ending with the prior year must not exceed \$5 million.)

The regulations do not apply to: (i) any transactions governed by *IRC § 475* (the mark-to-market rules for dealers in securities) (see § 18.05, *infra*); (ii) any *IRC § 988* hedging transaction if the transaction is integrated under *Treas Reg § 1.988-5* or if other regulations issued under *IRC § 988* govern when gain or loss from the transaction is taken into account; or (iii) the determination of the issuers' yield on an issue of tax-exempt bonds for purposes of the arbitrage restrictions under *Treas Reg § 1.148-4(h)*. *Treas Reg § 1.446-4(a)(2)*.

(n59)Footnote 41. *Treas Reg § 1.446-4(c)*.

(n60)Footnote 42. *Treas Reg § 1.446-4(e)(1)(i)*.

(n61)Footnote 43. *Treas Reg § 1.446-4(e)(1)(i)*.

(n62)Footnote 44. *Treas Reg § 1.446-4(e)(1)(ii)*.

(n63)Footnote 45. *Treas Reg § 1.446-4(e)(2)*.

(n64)Footnote 46. *Treas Reg § 1.446-4(e)(3)(i)*.

(n65)Footnote 47. *Treas Reg § 1.446-4(e)(3)(ii)*.

(n66)Footnote 48. *Treas Reg § 1.446-4(e)(4)*. Gain or loss realized on a transaction that hedges a contingent payment on a contingent payment debt instrument issued for nonpublicly traded property is taken into account when the contingent payment is taken into account under *Treas Reg § 1.1275-4(c)*, as discussed in § 17.02A[2][b]. In

Rev Rul 2002-71, 2002-2 CB 763, the taxpayer issues a ten-year debt instrument that provides for interest to be paid annually at a fixed rate. Contemporaneously, the taxpayer enters into a notional principal contract with a five-year term, that converts the fixed rate payments under the debt instrument into floating rate payments. This permits the taxpayer to receive payments equal to the product of the fixed rate on the debt instrument and a notional amount equal to the principal amount of the debt instrument in exchange for payments by the taxpayer equal to the product of the floating rate and the same notional amount. The taxpayer properly identifies the notional principal contract as a hedging transaction covering the first five years of the debt instrument. The taxpayer terminates the notional principal contract on the last day of the second year and either receives or makes a termination payment.

The situation in *Rev Rul 2002-71* is different from the hedging transaction described in *Treas Reg § 1.446-4(e)(4)* in that it does not hedge the fixed rate borrowing over the entire term of the debt instrument. Instead, the taxpayer's notional principal contract hedges and relates only to the first five years of the debt instrument. Prior to its termination the notional principal contract would have continued to hedge three more years of the debt instrument and the taxpayer would have been required to take into account the remaining income, deduction, gain, or loss over those three years. The termination payment made or received by the taxpayer represents the present value of the extinguished rights and obligations under the notional principal contract for the last three years. To clearly reflect income, the taxpayer must take into account the gain or loss from terminating the notional principal contract over the remaining three-year period.

If the taxpayer retired the debt instrument at the end of the fourth year, the taxpayer would have already taken into account in the third year a portion of the gain or loss resulting from the termination of the notional principal contract. The taxpayer would then take into account in the fourth year the remaining balance of the gain or loss from the terminated hedge.

(n67)Footnote 49. *Treas Reg § 1.446-4(e)(5)*. The accounting rules for notional principal contracts are discussed in § 9A.03, *infra*.

(n68)Footnote 50. *Treas Reg § 1.446-4(e)(6)*.

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions § 2.05

§ 2.05 Holding Period

The final element of the capital gain or loss equation, the holding period, plays no part in differentiating capital transactions from those which result in ordinary income or loss. Its sole function lies in determining whether gain or loss, previously found entitled to capital status, is to be denominated long-term or short-term gain or loss.

[1] Measuring the Holding Period of a Capital Asset.

[a] The Mechanics of Measurement. Whether long-term capital gain or loss is realized depends upon the date that the capital asset forming the subject of the requisite sale or exchange was acquired. Long-term gain or loss requires a holding period of more than one year.ⁿ¹ Any lesser holding period produces short-term gain or loss.ⁿ²

Computation of the critical period is not as simple as the definition would have it appear. The first concern is to fix the starting and ending dates of the holding period. While it might seem that holding period of an asset should begin on the date of acquisition, the first day of the period is the day following acquisition. On the other hand, the date of disposition is included within the prescribed period.ⁿ³ Therefore, gain or loss from the sale of capital asset purchased on February 15, 1997 will be long-term only if sold on or after February 16, 1998.

[b] Fixing the Beginning and End of the Period.

Of critical importance in measuring the period for which property has been "held" is the determination of the dates on which the period begins and ends. In a 1935 decision, the Supreme Court set forth the following rule for fixing the opening of the period:

"In common understanding, to hold property is to own it. In order to own or hold one must acquire. The date of acquisition is, then, that from which to compute the duration of ownership or the length of holding."ⁿ⁴

Thus, the measuring process becomes one of ascertaining, first, the date on which ownership of the property was obtained and, then, the date when ownership ceased. Here the concept of ownership is governed by applicable state law so that, normally, the controlling factor will be transfer of title.ⁿ⁵ Ordinarily the transfer of title test will pose no problem, since title will be acquired on the date of purchase and disposed of on the date of sale. But what result obtains

when the date on which the transaction is executed is not the date of actual delivery? It is to this uncommon state of facts that we now turn.

[i] Securities Traded on an Exchange. When securities are traded on an organized exchange, execution of the purchase or sale is accomplished on one day, and payment and delivery on another, some days later.ⁿ⁶ For holding period purposes, the commencement date is the date of execution of the purchase order, and not the date of payment or actual physical acquisition of the securities. Similarly, the period ends with the date of sale rather than with the subsequent delivery date.ⁿ⁷

The result seems consistent with the passage of title test if that concept is not limited solely to transfer of possession. Under exchange rules, execution of the purchase order seals the rights and duties of the buyer and seller, thereby producing as effective a change in ownership as would be accomplished by actual delivery and passage of legal title.

[ii] Escrow Transactions. Further problems are presented when the transaction involves an escrow deposit. Basically, the escrow agreement calls for the delivery of the subject matter of the transaction, or the price to be paid therefore, or both, to a third party, to be held by him until the occurrence of certain specified events. Such an arrangement suggests a number of choices for the pivotal date, namely, the date of delivery to the escrow agent, the date of delivery by him, or perhaps some date falling between the two.

Once again, transfer of title controls, but an oft-found problem in escrow transactions lies in fixing the date when title passes. Illustrative of the difficulty which may be encountered is the transaction in *First American National Bank v. United States*.ⁿ⁸ There, a contract dated September 7, 1956 called for an escrow deposit of all of the subject stock and one-half of the purchase price until January 4, 1957, the date fixed for closing and payment of the balance of the price. The purchaser was given proxies to vote the escrowed stock, the right to receive at the closing any stock dividends accruing on the escrowed stock, and the right to cancel if the corporation's management did any of certain specified things within a set period of time without the purchaser's permission. The Commissioner claimed that the stock was disposed of on September 7, 1956, the date of contract. This would have resulted in a holding period of less than six months. The taxpayers contended that the sale took place in 1957, at the time possession of the stock was transferred from the escrow agent to the purchaser.

The court determined that both legal and equitable title passed on the date of transfer of possession, since prior to that time there had not been the degree of performance of conditions precedent necessary to impose upon the purchaser an unconditional duty to pay. The court read the contract as one that imposed a duty to pay only upon actual delivery, and not a duty to pay a debt in the future for a completed sale. This conclusion rested on the fact that, except for the voting proxy, no incidents of ownership passed to the purchaser until closing. Since the buyer's duty remained conditional until closing, the sellers "held" the stock until that date.

The situation in *First American National Bank* should be distinguished from the completed sale, where a deposit escrow serves the sole function of security for deferred payment of the purchase price. In such a case, neither the escrow nor the deferral of payments to the future affects the unconditional nature of the promise to pay.ⁿ⁹

[2] Holding Period in Specific Situations.ⁿ¹

[a] Property Received From a Decedent. It will be remembered that the basis of property acquired by inheritance, bequest, or devise from a decedent is fixed by reference to the fair market value of the property at death or at the alternate valuation date. What is the first day of the holding period of taxpayer who acquires such property? Two possible acquisition dates are suggested: (1) the date of decedent's death, and (2) the date of actual receipt by the legatee. Prior to 1935, a split of authority existed, the Board of Tax Appealsⁿ² and four Courts of Appealsⁿ³ sustaining the Commissioner's position that the beneficiary's holding period began with the date of distribution, while the First Circuit took the view that his holding period started at the date of decedent's death.ⁿ⁴ The conflict brought a grant of certiorari by the Supreme Court.

In *McFeely v. Commissioner*,ⁿ⁵ a decision to which Justices Brandeis, Stone, and Cardozo dissented, the Court equated the statutory word "held" with "acquired." Having done so, it was a simple step to conclude that the beneficiary's holding period began on the date of death, since, in contemplation of law, one deriving property through devise, bequest, or intestacy acquires such property upon the decedent's death.ⁿ⁶

In *McFeely*, all of the acquired property had been owned by the decedent. Less than six years later, the Court was called upon to decide if the theory underlying the *McFeely* decision should be applied with equal force in the instance where the distributed property had been purchased by the fiduciary and not owned by the decedent at his death. In deciding that the taxpayer's holding period began with the date of purchase, the Court wrote in *Helvering v. Gambrill*:ⁿ⁷

"[P]roperty held by the taxpayer' ... embraces not only full ownership but also any interest whether vested, contingent, or conditional. ... Hence, as in *McFeely v. Commissioner, supra*, we look to the time when the taxpayer first acquired the interest which later ripened into full ownership."

The rationale of *McFeely* and *Helvering v. Gambrill* requires that the holding period of property received upon the distribution of a trust, whether testamentary or inter vivos, be traced back to the time of acquisition by the trust. Indeed, the taxpayer in *Helvering v. Gambrill* actually acquired the property as the result of the termination of a trust rather than the closing of an estate.

It must be kept in mind that the rules announced in *McFeely* and *Helvering v. Gambrill* do not reach every item of property acquired from a decedent, but only those acquired by devise or bequest of the subject property, by satisfaction of a residuary legacy, or by intestacy. Not reached is property distributed to a beneficiary in satisfaction of a pecuniary or fixed-dollar legacy. In such cases, the beneficiary is deemed to acquire the property by purchase from the estate, causing his holding period to commence with the date of distribution. The result is not at odds with *McFeely* or *Helvering v. Gambrill* since the beneficiary acquires no interest--vested, contingent, or conditional--prior to the date on which he accepts the property in satisfaction of his claim.

A special holding period provision, *IRC Section 1223(10)*, creates a long-term holding period where one does not actually exist. Under that subsection, a person acquiring property from a decedent, or to whom property passed from a decedent, is treated as having held the property for more than one year even if the property is sold within one year after the decedent's death.ⁿ⁸ Of course, if the property is retained for more than one year after the decedent's death, the holding period is automatically long-term. The provision was enacted as part of the legislation which changed the due date of estate tax returns from fifteen months after death to nine months after death; it is intended to mitigate the adverse tax consequences which could result if a sale shortly after death was required to raise the funds needed to pay the tax.

[b] Tacking--Acquiring an Added Holding Period.

Under rules prescribed by *IRC Section 1223*, there may be added to the taxpayer's normal holding period the time during which the property was held by another, or, perhaps, the time that the taxpayer held certain other property. In general, the situations calling for tacking are those in which the taxpayer acquires a substituted basis, that is, a basis determined by reference to the basis of the property in the hands of the person from whom it was acquired, or by reference to the basis of property for which it was exchanged.

[i] Property Acquired by Gift. We have seen previously that the donee of a gift of property assumes a basis in the property equal to that of the donor, adjusted for the amount of gift tax paid with respect to the gift.ⁿ⁹ Since the property has "for the purpose of determining gain or loss from a sale or exchange, the same basis in whole or in part in his hands as it would have in the hands of [any other person]"ⁿ¹⁰ the donee is permitted to add the donor's holding period for the property to his own. (Transfers between spouses governed by *IRC Section 1041* are gifts for holding period

purposes.ⁿ¹¹ The fact that basis is increased by the amount of gift tax paid does not destroy the ability to tack, for the statute requires no more than a substituted basis *in part*, and that condition is certainly met.

Suppose, however, the taxpayer receives property which has a time-of-gift value less than the transferor's basis, and therefore must employ fair market value as his basis for determining loss. If the taxpayer does sell at a loss, will his holding period include that of the donor, or will it commence with the taxpayer's acquisition? The issue comes down to one of statutory construction. *IRC Section 1223(2)* calls for tacking when substituted basis provides the basis for "determining gain or loss." The construction question revolves around the word "or." If the Code is to be read as permitting tacking only when the basis involved in the specific computation is a substituted basis, then clearly tacking would not be permitted if value serves as the basis for loss purposes. If, however, the intention of the statute is to prescribe tacking when either the basis for gain or the basis for loss is determined by reference to the basis in the hands of another person, then the taxpayer must add the prior owner's holding period to his. In 1941, the Service opted for the first construction.ⁿ¹² Its theory was simply that since the donee does not use the donor's basis for determining loss, the ability to tack is eliminated. The Government's position has never been challenged in any litigation, and probably never will be, for it works to the benefit of taxpayers by changing into short-term losses those which would be long-term if tacking were required. In 1969,

*Revenue Ruling 69-43*ⁿ¹³ declared the ruling obsolete and no longer determinative with respect to future transactions. However, this declaration has probably not brought any change in Internal Revenue Service position since it is also contained in a subsequent ruling which is not obsolete.ⁿ¹⁴

Holding *IRC Section 1223(2)* inapplicable when the basis employed in a particular transaction is other than a substituted basis is consistent with the normal basis-holding period partnership, that is, a new basis mandates a new holding period with the same date serving as basis valuation date and the date from which ownership is measured. There is, though, one instance in which the two dates do not coincide, and that is when a gift of property is found to have been in contemplation of death. The basis of the property in such case is its fair market value on the decedent's death, assuming the property was still then held by the donee.ⁿ¹⁵ The donee's holding period, on the other hand, begins, not with the decedent's death, but with actual acquisition by him.ⁿ¹⁶

[ii] Property Acquired in a Tax-Free Exchange. Congress has determined, as a matter of policy, that gain or loss realized from certain transactions should not be recognized. The legislative attitude rests in large measure on the notion that the exchange produces a change solely in the form of the investment, and that no tax should be imposed until the occurrence of an event which results in a change in the substance thereof. The interrelation of nonrecognition with basis and holding period may be illustrated by the exchange of common stock for other common stock of the same corporation. *IRC Section 1036* provides that any gain or loss realized on such an exchange shall not be recognized. Consistent with the sense of mere formal change is the requirement that the taxpayer carry over to the new common stock his basis in the old.ⁿ¹⁷ Equally consistent is the addition of the holding period of the property exchanged to the holding period of the property acquired, provided the asset exchanged is a capital asset or a Section 1231 asset.ⁿ¹⁸

Because *IRC Section 1223(1)* allows tacking only when the acquired property assumes a substituted basis, some of the property received in an exchange may take a tacked holding period while other property received in the same exchange may have a holding period which commences with the exchange. For example, if, in the exchange described in the preceding paragraph, the taxpayer receives not only common stock; but also other property which cannot be received without the recognition of gain or loss, the basis of the property exchanged (after adjustment as set forth in *IRC Section 1031(d)*) still furnishes the basis for the property received, but now an allocation is required. The prescribed method of allocation assigns to the recognition property an amount equal to its fair market value at the time of the exchange.ⁿ¹⁹ Thus, since the basis of the other property is determined by reference to fair market value, its holding period must commence with acquisition. The nonrecognition property takes the remainder of the available basis as well as a holding period which includes the time for which the property exchanged was held.

It is also possible to find a single piece of property with a split holding period. Typical of the facts producing this situation are those considered in *Revenue Ruling 62-140*,ⁿ²⁰ where the taxpayer obtained a share of common stock through the exercise of a conversion privilege contained in a debenture issued by the same corporation, accompanied by payment of \$50. The Service held that (1) the surrender of the debenture and the receipt of stock constituted a nonrecognition transaction, and (2) the share of stock had a split holding period. The part attributable to the surrender of the debenture would include the period of ownership of the debenture. The portion attributable to the \$50 payment would have a new holding period. The end of such a split holding period could see the realization of both long-term and short-term gain or loss from the single disposition of a single piece of property.

[iii] Property Acquired Through the Exercise of an Option or Rights. Suppose that a taxpayer acquires an option to purchase stock on January 15, 2000, exercises it on July 30, 2001, and then sells the acquired stock on February 1, 2002. It is easily ascertained that had the stock been acquired other than by the exercise of the option, the gain would be short-term gain, and that had the option been sold on the date of exercise, the gain arising therefrom would be long-term. The question presented is whether the period during which the option was held may be added to the holding period of the stock. Since the Code does not contain any provision specifically permitting tacking when an option is exercised, the right to tack must, of necessity, be founded on the theory that the stock was "acquired" on the date the option was acquired, a theory which the Supreme Court has refused to accept.ⁿ²¹ Thus, as in the case of a normal purchase, the holding period of stock obtained through the exercise of an option commences on the day following acquisition.ⁿ²²

The Code permits one slight exception to the normal rule--when stock or securities are acquired through the exercise of rights issued by the corporation whose stock is acquired. In such case, the holding period of the stock or securities begins with the date on which the rights are exercised.ⁿ²³ The provision, first enacted in 1942, came into the law as a result of congressional reaction to the administrative difficulties inherent in the rule developed by the courts which prescribed (1) tacking to the extent that the stock right element was represented in the new stock, and (2) no tacking as to the portion of the new stock representing the subscription price element.ⁿ²⁴ While it is clear that Congress intended to change the then-obtaining rule, it is not clear whether it intended to provide stock acquired through the exercise of rights with a holding period commencement date different from that of stock acquired through other options.ⁿ²⁵ Nonetheless, that is the mandate of *IRC Section 1223(6)*.

[iv] Qualified Small Business Stock Acquired in a Rollover. *IRC Section 1045* provides for a tax-free rollover of gain from the sale of qualified small business stock if certain conditions are met.ⁿ²⁶ The holding period of the qualified small business stock that was acquired in the rollover transaction includes the period for which the stock sold was held.ⁿ²⁷

[v] Securities Acquired in Satisfaction of a Securities Futures Contract. *IRC Section 1223(15)* provides that, if a security to which a securities future contract (other than a Section 1256 contract) relates is acquired in satisfaction of the contract, the holding period of the security includes the taxpayer's holding period for the contract if the contract was a capital asset in the hands of the taxpayer.

(n7)Footnote 7. *Rev Rul 70-598, 1970-2 CB 168* ; but cf *Hendricks v Commr, 423 F2d 485 (4th Cir 1970)* , holding that gain or loss on a short sale is realized when stock is delivered to close the sale, not when the delivered stock was purchased.

(n8)Footnote 8. *209 F Supp 902 (MD Tenn 1962)* . See also *Dyke v Commr, 6 TC 1134 (1946)* , *acq, 1946-2 CB 2* .

In *Fletcher v US, 436 F2d 413 (7th Cir 1971)* , *aff'd, 303 F Supp 583 (ND Ind 1969)* , the issue was the commencement date of the purchaser's holding period. The court found it to be the date of contracting not the date of actual acquisition, since the buyer's obligation to pay was fixed at the time of execution.

(n9)Footnote 9. See, eg, *Field v Commr, TC Memo 1971-225* .

An escrow agreement effectively shifted recognition of gain to a later year even though the only limitation on the seller's receipt of the funds was the passage of time. The First Circuit determined that the arrangement was valid because it was part of a bona fide, arm's-length agreement between buyer and seller, the seller did not receive any present beneficial enjoyment from the funds while they were in escrow, and the escrowee was not the exclusive agent of the seller. The Commissioner sought to support his argument that income was realized in the earlier year on three separate grounds--constructive receipt, economic benefit, and agency. *Reed v Commr, 723 F2d 138 (1st Cir 1983)* .

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions § 2.06

§ 2.06 Computing Capital Gains and Losses

[1] Definitions.

[a] Net Long-Term Capital Gain or Loss. *IRC Section 1222(7)* defines "net long-term capital gain" as the excess of long-term capital gains realized in the taxable year over long-term capital losses for the same year. Thus, if total long-term gains for a taxable year amounted to \$10,000 and total long-term losses to \$5,000, the net long-term gain for the year would be \$5,000. Conversely, if the amount of gain and loss were reversed, the taxpayer would realize a net long-term capital loss of \$5,000.ⁿ¹

[b] Net Short-Term Capital Gain or Loss. Net short-term capital gains and losses are determined in the same fashion as those which are long-term, that is, net short-term gain is the excess of short-term gains over short-term losses,ⁿ² and net short-term loss, the excess of such losses over such gains.ⁿ³

[c] Net Capital Gain and Net Capital Loss. A taxpayer is deemed to have a net capital gain in any year in which the taxpayer's net long-term capital gain exceeds the taxpayer's net short-term capital loss.ⁿ⁴ The taxpayer has a net capital loss whenever the losses for the year (long- and short-term taken together) exceed the amount allowed as a loss deduction under *IRC Section 1211*.ⁿ⁵ (If the taxpayer is a corporation, the amount of any loss carried back or forward to the year in question is excluded from the computation of net capital loss.)ⁿ⁶

[2] The Noncorporate Taxpayer.

[a] Treatment of Capital Gains.

[i] In General. Prior to the Tax Reform Act of 1986, the preferential treatment for taxpayers other than corporations was derived from the deduction from gross income of 60 percent of the net capital gain of the taxable year.ⁿ¹ The Act repealed the special treatment, subjecting net capital gains to the same rates as ordinary income.

The increase in tax rates brought about by the Omnibus Budget Reconciliation Acts of 1990 and 1993 returned preferential treatment for long-term capital gains to the Code, but did so by capping the rate of tax imposed on such gains at 28 percent.ⁿ² The Taxpayer Relief Act of 1997 placed different and additional caps on the tax imposed on net capital gains, the differences depending on the holding period and type of asset. The Jobs and Growth Tax Relief Reconciliation Act of 2003 reduced the rates even further for taxable years prior to January 1, 2009.ⁿ³ The rates prescribed by that legislation for taxable years ending after May 5, 2003 are:ⁿ⁴

1-2 Taxation of Securities Transactions § 2.06

Rate (%)	Application
5	Gain from the sale of assets held more than 12 months (adjusted net capital gain), if the taxpayer's regular rate of tax is 15 percent or less. ⁿ⁵ Adjusted net capital gain does not include collectibles gain, unrecaptured Section 1250 gain, or Section 1202 gain. ⁿ⁶ The rate is reduced to zero for taxable years beginning after 2007.
10	Collectibles gain, Section 1202 gain, and unrecaptured Section 1250 gain realized by a taxpayer whose regular rate of tax is 10 percent.
15	Adjusted net capital gain realized by a taxpayer whose regular rate of tax is greater than 15 percent. ⁿ⁷ The rate also applies to collectibles gain, Section 1202 gain, and unrecaptured Section 1250 gain realized by a person whose regular rate of tax is 15 percent.
25	Unrecaptured Section 1250 gain (gain to the extent of prior depreciation deductions realized on the sale of depreciable real property held for more than 12 months), if the taxpayer's regular rate of tax is greater than 25 percent. ⁿ⁸
Rate (%)	Application
28	Any gain realized by a taxpayer whose regular rate of tax is greater than 28 percent, other than gain taxed at 15 percent or 25 percent. This includes collectibles gain and Section 1202 gain. ⁿ⁹

The creation of various categories of net capital gain requires a special sequence of netting of capital gains and losses.ⁿ¹⁰ Short-term capital losses (including short-term capital loss carryovers) are applied, first, to reduce short-term capital gains. If there is a resulting net short-term capital loss, it is applied to reduce any net long-term capital gain from the 28-percent group, then to reduce gain from the 25-percent group, and, finally, to reduce net gain from the 15-percent group (5 percent for gain that would otherwise be taxed at 10 or 15 percent).

The netting of long-term capital gains and losses calls for a net loss from the 28-percent group (including long-term capital loss carryovers) to be used, first, to reduce gain from the 25-percent group, and then to reduce gain from the 15-percent group. A net loss from the 15-percent group first reduces net gain from the 28-percent group and, then, net gain from the 25-percent group.

The regulations provide for the treatment of look-through capital gain that arises from the sale or exchange of an interest in a partnership, S corporation or nongrantor trust held for more than one year. Look-through capital gain is the share of collectibles gain allocable to an interest in a partnership, S corporation, or trust, plus the share of Section 1250 capital gain allocable to an interest in a partnership.ⁿ¹¹ The share of collectibles gain taken into account is the amount of net gain that would be allocated to the partner, shareholder, or beneficiary if the partnership, corporation, or trust transferred all of its collectibles for cash equal to the fair market value of the assets in a fully taxable transaction immediately before the transfer of the interest; a similar rule applies to Section 1250 capital gain.ⁿ¹² Any capital gain remaining after accounting for look-through capital gain is treated in the normal way by the partner, shareholder, or beneficiary.ⁿ¹³

For years beginning after 2002 and ending before 2011, net capital gain is increased by the amount of qualified dividend income, namely, dividends received from domestic corporations and qualified foreign corporations.ⁿ¹⁴ Tax years from 2008 through 2010 will be subject to various temporary and transitional rules. Taxation of long-term capital gains from sales or exchanges of securities during these years will be based on three principles:

First, the basic tax rate for long-term capital gain and qualified dividend income will be 15 percent. This is the rate that

will apply to ordinary sales of securities, that is, sales which are not affected by recapture, special capital gains rates for collectibles, etc.

Second, if the taxpayer's income would otherwise be taxed at the 10 or 15 percent tax bracket, then a zero percent capital gains rate will apply.

Example:

In the year 2008, for a married couple filing jointly, the 25 percent marginal bracket starts with taxable income of \$65,100. If a couple has \$70,000 of taxable income, \$10,000 of which is attributable to long-term capital gains, then we look at the *marginal* bracket that the \$10,000 would be in. Thus, hypothetically applying regular rates, \$5,100 of that long-term capital gain would be taxed at 15 percent, and \$4,900 would be taxed at 25 percent. The \$4,900 is subject to the basic long-term capitals gains rate of 15 percent, and the \$5,100 is not subject to taxes at all. After calculating the 15 percent tax on \$4,900, that product is adding to the tax at the regular rates that would apply to the remaining \$60,000 of taxable income. If that same couple had \$65,100 or less of taxable income, including long-term capital gains, then there would be no tax at all on their long-term capital gains and only their other income would be taxable.

Third, the scope of the so-called "kiddie tax," an ever-present consideration when calculating tax liability on investment income, has been expanded in recent years. In the Small Business and Work Opportunity Act of 2007 (the "2007 Small Business Act"),ⁿ¹⁵ there were several changes made to the scope of individuals covered by the kiddie tax, that is individuals whose investment income over an amount exempt from the kiddie tax (\$1,800 in 2008) would be taxed at the parent's marginal bracket:

- (1) Prior law enacted in 2006 applied the kiddie tax to individuals who had not attained age 18 at the end of the year. The 2007 Small Business Act extended the kiddie tax to cover individuals who had not attained age 19 at the end of the year.
- (2) The 2007 Small Business Act further applied the kiddie tax to an individual who had not attained age 24 at the end of the year if he or she is a full-time student for at least five months of the year, and the individual's earned income (salary and net income from self-employment) is not more than half of his or her support for the year.

These expanded rules are applicable to tax years after enactment date May 25, 2007, which means for individuals on a calendar year they are first effective with calendar year 2008.

Based on tax law in effect as of the end of 2008, the foregoing will determine how qualified dividends and long-term capital gains from sales and exchanges of securities will be taxed in the years 2008 to 2010. Although the tax law is scheduled to return to its pre-2001 state after 2010, the likelihood is that some intervening legislation will be enacted that will continue the lower rates, although perhaps in some modified form.ⁿ¹⁶

Excluded for the definition of qualified dividend is any dividend received from a tax-exempt corporation, any amount allowed as a deduction for dividends paid by mutual savings banks, and any amount allowed as a deduction for dividends paid on employer securities to pension plan participants.ⁿ¹⁷ Also excluded is any dividend on a share of stock (i) with respect to which the holding period requirements of *IRC Section 246(c)* are not met, substituting "60 days" for "45 days" each time it appears and "121-day period" for "91-day period," or (ii) to the extent that the taxpayer is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property.ⁿ¹⁸

A qualified foreign corporation is defined as any corporation incorporated in a possession of the United States, or any

corporation that is eligible for benefits of a comprehensive income tax treaty with the United States that the Secretary of the Treasury determines is satisfactory for purposes of the definition of a qualified foreign corporation and that includes an exchange of information program.ⁿ¹⁹ A foreign corporation can be treated as a qualified corporation if the stock with respect to which the dividend is paid is readily tradable on an established securities market in the United States.ⁿ²⁰ A corporation cannot be a qualified foreign corporation if, in the year the dividend is paid, the corporation is a foreign personal holding company, a foreign investment company, or a passive foreign investment company.ⁿ²¹

Three special rules apply. Qualified dividend income does not include any amount taken into account as investment income under *IRC Section 163(d)(4)(B)*.ⁿ²² If a taxpayer receives, with respect to a share of stock, qualified dividend income from one or more dividends that are extraordinary dividends (within the meaning of *IRC Section 1059(c)*), any loss on a sale or exchange of the share is treated as long-term capital loss to the extent of the dividends.ⁿ²³ Any dividend received from a regulated investment company or real estate investment trust is subject to the limitations prescribed in *IRC Sections 854* and *857*.ⁿ²⁴

[ii] Gain on Sale or Exchange of Qualified Small Business Stock. *IRC Section 1202(a)(1)*, added by the Omnibus Budget Reconciliation Act of 1993, provides a noncorporate taxpayer with an exclusion from gross income of 50 percent of any gain from the sale or exchange of qualified small business stock held for more than five years.ⁿ²⁵ However, if the taxpayer has such gain ("eligible gain") for a taxable year from one or more dispositions of stock issued by any corporation, the aggregate amount of eligible gain from dispositions of qualified small business stock of that corporation in the taxable year cannot exceed the greater of (a) \$10 million (\$5 million in the case of a separate return by a married individual)ⁿ²⁶ reduced by the amount of eligible gain excluded from gross income for prior taxable years and attributable to dispositions of stock issued by the corporation, or (b) ten times the aggregate adjusted bases of qualified small business stock issued by the corporation and disposed of by the taxpayer during the taxable year.ⁿ²⁷

Stock is qualified small business stock if:

- (1) it is originally issued by a C corporation after August 10, 1993;
- (2) the corporation is a qualified small business; and
- (3) the stock is acquired by the taxpayer at its original issue (directly or through an underwriter) either in exchange for money or other property (not including stock), or as compensation for services provided to the issuing corporation, other than as an underwriter of the stock.ⁿ²⁸

Stock acquired by the taxpayer is not treated as qualified small business stock if, in one or more purchases during the four-year period beginning on the date two years before the issuance of the stock, the issuing corporation purchased (directly or indirectly) more than a *de minimis* amount of its stock from the taxpayer or a person related to the taxpayer within the meaning of *IRC Section 267(b)* or *707(b)*.ⁿ²⁹ Stock issued by a corporation is also not qualified small business stock if, in one or more purchases during the two-year period beginning on the date one year before the issuance of the stock, the corporation purchases more than a *de minimis* amount of its stock and the purchased stock has an aggregate value (at the time of the respective purchases) exceeding 5 percent of the aggregate value of its stock as of the beginning of the two-year period.ⁿ³⁰ If any transaction is treated as a distribution in redemption of the stock of the corporation under *IRC Section 304(a)*, the corporation is treated as if it purchased an amount of its stock equal to the amount treated as a distribution under Section 304.ⁿ³¹

A transfer of stock to an employee or independent contractor (or to a beneficiary of an employee or independent contractor) is not treated as a purchase of stock by the issuing corporation.ⁿ³² A stock purchase is disregarded if the stock is acquired in the following circumstances:

- (1) The stock was acquired by the seller in connection with the performance of services as an employee

or director and the stock is purchased from the seller incident to the seller's retirement or other bona fide termination of such services;

(2) Prior to a decedent's death, the stock (or an option to acquire the stock) was held by the decedent or the decedent's spouse (or by both), by the decedent and a joint tenant, or by a trust revocable by the decedent or the decedent's spouse (or both), and, within three years and nine months from the date of the decedent's death, the stock is purchased from the decedent's estate, beneficiary, heir, surviving joint tenant, surviving spouse, or from a trust established by the decedent or decedent's spouse;

(3) The stock is purchased incident to the disability or mental incompetency of the selling shareholder; or

(4) The stock is purchased incident to the divorce of the selling shareholder.ⁿ³³

For purposes of *IRC Section 1202*, any domestic C corporation can be a qualified small business if:

(1) the aggregate gross assets of the corporation (or any predecessor) at all times on or after August 10, 1993, and before issuance of the stock, did not exceed \$50 million;

(2) the aggregate gross assets of the corporation immediately after the issuance (determined by taking into account amounts received in the issuance) do not exceed \$50 million; and

(3) the corporation agrees to submit such reports to the Service and to shareholders as the Service may require to carry out the purposes of *IRC Section 1202*.ⁿ³⁴

All corporations that are members of the same parent-subsidary controlled group are treated as one corporation for this purpose.ⁿ³⁵

Stock will not be treated as qualified small business stock unless, during substantially all of the taxpayer's holding period for the stock, at least 80 percent (by value) of the assets of the corporation are used by it in the active conduct of one or more qualified trades or businesses, and the corporation is not:

(1) a domestic international sales corporation (DISC) or former DISC;

(2) a corporation with respect to which an election under *IRC Section 936* is in effect or that has a direct or indirect subsidiary with respect to which such an election is in effect;

(3) a regulated investment company (RIC), real estate investment trust (REIT), or real estate mortgage investment conduit (REMIC); or

(4) a cooperative.ⁿ³⁶

For this purpose, a qualified trade or business is any trade or business other than:

(1) trade or business involving the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, consulting, athletics, financial services, or any trade or business where the principal asset is the reputation or skill of one or more of its employees;

(2) any banking, insurance, financing, leasing, investing, or similar business;

(3) any farming business (including the business of raising or harvesting trees);

(4) any business involving the production or extraction of products of a character with respect to which a deduction for depletion is allowable under *IRC Section 613* or *613A*; or

(5) any business of operating a hotel, motel, restaurant or similar business.ⁿ³⁷

A corporation will fail the active business requirement for any period during which more than 10 percent of the value of its net assets consists of stock or securities in other corporations that are not subsidiaries; a special exception is provided for assets held as part of the working capital of the corporation.ⁿ³⁸ It will fail the requirement for any period during which more than 10 percent of the total value of its assets consists of real property that is not used in the active conduct of a qualified trade or business.ⁿ³⁹ On the other hand, the active business requirement is automatically met for any period during which the corporation qualifies as a specialized small business investment company that is licensed to operate under Section 3(d) of the Small Business Investment Act of 1958 (as in effect on May 13, 1993).ⁿ⁴⁰

IRC Section 1202(g) governs the treatment of the holder of an interest in a pass-through entity (partnership, S corporation, regulated investment company, or common trust fund) that sells or exchanges qualified small business stock. First, in determining whether the stock qualifies as qualified small business stock, the entity is treated as an individual and must have held the stock for more than five years.ⁿ⁴¹ Second, the taxpayer must have held the interest in the pass-through entity at the time it acquired the stock and at all times thereafter until the disposition of the stock by the entity.ⁿ⁴² Third, the amount excludable by the taxpayer is limited to the interest held by the taxpayer in the pass-through entity at the time the qualified small business stock was acquired.ⁿ⁴³

Pursuant to *IRC Section 1202(j)*, a taxpayer with an offsetting short position with respect to any qualified small business stock is not permitted to take advantage of the exclusion provided by *IRC Section 1202(a)* unless the stock was held by the taxpayer for more than five years as of the first day on which there was a short position, and the taxpayer elects to recognize gain as if the stock were sold on that day at its fair market value. The taxpayer is deemed to have an offsetting short position with respect to any qualified small business stock if:

- (1) the taxpayer has made a short sale of substantially identical property;
- (2) the taxpayer has acquired an option to sell substantially identical property at a fixed price; or
- (3) to the extent provided in regulations, the taxpayer has entered into any other transaction that substantially reduces the risk of loss from holding the qualified small business stock.ⁿ⁴⁴

Two other consequences derive from the sale of qualified small business stock come within the ambit of *IRC Section 1202*. The first is that 42 percent of the excluded gain is treated as an item of tax preference for minimum tax purposes.ⁿ⁴⁵ The second imposes a penalty for failure to file any report required under *IRC Section 1202*.ⁿ⁴⁶

A second provision, *IRC Section 1045(a)* permits a noncorporate taxpayer to elect to roll over tax-free gain from the sale or exchange of qualified small business stock held for more than six months if the taxpayer uses the proceeds of sale to purchase other qualified small business stock within 60 days of the sale.ⁿ⁴⁷ Thus, gain from the sale is recognized only if the amount realized on the sale exceeds the cost of the new stock. Generally, the holding period of the stock purchased will include the holding period of the stock sold, except for determining whether the six-month holding period is met.ⁿ⁴⁸

A partnership that sells qualified small business stock held for more than six months and purchases replacement qualified small business stock can elect to roll over the gain under *IRC Section 1045*.ⁿ⁴⁹ An eligible partner of a partnership that sells qualified small business stock can make the election if the partner purchases replacement qualified small business stock directly or through a partnership in which the taxpayer is a partner (directly or through an

upper-tier partnership).ⁿ⁵⁰ A taxpayer (other than a C corporation) that sells qualified small business stock and elects to roll over the gain can satisfy the replacement qualified small business stock requirement with qualified small business stock that is purchased within the 60-day period by a partnership in which the taxpayer is a partner on the day the replacement stock is purchased.ⁿ⁵¹

A partnership that holds qualified small business stock for more than six months, sells the stock and purchases replacement stock can make an election under *IRC Section 1045*.ⁿ⁵² If the partnership makes the election, each partner does not recognize its distributive share of Section 1045 gain unless the partner opts out of the election.ⁿ⁵³ Partnership Section 1045 gain equals the partnership's gain from the sale of the stock reduced by the greater of (i) the amount of gain from the sale of the stock treated as ordinary income, or (ii) the excess of the amount realized by the partnership on the sale over the total cost of all replacement qualified small business stock purchased by the partnership (excluding the cost of any replacement stock purchased by the partnership that is otherwise taken into account under *IRC Section 1045*).ⁿ⁵⁴ A partner's distributive share of partnership Section 1045 gain must be in the same proportion as the partner's share of the partnership's gain from the sale of the qualified small business stock.ⁿ⁵⁵

The *quid pro quo* for nonrecognition is a basis adjustment. The amount of gain not recognized is applied to reduce the basis of any qualified small business stock acquired during the 60-day period.ⁿ⁵⁶

The election under *IRC Section 1045* must be made on or before the later of December 31, 1998, or the due date (including extensions) for filing the income tax return for the taxable year in which the qualified small business stock is sold.ⁿ⁵⁷ The election is made by:

- (1) reporting the entire gain from the sale of qualified small business stock on Schedule D of the taxpayer's return;
- (2) writing "section 1045 rollover" directly below the line on which the gain is reported; and
- (3) entering the amount of deferred gain on the same line as (2) as a loss.

The election is revocable only with the prior written consent of the Commissioner.

[iii] Gain on Sale or Exchange of DC Zone Asset. A belief that one of the major problems faced by the District of Columbia was insufficient economic activity led Congress to provide, among other things, for a zero percent rate for qualified capital gain from the sale or exchange of any DC Zone asset held for more than five years.ⁿ⁵⁸ Qualified capital gain is defined as any gain recognized on the sale or exchange of a capital asset or property used in the trade or business (as defined in *IRC Section 1231(b)*).ⁿ⁵⁹ It does not include any gain

- (1) attributable to periods before January 1, 1998, or after December 31, 2007;
- (2) that would be treated as ordinary income under *IRC Section 1245* or under *IRC Section 1250* if that provision applied to all depreciation rather than additional depreciation;
- (3) that is attributable to real property, or an intangible asset, that is not an integral part of a DC Zone business; or
- (4) attributable, directly or indirectly, in whole or in part, to a transaction with a related person.ⁿ⁶⁰

A DC Zone asset can be any DC Zone business stock, any DC Zone partnership interest, or any DC Zone business property.ⁿ⁶¹ DC Zone business stock is defined as any stock in a domestic corporation that is originally issued after December 31, 1997, if:

1-2 Taxation of Securities Transactions § 2.06

- (1) the stock is acquired by the taxpayer before January 1, 2003, at its original issue (directly or through an underwriter) solely in exchange for cash;
- (2) as of the time the stock was issued, the corporation was a DC Zone corporation (or, in the case of a new corporation, the corporation was being organized for purposes of being a DC Zone business); and
- (3) during substantially all of the taxpayer's holding period for the stock the corporation qualified as a DC Zone business.ⁿ⁶²

A rule similar to *IRC Section 1202(c)(3)*, discussed in § 2.06[2][a][ii], applies for purposes of the rules relating to DC Zone business stock.ⁿ⁶³

A DC Zone partnership interest is defined as any capital or profits interest in a domestic partnership that is originally issued after December 31, 1997, if:

- (1) the interest was acquired by the taxpayer before January 1, 2003, from the partnership solely in exchange for cash;
- (2) as of the time the interest was acquired, the partnership was a DC Zone business (or, in the case of a new partnership, the partnership was being organized for purposes of being a DC Zone business); and
- (3) during substantially all of the taxpayer's holding period for the interest, the partnership qualified as a DC Zone business.ⁿ⁶⁴

DC Zone property is tangible property if:

- (1) the property was acquired by the taxpayer by purchase after December 31, 1997, and before January 1, 2003;
- (2) the original use of the property in the DC Zone begins with the taxpayer; and
- (3) during substantially all of the taxpayer's period for the property, substantially all of the use of the property was in a DC Zone business of the taxpayer.ⁿ⁶⁵

The first two requirements are treated as met with respect to property that is substantially improved by the taxpayer before January 1, 2003, and any land on which the property is located.ⁿ⁶⁶ Any DC Zone business stock, DC Zone partnership interest, or DC Zone property acquired on or after January 1, 2003, will be treated as a DC Zone asset if it was such in the hands of a prior holder.ⁿ⁶⁷ If any asset ceases to be DC Zone business stock, DC Zone partnership interest, or DC Zone property because the corporation or partnership no longer qualifies as a DC Zone business or the property is no longer used in a DC Zone business, after the five-year period beginning on the date the taxpayer acquired the asset, the asset will continue to be treated as a DC Zone asset, except that the amount of capital gain excluded from income will be limited to the amount that would be qualified capital gain if the property had been sold on the date of cessation.ⁿ⁶⁸

A DC Zone business means any entity that is an enterprise zone business (as defined in *IRC Section 1397C*), determined

- (1) without regard to the requirement that at least 35 percent of the business's employees must be residents of an empowerment zone;

(2) by requiring that at least 80 percent of a qualified business entity's total gross income be derived from the active conduct of a trade or business; and

(3) by treating no area other than the DC Zone as an empowerment zone or enterprise zone.ⁿ⁶⁹

[iv] Renewal Community Capital Gain. Pursuant to *IRC Section 1400F(a)*, gross income does not include any qualified capital gain from the sale or exchange of a qualified community asset held for more than five years. Qualified capital gain is any gain recognized on the sale or exchange of a capital asset, or property used in a trade or business (as defined in *IRC Section 1231(b)*), provided the gain is attributable to the period beginning after January 1, 2002 and ending December 31, 2014.ⁿ⁷⁰

A qualified community asset is any qualified community stock, any qualified community partnership interest, or any qualified community business property.ⁿ⁷¹ Qualified community stock is any stock of a domestic corporation if (i) the stock is acquired by the taxpayer after December 31, 2001, and before January 1, 2010, at its original issue (directly or through an underwriter) from the corporation solely in exchange for cash, (ii) as of the time the stock was issued, the corporation was a renewal community business (or, in the case of a new corporation, was being organized for purposes of being a renewal community business), and (iii) during substantially all of the taxpayer's holding period for the stock, the corporation qualified as a renewal community business.ⁿ⁷²

A qualified community partnership interest is any capital or profits interest in a domestic partnership that meets the same time and business requirements that are imposed for qualified community stock.ⁿ⁷³ Qualified community business property consists of tangible property if (a) the property was acquired by the taxpayer by purchase after December 31, 2001, and before January 1, 2010, (b) the original use of the property in the renewal community begins with the taxpayer, and (c) during substantially all of the taxpayer's holding period for the property, substantially all of the use of the property was in a renewal community business of the taxpayer.ⁿ⁷⁴ Property that is substantially improved by the taxpayer before January 10, 2010, and any land on which such property is located also can be treated as qualified community business property.ⁿ⁷⁵

[v] Gain on Rollover of Empowerment Zone Investments. *IRC Section 1397B(a)* provides that, at the election of the taxpayer, any gain realized on the sale of a qualified empowerment zone asset held by the taxpayer for more than one year will be recognized only to the extent that the amount realized exceeds (1) the cost of any qualified empowerment zone asset (with respect to the same zone as the asset sold) purchased by the taxpayer during the 60-day period beginning on the date of the sale, reduced by (2) any portion of that cost previously taken into account under the provision.ⁿ⁷⁶ The consideration exacted for nonrecognition is a corresponding reduction in the basis for determining gain or loss of any qualified empowerment zone asset that is purchased by the taxpayer during the 60-day period mentioned in the preceding sentence.ⁿ⁷⁷ Nonrecognition does not extend to (a) any gain that is treated as ordinary income under the Code, or (b) any gain that is attributable to real property, or to an intangible asset that is not an integral part of an enterprise zone business.ⁿ⁷⁸

The term "qualified empowerment zone asset" means any property that would be a qualified community asset (as defined in *IRC Section 1400F*) if in that section (1) references to empowerment zones were substituted for references to renewal communities, (2) references to enterprise zone businesses (as defined in *IRC Section 1397C*) were substituted for references to renewal community businesses, and (3) any reference to December 31, 2001 is changed to December 21, 2000.ⁿ⁷⁹

[b] Treatment of Capital Losses.

Capital gains, being gains derived from dealings in property, form part of gross income, unless nonrecognition of gain is specifically mandated by some provision of the Code. Therefore, finding that a transaction qualifies for capital, as opposed to ordinary, treatment has no effect on includability.

The same is true of capital losses. Whether an individual may deduct losses incurred in dealings in property is governed solely by *IRC Section 165(c)*. Unless incurred in a trade or business, or in a transaction for profit, the loss cannot be deducted even if the "capital" label has been affixed.ⁿ⁸⁰ The ensuing discussion will assume that the threshold question of deductibility has been resolved in favor of the taxpayer.

[i] Limiting the Deduction. Although both ordinary losses and capital losses must meet the same criteria for deduction, the extent to which capital losses are deductible is limited.ⁿ⁸¹ Total deduction of capital losses is permitted in any year that capital gains exceed capital losses. For example, if a taxpayer has long-term gains of \$2,000, long-term losses of \$3,000, short-term gains of \$4,000 and short-term losses of \$2,000, deduction would be allowed for all of the long-term losses and all of the short-term losses since total gains (\$6,000) are greater than total losses (\$5,000). The fact that the taxpayer has a net long-term capital loss is of no moment; the amount of the deduction is tested by reference to aggregate gains and losses.

The impact of the limitation is felt whenever the sum of the capital losses sustained in a tax year is greater than the aggregate capital gain for the year. In such event, *IRC Section 1211(b)(1)* allows a deduction only to the extent of the gains realized during the year, plus the lower of (1) \$3,000 (\$1,500 in the case of a husband or wife filing a separate return), or (2) the excess of capital losses over capital gains.

[ii] Capital Loss Carryover. We have just seen that *IRC Section 1211(b)(1)* limits the amount of capital loss that can be deducted in the year in which the loss is sustained. Once losses exceed the deductible amount the taxpayer must find relief in the carryover provisions of *IRC Section 1212(b)*.ⁿ⁸²

We may witness the working of the latter section by considering the taxpayer with taxable income greater than \$3,000 who sustains a short-term loss of \$1,500 and a long-term loss of \$10,500 in the taxpayer's only capital transactions. The deduction in the year of loss is limited to \$3,000; the carryover to the first succeeding year consists of \$9,000 of long-term loss.ⁿ⁸³ If in that year, the taxpayer realizes no capital gains, the deduction will be limited to \$3,000. The carryover to the next succeeding year will be \$6,000, all of which will be deemed a long-term capital loss. If, in the second carryover year, a capital gain of \$3,000 is realized, the balance of the carryover loss will be completely deductible.

A special carryback rule comes into play if the taxpayer has a "net Section 1256 contracts loss"ⁿ⁸⁴ for the taxable year and elects to have the provisions of *IRC Section 1212(c)* apply.ⁿ⁸⁵ The amount of such loss is allowed as a carryback to each of the three taxable years preceding the loss year, to the extent the amount does not exceed the net Section 1256 contract gain for such yearⁿ⁸⁶ or increase or produce a net operating loss, with 40 percent of the amount allowed treated as a short-term capital loss from Section 1256 contracts and the balance as a long-term capital loss from such contracts.ⁿ⁸⁷ A further consequence is the effect on the loss carryover rules of *IRC Section 1212(b)(1)*. The amounts carried back are treated as short-term and long-term capital gains in the same percentages as they are carried back, thereby reducing the amount of the carryover.ⁿ⁸⁸ In addition, any amount carried forward after the carryback retains its character as a Section 1256 contracts loss.ⁿ⁸⁹

[3] The Corporate Taxpayer.

[a] Treatment of Capital Gains.

[i] In General. The characterization of gain as capital gain is controlled by the same criteria whether the taxpayer is a corporation or an individual. However, unlike noncorporate taxpayers, net capital gains realized by corporations are taxed at the same rate applied to corporate ordinary income.ⁿ¹

[ii] Gain on Sale or Exchange of DC Zone Asset. Pursuant to *IRC Section 1400B*, the gross income of corporate taxpayers does not include qualified capital gain from the sale or exchange of a DC Zone asset held for more than five

years. See § 2.06[2][a][iii] for a discussion of *IRC Section 1400B*.

[b] Treatment of Capital Losses.

[i] Limiting the Deduction. As in the case of noncorporate taxpayers, the extent to which capital losses are allowed as a deduction is limited. However, in the case of a corporation, capital losses are allowed only to the extent of capital gains, and no part of any excess loss may be offset against ordinary income.ⁿ² The entire excess forms part of the corporation's capital loss carryover.

[ii] Capital Loss Carryover. Perhaps the only similarity in the manner in which corporations and noncorporate taxpayers handle capital loss carryovers is in treating the loss as one sustained in the year to which it is carried. The first difference is that, if a corporation cannot fully deduct a long-term capital loss in the year incurred, the nondeductible portion is treated as a short-term loss when carried to another year.

The second difference concerns the period to which losses may be carried. The corporate taxpayer that suffers a capital loss has a carryover period of five years and a capital loss carryback to each of the three years preceding the loss year.ⁿ³ However, if the corporation is a regulated investment company there is no carryback, but the loss may be carried forward for a period of eight years.ⁿ⁴

Special rules attend the carryback of a capital loss. It may not be carried back if attributable to a foreign expropriation lossⁿ⁵ or if it increases or produces a net operating loss (as defined in *IRC Section 172(c)*) for the taxable year to which the loss is carried back.ⁿ⁶ Furthermore, a loss may not be carried back to a year for which the taxpayer was a regulated investment company or a real estate investment trust.ⁿ⁷

The entire net capital loss for any taxable year must first be carried to the earliest year to which the loss can be carried. Normally, this will be the third year preceding the loss year unless carryback to such year is prohibited by any of the reasons previously mentioned. If net capital gainsⁿ⁸ in the year to which the loss is first carried are insufficient to absorb the entire loss, the balance of the loss is carried, in order, to the other years to which it can be carried, until completely deducted or until the period limitation bars further deduction. Although the statute does not specifically provide the order of deduction, it is assumed that if losses incurred in two years are carried back or carried forward to the same year, the earlier incurred loss is the first to be deducted.ⁿ⁹

On October 3, 2008, the President signed into law the Emergency Economic Stabilization Act of 2008.ⁿ¹⁰ This is the comprehensive legislation generally known for its \$700 billion bailout of financial institutions.

The Act, intended as a multifaceted approach to the financial crises, consisted of three separately-titled divisions: the Emergency Economic Stabilization Act of 2008, the Energy Improvement and Extension Act of 2008, and the Tax Extenders and Alternative Minimum Tax Relief Act of 2008. Most of the Act is beyond the scope of this book, however, the tax provisions that are relevant to this book are mostly contained within the last division, sometimes referred to as the "Extenders Act" or "TEAMTRA."

Although most of the tax provisions of the Act are in the third division, the first division contains some tax provisions as well. The first division is the bail-out core of this massive legislation, centering around a "Troubled Assets Relief Program," or TARP. Tax provisions of TARP include a special rule regarding financial institutions (as defined by *IRC Section 582(c)(2)*) holding preferred stock in the Federal National Mortgage Association ("Fannie Mae") or the Federal Home Loan Mortgage Corporation ("Freddie Mac").ⁿ¹¹

The Act permits losses on these to be treated as ordinary losses rather than as capital losses. This relief provision generally entitles these corporate preferred shareholders to deduct losses currently, rather than to carry them forward, in case there were inadequate capital gains against which capital losses could be taken (which would likely be the case for

these financial institutions).

This relief applies to such stock which either:

- (1) was held by the applicable financial institution on September 6, 2008, or
- (2) was sold or exchanged by the applicable financial institution on or after January 1, 2008, and before September 7, 2008.ⁿ¹²

The Act authorizes regulations to extend ordinary loss treatment to preferred stock not owned by the financial institution on September 6, 2008, if:

- (1) the financial institution sells or exchanges applicable preferred stock after September 6, 2008, which the institution did not hold on such date, but the basis of which in the hands of the institution at the time of the sale or exchange is the same as the basis in the hands of the person which held such stock on such date, or
- (2) the financial institution is a partner in a partnership which either (a) held such stock on September 6, 2008, and later sold or exchanged such stock, or (b) sold or exchanged such stock after September 6, 2008.ⁿ¹³

This relief provisions applies only to corporations. Noncorporate taxpayers will continue to be able to deduct these losses only to the extent of gains (plus \$3,000 in the case of individual taxpayers), with the excess losses carried forward to future years.

(n1)Footnote 1. *IRC § 1222(8)*.

(n2)Footnote 2. *IRC § 1222(5)*.

(n3)Footnote 3. *IRC § 1222(6)*.

(n4)Footnote 4. *IRC § 1222(11)*.

(n5)Footnote 5. *IRC § 1222(10)*.

(n6)Footnote 6. *IRC § 1222(10)*.

(n7)Footnote 1. *IRC § 1202* prior to its repeal by the Tax Reform Act of 1986.

(n8)Footnote 2. *IRC § 1(h)*. Notice 2004-39, 2004-1 CB 982, provides guidance to regulated investment companies, real estate investment trusts, and their shareholders in applying *IRC § 1(h)* to capital gain dividends of the entities.

(n9)Footnote 3. Jobs and Growth Tax Relief Reconciliation Act of 2003, § 303. The rates revert to pre-2003 rates for taxable years beginning after Dec 31, 2010.

(n10)Footnote 4. Transitional rules are provided for years that include May 6, 2003.

(n11)Footnote 5. *IRC § 1(h)(1)(B)*. For years 2003-2010, adjusted net capital gain is increased by the amount of qualified dividend income.

Adjusted net capital gain must be reduced by the amount of such gain that the taxpayer elects to treat as investment income for purposes of *IRC § 163(d)(4)(B)*.

(n12)Footnote 6. *IRC § 1(h)(3)*. Generally, collectibles gain is gain from the sale of any work of art, any rug or antique, any metal or gem, any stamp or coin, or any alcoholic beverage. *IRC §§ 1(h)(5)(A), 408(m)(2)*.

Any gain from the sale of an interest in a partnership, S corporation, or trust that is attributable to unrealized appreciation in the value of collectibles is treated as gain from the sale of a collectible. *IRC § 1(h)(5)(B)*. Rules similar to the rules of *IRC § 751* apply for this purpose.

For stock acquired before Dec 22, 2000, *IRC § 1202* gain is an amount equal to the gain excluded from gross income under *IRC § 1202(a)*. For stock acquired after Dec 21, 2000, *IRC § 1202* gain is the excess of (a) the gain that would be excluded from gross income under *IRC § 1202* but for the percentage limitation in *IRC § 1202(a)*, over (b) the gain excluded from gross income under *IRC § 1202*. *IRC § 1(h)(7)*.

(n13)Footnote 7. *IRC § 1(h)(1)(C)*.

(n14)Footnote 8. Regulations provide that, if capital gain from an installment sale of real property includes unrecaptured Section 1250 gain taxed at 25 percent as well as capital gain taxed at 15 or 5 percent, the taxpayer must account for the 25-percent gain before any of the 15- or 5-percent gain is included in income. *Treas Reg § 1.453-12(a)*.

The regulations also provide that Section 1231 gain from an installment sale that is recharacterized as ordinary income under either *IRC § 1231(a)* or *IRC § 1231(c)* is deemed to consist first of 25-percent gain and then of 15- or 5-percent gain.

(n15)Footnote 9. *IRC § 1(h)(4)*.

(n16)Footnote 10. *Notice 97-59, 1997-2 CB 309*. See *Notice 98-20, 1998-1 CB 776*, for use of the netting rules in determining how a charitable remainder trust characterizes capital gain distributions. *Notice 98-20*, modified, *Notice 99-17, 1999-1 CB 871*, to reflect later legislative changes.

(n17)Footnote 11. *Treas Reg § 1.1(h)-1(b)(1)*. In determining whether a partnership, S corporation, or trust has gain from collectibles, the partnership, corporation or trust shall be treated as owning its proportionate share of any partnership, S corporation, or trust in which it owns an interest directly or indirectly through a chain of such entities. This tiered-entity rule also applies with respect to Section 1250 capital gain of a partnership. *Treas Reg § 1.1(h)-1(d)*.

(n18)Footnote 12. *Treas Reg § 1.1(h)-1(b)(2)(ii), (3)(ii)*. The rules do not apply to a transaction that is treated, for federal income tax purposes, as a redemption of an interest in a partnership, S corporation, or trust.

(n19)Footnote 13. *Treas Reg § 1.1(h)-1(c)*.

If less than all of the realized gain is recognized upon the sale of the interest, the same methodology applies to determine the collectibles gain recognized by the transferor, except that the partnership, S corporation, or trust is treated as transferring only a proportionate amount of each of its collectibles determined as a fraction that is the amount of gain recognized in the sale or exchange over the amount of gain realized in the transaction. *Treas Reg § 1.1(h)-1(b)(2)(ii)*. The same calculation is made when there is Section 1250 gain and not all of the gain is recognized upon the sale or exchange of a partnership interest. *Treas Reg § 1.1(h)-1(b)(3)(ii)*.

(n20)Footnote 14. *IRC § 1(h)(11)(A), (B)(i)*. Rules similar to the rules contained in *IRC § 904(b)(2)(B)* (capital gain rate differential) apply in determining any limitation on the foreign tax credit for dividends received from a foreign corporation. *IRC § 1(h)(11)(C)(iv)*. See § 20.02[4][e][i] for a discussion of *IRC § 904(2)(b)(B)*.

The Service has determined that it is appropriate for a partner of an electing large partnership to take into account separately the partner's distributive share of the partnership's dividends received that are qualified dividend income. *Notice 2004-5, 2004-1 CB 489*.

(n21)Footnote 15. This was a part of the US Troop Readiness, Veterans' Care, Katrina Recovery, Iraq Accountability Appropriations Act (Pub L No 110-28, May 25, 2007)

(n22)Footnote 16. The Obama Administration's revenue proposals for the Government's fiscal year 2010 would make permanent the taxation of qualified dividend income at net capital gains rates and retain the zero and 15 percent capital gains brackets for taxpayers with incomes up to \$250,000 (\$200,000 in the case of single taxpayers). However, beginning in the calendar year 2011 and future years, a new maximum capital gains rate of 20 percent would apply to taxpayers with incomes in excess of those amounts. See General Explanations of the Administration's Fiscal Year 2010 Revenue Proposals (Treasury Dept, May 2009).

(n23)Footnote 17. *IRC § 1(h)(11)(B)(ii)*.

(n25)Footnote 19. *IRC § 1(h) ((11)(C)(i)*. *Notice 2006-101, 2006-47 IRB 930*, contains the current list of US tax treaties that meet this requirement.

(n26)Footnote 20. *IRC § 1(h)(11)(C)(ii)*. Common or ordinary stock, or an American depository receipt in respect of such stock, is considered readily tradable on an established securities market in the US if it is listed on a national securities exchange that is registered under § 6 of the Securities Exchange Act of 1934 or on the Nasdaq Stock Market. As of Sept 30, 2002 registered national exchanges include the American Stock Exchange, the Boston Stock Exchange, the Cincinnati Stock Exchange, the Chicago Stock Exchange, the New York Stock Exchange, the Philadelphia Stock Exchange, and the Pacific Exchange, Inc. *Notice 2003-71, 2003-2 CB 922*.

(n27)Footnote 21. *IRC § 1(h)(11)(C)(iii)*. *Notice 2004-70, 2004-2 CB 724*, provides guidance regarding the extent to which distributions, inclusions, and other amounts received by, or included in the income of, individual shareholders as ordinary income from controlled foreign corporations, foreign personal holding companies, foreign investment companies, and passive foreign investment companies may be treated as qualified dividend income.

(n28)Footnote 22. *IRC § 1(h)(11)(D)(i)*.

(n29)Footnote 23. *IRC § 1(h)(11)(D)(ii)*.

(n30)Footnote 24. *IRC § 1(h)(11) (D)(iii)*. Regulated investment companies are the subject of Chapter 12; real estate investment trusts are the subject of Chapter 13.

(n31)Footnote 25. If qualified small business stock is acquired after Dec 21, 2000, in a corporation that is a qualified business entity in an enterprise zone during substantially all of the taxpayer's holding period for the stock, the amount of excluded gain increases to 60 percent. *IRC § 1202(a)(2)(A)*. The provision does not apply to gain attributable to periods after Dec 31, 2014. *IRC § 1202(a)(2)(C)*. The rules were further amended in 2009 to provide that, with respect to any qualified small business stock acquired after February 17, 2009 and before January 1, 2011, the exclusion percentage is increased to 75 percent, whether or not the corporation issuing such stock is engaged in business in an "enterprise zone." See *IRC § 1202(a)(3)*, added by § 1241(a) of the American Recovery and Reinvestment.

The District of Columbia Enterprise Zone is not treated as an empowerment zone for purposes of *IRC § 1202(a)(2)*. *IRC § 1202(a)(2)(D)*.

(n32)Footnote 26. *IRC § 1202(b)(3)(A)*. The limitation is applied on a shareholder-by-shareholder basis. HR Rep

No 213, 103d Cong, 1st Sess 13 (1993).

(n33)Footnote 27. *IRC § 1202(b)(1)*. The adjusted basis of any stock is determined without regard to any addition to basis after the date on which the stock was originally issued. Contributed property is valued at its fair market value on the date of contribution. HR Rep No 213, 103d Cong, 1st Sess 13-14 (1993).

In the case of a joint return, the amount of excludable gain is allocated equally between the spouses for purposes of applying the limitation in subsequent taxable years. *IRC § 1202(b)(3)(B)*.

(n34)Footnote 28. *IRC § 1202(c)(1)*. If property other than money or stock is exchanged for stock, the basis of the acquired stock cannot be less than the fair market value of the property exchanged. *IRC § 1202(i)(1)(B)*. If the adjusted basis of any qualified small basis stock is adjusted by reason of a contribution to capital after the date on which the stock was originally issued, in determining the amount of the adjustment the basis of the contributed property is treated as not less than its fair market value on the date of contribution. *IRC § 1202(i)(2)*.

Stock in a corporation acquired on the conversion of other stock in the corporation that is qualified small business stock in the hands of the taxpayer is treated as qualified small business stock held during the period that the converted stock was held. *IRC § 1202(f)(2)*.

Qualified small business stock acquired by gift, at death, or from a partnership by a partner will also be considered qualified small business stock in the hands of the transferee. *IRC § 1202(h)(1), (2)*. The same holds true for incorporating transfers governed by *IRC § 351* or reorganizations defined in *IRC § 368*, but only to the extent of the gain that would have been realized had the transfer been deemed taxable.

The latter limitation does not apply if the issuing corporation is a qualified small business corporation at the time of the transfer. *IRC § 1202(h)(4)*.

(n35)Footnote 29. *IRC § 1202(c)(3)(A)*; *Treas Reg § 1.1202-2(a)(1)*. For this purpose, stock acquired from the taxpayer or a related person exceeds a *de minimis* amount if the aggregate amount paid for the stock exceeds \$10,000 and more than 2 percent of the stock held by the taxpayer is acquired. In ascertaining whether the 2-percent limit is exceeded, the percentage of stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock held, directly or indirectly, by the taxpayer and related persons immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase. *Treas Reg § 1.1202-2(a)(2)*.

(n36)Footnote 30. *IRC § 1202(c)(3)(B)*; *Treas Reg § 1.1202-2(b)(1)*. Stock exceeds a *de minimis* amount only if the aggregate amount paid for the stock exceeds \$10,000 and more than 2 percent of all outstanding stock is purchased. In ascertaining whether the 2-percent limit is exceeded, the percentage of stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock outstanding immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase. *Treas Reg § 1.1202-2(b)(2)*.

(n37)Footnote 31. *IRC § 1202(c)(3)(C)*.

(n38)Footnote 32. *Treas Reg § 1.1202-2(c)*.

(n39)Footnote 33. *Treas Reg § 1.1202-2(d)*.

(n40)Footnote 34. *IRC § 1202(d)(1)*. The term "aggregate gross assets" means the amount of cash and the aggregate adjusted bases of other property held by the corporation. *IRC § 1202(d)(2)(A)*. The adjusted basis of any property contributed to the corporation (or other property with a basis determined in whole or in part by reference to the

adjusted basis of the property so contributed) is determined as if the basis of the property immediately after the contribution were its fair market value at that time. *IRC § 1202(d)(2)(B)*.

(n41)Footnote 35. *IRC § 1202(d)(3)(A)*. The term "parent-subsidiary controlled group" means any controlled group of corporations as defined in *IRC § 1563(a)(1)*, except that the required ownership level is reduced from 80 percent to 50 percent. *IRC § 1202(d)(3)(B)*.

(n42)Footnote 36. *IRC §§ 1202(c)(2)(A), 1202(e)(1), (4)*. A parent is deemed to own its ratable share of the assets and conduct its ratable share of the business of any subsidiary in which it owns at least 50 percent of all classes of stock entitled to vote or 50 percent in value of all of the outstanding stock of the subsidiary corporation. *IRC § 1202(e)(5)(A), (C)*.

If in connection with any future qualified trade or business, a corporation is engaged in start-up activities described in *IRC § 195(c)(1)(A)*, activities resulting in the payment or incurring of expenditures that can be treated as research and experimental expenditures under *IRC § 174*, or activities with respect to in-house research expenses described in *IRC § 41(b)(4)*, then assets used in such activities are treated as used in the active conduct of a trade or business. *IRC § 1202(e)(2)*.

(n43)Footnote 37. *IRC § 1202(e)(3)*.

(n44)Footnote 38. *IRC § 1202(e)(5)(B)*. Assets are categorized as working capital if held as part of the reasonably required working capital needs of a qualified trade or business, or held for investment and reasonably expected to be used within two years to finance research and experimentation or increases in the working capital needs of a qualified trade or business. *IRC § 1202(e)(6)*.

(n45)Footnote 39. *IRC § 1202(e)(7)*.

(n46)Footnote 40. *IRC § 1202(c)(2)(B)*.

(n47)Footnote 41. *IRC § 1202(g)(2)(A)*.

(n48)Footnote 42. *IRC § 1202(g)(2)(B)*.

(n49)Footnote 43. *IRC § 1202(g)(3)*. In applying the per-issuer limitation of *IRC § 1202(b)*, the taxpayer's proportionate share of the adjusted basis of the pass-through entity in the stock is taken into account.

(n50)Footnote 44. *IRC § 1202(j)(2)*. A taxpayer is treated as holding an offsetting short position with respect to qualified small business stock if such a position is held by any person related to the taxpayer within the meaning of *IRC § 267(b)* or *707(b)*. *IRC § 1202(j)(2)*.

(n51)Footnote 45. *IRC § 57(a)(7)*. For taxable years ending before May 6, 1997, 50 percent of the excluded gain was an item of tax preference.

(n52)Footnote 46. *IRC § 6652(k)*. The penalty is \$50 for each failure to file. It is increased to \$100 if the failure is due to negligence or intentional disregard.

No penalty is imposed on any failure that is shown to be due to reasonable cause and not willful neglect.

(n53)Footnote 47. The replacement stock must meet the active business requirement for qualified small business stock only for the first six months following the purchase. *IRC § 1045(b)(4)(B)*.

Rules similar to the rules contained in *IRC § 1202(f), (g), (h), (i), (j)* and *(k)* apply to *IRC § 1045(a)*. *IRC § 1045(b)(5)*.

(n54)Footnote 48. *IRC § 1045(b)(4)(A)*.

(n55)Footnote 49. *Treas Reg § 1.1045-1(a)*.

(n56)Footnote 50. *Id.*; *Treas Reg §§ 1.1045-1(c)(1)(i), 1.1045-1(g)(3)(i)*.

(n57)Footnote 51. *Treas Reg § 1.1045-1(a)*.

(n58)Footnote 52. *Treas Reg § 1.1045-1(b)(1)*.

(n59)Footnote 53. *Id.*; *Treas Reg § 1.1045-1(b)(4)*.

(n60)Footnote 54. *Treas Reg § 1.1045-1(b)(1)*. The adjusted basis of a partner's interest in a partnership is not increased under *IRC § 705(a)(1)* by gain from a partnership's sale of qualified small business stock that is not recognized by the partner as a result of a partnership election under *IRC § 1045*. *Treas Reg § 1.1045-1(b)(3)(i)*.

(n61)Footnote 55. *Treas Reg § 1.1045-1(b)(2)*.

(n62)Footnote 56. *IRC § 1045(b)(3)*. The basis of a partnership's replacement qualified small business stock is reduced by the amount of gain from its sale of qualified small business stock that is not recognized by a partner as a result of the partnership's election under *IRC § 1045*. *Treas Reg § 1.1045-1(b)(3)(ii)*.

(n63)Footnote 57. *Rev Proc 98-48, 1998-2 CB 367*. A taxpayer with more than one sale of qualified small business stock that qualifies for the election can make the election for any one or more of the sales.

(n64)Footnote 58. *IRC § 1400B(a)*. The legislation is part of the package creating the District of Columbia Enterprise Zone. See *IRC § 1400*. *Notice 98-57, 1998-2 CB 671*, identifies the census tracts in the District of Columbia constituting the District of Columbia Enterprise Zone for purposes of *IRC § 1400* and the DC Zone for purposes of *IRC § 1400B*.

(n65)Footnote 59. *IRC § 1400B(e)(1)*.

(n66)Footnote 60. *IRC § 1400B(e)(2), (3), (4), (5)*. Persons are related if described in *IRC § 267(b)* or *IRC § 707(b)(1)*.

In the case of the sale or exchange of an interest in a partnership, or stock in an S corporation, that was a DC Zone business during substantially all of the period the taxpayer held the interest or stock, the amount of qualified capital gain is determined without regard to any gain attributable to real property, or an intangible asset, that is not an integral part of a DC Zone business, and any gain attributable to periods before January 1, 1998, or after December 31, 2007. *IRC § 1400B(g)*.

(n67)Footnote 61. *IRC § 1400B(b)(1)*. The termination of the designation of the DC Zone is disregarded for purposes of determining whether any property is a DC Zone asset. *IRC § 1400B(b)(5)*.

(n68)Footnote 62. *IRC § 1400B(b)(2)(A)*.

(n69)Footnote 63. *IRC § 1400B(b)(2)(B)*. *IRC § 1202(c)(3)* contains rules relating to purchases by a corporation of its own stock for purposes of the 50 percent gain exclusion for small business stock. Rules contained in *IRC § 1202(g), (h), (i)(2), and (j)* also apply for purposes of *IRC § 1400B*.

(n70)Footnote 64. *IRC § 1400B(b)(3)*. A rule similar to *IRC § 1202(c)(3)* applies for purposes of determining whether a partnership interest is a DC Zone partnership interest.

(n71)Footnote 65. *IRC § 1400B(b)(4)(A)*. Purchase here has the same definition as in *IRC § 179(d)(2)*. In general, this means the property cannot be acquired from a related party or a member of the same controlled group, and cannot have a substituted basis or a basis determined under *IRC § 1014* (property acquired from a decedent).

(n72)Footnote 66. *IRC § 1400B(b)(4)(B)(i)*. Property is treated as substantially improved by the taxpayer only if, during any 24-month period beginning after December 31, 1997, additions to basis with respect to such property exceed the greater of the amount equal to the adjusted basis of the property at the beginning of the 24-month period in the hands of the taxpayer, or \$5,000. *IRC § 1400B(b)(4)(B)(ii)*.

(n73)Footnote 67. *IRC § 1400B(b)(6)*.

(n74)Footnote 68. *IRC § 1400B(b)(7)*.

(n75)Footnote 69. *IRC § 1400B(c)*. See § 17.03[3][c][ii] for a discussion of *IRC § 1397C*.

(n76)Footnote 70. *IRC § 1400F(c)(1), (2)*. Rules similar to those contained in *IRC § 1400B(e)(3), (4), and (5)*, relating to gain that is not qualified gain on the sale or exchange of a DC Zone asset apply here. *IRC § 1400F(c)(3)*. In addition, rules similar to the rules of *IRC § 1400B(b)(5), (6), and (7)*, and *IRC § 1400B(f), and (g)* are also applicable, except that *IRC § 1400B(g)(2)* is applied by substituting Jan 1, 2002, for Jan 1, 1998, and Dec 31, 2014, for Dec 31, 2008. *IRC § 1400F(d)*. See § 2.06[2][a][iii] for a discussion of the provisions relating to sales or exchanges of DC Zone assets.

(n77)Footnote 71. *IRC § 1400F(b)(1)*.

(n78)Footnote 72. *IRC § 1400F(b)(2)(A)*. A rule similar to the rule of *IRC § 1202(c)(3)* is applicable here. *IRC § 1400F(b)(2)(B)*. See § 2.06[2][a][ii] for a discussion of *IRC § 1202(c)(3)*.

A renewal community business is any entity or proprietorship that would be a qualified business entity or qualified proprietorship under *IRC § 1397C* if reference to renewal communities were substituted for references to empowerment zones in that section. *IRC § 1400G*. See § 17.03[3][b][ii] for a discussion of *IRC § 1397C*.

(n79)Footnote 73. *IRC § 1400F(b)(3)*.

(n80)Footnote 74. *IRC § 1400F(b)(4)(A)*. The definition of purchase for this purpose is found in *IRC § 179(d)(2)*.

(n81)Footnote 75. *IRC § 1400F(b)(4)(B)*. Property is substantially improved only if, during any 24-month period beginning after Dec 31, 2001, additions to the basis of the property in the hands of the taxpayer exceed the greater of (i) an amount equal to the adjusted basis of the property at the beginning of the 24-month period in the hands of the taxpayer, or (ii) \$5,000.

(n82)Footnote 76. In determining whether nonrecognition treatment applies, (i) the taxpayer's holding period for the qualified empowerment zone asset that is sold, and for any qualified empowerment zone asset that is acquired during the 60-day period beginning with the sale, is determined without regard to *IRC § 1223*, and (ii) only the first year of the taxpayer's holding period of the asset acquired during the 60-day period is taken into account in considering whether a corporation or partnership qualifies as a renewal community business or property is used in a renewal community business. *IRC § 1397B(b)(5)*.

Rev Proc 2002-62, 2002-2 CB 682, sets forth the procedure for making the election under *IRC § 1397B(a)*.

The District of Columbia Enterprise Zone is not treated as an empowerment zone for purposes of *IRC § 1397B(b)(1)(B)*.

(n83)Footnote 77. *IRC § 1397B(b)(4)*. The reduction is on a first-acquired, first-reduced basis. The reduction does not apply for purposes of *IRC § 1202*.

A taxpayer is treated as having purchased any property if, but for the reduction in basis, the unadjusted basis of the property in the hands of the taxpayer would be a cost basis. *IRC § 1397B(b)(3)*.

(n84)Footnote 78. *IRC § 1397B(b)(2)*.

(n85)Footnote 79. *IRC § 1397B(b)(1) A*.

(n86)Footnote 80. To be allowable as a deduction under *IRC § 165(a)*, a loss must be evidenced by a closed and completed transaction, fixed by an identifiable event or events, and actually sustained during the taxable year. A decline in the value of stock acquired on the open market, even if due to accounting fraud or other illegal misconduct of officers or directors of the corporation, does not result in an allowable deduction unless the stock becomes wholly worthless. *Notice 2004-27, 2004-1 CB 782*.

(n87)Footnote 81. *IRC § 165(f)* limits the deduction to the extent allowed in *IRC §§ 1211 and 1212*.

The Fourth Circuit upheld a conviction for willfully making and subscribing false tax returns on which the taxpayer claimed ordinary losses on securities traded for his own account. Since the taxpayer was not a dealer, the losses were capital losses subject to the limitation on deductibility. *US v Diamond, 788 F2d 1025 (4th Cir 1986)*.

(n88)Footnote 82. The deduction can be taken only by the taxpayer who actually sustains the loss. Therefore, excess capital losses incurred by a decedent before his death do not give rise to a capital loss carryover for his estate. *Rev Rul 74-175, 1974-1 CB 52*. However, an excess loss incurred by one spouse can be carried over and deducted on joint returns. *Ltr Rul 8510053*.

(n89)Footnote 83. *IRC § 1212(b)*, added by the Revenue Act of 1964, Pub L No 88-272, 88th Cong, 2d Sess, § 230(a), became effective for taxable years beginning after Dec 31, 1963. Prior to this amendment any loss carried over was considered a short-term capital loss even if it had been a long-term loss in the year originally sustained. Furthermore, pre-1964 losses could be carried over only to the five succeeding years, not indefinitely, as is now the case.

In determining the extent to which losses carried over are offset by gains realized in the succeeding year, the excess deduction is considered a short-term capital gain. *IRC § 1212(b)(2)*.

The amount of the loss carryover from one carryover year to another is affected by the amount that could have been deducted in the first of the years, even though the taxpayer does not claim a loss deduction in that year. *Rev Rul 76-177, 1976-1 CB 224*. A taxpayer, who did not report a loss in the year in which it was incurred, was entitled to carry over the loss to a subsequent year to offset gains realized in the later year, after adjustment as provided in *Rev Rul 76-177*. *Lang v Commr, TC Memo 1983-318*.

(n90)Footnote 84. The term "net Section 1256 contracts loss" means the lesser of: (1) the net capital loss for the taxable year taking into account only gains and losses from Section 1256 contracts, namely, regulated futures contracts, foreign currency contracts, nonequity options, and dealer equity options; or (2) the amount of any capital loss carryover to the succeeding taxable year. *IRC §§ 1212(c)(4), 1256(b)*.

(n91)Footnote 85. The provision does not apply to estates or trusts. *IRC § 1212(c)(7)(B)*.

An Illinois district court has held that losses from *IRC § 1256* contracts that are part of a mixed straddle can be carried back under *IRC § 1212(c)*. *Roberts v US, 734 F Supp 314 (ND Ill 1990)*.

(n92)Footnote 86. The term "net Section 1256 contracts gain" means the lesser of the capital gain net income for the year taking into account only gains and losses from Section 1256 contracts, or the capital gain net income for the year. The net Section 1256 gain for any taxable year before the loss year is computed without regard to the net Section 1256 contracts loss for the loss year or for any taxable year thereafter. *IRC § 1212(c)(5)*.

(n93)Footnote 87. *IRC § 1212(c)(1), (3)*.

(n94)Footnote 88. *IRC § 1212(c)(6)(A)*.

(n95)Footnote 89. *IRC § 1212(c)(6)(B)*.

(n96)Footnote 1. *IRC §§ 11, 1201(a)*.

(n97)Footnote 2. *IRC § 1211(a)*.

(n98)Footnote 3. *IRC § 1212(a)(1)(A)*. This conforms the treatment of capital losses with that of net operating losses under § 172(b)(1) of the Code.

IRC § 383 may become operative to limit the extent to which capital losses may otherwise be carried over if certain changes occur in the ownership of the corporation.

(n99)Footnote 4. *IRC § 1212(a)(1)(C)(i)*.

(n100)Footnote 5. *IRC § 1212(a)(1)(A)(i)*. The ten-year carryforward is still available for such losses. *IRC § 1212(a)(1)(C)(ii)*.

(n101)Footnote 6. *IRC § 1212(a)(1)(A)(ii)*.

(n102)Footnote 7. *IRC § 1212(a)(3)*.

(n103)Footnote 8. Net capital gain is to be given the meaning set forth in *IRC § 1222(9)*, except when a net capital loss cannot be carried back in full to a preceding taxable year because it would increase or produce a net operating loss; the net capital gain for such prior year shall not be treated as greater than the amount of loss which can be carried back to the year. *IRC § 1212(a)(1)*.

(n104)Footnote 9. This is the procedure followed in the case of net operating losses, *Treas Reg § 1.172-4(a)(3)*, and pre-1970 net capital losses, *Treas Reg § 1.1212-1(a)(1)(ii)*, Ex (a).

CHAPTER 2 Capital Gains and Losses

1-2 Taxation of Securities Transactions § 2.07

§ 2.07 Specific Exceptions to Capital Gain or Loss Treatmentⁿ¹

Although it is generally true that a transaction meeting the requisites for capital gain or loss, i.e., a sale or exchange of a capital asset, will qualify for such treatment, there are a number of situations wherein this does not obtain. For the most part, the exceptions are decreed by specific provision in the Code, but on occasion the result has come about solely through judicial determination.

[1] Imputed Interest.

[a] The Judicial and Administrative Background. If stock having a basis of \$10,000 is sold for \$20,000, the entire purchase price is paid at the time of sale, and the stock is a capital asset in the hands of the seller, it is clear that the taxpayer realizes \$10,000 of capital gain. Suppose, however, that only \$10,000 of the consideration is paid at the time of sale, and that the \$10,000 balance is deferred for ten years. If the deferred payment bears no interest, is the taxpayer's entire \$10,000 gain still capital gain?

Alternatively, suppose a taxpayer loans \$1,000 to a borrower on January 1, 2010 and takes back a non-interest bearing note with a face value of \$1,060 payable on January 1, 2011. If the taxpayer receives payment of \$1,060 at maturity, is the \$60 profit capital gain?ⁿ¹

The answer is no, because the taxpayer's apparent "gain" in both these cases is actually interest, "compensation for the use or forbearance of [the taxpayer's] money."ⁿ² As the Supreme Court said in *United States v Midland-Ross Corp.*,ⁿ³ "[u]nlike the case of capital appreciation, the earning of discount to maturity is predictable and measurable, and is 'essentially a substitute for ... [interest] payments which [the predecessor of *IRC Section 61(a)*] expressly characterizes as gross income [; thus] it must be regarded as ordinary income, and it is immaterial that for some purposes the contract creating the right to such payments may be treated as 'property' or 'capital.'" *Hort v Commissioner* ... "ⁿ⁴

Accordingly, even before the subject was dealt with by statute, administrative and judicial doctrine reclassified capital gains as taxable interest when it was obviously appropriate to do so from the standpoint of economic reality.ⁿ⁵ However, statutory authority was needed to go beyond the relatively straightforward situations in which the taxpayer sells a noninterest bearing obligation acquired for less than face value, or sells an interest-bearing obligation between interest dates.ⁿ⁶ Congress addressed an entire range of imputed interest issues in a complex statutory scheme in which the two most important Code provisions--from the standpoint of our immediate interest in when interest may be imputed in place of capital gain on the sale or exchange of a capital asset--are *IRC Section 1274*ⁿ⁷ and *IRC Section 483*

.n8

[b] The Statutory Framework. Neither *IRC Section 1274* nor *IRC Section 483* expressly converts capital gain into ordinary income.ⁿ⁹ These and associated provisions instead identify sales or exchanges of property in which deferred payments of the sale price include imputed interest, measure the amount of imputed interest, and prescribe the method of accounting by which such imputed interest is recognized as interest income. For present purposes, it is key that imputed interest is removed entirely from the "amount realized" on the sale or exchange of a capital asset by the seller under *IRC Section 1001* and is instead reported as interest income under *IRC Section 61*.ⁿ¹⁰ Similarly, to the extent payments are reclassified as imputed interest, the purchaser may not treat the reclassified amounts as part of the basis of the asset acquired, although the imputed interest may be deductible under *IRC Section 163*.ⁿ¹¹

The Code's critical contribution to the imputed interest doctrine is its introduction of a standard interest rate--the "applicable federal rate" or "AFR"--by means of which taxpayers can determine whether and to what extent debt instruments issued for property include imputed interest. The AFR is a conservative baseline--calculated on the basis of the average market yield each month on outstanding marketable obligations of the United States--which does not require adjustments for such factors as the creditworthiness of the borrower or the marketability of the particular debt instrument being tested for imputed interest.ⁿ¹² One of three AFRs must be used: a Federal short-term rate, to test debt instruments with a term of 3 years or less; a Federal mid-term rate, for debt instruments with terms of over 3 but not over 9 years, and a Federal long-term rate, for debt instruments with a term in excess of 9 years.ⁿ¹³

In general, imputed interest is taken into account in a sale or exchange of property whenever one or more payments are deferred and the contract of sale or the debt instrument issued pursuant thereto either fails to provide for interest or bears interest at a rate lower than the relevant AFR. When the stated rate of interest is inadequate, imputed interest is generally equal to the excess of the sale price stated in the contract over the present value of the right to receive, as of the date of sale, all amounts payable under the contract (including any stated interest), using the AFR as the discount rate to determine present value.ⁿ¹⁴ Imputed interest is generally recognized over the term of the debt instrument rather than in a lump sum, but the exact timing depends on whether the transaction falls within the jurisdiction of *IRC Section 1274* or *IRC Section 483*. If determined under *IRC Section 1274*, imputed interest is taken into account as earned, regardless of the taxpayer's regular method of accounting or when payments on the debt instrument are actually made.ⁿ¹⁵ If determined under *IRC Section 483*, a portion of the imputed interest is allocated to each deferred principal payment called for in the contract or note, and taken into account in accordance with the taxpayer's regular method of accounting--either when the payment comes due (accrual method taxpayers) or when it is actually or constructively received (cash method taxpayers).ⁿ¹⁶

Example:

On December 31, 2010 a taxpayer sells nonpublicly traded securities held for more than one year with a basis of \$9 million for a sales price of \$10 million. The price is payable in a lump sum, without interest, on December 31, 2012, but payment is not actually nor constructively received by the taxpayer until January 2, 2013. Assume that on December 31, 2010 the present value of the right to receive \$10 million on December 31, 2012, calculated using a discount rate equal to the short-term AFR for December, 2010, is \$9,800,000. The excess of the stated sales price over the present value of the right to receive \$10 million in two years is \$200,000, and this is all imputed interest. If the imputation is made under *IRC Section 1274*, the interest must be reported as earned, \$100,000 in 2011 and \$100,000 in 2012. See *IRC Section 1272*. If the imputation is made under *IRC Section 483*, the entire \$200,000 is allocated to lump sum payment of \$10 million due December 31, 2012. If the taxpayer is on the accrual basis, all \$200,000 of imputed interest under *IRC Section 483* is reportable in 2012 when the lump sum payment is due. If the taxpayer is on the cash basis, all of the imputed interest is reportable when the single payment is received in 2013. In any case, the amount the taxpayer may report as long-term capital gain on the sale of the securities is reduced from \$10 million to \$9,800,000.

[c] Testing for and Measuring Imputed Interest in Debt-Financed Sales and Exchanges.

[i] The OID Rules (IRC Sections 1271-1275). The rules for testing for and measuring imputed interest in a debt-financed sale of property are substantially the same whether the tax consequences of finding imputed interest are determined under *IRC Section 1274* or *IRC Section 483*.ⁿ¹⁷ Since the original issue discount ("OID") rules (including *IRC Section 1274*) take precedence over *IRC Section 483* except in those cases in which a transaction is specifically excepted from the operation of the OID rules,ⁿ¹⁸ and since *IRC Section 483* generally follows the OID rules for testing and measuring imputed interest even when it is applicable,ⁿ¹⁹ we begin by examining the mechanics of the OID rules.

IRC Section 1274 is found in Subpart A ("Original Issue Discount") of Part 5 ("Special Rules for Bonds and Other Debt Instruments") of Subchapter P ("Capital Gains and Losses") of the Internal Revenue Code. Although Subpart A is confined to OID on "debt instruments," that term is broadly defined to encompass not just bonds, debentures, and notes commonly thought of as debt instruments but any other "evidence of indebtedness."ⁿ²⁰ By regulation, any "contractual arrangement that constitutes indebtedness under general principles of Federal income tax law" is an "evidence of indebtedness" that can be a "debt instrument," whether or not the contractual obligation is expressed in the traditional form of a bond or note.ⁿ²¹ It is important to keep in mind, therefore, that any sale or exchange of a capital asset in which payment of the purchase price is deferred in whole or in part is potentially covered by the OID provisions of Subpart A, whether or not the deferred portion of the purchase price is physically evidenced by a note or other type of security.

OID is defined as "the excess (if any) of--(A) the stated redemption price at maturity, over (B) the issue price."ⁿ²² The stated redemption price at maturity is the same as the stated principal amount or face value of the debt instrument as long as all other payments under the instrument are "qualified stated interest" payments; *i.e.*, payments unconditionally due at least annually that are calculated at a single fixed interest rate.ⁿ²³ The issue price, generally speaking, is the price paid to the issuer for the debt instrument.ⁿ²⁴ Determining the issue price is relatively straightforward when a debt instrument is issued for cash,ⁿ²⁵ or the property for which the debt instrument is issued (or the debt instrument itself) is publicly traded.ⁿ²⁶ Matters become more complex when a non-publicly traded debt instrument is issued in connection with a sale or exchange of non-publicly traded property. This is where *IRC Section 1274*, titled "Determination of issue price in the case of certain debt instruments issued for property," becomes applicable.ⁿ²⁷

The Regulations provide that a debt instrument is not subject to the OID rules as long as the excess of its stated redemption price at maturity over the issue price is less than a "de minimis amount."ⁿ²⁸ To qualify as *de minimis*, the excess may not exceed 0.0025 (1/4 of 1 percent) multiplied by the product of the instrument's stated price at maturity and the number of complete years to maturity calculated from the issue date.ⁿ²⁹ For example, the *de minimis* amount of OID on a \$10,000 note payable in 5 years would be \$125 ($.0025 \times \$10,000 \times 5$).ⁿ³⁰ If a seller received a 5-year \$10,000 note on which OID was \$124 or less, no part of the sales price would be reclassified as imputed interest.ⁿ³¹

The issue price of a nonpublicly traded debt instrument issued in exchange for nonpublicly traded property is the same as its stated principal amount as long as the debt instrument provides for "adequate stated interest."ⁿ³² If stated interest is not "adequate," the issue price is its "imputed principal amount,"ⁿ³³ defined as an amount equal to the sum of the present values of all payments due under the debt instrument, including payments of stated interest,ⁿ³⁴ determined as of the date of the sale or exchange using a discount rate equal to the applicable Federal rate or AFR.ⁿ³⁵ A debt instrument provides for adequate stated interest if its stated principal amount is less than or equal to its imputed principal amount.ⁿ³⁶ The AFR is key to determining (a) whether a debt instrument has adequate stated interest and (b) if not, its issue price (*i.e.*, its imputed principal amount).

Application of *IRC Section 1274* can result in a finding of OID even when the AFR indicates that the debt instrument has adequate stated interest. This is due to the fact that the OID provisions are concerned not only with reclassifying as imputed interest payments that are nominally designated as principal, but also with assuring that stated interest, as well as OID, accrues in an economically appropriate manner, with lender and borrower taking account of both types of

interest on a consistent and economically rational basis. To accomplish the latter goal, the OID provisions may reclassify stated interest as OID whether or not an instrument provides for an adequate amount of interest in total, so that stated interest and OID accrue for tax purposes in a more economically realistic manner than the stated interest provided in the debt instrument. As long as interest is adequate in total, however, the issue price of the instrument will be equal to the instrument's stated principal amount, and the "amount realized" by the seller will not be affected. n36.1

[ii] The Test Rate. The first step in finding the appropriate test rate is to determine which AFR applies to the debt instrument in question--the short-term, mid-term or long-term rate. This requires calculating the term of the debt instrument to which the test rate is to be applied, normally a simple process.ⁿ³⁷ It becomes more complex when principal payments are made throughout the term of the instrument, as in an installment obligation, or when principal or interest payments are subject to contingencies.

In the case of an installment obligation,ⁿ³⁸ the term of the debt instrument is deemed to be its "weighted average maturity." This is the sum of the following amounts, determined for each payment under the instrument other than a payment of qualified stated interest--

- (1) The number of complete years from the issue date of the instrument until the payment is due; multiplied by
- (2) A fraction, the numerator of which is the amount of the payment and the denominator of which is debt instrument's stated redemption price at maturity.ⁿ³⁹

Assume, for example, that a debt instrument is issued for property on December 31, 2010 in the face amount of \$100,000, of which \$60,000 is payable in 2 years, and \$40,000 in 6 years. The weighted average maturity of the instrument would be 3.6 years ($2 \times 60\% = 1.2$ yrs) + ($6 \times 40\% = 2.4$ years). Consequently, the AFR would be based on the mid-term rate.

Note that the result would be the same if, instead of issuing a single debt instrument payable in 2 installments, the issuer instead issued two notes, one for \$60,000 payable in 2 years and the other for \$40,000 payable in 6 years. Under an "aggregation rule," debt instruments issued in connection with the same transaction or related transactions (determined based on all the facts and circumstances) are ordinarily treated as a single debt instrument for purposes of *IRC Sections 1271 through 1275* and the regulations thereunder.ⁿ⁴⁰ In other words, the parties may not apply the short-term AFR in determining the present value of the \$60,000 payment and the mid-term AFR in determining the present value of the \$40,000 payment.

If a debt instrument provides for principal payments that are fixed in total amount but uncertain as to time, the term of the instrument, and therefore the term of the AFR to be applied to that instrument, is determined by reference to the latest possible date on which a principal payment can be made or, in the case of an installment obligation, by reference to the longest weighted average maturity under any possible payment schedule.ⁿ⁴¹ For example, if a holder of a debt instrument with a 5 year term has an option to renew the debt for an additional 5 years, the term of the debt instrument is 10 years and the AFR is the long-term rate.

Finally, the regulations provide that in the case of a "variable rate debt instrument" that provides for stated interest at a "qualified floating rate,"ⁿ⁴² the term of the instrument is determined by reference to the longest interval between interest adjustment dates, or, if the variable rate debt instrument also provides for a fixed rate, the interval between the debt instrument's issue date and the last day on which the fixed rate applies, if longer.ⁿ⁴³ However, the variable rate debt instrument's stated term is used if variations in the qualified floating rate are subject to significant restrictions so that "the rate in substance resembles a fixed rate."ⁿ⁴⁴

Once the AFR term is established, the next step is to find the AFR for that term that corresponds to the compounding

period used in the debt instrument to which it will be applied. The statutory OID rules provide that, in computing the imputed principal amount of a debt instrument, the present value of payments called for in that instrument are to be discounted at the AFR "compounded semiannually."ⁿ⁴⁵ However, comparing an AFR compounded semiannually with a debt instrument's stated rate of interest that is compounded more or less frequently than semiannually would be like comparing the proverbial apples and oranges, since the more frequently interest is compounded the higher the actual return will be.ⁿ⁴⁶ Published AFRs issued monthly by the IRS therefore show, for short-term, medium-term and long-term rates, rates compounded on an annual, quarterly, and monthly as well as semiannual basis. The regulations require that the AFR selected be "based on the appropriate compounding period."ⁿ⁴⁷

The "test rate," the AFR ultimately used, is also designated the "3-month rate" in the statute. The "3-month rate" is the lowest AFR appropriate to the term and compounding period of the debt instrument in any month (1) during the 3-month period ending with the first month in which there is a binding written contract substantially setting forth the terms under which the sale or exchange providing for the issuance of the debt instrument is ultimately consummated, or (2) during the 3-month period ending with the month in which the sale or exchange occurs.ⁿ⁴⁸ Assuming there was a binding written contract for the sale or exchange, AFRs for up to six months may have to be compared to determine the test rate, although as a practical matter the two three-month periods will often substantially overlap. For example, if a binding contract for a sale was entered in January, 2011 and the sale was actually consummated in March, 2011, the test rate would be the lowest appropriate AFR in effect during any of the five months from November, 2010 through March, 2011.

Further adjustments to the test rate may be required under certain circumstances. For example, when the debt instrument is given as consideration for the transfer of property, and the transferor of the property, or any related person, pursuant to a plan, leases back a portion of the property transferred, the test rate must be increased to 110 percent of the 3-month rate.ⁿ⁴⁹

Of potentially wider significance, at least when interest rates are high, is the statutory ceiling on the test rate of 9 percent per annum, compounded semiannually, for "qualified debt instruments" within the meaning of *IRC Section 1274A*.ⁿ⁵⁰ In general, a qualified debt instrument is one issued for propertyⁿ⁵¹ with a stated principal amount that does not exceed a maximum that was originally set at \$2,800,000 but is adjusted annually for inflation in accordance with *IRC Section 1274A(d)*.ⁿ⁵² The maximum stated principal amount of a qualified debt instrument issued in 2010 is \$5,115,100.ⁿ⁵³ No adjustment to the test rate is required, of course, when the AFR is below 9 percent.

[iii] Applying the Test Rate to Debt Instruments with Stated Interest Unconditionally Payable at a Single, Fixed Rate. Once a test rate is determined, it may be possible, without present value calculations, to determine by means of a comparison between the stated interest rate and the test rate whether a portion of the principal amount of a debt instrument must be reclassified as imputed interest for tax purposes. Under the regulations, "if a debt instrument has a single fixed rate of interest that is paid or compounded at least annually, and that rate is equal to or greater than the test rate, the debt instrument has adequate stated interest."ⁿ⁵⁴ As we have seen, a debt instrument may have adequate stated interest and still have OID.ⁿ⁵⁵ Nevertheless, any OID determined in such a case will not result in an adjustment to the amount realized, the capital gain or loss recognized, or the basis of property acquired in the sale or exchange of the capital asset for which the debt instrument was issued. This follows because the issue price of a debt instrument determines the amount realized on the sale as well as the basis of the property sold,ⁿ⁵⁶ and the issue price of a debt instrument with adequate stated interest is the same as its stated principal amount.ⁿ⁵⁷

The regulations also provide that *IRC Section 1274* does not apply to a debt instrument, and it will therefore have no OID, if the test rate is less than or equal to the instrument's stated rate of interest and the following three conditions are met.ⁿ⁵⁸

- (1) All interest payable on the instrument is qualified stated interest. Note that although an instrument may have adequate stated interest as long as interest is compounded no less frequently than annually,ⁿ⁵⁹

to be qualified stated interest, so that the debt instrument qualifies for complete exclusion from *IRC Section 1274*, the interest must actually be payable no less frequently than annually. Also, a debt instrument that provides interest at a variable interest rate would not have qualified stated interest unless the instrument was a variable rate debt instrument with a qualified floating rate, as discussed below.

(2) The debt instrument is not issued in a "potentially abusive situation."ⁿ⁶⁰ In such situations, the test rate is disregarded and the issue price of the debt instrument is the fair market value of the property for which it is exchanged, adjusted to take into account any other consideration involved in the transaction.ⁿ⁶¹ A "potentially abusive situation" is defined as a "tax shelter"ⁿ⁶² or any other situation which by reason of (1) recent sales transactions, (2) nonrecourse financing,ⁿ⁶³ (3) financing with a term in excess of the useful life of the property, or (4) a debt instrument with clearly excessive interest,ⁿ⁶⁴ (5) of a type identified by regulations as having a potential for tax avoidance.ⁿ⁶⁵

(3) No payment from the buyer-borrower to the seller-lender designated as points or interest is made at the time of issuance of the debt instrument. If the buyer pays points, the amount so paid is deducted from the stated principal amount of the debt instrument as though the buyer was only loaned the net amount. The issue price is therefore reduced by the points paid, while the stated price at maturity remains the same, with the difference treated as OID.ⁿ⁶⁶

In summary, when a nonpublicly traded debt instrument issued in exchange for nonpublicly traded property provides only qualified stated interest, present value calculations will ordinarily be necessary only if the test rate is greater than the stated rate of interest. In the latter case, present value calculations will be required to determine the issue price of the debt instrument (the "imputed principal amount") and consequently the amount of OID. The following section considers the special issues raised when a debt instrument provides stated interest that is not qualified stated interest either because the rate of interest is not at a single, fixed rate, or because one or more payments are subject to contingencies.

[iv] Applying the Test Rate to Debt Instruments when Stated Interest is Not at a Single, Fixed Rate. If the debt instrument's stated interest rate is a fixed rate that changes during the instrument's term, interest payments will not be considered "qualified stated interest" to the extent they exceed the amount of interest payable at the minimum rate applicable in any accrual period.ⁿ⁶⁷ Any "non-qualified" stated interest must be added to the instrument's stated redemption price at maturity for purposes of determining the amount, if any, by which such stated redemption price exceeds the instrument's issue price; *ie*, whether and to what extent the debt instrument includes OID.ⁿ⁶⁸

Example:

A debt instrument with a principal amount of \$100,000, payable in 3 years, provides for interest payable at the end of each year at a rate of 1 percent in the first year, 2 percent in the second year, and 6 percent in the third year. The interest payments in the second and third years are not "qualified stated interest" to the extent they exceed 1 percent of the principal amount (\$1,000), the minimum interest rate unconditionally payable in every accrual period during the instrument's term. Accordingly, interest payments of \$1,000 (\$2,000-\$1,000) at the end of year 2, and \$5,000 (\$6,000-\$1,000) at the end of year 3 must be added to the stated redemption price at maturity in calculating whether the instrument has OID.

Suppose a debt instrument provides for changes in the rate of interest during the term of the instrument, but instead of the rates being fixed in the debt instrument, they are wholly or partially dependent on an outside event, such as the percentage change in an index. In that event, calculation of the debt instrument's imputed principal amount as of its issue date is impossible because the future values of some of the payments to be made under the instrument are unknown as of the issue date.

The OID Regulations offer two possible solutions to this dilemma when the debt instrument is not

publicly traded and is issued in a sale or exchange for nonpublicly traded property. The first, and most favorable, solution applies only if the debt instrument meets all the conditions requisite to classification as a "variable rate debt instrument," including the requirement that contingent interest must be set in accordance with a "qualified floating rate."ⁿ⁶⁹ In that case, the Regulations provide that, for purposes of calculating the instrument's imputed principal amount, the amount of each future interest payment is determined on the assumption that the value of the qualified floating rate on the date such interest payment becomes fixed will be the same as the value of the qualified floating rate (a) on the the sale or exchange date, or (b) the first date on which there is a binding written contract for the sale or exchange, whichever value is greater.ⁿ⁷⁰ In effect, "the rules convert the debt instrument into a fixed rate instrument and then apply the general OID rules to the debt instrument [as discussed in § 2.07[1][c][iii], *supra*]."ⁿ⁷¹ The second, and significantly less favorable, solution applies to all other contingent payments: such payments are disregarded until actually made, and the debt instrument's issue price is determined solely with reference to the instrument's noncontingent payments.ⁿ⁷² The two solutions can have widely disparate tax consequences.ⁿ⁷³

In general, a debt instrument the issue price of which is determined under *IRC Section 1274* will only be considered a "variable rate debt instrument" if (1) all of its stated interest is determined by one or more qualified floating rates, or by a single fixed rate and one or more qualified floating rates; (2) the qualified floating rate in effect at any time during the term of the instrument must be set at a "current value" of that rate--i.e., determined no earlier than 3 months prior to the first day on which that value is in effect and no later than 1 year following that first day; (3) there are no contingent principal payments under the instrument; and (4) if the instrument is issued at a premium, the premium does not exceed a specified limit.ⁿ⁷⁴

A variable rate of interest is a "qualified floating rate" if variations in the value of the rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which the debt instrument is denominated, either for the issuer of the debt instrument or for issuers in general.ⁿ⁷⁵ The prime rate of a bank,ⁿ⁷⁶ the current interest rate of a bank's commercial paper,ⁿ⁷⁷ the London Interbank Offer Rate (LIBOR),ⁿ⁷⁸ and the average yield on 1-year Treasury securities as published in Federal Reserve bulletinsⁿ⁷⁹ are all offered by the regulations as examples of rates that can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds. On the other hand, rates based on changes in the value of a commodity index,ⁿ⁸⁰ on a percentage of the S&P 500 Index,ⁿ⁸¹ on changes in the value of French franc LIBOR if used in a dollar-denominated debt instrument,ⁿ⁸² or a rate based on a percentage of the profits earned by the issuer in the preceding year,ⁿ⁸³ are examples of rates that are not qualified floating rates because they cannot reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds.ⁿ⁸⁴

A multiple of a floating rate cannot be a qualified floating rate unless the multiple is not less than .65 and not more than 1.35 of the value of the floating rate.ⁿ⁸⁵ Further, a variable rate is not a qualified floating rate if it is subject to a maximum stated interest rate (cap), minimum stated interest rate (floor), restriction on the amount of increase or decrease in the stated interest rate (governor), or other similar restriction, unless the cap, floor or governor is either fixed throughout the term of the debt instrument, or is not reasonably expected as of the issue date to cause the yield on the debt instrument to be significantly higher or lower than it would have been without the restriction.ⁿ⁸⁶

When the debt instrument's interest payments are contingent but not determined by application of a qualified floating rate, imputed interest is calculated and taken into account under the provisions applicable to "contingent payment debt instruments" in *Treasury Regulation Section 1.1275-4*.ⁿ⁸⁷ Those provisions require that the contingent payment debt instrument (also referred to as the overall debt instrument) be broken up into separate components. All noncontingent payments provided for in the

overall debt instrument are treated as a single component, while each contingent payment is treated as a separate component.ⁿ⁸⁸ The single noncontingent component is treated as a separate debt instrument, the issue price of which is the issue price of the overall debt instrument, determined under *Treasury Regulation Section 1.1274-2(g)*.ⁿ⁸⁹ In the determination of OID for this component, no noncontingent interest payment can be considered qualified stated interest, and the rules regarding de minimis OID do not apply.ⁿ⁹⁰

The tax treatment of each of the contingent components is not determined until payment with respect to that component is actually made. The portion of the payment attributable to principal is deemed equal to the present value of the amount actually paid, discounted back from the actual payment date to the date the overall debt instrument was issued using as the discount rate the overall debt instrument's test rate as of the issue date.ⁿ⁹¹ The excess of the payment over the principal portion is treated as regular interest, not OID, and is taken into account on the cash basis by both the holder and the issuer in the year the payment is made.ⁿ⁹²

Example:

A owns unencumbered real estate known as Blackacre. On January 1, 2011, A sells Blackacre to B. As consideration for the sale, B makes a down payment of \$1 million to A and issues a debt instrument that matures on December 31, 2015. The debt instrument provides for a payment of principal at maturity of \$5 million and a contingent payment of interest on December 31 of each year equal to a fixed percentage of the gross rents B receives from Blackacre in that year. Assume that on January 1, 2011 the short-term applicable Federal rate is 5 percent, compounded annually, and the mid-term applicable Federal rate is 6 percent, compounded annually.

(1) Assume that the present value, as of the issue date, of A's right to receive the debt instrument's \$5 million noncontingent payment in 5 years, discounted at the mid-term AFR of 6 percent in effect on the instrument's issue date, is \$ 3,736,291. This is the issue price of both the overall debt instrument, see *Treasury Regulation Section 1.1274-2(g)*, and the separate debt instrument consisting of the only noncontingent payment provided for in the overall debt instrument. See *Treasury Regulation Section 1.1275-5(c)(3)*. Accordingly, the amount realized by A on the sale of Blackacre, as well as B's basis in Blackacre, is \$4,736,291 (the \$3,736,291 issue price of the separate debt instrument plus B's \$1,000,000 down payment). A must recognize OID (and B may be entitled to interest deductions in an equivalent amount under *IRC Section 163*) in the total amount of \$1,263,709 (\$5,000,000 - \$3,736,291) under the OID accounting rules over the 5 year term of the separate debt instrument.

(2) Assume that the amount of contingent interest (the percentage of rent collected by B in 2011), fixed and paid on December 31, 2011, is \$200,000. This payment is deemed to consist in part of principal in the amount of \$ 190,476, the present value of the \$200,000 payment made on December 31, 2011, discounted to January 1, 2010 using a discount rate of 5 percent, the test rate for the overall debt instrument (the short-term AFR) had its maturity been 1 year instead of 5 years. See *Treasury Regulation Section 1.1275-4(c)(4)(ii)(B)*. The remaining \$9,524 is considered interest. B may add the principal amount of the payment to her basis in Blackacre, and, if she uses a calendar year, may deduct the \$9,524 as interest subject to the limitations of *IRC Section 163*. A, if on the calendar year, must include \$9,524 of interest income in 2011, in addition to the amount includible as OID on the overall debt instrument for that year.

[v] Applying the Test Rate when Imputed Interest is Determined Under *IRC Section 483*. *IRC Section 483* applies to sales and exchanges of propertyⁿ⁹³ if the contract of sale provides for one or more deferred payments due more than one year after the date of the sale or exchange, and none of the exceptions to its application apply to the

transaction.ⁿ⁹⁴ When *IRC Section 483* is applicable, deferred payments due more than six months after the date of the sale or exchange must be tested to determine if the contract provides for "total unstated interest," the term used in *IRC Section 483* to describe imputed interest. A contract has total unstated interest if and to the extent that:

- (1) the sum of the deferred payments due more than six months from the date of the sale or exchange exceeds
- (2) the sum of the present values of such payments and the present values of any interest payments due under the contract.ⁿ⁹⁵

The subtrahend in the above equation is, except for its exclusion of the present values of payments made within six months of the sale or exchange, equivalent to the imputed principal amount which determines the issue price of a debt instrument under *IRC Section 1274*. Moreover, *IRC Section 483(b)* provides that "the present value of a payment shall be determined under the rules of [*IRC Section 1274(b)(2)*] using a discount rate equal to the applicable Federal rate determined under [*IRC Section 1274(d)*]." ⁿ⁹⁶ Thus, the methodologies of section 1274 and 483 are nearly identical.

There are a few minor differences. As noted above, *IRC Section 483* does not apply to deferred payments of the sales price made six months or less from the date of sale. In applying the unstated interest formula, such deferred principal payments are excluded from both the sales price and present value sides of the equation. However, *IRC Section 483(b)* provides that the present value factor includes, in addition to the present values of principal payments made more than six months from the date of sale, "the present values of *any* interest payments due under the contract." (Emphasis added.) Interest payments called for in the first six months of the contract (as opposed to deferred payments of the sales price itself) are therefore included in the present value calculation, even though they are allocable to deferred principal payments made during the first six months which are completely excluded from the formula. This lack of symmetry effectively raises the rate of return on the included (due in more than six months) principal payments, making it slightly easier to avoid or reduce imputed interest under *IRC Section 483* as compared with *IRC Section 1274*.ⁿ⁹⁷

IRC Section 483 applies to contracts with one or more deferred payments due more than one year from the date of sale, whether or not indebtedness under the contract is evidenced by a debt instrument issued in connection with the sale. *IRC Section 1274(c)*, on the other hand, is on its face more limited, since it is applicable only to a "debt instrument" given in consideration for the sale of property, which *IRC Section 1275(a)(1)(A)* defines as a "bond, debenture, note or certificate or other evidence of indebtedness." However, the OID regulations' more expansive interpretation of "debt instrument" as including any "contractual arrangement that constitutes indebtedness under general principles of federal income tax law"ⁿ⁹⁸ would appear to make the distinction a relatively unimportant one.

IRC Section 483 is only concerned with the adequacy of total stated interest, regardless of whether the sales contract accrues stated interest in an economically realistic manner. There is no concept of "qualified stated interest" in *IRC Section 483*.ⁿ⁹⁹ Unlike *IRC Section 1274*, there can be no imputed interest under *IRC Section 483* if the contract provides for adequate stated interest in total, even if all such interest is payable in a lump sum at maturity.ⁿ¹⁰⁰

The most significant difference between *IRC Sections 483* and *1274* is not in their methodology but in how the results of that methodology are applied: the economic accrual of OID determined under *IRC Section 1274* versus the allocation of unstated interest to deferred payments under *IRC Section 483*.ⁿ¹⁰¹ The tax accounting treatment of the holder and issuer of a debt instrument with OID (or unstated interest), including but not limited to the seller and purchaser of a capital asset in a debt-financed sale, is discussed in Chapter 17, § 17.03[2].

IRC Section 483 does not apply to any debt instrument for which an issue price is determined under either *IRC Section 1273(b)* (other than paragraph (b)(4)) or *IRC Section 1274*.ⁿ¹⁰² *IRC Sections 1273(b)(1)* and (2) apply only to debt instruments issued for money, not property, and thus would not fall within *IRC Section 483*'s scope in the first instance. *IRC Section 1273(b)(3)* does apply to debt instruments issued for property, and removes from *IRC Section 483*'s

jurisdiction any such debt issued in a transaction in which either the debt instrument or the property for which it is issued is publicly traded.ⁿ¹⁰³ That leaves *IRC Section 1274*, which appears to cover the rest of the field, since *Section 1274* determines the issue price of debt instruments issued for property where neither the debt instrument nor the property is publicly traded. *IRC Section 483*'s jurisdiction is preserved, however, because of exceptions to *IRC Section 1274* that carve out a number of debt instruments for which *IRC Section 1274* does not determine the issue price. These exceptions create the universe of transactions to which *IRC Section 483* applies.

(1) Cash Method Debt Instruments. *IRC Section 1274A(c)* provides an elective exception to *IRC Section 1274* by which seller and purchaser can jointly choose to have imputed interest determined under *IRC Section 483* rather than *IRC 1274* as long as the stated principal amount of the debt instrument does not exceed an inflation-adjusted maximum.ⁿ¹⁰⁴ The debt instrument must be a "qualified debt instrument," a category which, as previously discussed,ⁿ¹⁰⁵ qualifies for a 9 percent ceiling on the test rate used to calculate imputed interest.ⁿ¹⁰⁶ By making a joint election under *IRC Section 1274(c)*, the seller and purchaser agree to use the cash receipts and disbursements method of accounting for stated as well as unstated interest throughout the term of the debt instrument.ⁿ¹⁰⁷ The seller must not use an accrual method of accounting and must not be a dealer in the property sold or exchanged.ⁿ¹⁰⁸ If a qualified debt instrument meets these requirements, it is known as a "cash method debt instrument."ⁿ¹⁰⁹

If a cash method debt instrument is issued in a potentially abusive situation,ⁿ¹¹⁰ *IRC Section 483* is applied as though it included a provision similar to *IRC Section 1274(b)(3)*; that is, the fair market value of the property sold, less any consideration received for the property other than the cash method debt instrument, is substituted for the present value of payments under the contract in the formula by which the amount of unstated interest is derived.ⁿ¹¹¹

(2) Sales Calling for Total Payments of \$250,000 or Less. A debt instrument arising from the sale or exchange of property is not subject to *IRC Section 1274* if the sum of all of the following does not exceed \$250,000: (a) payments due under the debt instrument, other than stated interest, plus (b) the outstanding principal balance or adjusted issue price (in the case of debt obligations issued with original issue discount) of liabilities assumed or taken subject to by the purchaser, plus (c) the aggregate fair market value of any other consideration given up in the sale or exchange.ⁿ¹¹² The \$250,000 limitation is not indexed for inflation. Since contracts with a sales price of \$3,000 or less are also excepted from *IRC Section 483*,ⁿ¹¹³ a determination of imputed interest in a debt-financed sale or exchange of property in which payments total between \$3,001 and \$250,000 is exclusively within the jurisdiction of *IRC Section 483*.

(3) Sale of a Farm for Less Than One Million Dollars. A debt instrument arising from the sale or exchange of a "farm" (within the meaning of that term as used in *IRC Section 6420(c)(2)*),ⁿ¹¹⁴ for a purchase price which cannot exceed \$1 million, is excepted from *IRC Section 1274* if the sale is made by an individual, estate, testamentary trust, "small business corporation" (within the meaning of *IRC Section 1244(c)(3)*) or partnership which meets requirements similar to those of *IRC Section 1244(c)(3)* on the date of sale.ⁿ¹¹⁵ The regulations provide that the \$1 million limitation on the sale price is to be applied without regard to the substantive provisions of *IRC Section 1274* or the amount of stated interest, and without regard to other exceptions to the applicability of *IRC Section 1274* (including the exceptions for sales of a principal residence and sales of land between related parties as discussed below). The \$1 million limitation on the sale price is not indexed for inflation.

(4) Sale of Principal Residence. A debt instrument arising from the sale by an individual of his "principal residence," within the meaning of *IRC Section 121*, is not subject to *IRC Section 1274*, but may be subject to *IRC Section 483*.ⁿ¹¹⁶ *IRC Section 121* presently provides for the exclusion from gross income of gain from the sale or exchange of property which, during the 5-year period ending on the date of sale,

was used as the taxpayer's principal residence for periods aggregating 2 years or more. In general, whether a property qualifies as a taxpayer's principal residence is determined under a facts and circumstances test, but regulations under *IRC Section 121* provide that a residence may include a houseboat, a house trailer or a house or apartment that a taxpayer is entitled to occupy as a tenant-stockholder in a cooperative housing corporation.ⁿ¹¹⁷ When the taxpayer alternates between two residences using each as a residence for successive periods of time, the property that the taxpayer uses a majority of the time during the year ordinarily will be considered the taxpayer's principal residence.ⁿ¹¹⁸

(5) Sales of Land Between Related Parties. *IRC Section 483(e)* provides that, in the case of a "qualified" sale or exchange--that is, a sale of land by an individual to a member of the individual's family,ⁿ¹¹⁹--the discount rate used in determining total unstated interest is not to exceed 6 percent compounded semiannually. The lower discount rate only applies to the first \$500,000 of the stated principal amount of debt instruments issued in qualified sales between the same two individuals during the same calendar year.ⁿ¹²⁰ *IRC Section 1274(c)(3)(F)* cedes jurisdiction to *IRC Section 483* with respect to any debt instrument arising out of a sale to which *IRC Section 483(e)* applies.ⁿ¹²¹

[vi] Transactions Exempt from Imputed Interest Reclassification. Certain other transactions, listed below, are excepted from the operation of both *IRC Section 483* and *IRC Section 1274*. Of these, however, only the first two are potentially applicable to a debt-financed sale of securities.

(1) Marital property settlements between spouses or ex-spouses in which a debt instrument is issued as consideration for property transferred pursuant to the settlement agreement are exempt by regulation from both *IRC Section 1274* and *IRC Section 483*,ⁿ¹²² provided gain or loss on the transaction is not recognized pursuant to *IRC Section 1041*,ⁿ¹²³

(2) Short-term transactions in which all payments are due not more than 6 months after the date of the sale or exchange are not subject to *IRC Section 1274*.ⁿ¹²⁴ Since *IRC Section 483* only applies to transactions in which at least one payment is due more than one year from the date of the sale or exchange,ⁿ¹²⁵ transactions in which all deferred payments are due in 6 months or less are necessarily exempt from *IRC Section 483* as well.

(3) In the case of the issuer of a debt instrument (obligor) only, neither *IRC Section 1274* nor *IRC Section 483* apply to a debt instrument issued as consideration for the sale or exchange of "personal use property," defined as property substantially all the use of which by the taxpayer ["obligor"] is not in connection with a trade or business of the taxpayer or an activity described in [*IRC*] *Section 212*.ⁿ¹²⁶ This means that a purchaser of personal use property will not have deductible OID in connection with deferred payments due the seller as part of the purchase price,ⁿ¹²⁷ even though the seller who holds the debt instrument may be required to take OID attributable to such payments into income.ⁿ¹²⁸ Since the "production or collection of income" is an activity described in *IRC Section 212*,ⁿ¹²⁹ this exception should not apply to a debt-financed purchase of securities.

(4) Transactions involving certain demand loans that are also "below-market loans" described in *IRC Section 7872(c)(1)* are excepted by regulation from the application of *IRC Sections 1274* and *483*, but interest may be imputed instead under the provisions of *IRC Section 7872*.ⁿ¹³⁰

(5) An annuity contract to which *IRC Section 72* applies is not a "debt instrument" and therefore is not subject to *IRC Section 1274*.ⁿ¹³¹ Such contracts are also exempt by regulation from the operation of *IRC Section 483*.ⁿ¹³²

(6) Transfers of patents described in *IRC Section 1235*, to the extent the amount of the deferred payments

is contingent on the productivity, use or disposition of the property transferred, are excepted from both *IRC Section 1274*ⁿ¹³³ and *IRC Section 483*.ⁿ¹³⁴

[2] Transactions Producing Ordinary Loss.

[a] Small Business Investment Company Stock. The sale of stock at a loss will normally produce a capital loss.ⁿ¹ If the stock were to become wholly worthless, the loss resulting therefrom would likewise assume capital characteristics.ⁿ²

One exception to the general rule concerns stock in a small business investment company operating under the Small Business Investment Act of 1958.ⁿ³ The purpose of that legislation was to encourage and stimulate equity investment in small businesses. Consonant with this purpose and as an added incentive,ⁿ⁴ Congress provided that any loss resulting from such investment would be "treated as an ordinary loss."ⁿ⁵

[b] Losses Incurred by Small Business Investment Companies. As a further incentive to capital investment in small businesses, *IRC Section 1243* permits losses, incurred by a small business investment company by reason of the sale or exchange (or worthlessness)ⁿ⁶ of stock acquired through the exercise of a conversion privilege contained in debentures issued by a small business concern, to be treated as ordinary losses.ⁿ⁷

A number of other conditions must be satisfied before the loss can be cloaked with the ordinary character provided by *IRC Section 1243*. First, the loss has to be a loss from the sale or exchange of a capital asset, a loss which would be a capital loss were it not for *IRC Section 1243*.ⁿ⁸ Second, the company suffering the loss must, at the time of the loss, be licensed to operate as a small business investment companyⁿ⁹ and must submit a statement to this effect with the tax return on which the loss is claimed.ⁿ¹⁰

[c] Losses on Small Business Corporation Stock.

A third provision enacted in 1958, *IRC Section 1244*, has as one of its declared purposes the encouragement of "the flow of new funds into small business" by "reducing the risk of a loss for these new funds."ⁿ¹¹ In addition, the section seeks to place "shareholders in small corporations on a more nearly equal basis with ... proprietors and partners."ⁿ¹²

The operative effect of *IRC Section 1244(a)* is to permit an *individual* ⁿ¹³ to treat a loss on "*Section 1244* stock" as an ordinary loss instead of a capital loss. However, the amount which may be so treated in any single taxable year may not exceed \$50,000 (\$100,000 in the case of a husband and wife filing a joint return).ⁿ¹⁴ Furthermore, the benefits of *IRC Section 1244* are available only to individuals who acquire the stock on the original issuance by the corporation; an individual acquiring his stock from another is not entitled to an ordinary loss under *IRC Section 1244*.ⁿ¹⁵ Indeed, an individual who acquires *Section 1244* stock by distribution from a partnership in which he is a partner, and who subsequently sells the stock at a loss, is denied *Section 1244* treatment, even though he could have claimed an ordinary loss if the partnership had sold the stock.ⁿ¹⁶

[i] Section 1244 Stock Defined. In order for stock to qualify as *Section 1244* stock and, therefore, for the special benefits conferred by the section, *IRC Section 1244* requires that the following conditions be satisfied:ⁿ¹⁷

(1) The stock must be stock in a domestic corporation.ⁿ¹⁸

(2) In the case of stock issued before November 7, 1978, the date of enactment of the Revenue Act of 1978, the stock must have been issued pursuant to a plan adopted by the corporation after June 30, 1958, to offer the stock for a specified period ending not later than two years after the plan was adopted.ⁿ¹⁹ The plan must have been in writing, and must have specifically stated, in terms of dollars, the maximum amount to be received by the corporation for the stock.ⁿ²⁰ Additionally, the stock must actually have been issued during period of the offerⁿ²¹ and before a subsequent offering was made by the

corporation.ⁿ²²

The requirement of a written plan and of an offering period is eliminated for stock issued after November 6, 1978. However, good corporate practice dictates the adoption of some form of written plan.

(3) The corporation must be a small business corporation. For stock issued before the enactment of the Revenue Act of 1978, this status must have existed at the time the plan was adopted.ⁿ²³ For shares issued thereafter, the crucial time is when the stock is issued.ⁿ²⁴

(4) In the case of pre-Revenue Act shares, no portion of a prior offering could be outstanding at the time of plan adoption.ⁿ²⁵ No such requirement exists for post-Act shares.

(5) The stock must be issued for money or other property, but not in exchange for stock or securities (including stock or securities of the issuing corporation).ⁿ²⁶ Stock issued for past or future services rendered in behalf of the issuing corporation is also disqualified.ⁿ²⁷

(6) During the period of the five taxable years immediately preceding the loss year (or for a specified lesser period if not in existence that long), the corporation must have derived more than one half of its aggregate gross *receipts* from sources other than royalties, rents, dividends, interest, annuities, and gains from sales or exchanges of stock and securities.ⁿ²⁸ The purpose of this provision is an attempt to limit the benefit of *IRC Section 1244* to operating corporations.ⁿ²⁹ This had led the Government to argue, and one court to hold, that Section 1244 treatment is unavailable if the corporation has no gross receipts, for such a corporation cannot be classified as an operating company.ⁿ³⁰

[ii] Small Business Corporation Defined. In the case of stock issued before November 7, 1978, a corporation qualified as a small business corporation under *IRC Section 1244*ⁿ³¹ if, at the time of adoption of the plan, it satisfied two conditions:

(1) The aggregate amount which could have been offered under the plan, plus the aggregate amount of money and other property (taken into account at adjusted basis for determining gain as of the time of receipt by the corporation, reduced by any liabilities to which the property was subject or which were assumed by the corporation) received by the corporation for stock, as a contribution to capital, and as paid-in surplus, did not exceed \$500,000.ⁿ³²

(2) The sum of the aggregate amount which could have been offered under the plan and the equity capital of the corporation on the date of adoption of the plan did not exceed \$1 million.ⁿ³³ Equity capital here means the sum of its money and other property (taken at adjusted basis for determining gain) less the amount of its indebtedness other than indebtedness to shareholders.

The Revenue Act of 1978 removed the equity capital limitation and increased the amount which could be received for stock from \$500,000 to \$1 million.ⁿ³⁴ Determination of the aggregate amount is made at the time of issuance of the stock in question and must take into account the amounts received for such stock and all stock previously issued.ⁿ³⁵

[iii] Limitations on the Amount of Ordinary Loss. It has been seen that the maximum amount which may be taken as an ordinary loss in any year is \$50,000, or, in the case of a husband and wife filing a joint return (even if the loss is sustained by only one of the spouses),ⁿ³⁶ \$100,000. If the taxpayer's loss is within the annual dollar limitation, the inability to fully deduct the loss in the year sustained may not be critical. The part of the loss which cannot be employed as a deduction becomes part of the taxpayer's net operating loss, and for that purpose is deemed attributable to a trade or business of the taxpayer. It should be noted that neither the Code nor the Regulations specifies whether an

IRC Section 1244 loss retains its character as such when carried to a year other than the original loss year. If the original character is retained in another year, the amount of the loss would have to be considered when applying the annual limitation in the other year. With no expression to the contrary, it is arguable that, in applying *IRC Section 1244(b)*, only losses actually sustained in the year should be considered, and that losses incurred in another year should be deductible without regard to *IRC Section 1244(b)*.

A further limitation on the amount of loss that may be treated as an ordinary loss is required whenever (1) Section 1244 stock was issued in exchange for property; (2) the basis of the stock is determined by reference to the basis of the property; and (3) the adjusted basis of the property for loss purposes immediately before the exchange exceeded its fair market value. The limitation is achieved by reducing the basis of the stock by an amount equal to the excess of the adjusted basis of the property over its fair market value.ⁿ³⁷ It is important to note that this limitation does not reduce the quantum of loss, but only changes the amount that can be claimed as an ordinary loss under *IRC Section 1244*. The excluded portion still qualifies as a capital loss.ⁿ³⁸

IRC Section 1244(d)(1)(B) provides one more limitation by requiring any increase in basis resulting from contributions to capital, or otherwise, to be allocated to stock that is not Section 1244 stock. This prevents the basis of Section 1244 stock from rising above the amount of consideration paid when the stock was originally acquired from the corporation.

[iv] Record-Keeping and Filing Requirements. Substantiation of an ordinary loss deduction under *IRC Section 1244* will require proof that the conditions prescribed by the provision have been met. To that end, in addition to any written plan, the corporation should maintain records showing:

- (1) The shareholders to whom the stock was issued, the date of issuance, and the amount and type of consideration received;
- (2) If the consideration for the stock was property, the basis of the property in the hands of the shareholder and its fair market value when received by the corporation;
- (3) The certificates which represent the Section 1244 stock;
- (4) The amount of money and the basis in the hands of the corporation of property received after June 30, 1958 and before adoption of the plan, as contributions to capital and as paid-in surplus;
- (5) The equity capital of the corporation on the date of adoption of the plan; and
- (6) Information relating to any tax-free stock dividend made with respect to the Section 1244 stock and any reorganization in which the corporation exchanged stock for the Section 1244 stock.ⁿ³⁹

Under existing regulations, anyone claiming a loss on Section 1244 stock must file, as part of the return for the year in which the deduction is claimed, a statement indicating (a) the address of the issuing corporation, (b) the manner in which the stock was acquired and the amount and nature of consideration therefor, and (c) if acquired in a nontaxable exchange for property other than money, the type of property and its adjusted basis and fair market value on the date of transfer.ⁿ⁴⁰ Until 1994, the Service took the position that taxpayers were not entitled to ordinary loss treatment under *IRC Section 1244* if they failed to file the information statement. The Tax Court upheld this position.^{n40.1} In 1994, the Service and Treasury Department determined that denying ordinary loss treatment for stock that otherwise qualifies as Section 1244 stock, solely due to a taxpayer's failure to file the information statement, is not necessary to achieve the purposes of *IRC Section 1244*, and announced that the regulations will be revised to eliminate the filing requirement.ⁿ⁴¹

The shareholder must also maintain records sufficient to distinguish the Section 1244 stock from any other stock owned

in the issuing corporation.ⁿ⁴² This is important because the revised regulations will state that a person who owns Section 1244 stock in a corporation must maintain sufficient records to establish that the stock qualifies as Section 1244 stock.ⁿ⁴³

[d] Worthless Securities of an Affiliate. It will be recalled that when a security which is a capital asset becomes worthless, the loss resulting therefrom is treated as a capital loss.ⁿ⁴⁴ However, the general rule set forth in *IRC Section 165(g)(1)* is subject to an exception when the security that becomes worthless is a security in a corporation affiliated with the taxpayer. The exception, which causes the loss to be an ordinary loss by treating the security as a noncapital asset, is invoked whenever (1) the taxpayer is a domestic corporation; (2) the taxpayer directly owns stock that possesses at least 80 percent of the total voting power and that has a value equal to at least 80 percent of the total value of the stock of the corporation whose security has become worthless; and (3) more than 90 percent of the gross *receipts* of the affiliated corporation for *all* taxable years has been derived from sources other than royalties, rents (except rents derived from rentals to employees of the corporation in the ordinary course of its operating business), dividends, interests (except interest received on deferred sales of operating assets), annuities, and gains from the sale or exchange of stocks and securities.ⁿ⁴⁵

The deduction for worthlessness can be claimed even though the affiliated corporation has not been dissolved. The First Circuit so held in *Textron, Inc. v. United States*,ⁿ⁴⁶ over the argument pressed by the Internal Revenue Service that the stock was not worthless because the subsidiary had potential value as a source of loss carryovers. The subsidiary, using funds provided by its parent, had purchased a successful business and used losses generated by an earlier activity as an offset against subsequent profits.

[3] Wash Sales.

[a] Wash Sale Defined.

Suppose a taxpayer owns stock or securities which have declined in value, but which the taxpayer desires to retain as a investment. If it were possible for the stock or securities to be sold and quickly repurchased, the taxpayer could achieve his investment objective while securing the added benefit of a loss deduction. However, if (1) the acquisition occurs within the period beginning thirty days before the sale and ending thirty days thereafter; (2) the acquisition takes the form of a purchase or taxable exchange; and (3) the acquisition is of substantially identical stock or securities, or during the specified period, the taxpayer enters into a contract or option to acquire substantially identical stock or securities, the taxpayer will have engaged in a wash sale.ⁿ¹

[i] Substantially Identical Stock or Securities. Crucial to the definition of a wash sale is the requirement that the acquisition within the sixty-one-day period be of *substantially identical* stock or securities. The phrase is without definition either in the Code or the Regulations and it is to judicial and administrative decision that we must look for the meaning of the term.

In an early case, *Hanlin v. Commissioner*,ⁿ² the Board of Tax Appeals stated:

"The term 'substantially identical' is looser than 'identical,' and was unquestionably so intended; but the retention of the word 'identical'... clearly indicates that approximation to identity, and not mere similarity was the controlling thought."ⁿ³

On appeal, the Third Circuit added its opinion that the term imported something less than precise correspondence and that

"[T]he 'something less' that is required consists of economic correspondence exclusive of differentiations so slight as to be unreflected in the acquisitive and proprietary habits of holders of stocks and securities."ⁿ⁴

The court in *Hanlin* was called upon to decide whether bonds of equal value and interest rate issued by the same obligor under the same authority, but with maturity dates differing slightly, were substantially identical. The Board of Tax Appeals opined that, all other things being equal, the only consideration important to an investor would be the permanence of the investment, and it could see "no substantial difference in permanence of investments of approximately sixteen years life, to be found only in a difference of four or ten months in length of life of bonds."⁵ The *Hanlin* case also faced the question of substantial identity in the case of bonds whose maturity dates differed by two and one-half years, but which were subject to redemption at any time after the same date. The Board concluded that the securities were substantially identical, basing its decision on the ground that, to the ordinary investor, the possibility of redemption was a more important feature than the date of ultimate maturity. The decision recognized that if there were unconditional difference of two and one-half years in the maturity of the bonds, a more difficult question as to the substantiality of the difference might arise.

How great a difference in maturity dates is necessary before the securities can be found to lack substantial identity seems to be a function of the difference in dates and time in the future fixed for maturity. Thus, in *Frick v. Driscoll*,⁶ a difference of four years in maturity dates, maturity coming thirty-five years and thirty-nine years, respectively, in the future, was not considered a material difference, with the result that the securities were substantially identical. And in *Revenue Ruling 58-211*,⁷ a difference of six months in earliest call dates and maturity dates was held unsubstantial where the securities sold were to mature six years in the future, and those purchased, nine years in the future. But when those two situations are looked at in the light of the recognition by the Board of Tax Appeals in *Hanlin*, that a two-and-one-half-year difference would be substantial where maturity would not occur until twenty-one years after the wash sale, the point at which a difference in the maturity dates of the securities purchased and those sold requires a decision that the securities are not substantially identical becomes unclear.⁸

A material difference in interest rates can also prevent substantial identity. Again, the line between material and immaterial difference is hazy. However, the Internal Revenue Service has ruled "that two bonds of the same face amount issued by the same debtor *but bearing different rates of interest* are not substantially identical even though other features of the indebtedness are similar."⁹ The ruling concerned a difference in interest rates of 3/8 of one percent. Whether any lesser change in interest rates will produce the same result is an open question.

A finding of substantial identity has occurred where the only difference in the securities is the date of issue.¹⁰ However, if some material factor, such as whether the bonds are redeemable at par to pay estate taxes, depends on the issue date, the difference will be considered material.¹¹

A last consideration in determining whether two bonds have the necessary approximation to identity relates to the security behind the obligation. If in the main, the underlying security is the same, the securities will be held to be substantially identical.¹² Apparently, the test of underlying security is made with respect to the primary obligor; a common secondary obligor will not infuse the securities with substantial identity.¹³

The same basic test, i.e., economic correspondence, is employed to ascertain whether stock purchased is substantially identical to stock sold within the prescribed period.¹⁴ Thus, the purchase of common stock on the same day as the sale of voting trust certificates for the stock has been held to be the acquisition of a substantially identical security.¹⁵ This result follows logically from the conclusion that the only change is in legal title to the stock. There is no effective change in the beneficial ownership, and, therefore, economic equivalence is achieved. But where voting common stock was sold and nonvoting common stock purchased, the acquisition was not of substantially identical property, even though the classes of stock were alike in every respect other than the right to vote.¹⁶ If the lack of voting power is sufficient to remove the necessary economic correspondence and approximation to identity, then the two decisions seem inconsistent unless the fact that the voting trust certificate situation involves a voluntary relinquishment of voting rights is sufficient to distinguish the two cases.

[ii] Options or Contracts to Acquire Substantially Identical Stock or Securities. It is really apparent that wash sale consequences could easily be avoided if, during the sixty-one-day period, it were permissible for a taxpayer to enter into a contract or option to purchase substantially identical stock or securities with actual acquisition of the stock or securities delayed until a date falling without the specified period. *IRC Section 1091(a)* closes this avenue of avoidance by equating the contract or option to purchase with actual acquisition.ⁿ¹⁷ So, if a taxpayer sells stock and simultaneously acquires warrants to purchase the same stock, the wash sale rules will apply because the warrant is, in effect, an option to acquire stock. However, this does not mean that the warrant or option itself is deemed the equivalent of the stock. A sale of the warrant followed by the purchase of the same stock to which the warrant relates will not invoke the wash sale provisionsⁿ¹⁸ "unless the relative values and price changes are so similar as to make the warrants fully convertible securities and therefore substantially identical with the shares of ... stock."ⁿ¹⁹ The unless clause appears to require a finding of substantial identity whenever a change in the price of the stock is matched by a proportionate change in the price of the warrant.

Suppose a taxpayer receives rights to purchase stock or an option to purchase stock without any action on his part. Has he "entered into a contract or option ... to acquire [substantially identical stock]"? The words "entered into" would seem to require affirmative action on the part of the taxpayer. However, the Service has ruled that the grant of an option under an employee restricted option plan is considered an entry into an option agreement under *IRC Section 1091* as of the date of the grant.ⁿ²⁰ This implies that, no matter how accomplished, the acquisition within the sixty-one-day period of an option to acquire substantially identical securities will require application of *IRC Section 1091*.

[b] Tax Consequences of Wash Sales.

[i] In General. *IRC Section 1091(a)* provides that if a wash sale has occurred,

"no deduction shall be allowed under section 165 unless the taxpayer is a dealer in stocks or securities and the loss is sustained in a transaction made in the ordinary course of such business."

The quoted rule applies to sales after December 31, 1984 in taxable years ending after that date.ⁿ²¹ Under prior law, the prohibition of *IRC Section 1091* did not apply in the case of a noncorporate taxpayer if the sale or other disposition of stock was made in connection with the taxpayer's trade or business or if the taxpayer was a corporation and a dealer in stocks or securities, and the sale or other disposition was made in the ordinary course of its business as such a dealer.ⁿ²²

IRC Section 1091(a) poses some additional problems. Suppose a taxpayer sells 200 shares of X Corporation stock on December 1, realizing a loss of \$10,000; sells an additional 200 shares on December 5, realizing a loss of \$5,000; and then purchases 200 shares on December 20. What is the extent of the disallowed loss, \$10,000 or \$5,000? The answer, according to the Regulations, is \$10,000, since that loss was the first sustained.ⁿ²³ This rule will be followed even where both lots are sold on the same day, unless the order of disposition cannot be determined, in which event the shares shall be considered disposed of in the order acquired.ⁿ²⁴

Consideration should be given to the intended scope of *IRC Section 1091*. Is the section to apply if, say, 100 shares are purchased on one day and 50 of those shares are sold at a loss within the next thirty days? Literal application of the Code would require an affirmative answer, but strict adherence to the language of the statute is, here, not the practice. Indeed, it is the position of the Internal Revenue Service that Congress intended to prevent a taxpayer from taking losses for tax purposes while giving up his position in the stock or securities for only a few days and not to "disallow a loss sustained in a bona fide sale of securities made to reduce the taxpayer's holding, even though the sale is made within 30 days after the securities were purchased."ⁿ²⁵ This statement of position came in answer to a single fact situation, the sale at a loss of a portion of shares purchased in one lot on one day. The extent to which deviation from the stated fact pattern will be permitted before the disposition will be considered other than a bona fide sale made to reduce a holding is still in doubt.

Since *IRC Section 1091* is directed at the disallowance of realized losses, it is obvious that a sale at a gain can be preceded or followed by a purchase of substantially identical property without adverse consequences. The requirement that each sale of stock or securities be tested separately to determine gain or loss is important in this regard. For example, suppose a taxpayer purchases 100 shares of stock of a certain corporation at \$100 a share, and an additional 200 shares of its stock at \$80 a share. If all of the stock is sold on the same day at \$95 a share, the result is a loss of \$500 on the sale of the 100 shares, a gain of \$3,000 on the sale of the 200 shares, and a net profit of \$2,500. However, the existence of a net profit on the entire transaction will not prevent disallowance of the \$500 loss (or reduction of the gain by the amount of the loss) if substantially identical stock is purchased within the sixty-one-day period.ⁿ²⁶

[ii] Acquisition of a Greater or Lesser Amount of Stock Than Sold. It is clear that where the amount of stock or securities acquired during the sixty-one-day period matches exactly the amount sold, the loss will be disallowed in its entirety. If, however, the amount acquired is less than that sold, only a portion of the loss is disallowed, the nondeductible part being determined by matching the stock or securities acquired with an equal number of shares of stock or securities sold.ⁿ²⁷ Matching is also necessary when the amount acquired is greater than the amount sold. Here the purpose is to determine the particular shares of stock or securities whose acquisition caused the loss to be non-deductible. This will be achieved by matching the stock or securities sold with an equal number of shares or securities acquired in accordance with the order of acquisition of the stock or securities acquired.ⁿ²⁸

[iii] Basis and Holding Period of Acquired Stock or Securities. An exception to the normal basis rule of *IRC Section 1012* comes into play whenever the acquisition of stock or securities results in a disallowance of loss under *IRC Section 1091(a)*. Instead of cost, the acquired stock or securities take the same basis as the stock or securities sold or disposed of, adjusted for any difference between the acquisition price of the new stock or securities and the selling price of the old.ⁿ²⁹ So, if stock having a basis of \$1,000 is sold for \$900, and within the prescribed sixty-one-day period substantially identical stock is purchased for \$950, the basis of the new stock will be \$1,050 (the basis of the old shares, \$1,000, increased by the excess of the purchase price over the selling price, \$50). If the acquired stock were purchased for \$850, a downward adjustment of \$50 to the basis of the stock disposed of would be required.

Following the general pattern that permits tacking of holding periods whenever the basis of property is in whole or in part a substituted basis, *IRC Section 1223(4)* provides that the holding period of the new stock or securities includes the holding period of those whose loss was not allowed. This rule governs whether the acquisition of the stock itself results in the nondeductibility of the loss, or whether that result obtains because the taxpayer entered into a contract or option to acquire substantially identical securities.

[c] Wash Sale Application.

[i] Limited to Stock and Securities. By definition, non-deductibility of losses from wash sales is limited to losses "sustained from [a] sale or other disposition of *shares of stock or securities*."ⁿ³⁰ The issue posed focuses on the interpretation of the term "securities."

Little difficulty is encountered in affixing the "securities" label to those things that are ordinarily thought of as securities, such as bonds or debentures.ⁿ³¹ With similar ease, security status can be denied to commodities.ⁿ³² Suppose, however, the taxpayer sells, not a commodity, but a commodity future, and reacquires a substantially identical future within the sixty-one-day period. Has he now engaged in a security transaction coming within *IRC Section 1091(a)*? Here the courts disagree. The Sixth Circuit held a future contract to be a security, relying on the fact that they were pledged with a broker who advanced funds for the purchase of the commodity.ⁿ³³ This may have resulted from the court's inability to distinguish between property which serves as security for a debt and property which itself is "a security." The Tax Court, in a later case holding the future contract to be property other than a security, found the reasoning of the Sixth Circuit to be unsound.ⁿ³⁴ The Service's position is similar to that of the Tax Court, to wit, futures contracts are neither stock nor securities.ⁿ³⁵ The conclusions of the Tax Court may not have been necessary for a decision. An alternate ground, namely, that a new future contract is not substantially identical with any prior contract

even though the quantity involved in each is identical, would suffice to remove a future contract from the ambit of the wash sale provision.

The Technical and Miscellaneous Revenue Act of 1988 amended *IRC Section 1091(a)* to provide that the term "stock or securities" includes contracts or options to acquire or sell stock or securities. The amendment, effective for sales made after November 11, 1988, overrules a decision to the contrary in *Gantner v. Commissioner*.ⁿ³⁶

[ii] Short Sales of Stock and Securities. The traditional short sale contemplates the sale of stock or securities which the seller does not own, delivery being made with borrowed property.ⁿ³⁷ While the actual sale occurs on the day executed, for tax purposes it is not deemed to be consummated until the short sale is closed.ⁿ³⁸ Thus, it would appear that a short sale resulting in a loss will not run afoul of the wash sale rules even if the stock used to cover the sale is acquired during the 30-day period following the sale, provided the closing does not occur earlier than the thirty-first day following the sale.

Suppose, however, that the taxpayer seeks to secure the benefit of a loss deduction, but desires to retain the stock or security as an investment. One might suggest that the taxpayer first sell the stock, then enter into a short sale, next reacquire the stock or security, and finally close the short sale more than thirty days after reacquisition. At first glance, this approach would seemingly pass muster, for the Regulations provide that "the principles of paragraph (a) of § 1.1233-1 for determining the consummation of a short sale shall generally apply ..."ⁿ³⁹ However, the Regulations provide that the date of entering into the short sale will be the sale date if, on that date, the taxpayer owns, or has entered into a contract to acquire, substantially identical stock or securities (a short sale "against the box") and delivers such stock or securities to close the short sale.ⁿ⁴⁰

Prior to the enactment of *IRC Section 1091(e)*, as part of the Tax Reform Act of 1984, the Code did not preclude the allowability of losses from short sales of stock against the box in the instance in which the original purpose of the short sale was to defer income. If the value of the stock increased before the short sale was closed, the taxpayer would acquire additional stock at the higher price in order to close the short sale. The short sale would generate a short-term capital loss that could offset unrelated income. The sale of the original stock after the start of the next taxable year would effectively defer income until that year (assuming the stock did not decrease in value). Even if the transactions occurred within a 61-day period, the wash sale rules would not apply if the stock held by the taxpayer was not acquired within the 30-day period preceding the close of the short sale.ⁿ⁴¹ *IRC Section 1091(e)* prevents this outcome by extending the wash sale rules to a loss realized on the closing of a short sale of (or the sale, exchange, or termination of a securities futures contract to sell) stock or securities if, within 30 days before or after such closing, the taxpayer sells or enters into another short sale of (or securities futures contract to sell) substantially identical stock or securities.

Even if the wash sale can be avoided by means of a short sale, the taxpayer may still have to contend with the claim that the entire scheme was undertaken to create a deductible loss without any change in economic position.ⁿ⁴² This attack has occasionally proved successful in cases which fall without the scope of *IRC Section 1091* either because the property sold and subsequently reacquired is not a stock or security,ⁿ⁴³ or because the seller and purchaser are different, albeit related or controlled, persons.ⁿ⁴⁴ Nonetheless, the use of a short sale to circumvent the effect of *IRC Section 1091* still appears to be a viable means of achieving the goal of loss deduction and continued investment. The Regulations appear to approve the use of short sales to avoid nondeductibility by providing that the general rule for fixing the date of consummation of a short sale will be applicable in determining whether a disallowing acquisition has been made within the sixty-one-day period. The "no economic loss" theory cases should be limited to cases involving transactions which could never be subject to *IRC Section 1091*.

[iii] Sale by the Taxpayer, Acquisition by the Taxpayer. *IRC Section 1091(a)* works its disallowance of loss whenever "the taxpayer has acquired ... substantially identical stock or securities ..."ⁿ⁴⁵ This language would seem to look to a sale and acquisition by the same person. And, in general, this is the position which the courts have taken. So, a sale of stock by a taxpayer followed by a purchase of substantially identical stock by a related taxpayer will not run

afoul of the wash sale provisions,ⁿ⁴⁶ unless the sale is not bona fide and the acquiring party is the mere nominee of the taxpayer.ⁿ⁴⁷ Even where the seller lends the buyer the funds with which to make the purchase, the loss will be allowed provided the buyer has not acted as the seller's agent.ⁿ⁴⁸

However, where complete identity can be attributed to the seller and purchaser, the wash sale rule will be applied. Thus, a sale by a partnership followed by a partner's acquisition of substantially identical stock with his own funds has resulted in a nondeductible loss.ⁿ⁴⁹ This is a logical conclusion--the partnership is not an entity apart from its partners; a partnership sale is, in effect, made by the partners. A similar result has been reached when the acquirer was a trust created and so completely controlled by the taxpayer as to be, in reality, no trust at all.ⁿ⁵⁰

Avoiding the consequences of a wash sale does not, by itself, insure deductibility. A purchase by one taxpayer coming immediately upon the heels of a sale at a loss by a related taxpayer may still result in the denial of tax benefits under some other provision of the Code.

[4] Transactions Between Related Parties.

A second disallowance provision also seeks to prevent a taxpayer from reaping the benefit of a loss deduction on investments that, practically speaking, remain under the control of the taxpayer. Unlike the wash sale provisions which require the identical taxpayer, or his agent, to be both seller and purchaser, *IRC Section 267* is based on the relationship between seller and purchaser. It should be noted, however, that section 267 is not exclusive; losses claimed in sales between parties whose relationships are not included in section 267, but nevertheless raise doubts about the "bona fides" of the sale, may not be deductible under section 165 of the Code.ⁿ¹

[a] The Specified Relationships. *IRC Section 267(a)(1)* disallows a loss deduction whenever the sale or exchange is between persons whose relationship is described in one of 13 categories set forth in *IRC Section 267(b)*, namely:

- (1) Members of the family, defined as an individual's brothers and sisters (whether of the whole or half-blood), spouse, ancestors, and lineal descendants;^{n1.1}
- (2) An individual and a corporation in which the individual owns, directly or indirectly, more than 50 percent in value of the outstanding stock;ⁿ²
- (3) Two corporations which are members of the same controlled group;ⁿ³
- (4) A grantor and a fiduciary;ⁿ⁴
- (5) Fiduciaries of different trusts, if both were created by the same grantor;ⁿ⁵
- (6) A fiduciary of a trust and the beneficiary of that trust;ⁿ⁶
- (7) A fiduciary of one trust and the beneficiary of another, if both trusts were created by the same grantor;ⁿ⁷
- (8) A fiduciary of a trust and a corporation in which more than 50 percent in value of the outstanding stock is owned, directly or indirectly, by the trust or by the grantor of the trust;ⁿ⁸
- (9) A person and a tax-exempt organization controlled, directly or indirectly, by the person, or if he is an individual, by members of his family;ⁿ⁹
- (10) A corporation and a partnership if the same person owns more than 50 percent in value of the

outstanding stock of the corporation and more than 50 percent of the capital interest or profits interest in the partnership;ⁿ¹⁰

(11) An S corporation and another S corporation if the same persons own more than 50 percent in value of the outstanding stock of each corporation;ⁿ¹¹

(12) An S corporation and a C corporation if the same persons own more than 50 percent in value of the outstanding stock of each corporation;ⁿ¹² and

(13) Except in the case of a sale or exchange in satisfaction of a pecuniary bequest, an executor of an estate and a beneficiary of the estate.^{n12.1}

IRC Section 267 requires that certain stock ownership attribution rules be applied before determining whether the parties to a sale or exchange are related within the meaning of one of the categories defined above.

(1) Stock owned, directly or indirectly, by a corporation, partnership, estate, or trust is considered as being owned proportionately by its shareholders, partners, or beneficiaries.ⁿ¹³ Unanswered by the provisions or the Regulations is the manner in which the proportionate interest is to be ascertained. It may be presumed that since the stock ownership relationships contained in *IRC Section 267(b)* are measured in terms of value, the same yardstick should be used in determining constructive ownership. This is certainly logical when attribution is had from corporations, partnerships, or estates. But should it apply when the stock is owned by a trust? It would seem more sensible to determine the proportionate interest of a trust beneficiary on the basis of actuarial values, and this is what another constructive ownership section having no application to *IRC Section 267* expressly provides.ⁿ¹⁴ Whether the failure to specifically mandate use of actuarial values is manifestation of legislative intent to require resort to value as the measurement of proportionate interest remains an open question.

(2) An individual is considered to own the stock owned by his spouse, ancestors, lineal descendants, and his brothers and sisters (of the whole and half-blood).ⁿ¹⁵

(3) An individual that owns or is considered as owning stock in a corporation (other than by reason of the family attribution rules stated in (2) above) will be considered to own any stock in that corporation owned by a partner.ⁿ¹⁶

The consequence of the constructive ownership rule is to make one the owner of shares where he would not otherwise be. And because of this, he can constructively make another the owner of such shares. For example, assume an individual, A, owns all of the shares of X Corporation, which in turn owns all of the shares of Y Corporation. By virtue of *IRC Section 267(c)(1)*, A will be considered the owner of the Y Corporation shares, so that a loss on a sale between A and Y Corporations will be nondeductible. Furthermore, because he is now deemed the owner of the Y Corporation stock, his ownership will be attributed to the specified members of his family.ⁿ¹⁷ However, there is a limit to the extent to which attribution will be carried. Stock owned constructively by an individual by reason of the family attribution rules will not be treated as owned by him for the purpose of again applying the attribution rules.ⁿ¹⁸ Thus, while A's spouse would be considered as owning Y Corporation stock, the same would not hold true for, say, the sister of A's spouse.

[b] Covered Transactions.

IRC Section 267(a)(1) disallows losses if they arise from "sales or exchanges of property ... *directly or indirectly*, between persons [within any of the specified relationships]." ⁿ¹⁹ A special exception is made for transfers between spouses or incident to a divorce that are governed by *IRC Section 1041*.ⁿ²⁰

Few problems should be encountered with a direct sale or exchange. But when is a sale indirectly made? This would appear to be a question of fact to be resolved on a case-by-case basis, though some guidance can be derived from cases that have considered the question.

The starting point of any discussion of indirect sales between related parties must be *McWilliams v. Commissioner*.ⁿ²¹ There, a husband, managing both his portfolio of investments and the extensive investments of his wife, would sell stock from his account through a broker and then purchase an equal amount of the same stock for his wife's account, the purchase also being executed by a broker. In denying the taxpayer's contention that Congress could not have intended to disallow losses on bona fide transactions made through a public market, the Supreme Court concluded

"that the purpose of [Section 267(a)(1)] was to put an end to the right of taxpayers to choose, by intra-family transfers and other designated devices, their own time for realizing tax losses on investments which for the most practical purposes, are continued uninterrupted.

"We are clear as to this purpose, too, that its effectuation obviously had to be made independent of the manner in which an intra-group transfer was accomplished."ⁿ²²

At first glance, the broad interpretation which *McWilliams* gives to the phrase "between [related] persons" would appear to require disallowance whenever a sale is made by one taxpayer, and a purchase of like property by another having the specified relationship. However, does the rationale of *McWilliams* hold forth when neither the seller nor the purchaser knows of the transaction by the other? Or is *McWilliams* to be limited to those situations in which the seller is instrumental in effecting both transactions? The latter construction is the more rational and prevents disallowance when the subsequent purchase by a related party is a fortuitous event. Using this approach, a deduction would still be available to a taxpayer selling stock on the open market even if his brother were to purchase an equal number of the same shares, provided that the transactions were in no way connected.ⁿ²³

Courts have had little difficulty in finding an indirect sale when the transaction is effected through a conduit or strawman who serves no independent purpose. Hence, in *Boehm v. Commissioner*,ⁿ²⁴ losses were disallowed on a sale by a taxpayer to his in-laws, who resold the same securities *at cost* to the taxpayer's wholly owned corporations. A direct sale by the taxpayer to the corporations would have been a sale between related persons. The consequence of such a sale could not be avoided by routing the sale through an unrelated party, when the substance, if not the form, of the transaction remained a sale between related parties.

In both *McWilliams* and *Boehm*, the taxpayers entered into the sales voluntarily. Should a taxpayer be deprived of his loss deduction when the sale is a forced or involuntary sale? The Fifth Circuit provided an affirmative answer in *Merritt v. Commissioner*,ⁿ²⁵ holding that the nature of the sale had no bearing on the issue of disallowance. Thus, a wife's purchase of her spouse's securities in a closed corporation ran afoul of *IRC Section 267(a)(1)*, even though the purchase came at a tax sale held by the Internal Revenue Service. The court likened the Service to an agent playing a role similar to the broker in *McWilliams*, and looked to the substance of the transaction, namely, continued ownership of the property within the family unit. However, it may be significant that the property involved consisted of securities in a closed corporation, the stock of which was owned by the taxpayer, his wife, and his children. One may consider whether in these circumstances there could have been any purchaser other than the wife or children, and therefore, whether *Merritt* should have vitality when the property sold is readily resalable by any purchaser.

[i] Distributions in Corporate Liquidation. *IRC Section 267(a)(1)* is expressly inapplicable to any loss of the distributing or distributee corporation in a complete liquidation. Prior to the Technical and Miscellaneous Revenue Act of 1988, the exception applied to partial liquidations as well.

It must be pointed out that not every loss realized on a distribution in complete liquidation will be saved from disallowance. If it appears that the taxpayer formed the corporation for the sole purpose of effecting a sale of property

previously owned by him to a person related to him, the corporation might be deemed the taxpayer's alter ego, the corporate entity disregarded, and the sale deemed made by the taxpayer.ⁿ²⁶

[c] Treatment of Gain on Subsequent Sale. Partial relief from the consequences of *IRC Section 267(a)(1)*, is afforded the transferee of property, the sale of which resulted in a loss which was not allowed as a deduction to the transferor. The condition upon which relief is grounded is the sale of the property (or other property the basis of which is determined by reference to such property) at a gain. The medium by which relief is afforded is through recognition of gain only to the extent that it exceeds so much of the originally disallowed loss as is allocable to the property sold by the transferee.ⁿ²⁷

The operation of the relief provision can be illustrated by the situation in which a husband sells stock with an adjusted basis of \$2,000 to his wife for \$1,500. The loss of \$500 is nondeductible by reason of *IRC Section 267(a)(1)*. If the wife later sells the stock for \$2,300, her realized gain of \$800 (\$2,300 less her basis of \$1,500) is recognized to the extent of \$300, the excess of the realized gain of \$800 over the previously disallowed loss of \$500.ⁿ²⁸ Had the wife's sale been for \$1,400, the entire realized loss of \$100 would be recognized, for *IRC Section 267(d)* affects only the recognition of gain. If the wife had made a gift of the stock and the donee were to sell it for \$2,300, the donee would have had to recognize the entire gain of \$800. The benefits of *IRC Section 267(d)* are only available to the original transferee, and then only if he acquires the property by purchase or exchange.ⁿ²⁹

IRC Section 267(d) has no effect on the basis of the property.ⁿ³⁰ Nor does it permit tacking of the transferor's holding period to that of the transferee.ⁿ³¹ It operates in one way only, i.e., to affect the amount of recognized gain.

[5] Conversion Transactions.

A "conversion transaction" is a transaction, generally consisting of two or more positions taken with regard to the same or similar property, resulting in a situation where substantially all of the taxpayer's return is attributable to the time value of the taxpayer's net investment in the transaction. In a conversion transaction, the taxpayer is in the economic position of a lender, i.e., the taxpayer has an expectation of a return from the transaction that in substance is in the nature of interest and undertakes no significant risks other than those typical of a lender. In order to have the taxation of such transactions follow their economic posture, Congress enacted *IRC Section 1258(a)* to treat gain from the disposition or other termination of any position held as part of a conversion transaction entered into after April 30, 1993 as ordinary income instead of capital gain (to the extent the gain does not exceed the applicable imputed income amount).ⁿ¹ Thus, such gain will not be taxed at the preferential 28 percent rate accorded capital gains, but at the highest rate applicable to the taxpayer's ordinary income.

The "applicable imputed income amount" is an amount equal to (i) the amount of interest that would have accrued on the taxpayer's net investment in the conversion transaction for the period ending on the date of disposition or other termination at a rate equal to 120 percent of the applicable rate, reduced by (ii) the amount treated as ordinary income under *IRC Section 1258(a)* with respect to any prior disposition or termination of a position that was held as part of the transaction.ⁿ² The applicable rate is, generally, the applicable federal rate determined under *IRC Section 1274(d)* (compounded semiannually) as if the conversion transaction were a debt instrument but if the term of the conversion transaction is indefinite, the applicable rate is the federal short-term rate in effect under *IRC Section 6621(b)* during the period of the conversion transaction (compounded daily).ⁿ³

A transaction is not a conversion transaction unless, in addition to being one where substantially all of the taxpayer's return is attributable to the time value of the taxpayer's net investment in the transaction, it satisfies one of the following four criteria:

- (1) the transaction consists of the acquisition of property by the taxpayer and a substantially contemporaneous agreement to sell the same or substantially identical property in the future;

(2) the transaction is an applicable straddle;ⁿ⁴

(3) the transaction is one that was marketed or sold to the taxpayer on the basis that it would have the economic characteristics of a loan but the interest-like return would be taxed as capital gain; or

(4) the transaction is described as a conversion transaction in regulations to be promulgated on a prospective basis.ⁿ⁵

IRC Section 1258(a) does not apply to transactions of an options dealer in the normal course of the dealer's trade or business of dealing in options, or of a commodities dealer in the normal course of the trader's trade or business of trading *IRC Section 1256* contracts.ⁿ⁶ The exception for options dealers and commodities traders does not apply to gain recognized by an entity that is allocable to a limited partner or limited entrepreneurⁿ⁷ if (i) substantially all of the limited partner's (or limited entrepreneur's) expected return from the entity is attributable to the time value of the partner's (or entrepreneur's) net investment in the entity, (ii) the transaction (or the interest in the entity) was marketed or sold as producing capital gains attributable to the time value of the net investment in the entity, or (iii) the transaction or (interest in the entity) is a transaction (or interest) described in regulations under *IRC Section 1258*.ⁿ⁸

If a position with a built-in loss becomes part of a conversion transaction, and is later disposed of or terminated in a transaction in which gain or loss is recognized, the built-in loss is recognized and has a character determined without regard to *IRC Section 1258*.ⁿ⁹ A built-in loss is any loss that would have been realized if the position had been disposed of or terminated (at its fair market value) as of the time the position became part of the conversion transaction.ⁿ¹⁰

The operation of *IRC Section 1258* can be illustrated by the following examples:

Example 1:

On July 1, 1994, A purchased stock for \$1,000. On the same day, A agreed to sell the stock to B for \$1,200 on January 1, 1996. Assume that the applicable rate is 4 percent. When the sale is completed, of the \$200 realized gain that would be capital gain but for *IRC Section 1258*, \$74 is treated as ordinary income (\$1,000 multiplied by 120 percent of 4 percent compounded semiannually for 18 months) and \$126 as capital gain.

Example 2:

On July 1, 1993, A purchased stock for \$1,100. On July 1, 1994, when the stock was worth \$1,000, A used it as part of the conversion transaction described in Example 1.ⁿ¹¹ The stock is treated as having a basis of \$1,000, producing the same gain result as in Example 1. However, A would also recognize a built-in loss of \$100 when the stock was delivered to B; the character of the loss is unaffected by *IRC Section 1258*.

In determining a taxpayer's net investment in a conversion transaction, the source of the taxpayer's funds generally will not be taken into account.ⁿ¹² Amounts that a taxpayer may be committed to provide in the future generally will not be treated as an investment until such times as such amounts are committed to the transaction and unavailable to the taxpayer to invest in other ways.ⁿ¹³ Finally, the taxpayer's net investment in a conversion transaction generally will be the aggregate amount invested by the taxpayer in the conversion transaction, less any amount received by the taxpayer as consideration for entering into any position held as part of the conversion transaction, such as when the taxpayer is the grantor of an option.ⁿ¹⁴ The following examples illustrate these rules:

Example 3:

Assume that in Example 1, A borrowed \$900 of the \$1,000 purchase price of the stock from a bank and was required under *IRC Section 263(g)* to capitalize \$60 of interest on that debt into the cost of the stock.

Although A's basis in the stock will be increased to \$1060 to reflect the capitalized interest, A's net investment in the transaction will still be \$1,000. In addition, only \$14 of the gain will be recharacterized as ordinary income; the capitalized interest reduces the amount turned into ordinary income by *IRC Section 1258(a)*.

Example 4:

On January 1, 1995, A enters into a long futures contract committing A to purchase a certain quantity of gold on March 1, 1995 for \$10,000. On January 1, 1995, A also enters into a short futures contract to sell the same quantity of gold on April 1, 1995 for \$10,100. Under these contracts, A is not required to make any investment at the time they are entered into, but is required to make a 'margin' deposit (that may or may not bear interest), as security for A's obligations thereunder. Suppose A terminates both contracts on February 1, 1995, for a net profit of \$25. No part of the gain is subject to recharacterization under *IRC Section 1258(a)*, since A has no investment in the transaction on which the \$25 could be considered to be an interest equivalent return.

Example 5:

On January 1, 1995, A acquires non-publicly traded common stock for \$10,000 and, on the same day grants B a call option to purchase the same stock for \$10,600, exercisable at any time prior to February 1, 1996. B pays A a premium of \$1,000 for the call option. At the time that A grants B the call option, there is no substantial certainty that B will exercise the option. On these facts, A's net investment in the transaction comprised of the stock purchase and the granting of the option would be \$9,000 (\$10,000 paid for the stock less \$1,000 received for granting the option).

If a taxpayer disposes of or terminates all the positions of an identified netting transaction within a 14-day period in a single taxable year, all gains and losses on those positions taken into account for federal tax purposes within that period (other than built-in losses) are netted solely for purposes of determining the amount of gain treated as ordinary income under *IRC Section 1258(a)*.¹⁵ A taxpayer is treated as disposing of any position that is treated as sold under any provision of the Internal Revenue Code or the regulations thereunder, e.g., *IRC Section 1256(a)(1)*.

An identified netting transaction is a conversion transaction that the taxpayer identifies as an identified netting transaction on its books and records.¹⁶ Identification of each position of the conversion transaction must be made before the close of the day on which the position becomes part of the conversion transaction. No particular form of identification is necessary, but all the positions of a single conversion transaction must be identified as part of the same transaction and must be distinguished from all other positions.

Example 1:

On December 1, 1996, A purchases 2,000 shares of X Corporation stock for \$200,000 and enters into a forward contract to sell 2,000 shares of X Corporation stock on November 30, 1998 for \$220,000. The X stock is actively traded and is a capital asset in A's hands. A maintains books and records on which, on December 1, 1996, it identifies the two positions as all the positions of a single conversion transaction. A owns no other X stock. On December 1, 1997, when the applicable imputed income amount for the transaction is \$14,000, A sells the 2,000 shares of X stock for \$190,000. On the same day, A terminates its forward contract with its counterparty, receiving \$20,400. No dividends were received on the X stock during the time it was part of the conversion transaction.

The X stock and forward contract are positions of a conversion transaction. Under *IRC Section 1258(c)(1)*, substantially all of A's expected return from the overall transaction is attributable to the time value of the net investment in the transaction. Under *IRC Section 1258(c)(2)(B)*, the transaction is an applicable straddle.

A disposed of or terminated all the positions of the conversion transaction within 14 days and within the same taxable year. The transaction is an identified netting transaction because it meets the identification requirements set forth above. Solely for purposes of *IRC Section 1258(a)*, the \$10,000 loss realized (\$200,000 basis less \$190,000 amount realized) on the disposition of the *X* stock is netted against the \$20,400 gain recognized on the disposition of forward contract, yielding a net gain of \$10,400 that is recharacterized as ordinary income under *IRC Section 1258(a)*. For federal tax purposes other than *IRC Section 1258(a)*, A has a recognized gain of \$20,400 on the disposition of the forward contract (\$10,400 of which is treated as ordinary income) and a separate realized loss of \$10,000 on the sale of the *X* stock.

Example 2:

Assume the same facts as in Example 1, except that A had purchased the *X* stock for \$208,000 on May 15, 1996. The *X* stock had a fair market value of \$200,000 on that date. The results are the same as in Example 1, except that A has a built-in loss (in addition to the \$10,000 loss that arose economically during the period of the conversion transaction) of \$8,000 on the *X* stock. The built-in loss is not netted against the \$20,400 gain on the forward contract for purposes of *IRC Section 1258(a)*. Thus, the net gain from the conversion transaction for purposes of *IRC Section 1258(a)* is still \$10,400. The \$8,000 built-in loss is recognized and has a character determined without regard to *IRC Section 1258*.

[6] Gain From Constructive Ownership Transactions.

If a taxpayer has gain from a constructive ownership transaction with respect to any financial asset and that gain would otherwise be treated as a long-term capital gain, (1) the gain is treated as ordinary income to the extent that it exceeds the net underlying long-term capital gain, and (2) to the extent that the gain is treated as long-term capital gain, the capital gain rate (or rates) applicable to the gain under *IRC Section 1(h)* is determined on the basis of the respective rate or rates applicable to the net underlying long-term capital gain.ⁿ¹ The provision does not apply to any constructive ownership transaction if all of the positions that are part of the transaction are marked to market under any provision of the Code or regulations.ⁿ²

A financial asset is (a) any equity interest in a passthrough entity, and, (b) to the extent provided in regulations, any debt instrument, and any stock in a corporation that is not a passthrough entity.ⁿ³ The term "passthrough entity" includes a regulated investment company (RIC), a real estate investment trust (REIT), an S corporation, a partnership, a trust, a common trust fund, a passive foreign investment company (as defined in *IRC Section 1297*), and a REMIC.ⁿ⁴

A taxpayer is treated as having entered into a conversion transaction with respect to a financial asset if the taxpayer (i) holds a long position under a notional principal contract with respect to the financial asset, (ii) enters into a forward or futures contract to acquire the financial asset, (iii) is the holder of a call option, and is the grantor of a put option with respect to the financial asset and the options have substantially equal strike prices and substantially contemporaneous maturity dates, or (iv) to the extent prescribed in regulations, enters into one or more transactions (or acquires one or more positions) that have substantially the same effect as a transaction described in (i), (ii), or (iii).ⁿ⁵ A person is treated as holding a long position under a notional principal contract with respect to any financial asset if the person has the right to be paid (or receive credit for) all or substantially all of the investment yield on the financial asset for a specified period, and is obligated to reimburse (or provide credit for) all or substantially all of any decline in the value of the financial asset.ⁿ⁶

Except as provided in regulations, if a constructive ownership transaction is closed by reason of taking delivery of the financial asset, the rules of *IRC Section 1260(a)* are applied as if the taxpayer had sold all the contracts, options or other positions that are a part of the transaction for fair market value on the closing date.ⁿ⁷ The amount of gain so recognized cannot exceed the amount of gain treated as ordinary income under *IRC § 1260(a)*. An adjustment to basis must be made in the amount of any gain or loss subsequently realized for gain recognized and treated as ordinary income

because the taxpayer took delivery.

In addition to recharacterizing gain as ordinary income, the constructive ownership transaction rules impose an interest charge for each year that the transaction was open. If gain is recharacterized as ordinary income for any taxable year, the tax for that year is increased by an amount equal to the interest that would have been imposed under *IRC Section 6601* on the underpayment of tax for the year that would have resulted had the recharacterized gain been included in gross income in the taxable year in which it accrued (determined by treating the income as accruing at a constant rate equal to the applicable federal rate in effect on the day the transaction closed).ⁿ⁸ The period during which the interest accrues ends on the due date (without extensions) for the tax return for the taxable year in which the transaction closed. The increase in tax due to the interest charge is not treated as an income tax for purposes of determining the amount of any allowable income tax credit or the alternative minimum tax.ⁿ⁹ The interest is taken into account in computing the amount of any interest deduction allowable to the taxpayer for the taxable year.ⁿ¹⁰

The Service is directed to prescribe regulations as may be necessary or appropriate, including regulations to permit taxpayers to mark to market constructive ownership transactions in lieu of applying *IRC Section 1260*, and to exclude certain forward contracts that do not convey substantially all of the economic return with respect to a financial asset.ⁿ¹¹

[7] Gains or Losses From Securities Futures Contracts.

Pursuant to *IRC Section 1234B(a)(1)*, gain or loss attributable to the sale, exchange, or termination of a securities futures contract is treated the same as gain or loss from transactions in the underlying security, and, thus, such gain has the same character as the property to which the contract relates has or would have had in the hands of the taxpayer.ⁿ¹ If gain or loss realized on the sale or exchange of a securities futures contract to sell property is capital gain or loss, it generally will be treated as a short-term gain or loss.ⁿ²

The provision applies only to investors; a dealer securities futures contract is treated as a Section 1256 contract.ⁿ³ However, it does not apply to a contract that constitutes property described in *IRC Section 1221(a)(1)* (inventory or property held for sale to customers in the ordinary course of business) or *IRC Section 1221(a)(7)* (certain hedging transactions), or any income derived in connection with the contract that would be treated as ordinary income.ⁿ⁴

FOOTNOTES:

(n1)Footnote 1. The present discussion is not exhaustive. See also §§ 5.02[3] (redemptions not treated as exchanges); 7.02[2] (dispositions of Section 306 stock); 8.03[1][c][ii] ("boot" in reorganization exchanges); 9.03[3][b][i]; 9.04[3][b] (disqualifying dispositions of stock acquired through exercise of stock options or through employee stock-purchase plans); and 20.04[4] (sale or exchange of controlled foreign corporation stock).

(n2)Footnote 1. Recall that, by statute, retirement of a debt instrument is treated as a sale or exchange for capital gain purposes. See § 2.03[2], *supra*.

(n3)Footnote 2. See *Deputy v DuPont*, 308 US 488, 498 (1940) .

(n4)Footnote 3. 381 US 54, 57-58 (1965) .

(n5)Footnote 4. 313 US 28, 31 (1941) . Cf *Frank Lyon Co v US*, 435, 561, 573 (1978) ("In applying this doctrine of substance over form, the Court has looked to the objective economic realities of a transaction rather than to the particular form the parties employed."); *Corn Products Refining Co v Commr*, 350 US 46, 51-52 (1955) (the capital gains provisions "must be narrowly applied ... ").

(n6)Footnote 5. Treasury Regulations have long provided, for example, that when bonds are sold between interest dates, part of the sale price represents imputed interest accrued to the date of the sale and must be reported as interest income. *Treas Reg* § 1.61-1(d); § 2.04[2][b][ii], *supra* .

(n7)Footnote 6. In *Midland-Ross*, the taxpayer purchased noninterest-bearing commercial paper at a discount and sold it in the same taxable year (after holding the paper for more than 6 months, the long-term capital gain holding period at the time) for more than its purchase price. The original issue discount was calculated to yield the equivalent of 2% to 2 1/2% on an annual basis if the paper was held to maturity. The taxpayer's gain on sale approximated the discount earned to date, and it was not contended that any part of its gain was attributable to market fluctuations as opposed to the passage of time. *US v Midland-Ross Corp*, 381 US 54, 55 (fn. 1) (1965). The Supreme Court expressly declined to rule on whether the accrual basis taxpayer would have been required to report annually a portion of the original issue discount as "earned" had it sold the paper in a year subsequent to the year of purchase or held it to maturity, or whether and how original issue discount should be distinguished from "market discount" (see fn 8, *infra*) had there been any evidence that the latter could have accounted for a portion of the taxpayer's gain, issues on which there was in any event no statutory guidance for the taxable years in issue.

In *Lubin v Commr*, 335 F2d 209 (2nd Cir 1964), the Court of Appeals for the Second Circuit, while agreeing with the Internal Revenue Service's position that the portion of the amount received on the sale, exchange or retirement of a debt instrument attributable to original issue discount constitutes interest income rather than capital gain (the same position later accepted by the Supreme Court in *Midland-Ross*), see *Dixon v US*, 333 F2d 1016 (2nd Cir 1964), refused to go farther and accept the Service's argument that "anything above face value paid on notes by an obligor must, as a matter of law, be regarded as interest, no matter what the substance might be of the underlying transaction which has given rise to the obligations." *Lubin v Commr*, 335 F2d 209, 213. The Court of Appeals held that a note acquired by the taxpayer from the obligor for \$1,000,000 less than face value resulted in capital gain and not ordinary income when the note was paid in full because the "discount" actually represented, not interest, but the obligor's promise to share 50% of the profit made on the sale of a business acquired by the obligor, in part with the taxpayer's money.

(n8)Footnote 7. In *IRC § 1274*, and its associated provisions (*IRC §§ 1271-1273, 1274A, and 1275*), imputed interest is referred to as "original issue discount."

(n9)Footnote 8. In *IRC § 483*, imputed interest is referred to as "unstated interest." As further explained below, whether referred to as "original issue discount" or "unstated interest," imputed interest is identified and computed under similar principles in the two Code sections.

(n10)Footnote 9. *IRC § 1276(a)(1)*, which deals with market discount as opposed to original issue discount, takes the conversion approach. Congress there required "gain on the disposition of any market discount bond...[to] be treated as ordinary income to the extent it does not exceed the accrued market discount on such bond." Market discount, unlike original issue discount and unstated interest dealt with in *IRC §§ 1274 and 483*, respectively, generally arises when a taxpayer acquires a bond that has declined in value *after* issuance, typically because of an increase in prevailing interest rates or a decline in the credit-worthiness of the borrower. See Joint Committee on Taxation, *General Explanation of the Revenue Provisions of the Deficit Reduction Act of 1984* (HR 4170, 98th Cong; Pub L 98-369) 93. The operation of *IRC § 1276* is discussed in Chapter 17, § 17.04[2].

(n11)Footnote 10. See *Treas Reg § 1.483-1(a)(2)* ("If section 483 applies to a contract, unstated interest under the contract is treated as interest for tax purposes. Thus, for example, unstated interest is not treated as part of the amount realized from the sale or exchange of property (in the case of the seller), and is not included in the purchaser's basis in the property acquired in the sale or exchange." Thus, the statutory scheme indirectly turns capital gain into ordinary interest income by excluding imputed interest from the sale price of a capital asset and taxing it as interest. However, it can also turn a capital gain into a capital loss. For example, suppose a taxpayer sells securities with a basis of \$9 million, held for more than one year, for a total sales price of \$10 million, receiving \$5 million at the time of sale and taking back a note for \$5 million. If \$2 million of the principal amount of the note is determined to represent imputed interest, the amount realized on the sale will not be \$10 million but \$8 million, and the taxpayer's \$1 million capital gain on the transaction will become a \$1 million loss. See *Treas Reg § 1.1001-1(g)* ("If a debt instrument is issued in exchange for property, the amount realized attributable to the debt instrument is the issue price of the debt instrument as determined under [*Treas Reg §§ 1.1273-2 or 1.1274-2(b)*], whichever is applicable."); see also *Treas Reg § 1.483-1(a)(2)*

. As discussed in the text below, the "issue price" of a debt instrument, determined under *IRC* § 1274, excludes the portion of the stated principal amount that is determined to be imputed interest.

(n12)Footnote 11. *Treas Reg* §§ 1.1012-1(g), 1.483-1(a)(2), and 1.163-7(a).

(n13)Footnote 12. *IRC* § 1274(d). The Internal Revenue Service publishes applicable Federal rates each month in the Internal Revenue Bulletin. See, *eg*, *Rev Rul* 2010-8, 2010-10 *IRB* 432 (AFRs for debt issued in the month of March, 2010). Applicable Federal rates are based on the yield to maturity of outstanding marketable obligations of the United States of similar maturities during the one month period ending on the 14th day of the month preceding the month for which the rates are applicable. *Treas Reg* § 1.1274-4(b).

(n14)Footnote 13. The IRS calculates each AFR using the average market yields of US marketable obligations having remaining periods to maturity equivalent to the terms of the debt instruments (short-term, mid-term or long-term) to which the AFR is to apply (eg, the short-term AFR is determined with reference to US marketable obligations having remaining terms to maturity of 3 years or less). See *IRC* § 1274(d)(1)(C).

(n15)Footnote 14. This brief description necessarily oversimplifies the process as well as the computation, as subsequent sections will reveal. For example, the AFR may have to be adjusted upward or downward depending on the nature of the transaction, the amount involved, and how often interest is paid or compounded. Imputed interest may be determined without reference to the AFR if the debt instrument or the property for which it is given is publicly traded, or the transaction involves a "potentially abusive situation." Installment sales and debt instruments with variable interest rates or other contingent payments add further complexity to the process.

(n16)Footnote 15. See *IRC* § 1272(a); Ch 17, § 17.03[2].

(n17)Footnote 16. See *IRC* § 483(a); *Treas Reg* § 1.483-1(a)(2)(ii); 1.446-2(a). A discussion of the transactions that fall within the jurisdiction of *IRC* §§ 1274 and 483, respectively, may be found at § 2.07[1][c][v]. A third method of accounting for imputed interest applies if the lender, including a seller of debt-financed property, provides interest-free financing, or financing at below-market rates, as a disguised gift, compensation, or dividend to the borrower, or for some similar tax avoidance purpose. See *IRC* § 7872. Imputed interest in such cases goes by yet another name—"foregone interest" on a "below-market loan"—but is calculated in basically the same manner as OID or unstated interest. An amount identified as "foregone interest" under *IRC* § 7872 is analyzed in a two-step process: first, an amount equal to the imputed interest is deemed to have been transferred by the lender to the borrower as either a gift, compensation for services, a dividend, or other tax avoidance type of payment, and second, the same amount is deemed to have been transferred back to the lender from the borrower as an interest payment. See *Rabkin & Johnson, Federal Tax Guidebook*, § 35.01[3][a] (Matthew Bender).

(n18)Footnote 17. See *Frazee v Commr*, 98 TC 554, 581 (1996) : "Section 483 and 1274 establish two alternative interest imputation schemes for debt instruments issued in sales and exchanges of property. Section 1274 is the general rule; it applies to a note issued in a sale or exchange unless the note is excepted from its application. Section 483 applies to most notes excepted from section 1274. 'The principal difference between section 483 and 1274 is that the former operates on a cash basis, while the latter is an accrual regime', but both yield similar results. Lokken, 'The Time Value of Money Rules', 42 *Tax L Rev* 1, 82 (1986)."

(n19)Footnote 18. See *IRC* § 483(d)(1).

(n20)Footnote 19. See *Treas Reg* § 1.483-3(a).

(n21)Footnote 20. *IRC* § 1275(a)(1).

(n22)Footnote 21. *Treas Reg* § 1.1275-1(d).

(n23)Footnote 22. *IRC § 1273(a)(1)*;

(n24)Footnote 23. See *IRC § 1273(a)(2)*; *Treas Reg §§ 1.1273-1(b)* and *(c)*. Thus, the stated redemption price at maturity of a \$10,000 note, payable in five years, with stated interest payable unconditionally and annually at a fixed rate of 5% per annum, would be its stated principal amount of \$10,000. On the other hand, suppose accrued interest on the note were not payable until maturity. In that case, the interest would not be payable at least annually and therefore would not be "qualified stated interest." In those circumstances, the stated redemption price at maturity includes both the \$10,000 principal amount and the payment of accrued interest at maturity. See *Treas Reg § 1.1273-1(f)*, Example 3.

(n25)Footnote 24. See *IRC § 1273(b)*.

(n26)Footnote 25. If all or a substantial amount of the debt instruments in a public offering is issued for money, the issue price of each debt instrument in the issue is the first price at which a substantial amount of the debt instruments is sold (without regard to sales to bond houses, brokers, and similar organizations) for money. *IRC § 1273(b)(1)*; *Treas Reg §§ 1.1273-2(a)(1)* and *(e)*. Thus, each debt instrument in the issue will have the same issue price for OID purposes, regardless of the price actually paid by a particular holder. If a debt instrument is privately offered for money, the issue price is the amount paid by the first buyer of such instrument. *IRC § 1273(b)(2)*. For example, the issue price of a debt instrument in a simple cash loan transaction would be the amount loaned. *Treas Reg § 1.1273-2(a)(1)*.

(n27)Footnote 26. If the debt instrument is itself publicly traded, its issue price is the fair market value of the debt instrument on the date it is issued. *Treas Reg § 1.1273-2(b)*. If the debt instrument is not publicly traded but is issued in exchange for property that is publicly traded, its issue price is the fair market value of the publicly traded property on the date the debt instrument is issued. *Treas Reg § 1.1273-2(c)*.

(n28)Footnote 27. In general, *IRC § 1274* does not apply to a pre-existing debt instrument that is assumed or taken subject to in connection with a sale or exchange. See *IRC § 1274(c)(4)*. However, if the terms of the debt instrument that is being assumed or taken subject to are modified as part of the sale or exchange in a manner that would constitute an exchange under *IRC § 1001*, the modification may have OID consequences. See *Treas Reg § 1.1274-5(a)*. (As to the circumstances in which the modification of a debt instrument may be treated as an exchange of the unmodified debt for new modified debt under *IRC § 1001*, see Ch 1, § 1.02[3][a][ii].) The regulations treat the modification as having been made immediately prior to the sale and exchange, between the seller and the holder of the pre-existing debt instrument, with any OID consequences of the modification being attributed to the seller (unless the seller can show that it neither knew nor had reason to know about the modification). The purchaser, treated as having assumed the pre-existing debt instrument after the modification, incurs no *IRC § 1274* consequences. *Treas Reg § 1.1274-5(b)(1)*. Alternatively, the regulations allow the purchaser and the seller to jointly elect (in a statement attached to their tax returns for the year in which the sale or exchange occurs) to treat the modification as though it were made after the purchaser assumed the original (unmodified) debt instrument. The modification is then treated as a separate transaction between the purchaser and the holder of the debt instrument that occurs after the sale or exchange. *Treas Reg § 1.1274-5(b)(2)*.

(n29)Footnote 28. *Treas Reg § 1.1273-1(d)*.

(n30)Footnote 29. *Treas Reg § 1.1273-1(d)(2)*. In the case of an installment obligation (that is, an obligation which provides for the payment of any amount other than qualified stated interest before maturity), the number of complete years to maturity is calculated using the "weighted average maturity" of the obligation (see § 2.07[1][c][ii], *infra*) instead of the number of years until the last payment date. Alternatively, the actual number of years to maturity may be used if the installment obligation is a "self-amortizing installment obligation" (one which provides for equal payments composed of principal and qualified stated interest at least annually and requires no significant additional payment at maturity (principal balance fully amortized at maturity)), but the de minimis figure of .00167 is substituted for .0025. *Treas Reg § 1.1273-1(d)(3)*.

(n31)Footnote 30. A special rule applicable to debt instruments with so-called "teaser rates" or "interest holidays"

makes it easier for such instruments to qualify for the de minimis exception. Solely for purposes of calculating the maximum amount that would qualify as de minimis OID, the instrument's stated redemption price at maturity is treated as equal to the instrument's issue price plus the greater of "foregone interest" or the excess (if any) of the stated principal amount over the issue price. Foregone interest in this context means the amount of additional stated interest that would be required during the period of the interest holiday to make all stated interest under the instrument qualified stated interest. Under the rules generally applicable in calculating OID, the instrument's stated redemption price at maturity would have to include all interest payable during the entire term of the instrument in excess of the rate applicable during the interest holiday, because such excess would fail to satisfy the definition of qualified stated interest. *Treas Reg* § 1.1273-1(d)(4); *Treas Reg* § 1.1273-1(f), Examples 5 and 6; *Treas Reg* § 1.1274-2(h), Example 1.

(n32)Footnote 31. *Treas Reg* § 1.1273-1(d)(5).

(n33)Footnote 32. *IRC* § 1274(a)(1).

(n34)Footnote 33. *IRC* § 1274(a)(2).

(n35)Footnote 34. *Treas Reg* § 1.1274-2(c).

(n36)Footnote 35. *IRC* § 1274(b)(2). It would be more accurate to say that the discount or test rate used in calculating present values is based upon, rather than equal to, the AFR as published by the IRS, since as discussed below at least one and possibly more modifications must be made to the published rates before can be used as the discount rate to determine imputed interest.

(n37)Footnote 36. *IRC* § 1274(c)(2); *Treas Reg* § 1.1274-2(c)(1).

(n38)Footnote 36.1. See § 2.07[1][c][iii], *infra*.

(n39)Footnote 37. The Regulations provide in this regard that either the issue date or the maturity date should be included in the term of a debt instrument, but not both. *Treas Reg* § 1.1274-4(e)(3).

(n40)Footnote 38. "Installment obligation" is defined by the regulations as a debt instrument that provides for the payment of any amount other than qualified stated interest before maturity. *Treas Reg* § 1.1273-1(e)(1).

(n41)Footnote 39. *Treas Reg* § 1273-1(e)(3).

(n42)Footnote 40. *Treas Reg* § 1.1275-2(c)(1).

(n43)Footnote 41. *Treas Reg* § 1.1275-2(c)(4).

(n44)Footnote 42. "Variable rate instruments" and "qualified floating rates," defined in *Treas Reg* §§ 1.1275-5(a) and (b), respectively, are discussed in § 2.07[1][c][iv], *infra*. An example of a variable rate instrument with a qualified floating rate would be a debt instrument that provides for annual payments of interest based on the prime rate of a bank. See *Treas Reg* § 1.1274-4(e), Example 1.

(n45)Footnote 43. *Treas Reg* § 1.1274-4(c)(2)(i).

(n46)Footnote 44. *Treas Reg* § 1.1274-4(c)(2)(ii). In *Treas Reg* § 1.1274-4(e), Example 1 cited in fn 43 above, a provision in the debt instrument which restricted the variation in the debt instrument's interest rate to no more than .25 percentage points (25 basis points) from one year to the next was assumed to be a "significant restriction."

(n47)Footnote 45. *IRC* § 1274(b)(2)(B).

(n48)Footnote 46. In the published AFRs for January, 2010, the long-term AFR based on semiannual

compounding is 4.07%. If interest is compounded monthly however, the long-term AFR is reduced to 4.03%, since more frequent compounding makes 4.03% the economic equivalent of a 4.07% rate compounded semiannually. Similarly, the long-term AFR based on less frequent annual compounding is higher (4.11%) than either the monthly or semiannually compounded rates. *Rev Rul 2010-1, 2010-2 IRB 248, 249*.

(n49)Footnote 47. See *Treas Reg* §§ 1274-4(a)(ii)(A) and (B).

(n50)Footnote 48. *Treas Reg* § 1274-4(a)(1).

(n51)Footnote 49. *IRC* § 1274(e); *Treas Reg* § 1274-4(a)(2). For purposes of this provision, related party means a person related to the transferor within the meaning of *IRC* § 267(b) or *IRC* § 707(b)(1).

(n52)Footnote 50. See *IRC* § 1274A(a)(1); *Treas Reg* § 1274-4(a)(2)(ii). In circumstances where the ceiling rate becomes the test rate, if the stated rate in the qualified debt instrument is compounded on other than a semiannual basis, the 9 percent rate will have to be adjusted to make it comparable with the qualified debt instrument's compounding period. See fn 45 and accompanying text, *supra*.

(n53)Footnote 51. The property for which the debt instrument is issued must not be "new section 38 property" eligible for the investment credit within the meaning of *IRC* § 48(b), as in effect on the day before the date of the enactment of the Revenue Reconciliation Act of 1990 [enacted November 5, 1990], *IRC* § 1274A(b)(1), a restriction unlikely to disqualify contemporary debt instruments since the investment credit was repealed in 1986. In addition, a debt instrument issued in a sale-leaseback transaction cannot be a qualified debt instrument, since *IRC* § 1274(e) provides that the test rate for debt instruments issued in such transactions must be set at 110 percent of the AFR. See *Treas Reg* § 1.1274A-1(b)(1); text at fn 51, *supra*.

(n54)Footnote 52. The limitation on the principal amount of debt instruments that qualify for the rate ceiling is set annually for each calendar year, and is applied in accordance with aggregation rules under which (1) all sales or exchanges which are part of the same transaction (or a series of related transactions) are treated as 1 sale or exchange, and (2) all debt instruments arising from the same transaction (or a series of related transactions) are treated as 1 debt instrument. *IRC* § 1274A(d)(1).

(n55)Footnote 53. See *Rev Rul 2010-2, 2010-3 IRB 272, 273*.

(n56)Footnote 54. *Treas Reg* § 1.1274-2(c).

(n57)Footnote 55. See § 2.07[1][c][1], *supra*. OID will ordinarily result if some or all of the instrument's stated interest is not qualified stated interest. Since typically no stated interest accrues on the "unqualified" stated interest, the entire difference between the actual amount of the "unqualified" stated interest payment, added at face value to the instrument's stated redemption price at maturity, and the present value of the payment included in the imputed principal amount, will be OID.

(n58)Footnote 56. *Treas Reg* § 1001-1(g); *Treas Reg* § 1.1012-1(g).

(n59)Footnote 57. *Treas Reg* § 1.1274-2(b)(1). There is one exception: even if there is adequate stated interest, the stated principal amount of a debt instrument in the hands of a seller-lender will be reduced if cash is paid by the borrower-purchaser incident to the lending transaction that is designated as interest or "points" on the loan. *Treas Reg* §§ 1273-2(g)(2)(ii) and 1.1274-2(b)(1). The regulations treat the seller-lender in these circumstances as having made a net loan to the purchaser-borrower equal to the stated principal amount of the debt instrument reduced by the amount the purchaser is required to return to the seller as points. The reduced stated principal amount becomes the instrument's issue price while the instrument's stated redemption price at maturity remains at the original (unreduced) stated principal amount, resulting in OID equal to the difference or "points" paid by the purchaser. On the other hand, the purchaser's payment of "points" is included in the purchaser's basis in the property acquired. *Treas Reg* § 1273-2(g)(2)(ii); *Treas*

Reg § 1273-2(g)(5), Example 2.

(n60)Footnote 58. See *Treas Reg § 1.1274-1(b)(1)*.

(n61)Footnote 59. *Treas Reg § 1.1274-2(c)*.

(n62)Footnote 60. See *IRC § 1274(b)(3)*; *Treas Reg § 1.1274-3*.

(n63)Footnote 61. *IRC § 1274(b)(3)(A)*.

(n64)Footnote 62. As defined in *IRC § 6662(d)(2)(C)(ii)*.

(n65)Footnote 63. Nonrecourse financing does not include a sale or exchange of a real property interest financed by a nonrecourse debt instrument if the purchaser makes a down payment in money that equals or exceeds 20 percent of the total stated purchase price of the real property interest. *Treas Reg § 1.1274-3(b)(2)*.

(n66)Footnote 64. Interest on a debt instrument is clearly excessive if the interest, in light of the terms of the debt instrument and the creditworthiness of the borrower, is clearly greater than the arm's length amount of interest that would have been charged in a cash lending transaction between the same two parties. *Treas Reg § 1.1274-3(b)(3)*.

(n67)Footnote 65. See *IRC § 1274(b)(3)(B)*.

(n68)Footnote 66. Cf fn 55, *supra*.

(n69)Footnote 67. See *Treas Reg § 1.1273-1(f)*, Example 3.

(n70)Footnote 68. *Treas Reg § 1.1273-1(b)* and *Treas Reg § 1.1273-1(c)(4)*.

(n71)Footnote 69. See generally *Treas Reg § 1.1275-5*.

(n72)Footnote 70. *Treas Reg § 1.1274-2(f)(1)*.

(n73)Footnote 71. *Treas Reg § 1.1275-5(e)(1)*.

(n74)Footnote 72. *Treas Reg § 1.1274-2(g)* ("[T]he issue price of the debt instrument is the lesser of the instrument's noncontingent principal payments and the sum of the present values of the [instrument's] noncontingent payments" unless the debt instrument is issued in a potentially abusive situation, in which case the issue price is the fair market value of the noncontingent payments.) See also *Treas Reg § 1.1275-4(c)* (treatment of contingent payment debt instruments); *Treas Reg § 1.1275-4(a)(2)* (excluding variable rate debt instruments from provisions of *Treas Reg § 1.1275-4*).

(n75)Footnote 73. The significance of the difference in treatment can be illustrated by a case in which nonpublicly traded property is sold for \$10 million, resulting in a nominal capital gain to the seller of \$1 million. The entire purchase price is paid by the issuance of a nonpublicly traded 3-year debt instrument providing for payment in full at maturity and annual payments of interest at a floating rate which has a value equal to 6 percent per annum, compounded annually. The test rate on both the first date on which there is a binding contract and the actual date of the sale is 3.5 percent per annum, compounded annually. If the instrument does not qualify as a "variable rate debt instrument" with a "qualified floating rate," the issue price of the debt instrument will be the present value of its one noncontingent payment (\$10 million payable in 3 years), discounted at the test rate of 3.5 percent. Assume this produces an imputed principal amount of \$9 million. The seller's capital gain will be erased and replaced by OID of \$1 million. If, on the other hand, the debt instrument meets the requirements of a variable rate debt instrument and the variable rate is a "qualified floating rate," all interest payments are treated as "qualified stated interest" determined at a rate equal to the value of the qualified floating rate on the date of sale. Since that rate (6 percent) is greater than the test rate (3.5

percent), the instrument's stated principal amount and its issue price are both \$10 million. The seller's capital gain thus remains at \$1 million with no OID. See *Treas Reg* §§ 1.1274-2(f) and 1.1275-5(e)(2).

(n76)Footnote 74. *Treas Reg* § 1.1275-5(a). The limit on the amount of premium (ie, the excess of the instrument's issue price over the amount of its noncontingent principal payments) is the lesser of 15 percent of the total noncontingent principal payments or .015 multiplied by the product of the total noncontingent principal payments and the number of complete years to maturity from the issue date (or, in the case of an installment obligation, the weighted average maturity). *Treas Reg* § 1275-5(a)(2).

(n77)Footnote 75. *Treas Reg* § 1.1275-5(b).

(n78)Footnote 76. Cf *Treas Reg* § 1.1274-4(e), Example 1.

(n79)Footnote 77. *Treas Reg* § 1275-5(d), Example 3.

(n80)Footnote 78. *Treas Reg* § 1275-5(d), Example 1.

(n81)Footnote 79. *Treas Reg* § 1275-5(d), Example 2.

(n82)Footnote 80. *Treas Reg* § 1275-5(d), Example 4.

(n83)Footnote 81. *Treas Reg* § 1275-5(d), Example 5.

(n84)Footnote 82. *Treas Reg* § 1275-5(d), Example 8.

(n85)Footnote 83. *Treas Reg* § 1275-5(d), Example 6.

(n86)Footnote 84. A debt instrument issued for money or publicly traded property, the issue price of which is not governed by section 1274, may qualify as a variable rate debt instrument even though its variable rate is not a qualified floating rate if the variable rate meets the less stringent requirements of a "single objective rate." See *Treas Reg* § 1.1275-5(a)(3)(C) and (D). In general, an "objective rate" is one that uses a fixed formula based on objective financial or economic information that is not within the control, or unique to the circumstances, of the issuer or a related party (e.g., a rate based on the dividends, profits or the value of the issuer's stock would be considered unique to the circumstances or within the control of the issuer.) See *Treas Reg* § 1.1275-5(c)(1).

Suppose a debt instrument provided for interest payments at a rate determined in accordance with changes in the value of a commodity index based on the prices of several actively traded commodities. The debt instrument does not provide interest computed at a qualified floating rate because such an index cannot reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds. Nevertheless, the commodity index is an "objective rate" since it is based on financial or economic information not within the control or unique to the circumstances of the issuer or a related party, *Treas Reg* § 1.1275-1(d), Example 4. This would be sufficient to make the debt instrument a variable rate debt instrument if it were issued for cash or publicly traded property. However, *Treas Reg* § 1.1274-2(f)(2) provides that in calculating the issue price (imputed principal amount) of a debt instrument subject to *IRC Section 1274*, any interest payment determined by an objective rate that is not a qualified floating rate must be treated as a contingent payment. Making assurance double sure, *Treas Reg* § 1.1275-5(a)(6) also provides that if any stated interest payments on a debt instrument subject to *IRC § 1274* are treated as contingent payments under *Treas Reg* § 1.1274-2, the debt instrument cannot be a variable rate debt instrument.

(n87)Footnote 85. For example, a rate equal to two times the value of 1-year LIBOR as of the payment date would not be a qualified floating rate, while a rate equal to 1.35 times such value would. See *Treas Reg* § 1.1275-1(d), Example 7. A floating rate can be a qualified floating rate even though it is increased or decreased by a fixed amount, however. See *Treas Reg* § 1.1275-1(d), Example 2 (interest rate equal to 200 basis points (2 %) plus the current value,

at the end of each year, of the average yield on 1-year Treasury securities is a qualified floating rate).

(n88)Footnote 86. *Treas Reg § 1.1275-5(b)(3)*.

(n89)Footnote 87. *Treas Reg § 1.1275-4* actually prescribes two sets of rules: one set for contingent payment debt instruments issued for money or publicly traded property, known collectively as the noncontingent bond method, see *Treas Reg § 1.1275-4(b)*, and another for contingent payment debt instruments issued for nonpublicly traded property. See *Treas Reg § 1.1275-4(c)*. The noncontingent bond method is discussed in Chapter 17; this section considers only the rules applicable to contingent payment debt instruments issued for nonpublicly traded property.

(n90)Footnote 88. *Treas Reg § 1.1275-4(c)(2)*.

(n91)Footnote 89. See fn 72, *supra*.

(n92)Footnote 90. *Treas Reg § 1.1275-4(c)(3)*.

(n93)Footnote 91. *Treas Reg § 1.1275-4(c)(4)(ii)(A)*. However, for purposes of determining the test rate, the overall debt instrument's term must be recalculated as though the payment date of the contingent payment were the instrument's maturity date. *Treas Reg § 1.1275-4(c)(4)(ii)(B)*. For example, if the overall debt instrument's term was 10 years, but the actual date on which the contingent payment was made was 1 year after the issue date, the term of the instrument would be considered 1 year rather than 10 years, and the AFR selected as the basis of the test rate would be the short-term rather than the long-term AFR, on the date the instrument was issued.

(n94)Footnote 92. *Treas Reg § 1.1275-4(c)(4)(i)*.

(n95)Footnote 93. The regulations under *IRC § 483* provide that property does not include money, services, or the right to use property, but refer to *IRC §§ 404* and *407* for the treatment of certain obligations given in exchange for services or the use of property. *Treas Reg § 1.483-1(a)*.

(n96)Footnote 94. See *IRC §§ 483(a)* and *(d)*. The exceptions to the application of *IRC § 483* are discussed below.

(n97)Footnote 95. *IRC § 483(b)*.

(n98)Footnote 96. *IRC § 483(b)* (flush language).

(n99)Footnote 97. See Lokken, *The Time Value of Money*, 42 *Tax L Rev* 1, 127 (1986).

(n100)Footnote 98. *Treas Reg § 1.1275-1(d)*.

(n101)Footnote 99. Nevertheless, the concept of a "qualified variable rate instrument" can be important under *IRC § 483* if the stated interest rate in the contract depends upon the movement of a designated index. As under *IRC § 1274*, interest payments on a qualified variable rate instrument are determined under *IRC § 483* as though the interest rate were fixed throughout the instrument's term at the value of the rate on the date of sale or the date on which there was a binding contract to make the sale, whichever value is greater. See § 2.07[1][c][iv]. Otherwise, contingent interest payments are disregarded until payment is actually made, at which time the principal and interest components of the payment are determined. See *Treas Reg § 1.483-4(a)*.

(n102)Footnote 100. For a description of the circumstances under which a debt instrument may have OID under *IRC Section 1274* even though it has adequate stated interest, see fn 57, *supra*, and accompanying text.

(n103)Footnote 101. The accounting treatment of OID is governed by the provisions of *IRC § 1272* and the regulations thereunder. The accounting treatment of unstated interest is governed by *IRC §§ 446, 451* and *461* and the regulations thereunder, and in particular *Treas Reg § 1.446-2(e)*. See *Treas Reg § 1.483-1(a)(2)(ii)*. *IRC § 483(d)(1)*.

(n104)Footnote 102. *IRC § 483(d)(1)*.

(n105)Footnote 103. As previously mentioned, the issue price of those debt instruments is determined either by the fair market value of the publicly traded debt instrument or the fair market value of the publicly traded property for which it is issued. See fn 28, *supra*.

(n106)Footnote 104. The maximum stated principal amount was originally set at \$2,000,000, but with required adjustments for inflation each year has increased to \$3,653,600 for debt instruments issued in 2010. See *IRC § 1274A(c)(2)(A)*; *Rev Rul 2010-2, 2010-3 IRB 272, 273*. *Rev Rul 2010-2* includes a table showing the inflation-adjusted maximum for cash method debt instruments in each year from 1990 through 2010.

(n107)Footnote 105. See fns 53-55 and accompanying text.

(n108)Footnote 106. See § 2.07[1][c][ii]. As a practical matter, a debt instrument issued for property which does not exceed the maximum principal amount of a cash method debt instrument should be a qualified debt instrument as well, since the maximum stated principal amount of a qualified debt instrument is substantially higher than the maximum prescribed for cash method debt instruments. However, since a debt instrument issued in a sale-leaseback transaction cannot be a qualified debt instrument regardless of its stated principal amount, (see fn 53, *supra*), it cannot be a cash method debt instrument either. See *Treas Reg § 1.1274A(b)(1)*. Whether a debt instrument satisfies the statutory maxima on qualified debt instruments and cash method debt instruments is determined after the application of aggregation rules under which all debt instruments arising from the same transaction (or a series of related transactions) are treated as a single instrument. *IRC § 1274A(d)(1)*; *Treas Reg § 1.1274A-1(a)(3)*. Further, a debt instrument that calls for contingent payments cannot meet the statutory maximum in either case unless it can be determined at the time of the sale or exchange that the stated principal amount due under the debt instrument cannot under any circumstances exceed the statutory maximum.

(n109)Footnote 107. *IRC §§ 1274A(c)(1)(B) and 1274A(c)(2)(D)*. The election is generally binding on their successors in interest. If, however, the seller transfers the debt instrument to a taxpayer on the accrual basis, the cash method election is no longer binding on the transferee or its successors, although it continues to be binding on the purchaser and the purchaser's successors. See *Treas Reg § 1274A-1(c)(2)(ii)(B)*.

(n110)Footnote 108. *IRC § 1274A(c)(2)(B)*.

(n111)Footnote 109. *IRC § 1274A(c)(2)*.

(n112)Footnote 110. See fns 62-66 and accompanying text for the definition of a "potentially abusive situation."

(n113)Footnote 111. *IRC § 1274A(c)(4)*.

(n114)Footnote 112. See *IRC § 1274(c)(3)(C)*. The determination of the total amount of payments is made as of the date of the sale or exchange or, if earlier, the contract date. If the precise amount due under any debt instrument or the precise amount of any other consideration to be received cannot be determined as of that date, the \$250,000 exception applies only if it can be determined that the maximum of the aggregate amount of payments due under debt instruments issued, assumed or taken subject to under the contract, and any other consideration to be received, cannot exceed \$250,000. *Treas Reg § 1.1274-1(b)(2)(B)*. The aggregation rule also applies here: all sales and exchanges which are part of the same transaction (or a series of related transactions) are treated as a single sale. *IRC § 1274(c)(3)(C)(iii)*.

(n115)Footnote 113. *IRC § 483(d)(2)*.

(n116)Footnote 114. *IRC § 6420*, which provides a credit against the federal excise tax on gasoline for gasoline used on a farm for farming purposes, defines a "farm" to include "stock, dairy, poultry, fruit, fur-bearing animal, and truck farms, plantations, ranches, nurseries, ranges, greenhouses or other similar structures used primarily for the raising

of agricultural or horticultural commodities, and orchards."

(n117)Footnote 115. *IRC § 1274(c)(3)(A)*. For purposes of applying the \$1 million limitation, the sales price includes the amount of any liability assumed or taken subject to by the purchaser which is includible in the amount realized from the sale or exchange. *Treas Reg § 1.1274-1(b)(2)(ii)*.

(n118)Footnote 116. *IRC § 1274(c)(3)(B)*.

(n119)Footnote 117. *Treas Reg § 1.121-1(b)(1)*.

(n120)Footnote 118. *Treas Reg § 1.121-1(b)(2)*.

(n121)Footnote 119. "Family" for this purpose has the same basic meaning as in *IRC § 267(c)(4)*, with some modifications added by the *IRC § 483* regulations; "family" includes an individual's brothers or sisters, spouse, parents and grandparents, children and grandchildren. and the spouses of those individuals, giving full effect to any legal adoptions. *Treas Reg § 1.483-3(c)(2)(i)*.

(n122)Footnote 120. *Treas Reg § 1.483-3(b)(2)(ii)*. As interpreted by the regulations, it is not the total sale price of the land but the stated principal amount of the indebtedness arising out of the sale that is critical in applying the \$500,000 limitation. Thus, if an individual sells land to a member of his family for \$650,000, but the purchaser pays \$250,000 down and issues a note for the \$400,000 difference, the entire \$400,000 note is within the jurisdiction of *IRC § 483* even though the sales price exceeds \$500,000. If the seller were to sell additional land to the same member of his family within the same taxable year for a \$150,000 note, only the \$50,000 excess of the \$550,000 sum of the stated principal amounts of the two notes received by the seller over the \$500,000 annual limitation would not satisfy *IRC § 483(e)*. In that case, the regulations would treat the \$150,000 note as if it were two separate debt instruments, one for \$100,000 that qualifies under *IRC § 483(e)* for the 6 percent ceiling on the discount rate and the other for the \$50,000 excess, which does not. See *Treas Reg § 1.483-3(b)(3)*, Examples 1 and 3.

(n123)Footnote 121. In a case where the principal stated amount of a debt instrument falls within the \$500,000 limitation of *IRC § 483(e)* in part, and in part exceeds those limitations, *IRC § 1274* may apply to the excess portion of the stated principal amount. See fn 122, *supra*; *Treas Reg § 1.1274-1(c)*, Example 3.

(n124)Footnote 122. *Treas Reg § 1.1274-1(b)(3)(iii)*; *Treas Reg § 1.483-(c)(3)(i)*.

(n125)Footnote 123. Marital property settlements and the provisions of *IRC § 1041* are discussed in Ch 1, § 1.02[3][d].

(n126)Footnote 124. *IRC § 1274(c)(1)(B)*.

(n127)Footnote 125. *IRC § 483(c)(1)(A)*; *Treas Reg § 1.483-1(a)(1)*.

(n128)Footnote 126. *IRC § 1275(b)(2)*.

(n129)Footnote 127. OID would presumably be nondeductible "personal interest" even without the exception unless the personal use property acquired was a qualified residence of the taxpayer, making the OID deductible "qualified residence interest." See *IRC § 163(h)*. However, exemption from *IRC Section 1274* and *483* would allow the purchaser to avoid the reduction in basis of the personal use property that would be otherwise be required under the OID rules.

(n130)Footnote 128. Although the seller is not covered by the exception, the regulations (*Treas Reg §§ 1.1274-2(b)(3)* and *1.483-1(a)(3)(ii)*) create an administrative exception to both *IRC §§ 1274* and *483* which becomes applicable to the seller if the debt instrument is a "below-market loan" as described in *IRC § 7872(c)(1)*. This does not let the seller off the hook, however, for in that case the imputed interest will be taxed in accordance with the provisions

of IRC § 7872. See fn 17, *supra*.

(n131)Footnote 129. See Ch 19, § 19.05.

(n132)Footnote 130. *Treas Reg § 1.1274-1(b)(3)(ii)* and *Treas Reg § 1.483-1(c)(3)(iii)*; see also fn 126, *supra*. Regarding the basic operation of IRC § 7872, see fn 37, *supra*.

(n133)Footnote 131. *IRC § 1275(a)(1)(B)*. The annuity contract (1) must depend on the life expectancy of one or more individuals; (2) be issued by an insurance company subject to tax under Subchapter L of the Code or by an organization exempt from tax under *IRC § 501(a)* which would be taxable under Subchapter L if it were not tax exempt; and (3) be issued (a) for cash or in exchange for another annuity contract meeting the requirements of *IRC § 1275(a)(1)(B)*, or (b) pursuant to the exercise of an election under an insurance contract by a beneficiary thereof upon the death of the insured party under such contract, or (c) in a transaction involving a qualified pension or employee benefit plan.

(n134)Footnote 132. See *Treas Reg § 1.483-1(c)(iv)*.

(n135)Footnote 133. *IRC § 1274(c)(3)(E)*.

(n136)Footnote 134. *IRC § 483(d)(4)*.

(n137)Footnote 1. This, of course, assumes that the stock is a capital asset in the taxpayer's hands.

(n138)Footnote 2. *IRC § 165(g)(1)*. No sale or exchange is here required, for the section provides that the loss shall be treated as resulting "from [a] sale or exchange, on the last day of the taxable year. ..." If the stock is not a capital asset, the loss may be deducted under § 165(a) as an ordinary loss. *Treas Reg § 1.165-5(b)*.

(n139)Footnote 3. Pub L No 85-866, § 57(a), 72 Stat 1645.

(n140)Footnote 4. S Rep No 1983, 85th Cong, 2d Sess 80 (1958). The Senate Finance Committee was convinced that the provisions would "substantially increase the effectiveness of ... small-business investment companies." S Rep No 1983, 85th Cong, 2d Sess 80 (1958).

(n141)Footnote 5. *IRC § 1242* (emphasis supplied).

(n142)Footnote 6. *Treas Reg § 1.1243-1(a)(1)*.

(n143)Footnote 7. The debentures or stock must be acquired in accordance with Section 304 of the Small Business Investment Act of 1958 (15 USC § 684), and the regulations thereunder. *Treas Reg § 1.1243-1(a)(1)(i)*.

IRC § 582(c)(1) provides the same treatment for losses sustained on the sale or exchange of the debenture itself. But for taxable years beginning after July 11, 1969, any gain realized on the sale of such debenture will be taxed as ordinary income.

(n144)Footnote 8. *IRC § 1243(2)*.

(n145)Footnote 9. *Treas Reg § 1.1243-1(a)(1)(ii)*; *Rev Rul 62-58, 1962-1 CB 158*.

(n146)Footnote 10. *Treas Reg § 1.1243-1(b)*.

(n148)Footnote 12. H Rep No 2198, 85th Cong, 1st Sess, 4 (1958).

(n149)Footnote 13. The term "individual" does not include a trust or estate, *IRC § 1244(d)(4)*. It does include an individual who is a partner in a partnership at the time the partnership acquires § 1244 stock and whose distributive share of partnership items reflects the loss sustained by the partnership. *Treas Reg § 1.1244(a)-1(b)(2)*.

Individual shareholders of an S corporation cannot treat losses on the sale of stock by the corporation as ordinary losses under *IRC § 1244*. *Rath v Commr, 101 TC 196 (1993)* ; *Ltr Rul 9130003* .

(n150)Footnote 14. *IRC § 1244(b)*. Any loss in excess of the applicable limitation will be treated as a capital loss. *Treas Reg § 1.1244(b)-1*.

(n151)Footnote 15. *Treas Reg § 1.1244(a)-1(b)(2)*; *Magee v Commr, TC Memo 1993-305* ; *Harwell v Commr, TC Memo 1974-153* .

(n152)Footnote 16. *Treas Reg § 1.1244(a)-1(b)(2), (c), Ex (2)*; *Harwell v Commr, TC Memo 1974-153* . The regulations echo the language of the Conference Report, H Rep No 2632, 85th Cong, 2d Sess, 43. They were applied to deny ordinary loss treatment in *Prizant v Commr, TC Memo 1971-196* .

(n153)Footnote 17. Taylor & Tripp, "Section 1244; Avoiding Its Problems," 29 *NYU Inst on Fed Tax* 201 (1971).

(n154)Footnote 18. *IRC § 1244(c)(1)*. The provision extends to preferred stock only if issued after July 18, 1984.

Stock issued by a corporation contemplating liquidation does not qualify for ordinary loss treatment under *IRC § 1244*. See, eg, *Heger v Commr, TC Memo 1993-408* .

(n155)Footnote 19. *IRC § 1244(c)(1)(A)* as it read before the Revenue Act of 1978. Language adopted May 21, 1960 to the effect that all of the stock would be issued "within 2 years and by no later than May, 1962," was held to meet the two-year requirement. *Hayden v Commr, 52 TC 1112 (1969)* , *acq* 1970-1 CB xvi.

A denial of § 1244 treatment most often resulted from the absence of an adequate plan. See, eg, *Rickey v Commr, 502 F2d 748 (9th Cir 1974)* ; *Anderson v US, 436 F2d 356 (10th Cir 1971)* ; *Godart v Commr, 425 F2d 633 (2d Cir 1970)* ; *Kaplan v Commr, 59 TC 178 (1972)* ; *Malawer v Commr, TC Memo 1975-351* ; *Fox v Commr, TC Memo 1975-64* ; *Hurd v Commr, TC Memo 1975-6* ; *Frahm v Commr, TC Memo 1974-138* ; *Coloman v Commr, TC Memo 1974-78* , *affd* 540 F2d 427 (9th Cir 1976) .

(n156)Footnote 20. *Treas Reg § 1.1244(c)-1(c)(1)*.

Casco Bank & Trust Co v US, 403 F Supp 687 (D Me 1975) , *aff'd*, 544 F2d 528 (1st Cir 1976) , *cert. denied*, 430 US 907 ; *Farr v Commr, TC Memo 1973-283* (failure to specifically state total dollar consideration to be received for stock prevented resort to § 1244 ordinary loss treatment).

Stock issued for a payment which, alone or together with prior payments, exceeds the maximum amount that can be received under the plan is not considered issued pursuant to the plan and none of such stock will be deemed § 1244 stock. *Treas Reg § 1.1244(c)-2(d), Ex (2)*.

(n157)Footnote 21. *Treas Reg § 1.1244(c)-(2)*; cf *Bruce v US, 279 F Supp 686 (SD Tex 1967)* , *aff'd*, 409 F2d 1317 (5th Cir 1969) . Stock subscribed for prior to adoption can qualify as § 1244 stock, provided it was not issued prior to adoption. *Treas Reg § 1.1244(c)-1(c)(3)*; *Rev Rul 67-256, 1967-2 CB 294* . However, stock issued on the exercise of a stock right or option will be considered issued pursuant to the plan only if the right or option was not outstanding at the time the plan was adopted, the right or option is applicable solely to unissued stock offered under the plan, and the right or option was exercised during the specified period. *Treas Reg § 1.1244(c)-1(c)(2)*.

(n158)Footnote 22. *IRC § 1244(c)(1)(E)* as it read prior to repeal by the Revenue Act of 1978.

(n159)Footnote 23. *IRC § 1244(c)(1)(B)* as it read prior to the Revenue Act of 1978.

(n160)Footnote 24. *IRC § 1244(c)(1)(A)*.

(n161)Footnote 25. Outstanding preferred stock, stock rights, stock warrants, stock options, or securities convertible into stock are deemed prior offerings. *Treas Reg § 1.1244(c)-1(e)*.

(n162)Footnote 26. *IRC § 1244(c)(1)(B)*; *Treas Reg § 1.1244(c)-1(f)*. However, *IRC § 1244(d)(2)* permits the adoption of Regulations permitting common stock received in exchange for qualifying § 1224 stock to be treated as such if the stock is received in a reorganization under *IRC § 368(a)(1)(F)* or its basis is determined by reference to the basis of the exchanged § 1244 stock in the hands of the taxpayer. *Treas Reg § 1.1244(d)-3* authorizes two exceptions other than an "F" reorganization, namely, stock received as a stock dividend and stock received in a reorganization described in *IRC § 368(a)(1)(E)* (recapitalization).

Stock issued in exchange for an earlier advance to the corporation was not § 1244 stock; the initial advance constituted equity rather than debt. *Ginsberg v Commr, TC Memo 1992-372*.

(n163)Footnote 27. *Treas Reg § 1.1244(c)-1(f)*.

(n164)Footnote 28. *IRC § 1244(c)(1)(C)*. The gross receipts test does not apply if, for the period in question, the corporation's deductions, other than the net operating loss deduction and the deduction for dividends received, exceeded its income. *IRC § 1244(c)(2)(C)*.

(n165)Footnote 29. H Rep No 2198, 85th Cong, 1st Sess 4 (1958); *Treas Reg § 1.1244(c)-1(e)(2)*. The regulation was held to be valid in *Davenport v Commr, 70 TC 922 (1978)*. See also *Crigler v Commr, TC Memo 2003-93*.

Stock in a corporation engaged in the business of making small loans to the public could not be § 1244 stock because more than 50 percent of the corporation's gross receipts consisted of interest. *Rev Rul 75-431, 1975-2 CB 346*. The Service could find nothing in the Code, Regulations, or legislative history excepting a corporation actively engaged in the loan business, and earning interest income, from the gross receipts requirement of *IRC § 1244*.

(n166)Footnote 30. *Bates v US, 1976 US Dist LEXIS 15880 (ND Ohio 1976)*, *affd* 581 F2d 575 (6th Cir 1978). The court originally reasoned that it was impossible to derive more than 50 percent of gross receipts from passive income sources if, in fact, there were no receipts. The earlier decision is reported at 36 AFTR2d 75-6074 (ND Ohio 1976).

(n167)Footnote 31. The definition of small business corporation provided by *IRC § 1244(c)(2)* should be compared with that of *IRC § 1361* relating to Subchapter S corporations. The latter is based on stock ownership rather than aggregate capital amount.

(n168)Footnote 32. *IRC § 1244(c)(2)(A)* as it read prior to the Revenue Act of 1978.

(n169)Footnote 33. *IRC § 1244(c)(2)(B)* as it read prior to the Revenue Act of 1978.

(n170)Footnote 34. *IRC § 1244(c)(3)(A)*.

(n171)Footnote 35. *Id.*

(n172)Footnote 36. *Treas Reg § 1.1244(b)-1*.

(n173)Footnote 37. *IRC § 1244(d)(1)(A)*.

(n174)Footnote 38. The effect of *IRC § 1244(d)(1)(A)* can be illustrated by the following example: Assume a

taxpayer transfers property having a basis of \$12,000 and a value of \$10,000 to a corporation in a transaction which requires him to assign a basis of \$12,000 to the stock received. If the stock is subsequently sold for \$5,000, the total realized loss is \$7,000 of which \$5,000 (\$10,000, the basis of the stock for *IRC § 1244* purposes, less \$5,000) would be treated as an ordinary loss under *IRC § 1244*, and \$2,000 treated as a capital loss.

(n175)Footnote 39. *Treas Reg § 1.1244(e)-1(a)*. Poor record keeping at the corporate level prevented the taking of an ordinary loss in *Dwyer v Commr, TC Memo 1991-65*.

(n176)Footnote 40. *Treas Reg § 1.1244(e)-1(b)*.

(n177)Footnote 40.1. *Wong v Commr, TC Memo 1994-202*; *Cournan v Commr, TC Memo 1989-520*.

(n178)Footnote 41. *Notice 94-89*, 1994-2 CB 560.

(n179)Footnote 42. *Treas Reg § 1.1244(e)-1(b)*.

(n180)Footnote 43. *Notice 94-89*, 1994-2 CB 560. The revisions to *Treas Reg § 1.1244(e)-1(b)* will be effective for all open tax years covered by the existing regulations under *IRC § 1244*.

(n181)Footnote 44. *IRC § 165(g)(1)*. See Ch 17 for a discussion of the disallowance of losses on certain obligations not in registered form.

(n182)Footnote 45. *IRC § 165(g)(3)*. A corporation owned all of the stock of a holding corporation that owned all of the stock of a foreign operating company. The ownership format was a consequence of local law that forbade direct ownership of the operating company by a US corporation. The stock of the operating company and, thus, the stock of the holding company became worthless. The Service held, in a Technical Advice Memorandum, that the parent corporation's loss was limited to a capital loss under *IRC § 165(g)(1)*; an ordinary loss is permitted only when the worthless subsidiary is an operating company. *Ltr Rul 8939001*. But in *Ltr Rul 200914021*, a National Office Technical Advice Memorandum ruled that stock of a wholly owned foreign subsidiary that never had any gross receipts in any taxable year, but would have had substantial receipts from operations had its activities been successful, qualified for ordinary loss treatment. The Service reasoned that the purpose of *IRC § 165(g)(3)(B)* is to distinguish operating affiliates from mere investment or holding companies, but in the absence of any gross receipts the test could not fulfill its intended purpose. Since the taxpayer demonstrated that its affiliate was intended to be an operating company, inability to meet the gross receipts test in these circumstances did not prevent the taxpayer from qualifying for ordinary loss treatment.

When an election is made to change the classification of an entity from a corporation to a disregarded entity, the shareholder of the entity is allowed a worthless security deduction under *IRC § 165(g)(3)* if the entity's liabilities exceed the fair market value of all of its assets so that the shareholder receives no payment on its stock on the deemed liquidation of the entity. *Rev Rul 2003-125*, 2003-2 CB 1243.

(n183)Footnote 46. *561 F2d 1023 (1st Cir 1977)*.

(n184)Footnote 1. *IRC § 1091(a)*. The wash sale rule is applicable even if a contract or option to acquire or sell stock or securities settles in, or can be settled in, cash or property other than stock or securities. *IRC § 1091(f)*.

The wash sale rule applies to securities purchased on margin, *Rev Rul 71-316*, 1971-2 CB 311, and when the contract to repurchase is unenforceable but not void *ab initio*, *Est of Estroff v Commr, TC Memo 1983-666*.

On the day following the sale of shares at a loss, the taxpayer sold a "put" option with an exercise price that was substantially higher than the existing market price of the stock. Objective factors, including the spread between option price and market value, led the Service to conclude that there was substantial likelihood that the "put" would be

exercised and that the option was a contract to acquire the stock. Thus, the sale of the "put" invoked the wash sale rule and caused the loss to be disallowed. *Rev Rul 85-87, 1985-1 CB 268* .

(n185)Footnote 2. *38 BTA 811 (1938)* , *aff'd, 108 F2d 429 (3d Cir 1939)* .

(n186)Footnote 3. *38 BTA at 814-815* . The Service defines securities as being "substantially identical ... if they are not substantially different in any material feature ... or because of differences in several material features considered together." *Rev Rul 58-211, 1958-1 CB 529, 530* . Thus differences in several material factors considered together would make securities not substantially identical even though each of the differences considered alone might not produce this result.

(n187)Footnote 4. *108 F2d at 430* .

(n188)Footnote 5. *38 BTA at 817-818* .

(n189)Footnote 6. *29 AFTR 1298 (WD Pa 1941)* , *rev'd on other grounds 129 F2d 148 (3d Cir 1942)* .

(n190)Footnote 7. *1958-1 CB 529, 530* .

(n191)Footnote 8. See also *Campbell v Commr, 39 BTA 916 (1939)* , *rev'd on other grounds 112 F2d 530 (2d Cir 1940)* , *rev'd 313 US 15 (1941)* . The date difference in *Campbell* was over five years; the nearest maturity date more than twenty-three years after the purchase and sale. The bonds were not substantially identical. However, the bonds were also issued on different dates, bore different interest payment dates, and were different in form (one was registered; the other bore coupons). IT 2672 , XII-1 CB 72 (1935) , held that a difference of approximately three months on bonds that were to mature forty-five and forty-eight years after the sale was substantial. A subsequent ruling, *Rev Rul 58-210, 1958-1 CB 523* , regarded the prior ruling as borderline, but stated that it would be followed in like cases. IT 2672 was declared obsolete in *Rev Rul 69-43 1969-1 CB 310* . The 1958 ruling also held that any reliance on different issuance dates or interest payment dates was unwarranted.

(n192)Footnote 9. The statement is contained in an unpublished ruling. See Dixon, "Wash Sales and Short Sales," *NYU 18th Inst on Fed Tax* 335, 350 (1960). See also *Rev Rul 60-195, 1960-1 CB 300* .

(n193)Footnote 10. IT 2778, XIII-1 CB 79 (1934). The securities here were debentures of different series identical in all respects except for the date of issue and the amounts to be redeemed annually. IT 2778 was eventually revoked by IT 4081, *1952-1 CB 65*, on the ground that the transaction involved in the former was one in which gain or loss would no longer be recognized. IT 4081 was declared obsolete in *Rev Rul 69-44, 1969-1 CB 312* .

(n194)Footnote 11. *Rev Rul 58-210, 1958-1 CB 523* . See also *Rev Rul 76-346, 1976-2 CB 247* .

(n195)Footnote 12. *Rev Rul 60-195, 1960-1 CB 300* .

(n196)Footnote 13. *Hanlin v Commr, 38 BTA 811 (1938)* , *aff'd 108 F2d 429 (3d Cir 1939)* . This portion of the *Hanlin* decision held that bonds of two different Federal Land Banks were not substantially identical because of the difference in the collateral securing the bonds. The Service issued its nonacquiescence in this part of the decision on the ground that each Land Bank was secondarily liable on the bonds of the other. *1939-1 CB (Pt. 1) 55* . In *Rev Rul 59-44, 1959-1 CB 205* , the primary obligors were not secondarily liable with respect to the other's obligations; the securities were not substantially identical.

The issue of whether substantial identity prevented the realization of a loss in the first instance was present in *Cottage Savings Assn v Commr, 111 S Ct 1503 (1991)* , and *US v Centennial Savings Bank FSB, 111 S Ct 1512 (1991)* . In both cases, the losses resulted from mortgage exchanges made pursuant to a regulatory directive of the Federal Home Loan Bank Board that determined that the savings and loan associations need not report losses associated with mortgages that

were exchanged for "substantially identical" mortgages held by other lenders. Notwithstanding the characterization of the new mortgages by the Federal Home Loan Bank Board for accounting purposes, the Supreme Court held that, for tax purposes, the new mortgages were materially different from the old because they embodied legally different entitlements--different obligors and different security.

(n197)Footnote 14. Substantial identity was found where convertible preferred stock and the common stock into which it was convertible, had selling prices that did not vary greatly from the conversion ratio. *Rev Rul 77-201, 1977-1 CB 250* .

(n198)Footnote 15. *Kidder v Commr, 30 BTA 59 (1934)* .

(n199)Footnote 16. *IT 2585, X-2 CB 182 (1931)* .

(n200)Footnote 17. The contract to repurchase can be oral. *Stein v Commr, TC Memo 1977-241* .

The wash sale rule does not apply where the purchaser has the option to put the acquired stock to the seller. *GIC Corp v US, 77 AFTR2d 96-2411 (SD Fla 1996)* .

(n201)Footnote 18. *Rev Rul 56-406, 1956-2 CB 523* .

(n202)Footnote 19. *Id* at 525 ; cf *Ltr Rul, Feb 27, 1957, 5 Stand Fed Tax Rep (CCH) P 6332 (1957)* (for short sale purposes, a call (option to purchase) is not substantially identical to stock subject to the call).

Preferred stock convertible into common stock at a shareholder's election without restriction was treated as an option to purchase in *Rev Rul 77-201* , N 13, *supra*.

(n203)Footnote 20. *Rev Rul 56-452, 1956-2 CB 525* . The shares acquired pursuant to the exercise of the option will be deemed to have been acquired on the date of issuance. However, to the extent that the grant of the option to acquire shares has resulted in the disallowance of a loss under *IRC § 1091*, the acquisition of the shares through exercise of the option will not cause a further disallowance of any loss realized on shares sold within the specified period before and after the stock issuance.

(n204)Footnote 21. Tax Reform Act of 1984, § 106(c)(2).

(n205)Footnote 22. The supervision of one's investments, no matter how extensive, is not a trade or business, *Higgins v Commr, 312 US 212 (1941)* .

A corporation whose only business was buying or selling securities for profit through a stock exchange was held not a dealer in securities. *Donander Co v Commr, 29 BTA 312 (1933)* .

(n206)Footnote 23. *Treas Reg § 1.1091-1(b)*. The regulation states that "the provisions of [Section 1091] shall be applied to the losses in the order in which the stock or securities the disposition of which resulted in the respective losses were disposed of (beginning with the earliest disposition)."

(n207)Footnote 24. *Treas Reg § 1.1091-1(b); cf Coulter v Commr, 32 BTA 617 (1935)* .

(n208)Footnote 25. *Rev Rul 56-602, 1956-2 CB 527, at 528* . The Service based its conclusion as to legislative intent on consistent reference in discussions and reports to "new acquisition," "repurchasing," and "buying back."

A taxpayer's sale of shares at a loss within 30 days of the acquisition of an equal number of shares through the exercise of stock rights is a wash sale. The fact that the principal motive for the stock subscription is not the replacement of shares sold at a loss, but the desire to take advantage of a low price, does not alter the status of the

transaction. *Rev Rul 71-520, 1971-2 CB 311* .

(n209)Footnote 26. *Rev Rul 70-231, 1970-1 CB 171* .

(n210)Footnote 27. *IRC § 1091(b); Treas Reg § 1.1091-1(c)*.

(n211)Footnote 28. *IRC § 1091(c); Treas Reg § 1.1091-1(d)*.

(n212)Footnote 29. *IRC § 1091(d)*. See § 1.05[9][d] *supra*, for the application of *IRC § 1091(d)* to mutual fund shares with respect to which an average basis election has been made.

(n213)Footnote 30. *IRC § 1091(a)*. Emphasis supplied.

The Service takes the position that a loss on a sale by a cooperative bank of Government National Mortgage Association mortgage-backed certificates should be disallowed under *IRC § 1091* when the taxpayer acquires substantially similar certificates within 30 days of the sale. The certificates are securities for purposes of the wash sale rules. *GCM 39551* .

(n214)Footnote 31. Thus, it has been held that "when issued" securities fall within the scope of *IRC § 1091(a)*. *IT 3858, 1947-2 CB 71*. ("When issued" securities are the subject matter of Ch 11, *infra* .)

(n215)Footnote 32. A like conclusion has been reached in the case of a membership certificate in a commodity exchange, *Horne v Commr, 5 TC 250 (1945)* , as well as in the case of foreign money. *Rev Rul 74-218, 1974-1 CB 202* .

(n218)Footnote 35. *Rev Rul 71-568, 1971-2 CB 312* .

(n219)Footnote 36. *91 TC 713 (1989)* , *aff'd, 905 F2d 241 (8th Cir 1990)* .

(n220)Footnote 37. Short sales are discussed in Ch 10, *infra*.

(n221)Footnote 38. *Treas Reg § 1.1233-1(a)(1956)*; *cf Doyle v Commr, 286 F2d 654 (7th Cir 1961)* .

(n222)Footnote 39. *Treas Reg § 1.1091-1(g)*.

(n223)Footnote 40. *Treas Reg § 1.1091-1(g)*.

(n224)Footnote 41. Alternatively, the taxpayer could replace the closed short position by entering into a new short sale after the beginning of the next taxable year in order to claim a tax loss without any essential change in position.

(n225)Footnote 42. *Rev Rul 78-414, 1978-2 CB 214* ; *Rev Rul 77-185, 1977-1 CB 48* .

(n226)Footnote 43. *Horne v Commr, 5 TC 250 (1945)* .

(n227)Footnote 44. *Shoenberg v Commr, 77 F2d 446 (8th Cir 1935)* , *cert denied, 296 US 586* ; *Rev Rul 72-225, 1972-1 CB 59* .

(n228)Footnote 45. Emphasis supplied. A mutual life insurance company realized a loss on the sale of shares of stock held in its general asset accounts. Within 30 days, the company purchased substantially identical stock and allocated the shares to its segregated asset accounts. The loss was disallowed pursuant to *IRC § 1091*; the company was

not a separate taxpayer with respect to its segregated accounts. *Rev Rul 74-4, 1974-1 CB 51* .

(n229)Footnote 46. *Twining v Commr*, 32 BTA 600 (1935) , *aff'd* 83 F2d 954 (2d Cir 1936) , *cert denied* 299 US 578 (husband-seller, wife-buyer); *Cole v Helburn*, 4 F Supp 230 (WD Ky 1933) (father-seller, son-buyer). However, depending upon the relationship, the loss may still be disallowed, under *IRC § 267*, discussed in § 2.07[4], or, if the buyer is the spouse of the seller, treated as a transfer governed by *IRC § 1041*.

(n230)Footnote 47. *Brochon v Commr*, 30 BTA 404 (1934) ; *Weyl v Commr*, 38 BTA 850 (1938) ; *Kaplan v Commr*, 21 TC 134 (1953) , *acq* 1954-1 CB 5 .

(n231)Footnote 48. *Cole v Helburn*, N 46, *supra*; *Atkins v Commr*, 28 BTA 500 (1933) , *aff'd* 76 F2d 387 (5th Cir 1935) .

(n232)Footnote 49. *Ltr Rul*, Oct 11, 1946, 1956 *Fed Taxes (P-H)* P 76,039 (1947).

(n233)Footnote 50. *Security First Natl Bank v Commr*, 28 BTA 289 (1933) . In *Rev Rul 2008-5, 2008-1 CB 271* , the Internal Revenue Service took the position that a sale by an individual within 30 days before or after a purchase by that individual's IRA or Roth IRA will trigger the wash sale rule.

(n234)Footnote 1. See *Treas Reg § 1.267(a)-1(c)*; *Scully v US*, 840 F2d 478 (7th Cir 1988) , discussed at n 5, *infra*.

(n235)Footnote 1.1. *IRC § 267(b)(1), (c)(4)*. A taxpayer's stepmother is not his ancestor. *Rev Rul 71-50, 1971-5 CB 106* . The existence of "family hostility" does not prevent application of the disallowance rule. *Miller v Commr*, 75 TC 182 (1980) .

(n236)Footnote 2. *IRC § 267(b)(2)*. The term "individual" is strictly construed. *Est of Hanna v Commr*, 320 F2d 54 (6th Cir 1963) (estate not an "individual").

Transfers of stock between an individual and his controlled corporation resulted in gain with respect to some shares and loss with respect to others. *IRC § 267(a)(1)* disallowed the entire loss while *IRC § 61(a)* mandated inclusion in income of the entire gain; the two could not netted. *Rev Rul 76-377, 1976-2 CB 89* .

A controlling shareholder who voluntarily surrenders a portion of his stock to the corporation, and continues to retain control, does not sustain an immediate loss deductible for income tax purposes as a result of the surrender of stock. See, eg, *Yei v Commr*, *TC Memo 1997-57* .

(n237)Footnote 3. *IRC § 267(b)(3)*. The term "controlled group" has the meaning given it by *IRC § 1563(a)* except that it does not include a DISC, and the percentage of stock ownership required is 50 percent rather than 80 percent. *IRC § 267(f)(1), (3)(A)*.

The loss in this instance is not disallowed but is deferred until the property is transferred outside the controlled group and there would be recognition of the loss under consolidated return principles or until such other time as may be prescribed by regulations. *IRC § 267(f)(2)*.

Where a corporation that is a member of a controlled group is acquired by an unrelated third party, thereby terminating the controlled group relationship, and that corporation simultaneously sells an asset at a loss to a member of the former controlled group, the loss is not deferred or denied. *Turner Broadcasting System Inc v Commr*, 111 TC 315 (1998) .

In *Transport Mfg & Equip Co v Commr*, *TC Memo 1968-190* , *aff'd*, 431 F2d 729 (8th Cir 1970) , the loss was disallowed even though *IRC § 267* was inapplicable. The sale between the related corporations was at a price which the Tax Court found to be grossly inadequate. The "loss" was treated as a contribution to the purchasing corporation by the

shareholders of the taxpayer.

(n238)Footnote 4. *IRC § 267(b)(4)*.

(n239)Footnote 5. *IRC § 267(b)(5)*. Losses on sales of securities between trusts having a common trustee and same income beneficiary, but created by different grantors, were allowed in *Widener Trust No 5 v Commr*, 80 TC 304 (1983) , *acq*, 1984-1 CB 2 . None of the relationships specified in *IRC § 267* existed, and though the Tax Court acknowledged that this did not insure the deductibility of the losses, it found that since the transactions were "bona fide" (referencing *Treas Reg § 267(a)-1(c)*) there was no reason why the losses should be disallowed. But see *Scully v US*, 840 F2d 478, n 1 , which denied a deduction for losses produced by sales of real estate between family trusts which, similarly, did not fall within any of the categories in *IRC § 267*. The Court of Appeals held that the losses still had to qualify under *IRC § 165*, which ever since *Higgins v Smith*, 308 US 473 (1940) has incorporated the principle that a sale of property at a loss will not be given significance for tax purposes if the seller continues to retain dominion and control over the property through his control of the purchaser. Though decided under pre-§ 267 law, the Court of Appeals made clear that the *Higgins v Smith* principle continues to apply after *IRC § 267*. The Court of Appeals distinguished the result reached by the Tax Court in *Widener* on the ground that co-trustees of the buyer and seller trusts in that case were different, the termination dates of the trusts were significantly different, and the trusts' investment objectives were different. In *Widener*, therefore, because of the relative independence of the buyer and seller trusts, the sale was found to be "bona fide." In *Scully*, as a result of the integrated nature of the buying and selling trusts, the sale was not "bona fide."

(n240)Footnote 6. *IRC § 267(b)(6)*. *IRC § 267* does not preclude a deduction for a loss sustained by an estate upon a sale to the executor. The sale is not between related parties as defined in the Code. *Rev Rul 77-439*, 1977-2 CB 85 .

(n270)Footnote 4. For this purpose, an applicable straddle is any straddle defined in *IRC § 1092(c)*, namely offsetting positions with respect to personal property. *IRC § 1258(d)(1)*.

(n271)Footnote 5. *IRC § 1258(c)*.

(n272)Footnote 6. *IRC § 1258(d)(5)(A)*. An "options dealer" is defined in *IRC § 1256(g)* as any person registered with an appropriate securities exchange as a market maker or specialist in listed options. A "commodities trader" is, generally, a person who is a member of a domestic board of trade that is designated as a contract market by the Commodity Futures Trading Commission. *IRC § 1258(d)(5)(B)*. The term also includes a person entitled to trade as a member, such as a lessee of a membership or an entity that is, or is affiliated with, a beneficial owner of a membership,

if the entity is eligible for any preferential rates available to members with respect to fees or margins imposed by the board of trade or for the clearing of trades on the board of trade. HR Rep No 213, 103d Cong, 1st Sess 80 (1993).

(n273)Footnote 7. A "limited entrepreneur" is a person who has an interest in an enterprise other than as a limited partner, and does not actively participate in the management of the enterprise. *IRC § 464(e)(2)*.

(n274)Footnote 8. *IRC § 1258(d)(5)(C)*.

(n275)Footnote 9. *IRC § 1258(d)(3)(A)*.

(n276)Footnote 10. *IRC § 1258(d)(3)(B)*.

(n277)Footnote 11. In determining the taxpayer's net investment in any conversion transaction, there is included the fair market value of any position that becomes a part of the transaction as of the time that it becomes a part. *IRC § 1258(d)(4)*.

(n278)Footnote 12. S Rep No 103-36, 103d Cong, 1st Sess 56 (1993).

(n279)Footnote 13. S Rep No 103-36, 103d Cong, 1st Sess 56-57 (1993).

(n280)Footnote 14. S Rep No 103-36, 103d Cong, 1st Sess 57 (1993).

(n281)Footnote 15. *Treas Reg § 1.1258-1(b)(1)*. For this purpose, a built-in loss means (1) a built-in loss as defined in *IRC § 1258(d)(3)(B)* (see text at N 10, *supra*), and (2) if a taxpayer realizes gain or loss on any one position of a conversion transaction, as of the date that gain or loss is realized, any unrecognized loss in any other position of the conversion transaction that is not disposed of, terminated, or treated as sold under any provision of the Code or regulations within 14 days of and within the same taxable year as the realization event. *Treas Reg § 1.1258-1(c)*.

(n282)Footnote 16. *Treas Reg § 1.1258-1(b)(2)*.

(n283)Footnote 1. *IRC § 1260(a)*. Net underlying capital gain is the aggregate net capital gain that the taxpayer would have had (i) if the financial asset had been acquired for fair market value on the date the constructive ownership transaction was opened and sold for fair market value on the date the transaction was closed, and (ii) if only gains and losses that would have resulted from the deemed ownership were taken into account. The amount of net underlying long-term capital gain is treated as zero unless the amount thereof is established by clear and convincing evidence. *IRC § 1260(e)*.

The provision applies to transactions entered into after July 11, 1999. It is expected that a contract, option, or other arrangement entered into or exercised after that date that extends or modifies the terms of an earlier transaction will be subject to *IRC § 1260(a)*. H Rep 106-478, 106th Cong, 1st Sess (1999).

No inference is intended as to the proper treatment of a constructive ownership transaction entered into before July 12, 1999. H Rep 106-478, 106th Cong, 1st Sess (1999).

(n284)Footnote 2. *IRC § 1260(d)(2)*.

(n285)Footnote 3. *IRC § 1260(c)(1)*.

(n286)Footnote 4. *IRC § 1260(c)(2)*.

(n287)Footnote 5. *IRC § 1260(d)(1)*. A forward contract is any contract to acquire in the future (or provide or receive credit for the future value of) any financial asset. *IRC § 1260(d)(4)*.

(n288)Footnote 6. *IRC § 1260(d)(3)*.

(n289)Footnote 7. *IRC § 1260(f)*.

(n290)Footnote 8. *IRC § 1260(b)(1), (2)*. The applicable federal rate for this purpose is the applicable federal rate determined under *IRC § 1274(d)*, compounded semiannually, that would apply to a debt instrument with a term equal to the period the transaction was open. *IRC § 1260(b)(3)*.

(n291)Footnote 9. *IRC § 1260(b)(4)*.

(n292)Footnote 10. *IRC § 1260(b)(1)*.

(n293)Footnote 11. *IRC § 1260(g)*.

(n294)Footnote 1. Gain or loss attributable to the cancellation, lapse, expiration, or other termination of a securities futures contract that is a capital asset in the hands of the taxpayer is treated as capital gain or loss. *IRC § 1234A*.

A securities futures contract is any security future as defined in § 3(a)(55)(A) of the Securities Exchange Act of 1934. *IRC § 1234B(c)*. The Service may prescribe regulations regarding the status of contracts the value of which are determined directly or indirectly by reference to an index that becomes (or ceases to be) a narrow-based security index (as defined for purposes of *IRC § 1256(g)(6)*).

A securities futures contract is not treated as a commodity futures contract for purposes of the Code. *IRC § 1234B(d)*.

(n295)Footnote 2. *IRC § 1234B(b)*. Rules relating to straddles and the special holding period rules applicable to short sales may apply in lieu of the stated rule.

(n296)Footnote 3. See § 9.02[4].

CHAPTER 2A The Alternative Minimum Tax

1-2A Taxation of Securities Transactions § 2A.01

§ 2A.01 Introduction

The Tax Reform Act of 1969 introduced the concept of the minimum tax on preferences, a provision designed to limit the escape from taxation that could be achieved by taxpayers who availed themselves of the preferential treatment of certain types of income and the allowance of certain deductions. The Revenue Act of 1978 brought with it a new concept, the alternative minimum tax, operating only with respect to noncorporate taxpayers and concerned with the excluded portion of long-term capital gains and with excess itemized deductions. The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) changed the ambit of the alternative minimum tax by including within it all items of tax preference. At the same time, the minimum tax was made applicable only to corporations. Finally, the Tax Reform Act of 1986 repealed the corporate minimum tax and replaced it with an alternative minimum tax applicable to both corporate and noncorporate taxpayers, which is what we have today.ⁿ¹

As currently structured, the alternative minimum tax is calculated on an expanded tax base known as "alternative minimum taxable income" (AMTI).ⁿ² Computation of AMTI starts with the taxable income on which the taxpayer's regular tax is computed. Adjustments prescribed by *IRC Sections 56-59* are added or subtracted from this starting point to arrive at AMTI. These adjustments are generally intended to eliminate or modify departures from "economic income" found in the regular income tax, such as the exclusion of interest on state and local bonds, the allowance of deductions for personal expenditures, and the expensing of items that would be capitalized under economic concepts. After AMTI is determined, it is reduced by an "exemption amount." The excess of AMTI over the exemption amount is multiplied by an alternative minimum tax rate of (1) 20 percent, in the case of corporations, or (2) 26 percent of the first \$175,000, and 28 percent of the amount over \$175,000, in the case of individuals. The result is the taxpayer's "tentative minimum tax."ⁿ³ The alternative minimum tax actually imposed, however, is limited to the excess, if any, of the tentative minimum tax for the taxable year over the regular tax imposed in such year.ⁿ⁴

Since long-term capital gains are no longer considered a preference for minimum tax purposes, the alternative minimum tax is of considerably less importance to investors in stocks and securities than it once was. Still, all taxpayers need to be aware of the minimum tax or risk unpleasant surprises. For example, interest on some types of municipal bonds may be tax exempt for regular tax purposes but subject to the alternative minimum tax. Consulting fees for legal, accounting and investment advice may be deductible for regular tax purposes but nondeductible in the alternative minimum tax base. A taxpayer may sell investments producing short-term capital gain believing the gain will be absorbed by losses from other investments, only to find that the losses disappear after adjustments are made for alternative minimum tax purposes. Some acquaintance with the alternative minimum tax, then, is prudent for securities investors as for other

taxpayers.

The remainder of this chapter will review the more significant adjustments made to regular taxable income in arriving at AMTI;ⁿ⁵ the calculation of the tax;ⁿ⁶ and circumstances under which a taxpayer may be able to recover minimum taxes paid in prior years through the minimum tax credit.ⁿ⁷

FOOTNOTES:

(n1)Footnote 1. "Small corporations" with average gross receipts of not more than \$7,500,000 annually are wholly exempt from the alternative minimum tax. *IRC § 55(e)*.

(n2)Footnote 2. *IRC § 55(b)(2)*.

(n3)Footnote 3. *IRC § 55(b)*. The 26 percent rate is applied to the first \$87,500 in the case of a married person filing separately, and 28 percent to any excess over that amount. *IRC § 55(b)(1)(A)(iii)*. Lower maximum rates of alternative minimum tax are applied to the net capital gain of noncorporate taxpayers and to the "qualified timber gain" of corporations. See *IRC §§ 55(b)(3)* and *55(b)(4)*, respectively.

CHAPTER 2A The Alternative Minimum Tax

1-2A Taxation of Securities Transactions § 2A.02

§ 2A.02 Alternative Minimum Taxable Income: A Separate Tax Base

Treasury regulations state that "except as otherwise provided by statute, regulations or other published guidance issued by the Commissioner, all Internal Revenue Code provisions that apply in determining the regular taxable income of a taxpayer also apply in determining the alternative minimum taxable income of the taxpayer."¹ The key words are "except as otherwise provided..." Regular taxable income is the starting point, but the adjustments prescribed by the minimum tax provisions, and adjustments generated by those adjustments, effectively create a second tax base for taxpayers to contend with, one that in many cases requires keeping an additional set of books. Some adjustments affect only individuals, others affect only corporations, and others affect both. Some adjustments include items that would otherwise escape taxation completely, while other adjustments merely affect the timing of income or deductions. Taken together, the adjustments potentially affect all taxpayers and can produce an AMTI tax base that is very different from the taxpayer's regular taxable income.

[1] Income Items

[a] Tax-exempt Interest

IRC Section 57(a)(5) treats interest on municipal bonds that are "specified private activity bonds" as a tax preference item, adding the interest to income for AMTI purposes. As a general rule, interest on private activity bonds is already includible in income for regular tax purposes, making an AMTI adjustment seemingly superfluous, but interest on a subset of private activity bonds, known as "qualified bonds," is exempt from regular tax.¹ Private activity bonds that pay tax-exempt interest include (a) qualified Section 501(c)(3) bonds; (b) exempt facility bonds, (3) qualified mortgage bonds, (4) qualified veterans' mortgage bonds, (5) qualified small issue bonds, (6) qualified student loan bonds, and (7) qualified redevelopment bonds.²

Although *IRC Section 57(a)(5)* begins by nominally taxing interest on all such tax-exempt qualified bonds, statutory exceptions exclude interest on the first four types of qualified bonds from the AMTI adjustment.³ Furthermore, interest on any bonds that remain subject to *IRC Section 57(a)(5)*, if such bonds are issued in 2009 or 2010, may not be considered an item of tax preference nor taken into account in any way in calculating AMTI.⁴

[b] Gain on Qualified Small Business Stock

IRC Section 1202 excludes from the gross income of taxpayers other than corporations a percentage of the gain realized

on the sale or exchange of qualified small business stock held for more than 5 years. The excluded amount is generally 50 percent of the gain but can be 60 percent or as much as 75 percent of the gain in certain cases.ⁿ⁵ *IRC Section 57(a)(7)* recaptures a portion of the excluded gain in calculating AMTI by including in income an amount currently equal to 7 percent of the gain excluded from gross income by *IRC Section 1202*.ⁿ⁶

[c] Income from Exercise of Incentive Stock Options

The income that ordinarily would be recognized when an employee purchases stock from an employer at a price below its fair market value is excluded by *IRC Section 421(a)* for regular tax purposes if the purchase is made pursuant to an "incentive stock option" ("ISO") described in *IRC Section 422*.ⁿ⁷ This exclusion is considered a tax preference under *IRC Section 56(b)(3)*, however, and the employee who exercises an ISO must disregard *IRC Sections 421* and *422* in calculating income for AMTI purposes. If the stock is transferrable or not subject to a substantial risk of forfeiture, the employee must include in income for alternative minimum tax purposes the difference between the fair market value of the stock and its option or exercise price in the taxable year the option is exercised.ⁿ⁸

The ISO adjustment has proven to be one of the most controversial tax preferences addressed in the alternative minimum tax because the AMTI adjustment leaves the employee at risk that the value of the stock received at the time the option is exercised may decline before the stock can be sold, so that the employee ends up having paid alternative minimum tax on a substantial amount of "phantom income." *IRC Section 56(b)(3)* contains two provisions that partially address the problem. First, *IRC Section 56(b)(3)* provides that the adjusted basis of stock acquired pursuant to the exercise of an ISO is stepped up to its fair market value on the option exercise date for AMTI purposes, consistently with the amount of income required to be recognized under that subsection. Second, if the stock is sold at a loss (calculated using its AMTI basis) before the end of the taxable year in which the option was exercised, the measure of income on exercise of the option for minimum tax purposes is the difference between the option price and the price actually received for the stock rather than the higher fair market value of the stock at time the option was exercised.ⁿ⁹

Neither of these provisions is particularly helpful, however, if the stock is sold at a loss in a year subsequent to the year in which the ISO was exercised, as was discovered by executives who exercised ISOs during the "dot.com" bubble in 1999 and 2000. They paid alternative minimum tax on the substantial spreads between the exercise price and the fair market value of their companies' high flying stocks, only to watch their stocks become worthless (or nearly so) when the bubble burst in 2001. Although the step-up in basis produced substantial losses for AMTI purposes when the stock became worthless or was sold at a fraction of its exercise date value, the losses were capital losses that could only be used to offset capital gains (of which there were precious little in 2001) plus \$3,000 of ordinary income.ⁿ¹⁰ Further, since capital losses cannot be carried back by individuals,ⁿ¹¹ and as noted are generally not deductible from ordinary income in any event, there was no way the taxpayers could offset their AMTI stock losses against the AMTI income that had been recognized on exercise of the ISO in a prior year.

Although taxpayers fought these conclusions in the courts, they were uniformly unsuccessful.ⁿ¹² The cases affirmed the basic principle referred to at the beginning of this section: even though the alternative minimum tax has its own tax base separate from regular taxable income, in the absence of alternative minimum tax provisions providing specifically to the contrary Code sections applicable in calculating regular taxable income (such as the capital loss limitations in *IRC Section 1211* and the limitation on loss carrybacks in *IRC Section 1212*) also apply for purposes of calculating AMTI.ⁿ¹³ Finally, in an extraordinary measure, Congress in 2008 simply abated (forgave) all taxes (along with interest and penalties) due and unpaid on AMTI income resulting from the exercise of an ISO in all taxable years ending before January 1, 2008, while leaving the underlying problem unresolved for 2008 and future years.ⁿ¹⁴

[d] Adjusted Corporate Earnings (ACE) Adjustment

The adjusted current earnings or "ACE" adjustment utilizes an alternative tax base within the alternative minimum tax base, applicable only to corporations.ⁿ¹⁵ To calculate the ACE adjustment, a corporate taxpayer must first calculate its

"adjusted current earnings" which equals AMTI (without any ACE adjustments, and without regard to the alternative tax net operating loss deduction) modified by the adjustments prescribed in *IRC Section 56(g)(4)*.ⁿ¹⁶ The actual ACE adjustment equals 75 percent of the excess of adjusted current earnings over AMTI, which is added to the AMTI tax base.ⁿ¹⁷ If AMTI exceeds adjusted current earnings, a negative ACE adjustment results, equal to 75 percent of the difference between AMTI and adjusted current earnings. The negative adjustment may be deducted from the AMTI tax base provided, however, that the amount deducted may not exceed the net amount (if any) by which AMTI was increased by ACE adjustments in prior years.ⁿ¹⁸

[i] The Earnings and Profits Standard

The adjustments in *IRC Section 56(g)(4)* are designed to make adjusted current earnings correspond roughly to the corporation's earnings and profits for the current year.ⁿ¹⁹ Consistent with that view, *IRC Section 56(g)(4)* conforms AMTI to the earnings and profits standard by adding (1) income items taken into account in calculating earnings and profits but omitted from AMTI, and (2) deductions allowed in computing AMTI that are not allowed in calculating earnings and profits.ⁿ²⁰ The alignment between current earnings and profits and adjusted current earnings is not perfect, as might be inferred from use of the word "adjusted." Congress has sanctioned many exceptions to the earnings and profits standard, usually to preserve tax incentives it considers especially important by not subjecting the special exclusions or deductions associated with them to the alternative minimum tax. Conversely, however, some deductions are allowable in computing earnings and profits but disallowed for various reasons for regular tax and AMTI purposes; typically, no adjustment is permitted to allow a deduction for such disallowed expenses in computing the ACE adjustment.ⁿ²¹

Since earnings and profits is the standard that the ACE adjustment aims for, a necessary threshold question is: what income and deduction items are taken into account in the computation of "earnings and profits"? The statute provides that for purposes of calculating the ACE adjustment the term "earnings and profits" has the same meaning as in Subchapter C,ⁿ²² but there is no comprehensive statutory definition of "earnings and profits" in Subchapter C or elsewhere in the Code.ⁿ²³

Congress authorized the Treasury to issue guidance on this question,ⁿ²⁴ and in response it has provided "partial lists" of items that increase the ACE adjustment either because they are excluded from gross income for regular tax and AMTI purposes but included in earnings and profits,ⁿ²⁵ or are deductible for AMTI purposes but not earnings and profits purposes.ⁿ²⁶ There is also a partial list of items of income and deduction that are treated consistently in calculating both AMTI and earnings and profits and therefore require no ACE adjustment.ⁿ²⁷ These regulations have been deemed legislative in character, so that their provisions are entitled to "controlling weight" unless in a particular instance they are found to be "arbitrary, capricious, or manifestly contrary to the statute."ⁿ²⁸

The Treasury regulations also make a significant but appropriate concession regarding the ACE adjustment: it is only intended to reach permanent discontinuities between AMTI and earnings and profits, not temporary timing differences.ⁿ²⁹ Thus, even though an eligible taxpayer that uses the completed contract method of accounting to defer income for regular tax and AMTI purposes is required to use the percentage of completion method in calculating earnings and profits,ⁿ³⁰ no ACE adjustment is required under *IRC § 56(g)(4)(B)* because the income is only temporarily deferred and will ultimately be included in regular taxable income and AMTI.ⁿ³¹ Similarly, a deduction claimed by the taxpayer under *IRC Section 196* for unused research credits attributable to amounts expended on research in prior years does not increase its ACE adjustment even though no deduction is taken for such expenditures in calculating earnings and profits for the current year because earnings and profits were previously reduced by a deduction for the expenditures in the year they were made.ⁿ³²

The regulations further provide that in calculating adjusted current earnings, as in calculating AMTI, all Internal Revenue Code provisions that apply in determining the regular taxable income of a taxpayer also apply in determining adjusted current earnings, except to the extent the statute, regulations or guidance from the Internal Revenue Service

provide otherwise.ⁿ³³ In applying Internal Revenue Code provisions, however, the adjustments of *IRC Section 56(g)* must be taken into account.ⁿ³⁴ For example, if a manufacturer's depreciation of plant and equipment is \$80,000 for regular tax purposes, \$60,000 for AMTI purposes, and \$40,000 for ACE purposes, its adjusted basis in such plant and equipment will be \$20,000 less for AMTI than for regular tax purposes, and \$40,000 less for ACE purposes than for regular tax purposes. Moreover, if *IRC Section 263A* requires that the manufacturer capitalize depreciation into cost of goods sold for regular tax and AMTI purposes, it must also capitalize the depreciation in calculating adjusted current earnings, and the basis of its closing inventory will consequently be different depending on whether regular taxable income, AMTI, or adjusted current earnings is being calculated.ⁿ³⁵

The most significant item excluded from AMTI but includible in earnings and profits is undoubtedly tax-exempt interest on municipal bonds, which must be added back to AMTI in calculating the ACE adjustment.ⁿ³⁶ Interest on qualified private activity bonds that is exempt for regular tax purposes but includible in AMTI does not require an ACE adjustment. However, interest on qualified bonds that are excepted from the tax preference provisions of *IRC Section 57(a)(5)*ⁿ³⁷ must be included in the ACE adjustment unless a specific exception also applies for ACE purposes. Such exceptions have been made for interest on exempt facility bonds, qualified mortgage bonds, and qualified veterans' mortgage bonds, the interest on which is consequently excluded from adjusted current earnings as well as AMTI.ⁿ³⁸

If an item of income is included in the ACE adjustment because it is excluded from AMTI but included in earnings and profits, any expense related to that item which would have been deductible had the item been includible in gross income for AMTI purposes is allowable for purposes of the ACE adjustment.ⁿ³⁹ For example, if a corporate taxpayer is required to add otherwise tax-exempt interest on municipal bonds to AMTI for purposes of calculating the ACE adjustment, the taxpayer is entitled to deduct any interest paid or incurred to purchase or carry the bonds. The deduction is allowed notwithstanding *IRC Section 265(a)(2)*, which disallows the deduction when the municipal bond interest is excluded from gross income for regular and alternative minimum tax purposes.ⁿ⁴⁰

Although there is no earnings and profits counterpart to the dividends received deduction allowed by *IRC Section 243*, a statutory exception prohibits adding the deduction back to AMTI for purposes of calculating the ACE adjustment in the case of (1) the deduction for 100 percent of dividends received from domestic corporations that are in the same affiliated group as the recipient,ⁿ⁴¹ and (2) the deduction for 80 percent of dividends received from domestic companies that do not meet the affiliated group requirement but are at least 20 percent owned by the recipient.ⁿ⁴² This leaves the deduction for 70 percent of dividends received by corporate taxpayers from domestic corporations in which they own less than 20 percent of the stock as the only *IRC Section 243* deduction still subject to the ACE adjustment.

An exception from the ACE adjustment is also made for discharge of indebtedness income that is excluded from gross income under *IRC Section 108*, whether or not such excluded income correspondingly increases earnings and profits.ⁿ⁴³ Moreover, no adjustment may be made to adjusted current earnings with respect to the difference, if any, between AMTI and earnings and profits treatment of charitable contributions.ⁿ⁴⁴ Finally, no ACE adjustment is allowed to dilute the incentive effect of the special deduction allowed by *IRC Section 199* to encourage domestic production activities (scheduled to expire after 2009).ⁿ⁴⁵

[ii] Specific Items Adjusted for ACE Purposes

In addition to the general directives in *IRC Sections 56(g)(4)(B)* and *(C)* to conform AMTI to the earnings and profits standard, *IRC Section 56(g)(4)* prescribes that the following additional adjustments be made to specific items in AMTI:

Depreciation. ACE depreciation follows AMTI depreciation for tangible assets placed in service after December 31, 1993.ⁿ⁴⁶ However, adjustments applicable only for ACE purposes are prescribed for assets placed in service in 1993 and prior years.ⁿ⁴⁷

Intangible drilling costs. The adjustment to earnings and profits prescribed in *IRC § 312(n)(2)(A)*, requiring the

capitalization of intangible drilling costs and their amortization over a 60 month period, is applied in taxable years beginning after December 31, 1989. However, no such adjustment may be made to intangible drilling costs of oil and gas wells paid or incurred by a corporate taxpayer in taxable years beginning after December 31, 1992 unless the taxpayer is an "integrated oil company" (as defined in *IRC Section 291(b)(4)*).ⁿ⁴⁸

Circulation and organizational expenditures. Following the adjustment to earnings and profits prescribed in *IRC Section 312(n)(3)*, adjusted current earnings must be calculated without regard to *IRC Section 173* (which provides, at the election of the taxpayer, for either expensing or capitalization and amortization of circulation expenditures) and *IRC Section 248* (which provides for the expensing of the first \$5,000 of organizational expenditures and amortization of the remainder over a 180 month period).ⁿ⁴⁹ Note that if a corporation elects, under *IRC § 59(e)*, to capitalize circulation expenditures and amortize them over 3 years for regular and alternative minimum tax purposes, it may do so for purposes of calculating the ACE adjustment as well.ⁿ⁵⁰ In the absence of such an election, it appears that circulation expenditures, like organizational expenditures, must be permanently capitalized in calculating ACE.

LIFO recapture adjustment. Incorporating a similar adjustment to earnings and profits in *IRC Sections 56(g)(4)(D)(iii)* and *312(n)(4)*, requires that taxpayers using a LIFO method of accounting for inventory add to AMTI, for purposes of calculating adjusted current earnings, a LIFO recapture amount equal to the difference between the taxpayer's closing inventory as valued under LIFO and the value of such closing inventory had the FIFO method been used.ⁿ⁵¹

Installment method adjustment. The installment method may not be used in calculating adjusted current earnings because it cannot be used in computing earnings and profits.ⁿ⁵² Gain deferred to later years under the installment method must therefore be reported in the year of sale when computing adjusted current earnings, although the taxpayer is presumably entitled to make negative adjustments in subsequent years when AMTI reflects installment sales gain that has already been recognized for ACE purposes.

There is an exception to the rule if the installment sale qualifies for installment reporting under *IRC Section 453A*; i.e., as a nondealer sale of property for a sales price in excess of \$150,000 in which the taxpayer is required to pay annual interest on an "applicable percentage" of its deferred tax liability each year. The numerator of the applicable percentage is the amount of installment obligations in excess of \$5 million remaining outstanding at the close of the taxable year, and the denominator is the total amount of such outstanding installment obligations at the close of the year (hence, no interest is due on deferred tax liabilities if installment obligations are \$5 million or less). For ACE calculation purposes, the amount of gain eligible for installment reporting is determined by multiplying the same applicable percentage by the total amount of gain realized on the sale. Ineligible gain from the nondealer sale must be recognized in full in the year of sale.ⁿ⁵³

Debt pool exchange adjustment. In *Cottage Savings Ass'n v Comm'r*,ⁿ⁵⁴ the Supreme Court held that a savings bank that exchanged its portfolio of home mortgages for another bank's portfolio of home mortgages with substantially the same interest rates, maturity dates and, in the aggregate, equivalent economic value, could recognize a tax loss on the exchange, though no such loss was recognized on its financial statements, because the mortgages represented "legally distinct entitlements."ⁿ⁵⁵ *IRC Section 56(g)(4)(E)* provides that if any such loss is recognized for regular and AMTI tax purposes, it must be added back to AMTI for purposes of calculating the ACE adjustment.

Depletion. The allowance for depletion with respect to any property placed in service in a taxable year beginning after December 31, 1989 is limited to cost depletion under *IRC Section 611* for purposes of the ACE adjustment. Thus, the difference between any percentage depletion deduction allowed in calculating AMTI and cost depletion allowable with respect to the property under *IRC Section 611* must be added back to adjusted current earnings in calculating the ACE adjustment.ⁿ⁵⁶ The Tax Court has held that, independently of *IRC Section 56(g)(4)(F)(i)*, *IRC Section 56(g)(4)(C)*, which mandates generally that all deductions taken for ACE purposes conform to the earnings and profits standard, also requires an add-back of percentage depletion (though computed differently than the adjustment required by *IRC Section 56(G)(4)(F)(i)*) since only cost depletion is allowable when calculating earnings and profits.ⁿ⁵⁷ Hence, even if *IRC*

Section 56(g)(4)(F)(i) does not apply to the taxpayer's property because it was placed in service in a taxable year beginning before December 31, 1989, *IRC Section 56(g)(4)(C)* may apply, regardless of when the property was placed in service.ⁿ⁵⁸

As previously observed, once all the adjustments above have been made to AMTI, the resulting "adjusted current earnings" is compared with pre-adjustment AMTI. Seventy-five percent of the excess (as it will prove to be in most cases) of adjusted current earnings over pre-adjustment AMTI becomes the ACE adjustment, added to AMTI and potentially subject to the alternative minimum tax.

[e] Completed Contract Method of Accounting

Taxpayers using the completed contract method of accounting for post-March 1, 1986 long-term contracts are required to use the percentage of completion method, as modified by *IRC § 460(b)*, for purposes of computing AMTI, thus accelerating the recognition of income generated by such contracts.ⁿ⁵⁹

[2] Deduction Items

[a] Below-the-line Deductions

For most individual taxpayers, the adjustments to regular taxable income that pose the greatest threat of liability for the alternative minimum tax are those which wholly or partially disallow for AMTI purposes certain below-the-line deductions; i.e., expenses deductible from adjusted gross income (AGI) rather than gross income. ⁿ¹ Many of these are personal expenses for which deductions are permitted for equitable reasons (such as ability to pay) that have little to do with the measurement of disposable economic or business income. But the adjustment's net also catches deductions that do not appear to be departures from an economic concept of income, principally employee business expenses and expenses incurred for the production of income. The following deductions are affected.

[i] Miscellaneous Itemized Deductions

All "miscellaneous itemized deductions," as defined in *IRC Section 67(b)*, are disallowed for AMTI purposes.ⁿ² *IRC § 67(b)* defines the term "miscellaneous itemized deductions" comprehensively to include all itemized deductions other than those specifically excluded from the definition by that subsection. There are currently twelve types of itemized deductions expressly excluded from the "miscellaneous itemized deductions" category, of which the most important are the deductions for charitable contributions, medical expenses, state and local taxes, casualty and theft losses, and expenses allocable to income in respect of a decedent.ⁿ³ All non-excluded itemized deductions, including expenses incurred for the production of income under *IRC Section 212(1)*, are miscellaneous itemized deductions for which no deduction may be taken in calculating AMTI.ⁿ⁴

Expenses deductible from gross income in arriving at AGI are not itemized deductions and therefore cannot be in the "miscellaneous itemized deductions" category. Above-the-line deductions are allowed principally for expenses incurred in connection with an individual's trade or business,ⁿ⁵ but Congress has allowed above-the-line deductions in *IRC Section 62* for many other specific categories of expenses.ⁿ⁶ Expenses for which above-the-line deductions are allowed include: employee expenses reimbursed by the employer;ⁿ⁷ unreimbursed employee expenses of performing artists, certain state and local officials, elementary and secondary school teachers, and members of the Armed Forces' reserves;ⁿ⁸ losses from the sale or exchange of property;ⁿ⁹ deductions attributable to property held for the production of rents and royalties;ⁿ¹⁰ and alimony deductible under *IRC Section 215*.ⁿ¹¹ Congress has also reversed in part the result in *Banks* and other cases holding legal fees nondeductible for AMTI purposes by classifying legal fees as *IRC Section 62(a)* above-the-line deductions when incurred in pursuance of unlawful discrimination claims under certain federal statutesⁿ¹² or "whistleblower" claims made under *IRC Section 7623(b)*.ⁿ¹³

[ii] Deduction for State and Local Taxes

Deductions for state and local income, personal property, real property and sales taxes are disallowed for AMTI purposes.ⁿ¹⁴

[iii] Deduction for Medical Expenses

The regular tax itemized deduction for medical expenses in excess of 7.5 percent of adjusted gross income (AGI) is modified so that only medical expenses in excess of 10 percent of AGI are deductible for AMTI purposes.ⁿ¹⁵

[iv] Deduction for Personal Interest

Personal interest other than interest on the taxpayer's home mortgage is non-deductible for both regular tax and AMTI purposes.ⁿ¹⁶ However, deductible "qualified housing interest" allowed for AMTI purposes is defined somewhat more narrowly than "qualified residence interest" allowed for regular tax purposes: *viz*, interest on a home equity loan of up to \$100,000, secured by the taxpayer's residence, is deductible for regular tax purposes regardless of the use to which the proceeds of the loan are put, while under the AMTI the proceeds of any home mortgage loan, including a home equity loan, must be used to acquire, construct or substantially improve the taxpayer's residence or interest on the loan will not be deductible.ⁿ¹⁷

[v] Standard Deduction and Personal Exemptions

Neither the standard deduction, the deduction for personal exemptions, nor the exemptions for estates and trusts allowed for regular tax purposes in *IRC Sections 63(c), 151 and 642(b)*, respectively, are allowed in computing AMTI.ⁿ¹⁸ The alternative minimum tax does have its own exemptions, however.ⁿ¹⁹ On the positive side, the overall limitation on itemized deductions in *IRC Section 68* does not apply for AMTI purposes.ⁿ²⁰

[b] Depreciation

IRC Section 56(a)(1) requires the taxpayer to calculate depreciation for AMTI purposes in a manner that, as compared with the modified Accelerated Cost Recovery System (MACRS) allowed by *IRC Section 168(a)* in computing regular taxable income, produces lower depreciation deductions in the early years of an asset's life but higher deductions in later years. The intention is to allow depreciation for AMTI purposes that more closely corresponds with economic depreciation. The AMTI depreciation rules generally follow the regular tax MACRS rules for property placed in service on and after January 1, 1999, except that AMTI depreciation is limited to the 150 percent declining balance method for personal property,ⁿ²¹ and is limited to the straight line method for real estate.ⁿ²² Tangible real and personal property placed in service before January 1, 1999 (but after the January 1, 1987 effective date of MACRS) is depreciated for AMTI purposes using the alternative depreciation system (ADS) prescribed by *IRC Section 168(g)*, which is limited to the straight-line method and uses longer recovery periods than MACRS.ⁿ²³

[c] Depletion

IRC Section 57(a)(1) requires that there be added to regular taxable income, in computing AMTI, the excess of the depletion deductions allowable for the taxable year under *IRC Section 611* with respect to each mining property (as defined in *IRC Section 614*) over the adjusted basis of such property at the close of the year, determined without regard to any depletion deduction for the taxable year.ⁿ²⁴ The term "property" in *IRC Section 57(a)(1)* refers only to the mineral deposit in place, and does not include depreciable improvements to the property in the form of investments in machinery, tools, pipes, and other equipment used to exploit the deposits.ⁿ²⁵

[d] Mining Exploration and Development Costs

IRC Sections 616 and 617 give taxpayers an election to claim a current deduction for the costs of exploring for and

developing a mineral deposit (other than oil or gas). The election is not available for purposes of calculating AMTI, however; rather, the taxpayer is required to capitalize such costs and amortize them over a 10-year period.ⁿ²⁶ The taxpayer may deduct mining costs which remain unamortized for AMTI purposes when it abandons or otherwise disposes of the mine at a loss, in an amount not to exceed the loss that would have been recognized under *IRC Section 165* had the mining costs remained capitalized.ⁿ²⁷

[e] Intangible Drilling Costs

For purposes of calculating AMTI, the taxpayer must add the amount by which "excess intangible drilling costs" paid or incurred in connection with oil and gas wells is greater than 65 percent of the taxpayer's net income from such properties.ⁿ²⁸ The term "excess intangible drilling costs" means the excess of the amount deducted currently for regular tax purposes under *IRC Section 263(c)* or *IRC Section 291(b)*ⁿ²⁹ over the amount that would have been allowable if intangible drilling costs had been capitalized and amortized using the straight line method over a 120 month period.ⁿ³⁰

[f] Amortization of Pollution Control Facilities

Under *IRC Section 169*, a taxpayer may elect to amortize the cost of certified pollution control over a period of 60 months.ⁿ³¹ *IRC Section 56(a)(5)* requires that, for AMTI purposes, such facilities must be amortized under the MACRS system but using the straight line method of depreciation.ⁿ³²

[g] Circulation and Research Expenditures

In the case of individuals only, the deductions allowed by *IRC Section 173* (allowing a current deduction for expenditures incurred to establish, maintain or increase the circulation of a newspaper, magazine or other periodical) and *IRC Section 174* (allowing a current deduction for research and experimental expenditures) are disallowed for AMTI purposes.ⁿ³³ Instead, such expenditures must be capitalized and amortized over 3 years (in the case of circulation expenditures) or 10 years (in the case of research or experimental expenditures).ⁿ³⁴

[h] Denial of Loss from Tax Shelter Farm Activity

Individuals may not deduct for AMTI purposes any loss from a "tax shelter farm activity."ⁿ³⁵ A tax shelter farm activity includes a farming syndicate, as defined in *IRC Section 464(c)*, and any other activity consisting of farming which is a passive activity (within the meaning of *IRC Section 469(c)*) with respect to the taxpayer.ⁿ³⁶

[3] Impact of Adjustments on Other Items

Several of the preceding adjustments change the regular tax methods of expensing, depreciating or amortizing assets to different methods for AMTI purposes.ⁿ¹ In these cases, *IRC Section 56(a)(6)* requires a recalculation of the adjusted basis of each affected asset for AMTI purposes so that the asset's adjusted basis is consistent with the AMTI method prescribed. For example, if the taxpayer purchases an asset for \$1,500 and deducts \$500 in depreciation for regular tax purposes but is allowed only \$300 in depreciation in computing AMTI, the asset will have a regular tax basis of \$1,000 and an AMTI tax basis of \$1,200. If the asset is sold for \$1,100, the taxpayer would report a gain of \$100 in calculating regular taxable income and a loss of \$100 in calculating AMTI.ⁿ²

Similarly, *IRC Section 58(b)(1)* requires that the provisions of *IRC Sections 469*, governing when and how losses from "passive activities" may be deducted in computing regular taxable income, be re-applied when calculating AMTI in light of the adjustments required by *IRC Sections 56* and *57* that affect the *IRC Section 469* calculations. Taxpayer losses (and gains) from passive activities, and the amounts of passive activity losses and credits that may be carried over to subsequent years, may be different for regular and alternative minimum tax purposes after the AMTI adjustments are taken into account.

For example, suppose that for regular tax purposes a taxpayer has a net loss of \$100,000 from a passive activity in Year 1. In calculating this loss the taxpayer uses a method of depreciation that produces a deduction of \$20,000. However, *IRC Section 56(a)(1)* requires that the taxpayer use a different depreciation method, which reduces the depreciation deduction to only \$10,000 for AMTI purposes, which in turn reduces the passive activity loss for the year to \$90,000. If the taxpayer has income from the passive activity of \$50,000 in Year 1, the passive activity rules in *IRC Section 469* will limit the amount deductible in respect of that activity to \$50,000 for purposes of both the regular and alternative minimum taxes. However, the amount of the passive activity loss that can be carried over to Year 2 under *IRC § 469(b)* is \$50,000 for regular tax purposes (\$100,000 - \$50,000) but only \$40,000 (\$90,000 - \$50,000) for AMTI purposes.ⁿ³

AMTI adjustments also affect the net operating loss deduction available for AMTI calculation purposes, known as the "alternative tax net operating loss or "ATNOL."ⁿ⁴ Pursuant to *IRC § 56(d)*, the net operating loss deduction allowable for regular tax purposes is modified in two principal respects to arrive at the ATNOL for the taxable year. First, all the adjustments required to be taken into account by *IRC §§ 56-58* in calculating AMTI must also be taken into account when calculating the ATNOL.ⁿ⁵ Second, the ATNOL deduction may not exceed the lesser of the NOL deduction for the year or 90 percent of AMTI (determined without regard to the ATNOL deduction or the deduction allowed by *IRC Section 199*).ⁿ⁶

ATNOLs, like NOLs, may generally be carried back two years and forward 20 years.ⁿ⁷ Also like NOLs, ATNOLs are first carried back to the earliest available year and then carried forward to the next succeeding year until fully used.ⁿ⁸ The ATNOL will be absorbed by any AMTI the taxpayer may have in the earliest taxable year to which it is properly carried, even though the taxpayer has no alternative minimum tax liability for that year because its regular tax equals or exceeds its tentative minimum tax.ⁿ⁹

The difference in application of the NOL and ATNOL can be seen in the following example:

Example:

In Year 1, a taxpayer has \$20,000 of income and \$35,000 of losses, of which \$10,000 are preference items. The regular tax NOL for the year is \$15,000; the ATNOL is \$5,000, since the preferences are added back and reduce the amount of the loss.

In Year 2, the taxpayer has AMTI of \$20,000, determined without regard to its ATNOL. The ATNOL reduces that amount to \$15,000. The NOL deduction for regular tax purposes is not affected by this computation; the taxpayer has a \$15,000 NOL from Year 1 to be used for regular tax purposes.

(n4)Footnote 3. See *IRC § 57(a)(5)(C)(ii)* and *(iii)*. In addition, interest on Gulf Opportunity (GO) Zone Bonds is excluded from the *IRC § 57(a)(5)* adjustment. *IRC § 1400N(a)(5)(G)*.

(n5)Footnote 4. See Section 1503 of the American Recovery and Reinvestment Act of 2009, Pub L No 111-5, 123 Stat 115 (2009) ("ARRA of 2009"), adding *IRC § 57(a)(5)(C)(vi)(I)*. For purposes of determining eligibility for the 2009-2010 exception, refunding bonds issued in 2009 and 2010 (whether current or advanced refunding) are treated as if issued on the date the refunded bond was issued, *IRC § 57(a)(5)(C)(vi)(II)*. Nevertheless, interest on such refunding bonds will not be included in income for AMTI purposes if the refunded bond was issued after December 31, 2003 and before January 1, 2009. *IRC § 57(a)(5)(C)(vi)(III)*.

(n6)Footnote 5. See *IRC § 1202(a)*. The 60 percent exclusion applies to sales of qualified small business stock when the issuer of the stock is a "qualified business entity" operating in an "empowerment zone." *IRC § 1202(a)(2)*. The 75 percent exclusion applies to sales (after the 5 year holding period) of all qualified small business stock issued after February 17, 2009 and before January 1, 2011. *IRC § 1202(a)(3)*. These and other rules governing the exclusion of gain from the sale of qualified small business stock are discussed in § 2.06[2][a][ii].

(n7)Footnote 6. Prior to its amendment by section 301 of the Jobs and Growth Tax Relief Reconciliation Act of 2003 (JGTRRA), *IRC § 57(a)(7)* treated 42 percent of the excluded gain as a tax preference if the qualified small business stock was acquired before January 1, 2001, lowered to 28 percent if the stock disposed of was acquired after that date. JGTRRA reduced the amount of tax preference income to 7 percent of the gain excluded under *IRC § 1202* for all qualified small business stock disposed of after May 6, 2003, regardless of the date of acquisition. However, JGTRRA contains a "sunset" provision pursuant to which the amendment to *IRC § 57(a)(7)* is scheduled to expire, and the old recapture rules restored, in taxable years beginning after December 31, 2008. The effective date of the sunset provision was delayed by section 102 of the Tax Increase Prevention and Reconciliation Act of 2005 (Pub L 109-222) until taxable years beginning after December 31, 2010. In summary, the percentage of excluded gain treated as a tax preference is: (i) seven percent in the case of stock disposed of in a taxable year beginning before 2011; (ii) 42 percent in the case of stock acquired before January 1, 2001 and disposed of in a taxable year beginning after 2010; and (3) 28 percent in the case of stock acquired after December 31, 2000 and disposed of in a taxable year beginning after 2010. See HR Conf Rep 111-16, (House Conference Report on ARRA of 2009, 111th Cong, 1st Sess (February 12, 2009) at 569.

(n8)Footnote 7. If the stock option fails to qualify as an ISO or other qualified stock option, *IRC § 83(a)* requires that the employee recognize income equal to the difference between the fair market value of property received (i.e., the stock) and the amount paid (if any) as soon as the employee's rights in the stock are either transferable or are not subject to a substantial risk of forfeiture. The rules governing the regular tax treatment of stock options, including ISOs and nonqualified stock options, are covered in Chapter 9.

(n9)Footnote 8. *IRC § 83*.

(n10)Footnote 9. In these circumstances only, *IRC § 56(b)(3)* makes *IRC § 422(c)(2)* applicable for purposes of determining the amount of income reportable in calculating AMTI.

(n11)Footnote 10. *IRC § 1211*.

(n12)Footnote 11. *IRC § 1212(b)*.

(n13)Footnote 12. See, eg, *Palahnuk v Comm'r*, 544 F3d 471 (2nd Cir 2008); *Kadillak v Comm'r*, 534 F 3d 1197 (9th Cir 2008); *Merlo v Comm'r*, 492 F3d 618 (5th Cir 2007) ; *Pierce v US*, 76 Fed Cl 638 (2008), *affd without opinion* 274 Fed Appx 897 (Fed Cir 2008); *Nemitz v Comm'r*, 130 TC 102 (2008) .

(n14)Footnote 13. See *Treas. Reg. § 1.55-1(a)*.

(n15)Footnote 14. Pub L 110-343, Emergency Economic Stabilization Act of 2008 (EESA), sec. 103(b), 122 Stat 3765 (Oct 3, 2008), adding new *IRC § 53(f)*. In program manager technical assistance issued November 17, 2008, the Internal Revenue Service ruled that taxpayers who had previously entered into an offer in compromise (OIC) with the Service settling tax liabilities attributable to the exercise of ISO options that were forgiven in *IRC § 53(f)* were not entitled to a refund of taxes paid before the October 3, 2008 effective date of *IRC § 53(f)*, but were relieved of the obligation to make any further deferred payments under an OIC to the extent such deferred payments represented unpaid tax liabilities, interest or penalties abated by *IRC § 53(f)*. See 2009 TNT 82-16 (Service Explains Relief for Taxes on Exercised Incentive Stock Options) (Doc 2009-8991). Taxpayers that paid the alternative minimum tax due on income generated by the exercise of ISOs before the October 3, 2008 effective date of *IRC § 53(f)* (whether pursuant to an OIC or otherwise) are given tax relief in the form of a relaxation of the rules governing the minimum tax credit, as

well as an acceleration of the availability of the credit, as explained below in the discussion of the minimum tax credit. See *IRC* § 53(e).

(n16)Footnote 15. See *IRC* §§ 56(c)(1) and 56(g). The ACE adjustment does not apply to S corporations, regulated investment companies, real estate investment trusts, and real estate investment conduits. See *IRC* § 56(g)(6).

(n17)Footnote 16. See *IRC* § 56(g)(3).

(n18)Footnote 17. *IRC* § 56(g)(1).

(n19)Footnote 18. *IRC* § 56(g)(2).

(n20)Footnote 19. See *Snap-Drape, Inc v Comm'r*, 98 F3d 194, 200 (5th Cir 1996), cert denied 522 US 821 (1997) (the ACE adjustment uses earnings and profits as a measure of a corporation's economic income available for distribution to its shareholders).

(n21)Footnote 20. See *IRC* § 56(g)((4)(B) and (C).

(n22)Footnote 21. For example, meals and entertainment expenses are fully deductible when computing earnings and profits, but half are disallowed for regular tax and AMTI purposes. See *IRC* § 274(n). Such disallowed expenses are not allowed to reduce "adjusted" current earnings.

(n23)Footnote 22. *IRC* § 56(g)(5)(A).

(n24)Footnote 23. Treasury regulations define "earnings and profits" as "current earnings and profits within the meaning of section 316(a)(2), that is, earnings and profits for the taxable year computed as of the close of the taxable year of the corporation without diminution by reason of any distributions made during the taxable year." While largely circular, this definition does make clear that the ACE adjustment is concerned with current, not accumulated earnings and profits, and that dividends are not taken into account for purposes of the ACE adjustment. *Treas Reg* § 1.56(g)-1(a)(6)(iii). In addition, *IRC* § 312 contains rules regarding the computation of earnings and profits in respect of certain specific items though several of these have incorporated into statutory ACE adjustments under *IRC* § 56(g)(4)(D).

(n25)Footnote 24. Section 7611(g)(3) of the Omnibus Budget Reconciliation Act of 1989, Pub L No. 101-239, 103 Stat 2106, 2373 (1989).

(n26)Footnote 25. See *Treas Reg* § 1.56(g)-1(c)(6). These include the inside buildup on a life insurance contract excluded for regular and AMTI purposes by *IRC* § 101 (subject to the deduction allowed by *IRC* § 56(g)(4)(B)(ii)(II) for the portion of any premium on such contract attributable to insurance coverage) and tax-exempt interest excluded by *IRC* § 103.

(n27)Footnote 26. See *Treas Reg* § 1.56(g)-1(d)(3). These include the deductions for dividends received by a corporation under *IRC* §§ 243, 244, 245 and 247 to the extent not excluded from the ACE adjustment by *IRC* § 56(g)(4)(C)(ii) and (iv) (see discussion below), and the deduction for dividends paid to an employee stock ownership plan under *IRC* § 404(k).

(n28)Footnote 27. See *Treas Reg* §§ 1.56(g)-1(c)(7) and 1.56(g)-1(d)(4). Such items include the value of improvements made by a lessee to a lessor's property that is excluded from the lessor's gross income under *IRC* § 109; contributions to the capital of a corporation by a non-shareholder excludible under *IRC* § 118; and payments by a US corporation with respect to employees of certain foreign corporations that are deductible under *IRC* § 176.

(n29)Footnote 28. See *Snap-Drape, Inc v Comm'r*, 98 F3d 194, 197, citing *Chevron, USA, Inc v Natural Resources Defense Council, Inc*, 467 US 837, 844; and *Dresser Indus v Comm'r*, 911 F2d 1128, 1137 (5th Cir 1990).

In *Snap-Drape*, the court upheld an increase in the taxpayer's adjusted current earnings equal to the regular tax and AMTI deduction it had claimed for dividends paid to an employee stock ownership plan. Treasury regulations specifically provide that such dividends are not deductible in computing current earnings and profits and therefore must be added back to adjusted current earnings. The court found taxpayer's argument that these "dividends" are more akin to compensation than corporate distributions "compelling and...likely to carry the day" but for the "highly deferential standard of review" a legislative regulation commands. *Snap-Drape, Inc v Comm'r*, 98 F3d at 201.

(n30)Footnote 29. See *Treas Reg* §§ 1.56(g)-1(c)(1) and 1.56(g)-1(d)(1).

(n31)Footnote 30. See *IRC* § 312(n)(6).

(n32)Footnote 31. *Treas Reg* § 1.56(g)-1(c)(1).

(n33)Footnote 32. *Treas Reg* § 1.56(g)-1(d)(1).

(n34)Footnote 33. *Treas Reg* § 1.56(g)-1(a)(5).

(n35)Footnote 34. *Id.* See also *IRC* § 56(g)(4)(H) (the adjusted basis of any property with respect to which an ACE adjustment is made must be redetermined to take such adjustment into account for all purposes in calculating adjusted current earnings.)

(n36)Footnote 35. See *Treas Reg* § 1.56(g)-1(a)(5)(ii). Fortunately, as noted below, there is no difference between AMTI depreciation and ACE depreciation for assets placed in service after December 31, 1993. *IRC* § 56(g)(4)(A)(i).

(n37)Footnote 36. However, no interest on any tax-exempt municipal bond issued during 2009 or 2010 may be taken into account in calculating the ACE adjustment. See *IRC* § 56(g)(4)(B)(iv).

(n38)Footnote 37. See § 2A.02[1][a].

(n39)Footnote 38. *IRC* § 56(g)(4)(B)(iii).

(n40)Footnote 39. *IRC* § 56(g)(4)(B)(i)(II); *Treas Reg* § 1.56(g)-1(c)(3).

(n41)Footnote 40. See *Treas Reg* § 1.56(g)-1(c)(3).

(n42)Footnote 41. For purposes of this deduction, "affiliated group" has substantially the same meaning as in *IRC* § 1504(a), which generally requires that each corporation within the affiliated group (except the common parent) be at least 80 percent owned by one or more members of the group. See *IRC* § 243(b)(2).

(N43)Footnote 42. *IRC* § 56(g)(4)(C)(ii). Another statutory exception prohibits taking into account for ACE adjustment purposes the 85 percent dividends received deduction allowed by *IRC* § 965 for dividends received by US shareholders from certain controlled foreign corporations. See *IRC* § 56(g)(4)(C)(vi).

(n44)Footnote 43. *IRC* § 56(g)(4)(B)(i). Under *IRC* § 312(l)(1), discharge of indebtedness income is excluded from earnings and profits only to the extent of any reduction of basis under *IRC* § 1017.

(n45)Footnote 44. Although it is clear that charitable contributions reduce earnings and profits, when the contribution is in the form of appreciated property the Internal Revenue Service takes the position that earnings and profits are only reduced by the adjusted basis of the property, *Rev Rul* 78-123, 1978-1 CB 87, while the Tax Court has held that earnings and profits are reduced by the fair market value of the property. *Kaplan v Comm'r*, 43 TC 580 (1965), *acq withdrawn and nonacq substituted*, 1978-1 CB 2. Whether or not the Service is correct about the effect of a charitable contribution of appreciated property on earnings and profits, *IRC* § 56(g)(4)(I) prevents it from increasing the taxpayer's ACE adjustment by the difference between the fair market value allowable in calculating the charitable

contribution deduction and the adjusted basis the IRS regards as deductible in computing earnings and profits.

(n46)Footnote 45. *IRC § 56(g)(4)(C)(iv)*. See also *IRC § 199(d)(6)* (providing that, in computing the amount of the deduction allowed by *IRC § 199* for AMTI purposes, none of the adjustments in *IRC §§ 56-58* are to be taken into account in calculating "qualified production activities income."

(n47)Footnote 46. *IRC § 56(g)(4)(A)(i)* (second sentence).

(n48)Footnote 47. See *IRC § 56(g)(A)(i) through (v)*.

(n49)Footnote 48. *IRC § 56(g)(4)(D)(i)*.

(n50)Footnote 49. *IRC § 56(g)(4)(D)(ii)*.

(n51)Footnote 50. See *Treas Reg § 1.56(g)-1(f)(2)*.

(n52)Footnote 51. Treasury regulations prescribe the methodology to be used for computing the LIFO recapture amount, *Treas Reg § 1.56(g)(f)(3)*, and also provide an optional "simplified" method of calculating the LIFO recapture amount in *Treas Reg § 1.56(g)-1(r)*.

(n53)Footnote 52. See *IRC § 56(g)(4)(D)(iv)* and compare *IRC § 312(n)(5)*.

(n54)Footnote 53. For example, if a corporate taxpayer makes a casual sale of property costing \$15 million for sales price of \$25 million, all of which is deferred until after the year of sale, its applicable percentage is 80 percent (\$25 million - \$5 million = \$20 million/\$25 million = 80 percent) and the eligible gain is therefore \$8 million (\$10 million x 80 percent = \$8 million). The taxpayer can defer recognition of the entire \$10 gain for regular and alternative minimum tax purposes, but only \$8 million of the gain is eligible for installment reporting in calculating adjusted current earnings. The remaining \$2 million of ineligible gain must be included in income in the year of sale for purposes of calculating the ACE adjustment.

(n55)Footnote 54. 499 US 554 (1991) .

(n56)Footnote 55. See § 1.02[3][a][i].

(n57)Footnote 56. *IRC § 56(g)(4)(F)(i)*.

(n58)Footnote 57. See *Treas Reg § 1.312-6(c)(1)*. See also *Santa Fe Pacific Gold Co and Subs v Comm'r*, 130 TC No 17 (2008) .

(n59)Footnote 58. However, no ACE adjustment is permitted under any ACE provision with respect to depletion of oil and gas wells determined under *IRC § 613A(c)* that is allowable to independent producers and royalty owners. *IRC § 56(g)(4)(F)(ii)*.

(n60)Footnote 59. *IRC § 56(a)(3)*. No adjustment is required, however, if the contract is a home construction contract as defined in *IRC § 460(e)(6)*.

(n61)Footnote 1. See *IRC § 56(b)(1)*.

(n62)Footnote 2. *IRC § 56(b)(1)(A)(i)*. For regular tax purposes, such miscellaneous itemized deductions are allowed only to the extent they exceed in the aggregate 2 percent of the taxpayer's AGI. *IRC § 67(a)*.

(n63)Footnote 3. Charitable contributions, casualty and theft losses, and expenses allocable to income in respect of a decedent are deductible in the same manner and subject to the same limitations for both regular income and AMTI

purposes. State and local taxes and medical expenses, although not considered miscellaneous itemized deductions (and therefore not subject to the 2 percent floor for regular tax purposes), are separately disallowed in whole or in part for AMTI purposes by other provisions of *IRC § 56(b)(1)* (see below).

(n64)Footnote 4. See *Commissioner v Banks*, 543 US 426 (2005) (contingent legal fees taken out of taxpayer's recovery in lawsuit were includible in gross income for regular and alternative minimum tax purposes, and as a miscellaneous itemized deduction such fees were not deductible from AGI for purposes of computing the taxpayer's AMTI); *Alexander v IRS*, 72 F3d 938, 946 (1st Cir 1995) (opining that including the taxpayer's damages recovery in income without allowing an AMTI deduction for the legal fees incurred in obtaining that income "smacks of injustice," but concluding nonetheless that equitable considerations cannot override the plain meaning of the statute).

(n65)Footnote 5. *IRC § 62(a)(1)*. However, with few exceptions, above-the line deductions are specifically not allowed for expenses incurred in connection with the trade or business of performing services as an employee, which expenses therefore fall into the category of "miscellaneous itemized deductions."

(n66)Footnote 6. By classifying these expenses as above-the-line deductions, Congress automatically exempts such expenses from both disallowance for purposes of the alternative minimum tax and the 2 percent of AGI floor which miscellaneous itemized deductions must exceed to be deductible under the regular income tax.

(n67)Footnote 7. *IRC § 62(a)(2)(A)*.

(n68)Footnote 8. *IRC §§ 62(a)(2)(B), (C), (D) and (E)*.

(n69)Footnote 9. *IRC § 62(a)(3)*.

(n70)Footnote 10. *IRC § 62(a)(4)*.

(n71)Footnote 11. *IRC § 62(a)(10))*.

(n72)Footnote 12. See *IRC § 56(e)*.

(n73)Footnote 13. See *IRC §§ 62(a)(20) and (21)*. The above-the-line deduction for legal fees may not exceed the amount of any settlement or other recovery included in the taxpayer's income for the taxable year.

(n74)Footnote 14. *IRC § 56(b)(1)(A)(ii)*. Neither is the taxpayer required to include refunds of those taxes in income for AMTI purposes. *IRC § 56(b)(1)(D)*.

(n75)Footnote 15. *IRC § 56(b)(1)(B)*. For purposes of calculating AMTI, the amount of deductible medical expenses, as well as the amount of any other item of income, exclusion or deduction computed with reference to AGI or modified AGI (e.g., the deduction for charitable contributions), the taxpayer is instructed to use AGI or modified AGI as determined for regular tax purposes. See *Treas Reg § 1.55-1(b)*.

(n76)Footnote 16. *IRC § 163(h)*.

(n77)Footnote 17. Compare *IRC § 163(h)(3)(C)* with *IRC §§ 56(b)(1)(C) and 56(e)*.

(n78)Footnote 18. *IRC § 56(b)(1)(E)*.

(n79)Footnote 19. *IRC § 55(b)(1)*. See discussion at § 2A.03.

(n80)Footnote 20. *IRC § 56(b)(1)(F)*.

(n81)Footnote 21. The depreciation method switches to straight-line when that produces a higher depreciation

deduction.

(n82)Footnote 22. For regular tax purposes, MACRS allows the use of a 200 percent declining balance method for personal property but, like the AMTI rule, requires the straight line method for depreciating real property. The result is that no AMTI adjustment should be required for real property placed in service on or after January 1, 1999, since depreciation on real property is computed the same way for regular tax and AMTI purposes.

(n83)Footnote 23. *IRC § 56(a)(1)(A)(i)*. AMTI depreciation rules applicable to property placed in service prior to January 1, 1987 are prescribed under a separate minimum tax provision, *IRC § 57(a)(6)*, which by now is of limited interest.

(n84)Footnote 24. The objective is to subject percentage depletion in excess of a property's cost to the adjusted minimum tax. Since the adjustment required by *IRC Section 57(a)(1)* is made on a property-by-property basis, the fact that the adjusted basis of one property exceeds the current year's depletion deduction taken in respect of that property does not allow the taxpayer to "carry over" the unused adjusted basis to offset the depletion deduction taken with respect to another separate property. *Treas Reg § 1.57-1(h)(1)*.

(n85)Footnote 25. *US v Hill, 506 US 546 (1993)* (holding that the adjusted basis of the property which the taxpayer is allowed to deduct from percentage depletion in respect of that property does not include the adjusted basis of such improvements, which are separately recovered through depreciation, not depletion deductions. See also *Santa Fe Pacific Gold Co and Subs v Comm'r, 130 TC No 17 (2008)*, in which the Tax Court, applying the reasoning of *Hill*, held *sua sponte* that unamortized mining exploration and development costs capitalized for AMTI purposes under *IRC § 56(a)(2)* (see discussion below) are similarly not includible in the adjusted basis of the "property" that is deducted from percentage depletion in calculating the *IRC § 57(a)(1)* adjustment. The Court nevertheless allowed the taxpayer to include mining exploration and development costs in adjusted basis because the Government had conceded that such costs were includible.

(n86)Footnote 26. See *IRC § 56(a)(2)*. A corporate taxpayer that elects to deduct mining exploration or development costs for regular tax purposes must reduce the deduction by an amount equal to 30 percent of such costs under the regular tax's own corporate preference tax rules, see *IRC § 291(b)(1)(B)*, and amortize that 30 percent over a 60 month period. *IRC § 291(b)(2)*. The AMTI tax treatment prescribed by *§ 56(a)(2)* requires 100 percent of exploration and development costs to be capitalized and amortized over 10 years, including the 30 percent that is not currently deductible for regular tax purposes because of *IRC § 291*.

(n87)Footnote 27. *IRC § 56(a)(2)(B)*.

(n88)Footnote 28. *IRC § 57(a)(2)*. The tax preference also applies to the separately computed difference between excess intangible drilling costs paid or incurred in connection with geothermal deposits over 65 percent of the taxpayer's net income from such deposits. *IRC § 57(a)(2)(D)*. However, the intangible drilling costs tax preference only fully applies to integrated oil companies as defined in *IRC § 291(b)(4)*. *IRC § 57(a)(2)(E)(1)*. Independent producers are exempt from the preference as long as the reduction in the alternative minimum tax resulting from such exemption does not exceed 40 percent of AMTI, computed without the exemption and without regard to any alternative tax net operating loss. *IRC § 57(a)(2)(E)(2)*.

(n89)Footnote 29. In this case, unlike the tax preference for mining exploration and development costs, in calculating the amount of the AMTI preference corporate taxpayers take into account the 30 percent reduction in the intangible drilling costs deduction required by *IRC § 291(b)*. See *IRC § 57(a)(2)(B)(i)* and compare *IRC § 56(a)(2)*.

(n90)Footnote 30. See *IRC § 57(a)(2)(B)(ii)* and *57(b)(1)*. Alternatively, the taxpayer may elect to use any other permissible cost depletion method. See *IRC § 57(b)(2)*.

(n91)Footnote 31. The amortizable basis of such facilities eligible for 60 month amortization is reduced by 20

percent for corporate taxpayers under *IRC* § 291(b)(4), which percentage may be depreciated under the normal MACRS rules. *IRC* § 169(g).

(n92)Footnote 32. AMTI depreciation applies to the entire basis of such facilities, including the 20 percent that *IRC* Section 291(a)(4) disqualifies from 60 month amortization for purposes of the regular tax. *IRC* § 56(a)(5). Pollution control facilities placed in service after December 31, 1986 but before January 1, 1999 must use the alternative system of depreciation under *IRC* § 168(g).

(n93)Footnote 33. *IRC* § 56(b)(2). The disallowance of the deduction for research and experimental expenditures does not apply to individuals who materially participate in the activity that gives rise to such expenditures. *IRC* § 56(b)(2)(D). And while corporations are not subject to this adjustment, they are required to capitalize circulation expenditures for purposes of calculating the ACE adjustment. See § 2A.02[2][d][ii].

(n94)Footnote 34. *IRC* § 56(b)(2)(A)(i) and (ii).

(n95)Footnote 35. *IRC* § 58(a)(1).

(n96)Footnote 36. *IRC* § 58(a)(2).

(n97)Footnote 1. See *IRC* §§ 56(a)(1) (depreciation of tangible real and personal property), 56(a)(2) (capitalization of mining exploration and development costs), 56(a)(5) (amortization of pollution control facilities), and 56(b)(2) (capitalization of circulation and research or experimental expenditures).

(n98)Footnote 2. The \$100 loss should be allowed in calculating AMTI even if the taxpayer did not pay alternative minimum tax in prior years, and so received the full benefit of faster regular tax depreciation in such years. Cf *IRC* § 1016(a)(2); *Breckridge Corp v Comm'r*, 45 BTA 131, *affd* 129 F2d 318 (2d Cir 1942).

(n99)Footnote 3. Under a special rule, the amount of passive activity losses disallowed under *IRC* § 469 is reduced for AMTI purposes by the amount (if any) by which the taxpayer is insolvent as of the close of the taxable year (i.e., the amount by which the taxpayer's liabilities exceed the fair market value of the taxpayer's assets.) *IRC* § 58(c)(1).

(n100)Footnote 4. See *IRC* §§ 56(a)(4), 56(d).

(n101)Footnote 5. *IRC* § 56(d)(2)(A).

(n102)Footnote 6. *IRC* § 56(d)(1)(A). ATNOLs that are not allowed in a particular taxable year because they exceed 90 percent of AMTI for the year may be carried over to other taxable years, in accordance with the rules of *IRC* § 172(b). See Staff of Joint Comm on Taxation, 99th Cong, General Explanation of the Tax Reform Act of 1986 (Comm Print 1987) ("Tax Reform Act of 1986 Blue Book") at 469, n 29.

(n103)Footnote 7. *IRC* §§ 56(d)(1), 172(b)(1)(A).

(n104)Footnote 8. If the taxpayer makes an *IRC* § 172(b)(3)(C) election to relinquish the carryback of an NOL, such election applies to both the regular NOL and any ATNOL for the year. See *Branum v Comm'r*, 17 F3d 805 (5th Cir 1994); *Plumb v Comm'r*, 97 TC 632 (1991); *Rev Rul* 87-44, 1987-1 CB 3.

(n105)Footnote 9. See Tax Reform Act of 1986 Blue Book at 469.

CHAPTER 2A The Alternative Minimum Tax

1-2A Taxation of Securities Transactions § 2A.03

§ 2A.03 Calculating the Alternative Minimum Tax

Having made the adjustments to regular taxable income called for in *IRC Sections 56-58*, the taxpayer's next step is to deduct the "exemption amount" from the resulting AMTI. The statutorily prescribed exemption is \$45,000 in the case of a joint return or surviving spouse;ⁿ¹ \$33,750 in the case of an unmarried individual who is not a surviving spouse, and \$22,500 in the case of a married person filing separately, or an estate or trust.ⁿ² The exemption amount for corporations is \$40,000.ⁿ³ However, under a series of "patches," the exemption amounts for individuals have been increased, usually on a year-to-year basis, to provide some relief from the AMTI.

The last AMT patch was made by section 1012(a) of the American Recovery and Reinvestment Act of 2009, (ARRA of 2009).ⁿ⁴ The AMT exemptions for individuals in taxable years beginning in 2009 and thereafter are:

- (1) \$70,950 in the case of married individuals filing a joint return and returns filed by a surviving spouse;
- (2) \$46,700 in the case of other unmarried individuals;
- (3) \$35,475 in the case of married individuals filing separate returns (50 percent of exemption allowed to married couples filing jointly).ⁿ⁵

The stipulated exemption amounts are phased out for all taxpayers after certain income levels are reached. The exemption amount is reduced (but not below zero) by 25 percent of the amount by which the taxpayer's AMTI exceeds: \$150,000, in the case of corporations and individual taxpayers filing joint returns or a return filed by a surviving spouse; \$112,500, in the case of single and head of household taxpayers; and \$75,000, in the case of married taxpayers filing separate returns and returns filed by estates and trusts.ⁿ⁶ Married taxpayers filing separately are also required to increase alternative minimum taxable income by the lesser of (for taxable years beginning in 2009) (i) 25 percent of the amount by which AMTI exceeds \$216,900 or (ii) \$35,475.ⁿ⁷

AMTI remaining after the exemption amount (if any) is deducted, referred to in *IRC Section 55(b)(1)(ii)* as the "taxable excess," is then multiplied by the appropriate minimum tax rate. For individuals, the rate is 26 percent of the first \$175,000 and 28 percent of income in excess of that amount.ⁿ⁸ A special computation, prescribed by *IRC Section 55(b)(3)*, incorporates the preferential rates for net capital gains of individuals found in *IRC Section 1(h)*.ⁿ⁹ This means that an individual taxpayer who computes the regular tax for a taxable year utilizing the rate caps for net capital gains

will not be penalized when it comes to determining the alternative minimum tax for the year. A 20 percent tax rate is applied to the AMTI of corporations in excess of the exemption amount.ⁿ¹⁰

Both individuals and corporations are entitled to deduct an "alternative minimum tax foreign tax credit" (AMTFTC) from the minimum tax calculated above to arrive at their "tentative minimum tax."ⁿ¹¹ The AMTFTC is calculated in the same manner as the regular FTC, except that the limitation on the creditⁿ¹² must be calculated after applying the adjustments in *IRC Sections 56-58* both to income from sources outside the US and to total worldwide income. The resulting ratio of foreign source alternative minimum taxable income to total AMTI is then multiplied by the taxpayer's "pre-credit tentative minimum tax;" i.e., the tentative minimum tax before deducting the AMTFTC.ⁿ¹³

The alternative minimum tax imposed for the taxable year (in addition to the regular income tax imposed by *IRC Section 1* or *Section 11*) is the excess of the taxpayer's tentative minimum tax over the regular tax liability for the year.ⁿ¹⁴ Most credits against the regular tax, including nonrefundable personal credits, may also be credited against liability for any add-on alternative minimum tax due for the taxable year.ⁿ¹⁵ The rule regarding nonrefundable personal credits has been in effect for taxable years beginning in 2000 through 2009.ⁿ¹⁶ However, unless further extended by Congress, for taxable years beginning in 2010 nonrefundable personal credits cannot be deducted from the alternative minimum tax and cannot be used to reduce the taxpayer's regular tax liability below the taxpayer's tentative minimum tax for the year.ⁿ¹⁷

CHAPTER 2A The Alternative Minimum Tax

1-2A Taxation of Securities Transactions § 2A.04

§ 2A.04 The Minimum Tax Credit

The minimum tax credit was intended to correct a potential inequity in the working of the minimum tax involving timing or deferral adjustments.ⁿ¹ To take an extreme example of the problem, suppose a taxpayer made an expenditure of \$100 that it was allowed to expense for regular tax purposes but that the minimum tax required to be capitalized and amortized ratably over a 2-year life. If the taxpayer was subject to the alternative minimum tax in Year 1 (perhaps because of the expensing preference), it would be limited to a deduction of \$50 with respect to that expenditure. But if in Year 2 the taxpayer had no tax preferences and was no longer subject to the minimum tax, it would have no way of recovering the remaining \$50 since, for regular tax purposes, the item was fully expensed in the prior year. Thus, the taxpayer would be permanently deprived of any tax benefit for an expenditure that even under economic concepts of income should have been fully deductible over its useful life.

The minimum tax credit allows a credit against the taxpayer's regular tax liability equal to the "adjusted net minimum tax" imposed in all prior taxable years (after 1986) less any minimum tax credits previously allowed or allowable.ⁿ² The amount of adjusted net minimum tax that may be credited in any year may not exceed the difference between the taxpayer's regular tax liability and its tentative minimum tax for the year.ⁿ³

Consistent with the original goal of the credit, creditable "adjusted net minimum tax" generally excludes any minimum tax paid with respect to "exclusion preferences;" adjustments that restored to AMTI income that would otherwise have been permanently excluded from the tax base.ⁿ⁴ This requires individual taxpayers to recalculate their tentative minimum tax in prior years to determine what it would have been had only adjustments for "deferral preferences" been includible in AMTI. Corporations, however, are permitted to claim credits for the entire amount of alternative minimum tax paid in prior years, including minimum tax attributable to "exclusion preferences."ⁿ⁵ Since the exclusion preferences with respect to gain on the sale of small business stock and personal itemized deductions are not applicable to corporations, percentage depletion and tax-exempt interest are the only exclusion preferences on which corporations could be subject to minimum tax.

Taxpayers who incurred substantial minimum tax liabilities when they acquired high-priced stock through the exercise of incentive stock options in the late 1990s and 2000, at the height of a stock market bubble, faced a problem that the minimum tax credit couldn't solve when the market collapsed and the expected increase in their regular taxable income from selling the stock never materialized.ⁿ⁶ Congress responded by amending the minimum tax credit provisions in a manner that allows long unused minimum tax credits to be recovered through a special refundable minimum tax credit

over a period of two years.ⁿ⁷ Under this provision, a "long-term unused minimum tax credit" for any taxable year beginning before January 1, 2013 is turned into an "AMT refundable credit."ⁿ⁸ The taxpayer has a "long-term unused minimum tax credit" to the extent that a portion of uncredited minimum taxes for prior years is attributable to a year that precedes the current taxable year by more than three taxable years.ⁿ⁹ The "AMT refundable credit" available in these circumstances is equal to the greater of (1) 50 percent of the taxpayer's long-term unused minimum tax credits (as defined above) in the current taxable year or (2) the amount (if any) of the AMT refundable credit determined for the immediately preceding taxable year.ⁿ¹⁰

FOOTNOTES:

(n1)Footnote 1. See Staff of Joint Comm on Taxation, 99th Cong, General Explanation of the Tax Reform Act of 1986 (Comm Print 1987) ("Tax Reform Act of 1986 Blue Book") at 436-437.

(n2)Footnote 2. *IRC* §§ 53(a), (b). The credit is carried forward from year to year until completely used. Since the carryforward period is indefinite, there is no need to keep track of which taxable years' minimum taxes are included in the credit (unless the taxpayer has a long-term unused minimum tax credit under *IRC* § 53(e), discussed below.)

(n3)Footnote 3. *IRC* § 53(c). Returning to the facts of the hypothetical above, if the taxpayer had gross income of \$100 in both Years 1 and 2 for regular tax and alternative minimum tax purposes and no other expenses, its regular taxable income would be \$0 in Year 1 and \$100 in Year 2, while AMTI would be \$50 in each year. In Year 2, therefore, the taxpayer's regular taxable income would exceed AMTI by \$50, and the regular tax on this excess would absorb (and be reduced by) the credit for the minimum tax paid on the \$50 of income reported in Year 1. This fits the rationale of the limitation: a minimum tax credit should be allowed when income excluded from the regular tax base in earlier years as the result of a timing preference is brought back into the regular tax base in a subsequent year(s) when the beneficial effect of the timing preference is reversed.

(n4)Footnote 4. *IRC* § 53(d)(1)(B). These "exclusion preferences" consist of: the percentage depletion adjustment required by *IRC* § 57(a)(1); the tax-exempt interest adjustment required by *IRC* § 57(a)(3); the adjustment restoring the excluded gain from the sale of small business stock required by § 57(b)(5); and the disallowance of itemized deductions required by *IRC* § 56(b)(1). *IRC* § 53(d)(1)(B)(ii).

(n5)Footnote 5. *IRC* § 53(d)(1)(B)(iii).

(n6)Footnote 6. See § 2A.02[1][c].

(n7)Footnote 7. See *IRC* § 53(e).

(n8)Footnote 8. *IRC* § 53(e)(1). Not only does the limitation imposed by *IRC* § 53(c) not apply to such AMT refundable credits, but the taxpayer is entitled to a refund if the AMT refundable credit exceeds the taxpayer's tax liability for the year. *IRC* § 53(e)(4).

(n9)Footnote 9. *IRC* § 53(e)(3)(A). In making this determination, previously allowed credits are deemed to have been allowed on a first-in, first-out basis. *IRC* § 53(e)(3)(B).

(n10)Footnote 10. *IRC* § 53(e)(2). Finally, to provide relief for taxpayers who had not yet paid minimum taxes due or asserted by the Internal Revenue Service as the result of exercising incentive stock options in years ending before January 1, 2008, Congress abated all such taxes, plus interest and penalties, in *IRC* § 53(f)(1). See § 2A.02[1][c].

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.01

§ 3.01 Introduction

The transfer of property to a corporation in exchange for its stock is a disposition giving rise to the realization of gain or loss. Should, however, the transferor who retains a sufficient degree of control of the corporation, and who has, in effect, done little more than alter the form of his investment, be required to presently recognize that gain? The inequity of immediate recognition in the absence of any change in substance prompted Congress, in 1921, to enact the predecessor of *IRC Section 351*.ⁿ¹

This chapter will focus upon the conditions imposed by the Code for nonrecognition, the consequences of nonrecognition on the basis and holding period of the stock in the hands of the taxpayer, and the effect of the transfer on the transferee corporation. Also to be explored are the factors influencing the choice of corporate capital structure, i.e., whether the corporation should be financed through investment in equity capital or debt securities.

FOOTNOTES:

(n1)Footnote 1. Revenue Act of 1921, Ch 136, § 202(c)(3), *42 Stat* 230.

The provision does not apply to a transfer of property of a debtor while the debtor is under the jurisdiction of a court in a bankruptcy, receivership, foreclosure or similar case, to the extent that the stock or securities received in the exchange are used to satisfy the indebtedness of the debtor. *IRC § 351(e)(2)*.

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.02

§ 3.02 The Requirements of Section 351

In brief, the Code provides for nonrecognition of gain or loss realized on incorporating transfers if three conditions are satisfied: (1) the transfer to the corporation consists of property, (2) the transfer is in exchange solely for stock of the transferee corporation, and (3) the transferors are in control of the corporation immediately after the exchange.ⁿ¹ The discussion that follows will consider each of these conditions in depth.

[1] Transfer of Property.

[a] Property Defined. The first requirement of *IRC Section 351* is that the transfer to the corporation be of "property." The section affords little help in ascertaining the meaning of the word "property" except to declare in *IRC Section 351(d)* that "stock issued for (1) services, (2) indebtedness of the transferee corporation which is not evidenced by a security, or (3) interest on indebtedness of the transferee corporation which accrued on or after the transferor's holding period for the debt, shall not be considered as issued in return for property." Does the absence of an affirmative definition imply that normal concepts of property should control in determining the content of the term? While this would seem to be a logical conclusion, it does not find complete support in administrative ruling. For example, the Internal Revenue Service originally ruled that a transfer of less than all substantial rights in a patent was not a transfer of property under *IRC Section 351*.ⁿ¹ It now concedes that the rights constitute property, but would continue to deny nonrecognition treatment on the ground that the transfer could not qualify as a sale or exchange for capital gain purposes. This reasoning was rejected by the Court of Claims in *E.I. du Pont de Nemours & Co. v. United States*,ⁿ² on the theory that the requirement of continuing control in *IRC Section 351* militates against the application of capital gain formulations which rest on the completeness of the disposition.

Given its normal meaning, money is property. However, in some instances, the Code provides that money is not property. Is it for purposes of *IRC Section 351*? The answer is of crucial importance. Although the transfer of money cannot itself result in the realization of gain or loss, the denial of property status to money could force persons transferring property other than money to recognize gain on the transfer, if such transferors were not, by virtue of their stock ownership, in control of the corporation immediately after the exchange. Reason and practicality dictate that money should be included within the definition of property, thereby permitting the contemporaneous transfer of money and other property without jeopardizing nonrecognition;ⁿ³ the Service has ruled that it is.

The express negation of services as property must here be considered. The disqualification does not attach to all services, but only to those which are rendered to or for the benefit of the issuing corporation.ⁿ⁴ Thus, assume A

transfers property to a corporation in exchange for its stock and, at the same time, directs the issuance of shares to *B* who previously rendered services to *A* having no relation to the business of the corporation or the assets transferred. The shares issued to *B* will not be considered shares issued in exchange for services. Rather, *A* will be deemed to have first received all of the shares in exchange for his transfer of property, and then to have transferred the shares to *B*. The transaction will still qualify for Section 351 treatment as long as *A* retains sufficient control after the transfer to *B*, or if not, as long as the incorporation transfer and the transfer to *B* were not independent steps.ⁿ⁵ *B* will realize ordinary income equal to the fair market value of the shares received by him as compensation for services to *A*. *A* will realize gain or loss on the difference between the fair market value of the shares transferred to *B* and *A*'s basis for such shares.ⁿ⁶

Ascertaining whether stock has been issued as consideration for services rendered or to be rendered to the issuing corporation, or in exchange for a property interest previously acquired as compensation for past services, or in satisfaction of a claim for services rendered to one of the transferors, is not always an easy task. *United States v. Frazell*ⁿ⁷ illustrates the difficulty that may be encountered. The taxpayer in *Frazell* performed services for a partnership for which he was to receive compensation in the form of salary, plus a specified interest in properties acquired by the partnership. However, by contract, it was agreed that the taxpayer would not be deemed to own any interest in the properties until the partners had fully recovered their costs and expenses. Prior to complete recovery of costs and expenses, the properties were transferred to a corporation. The taxpayer received 13 percent of the issued shares, but included no part of their value in his income for the year of receipt. The taxpayer contended that the shares were received in an exchange qualifying for nonrecognition under *IRC Section 351*. The Fifth Circuit had little difficulty in finding compensation income on either of two grounds:

- (1) The taxpayer had acquired a partnership interest which became possessory prior to the transfer to the corporation, and was therefore in receipt of ordinary income under the partnership rules.ⁿ⁸ The subsequent transfer of the partnership interest to the corporation could then qualify as a transfer of property.
- (2) The shares were given in substitution for the partnership interest originally contemplated, and, thus, the stock itself represented compensation for services.

Frazell indicates that at least one court has found a claim for services rendered to a third party by a cash basis taxpayer as falling without the definition of property. However, the first alternative ground may provide a sound basis for argument if the partnership interest became possessory in a year prior to the year in which the interest was transferred to the corporation.

A final consideration is the proper treatment of a transfer of property coupled with the performance of services for the transferee corporation. For example, suppose that a corporation issues 80 percent of its stock (worth \$20,000) in exchange for a transfer of property worth \$15,000 and in consideration of the performance of services valued at \$5,000. The property transfer qualifies for nonrecognition inasmuch as the transferor is in control of the corporation (owns 80 percent of the corporation's stock) after the exchange.ⁿ⁹ All of the stock received by the transferor, even the shares received in consideration of the services rendered to the corporation, may be counted in determining whether the control requirement of *IRC Section 351* has been met. However, nonrecognition does not extend to the stock issued for services. The taxpayer will realize ordinary income to the extent of the value of the stock received as compensation.ⁿ¹⁰

Caution should be exercised lest it be assumed that a taxpayer who renders services to a corporation for which he receives stock, an transfer any amount of property and still have all of the shares counted for control purposes. Under the Regulations:

"[S]tock or securities issued for property which is of relatively small value in comparison to the value of the stock and securities already owned (or to be received for services) by the person who

transferred such property, shall not be treated as having been issued in return for property if the primary purpose of the transfer is to qualify ... the exchanges of property by other persons transferring property."¹¹

Thus, if *A* were to transfer property worth \$30,000 and receive 75 percent of a new corporation's stock, and *B* were to render services worth \$10,000 and receive 25 percent of the stock, the transaction would not qualify under *IRC Section 351* since *A*, the only transferor of property, would not be in control of the corporation. The result would be no different if *B* transferred a relatively small amount of property, say \$200, to the corporation in an attempt to secure nonrecognition treatment for *A*.

[b] Assignment of Income and Related Problems.

We have just seen that the receipt of stock by a taxpayer in consideration of services rendered to the issuing corporation or to one of the transferors produces ordinary income for the taxpayer. We must now inquire whether the protective umbrella of *IRC Section 351* affords nonrecognition to all transfers of property, or whether considerations, such as the tax benefit rule or the doctrine of anticipatory assignment of income, override the provisions of *IRC Section 351* and require the transferor to report ordinary income when the transferred item is one which would generate ordinary income.¹²

[i] Section 351 and the Assignment of Income Doctrine. The underlying premise of the assignment of income doctrine is that income should be taxable to the person who earns it. It is obvious that if *IRC Section 351* permitted a taxpayer to transfer an item of potential income to a corporation without recognition of gain, a change in the taxable person could be achieved through the volitional act of the taxpayer. By relying on cases such as *Helvering v. Horst*¹³ and *Lucas v. Earl*,¹⁴ courts have generally been able to block attempts to shift the incidence of taxation through anticipatory assignments, even though the transfer meets the literal terms of *IRC Section 351*.¹⁵

However, the taxpayer has not always been on the losing side. The transfer of a carved-out oil payment to a corporation was held to be a transfer of property entitled to nonrecognition in *H.B. Zachry Co. v. Commissioner*.¹⁶ The Commissioner's contention that the carved-out oil payment was not property was founded on two arguments: The first, based on *Commissioner v. P.G. Lake, Inc.*,¹⁷ asserted that an assignment of a carved-out oil payment could never be made under a nonrecognition provision without immediate tax consequences. The Tax Court, in dismissing this argument, distinguished *Lake* on the ground that the issue in that case concerned the character of realized and recognized gain, and not the nonrecognition of gain. The second sought to deny property status to the transferred income on the theory that it was no more than a mere income right. The denial of this contention rested on the finding that even if it was a pure income right, local law treated the oil payment as an interest in land. And, because of this, the Tax Court was able to "view it as 'property' within the common law definition and within the intent of Section 351."¹⁸

By looking to local law to provide the definition of "property," the Tax Court effectively removed the assignment of income doctrine from consideration in *IRC Section 351* transfers. In so doing, the court overlooked the fact that the doctrine developed notwithstanding the characterization of the assigned item as property under local law. The correctness of the *Zachry* decision is, therefore, open to doubt.

One normally expects to see the Internal Revenue Service pressing for application of the assignment of income doctrine. A reversal of roles occurred in *Hempt Bros., Inc., v. United States*,¹⁹ where a transferee corporation sought to invoke the doctrine to make a cash basis transferor taxable on income generated by the collection of transferred accounts receivable. The Third Circuit held otherwise, reasoning that if the transferor were taxed on the transfer of the receivables, the specific congressional intent reflected in *IRC Section 351* would be frustrated if an ongoing business could not be incorporated tax free. An essential ingredient of the *Hempt Bros.* result is the finding that the transfer of the accounts receivable served a valid business purpose.²⁰ Where a tax avoidance purpose is evident, the Service will

continue to argue for taxation of the transferor.ⁿ²¹

[ii] Section 351 and the Tax Benefit Rule. It is well settled that if a taxpayer using the reserve method of accounting for bad debts no longer needs to maintain the reserve, the amount of such reserve becomes an item of gross income.ⁿ²² This result is dictated by the tax benefit rule--creation of the reserve produced a deduction; its cancellation should properly produce income. Should, however, the rule apply if the taxpayer's need for the reserve ends because of an incorporating transfer of the accounts receivable to which the reserve applies?

The question produced conflicting answers. The Internal Revenue Service,ⁿ²³ the Fifth Circuit,ⁿ²⁴ and the Tax Courtⁿ²⁵ all held that elimination of the reserve caused income to be realized under the tax benefit rule, even though the transfer of the receivables qualified for nonrecognition treatment under *IRC Section 351*. The reasoning of the Tax Court was simply "that the taxpayer, by disposing of the accounts receivable, will never sustain a bad debt in respect thereof, and the deduction which he has previously taken for such anticipated loss must therefore be restored to income."ⁿ²⁶

The contrary result was reached by the Ninth Circuit in *Estate of Schmidt v. Commissioner*.ⁿ²⁷ The receivables were there transferred to the corporation subject to the reserve. In fixing the net value of the transferred assets, and, therefore, the amount of stock to be issued, the reserve was deducted from the face amount of the receivables. The court, in holding that the economic realities of the situation prevented any realization of income, stated:

"It is quite true that the taxpayer no longer 'needed' the reserve, but it is certainly not true, in any economic sense, that he has recovered its value. What he has recovered, in relation to the receivables, is pieces of paper--stock certificates--representing their net value, not their gross value."ⁿ²⁸

The Supreme Court's decision in *Nash v. United States*ⁿ²⁹ resolved the conflict in favor of the taxpayer. The nonrecognition provisions of *IRC Section 351* prevailed, and no income was realized because of the elimination of the bad debt reserve.ⁿ³⁰ The result in *Nash* is of diminishing importance because of the repeal, in 1986, of the reserve method of deducting bad debts.ⁿ³¹

[iii] Section 351 and the Clear Reflection of Income Doctrine. A third weapon available to the Commissioner in his battle against midstream transfers of potential income is his ability to require clear reflection of a taxpayer's income, either through a change in accounting method under *IRC Section 446(b)*, or an allocation of income and deductions between taxpayers under *IRC Section 482*.ⁿ³² Use of the former section is illustrated by *Palmer v. Commissioner*,ⁿ³³ where a taxpayer, reporting income on the completed contract method, transferred assets to a corporation in return for all of its stock prior to completion of a major contract. Consistent with the completed contract method, the taxpayer did not report any pretransfer payments received under the contract as income.ⁿ³⁴ At the same time, the transferee corporation was able to offset the profits from the venture against existing losses. The Commissioner's attempt to charge the transferor with a proportionate share of the income earned under the contract, by requiring adoption of the percentage of completion method,ⁿ³⁵ met with Ninth Circuit approval.

The fact situation in *Rooney v. United States*,ⁿ³⁶ is typical of those in which the Commissioner seeks to invoke the clear reflection provision of *IRC Section 482*. The transferors incurred all of the expenses necessary for the production of income prior to the date of transfer. By deducting these expenses on their individual returns for the year of transfer, they suffered a net operating loss which they attempted to carry back to prior years in order to secure a refund. All of the income earned was reported by the corporation. The Government reallocated the expenses to the corporation, an action considered by the court to be in keeping with the purpose of *IRC Section 482*, namely, to prevent the avoidance of tax or the distortion of income by shifting profits from one trade or business to another one under common control. The taxpayers' argument, that *IRC Section 482* had to give way when *IRC Section 351* applied, was met with the statement that "section 482 ... will control when it conflicts with section 351 ... as long as the discretion of the Commissioner in reallocating is not abused."ⁿ³⁷ The holding of the Ninth Circuit in this regard has found fairly

uniform application.ⁿ³⁸

IRC Section 269A provides the Service with another weapon to attack the formation or use of corporations to achieve a tax avoidance purpose. If (1) substantially all of the services of a personal service corporationⁿ³⁹ are performed for or on behalf of one other corporation, partnership, or other entity, and (2) the principal purpose for the formation or use of the corporation is the avoidance or evasion of federal income tax by reducing the income of, or securing the benefit of any deduction, credit, exclusion, or other allowance for any employee-ownerⁿ⁴⁰ that would not otherwise be available, the Commissioner can allocate the income, deductions, credits, exclusions, or allowances between the corporation and its employee-owners if necessary to prevent tax avoidance or evasion, or clearly reflect income.

[iv] Section 351 and the Business Purpose Doctrine. Must a transfer meeting the literal terms of *IRC Section 351* be granted nonrecognition if the transfer serves no purpose other than tax avoidance? A recurring theme in cases involving transfers made to secure tax advantages is that only those transactions having a legitimate business purpose in addition to the lessening of tax impact will be recognized for tax purposes.ⁿ⁴¹ If the taxpayer is unable to establish an independent purpose for the transfer, it will be disregarded and the true nature of the transaction given effect. The rationale for giving effect to the business purpose doctrine in other nonrecognition situations should apply with equal force to *IRC Section 351* transfers,ⁿ⁴² and thereby afford another means of attacking attempts at tax-free incorporation of potential income.

[2] Solely in Exchange for Stock.

The second requisite of *IRC Section 351* is that the consideration flowing from the corporation to the transferors consist solely of "stock in such corporation."ⁿ¹ However, for transfers before October 3, 1989 (July 12, 1989 for a transferor corporation that became the common parent of the transferee in an affiliated group), the permitted consideration could also take the form of securities of the transferee corporation.ⁿ² Excepting the question whether stock warrants or stock rights constitute stock,ⁿ³ or whether a certificate of contingent interest is the equivalent of stock,ⁿ⁴ there has been little litigation concerned with the meaning of stock. The bulk of the problems focused on the meaning of, "securities."

The task of classifying an instrument as one which does or does not constitute a security abounds in confusion. The difficulties that exist can in large part be traced to the opinion in *Pinellas Ice & Cold Storage Co. v. Commissioner*,ⁿ⁵ wherein the Supreme Court held a transfer of property in exchange for cash and short-term notes one which could not qualify as a reorganization. In arriving at this result, the Court said:

"These notes--mere evidence of obligation to pay the purchase price--were not securities within the intentment of the act and were properly regarded as the equivalent of cash. It would require clear language to lead us to conclude that Congress intended to grant exemption to one who sells property and for the purchase price accepts well-secured, short-term notes (all payable within four months), when another who makes a like sale and receives cash certainly would be taxed."ⁿ⁶

The Court concluded "that to be within the exemption the seller must acquire an interest more definite than that incident to ownership of its short-term purchase-money notes."ⁿ⁷

The last statement marked the Supreme Court's adoption of the continuity of interest doctrine developed shortly before by the Second Circuit in *Cortland Specialty Co. v. Commissioner*.ⁿ⁸ According to that doctrine, a transaction falls without the realm of reorganization unless the transferors retain a continuing proprietary interest in the transferred property. Once it had been determined that short-term notes did not provide the necessary continuity, and, therefore, that the transaction was not a reorganization, there was no need for the Court to decide more. It no longer mattered whether the instruments received were securities or something else. Taxability of the transaction had been decreed by lack of continuity of interest.

The additional determination, that short-term notes did not constitute securities, caused the subsequent confusion.ⁿ⁹ Courts seized upon length of time to maturity as the most important classification criterion. Indicative of the post-*Pinellas* approach is the following language of the Tax Court:

"[The term securities] denotes an obligation of a character giving the creditor some assured participation in the business of the debtor, or, in other words, an investment in the business, and that term does not include evidences of indebtedness for short-term loans representing temporary advances for current corporate needs."ⁿ¹⁰

What length of time did the courts think necessary to turn an obligation into an investment in the business of the debtor? It became generally assumed that an instrument having a term of ten years or more could qualify as a security,ⁿ¹¹ while one with a term of five years or less could not.ⁿ¹² But the existence of other criteria may outweigh an adverse "time" factor. The Tax Court has held unsecured notes maturing five to nine years after issuance to be securities when their payment was subject to the complete liquidation of a substantial prior loan.ⁿ¹³ Similar reliance on additional factors resulted in a Service ruling that bonds secured by a mortgage on the issuer's property were securities, even though the shortest time to maturity was three years, and the average time, six and one half years.ⁿ¹⁴ According to the Tax Court, the determination involved an over-all evaluation of the nature of the debt, degree of participation and continuing interest in the business, the extent of proprietary interest compared with the similarity of the note to a cash payment, the purpose of the advances, etc.ⁿ¹⁵ In other words, no hard and fast rule mechanically choosing which instruments are securities is possible; the evaluation must proceed on a case-by-case basis. Indeed, such an approach led the Fifth Circuit to find a one-year note a security.ⁿ¹⁶

Under *IRC Section 351(g)(1)(A)*, the receipt of only nonqualified preferred stock eliminates nonrecognition treatment. This means that both gain or loss can be recognized on the transfer. However, if the taxpayer receives stock other than nonqualified stock in addition, the nonqualified stock is treated as "boot" and gain is recognized only to the extent of the value of the boot;ⁿ¹⁷ loss in such case cannot be recognized.ⁿ¹⁸ The nonqualified preferred stock still qualifies as stock in the determination of control of the corporation.ⁿ¹⁹

The provision applies to preferred stock (stock that is limited and preferred as to dividends and does not participate in corporate growth to any significant extent), where (1) the holder has the right to require the issuer or a related person to redeem or purchase the stock, (2) the issuer or a related party is required to purchase the stock, (3) the issuer or a related person has the right to redeem or purchase the stock and, as of the issue date, it is more likely than not that the right will be exercised, or (4) the dividend rate on the stock varies in whole or in part (directly or indirectly) with reference to interest rates, commodity prices, or other similar indices.ⁿ²⁰ The rules of (1), (2), and (3) apply only if the right or obligation may be exercised within 20 years of the date the instrument is issued and such right or obligation is not subject to a contingency that, as of the issue date, makes remote the likelihood of the redemption or purchase.ⁿ²¹ Moreover, a right or obligation is disregarded if it may be exercised only upon the death, disability, or mental incompetency of the holder, or, in the case of stock transferred in connection with the performance of services, it may be exercised only upon the holder's separation from service.ⁿ²²

[a] The Receipt of "Boot."

Suppose the consideration received by the taxpayer in exchange for his transfer of property consists not only of stock, but also of other property.ⁿ²³ Clearly, the transfer is not "solely in exchange for stock." However, the failure to meet this condition of *IRC Section 351(a)* does not completely negate nonrecognition treatment. In the first place, any loss realized on a transfer falling within *IRC Section 351* will continue to go unrecognized in full, notwithstanding the receipt of "boot."ⁿ²⁴ In the second, the amount of gain to be recognized as a result of the receipt of "boot" is a product of two functions: (1) the amount of gain realized, and (2) the value of the property received.ⁿ²⁵

Example:

Assume a taxpayer transfers property which has an adjusted basis of \$50,000 and a value at the time of transfer of \$75,000 to a corporation in exchange for stock of the corporation worth \$60,000, cash of \$10,000, and other property having a value of \$5,000. Assuming further that the control requirement of *IRC Section 351(a)* is met, the realized gain of \$25,000 will be recognized only to the extent of \$15,000, the amount of money received plus the value of the other property received.

Since the receipt of "boot" affects the recognition of gain only, an interesting problem is posed when the property transferred consists of more than one asset. To illustrate, suppose a taxpayer transfers two assets, one with an adjusted basis of \$40,000 and a fair market value of \$25,000, and the other with a basis of \$10,000 and a value of \$50,000 in exchange for stock worth \$45,000 and cash of \$30,000. Using an aggregate approach, the taxpayer's net gain is \$25,000, all of which is recognized. Using a fragmented approach, the result is a loss of \$15,000 on the first asset and a gain of \$40,000 on the second. The latter method accords more with precedent and probably is the one to be employed.ⁿ²⁶ Since the quantum of realized gain or loss is determined on an asset-by-asset basis, the consideration received must be allocated between the two assets in order to determine the extent of recognized gain. Using a method of allocation based on relative fair market values, two-thirds ($\$50,000/\$75,000$) of the total consideration, and, thus \$20,000 of the cash is attributed to the "gain" producing asset, giving rise to recognized gain of \$20,000.ⁿ²⁷ No loss is recognized even though \$10,000 of the cash is allocable to the transfer of the "loss" property.ⁿ²⁸

[i] Character of the Recognized Gain. Once gain is recognized to any degree, the character of the gain--capital or ordinary--becomes an important consideration. Since the exchange requirement of a capital transaction is clearly present, capital gain will ensue if the transferred property is a capital asset. Whether the gain is long- or short-term will obviously depend on the length of time the property was held by the transferor.

The Code contains a number of exceptions to capital gain treatment. These special provisions are generally triggered when the transfer is of a specific type of property, although the relationship of the transferor is sometimes crucial. The sections to consider are listed below.

(1) *IRC Section 1245*, requiring recapture of depreciation taken after 1961 on dispositions of specified types of property.ⁿ²⁹ The normal overriding effect of *IRC Section 1245*, namely, that it applies notwithstanding any contrary provision of the Code, is modified by *IRC Section 1245(b)(3)* to require recapture only in the event gain must be recognized under *IRC Section 351(b)*. In other words, *IRC Section 1245* does not mandate independent recognition of gain in an *IRC Section 351* transfer.ⁿ³⁰ Furthermore, the amount of post-1961 depreciation that *IRC Section 1245* causes to be recaptured cannot exceed the amount of the otherwise recognized gain. To illustrate, assume a taxpayer realizes a gain of \$10,000 on the transfer of depreciable personal property to a corporation in exchange for its stock and \$5,000 in cash. The gain recognized on the transfer cannot exceed \$5,000, the cash received.ⁿ³¹ The amount of depreciation recapture also cannot exceed that sum.

(2) *IRC Section 1250*, which decrees recapture of certain post-1963 depreciation when the disposition is of real property not specified in *IRC Section 1245*. The extent to which *IRC Section 1250* applies in a transaction falling within *IRC Section 351* is limited in the same manner as *IRC Section 1245*.ⁿ³²

(3) *IRC Section 1239*, which eliminates from capital gain treatment any gain recognized on the transfer of depreciable property if more than 50 percent in value of the outstanding stock of the transferee corporation is owned (directly or indirectly) by or for the transferor.ⁿ³³ The statute calls for the application of the rules of *IRC Section 267(c)* to determine the extent of the transferor's ownership interest.ⁿ³⁴

(4) *IRC Section 1248*, which may turn the gain realized on dispositions of stock in controlled foreign corporations into dividend income.ⁿ³⁵

[ii] Assumption of the Transferor's Liability. Previous mention has been made of the rule that an assumption of liability by the purchaser or transferee results in an increase in the amount realized by the transferor.ⁿ³⁶ This should logically lead to the conclusion that when liabilities are assumed as part of an incorporating transfer, the transferor is in receipt of "boot." And this is exactly how the Supreme Court ruled in *United States v. Hendler*.ⁿ³⁷ However, through specific statutory enactment, now *IRC Section 357(a)*, no "boot" is deemed received by the transferor when the transferee corporation assumes a liability.ⁿ³⁸ Thus, if a taxpayer transfers property with a basis of \$25,000 and a value of \$50,000 to a corporation in exchange for stock of \$40,000 and the corporation's assumption of an existing encumbrance of \$10,000, the taxpayer realizes a gain of \$25,000, but because of *IRC Section 357(a)*, recognizes none of that gain.

Prior to 1999, *IRC Section 357(a)* applied if the transferee corporation acquired property subject to a liability. Legislation enacted in that year limits the application of the provision to liabilities that are assumed. For this purpose, a recourse liability is treated as having been assumed if, on the basis of all facts and circumstances, the transferee has agreed to, and is expected to, satisfy the liability, whether or not the transferor has been relieved of the liability.ⁿ³⁹ A nonrecourse liability is treated as having been assumed by the transferee of any asset subject to the liability, but the amount of the liability must be reduced by the lesser of (1) the amount of the liability that the owner of assets not transferred to the transferee corporation and also subject to the liability has agreed with the transferee to, and is expected to, satisfy; or (2) the fair market value of the other assets subject to the liability.ⁿ⁴⁰

The possibility that *IRC Section 357(a)* might lead a taxpayer to borrow money, pledge the property as security, and then immediately transfer the property to a corporation which would assume the liability or take the property subject to it, prompted Congress to enact *IRC Section 357(b)*.ⁿ⁴¹ The effect of the provision, invoked whenever it appears that the principal purpose of the taxpayer is either a purpose to avoid federal income tax on the exchange or one which is not a bona fide business purpose,ⁿ⁴² is to treat the assumption as money received on the exchange (in other words, "boot"). Furthermore, if one of the improper purposes is found to exist with respect to the assumption of any liability, then all liabilities assumed pursuant to the exchange are treated as "boot."ⁿ⁴³

The determination of principal purpose requires inquiry into the nature of the liability as well as the circumstances surrounding the arrangement for the assumption. Thus, where the taxpayer first expressed eagerness in mortgaging properties "to the limit" before transferring them to a corporation, and then used the proceeds to purchase tax-exempt securities, the transfer resulted in the recognition of gain.ⁿ⁴⁴ In like manner, a taxpayer who borrowed against property in order to secure funds to pay a personal tax liability, was held to have run afoul of *IRC Section 357(b)* when his transfer of the property to a corporation three days later was accompanied by an assumption of the liabilities by the transferee, and the transferor could not show a valid purpose for the transfer and assumption.ⁿ⁴⁵ However, it is important to note that the bona fide business purpose need not be a corporate purpose. In *Easson v. Commissioner*,ⁿ⁴⁶ the taxpayer sought to place himself in a liquid position to take advantage of a business downturn which he believed would soon occur. Finding himself unable to obtain a buyer for his property, the only way to achieve liquidity was by mortgaging the property. The transfer to the corporation was motivated by the desire for limited liability and convenience of management. The business purpose for transferring the property without first removing the encumbrance was the taxpayer's desire to remain liquid during an expected business recession. This the Ninth Circuit found to be a good business purpose, for:

"[*IRC Section 357(b)*] says nothing about the origin of an encumbrance. ... Nor is there anything in the section which deals with the reasons for the encumbrance, or the manner in which the mortgage proceeds are used. If there is a good business purpose for transferring the property without first removing the encumbrance, the requirements of [*IRC Section 357(b)*] are satisfied."ⁿ⁴⁷

A further exception to the general rule of *IRC Section 357(a)* comes into play whenever the liabilities assumed exceed the total adjusted basis of all properties transferred to the corporation by the taxpayer.ⁿ⁴⁸ Under *Section 357(c)(1)*, the excess is considered a gain from the exchange of the property.ⁿ⁴⁹ Thus, if an individual transfers two assets, each having a basis of \$20,000, but one of which is encumbered by a liability of \$35,000, assumption of the liability by the transferee corporation will not result in the receipt of "boot" since the aggregate basis of the transferred property is greater than the liability assumed. If, however, the basis of each asset is only \$15,000, the taxpayer now has a gain of \$5,000. This result will obtain in all events, that is, whether or not gain is realized on the transaction as a whole. While the express language of *IRC Section 357(c)(1)* appears to classify the nature of the gain solely by reference to the character of the transferred property,ⁿ⁵⁰ the question whether the gain is capital gain or ordinary income should probably be resolved by reference to all of the rules affecting character.ⁿ⁵¹

How does one determine the character of the gain if more than one asset is transferred to the corporation? Consider an incorporating transfer consisting of the following assets:

Asset	Basis	Value	Liability
Capital	\$5,000	\$20,000	\$40,000
Noncapital	30,000	10,000	-0-
	\$35,000	\$30,000	\$40,000

Although the transaction produces a loss, *IRC Section 357(c)* requires the recognition of \$5,000 in gain because the \$40,000 liability encumbering the capital asset exceeds the aggregate basis of the transferred assets. According to *Regulations Section 1.357-2(b)*, a portion of the gain must be allocated to each asset in accordance with its fair market value in order to determine the character of the gain. Therefore, under the regulation, two-thirds of the gain must be allocated to the capital asset and one-third to the noncapital asset. Not only does this mean that a portion of the gain must be characterized as ordinary income, but that characterization stems from an asset that, if sold, would engender a loss. This result has been called absurd.ⁿ⁵²

IRC Section 357(c) once posed a trap for the unwary cash basis taxpayer who incorporated a going business which listed accounts receivable among its assets and accounts payable among its liabilities. The accounts receivable of a proprietorship operated on a cash basis method of accounting have a basis of zero.ⁿ⁵³ Thus, if the books and records of the business showed the following assets and liabilities:

Assets

Cash	\$2,000
Accounts receivable	78,000
Equipment (net of depreciation)	10,000
	\$90,000

Liabilities

Accounts Payable	\$50,000

the aggregate basis of the transferred assets would be less than the liability represented by the accounts payable.

IRC Section 357(c)(3) prevents this result by excluding from the amount of liabilities assumed any liability whose payment would produce a deduction (e.g., interest and taxes which relate to the transferred trade or business),ⁿ⁵⁴ or any liability that would be payable to a partner under *IRC Section 736(a)*.ⁿ⁵⁵ Not covered by the subsection is any liability

to the extent its incurrence resulted in the creation of, or an increase in, the basis of any property.

[3] Control.

[a] Control Defined. The final condition of *IRC Section 351* requires the transferors to be in control of the corporation immediately after the exchange.ⁿ¹ The requisite degree of control is met if the transferors own stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of the corporation.ⁿ²

A threshold problem raised by the definition of control focuses on the question of voting power. Suppose a corporation issues preferred stock which has voting rights only when dividends are in arrears. Is such stock to be counted when determining the total combined voting power of all classes of stock entitled to vote? The answer is not entirely free from doubt, although it would seem that only stock having presently vested voting rights should be considered since the statute looks to control immediately after the transfer, and at that moment in time, contingent-voting-right stock has no effect on control.ⁿ³

A second problem is presented whenever a corporation has more than one class of nonvoting stock outstanding. Assume a taxpayer transfers property to a corporation in return for at least 80 percent of the voting common stock of the corporation, 90 percent of the corporation's nonvoting preferred stock, and 75 percent of its nonvoting common stock. If the number of outstanding shares of each class of nonvoting stock is the same, it is clear that the transferor owns more than 80 percent of the total of all other classes. However, is he in control of the corporation? If the second ownership requirement is tested on an aggregate basis, the answer is yes; if class-by-class, it is no. The question has been considered on only one occasion, and then by the Service. It denies control unless the persons claiming control own at least 80 percent of each class of stock.ⁿ⁴

[b] Control Immediately After the Exchange. The extent of stock ownership is not the only criterion of control under *IRC Section 351*. Also imposed is a time test, namely, that the requisite degree of control exist "immediately after the exchange." Use of the word "immediately" suggests that mere momentary control is enough. However, despite some early cases holding that retention of control for an instant satisfied the statute,ⁿ⁵ the courts now are of the view that momentary control is not sufficient, if the loss of control results from a subsequent transfer made pursuant to prior agreement, and the transfer is an interrelated step in the incorporating transaction.ⁿ⁶

The difference between a subsequent transfer which is an integral part of the entire transaction, and one which is independent can be illustrated by comparing the facts in two cases. In the first, *S. Klein on the Square, Inc. v. Commissioner*,ⁿ⁷ a third party made an offer to the eventual transferors either to purchase the assets of an unincorporated business which he would then transfer to a corporation, or to buy the stock of a corporation to be formed by the transferors. Following an agreement in which the second approach was adopted, the corporation was formed, the assets transferred to it in return for stock, and the stock distributed to the purchaser. The Tax Court, in holding that the transaction fell outside the scope of the predecessor of *IRC Section 351* because the transferors lacked control, found:

"The steps of the plan, at least to the point where the shares went out of the ownership of [the transferors], were so inseparable and interdependent that the acceptance of the bid and the agreement would have been vacuous had the ownership stopped there. The transfer of the shares by [the transferors to the purchaser] was not an independent transaction as to which [the transferors] had any further choice."ⁿ⁸

The second case, *American Bantam Car Co. v. Commissioner*,ⁿ⁹ involved a plan calling for a transfer in exchange for 300,000 shares of common stock (all of the corporation's outstanding stock immediately after the exchange), to be followed by an offering to the public of preferred stock of the corporation. Under the contemplated plan, the underwriters of the issue of preferred stock were to receive certain amounts of common stock as compensation for services. The incorporating transfer, including the receipt of the 300,000 shares by the transferors, occurred on June 3,

1936. The agreement with the underwriters was formalized five days later. In October, 1937, the public offering of preferred stock ceased and the underwriters received the almost 88,000 shares of common stock to which they had become entitled. The Tax Court found the original exchange of assets for stock and the subsequent transfer to the underwriters to be independent steps which could not be considered part of the same transaction in order to deprive the original transferors of control immediately after the exchange. The court looked to three factors to justify its conclusion:

- (1) There was no written agreement prior to the exchange binding the transferors to transfer stock to the underwriters.
- (2) The underwriters did not have an absolute right to ownership of the common stock, but would become entitled thereto only as and if certain percentages of preferred stock were sold.
- (3) The necessity of placing the common shares in escrow pending completion of the public offering was indicative of complete ownership in the transferor.

According to the Tax Court:

"The understanding with the underwriters, for disposing of the preferred stock, however important, was not a *sine qua non* in the general plan, without which no other step would have been taken. While the incorporation and exchange of assets would have been purposeless, yet both would have been carried out even though the contemplated method of marketing the preferred stock might fail."¹⁰

Perhaps this latter ground, and not technical distinctions such as whether an agreement is in writing or not, better explains the rationale of *American Bantam Car*. While financing was crucial, proceeding via the sale of preferred stock was not. Another means of raising funds could have been pursued had the public offering been abandoned. Viewed in this light, the original exchange could stand alone.

Although the two cases mentioned both occurred in the commercial sphere, the same test of interdependence is employed where the transfer is gratuitous. Control immediately after the exchange will be present unless the transferor is under a legal obligation to dispose of the shares.¹¹

One instance in which control is not lost by a subsequent transfer of the stock received by the transferor is provided by *IRC Section 351(c)(1)*. The fact that a corporate transferor distributes all or part of the stock which it receives in the exchange to its shareholders is not taken into account in determining control.¹²

[c] The Problem of Multiple Transferors. *IRC Section 351(a)* expressly permits transfers by more than one person to qualify for nonrecognition treatment provided that "immediately after the exchange such ... persons are in control ... of the corporation." By this provision, control following a multiple transferor exchange is tested by looking to the transferors as a group.¹³ Thus, it is possible for control to exist even though each of the transferors does not receive shares of each class of stock issued as part of the exchange. However, a pre-October 3, 1989 exchange in which some of the transferors received only stock while others received only securities is one which can qualify only in part. To illustrate:

Example:

In 1988, *A*, *B*, *C*, and *D* transferred property of equal value to a newly formed corporation. *A*, *B*, and *C*, received all of the outstanding stock of the corporation while *D* received debt securities. *A*, *B*, and *C* met the requirements for nonrecognition; they transferred property in exchange for a controlling stock interest. *D*, on the other hand, engaged in a taxable transaction since he is not part of the control group. He is merely a creditor of the corporation.¹⁴

The foregoing result should be contrasted with the situation in which all of the stock of an existing corporation is owned by A, B, C, and D, each of whom transferred property to the corporation solely in exchange for securities. The transaction met the conditions imposed by *IRC Section 351*. Each of the four individuals transferred property and received a security in return. Together they controlled the corporation immediately after the exchange.ⁿ¹⁵

Control can exist "immediately after the exchange" even if the transfers take place at different times. The Regulations explicitly negate any requirement of simultaneous exchanges by two or more persons if the rights of the parties have been previously defined by agreement and the terms of the agreement are carried out expeditiously.ⁿ¹⁶ This provision is of extreme importance if the property to be transferred by one person is, say, the subject of litigation. An agreement between the parties to transfer the property upon termination of the litigation, and actual transfer at that time, will make all transfers part of one transaction qualifying for *IRC Section 351* treatment.

The present Code does not require, as did the 1939 Code, that the stock received by each transferor be substantially in proportion to the fair market value of the property transferred by each. Notwithstanding elimination of this requirement, consideration must be given to any exchange in which stock is received in disproportion to the recipient's interest in the transferred property. The Regulations call for an inquiry into the realities of the situation and for the entire transaction to be given tax effect in accordance with the true nature of the transaction.ⁿ¹⁷ They go on to say that, in appropriate cases, the transaction may be treated as if the stock had first been received in proportion to the interests transferred and then used to make gifts, to pay compensation, or to satisfy obligations of the transferor.ⁿ¹⁸

[4] The "Investment Company" Exception.

The underlying purpose of an "exchange fund" or "swap fund" is to provide a degree of diversification of investment not otherwise practicable or possible for the individual investor. Typically, a swap fund exchange involves transfers of appreciated securities (usually publicly-listed companies) by a group of investors in exchange for stock of the transferee fund. If the investors individually sold their stocks and securities and used the proceeds of sale to acquire shares in the mutual fund, they would be required to pay tax on the appreciation in the value of the stocks and securities sold. Structured as a section 351 exchange, however, the members of the group hope to achieve diversification while avoiding recognition of gain.

Should such an exchange be tax-free? Literally, there has been a transfer of property in return for stock, with the transferors in control of the corporation after the exchange. But, does the transaction accord with the rationale for nonrecognition, namely, that the exchange has not produced a substantial change in the transferor's economic position, but rather a change in the form of investment only? In the early days of swap funds, the Service apparently thought such exchanges fit the mold of nonrecognition transfers for it ruled privately on a number of occasions that the exchanges were tax-free. However, the Service announced a no-ruling policy with respect to swap fund transactions in *Rev Proc 62-32*,ⁿ¹ and in 1966 the Treasury issued proposed regulations which sought to tax "swap fund" exchanges. Shortly thereafter, Congress created an exception to *IRC Section 351*'s nonrecognition rule when the corporation to which controlling shareholders transfer property is an "investment company."ⁿ² Congress subsequently required recognition of gain on transfers of property to investment company partnershipsⁿ³ and trustsⁿ⁴ as well, and extended the denial of tax-free treatment to asset transfers in which a previously undiversified investment company is able, through an otherwise tax-free reorganization, to diversify its investment portfolio.ⁿ⁵

As Congress did not define the term "investment company," the Treasury and Internal Revenue Service were left with the task of administratively defining that term as well as other parameters of the investment company exception. The regulations define an investment company as either (1) a regulated investment company, (2) a real estate investment trust, or (3) a corporation more than 80 percent of the value of whose assets are held for investmentⁿ⁶ and consist of readily marketable stocks and securities, or interests in regulated investment companies or real estate investment trusts.ⁿ⁷ In 1997, Congress, concerned that exchange funds were evading the investment company exception by adding

high quality investments other than readily marketable stocks and securities to their portfolios, expanded the list of assets which result in designation as an investment company for purposes of *IRC Section 351(e)*.ⁿ⁸ As amended, *IRC Section 351(e)(1)* requires that all stock and securities be taken into account for purposes of the 80 percent test, whether or not they are readily marketable.ⁿ⁹ Also treated as "stock and securities" for purposes of the 80 percent test are money,ⁿ¹⁰ any equity interest in a corporation, evidences of indebtedness, options, forward or futures contracts, notional principal contracts or derivatives, foreign currency, and interests in precious metals unless used or held in the active conduct of a trade or business.ⁿ¹¹

The regulations provide that, in applying the 80 percent test, stock and securities in subsidiary corporations (*i.e.*, those in which the parent owns 50 percent or more of the voting power or total value of the outstanding shares) are disregarded and the parent is deemed to own directly its ratable share of the subsidiaries' assets.ⁿ¹² Subject to and without overriding this provision, the 1997 amendments added other operating rules to be used in determining whether a transferee meets the 80 percent test:

- (1) If substantially all the assets of any entity consists of stock and securities or assets treated as stocks and securities by *IRC Section 351(e)(1)(B)*, any interest in the entity itself is treated as "stock and securities."ⁿ¹³
- (2) If any entity owns stock and securities (including assets treated as stock and securities by *IRC Section 351(e)(1)(B)*), but such stock and securities constitute less than substantially all of its assets, an interest in such entity is treated as "stock and securities" to the extent the value of such interest is attributable to the entity's "stock and securities."ⁿ¹⁴
- (3) An interest in any noncorporate entity is considered "stock and securities" if, pursuant to its terms or any other arrangement, it is convertible into, or exchangeable for, any asset that either is or is treated as "stock and securities" under *IRC Section 351(e)(1)*.ⁿ¹⁵

Significantly, the regulations do not treat every transfer of property to an "investment company" (including a corporation meeting the 80 percent test) as taxable.ⁿ¹⁶ To fall within the investment company exception, two or more persons must transfer nonidentical assets to an investment company, and the transfer must result, directly or indirectly, in a diversification of the interests of at least one of the transferors.ⁿ¹⁷ A transfer to a newly organized corporation by a single transferor, or transfers by two or more persons each of whom transfers assets identical to those transferred by the others, do not come within the investment company exception.ⁿ¹⁸ Thus, if each of several transferors transfer a diversified portfolio of stocks and securities to a corporation, none achieves diversification by reason of the transfers, the investment company exception does not apply, and no gain or loss is recognized.ⁿ¹⁹ A transferor is deemed to have transferred a diversified portfolio of stocks and securities if not more than 25 percent of the value of her portfolio is invested in the stock and securities of any one issuer and not more than 50 percent of the value of her portfolio is invested in stock and securities of 5 or fewer issuers.ⁿ²⁰ For purposes of calculating the 25 and 50-percent tests, Government securities are included in the denominator but not the numerator of the fractions, unless they were acquired to meet the 25 and 50-percent tests.

[5] The Bankruptcy Exception.

Gain must be recognized if, pursuant to a plan, property of a debtor subject to the jurisdiction of a court in a "title 11 or similar case" is transferred to a controlled corporation, but only to the extent that the stock received on the exchange is used to satisfy the indebtedness of the transferor.ⁿ¹ A "title 11 or similar case" is defined as a case under title 11 of the United States Code, or a receivership, foreclosure, or similar proceeding in a federal or state court.ⁿ²

[6] Forming the Foreign Corporation.

If the transferor is a U.S. person and the transferee corporation is a foreign corporation, an additional Code provision must be considered. *IRC Section 367(a)(1)* provides that in determining the extent to which gain is recognized on an *IRC Section 351* exchange, "a foreign corporation shall not ... be considered to be a corporation."ⁿ¹ The effect of this provision is to remove the exchange from the ambit of *IRC Section 351*,ⁿ² unless one of the stated exceptions applies.

The first exception prevents the application of *IRC Section 367(a)(1)* to the transfer of stock or securities of a foreign corporation which is a party to the exchange.ⁿ³ The second makes the provision inapplicable if the transferee corporation will use the transferred property in the active conduct of a trade or business outside the United States.ⁿ⁴ However, certain assets are tainted and ineligible for the active trade or business requirement, namely: (1) stock in trade, inventory, or property held primarily for sale to customers in the ordinary course of business; (2) copyrights and similar property as defined in *IRC Section 1221(a)(3)*; (3) installments obligations, accounts receivable, or similar property; (4) foreign currency or other property denominated as foreign currency; and (5) property leased by the transferor to anyone other than the transferee.ⁿ⁵

Intangible assets, as defined by *IRC Section 936(h)(3)(B)*,ⁿ⁶ are generally treated as tainted assets for purposes of *IRC Section 367(a)(1)*, but not when the exchange is governed by *IRC Section 351*.ⁿ⁷ Instead, the U.S. person transferring the property is treated as having sold the property in exchange for payments that are contingent upon the productivity, use, or disposition of the property, i.e., royalty income, and as receiving amounts that reasonably reflect what would have been received (i) annually, or (ii) in the case of a disposition following the transfer (whether direct or indirect), at the time of disposition over the useful life of the property.ⁿ⁸ The earnings and profits of the foreign corporation to which the intangible property was transferred are reduced by the amount required to be included in income by the transferor.ⁿ⁹

Regulations make *IRC Section 367(a)(1)* inapplicable if a United States person transfers foreign stock or securities to a foreign corporation and, after the transfer the transferor owns less than 5 percent of both the total voting power and the total value of the stock of the transferee foreign corporation, or the United States transferor receives a 5-percent or greater interest in the transferee foreign corporation and enters into a prescribed five-year gain recognition agreement.ⁿ¹⁰ *IRC Section 367(a)(1)* also is inapplicable to a transfer by a United States person of stock or securities in a domestic corporation (target corporation) to a foreign corporation if the target corporation complies with the reporting requirements of *Regulations Section 1.367(a)-3(c)(6)* and each of the following conditions are met:ⁿ¹¹

- (1) No more than 50 percent of both the total voting power and the total value of the stock of the transferee foreign corporation is received in the transaction, in the aggregate, by United States shareholders.ⁿ¹²
- (2) No more than 50 percent of each of the total voting power and the total value of the stock of the transferee foreign corporation is owned, in the aggregate, immediately after the transfer, by United States persons who are either officers or directors of the domestic target corporation or who are 5-percent shareholders (own at least 5 percent of either the total voting power or total value of the domestic target corporation). Any stock of the transferee foreign corporation owned by a United States person immediately after the transfer will be taken into account, whether or not it was received in exchange for the stock or securities of the domestic target corporation.
- (3) The transferee foreign corporation or an affiliate (qualified subsidiary or qualified partnership) has been engaged in the active conduct of a trade or business outside the United States for the entire 36-month period preceding the date of transfer.ⁿ¹³ In addition, at the time of the transfer, neither the transferors nor the transferee (and, if applicable, the qualified subsidiary or qualified partnership engaged in the active trade or business) have an intention to substantially dispose of or discontinue the trade or business. Finally, the fair market value of the transferee foreign corporation must be at least equal to the fair market value of the domestic target corporation.

- (4) Either (a) the United States transferor is not a 5-percent transferee shareholder (owns at least 5 percent of either the total voting power or total value of the stock of the transferee foreign corporation immediately after the transfer); or (b) the United States transferor is a 5-percent transferee shareholder and enters into a five-year gain recognition agreement with respect to the domestic target company stock or securities transferred to the transferee foreign corporation.

Gain recognition is required under a gain recognition agreement ("GRA") if a "gain recognition event" listed in *Treasury Regulation Section 1.367(a)-8(j)*, that is not within any of the exceptions provided in *Treasury Regulation Section 1.367(a)-8(k)*, occurs during the GRA term.ⁿ¹⁴ The GRA term is approximately five-years, beginning on the date of the initial transfer of stock or securities to the transferee foreign corporation and ending as of the close of the fifth full taxable year (not less than 60 months) following the close of the taxable year in which the initial transfer occurred.ⁿ¹⁵ In general, a non-expected gain recognition event occurring during this period triggers taxation of the gain that was realized but not recognized by the US transferor on the initial transfer of stock or securities to the transferee foreign corporation.ⁿ¹⁶ The US transferor must report the gain on an amended return for the taxable year in which the initial transfer took place and pay any additional tax due plus interest, from the due date prescribed for filing the return for that year to the date the tax is paid.ⁿ¹⁷ Once the gain is reported, the US transferor gets a step-up in the basis of stock in the transferee foreign corporation received in the exchange equal to the amount of gain recognized, and the transferee gets a step-up in the basis of the stock or securities it received from the US transferor in the same amount.ⁿ¹⁸

A common "gain recognition event" is the complete or partial disposition of the stock or securities initially transferred to the foreign corporation.ⁿ¹⁹ A disposition, for purposes of this and all other provisions of the GRA regulations, includes any transfer that would constitute a disposition for any purpose under the Internal Revenue Code.ⁿ²⁰ Other transactions which may trigger gain recognition include: a disposition of substantially all of the assets of the transferred corporation;ⁿ²¹ complete or partial disposition of a partnership interest if the if the initial transfer occurred by reason of the transfer of such partnership interest;ⁿ²² complete or partial disposition of the stock of the transferee foreign corporation received in the initial exchange by the US transferor;ⁿ²³ a US corporate transferor leaves a consolidated group or joins a new consolidated group;ⁿ²⁴ a US individual transferor dies, or a US transferor that is a trust or estate ceases to exist.ⁿ²⁵ Gain recognition may also be triggered if a US transferor fails to comply in any material respect with the terms and requirements of the GRA and the GRA regulations.ⁿ²⁶

Treasury Regulation Section 1.367(a)-8(k) provides exceptions that prevent many transactions classified as "gain recognition events" from becoming "triggering events" that actually require recognition of the gain realized on the initial transfer. A general catch-all exception covers any disposition in which: (i) the disposition qualifies as a nonrecognition transaction, (ii) after which the US transferor retains an interest in the transferred stock or securities or the assets of the transferred corporation, and (iii) the US transferor enters into a new gain recognition agreement.ⁿ²⁷ For this purpose, "nonrecognition transaction" has the same meaning as in *IRC Section 7701(a)(45)*:--"any disposition of property in a transaction in which gain or loss is not recognized in whole or in part for purposes of subtitle A"--and also includes an exchange described in *IRC Sections 351(b)* or *356* even if all gain realized in the exchange is recognized.ⁿ²⁸ Transferred stock or securities" refers both to the stock or securities originally transferred to the foreign corporation and any stock or securities of the transferred corporation having a basis determined in whole or in part by reference to the basis of the stock or securities originally transferred.ⁿ²⁹ The "transferred corporation" is the corporation whose stock or securities were the subject of the initial transfer from the US transferor to the transferee foreign corporation.ⁿ³⁰ The catch-all exception additionally requires that if as a result of a disposition in a nonrecognition transaction any foreign corporation acquires either the transferred stock or securities or substantially all the assets of the transferred corporation, the US transferor must own at least five percent (applying the attribution rules of section 318 as modified by *IRC Section 958(b)*) of the total voting power and the total value of the outstanding stock of such foreign corporation.ⁿ³¹

Treasury Regulation Section 1.367(a)-8(k) also contains a list of more specific circumstances under which a US

transferor may avoid gain recognition notwithstanding the occurrence of a gain recognition event:

Death of individual US transferor. The death of an individual US transferor is not a triggering event if the person winding up the affairs of the US transferor: (i) retains sufficient assets to satisfy any possible Federal tax liability of the US transferor under the GRA for the duration of the extended period of limitations under the GRA; (ii) provides security for the payment of such tax liability if required to do so by the IRSⁿ³² (security generally required only if the transferred stock or securities are a principal asset of the US transferor and the IRS has reason to believe that a disposition of such stock or securities may be contemplated); or (iii) obtains a ruling from the IRS providing for one or more successors to the US transferor under the GRA.ⁿ³³

Liquidation of corporate US transferor. If a US transferor distributes stock in the transferee foreign corporation that it received in exchange for the initial transfer of stock or securities, the disposition will not be a triggering event if the distribution is pursuant to a complete liquidation of the US transferor under *IRC Section 332*, and the distributee (as defined in *IRC Section 334(b)(2)*) is a domestic corporation, provided the distributee enters a new GRA in which it is designated as the US transferor.ⁿ³⁴

Consolidation or deconsolidation of US transferor. A deconsolidation of the US transferor, or its consolidation with a new group, will not be considered a triggering event if the US transferor enters into a new GRA.ⁿ³⁵ An exception is also available if stock in the transferee foreign corporation is transferred to another member of the US transferor's consolidated group in a transaction governed by the intercompany transaction rules in *Treasury Regulation Section 1.1502-13*.ⁿ³⁶

Transfers of transferred stock or securities to a corporation or partnership. A disposition of transferred stock or securities to a corporation or partnership in an exchange to which *IRC Sections 351, 354* (but only in connection with a "B" reorganization) or *IRC Section 721* applies will not constitute a triggering event if the US transferor enters into a new GRA which includes as additional triggering events (i) any disposition of the stock, securities or partnership interests received in exchange for the transferred stock or securities, and (ii) any other event "inconsistent with the principles of [*Treasury Regulation Section 1.367(a)-8(k)*], including the indirect disposition of the transferred stock or securities."ⁿ³⁷

Transfers of substantially all the assets of the transferred corporation. A disposition of substantially all the assets of the transferred corporation pursuant to an exchange to which *IRC Sections 351, 354* (but only in connection with a "B" organization) or *IRC Section 721* applies will not be a triggering event if the US transferor agrees to enter a new GRA which provides that any disposition of the stock, securities or partnership interest (as applicable) received in the exchange will constitute a triggering event for purposes of the new GRA.ⁿ³⁸

The regulations also include a procedure by which a US transferor can request relief from the consequences of a failure to make a timely filing or to comply in any material respect with any requirement of the GRA regulations, provided such failure is shown to have been due to reasonable cause and not willful neglect.ⁿ³⁹ Requests will be considered only if an amended return is filed for the taxable year to which the failure relates that includes the information that should have been included with the original return or otherwise complies with the rules and that includes a written statement explaining the reasons for the failure to file timely or otherwise to comply with the regulations. If the year is currently under examination by the IRS the amended return must be delivered to the IRS personnel conducting the examination; otherwise, the amended return is filed with the Director having jurisdiction over the original return.ⁿ⁴⁰

IRC Section 367(b)(1) provides that in the case of an incorporating exchange (as well as any exchange governed by *IRC Section 332, 354, 355, 356 or 361*) in which there is no transfer of property described in *IRC Section 367(a)(1)*, a foreign corporation will be considered to be a corporation except to the extent provided in regulations. The covered

exchange (described in the regulations as a Section 367(b) exchange) is any exchange described above in which the status of a foreign corporation as a corporation is relevant for determining the extent to which income shall be recognized or for determining the effect of the transaction on earnings and profits, basis of stock or securities, basis of assets, or other relevant tax attributes.ⁿ⁴¹

A notice requirement is imposed on certain shareholders, the determination based on the nature of the transaction.ⁿ⁴² The notice must be attached to the person's timely filed tax return for the year in which income is realized in the Section 367(b) exchange.ⁿ⁴³

Every U.S. person who transfers property in an exchange falling within *IRC Section 351* must furnish to the Service information that will be prescribed in regulations.ⁿ⁴⁴ Failure to do so results in a penalty equal to 10 percent of the fair market value at the time of the exchange unless the failure is due to reasonable cause and not to willful neglect.ⁿ⁴⁵ The penalty with respect to any one exchange cannot exceed \$100,000 unless the failure to furnish the information is due to intentional disregard.ⁿ⁴⁶

FOOTNOTES:

(n1)Footnote 1. *IRC § 351(a)*. A transfer of property by a corporation to its wholly owned subsidiary in exchange for the latter's stock was followed by a transfer of the same property to a wholly owned subsidiary of the transferee in exchange for stock. Since each transaction qualified for nonrecognition treatment under *IRC § 351*, the entire transaction did so as well. *Rev Rul 77-449, 1977-2 CB 110* . The same result obtained in *Rev Rul 83-156, 1983-2 CB 66* , and *Rev Rul 83-84, 1983-1 CB 79* .

Rev Rul 84-111, 1984-2 CB 88 , sets forth the tax consequences of a transfer to a newly formed corporation of (i) partnership assets and liabilities, (ii) partnership assets and liabilities by partners after the liquidation of the partnership, and (iii) partnership interests.

If an unincorporated state law entity that is classified as a partnership for federal tax purposes converts into a state law corporation under a state law formless conversion statute, the following is deemed to occur: the partnership contributes all its assets and liabilities to the corporation in exchange for stock in the corporation, and immediately thereafter, the partnership liquidates distributing the stock of the corporation to its partners. *Rev Rul 2004-59, 2004-1 CB 1050* .

See generally North, "Organizing the Closely Held Corporation," 32 *NYU Inst on Fed Tax* 697 (1974); Henkel, "Corporate Organizational Problems: A Checklist of Actions, Elections and Considerations," 31 *NYU Inst on Fed Tax* 255 (1973); Burke, "Section 351: The Beginning of Life in Subchapter C," 24 *SW LJ* 742 (1970).

A checklist of the information to be included in a request for a ruling under Section 351 is contained in *Rev Proc 83-59, 1983-2 CB 575* , reprinted in App A.

(n2)Footnote 1. *Rev Rul 69-156, 1969-1 CB 101* . The rationale of the ruling is that the transfer would not qualify for capital gain or loss treatment under *IRC § 1235*. One may question whether the Service's reliance on a provision concerned with the character of gain or loss is warranted.

A transfer to a new corporation of a certificate of registration of a corporate name, all rights to use the name in a foreign country, and all goodwill associated with the name was a transfer of property for purposes of *IRC § 351*. The transfer of a name that has no goodwill value is not a transfer of property. *Rev Rul 79-288, 1979-2 CB 139* . The distinction is important when the transfer is to a foreign corporation. See § 3.02[5].

(n3)Footnote 2. 471 *F2d* 1211 (*Ct Cl* 1973) .

(n4)Footnote 3. *Rev Rul 69-357, 1969-1 CB 101* ; *Halliburton v Commr*, 78 *F2d* 265 (9th *Cir* 1935) .

(n5)Footnote 4. *Treas Reg § 1.351-1(a)(1)(i)*. The issuance of shares in exchange for property previously received by the taxpayer as compensation for services rendered will qualify as an issuance for property. *IDI Management, Inc v Commr, TC Memo 1977-369*.

(n6)Footnote 5. See § 3.03.

(n7)Footnote 6. *Treas Reg § 1.351-1(b)(1), (2)*.

(n8)Footnote 7. *335 F2d 487 (5th Cir 1964)*.

(n9)Footnote 8. *Treas Reg § 1.721-1(b)(1)*.

(n10)Footnote 9. *Treas Reg § 1.351-1(a)(2), Ex (3)*.

(n11)Footnote 10. *Id*; *Rev Rul 64-56, 1964-1 CB 133*.

(n12)Footnote 11. *Treas Reg § 1.351-1(a)(1)(ii)*. For an example of an attempt by one transferor to qualify a transfer by another, see *Rev Rul 68-349, 1968-2 CB 143*; *Kamborian v Commr, 56 TC 847 (1971)*, *aff'd*, *469 F2d 219 (1st Cir 1972)*. When the transaction is designed to serve a business purpose and not be a vehicle for qualifying transfers by others, nonrecognition treatment should ensue. See, eg, *Rev Rul 76-123, 1976-1 CB 94*, where the purpose of the transfer was reincorporation in another state.

For ruling purposes, the property transferred will not be considered to be of relatively small value if its fair market value is at least 10 percent of the value of the stock and securities already owned (or to be received for services) by the transferor. *Rev Proc 77-37, 1977-2 CB 568*.

(n31)Footnote 30. The transferor's basis in the accounts receivable is deemed to be equal to the net value of the receivables. *Rev Rul 78-280, 1978-2 CB 139* .

(n32)Footnote 31. The reserve method is still available to banks and certain other special categories of taxpayers. See, eg, *IRC §§ 585, 586, and 593*.

(n33)Footnote 32. The provisions may be relied upon to treat a transfer of property to a corporation closely followed by a sale as a sale by the transferor. See, eg, *Ltr Rul 9016001* and cases cited therein.

(n34)Footnote 33. *267 F2d 434 (9th Cir 1959)* , *cert denied 361 US 821* .

The Commissioner's use of *IRC § 446(b)* was disapproved in *Mathis v US, 430 F2d 158 (7th Cir 1970)* . The transferring proprietorship had exercised an election to be taxed as a corporation, making the tax the same no matter who reported the income.

(n35)Footnote 34. *Treas Reg § 1.460-4(d)*.

(n36)Footnote 35. *Treas Reg § 1.460-4(e)*.

(n37)Footnote 36. *305 F2d 681 (9th Cir 1962)* .

(n38)Footnote 37. *Id at 686* .

(n39)Footnote 38. *National Sec Corp v Commr, 137 F2d 600 (3d Cir 1943)* , *cert denied 320 US 794* ; *Aiken Drive-In Theatre Corp v US, 281 F2d 7 (4th Cir 1960)* ; *Estate of Walling v Commr, 373 F2d 190 (3d Cir 1967)* . The Regulations reflect this view. *Treas Reg § 1.482-1(d)(5) (1968)*; see also *Central Cuba Sugar Co v Commr, 198 F2d 214 (2d Cir 1952)* , *cert denied 344 US 874* .

(n40)Footnote 39. A personal service corporation is one whose principal activity is the performance of personal services substantially by employee-owners.

(n41)Footnote 40. An employee-owner is any employee who owns, on any day during the taxable year, more than 10 percent of the outstanding stock of the personal service corporation. The attribution rules of *IRC § 318* apply, except that attribution from a corporation to a shareholder is permitted when the shareholder owns as little as 5 percent of the stock of the corporation.

(n42)Footnote 41. Eg, *Gregory v Helvering, 293 US 465 (1935)* .

(n43)Footnote 42. *Rev Rul 60-331, 1960-2 CB 189* ; contra, *Cukor v Commr, TC Memo 1968-17* .

The fact that certain acquisitive transactions fail to meet the requirements for tax-free organization treatment does not preclude application of *IRC* § 351 to transfers that are a part of a larger transaction, but meet the requirements of that section either alone or in conjunction with other transfers. *Rev Rul 84-71, 1984-1 CB 106*.

(n44)Footnote 1. An actual distribution of stock to the transferors may not be required. See, eg, *Ltr Rul 9719030*, where equal shareholders transferred additional property that they owned equally to the corporation.

(n45)Footnote 2. Securities become "boot" if received in a transfer occurring after Oct 2, 1989.

(n46)Footnote 3. In *Helvering v Southwest Consol Corp*, 315 US 194 (1942), stock warrants were held not to be voting stock for purposes of *IRC* § 368(a)(1)(B). The Regulations go even further in providing that for purposes of *IRC* § 351, stock rights and warrants are not treated as stock. *Treas Reg* § 1.351-1(a)(1) (ii). This Regulation has been criticized insofar as it denies "stock" status to stock warrants for any purpose other than to determine whether the transferors are in control of the corporation immediately after the exchange. Bittker & Eustice, *Federal Income Taxation of Corporations and Shareholders* 3-16 (6th ed 1998).

(n47)Footnote 4. *Carlberg v US*, 281 F2d 507 (8th Cir 1960).

(n48)Footnote 5. 287 US 462 (1933).

(n49)Footnote 6. *Id* at 468-469.

(n50)Footnote 7. *Id* at 470.

(n51)Footnote 8. 60 F2d 937 (2d Cir 1932).

(n52)Footnote 9. One commentator has suggested that the language about securities may have been nothing more than another way of stating the continuity of interest test, the Court intending to show that the notes in question were not the kind of securities as meet the continuity of interest requirement. Griswold, " 'Securities' and 'Continuity of Interest'," 58 *Harv L Rev* 705 (1945). The House of Representatives version of the 1954 Code contained a statutory definition of "security." The Senate considered the inclusion of a fixed definition unwise. S Rep No 1622, 83d Cong, 2d Sess 42 (1954). The Senate view obviously prevailed.

(n53)Footnote 10. *Wellington Fund, Inc v Commr*, 4 TC 185, 189 (1944).

(n54)Footnote 11. *Neville Coke & Chem Co v Commr*, 148 F2d 599 (3d Cir 1945) (three-, four-, and five-year notes); *Lloyd-Smith v Commr*, 116 F2d 642 (2d Cir 1941) (two-year notes); *Commr v Sisto Fin Corp*, 139 F2d 253 (2d Cir 1943) (demand notes); *Wellington Fund, Inc*, 4 TC 185 (1944) (12-month notes); but cf *US v Mills*, 399 F2d 944 (5th Cir 1968) (one-year note a security).

In *Lovell & Hart, Inc v Commr*, TC Memo 1970-335, *aff'd*, 456 F2d 145 (6th Cir 1972), the Tax Court held that the taxpayer recognized gain on the receipt of 13-month notes. The taxpayer did not argue, nor did the Tax Court consider, whether the notes constituted "securities"; the issue before the court was whether the notes had been issued as consideration for the transfer of property to the corporation.

(n55)Footnote 12. *Burnham v Commr*, 86 F2d 776 (7th Cir 1936).

(n56)Footnote 13. *Camp Wolters Enterprises, Inc v Commr*, 22 TC 737 (1954), *aff'd*, 230 F2d 555 (5th Cir 1956), *cert denied* 352 US 826.

(n57)Footnote 14. *Rev Rul 59-98, 1959-1 CB 76*.

(n58)Footnote 15. *Camp Wolters Enters, Inc v Commr*, 22 TC 737, 751 (1954) , *aff'd*, 230 F2d 555 (5th Cir 1956) . The Tax Court applied the quoted language in *Lagerquist v Commr*, TC Memo 1987-185 , to find that notes with consecutive terms of four to five years were securities.

(n59)Footnote 16. *US v Mills*, 399 F2d 944 (5th Cir 1968) . See also *US v Hertwig*, 398 F2d 452 (5th Cir 1968) , in which security status was granted to a note payable in 150 installments.

Hertwig was distinguished in *Bradshaw v US*, 683 F2d 365 (Ct Cl 1982) , a case involving a transfer of property to a wholly owned corporation in exchange for five installment notes due more than 10 years after the transfer, on the ground that the degree of risk in *Bradshaw* was insubstantial in contrast to the risk involved in *Hertwig*. This resulted in a holding that the transaction in *Bradshaw* was a sale.

(n60)Footnote 17. Options to acquire nonqualified preferred stock are also boot. *Treas Reg* § 1.356-6.

(n61)Footnote 18. *IRC* § 351(g)(1)(B).

(n62)Footnote 19. HR Rep No 2014, 105th Cong, 1st Sess 242 (1997).

(n63)Footnote 20. *IRC* § 351(g)(2)(A), (3)(A). Stock will not be treated as participating in corporate growth to any significant extent unless there is a real and meaningful likelihood of the shareholder actually participating in the earnings and growth of the corporation. If there is not a real and meaningful likelihood that dividends beyond any limitation or preference will actually be paid, the possibility of such payments will be disregarded in determining whether stock is limited and preferred as to dividends.

A person is treated as related to another person if they bear a relationship to such other person described in *IRC* §§ 267(b) or 707(b). *IRC* § 351(g)(3)(B).

(n64)Footnote 21. *IRC* § 351(g)(2)(B).

(n65)Footnote 22. *IRC* § 351(g)(2)(C)(i). The death, disability, or mental incompetency exception does not apply if the stock surrendered or the stock received in an exchange is stock of a corporation any class of stock of which (or of a related corporation) is publicly traded. *IRC* § 351(g)(2)(C)(ii). This rule will normally come into play in divisive reorganizations, acquisitive reorganizations, and stock-for-stock exchanges.

Preferred stock containing one of the first three rights or obligations described in *IRC* § 351(g)(2)(B) that is exercisable only upon the holder's separation from service from the issuer or a related person will be treated as transferred in connection with the performance of services, if the stock is received in exchange for, or in a distribution with respect to, existing stock containing a similar right or obligation that was issued in exchange for services. In applying the rules relating to nonqualified preferred stock, the preferred stock received will continue to be treated as transferred in connection with the performance of services in subsequent transactions involving the stock. *Treas Reg* § 1.356-7(c).

(n66)Footnote 23. An open-account debt from corporation to shareholder will constitute "boot" if the parties to the transaction intend to create the debt as part of the incorporating transfer. The absence of such intent led to nonrecognition in *R Shisler Farms, Inc v Commr*, TC Memo 1974-141 , and *Taub v Commr*, TC Memo 1971-155 .

The Service has held that an intracompany account payable becomes "other property" when a corporation transfers all of the assets of one division of the company to a newly formed corporation in exchange for all of the stock of the new entity. *Rev Rul* 80-228, 1980-2 CB 115 . According to the Service, the intracompany account does not give rise to a debtor-creditor relationship prior to the incorporation, but afterwards becomes a liability of the subsidiary and an asset of the parent. In so ruling, the Service refused to follow a contrary decision in *Wham Constr Co v US*, 600 F2d 1052

(4th Cir 1979) .

(n67)Footnote 24. *IRC § 351(b)(2)*. It should be noted that if the transfer were to a corporation in which the taxpayer owned, directly or indirectly, 50 percent in value of the outstanding stock, any loss realized would be disallowed by *IRC § 267(a)(1)*. The immediate effect is the same--no loss deduction. However, the tax consequences of a later sale of the stock may be different due to the provisions of *IRC § 267(d)*. See § 2.07[4][c]. It would seem that *IRC § 351(b)(1)* should control the effect of loss since that decrees nonrecognition, rather than disallowance which assumes prior recognition.

(n68)Footnote 25. *IRC § 351(b)(1)* provides that:

"[G]ain (if any) ... shall be recognized, but not in excess of--
 "(A) the amount of money received, plus,
 "(B) the fair market value of ... other property received ... "

(n69)Footnote 26. *Watson v Commr*, 345 US 544 (1953) ; *Williams v McGowan*, 152 F2d 570 (2d Cir 1945) ; *Rev Rul 67-192*, 1967-2 CB 140 ; *Rev Rul 68-55*, 1968-1 CB 140 , amplified by *Rev Rul 85-164*, 1985-2 CB 117 . An excellent article dealing with boot allocation is Rabinovitz, "Allocating Boot in Section 351 Exchanges," 24 *Tax L Rev* 337 (1969). A more recent discussion of the issue of boot allocation can be found in Cohen & Whitney, "Revisiting the Allocation of Boot in Section 351 Exchanges," 48 *Tax Lawyer* 959 (1995).

(n70)Footnote 27. Two-thirds (\$50,000/\$75,000) of the total amount received will be allocated to the gain property. Thus, \$30,000 in value of the stock and \$20,000 in cash will be deemed the consideration received in exchange for the transfer of the gain property.

(n71)Footnote 28. *IRC § 351(b)(2)*.

(n72)Footnote 29. *IRC § 1245(a)*. The subject property is set forth in *IRC § 1245(a)(3)*.

(n73)Footnote 30. *Rev Rul 71-569*, 1971-2 CB 314 .

(n74)Footnote 31. *IRC § 351(b)(1)*.

(n75)Footnote 32. *IRC § 1250(d)(3)*.

(n76)Footnote 33. *IRC § 1239(b)(1)*, (c)(1)(A). A person can come within the scope of *IRC § 1239* even though he does not own more than 50 percent of the number of shares of stock outstanding. The test is whether he owns more than 50 percent *in value* of the outstanding stock. *US v Parker*, 376 F2d 402 (5th Cir 1967) ; *Rev Rul 69-339*, 1969-1 CB 203 . The Court of Claims held, in *Robertshaw v US*, 616 F2d 507 (Ct Cl 1980) , that the taxpayer's stock is to be valued prior to the transaction.

(n77)Footnote 34. *IRC § 1239(c)(2)*. *IRC § 267(c)(3)*, which treats an individual owning stock in a corporation as owning the stock owned directly or indirectly by or for his partner, is inapplicable here. The constructive ownership rules of *IRC § 267(c)* are discussed in § 2.07[4][a].

(n78)Footnote 35. *Rev Rul 75-143*, 1975-1 CB 275 . The operation of the provision is the subject of § 20.04[4].

(n79)Footnote 36. See § 1.04[2][b].

(n80)Footnote 37. 303 US 564 (1938) .

(n81)Footnote 38. Under the authority of *IRC § 357(a)*, an agreement by the transferee corporation to pay the

transferor's expenses does not constitute "boot." *Rev Rul 74-477, 1974-2 CB 116* .

A corporation's assumption of a shareholder's obligation to deliver replacement securities to close out a short sale constitutes an assumption of a liability for purposes of *IRC § 357*. The amount of the liability assumed equals the proceeds of the original short sale. *Rev Rul 95-45, 1995-1 CB 53* .

(n82)Footnote 39. *IRC § 357(d)(1)(A)*.

(n83)Footnote 40. *IRC § 357(d)(1)(B), 357(d)(2)*. Fair market value is determined without regard to *IRC § 7701(g)*, the provision that treats property subject to a nonrecourse liability as having a value not less than the amount of the debt.

(n84)Footnote 41. It is interesting to note that the Government urged passage of this legislation. This position was prompted by the realization that taxpayers who had made transfers prior to the decision in *Hendler* would be able to reap benefits, such as a stepped-up basis, without shouldering any burdens.

(n85)Footnote 42. *IRC § 357(b)(1)(A), (B)*. The presence of a valid business purpose will prevent application of *IRC § 357(b)* even though the borrowing immediately precedes the transfer to the corporation. See, eg, *ISC Indus Inc v Commr, TC Memo 1971-283* ; *Rev Rul 79-258, 1979-2 CB 143* .

(n86)Footnote 43. *Treas Reg § 1.357-1(c)*.

(n87)Footnote 44. *Drybrough v Commr, 376 F2d 350 (6th Cir 1967)* .

(n88)Footnote 45. *Campbell v Wheeler, 342 F2d 837 (5th Cir 1965)* ; see also *Thompson v Campbell, 353 F2d 787 (5th Cir 1965)* , *aff'g per curiam 353 F2d 787* (transfer subject to liability one day after liability incurred).

(n89)Footnote 46. *294 F2d 653 (9th Cir 1961)* .

(n90)Footnote 47. *294 F2d 653, 659 (9th Cir 1961)* .

(n91)Footnote 48. The taxpayer in *Doe v Commr, TC Memo 1993-543* , argued that *IRC § 357(c)* should not apply if the transferee corporation does not assume any debt. The Tax Court held that, for purposes of *IRC § 357(c)*, it is sufficient that the property received by the corporation is subject to the debt.

The Service has held that contingent environmental liabilities assumed as part of a transfer to a controlled corporation are not liabilities for purposes of *IRC § 357(c)*. *Rev Rul 95-74, 1995-2 CB 36* .

(n92)Footnote 49. The Service takes the position that a taxpayer cannot avoid the application of *IRC § 357(c)(1)* by issuing a note for the difference between the basis of the transferred property and the liability assumed by the transferee; the basis of the note to the transferor is zero. The Tax Court agrees. *Alderman v Commr, 55 TC 662 (1971)* ; *Rev Rul 68-629, 1968-2 CB 154* . However, in *Lessinger v Commr, 872 F2d 519 (2d Cir 1989)* , *rev'g 85 TC 824 (1985)* , the Second Circuit held that *IRC § 357(c)* could be avoided if the shareholder, as part of the incorporating transfer, promises to pay the excess debt. For a discussion of *Lessinger*, see Cummings, "Zero Basis Hoax or Contingent Debt and Failure of Proof? Sorting Out the Issues in the *Lessinger* Case," *2 Fla Tax Rev 283 (1994)*; Fleming, "A Second Look at the Zero Basis Hoax," *64 Tax Notes 811(1994)*; Brewer, "The Zero Basis Hoax," *63 Tax Notes 457 (1994)*.

The court, in *Peracchi v Commr, 143 F3d 487 (9th Cir 1998)* , held that an unsecured note that an individual contributed to his wholly owned corporation constituted genuine indebtedness with a basis equal to the face amount of the debt. This meant that the taxpayer did not have to recognize gain on the transfer of real property encumbered by liabilities exceeding the basis of the property.

The taxpayers, in *Seggerman Farms, Inc v Commr*, TC Memo 2001-99 , *aff'd*, 308 F3d 803 (7th Cir 2002) , argued that their personal guaranties of corporate indebtedness were the equivalent of loans receivable or personal notes, so that *Lessinger* and *Peracchi* should apply. The Tax Court rejected the argument on the ground that a guaranty is a mere promise to pay in the future and not an economic outlay.

If both *IRC* §§ 357(b)(1) and 357(c)(1) apply to an exchange, the former will control, treating as boot the total amount of assumed liabilities. *IRC* § 357(c)(2)(A).

IRC § 357(c)(1) will apply to a transaction coming within its terms even though the transfer does not relieve the transferor of liability, *Rosen v Commr*, 62 TC 11 (1974) .

IRC § 357(c)(1) does not apply to transactions that qualify as reorganizations under *IRC* §§ 368(a)(1)(A) or (C), or under (D) or (G) (provided the requirements of *IRC* § 354(b)(1) are met), regardless of whether *IRC* § 351 applies. *Rev Rul* 2007-8, 2007-1 CB 469 .

When partnership interests are transferred for stock, the partners recognize gain to the extent that each partner's share of partnership liabilities exceeds the adjusted basis of the transferred interest. Where none of the partners has any personal liability with respect to a partnership liability, the liability is allocated to each partner in the same proportion as the partner's interest in partnership profits. *Rev Rul* 80-323, 1980-2 CB 124 . See also *Smith v Commr*, 84 TC 889 (1985) .

(n93)Footnote 50. The statute considers the excess of liabilities over basis "as a gain from the sale or exchange of a capital asset or of property which is not a capital asset, as the case may be."

(n94)Footnote 51. *Rev Rul* 60-302, 1960-2 CB 223 , which held *IRC* § 357(c) gain to be ordinary income because of the application of *IRC* § 1239.

(n95)Footnote 52. Fredericks, "The Character of Section 357(c) Gain: Why the Underlying Regulation Is Capable of Producing Absurd Results," 48 *Tax Lawyer* 167 (1994).

The Tax Court (using what the author of the cited article describes as an intuitive approach) has not followed the regulation in two reported decisions. The cases are *Rosen v Commr*, 62 TC 11 (1974) , and *Raich v Commr*, 46 TC 604 (1966) .

(n96)Footnote 53. *Raich v Commr*, 46 TC 604 (1966) .

(n97)Footnote 54. A liability falls within *IRC* § 357(c)(3) if the transferor would have been entitled to a deduction had the transferor paid the liability and the transfer not taken place. *Black & Decker Corp v US*, 436 F3d 431,436 (4th Cir 2006) . Further, even though the legislative history of *IRC* § 357(c)(3) makes clear that Congress had in mind the trap for the unwary described above when liabilities are transferred to a corporation along with the assets of an incorporated trade or business, two courts of appeal have determined that the plain language of *IRC* § 357(c)(3) is not limited to this paradigm case but is applicable to any assumption of liabilities by a corporation in exchange for its stock; there is no requirement that the assets associated with those liabilities must likewise be transferred to the corporation. *Coltec Indus, Inc v US*, 454 F3d 1340, 1349 (Fed Cir 2006) ; *Black & Decker Corp v US*, 436 F3d 431 436-437 (4th Cir 2006) .

(n98)Footnote 55. A discussion of *IRC* § 736(a) can be found in § 14.04[1][a][ii].

(n99)Footnote 1. Only stock issued to transferors of property can be counted for control. Stock issued to one who just renders services to the corporation does not qualify, but the mere fact that stock is issued for services will not prevent use of *IRC* § 351 by other, if they transfer property and can themselves achieve the necessary control.

1-3 Taxation of Securities Transactions § 3.02

(n100)Footnote 2. *IRC § 368(c)*. An outstanding issue of stock may not have to be counted as a class of stock if it in fact does not represent an equity interest. *Rev Rul 66-333, 1966-2 CB 114* (shares of special preferred stock issued to Federal Housing Administration in compliance with the requirements of law not treated as a class of stock).

An attempt to use the attribution rules to boost a transferor's ownership to the required 80 percent level failed in *Yamamoto v Commr, TC Memo 1986-316*.

(n101)Footnote 3. *Cf Rev Rul 66-339, 1966-2 CB 274*, holding that shareholders' voting agreements, stockwarrants, options, rights, convertible debentures and similar rights to purchase stock are not voting securities for the purpose of *IRC § 351(b)*.

(n102)Footnote 4. *Rev Rul 59-259, 1959-2 CB 115*.

(n103)Footnote 5. *Portland Oil Co v Commr, 109 F2d 479 (1st Cir), cert denied 310 US 650 (1940)*; *America Compress & Warehouse Co v Bender, 70 F2d 655 (5th Cir 1934)*.

(n104)Footnote 6. An incorporating transfer followed by a prearranged exchange of the acquired stock for stock of a public corporation has been treated as a sale of the transferred property rather than a *IRC § 351* transaction and a stock for stock reorganization. The original transfer could not fit within *IRC § 351* because of the lack of control in the transferors immediately after the exchange. *Rev Rul 70-140, 1970-1 CB 73*; *Rodman v Commr, 57 TC 113 (1971)*, *acq 1972-1 CB 2*. The opposite result was reached in *Vest v Commr, 57 TC 128 (1971)*, *rev'd in part, aff'd in part on other grounds 481 F2d 238 (5th Cir 1973)*. The incorporation there served a valid business purpose and was not merely a transitory step in the acquisition of the property by the publicly held corporation.

A shift of ownership pursuant to an agreement to sell is not automatically fatal. If the sale is to persons who themselves are transferors, and the stock received directly by them for property is not of relatively small value in relation to the value of the purchased stock, the control requirement is satisfied. *Rev Rul 79-194, 1979-1 CB 145*.

A transfer of assets to a corporation (first corporation) in exchange for an amount of stock in that corporation constituting control satisfies the control requirement even if, pursuant to a binding agreement entered into by the transferor with a third party prior to the exchange, the transferor transfers the stock of the first corporation to a second corporation simultaneously with the transfer of assets by the third party to the second corporation, and immediately after the transfer the transferor and third party are in control of the second corporation. *Rev Rul 2003-51, 2003-1 CB 938*.

(n105)Footnote 7. *14 TC 786 (1950)*, *aff'd, 188 F2d 127 (2d Cir 1951)*, *cert denied 342 US 824*.

(n106)Footnote 8. *14 TC at 790*.

(n107)Footnote 9. *11 TC 397 (1948)*, *aff'd, 177 F2d 513 (3d Cir 1949)*, *cert denied 339 US 920*.

(n108)Footnote 10. *11 TC at 406-407*.

(n109)Footnote 11. *Wilgard Realty Co v Commr, 127 F2d 514 (2d Cir 1942)*, *cert denied 317 US 655*.

(n110)Footnote 12. If the transfer is part of a divisive reorganization that qualifies for nonrecognition treatment in whole or in part, then, solely for purposes of determining the tax treatment of the transfers of property to the controlled corporation by the distributing corporation, the fact that the shareholders of the distributing corporation dispose of part or all of the distributed stock, or the fact that the corporation whose stock was distributed issues additional stock, shall not be taken into account in determining control for purposes of *IRC § 351*. *IRC § 351(c)(2)*.

(n111)Footnote 13. This, of course, assumes that the recipients are transferors of property and that the transfer does not run afoul of *Treas Reg § 1.351-1(a)(1)(ii)*, which provides that stock issued for property which has relatively little

value in comparison to the value of stock already owned is not stock issued for property, and therefore stock which can be counted for recipients are transferors of property, control, if the primary purpose of the transfer is to qualify transfers by others.

The owner of a noncorporate business and an underwriter transferred property to a corporation in exchange for all of its stock. Because the transfer by the underwriter was pursuant to a firm-commitment underwriting under which the underwriter had to retain any shares that could not be sold to the public, the underwriter was considered a transferor for control purposes. *Rev Rul 78-294, 1978-2 CB 141* .

One of two transactions forming part of an overall plan involved a forward subsidiary merger in which shareholders of the merged corporation received stock of the surviving corporation's parent. In the other transaction, a second corporation transferred part (but not substantially all) of its assets to the parent corporation in exchange for its stock. After both transactions, the shares held by the second corporation and by the former shareholders of the merged corporation were sufficient to constitute control, but since there was no transfer of property by those former shareholders, their shares could not be counted towards control. *Rev Rul 84-44, 1984-1 CB 105* .

(n112)Footnote 14. *Rev Rul 73-472, 1973-2 , CB 114*.

(n113)Footnote 15. *Rev Rul 73-473, 1973-2 CB 115* .

(n114)Footnote 16. *Treas Reg § 1.351-1(a)(1)*. The assets of a noncorporate business were transferred to a new corporation in exchange for one half of the authorized shares. The balance of the stock was sold to the public by an underwriter within the next two weeks. Held, the transferor of the assets and the public were treated as transferors for purposes of *IRC § 351*. *Rev Rul 78-294, 1978-2 CB 141* .

For purposes of *IRC § 351*, if a person acquires stock of a corporation from an underwriter in exchange for cash in a qualified underwriting transaction, the person is treated as transferring cash to the corporation in exchange for the stock and the underwriter is ignored. A qualified underwriting transaction is one in which a corporation issues stock for cash in an underwriting under which either the underwriter is an agent of the corporation or the underwriter's ownership of the stock is transitory. *Treas Reg § 1.351-1(a)(3)*.

(n115)Footnote 17. *Treas Reg § 1.351-1(b)(1)*.

(n116)Footnote 18. *Treas Reg § 1.351-1(b)(1)*. The exchange itself remains tax-free. The tax consequences which flow from the "reapportionment" depend on the reasons therefor. *Treas Reg § 1.351-2(b)(2)*, Ex (1).

(n117)Footnote 1. *1962-2 CB 527* .

(n118)Footnote 2. See *IRC § 351(e)*, the predecessor of which was added to the Code by the Foreign Investors Tax Act of 1966. See S Rep No 1707, 89th Cong, 2d Sess 61 (1966).

(n119)Footnote 3. See *IRC § 721(b)*. Whether or not a contribution of property to a partnership is denied tax-free status depends on whether the partnership would have been treated as an investment company within the meaning of *IRC § 351* if it had been incorporated. Unlike *IRC § 351*, however, while gain is recognized in a transfer of property to an investment company partnership, loss is not recognized.

(n120)Footnote 4. See *IRC § 683(a)*. As in *IRC § 721(b)*, whether or not a contribution of property to a trust is denied tax-free status depends on whether the trust would have been treated as an investment company within the meaning of *IRC § 351* if the trust were a corporation. Further, only gain, not loss, is recognized in a transfer of property to an investment company trust.

(n121)Footnote 5. See *IRC § 368(a)(2)(F)*. This provision was intended to foreclose a possible end run around *IRC*

§ 351(e). While two or more investors could not combine their undiversified portfolios tax-free by contributing them to a single corporation, each investor might instead contribute his undiversified portfolio to a wholly owned corporation and, after a time, merge the corporations in a tax-free reorganization, thereby creating a single surviving corporation with a diversified portfolio. *IRC* § 368(a)(2)(F) precludes this result by imposing tax on the transfers from the individual nondiversified "investment company" transferors to the surviving entity notwithstanding the reorganization provisions. See Staff of the Joint Committee on Taxation, General Explanation of the Tax Reform Act of 1976 (HR 10612, 94th Cong, Pub L 94-455) (1976), 662-667. See also Ch 8, § 8.07[5].

(n122)Footnote 6. Stocks and securities are considered held for investment unless they are (i) held primarily for sale to customers in the ordinary course of business, or (ii) used in the trade or business of banking, insurance, brokerage, or a similar trade or business. *Treas Reg* § 1.351-1(c)(3).

(n123)Footnote 7. *Treas Reg* § 1.351-1(c)(1)(ii).

(n124)Footnote 8. See *IRC* § 351(e)(1), as amended by Section 1002 of the Taxpayer Relief Act of 1997 (Pub L 105-34). As noted above, the investment company exception for partnerships and trusts references the provisions of section 351 (see fns 3 and 4, *supra*), so any amendment to section 351 or the regulations thereunder applies, *mutatis mutandis*, to asset transfers to partnerships and trusts under *IRC* §§ 721(b) and 683(a). Other than expanding the types of assets to be taken into account in applying the 80 percent test, Congress did not intend the 1997 amendments to override the provisions of the existing regulations defining the investment company exception. See Staff of Joint Committee on Taxation, "General Explanation of Tax Legislation Enacted in 1997" (Dec 17, 1997) (hereafter, "1997 Bluebook"), at 184. Thus, no asset is included in the numerator of the 80 percent test unless it is actually held for investment as required by *Treas Reg* § 1.351-1(c)(3) (see fn 6). 1997 Bluebook, at 184. See also *IRC* § 351(e)(1)(B)(v) (investment requirement made explicit in case of an interest in precious metals).

(n125)Footnote 9. *IRC* § 351(e)(1)(A).

(n126)Footnote 10. The regulations provide that while the determination of whether the 80 percent test is met is ordinarily made by reference to the circumstances existing immediately after the property-for-stock exchange, a subsequent change in circumstances will be taken into account if it occurs as the result of a plan in existence at the time of the transfer. *Treas Reg* § 1.351-1(c)(2). Citing this regulation, the Joint Committee on Taxation's explanation of the 1997 amendment states that cash contributed to the transferee will not be treated as "stocks and securities" if, pursuant to a plan in existence at the time of the transfer, the contributed cash is subsequently used to purchase assets other than "stocks and securities" as defined in *IRC* § 351(e)(1), or the transferee uses the cash to make expenditures not resulting in the acquisition of an asset (eg, for payment of salaries). 1997 Bluebook, at 184.

(n127)Footnote 11. *IRC* § 351(e)(1)(B).

(n128)Footnote 12. *Treas Reg* § 1.351-1(c)(4).

(n129)Footnote 13. *IRC* § 351(e)(1)(B)(vi).

(n130)Footnote 14. *IRC* § 351(e)(1)(B)(vii).

(n131)Footnote 15. *IRC* § 351(e)(1)(B)(iv).

(n132)Footnote 16. See *Treas Reg* § 1.351-1(c)(1)(i).

(n133)Footnote 17. *Treas Reg* § 1.351-1(c)(5). A *de minimis* exception protects the nontaxable status of transfers in which only an insignificant portion of the total value of assets transferred is not identical. For example, if A and B each transfers \$10,000 worth of the only class of stock of Corporation X for 50 shares each of Investment Company X's stock, and C transfers \$200 worth of Corporation Y's stock (less than 1 percent of the total value of all assets transferred

to X) for 1 share of Investment Company X, C's participation in the transfer will be disregarded in determining whether the diversification requirement is met. Therefore, the transfers will not be considered as resulting in the diversification of the transferors' interests, and neither A, B, nor C will be required to recognize gain on the transfers under the investment company exception. *Treas Reg § 1.351-1(c)(7)* (Example 1). Compare *Rev Rul 87-9, 1987-1 CB 133* (contribution of nonidentical assets by one of the transferors that represented 11 percent of the total value of assets contributed was not "insignificant").

(n134)Footnote 18. If a transfer of identical assets is part of a plan to achieve diversification without recognition of gain, such as a plan which contemplates a subsequent transfer, however delayed, of the corporate assets (or of the stock or securities received in the earlier exchange) to an investment company in a transaction purporting to qualify for nonrecognition treatment, the original transfer will be treated as resulting in diversification. See *Treas Reg § 1.351-1(c)(5)*. This "look-back" provision is not applicable if the transferee corporation plans to dispose of all or a portion of the contributed identical stock and securities through taxable sales and to use the proceeds to purchase a diversified portfolio of stock and securities, for such a plan does not contemplate a subsequent nontaxable transfer. See *Rev Rul 88-32, 1988-1 CB 113*.

(n135)Footnote 19. *Treas Reg § 1.351-1(c)(6)*. The IRS has ruled privately that the result is the same if, as part of the transaction, one or more transferors contribute cash rather than a diversified portfolio of stock and securities to the investment company; the transferors who contribute diversified portfolios of stock and securities do not recognize gain or loss. See *PLR 200934013 (2009)*; *PLR 200931042 (2009)*. On the other hand, in a transaction in which a transferor contributes stock of a single issuer to a newly organized corporation and another transferor contributes cash, the transferor contributing stock will be deemed to have diversified his investment and the stock transfer will be taxable under the investment company exception since the transferors have contributed nonidentical assets and neither has contributed a diversified portfolio of stock and securities. See *Rev Rul 87-9, 1987-1 CB 133*.

(n136)Footnote 20. The diversification test is borrowed from *IRC § 368(a)(2)(F)(ii)*, which sets out requirements that must be met to avoid recognition of gain under *IRC § 368 (a)(2)(F)* with respect to transfers of stock and securities pursuant to a diversifying reorganization. See fn 5, *supra*.

(n137)Footnote 1. *IRC § 351(e)(2)*.

(n138)Footnote 2. *IRC § 368(a)(3)(A)*.

(n139)Footnote 1. A transfer of property to a foreign corporation as a contribution to the capital of the corporation by persons who, immediately after the transfer, own 80 percent of the voting stock of the corporation is treated as an exchange of property for stock equal in value to the value of the property transferred. *IRC § 367(c)(2)*. The attribution rules of *IRC § 318* apply in determining ownership.

No difficulty is encountered unless gain is realized on the exchange. *Rev Rul 68-43, 1968-1 CB 146*. However, the determination of gain or loss on an asset-by-asset approach can produce recognized gain and unrecognized loss. *Rev Rul 67-192, 1967-2 CB 140*. Although the rulings applied prior law, the positions taken therein are probably still valid.

In *Abegg v Commr, 50 TC 145 (1968)*, *aff'd on other grounds 429 F2d 1209 (2d Cir 1970)*, *cert denied 400 US 1008*, a shareholder transferred securities to his wholly owned foreign corporation, but received nothing in return. The transfer was viewed as a contribution to capital and not as an *IRC § 351* exchange, with the result that *IRC § 367* was held to be inapplicable. *IRC § 367* will also not apply where the transaction is an exchange, but the conditions of *IRC § 351* are not met. *Rev Rul 70-522, 1970-2 CB 81*.

The Tax Court overruled *Abegg* to the extent that it held that no exchange had taken place, and determined in *Lessinger v Commr, 85 TC 824 (1985)*, *rev'd on other grounds 872 F2d 519 (2d Cir 1989)*, that a transfer of assets to an already existing corporation by the sole shareholder of the corporation was an exchange within *IRC § 351* even

though the shareholder did not receive any additional stock.

In the case of a transfer by a US person to a foreign corporation as paid-in surplus or as a contribution to capital in a transaction not otherwise covered by *IRC* § 367 (eg, a contribution to capital by a nonshareholder), regulatory authority is granted under *IRC* § 367 to treat the transaction as a sale or exchange at fair market value, requiring gain recognition. *IRC* § 367(f).

(n140)Footnote 2. *IRC* § 367(a)(1) applies as well to exchanges described in *IRC* §§ 332, 351, 354, 356, and 361, and to distributions described in *IRC* §§ 332 and 355 if made to a foreign corporation. *IRC* § 367(e).

If, pursuant to *IRC* § 304(a)(1), a US person is treated as transferring stock of a domestic or foreign corporation to a foreign corporation in exchange for stock of the transferee corporation in a transaction to which *IRC* § 351(a) applies, the deemed *IRC* § 351 exchange is not a transfer to a foreign corporation subject to *IRC* § 367(a). *Treas Reg* § 1.367(a)-3(a). The same holds true if, pursuant to *IRC* § 304(a)(1), a foreign acquiring corporation is treated as acquiring the stock of a foreign acquired corporation in a transaction to which *IRC* § 351(a) applies. *Treas Reg* § 1.367(b)-4(a). A discussion of *IRC* § 304(a)(1) can be found in § 5.04[1].

(n141)Footnote 3. *IRC* § 367(a)(2). The exception also applies if the foreign corporation is a party to a reorganization.

(n142)Footnote 4. *IRC* § 367(a)(3)(A). For the exception to apply, the US transferor also must comply with the reporting requirements of *IRC* § 6038B. *Temp Treas Reg* § 1.367(a)-2T(a)(2).

The active trade or business exception does not apply if the foreign corporation transfers the property to another person. A subsequent transfer within six months of the initial transfer is considered to be part of the same transaction; a subsequent transfer more than six months after the initial transfer may be considered part of the same transaction under step-transaction principles. *Temp Treas Reg* 1.367(a)-2T(c)(1). Subsequent transfers will not preclude application of the active trade or business exception if (1) the initial transfer is followed by one or more subsequent transfers granted nonrecognition treatment under either *IRC* § 351 or *IRC* § 721; (2) each subsequent transferee is either a partnership in which the preceding transferor is a general partner or a corporation in which the preceding transferor owns common stock; and (3) the ultimate transferee uses the property in the active conduct of a trade or business outside the US. *Temp Treas Reg* § 1.367(a)-2T(c)(2).

Transfers of assets by a foreign branch of a US person to a foreign corporation produce gain to the extent that the sum of losses incurred by the branch before the transfer for which a deduction was allowed exceeds the amount of those losses recaptured as US income. The amount so recognized is treated as foreign source income. *IRC* § 367(a)(3)(C).

A transfer of a partnership interest is treated as a transfer of the partner's pro rata share of the partnership assets. *IRC* § 367(a)(4).

(n143)Footnote 5. *IRC* § 367(a)(3)(B). *IRC* § 367(a)(1) applies to the transfer of installment obligations, accounts receivable, or similar property only to the extent that the principal amount of any such obligation has not previously been included in income by the taxpayer. *Temp Treas Reg* § 1.367(a)-5T(c).

Foreign currency includes installment obligations, futures contracts, accounts receivable, or any other obligation entitling its payee to receive payment in a currency other than US dollars. *Temp Treas Reg* § 1.367(a)-5T(d)(1). However, if transferred property denominated in a foreign currency is denominated in the currency of the country in which the transferee foreign corporation is organized, and was acquired in the ordinary course of business of the transferor that will be carried on by the transferee foreign corporation, then *IRC* § 367(a)(1) applies to the transfer only to the extent that gain is required to be recognized with respect to previously realized gain reflected in installment obligations subject to *Temp Treas Reg* § 1.367(a)-5T(c). *Temp Treas Reg* § 1.367(a)-5T(d)(2).

(n144)Footnote 6. Intangible property is defined as any: (1) patent, invention, formula, process, design, pattern, or know-how; (2) copyright, literary, musical, or artistic composition; (3) trademark, trade name, or brand name; (4) franchise, license, or contract; (5) method, program system, procedure, campaign, survey, study, forecast, estimate, customer list, or technical data; or (6) any similar item, which has substantial value independent of the services of any individual.

(n145)Footnote 7. *IRC § 367(d)(1)*.

(n146)Footnote 8. *IRC § 367(d)(2)*. The amount taken into account must be commensurate with the income attributable to the intangible. The income is treated as ordinary income. *IRC § 367(d)(2)(C)*. Prior to 1997, the income was treated as US source income. The Taxpayer Relief Act of 1997 repealed the US-source treatment of the income. This should mean that the income will be governed by the source rules for royalties contained in *IRC §§ 861(a)(4)* and *862(a)(4)*. Thus, if the intangible property is used outside the US, the income will be foreign-source income.

For purposes of applying *IRC § 904(d)* (discussed in § 20.02[4][e][iii]), the amount is treated as if it were a royalty.

(n147)Footnote 9. *IRC § 367(d)(2)(B)*.

(n148)Footnote 10. *Treas Reg § 1.367(a)-3(b)(1)*. The agreement must be attached to, and filed by the due date (including extensions) of, the transferor's income tax return for the year of transfer. *Treas Reg § 1.367(a)-8(d)*. The information required in the agreement is set forth in *Treas Reg § 1.367(a)-8(a)(2)* and (3). The transferor also must file a waiver of the period of limitation on assessment of tax on the gain realized on the transfer. *Treas Reg § 1.367(a)-8(f)*.

Annual certifications that the transferred property has not been disposed of are required throughout the five-year period. *Treas Reg § 1.367(a)-8(g)*.

(n149)Footnote 11. *Treas Reg § 1.367(a)-3(c)*.

(n150)Footnote 12. Persons who transfer stock or securities in the domestic target corporation in exchange for stock in the transferee foreign corporation are presumed to be US persons. *Treas Reg § 1.367(a)-3(c)(2)*. The presumption can be rebutted by the domestic target corporation obtaining ownership statements from a sufficient number of transferors who are not US persons to demonstrate that the 50% threshold is not exceeded. *Treas Reg § 1.367(a)-3(c)(7)*.

Stock of the transferee foreign corporation owned directly or indirectly (applying the attribution rules of *IRC § 267(c)(1)* and (5)) by the domestic target corporation is not taken into account in determining whether the 50% threshold is exceeded or whether a control group exists. *Treas Reg § 1.367(a)-3(c)(4)(iii)*.

The attribution rules of *IRC § 318*, as modified by *IRC § 958(b)*, apply in determining the ownership of stock. *Treas Reg § 1.367(a)-3(c)(4)(iv)*. Options (or similar interests) are treated as exercised and counted as stock for purposes of determining whether the 50% threshold is exceeded or whether control exists if a principal purpose of the issuance or acquisition of the option (or other interest) was the avoidance of the general rule of *IRC § 367(a)(1)*. *Treas Reg § 1.367(a)-3(c)(4)(ii)*.

(n151)Footnote 13. A qualified subsidiary is a foreign corporation whose stock is at least 80% owned (by total voting power and total value), directly or indirectly, by the transferee foreign corporation. *Treas Reg § 1.367(a)-3(c)(5)(vii)*. However, a corporation will not be treated as a qualified subsidiary if it was affiliated with the domestic target corporation at any time during the 36-month period preceding the transfer, or if it was acquired by the transferee foreign corporation at any time during that period for the principal purpose of satisfying the active trade or business test.

A qualified partnership is a partnership in which the transferee foreign corporation has active and substantial

management functions as a partner with respect to the partnership business, or has at least a 25% interest in the partnership's capital and profits. *Treas Reg § 1.367(a)-3(c)(5)(viii)*. A partnership is not a qualified partnership if the domestic target company or any of its affiliates held a 5% or greater interest in the partnership's capital and profits during the 36-month period prior to the transfer, or if the transferee foreign corporation's interest was acquired during that period for the principal purpose of satisfying the active trade or business test.

(n152)Footnote 14. *Treas Reg § 1.367(a)-8(c)(1)*.

(n153)Footnote 15. *Id.*

(n154)Footnote 16. *Id.*

(n155)Footnote 17. *Treas Reg § 1.367(a)-8(c)(1)(iii)(A)*. The US transferor may file an election with the GRA to report the unrealized gain in the year the gain recognition event occurs rather than in an amended return for the year in which the initial transfer took place. *Treas Reg § 1.367(a)-8(c)(iii)(B)*. In either case, however, interest must be paid on the additional tax attributable to the previously unreported gain, calculated from the due date of the return for the year of the initial transfer. *Treas Reg § 1.367(a)-8(c)(1)(v)*.

(n156)Footnote 18. *Treas Reg § 1.367(a)-8(c)(4)*.

(n157)Footnote 19. *Treas Reg § 1.367(a)-8(j)(1)*. If there is only a partial disposition, only a proportionate amount of the gain realized but unrecognized on the initial transfer need be reported under the GRA. Such portion is determined by the ratio that the fair market value of stock or securities disposed of bears to the fair market value of the stock or securities initially transferred, with both values determined as of the date of the partial disposition. The total amount of gain subject to the GRA is reduced by the amount of the partially recognized gain. *Treas Reg § 1.367(a)-8(c)(1)*.

(n158)Footnote 20. *Treas Reg § 1.367(a)-8(b)(1)(iii)*. A disposition by installment sale is treated as made in the year of sale. *Id.*

(n159)Footnote 21. *Treas Reg § 1.367(a)-8(j)(2)*.

(n160)Footnote 22. *Treas Reg § 1.367(a)-8(j)(3)*.

(n161)Footnote 23. *Treas Reg § 1.367(a)-8(j)(4)*. For purposes of this provision, an individual US transferor that loses US citizenship or ceases to be a lawful US permanent resident is treated as having disposed of all the stock of the transferee foreign corporation as of the date before the loss of such status. *Id.*

(n162)Footnote 24. *Treas Reg § 1.367(a)-8(j)(5) and (6)*. A deconsolidation that occurs by reason of the acquisition of the assets of the US transferor in a transaction to which *IRC § 381(a)* applies (in general, a nontaxable liquidation or a reorganization) or by reason of the US transferor joining another consolidated group as part of the same transaction, is not treated as a gain recognition event. *Id.*

(n163)Footnote 25. *Treas Reg § 1.367(a)-8(j)(7)*.

(n164)Footnote 26. *Treas Reg § 1.367(a)-8(j)(8)*.

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.03

§ 3.03 The Transferor's Basis

Consistent with the theory that a transfer to a controlled corporation works only a change in form, *IRC Section 358* prescribes a set of substituted basis rules. Where the transferor receives only nonrecognition property (stock, or stock and securities in a pre-October 3, 1989 transfer), the basis of such property is exactly the same as the basis of the property given up in the exchange. If the transferor receives more than one class of stock (or stock and securities in a pre-October 3, 1989 transfer), an allocation of the preserved basis becomes necessary.ⁿ¹ Under the Regulations, the allocation is to be in proportion to the fair market values of each class of nonrecognition property.ⁿ² Therefore, if the basis of the transferred property was \$8,000, and the transferor received Class A stock worth \$12,000 and Class B stock having a value of \$4,000, the basis of the Class A stock would be \$6,000, and the basis of the Class B stock, \$2,000.ⁿ³

When "boot" (including securities received in a post-October 2, 1989 transfer) is part of the consideration received by the transferor, a number of additional factors enter into the determination of basis. The first is the basis of the "other property," and *IRC Section 358(a)(2)* provides, simply, that it is the fair market value of such property. The second is the effect of "boot" on the basis of the nonrecognition property received on the exchange. The starting point here is the same as if "boot" had not been received, namely, the transferor's basis for the transferred property. Only now the original basis must be decreased by the amount of money and the fair market value of any other "boot" received by the taxpayer, and increased by the amount of gain recognized on the exchange.ⁿ⁴

Example:

Assume a transfer of property with a basis of \$10,000 in exchange for stock worth \$12,000, other property worth \$2,000 and cash of \$1,000. The gain realized by the transferor would be \$5,000; the gain recognized, \$3,000 (the "boot" received). The basis of the other property would be its fair market value, \$2,000; the basis of the stock, \$10,000. The last figure is the transferor's original basis of \$10,000, decreased by the amount of money (\$1,000) and the fair market value of other property (\$2,000) received on the exchange, and increased by the amount of gain recognized (\$3,000).

It was indicated in § 3.02[2] that the asset-by-asset approach is the preferred means of determining the amount of realized and recognized gain in the case of multiple-asset transfers. An unanswered question is whether the fragmented approach must also be employed in allocating "boot" for basis purposes.ⁿ⁵ The problem is posed by the transfer of two assets, one with a basis of \$500 and a value of \$1,000, and the other with a basis of \$700 and a value of \$1,000, in exchange for 100 shares of stock worth \$1,500 and \$500 cash. Using the comminuted approach, and allocating in

proportion to fair market value, the consideration deemed received for each asset is \$1,000, consisting of fifty shares of stock worth \$750 and \$250 in cash. The realized gain of \$500 on the first asset (the one with the \$500 basis) is recognized to the extent of \$250, the amount of "boot". The realized gain of \$300 on the other asset is similarly recognized only to the extent of \$250. If the asset-by-asset approach must be carried through to the determination of basis, the fifty shares received for the first asset would assume a basis of \$500 (\$500 original basis, less \$250 money received, plus \$250 recognized gain), while the basis of the remaining fifty shares would be \$700 (\$700 original basis, less \$250, money received, plus \$250 gain recognized). It is true that in this case (but not in every case) the total basis of the 100 share of stock would be the same under the aggregate approach, so that a sale of all of the shares at one time would produce the same gain or loss no matter which method was used to compute basis. However, a sale of less than all the shares would produce different results, since the per-share basis determined under the aggregate approach would be \$12 (\$1,200 divided by one hundred shares), while under the asset-by-asset approach, fifty of the shares would have a per-share basis of \$10 (\$500 divided by fifty shares) and the other fifty, a per-share basis of \$14 (\$700 divided by fifty shares).ⁿ⁶

Although the assumption of a liability by the transferee corporation does not result in the receipt of "boot" by the transferor, except in limited situations,ⁿ⁷ such assumption or acquisition generally invokes a basis adjustment. *IRC Section 358(d)* decrees that, for basis purposes, the amount of liability assumed must be considered money received on the exchange, thus decreasing the transferor's original basis by that amount.ⁿ⁸ The only exception to this rule relates to certain accounts payable which are not treated as liabilities by virtue of *IRC Section 357(c)(3)*.ⁿ⁹

If the basis of stock received by the transferor exceeds its fair market value, the basis must be reduced (but not below fair market value) by the amount of any liability assumed by another person as part of the exchange for the stock that did not otherwise reduce basis.ⁿ¹⁰ Except as provided by the Service, this rule does not apply to any liability if (a) the trade or business with which the liability is associated is transferred to the transferee corporation as part of the exchange, or (b) substantially all of the assets with which the liability is associated is transferred to the transferee corporation as part of the exchange.ⁿ¹¹

FOOTNOTES:

(n1)Footnote 1. *IRC § 358(b)(1)*.

(n2)Footnote 2. *Treas Reg § 1.358-2(b)(2)*. The transferor cannot determine the bases and holding periods of each class of stock by designating specific property to be exchanged for particular stock. Rather, the aggregate basis of the transferred property is allocated among the classes of stock received in proportion to the fair market value of each class. *Rev Rul 85-164, 1985-2 CB 117*.

(n3)Footnote 3. On the basis of the given facts, 12/16 (\$12,000/\$16,000) of the old basis is allocated to the Class A stock and 4/16 (\$4,000/\$16,000) to the Class B stock.

(n4)Footnote 4. *IRC § 358(a)(1)*.

(n5)Footnote 5. The regulations appear to suggest an aggregate approach. *Treas Reg § 1.358-2(b)(2)*.

(n6)Footnote 6. The existence of a different basis for each fifty share lot requires a consideration of the identification rules discussed in § 1.05[7]. See also Cohen & Whitney, "Revisiting the Allocation of Boot in Section 351 Exchanges," 48 *Tax Lawyer* 959 (1995), and Rabinovitz, "Allocating Boot in Section 351 Exchanges," 24 *Tax L Rev* 337 (1969).

(n7)Footnote 7. See § 3.02[2][b][ii].

(n8)Footnote 8. Prior to 1999, a liability to which property acquired was subject was considered money received on the exchange as well. Legislation enacted in that year limits the rule to liabilities that are assumed. See §

3.02[2][a][ii].

The assumption by the corporation of a shareholder's obligation to deliver securities to close a short sale is treated as an assumption of a liability for purposes of *IRC* § 358. The amount of the liability assumed equals the proceeds of the original short sale. *Rev Rul 95-45, 1995-1 CB 53* .

The Service has held that contingent environmental liabilities assumed as part of a transfer to a controlled corporation are not liabilities for purposes of *IRC* § 357(c), and, thus, are not to be treated as money received in determining the transferor's basis. *Rev Rul 95-74, 1995-2 CB 36* .

(n9)Footnote 9. *IRC* § 358(d)(2). § 3.02[2][b][ii] for a discussion of *IRC* § 357(c)(3). Two courts have concluded that if a liability is excluded by *IRC* § 357(c)(3) standing alone, then the exception contained in *IRC* § 357(d)(2) applies, whether or not the anti-abuse provision of *IRC* § 357(b)(1) overrides the application of *IRC* § 357(c)(3) for gain recognition purposes. *Coltec Indus, Inc v US, 454 F3d 1340, 1351 (Fed Cir 2006)* ; *Black & Decker Corp v US, 436 F3d 431, 438-439 (4th Cir 2006)* . However, the Federal Circuit, in *Coltec* held that lack of economic substance in a transaction can override the literal application of the Code in a case in which *IRC* §§ 357(c)(3) and 358(d)(2) would otherwise control.

(n10)Footnote 10. *IRC* § 358(h)(1). The amount of the liability is determined as of the date of the exchange.

For this purpose, the term "liability" includes any fixed or contingent obligation to make payment, without regard to whether the obligation is otherwise taken into account for purposes of income taxation. *IRC* § 358(h)(3).

(n11)Footnote 11. *IRC* § 358(h)(2). *Treas Reg* § 1.358-5 removes the second exception ("substantially all of the assets") for exchanges occurring on or after May 9, 2008.

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.04

§ 3.04 The Transferor's Holding Period

Since the basis of stock received in an *IRC Section 351* exchange is determined in accordance with substituted basis rules, the holding period of the stock includes the period during which the transferred property was held by the transferor, provided such property was either a capital asset or *IRC Section 1231* property.ⁿ¹ If the property exchanged consists not only of capital assets or Section 1231 property, but of noncapital assets as well, the result will be a split holding period for each share of stock. In such case, the extent to which the stock takes a tacked holding period or one which commences with the exchange, will depend on the relative values of the "tacking" property and the noncapital assets.

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.05

§ 3.05 Effect on the Transferee Corporation

[1] Gain or Loss on the Issuance of Stock.

Pursuant to *IRC Section 1032*, a corporation does not recognize any gain or loss realized on the issuance of its stock, including treasury stock, in exchange for money or other property. Although the language of the statute seems to preclude nonrecognition when stock is issued as compensation for services, the Regulations consider such a transfer "as a disposition by the corporation of such shares for money or other property."¹

What is stock for the purpose of *IRC Section 1032*? Neither the statute nor the Regulations gives any clue as to the meaning of the term. And in only a few cases has the result turned on the issue of whether the corporation issued stock.² From the decisions in these cases, and the silence of the Code and Regulations, it is fairly safe to assume that whenever the item issued lacks too many of the ordinary attributes of stock, i.e., the right to dividends, the right to share to some extent in the assets upon dissolution, and the right to participate in profits and management, the corporation will be called upon to recognize income.

[2] Basis of Acquired Property.

Just as nonrecognition of gain or loss dictates a substituted basis for the transferor, so it does for the transferee corporation. *IRC Section 362(a)* provides that the basis of the property received "shall be the same as it was in the hands of the transferor, increased in the amount of gain recognized to the transferor on such transfer."¹ It should be noted that, contrary to the general rule, the assumption of liability by the transferee will have no effect on basis, unless the assumption triggers the recognition of gain under *IRC Section 357(b)*, or *IRC Section 357(c)*.

Is the basis of each asset transferred to be kept the same, or can the transferee effect a realignment of basis by allocating the aggregate basis of the entire property among the various assets in proportion to their fair market values? A related concern is the manner in which any increase resulting from the recognition of gain by the transferor should be allocated. The Code and Regulations say nothing with respect to either of these issues. Case law provides an answer to the first, namely, that the basis of each asset must be carried over without reallocation.² However, no answer has been forthcoming on the second. Four allocation methods suggest themselves. The first would apportion the gain to all of the transferred assets by reference to fair market values. A second would allocate gain only to those assets which produced gain in the proportion that the increase in value of each asset bore to the total appreciation in all of the assets. Another would look to the relative bases of the transferred property to provide the proper proportion. The last would call for an

equal percentage increase in all assets, the percentage being determined by comparing the total recognized gain with the total original basis. The differences in result can be striking.

Example:

A taxpayer transfers land with a basis of \$50,000 and a net value of \$200,000, and a building with a basis of \$750,000 and a net value of \$800,000, to a corporation in exchange for stock of the transferee corporation and the latter's assumption of an \$850,000 mortgage on the entire property. Because the assumed liability exceeds the basis of the property transferred, the transferor is required to recognize gain of \$50,000.ⁿ³ If gain is allocated to assets producing gain on the basis of the relative amounts of gain inherent in each asset, \$37,500 of the gain would be allocated to the land and \$12,500 to the building. If the allocation proceeds on the basis of relative fair market values, \$37,500 would be allocated to the building and \$12,500 to the land; the same result would obtain if the gain was allocated on an equal percentage basis. Using the relative bases of the assets would yield an increase of \$3,125 to the basis of the land and \$46,875 to the basis of the building.

If a net built-in loss is imported into the United States in a tax-free corporate organization, *IRC Section 362(e)(1)* causes the basis of the property transferred to the corporation to be its fair market value if (i) gain or loss with respect to the property is not subject to federal income tax in the hands of the transferor immediately before the transfer, and (ii) gain or loss with respect to the property is subject to federal income tax in the hands of the transferee immediately after the transfer.ⁿ⁴ There is an importation of a net-built-in loss in a transaction if the transferee's aggregate bases of the transferred property would exceed the fair market value of the property after the transaction.ⁿ⁵

If, in connection with a tax-free corporate organization, there is a transfer of built-in loss that is not governed by *IRC Section 362(e)(1)*, and the transferee's aggregate adjusted bases of the property transferred exceed the fair market value of the property immediately after the transaction, then the transferee's aggregate adjusted bases of the transferred property cannot exceed the fair market value of the property immediately after the transaction.ⁿ⁶ Any basis reduction required because of the foregoing rule is allocated among the transferred property in proportion to their respective built-in losses immediately before the transaction.ⁿ⁷ However, in lieu of limiting the basis of the transferred assets, the parties to the transaction can elect to limit the basis of the stock received by the transferor to the aggregate fair market value of the transferred property.ⁿ⁸

[3] Holding Period of Acquired Property.

Since the corporation's basis for the property received on the exchange is determined by reference to its basis in the hands of the transferor, the corporation can tack the transferor's holding period to its own.ⁿ¹ Here there is no requirement that the asset have been a capital asset or Section 1231 property when held by the transferor. It is sufficient that the property partake of that nature when it enters the hands of the transferee.

[4] Transfers of Property by the Transferee Corporation.

IRC Section 351(f) treats a transfer of property by the transferee corporation as a distribution governed by *IRC Section 311*, if the transferor did not recognize gain or loss (in whole or in part) under *IRC Section 351* and the original transfer was not part of a plan of reorganization. This means that the transferee will recognize gain on its transfer of the property.ⁿ¹

FOOTNOTES:

(n1)Footnote 1. *Treas Reg § 1.1032-1(a)*. The corporation may also be entitled to a deduction under *IRC § 162(a)*. Non-recognition of gain under *IRC § 1032* has no effect on deductibility. *Duncan Inds, Inc v Commr*, 73 TC 266 (1979); *Rev Rul 62-217*, 1962-2 CB 59.

(n2)Footnote 2. *Affiliated Govt Employees' Distrib Co v Commr*, 322 F2d 872 (9th Cir 1963) , cert denied 376 US

950 ; *Community TV Assn v US*, 203 F Supp 270 (D Mont 1962) .

(n3)Footnote 1. In no event can the basis of property be increased above the fair market value of the property, determined without regard to *IRC § 7701(g)* (fair market value of property subject to a nonrecourse liability treated as not less than the amount of the debt). *IRC § 362(d)(1)*. If gain is recognized to the transferor as a result of an assumption of a nonrecourse liability that is also secured by assets that are not transferred to the transferee, and no person is subject to tax on the gain, the basis can be increased only by the ratable portion of the liability determined according to the relative fair market values of all assets subject to the liability. *IRC § 362(d)(2)*.

The term "recognized" has been construed to mean "should have been recognized" so that the failure of the transferor to recognize gain will not prevent an upward adjustment of basis by the corporation. *Fahs v Florida Mach & Foundry Co*, 168 F2d 957 (5th Cir 1948) . See generally Burford, "Basis of Property After Erroneous Treatment of a Prior Transaction," 12 *Tax L Rev* 365 (1957).

One corporation transferred its treasury stock to another in exchange for 80 percent of the stock of the acquiring corporation. The Service originally ruled that the transferor's basis in the transferee corporation's stock received in the exchange was determined under *IRC § 362(a)* and that both the treasury stock received by the transferee and the stock acquired by the transferor have a basis of zero. *Rev Rul 74-503*, 1974-2 CB 117 . The Service now takes the position that *IRC § 362(a)* does not apply to the transaction; the zero basis ruling is under study. *Rev Rul 2006-2*, 2006-1 CB 261. *Rev Rul 74-503* has been revoked, but the Service will not challenge a position taken prior to Dec 20, 2005, with respect to a transaction occurring before that date.

(n4)Footnote 2. *PA Birren & Son, Inc v Commr* 116 F2d 718 (7th Cir 1940) ; *Gunn v Commr*, 25 TC 424 (1955) , *aff'd per curiam* 244 F2d 408 (10th Cir) , *cert denied* 355 US 830 . This view is also reflected in administrative decision. Thus a corporation was required to assume a zero basis for inventory items, that basis arising from the prior deduction of the cost of the items by a cash basis transferor. *Rev Rul 69-117*, 1969-1 CB 12 .

(n5)Footnote 3. *IRC § 357(c)*.

(n6)Footnote 4. If the transferor is a partnership, the provision is applied by treating each partner as holding the partner's proportionate share of the property of the partnership.

(n7)Footnote 5. *IRC § 362(e)(1)(C)*.

(n8)Footnote 6. *IRC § 362(e)(2)(A)*. Generally, *IRC § 362(e)(2)* does not apply to intercompany transactions occurring after September 17, 2008. *Treas Reg §§ 1.362-4(a)(2)* and *1.1502-80(h)*.

(n9)Footnote 7. *IRC § 362(e)(2)(B)*.

(n10)Footnote 8. *IRC § 362(e)(2)(C)(ii)*. The election is made at the time and in the form and manner as prescribed by the Service, and is irrevocable.

(n11)Footnote 1. *IRC § 1223(2)*.

(n12)Footnote 1. A discussion of *IRC § 311* can be found in § 4.07[1].

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.06

§ 3.06 Financing the Corporation--The Choice Between Debt and Equity

The organizers of a corporation have wide latitude in choosing the capital structure of the newly formed enterprise. The entity may be financed solely through the issuance of stock, in which case the "owners" become shareholders only, or through the use of stock and debt securities, in which case they become both stockholders and creditors. State corporation laws have little effect on the ultimate choice, for if they even prescribe a minimum capital requirement, the amount is generally nominal.ⁿ¹

Why, then, be concerned with the manner in which the corporation is financed? The answer is simple--the tax consequences that flow from the choice.ⁿ² And those most concerned with these tax consequences are persons involved with closely held corporations.ⁿ³

[1] Impact of the Choice.

The choice between debt and stock creates no special problems at the time of the initial incorporating transfer. If the nonequity instruments received rise to the status of "securities," and the remaining conditions of *IRC Section 351* are met, the receipt of debt securities will not require the recognition of any gain or loss realized by the transferor.ⁿ¹ The impact of the choice comes later.

[a] On Distributions.

[i] Dividend vs. Interest. A principal consequence of the choice between debt and equity lies with the treatment of corporate distributions. Interest received by a creditor is always includable in gross income. On the other hand, the extent to which dividends form a part of ordinary income depends on the existence of corporate earnings and profits. Lack of sufficient earnings and profits will remove part of the distribution from ordinary income, and result, first, in a reduction of the shareholder's basis for his stock, and, then, in the realization of capital gain.ⁿ² Furthermore, even if the corporation's earnings and profits are of such magnitude as to cover the entire distribution, partial tax relief is afforded, and to corporations by way of the dividends received deductions provided by *IRC Sections 243, 244, and 245*.ⁿ³

The treatment of the distribution also differs from the standpoint of the distributing corporation. A dividend distribution gives the corporation no deduction; it only reduces earnings and profits.ⁿ⁴ The payment of interest gives rise to a deduction,ⁿ⁵ provided, of course, that a true indebtedness exists.ⁿ⁶ Manifestly, then, the existence of a bona fide debt, and the resulting interest deduction, eliminates the double taxation which attends dividend distributions.

[ii] Redemption vs. Retirement. Any amount received on the retirement of a debt security is deemed to have been received in exchange therefor, thus qualifying the gain or loss for capital treatment if the instrument is a capital asset in the hands of the holder.ⁿ⁷ No income can result to the holder of a debt security unless the amount received in retirement exceeds his basis in the security.

The gain or loss characteristics of a redemption of stock are subject to a more complex set of rules. Gain or loss will be capital in nature only if (1) the redemption is not essentially equivalent to a dividend; (2) the redemption is substantially disproportionate with respect to the shareholder; (3) the redemption is in complete redemption of all of the stock of the corporation owned by the shareholder; or (4) the distribution is a partial liquidation.ⁿ⁸ In addition, capital gain or loss will result to a limited extent if the redemption is from an estate, and the value of all of the stock of the corporation included in the gross estate or the net estate.ⁿ⁹ If the redemption cannot qualify for capital treatment, the distribution will fall under *IRC Section 301*,ⁿ¹⁰ raising the specter of dividend income.ⁿ¹¹

The foregoing illustrates that, other factors being equal, the taxpayer intent upon a quick withdrawal of capital from the corporation should opt for debt rather than equity.

[b] On Dispositions. As a general rule, an instrument, whether classed as debt or equity, will be considered a capital asset whose sale or exchange produces capital gain or loss.ⁿ¹² Noncapital treatment will result even where stock is a capital asset, if the corporation is found to be a collapsible corporation under *IRC Section 341*,ⁿ¹³ if a loss is incurred and the stock qualifies as small business corporation stock under *IRC Section 1244*,ⁿ¹⁴ or if a loss is incurred on stock in a small business investment company.ⁿ¹⁵ Gain on the disposition of a debt security held for more than six months may be excluded from capital treatment if the bond was issued or purchased at a discount.ⁿ¹⁶

[c] Other Tax Consequences.

[i] Worthless Stock or Securities. Losses sustained by reason of stock becoming worthless are treated as capital losses as long as the stock constitutes a capital asset in the hands of the stockholder.ⁿ¹⁷ The same holds true for debt securities only if they bear interest coupons or are in registered form.ⁿ¹⁸ If an evidence of indebtedness is issued without interest coupons and is not in registered form, the tax consequences of worthlessness are tested by *IRC Section 166* (dealing with bad debts), a business bad debt giving rise to an ordinary loss, and a nonbusiness bad debt, to a short-term capital loss.ⁿ¹⁹

[ii] Accumulated Earnings Tax. The Code imposes a penalty tax on any corporation which unreasonably accumulates earnings and profits in order to avoid the tax which its shareholders would have to pay if the profits were distributed in the form of dividends.ⁿ²⁰ No tax is imposed to the extent that earnings and profits for the taxable year are retained for the reasonable needs of the business.ⁿ²¹ The existence of debt as opposed to equity can play a significant part in determining whether the penalty tax will be imposed.

For example, assume that a corporation decides to accumulate surplus for the purpose of retiring the interest of one of its owners. If the interest is a stock interest, it is more than likely that the accumulation will be held to be for a purpose unconnected with the reasonable needs of the business, and the tax imposed on the accumulation. This is especially true if the redeemed shareholder occupies a position of control;ⁿ²² an accumulation to buy out a minority shareholder or to resolve a deadlock is more likely to pass muster.ⁿ²³ The difference in result reflects the judicial attitude that a redemption of the interest of a majority stockholder primarily benefits the shareholder without furthering the corporation's business, while a redemption which eliminates dissidence, or promotes continuity of management through the retention of key personnel,ⁿ²⁴ serves a business purpose.

By statutory mandate, an accumulation to redeem the stock of a decedent is permitted to the extent to which the redemption qualifies for capital gains treatment under *IRC Section 303*.ⁿ²⁵ Were such accumulations considered to be unreasonable, they "would substantially interfere with the purpose of [the redemption provision]."ⁿ²⁶

An accumulation to pay off an existing debt has a better chance of meeting with approval. This is certainly true if the purpose of the indebtedness can be connected to the operation of the business,ⁿ²⁷ and if the lender is an unrelated party.ⁿ²⁸ While courts have been less prone to sanction accumulations where the creditor is a shareholder as well,ⁿ²⁹ they have not closed the door to such accumulations. Thus, where the equity of the corporation is of sufficient size to permit the court to call the indebtedness bona fide and not a substitute for equity, the accumulation will not be subject to the special tax.ⁿ³⁰ It appears, then, that once a sufficient level of equity financing is reached, a more beneficial accumulated earnings tax result can be achieved through the issuance of debt.

[iii] Qualifying for Subchapter S Status. Subchapter S of the Code provides special tax treatment for certain small business corporations and their shareholders.ⁿ³¹ One of the conditions for entry into Subchapter S status is that the corporation have only a single class of stock.ⁿ³² Early regulations sought to convert any debt which was in fact equity into a disqualifying second class of stock. These were found invalid for the reason that they attempted to apply automatically and arbitrarily to all misdesignated debt.ⁿ³³ Amended regulations placed purported debt obligations held by shareholders in substantially the same proportion as their stock interests in the category of contributions to capital rather than second class of stock. The Tax Court again decreed invalidity when it could not agree that the fact that debt characterized as equity was disproportionate to stock ownership controlled the decision as to the existence of more than one class of stock.ⁿ³⁴

If purported debt is not automatically a second class of stock, whether held in proportion to stock interest or not, are traditional debt-equity classification criteria suitable in determining that the recharacterized debt constitutes a different class of stock? The courts that have considered the question have concluded that the thrust of the criteria--limiting improper tax avoidance--prevents them from being the sole determinant of the second class of stock question.ⁿ³⁵ Indeed, it has been suggested that when the decisional process takes into account factors peculiar to the Subchapter S corporation and its one class of stock requirement, the consequence "will be that debt which for other purposes or in the instances of a non-subchapter S corporation might be recharacterized as stock will not be a second class of stock for purposes of [Subchapter S]" and "to cause the existence of what might be termed 'non-stock equity.'" ⁿ³⁶

[2] Classifying Debt and Equity.

What is debt and what is equity? A simple question is posed, but there is no simple answer. One thing is certain:

"There is no dearth of cases in this province of tax law. So large is their number and disparate their facts, that for every parallel found, a qualification hides in the thicket. At most they offer tentative clues to what is debt and what is equity for tax purposes; but in the final analysis each case must rest and be decided upon its own unique factual flavor, dissimilar from all others, for the intention to create a debt is a compound of many diverse external elements pointing in the end to what is essentially a subjective conclusion."ⁿ¹

Thus, the classification of an interest as debt or equity calls for the resolution of a question of fact in which all the facts and circumstances relative to the relationship between corporation and owner are weighed.ⁿ² In this regard, it should be noted that little weight is given to local law labels or characterizations.ⁿ³ The relationship, and the interest it creates, are viewed solely from a tax law standpoint.ⁿ⁴

[a] The Relevant Factors.

[i] Formal Indicia. While form alone is not determinative of the issue of debt versus equity, lack of formal indicia of debt may swing the balance in favor of equity.ⁿ⁵ Likewise, the failure to cloak a purported equity instrument with the characteristics of equity may lead a court to find the existence of debt. Generally, a debt instrument is thought of as one which contains an obligation to pay a sum certain at a reasonably close fixed maturity date, or, perhaps, at some accelerated date if a default occurs; bears a fixed rate of interest; is not subordinated in priority to general or unsecured

creditors; is readily transferable; and does not grant the holder the right to vote except in limited circumstances, eg, on default.ⁿ⁶ Equity, on the other hand, lacks a maturity date, normally gives the holder the right to vote or participate in management, gives the holder the right to share in the profits of the enterprise, and is subordinate to the claims of creditors.ⁿ⁷

Suppose an instrument contains indicia of both equity and debt. Is the instrument to be characterized as debt or as equity? When faced with the question of classifying such a hybrid security, the Supreme Court concluded:

"[N]o one characteristic ... can be said to be decisive in the determination of whether the obligations are risk investments in the corporations or debts. So-called stock certificates may be authorized by corporations which are really debts, and promises to pay may be executed which have incidents of stock."ⁿ⁸

By so finding, the Court was forced to relegate the classification process to the trier of fact, its determination to be regarded as conclusive unless found to be clearly erroneous. A hybrid security may, therefore, be either debt or equity. The absence of certainty does not permit a more definitive answer.

[ii] "Thin" Capitalization--The Debt-Equity Ratio Problem. Suppose a corporation's capital structure consists of \$20,000 in stock and \$200,000 in debt. Can the entire amount of debt pass the characterization test, or does the existence of such a thin capitalization make the debt a prime candidate for classification as equity? Language contained in the Supreme Court's opinion in *John Kelley Co. v. Commissioner*,ⁿ⁹ might lead one to believe that an excessive debt-equity ratio is itself sufficient to transform debt into equity. However, not only is there "no magic debt-equity ratio which is appropriate for all corporations in all circumstances,"ⁿ¹⁰ but thin capitalization is only one factor to consider in determining whether a specified interest is debt or equity.ⁿ¹¹ Thus, equity has been found where the debt-equity ratio was 5 to 1,ⁿ¹² and debt found where the ratio was 700 to 1.ⁿ¹³ The seeming disparity in result is simply explained. The low debt-equity ratio in the first case was overridden by the presence of a sufficient number of other factors to permit the court to constitute the interest equity rather than debt.ⁿ¹⁴ On the other hand, the very thin capitalization of the second case was saved from equity classification by the existence of factors which the court considered so significant that it was able to find a bona fide debtor-creditor relationship.ⁿ¹⁵

It should be noted that the taxpayer contemplating the use of excessive debt will "go it on his own." The Internal Revenue Service will not ordinarily rule whether an "indebtedness" is to be classified as debt or equity because such determinations are factual.ⁿ¹⁶

[iii] Holding Debt in Proportion to Stock. Although not alone determinative of the issue of debt versus equity, the pro rata holding of debt and stock is often taken as evidence that a purported debt interest is, in reality, equity.ⁿ¹⁷ Conversely, the lack of identity between debt holders and stockholders provides a strong argument that a true indebtedness exists.ⁿ¹⁸ However, the mere fact that holdings are disproportionate will not support a finding of debt if all of the relevant facts and circumstances indicate an equity interest.ⁿ¹⁹

[iv] Advances Made to Initiate the Business or to Purchase

Essential Assets. Courts are quite prone to characterize purported debt instruments as equity where the advances provide the capital needed to commence business operations or to purchase essential assets.ⁿ²⁰ In addition, the issuance of debt securities in exchange for "key" assets is often looked upon with a jaundiced eye, and the debt held not bona fide.ⁿ²¹ Even an attempt to cast the transaction in the form of a sale might not pass muster. Thus, a transfer of land to a closely held corporation in exchange for its promissory note was held by the Seventh Circuit to be a contribution to capital, and not a sale as characterized by the parties to the transaction.ⁿ²² In the court's opinion:

"When the payment to the transferors is dependent on the success of an untried undercapitalized business with uncertain prospects, a strong inference arises that the transfer is an equity contribution."ⁿ²³

Once the corporation becomes successful and well-established, so that loans are not subject to the same risks as investment capital and payments of principal and interest become more secure, the court is more likely to view the advance as a loan. Indeed, the fact that the business was successful helped the taxpayer in *Baker Commodities, Inc. v. Commissioner*,ⁿ²⁴ overcome the normal equity inference which arises from a debt-equity ratio of 700 to 1.

[v] Intention of the Parties. A crucial inquiry is whether the shareholder and the corporation intended to enter into a debtor-creditor relationship with respect to the advance in question, that is, whether the lender entertained any reasonable expectation of repayment.ⁿ²⁵ Relevant to the determination of intent are such objective criteria as the existence of written evidence of the debt,ⁿ²⁶ whether outside lenders would have made such a loan,ⁿ²⁷ the extent to which the loan is subordinated to general creditors,ⁿ²⁸ the presence or absence of formal indicia of a debt, the thinness of the capitalization, and, finally, the use to which the advance is put. Put simply, the issue is whether the shareholder intended to risk his capital in the hope of reaping a profit, or merely to temporarily lend additional support to the venture.

[3] Debt-Equity Classification and the Tax Reform Act of 1969.

The difficulties inherent in the attempt to draw a distinction between debt and equity finally led Congress, in 1969, to enact legislation authorizing the promulgation of "such regulations as may be necessary or appropriate to determine whether an interest in a corporation is to be treated for purposes of this title as stock or indebtedness."ⁿ¹ Additional authority was granted in 1989 to permit regulations covering interests that "are in part stock and in part indebtedness." The debt-equity guidelines are required to set forth the factors to be taken into account in determining whether a specific interest qualifies as debt or equity, including among others:

"(1) whether there is a written unconditional promise to pay on demand or on a specified date a sum certain in money in return for an adequate consideration in money or money's worth, and to pay a fixed rate of interest,

"(2) whether there is subordination to or preference over any indebtedness of the corporation,

"(3) the ratio of debt to equity of the corporation,

"(4) whether there is convertibility into the stock of the corporation, and

"(5) the relationship between holdings of stock in the corporation and holdings of the interest in question."ⁿ²

It took some 13 years for the Treasury to issue regulations.ⁿ³ Although final regulations were issued, their effective date was postponed repeatedly until they and proposed revisions were withdrawn on the ground that the rules did not fully reflect the Treasury or Service position on debt-equity matters.ⁿ⁴

FOOTNOTES:

(n1)Footnote 1. Eg, *NY Bus Corp Law § 504* (McKinney 1963) requires only that the consideration paid for par value stock be at least equal to par, and that the amount paid for no par value stock not be less than the stated value of such stock.

(n2)Footnote 2. A major nontax consideration is the ability of shareholder-creditors to share equally with trade creditors in the event of insolvency.

A few courts have viewed the issue as a mixed question of law and fact. *JS Birtz Constr Co v Commr, 387 F2d 451 (8th Cir 1967)* , or as a question of law. *US v Snyder Bros Co, 367 F2d 980 (5th Cir 1966)* , *cert denied, 386 US 956* .

The Service has announced that it will scrutinize and challenge transactions involving the issuance of instruments designed to be treated as debt for federal income tax purposes, but as equity for regulatory, rating agency, or financial accounting purposes. *Notice 94-48, 1994-19 IRB 10* ; *Notice 94-47, 1994-19 IRB 9* .

(n42)Footnote 3. *WO Covey, Inc v Commr, TC Memo 1969-273* .

(n43)Footnote 4. *US v Snyder Bros Co, 367 F2d 980 (5th Cir 1966)* .

(n44)Footnote 5. But see *Est of Mixon v US, 464 F2d 394 (5th Cir 1972)* , where the intention of the parties overcame the absence of usual indicia of legitimate debt, and *Turner Tire Co v US, 344 F Supp 634 (MD La 1972)* , where extensive repayment produced a finding of debt even though the transaction was marked by informality.

The Service has ruled that adjustable rate convertible notes (ARCNs) are equity, not debt. *Rev Rul 83-98, 1983-2 CB 40* . A typical ARCN bears interest at a rate that is tied to the current dividend yield on the issuer's common stock, is callable by the issuer, and generally is redeemable at the time of issuance of the stock into which the ARCN is convertible. In the ruling, the ARCNs under consideration were offered at a price of \$1,000 and were redeemable at maturity in 20 years for cash of \$600 or 50 shares of stock. Since the value of 50 shares of stock of the issuer at the time the ARCNs were issued was also \$1,000, the price of the stock would have to decline by more than 40 percent before a holder would take cash rather than stock. Because of the very high probability that all of the ARCNs would be converted into stock, the Service took the position that the ARCNs did not truly represent a promise to pay a sum certain. *Rev Rul 83-98* should be compared with *Rev Rul 85-119, 1985-2 CB 60* , where the amount of stock to be issued at maturity was not fixed, but was based upon the face amount of the notes. Thus, the noteholders did not share in the increase or decrease in the market value of the corporation's stock. The Service concluded that the notes constituted debt.

(n45)Footnote 6. *Gilbert v Commr, 248 F2d 399 (2d Cir 1957)* ; *PF Scheidelman & Sons, Inc v Commr, TC Memo 1965-31* ; *Rev Rul 68-54, 1968-1 CB 69* . An instrument with a fifty-year maturity was held to be a debt security in *Monon RR v Commr, 55 TC 345 (1970)* , *acq 1973-1 CB 2* .

A district court treated subordinated promissory notes issued contemporaneously with a sale of stock in an arm's-length transaction as debt rather than equity. The court focused on the form of the instrument to reach its conclusion. *Federal Express Corp v US, 645 F Supp 1281 (WD Tenn 1986)* .

(n46)Footnote 7. *Road Materials, Inc v Commr, 407 F2d 1121 (4th Cir 1969)* ; *Rev Rul 68-54, 1968-1 CB 69* .

The mere fact that interest is payable only out of income will not require an instrument to be treated as equity. *Monon RR v Commr, 55 TC 345 (1970)* , *acq 1973-1 CB 2* .

(n47)Footnote 8. *John Kelley Co v Commr, 326 US 521 (1946)* .

Shares of "Dutch auction rate preferred stock"--stock on which the dividend rate is set periodically pursuant to a Dutch auction--generally have characteristics that are more like stock than debt and will be treated as equity under the circumstances set forth in *Rev Rul 90-27, 1990-1 CB 50* . See also *Notice 2008-55, 2008-2 CB 11* , which provides that adding liquidity facilities to action rate preferred stock will not change the equity characterization if the conditions set forth in the Notice are met.

(n48)Footnote 9. *326 US 521 (1946)* . The specific dictum is:

"as material amounts of capital were invested in stock, we need not consider the effect of extreme situations such as nominal stock investments and an obviously excessive debt structure." (*326 US at 526*).

(n49)Footnote 10. *Wood Preserving Corp v US, 347 F2d 117 (4th Cir 1965)* .

(n50)Footnote 11. *Montclair Inc v Commr, 318 F2d 38 (5th Cir 1963)* ; *Baker Commodities, Inc v Commr, 48 TC 374 (1967)* , *aff'd 415 F2d 519 (9th Cir 1969)* , *cert denied 397 US 988* .

The corporation's equity includes retained earnings as well as paid-in capital. *Bauer v Commr, 748 F2d 1365 (9th Cir 1984)* .

(n51)Footnote 12. *Wood Preserving Corp v US, 347 F2d 117 (4th Cir 1965)* . The same result was reached in

Champaign Realty Co v US, 324 F Supp 922 (SD Ohio 1971) , where the debt-equity ratio was 51/2 to 1.

(n52)Footnote 13. *Baker Commodities, Inc v Commr*, 48 TC 374 (1967) , *aff'd* 415 F2d 519 (9th Cir 1969) , *cert denied* 397 US 988 .

(n53)Footnote 14. The equity producing factors included the absence of written evidence of the debt, the expression of intent not to demand repayment unless profits we earned, and the use of the advances to purchase essential assets.

(n54)Footnote 15. The debt was in "proper" form; the holding of debt was not in proportion to the ownership of stock; there was a reasonable expectation of repayment; the corporation was a going concern; and the transaction was entered into for valid business reasons.

The Tax Court found debentures to be debt in *Delta Plastics, Inc v Commr*, TC Memo 2003-54 , where an initial debt-equity ratio of 26 to 1 was reduced to 4 to 1 in just over three years. In addition, the obligation to repay the debentures was unconditional, there were loans from third parties, none of the debenture holders was granted a management position or increase in voting rights, and the taxpayer made all scheduled payments of principal and interest on time.

(n55)Footnote 16. *Rev Proc 2010-3*, 2010-1 IRB 110 , § 4.02(1). The Service may issue a letter ruling with respect to an instrument issued by a domestic corporation if (1) the taxpayer believes that the facts strongly support the proposed classification of the instrument as debt or stock and (2) the taxpayer can demonstrate that there are unique and compelling reasons to justify the issuance of a letter ruling. However, the taxpayer is advised to first contact the office of the Associate Chief Counsel (Corporate) in such cases to discuss whether the Service will consider issuing such a ruling.

(n56)Footnote 17. *McSorley's, Inc v US*, 323 F2d 900 (10th Cir 1963) ; *Harkins Bowling v Knox*, 164 F Supp 801 (D Minn 1958) . A pro rata holding was considered irrelevant where the corporation had only one stockholder, *JS Birtz Constr Co v Commr*, 387 F2d 451 (8th Cir 1967) .

(n57)Footnote 18. *Baker Commodities, Inc v Commr*, 48 TC 374 (1967) , *aff'd* 415 F2d 519 (9th Cir 1969) , *cert denied* 397 US 988 ; *Hofert Co v US*, 1969 US Dist LEXIS 12660 (CD Cal 1969) .

(n58)Footnote 19. *American-LaFrance-Foamite Corp v Commr*, 284 F2d 723 (2d Cir 1960) , *cert denied*, 365 US 881 .

(n60)Footnote 21. *Schnitzer v Commr*, 13 TC 43 (1949) , *aff'd per curiam* 183 F2d 70 (9th Cir 1950) , *cert denied* 340 US 911 .

(n61)Footnote 22. *Burr Oaks Corp v Commr*, 365 F2d 24 (7th Cir 1966) , *cert denied* 385 US 1007 .

(n62)Footnote 23. 365 F2d at 27 .

(n63)Footnote 24. 48 TC 374 (1967) , *aff'd*, 415 F2d 519 (9th Cir 1969) , *cert denied* 397 US 988 .

(n64)Footnote 25. Equity found because no expectation of repayment or because repayment contingent on success of business: *Slappey Drive Indus Park v US*, 561 F2d 572 (5th Cir 1977) ; *Burton v Commr*, 549 F2d 1111 (6th Cir 1977) ; *Raymond v US*, 511 F2d 185 6th Cir 1975) ; *Miles Prod Co v Commr*, 457 F2d 1150 (5th Cir 1972) ; *Dixie*

Dairies Corp v Commr, 74 TC 476 (1980) ; *Davis v Commr*, 69 TC 814 (1978) .

Debt found: repayment expected or substantially accomplished: *Anderson v US*, 555 F2d 236 (9th Cir 1977) ; *Bordo Prods Co v US*, 476 F2d 1312 (Ct Cl 1973) ; *Turner Tire Co v US*, 344 F Supp 634 (MD La 1972) .

(n65)Footnote 26. The absence of a note or agreement to repay is often considered an "equity" factor. See, eg, *Road Materials, Inc v Commr*, 407 F2d 1121 (4th Cir 1969) ; *Berkowitz v US*, 411 F2d 818 (5th Cir 1969) .

In *Hollenbeck v Commr*, 422 F2d 2 (9th Cir 1970) , the advances were evidenced by demand notes bearing interest and containing the ordinary attributes of debt. However, the treatment accorded the lending of the money and its repayment was not consistent with the normal relation of debtor and creditor, and, so, the advance was held to be equity. This had the added consequence of denying Section 1244 stock status to stock issued in return for a cancellation of the "debt." See § 2.07[2][c][i].

(n66)Footnote 27. *Tomlinson v 1661 Corp*, 377 F2d 291 (5th Cir 1967) (inability to obtain outside financing except at higher interest rates not fatal to a finding of debt); *Ram Corp v US*, 305 F Supp 831 (WD NC 1969) (equity found; outside financing wholly unavailable).

(n67)Footnote 28. Subordination to all indebtedness of the corporation whether already incurred or to be incurred in the future led to a "no debt" finding in *US v Snyder Bros Co*, N 9 *supra*. Where the shareholder-creditors were placed on equal footing with other unsecured creditors, debt status for the advance was upheld. *Tomlinson v 1661 Corp*, 377 F2d 291 (5th Cir 1967) .

(n68)Footnote 1. *IRC § 385(a)*. The difficulty of providing "comprehensive and specific statutory rules of universal and equal applicability" led Congress to frame the legislation in terms of a grant of authority to prescribe Regulations. S Rep No 91-252, 91st Cong, 1st Sess 138 (1969).

(n69)Footnote 2. *IRC § 385(b)*.

(n70)Footnote 3. The proposed regulations were published in the Federal Register on March 24, 1980.

(n71)Footnote 4. 48 Fed Treas Reg 31053-31054, 50711 (1983).

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.07

§ 3.07 Expenses of the Transferee Corporation

[1] Organizational Expenditures.

Expenditures incurred in the organization of a corporation (e.g., legal fees, filing fees) are clearly capital expenditures that are not currently deductible. Nor should such expenses normally be amortizable because of the indeterminate life of the corporation. However, *IRC Section 248(a)* allows a corporation to amortize its "organizational expenditures" over a period of not less than 60 months, beginning with the month in which the corporation begins business.

An organizational expenditure is defined as any expenditure that is (1) incident to the creation of the corporation, (2) chargeable to capital account, and (3) of a character that, if expended incident to a corporation having a limited life, would be amortizable over such life.ⁿ¹ The regulations amplify the statutory definition by treating the following as organizational expenses: legal services incident to the organization of the corporation, such as drafting the corporate charter, by-laws, minutes of organizational meetings, terms of original stock certificates, and the like; necessary accounting services; expenses of temporary directors and of organizational meetings of directors or stockholders; and fees paid to the state of incorporation.ⁿ² On the other hand, expenditures connected with the issuance or sale of shares of stock or other securities, such as commissions, professional fees, and printing costs are not organizational expenses within the meaning of *IRC Section 248*, even if the particular issue of stock to which the expenditures relate is for a fixed term of years.ⁿ³

A corporation is deemed to have made an election to amortize organizational expenditures for the taxable year in which the corporation begins business. A corporation may opt out of the deemed election by electing to capitalize its organizational expenditures on a timely filed Federal income tax return (including extensions) for the taxable year in which the corporation begins business. The election either to amortize organizational expenditures or to capitalize organizational expenditures is irrevocable and applies to all organizational expenditures of the corporation.ⁿ⁴

[2] Expenditures Incurred in Issuing or Selling Stock.

As mentioned above, expenditures connected with the issuance or selling of stock or other securities are not organizational expenses and must be relegated to the realm of nondeductible capital expenditures.ⁿ¹ Included in this category are: expenses incurred in issuing stock;ⁿ² fees paid in connection with the registration of capital stock issues with the Securities and Exchange Commission;ⁿ³ stock exchange listing costs;ⁿ⁴ and expenditures relating to the payment of stock dividends or stock splits.ⁿ⁵ However, fees paid to maintain a stock exchange listing,ⁿ⁶ expenses

incurred in filing periodic reports required by the SEC,ⁿ⁷ and amounts paid to a registrar and transfer agent for the maintenance of capital stock records not related to an original issuance of stock, stock dividend, or reorganization,ⁿ⁸ are deductible as ordinary and necessary business expenses.

CHAPTER 3 Forming the Corporation

1-3 Taxation of Securities Transactions § 3.08

§ 3.08 Reporting and Record-Keeping Requirements

Statements containing information relating to a transfer coming within *IRC Section 351* are to be filed as part of the tax returns of the transferors and transferee corporation for the year in which the exchange occurs. The statement for each transferor must contain the following information:

- (1) A description of the property transferred, or of the transferor's interest therein, together with a statement of the cost or other basis thereof, adjusted to the date of transfer.
- (2) With respect to the stock of the transferee corporation received in the exchange, a statement of, (i) the kind of stock and preferences, if any; (ii) the number of shares of each class received; and (iii) the fair market value per share of each class at the date of the exchange.
- (3) The amount of money received, if any.
- (4) With respect to other property received, (i) a complete description of each separate item; (ii) the fair market value of each separate item at the date of the exchange; and (iii) in the case of a corporate shareholder, the adjusted basis of the other property in the hands of the transferee corporation immediately before the distribution to the corporate shareholder.
- (5) With respect to liabilities of the transferor assumed by the transferee corporation, (i) the nature of the liabilities; (ii) when and under what circumstances created; (iii) the corporate business purpose for the assumption by the transferee corporation; and (iv) whether the assumption eliminates the transferor's primary liability.ⁿ¹

The statement filed by the transferee corporation must include:

- (1) A complete description of the property received from the transferors.
- (2) A statement of the cost or other basis thereof in the hands of the transferors adjusted to the date of transfer.

(3) The following information with respect to the stock of the transferee corporation: (i) the total issued and outstanding capital stock immediately prior to and immediately after the exchange, with a complete description of each class of stock; (ii) the classes of stock and number of shares issued to each transferor in the exchange, and the number of shares of each class of stock owned by each transferor immediately prior to and immediately after the exchange; and (iii) the fair market value of the capital stock as of the date of the exchange that was issued to each transferor.

(4) The amount of money, if any, that passed to each of the transferors in connection with the transaction.

(5) With respect to other property that passed to each transferor, (i) a complete description of each item at the date of the exchange, (ii) the fair market value of each separate item at the date of the exchange; and (iii) in the case of a corporate transferor, the adjusted basis of each separate item in the hands of the transferee corporation before the distribution to the corporate transferor in connection with the exchange.

(6) The following information regarding the transferor's liabilities assumed by the transferee corporation in the exchange: (i) the amount and a description thereof; (ii) when and under what circumstances created, and (iii) the corporate business reason for assumption by the transferee corporation.ⁿ²

Permanent records in substantial form must be kept by every taxpayer who participated in the exchange, showing the information required to be reported, in order to facilitate the determination of gain or loss from a subsequent disposition of stock and other property received in the exchange.ⁿ³

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions 4.syn

§ 4.syn Synopsis to Chapter 4: Dividend Distributions

§ 4.01 Introduction

§ 4.02 Dividend Defined

[1] The Relevance of Earnings and Profits.

[a] Computation of Earnings and Profits.

[i] Effect of Accounting Method on Earnings and Profits.

[2] Personal Holding Company Dividends.

[3] Constructive Dividends.

[a] General Principles.

[b] Corporate "Loans" to Shareholders.

[c] Bargain Transactions.

[d] Excessive Compensation.

[e] Payment of Personal Expenses of Shareholders.

§ 4.03 The Individual Shareholder

[1] Amount of the Distribution.

[2] Amount Treated as a Dividend.

[3] Treatment of Distributions in Excess of the Amount Considered a Dividend.

[4] Basis of Property Distributed in Kind.

§ 4.04 The Corporate Shareholder

[1] Amount of the Distribution.

[2] Amount Treated as a Dividend.

[a] Dividends Received Deduction.

[i] Dividends Received From Domestic Corporations.

[ii] Dividends Received From Affiliated Corporations.

[iii] Dividends Received on Preferred Stock of a Public Utility.

[iv] Dividends Received From Foreign Corporations.

[v] Restrictions on the Dividends Received Deduction.

[3] Treatment of Distributions in Excess of the Amount Considered a Dividend.

[4] Basis of Property Distributed in Kind.

§ 4.05 Tax Accounting for Dividends Received

[1] Year of Inclusion.

[2] The Taxable Person.

[a] Pledged or Escrowed Stock.

[b] Assignment of Income Problems.

[3] Characterization of Income Problems.

§ 4.06 Stock Dividends and Distributions of Stock Rights

[1] Effect of the Distribution on Income.

[a] Disproportionate Distributions.

[i] In General.

[ii] Constructive Disproportionate Distributions.

[iii] Adjustments in Conversion Ratios.

[iv] Periodic Redemption Plans.

[v] Distributions of Cash in Lieu of Fractional Shares.

[vi] Reorganizations Utilizing Contingent Shares.

[b] Distributions of Common and Preferred.

[c] Distributions on Preferred Stock.

[i] In General.

[ii] Recapitalizations of Preferred.

[iii] The Effect of an Excess Redemption Premium.

[d] Distributions of Convertible Preferred Stock.

[2] Basis of Stock or Stock Rights Received in Nontaxable Distributions.

[3] Holding Period of Stock or Stock Rights Received in a Nontaxable Distribution.

§ 4.07 Stripped Preferred Stock

§ 4.08 Effect on the Distributing Corporation

[1] Gain or Loss Resulting From the Distribution.

[a] General Rule.

[b] The Statutory Exceptions.

[2] Effect on Earnings and Profits.

[a] General Rule.

[b] Exceptions to the General Rule.

[i] Distributions of Appreciated Property.

[ii] Distributions of Property Subject to Liabilities.

[iii] Distributions of Stock Dividends and Stock Rights.

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.01

§ 4.01 Introduction

A corporate distribution can have as its purpose the partial or complete liquidation of the corporation, the partial or complete redemption of a shareholder's interest, or merely the distribution of surplus earnings to the shareholders. Each of these produces its own set of tax consequences; all of these do so because the corporation and its owners are separate tax entities.

The major concern attending any nonliquidating distribution is the extent to which the distribution is a "dividend." Leaving aside those nonliquidating distributions which are in redemption of stock, the determination as to whether a distribution is a dividend requires consideration of:

- (1) the type of property distributed, for if it consists of stock or stock rights of the distributing corporation, the distribution can, perhaps, be received tax-free;
- (2) the nature of the recipient, for the amount ultimately subject to tax will differ if the distributee is a corporation or a noncorporate entity; and
- (3) the earnings and profits of the distributing corporation, for this determines the extent to which the distribution will be a dividend, and, thus, constitute ordinary income.

Normally, dividends are taxed at ordinary income rates. However, for taxable years 2003-2010, qualified dividends are taxed at preferential net capital gain rates.ⁿ¹

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.02

§ 4.02 Dividend Defined

[1] The Relevance of Earnings and Profits.

As a general rule, state law authorizes payment of a dividend only when the corporation has a surplus; a distribution while the corporation is insolvent or which will render the corporation insolvent is prohibited.ⁿ¹ While these provisions have local law effect, they play no part in the determination of a dividend for tax purposes.ⁿ² Under the Code, a distribution becomes a dividend whenever made:

"(1) out of [the corporation's] earnings and profits accumulated after February 28, 1913, or

"(2) out of its earnings and profits of the taxable year (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year), without regard to the amount of earnings and profits at the time the distribution was made."ⁿ³

It is readily observed that even though a corporation may have an accumulated deficit both at the beginning and end of the year, a distribution will be classified as a dividend to the extent of the corporation's current earnings and profits. Therefore, ascertainment of the amount of accumulated earnings and profits becomes necessary only when earnings and profits of the year of distribution are less than the total of the distributions made during the year.

The Internal Revenue Service has ruled that the date of payment controls in determining whether and when a distribution is made out of earnings and profits.ⁿ⁴ In a second ruling, the Service held that the date on which a check is mailed determines the tax status and effect on earnings and profits of the distribution.ⁿ⁵ If the distribution consists of property other than cash, the fair market value of the property is determined as of the date of distribution without regard to whether such date is the same as that on which the distribution is includable in gross income.ⁿ⁶

The Code further provides that every distribution by a corporation "is made out of earnings and profits to the [full] extent thereof, and from the most recently accumulated earnings and profits."ⁿ⁷ This creates a priority of distribution sources headed by earnings and profits of the current taxable year and followed, first, by earnings and profits accumulated after February 28, 1913, and, then, by earnings and profits accumulated before that date.ⁿ⁸ No class of earnings and profits may be invaded until a prior one has been completely exhausted. This last consideration is important only when the distributions made during the taxable year exceed the earnings and profits of that year. In such

event, the current earnings and profits are spread ratably across the distributions in the proportion that the total of such earnings and profits bears to the total distributions made during the year. The balance of each distribution will be a dividend only if there are earnings and profits accumulated since February 28, 1913 available on the date of distribution.ⁿ⁹

Application of the earnings and profits source rules may be illustrated by the following:

Example:

At the beginning of the year, a corporation had \$6,000 in earnings and profits accumulated since February 28, 1913. Its earnings and profits for the current year amounted to \$21,000. The corporation made two cash distributions during the taxable year, one on June 30, in the amount of \$20,000, and the other on December 31, in the amount of \$10,000. Since current earnings and profits are apportioned ratably, \$14,000 of such earnings and profits is allocated to the June distribution, and \$7,000 to the one made in December. The entire \$6,000 in accumulated earnings and profits will provide the source for the balance of the earlier distribution, making it a dividend in its entirety. Whether the source of the remaining \$3,000 of the December distribution is pre-March 1, 1913, earnings and profits or sources other than earnings and profits is unimportant. The dividend portion of the distribution can never be greater than \$7,000.ⁿ¹⁰

Suppose a corporation has accumulated earnings and profits at the beginning of the year, but suffers a current loss of sufficient magnitude to reduce such earnings and profits below the total amount of distributions made during the year. Of importance, here, is the way in which a current deficit affects the amount of accumulated earnings and profits available on each distribution date. Unless it can be shown that the loss developed in a particular way or at a particular point in time, so that the actual earnings and profits available at the time of distribution can be ascertained, the loss is deemed to have been incurred evenly throughout the year.ⁿ¹¹

Example:

A corporation, which has accumulated earnings and profits of \$10,000, suffers a loss of \$20,000 in the current year. The corporation makes end-of-quarter distributions of \$5,000 each. If the manner or time in which the loss developed cannot be determined, the earnings and profits available at the end of the first quarter will amount to \$5,000 (\$10,000 less one-fourth of the loss). Only the first distribution will be taxed as a dividend, for no earnings and profits will be available for any other distribution. If, however, proof can be adduced to show that the entire loss was in fact, incurred in the second half of the year, the first two distributions would be made out of accumulated earnings and profits and be taxed as dividends.

[a] Computation of Earnings and Profits.

What are earnings and profits? The Code does not say.ⁿ¹² Clearly, they are not the equivalent of the accounting concept of "earned surplus."ⁿ¹³ Nor are earnings and profits the same as taxable income.ⁿ¹⁴ However, taxable income is perhaps as good a starting place as any to look for the meaning of earnings and profits.

Beginning with taxable income, one must add "all income exempted by statute, income not taxable by the Federal Government under the Constitution, as well as all items includible in gross income under section 61 or corresponding provisions of prior revenue acts."ⁿ¹⁵ Thus, if the corporation receives interest on municipal obligations excluded from gross income by *IRC Section 103*, or proceeds of insurance exempted by *IRC Section 101(a)*, the amount of these receipts will enter into the computation of earnings and profits. The quoted Regulation attempts to include in earnings and profits amounts received by the corporation which become available for distribution to its shareholders. To be consistent, items exempted from inclusion in gross income by some nonrecognition provision should not enter the computation of earnings and profits, since the mere change in form which results from the exchange does not produce the kind of "income" which can be passed on to shareholders. And this is exactly what *IRC Section 312(f)(1)* of the

Code provides--no inclusion in earnings and profits until recognition.ⁿ¹⁶

A number of courts took the rationale of *IRC Section 312(f)* and applied it in cases which closely resemble nonrecognition transactions. For example, in *Bangor & Aroostook R.R. v. Commissioner*,ⁿ¹⁷ a corporation elected to exclude cancellation of indebtedness income under the predecessor of *IRC Section 108* and to adjust the basis of its assets as required by present *IRC Section 1017*.ⁿ¹⁸ It then attempted to include the excluded amount in its accumulated earnings and profits for the purpose of decreasing its excess profits tax. The attempt failed. No increase in earnings and profits was the result reached as well in *Meyer v. Commissioner*,ⁿ¹⁹ where the debt cancellation came as part of an arrangement under Chapter XI of the Bankruptcy Act. Such cancellation did not give rise to income, but a reduction in basis was required. The situation in *Meyer* was complicated by the fact that the cancelled debt exceeded the reduction in basis. The Government took the position that the excess worked an increase in the debtor's earnings and profits on the theory that an economic benefit had been conferred on the corporation. Because of this the Service announced that it would not follow *Meyer*.ⁿ²⁰ The Bankruptcy Tax Act of 1980 clarified the situation. Income from discharge of indebtedness increases earnings and profits, whether or not current tax is imposed on the income, except to the extent the discharged amount is applied to reduce basis under *IRC Section 1017*.ⁿ²¹ In addition, if the interest of any shareholder in a corporation is eliminated in a bankruptcy or similar case and the corporation has a deficit in earnings and profits, the deficit is reduced by the amount equal to the paid-in capital allocable to the interest that is terminated.ⁿ²²

A logical extension of the notion that earnings and profits should reflect the amount available for distribution is the elimination from the computation of earnings and profits of any deduction which does not call for an expenditure by the corporation.ⁿ²³ For example, the dividends received deduction must be disregarded when computing earnings and profits. Similarly, if the corporation is entitled to a depletion deduction, it must be figured on a cost basis for earnings and profits, even though percentage depletion is allowable in determining taxable income.ⁿ²⁴ A like provision, *IRC Section 312(k)(1)*, effective for taxable years beginning after June 30, 1972, calls for the use of the straight-line method of depreciation in computing earnings and profits, even if the corporation uses another method to determine its depreciation deduction for other purposes. Enactment of the accelerated cost recovery system provisions as part of the Economic Recovery Tax Act of 1981 brought with it *IRC Section 312(k)(3)(A)*, which, as amended by the Tax Reform Act of 1986, provides that in the case of property placed in service after 1986, the deduction for depreciation for earnings and profits purposes must be determined under the alternative depreciation method of *IRC Section 168(g)*.ⁿ²⁵ Depreciable property which is immediately expensed under *IRC Section 179* is taken into account for earnings and profits purposes on a ratable basis over a five-year period beginning with the year in which the deduction is taken.ⁿ²⁶

IRC Section 312(n), added by the Tax Reform Act of 1984, is "designed to ensure that a corporation's earnings and profits more closely conform to its economic income."ⁿ²⁷ Under its terms, in computing earnings and profits:

- (1) Construction period interest, property taxes and carrying charges are capitalized and added to the basis of the property to which they relate;
- (2) Intangible drilling costs allowed as a deduction under *IRC Section 263(c)* are capitalized and amortized ratably over the 60-month period beginning with the month in which production from the well begins;
- (3) Mineral exploration and development costs allowable as a deduction under *IRC Section 616(a)* or *617* are capitalized and amortized ratably over the 120-month period beginning with the later of the month in which production begins or the month in which the amount was paid or incurred;
- (4) Amounts amortized under *IRC Sections 173* (relating to circulation expenditures), *177* (relating to trademark and trade name expenditures), and *248* (relating to organizational expenditures) are capitalized and treated as part of the basis of the asset to which they relate;

- (5) Earnings and profits are increased or decreased by the amount of increase or decrease in the corporation's LIFO recapture amount as of the close of any taxable year;ⁿ²⁸
- (6) All principal payments due on property sold by the corporation on the installment basis are treated as having been received in the year of sale;
- (7) Taxpayers who determine taxable income under the completed contract method of accounting must use the percentage of completion method for earnings and profits purposes; and
- (8) In the case of a redemption to which *IRC Section 302(a)* or *303* applies, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed.ⁿ²⁹

If deductions which do not call for any outlay are removed from the computation of earnings and profits, thereby increasing earnings and profits, then actual outlays which are not deductible for one reason or another should serve to decrease earnings and profits. Thus, earnings and profits are reduced by the disallowed excess of capital losses over capital gains,ⁿ³⁰ disallowed losses incurred in transactions with a controlling shareholder,ⁿ³¹ nondeductible expenses incurred in carrying tax-exempt interest bonds, compensation paid but not deductible because excessive,ⁿ³² and federal income taxes. However, *IRC Section 312(m)* permits no decrease for interest rendered nondeductible by *IRC Section 163(f)* because paid on a registration-required obligation not in registered form, unless at the time of issuance, the issuer is a foreign corporation that is not a controlled foreign corporation and the issuance of the obligation did not have as a purpose the avoidance of *IRC Section 163(f)*, or *IRC Section 312(m)*.ⁿ³³

An interesting problem concerns the proper charge to earnings and profits when a corporation contributes appreciated property to a charity. The Tax Court holds that the earnings and profits can be reduced by an amount equal to the excess of the fair market value of the property over the amount allowed as a charitable deduction.ⁿ³⁴ The Internal Revenue Service takes the position that the proper charge is an amount equal to the adjusted basis of the donated property, even though fair market value is the measure of the gift for deduction purposes.ⁿ³⁵

The foregoing discussion has centered on the relationship between taxable income and earnings and profits, and the adjustment required to conform the two concepts. But earnings and profits can also be increased or decreased by transactions which have no bearing on the taxable income of the corporation. Thus, earnings and profits will be affected when a corporation makes a distribution of property with respect to its stock;ⁿ³⁶ makes a distribution in partial liquidation or in redemption of its shares;ⁿ³⁷ is a party to a divisive reorganization under Section 355;ⁿ³⁸ or distributes property at a time when it is obligated on a loan made, guaranteed, or insured by the United States (or one of its agencies or instrumentalities), and the amount of the outstanding loan exceeds the basis of the property standing as security for the loan.ⁿ³⁹

[i] Effect of Accounting Method on Earnings and Profits. The Regulations state that "the amount of the earnings and profits in any case will be dependent upon the method of accounting properly employed in computing taxable income ..."ⁿ⁴⁰ If the corporation keeps its accounting records and files its tax returns on the cash receipts and disbursements method, it must use the same method in determining earnings and profits. Furthermore, since it appears that consistency is required even as to individual items, a corporation which deducts bad debts on an individual charge-off basis for tax purposes cannot use the bad debts reserve method in computing earnings and profits.ⁿ⁴¹

While courts are fairly in agreement that a consistent approach should be taken when the same item affects both taxable income and earnings and profits, there is a difference of opinion as to whether consistency is required when the item affects earnings and profits alone. A major area of disagreement concerns the permissibility of an accrual of federal income taxes for the purpose of determining earnings and profits when the corporation uses the cash basis method of

accounting. It is plain to see that an accrual of taxes payable in the following year will work a decrease in earnings and profits as of the close of the year to which the taxes relate, rather than in the year of payment. Such an accrual has been permitted by some courts on the theory that an accounting method is relevant only in determining the income and deductions of a taxpayer, and should not control whenever the item cannot be deducted to arrive at taxable income.ⁿ⁴² Courts reaching the contrary result do so on the basis of accounting method and the requirement of consistency.ⁿ⁴³ Disregard of accounting method principles has not been limited to cases involving cash basis corporations. Those on the accrual basis have been permitted to use contested tax liabilities relating to prior years to reduce earnings and profits as of the close of such prior years, even though no deduction would be permitted until the liability became fixed and certain.ⁿ⁴⁴

[2] Personal Holding Company Dividends.ⁿ¹

If a corporation is a personal holding company in the taxable year in which the distribution is made, the extent to which the distribution constitutes a dividend is not limited by the traditional sources--current earnings and profits and accumulated earnings and profits. In the case of a personal holding company, "the term 'dividend' also means any distribution of property ... made by the corporation to its shareholders, to the extent of its undistributed personal company income ... for such year."ⁿ² Thus, even if a personal holding company has neither accumulated nor current earnings and profits, a dividend can result if it has undistributed personal holding company income for the taxable year.ⁿ³

A further provision of *IRC Section 316(b)(2)* creates dividend income to the extent of undistributed personal holding company income even where the distribution is in complete liquidation of the company, but only if:

- (1) the distribution occurs within 24 months after adoption of the plan of liquidation;
- (2) the distributee is a noncorporate shareholder of the corporation; and
- (3) the corporation designates the distributed amounts as dividends.ⁿ⁴

The amount which a noncorporate shareholder must treat as a dividend cannot exceed his allocable share of the corporation's undistributed personal holding company income for the year.ⁿ⁵

[3] Constructive Dividends.

The double taxation of corporate profits through a tax at the corporate level on corporate earnings, and a tax at the shareholder level on distributed earnings, fosters attempts to siphon off earnings and profits via distributions disguised as something other than a dividend. The variations on the disguised dividend theme are many; the effect is singular--to confer an economic benefit on the shareholder--and economic benefit, rather than formal dividend action by the corporation, is the crucial test in finding a constructive dividend.ⁿ¹

[a] General Principles. The double taxation of corporate profits--a corporation income tax on corporate earnings and an individual income tax at the shareholder level when the after-tax earnings are distributed as dividends--has long motivated shareholders to move corporate earnings into their hands via transactions characterized as something other than dividends. Treasury regulations recognize the right of shareholders to engage in transactions with their corporations in some other capacity--as employees, creditors, sellers, purchasers, lessors, lessees, and the like--and so long as those transactions are conducted on arm's length terms they should not have dividend consequences.ⁿ² It is when shareholders try to cloak distributions with respect to their stock in the garb of ordinary business transactions that the IRS becomes concerned. These often take the form of corporate "loans" to shareholders for which there is no expectation of repayment, or corporate payment of shareholders' personal liabilities or expenses under the guise of "corporate expenses," or the sale, lease or other transfer of corporate assets or services to shareholders for less than fair

value, or conversely, the sale, lease or other transfer of shareholder assets or services to the corporation at prices exceeding their fair value.

The Treasury and the courts developed the concept of "constructive" or "disguised" corporate distributions to contend with such schemes.ⁿ³ In accord with the "broad definition" of "dividend" in *section 316(a) of the Internal Revenue Code*,ⁿ⁴ a shareholder may be charged with the receipt of a "constructive" dividend, taxable in the same manner as a legally declared dividend, whenever a constructive distribution of property confers an economic benefit on the shareholder.ⁿ⁵ The formalities of a dividend declaration are not required; indeed, a shareholder may be deemed to have received constructive dividends "even though ... [the corporation] has not made a pro rata distribution to the entire class of stockholders, and even though neither the corporation nor the shareholder intended a dividend and the corporation did not record the distribution as a dividend for bookkeeping purposes."ⁿ⁶

A constructive dividend must be a distribution of "property" by a corporation to its shareholders, but in constructive dividend cases the courts generally use "property" and "economic benefit" synonymously. *Section 317 of the Internal Revenue Code* circularly defines "property" as "any property," with the exception of the corporation's own stock and rights to acquire its stock.ⁿ⁷ That definition is "broad" enough to treat a corporation's rendition of services to shareholders a distribution of property.ⁿ⁸ "Property" also includes an option given to shareholders to acquire the corporation's property, even if the option only gives the right to purchase at a price equal to the property's fair market value at the time the option is distributed.ⁿ⁹

A shareholder may be charged with a constructive dividend even if corporate property never actually passes through his hands, but is transferred by the corporation to a nominee,ⁿ¹⁰ or a third party in satisfaction of a legal or moral obligation of the shareholder,ⁿ¹¹ or a third party whose acquisition of the property results from the shareholder's substantial influence over the corporation and in a substantial if intangible personal benefit to the shareholder.ⁿ¹² Such cases often invoke the "assignment of income" principle: a shareholder may not escape taxation on a constructive dividend by using his "controlling interest in the dividend-paying corporation and ... effective power to direct the flow of corporate wealth to another, without routing the transaction through his own hands."ⁿ¹³ In these cases, the Internal Revenue Service and the courts will treat the property as having first been "constructively received" from the corporation by the shareholder, then transferred by the shareholder to the recipient of the economic benefit. When property has not simply been transferred to the shareholder's alter ego or creditor, the deemed transfer is usually a gift (if the recipient is a family member) or a contribution to capital (if the recipient is another corporation or entity in which the shareholder owns a significant financial interest).ⁿ¹⁴

A showing that a shareholder caused property to be transferred from one of his controlled corporations to another does not, without more, establish a constructive dividend to the shareholder, however; the transfer must result in a benefit to the shareholder personally, as opposed to an enrichment of the transferee corporation that benefits the shareholder, if it all, only derivatively by increasing the value of his stock in the transferee.ⁿ¹⁵ In *Sammons*, a leading case, a shareholder caused a corporation he controlled to transfer its funds to an insolvent subsidiary as a contribution to capital, which allowed the subsidiary to repay debts owed to the shareholder. The intercompany transfer from the controlled corporation to its subsidiary, standing alone, could not be regarded as a constructive dividend to the shareholder, for it neither increased his personal wealth nor gave him direct control over the funds.ⁿ¹⁶ The re-transfer of the funds from the formerly insolvent subsidiary into the shareholder's hands could provide the necessary personal shareholder benefit,ⁿ¹⁷ but in this case most of the transferred funds went towards repayment of a debt that had previously been guaranteed by another of the transferor's subsidiaries; and the guarantor was both legally required and financially able to pay the debt if the transferee failed to do so. As to the guaranteed debt, the shareholder derived no economic benefit from the transfer and subsequent re-transfer of the funds to repay the indebtedness. The funds he received were those to which he was not only legally entitled but was assured of receiving whether or not the transfer was made. The insolvent subsidiary's remaining indebtedness was not guaranteed, however, and the shareholder's repayment would not have been possible without the transfer. To this extent, the shareholder did receive a personal economic benefit by diverting the transferor's funds to the transferee, and this could properly be treated as a constructive dividend.

The economic benefit, if any, realized by a shareholder from a corporate distribution is not always the same as the cost to the corporation of furnishing the benefit. For example, a sale of corporate property to a shareholder for less than the corporation's acquisition cost is not a bargain sale, and confers no economic benefit on the shareholder, if the property's sale price is not greater than its current fair market value.ⁿ¹⁸ Similarly, even if payment for services provided by the shareholder's corporation is below the corporation's cost of providing the service, an economic benefit is conferred only to the extent (if any) that the fair market value of the services exceeds the shareholder's payment.ⁿ¹⁹

A corporate expenditure or transfer made for a legitimate business purpose of the corporation will not result in a constructive dividend even if, as a consequence of such an expenditure, an economic benefit is incidentally conferred upon a shareholder.ⁿ²⁰ This rule is not surprising since the purpose of the constructive dividend doctrine is to tax as dividends distributions which are disguised to look like legitimate business transactions but, in substance, are not.ⁿ²¹ Thus, it is normally taken for granted that corporate expenditures for such ordinary and necessary business expenses as the costs of providing a pleasing work environment, business-related travel and entertainment expenses, the business use of corporate automobiles and other transportation facilities, business meals and similar expenses do not create constructive dividends to shareholder-managers because of the incidental personal benefits they may derive from such expenditures, particularly when nonshareholder employees are not taxable on similar benefits they incidentally enjoy from such expenditures.ⁿ²²

An asserted business purpose will not insulate a shareholder from constructive dividend treatment, however, if shareholder benefit was not merely an incidental consequence but the primary purpose of making the expenditure; indeed, the business purpose test is frequently referred to as the "primary purpose" test.

[W]here the primary or dominant motivation for a distribution ... [is] to benefit the stockholder rather than the corporation ... the articulation of a concededly subordinate business justification should [not] cause the entire transaction to be recharacterized for tax purposes[W]e hold that where the business justifications put forward are not of sufficient substance to disturb a conclusion that the distribution was *primarily* for shareholder benefit, this prong of the dividend characterization test is met.ⁿ²³

Moreover, a business purpose may not be enough to avoid constructive dividend treatment if the route chosen for accomplishing that purpose--i.e., the distribution of corporate property--was motivated by shareholder rather than corporate requirements.ⁿ²⁴

The business purpose test is sometimes difficult to apply, not only because "the line between shareholder benefit and corporate benefit is not always clear"ⁿ²⁵ but because the cases are not always consistent in their application of the test. *Sammons* said the test is a search for subjective intent to determine if the distribution was motivated by a desire to primarily benefit the shareholder.ⁿ²⁶ Subsequently, however, in *Kuper v Commr*, decided in the same circuit (the Fifth) explained that "the search for underlying purpose usually involves the objective criterion of actual primary economic benefit to the shareholders as well."ⁿ²⁷ Finally, in *Baumer v US*, the Fifth Circuit announced as a "guiding principle" that "the intent of the parties does not govern the characterization of a distribution. Instead, courts have looked to the economic effect of the transaction at issue in determining the existence of a dividend."ⁿ²⁸ That would seem to leave little if any room for a consideration of subjective intent, though constructive dividend decisions continue to take subjective intent into account.ⁿ²⁹

[b] Corporate "Loans" to Shareholders. The withdrawal of corporate funds unaccompanied by any intention to create an obligation to repay the "loan" is a common source of constructive dividends.ⁿ³⁰ Even where the original withdrawal constitutes a genuine loan, a later cancellation of the indebtedness by the corporation can produce dividend income.ⁿ³¹ The shareholder may seek to escape dividend income consequences by claiming either that the original withdrawal constituted a dividend (a contention that will work a benefit only if the statute of limitations for the original

year has run),ⁿ³² or that the cancellation was a gift from the corporation to the shareholder.ⁿ³³ The chances of success, in either case, seem slim. The taxpayer putting forth a prior dividend claim will no doubt have the difficult task of overcoming the fact that the withdrawal was carried as a loan on the books of the corporation, and that the taxpayer did not originally consider the withdrawal a dividend.ⁿ³⁴ The taxpayer urging a gift will be faced with an even more difficult problem, namely, that courts rarely find the existence of a gift in a business setting.ⁿ³⁵

"For 'disbursements to constitute true loans there must have been, at the time the funds were transferred, an unconditional obligation on the part of the transferee to repay the money, and an unconditional intention on the part of the transferor to secure repayment' ... In the absence of direct evidence of intent, the nature of the transaction may be inferred from its objective characteristics, ... including the presence or absence of debt instruments, collateral, interest provisions, repayment schedules or deadlines, and any other attributes indicative of an enforceable obligation to repay the sums advanced."ⁿ³⁶ However, "no simple rule exists for determining whether an instrument should be classified as debt or equity; the ultimate test is whether in substance the arrangement more nearly resembles debt or equity, and to answer that question, all the facts and circumstances must be examined and considered."ⁿ³⁷

Thus, charging a withdrawal to the account of the shareholder and carrying the advance as a receivable is often cited as a factor tending to show the withdrawal was a loan and not a disguised dividend, but this factor will not insure nondividend treatment.ⁿ³⁸ Evidencing the obligation to repay with a note and charging and collecting interest on the balance is persuasive of debt characterization, but still not determinative in all circumstances.ⁿ³⁹ The attempt by the corporation to collect the advance weighs heavily in favor of treating the transaction as a loan,ⁿ⁴⁰ as does the fact that the taxpayer repaid at least part of the amount withdrawn.ⁿ⁴¹ While full repayment is generally decisive of the intent issue,ⁿ⁴² it will not be if repayment is matched by further withdrawals, or if repayment is made in an amount relatively insignificant in relation to the total withdrawal.ⁿ⁴³ Finally, the shareholder's inability to repay the loan at the time of withdrawal may be taken as evidence of an intent never to repay.ⁿ⁴⁴

For years, courts were virtually unanimous in holding that an interest-free loan by a corporation to a shareholder did not create income for the shareholderⁿ⁴⁵ but, in 1984, Congress made below-market loans income-producing events. *IRC Section 7872(a)* views the transaction as a transfer of the forgone interest from the lender to the borrower, and a retransfer of the interest by the borrower to the lender.ⁿ⁴⁶ Thus, if a below-market loan is made by corporation to a shareholder, the following tax consequences ensue: a dividend to the shareholder, interest income to the corporation, and interest deduction for the shareholder unless disallowed by some other provision of the Code.ⁿ⁴⁷

If the loan is a term loan, the transfer is treated as occurring on the date the loan is made in an amount equal to the excess of the amount loaned over the present value of all payments that are required to be made under the terms of the loan.ⁿ⁴⁸ Such excess is considered to be original issue discount so that the lender is treated as receiving interest income in a pattern producing a constant yield to maturity over the life of the loan.ⁿ⁴⁹ If the loan is a demand loan the imputed interest that gives rise to the dividend, interest income, and interest deduction is determined for each day the loan is outstanding.ⁿ⁵⁰

[c] Bargain Transactions. A sale of corporate property to shareholders for less than the property's fair market value confers an obvious economic benefit on the shareholders. The Regulations have long taken the position that the shareholders receive a distribution from the corporation in this situation to which section 301 applies, equal in amount to the difference between the price paid for the property and its fair market value.ⁿ⁵¹ The Regulations nevertheless regard the bargain transaction as, in part, a valid sale by the corporation and, prior to the amendment of *IRC section 311(b)* by the Tax Reform Act of 1986, the corporation would have been taxable, in most cases, on the difference between the price paid by the shareholders and the corporation's adjusted basis in the property as gain on the sale or exchange of the property. Under *IRC section 311(b)* as amended, however, the corporation is now taxed on the entire difference between its adjusted basis and the fair market value of the value of the property, as though it had sold the property to its shareholders at fair market value.

Example:

A corporation sells land which cost \$1 million (and has an adjusted basis of \$1 million to the corporation) but a current value of \$4 million, to its sole shareholder for \$2 million. The transaction will be treated as a distribution to the shareholder of \$2 million (\$4 million value of property less the shareholder's \$2 million payment) and, assuming the corporation has sufficient earnings and profits, the distribution will be taxable as a dividend under *IRC section 301*. Under the regulations, the transaction is regarded as a legitimate sale by the corporation to the extent of the difference between the shareholder's payment and the corporation's adjusted basis in the land, resulting in gain on the sale of the property of \$1 million (\$2 million sales price less \$1 million adjusted basis).ⁿ⁵² However, *IRC section 311(b)* now requires the corporation to compute its gain as though it sold the land to the shareholders for fair market value, so that the corporation must report gain of \$3 million rather than \$1 million.ⁿ⁵³

The converse of the bargain sale is present when the shareholder sells property to the corporation and receives a price in excess of fair market value. In that case, the shareholder's constructive dividend is equal to the difference between the price paid by the corporation and the property's lower fair market value, while the corporation's basis in the property is limited to its fair market value.ⁿ⁵⁴

A "bargain rental" of corporate property will result in a constructive dividend to the extent of the difference between the fair rental value of the property and the amount paid by the shareholder.ⁿ⁵⁵

[d] Excessive Compensation. *IRC Section 162(a)(1)* allows "a reasonable allowance for salaries or other compensation for personal services actually rendered" to be deducted from gross income. But when payments labeled salary or compensation are found not to be reasonable in amount but excessive, "if such [excessive] payments correspond or bear a close relationship to stockholdings, and are found to be a distribution of earnings, or profits, the excessive payments will be treated as a [nondeductible] dividend."ⁿ⁵⁶

May a court infer that compensation is excessive because, over a substantial period of time, shareholders of the corporation have taken only salaries and the corporation has never paid dividends? In *Charles McCandless Tile Service v US*,ⁿ⁵⁷ the corporation never paid a dividend, compensation was paid to shareholder/employees in proportion to their stock interests, half the corporation's pre-tax profits (before reduction by their compensation) was paid out to the shareholder/employees as compensation, and the corporation's return on equity capital was "conspicuous by its absence." Even though the Court of Claims found that the total amount of compensation paid to the shareholder/employees was "within the realm of reasonableness," it disallowed a portion of the compensation deduction as a disguised dividend to increase the corporation's earnings to a level that achieved what the court considered a reasonable rate of return on its equity. "Even a payment deemed reasonable," the court said, "is not deductible to the extent that it is in reality a distribution of corporate earnings and not compensation for services rendered."ⁿ⁵⁸

Most courts, however, require independent proof that the shareholder/employee's compensation is not "reasonable" before disallowing a deduction for compensation as a disguised dividend. They typically employ a multifactor analysis which examines most if not all of the following factors:

the employee's qualifications, the nature, extent and scope of the employee's work; the size and complexities of the business; a comparison of salaries paid with gross income and net income; the prevailing economic conditions; comparison of salaries with distributions to stockholders; the prevailing rates of compensation for comparable positions in comparable concerns; the salary policy of the taxpayer as to ... [nonstockholder as well as stockholder] employees; and in the case of small corporations with a limited number of officers the amount of compensation paid to the particular employee in previous years."ⁿ⁵⁹

More recently, courts have applied an "independent investor" or "happy investor" test, which uses the taxpayer

corporation's return on equity as the touchstone and assumes that if an independent investor would be happy with the corporation's returns, the shareholder/employee's salary is probably reasonable. "If the bulk of the corporation's earnings are being paid out in the form of compensation, so that the corporate profits, after payment of the compensation, do not represent a reasonable return on the shareholder's equity in the corporation, then an independent shareholder would probably not approve of the compensation arrangement. If, however, that is not the case and the company's earnings on equity remain at a level that would satisfy an independent investor, there is a strong indication that management is providing compensable services and that profits are not being siphoned out of the company disguised as salary."ⁿ⁶⁰ See *Elliott's, Inc v Commr*, 716 F2d 1241, 1247 (9th Cir 1983) .

The adoption of an "independent investor" test in *Elliot's Inc.* followed the court's rejection of an "automatic dividend rule," as it characterized the Court of Claims' approach in *McCandless Tile*. The court explained that a company's failure to pay dividends was a poor indicator of whether management's performance justified its compensation, because many investors, in public as well as closely held corporations, prefer that earnings be reinvested rather than distributed, particularly when alternative means of raising capital are impractical or unavailable.ⁿ⁶¹

The Court of Appeals for the Seventh Circuit places the heaviest emphasis on the happy investor test, holding that satisfaction of that test creates a rebuttable presumption of the reasonableness of shareholder/employee compensation.ⁿ⁶² Other courts of appeal that have adopted the test view it as simply another factor in the multifactor analysis, albeit one that "may be a substantial factor" in certain cases.ⁿ⁶³ The Court of Appeals for the Tenth Circuit is the only circuit thus far to reject the "independent investor" test in favor of exclusive reliance on the traditional multifactor analysis.ⁿ⁶⁴ The Tax Court, unless compelled by its *Golsen* rule to apply a contrary rule adopted by the circuit to which the case before it is appealable,ⁿ⁶⁵ employs a multifactor test viewed "through the lens of an independent investor."ⁿ⁶⁶

An issue that sometimes arises in reasonable compensation cases is whether a shareholder/employee's consistent practice of taking an annual bonus based on a formula, such as a percentage of pretax profits, points towards a disguised dividend or in favor of the reasonableness of such compensation. The Tax Court has argued that a shareholder/employee has no need for an incentive bonus plan because, as a shareholder in the company, there is already sufficient incentive to work hard.ⁿ⁶⁷ The Court of Appeals for the Ninth Circuit rejected that argument because it would prevent shareholder/employees of closely held corporations from working under the same type of incentive arrangements available to non-shareholder employees, a discriminatory result for which the Court could find no justification in the statute or Congressional intent.ⁿ⁶⁸ Moreover, as the Seventh Circuit's opinion in *Menard, Inc.* points out, the argument proves too much; it could justify treating all compensation paid to a controlling shareholder/employee as unnecessary and, therefore, unreasonable.ⁿ⁶⁹

Compensation paid pursuant to any longstanding, consistently applied compensation plan is evidence of reasonableness, but the issue ultimately depends on whether the formula itself is reasonable.ⁿ⁷⁰ The regulations provide that the reasonableness of the formula should be judged at the time the plan is adopted, "even though in the actual working out of the contract ... [compensation] may prove to be greater than the amount which would ordinarily be paid."ⁿ⁷¹ However, the Court of Appeals in *Elliotts, Inc.*, suggested that the operation of the formula be viewed on a long-term basis since "a formula which is reasonable at its inception may later become unreasonable because of changed circumstances."ⁿ⁷² Furthermore, consistent with its adoption of the "independent investor" test as a factor to be considered in the analysis of reasonableness, the Court of Appeals cautioned that the formula "should not stand in the way of a satisfactory return on equity."ⁿ⁷³

It is not uncommon for a closely held corporation to adopt by-laws or enter into agreements with its shareholder-managers which require the latter to return to the corporation any part of their compensation that the Internal Revenue Service determines to be "excessive" or "unreasonable."ⁿ⁷⁴ In *Oswald v Commr*,ⁿ⁷⁵ the Tax Court held, and the Internal Revenue Service subsequently agreed, that the shareholder-manager was entitled to deduct the amount returned to the corporation pursuant to the requirements of the by-law or agreement as an ordinary and

necessary expense under *IRC section 162*.ⁿ⁷⁶ The by-law or agreement does not create an "expectation of repayment" that would support a contention that the excessive compensation was not taxable when received, however; whether taxable as compensation or as a constructive dividend, the shareholder is deemed to have received money from the corporation under a "claim of right" which must be reported as income even though it is subsequently determined that it did not belong to him.ⁿ⁷⁷

[e] Payment of Personal Expenses of Shareholders. An expenditure by a corporation which benefits a shareholder need not be treated as a disguised dividend if the primary purpose of the expenditure is one related to the corporation's trade or business.ⁿ⁷⁸ When the emphasis shifts, and the payment is made primarily to benefit the shareholder, the probability of attack on the ground that the payment constitutes a disguised dividend becomes likely.ⁿ⁷⁹ In addition, the Government will couple this attack with a disallowance of any deduction by the corporation on the theory that the expenditure was not an ordinary and necessary expense of doing business. Thus, reimbursement to a shareholder for excessive entertainment expenses incurred for the primary benefit of the shareholder may be considered a disguised dividend distribution to the shareholder.ⁿ⁸⁰ The same result obtains if the corporation assumes the cost of purchasing and maintaining items such as cars and boats used solely by shareholders for their personal enjoyment and convenience.ⁿ⁸¹ The measure of the dividend in such cases will be the fair rental value of the item.ⁿ⁸²

A crucial factor in determining deductibility is whether the payment in question is one customarily incurred in doing business. For example, in *Tulia Feedlot v. United States*,ⁿ⁸³ shareholders were asked to guarantee a loan which would not have been made without the guarantee. For this, the shareholders demanded a fee equal to 3 percent of the loan. Without the fee, there would have been no guarantee. In reversing a lower court decision that the fee was a necessary expenditure reasonable in amount, the Fifth Circuit took the view that the payments looked suspiciously like dividends. Of importance was the failure on the part of the corporation to show that the fee was ordinary or that similar consideration would have been paid to nonshareholders.

A singular problem is the difficulty in distinguishing between an expense which is primarily made for the benefit of the corporation, but which incidentally benefits the shareholder, and one made primarily to benefit the shareholder. For example, a corporation's payment to a third party in settlement of a claim against a shareholder may not produce dividend income if the corporation was also a party to the proceeding in which the claim was asserted and the settlement relieved the corporation of liability.ⁿ⁸⁴ However, if the only person who could have been liable is the stockholder, payment of the claim will put him in receipt of a constructive dividend.ⁿ⁸⁵ In like fashion, dividend consequences will ensue if the corporation satisfies a contractual obligation of a shareholder,ⁿ⁸⁶ although such will not be the result if the corporation is the primary obligor and the shareholder merely secondarily liable.ⁿ⁸⁷

The Service will not issue rulings regarding the determination of earnings and profits. *Rev Proc 2007-3*, 2007-1 CB 108 .

A corporation adopted a plan that provided the shareholders with "poison pill" rights. The purpose of the plan was to establish a mechanism by which the corporation could provide shareholders with rights to purchase stock at substantially less than fair market value as a means of responding to unsolicited offers to acquire the corporation.

Although adoption of the plan constituted the distribution of a dividend under state law, it was not a distribution of stock or property giving rise to the realization of gross income by any taxpayer. *Rev Rul 90-11, 1990-1 CB 10* .

(n45)Footnote 1. A discussion of personal holding companies is contained in 3 Rabkin & Johnson, *Federal Income, Gift and Estate Taxation*, Ch 17 (Matthew Bender).

(n46)Footnote 2. IRC § 316(b)(2)(A)(ii).

(n47)Footnote 3. *Treas Reg § 1.316-1(d)*, Ex (2).

(n48)Footnote 4. IRC § 316(b)(2)(B). The notification requirement is satisfied if the corporation claims a dividends paid deduction in the amount of the designated dividend in its return for the year in which, or in respect of which, the distribution is made, and includes such amount in Form 1099 and in a written statement of dividends paid furnished to the shareholder. *Treas Reg § 1.316-1(b)(5)*.

(n49)Footnote 5. IRC § 316(b)(2)(B)(iii); *Treas Reg § 1.316-1(b)(3)*, (d), Ex (5). If there is more than one

distribution in the year, or more than one class of stock, the amount of dividend in each distribution or allocable to each class of stock must be figured separately.

(n50)Footnote 1. *US v Smith*, 418 F2d 589, 593 (5th Cir 1969) ; Rabkin & Johnson, 3 *Federal Income, Estate and Gift Taxation*, § 21.07 (Matthew Bender); Comment, "Disguised Dividends: A Comprehensive Survey," 3 *UCLA L Rev* 207 (1956). The ensuing discussion assumes the presence of earnings and profits, for without them, there can be no disguised dividend. Although the absence of earnings and profits will prevent the distribution from being cast as a dividend, it still must be treated as a corporate distribution. *BB Rider Corp v Commr*, TC Memo 1982-98 (1982) , *aff'd* 725 F2d 945 (3d Cir 1984) .

A corporation's cancellation of a shareholder's debt without consideration can be treated as a distribution to the shareholder, that, in turn can be treated as a dividend to the extent of the corporation's earnings and profits. *Burke v Commr*, TC Memo 1997-237 , *aff'd by unpublished order* 176 F3d 488 (10th Cir 1999) .

A taxpayer's total control over a corporation and use of corporate funds for personal reasons can result in constructive dividends, even though the taxpayer does not hold legal title to the corporation's stock at the time of the advances. See *eg*, *Yelencsics v Commr*, 74 TC 1513 (1980) ; *Cordes v Commr*, TC Memo 1994-377 .

(n51)Footnote 2. *IRC § 301(a)* provides that only distributions made by a corporation with respect to its shareholders' stock are taxable as dividends. Thus, *IRC § 301* does not apply to amounts paid by a corporation to a shareholder acting in some other capacity. *Treas Reg § 1.301-1(c)*. The shareholder may be taxable on the payment under a Code section other than *IRC § 301*--under *IRC § 61*, for example, if the corporate payment represents compensation for his services--but since the payment will often be deductible by the corporation as a business expense, the desired goal of avoiding double taxation of corporate earnings will have been achieved.

(n52)Footnote 3. Once a common issue in IRS audits, the number of tax disputes involving "disguised dividends" appears to have diminished substantially in recent years. If true, it may be because taxpayers are increasingly avoiding the double taxation dilemma, within the letter and spirit of the law, by using "pass-through" entities such as S corporations and limited liability companies taxed as partnerships, rather than "C corporations" the formerly preferred investment vehicle for closely held businesses. See Chapters 14 and 15, *infra*. The Congressional Research Service reported that, according to IRS data, the number of businesses taxed as partnerships grew 38 percent between 1983 and 2006, with most of the growth being attributed to LLCs. "CRS Report Says Most US Businesses Likely Taxed at Individual Rates," 2009 *TNT* 154-24 (Aug 13, 2009).

The taxation of qualifying dividends from C corporations at capital gain rather than ordinary income tax rates beginning in 2004 has also diluted the incentive to employ disguised dividend schemes.

(n53)Footnote 4. Section 316(a) defines a dividend as any distribution of property by a corporation to its shareholders made out of post-1913 earnings and profits or earnings and profits of the taxable year. It further provides that all corporate distributions of property are deemed made out of the corporation's earnings and profits, (starting with the most current) to the extent thereof. See § 4.02[1].

(n54)Footnote 5. *Crosby v US*, 496 F2d 1384, 1388 (5th Cir 1974) ; *US v Smith*, 418 F2d 589, 593 (5th Cir 1969) ; *Gibbs v Tomlinson*, 362 F2d 394, 397 (5th Cir 1966) . It must be remembered that a constructive distribution of property is only a constructive dividend if the corporation has sufficient earnings and profits to cover the distribution. See § 4.02[1], above. The tax consequences to the shareholder of a constructive distribution without earnings and profits may well approximate those of a constructive dividend, however. The economic benefit received by the shareholder in the transaction would still be considered a distribution of corporate property with respect to the shareholder's stock, and the value of the benefit received by the taxpayer in excess of the taxpayer's basis in the stock would be taxed as gain on a sale or exchange of the stock. See *IRC § 301(c)*, discussed in § 4.03[3] below. Currently, such gain would be taxable at the same capital gains rates that would have applied to a constructive dividend. See *IRC §*

1(h)(11).

(n55)Footnote 6. *Crosby v US*, 496 F2d at 1388 .

(n56)Footnote 7. *IRC § 317* parenthetically provides a few non-exclusive examples of property: "money, securities, and indebtedness to the corporation." The term "securities" here does not include the distributing corporation's own stock or rights to acquire its stock. *IRC § 317, supra*. For the tax treatment of distributions of stock dividends and stock rights, see § 4.06 below.

(n57)Footnote 8. *Loftin and Woodard, Inc v US*, 577 F2d 1206, 1214 (5th Cir 1978) .

(n58)Footnote 9. *Baumer v US*, 580 F2d 863, 881 (5th Cir 1978) . See also *Redding v Commr*, 630 F2d 1169, 1181-1184 (7th Cir 1980) , *cert denied* 450 US 913 (1981) ; *Weigl v Commr*, 84 TC 1192, 1221-1223 (1985) ; *Rev Rul 80-292*, 1980-2 CB 104 ; *Rev Rul 70-521*, 1970-2 CB 72 .

In *Palmer v Commr*, 302 US 63, 71 (1937) , a case decided under the Revenue Act of 1928, the US Supreme Court said, in dictum, that "the mere issue of rights to subscribe [to the purchase of corporate property] and their receipt by stockholders, is not a dividend. No distribution of corporate assets or diminution of the net worth of the corporation results in any practical sense." The cases and rulings cited above concluded that the addition of *IRC § 317* to the Internal Revenue Code significantly changed the statutory framework and justified disregarding this dictum in *Palmer*. Under the Internal Revenue Code as currently written, the distribution of an option to acquire corporate property can be considered a dividend (assuming sufficient earnings and profits) because an option comes within the Code's broad definition of "property." Moreover, as the Court of Appeals stated in *Baumer*, "Any determination of whether the grant of an option to purchase property constitutes a distribution of valuable rights must consider not only the "spread" between the exercise price of the option and the fair market value of the underlying property, but also the length of time during which the rights can be exercised and the potential for appreciation during that period. *Baumer v US*, 580 F2d at 879 (n. 23). Thus, even an option to purchase corporate property at its fair value at the time the option is issued may be a taxable dividend if the purchase rights are exercisable over a substantial period of time (which was not the case in *Palmer*) and there is a reasonable expectation of appreciation in the value of the property during that period. *Id*.

(n59)Footnote 10. See *Honigman v Commr*, 466 F2d 69 (6th Cir 1972) (transfer of corporate property which shareholder caused to be sold for less than fair market value to a second corporation organized by the shareholder's wife resulted in a constructive dividend to the shareholder).

(n60)Footnote 11. *Hardin v US*, 461 F2d 865, 872 (5th Cir 1972) (corporate payments to shareholder's sister-in-law "to satisfy what Taxpayer obviously felt to be a personal or moral responsibility for his sister-in-law's welfare"); *Baumer v US*, 580 F2d at 883 (gratuitous transfer of valuable option to purchase corporate property to shareholder's adult son "to satisfy the moral obligation of Father to compensate Son for taking advantage of a business opportunity Father had personally discouraged Son from pursuing").

(n61)Footnote 12. See *Green v US*, 460 F2d 412 (5th Cir 1972) (corporate property acquired at bargain price by shareholder's adult and minor children was a constructive dividend to their father); *Sammons v Commr*, 472 F2d 449 (5th Cir 1972) (transfer of corporate property between corporations within affiliated group that allowed controlling shareholder to collect otherwise uncollectible debt from the transferee was a constructive dividend to shareholder); *Kuper v Commr*, 533 F2d 152 (5th Cir 1976) (transfer of corporate funds from one brother-sister corporation to another that facilitated an exchange of stock between the shareholders was a constructive dividend to the shareholders).

Whether a shareholder has sufficient stock ownership to permit the exercise of "substantial influence" is a factual matter which precludes any "bright line" rule, though clearly in some circumstances such influence can be exercised even by a shareholder with less than majority ownership. *Green v US*, 460 F2d at 421 . The shareholder in *Green* was found to have exercised substantial influence over the corporation despite owning less than 8 percent of its stock. He

was the corporation's president as well as a director who presided over board meetings, but, "most important of all," the Court could find no other plausible explanation for why the corporation would confer an economic benefit upon non-shareholders "who were strangers to the company save for their connection to it through their mother and father." *Id.* "[W]here a corporation consummates a transaction with favorable consequences for a controlling shareholder's immediate family, 'only in the most extraordinary circumstances' would it be possible to conclude that the shareholder had not exercised 'substantial influence' in causing a diversion of corporate assets, thereby justifying constructive dividend treatment."

In *Commr v Riss*, 374 F2d 161, 167-169 (8th Cir 1967), on the other hand, the Court refused to charge a minority shareholder with a constructive dividend even though his former spouse enjoyed the use of a corporate-owned residence. As the result of a property settlement the shareholder had no legal obligation to provide his ex-wife with a home or support, and though he was chairman of the board of the family corporation, a majority of its stock was owned by his adult children who had, perhaps, greater reason for allowing the corporation to make the house available to their mother, and who themselves used the house as a residence for part of the period in issue.

The Court noted in *Riss* that the family corporation's claimed deductions for depreciation and maintenance expenses with respect to the ex-wife's residence had been disallowed by the Internal Revenue Service and that the disallowance was upheld by the Tax Court, a decision from which the corporation did not appeal. However, the Court observed that "the fact that such items were disallowed as a corporate business expense does not in itself establish that an economic benefit flows to a shareholder." 374 F2d at 169. See also *Palo Alto Town & Country Village, Inc v Commr*, 565 F2d 1388, 1391 (9th Cir 1977).

(n62)Footnote 13. *Green v US*, 460 F2d at 419. See also *Honigman v Commr*, 466 F2d at 74; *Hardin v US*, 461 F2d at 872; *Commr v Riss*, 374 F2d at 169. As noted below, § 4.05[2][b], *infra*, the general rule regarding the assignment of dividend income, whether or not the shareholder owns a controlling interest in the corporation, is that dividends are always taxable to the beneficial owner of the stock.

(n63)Footnote 14. See *Hagaman v Commr*, 958 F2d 684, 691 (6th Cir 1992). In *Rountree Cotton Co v Commr*, 113 TC 422 (1999), *aff'd per curiam* by unpublished opinion, 2001 US App LEXIS 5258 (10th Cir 2001), interest-free loans were made by a closely held corporation to a borrower entity owned in part by the lender's shareholders and in part by non-shareholders, all of whom were members of the immediate families of the lender's shareholders. The issue was whether these "below market" loans were made "directly or indirectly" between the corporation and its shareholders within the meaning of IRC § 7872(c)(1)(C), despite the fact that the borrowing entity was owned in part by non-shareholder family members. See § 4.02[3][b], notes 47 and 48, *infra*, and accompanying text. The Tax Court analyzed the transaction as though the corporation first made a "below-market" loan solely to its shareholders, on which imputed interest was deemed distributed to the shareholders and then repaid to the corporation as interest in accordance with the provisions of IRC § 7872. The shareholders were then deemed to have re-loaned a portion of the borrowed funds to the family member-owners of the borrower in accordance with their interests in the entity that had actually borrowed the funds. The result is comparable to constructive dividend cases like *Hardin* and *Green*; indeed, the Tax Court justified the result with language that could have been lifted from a constructive dividend case. "To the extent that ... family members who were not shareholders received some benefit from the below-market loans, they did so only because the lender's shareholders (who were also ... family members) made the decision or choice that they so benefit." 113 TC at 436.

(n64)Footnote 15. See, eg, *Sammons v Commr*, 472 F2d at 453; *Mills v Commr*, 840 F2d 229, 235 (4th Cir 1988).

(n65)Footnote 16. See *Sammons v Commr*, 472 F2d at 453. In the context of transfers of property between vertically integrated corporations, the Fifth Circuit observed, the shareholder has "no more control over or right to the money [after a gratuitous transfer from parent to subsidiary] than he did before the transfer occurred," nor does the parent "relinquish its interest in the transferred funds ... though its control over them may be attenuated ... Only when

[the transferor's] funds are diverted from the lineal chain of ownership, either to the shareholder himself or to a collaterally owned chain of corporations, does his right to the funds have a source independent of his direct or indirect ownership of the stock of the distributing corporation, and only then has the [parent] corporation relinquished control of the funds."

Dictum in *Sammons* suggests that gratuitous transfers between brother-sister corporations are different, and require the application of a business purpose test to distinguish "between the normal business transactions of [the] related corporations and those transactions designed primarily to benefit the stockowner." 472 F2d at 451. As a practical matter, however, the analysis is not appreciably different in either case. Courts do not regard a gratuitous transfer of property between commonly controlled corporations as necessarily conferring an economic benefit on the common shareholder and will refuse to infer such a benefit absent a showing that the shareholder benefitted personally from the transfer. See *Joseph Lupowitz Sons, Inc v Commr*, 497 F2d 862, 868 (3d Cir 1974) (interest-free loans made from one brother-sister corporation to another did not personally benefit their common shareholders and the loans were therefore not constructive dividends; "absence of a specific business purpose in making the transfers... does not mandate a different result."). See also *Mills v Commr*, 840 F2d 229, 235 (4th Cir 1988) ("Any transfer that benefits a corporation can be said indirectly to benefit the corporation's shareholders, but it is not a constructive dividend unless it benefits the shareholder in some direct way quite apart from his strictly derivative interest as a shareholder.")

The courts' attitude towards the constructive dividend implications of brother-sister property transfers is illustrated by the Tax Court's decision in *White Tool and Machine Co v Commr*, 41 TCM 116, TC Memo 1980-443, 1980 Tax Ct Memo LEXIS 145. In that case, one of the shareholders' controlled corporations paid excessive rentals for leased property to other commonly controlled "brother-sister" corporations. The Internal Revenue Service disallowed the rent deduction claimed by the payor corporation to the extent it exceeded an arm's length rental determined under IRC § 482 and, in addition, charged the common shareholders with constructive dividends equal to the excessive rentals paid to the brother-sister recipients. The Tax Court upheld the Service's § 482 adjustment but rejected constructive dividend treatment for the shareholders because they had neither received nor made personal use of the transferred funds. The Tax Court acknowledged that the controlled group had (temporarily) realized tax savings as a result of the payor corporation's deduction of the excessive rentals at no tax cost to the transferees, which had losses with which to offset the excessive rental income, but refused to treat this as a personal benefit to the group's shareholders. In the first place the Service's § 482 adjustment had eliminated the benefit; moreover, any net increase in the value of the shareholders' stock as a result of the temporary increase in their corporations' after-tax income was a "derivative" and not a personal benefit. See also *R T French Co v Commr*, 60 TC 836, 854-856 (1973).

(n66)Footnote 17. See *McLemore v Commr*, TC Memo 1973-59, 1973 Tax Ct Memo LEXIS 228, 32 TCM 259, aff'd 494 F2d 1350 (6th Cir 1974).

(n67)Footnote 18. This follows from the general rule that when a corporation distributes property in kind as a dividend to its stockholders, whether legally declared or constructively paid, the amount of the distribution taken into account by the recipient is the fair market value of the property, not the corporation's adjusted basis in the property. IRC § 301(b)(1); See § 4.03[1], *infra*.

(n68)Footnote 19. *Loftin & Woodard, Inc v US*, 577 F2d at 1219-1223; *Ireland v US*, 621 F2d 731 (5th Cir 1980). What it costs the corporation to provide a service to a shareholder may be used as a surrogate for the fair market value of the service only if fair value is not otherwise ascertainable. "The equation of value with costs is, therefore, not the norm but the exception." *Loftin & Woodard, Inc v US*, 577 F2d at 1223. As *Loftin & Woodard, Inc* demonstrates, the data necessary to establish the cost of providing a service to the shareholder may be more readily to hand than evidence of fair market value but its determination may be no less controversial, particularly if the corporation is performing a custom service. For example, should "cost" be limited to out-of-pocket costs or include an allocation of the corporation's fixed expenses, and how should direct costs benefitting several-9 jobs should be apportioned to services performed for the shareholder.

(n69)Footnote 20. See, eg, *Mills v Commr*, 840 F2d 229, 235 (4th Cir 1988) ; and *Rushing v Commr*, 52 TC 888 (1969) , *aff'd on other grounds*, 441 F2d 593 (5th Cir 1071) . In both cases, the court refused to find that interest-free advances from one brother-sister corporation to another were constructive dividends to their common stockholder because the corporation making the advances was serving a substantial business interest of its own in assuring the success of the transferee's business. See also *Sammons v Commr*, 472 F2d at 451 , in which the Court of Appeals observed that, where property is transferred between brother-sister corporations, the business purpose test serves to distinguish "between the normal business transactions of [the] related corporations and those transactions designed primarily to benefit the stockowner." The business purpose test is not limited to transfers within a related group of corporations, however; many if not most constructive dividend cases turn on the issue of whether an expenditure or transfer made directly to a shareholder is justified by a corporate business purpose. See § 4.02[3][e], *infra*.

(n70)Footnote 21. See *Mills v Commr*, 840 F2d at 235 : "When there is no evasion of corporate income tax and the only benefit to the shareholder is indirect or derivative, transfers between closely related corporations are not constructive dividends to the common shareholder.

(n71)Footnote 22. Congress has imposed special substantiation and other requirements as conditions to the deductibility of these expenses because the personal consumption element makes them particularly subject to abuse, whether the benefit is enjoyed by shareholder-managers or non-shareholder employees. See *IRC §§ 274, 280F*. However, a corporation's failure to meet these additional Code requirements does not mean that the expense was not incurred for a proper corporate purpose, and accordingly disallowance of a deduction to the corporation under these provisions neither requires nor supports a constructive dividend to the shareholder. *Ashby v Commr*, 50 TC 409, 418 (1968) . Neither, of course, does such a disallowance prevent the Internal Revenue Service from imputing a constructive dividend to the shareholder if in fact the expenditure was made primarily for the shareholder's benefit. See *Nichols, North, Buse Co v Commr*, 56 TC 1225, 1238-1239 (1971) , *acq*, 1972-1 CB 1 .

(n72)Footnote 23. *Sammons v Commr*, 472 F2d at 452 (emphasis in original).

(n73)Footnote 24. In *Kuper v Commr*, 533 F2d at 162 , the court of appeals agreed with the Tax Court that the transfer of funds from one of the shareholders' commonly controlled corporations to another was motivated by the "primary corporate goal" of removing one of the shareholders from the ownership and management of the transferor corporation, thereby avoiding continuing managerial friction among the shareholders. But, the Court said, "it is not the ultimate motivating factor which is in question but rather the intent behind the specific route by which the larger purpose was accomplished." 533 F2d at 162 . The remaining shareholders could have accomplished the corporate purpose by having the transferor corporation pay them a cash dividend for use as "boot" in their stock-for-stock exchange to equalize the values of the transferor's stock they received with the value of the transferee's stock given up by the departing shareholder in the exchange. Instead, they chose to accomplish the equalization by having the transferor corporation make a gratuitous transfer of funds to the transferee, a route which personally benefitted the shareholders by enabling them to exchange stocks of equal value without having to come up with additional cash to compensate for the pre-transfer difference in stock values, but which, as compared with the dividend route, served no business purpose of the transferor corporation.

(n74)Footnote 25. *Sammons v Commr*, 472 F2d at 452 .

(n75)Footnote 26. *Sammons v Commr*, 472 F2d at 451 . At the same time, the Court noted that "the search for intent or purpose is not ordinarily prerequisite to discovery of a dividend." *Id*.

(n76)Footnote 27. *Kuper v Commr*, 533 F2d at 160 (emphasis in original).

(n77)Footnote 28. 580 F2d at 876 .

(n78)Footnote 29. See *Cox Enterprises Inc & Subsidiaries v Commr*, 97 TCM 1767, TC Memo 2009-134, 2009 Tax Ct Memo LEXIS 134 (2009) , in which subjective intent was not only taken into account but trumped a significant

economic benefit resulting from a corporation's transfer of property for a consideration concededly well below the property's fair market value to a partnership composed of the beneficiaries of trusts that owned the corporation. The taxpayer was a closely held corporation owned by three trusts of which the trustees were two sisters and the beneficiaries were the sisters (holders of life estates) and their children (the remaindermen). The corporation's subsidiary transferred a going business, a television station, to a partnership in which the subsidiary owned a 51 percent interest; the trust beneficiaries directly or indirectly owned the remaining 49 percent. The taxpayer corporation *conceded* for purposes of its motion for summary judgment that the fair market value of the television station assets transferred to the partnership exceeded the value of the 51 percent partnership interest the corporation received in exchange by \$60.5 million. Treating this *ipso facto* enhancement in the value of the trust beneficiaries' minority interests in the partnership as a distribution with respect to the subsidiary's stock, and ultimately a constructive dividend to the taxpayer's stockholders, the Internal Revenue Service contended that as a corollary of this determination the distributing corporation was taxable under *IRC § 311(b)* on the appreciation (excess of fair market value over basis) of the assets deemed distributed.

The Tax Court held that no constructive dividend, and therefore no corporate distribution of appreciated property taxable under *IRC § 311(b)*, took place because none of the parties intended the transaction to confer an economic benefit on the taxpayer's shareholders. The corporation had been advised by management consultants to reduce its investment in the broadcasting business but efforts to find a third party buyer for the television station had been unsuccessful. By transferring the TV station to the partnership, the taxpayer could at least partially achieve its disinvestment goal while serving another important if somewhat inconsistent corporate objective: demonstrating to its remaining broadcast employees that it continued to be committed to the broadcasting business. Most important, however, was the "undisputed" fact that the conceded discrepancy between the value of the station assets transferred to the partnership and the value of the partnership interest the taxpayer received in exchange had been wholly "unintentional," occurring despite rather than as a result of the parties' wishes. *TC Memo 2009-134* (Slip Op, p 40). The parties made good faith efforts to determine an arm's length price for the station assets by engaging an outside accounting firm to make an appraisal and even increasing the assets' valuation as recommended by a second appraiser after errors were discovered in the first appraisal. The parties' benign intent was inconsistent with, and therefore precluded, a constructive dividend, notwithstanding that, as a matter of actual economic fact, the family wealth of the shareholder trusts' beneficiaries had been enhanced, and the corporation's net worth diminished, by over \$60 million.

The Tax Court also concluded that the admitted inadequacy of the consideration received by the corporation did not benefit the shareholder trusts but rather was inimical to their interests. A transfer that effectively diverted corporate assets to the trust's beneficiaries prior to the time they were scheduled to receive distributions of the trust corpus was necessarily contrary to the wishes of the grantor of the trusts, the deceased father of the two sisters. *Cox Enterprises Inc & Subsidiaries v Commr, TC Memo 2009-134*, (Slip Op pp 40-46) .

Cf. *Lamble v Commr, TC Memo 1967-185*, 1967 *Tax Ct Memo LEXIS 76*, 26 *TCM* 912 , another case in which the Commissioner asserted that the allegedly non-arm's price paid for a going business resulted in a constructive dividend, even though good faith efforts (including an outside appraisal) had been made to arrive at a fair, arm's length price for the business. In *Lamble*, however, not being bound by the taxpayer's concession to the contrary, the Tax Court found that the price paid for the business was in fact its fair market value, and so avoided the difficult issue that confronted the Court in *Cox Enterprises*.

See also Field Service Advice Memoranda [sic] of November 10, 1998, *FSA LEXIS 571*. This FSA, despite the redactions made by the Internal Revenue Service, was obviously prepared in connection with the audit of Cox Enterprises that resulted in the Tax Court litigation. Interestingly, the author of the FSA concluded that "when a transaction is bona fide and conducted in an arm's length manner, the ultimate objective of the constructive dividend theory has been obtained and the courts need not determine independently the value of the property transferred." (FSA, p. 42).

(n86)Footnote 37. *Monon Railroad v Commr*, 55 TC 345, 356 (1970) , *acq*, 1973-2 CB 3 , citing, *inter alia*, *John Kelley Co v Commr*, 326 US 521, 530 (1946) .

(n87)Footnote 38. *Regensburg v Commr*, 144 F2d 41 (2d Cir 1944) , *cert denied*, 323 US 783 ; *Spheeris v Commr*, 284 F2d 928 (7th Cir 1960) , *cert denied* 366 US 944 . In addition to the fact that the advances in *Regensberg* were treated as receivables on the corporation's books, they were made to the four principal stockholders of the corporation, all brothers, in amounts that differed significantly from their respective percentage interests in the corporation's stock, while other shareholders apparently received no advances at all. The Court of Appeals conceded that such inequality of economic benefits among shareholders was an "extraordinary feature" of a disguised dividend scheme, but even taken together with the corporation's treatment of the advances as debts on its books it did not prevent the trial judge from concluding (as he did) that the advances were in substance constructive dividends, largely on the basis that the advances had been allowed to accumulate over a 40 year period to a "staggering total" that exceeded the value of the borrowing shareholders' stock. *Regensberg v Commr*, 144 F2d at 44 .

(n88)Footnote 39. *Page v Haverty*, 129 F2d 512 (5th Cir 1942) (note existed, loan found); *Spheeris v Commr*, 284 F2d 928 (7th Cir 1960) , *cert denied* 366 US 944 (no note, held a dividend). The presence or absence of a note can be outweighed by other factors. See *Meyer v Commr*, 45 BTA 228 (1941) , *acq*, 1942-1 CB 12 , and *White v Commr*, 17 TC 1562 (1952) , *acq*, 1952-2 CB 3 . In *Est of Taschler v US*, 440 F2d 72 (3d Cir 1971) , the deduction of interest from the taxpayer's salary did not convert a withdrawal into a loan. The taxpayer was in complete control of the corporation and, thus, had complete control over the amount of his salary.

(n89)Footnote 40. *White v Commr*, 17 TC 1562 (1952) , *acq*, 1952-2 CB 1 . Filing a claim against the estate of deceased stockholder did not prevent the court from finding the existence of a constructive dividend in *Regensburg v Commr*, 144 F2d at 44 .

(n107)Footnote 58. 422 F2d at 1339 .

(n108)Footnote 59. *Mayson Mfg Co v Commr*, 178 F2d 115, 119 (6th Cir 1949) Among the many cases that have employed these or similar factors are: *Haffner's Service Stations, Inc v Commr*, 326 F3d 1 (1st Cir 2003) ; *Eberl's Claim Service, Inc v Commr*, 249 F3d 994 (10th Cir 2001) ; *LabelGraphics Inc v Commr*, 221 F3d 1091 (9th Cir 2000) ; *Alpha Medical, Inc v Commr*, 172 F3d 942 (6th Cir 1999) ; and *Rutter v Commr*, 853 F2d 1267 (5th Cir 1988) . But see *Menard, Inc v Commr*, 560 F3d at 622-623 , where the Court of Appeals for the Seventh Circuit (Posner, J.) after collecting the cases, criticized the multifactor analysis as unduly subjective and unpredictable. "Multifactor tests with no weight assigned to any factor are bad enough...; multifactor tests when none of the factors is concrete are worse, and that is the character of most of the multifactor tests of excessive compensation." As Judge Posner had previously complained in *Exacto Spring Corp v Commr*, 196 F3d 833 (7th Cir 1999) : "[T]he ... [multifactor] test invites the Tax Court to set itself up as a superpersonnel department for closely held corporations ... The test ... invites the court to decide what the taxpayer's employees *should* be paid on the basis of the judges' own ideas of what jobs are comparable, what relation an employee's salary should bear to the corporation's net earnings, what types of business should pay abnormally high (or low) salaries, and so forth. The judges of the Tax Court are not equipped by training or experience to determine the salaries of corporate officers; no judges are." 196 F3d at 835 (emphasis in original).

(n109)Footnote 60. See *Elliott's, Inc v Commr*, 716 F2d 1241, 1247 (9th Cir 1983) .

(n110)Footnote 61. While that may be true, it will be recalled that the Court of Claims in *McCandless* also used return on equity to determine the amount of shareholder/employee compensation that it deemed unreasonable. The difference between *Elliott's Inc* and *McCandless* is perhaps not so great as it might appear.

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.03

§ 4.03 The Individual Shareholder

[1] Amount of the Distribution.

A necessary element in the determination of the amount of dividend income received by a shareholder is the prior determination of the amount of the distribution itself. This amount is set at the amount of money received, plus the fair market value (determined as of the date of distribution) of any other property received.ⁿ¹ Reduction in the amount of the distribution is called for whenever a liability of the corporation is assumed by the shareholder in connection with the distribution, or if the shareholder receives property which is subject to a liability immediately before and immediately after the distribution.ⁿ² The extent of reduction is the amount of liability assumed or acquired. However, in no event can the amount of the distribution be reduced below zero.ⁿ³

The regulations provide that the shareholders include the distribution in gross income when the cash or other property is unqualifiedly made subject to their demands.ⁿ⁴ However, if a dividend is declared payable on December 31, and the corporation follows its usual practice of paying the dividend by checks mailed so that the shareholders would not be received until January of the following year, the dividend is not considered to have been constructively received in December.ⁿ⁵

[2] Amount Treated as a Dividend.

The portion of the distribution constituting a dividend will depend on the extent to which the corporation has earnings and profits available as a source of distribution.ⁿ¹ If the earnings and profits exceed the amounts distributed to all shareholders, then obviously the entire distribution qualifies as a dividend. If the distribution exceeds the available earnings and profits, then each shareholder need treat the distribution as a dividend only to the extent of his allocable share of earnings and profits.

[3] Treatment of Distributions in Excess of the Amount Considered a Dividend.

The portion of a distribution which exceeds the amount treated as a dividend is applied against, and in reduction of, the adjusted basis of the shareholder's stock.ⁿ¹ If the distribution is of such magnitude that it exceeds even the basis for the stock, the amount by which the distribution exceeds both the amount of the dividend and the adjusted basis of the stock is considered gain from the sale or exchange of property.ⁿ² Whether the gain is capital or ordinary will turn on the character of the stock in the hands of the shareholder; *IRC Section 301(c)(3)(A)* merely provides the sale or exchange

requirement.

For example, assume a shareholder receives a distribution of \$1,000, \$300 of which is treated as dividend by reason of *IRC Sections 301(c)(1) and 316*. If we assume further that the adjusted basis of the stock is \$500, then the first \$500 of the portion of the distribution which is not a dividend (\$700) will reduce the shareholder's basis to zero. The remaining \$200 will be considered gain from the sale or exchange of the stock. Had the shareholder's basis prior to the distribution been greater than \$700, the entire excess distribution would have been applied against, and in reduction of, the basis of the stock.

An additional consideration is presented when the shares with respect to which the distribution is made were purchased at different times or for different prices. For example, assume that the shareholder in the last example held 200 shares, 150 of which were purchased in 1960 at a cost of \$150, and the balance in 1970 at a cost of \$350. The dividend income would still be \$300, the extent of the corporation's earnings and profits. But the amount of gain increases to \$375. This result flows from a rule which requires that there be allocated to each block of stock the proportion of the distribution that the number of shares in that block bears to the number of shares outstanding.³ Thus, we find:

	Allocated to 150 share block	Allocated to 50 share block
Amount received	\$750	\$250
Amount treated as a dividend	225	75
Balance of distribution	525	175
Basis	150	350
Gain	\$375	\$-0-

[4] Basis of Property Distributed in Kind.

A noncorporate distributee receiving a distribution of property in kind generally assumes a basis for such property equal to its fair market value.¹ Such basis is not affected by a reduction in the amount distributed resulting from the distributee's assumption of a liability or receipt of property subject to a liability. Nor is it in any way dependent on the tax consequences attaching to the distribution. The general rule applies whether the distribution is treated as a dividend or not.

FOOTNOTES:

(n1)Footnote 1. See *IRC §§ 301(b)(1), 301(b)(3)*. *IRC § 317(a)* defines "property" as money, securities or any other property, but not stock or rights to acquire stock of the distributing corporation. The date of distribution is the date of payment, not the date of declaration. *Rev Rul 62-131, 1962-2 CB 94*.

A distribution by a subsidiary to its parent of indebtedness of the parent is a distribution of property in an amount equal to the fair market value of the indebtedness. *Rev Rul 2004-79, 2004-2 CB 106*.

1-4 Taxation of Securities Transactions § 4.03

The value of stock of a subsidiary corporation that is distributed to shareholders of the parent corporation and can only be sold with stock of the distributing corporation ("paired" or "stapled" stock) presents special valuation problems. *Rev Rul 80-213, 1980-2 CB 101*, contains relevant factors to be considered in valuing the stock.

(n2)Footnote 2. *IRC § 301(b)(2)*. For distributions occurring after Jan 4, 2001, no reduction can be made for the amount of any liability unless the liability is assumed by the shareholder within the meaning of *IRC § 357(d)(1)* and (2) (discussed in § 3.02[2][a][ii]). *Treas Reg § 1.301-1(g)(1)*. The reduction cannot reduce the amount of the distribution below zero. *Treas Reg § 1.301-1(g)(2)*.

A shareholder in a C corporation cannot reduce the amount of gain by the basis of the shareholder in a debt owed by the corporation. *Spera v Commr, TC Memo 1998-299*.

(n3)Footnote 3. *IRC § 301(b)(2)*.

(n4)Footnote 4. *Treas Reg §§ 1.301-1(b), 1.451-2(b)*.

(n5)Footnote 5. *Treas Reg § 1.451-2(b)*.

(n6)Footnote 1. See § 4.02[1], *supra*, for the manner in which earnings and profits are allocated to distributions made during the taxable year.

Resolving a conflict among the Courts of Appeal, the US Supreme Court held in *Boulware v US, 552 US 421 (2008)* that a criminal defendant who diverts funds from a corporation in which he owns a significant stock interest cannot be guilty of tax evasion under *IRC § 7201* if the funds were distributed with respect to his stock, the corporation did not have earnings and profits in the year the funds were diverted, and the amount diverted did not exceed the defendant's basis in the corporation's stock. The Court of Appeals for the Ninth Circuit, relying on its earlier decision in *US v Miller, 545 F2d 1204, 1215 (9th Cir 1976)*, had held that in order to rely on the defense that the diversion represented a return of capital, the defendant had to show that the diverted funds were intended as a return of defendant's investment in the corporation's stock. The Supreme Court found no such requirement in *IRC §§ 301* and *316*, which provide a purely objective test for determining whether a distribution with respect to stock is a nontaxable return of capital. Holding that the Government must prove the existence of a tax deficiency as an essential element of the crime of tax evasion under *IRC § 7201*, the Court said that the rules for determining whether a tax deficiency exists are no different in criminal or civil tax cases. On remand, however, the Court of Appeals upheld defendant's conviction on the ground that defendant's offer of proof at trial that the funds diverted represented a nontaxable return of capital was inadequate on grounds other than failure to prove intent (for example, defendant failed to offer evidence showing that the diverted funds represented a distribution with respect to his stock in the first instance, a showing that "at the very least" requires either "evidence of nexus between the corporate distribution and stock ownership," or a showing "that there were no other alternative explanations.") *US v Boulware, 558 F3d 971, 977 (9th Cir 2009)*.

(n7)Footnote 1. *IRC § 301(c)(2)*. If a transaction governed by *IRC § 304(a)(1)* (acquisition of stock by a related corporation other than a subsidiary) is treated as a dividend, the transferor of the stock is deemed to have contributed the acquired stock to the capital of the acquiring corporation. The increase in the transferor's basis in the stock of the acquired corporation occurs before the deemed distribution takes place. *TAM 9748003*.

(n8)Footnote 2. *IRC § 301(c)(3)(A)*. To the extent that the excess is out of an increase in value accrued before March 1, 1913, it is exempt from tax. *IRC § 301(c)(3)(B)*.

A shareholder in a C corporation cannot reduce the amount of gain by the basis of the shareholder in a debt owed by the corporation. *Spera v Commr, TC Memo 1998-299*.

(n9)Footnote 3. *Johnson v US, 435 F2d 1257 (4th Cir 1971)*.

(n10)Footnote 1. *IRC § 301(d)*. An increase in the conversion ratio of convertible debentures, treated as a taxable stock dividend under *IRC § 305(b)(2)*, increases the basis of the debentures in an amount equal to the fair market value of the deemed distribution. *Rev Rul 76-186, 1976-1 CB 86* .

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.04

§ 4.04 The Corporate Shareholder

[1] Amount of the Distribution.

The amount of a distribution to a corporate shareholder is the same as in the case of a noncorporate shareholder, namely, the amount of money and the fair market value of property other than money received by the shareholder.ⁿ¹ At one time, property distributions to corporate taxpayers were taken into account by them at the lesser of adjusted basis in the hands of the distributing corporation or fair market value. This was required to prevent the combination of the then extant rule that a distributing corporation did not recognize gain on the distribution of appreciated property, and the dividends received deduction allowed to corporations, from greatly reducing or eliminating any tax on the appreciation.

[2] Amount Treated as a Dividend.

The rules determining the extent to which a distribution is a dividend apply with equal force to corporate and noncorporate distributees. A corporate shareholder is required to include in gross income only that portion of the distribution which represents such stockholder's ratable share of the earnings and profits of the distributing corporation.

IRC Section 301(e) prescribes a special rule for distributions received by a 20 percent corporate shareholder--a corporation that owns (directly or indirectly through the application of *IRC Section 318*) at least 20 percent of the voting stock in the distributing corporation or at least 20 percent of the total value of all stock in the distributing corporation except nonvoting stock which is limited and preferred as to dividends. In determining the extent of the dividend to the 20 percent corporate shareholder, and for no other purpose, the earnings and profits of the distributing corporation are computed without the application of *IRC Sections 312(k)* and *312(n)*, other than *IRC Section 312(n)(7)*.ⁿ¹ The special rule applies only if the corporate shareholder would, but for the rule, be entitled to a dividends received deduction with respect to the distribution involved.

[a] Dividends Received Deduction.

[i] Dividends Received From Domestic Corporations. Under *IRC Section 243(a)* a corporation is allowed a deduction of at least 70 percent of the amount received as dividends from domestic corporations that are subject to income taxation under the Code.ⁿ² An 80-percent deduction is allowed if the taxpayer owns 20 percent or more of the stock (by vote and value) of the distributing corporation.ⁿ³ If the recipient happens to be a small business investment company operating under the Small Business Investment Company Act of 1958, or a member of the same affiliated

group of corporations as the distributing corporation and certain other conditions are met, the allowable deduction rises to 100 percent of the amount received.ⁿ⁴ The effect of the general rule is to limit the maximum rate of tax on dividends received to 10.5 percent (30 percent of the dividends received taxed at the maximum corporate tax rate of 35 percent).

Excluded from the dividends which qualify for the deduction are (1) those paid by mutual savings banks, cooperative banks, and building and loan associations, if payment of the dividend gives rise to a deduction under *IRC Section 591*;ⁿ⁵ (2) long-term capital gains dividends paid by a regulated investment company;ⁿ⁶ (3) dividends paid by a real estate investment trust;ⁿ⁷ and (4) any dividend received on preferred stock of a public utility, if payment of the dividend affords the public utility a deduction under *IRC Section 247*.ⁿ⁸ Also excluded is any distribution to meet qualification requirements for the effective tax exemption that inures to possessions corporations and certain corporations doing business in the Virgin Islands.ⁿ⁹

[ii] Dividends Received From Affiliated Corporations. *IRC Section 243(a)(3)* allows a deduction equal to 100 percent of qualifying dividends, defined in *IRC Section 243(b)(1)* as dividends received by a corporation which, at the close of the day the dividends are received, is a member of the same affiliated group of corporations as the distributing corporation.ⁿ¹⁰ Two other conditions must be satisfied before a dividend can be denominated a qualifying dividend. First, the group must be consistent in its foreign tax treatment, that is, a dividend will not be a qualifying dividend if, for any taxable year that includes the day on which the dividend is received, one or more members of the affiliated group choose to take the benefits of *IRC Section 901* (foreign tax credit), and one or more members of the group claim a deduction for taxes otherwise creditable under *IRC Section 901*.ⁿ¹¹ Second, either (1) the dividend must be distributed out of earnings and profits of a taxable year of the distributing corporation ending after December 31, 1963, and on each day of the year the distributing and receiving corporations were members of the affiliated group, or (2) the dividends are paid by a corporation with respect to which an election under *IRC Section 936* is in effect for the taxable year in which the dividends are paid.ⁿ¹² The election under *IRC Section 936* gives rise to a credit for taxes attributable to taxable income from sources outside the United States, from the active conduct of a trade or business within a possession of the United States, and from qualified possessions sources investment income. With certain exceptions contained in transition rules, *IRC Section 936* does not apply to any taxable year beginning after December 31, 1995.ⁿ¹³

In the case of an affiliated group that contains one or more life insurance companies, no dividend by any member of the group will be a qualifying dividend unless an election made by the common parent is in effect for the taxable year in which the dividend is received or the dividend is received from a corporation with respect to which an election under *IRC Section 936* is in effect for the taxable year in which the dividend is received.ⁿ¹⁴ The consequence of the election restricts the extent to which members of the group can claim certain benefits normally available to corporations.ⁿ¹⁵

[iii] Dividends Received on Preferred Stock of a Public Utility. *IRC Section 244* provides a special deduction for dividends received from public utilities on preferred stock issued before October 1, 1942,ⁿ¹⁶ if the dividends on such stock are "cumulative, limited to the same amount, and payable in preference to the payment of dividend on other stock."ⁿ¹⁷ Computation of the allowable deduction is a three-step process. First, the amount of preferred stock dividends received is multiplied by a fraction, the numerator of which is 14 and the denominator of which is the highest corporate tax rate in effect for the taxable year. The product of that multiplication is then subtracted from the dividends received. The remainder is then multiplied by 70 percent (80 percent if the distributee shareholder is a 20-percent shareholder) and the product of this second multiplication becomes the allowable deduction. If the public utility and the receiving corporation are members of an affiliated group and the dividends would be qualifying dividends under *IRC Section 243(d)(1)*, were it not for *IRC Section 243(c)(4)*, the multiplying percentage in the third step is 100 percent. To illustrate:

Example:

Suppose, in 2002, a corporation received \$200,000 in preferred stock dividends from a public utility. If the entire \$200,000 qualified for the dividend paid deduction of *IRC Section 247*, and if the dividends were not "qualifying dividends" as defined in *IRC Section 243(b)*, and the corporation was not a

20-percent shareholder, the allowable deduction would be computed as follows:

Preferred stock dividends received	\$200,000
Less: $14/35 \times \$200,000$ (IRC Section 244(a)(2)) ⁿ¹⁸	80,000
Remainder subject to 70 percent deduction	\$120,000
70 percent of \$120,000 (IRC Section 244(a)(3))	\$84,000

If the corporation was a 20-percent shareholder, the deduction would be 80 percent of \$120,000, or \$96,000. If the public utility and the corporation receiving the dividends were members of an affiliated group, and if the dividends met the definition of *IRC Section 243(b)(1)*, the allowable deduction would be \$117,647, the entire remainder resulting from the fraction-multiplication, subtraction process required by *IRC Section 244(a)(2)*.

[iv] Dividends Received From Foreign Corporations. *IRC Section 245* allows a 70-percent deduction (80 percent in the case of a 20-percent shareholder) for the United States-source portion of dividends received from a foreign corporation, other than a passive foreign investment company, if at least 10 percent of the stock of the foreign corporation (by vote and value) is owned by the taxpayer.ⁿ¹⁹ The United States-source portion of any dividend is an amount that bears the same ratio to such dividend as the post-1986 undistributed United States earnings bears to the total post-1986 undistributed earnings of the foreign corporation.ⁿ²⁰ The foreign corporation's post-1986 undistributed earnings are the earnings and profits of the corporation accumulated in taxable years beginning after 1986 as of the close of the taxable year in which the dividend is distributed, without diminution for dividends distributed during the year.ⁿ²¹ Its post-1986 undistributed United States-source earnings are the portion of the total post-1986 undistributed earnings that is attributable to (1) income of the corporation that is effectively connected with the conduct of a trade or business within the United States and is subject to federal income tax, or (2) any dividend received (directly or through a wholly owned foreign corporation) from a domestic corporation at least 80 percent of the stock of which (by vote and value) is owned (directly or through the wholly owned foreign corporation) by the 10-percent owned foreign corporation.ⁿ²²

The deduction percentage will increase to 100 percent if the domestic corporation owns 100 percent of the foreign corporation and all of the latter's gross income from all sources is effectively connected with the conduct of a trade or business within the United States.ⁿ²³

A domestic corporation is allowed a 100-percent deduction for dividends distributed out of earnings and profits attributable to foreign trade income for a period during which the distributing corporation was a foreign sales corporation.ⁿ²⁴ A 70-percent deduction (80 percent in the case of a 20-percent shareholder) is allowed with respect to dividends distributed out of earnings and profits attributable to qualified interest and carrying charges received or accrued by the distributing corporation while it was a foreign sales corporation.ⁿ²⁵

[v] Restrictions on the Dividends Received Deduction. The dividends received deductions allowed by *IRC Sections 243, 244, and 245* do not apply if (1) the distributing corporation is for the taxable year of distribution or for the preceding taxable year, exempt from tax under either *IRC Section 501* or *IRC Section 521*,ⁿ²⁶ or (2) the distributing corporation is a Domestic International Sales Corporation (DISC) or former DISC and the dividend is paid out of its accumulated DISC income or previously taxed income or is a deemed distribution pursuant to *IRC Section 995(b)(1)*

.n27 In addition, deduction is denied if the dividend is on any share of stock which is held by the taxpayer for 45 days or less during the 91-day period beginning 45 days before the ex-dividend date (90 days or less during the 181-day period beginning 90 days before the ex-dividend date if the dividend is on certain preferred stock),^{n27.1} or to the extent that the taxpayer is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property.ⁿ²⁸ The 45- and 90-day holding periods will be reduced for any period (during such holding periods) in which:

- (1) the seller has an option to sell, is under a contractual obligation to sell, or has made and not closed a short sale of substantially identical stock or securities;
- (2) the taxpayer is a grantor of an option to buy substantially identical stock or securities; or
- (3) the taxpayer has diminished the taxpayer's risk of loss by holding one or more positions with respect to substantially similar or related property.^{n28.1}

A mandatory redemption provision found in preferred stock is generally not considered a contractual obligation to sell.^{n28.2}

The term "substantially similar or related property" is applied according to the facts and circumstances of each case. In general, property is substantially similar or related to stock when:

- (1) the fair market values of the stock and the property primarily reflect the performance of:
 - (a) a single firm or enterprise,
 - (b) the same industry or industries, or
 - (c) the same economic factors such as interest rates, commodity prices, or foreign-currency exchange rates; and
- (2) changes in the fair market value of the stock are reasonably expected to approximate, directly or inversely, changes in the fair market value of the property, a fraction of the fair market value of the property, or a multiple of the fair market value of the property.^{n28.3}

A taxpayer diminishes its risk of loss on its stock by holding positions with respect to similar or related property if changes in the fair market values of the stock and the positions are reasonably expected to vary inversely.^{n28.4} A taxpayer is also treated as diminishing its risk or loss by holding substantially similar or related property if it engages in the following transactions or their substantial equivalents:

- (1) a short sale of common stock while holding convertible preferred stock of the same issuer and the price changes of the convertible preferred stock and the common stock are related;
- (2) a short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible or common stock; or
- (3) a short sale of convertible preferred stock while holding common stock.^{n28.5}

Finally, a taxpayer diminishes its risk of loss on stock by holding a position in substantially similar or related property if the taxpayer is the beneficiary of a guarantee, surety agreement, or similar arrangement that provides for payments that will substantially offset decreases in the fair market value of the stock.^{n28.6}

A position established as a hedge of one outstanding position, transaction, or obligation of the taxpayer (other than stock) is not treated as diminishing the risk of loss with respect to any other position held by the taxpayer. In determining whether a position is established to hedge an outstanding position, transaction, or obligation of the taxpayer, substantial deference will be given to the relationships that are established in its books and records at the time the taxpayer entered into the position.^{n28.7}

A position reflecting the value of a portfolio (a group of stocks of 20 or more unrelated issuers) is substantially similar or related to the stocks held by the taxpayer only if the position and the taxpayer's holdings substantially overlap as of the most recent testing date.^{n28.8} A position may be substantially similar or related to a taxpayer's entire stock holdings or to a portion of the taxpayer's stock holdings.^{n28.9}

A three-step procedure is used to determine whether a position and the taxpayer's stock holdings overlap.^{n28.10} First, the taxpayer must construct a subportfolio that consists of stock in an amount equal to the lesser of the fair market value of each stock represented in the position and the fair market value of the stock in the taxpayer's stock holdings; the subportfolio may contain less than 20 stocks.^{n28.11} Second, if the fair market value of the subportfolio is equal to or greater than 70 percent of the fair market value of the stocks represented in the position, the position and the subportfolio overlap.^{n28.12} Third, if the position does not substantially overlap with the subportfolio, the taxpayer must repeat the two prior steps reducing the size of the position. The largest percentage of the position that results in a substantial overlap is substantially similar or related to the subportfolio determined with respect to that percentage of the position.^{n28.13}

A position that reflects the fair market value of more than one stock, but not of a portfolio of stocks, is treated as a separate position with respect to each of the stocks the value of which the position reflects.^{n28.14}

Under an anti-abuse rule, a position that reflects the value of more than one stock is a position in substantially similar or related property to the appropriate portion of the taxpayer's stock holdings if (a) changes in the value of the position or the stocks are reasonably expected to virtually track (directly or indirectly) changes in the value of the taxpayer's stock holdings, or any portion of the taxpayer's stock holdings and other portions of the taxpayer, and (b) the position is acquired or held as part of a plan a principal purpose of which is to obtain tax savings (including a tax deferral) in excess of the expected pre-tax economic profits from the plan.^{n28.15}

For purposes of *IRC Section 246(c)*, rights and obligations under notional principal contracts are considered separately even though payments with regard to those rights and obligations are generally netted for other purposes. Thus, if a taxpayer is treated as receiving payments under a notional principal contract when the fair market value of the taxpayer's stock declines, the taxpayer has diminished its risk of loss by holding a position in substantially similar or related property regardless of the netting of the payments under the contract for any other purpose.^{n28.16}

Positions held by a party related to the taxpayer within the meaning of *IRC Section 267(b)* or *707(b)(1)* are treated as positions held by the taxpayer if held with a view to avoiding application of *Regulations Section 1.246-5* or *1.1092(d)-2*. The same holds true if the taxpayer holds an interest in, or is a beneficiary of, a pass-through entity, intermediary, or other arrangement with a view to avoiding application of those provisions.^{n28.17}

The deduction will also be denied if the taxpayer is obligated to make corresponding payments with respect to positions in substantially identical stock or securities.ⁿ²⁹ The latter situation will generally occur when a taxpayer has both a long and a short position in the same stock. No deduction will be allowed on account of the dividends received on the stock held long to the extent the taxpayer is obligated to make payments to cover the dividends with respect to its offsetting short position in the same stock.ⁿ³⁰

IRC Section 246A reduces the amount of the deduction otherwise allowable under *IRC Sections 243, 244* and *245(a)*, if

the dividends are received with respect to debt-financed portfolio stock. The reduction is achieved by substituting for the usual deduction amount a percentage determined by multiplying 70 percent (80 percent in the case of a 20-percent shareholder) by 100 percent less the average indebtedness percentage. The latter percentage is derived by dividing the average amount of the portfolio indebtedness with respect to the stock during the base period by the average amount of the adjusted basis of the stock during the base period.ⁿ³¹ However, the reduction with respect to any dividend cannot exceed the amount of any interest deduction (including short sale expense) allocable to the dividend.ⁿ³²

Stock is debt-financed portfolio stock if: (1) as of the ex-dividend date the corporate shareholder owns less than 50 percent of the total value of the stock of the distributing corporation; and (2) there is portfolio indebtedness--indebtedness directly attributable to the stockⁿ³³--during the base period, i.e., the shorter of: (a) the period beginning on the ex-dividend date for the most recent dividend on the stock and ending on the day before the ex-dividend date for the dividend involved; or (b) the one-year period ending on the day before the ex-dividend date for the dividend involved.ⁿ³⁴

Finally, the aggregate amount of the deductions allowed by *IRC Sections 243(a)(1), 244(a), and 245* cannot exceed specified percentages of the corporation's taxable income computed without regard to such deductions, the net operating loss deduction allowed by *IRC Section 172(a)*, the deduction for income attributable to domestic production activities under *IRC Section 199*, or the dividends paid deduction of *IRC Section 247* without regard to any adjustment to basis prescribed by *IRC Section 1059* because of the receipt of extraordinary dividends, and without regard to any capital loss carryback to the taxable year under *IRC Section 1212(a)(1)*.ⁿ³⁵ An 80-percent limitation is applied separately with respect to dividends received from 20-percent owned corporations. A 70-percent ceiling is then applied separately with respect to dividends not from 20-percent owned corporations, with taxable income reduced by the aggregate amount of dividends from 20-percent owned corporations.ⁿ³⁶ If, however, the receiving corporation has a net operating loss for the taxable year of receipt, the dividends received deductions are not affected by the limitations.ⁿ³⁷ To illustrate:

Example:

Suppose the corporation's books of account show gross income from operations of \$50,000, dividends received from 20-percent owned corporations of \$50,000, dividends from other domestic corporations of \$100,000, and allowable business expenses of \$100,000. The corporation's taxable income without regard to the dividends received deduction is \$100,000 (\$200,000 in income less \$100,000 in deductions). The dividends received deduction allowed with respect to the dividends received from the 20-percent owned corporations would be \$40,000 (80 percent of \$50,000). The deduction would not be affected by the limitation since the dividends were less than 80 percent of taxable income. The deduction allowed in the case of the dividends from other domestic corporations (normally \$70,000) would be limited to \$35,000 (70 percent of taxable income of \$100,000 reduced by dividends of \$50,000 received from 20 percent owned corporations). If, however, the deductible business expenses amounted to \$300,000, the corporation would have a net operating loss, and the full \$110,000 allowed by *IRC Section 243(a)* would be deductible, increasing the net operating loss for the year to \$210,000.ⁿ³⁸

A further consequence of the receipt of dividends qualifying for the dividends received deduction is a reduction in basis if the dividend is an extraordinary dividend and the recipient has not held the stock on which the dividend was paid for more than two years before the date on which the corporation declares, announces, or agrees to, the payment of the dividend, whichever is the earliest (the "dividend announcement date").ⁿ³⁹ This reduction is equal to the nontaxed portion of the dividend, that is, the amount of the dividend includable in gross income less the dividends received deduction allowable with respect to the dividend under *IRC Section 243, 244, or 245*, and occurs at the beginning of the ex-dividend date of the extraordinary dividend to which the reduction relates.ⁿ⁴⁰ However, the basis cannot be reduced below zero. Because of this, an amount equal to the aggregate nontaxed portions of extraordinary dividends that did not reduce the basis of the stock is treated as gain from the sale or exchange of the stock for the taxable year in which the extraordinary dividend is received.ⁿ⁴¹ The rules do not apply to any extraordinary dividend if the stock has been held by the taxpayer during the entire period that the distributing corporation (or a predecessor corporation) has been in

existence and no earnings and profits of the corporation are attributable to transfers of property from (or earnings and profits of) a corporation that is not a qualified corporation,ⁿ⁴² or to distributions between members of an affiliated group filing consolidated returns.ⁿ⁴³ However, in the case of a redemption that (i) is not pro rata as to all shareholders, (ii) is part of a partial liquidation of the redeeming corporation, or (iii) would not have been treated in (whole or in part) as a dividend if any options had not been taken into account under the option attribution rule of *IRC Section 318(a)(4)*, or if *IRC Section 304(a)* had not applied, any amount treated as a dividend with respect to the redemption is an extraordinary dividend without regard to the period of time the taxpayer held the stock.^{n43.1} A reorganization exchange that is treated as a dividend is treated as a redemption of stock for purposes of applying the foregoing rule.^{n43.2}

A dividend is an extraordinary dividend if the amount of cash and the fair market value of property received equals or exceeds 5 percent of the taxpayer's basis of preferred stock and 10 percent of the basis of any other stock.ⁿ⁴⁴ Dividends which have ex-dividend dates within a period of 85 consecutive days are treated as a single dividend.ⁿ⁴⁵ Dividends with ex-dividend dates during a period of 365 consecutive days are treated as extraordinary dividends if the aggregate of such dividends exceeds 20 percent of the taxpayer's adjusted basis in the stock.ⁿ⁴⁶

Pursuant to *IRC Section 1059(f)*, any dividend, including a dividend deemed received under *IRC Section 305* or any other provision,ⁿ⁴⁷ with respect to "disqualified preferred stock" is an extraordinary dividend without regard to the period the taxpayer held the stock. Disqualified preferred stock is stock issued after July 10, 1989, that is preferred as to dividends if:

- (a) when issued, the stock has a dividend rate that declines, or can reasonably be expected to decline, in the future;
- (b) the issue price of the stock exceeds its liquidation rights or stated redemption price; or
- (c) the stock is otherwise structured to enable corporate shareholders to reduce tax through a combination of dividend received deductions and loss on the disposition of the stock.ⁿ⁴⁸

The distributee corporation can elect to determine whether a distribution is an extraordinary dividend by reference to the fair market value of the share on the day before the ex-dividend date in lieu of its adjusted basis, if the taxpayer can establish the fair market value of the property to the satisfaction of the Service.ⁿ⁴⁹ *Revenue Procedure 87-33*ⁿ⁵⁰ sets forth the following guidelines for establishing fair market value for purposes of the election:

For stock traded on a national or regional exchange or on the NASDAQ system, the closing price of the stock on the day before the ex-dividend date is treated as the fair market value of the stock. If there were no sales of stock on the specified day, the mean of the bid and asked prices on the day before the ex-dividend date establish the fair market value. For stock listed on more than one exchange, the price of the stock on a composite listing of the combined exchanges must be used if the records are set forth in a generally available listing or publication of general circulation. If such a composite listing is not available, the records of the price on the exchange where the stock is principally traded must be used.

If the stock is not publicly traded, a taxpayer wishing to make the election must request a written determination of the stock's fair market value from the Service. The request must be made no later than 60 days after the close of the taxable year containing the ex-dividend date (or the last of the ex-dividend dates at issue if the election is made for purposes of *IRC Section 1059(c)(3)*), and must include a proposed determination of the stock's fair market value which is supported by a credible appraisal that follows the guidelines contained in *Revenue Ruling 59-60*,ⁿ⁵¹ as amplified by *Revenue Ruling 77-287*,ⁿ⁵² *Revenue Ruling 80-213*,ⁿ⁵³ and *Revenue Ruling 83-120*.ⁿ⁵⁴ The Corporation Tax Division of the Service will respond with a letter indicating what fair market value has been established to its satisfaction.

In order to make the election, the taxpayer's tax return for the year must contain a statement that is headed "ELECTION

FILED UNDER SECTION 1059(c)(4)" and includes the following information: (1) the taxpayer's name, address, and taxpayer's identification number; (2) identification of the stock; (3) the amount of the dividends; (4) the number of shares of stock; and (5) the ex-dividend date(s). If the stock is publicly traded, the taxpayer must add the closing price of the stock (or, if applicable, the mean of the bid and asked prices of the stock) on the day before the ex-dividend date, and identify the publication that sets forth the composite listing, principal exchange listing, or NASDAQ listing used. If the stock is not publicly traded, the taxpayer must attach a copy of the Service's response as to value, unless the taxpayer has not received the response at the time the return is filed, in which case the taxpayer must furnish the proposed fair market value of the stock shown in the written request, and represent that the request was filed.

A special provision governs dividends on qualified preferred stock. Were it not for the special rule, a dividend of greater than 5 percent paid within any period of 85 days or less would be an extraordinary dividend. Preferred stock is qualified preferred stock if (1) it provides for fixed dividends payable at least annually; and (2) dividends were not in arrears when the taxpayer acquired the stock.ⁿ⁵⁵

IRC Section 1059 does not apply to any qualified preferred dividend if the taxpayer holds the stock for more than five years.ⁿ⁵⁶ If the stock is not held for more than five years, the reduction called for by *IRC Section 1059(a)(1)* cannot be greater than the excess of (a) the qualified preferred dividends paid during the period the taxpayer held the stock, over (b) the qualified dividends that would have been paid during the period on the basis of the stated rate of return on the stock.ⁿ⁵⁷

In addition to the usual dividend distributions, the extraordinary dividend concept is expanded to include any distribution (without regard to the holding period of the stock or the relative magnitude of the distribution) to a corporate shareholder in partial liquidation, or as part of a non-pro rata redemption of stock.ⁿ⁵⁸ For this purpose, a distribution will be treated as in partial liquidation if it satisfies the requirements of *IRC Section 302(e)*.ⁿ⁵⁹

[3] Treatment of Distributions in Excess of the Amount Considered a Dividend.

Distributions which exceed the amount includable in ordinary income as a dividend are handled by a corporate shareholder in the same manner as an individual. The portion that is not a dividend is first applied against and in reduction of the stock's adjusted basis.ⁿ¹ Any portion remaining after the adjusted basis has been reduced to zero is treated as a gain from the sale or exchange of property.ⁿ²

[4] Basis of Property Distributed in Kind.

The basis of property received in kind by a corporate taxpayer is its fair market value.ⁿ¹ If the distribution was made at a time when the Code fixed the amount thereof at the lesser of adjusted basis in the hands of the distributing corporation or fair market value, the basis would be the lesser of the two.

FOOTNOTES:

(n1)Footnote 1. *IRC § 301(b)(1)*.

(n2)Footnote 1. See § 4.02[1][a]. Congress intends that this provision apply only where the distribution is between corporations not filing a consolidated return. HR Rep No 100-391, 100th Cong, 1st Sess 1090 (1987).

(n3)Footnote 2. The availability of the deduction often results in a reversal of roles, the taxpayer claiming that an advance to a corporation should be treated as equity in order to treat payments made with respect thereto as dividends. Eg, *Ragland Inv Co v Commr*, 435 F2d 118 (6th Cir 1970) .

"Boot" dividends under *IRC § 356(a)(2)* qualify for the deduction. *Rev Rul 72-327, 1972-2 CB 197* .

Payments in lieu of dividends on borrowed stock do not qualify for the dividends received deduction even if the

borrowed stock is used to cover a short sale. *Prop Treas Reg § 1.1058-1(d)*.

See generally Mundstock, "Taxation of Intercompany Dividends Under an Unintegrated Regime," 44 *Tax L Rev* 1 (1988); Pearce, "The Intercompany Dividends-Received Deduction: An Area of Increasing Complexity," 68 *Ore L Rev* 161 (1989).

(n4)Footnote 3. *IRC § 243(c)(1), (2)*. Stock that is not entitled to vote is limited and preferred as to dividends and does not participate in corporate growth to any significant extent, has redemption and liquidation rights which do not exceed the issue price of the stock except for a reasonable redemption or liquidation premium, and is not convertible into any other class of stock, is not counted as stock for determining the extent of stock ownership.

The Service holds that a corporation is not entitled to the dividends received deduction when it receives dividends on stock purchased after the record date for the dividend payment. *Rev Rul 82-11, 1982-1 CB 51*. The ruling involved a situation in which the stock exchange fixed the payment date as the ex-dividend date, and is based on a corporate title theory. For a case reaching a contrary result by applying an economic reality theory, see *Silco, Inc v US*, 779 F2d 282 (5th Cir 1986).

(n5)Footnote 4. *IRC § 243(a)(2), (3)*. The dividend must be a true dividend and not an attempt to disguise a nondividend payment as a dividend. *Cf Waterman SS Corp v Commr*, 430 F2d 1185 (5th Cir 1970), cert denied 401 US 939, where a parent filing a consolidated return attempted to eliminate a payment received from a subsidiary by treating the payment as an intercompany dividend; the payment actually constituted part of the purchase price paid by a third party for the subsidiary's stock.

Where a corporation made a payment to one of its 50-percent shareholders prior to a split-up, the payment constituted a dividend. See *Uniroyal Inc & Cons Subs v Commr*, TC Memo 1993-214.

(n6)Footnote 5. *IRC § 243(d)(1)*.

(n7)Footnote 6. *IRC § 243(d)(2)*. Dividends other than capital gains dividends may qualify for the deduction. *IRC § 854(b)(1)*. See § 12.04[1][c].

(n8)Footnote 7. *IRC § 243(d)(3)*.

(n9)Footnote 8. *IRC § 243(d)(4); Treas Reg § 1.243-2(d)*.

(n10)Footnote 9. *IRC § 246(e)*. The specific distribution provisions are *IRC §§ 936(h)(4) and 934(e)(3)*. With certain exceptions contained in transition rules, *IRC Section 936* does not apply to taxable years beginning after December 31, 1995. *IRC § 936(j)(1)*.

(n11)Footnote 10. The term "affiliated group" takes the meaning assigned to it by *IRC § 1504(a)*, with slight modification. *IRC § 243(b)(2)(A)*.

The regulations provide that, for purposes of meeting the requirement that both the distributing corporation and receiving corporation be part of the same affiliated group, a mere change in form, whereby a new corporation has acquired substantially all of the stock of the common parent solely in exchange for stock of the acquiring group, will not produce a new affiliated group. *Treas Reg § 1.243-4(a)(5)(i)*. A reorganization that creates a new common parent and merges the old common parent into a newly formed subsidiary of the new parent is such a mere change in form. *Rev Rul 72-274, 1972-1 CB 97*. See also *Rev Rul 85-144, 1985-2 CB 86*, and *Rev Rul 84-154, 1984-2 CB 62*.

(n12)Footnote 11. *IRC § 243(b)(2)(B)*.

(n13)Footnote 12. *IRC § 243(b)(1)(B), (C)*.

(n14)Footnote 13. *IRC § 936(j)(1)*.

(n15)Footnote 14. *IRC § 243(b)(3)(A), (C)*. The election is binding on all members of the group and can be revoked only with the consent of the Commissioner.

(n16)Footnote 15. *IRC §§ 243(b)(3)(B), 1561*. In addition, a distribution by any member of the group that is a life insurance company subject to tax under *IRC § 801* will not be treated as a qualifying dividend if the distribution is out of earnings and profits for a taxable year for which an election is not effective and for which the distributing corporation was not a component member of a controlled group of corporations because treated as an excluded member under *IRC § 1563(b)(2)(D)*.

(n17)Footnote 16. Stock issued after Oct 1, 1942 can qualify if received in a reorganization or similar exchange. *IRC § 247(b)(2)*.

(n18)Footnote 17. *Id.* The definitions of preferred stock and public utility are contained in *IRC § 247(b)*, governing the deduction for dividends paid on certain preferred stock of public utilities. This dividends paid deduction must be available to the public utility before the dividends received deduction of *IRC § 244* can be claimed. If this prerequisite cannot be met, the dividend qualifies for deduction under *IRC § 243*. *IRC § 243(d)(4)*.

(n19)Footnote 18. The highest rate of tax specified for corporations is 35 percent.

(n20)Footnote 19. *IRC § 245(a)(1), (2)*. No foreign tax credit is allowed for any taxes paid or accrued with respect to the US-source portion of any dividend received by a corporation from a qualified 10-percent owned foreign corporation, unless a treaty obligation of the US treats the dividend as arising from sources outside the US. *IRC § 245(a)(8), (10)*. In addition, the United States-source portion of the dividend is treated as income from United States sources for purposes of the foreign tax credit limitation. *IRC § 245(a)(9)*. Under *IRC § 243(e)*, any dividend paid by a foreign corporation out of earnings and profits accumulated by a domestic corporation during a period with respect to which the domestic corporation was subject to federal income taxation is treated as a domestic dividend. If *IRC § 243(e)* applies, *IRC § 245* does not. *Treas Reg § 1.245-1(a)(2)*.

For this purpose, the term "dividend" does not include any amount treated as a dividend under *IRC § 1248*. *IRC § 245(a)(11)*.

(n21)Footnote 20. *IRC § 245(a)(3)*. If the first day on which the ownership requirement is met is in a taxable year of the foreign corporation beginning after December 31, 1986, the post-1986 undistributed earnings and the post-1986 undistributed US earnings of the corporation are determined by only taking into account periods beginning after the first day of the first taxable year in which the requirement is met. *IRC § 245(a)(6)*.

(n22)Footnote 21. *IRC §§ 245(a)(4), 902(c)(1)*.

(n23)Footnote 22. *IRC § 245(a)(5)*.

(n24)Footnote 23. *IRC § 245(b)*. Earnings and profits of a 10-percent owned foreign corporation are not taken into account for purposes of determining the United States-source portion of a dividend if the 100 percent deduction is available. *IRC § 245(a)(7)*.

(n25)Footnote 24. *IRC § 245(c)(1)(A)*. The provision does not apply if the payment is attributable to *IRC § 923(a)(2)* nonexempt income or to income which would not be treated as exempt income but for *IRC § 923(a)(4)*. *IRC § 245(c)(2)*.

The deduction permitted by *IRC § 245(c)(1)(A)* cannot be claimed by S corporations. *Naporano v US, 834 F Supp 694 (DNJ 1993)*.

The Service has ruled that a corporate partner of a limited liability company classified as a partnership for federal income tax purposes is entitled to a 100 percent deduction for its distributive share of dividend income from earnings and profits of a foreign sales company that are attributable to the company's foreign trade income. *Ltr Rul 200137038*.

(n26)Footnote 25. *IRC § 245(c)(1)(B)*.

(n27)Footnote 26. *IRC § 246(a)(1)*. The restriction does not apply to dividends paid by any Federal Home Loan Bank attributable to dividends received by it from the Federal Home Loan Mortgage Corporation during the taxable year. *IRC § 246(a)(2)*.

(n28)Footnote 27. *IRC § 246(d)*.

(n29)Footnote 27.1. *IRC § 246(c)(1)(A), (c)(2)*. The holding period for preference dividends applies if the taxpayer receives dividends on such stock which are attributable to a period or periods aggregating more than 366 days. In determining the holding period, the day of disposition, but not the day of acquisition is taken into account, and no date that is more than 45 days (90 days, if applicable) after the ex-dividend date can be taken into account. *IRC § 246(c)(3)*.

A corporate shareholder of a regulated investment company (RIC) is required to meet the holding period requirements of *IRC § 246(c)(1)(A)* in order to claim a dividends received deduction for ordinary income distributions from the RIC. *Rev Rul 91-68, 1991-2 CB 43*.

The combination of simultaneously purchased stock and "put" options as part of "forward conversions" yielded a holding period of zero under *IRC § 246(c)(4)*. *Progressive Corp & Subs v US, 970 F2d 188 (6th Cir 1992)*. The case is discussed in Note, "Dividends Received Deduction: The Effect of Hedging With In-The-Money Call Options of the Holding Period Requirement of Section 246: *Progressive Corp v United States*," 46 *Tax Lawyer* 629 (1993).

If, at the beginning of the ex-dividend date, the taxpayer owns at least 80 percent of the total value of the stock of a bank or bank holding company, the taxpayer is treated as also owning any of the stock that the taxpayer has an option to acquire. *IRC § 246A(c)(3)*.

The writing of a "call" option on the stock does not reduce the holding period for the dividends received deduction, since the taxpayer still holds the stock subject to the risks of the marketplace. *Rev Rul 80-238, 1980-2 CB 96*.

(n30)Footnote 28. *IRC § 246(c)(1)(B)*, which evidences a congressional concern that corporations not abuse the dividends received deduction to obtain a tax arbitrage. *Ltr Rul 9128050*.

(n31)Footnote 28.1. *IRC § 246(c)(4)*. The provision does not apply in the case of any qualified covered call as defined in *IRC § 1092(c)(4)* other than a qualified covered call option to which *IRC § 1092(f)* applies. See *Rev Rul 90-27, 1990-1 CB 50*, for an instance in which *IRC § 246(c)(4)* will not apply to prevent a dividends received deduction for dividends paid on "Dutch-auction rate preferred stock"--stock on which the dividend rate is changed periodically through a Dutch-auction mechanism.

(n32)Footnote 28.2. *Rev Rul 94-28, 1994-1 CB 86*. However, the ruling goes on to state that *IRC § 246(c)(4)* applies to an instrument that affords the holder the rights of a creditor and is not stock for corporate law purposes, but is stock for federal income tax purposes.

(n33)Footnote 28.3. *Treas Reg § 1.246-5(b)(1)*. Reasonable expectations are the expectations of a reasonable person, based on all of the facts and circumstances at the later of the time the taxpayer acquired the stock or entered into the positions. Reasonable expectations include all explicit or implicit representations made with respect to the marketing or sale of the position. *Treas Reg § 1.246-5(b)(4)*.

(n34)Footnote 28.4. *Treas Reg § 1.246-5(b)(2)*. A position with respect to property is an interest (including a futures or forward contract or an option) in property or any contractual right to a payment, whether or not severable from stock or other property. A position does not include traditional equity rights to demand payment from the issuer, such as rights inherent in mandatorily redeemable preferred stock. *Treas Reg § 1.246-5(b)(3)*.

An option to sell that is significantly out of the money does not diminish the taxpayer's risk of loss on its stock unless the option is held as part of a strategy to substantially offset changes in the fair market value of the stock. *Treas Reg § 1.246-5(c)(2)(i)*.

(n35)Footnote 28.5. *Treas Reg § 1.246-5(c)(2)(ii)*.

(n36)Footnote 28.6. *Treas Reg § 1.246-5(c)(4)*.

(n37)Footnote 28.7. *Treas Reg § 1.246-5(c)(5)*.

(n38)Footnote 28.8. *Treas Reg § 1.246-5(c)(1)(i), (ii)*. A testing date is any day on which the taxpayer purchases or sells stock if the fair market value of the stock or the fair market value of substantially similar or related property is reflected in the position, any day on which the taxpayer changes the position, or any day on which the composition of the position changes. *Treas Reg § 1.246-5(c)(1)(iv)*.

(n39)Footnote 28.9. *Treas Reg § 1.246-5(c)(1)(ii)*. If a taxpayer diminishes its risk of loss by holding a position in substantially similar or related property with respect to only a portion of the shares that the taxpayer holds in a particular stock, the holding period of those shares having the shortest holding period is reduced. *Treas Reg § 1.246-5(c)(3)*.

(n40)Footnote 28.10. *Treas Reg § 1.246-5(c)(1)(iii)*.

(n41)Footnote 28.11. *Treas Reg § 1.246-5(c)(1)(iii)(A)*.

(n42)Footnote 28.12. *Treas Reg § 1.246-5(c)(1)(iii)(B)*.

(n43)Footnote 28.13. *Treas Reg § 1.246-5(c)(1)(iii)(C)*.

(n44)Footnote 28.14. *Treas Reg § 1.246-5(c)(1)(v)*.

(n45)Footnote 28.15. *Treas Reg § 1.246-5(c)(1)(vi)*. Notional principal contracts are discussed in Chapter 9A.

(n46)Footnote 28.16. *Treas Reg § 1.246-5(c)(7)*.

(n47)Footnote 28.17. *Treas Reg § 1.245-5(c)(6)*. See Ch 9 for a discussion of *IRC § 1092*.

(n48)Footnote 29. *IRC § 246(c)(1)*; *Treas Reg § 1.246-3(c)(2), (3)*.

(n49)Footnote 30. *Treas Reg § 1.246-3(c)(3)*.

(n50)Footnote 31. The provision does not apply to the 100 percent dividends received deduction available to members of the same affiliated group or to dividends received by a small business investment company. *IRC § 246A(b)*.

(n51)Footnote 32. *IRC § 246A(d)(1)*. The determination of average amounts will be specified in regulations.

If stock is not held throughout the base period, the determination is made as if the base period consisted only of that portion of the period during which the stock was held by the taxpayers. *IRC § 246A(d)(2)*.

(n52)Footnote 33. Indebtedness is portfolio indebtedness if it is clearly incurred for the purpose of acquiring

portfolio stock or is otherwise directly traceable to the stock. Indebtedness is directly traceable to dividend-paying stock when (1) the stock is held in a margin account with a securities broker; (2) a nonrecourse loan is secured, in whole or in part by dividend-paying stock; and (3) when money is received by a taxpayer as proceeds from a short sale. HR Rep No 432, 98[th] Cong, 2d Sess 853 (1984). Indebtedness is also portfolio indebtedness if the stock is acquired by the corporation using its equity, the corporation later borrows money using the stock as security, and the purchaser could reasonably have been expected to sell the stock rather than incur the indebtedness. Conf Rep No 861, 98th Cong, 2d Sess 813 (1984).

See Rev Rul 88-66, 1988-2 CB 34, in which the Service focuses on three situations to determine whether an indebtedness is directly attributable to an investment in portfolio stock. The ruling rejects the concept that indebtedness is directly attributable to the stock merely because the dividend-paying stock and the indebtedness are in existence at the same time. See also *Ltr Rul 9141006*.

The Tax Court has held that, in an appropriate case, the provisions of IRC § 246A may be used when one member of an affiliated group is the borrower and another member is the purchaser of portfolio stock. *H Enterprises Intl, Inc & Subs v Commr*, 105 TC 71 (1995). The court found such an appropriate case in a second decision involving the same taxpayer reported as *TC Memo 1998-97*. The Tax Court was affirmed by the Eighth Circuit. *183 F3d 907 (8th Cir 1999)*.

(n53)Footnote 34. IRC § 246A(c), (d)(3), (4). The ownership percentage is 20 percent if stock meeting the 50 percent test is owned by five or fewer corporate shareholders.

Stock that is not entitled to vote, is limited and preferred as to dividends and does not participate in corporate growth to any significant extent, has redemption and liquidation rights which do not exceed the paid-in capital or par value represented by such stock (except for a reasonable redemption premium), and is not convertible into another class of stock, is not counted as stock for this purpose. IRC §§ 246A(c)(4), 1504(a)(4).

(n54)Footnote 35. IRC § 246(b)(1).

(n55)Footnote 36. IRC § 246(b)(3).

(n56)Footnote 37. IRC § 246(b)(2); *Treas Reg* § 1.246-2(b).

(n57)Footnote 38. IRC §§ 172(c), 172(d)(6).

(n58)Footnote 39. IRC § 1059(a)(1)(d)(5). The provision applies to dividends declared after July 18, 1986, in taxable years ending after such date.

In determining the holding period for the stock, the day of disposition, but not the day of acquisition, is taken into account, any day which is more than one year after the stock becomes ex-dividend is not taken into account, and the tacked holding period provisions of IRC § 1223(4) (relating to wash sale stock) are inapplicable. IRC §§ 246(c)(3), 1059(d)(3).

(n59)Footnote 40. IRC § 1059(b), (d)(1). For distributions made before May 4, 1995, the reduction occurred immediately before any sale or disposition of the stock. The same rule applies to any distribution pursuant to the terms of (i) a written binding contract in effect on May 3, 1995, and at all times thereafter, or (ii) a written tender offer outstanding on May 3, 1995. Taxpayer Relief Act of 1997, § 1011(d).

(n60)Footnote 41. IRC § 1059(a)(2). For distributions before May 4, 1995, or subject to the traditional rule described in N 40, the gain was taken into account in the year in which the sale or other disposition occurred.

(n61)Footnote 42. IRC § 1059(d)(6). A qualified corporation is defined as any corporation (including a predecessor

corporation) (1) with respect to which the taxpayer holds, directly or indirectly during the entire period of the corporation's existence, at least the same ownership in the corporation distributing the dividend, and (2) that has no earnings and profits either earned by a corporation not described in clause (1) or attributable to gain on property that accrued during a period that the corporation holding the corporation was a corporation not described in clause (2).

(n62)Footnote 43. *IRC §§ 243(b)(1), 1059(e)(2).*

(n63)Footnote 43.1. *IRC § 1059(e)(1)(A).* Regulations make it clear that neither *IRC § 1059(d)(6)* nor *IRC § 1059(e)(2)* applies in such a case. *Treas Reg § 1.1059(e)-1(a).*

(n64)Footnote 43.2. *IRC § 1059(e)(1)(B).*

(n65)Footnote 44. *IRC § 1059(c)(1), (2).*

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.05

§ 4.05 Tax Accounting for Dividends Received

[1] Year of Inclusion.

The Regulations to *IRC Section 301* state that "[a] distribution made by a corporation to its shareholders shall be included in the gross income of the distributees when the cash or other property is unqualifiedly made subject to their demands."ⁿ¹ Another part of the Regulations provides that dividends declared payable and mailed on December 31, and, therefore, not received until the following year, are not constructively received in the prior year.ⁿ² Taking these two provisions together, it is an easy step to say that, at least for a cash basis taxpayer, the crucial date is the date of receipt. But suppose a taxpayer could have obtained possession of the dividend in the prior year, but determined not to do so. Here the doctrine of constructive receipt requires inclusion in the earlier year, thereby preventing taxpayers from selecting the year of inclusion.ⁿ³

Should the same rules apply if the taxpayer uses the accrual method of accounting? It is arguable that, for such a taxpayer, the dividend should enter gross income in the year in which the record date falls since that is the time at which the right to payment becomes fixed, and such right is the *sine qua non* of recognition of income for an accrual basis taxpayer.

However, this has not been the conclusion reached by the courts. Pointing to the fact that the mentioned Regulations make no distinction between cash basis and accrual method taxpayers, their decision has been to treat all taxpayers alike.ⁿ⁴

A distinction must be made between the time at which the consequences of a distribution are to be reflected in the income of the shareholder, and the time at which the status of the distribution is determined. The former is ordinarily controlled by the year of receipt; the latter looks to the distributing corporation's earnings and profits as they appear on the date of payment.ⁿ⁵

[2] The Taxable Person.

[a] Pledged or Escrowed Stock. Suppose dividends are paid to a person holding stock as security for repayment of an outstanding indebtedness or unpaid purchase price. If the dividends, though received by the escrow holder or pledgee, are applied in reduction of the balance due, the obligor receives the same measure of beneficial enjoyment as he would from actual receipt of the dividend. Viewed in this light, the taxable person must be the obligor.ⁿ¹ Of course,

if the creditor has the right to retain the dividend for his own purposes and not use it as an offset against the price or debt, the dividend is income to him.

[b] Assignment of Income Problems. It is well settled that an anticipatory assignment of the right to a future dividend does not shift the incidence of taxation to the assignee.ⁿ² A change in taxable person can occur only when there is a bona fide transfer of the stock with respect to which the dividend is paid.ⁿ³ But even that will not automatically remove the dividend from the assignor's income, for if the gift is made after the record date, the assignor will still be taxed.ⁿ⁴ Only a complete transfer prior to the record date will make the dividend taxable to the donee.ⁿ⁵

An assignment of anticipated dividends does not always constitute an anticipatory assignment of income. One fact pattern which can produce this result is that presented by *Estate of Stranahan v. Commissioner*,ⁿ⁶ where the taxpayer desiring to obtain the benefit of a large interest deduction, accelerated future income by assigning anticipated dividends for an immediate cash payment. The payment was reported as income by the taxpayer; he did not do likewise with respect to the actual dividend payments. This course of action was approved by the Sixth Circuit over the objection of the Commissioner who sought to attribute the dividend income to the assignor. The appellate court distinguished the case from one involving a gratuitous assignment on the ground that the amount paid by the assignee fairly reflected the value of the right to receive the future dividend income.

A related question is the extent to which a waiver of dividends by a majority shareholder results in the realization of income by him. It seems fairly clear that such a waiver will not cause the shareholder to be in constructive receipt of income if the waiver is made for a bona fide business reason, e.g., the preservation of working capital.ⁿ⁷ If, however, the result of the action taken by the shareholder serves to increase the share of dividends flowing to members of his family, as minority shareholders, and the purpose of the waiver is to effect such an increase, the waiver will not be recognized, and the shareholder will realize income to the extent of the waived dividend.ⁿ⁸ Using these principles as the basis for decision, the Service will rule on proposed waiver transactions if (1) there is a bona fide business reason for the waiver; and (2) relatives of the waiving shareholder (defined as his spouse, ancestors, lineal descendants and their spouses, and brothers and sisters of the whole and half blood and their spouses) are not in a position to receive more than 20 percent of the total dividends distributed to nonwaiving shareholders.ⁿ⁹ The ruling becomes inapplicable if a change in stock ownership enables nonwaiving relatives to get more than 20 percent of future dividends, unless the change occurs because of death. It becomes ineffective three after issuance.

[3] Characterization of Income Problems.

Can a taxpayer change the character of income from ordinary to capital by selling his stock prior to the payment date? The answer turns on whether the taxpayer had acquired a vested right to the dividend at the time of sale. Thus, if the sale precedes both the date of declaration and the date of payment, the seller, having acquired no right to any future dividend, does not realize dividend income even if the selling price includes the amount of any projected dividend.ⁿ¹ Clearly, if the stock were sold after the date upon which the seller became entitled to the dividend,ⁿ² he could not escape ordinary income consequences to the extent of the dividend.ⁿ³ The consequences to the purchaser follow those of the seller. If the sale antedates the time at which the right to dividends vests, the purchaser will be in receipt of ordinary income when the dividend is paid to him, even though the purchase price reflects the amount of the anticipated dividend.ⁿ⁴ The added price merely increases the purchaser's basis for his stock.

An interesting corollary to the last-stated proposition is presented when the owner of preferred stock on which dividends are accrued receives a distribution in liquidation or in redemption of his interest, and the amount of the distribution includes the amount of accrued dividends. Once again, the nature of the income received rests upon prior entitlement to the dividend. Thus, although dividends may have accrued on the stock, no part of the distribution will be deemed a dividend, unless preceded by an actual declaration of a dividend.ⁿ⁵

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.06

§ 4.06 Stock Dividends and Distributions of Stock Rights

[1] Effect of the Distribution on Income.

The general rule contained in the present Code is that "gross income does not include the amount of any distribution of the stock of a corporation made by such corporation to its shareholders with respect to its stock."ⁿ¹ Prior to the Tax Reform Act of 1969, this rule applied to every stock dividend or distribution of stock rights by a corporation to its shareholders, except (1) a distribution made in discharge of preference dividends for the current taxable year of the corporation or the preceding taxable year,ⁿ² or (2) any distribution in which any of the shareholders had the option at any time to have the distribution payable either in stock (or stock rights) or in property.ⁿ³ Under Regulations first proposed in 1956, and finally issued early in 1969, an election would be imputed whenever the corporation had more than one class of stock and paid dividends in cash or property to holders of one class, and dividends in stock to holders of the other.ⁿ⁴ The election derives from the fact that, under *IRC Section 1036*, shares of one class may be exchanged for shares of the other without recognition of gain or loss. Furthermore, if the corporation had, say, Class A stock convertible into Class B stock of the corporation on a stated basis, and the conversion ratio increased with the payment of cash dividends on the Class B shares, the holders of Class A stock would be deemed in receipt of a taxable dividend to the extent of the increase.ⁿ⁵

The Tax Reform Act of 1969 expanded the instances in which a stock dividend or distribution of stock rights will be taxable.ⁿ⁶ The actual effect of the new provisions is to transform the distribution from one that is tax-free under *IRC Section 305(a)* to one that is governed by *IRC Section 301*. The amount of the distribution is measured by the fair market value of the distributed stock.

In general, a distribution, which at the election of any shareholder, is payable either in stock or in property, continues to be taxable to participating shareholders in an amount equal to the fair market value of the stock on the dividend date.ⁿ⁷ Nonparticipating shareholders include the amount of cash or fair market value of property received.ⁿ⁸ Regulations provide in general that, under *IRC Section 305(b)(1)*, if any shareholder has the right to an election or option with respect to whether a distribution shall be made either in money or any other property, or is stock or stock rights of the distributing corporation, then, with respect to all shareholders, the distribution of stock or stock rights is treated as a taxable distribution regardless of whether (1) the distribution is actually made in whole or in part in stock or in stock rights; (2) the election or option is exercised or exercisable before or after the declaration of the distribution; (3) the declaration of the distribution provides that the distribution will be made in one medium unless the shareholder

specifically requests payment in the other; (4) the election governing the nature of the distribution is provided in the declaration of the distribution or in the corporate charter, or arises from the circumstances of the distribution; or (5) all or part of the shareholders have the election.ⁿ⁹

The 1969 Act enlarged the list of taxable distributions to include:

(1) A disproportionate distribution, i.e., one in which some of the shareholders receive a cash or property distribution, while others receive an increase in their proportionate interest in the assets or earnings of the corporation.ⁿ¹⁰

(2) A distribution which has the effect of the receipt of preferred stock by some common shareholders and the receipt of common stock by others.ⁿ¹¹

(3) Any distribution in respect of preferred stock, other than one which increases the conversion ratio of convertible preferred stock to take account of a stock split.ⁿ¹² Therefore, a stock distribution in discharge of preference dividends for the current or preceding taxable year remains a taxable distribution.

(4) Any distribution of convertible preferred stock, unless the distribution is shown not to have the effect of a disproportionate distribution.ⁿ¹³

[a] Disproportionate Distributions.

[i] In General. By virtue of *IRC Section 305(b)(2)*, a stock dividend becomes taxable if it is made as part of a disproportionate distribution, that is, a distribution or series of distributions that has the result of the receipt of cash or other property by some shareholders and an increase in the proportionate interests of other shareholders in the assets or earnings and profits of the corporation. (Any increase in proportionate interest, even one that is de minimis, will render the stock dividend taxable.) The provision comes into play if, for example, a corporation has two classes of common stock, one paying regular cash dividends and the other paying corresponding stock dividends. In contrast, if the corporation has a single class of common and a class of nonconvertible preferred that pays a cash dividend, a pro rata distribution of common shares to the holders of common will be nontaxable; there will be no increase in the proportionate interests of any of the shareholders.ⁿ¹⁴

In determining whether a distribution is disproportionate, holders of rights to acquire stock and holders of securities convertible into stock are treated as stockholders.ⁿ¹⁵ Thus, if a corporation has common stock and convertible debentures outstanding, and pays interest on the convertible securities and a stock dividend on the common stock, the payment of interest is considered as a distribution of property to a shareholder, giving rise to a disproportionate distribution and a taxable stock dividend.ⁿ¹⁶

Application of *IRC Section 305(b)(2)* does not depend upon some relationship or connection between the cash and stock distributions. Rather, taxation of the stock dividend ensues whether or not the stock distribution and the cash distributions are steps in an overall plan or are independent or unrelated.ⁿ¹⁷ All that need occur is that there be a receipt of cash or property by some shareholders and an increase in the proportionate interest of other shareholders. Moreover, there is no requirement that both elements of *IRC Section 305(b)(2)* occur in the form of a distribution as long as the result of some distribution is that certain shareholders acquire cash or property while others increase their proportionate interests.ⁿ¹⁸ For example, the requirements of *IRC Section 305(b)(2)* will be satisfied if a corporation makes a stock distribution to its shareholders and then, pursuant to prearrangement, a related corporation purchases the stock in a transaction treated as a redemption under Section 304.ⁿ¹⁹ However, where the interval between the receipt of cash or property and the stock dividend is more than thirty-six months, the stock distribution will be nontaxable unless the distribution of cash or property and the distribution of stock are made pursuant to a plan.ⁿ²⁰

[ii] Constructive Disproportionate Distributions. The proportionate interest of a shareholder can be increased not only by the payment of a stock dividend to him and not to others, but also by increasing the ratio at which stock, convertible securities, or rights that he owns can be converted into other stock, by decreasing the ratio at which stock, convertible securities, or rights owned by others can be converted into stock of the class he owns, or by the periodic redemption of stock owned by other shareholders. *IRC Section 305(c)* authorizes the Treasury to prescribe Regulations governing the extent to which "a change in conversion ratio, a change in redemption price, a difference between redemption price and issue price, a redemption which is treated as a distribution to which *IRC Section 301* applies, or any transaction (including a recapitalization) having a similar effect on the interest of any shareholder" will be treated as a constructive disproportionate distribution.ⁿ²¹ And the Treasury has done so, and seems most concerned with two problems--adjustments in conversion ratios following stock dividends and periodic redemption schemes.

[iii] Adjustments in Conversion Ratios. Under the Regulations, an increase in proportionate interest in assets or earnings and profits will be deemed to have occurred if a corporation (1) has convertible stock or securities outstanding upon which it pays dividends or interest in money or property, (2) distributes a stock dividend on the stock with respect to which the convertible stock or securities are convertible, and (3) fails to fully adjust the conversion ratio or conversion price to reflect the stock dividend.ⁿ²² In general, the presence of an antidilution formula should guard against the lack of adequate adjustment in ratio or price, but if the formula provides for a credit where stock is issued for a consideration in excess of the conversion price, the requirement for a full adjustment may not be met.ⁿ²³

To prevent the stock dividend from being treated as a taxable distribution, the distributing corporation must make the required adjustment in conversion ratio or conversion price as of the date of distribution of the stock dividend or must elect to do so no later than the earlier of (a) three years after the date of the stock dividend, or (b) the date as of which the aggregate stock dividends for which adjustment of the conversion ratio has not previously been made total at least 3 percent of the stock issued and outstanding on the date of the first such stock dividend.ⁿ²⁴ The election to make the adjustment is made by the distributing corporation in a statement attached to its income tax return for the taxable year during which the stock dividend is distributed.ⁿ²⁵ Such statement must indicate that an adjustment will be made as provided in the Regulations and must also contain a description of the antidilution provisions under which the adjustment will be made.ⁿ²⁶

The foregoing rules may be illustrated by the following examples:

Example 1:

X Corp. has a single class of common stock outstanding. It also has outstanding interest-paying debentures convertible into common stock at a fixed conversion ratio that is not subject to adjustment in the event stock dividends are paid on the common stock. In such case, any distribution of stock with respect to the common stock will be treated as a taxable stock dividend under *IRC Section 305(b)(2)*. There is an increase in the proportionate interest of the common shareholders, while the holders of convertible securities--treated as stockholders for the purpose of determining whether a distribution is disproportionate--receive only cash in the form of interest.

Example 2:

Assume the same facts in Example 1, except that the conversion ratio must be adjusted to reflect stock dividends paid with respect to the common stock. Any distribution of stock to the shareholders will now be nontaxable since the required adjustment in conversion ratio will prevent the distribution from working an increase in the proportionate interests of the common stockholders. This will hold true even though no adjustment is required until the stock dividends equal 3 percent of the common stock issued and outstanding on the date of the first such stock dividend, provided, of course, the corporation files the statement and information prescribed by the Regulations and discussed above.

Example 3:

Assume the same facts as in Example 1, except that the conversion feature is contained in preferred stock

that pays no dividends, but is redeemable in ten years at a price in excess of the issue price. Under *IRC Sections 305(b)(4)* and *305(c)*, the redemption price may be treated as a taxable stock dividend paid with respect to the preferred stock.ⁿ²⁷ If it is, is it also treated as a distribution of property for purposes of *IRC Section 305(b)(2)*? The Regulations indicate that it must be so treated, the result being that a distribution of common stock with respect to the outstanding common stock of the corporation will be a distribution that is subject to tax.ⁿ²⁸ It is questionable whether Congress intended that a distribution do double duty, that is, be taxed itself under one provision of *IRC Section 305(b)* and, at the same time, play a role in the taxation of the other distribution under a different portion of the section.

The Regulations continue in force the provisions of the 1969 Regulations that a taxable stock dividend is produced by an increase or decrease in conversion ratio coupled with the payment of cash dividends. For example, if class A shares are convertible into class B shares at an increasing rate, and the corporation distributes cash dividends to the holders of class B stock, the increase in conversion ratio will be treated as a stock dividend that results in an increase in the proportionate interests of the class A shareholders, and, thus, as a distribution subject to the provisions of *IRC Section 305(b)(2)*.ⁿ²⁹ On the other hand, a reduction in the conversion ratio of the class A shares due to the payment of cash dividends on those shares will work an increase in the proportionate interest of the class B shareholders. In that event, the holders of class B stock will be the ones in receipt of a taxable stock dividend.ⁿ³⁰

[iv] Periodic Redemption Plans. Suppose a corporation has two classes of common stock outstanding. If it redeems the shares of one class, the proportionate interests of the shareholders in the other class is increased. The same result would obtain if the corporation had only a single class of stock outstanding and redeemed the shares of some, but not all, of the shareholders; the nonredeeming shareholders would realize an increase in their proportionate interests in the corporation.

If the redemption in the latter case is taxable under *IRC Section 301*, that is, is a redemption that is essentially equivalent to a dividend, then the shareholders whose shares are not redeemed and whose proportionate interests are thereby increased, will be taxed under *IRC Section 305(b)(2)*. The redemption is treated as an actual distribution of cash to the shareholders whose stock is redeemed and as a constructive distribution of stock to the nonredeemed shareholders.ⁿ³¹ The amount of the constructive distribution is measured by the fair market value of the number of shares that each nonredeemed shareholder would have received prior to the redemption in order to increase his ownership interest to the percentage held following the redemption.ⁿ³² To illustrate:

Example 1:

A Corporation has 1,000 shares of stock outstanding. The shares are owned equally by ten shareholders, one of whom is *T*. A Corporation adopts a plan for periodic redemptions which calls for the redemption annually of 5 percent of each shareholder's stock. During the year, each of the shareholders other than *T* redeems 5 shares of his stock for cash. Assuming that the redemptions are treated as dividends under *IRC Section 301*, *T* is deemed to have received a taxable distribution of 5.25 shares. The increase is determined by computing the number of shares that *T* would have received if the corporation had sought to increase his interest immediately prior to the redemption by the same percentage that it did increase by reason of the redemptions. The computation is in two steps:

(a) First compute the percentage owned by *T* following the redemption:

Total shares owned by <i>T</i>	=	10.47 percent
Total shares outstanding		

(b) Next compute the number of shares that the corporation would have been required to distribute prior to the redemption in order to raise *T*'s ownership percentage from 10 percent to 10.47 percent.

$$\frac{100 + X}{1,000 + X} = .1047$$

$$X = 5.25$$

The value of each share deemed to be distributive to *T* is then determined by dividing the aggregate fair market value of the shares actually outstanding after the redemption (955) by the number of shares that would have been outstanding if the distribution had taken place prior to the redemption (1005.25).ⁿ³³

Example 2:

Assume the same facts as in Example 1, except that *T* owns 150 shares and that *S*, a shareholder owning fifty shares, also elects not to redeem his shares. The computation of the number of shares deemed distributed to *S* and *T* is made in the aggregate,ⁿ³⁴ and takes the following form:

(a) Compute the percentage owned by *S* and *T* following the redemption:

$$\frac{150}{960} + \frac{50}{960} = 20.83 \text{ percent}$$

(b) Compute the additional shares deemed to have been distributed to *S* and *T*:

$$\frac{200 + X}{1,000 + X} = .2083$$

$$X = 10.48$$

(c) Compute the shares deemed to have been distributed to each of the two shareholders:

To *S*:

$$\begin{array}{r} 50 \\ 200 \end{array} \times 10.48 = 2.62$$

To *T*:

$$\begin{array}{r} 150 \\ 200 \end{array} \times 10.48 = 7.86$$

The value of each of the shares deemed distributed to *S* and *T* is determined by dividing 1010.48 into the aggregate value of the 960 shares actually outstanding immediately after the redemption.

The regulatory authority granted the Treasury under *IRC Section 305(c)* is not meant to be used to bring isolated redemptions of stock under the disproportionate rule of *IRC Section 305(b)(2)*. This is clear both from the committee reports accompanying the Tax Reform Act of 1969,ⁿ³⁵ the Regulations,ⁿ³⁶ and Service rulings.ⁿ³⁷

[v] Distributions of Cash in Lieu of Fractional Shares. Suppose that a corporation, in voting a stock dividend, declares that only full shares will be issued and that cash will be distributed in lieu of fractional shares to which

shareholders would otherwise be entitled. Does this fact taint the entire distribution and cause it to be subject to tax under *IRC Section 305(b)(2)*? The answer is no,

"provided the purpose of the distribution of cash is to save the corporation the trouble, expense, and inconvenience of issuing and transferring fractional shares (or scrip representing fractional shares), or issuing full shares representing the sum of fractional shares, and not to give any particular group of shareholders an increased interest in the assets and earnings and profits of the corporation."ⁿ³⁸

A distribution of cash is deemed to be for the designated valid purpose, if the amount of cash paid annually in lieu of fractional shares is 5 percent or less of the fair market value (determined as to the date of distribution) of the stock distributed during the year.ⁿ³⁹

[vi] Reorganizations Utilizing Contingent Shares. A reorganization transaction may call for the withholding of a quantity of shares of the acquiring corporation's stock pending the resolution of certain contingencies, eg, the determination of unliquidated but potentially substantial liabilities.ⁿ⁴⁰ Will the distribution of the additional shares to the former shareholders of the acquired corporation be subject to tax under *IRC Section 305(b)(2)* if made in conjunction with, or close in time to, a distribution of property to existing shareholders? The language of the statute seems sufficiently broad to cover the transaction. However, the Regulations provide that

"A transfer of stock (or rights to acquire stock) or an increase in the conversion ratio or redemption price of stock which represents an adjustment of the price to be paid by the distributing corporation in acquiring property is not within the purview of section 305 because it is not a distribution with respect to stock."ⁿ⁴¹

[b] Distributions of Common and Preferred. Under *IRC Section 305(b)(3)*, a distribution of stock is treated as a distribution to which *IRC Section 301* applies, and not as a nontaxable stock dividend, if it results in the receipt of preferred stock by some common shareholders and the receipt of common stock by other common shareholders. The provision is, in effect, an extension of the disproportionate distribution rule of *IRC Section 305(b)(2)*. Without it, a nontaxable increase in proportionate interest could be achieved by coupling the distribution of common stock with a distribution of preferred instead of cash or other property.

Application of *IRC Section 305(b)(3)* may be illustrated by the following:

Example 1:

X Corp. has both class A and class B common stock outstanding. Dividends on either class may be paid in stock or in cash and without regard to the medium of payment of dividends on the other class. A dividend is declared on class A stock payable in additional shares of that stock. At the same time, a dividend is declared on the class B common, but this dividend is payable in shares of a new issue of nonconvertible preferred stock. By reason of *IRC Section 305(b)(3)*, both distributions are removed from the protection of *IRC Section 305(a)* and made distributions to which *IRC Section 301* applies. It should be noted that the rule under discussion comes into play even though there is no affirmative showing of an increase in the proportionate interests of the holders of class A shares. Apparently such an increase is presumed from the nature of the transaction.ⁿ⁴²

Example 2:

Y Corp. has a single class of stock outstanding. During the year, it declares a dividend payable in shares of a newly authorized class of preferred that is convertible into common no later than six months from the date of distribution at a price only slightly higher than the market price of the common on the date of distribution. Taking into account the dividend rate, redemption provisions, the marketability of the convertible stock, and the conversion price, it is reasonable to assume that within a relatively short period of time some, but not all, of the shareholders will exercise the conversion privilege. This transaction is

viewed as the equivalent of the receipt of preferred stock by some common shareholders (those who do not exercise their conversion rights) and the receipt of common stock by other common shareholders (those who do), causing the distribution of the preferred to be treated as a taxable stock dividend.ⁿ⁴³

[c] Distributions on Preferred Stock.

[i] In General. A distribution of stock made with respect to preferred stock is rendered taxable by *IRC Section 305(b)(4)*. This subsection applies whether the distribution consists of common or preferred,ⁿ⁴⁴ whether it is actual or constructive,ⁿ⁴⁵ and whether it is disproportionate or not.ⁿ⁴⁶ However, the rule is inapplicable where the distribution is designed to increase the conversion ratio of convertible preferred stock, and is made solely to take account of a stock dividend, stock split, or similar eventⁿ⁴⁷ with respect to the stock into which the preferred may be converted.

The Regulations define the term "preferred stock" as stock, which in relation to other classes of stock outstanding, enjoys certain limited rights and privileges (e.g., dividend or liquidation priorities), but does not have a substantial participating interest in corporate growth.ⁿ⁴⁸ The Regulations continue that the distinguishing feature of preferred stock for purposes of *IRC Section 305(b)(4)* "is not its privileged position as such, but that such privileged position is limited and that such stock does not participate in corporate growth to any significant extent."ⁿ⁴⁹ However, the mere existence of a right to participate in future growth will not prevent stock that enjoys a priority as to dividends and liquidation from being treated as preferred stock if, taking into account all of the facts and circumstances,ⁿ⁵⁰ it is reasonable to anticipate that there is little likelihood of the stock actually participating in earnings and upon liquidation beyond its preferred interest.

[ii] Recapitalizations of Preferred. It will be remembered that prior to the 1969 amendments to *IRC Section 305*, a stock dividend was taxable if it was used to discharge preference dividends for the taxable year of the corporation in which the distribution was made or for the preceding taxable year. The cases reached by the old provision are now governed by *IRC Section 305(b)(4)*. But distributions in discharge of preference dividends that would have been nontaxable under prior law are now subject to tax, for they constitute distributions made with respect to preferred stock. Moreover, when *IRC Section 305(b)(4)* is coupled with *IRC Section 305(c)*, a recapitalization of preferred stock that includes the distribution of additional shares in discharge of accumulated dividends in arrears becomes partially taxable rather than wholly tax-exempt. On the other hand, if, as part of the recapitalization, the taxpayer gives up his right to dividend arrearages but receives nothing of identifiable value in return, the transaction will be treated as a nontaxable reorganization and not as a distribution subject to *IRC Section 305(b)(4)*. To illustrate:

Example 1:

Corporation X has outstanding 1,000 shares of 8 percent cumulative preferred stock with a par value of \$100 per share. 500 shares are owned by A and 500 shares by B. The corporation is 3 years in arrears on its dividends to the preferred shareholders. Pursuant to a recapitalization under *IRC Section 368(a)(1)(E)*, each share of preferred stock, including the right to dividend arrearages, is exchanged for 1.2 shares of new preferred stock which is worth, and has a liquidation value of, \$100 per share. The exchange has the effect of increasing the preferred shareholders' proportionate interest in the assets or earnings and profits of the corporation since the fair market value of the 1.2 shares of new preferred exceeds the issue price of the old. Accordingly, *IRC Section 305(b)(4)* and *IRC Section 305(c)* combine to produce a distribution of \$20 on each share of old preferred, which distribution will be governed by the provisions of *IRC Section 301*.ⁿ⁵¹

Example 2:

Corporation Y has 1,000 shares of nonvoting cumulative preferred stock and 10,000 shares of common stock outstanding. The issue price of the preferred is \$100 a share; the fair market value of the common is \$10 a share. The corporation is three years in arrears on its dividends to the preferred shareholders. Pursuant to a recapitalization under *IRC Section 368(a)(1)(E)*, the shareholders exchange their preferred stock, and their right to dividend arrearages, on the basis of one preferred share for ten shares of

common. The common continues to trade at \$10 a share following the transaction. Since the preferred shareholders receive \$100 in value of common stock for the preferred, they did not increase their proportionate interest in the assets or earnings and profits of the corporation. Therefore, the distribution is not one to which *IRC Section 305(b)(4)* applies.ⁿ⁵²

[iii] The Effect of an Excess Redemption Premium. Suppose a corporation issues preferred stock that does not pay dividends, but is redeemable after a stated period of time at a price in excess of the issue price. If the repurchase by the corporation is viewed solely as a redemption, the shareholder's gain will take on the character of capital gain.ⁿ⁵³ And, prior to 1969, this was the way the transaction was taxed even though the higher redemption price could be looked upon as a dividend substitute.

For stock issued after January 10, 1969 and before October 10, 1990,ⁿ⁵⁴ any increase in redemption price in excess of a reasonable call premium must be taxed as a constructive dividend received ratably over the period during which the preferred stock cannot be called for redemption.ⁿ⁵⁵ A redemption premium is considered to be reasonable if it is in the nature of a penalty for a premature redemption of the preferred stock and if such premium does not exceed the amount the corporation would be forced to pay to accomplish such premature redemption under market conditions existing at the time of issuance or if it is not in excess of 10 percent of the issue price on stock that is not redeemable for five years.ⁿ⁵⁶ For example:

Example 1:

Corporation X issues preferred stock for \$100 per share. The stock is redeemable in five years or any time thereafter for \$110. The redemption price at no time exceeds 10 percent of the issue price. The increase in the redemption price is not considered a distribution on preferred stock under *IRC Section 305(b)(4)*.ⁿ⁵⁷

Example 2:

Corporation W. issues preferred stock for \$100 per share. The stock pays no dividends but is redeemable in five years for \$185, with yearly increases thereafter of \$15. There are no facts to indicate that a call premium in excess of \$10 is reasonable. Since the increase in redemption price over the issue price exceeds the reasonable call premium to the extent of \$75, that amount will be deemed to be a substitute for the distribution of dividends on such stock. The shareholder is considered to receive on the last day of each year during the five-year period, a distribution on his preferred stock in an amount equal to 15 percent of the issue price. Each \$15 increase in the redemption price thereafter is considered to be a distribution on the preferred stock at the time each such increase becomes effective.ⁿ⁵⁸

Generally, for preferred stock issued after October 9, 1990, *IRC Section 305(c)* provides that regulations to be issued must provide that the economic accrual rule and the *de minimis* rule applicable to debt instruments issued with original issue discount will apply to preferred stock that is subject to mandatory redemption or a put at a premium regardless of whether the stock is callable.ⁿ⁵⁹ The original issue discount *de minimis* rule will normally not apply to preferred stock that is callable solely at the option of the issuer. Nonetheless, the economic accrual rule will apply to the entire call premium on the stock if the premium is considered to be unreasonable.

Regulations issued to implement *IRC Section 305(c)* focus primarily on stock callable at a premium at the option of the issuer. If stock is subject to an issuer call and, based on all the facts and circumstances as of the issue date, redemption pursuant to that right is more likely than not to occur, the redemption premium is treated as a constructive distribution of additional stock on preferred stock to be accounted for under the original issue discount rules of the Code.ⁿ⁶⁰ However, even if redemption is more likely than not to occur, the constructive distribution rule does not apply if the redemption premium is solely in the nature of a penalty for premature redemption.ⁿ⁶¹ In addition, constructive distribution treatment does not result if the redemption does not exceed a *de minimis* amount, as determined under the principles of *IRC Section 1273(a)(3)*.ⁿ⁶²

Redemption pursuant to an issuer's right is not treated as more likely than not to occur if:

- (1) the issuer and the holder are not related within the meaning of *IRC Section 267(b)* or *707(b)*, substituting the phrase '20 percent' for the phrase '50 percent' in those sections;
- (2) there are no arrangements that effectively require or are intended to compel the issuer to redeem the stock; and
- (3) exercise of the right to redeem would not reduce the yield of the stock as determined under principles similar to the original issue discount principles of *IRC Section 1272(a)* or the regulations under *IRC Sections 1271 through 1275*.ⁿ⁶³

Failure to meet the safe harbor described in the preceding sentence does not affect the determination of whether the right to redeem is more likely than not to occur.ⁿ⁶⁴

The constructive distribution rules apply to preferred stock if the issuer is required to redeem the stock at a specified time or the holder has the option (whether or not currently exercisable) to require the issuer to redeem the stock.ⁿ⁶⁵ However, the rules do not apply if the issuer's obligation to redeem or the holder's option to put the stock is subject to a contingency that is beyond the legal or practical approach of either the holder or holders as a group (or through a related party within the meaning of *IRC Section 267(b)* or *707(b)*), and that, based on all of the facts and circumstances as of the issue date, renders remote the likelihood of redemption. For this purpose, a contingency does not include the possibility of default, insolvency, or similar circumstances, or that a redemption may be precluded by applicable law which requires that the issuer have a particular level of capital, surplus, or similar items. A contingency also does not include an issuer's option to require earlier redemption of the stock.

If the provisions of the stock permit redemption at more than one time, the time and price at which redemption is most likely to occur must be determined based on all of the facts and circumstances as of the issue date. Any constructive distribution will be construed to result only with respect to the time and price so identified. However, if redemption does not occur at that identified time, the amount of any additional premium payable on any later redemption date, to the extent not previously treated as distributed, is treated as a constructive distribution over the period from the missed call or put date to the later redemption date.ⁿ⁶⁶

The issuer's determination as to whether there is a constructive distribution is binding on all holders of the stock, other than a holder that explicitly discloses that its determination differs from that of the issuer. Unless otherwise prescribed by the Service, the disclosure must be made on a statement attached to the holder's timely filed federal income tax return for the taxable year in which the holder acquired the stock.ⁿ⁶⁷

The constructive distribution rules are not limited to the actual issuer of the preferred stock. If the stock may be acquired by a person other than the issuer, the term 'issuer' includes that third person if (1) the rules would apply to the stock were the third person the issuer, and (2) acquisition of the stock by the third person would be treated as a redemption for tax purposes (under *IRC Section 304* or otherwise).ⁿ⁶⁸ In addition, if the issuer and the third person are members of the same affiliated group, the term 'issuer' includes the third person if a principal purpose of the arrangement is the avoidance of the constructive distribution rules.ⁿ⁶⁹ Finally, the agreement or arrangement for a person other than the issuer to acquire the stock may create a conversion transaction for purposes of *IRC Section 1258*.ⁿ⁷⁰

[d] Distributions of Convertible Preferred Stock. Pursuant to *IRC Section 305(b)(5)*, a distribution of convertible preferred stock is made a distribution of property to which *IRC Section 301* applies, "unless it is established to the satisfaction of the Secretary or his delegate that such distribution will not have the result described in [*IRC Section*

305(b)(2)]." Since a distribution of convertible preferred paid on an outstanding issue of preferred will be taxed in all events under *IRC Section 305(b)(4)*, the instant provision is effective only when the distribution is with respect to common stock.

The Regulations indicate that a distribution of convertible preferred stock is likely to result in a disproportionate distribution when both of the following conditions exist: (1) The conversion right must be exercised within a relatively short period of time after the distribution (e.g., four months);ⁿ⁷¹ and (2) taking into account such factors as the dividend rate, the redemption provisions, the marketability of the convertible stock, and the conversion price, it may be anticipated that some of the shareholders will convert their preferred while others will not.ⁿ⁷² The Regulations go on to state that where the conversion right may be exercised over a period of many years (say, twenty years)ⁿ⁷³ and the dividend rate is consistent with market conditions at the time of distribution, there is no basis for predicting at what time and to what extent the stock will be converted, and, therefore, it is unlikely that a disproportionate distribution will result.ⁿ⁷⁴ Where the breaking point is between four months and twenty years, the result remains uncertain and must await regulations, rulings, or court decisions.

[2] Basis of Stock or Stock Rights Received in Nontaxable Distributions.

No basis problems are encountered when *IRC Section 305(b)* turns a stock dividend into a taxable distribution. Since such a distribution is treated as one to which *IRC Section 301* applies,ⁿ¹ the basis of the stock received will be its fair market value.

Once the stock dividend is sheltered from taxation by Section 305(a), the basis of the original shares must be allocated between the old and new shares in proportion to the fair market values of each.ⁿ² For example, if a distribution of stock worth \$5,000 is made with respect to stock having a value of \$20,000 and a basis of \$10,000, the old stock will assume a basis of \$8,000 (20/25ths of \$10,000) and the new, a basis of \$2,000 (5/25ths of \$10,000).

When the distribution is of rights to acquire stock rather than stock itself, allocation in the manner prescribed in the preceding paragraph is made only if the rights are sold or exercised.ⁿ³ Thus, the lapse of rights received in a nontaxable distribution does not produce a tax loss. In addition, no allocation of basis is required, unless the taxpayer so elects, when the value of the rights on the date of distribution is less than 15 percent of the value of the stock on that date.ⁿ⁴

[3] Holding Period of Stock or Stock Rights Received in a Nontaxable Distribution.

By virtue of *IRC Section 1223(5)*, the holding period of stock received in a distribution rendered immune from taxation by *IRC Section 305(a)* includes the period during which the taxpayer held the stock with respect to which the stock dividend was paid.ⁿ¹ In similar fashion, the seller of stock rights received in a nontaxable distribution is permitted to tack the holding period of the stock to that of the rights, even when the basis of the rights is fixed at zero by Section 307(b)(1).ⁿ² However, exercise of the rights removes the ability to tack; the holding period of the acquired stock begins with the date of exercise.ⁿ³

FOOTNOTES:

(n1)Footnote 1. *IRC § 305(a)*. For purposes of *IRC § 305*, stock rights are treated as stock. *IRC § 305(d)*.

Payment of cash in lieu of fractional shares produce gain or loss, rather than ordinary income. This result is reached by treating the transaction as a distribution of the shares to the shareholders followed by a repurchase by the corporation. *Treas Reg § 1.305-3(c)*; *Rev Rul 66-365, 1966-2 CB 116* ; *Rev Rul 69-34 1969-1 CB 117* ; *Rev Rul 74-36, 1974-1 CB 85* .

The issuance of stock as part of a reorganization cannot be viewed as a distribution with respect to the stock of the distributing corporation, and is not governed by *IRC § 305*. *Rev Rul 82-158, 1982-2 CB 77* .

In 1934, the Service took the position that the receipt of rights to subscribe to bonds of the issuing corporation that are convertible into its stock did not result in income. *GCM 13414*, XIII-2 CB 124 (1934); *GCM 13275* XIII-2 CB 121 (1934). A 1956 letter ruling indicates that this will be the result if substantially all of the value of the rights is attributable to the conversion privilege. *Letter Ruling, June 27, 1956, P-H 1956 Fed Taxes P 76, 680*.

If the cash dividend were paid to the holders of the Class A convertible shares, and, by reason of such payment, the conversion ratio reduced, the Class B shareholders would be the recipients of a taxable dividend. *Treas Reg § 1.305-2(b)(2)*, Ex (4).

(n6)Footnote 6. See generally, Andrews & Wilson, "Stock Dividend Taxation Under the Tax Reform Act of 1969: Expansion of an Ominous Past," *13 Ariz L Rev 751 (1971)*; Bashian, "Stock Dividends and Section 305: Regulation and the Constitution," *1971 Duke L J 1105 (1971)*; Del Cotto & Wolf, "The Proportionate Interest Test of Section 305 and the Supreme Court," *27 Tax L Rev 49 (1971)*; Lee, "Tax Reform Act Shareholder Changes: Stock Dividends," *1971 So Calif Tax Inst 191*; Metzger, "The 'New' Section 305," *27 Tax L Rev 93 (1971)*; Tierney, "Proposed Regs Under Section 305 Amplify Treasury's Tough Posture on Stock Dividends," *35 J Tax'n 86 (1971)*; Youngwood, "New Rules Governing Stock Dividends and Stock Redemptions," *29 NYU Inst on Fed Tax 277 (1971)*.

(n7)Footnote 7. *IRC § 305(b)(1)*; *Rev Rul 79-42, 1979-1 CB 130*. Dividend reinvestment plans which provide only for the transfer of cash to a bank which purchases additional shares for electing shareholders are governed directly by *IRC § 301*, since the dividends are payable only in cash. *Rev Rul 77-149, 1977-1 CB 83*. Stock dividends immediately redeemable for cash at the option of the shareholder are taxable elective dividends under *IRC § 305(b)(1)*. *Rev Rul 76-258, 1976-2 CB 95*.

It will be difficult to argue that distributions of stock in connection with a dividend reinvestment plan are not taxable distributions. See *Birmingham v Commr, TC Memo 1994-69*, for a case in which a taxpayer tried to avoid taxation by claiming, unsuccessfully, that as long as distributions are in the form of shares, they remain a paper gain only, and no income should result until the stock is sold.

In *Rev Rul 83-68, 1983-1 CB 75*, the distribution of a stock dividend by the Federal Home Loan Bank to its member banks was treated as a distribution under *IRC § 301* because at least one of the member banks had the option to have all of the shares received as a stock dividend redeemed. However in *Frontier Savings Assn v Commr, 87 TC 665 (1986)*, *aff'd sub nom Colonial Savings Assn v Commr, 854 F2d 1001 (7th Cir 1988)*, *cert denied, 109 S Ct 1556*, *acq, 1990-1 CB 1*, the dividend was not taxable even though the practice was to redeem shares owned by member banks upon request; there was always discretion to refuse to redeem the shares. The Eighth Circuit reached the same result in *Western Savings & Loan Assn v Commr, 880 F2d 1005 (8th Cir 1989)*.

According to *Rev Rul 90-98, 1990-2 CB 56*, *Rev Rul 83-68* no longer represents the Service's position regarding whether a member bank receiving a stock dividend from an Federal Home Loan Bank has an election to receive stock or property within the meaning of *IRC § 305(b)(1)*. However, except in the case of a Federal Home Loan Bank acting pursuant to a federal statutory directive and in protection of the public interest, the Service will continue to apply the principles underlying *Rev Rul 83-68* and *IRC § 305(b)(1)* to a pattern of granting redemption requests in determining whether in substance the pattern confers an election to receive stock or property.

(n8)Footnote 8. *Rev Rul 79-42, 1979-1 CB 130*.

(n9)Footnote 9. *Treas Reg* § 1.305-2(a).

(n10)Footnote 10. *IRC* § 305(b)(2).

(n11)Footnote 11. *IRC* § 305(b)(3).

(n12)Footnote 12. *IRC* § 305(b)(4).

(n44)Footnote 44. *Treas Reg* § 1.305-5(d), Ex (1). Holders of cumulative preferred stock, on which dividends were in arrears, were given the option to receive an amount of common stock equal to, and in cancellation of, the credit balances in their accrued dividend accounts. The distribution of the common stock came within the purview of *IRC* § 305(b)(4). *Rev Rul 84-141, 1984-2 CB 80*.

(n45)Footnote 45. *Treas Reg* § 1.305-5(a).

(n46)Footnote 46. It has been argued that *IRC* § 305(b)(4) is meant to apply only when the distribution is disproportionate. Del Cotto & Wolf, "The Proportionate Interest Test of Section 305 and the Supreme Court," 27 *Tax L Rev* 49, 67-68 (1971).

(n47)Footnote 47. A distribution made to take into account the sale of stock at less than fair market value pursuant to a rights offering would be a "similar event." An adjustment made solely to take into account the distribution by a closed-end regulated investment company of a capital gain dividend with respect to the stock into which the preferred stock is convertible would not be. *Treas Reg* § 1.305-5(a).

(n48)Footnote 48. *Treas Reg* § 1.305-5(a). There is an express inclusion of "non-participating stock the terms of which require, in all events, periodic distributions with respect to it of stock or rights to acquire stock, provided the corporation has another class of stock outstanding." There is an express exclusion of convertible debentures.

(n49)Footnote 49. *Treas Reg* § 1.305-5(a); *Treas Reg* § 1.305-5(d), Examples (8) and (9).

(n50)Footnote 50. "Among the facts and circumstances to be considered are the prior and anticipated earnings per

share, the cash dividends per share, the book value per share, the extent of preference and of participation of each class, both absolutely and relative to each other, and any other facts which indicate whether or not the stock has a real and meaningful probability of actually participating in the earnings and growth of the corporation." *Treas Reg § 1.305-5(a)*; *Treas Reg § 1.305-5(d)*, Ex (8).

(n51)Footnote 51. *Treas Reg § 1.305-5(d)*, Ex (1). The amount of the distribution resulting from the recapitalization is the lesser of (a) the amount by which the fair market value or the liquidation preference, whichever is greater, of the stock received, exceeds the issue price of the stock surrendered, or (b) the amount of dividends in arrears. *Treas Reg § 1.305-7(c)(2)*. If there had not been any dividends in arrears, the distribution would have been nontaxable unless made pursuant to a plan to periodically increase the shareholders' proportionate interest in the corporation. *Treas Reg § 1.305-7(c)(1)*.

The preferred stock received in the recapitalization will continue to be treated as Section 306 stock even though the portion attributable to dividends in arrears is includable in gross income under *IRC § 305(b)(4)*: See Fetzer, "The 'New' Section 305," 27 *Tax L Rev* 93, 136 (1971). A discussion of *IRC § 306* can be found in Ch 7 *infra* .

(n52)Footnote 52. *Treas Reg § 1.305-7(c)(1)(ii)*.

(n53)Footnote 53. This assumes that the redemption meets the provisions of *IRC § 302(b)*. See § 5.02[2] *infra*.

(n54)Footnote 54. Transitional rules contained in the Tax Reform Act of 1969 and in the Omnibus Budget Reconciliation Act of 1990 can affect both dates.

(n55)Footnote 55. *Treas Reg § 1.305-5(b)(1)*.

(n56)Footnote 56. *Treas Reg § 1.305-5(b)(2)*.

In Rev Rul 75-179, 1975-1 *CB* 103 , shareholders of an acquired corporation in a statutory merger received for each share of their common stock an equal share of the acquiring corporation's new convertible preferred stock. Both the old and new stock were worth \$6 a share on the date of exchange. The new stock was (1) convertible into .55 shares of the acquiring corporation's common stock, (2) not callable by the corporation for a period of five years from the date of issuance, and (3) callable anytime thereafter, provided the common stock into which the preferred stock was convertible had a fair market value at least 25 percent greater than the call price on the date of the call. The redemption price at the end of the five year period was initially \$11 a share and thereafter declined at the rate of 10 cents a year to \$10.50 a share. Even though the redemption premium exceeded the 10 percent "safe harbor," the facts and circumstances led the Service to conclude that it would be to a shareholder's economic benefit to convert the preferred stock into common stock rather than to have the preferred stock called for redemption. (For example, the preferred stock could not be called for redemption at \$11 a share unless the value of the .55 shares of common stock into which each preferred share could be converted was 25 percent greater than \$11, or approximately \$13.75 a share.) Thus, the redemption premium was reasonable.

(n57)Footnote 57. *Treas Reg § 1.305-5(d)*, Ex (4).

(n58)Footnote 58. *Treas Reg § 1.305-5(d)*, Ex (5), (7).

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.07

§ 4.07 Stripped Preferred Stock

Stripped preferred stock purchased after April 30, 1993 is now treated in the same manner as a stripped bond.ⁿ¹ Under *IRC Section 305(e)(1)*, the purchaser of stripped preferred stock must include in gross income, during the period of time the stock is held, the same amount that would be includable if the stripped preferred stock were a bond issued on the purchase date having original issue discount equal to the excess of the redemption price of the stock over the purchase price.ⁿ² The amount included in income is treated as ordinary income.ⁿ³ A person who strips dividend rights from preferred stock, and, after April 30, 1993 disposes of the dividend rights, is treated as a purchaser of the stripped preferred stock on the date of disposition for a price equal to the person's adjusted basis in the stock.ⁿ⁴

Stripped preferred stock is stock (1) that is limited and preferred as to dividends and does not participate in corporate growth to any significant extent, (2) that has a fixed redemption price, and (3) with respect to which there has been a separation in ownership between such stock and any dividend on the stock that has not become payable.ⁿ⁵

FOOTNOTES:

(n1)Footnote 1. See Ch 17. Congress intends no inference regarding the treatment of stripped preferred stock for tax purposes with respect to issues not directly addressed by *IRC § 305(e)*, including the availability of the dividends received deduction to a holder of dividends stripped from the stock, the allocation of basis by the creator of the stock, or the proper characterization of a purported sale of stripped dividend rights. HR Rep No 213, 103d Cong, 2d Sess 82 (1993).

(n2)Footnote 2. Appropriate adjustments to basis are made for amounts includable in income under *IRC § 305(e)(1)*. *IRC § 305(e)(2)*.

(n3)Footnote 3. *IRC § 305(e)(4)*.

(n4)Footnote 4. *IRC § 305(e)(3)*.

CHAPTER 4 Dividend Distributions

1-4 Taxation of Securities Transactions § 4.08

§ 4.08 Effect on the Distributing Corporation

[1] Gain or Loss Resulting From the Distribution.

[a] General Rule. As a general rule, a corporation does not recognize gain or loss upon a distribution in respect of its stock of either (1) its stock, or rights to acquire such stock, or (2) property.ⁿ¹

[b] The Statutory Exceptions. The general nonrecognition rule is severely limited by *IRC Section 311(b)(1)*, which provides for the recognition of *gain* whenever the distributing corporation distributes appreciated property, other than an obligation of the distributing corporation.ⁿ² The amount of gain is determined by assuming that the property was sold to the distributee at fair market value.ⁿ³ For this purpose, if any of the distributed property is subject to a liability or the shareholder assumes a liability of the distributing corporation, the fair market value of the property is treated as not less than the amount of such liability.ⁿ⁴

If the property distributed consists of an interest in a partnership or trust, regulations to be promulgated may provide that the amount of recognized gain is to be computed without regard to any loss attributable to property contributed to the partnership or trust for the principal purpose of recognizing the loss on the distribution.ⁿ⁵

IRC Section 897(d)(1) requires gain to be recognized whenever a foreign corporation distributes a United States real property interest, unless the basis of the distributed property in the hands of the distributee is the same as the adjusted basis of the property before the distribution increased by the amount of any gain recognized by the distributing corporation. The amount of gain to be recognized is the excess of the fair market value of the distributed interest as of the time of distribution over its adjusted basis.

[2] Effect on Earnings and Profits.

[a] General Rule. The distribution of property by a corporation with respect to its stock requires a decrease in the earnings and profits of the corporation to the extent of (1) the amount of money, (2) the principal amount of the obligations of the distributing corporation, and (3) the adjusted basis of other property, so distributed.ⁿ¹ For example, if the corporation distributes property of a value of \$10,000, but with a basis in the hands of the corporation of \$5,000, the corporation will reduce earnings and profits by \$5,000. If the property is worth only \$4,000, the corporation still reduces its earnings and profits by \$5,000. The fact that an individual shareholder would have a dividend of \$10,000 in one case, and \$4,000 in the other, is of no moment.

The time when earnings and profits are decreased is an important consideration when planning the amount and nature of any distributions. To illustrate:

Example:

If a corporation which has accumulated earnings and profits of \$15,000, and no current earnings and profits, makes a cash distribution of \$10,000 and a distribution of property having a value of \$10,000 and a basis of \$5,000, the extent of dividend income will rest on the order of distribution. If the cash is distributed first, an individual shareholder need report only \$15,000 as dividend income. This result is produced by allocating \$10,000 of earnings and profits to the first distribution and the remaining \$5,000 to the second.ⁿ² The earnings and profits available at the time of the first distribution are decreased by \$10,000, the amount of money distributed. However, if the property is distributed first, the shareholder must report dividend income of \$20,000. Here the decrease in earnings and profits resulting from the first distribution is only \$5,000, the basis of the property, leaving \$10,000 in earnings and profits to cover the distribution of cash. If, instead of accumulated earnings and profits, the corporation has current earnings and profits of \$15,000, and if both distributions are made within the current year, the amount of dividend income will be \$15,000, no matter what the order of distribution; current earnings and profits are never reduced by distributions made during the taxable year.ⁿ³ If only one distribution was made in the current year, the nature of the distribution would be important in determining the amount to be carried to the following year as accumulated earnings and profits.

[b] Exceptions to the General Rule.

[i] Distributions of Appreciated Property. A distribution of appreciated property with a fair market value in excess of adjusted basis requires that earnings and profits first be increased by the amount of the excess of fair market value over basis, and then decreased by an amount equal to the fair market value of the distributed property.ⁿ⁴ For this purpose, the adjusted basis of property is its adjusted basis for purposes of computing earnings and profits.

[ii] Distributions of Property Subject to Liabilities. *IRC Section 312(c)* mandates "proper adjustment" to earnings and profits when property is distributed subject to a liability in connection with the distribution. The Regulations make clear what is meant by the term "proper adjustment." In essence, it consists of a reduction in the amount by which earnings and profits are ordinarily decreased, namely, the adjusted basis of the distributed property, by the amount of the liability.ⁿ⁵ Thus, if the corporation has earnings and profits of \$5,000 at a time when it distributes property with a value of \$5,000 and a basis of \$2,000, and subject to a mortgage of \$1,000, the proper adjustment to earnings and profits is a reduction of \$1,000 (\$2,000, the basis of the distributed property, less \$1,000, the amount of the mortgage).

[iii] Distributions of Stock Dividends and Stock Rights. A distribution of stock or stock rights that is sheltered from taxation by *IRC Section 305(a)* is not considered a distribution of earnings and profits, and so, no adjustment is made by reason of any such distribution.ⁿ⁶ On the other hand, if the distribution is rendered taxable by *IRC Section 305(b)*, earnings and profits are reduced by the fair market value of the portion of the distribution includable in income.ⁿ⁷

FOOTNOTES:

(n1)Footnote 1. *IRC § 311(a)*.

(n2)Footnote 2. In *Pope & Talbot, Inc v Commr*, 104 TC 574 (1995), *aff'd*, 162 F3d 1236 (9th Cir 1999), a corporation transferred all of its properties in one state to a partnership and then distributed partnership units to its shareholders. At issue was the proper way to measure the gain realized on the distribution. The taxpayer contended that gain was to be determined by reference to the value of the partnership units received by its shareholders; the Service took the position that the gain should be computed as if the corporation had sold its entire interest in the properties at

their fair market value on the date of distribution. The Tax Court upheld the Service's determination. Of interest is the fact that the distribution occurred in 1985 when the applicable provision read that the distributing corporation had to recognize gain "as if the property distributed had been sold at the time of distribution." *IRC § 311(b)(1)* now provides that gain must be recognized "as if [the] property were sold to the distributee at its fair market value." Query, whether the result would be different had the transfer and distribution taken place after the effective date of the 1986 legislation?

(n3)Footnote 3. In *South Tulsa Pathology Laboratory, Inc v Commr*, 118 TC 84 (2002) , a spinoff followed by an immediate sale of the distributed stock failed to qualify for nonrecognition treatment under *IRC § 355*, resulting in a dividend for the distributee shareholders. The court held that the best measure of fair market value was the price at which the distributed shares were sold.

(n4)Footnote 4. *IRC §§ 311(b)(2), 336(b)*.

(n5)Footnote 5. *IRC § 311(b)(3)*.

(n6)Footnote 1. *IRC § 312(a)*. If the distributed obligations have original issue discount, earnings and profits are decreased by the aggregate issue price of the obligations.

For this purpose, the adjusted basis of any property is its adjusted basis for purposes of computing earnings and profits. *IRC § 312(b)*.

(n7)Footnote 2. Accumulated earnings and profits are applied to distributions in chronological order, rather than ratably. *Treas Reg § 1.316-2(b)*.

(n8)Footnote 3. *IRC § 316(a)(2)*.

(n9)Footnote 4. *IRC § 312(b)(1)*. In no event can earnings and profits be decreased below zero.

CHAPTER 4A Fast-Pay Arrangements

1-4A Taxation of Securities Transactions § 4A.01

§ 4A.01 Introduction

IRC Section 7701(l) gives the Internal Revenue Service the ability to prescribe regulations recharacterizing any multiple-party financing transaction as a transaction directly among any two or more of such parties where it is determined that the recharacterization is appropriate to prevent avoidance. Final regulations relating to fast-pay arrangements were issued in January 2000, effective for tax years ending after February 26, 1997.

CHAPTER 4A Fast-Pay Arrangements

1-4A Taxation of Securities Transactions § 4A.02

§ 4A.02 Fast-Pay Arrangement, Fast-Pay Stock and Benefited Stock Defined

A fast-pay arrangement is any arrangement in which a corporation has fast-pay stock outstanding.ⁿ¹ Stock is fast-pay stock if it is structured so that dividends (as defined in *IRC Section 316*) paid by the corporation with respect to the stock are economically (in whole or in part) a return of the holder's investment, as opposed to only a return on the holder's investment.ⁿ² Unless clearly demonstrated otherwise, stock is presumed to be fast-pay stock if (1) it is structured to have a dividend rate that is reasonably expected to decline, as opposed to a dividend rate that is reasonably expected to fluctuate or remain constant, or (2) it is issued for an amount that exceeds (by more than a *de minimis* amount, as determined under the principles of *Regulations Section 1.1273-1(d)*)ⁿ³ the amount at which the holder can be compelled to dispose of the stock.

Generally, whether stock is fast-pay stock is determined based on all of the facts and circumstances, including any related agreements, such as options or forward contracts.ⁿ⁴ A related agreement includes any direct or indirect, oral or written, agreement between the holder of the stock, or between the holder of the stock and one or more other shareholders in the corporation. The determination that stock is fast-pay stock is made when the stock is issued, or for stock that is not originally fast-pay stock, whenever there is a significant modification in the terms of the stock or related agreements or a significant change in the relevant facts and circumstances. Stock is not fast pay stock solely because a redemption is treated as a dividend under *IRC Section 302(d)*,ⁿ⁵ unless there is a principal purpose of achieving the same economic and tax effect as a fast-pay arrangement.

Benefited stock is defined by reference to fast-pay stock. With respect to any fast-pay stock, all other stock in the corporation (including any other fast-pay stock having significantly different characteristics) is benefited stock.ⁿ⁶

Example 1:

X Corp. issues 1,000 shares of *A* stock and 1,000 shares of *B* stock for \$100 a share. By its terms, a share of *B* stock is reasonably expected to pay a dividend of \$9 a share in the first ten years that it is outstanding and a \$2 dividend thereafter. If *X Corp.* liquidates, the holder of a share of *B* stock is entitled to a preference equal to the share's issue price. Otherwise, the *B* stock cannot be redeemed at either the corporation's or the shareholder's option.

When issued, the *B* stock has a dividend rate that is reasonably expected to decline from an annual rate of 9 percent of its issue price to an annual rate of 2 percent. Because of this structured declining

dividend rate, the *B* stock is fast-pay stock, while the *A* stock is benefited stock.

Example 2:

Assume the same facts as in Example 1, except that a share of *X* Corp. is reasonably expected to pay a \$9 annual dividend with respect to the *B* stock as long as it is outstanding, and *X* Corp. has the right to redeem the *B* stock for \$50 at the end of 10 years. The *B* stock is structured so that the \$100 issue price of the *B* stock exceeds by more than a *de minimis* amount the \$50 price at which the shareholder can be compelled to dispose of the stock. This makes the *B* stock fast-pay stock and the *A* stock benefited stock.

Example 3:

A Corp. issues 500 shares of common stock for \$100 a share. Under its charter, *A* Corp. can issue warrants entitling the holder to acquire the stock at a price of \$200 a share until such time as *A* Corp. adopts a plan of liquidation. Under the charter, *A* Corp. can adopt a plan of liquidation if it is approved by 80 percent of its shareholders. The stock is purchased at original issue equally by *P* Corp. and *C* Corp., a tax-exempt entity. At the time of purchase, the two shareholders agree that, annually for a period of 10 years, *A* Corp. will redeem (and *C* Corp. will tender) 20 shares of stock in exchange for \$250 a share and 20 warrants. It is anticipated that, under *IRC Sections 302 and 301*, the annual payment to *C* Corp. will be treated as a dividend.

Considering all of the facts and circumstances, including the agreement between *P* Corp. and *C* Corp., *A* Corp.'s redemption of *C* Corp.'s stock is undertaken with a principal purpose of achieving the same economic and tax effect as a fast-pay arrangement. This causes the stock owned by *C* Corp. to be fast-pay stock and the stock owned by *P* Corp. to be benefited stock.

FOOTNOTES:

(n1)Footnote 1. A fast-pay arrangement is any arrangement in which a corporation has fast-pay stock outstanding for any part of its taxable year. *Treas Reg § 1.7701(l)-3(b)(1)*.

CHAPTER 4A Fast-Pay Arrangements

1-4A Taxation of Securities Transactions § 4A.03

§ 4A.03 Recharacterization of Fast-Pay Arrangements

If the corporation that has a fast-arrangement is either a regulated investment company (RIC) or a real estate investment trust (REIT), the fast-pay arrangement is automatically recharacterized.ⁿ¹ If the corporation is neither a RIC nor a REIT, the Commissioner can exercise discretion to recharacterize the fast-pay arrangement if it is determined that a principal purpose for the structure of the fast-pay arrangement is tax avoidance; the determination applies to all parties to the fast-pay arrangement, including transferees.ⁿ²

A fast-pay arrangement that is recharacterized is treated as an arrangement directly between the benefited shareholders and the fast-pay shareholders.ⁿ³ The resulting relationships are as follows:

- (1) The relationship between the benefited shareholders and the fast-pay shareholders is deemed to be one in which the benefited shareholders issue financial instruments (the financing instruments) directly to the fast-pay shareholders in exchange for cash equal to the fair market value of the fast-pay stock at the time of issuance (taking into account any related agreements).ⁿ⁴ The financing instruments have the same terms as the fast-pay stock. Therefore, the timing and amount of payments made with respect to the financing instruments always match the timing and amount of distributions made with respect to the fast-pay stock.
- (2) The benefited shareholders are deemed to contribute to the corporation the cash they receive for issuing the financing arrangements.ⁿ⁵ Distributions made with respect to the fast-pay stock are distributions made by the corporation with respect to the benefited stock.
- (3) The corporation is the paying agent for the benefited shareholders with respect to the financing instruments, but has no other relationship to the fast-pay shareholders.ⁿ⁶

Example 4:

Assume the same facts as in Example 1, except that (i) the issuer of the stock is a REIT, (ii) during the first ten years of the REIT's existence, persons holding a majority of the *B* shares must consent before the REIT can take any action that would result in the REIT liquidating or dissolving, merging or consolidating, losing its REIT status, or selling substantially all of its assets, and (iii) after the ten-year period, the REIT can take the specified actions without consent of the *B* shareholders if the shareholders

receive \$40 for their *B* stock.

The arrangement is a fast-pay arrangement because of the reasonably expected decline in dividend rate and the provision that the \$100 issue price of the *B* shares exceeds the \$40 price at which the shareholders can be compelled to dispose of the stock. Because the issuer is a REIT, the arrangement is recharacterized automatically as follows:

- (1) The *A* stock shareholders are treated as issuing financing instruments to the *B* stock shareholders in exchange for \$100,000 (\$100, the fair market value of each *B* share, multiplied by 1,000, the number of shares).
- (2) The *A* stock shareholders are treated as contributing \$200,000 to the REIT (the sum of the \$100,000 received for the financing instruments, and the \$100,000 actually paid for the *A* stock) in exchange for the *A* stock.
- (3) Each distribution with respect to the *B* stock is treated as a distribution with respect to the *A* stock.
- (4) The *A* stock shareholders are treated as making payments with respect to the financing instruments, with the REIT being treated as the paying agent of the financing instruments for the *A* stock shareholders.

Example 5:

Assume the same facts as in Example 3. Because *A Corp.* is neither a RIC nor a REIT, there is no automatic recharacterization. Instead, the fast-pay arrangement will be recharacterized only if the Commissioner determines that tax avoidance is a principal purpose for the structure of the fast-pay arrangement.

The regulations contain a special basis adjustment rule to ensure that unrealized gain on benefited stock is not inappropriately eliminated. Because the regulations do not apply to taxable years ending before February 27, 1997 (pre-effective years), a benefited shareholder will have economic income, but not taxable income, attributable to pre-effective years if the form of a fast-pay arrangement is respected for those years. The economic income is reflected as unrealized gain in the benefited stock. Thus, if a recharacterized fast-pay arrangement involved amounts accrued or paid in pre-effective years, a benefited shareholder must decrease its basis in any benefited stock by the amount that (i) its income attributable to the benefited stock (reduced by deductions attributable to the financing instruments) for pre-effective years, computed by recharacterizing the fast-pay arrangement and by treating the financing arrangements as debt, exceeds (ii) its income attributable to such stock for pre-effective years, computed without application of the recharacterization rules.ⁿ⁷

Example 6:

In June 1996, *A*, a calendar year taxpayer, acquired shares of REIT *R* benefited stock for \$30,000. In December 1996, *A* received dividends of \$200. Assume that, under the recharacterization rules, *A*'s 1996 income attributable to the benefited stock is \$2,400, *A*'s 1996 deduction attributable to the financing instruments is \$1,000, and *A*'s basis in the benefited stock is \$50,000. These facts require a \$1,200 reduction in *A*'s basis in the benefited stock. This is the amount by which *A*'s 1996 net income from the fast-pay arrangement as recharacterized (\$2,400 income less \$1,000 deduction) exceeds *A*'s income from the fast-pay arrangement computed without the recharacterization rules (\$200 dividends attributable to the benefited stock).

A taxpayer is prohibited from affirmatively using the automatic recharacterization rules if a principal purpose for using the rules is the avoidance of any tax imposed by the Internal Revenue Code.ⁿ⁸ With respect to such a taxpayer, the Commissioner may depart from the automatic recharacterization rules and treat (for all purposes of the Code) the fast-pay arrangement in accordance with its form or its economic substance. For example, if a foreign person acquires fast-pay stock in a REIT and a principal purpose for the acquisition is the reduction of U.S. withholding taxes by applying the automatic recharacterization rules, the Commissioner may, for purposes of determining the foreign person's U.S. tax consequences (including withholding tax) depart from the automatic recharacterization rules and treat the foreign person as holding fast-pay stock in the REIT.

For periods prior to April 1, 2000, a taxpayer can limit the amount of taxable income attributable to a recharacterized fast-pay arrangement to the taxable income that results if the fast-pay arrangement is recharacterized under either *Notice 97-21*ⁿ⁹ or the general recharacterization rules.ⁿ¹⁰ The recharacterization must be consistent for all such periods.

A shareholder that limits taxable income to the amount determined under *Notice 97-21* must include as an adjustment to taxable income that excess, if any, of the amount determined according to the general recharacterization rules over the amount determined under *Notice 97-21*.ⁿ¹¹ The adjustment must be made in the shareholder's first taxable year that includes April 1, 2000. The shareholder's books and records must include a statement identifying each fast-pay arrangement for which an adjustment must be made and providing the amount of the adjustment for each fast-pay arrangement.

FOOTNOTES:

(n1)Footnote 1. *Treas Reg § 1.7701(l)-3(c)(1)(i)*. RICs and REITs are discussed in Ch 12 and Ch 13, respectively.

(n2)Footnote 2. *Treas Reg § 1.7701(l)-3(c)(1)(ii)*.

(n3)Footnote 3. *Treas Reg § 1.7701(l)-3(c)(2)*. If there are multiple classes of benefited stock, the recharacterization rules apply among the different classes as appropriate to match the economic substance of the fast-pay arrangement. *Treas Reg § 1.7701(l)-3(c)(3)(ii)*.

(n4)Footnote 4. *Treas Reg § 1.7701(l)-3(c)(2)(i)*. The character of the financing instrument (eg, stock or debt) is not specified in the regulations, and must be determined under general tax principles looking at all of the facts and circumstances. *Treas Reg § 1.7701(l)-3(c)(3)(i)*.

(n5)Footnote 5. *Treas Reg § 1.7701(l)-3(c)(2)(ii)*. This results in an increase in the basis of the benefited shares.

(n6)Footnote 6. *Treas Reg § 1.7701(l)-3(c)(2)(iii)*.

(n7)Footnote 7. *Treas Reg § 1.7701(l)-3(c)(3)(iv)*.

(n8)Footnote 8. *Treas Reg § 1.7701(l)-3(d)*.

CHAPTER 4A Fast-Pay Arrangements

1-4A Taxation of Securities Transactions § 4A.04

§ 4A.04 Transactions Affecting Benefited Stock

In addition to any consideration actually paid and received upon a sale of benefited stock, the buyer is deemed to pay, and the seller is deemed to receive, the amount necessary to terminate the seller's position in the financing instruments at fair market value.ⁿ¹ In addition, the buyer is deemed to issue financing instruments to the fast-pay shareholders in exchange for the amount necessary to terminate the seller's position in the financing instruments. If the transaction affecting the benefited stock is other than a sale, the parties to the transaction must make appropriate arrangements to take into account the fast-pay arrangement.ⁿ²

Example 7:

Assume the same facts as in Examples 1 and 4. Near the end of Year 6, a person holding one share of *A* stock sells it for \$140 to a buyer who is unrelated to the REIT or to any of the *B* stock shareholders. At the time of sale, the amount needed to terminate the seller's position in the financing instrument is \$80.

The seller's amount realized is \$220, the sum of \$140 (the selling price) and \$80 (the amount needed to terminate the seller's position in the financing instrument at fair market value). The seller's gain realized is \$20 (\$220 amount realized less \$200 basis); the seller has no income or deduction with respect to terminating the seller's position in the financing instruments.

The buyer's basis is the same as the seller's amount realized, namely, \$220. In addition, the buyer is treated as issuing financing instruments to the fast-pay shareholders in exchange for \$80, the amount needed to terminate the seller's position in the financing instruments at fair market value.

CHAPTER 4A Fast-Pay Arrangements

1-4A Taxation of Securities Transactions § 4A.05

§ 4A.05 Reporting Requirements

A corporation (other than a controlled foreign corporation, a foreign personal holding company, or a passive foreign investment company) that has fast-pay stock outstanding at any time during the taxable year must attach a statement to its federal income tax return for the taxable year that says, "This fast-pay stock disclosure statement is required by section 1.7701(l)-3(f) of the income tax regulations."ⁿ¹ The statement must also identify the corporation that has outstanding fast-pay stock and must contain the date on which the fast-pay stock was issued, the terms of the fast-pay stock, and (to the extent the filing person knows or has reason to know such information) the names and taxpayer identification numbers of the shareholders of any stock that is not traded on an established securities market.

If a controlled foreign corporation (CFC) has fast-pay stock outstanding at any time during its taxable year (during which time it was a CFC), each controlling U.S. shareholder must attach the required statement to the shareholder's Form 5471 for the CFC's taxable year.ⁿ² If a foreign personal holding company (FPHC) has fast-pay stock outstanding at any time during its taxable year (during which time it was a FPHC), each U.S. citizen or resident who is an officer, director, or 10-percent shareholder of the FPHC must attach the statement to his or her Form 5471 for the FPHC's taxable year.ⁿ³

In the case of a passive foreign investment company (PFIC) that has fast-pay stock outstanding at any time during its taxable year (during which it was a PFIC), each shareholder that has elected to treat the PFIC as a qualified electing fund and knows or has reason to know that the PFIC has outstanding fast-pay stock must attach the required statement to its Form 8621 for the PFIC's taxable year.ⁿ⁴

CHAPTER 5 Distributions in Redemption of Stock

1-5 Taxation of Securities Transactions § 5.01

§ 5.01 Introduction

A sale of stock to a third party will either completely terminate the shareholder's interest in the corporation or reduce both his absolute and proportionate interests in the equity of the corporation. A redemption of his stock, that is, the acquisition of the stock by the corporation in exchange for its property,ⁿ¹ can have the same effect. However, a redemption need not produce any change in the percentage of outstanding stock which the shareholder continues to own. A pro rata redemption of a portion of the holdings of all stockholders will produce a change only in the number of shares owned by each; the proportionate interest of each shareholder will not be disturbed.

As a matter of policy, the same tax treatment should be afforded the selling stockholder and the redeeming stockholder, if the effect of the disposition is the same. This is the view that Congress has taken in legislating the tax consequences of redemptions. Where the redemption is in complete termination of the shareholder's holdings, is substantially disproportionate with respect to the shareholder, or is not essentially equivalent to a dividend, the redemption will be treated as an exchange, thus producing capital gain. Where the redemption serves only to remove corporate profits and is essentially equivalent to a dividend distribution, it will be taxed as a dividend.

CHAPTER 5 Distributions in Redemption of Stock

1-5 Taxation of Securities Transactions § 5.02

§ 5.02 Redemptions Under Section 302

[1] Constructive Ownership of Stock

Suppose the stock of a corporation is owned equally by a taxpayer and his wife. If half of the taxpayer's shares are redeemed and the effect of the redemption measured only by reference to the shares actually owned by the taxpayer, it is obvious that there has been a significant change in the taxpayer's interest in the corporation. Where prior to the redemption he owned one-half of the outstanding stock, he now owns one-third. If, however, the ownership by husband and wife is viewed as ownership by a single person, the redemption produced no change in ownership; husband and wife continue to own 100 percent of the outstanding stock of the corporation.

Congress deemed it more significant to consider the effect of a redemption in terms of the stock ownership of an economic unit than to look merely at the actual ownership of the redeeming shareholder. This is achieved through attribution--stock owned by one person is treated as constructively owned by another if the two stand in a specified relationship to each other. However, in no event is attribution required unless the constructive ownership rules are expressly made applicable.ⁿ¹

[a] Family Attribution. Under *IRC Section 318(a)(1)*, an individual is deemed to own the stock owned by his spouse,ⁿ² his children,ⁿ³ his grandchildren, and his parents. Special note should be taken of the fact that attribution may flow in only one direction between certain family relationships. Thus, while a grandfather will constructively own the stock owned by his grandchildren, they will not be deemed the owners of his stock. Furthermore, unlike other constructive ownership provisions of the Code,ⁿ⁴ there is no attribution between brothers and sisters.

Stock constructively owned by one family member through application of the family attribution rules is not considered owned by him for the purpose of reattributing ownership to still another family member.ⁿ⁵ But if shares are constructively owned by an individual by reason of some other attribution rule, those shares may be reattributed to another family member.ⁿ⁶ For example, if *A*, his son *B*, and his grandson *C* each owned 100 shares of *X Corp* stock, *A* and *B* would each be considered the owner of 300 shares (100 actually, 200 constructively), while *C* would be considered as owning only 200 shares (his 100 shares and the shares owned by *B*). If, in addition, *B* were considered the owner of another 50 shares due, say, to the trust attribution rules, those 50 shares would in turn be attributed to *A* and *C* under the family attribution rules.

[b] Attribution to and From Partnerships. Stock owned by a partnership is considered as owned proportionately

by its partners,ⁿ⁷ while stock owned by the partners is attributed in its entirety to the partnership.ⁿ⁸ The proportion attributed from partnership to partner is based upon the percentage interest of the partner in the partnership--a partner having a 50 percent interest in the partnership will constructively own 50 percent of each stock holding of the partnership.ⁿ⁹

Stock owned by a partner and therefore attributed to the partnership cannot then be reattributed from the partnership to another partner.ⁿ¹⁰ To illustrate, if *A* and *B* have equal interests in a partnership, and each also owns 100 shares of *X* Corp stock, the shares owned by *A* and *B* will be constructively owned by the partnership, but neither partner will be considered as owning more than the 100 shares that he actually owns.

Reattribution is permitted where the partnership is the actual owner and the partner, the constructive owner.ⁿ¹¹ Thus, if *A* has a 50 percent interest in a partnership which owns 100 shares of *X* Corp stock, the fifty shares constructively owned by *A* by reason of the partnership-partner attribution rule will also be constructively owned by any person (including any entity) to whom shares owned by *A* must be attributed.

[c] Attribution to and From Estates. The rules governing attribution to and from estates are the same as those imposed on partners and partnerships. Stock owned by an estate is considered as owned proportionately by its beneficiaries; stock owned by a beneficiary is constructively owned by the estate.ⁿ¹²

If stock owned by the decedent at his death is subject to administration for the purpose of paying claims against the estate and administration expenses, it will be treated as owned by the estate for the purpose of applying the attribution rules relating to estates. A local law providing for vesting of property in the decedent's heirs or legatees immediately upon death will not produce a contrary result.ⁿ¹³

A critical determination is whether a person is a beneficiary. The Regulations provide that the term "includes any person entitled to receive property of a decedent pursuant to a will or pursuant to laws of descent and distribution."ⁿ¹⁴ They further provide that a person loses beneficiary status (1) when he has received all the property to which he is entitled, (2) when he no longer has a claim against the estate by reason of having been a beneficiary, and (3) when there is only a remote possibility that the estate will find it necessary to seek a contribution from him to satisfy claims against the estate or payment of administration expenses.ⁿ¹⁵

Clearly, then, a residuary legatee will be a beneficiary until estate administration is concluded.ⁿ¹⁶ And it would seem that a specific legatee of a solvent estate would cease to be a beneficiary after his bequest is satisfied. However, as *Estate of Webber v. United States*ⁿ¹⁷ shows, mere payment of a legacy is not sufficient to remove one from beneficiary status. In *Webber*, satisfaction of the bequest preceded redemption of shares owned by the estate, which, in turn, preceded the estate's payment of estate and inheritance taxes. Under local law, the legatee was required to reimburse the estate for his proportionate share of all such taxes, something he failed to do until after the redemption. The claim which the estate had against the legatee for reimbursement of taxes was held sufficient to keep him in beneficiary status and to impute the shares owned by him to the estate.

Finally, in order to be a beneficiary, one must have a direct present interest in property held by the estate or in income produced by such property. This makes the life tenant of a testamentary trust a beneficiary, but denies beneficiary status to one whose interest is limited to a remainder interest, even where the interest is vested.ⁿ¹⁸

As in the case of partnerships and partners, shares attributed from individual (beneficiary) to entity (estate) cannot be reattributed, but reattribution is permitted when attribution runs from entity to individual.ⁿ¹⁹

[d] Attribution to and From Trusts. Stock owned by a trust (other than a tax-exempt employees' trust) will be constructively owned by its income beneficiaries and remaindermen in proportion to their respective actuarial interests in the trust.ⁿ²⁰ For example, if a trust owns 100 shares of *X* Corp. stock and, on an actuarial basis, the income

beneficiary has a 40 percent interest in the trust, and the remainderman a 60 percent interest therein, the income beneficiary will be considered to be the owner of forty shares of X Corp. stock and the remainderman considered the owner of sixty shares.

If the trust is considered a grantor trust under the provisions of *IRC Sections 671-678* of the Code, stock owned by the trust will be attributed to the person treated as the owner of the trust under said section.ⁿ²¹ It is unclear whether attribution to the grantor or other person treated as the substantial owner of a trust eliminates attribution to the beneficiaries of such trust. The only type of trust expressly excepted from the operation of *IRC Section 318(a)(2)(B)(i)* is "an employees' trust described in section 401(a) which is exempt from tax under section 501(a)." The legislative history would appear to make trust-beneficiary attribution applicable even in the case of grantor trusts, for, according to the Senate Report:

"[The] rule applies to ... all trusts including those relating to grantors and others treated as substantial owners but does not apply to employees' trusts described in section 401[a] which are exempt from tax under section 501(a)."ⁿ²²

The trust will be considered the constructive owner of stock directly or indirectly owned by a beneficiary, unless the beneficiary's interest in the trust (1) is a contingent interest and (2) taking into account the maximum exercise of discretion by the trustee in favor of the beneficiary, has an actuarial value which does not exceed 5 percent of the value of the trust property.ⁿ²³ If the beneficiary's interest is vested, his stock is attributed to the trust, irrespective of the value of the interest.ⁿ²⁴ Attribution is likewise required where the interest is contingent provided the actuarial value of the interest exceeds 5 percent of the value of the trust. It would appear that since the Code does not specify when an interest is vested or contingent, local law characterizations presumably control. However, the Service has ruled that, for purposes of *IRC Section 318*, an interest conditioned on survivorship is always contingent.ⁿ²⁵

Stock owned by the grantor or other person treated as the substantial owner of a grantor trust will be attributed to the trust.ⁿ²⁶ Here, too, it is unclear whether attribution from a grantor precludes attribution from a beneficiary.

Following the mold cast for partnerships and estates, stock constructively owned by a trust through attribution from a beneficiary or grantor will not be considered as owned by the trust for the purpose of making another the constructive owner.ⁿ²⁷ Stock attributed from a trust to a beneficiary or grantor is subject to further attribution.ⁿ²⁸

[e] Attribution to and From Corporations. Attribution of stock from corporation to shareholder and from shareholder to corporation will occur only when the shareholder owns, actually and constructively, at least 50 percent in value of the stock of the corporation.ⁿ²⁹ The ownership attributed from corporation to shareholder is proportionate to the shareholder's interest in the corporation; a shareholder owning 70 percent in value of the stock of the corporation will constructively own 70 percent of stock owned by the corporation.ⁿ³⁰ On the other hand, if attribution from shareholder to corporation is required at all, it is a total attribution of all stock owned by the shareholderⁿ³¹ with one exception--a corporation will not be deemed the constructive owner of its own stock.ⁿ³²

Any stock constructively owned by the corporation by attribution from a shareholder will not be reattributed from the corporation to any other shareholder.ⁿ³³ Stock owned by the corporation and attributed to a shareholder can again be attributed.ⁿ³⁴ For example, suppose A and B, unrelated persons, each own 50 percent of the stock of X Corp., and B and X Corp. each own 50 percent of the stock of Y Corp. If each corporation has 100 shares outstanding, the following will be the manner in which the shares of X Corp. and Y Corp. stock are actually and constructively owned:

Owner	X Corp. Stock	Y Corp. Stock
A	50 shares	25 shares
B	50 shares	75 shares
X Corp.	--	100shares

Y Corp.	50 shares	--

The X Corp. stock owned by A and B is actually owned by them. The X Corp. stock owned by Y Corp. is constructively owned by attribution from B, a 50 percent stockholder. Although X Corp. actually and constructively owns 100 shares of Y Corp. stock, only the fifty shares actually owned may be attributed proportionately to A and B. The fifty shares of Y Corp. stock constructively owned by X Corp. by attribution from B cannot be reattributed to A. Therefore, A constructively owns twenty-five shares of Y Corp stock (50 percent of fifty shares) while B actually owns fifty shares, and constructively owns twenty-five shares, of Y Corp. stock.

[f] The Effect of Options on Attribution. A person having an option to acquire stock is deemed the owner of such stock for the purpose of applying the attribution rules of *IRC Section 318*.ⁿ³⁵ So, if A has an option to acquire 100 shares of stock and A is B's father, B will be the constructive owner of the 100 shares through application of the option rule and the family attribution rule.

We saw before that stock constructively owned by a person by operation of the family attribution rule could not be reattributed to another family member. Thus, while A's son, B, will be the constructive owner of stock owned by A, B's son, C, will not be. If, however, B has an option to acquire A's stock, C will be the constructive owner of any shares subject to the option. B is considered as owning the stock under the option rule and not the family attribution rule.ⁿ³⁶

Another facet of the option ownership rule affects reattribution of stock constructively owned by an entity (partnership, estate, trust, or corporation). For example, we have seen that if A and B each own 50 percent of the stock of X Corp., and A also owns 100 shares of Y Corp. stock, X Corp. will be the constructive owner of the 100 shares of Y Corp. stock owned by A, but B will not be considered the owner of any Y Corp. shares. On the other hand, if X Corp. has an option to purchase A's Y Corp. stock, B will be considered the owner of the Y Corp. shares. Reattribution under *IRC Section 318(a)(2)(C)* of stock constructively owned by the corporation under *IRC Section 318(a)(3)(C)* is not precluded if the corporation also constructively owns stock under the option rules of *IRC Section 318(a)(4)*.ⁿ³⁷

An interesting application of *IRC Section 318(a)(4)* is presented by *Sorem v. Commissioner*,ⁿ³⁸ where employees holding stock options were considered as owning the stock for which they held options even though the stock was unissued. The unissued stock subject to the options was then included in the total stock outstanding for the purpose of testing the tax consequences of a transaction involving other shareholders. The Service will not follow *Sorem* insofar as it stands for the proposition that the total outstanding stock of a corporation includes unissued stock subject to options held by persons whose stock is not being redeemed or whose stock is not constructively owned by a redeeming shareholder.ⁿ³⁹

[2] Redemptions Treated as Exchanges of Stock

Under *IRC Section 302(a)*, a redemption of stock will "be treated as a distribution in part or full payment in exchange for the stock" if the redemption is (1) not essentially equivalent to a dividend, (2) substantially disproportionate with respect to the shareholder, (3) in complete redemption of all of the stock of the corporation owned by the shareholder, or (4) from a noncorporate shareholder in partial liquidation of the distributing corporation.ⁿ¹ With *IRC Section 302(a)* providing the necessary exchange requirement, a redemption meeting one of the prescribed tests will qualify as a capital transaction provided the redeemed stock constitutes a capital asset in the hands of the shareholder.ⁿ²

Two of the categories of redemptions--the substantially disproportionate redemption and the complete redemption of all stock owned by the shareholder--are "safe harbor" provisions, i.e., they are:

"[I]ntended to prescribe specific conditions from which the taxpayer may ascertain whether a given redemption will be taxable at rates applicable to the sale of assets or as a distribution of property not in

redemption of stock subject to Section 301."ⁿ³

The third category, the distribution not essentially equivalent to a dividend, is the taxpayer's last refuge, one which he should seek only if he cannot steer a course into the safe harbor. One thing is fairly certain: The shelter afforded by this category will be reached only after travel upon the stormy sea of litigation.

[a] Redemptions Not Essentially Equivalent to a Dividend

"It has taken several weeks of study to gain a fair comprehension of the applicable law from the myriad of judicial writings on this intricate statute [the predecessor of Section 302(b)(1)]. It makes one shudder to realize that ordinarily a question of fact of this kind is to be submitted to a jury if a jury is insisted upon."ⁿ⁴

Much of the difficulty which attended the determination of dividend equivalency under the 1939 Code stemmed from the fact that stock redemptions were included within the terms of the partial liquidation provisions. This led many courts to consider, as part of their decisional criteria, the presence or absence of a bona fide corporate business purpose,ⁿ⁵ and, in some cases, whether the transaction was the result of, or resulted in, a contraction of the corporation's business or narrowed its activities.ⁿ⁶ The commingling of corporate level factors with criteria which tested the redemption on the shareholder level, e.g., whether the transaction was pro rata among the shareholders or resulted in a substantial change in the ownership or control of the corporation,ⁿ⁷ led Congress to separate the provisions governing redemptions of stock from those concerned with partial liquidations. Although the rules for partial liquidations are once again united with those concerned with nonliquidating redemptions, it is clear that the testing criteria are different.

In its original version of the 1954 Code, the House eliminated the dividend equivalency test for nonliquidating redemptions and granted capital gain treatment just to substantially disproportionate redemptions and complete redemptions. The Senate, viewing the House approach as unduly restrictive,ⁿ⁸ reinserted the then prevailing rule that a redemption would be treated as an exchange, and not as a dividend, if it was not essentially equivalent to a dividend. In so doing, the Senate Finance Committee stated:

"The test intended to be incorporated in the interpretation of [*IRC Section 302(b)(1)*] is in general that currently employed under section 115(g)(1) of the 1939 Code. Your Committee further intends that in applying this test for the future that the inquiry will be devoted solely to the question of whether or not the transaction by its nature may properly be characterized as a sale of stock by the redeeming shareholder to the corporation."ⁿ⁹

By differentiating stock redemptions from partial liquidations, Congress seemingly removed any consideration of business purpose from the test of dividend equivalency under *IRC Section 302(b)(1)*. Yet even after the enactment of the 1954 Code, certain courts were willing to give at least some weight to the business motivation behind the distribution and redemption.ⁿ¹⁰ Indeed, on the appellate level, only the Second Circuit refused to inquire into the motive for the redemption; it looked strictly at the net effect of the distribution at the shareholder level, i.e., to see if the redemption produced the same result as the payment of a dividend.ⁿ¹¹ If it did, the distribution would be considered to have the effect of a dividend.

The death blow to business purpose as a criterion in determining dividend equivalency was finally dealt by the Supreme Court in *United States v. Davis*,ⁿ¹² a 1970 case involving the redemption of preferred stock which the taxpayer had originally purchased in order to increase the corporation's working capital, and thereby to qualify the corporation for a loan from a government agency. After the loan was repaid, the preferred stock was redeemed in accordance with a prior understanding. At the time of the redemption, the shareholders of the corporation were the redeeming shareholder, his son, and his daughter. In reversing the Sixth Circuit, which had held that the distribution was not essentially equivalent to a dividend on the ground that the redemption was the final step in a course of action which had a legitimate business

purpose, the Court looked to the legislative history quoted above and concluded that

"[B]y making the sole inquiry relevant for the future the narrow one whether the redemption could be characterized as a sale, Congress was apparently rejecting past court decisions that had also considered factors indicating the presence or absence of a tax-avoidance motive. ... We conclude that the Court of Appeals was therefore wrong in looking for a business purpose and considering it in deciding whether the redemption was equivalent to a dividend. Rather, we agree with the Court of Appeals for the Second Circuit that 'the business purpose of a transaction is irrelevant in determining dividend equivalence' under § 302(b)(1). *Hasbrook v. United States*, 343 F2d 811, 814 (1965)."n13

Dividend equivalence now means exactly that. If a redemption has the effect of a transfer of property from corporation to shareholder without any change in the shareholder's control over the corporation or his rights to its future earnings, the distribution will be essentially equivalent to a dividend; the presence of a good business motive for the distribution will not change the result. A redemption will come within *IRC Section 302(b)(1)* only if it results "in a meaningful reduction of the shareholder's proportionate interest in the corporation."n14

Application of the *Davis* criterion for dividend equivalence may not create as great a change in future results as might be expected. It had earlier been suggested that

"Despite the words used in most of [the] cases, ... the holdings in all but the exceptional case decided under section 302(b)(1) and its predecessor under the 1939 Code can be resolved by the application of one objective test: there must be a significant modification of shareholder interests."n15

Davis gives little aid in determining how great a departure from pro rata redemption is required before a reduction in shareholder interest is meaningful, since the taxpayer there actually and constructively owned 100 percent of the common stock of the corporation before and after the redemption of his preferred shares. And while *Davis* does make it clear that the attribution rules of *IRC Section 318(a)* apply to redemptions tested under *IRC Section 302(b)(1)*, a view previously advanced by the Regulationsn16 and by judicial decisions,n17 it does not indicate whether the constructive ownership rules are to be rigidly applied, or whether other facts and circumstances may be taken into account in determining whether a reduction is significant.

The role of attribution in determining dividend equivalence can be illustrated by the case of the father and son who each own 50 percent of the common stock of a corporation. A redemption of one-half of the father's shares would reduce his actual ownership to 33 1/3 percent, but would not affect his actual and constructive ownership; that would remain at 100 percent because of the family attribution rules. Strict application of these rules would mandate a finding of dividend equivalence, for there would be no reduction in the shareholder's interest in the corporation. But suppose conflict between father and son made the father's interest in fact a minority interest. Should this additional circumstance produce any change in result?

Prior to *Davis*, the Tax Court had on occasion relied on other facts and circumstances to circumvent strict application of the *IRC Section 318(a)* attribution rules and find a distribution not essentially equivalent to a dividend. In *Parker v. Commissioner*,n18 a change in actual ownership from 49.7 percent to 28.7 percent was matched by a reduction in actual and constructive ownership of only one percent. Nevertheless, because of a sharp and continuing disagreement between father and son, the court was able to conclude that the redemption brought about a significant change in control and, thus, that the redemption was not essentially equivalent to a dividend. Similar emphasis on other circumstances produced capital gain for the taxpayer in *Estate of Squier v. Commissioner*,n19 where direct ownership was reduced from 50.09 percent to 41.27 percent, and constructive ownership from 63.30 percent to 56.82 percent. The existence of a substantial minority interest (43.18 percent) held by an unrelated party, together with a sharp cleavage between the executor of the estate and those whose stock was attributed to it, led the Tax Court to decide that "the redemptions herein in fact resulted in a crucial reduction of the estate's *control* over the corporation."n20

In *Haft Trust v. Commissioner*,²¹ the Tax Court relied on *Davis* to conclude that the attribution rules of *IRC Section 318(a)* are to be applied irrespective of the personal relationships which exist among members of a family. In the opinion of the court, an interpretation of the statute which makes applicability of the attribution rules dependent upon whether there is discord among family members would frustrate the legislative purpose behind the rules and be inconsistent with the language of the statute and the rationale of *Davis*. The First Circuit reversed²² and remanded the *Haft Trust* case for a consideration of the effect of family hostility on the attribution rules.²³ The appellate court refused to find that *Davis* required an unyielding application of *IRC Section 318(a)*. Instead, it felt that *IRC Section 302(b)(1)* and *Davis* allow consideration of the facts and circumstances of each case.

The flexible approach suggested by the First Circuit and taken by the Tax Court prior to *Davis* seems more in keeping with the reason for the inclusion of *IRC Section 302(b)(1)* in the 1954 Code, namely, not to unduly restrict the ability of the taxpayer to achieve capital gain treatment when the redemption of his stock looks more like a sale than a dividend. If the presumptions underlying the constructive ownership rules are rebutted by the existence of other facts, mechanical application of these rules would seem to be unwarranted.²⁴ However, until the Supreme Court resolves this issue, one can expect the Service to press its contention that strict application of *IRC Section 318(a)* is required in determining dividend equivalence.²⁵

When does a redemption produce a "meaningful reduction in the shareholder's proportionate interest in the corporation"? Certainly it does not occur when the corporation has a single class of stock and the redemption is pro rata;²⁶ or the redeemed share holder's actual and constructive interest either increases²⁷ or remains unchanged and no special circumstances affecting application of the attribution rules are present.²⁸ In each instance, the amount received on the redemption would be the same as the amount which would have been received if a dividend were paid on the stock actually and constructively owned by the shareholder, and in each case the redemption bears the hallmark of a dividend--a distribution of earnings and profits which causes no change in basic relationships either between the shareholder and the corporation or between the shareholder and the other shareholders of the corporation.

Obviously, then, the question of whether a reduction in ownership interest is meaningful will be presented only when the redemption is not pro rata. Here one encounters difficulty for the courts, with rare exception, have failed to articulate the significance to be accorded to a particular alteration in stock ownership. A number of illustrations will point up the problem. In *Sorem v. Commissioner*,²⁹ the redemption changed the interests of two 50 percent shareholders to 43.77 percent and 37.91 percent, respectively, a reduction of 6.23 percent in one case and 12.09 percent in the other. In *Friend v. United States*,³⁰ the reduction was from 73 percent to 66 percent, a change of 7 percent. The redemption in *Leleux v. Commissioner*³¹ changed the shareholder's ownership ratio from 75 percent to 53.5 percent, while in *Estate of Squier v. Commissioner*,³² it went from 50.09 percent to 41.27 percent. The *Sorem* and *Squier* redemptions were held to be not essentially equivalent to a dividend; the *Friend* and *Leleux* distributions were considered to have the effect of a dividend.

The only rational basis for the difference in result rests with the retention of control in *Leleux* and *Friend* and the loss of control through the redemptions in *Sorem* and *Squier*.³³ Indeed, the Service has ruled that a redemption which results in a loss of dominant voting rights is one which produces a meaningful reduction and a distribution not essentially equivalent to a dividend.³⁴ But should retention of control automatically signal dividend equivalence? Clearly not, it would seem, if, as *Davis* states, the sole inquiry is whether the redemption can be characterized as a sale. Retention of control may be a factor in determining the presence or absence of a tax avoidance motive, but we have seen that *Davis* now makes motive an irrelevant consideration when testing a distribution to see if it has the effect of a dividend.³⁵

The point at which a change in the ownership ratio of a minority shareholder becomes significant is less obscure. If there is a decrease in voting and participation rights, the redemption should be accorded capital gains treatment, and the Service has so ruled.³⁶ However, there are cases in which dividend equivalence was found even though the redemption produced a reduction in interest.³⁷ And if one looks to some of the language employed by the courts, such

as the following, it would be impossible for any redemption from a minority shareholder to qualify under *IRC Section 302(b)(1)*:

"Prior to the redemption in this case, the taxpayer was a minority stockholder and could only exercise control by aligning himself with one or more of the other stockholders. After the redemption, he was still a minority stockholder who could only exercise control by aligning himself with other stockholders."³⁸

There can be no doubt that a redemption of a minority stockholder's shares can qualify for capital gain treatment under *IRC Section 302(b)(1)*. Any indication to the contrary is patently wrong. Indeed, the Service once argued that Congress intended to limit the provision to redemptions of nonvoting preferred stock and redemptions from minority shareholders.³⁹ It now considers such redemptions to be one of the purposes underlying the enactment of *IRC Section 302(b)(1)*.⁴⁰

A more definite pattern of decision emerges when the corporation has an issue of preferred stock outstanding and shares of that class are redeemed. Such a redemption will be essentially equivalent to a dividend if the shares are redeemed from a sole stockholder,⁴¹ or pro rata from a group of stockholders whose ownership of preferred is in the same proportion (or very close to the same proportion) as their ownership of common stock.⁴² Where the ownership of preferred does not parallel the holding of common, a redemption of preferred, even if pro rata, is likely to qualify under *IRC Section 302(b)(1)*.⁴³ To illustrate, in *Revenue Ruling 68-547*,⁴⁴ the preferred and common were owned by approximately 300 shareholders, but the shareholders owning common stock owned only 12 percent of the preferred. The redemption was held not to have the effect of a dividend, even as to the principal shareholder of the corporation who owned (actually and constructively) 60 percent of the common stock and 7 percent of the preferred. A comparable result was reached in *Revenue Ruling 56-540*,⁴⁵ where, of a total of 570 shareholders, 191 owned common stock, 313 owned preferred stock, while just sixty-six owned both common and preferred. Since the shareholders holding both classes of stock owned only 25 percent of the outstanding issue of preferred stock, a pattern of stock ownership between the holders of the two classes of stock did not exist, and so the redemption fit within *IRC Section 302(b)(1)*.

The extent of common stock ownership will not affect the non-dividend quality of a preferred stock redemption as long as there is no proportional relationship between the holding of common stock and the holding of preferred. Thus, in *Revenue Ruling 55-462*,⁴⁶ a redemption of fourteen of the fifteen preferred shares owned by one of two 50 percent shareholders was held to be not essentially equivalent to a dividend; the other shareholder held one share of preferred stock. In fact, while the *Davis* case was before the Sixth Circuit, the Government conceded that the redemption would have passed muster had it taken place while an unrelated party owned 50 percent of the stock.⁴⁷

An interesting variation on the usual form of redemption of stock in a corporation with a multiclass capitalization was presented by *Himmel v. Commissioner*,⁴⁸ where the taxpayer constructively owned 50 percent of the corporation's common stock and actually owned all of its voting and nonvoting preferred stock. A redemption of a portion of the taxpayer's nonvoting preferred stock was held by the Second Circuit to be not essentially equivalent to a dividend. In reaching this conclusion, the court looked not only at voting power (unchanged by the redemption), but also at the shareholder's right to participate in the profits of the corporation and his interest in the net worth of the corporation, and found significant changes produced by the redemption. However, the Service is of the opinion that, since *Himmel* was decided before the *Davis* case, it fails to reflect the development in the law represented by the *Davis* limitation on the applicability of *IRC Section 302(b)(1)* where there is no meaningful reduction in the shareholder's proportionate interest in the corporation.⁴⁹

The determination of dividend equivalence remains a question of fact to be determined by reference to the facts and circumstances of each case and not by the application of a hard and fast rule of law. The task of future cases will be to show the effect of the facts and circumstances of a particular situation on the significance of the reduction in proportionate interest produced by the redemption in issue.

[b] Substantially Disproportionate Redemptions. Under *IRC Section 302(b)(2)*, a redemption will avoid the possibility of dividend consequences under *IRC Section 301*, and be considered a distribution in exchange for the stock, if the redemption is substantially disproportionate with respect to the shareholder. A redemption will be so treated only if (1) immediately after the redemption the shareholder owns less than 50 percent of the voting stock of the corporation,ⁿ⁵⁰ (2) the proportion of voting stock (including voting preferred stock) owned by the shareholder immediately after the redemption is less than 80 percent of the proportion which he owned immediately prior to the redemption,ⁿ⁵¹ and (3) the proportion of common stock (voting and nonvoting) owned by the shareholder immediately after the redemption is less than 80 percent of the proportion which the shareholder owned immediately prior to the redemption.ⁿ⁵² The operation of *IRC Section 302(b)(2)* can be seen in the following illustration:

Example:

A and B each own 100 of the 200 shares of outstanding stock of X Corp. The corporation redeems twenty of A's shares. Although following the redemption, A owns less than 50 percent of the voting stock of the corporation, the redemption will not be substantially disproportionate since the percentage of the corporation's stock which he owns after the redemption (80/180 or 44.4 percent) is more than 80 percent of the percentage that he owned prior to the redemption (100/200 or 50 percent). For the redemption to have qualified under *IRC Section 302(b)(2)*, the corporation would have had to redeem 34 shares,ⁿ⁵³ making the post-redemption ownership percentage 39.8 percent, a ratio less than 80 percent of the 50 per cent interest owned before the redemption.ⁿ⁵⁴

The foregoing example also assumed that there was only one class of common stock outstanding. If there is more than one class of common stock, the fair market value of all of the common stock determines whether the requisite reduction in common stock ownership has occurred.ⁿ⁵⁵ The Service has taken the position that an aggregate, and not a class-by-class, approach should be used in testing whether the third prong of the substantially disproportionate test has been met.ⁿ⁵⁶

Example:

X Corp. has outstanding 100 shares of voting common stock and 300 shares of nonvoting common stock. Shareholder A owns 60 shares of voting stock and all of the shares of nonvoting stock; persons unrelated to A own the rest of the voting shares. A share of voting stock and a share of nonvoting stock are of approximately equal value. A redeems 30 of his voting shares and 270 of his nonvoting shares in a single transaction.

The redemption reduces A's percentage of voting stock from 60 percent (60 of 100 shares) to 43 percent (30 of 70 shares), satisfying the first two substantially disproportionate tests. If the third test were applied on a class-by-class basis, the redemption would fail to qualify; A still owns all of the outstanding nonvoting common stock. By applying the fair market value test on an aggregate basis, the third test is also satisfied. Before the transaction, A owned 90 percent of the total fair market value of all of the outstanding X Corp. common stock (360 of 400 shares stated to be of approximately equal value). After the redemption, A owns 60 percent of the total fair market value of X common stock (30 of 70 voting shares, 30 of 30 nonvoting shares). The percentage of common stock owned after the redemption is less than 80 percent of the percentage owned before the transaction.

The foregoing example assumed that A and B were unrelated persons. However, *IRC Section 302(c)(1)* calls for application of the attribution rules of *IRC Section 318(a)* in determining stock ownership, so that if A and B were, say, husband and wife, A would constructively own B's 100 shares both before and after the redemption and would be unable to qualify the redemption under *IRC Section 302(b)(2)*.

In addition, the example was cast in terms of a redemption from a single shareholder. Where the redemption covers

stock held by more than one person, the requirements of *IRC Section 302(b)(2)* are applied to each shareholder separately, making it possible for a redemption to be substantially disproportionate with respect to one shareholder, and not with respect to another.ⁿ⁵⁷ For example, if the corporation had redeemed 50 shares from *A* and ten shares from *B*, the redemption from *A* would fit the definition of a substantially disproportionate redemption (*A* would own roughly 36 percent of the outstanding shares of the corporation following the redemption as compared to 50 percent before the redemption), but the redemption from *B* would not; following the redemption *B* would own 90 of the 140 outstanding shares of stock, or more than 50 percent of the voting stock of the corporation.

Alert to the possibility that a nonqualifying multishareholder redemption could be made substantially disproportionate by staggering the time of each component distribution, Congress made *IRC Section 302(b)(2)* inapplicable to any redemption made pursuant to a plan calling for a series of redemptions "resulting in a distribution which (in the aggregate) is not substantially disproportionate with respect to the shareholder."ⁿ⁵⁸ Using the facts of the original example to illustrate, a redemption of 35 shares from *A* in June would qualify as a substantially disproportionate redemption,ⁿ⁵⁹ as would an August redemption of 40 shares from *B*,ⁿ⁶⁰ if both could be viewed as independent transactions. However, if the distributions were merely steps in a plan to redeem 75 shares, neither redemption would fit within *IRC Section 302(b)(2)*.ⁿ⁶¹

Since a substantially disproportionate redemption contemplates a reduction in the shareholder's ownership of voting stock, a redemption of nonvoting preferred stock alone can never be substantially disproportionate.ⁿ⁶² Such a redemption can qualify for capital treatment if it takes place in conjunction with a redemption covered by *IRC Section 302(b)(2)*.ⁿ⁶³ A redemption of voting preferred stock alone, or of both voting and nonvoting preferred stock, can qualify under *IRC Section 302(b)(2)* only if the shareholder owns no common stock. Otherwise the shareholder will be called upon to meet the 80 percent requirement relative to common stock, and be unable to do so.

[c] Complete Redemptions. A redemption is treated as an exchange of stock if it is in complete redemption of all of the shareholder's stock in the corporation.ⁿ⁶⁴ This does not represent a change in the law as it existed prior to the 1954 Code; complete redemptions were considered to be not essentially equivalent to a dividend.ⁿ⁶⁵ The major contribution of the 1954 legislation comes in the clarification of the consequences of a complete redemption of a shareholder's interest in a situation where there is family ownership of other shares of stock in the corporation. *IRC Section 302(c)(2)* eliminates family attribution (but not any other form of attribution) in determining whether a complete redemption has been effected, provided there is compliance with certain prescribed conditions. Thus, if all of the shares actually owned by the shareholder are redeemed, and the only shares he constructively owns are considered so owned because of the family attribution rules of *IRC Section 318(a)(1)*,ⁿ⁶⁶ the redemption will meet the complete redemption test of *IRC Section 302(b)(3)*. But, if the shareholder constructively owns additional shares because of the application of some other attribution rule, the distribution cannot be considered a complete redemption.

Since family attribution waiver may be the only route to capital gains treatment, it is important to note that there are instances in which one, not the record owner of shares, has been deemed the stockholder for purposes of *IRC Section 302*. For example, a redemption of stock placed in a voting trust is a redemption from the holder of the voting trust certificates and not from the trust,ⁿ⁶⁷ while a redemption from a grantor trust is deemed a redemption from the person treated as the owner under the grantor trust rules.ⁿ⁶⁸

The extent to which one can carry family attribution waiver was the subject of controversy prior to the Tax Equity and Fiscal Responsibility Act of 1982. The Service was of the view that *IRC Section 302(c)(2)* eliminated family attribution only when the individual to whom shares would be attributed was the one whose stock was being redeemed.ⁿ⁶⁹ The Tax Court applied the waiver rule even when family attribution was part of a chain of attribution.ⁿ⁷⁰ To illustrate, suppose that stock in a corporation was owned by an individual, his son, and a trust in which the son was sole beneficiary. If all of the stock actually owned by the son and the trust was redeemed, it is clear that the distribution to the son qualified as a complete termination. However, when it came to the trust, the Service took the position that the father's stock must be attributed to the son and then to the trust. The Tax Court applied the waiver rule to ban attribution

from father to son, thereby preventing attribution from beneficiary to trust.ⁿ⁷¹ The 1982 legislation permits an entity to waive the family attribution rules if the entity and those through whom ownership is attributed to the entity ("related parties") join in the waiver.ⁿ⁷² Thus, in the sample given, the trust and son can waive family attribution if both meet the conditions of *IRC Section 302(c)(2)*.

The first prescribed condition upon which waiver of family attribution is predicated prohibits the distributee from retaining an interest in the corporation (including an interest as an officer, director, or employee) other than an interest as a creditor, or from acquiring any noncreditor interest (other than stock acquired by bequest or inheritance) within ten years from the date of the redemption.ⁿ⁷³ If an entity joins in waiving the family attribution rules, it, too, is prohibited from holding or acquiring an interest during the ten-year period following distribution.ⁿ⁷⁴

The interest-retention rule is strictly construed. Thus, waiver of attribution was precluded where the taxpayer continued as trustee of a voting trust,ⁿ⁷⁵ and where the distributee shareholder became custodian of shares of stock of the distributing corporation under the Uniform Gifts to Minors Act.ⁿ⁷⁶ However, a prohibited interest is not acquired if the former shareholder is named as the executor of an estate, or trustee of a testamentary trust, that owns stock in the corporation; the interest in such case is acquired by bequest or inheritance.ⁿ⁷⁷

It is unclear whether the statute is intended to proscribe any interest as an officer, director, or employee, or whether it is directed at active interests or those which bring financial reward to the distributee. The Service's position is unyielding: a person has an interest if he occupies the status of a director or employee, even if his powers are limited.ⁿ⁷⁸ On the other hand, the Tax Court refuses to hold that *IRC Section 302(c)(2)(A)(i)* contains a *per se* prohibition against the retention of any noncreditor interest, and, instead, focuses on whether the shareholder maintains a financial stake in, or exerts managerial control over, the corporation.ⁿ⁷⁹

A person will be deemed to have the permitted creditor interest only if his rights with respect to the corporation are not greater or broader in scope than necessary for the enforcement of his claim.ⁿ⁸⁰ The obligation that the distributee receives from the corporation must be evidence of a true debt and must not accord rights or contain terms that are commonly associated with a proprietary interest,ⁿ⁸¹ e.g., the debt cannot be subordinate to the claims of general creditors, nor can payment of the principal sum be dependent upon the earnings of the corporation.ⁿ⁸²

A second prerequisite for waiver is the filing of an agreement to notify the Service of any acquisition of an interest (other than the acquisition of stock by bequest or inheritance) within the ten-year period following the redemption.ⁿ⁸³ The regulations call for the agreement to be attached to a timely filed return for the taxable year in which the redemption occurs,ⁿ⁸⁴ a requirement which the Service once viewed as mandatory.ⁿ⁸⁵ However, the Service now permits a reasonable extension of time to file if it is established, to the satisfaction of the district director of the district in which the distributee resided at the time of filing the return for the taxable year in which the distribution occurred, that (1) there was reasonable cause for failing to file the agreement within the prescribed time, and (2) the request for extension is filed within a time that the district director considers reasonable under the circumstances.ⁿ⁸⁶

Family attribution will not be waived if (1) any portion of the stock redeemed was acquired, directly or indirectly, within the prior ten-year period from a person whose stock the taxpayer constructively owns under *IRC Section 318(a)*, or (2) at the time of the redemption stock in the corporation is held by a person whose ownership is attributable to the taxpayer and who acquired any stock in the corporation, directly or indirectly, from the taxpayer within the ten-year period preceding the redemption, unless the stock so acquired is redeemed along with the taxpayer's stock.ⁿ⁸⁷ Waiver is still possible if the distributee can show that his acquisition of stock from the related party or the related party's acquisition of stock from him "did not have as one of its principal purposes the avoidance of Federal income tax."ⁿ⁸⁸ The difference between an acquisition that is in furtherance of a tax avoidance scheme and one that is not can be seen by comparing (1) a gift of stock from father to son followed soon after by a redemption of the son's shares, the gift having been made in contemplation of the redemption and for the sole purpose of placing funds in the hands of the son, with (2) a gift of stock from father to son made for the purpose of inducing the son to enter the family business,

redemption coming only after the son left the employ of the corporation. The second situation is the one illustrative of an acquisition not motivated by an avoidance purpose.ⁿ⁸⁹

[d] Determining the Amount of Gain or Loss. The computation of gain or loss realized on a redemption of stock which qualifies as an exchange of stock, by virtue of *IRC Section 302(a)*, follows the pattern prescribed for all dispositions of property--the amount realized is compared with the adjusted basis of the stock. If the shareholder owns shares with varying bases and he can adequately identify the different lots, he can successfully control gain or loss by choosing the shares to be redeemed. But is this the only means by which the shareholder can exercise control over the tax consequences of the redemption, or is it also possible for him to achieve a desired result by choosing the number of shares to be redeemed? Put another way, can the consideration received on the redemption be greater or less than the market value of the surrendered shares? The Service has ruled that

"If a shareholder surrenders stock to a corporation for less than its fair market value, such surrender may be gift or compensation to the shareholders who remain interested in the corporation. Conversely, if a corporation pays more than fair market value for its stock, the payment may be compensation to the shareholder surrendering stock or may be a gift to him from the shareholders who remain interested in the corporation."ⁿ⁹⁰

Notwithstanding its ruling, the Service has not pressed the argument in litigation. An explanation may lie in the fact that many of the cases in which the consideration paid was an amount other than the fair market value of the stock involved redemptions which could be treated as exchanges only if found not essentially equivalent to a dividend, and that, in those cases, the Government focused solely on the issue of dividend equivalence.ⁿ⁹¹

A second problem concerns the deductibility of losses sustained in redemptions. Since such losses are incurred in a transaction entered into for profit, they meet the test of deductibility for individuals contained in *IRC Section 165(c)(2)*. However, if the shareholder owns directly or indirectly more than 50 percent of the outstanding stock of the corporation prior to the redemption, the loss will be disallowed by *IRC Section 267(a)(1)*.ⁿ⁹² The exception found therein for losses incurred in corporate liquidations has been held inapplicable to stock redemptions.ⁿ⁹³

[3] Redemptions Not Treated as Exchanges

Any redemption which cannot qualify as an exchange of stock will be subject to the rules of *IRC Section 301*.ⁿ¹ If the corporation has sufficient earnings and profits, the entire distribution will be taxed as a dividend. To the extent that earnings and profits are insufficient to cover the distribution, the basis of the shareholder's stock will be reduced, with any excess of the distribution over basis treated as a payment in exchange for the stock.

Of interest is the effect on basis of a redemption taxed wholly as a dividend. The problem does not arise in the ordinary distribution; the shareholder receiving the distribution continues to hold all his shares. But a different situation is presented when a redemption has the effect of a dividend, for here the shareholder has parted with some of his shares. The question posed is whether the basis of the surrendered shares is forever lost or whether it is transferred to the remaining shares. The only guide to the treatment of basis is found in the regulations, which direct "proper adjustment of the basis of the remaining stock ..." ⁿ² and which show by way of example that "proper adjustment" is achieved by adding the basis of the redeemed shares to the basis of the shares remaining after the distribution.ⁿ³

Suppose, however, application of the attribution rules causes a complete redemption of the shareholder's stock to be taxed as a dividend. Here, the regulations call for a shift of the "lost" basis to the shares owned by the attributing stockholder.ⁿ⁴

Recently proposed regulations would replace the reassignment of basis rules in *Treasury Regulation Section 1.302-2(c)* with new rules for determining the basis of stock remaining in the hands of a shareholder after a redemption which is

treated as "essentially equivalent to a dividend."⁵

When the redeemed shareholder continues to own stock in the corporation after the "essentially equivalent to a dividend" redemption, and the remaining shares are the same class of stock as the redeemed shares, any unused basis in the redeemed shares is added to the basis of the shareholder's remaining shares. Mechanically, the proposed regulations accomplish this reassignment by assuming a hypothetical recapitalization ("E" reorganization) in which the redeemed shareholder surrenders all the stock he owned directly in the redeemed class before the redemption, including the redeemed shares, and receives in exchange the number of shares he actually holds after the redemption. Basis is then assigned to the remaining shares under the rules of *IRC Section 358* and *Treasury Regulation Section 1.358-2*.⁶ The net result is similar to existing law except that, unlike the current regulations, the proposed regulations do not permit reassignment of basis if the redeemed shareholder's remaining shares are in a different class of stock from the shares that were redeemed.

When the redeemed shareholder either does not directly own any remaining shares in the corporation after the redemption, or does not own any shares of stock of the same class as the redeemed shares, the proposed regulations treat the redeemed shares as having been disposed of at a loss equal to their basis on the date of the redemption.⁷ The amount, character and source of the loss are determined on the date of the redemption,⁸ but the loss itself is not taken into account until the "inclusion date."⁹ The inclusion date occurs on the earlier of (1) the first date on which the facts are such that the redemption would have qualified as a "sale or exchange" under the criteria of *IRC Sections 301(b)(1), (b)(2) or (b)(3)* had the same facts been in existence on the actual date of the redemption, or (2) the first date on which all classes of the redeeming corporation's stock become worthless within the meaning of *IRC Section 165(g)*.¹⁰

Note that if a redemption is "essentially equivalent to a dividend" but the redeeming corporation has no current or accumulated earnings and profits, or the redemption price exceeds its earnings and profits, the non-dividend portion of the redemption distribution first reduces the basis in the stock to zero, and then is treated as a gain from the sale or exchange of property. *IRC Sections 301(c)(2) and (c)(3)*. The proposed regulations provide that the redeemed shareholder must treat the redemption proceeds as though they were distributed in respect of all of the shareholder's stock in the redeemed class, not merely the shares actually redeemed, on a pro rata basis.¹¹

The principles of the proposed regulations are illustrated in the following examples:

Example 1:

A owns 100 shares of Corporation X's one class of stock. 50 shares (Block 1) were acquired for \$2 a share (\$100) and 50 shares (Block 2) were acquired at a later date for \$4 per share (\$200). The remaining 100 shares of Corporation X are owned by B, A's wife. On December 31, 2009, X redeems all of A's Block 2 shares for \$6 per share (\$300). On the date of the redemption, X has no current or accumulated earnings and profits.

The redemption does not qualify as a "sale or exchange" under *IRC § 302(b)* because of A's remaining ownership of X stock as well as his constructive ownership of B's stock. However, X had no earnings and profits so the redemption proceeds are effectively taxed as though received in a "sale or exchange" under *IRC § 301(c)(2) and (c)(3)*. The proposed regulations treat the \$300 redemption proceeds as if distributed pro rata with respect to each share of X's 100 shares of stock (since all are in the same class), a distribution of \$3 per share (\$300/100). Since A's Block 1 shares have a basis of \$2 per share, A applies \$2 of the \$3 per share distribution to reduce the basis of the Block 1 shares to zero, leaving him with a gain of \$1 per Block 1 share or a total gain of \$50. The \$3 per share deemed distribution reduces the \$4 basis in A's Block 2 shares to \$1, leaving each of his 50 Block 2 share with a reduced basis of \$1 per share. A is further deemed to have exchanged all of his pre-redemption Block 1 and Block 2 shares for 50 "new" shares (i.e., the number of shares he has left) of Corporation X stock pursuant to an "E" reorganization/recapitalization. Under the principles of Proposed *Treasury Regulation Section 1.358-2*,

one half of A's 50 "new" shares inherits the post-redemption basis of his Block 1 shares, *i.e.*, zero, while the total basis of his Block 2 shares (\$50) is assigned pro rata to the remaining half ($\$50/25 \text{ shares} = \$2 \text{ per share}$).ⁿ¹²

Example 2:

The facts are the same as Example 1, except that on December 31, 2010, when X still has no current or accumulated earnings and profits, Corporation X redeems A's remaining 50 shares for \$.80 per share or \$40. A does not file an agreement described in *IRC Section 302(c)(2)(A)(iii)* waiving family attribution under *IRC Section 318*. Two years later, on December 31, 2012, B sells all of her stock in Corporation X to Z, an unrelated party.

As in the previous example, the tax consequences of the redemption of A's stock are determined by *IRC Section 301(c)(2)* and *(c)(3)*, and the proceeds are deemed distributed pro rata to each of A's 50 shares (\$.80 per share). Since half of A's shares have a zero basis, A has a \$20 gain on those shares ($25 \times \$.80 = \$20$). The remaining half (25 shares) have a basis of \$2 per share, leaving A with a net loss of \$1.20 per share ($\$.80 - \$2$) or a total loss of \$30 ($25 \text{ shares} \times \$1.20 \text{ per share}$). While the \$20 gain is taxable in 2010, the \$30 loss must be deferred until the "inclusion date." In the example, the inclusion date occurs in 2012, when B, A's wife, sells her stock to an unrelated party. Since B's shares have been sold outside the family they can no longer be attributed to A, and would not have been attributable to A on the redemption date had B's shares been sold on that date. Note, however, that although the loss deduction is deferred until 2012, the amount, character and source of the loss are determined as of December 31, 2010, the date on which A's shares were actually redeemed.ⁿ¹³

Example 3:

The facts are the same as Example 1 except (1) A's Block 2 shares represent preferred stock of X, and (2) X's earnings and profits are sufficient to cover the entire \$300 redemption price for the preferred.

In this example, the entire \$300 would be taxable to A as a dividend under *IRC § 301(c)(1)*. No part of A's basis of \$4 per share in the 50 shares of preferred would be deducted from the proceeds, nor would such basis be assigned to A's Block 1 common shares since the common is a different class of stock. A's \$200 basis in the 50 redeemed preferred shares becomes a "deferred loss" which cannot be taken into account until the inclusion date.ⁿ¹⁴

The proposed regulations leave open questions as to what happens to a deferred loss when the redeemed shareholder is a flow-through entity: a partnership, trust, or S corporation. The primary issue under study is whether an "outside" basis adjustment in an ownership interest in such an entity should reflect the deferred loss at the time of a dividend equivalent redemption or whether such an adjustment should await the inclusion date.^{n14.1}

On the final inclusion date, the redeemed shareholder is permitted to take into account the loss attributable to the basis of the redeemed stock, reduced by the amount of any loss taken into account on an accelerated loss inclusion date.ⁿ¹⁵ On an accelerated loss inclusion date, the redeemed shareholder is permitted to take into account the loss attributable to the basis of the redeemed stock to the extent of the lesser of (i) the amount of the loss reduced by the amount of any loss previously taken into account on an accelerated loss inclusion date, or (ii) the amount of gain recognized with respect to stock of the redeeming corporation that must be taken into account by the shareholder on the accelerated loss inclusion date.ⁿ¹⁶ Any loss attributable to the basis of the redeemed stock that has not been permitted to be taken into account is treated as a net operating loss carryforward or a capital loss carryforward, as applicable.ⁿ¹⁷ In applying the net operating loss carryforward and capital loss carryforward rules, the loss attributable to the basis of the redeemed stock is treated as occurring in the taxable year in which the shareholder is permitted to take the loss into account, not the taxable year of the redemption.ⁿ¹⁸ If the redeemed shareholder is a corporation, any loss attributable to the basis of redeemed stock is not reflected in the corporation's earnings and profits before it is taken into account.ⁿ¹⁹

[4] Effect of Redemptions on Other Shareholdersⁿ¹

Suppose that the outstanding stock of *X Corp.* is owned equally by *A* and *B*. Does a redemption of all of *A*'s stock have any tax effect on *B*? The answer turns on *B*'s relationship to the redemption, i.e., whether the redemption takes place at a time when *B* is subject to an unconditional obligation to purchase *A*'s stock. If he is, then the redemption will produce dividend income for *B*; ⁿ² if he is not, it will be without tax consequence for him.ⁿ³

The important determination is whether the continuing shareholder's obligation has become primary and unconditional at the time of the redemption, since dividend treatment will not automatically ensue from the fact that the corporation, in purchasing the shares, satisfies the remaining shareholder's executory contractual obligation.ⁿ⁴ Thus, if *A* and *B* had agreed that *B* would purchase *A*'s stock when *A* left the employ of *X Corp.* or when *A* died, *B*'s obligation would become primary and unconditional immediately upon the termination of *A*'s employment or upon his death.ⁿ⁵ If *B* were to assign his purchase contract to *X Corp.* prior to the happening of the specified event, a later redemption of *A*'s stock by the corporation would have no tax effect on *B*; an assignment after the event would give him a dividend.

On the other hand, an executory obligation can be so cast that it becomes unconditional only if the obligor takes further action with respect to his promise to purchase. For example, if *B* agrees that upon *A*'s death, he will either purchase *A*'s shares or vote the stock for liquidation, the existence of the ability to liquidate prevents the promise from becoming unconditional.ⁿ⁶ (But if after *A*'s death, *B* enters into a binding agreement to purchase the stock from *A*'s estate, a subsequent redemption of the shares will produce a dividend for *B*.) A similar result will obtain if the contract gives *A*'s estate the right to sell shares to anyone, and this right has not been foreclosed at the time of redemption.ⁿ⁷ Finally, the redemption will not adversely affect *B*, if his promise creates only a secondary liability, e.g., if he agrees to purchase the shares from *A*'s estate only in the event the corporation fails to do so.ⁿ⁸

Dividend consequences can be avoided, even though the continuing shareholder's promise appears to be primary and unconditional, if he is able to prove that he was acting merely as an agent or conduit for the real obligor, the corporation.ⁿ⁹ The claim is easier made than sustained; the burden of proving agency rests upon the taxpayer.ⁿ¹⁰

A number of cases have involved the redemption of closely held corporation stock from tax-exempt organizations to which the stock had been donated.ⁿ¹¹ In each of these cases, the Commissioner argued that the redemption saddled the contributing taxpayer with dividend income. In each, his attack proved singularly unsuccessful. Although the redemption was contemplated, the donee was never under an obligation to offer the shares to the corporation. Thus, in fact and in substance, the organization was the shareholder whose stock was redeemed.

See § 1.03[2][e] above for a discussion of the effect of a redemption of stock as part of a property settlement attendant upon a divorce.

An option exercisable only after the lapse of a fixed period of time is still an option for purposes of *IRC § 318(a)(4)*. *Rev Rul 89-64, 1989-1 CB 91 .*

The Sixth Circuit used the fact that an unrelated person held options to purchase stock of the corporation to find that a redemption produced a meaningful reduction in ownership. *Patterson Trust v US, 729 F2d 1089 (6th Cir 1984) .*

(n40)Footnote 1. *IRC § 302(b)(1)-(4).* Partial liquidations became subject to the redemption provisions as part of the Tax Equity and Fiscal Responsibility Act of 1982. The amendment affects distributions made after Aug 31, 1982. See Ch 6, for a discussion of partial liquidations.

Rev Proc 86-18, 1986-1 CB 551 , reprinted in Appendix B, sets forth the information to be included in a request for ruling under *IRC § 302*.

The Service will not issue rulings as to whether *IRC § 302(b)* applies if the consideration consists entirely or partly of a promise to pay an amount based or contingent upon future earnings, or if after the redemption, the corporation will use property owned by the shareholder and payments for such use depend on future earnings or are subordinate to claims of general creditors. Payments for the use of property are not considered to be dependent upon future earnings merely because they are based on a fixed percentage of sales or receipts. *Rev Proc 2009-3, 2009-1 IRB 107* . The no-ruling policy also applies if the shareholder's stock is placed in escrow to secure payment of notes given as part of the consideration, with the possibility that the stock will be returned to the shareholder upon the happening of specified defaults.

Rulings as to the tax effect of a redemption of stock for notes will not ordinarily be issued if the payments on the notes are to be made over a period of more than 15 years.

(n46)Footnote 7. Additional criteria considered by the courts included whether the initiative for the redemption came from the corporation or redeeming shareholders; whether earnings and profits were available for dividends and the prior dividend history of the corporation; and whether the redeemed stock was canceled and retired or held as treasury stock.

(n47)Footnote 8. S Rep No 1622, 83d Cong, 2d Sess 44-45 (1954).

(n48)Footnote 9. *Id* at 234. Not to be considered in making the determination of dividend equivalence is the fact that the distribution fails to satisfy the "safe harbor" redemption provisions. *IRC § 302(b)(5)*.

(n49)Footnote 10. *Kerr v Commr*, 326 F2d 225 (9th Cir 1964) , *cert denied* 377 US 963 ; *Commr v Berenbaum*, 369 F2d 337 (10th Cir 1966) ; *Bradbury v Commr*, 298 F2d 111 (1st Cir 1962) ; *Sorem v Commr*, 334 F2d 275 (10th Cir 1964) ; *Herzog v Commr*, TC Memo 1963-303 . This did not necessarily mean victory for the taxpayer; the presence of a bona fide business purpose standing alone was insufficient to overcome the net effect of the distribution.

(n50)Footnote 11. *Hasbrook v US*, 343 F2d 811 (2d Cir 1965) , cert denied 382 US 834 ; *Levin v Commr*, 385 F2d 521 (2d Cir 1967) ; *Blount v Commr*, 425 F2d 921 (2d Cir 1969) . The First Circuit was willing to apply the strict net effect test if the corporation had only one shareholder. *Wiseman v US*, 371 F2d 816 (1st Cir 1967) . The Third Circuit had adopted this test for cases arising under the 1939 Code. Eg, *Kessner v Commr*, 248 F2d 943 (3d Cir 1957) .

(n51)Footnote 12. 397 US 301 (1970) .

(n52)Footnote 13. 397 US at 311-312 .

(n53)Footnote 14. 397 US at 313 .

A meaningful reduction was found in *McDonald v Commr*, 52 TC 82 (1969) , where a redemption of the taxpayer's preferred stock was coupled with an exchange of his common stock for voting stock of another corporation. The Service's concession that the exchange and redemption were separate transactions led the Tax Court to decide a single issue, namely, the tax effect of the redemption. The Service is now of that view that there was only one transaction in which stock was acquired for stock and cash, and that *McDonald* was presented to the court on the basis of an improper characterization of the facts; it will not treat the case as an appropriate precedent. *Rev Rul 75-360, 1975-2 CB 110* .

(n54)Footnote 15. Moore, N 4, *supra*, at 252.

(n55)Footnote 16. *Treas Reg § 1.302-2(b)*.

(n56)Footnote 17. Eg, *Bradbury v Commr*, N 8, *supra*; *Estate of Squier v Commr*, 35 TC 950 (1961) , *nonacq 1978-2 CB 4* .

(n57)Footnote 18. *TC Memo 1961-176* .

(n58)Footnote 19. N 17, *supra*.

(n59)Footnote 20. *Id* at 955-956. Emphasis in the original.

(n60)Footnote 21. 61 TC 398 (1973) .

(n61)Footnote 22. 510 F2d 43 (1st Cir 1975) .

(n62)Footnote 23. No further proceedings were reported. The point was raised again in *Benjamin v Commr*, 66 TC 1084 (1976) , *affd* 592 F2d 1259 (5th Cir 1979) , but the Tax Court did not have to reach a decision on the issue for it found that the taxpayer retained absolute control of the corporation. *Haft Trust, Parker*, and *Squier* were distinguished on their facts.

The Service will not follow the decision in *Haft Trust*. *Rev Rul 80-26, 1980-1 CB 66* .

(n63)Footnote 24. Rigid application of the attribution rules is warranted when the redemption is tested under *IRC § 302(b)(2)*, or *IRC § 302(b)(3)*, for the question to be resolved in such case is not the effect of the distribution, but whether a specifically described test has been met.

(n64)Footnote 25. The Supreme Court did not consider this issue in *Davis* since there was no indication of disagreement between the taxpayer and his children.

The Tax Court continues to hold that family discord does not nullify the attribution rules, but recognizes that hostility can be relevant in determining whether a reduction in stock ownership is meaningful. *Cerone v Commr*, 87 TC (1986); *Metzger Trust v Commr*, 76 TC 42 (1981) , *affd* 693 F2d 459 (5th Cir 1982), *cert denied* 463 US 1207 .

1-5 Taxation of Securities Transactions § 5.02

(n65)Footnote 26. *US v Davis*, N 12, *supra*; *Television Indus, Inc v Commr*, 284 F2d 322 (2d Cir 1960) ; *Tabery v Commr*, 354 F2d 422 (9th Cir 1965) ; *Est of Freeman v Commr*, TC Memo 1964-306 ; *Treas Reg* § 1.302-2(b).

(n66)Footnote 27. *Title Ins & Trust Company v US*, 484 F2d 462 (9th Cir 1973) ; *Brown v US*, 345 F Supp 241 (SD Ohio 1972) , *affd* 32 AFTR2d 73-5712 (6th Cir 1973) , *cert denied* 414 US 1011 ; *Sawelson v Commr*, 61 TC 109 (1973) . The increase in interest resulted from the fact that stock owned by other shareholders was redeemed as well.

(n67)Footnote 28. Eg, *Bradbury v Commr*, N 10, *supra*; *Kerr v Commr*, N 10, *supra*; *Humphrey v Commr*, 39 TC 199 (1962) ; *Est of Runnels v Commr*, 54 TC 762 (1970) .

(n68)Footnote 29. See § 5.02[1], N 38, *supra*.

(n69)Footnote 30. 226 F Supp 814 (D Mass 1964) , *affd* 345 F2d 761 (1st Cir 1965) .

(n70)Footnote 31. 54 TC 408 (1970) . The case was decided less than three weeks prior to the Supreme Court's decision in *Davis*. The Tax Court based its decision in part on the absence of a business purpose and the lack of corporate contraction.

(n71)Footnote 32. N 17, *supra*.

(n72)Footnote 33. Retention of control also resulted in dividend equivalence in *Gloninger v Commr*, TC Memo 1963-310 , *affd per curiam* 339 F2d 211 (3d Cir 1964) ; *Levin v Commr*, N 11, *supra*; and *Rev Rul* 56-182, 1956-1 CB 157 . Loss of control was considered significant in *Rickey v US*, 592 F2d 1251 (5th Cir 1979) , *Parker*, N 18, *supra*; and *Ferris v US*, 135 F Supp 286 (Ct Cl 1955) .

A reduction in ownership from 78 percent to 50 percent was held to be a meaningful reduction in *REP Sales, Inc v US*, 57 AFTR2d 86-1282 (SD W Va 1986) ; the transaction had the effect of converting a controlling percentage into an equal interest. See also *Patterson Trust v US*, 729 F2d 1089 (6th Cir 1984) , where a reduction from 80 percent to 62.8 percent was meaningful since the taxpayer no longer held the two thirds vote necessary for control.

(n73)Footnote 34. *Rev Rul* 76-364, 1976-2 CB 91 ; *Rev Rul* 75-502, 1975-2 CB 111 . Other factors to consider besides the right to vote and exercise control are the right to participate in current earnings and accumulated surplus and the right to share in net assets on liquidation.

(n74)Footnote 35. Although *Davis* concerned a taxpayer who sought to overcome the net effect of the distribution, the tenor of the decision is that motive is irrelevant in all events. Thus, a redemption which produced a meaningful reduction should not be treated as the equivalent of a dividend because no business purpose was present.

(n75)Footnote 36. *Rev Rul* 76-385, 1976-2 CB 92 (interest in publicly listed corporation minimal); *Rev Rul* 75-512, 1975-2 CB 112 (19 percent reduction in interest; *Rev Rul* 56-183, 1956-1 CB 161 (stockholding decreased from 11 percent to 9 percent).

(n76)Footnote 37. Eg, *Bloch v US*, 261 F Supp 597 (SD Tex 1966) , *affd per curiam* 386 F2d 839 (5th Cir 1967)

(n77)Footnote 38. *Bloch v US*, 261 F Supp at 612-613 .

(n78)Footnote 39. The argument was advanced in *Parker v Commr*, N 18, *supra*.

(n79)Footnote 40. *Rev Rul* 76-385 , N 36, *supra*, citing S Rep No 1622, 83rd Cong, 2d Sess 44-45 (1954).

(n80)Footnote 41. *Ringmaster, Inc v Commr*, TC Memo 1962-187 ; *Plimer v Commr*, TC Memo 1961-218 . See also *Est of Lammerts v Commr*, 54 TC 420 (1970) , where the shares were redeemed from a person who actually and constructively owned all of the stock of the corporation. However, on appeal, the parties in *Lammerts* stipulated that the

transaction was governed by *IRC § 303* (§ 5.03, *infra*). *Lammerts v Commr*, 456 F2d 681 (2d Cir 1972) .

(n81)Footnote 42. *Ballenger v US*, 301 F2d 192 (4th Cir 1962) ; *Commr v Berenbaum*, N 10, *supra*; *Heman v Commr*, 283 F2d 227 (8th Cir 1960) ; *Rev Rul 59-258*, 1959-2 CB 105 .

(n82)Footnote 43. *Rev Rul 77-426*, 1977-2 CB 87 .

(n83)Footnote 44. 1968-2 CB 123 .

(n84)Footnote 45. 1956-2 CB 177 .

(n85)Footnote 46. 1955-2 CB 221 .

(n86)Footnote 47. 408 F2d 1139 (6th Cir 1969) ; see also *Commr v Est of Antrim*, 395 F2d 430 (4th Cir 1968) . In *Rev Rul 56-521*, 1956-2 CB 174 , a redemption of preferred stock from the sole owner of the common stock of a corporation was considered a dividend, but not so the redemption of preferred from his brother and sister.

(n87)Footnote 48. 338 F2d 815 (2d Cir 1964) .

(n88)Footnote 49. *Rev Rul 85-106*, 1985-32 CB 116 (no change in shareholder's actual and constructive ownership of voting and nonvoting common stock following redemption of preferred stock).

(n89)Footnote 50. *IRC § 302(b)(2)(B)*. The Regulations provide a general rule that stock which does not have voting rights until the happening of an event, such as a default in the payment of dividends on preferred stock, will not be considered voting stock until the happening of the specified event. *Treas Reg § 1.302-3(a)*. See also *Cornwall v Commr*, 48 TC 736 (1967) , *acq* 1968-1 CB 2 , where the redemption did not fit *IRC § 302(b)(2)* although the post-redemption ownership percentage was less than 80 percent of the preredemption percentage; voting rights were not keyed to stock ownership.

(n90)Footnote 51. *IRC § 302(b)(2)(C)*.

(n91)Footnote 52. *Id.* A redemption of voting preferred stock from a shareholder who owns no common stock can qualify as a substantially disproportionate redemption, if the tests prescribed by *IRC § 302(b)(2)* are met. *Rev Rul 81-41*, 1981-1 CB 121 .

(n92)Footnote 53. If:

X represents the number of shares which must be redeemed;

T represents the total shares outstanding prior to the redemption; and

S represents the number of shares owned by the shareholder prior to the redemption;

the number of shares which must be redeemed in a single shareholder redemption in order to make the postredemption percentage exactly 80 percent of the preredemption percentage is:

$$X = \frac{ST}{5T - 4S}$$

Since the statute requires the proportion of ownership to be less than 80 percent of the proportion owned before the

redemption, the next full share above the number indicated by the formula must be redeemed in order to satisfy the 80 percent requirement. (Eg, if $X = 43$, redeem 44; if $X = 43.2$, still redeem 44).

(n93)Footnote 54. The regulations state that the requirements of *IRC § 302(b)(2)* are to be applied "only with respect to stock which is issued and outstanding in the hands of the shareholders." *Treas Reg § 1.302-3(a)*. This would seem to preclude any reference to treasury stock. Yet in *Bloch v US*, N 37, *supra*, the court tested the redemption by considering treasury stock as outstanding stock. However, since the redemption was not disproportionate whether or not treasury stock was so considered, the court did not have to rule on the effect of treasury stock on the disproportionateness of the redemption.

(n94)Footnote 55. *IRC § 302(b)(2)(C)*.

(n95)Footnote 56. *Rev Rul 87-88, 1987-2 CB 81*. The Service opined:

To conclude otherwise would require that, notwithstanding a redemption of one class of common stock in an amount sufficient to reduce the shareholder's aggregate common stock ownership by more than 20 percent in value, every other class of common stock owned by the shareholder must be subject to a redemption.

(n96)Footnote 57. *Treas Reg § 1.302-3(a)*. Formulas for computing the shares required to be redeemed in multishareholder redemptions can be found in Ginsburg, "How to Compute Multiple Substantially Disproportionate Stock Redemptions," 37 *Taxes* 387 (1959); Price, "The Disproportionate Redemption Formula," *Id* at 633; Freret, "A Simplified Computation for Substantially Disproportionate Stock Redemptions," *Id* at 767.

X corporation had one class of stock owned by four unrelated individuals. *A* owned 1,466 shares, *B* owned 210 shares, *C* owned 200 shares, and *D* owned 155 shares. The corporation had a repurchase agreement that required each shareholder other than *A* to tender his shares to the corporation in the event he ceased to be actively connected with the business. On January 1, *B* informed *A* that he intended to resign on March 22. On March 15, *A* redeemed 902 of his shares, causing his stock ownership to fall below 50 percent for the period of time until *B*'s stock was redeemed. Although standing alone, the redemption from *A* was substantially disproportionate, the Service ruled that the two redemptions had to be considered in the aggregate when the first shareholder's redemption was undertaken with knowledge of the impending redemption of the second's shares, despite the absence of any specific agreement between the two. *Rev Rul 85-14, 1985-1 CB 92*.

(n97)Footnote 58. *IRC § 302(b)(2)(D)*. The Service has stated that, for this purpose, the plan "may not be so infinitely elastic that it can encompass any separate and unrelated redemptions however closely in time proximity they occur with respect to each other but neither is it so narrow in scope that minds must be found to have embarked upon a common adventure before redemptions can be lashed to its yoke." *Ltr Rul 8316019*.

(n98)Footnote 59. Before the redemption, *A* would own 50 percent of the voting stock, while after the redemption he would own 39.4 percent.

(n99)Footnote 60. The preredemption proportion would be 100/165 or 60.6 percent; the post-redemption proportion would be 60/125 or 48 percent.

(n100)Footnote 61. Following the total redemption, *A*'s percentage would be 65/125 (greater than 50 percent and therefore automatically disqualified). *B* would still own only 48 percent of the outstanding stock, but this would be compared with the 50 percent he owned prior to the series of redemptions.

(n101)Footnote 62. *Treas Reg § 1.302-3(a)*.

(n102)Footnote 63. *Id.* The preferred stock cannot be *IRC* § 306 stock (see § 7.02, *infra*).

Capital treatment will also be available where the nonvoting preferred is the only stock the taxpayer owns; the redemption in such case works a complete termination of his interest.

(n103)Footnote 64. *IRC* § 302(b)(3).

(n104)Footnote 65. *Treas Reg* 111, § 29.115-9 (1951); *Zenz v Quinlivan*, 213 F2d 914 (2d Cir 1954) ; *Summerfield v US*, 145 F Supp 104 (ED Mich 1956) , *affd* 249 F2d 446 (6th Cir 1957) ; *Tiffany v Commr*, 16 TC 1443 (1951) , *acq* 1957-1 CB 5 ; *Rev Rul* 54-458, 1954-2 CB 167 .

(n105)Footnote 66. An attempt to use the waiver rule failed when it was held that the redemption was from an estate and not from its sole beneficiary, the remaining shareholder's mother. *Rev Rul* 68-388, 1968-2 CB 122 .

(n106)Footnote 67. *Rev Rul* 71-262, 1971-1 CB 110 .

(n107)Footnote 68. *Rev Rul* 72-471, 1972-2 CB 201 .

(n108)Footnote 69. *Rev Rul* 72-472, 1972-2 CB 202 , declared obsolete in *Rev Rul* 2003-99, 2003-37 IRB 388 .

(n109)Footnote 70. *Crawford v Commr*, 59 TC 830 (1973) , *acq* 1984-1 CB 1 . See also *Johnson Trust v Commr*, 71 TC 941 (1979) , *acq* 1984-1 CB 1 .

(n110)Footnote 71. The Fifth Circuit went even further and permitted the filing of a waiver by an estate to prevent attribution to the estate from its beneficiaries who were actual owners of the stock. *Rickey v US*, 592 F2d 1251 (5th Cir 1979) . The amendment is intended to overrule *Rickey*.

(n111)Footnote 72. *IRC* § 302(c)(2)(C), applicable to distributions after Aug 31, 1982. Conf Rep No 97-760, 97th Cong, 2d Sess 545 (1982).

(n112)Footnote 73. *IRC* § 302(c)(2)(A)(i), (ii). The leasing of property by the former shareholder to the corporation is not the retention of an interest. *Rev Rul* 77-467, 1977-2 CB 92 ; *Rev Rul* 70-639, 1970-2 CB 74 . See also *Hurst v Commr*, 124 TC 16 (2005) .

A redeemed shareholder's right to receive payments under an unfunded pension agreement after the redemption was not the retention of a prohibited interest where the payments related to pre-redemption employment. The payments were not dependent on the corporation's earnings and the ex-shareholder's pension claim was not subordinate to general creditors. *Rev Rul* 84-135, 1984-2 CB 80 .

Retention of an interest in a parent or subsidiary is equally prohibited. *Treas Reg* § 1.302-4(c). However, retention or acquisition of an interest will not be fatal if the redemption can also qualify as a substantially disproportionate redemption, as a partial liquidation, or a distribution which is not essentially limited to a dividend. *IRC* § 302(b)(5).

The prohibition applies to the redeemed shareholder. Members of his family can retain or acquire such interests. *Rev Rul* 71-562, 1971-2 CB 173 . Moreover, waiver of attribution is unnecessary if attribution does not exist after the redemption. *Rev Rul* 76-524, 1976-2 CB 94 .

(n113)Footnote 74. *IRC* § 302(c)(2)(C)(i)(I). The entity and related parties will be jointly and severally liable if any of them acquired an interest within the ten-year period. *IRC* § 302(c)(2)(C) (i)(II). Any tax deficiency resulting from the breach of the condition will be collected from a related party only when it cannot be assessed against or collected from the entity. Conf Rep No 97-760, 97th Cong, 2d Sess 545 (1982).

Disagreement between a father and son led to a redemption of the father's stock. Although the father resigned from his positions as president and a director, he continued to be employed by the corporation. This retained interest prevented waiver of the family attribution rules and turned the distribution into a dividend. The Tax Court continued to hold that there was no family hostility exception to the application of the attribution rules. *Cerone v Commr*, 87 TC 1 (1986).

(n114)Footnote 75. *Rev Rul 71-426*, 1972-2 CB 173. See also *Ltr Rul 199914017*, where the Service ruled that, if shareholders who had their stock in a family corporation redeemed became members of the trustee succession committees for trusts that continued to own stock in the corporation, the shareholders would be treated as retaining an interest in the corporation.

(n115)Footnote 76. *Rev Rul 81-223*, 1981-2 CB 83.

(n116)Footnote 77. *Rev Rul 79-334*, 1979-2 CB 127; *Rev Rul 72-380*, 1972-2 CB 201.

(n117)Footnote 78. *Rev Rul 70-104*, 1970-1 CB 66; *Rev Rul 59-119*, 1959-1 CB 68; but see *Rev Rul 54-408*, 1954-2 CB 165, approving employment for a limited time to train other employees. The later ruling concerned a redemption covered by the 1939 Code.

(n118)Footnote 79. *Lynch v Commr*, 83 TC 597 (1984), *revd* 801 F2d 1176 (9th Cir 1986); *Seda v Commr*, 82 TC 484 (1984); *Est of Lennard v Commr*, 61 TC 554 (1974), *nonacq* 1978-2 CB 3.

The Ninth Circuit rejected the reasoning of the Tax Court in *Lynch* as undermining congressional intent to promote tax certainty, and reversed. 801 F2d 1176 (9th Cir 1986).

(n119)Footnote 80. *Treas Reg § 1.302-4(d)*. In the enforcement of his rights, a creditor may acquire the assets of the corporation, but not its stock. *Treas Reg § 1.302-4(e)*. It should be noted that the Service will not issue rulings as to whether *IRC § 302(b)* applies if the consideration consists entirely or partly of notes of the corporation, and the shareholder's stock is held in escrow or as security for payment of the notes with the possibility that he will recapture the stock in the future upon the happening of specified defaults. *Rev Proc 2009-3*, 2009-1 CB 107 (§ 3.01(31)).

The redeemed taxpayers in *Hurst v Commr*, 124 TC 16 (2005), did not retain a prohibited interest even though the promissory notes issued to them were subject to cross-default clauses and were secured by the buyers' stock, which could be seized and sold in the event of a default in payment. There was credible evidence that the transactions were consistent with common practice in seller-financed transactions.

(n120)Footnote 81. *Treas Reg § 1.302-4(d)*; see also *Duerr v Commr*, 30 TC 944 (1958), where the court considered debentures received by the taxpayer as the equivalent of the preferred stock redeemed. The question of identity between debt obligation and stock redeemed should be considered in every redemption, not only those in which a waiver of family attribution is sought.

(n121)Footnote 82. *Treas Reg § 1.302-4(d)*. *Dunn v Commr*, 70 TC 715 (1978), *affd* 615 F2d 578 (2d Cir 1980), involved a deferral of payments beyond the due date. The Tax Court refused to accept the Service's argument that the deferral produced a situation in which the taxpayer's claim was voluntarily subordinated to the claims of general creditors.

(n122)Footnote 83. *IRC § 302(c)(2)(A)(iii)*. In *Rev Rul 71-138*, 1971-1 CB 109, the stock of a corporation was owned equally by *H* and his son, *S*. However, since *H* resided in a community property state, *H*'s wife, *W*, was considered a distributee of one half of the proceeds of the redemption and, accordingly, was required to file the agreement called for by *IRC § 302(c)(2)(A)(iii)*. An entity-related party waiver requires all to join in the agreement. *IRC § 302(c)(2)(C)(i)(I)*.

The statute of limitations on assessment does not run until the completion of one year following notification of the

acquisition of a forbidden interest.

(n123)Footnote 84. *Treas Reg § 1.302-4(a)*. The taxpayer must also retain copies of income tax returns and any other records indicating the tax which would have been payable had the redemption been treated as a distribution subject to *IRC § 301*. *Treas Reg § 1.302-4(b)*.

An executor can file the required agreement if the shareholder dies before the due date of the return for the taxable year in which the redemption occurs. *Rev Rul 77-93, 1977-1 CB 80*.

(n124)Footnote 85. The same conclusion was reached in *Archbold v US, 201 F Supp 329 (DNJ 1962)*, *affd per curiam 311 F2d 228 (3d Cir 1963)*. *Contra, US v Van Keppel, 321 F2d 717 (10th Cir 1963)*; *Cary v Commr, 41 TC 214 (1963)*, *nonacq 1964-2 CB 8*; *Pearce v US, 226 F Supp 702 (WDNY 1964)*.

(n125)Footnote 86. *Treas Reg § 1.302-4(a)(2)*.

(n126)Footnote 87. *IRC § 302(c)(2)(B)*. A partition of stock held as community property into separate interests was followed by a redemption from one of the spouses. The partition was not an acquisition of stock within the meaning of *IRC § 302(c)(2)(B)*. *Rev Rul 82-129, 1982-2 CB 76*.

(n127)Footnote 88. *IRC § 302(c)(2)(B)*. The regulations state that a transfer will not be deemed to have tax avoidance as one of its principal purposes merely because the transferee is in a lower tax bracket than the transferor. *Treas Reg § 1.302-4(g)*.

The rule is designed to prevent a taxpayer from extracting earnings and profits at capital gain rates while still exercising control over the affairs of the corporation.

(n128)Footnote 89. *Rev Rul 56-584, 1956-2 CB 179*. *Rev Rul 56-556, 1956-2 CB 177*; *Rev Rul 57-387, 1957-2 CB 225*; *Rev Rul 77-293, 1977-2 CB 91*; *Rev Rul 79-67, 1979-1 CB 128*; and *Rev Rul 85-19, 1985-1 CB 94*, contain additional examples of transfers not having tax avoidance as a principal purpose. The Service will not rule whether an acquisition or disposition has, or does not have, as one of its principal purposes the avoidance of federal income taxes, unless the facts and circumstances are materially identical to those set forth in the cited rulings. *Rev Proc 2009-3, 2009-1 IRB 107*.

(n129)Footnote 90. *Rev Rul 58-614, 1958-2 CB 920, 921*. The additional payment could also be held to be a dividend.

It has long been the Service's position that, in the absence of a prior and independent dividend declaration, the total consideration paid in the redemption of preferred stock with dividend arrearages enters the computation of the amount realized, so that no part of the distribution can be treated as a dividend. *Rev Rul 69-131, 1969-1 CB 94*, *superseding Sol Mem 4181, IV-2 CB 12 (1925)*. This position was approved in *Cummins Diesel Sales Corp v US, 323 F Supp 1114 (SD Ind 1971)*, *affd per curiam 459 F2d 668 (7th Cir 1972)*. If the dividend is declared before the redemption, the amount paid to satisfy the dividend obligation is taxed as a dividend. *Rev Rul 75-320, 1975-2 CB 105*; *Rev Rul 69-130, 1969-1 CB 93*, *superseding GCM 5180, VII-2 CB 110 (1928)*.

(n130)Footnote 91. Eg, *Keefe v Cote, 213 F2d 651 (1st Cir 1954)* (price \$4 above book value); *Commr v Snite, 177 F2d 819 (7th Cir 1949)* (price below market value, but equal to price which holders of employee stock options would pay).

(n131)Footnote 92. See Ch 2.

(n143)Footnote 11. *Prop Treas Reg § 1.302-5(a)(1)*.

(n144)Footnote 12. *Prop Treas Reg § 1.302-5(e), Ex 1*.

(n145)Footnote 13. *Prop Treas Reg § 1.302-5(e), Ex 2*.

(n146)Footnote 14. See *Prop Treas Reg § 1.302-5(e), Exs 3 and 4*.

(n147)Footnote 14.1. See *Prop Treas Reg § 1.302-5(c)* and Preamble to Proposed Regulations.

(n148)Footnote 15. *Prop Treas Reg § 1.302-5(c)(1)*.

(n149)Footnote 16. *Prop Treas Reg § 1.302-5(c)(2)*.

(n150)Footnote 17. *Prop Treas Reg § 1.302-5(d)(1)*.

(n151)Footnote 18. *Prop Treas Reg § 1.302-5(d)(2)*. If an estate or trust terminates before it is permitted to take into account all of the loss attributable to the basis of redeemed stock, the amount of loss not taken into account is allowed as a deduction to the beneficiaries under *IRC § 642(h)*.

(n152)Footnote 19. *Prop Treas Reg § 1.302-5(d)(4)*.

(n153)Footnote 1. Redemptions pursuant to periodic redemption plans can produce dividend consequences for the remaining shareholders. See Ch 4.

(n154)Footnote 2. *Rev Rul* 69-608, 1969-2 *CB* 42 ; *Wall v US*, 164 *F2d* 462 (4th *Cir* 1947) ; *Sullivan v US*, 363 *F2d* 724 (8th *Cir* 1966) , *cert denied* 387 *US* 905 ; *Zipp v Commr*, 259 *F2d* 119 (6th *Cir* 1958) , *cert denied* 359 *US* 934 . See also *Apschnikat v US*, 421 *F2d* 910 (6th *Cir* 1970) . The test is actually whether the redemption of the other

shareholder's stock is a distribution which is essentially equivalent to a dividend to the remaining shareholder. This permits the shareholder to argue that the distribution should be taxed as an exchange under *IRC § 302(b)(1)*, but his chances of success seem slim.

A corporation's discharge of its sole shareholder's obligation to purchase the stock of another corporation did not produce income for the shareholder in *Citizens Bank & Trust Co v US*, 580 F2d 442 (Ct Cl 1978) . The stock had a value greater than the price paid so that there was no depletion of assets, as was the case in *Wall and Sullivan*.

(n155)Footnote 3. *Rev Rul 69-608*, 1969-2 CB 42 ; *Rev Rul 59-286*, 1959-2 CB 103 ; *Rev Rul 58-614*, 1958-2 CB 920 ; *Niederkrome v Commr*, 266 F2d 238 (9th Cir 1958) , *cert denied* 359 US 945 ; *Holsey v Commr*, 258 F2d 865 (3d Cir 1958) ; *Ward v Rountree*, 193 F Supp 154 (MD Tenn 1961) ; *Edenfield v Commr*, 19 TC 13 (1952) , *acq* ; 1953-1CB 4 ; *Priester v Commr*, 38 TC 316 (1962) ; see also *Tracy v US*, 1966 US Dist LEXIS 9856 (CD Cal 1966) (purchaser of stock not in receipt of dividend where not obligated to buy shares redeemed from selling shareholder).

Shareholders were not in receipt of dividend income when the corporation redeemed stock pursuant to a contract that called for the purchase of the stock by the shareholders "or their assigns." *Buchholz Mortuaries, Inc v Commr*, TC Memo 1990-269 .

A corporation's redemption of stock from a shareholder's ex-wife did not produce a constructive dividend for the shareholder. Under the divorce arrangement, the wife agreed to look first to the corporation for payment for her shares, making the taxpayer's obligation secondary. *Edler v Commr*, TC Memo 1982-67 , *affd* 727 F2d 857 (9th Cir 1984) . The reverse was true in *Hayes v Commr*, 101 TC 593 (1993) , resulting in a constructive dividend for the husband and a tax-free transaction for the wife under *IRC § 1041*.

(n156)Footnote 4. *Rev Rul 69-608*, 1969-2 CB 42 ; *Rev Rul 59-286*, 1959-2 CB 103 .

(n157)Footnote 5. *Rev Rul 69-608*, 1969-2 CB 42 ; *Sullivan v US*, 363 F2d 724 (8th Cir 1966) , *cert denied* 387 US 905 .

CHAPTER 5 Distributions in Redemption of Stock

1-5 Taxation of Securities Transactions § 5.03

§ 5.03 Redemptions Under Section 303--Redemptions From a Decedent

IRS Section 303, a relief provisions enacted to prevent the need for the forced sale of closely held family businesses to large corporate enterprises solely because of the combined impact of estate and income taxes,ⁿ¹ affords exchange treatment for a redemption of stock, the value of which has been included in a decedent's gross estate, to the extent that the consideration for the redemption does not exceed the sum of (a) the estate, inheritance and other death taxes (including interest thereon) imposed because of the decedent's death,ⁿ² and (b) the amount of funeral and administration expenses (but not debts of the decedent) allowable as a deduction to the estate of the decedent under *IRC Section 2053* (or under *IRC Section 2106* if the decedent is a nonresident alien).ⁿ³ *IRC Section 303* has no effect on a redemption which can qualify as an exchange under *IRC Section 302(a)*. Its sphere of influence lies in the area of redemptions which would otherwise be taxed as distributions under *IRC Section 301*.ⁿ⁴

A redemption of stock is treated as an exchange under *IRC Section 303* only if the following conditions are met:

- (1) The value of the stock must be included in the decedent's gross estate for federal estate tax purposes.ⁿ⁵ The reason for inclusion is unimportant; the necessity for inclusion is.
- (2) The value of *all* of the stock of the redeeming corporation included in the gross estate of the decedent must amount to more than 35 percent of the value of the decedent's gross estate, less losses, debts, and funeral and administration expenses.ⁿ⁶ If more than 20 percent in value of the outstanding stock of each of two or more corporations is included in determining the decedent's gross estate, such stock may be considered as the stock of a single corporation for the purpose of meeting the 35 percent requirement.ⁿ⁷
- (3) The redemption distribution must be made after the decedent's death and (a) before the expiration of the three-year period of limitations for the assessment of estate tax, or within 90 days after the expiration of such period,ⁿ⁸ or (b) if a petition for redetermination of a deficiency in estate tax is timely filed with the Tax Court, at any time before the expiration of sixty days from the date on which the decision of the Tax Court becomes final.ⁿ⁹ However, the filing of a groundless petition, that is, one filed solely for the purpose of extending the period during which distribution can be made, will not increase the period within which *IRC Section 303* will be applicable.ⁿ¹⁰ If an election is made to extend the time for payment of estate taxes, the redemption period is also extended until the due date of the last installment.ⁿ¹¹ This correlates the special treatment of *IRC Section 303* with the extended payment

election of *IRC Section 6166* and allows the corporation to build up liquid assets and redeem stock so that payment of estate taxes might be made at any time during the installment payment period.ⁿ¹² However, in the case of any redemption distribution made more than four years and 90 days after the decedent's death, capital gains treatment is limited to the lesser of (a) the amount of qualifying death taxes and funeral and administration expenses that are unpaid immediately before the distribution, or (b) the amount of such taxes and expenses that are paid within one year after the distribution.ⁿ¹³

IRC Section 303 is applicable only to the extent that the interest of the shareholder is reduced directly or indirectly or through a binding obligation to contribute toward the payment of debts, expenses, or taxes.ⁿ¹⁴ Thus, *IRC Section 303* will not apply unless the party whose shares are redeemed actually has a liability for federal estate tax, state death taxes, or funeral and administration expenses in an amount at least equal to the amount of the distribution.

There is no requirement that the distribution be in cash. The distribution of a corporate note payable within the applicable period will satisfy the statutory requirement.ⁿ¹⁵ Furthermore, there is no prohibition against a series of redemptions. All distributions made within the statutory period (and which do not exceed the amount specified in *IRC Section 303(a)*) can qualify as *IRC Section 303* redemptions.ⁿ¹⁶ However, where there is more than one distribution in redemption of stock, the distributions are to be applied against the total amount qualifying under *IRC Section 303* in the order in which the distributions are made.ⁿ¹⁷ For this purpose, all redemption distributions are taken into account, including those granted capital gain treatment by some other provision of the Code.ⁿ¹⁸ To illustrate:

Example:

The gross estate of a decedent has a value of \$1,000,000; the taxable estate amounts to \$600,000; death taxes and funeral and administration expenses total \$300,000. Included in the gross estate is closely held corporation stock valued at \$500,000. During the first year of administration, one-half of the stock is redeemed for \$250,000. During the second year, an additional one-quarter (or one-half of the balance) is redeemed for \$125,000. The first distribution qualifies for *IRC Section 303* treatment irrespective of whether the transaction can be treated as an exchange under *IRC Section 302(a)*. Of the second distribution, only \$50,000 can come under the umbrella of *IRC Section 303*.

Where stock in a closely held corporation is subject to the generation-skipping transfer occurring at the same time as and as a result of the death of an individual:

- (1) the stock is deemed to be included in the estate of such individual;
- (2) all death taxes imposed because of the generation-skipping transfer are treated as imposed because of the individual's death;ⁿ¹⁹
- (3) the period of distribution is measured from the date of the generation-skipping transfer; and
- (4) the relationship of the value of the stock to the value of the decedent's estate is measured with reference solely to the amount of the generation-skipping transfer.ⁿ²⁰

CHAPTER 5 Distributions in Redemption of Stock

1-5 Taxation of Securities Transactions § 5.04

§ 5.04 Redemptions Under Section 304--Redemptions by Related or Affiliated Corporations

Suppose that A owns all of the outstanding stock of both X Corp. and Y Corp. Whether A redeems one-half of his X Corp. shares or sells them to Y Corp., the economic result is the same. The issue posed is whether the tax consequences of the sale should equal those of the redemption--in this case, a distribution which has the effect of a dividend.

Prior to the 1954 Code, there was no statutory authority for treating the transaction other than as a sale.ⁿ¹ The Internal Revenue Service did at one time rule, that under the 1939 Code, such a sale would be considered the equivalent of a dividend to the shareholder.ⁿ² However, the ruling was subsequently revokedⁿ³--the Service could not sustain its position in the courts.ⁿ⁴

The 1954 Code broadened the scope of related corporation redemptions by adding specific rules to govern the tax treatment of stock transactions involving the stock of affiliated corporations other than parent and subsidiary. The purpose of the new provision was to insure "that where the effect of the sale is in reality the distribution of a dividend, such sale shall be taxed as such."ⁿ⁵

[1] Acquisition by a Related Corporation Other Than a Subsidiary

If one or more persons (whether related by blood or not)ⁿ¹ own at least 50 percent of the voting stock, or at least 50 percent of the value of the outstanding stock, of each of two corporations,ⁿ² and one of the corporations acquires stock in the other from such person or persons, the transaction will be treated as a redemption of stock of the acquiring corporation.ⁿ³ However, the determination as to whether the redemption meets the tests prescribed by *IRC Section 302(b)* is made by reference to the stock of the issuing corporation (the corporation whose stock was sold).ⁿ⁴ If the redemption cannot be considered an exchange,ⁿ⁵ it must be treated as a distribution to which *IRC Section 301* applies. The amount of dividend income and the source thereof is determined by assuming that the distribution was made by the acquiring corporation to the extent of its earnings and profits and then by the issuing corporation to the extent of its earnings and profits.ⁿ⁶ In this way, dividend treatment ensues to the extent of the aggregate earnings and profits of both the acquiring corporation and the corporation whose stock is acquired.

If the transaction is treated as a distribution under *IRC Section 301*, the transferor and the acquiring corporation are treated as if (1) the transferor had transferred the stock involved in the transaction to the acquiring corporation in exchange for stock of the acquiring corporation in a transaction to which *IRC Section 351(a)* applies, and (2) the

acquiring corporation had then redeemed the stock it treated as having issued. Therefore, under *IRC Section 362*, the acquiring corporation's basis in the stock is equal to the basis the transferor had in the stock, and under *IRC Section 358*, the transferor's basis in the stock of the acquiring corporation deemed issued to the transferor in the deemed transaction to which *IRC Section 351(a)* applies is equal to the transferor's basis in the stock of the issuing corporation it surrendered.ⁿ⁷

If the acquiring corporation is a foreign corporation, then the amount of earnings and profits of the acquiring foreign corporation that are taken into account in applying *IRC Section 304* cannot exceed the portion of the earnings and profits that (1) is attributable to stock of the acquiring foreign corporation held by a corporation or individual who is the transferor (or a person related thereto within the meaning of *IRC Section 267(b)* or *707(b)*) and who is a United States shareholder (within the meaning of *IRC Section 951(b)*) of such corporation, and (2) was accumulated during periods in which the stock was owned by such person while the acquiring corporation was a controlled foreign corporation.ⁿ⁸

Example:

X Corp and *Y Corp* each have 100 shares of common stock outstanding. The stock of each corporation is owned equally by two unrelated persons, Andy and Bob. Andy sells 20 shares of his *X Corp* stock to *Y Corp*. After the sale, Andy will own 30 shares of *X Corp* stock directly and ten shares constructively by reason of his 50 percent ownership of *Y Corp* stock. Since Andy's percentage of ownership of *X Corp* stock after the sale (40/100 or 40 percent) is exactly 80 percent and not less than 80 percent of his ownership percentage before the sale, the redemption will not meet the substantially disproportionate test of *IRC Section 302(b)(2)*.ⁿ⁹ If the redemption cannot come within *IRC Section 302(b)(1)* and be considered a distribution which is not essentially equivalent to a dividend, the dividend consequences of the transaction will be determined as if it were a distribution by *Y Corp* to the extent of its earnings and profits and then as a distribution by *X Corp*.ⁿ¹⁰

Suppose that Andy, owning all of the stock of *X Corp* and *Y Corp*, transfers all of his *X Corp* shares to *Y Corp* in exchange for more stock in the latter plus cash. Clearly the transaction fits the description of a "brother-sister" corporation redemption found in *IRC Section 304(a)(1)*, but just as clearly it is a transaction which falls within the terms of *IRC Section 351*. If *IRC Section 304* is the controlling provision, the distribution of cashⁿ¹¹ would, under the fact situation given, be essentially equivalent to a dividend since there would be no change in Andy's percentage ownership of *X Corp* stock (Andy would actually own 100 percent before the transfer and constructively own 100 percent after the transfer). If *IRC Section 351* governs, Andy would recognize any gain realized on the exchange only to the extent of the lesser of the amount of such gain or the amount of cash ("boot") received.

The problem posed is an abbreviated version of the fact situation presented in *Haserot v. Commissioner*. The Tax Court, in its initial decision,ⁿ¹² found *IRC Section 351* controlling by looking to the "except as otherwise provided in this chapter ..." language found in *IRC Sections 301(a)* and *302(d)*. In its concluding paragraph, the court stated:

"[S]ince that amount will in either event be taxed as a long-term capital gain, it is not necessary for us to determine in this proceeding whether that result is arrived at via section 351 or via sections 304 and 302(a)."ⁿ¹³

The Government appealed, pressing its contention that *IRC Section 304(a)* applied to the transaction in issue. The Sixth Circuit remanded the matter to the Tax Court for it to determine whether the distribution in redemption had the effect of a dividend.ⁿ¹⁴ The absence of dividend equivalence would dispose of the issue in favor of the taxpayer without the need to resolve the conflict.

On remand,ⁿ¹⁵ the Tax Court found the distribution essentially equivalent to a dividend. However, because a majority of the judges felt that the remand limited the court to a consideration of the specific issue of dividend equivalence, the original decision was reaffirmed. The Commissioner once again appealed. This time the Sixth Circuit found itself in

agreement with the Tax Court's determination that *IRC Section 351* controlled the transaction.ⁿ¹⁶

After the Service had taken a firm stand against the position adopted by the Sixth Circuit,ⁿ¹⁷ a view with which the Ninth Circuit agreed,ⁿ¹⁸ Congress resolved the issue for transfers occurring after August 31, 1982 by providing that *IRC Section 304* overrides *IRC Section 351* (and so much of *IRC Sections 357* and *358* as relate to *IRC Section 351*) when both can apply.ⁿ¹⁹ However, *IRC Section 351* will continue to apply to the extent the transaction consists of an exchange of stock for stock in the acquiring corporation, or the additional consideration for the transfer consists of acquisition indebtedness--a liability incurred by the transferor to acquire the stock which is assumed by the acquiring corporation or to which the stock is subject.ⁿ²⁰ The exclusion for acquisition indebtedness does not extend to cases in which the debt is incurred to purchase stock from a person whose ownership is attributable to the transferor under *IRC Section 318(a)*. This restriction is removed if there is a termination of the interest of the related person in both the acquiring and issuing corporations, and the related person does not reacquire an interest in either corporation for ten years and files an agreement with the Service similar to the one required under *IRC Section 302(c)(2)* (discussed in § 5.02[2][c], *supra*).

A further exception is provided in the case of the receipt of securities in a bank holding company, as an incident of the formation of the company, by any shareholder who owns less than 10 percent in value of the stock of the company.ⁿ²¹ For the rule to apply, (1) the bank holding company must acquire stock constituting control of a bank within two years after control of the bank was acquired, (2) the acquisition of control of the bank and the transfer to the bank holding company must be pursuant to a plan, and (3) shareholders of the bank holding company who receive distributions of property cannot have control of the company.

[2] Acquisition by a Subsidiary of the Stock of Its Parent

IRC Section 304(a)(2) treats the acquisition by a subsidiary of the stock of its parent as a redemption of the parent corporation's stock.ⁿ¹ If the redemption cannot qualify as an exchange under the standards contained in *IRC Section 302(b)* (applied by looking to the stock of the parent corporation),ⁿ² the amount of dividend income will be determined by assuming that the distribution was made first by the subsidiary to the extent of its earnings and profits and then by the parent to the extent of its earnings and profits.ⁿ³ The stated rule applies to stock acquired after June 18, 1984. For earlier years, the dividend determination was made by reference to the earnings and profits of the parent corporation, computed as if the amount paid by the subsidiary for the stock was first distributed to the parent and then distributed by the parent to the transferor.

An interesting phenomenon occurs whenever a person has actual control of each of two corporations. Because of the attribution rules, each of the controlled corporations will also be the parent of the other. This means that the redemption can fit *IRC Section 304(a)(1)* and *IRC Section 304(a)(2)*, which, before 1984, could have yielded different amounts of dividend income. The regulations treat a brother-sister corporation redemption as just that and not as a parent-subsidiary redemption as well.ⁿ⁴ However, it has been pointed out that the decided *IRC Section 304(a)(1)* cases have never had to face the problem of overlapping coverage, since, in each case, the acquiring corporation had sufficient earnings and profits to cover the distribution.ⁿ⁵

[3] Basis Adjustments in Redemptions by Related Corporations

[a] Section 304(a)(1) Transactions. Assume that A has control of both X Corp. and Y Corp. and that he has a basis of \$100,000 for the stock of each corporation. If A sells one-half of his X Corp. stock to Y Corp. in a transaction found to be essentially equivalent to a dividend, A's basis in his Y Corp. shares will be increased by \$50,000, the basis of the shares surrendered by him.ⁿ¹ What effect the transaction has on the basis of the X Corp. shares remaining in A's hands is nowhere specified, but it would seem logical to set the basis of these shares at \$50,000 and thereby compensate for the step-up in basis of the Y Corp. shares.

Suppose that, after the transaction, the transferor owns no stock in either the issuing or acquiring corporation. What happens to the basis of the transferred shares? According to the Service, it disappears. However, under proposed regulations, shareholder will be able to take into account any loss attributable to unutilized basis.ⁿ²

If the redemption qualifies as an exchange under *IRC Section 302*, A's basis for his Y Corp. shares will remain unchanged.ⁿ³ Since one-half of A's original basis for his X Corp. stock will enter into the computation of gain or loss realized on the exchange, the remaining X Corp. shares will have an aggregate basis of \$50,000.

The basis of the X Corp. shares in the hands of the acquiring corporation likewise depends on the tax consequences of the redemption, since under *IRC Section 362(a)*, the governing provision,ⁿ⁴ the acquiring corporation's basis is the same as the transferor's basis, increased in the amount of any gain recognized to the transferor on the transaction. Thus, if the distribution is taxed wholly as a dividend, the transferor recognizes no gain on the transfer and the acquiring corporation's basis will be exactly the same as the transferor's.

[b] Section 304(a)(2) Transactions. The shareholder whose stock is the subject of a *IRC Section 304(a)(2)* transaction that is found to have the effect of a dividend is directed by the Regulations to add the basis of the stock sold to the subsidiary to the basis of any retained shares of the parent corporation's stock.ⁿ⁵ If the redemption qualifies as an exchange, the transferor's basis in the remaining shares should be determined in accordance with the usual basis provisions. The taxpayer is thereby placed in the same position, basis-wise, as he would have been had his shares been redeemed by the parent corporation in a "true" redemption.

The Regulations are silent when it comes to the manner in which the subsidiary determines its basis in the acquired stock. It has been suggested that the subsidiary take over the shareholder's basis in the surrendered stock whenever the redemption is treated as a dividend.ⁿ⁶ However, the contribution to capital concept which underlies the use of substituted basis in a *IRC Section 304(a)(1)* transaction finds no application in a parent-subsidiary redemption. Coupling this with the lack of guidelines to the contrary may indicate that the subsidiary's basis in the acquired shares will be its cost.ⁿ⁷ While there may be disagreement as to the subsidiary's basis for stock acquired in *IRC Section 304(a)(2)* redemptions which have the effect of a dividend, there should be no argument that the general basis rules must apply when the redemption is treated as an exchange.

[c] Intragroup Transactions. Under *IRC Section 304(b)(4)*, if stock from one member of an affiliated group is transferred to another member of the group in a transaction governed by *IRC Section 304(a)*, "proper adjustments" must be made in the bases of intragroup stock and in the earnings and profits of any member of the group to the extent necessary to carry out the purposes of *IRC Section 304*.ⁿ⁸ For example, suppose that subsidiary X sells the stock of appreciated subsidiary Y to Z (a sister corporation in an affiliated group) in a transaction that is treated as a dividend by Z to X and a contribution of the Y stock to the capital of Z. Adjustments must be made to the stock bases of members of the group so that neither X, Z, nor any other corporation that is part of the same chain of corporations (excluding the common parent) can thereafter be sold without the recognition of the built-in appreciation in the Y stock at the time of the initial transaction.ⁿ⁹

FOOTNOTES:

(n1)Footnote 1. Legislation enacted in 1950 did treat the purchase by a subsidiary of the stock of its parent as a distribution of assets from parent to subsidiary followed by a redemption by the parent of its own stock.

(n2)Footnote 2. *Rev Rul 55-15, 1955-1 CB 361* .

(n3)Footnote 3. *Rev Rul 59-97, 1959-2 CB 684* . This ruling has been rendered obsolete because of the enactment of *IRC § 304, Rev Rul 72-620, 1972-2 CB 651* .

(n4)Footnote 4. *Westerhaus Co v Commr, TC Memo 1957-218* was the case which precipitated the revocation. Other cases holding for the taxpayer included *Commr v Pope, 239 F2d 881 (1st Cir 1957)*; and *Cramer v Commr, 20 TC*

679 (1953) , *acq* 1960-1 CB 4 .

(n5)Footnote 5. HR Rep No 1337, 83rd Cong, 2d Sess 37 (1954). See generally, Shores, "Section 304 and the Limits of Statutory Law," *16 Va Tax Rev* 455 (1997); Marans, "Section 304: The Shadowy World of Redemptions Through Related Corporations," *22 Tax L Rev* 161 (1967); Lanahan, "Redemptions to Pay Death Taxes: Redemptions Through the Use of Related Corporations (Sections 303, 304)," *15 NYU Inst on Fed Tax* 493 (1957).

(n6)Footnote 1. The taxpayer in *Coates Trust v Commr*, 480 F2d 468 (9th Cir 1973) , *cert denied* 414 US 1045 , contended that the phrase "one or more persons" referred to one person plus those persons whose stock would be attributed to him under IRC § 318. The court disagreed and saw the phrase as indicating an attempt to expand the scope of IRC § 304(a)(1) beyond the family relationship to include unrelated persons who act in concert.

(n7)Footnote 2. The constructive ownership rules of IRC § 318(a) are applicable in determining stock ownership. Attribution to and from corporations is made by changing the 50 percent limitation contained in IRC §§ 318(a)(2)(C) and 318(a)(3)(C) to 5 percent. Further, in applying the latter section, where the stock owned by or for a shareholder is less than 50 percent in value of the corporation's stock, attribution of ownership from the shareholder to the corporation is limited to the proportion of the value of the corporation's outstanding stock owned by the shareholder. IRC § 304(c)(3). Thus, if A owned 40 percent of X Corp's voting stock and Z Corp owned the remaining 60 percent, and if A owned 25 percent of the stock of Z Corp as well, he would own directly and indirectly 55 percent of the voting stock of X Corp.

The value test is applied to the aggregate of all classes of stock of the corporation, not on a class-by-class basis. *Rev Rul* 89-57, 1989-1 CB 90 .

Under *Treas Reg* § 1.318-1(b)(1), a corporation cannot constructively own its own stock. This prevented the sale to a related corporation in *Rev Rul* 74-605, 1974-2 CB 97 , from coming within IRC § 304(a)(1).

The absence of legal title to stock sold to a related corporation did not prevent the Tax Court from applying IRC § 304 to the transaction in *Maher v Commr*, 55 TC 441 (1970) . The taxpayer had purchased the stock under an agreement that required the placing of the stock in escrow as security for payment of the purchase price; this sufficed to make him the owner of the stock for IRC § 304 purposes.

(n8)Footnote 3. IRC §§ 304(a)(1), 304(c)(1).

Taxpayers sold all of their shares in one wholly owned corporation to another in exchange for notes payable over a period of years. Application of IRC §§ 318 and 304(a)(1) turned the sale into a redemption that was essentially equivalent to a dividend. This meant that the entire "sales" price was includable in income in the year of the transaction, not as the notes were paid. *Brams v Commr*, 734 F2d 290 (6th Cir 1984) ; *Cox v Commr*, 78 TC 1021 (1982) .

Treas Reg § 1.1502-80 provides that a post-July 23, 1991 acquisition of stock of a corporation by one member of a consolidated group from another member is not subject to IRC § 304. Instead, the transaction is treated as a deferred intercompany transfer as provided in *Treas Reg* § 1.1502-13.

For purposes of determining the amount constituting a dividend and the source thereof, the Service may treat a corporation (deemed acquiring corporation) as having acquired for property the stock of a corporation (issuing corporation) acquired by another corporation (acquiring corporation) that is controlled by the deemed acquiring corporation, if one of the principal purposes for organizing or funding the acquiring corporation, through capital contributions or debt, is to avoid application of IRC § 304 to the deemed acquiring corporation. *Temp Treas Reg* § 1.304-4T(a). The examples contained in the regulations illustrate the application of the provision to controlled foreign corporations.

(n9)Footnote 4. *IRC § 304(b)(1); Rev Rul 71-563, 1971-2 CB 175* . The attribution rules of *IRC § 318(a)* are applicable since the redemption is tested under *IRC § 302*. Here attribution between corporation and shareholder is applied without regard to the 50 percent limitation contained in *IRC §§ 318(a)(2)(C) and 318(a)(3)(C)*. The 5 percent threshold ownership condition used in determining control is inapplicable here.

When two or more persons are in control of the issuing corporation after application of the constructive attribution rules, the tests prescribed by *IRC § 302* are applied to the controlling person who transferred the issuing corporation's stock in the *IRC § 304* redemption. *Merrill, Lynch & Co. v Comm'r, 131 TC No 19 (2008)* . For example, assume P owns 100% of the stock of X and Y, and X owns 100% of the stock of Z. As part of an integrated transaction, X sells all its Z stock to Y for fair market value, and immediately thereafter P sells all its X stock to an unrelated purchaser outside the corporate group. X's sale of Z stock to Y is treated as a redemption of Y's stock under *IRC § 304*, but whether the redemption is treated as a dividend or an exchange under *IRC § 302* is determined by pre- and post-sale ownership of Z by its "controlling person." There are two "controlling persons" of Z in this case, P and X. Focusing on P, the redemption proceeds should be treated as a dividend since P constructively owns all of Z's stock before and after the transaction, but looking at X, the redemption should be treated as an exchange because X owns none of Z's stock at the end of the integrated transaction, actually or constructively. *Merrill, Lynch* holds that only X's ownership is relevant for purposes of applying *IRC § 302(b)* because X was the actual transferor of Z's stock in the *IRC § 304* redemption, so that under *IRC § 302* the redemption is taxable as an exchange.

(n10)Footnote 5. A redemption under *IRC § 304* may qualify for capital gain treatment via the application of *IRC § 303*. *Rev Rul 71-527, 1971-2 CB 174* .

(n11)Footnote 6. *IRC § 304(b)(2)*. The provision applies to transactions after June 18, 1984. For earlier transactions, the dividend determination was made by assuming that the distribution went from issuing corporation to acquiring corporation and then to the transferor.

(n12)Footnote 7. *Prop Treas Reg § 1.304-2(a)(3)*. In applying *Prop Treas Reg § 1.302-5* to any unutilized basis of the transferor in the stock of the acquiring corporation treated as redeemed, the acquiring corporation is treated as the redeeming corporation and the transferor as the redeemed shareholder. See § 5.02[4] for a discussion of *Prop Treas Reg § 1.302-5*.

If, pursuant to *IRC § 304(a)(1)*, a US person is treated as transferring stock of a domestic or foreign corporation to a foreign corporation in exchange for stock of the transferee corporation in a transaction to which *IRC § 351(a)* applies, the deemed *IRC § 351* exchange is not a transfer to a foreign corporation subject to *IRC § 367(a)*. *Treas Reg § 1.367(a)-3(a)*. The same holds true if, pursuant to *IRC § 304(a)(1)*, a foreign acquiring corporation is treated as acquiring the stock of a foreign acquired corporation in a transaction to which *IRC § 351(a)* applies. *Treas Reg § 1.367(b)-4(a)*.

(n13)Footnote 8. *IRC § 304(b)(5)(A)*.

Payment of a deemed dividend under *IRC § 304(a)(1)* to a foreign corporation is subject to withholding under *IRC § 1442* to the extent the dividend is derived from US sources. The normal 30% withholding rate applies unless reduced by treaty. *Rev Rul 92-85, 1992-2 CB 69* . A deemed dividend received by a domestic corporation from foreign sources qualifies for the deemed-paid foreign tax credit. *Rev Rul 91-5, 1991-1 CB 114* , amplified by *Rev Rul 92-86, 1992-2 CB 69* .

(n14)Footnote 9. The corporation-shareholder attribution rules prevent a *IRC § 304* redemption from becoming a complete redemption under *IRC § 302(b)(3)* whenever the transferor has direct ownership of a portion of the stock of the acquiring corporation.

(n15)Footnote 10. For examples of *IRC § 304* redemptions found to be essentially equivalent to a dividend, see

Kerr v Commr, 326 F2d 225 (9th Cir 1964) , cert denied 377 US 963 ; *Wiseman v US*, 259 F Supp 90 (D Me 1966) , affd per curiam 371 F2d 816 (1st Cir 1967) ; *Blaschka v US*, 393 F2d 983 (Ct Cl 1968) ; *Coates Trust v Commr*, 55 TC 501 (1970) , affd 480 F2d 468 (9th Cir 1973) , cert denied 414 US 1045 ; *Vinnell v Commr*, 52 TC 934 (1969) . The redemption was held not to be essentially equivalent to a dividend in *Sorem v Commr*, 334 F2d 275 (10th Cir 1964) ; and *Salvatori v US*, 18 AFTR2d 5876 (SD Calif 1966) .

(n16)Footnote 11. IRC § 305(a) would treat the receipt of stock as a tax-free stock dividend unless one of the exceptions contained in IRC § 305(b) was applicable. See Ch 4.

(n17)Footnote 12. 41 TC 562 (1964) , nonacq 1966-2 CB 7 .

(n18)Footnote 13. 41 TC at 572 .

(n19)Footnote 14. 355 F2d 200 (6th Cir 1965) .

(n20)Footnote 15. 46 TC 864 (1966) .

(n21)Footnote 16. *Commr v Stickney*, 399 F2d 828 (6th Cir 1968) (the change in the title of the action resulted from the taxpayer's death during the pendency of the proceedings). The Seventh Circuit reached the same conclusion as the Tax Court and Sixth Circuit in *Gunther v Commr*, 909 F2d 291 (6th Cir 1990) .

(n22)Footnote 17. Rev Rul 73-2, 1973-1 CB 171 . See also Rev Rul 78-422, 1978-2 CB 129 (assumption of liabilities of transferor corporation governed by IRC § 304(a)(1), not IRC § 357(a)(1)). The enactment of IRC § 304(b)(3)(A) has rendered the two rulings obsolete. Rev Rul 95-71, 1995-2 CB 323 .

(n23)Footnote 18. *Coates Trust v Commr*, 480 F2d 468 (9th Cir 1973) , cert denied 414 US 1045 .

(n24)Footnote 19. IRC § 304(b)(3)(A). In determining whether persons in control of the issuing corporation are in control of the acquiring corporation, all transferors of stock must be counted even though some of them receive only stock and not other property from the acquiring corporation. IRC § 304(c)(2)(B).

(n25)Footnote 20. IRC § 304(b)(3)(B). The exception for acquisition indebtedness applies to an extension, renewal, or refinancing of the debt.

The tax consequences of the existence of the indebtedness will be governed by IRC §§ 357 and 358.

(n26)Footnote 21. IRC § 304(b)(3)(C), (D). The attribution rules of IRC § 318 apply in determining the extent of a shareholder's ownership. IRC § 304(b)(2)(D)(i), (c)(3).

For this purpose, any assumption of, or acquisition of stock subject to, acquisition indebtedness is treated as a distribution of property.

(n27)Footnote 1. A corporation qualifies as the parent of another corporation if it owns 50 percent of the voting stock or 50 percent of the value of the outstanding stock of such other corporation. IRC § 304(c)(1).

Stock of a parent corporation was exchanged for stock of its subsidiary and cash pursuant to a plan of reorganization. The Tax Court relied on the definition of property found in IRC § 317(a) (money, securities, and other property, but not stock in the distributing corporation) to hold that the stock portion of the transaction did not fall within IRC § 304(a)(2). *Bhada v Commr*, 89 TC 959 (1987) , affd 892 F2d 39 (6th Cir 1989) ; see also *Caamano v Commr*, 879 F2d 156 (5th Cir 1989) .

(n28)Footnote 2. IRC § 304(b)(1).

(n29)Footnote 3. *IRC § 304(b)(2)*. In *Rev Rul 69-261, 1969-1 CB 94*, the Service held that a wholly owned subsidiary's purchase of its parent's stock from the sole shareholder of the parent resulted in a constructive dividend to the parent and to the shareholder. It abandoned that position in *Rev Rul 80-189, 1980-2 CB 106*, to conform to the consensus of the courts. *Webb v Commr, 572 F2d 135 (5th Cir 1978)*, *affg per curiam 67 TC 293 (1976)*; *Broadview Lumber Co v US, 561 F2d 698 (7th Cir 1977)*; *Virginia Metals Corp v Commr, 67 TC 372 (1976)*.

(n30)Footnote 4. *Treas Reg § 1.304-2(c)*.

(n31)Footnote 5. Marans, "Section 304: The Shadowy World of Redemptions Through Related Corporation," 22 *Tax L Rev* 161 (1967).

(n32)Footnote 1. *Treas Reg § 1.304-2(a)*; *Rev Rul 71-563, 1971-2 CB 175*. See *Rev Rul 71-527, 1971-2 CB 174*, applying the Regulations to an *IRC § 304* transaction treated as an *IRC § 303* redemption.

(n33)Footnote 2. *Prop Treas Reg § 1.302-5*, discussed in § 5.02[4]; *Prop Treas Reg § 1.304-2(a)(3)*.

(n34)Footnote 3. *Treas Reg § 1.304-2(a)*. Conceptual consistency requires the Regulations to call for an increase in basis (reflecting the idea that the transaction is a contribution to the capital of the acquiring corporation) followed by an immediate decrease in basis.

(n35)Footnote 4. *Treas Reg § 1.304-2(a)*.

(n36)Footnote 5. *Treas Reg § 1.304-3(a)*. *Prop Treas Reg § 1.302-5* will apply to any of the shareholder's unutilized basis in the stock of parent corporation. In applying the regulation, the parent corporation is treated as the redeeming corporation and the shareholder as the redeemed shareholder. *Prop Treas Reg § 1.304-3(a)*.

(n37)Footnote 6. Marans, "Section 304: The Shadowy World of Redemptions Through Related Corporation," 22 *Tax L Rev* 161, 172 (1967); Diamond, " 'Brother-Sister Corporations'--Sale of Stock or Other Assets, And Other Problems," 1959 *So Calif Tax Inst* 109, 129.

(n38)Footnote 7. The Internal Revenue Service took this position in *Rev Rul 80-189, 1980-2 CB 106*.

(n39)Footnote 8. The provision applies generally to distributions after Dec 15, 1987. However, the effective date is deferred until Jan 1, 1993 if the transaction is between corporations that were members of the same affiliated group on Dec 15, 1987, or became members of the same group before Jan 1, 1989, pursuant to a binding written contract or tender offer in effect on Dec 15, 1987.

(n40)Footnote 9. The example is taken from the Conference Report, HR Rep No 100-495, 100th Cong, 1st Sess 969-970 (1987).

CHAPTER 5 Distributions in Redemption of Stock

1-5 Taxation of Securities Transactions § 5.05

§ 5.05 Effect of Redemptions on the Distributing Corporation

[1] Gain or Loss on the Distribution

IRC Section 311(b)(1) requires the recognition of gain when appreciated property (other than an obligation of the distributing corporation) is distributed to a shareholder in redemption of all or part of his stock.ⁿ¹ The manner in which the shareholder treats the redemption is unimportant when considering the tax consequences to the corporation. The only exception is a distribution by a regulated investment company (RIC) in redemption of its stock upon demand by the shareholder.ⁿ²

In determining the amount of gain to be recognized on a redemption falling within *IRC Section 311(b)(1)*, no offset is permitted for losses realized on the distribution of depreciated property as part of the transaction.ⁿ³ The character of the gain is a function of the nature of the property distributed.ⁿ⁴

Gain must also be recognized in the case of a redemption distribution by a foreign corporation of a United States real property interest, except when the basis of the distributed property in the hands of the distributee is the same as the adjusted basis of the property before the distribution increased by the amount of any gain recognized by the distributing corporation.ⁿ⁵

[2] Effect on Earnings and Profits

A redemption distribution treated as a dividend under *IRC Section 301* will have the same effect on the distributing corporation's earnings and profits as any ordinary dividend distribution.ⁿ¹ A redemption treated as an exchange has a different impact on earnings and profits. *IRC Section 312(n)(7)* provides that "the part of the distribution which is properly chargeable to earnings and profits shall be an amount which is not in excess of the earnings and profits of the corporation accumulated after February 28, 1913, attributable to the stock so redeemed." Thus, if 20 percent of the corporation's stock is redeemed, earnings and profits are reduced by 20 percent, but in no event can the reduction be greater than the amount of the distribution.ⁿ²

If the corporation has more than one class of stock, its earnings and profits should be allocated among the different classes in determining the amount by which a redemption of all or part of one class reduces earnings and profits.ⁿ³ Generally no allocation will be made to preferred stock that is not convertible or participating to any significant extent in corporate growth. A redemption of such stock should result in a reduction of the capital account only, unless the

distribution includes dividend arrearages.ⁿ⁴

Priorities legally required as between different classes of stock may be taken into account in allocating earnings and profits between classes.ⁿ⁵

Example:

A corporation has 1,000 shares of class A common stock and 1,000 shares of class B common stock. Both classes have the same par value and were issued at the same time at the same price. The class A common has a preference as to dividends and liquidating distributions twice that of the class B common. The corporation has earnings and profits of \$120,000 and a capital account greater than \$60,000. If the corporation redeems all of the class A common for \$140,000, earnings and profits should be reduced by \$80,000 (2/3rds of \$120,000) and the capital account by \$60,000.

The rules just described apply to distributions in taxable years beginning after September 30, 1984. For preceding years, *IRC Section 312(e)*, repealed by the Tax Reform Act of 1984, provided that "the part of [the] distribution which is properly chargeable to capital account shall not be treated as a distribution of earnings and profits."ⁿ⁶

The difference in result between the new and old rules can be illustrated by the following example:

Example:

The balance sheet of a corporation shows the following information:

Assets.....	\$100,000
Liabilities.....	20,000
Capital (stated value of stock plus paid-in surplus).....	40,000
Accumulated Earnings and Profits	40,000

The corporation redeems 25 percent of the stock for \$30,000. Under the old rule, the charge to capital account would have been \$10,000, with earnings and profits reduced by \$20,000. Under the new rule, earnings and profits are reduced by \$10,000.

[3] Expenses "In Connection With" a Redemption

IRC Section 162(k) disallows a deduction for "any amount paid or incurred by a corporation in connection with the reacquisition of its stock or the stock of any related person..."ⁿ¹ These few words have spawned a surprising amount of litigation, including an issue that may be headed for the US Supreme Court.

The subsection was added to the Code by the Tax Reform Act of 1986 to clarify that Congress disapproved the result in *Five Star Mfg Co v Comm'r*,ⁿ² which allowed a corporation to deduct as an ordinary and necessary expense the cost of acquiring its stock from a dissident shareholder as a means of avoiding litigation and potential dissolution.ⁿ³ However, *IRC Section 162(k)* does not merely disallow a deduction for amounts paid by a corporation, under any circumstances, to reacquire its stock; it also disallows any expenditure incurred "in connection with" a redemption.ⁿ⁴

Are loan fees (other than interest) paid to borrow money with which to redeem stock disallowed by *IRC Section 162(k)*? The Ninth Circuit said no; such fees are incurred "in connection with" the loan transaction, not in connection with the redemption.ⁿ⁵ The Tax Court said yes; Congress intended the phrase "in connection with" to be broadly construed.ⁿ⁶ The Senate Finance Committee report illustrated the kind of incidental expenditures *IRC Section 162(k)* was intended to cover: "The committee intends that amounts subject to this provision will include amounts paid to repurchase stock,

premiums paid for the stock, legal, accounting, brokerage, transfer agent, appraisal and similar fees incurred in connection with the repurchase, *and any other expenditure that is necessary or incident to the repurchase* * * * [S Rep 99-313, at 223 (1986), 1986-3 C.B. (Vol. 3) 1, 223; emphasis added.]ⁿ⁷ Fees paid for a loan obtained solely for the purpose of redeeming the corporation's stock were, in the Tax Court's opinion, "connected with" the redemption in the "ordinary, everyday sense" of those words.ⁿ⁸ Congress ultimately resolved the loan fee issue by adding such fees to a list of expenditures for which a deduction is expressly permitted notwithstanding *IRC Section 162(k)*,ⁿ⁹ but without resolving the larger dispute over the breadth of *IRC Section 162(k)*'s "in connection with" language.

However, the scope of the "in connection with" language in *IRC Section 162(k)* was again put in issue in conflicting decisions over whether *IRC Section 162(k)* disallows deductions that would otherwise be allowable when retirement benefits paid by an employee stock ownership plan (ESOP) are funded by the taxpayer's redemption of its own stock from the ESOP.ⁿ¹⁰ Following its "strict construction" of the "in connection with" language in *IRC Section 162(k)*,ⁿ¹¹ the Ninth Circuit held that a taxpayer's redemption of its own stock from its ESOP, which used the redemption proceeds to pay retirement benefits to the taxpayer's retired employees, which retirement benefits were then deducted by the taxpayer under *IRC Section 404(k)(1)*, was not "connected with" the deduction claimed by the taxpayer because the retired employees, not the taxpayer, independently determined whether to withdraw the redemption proceeds as retirement benefits from the ESOP which is what made them deductible by the taxpayer.ⁿ¹² The Tax Court, following its broader interpretation of "in connection with" announced in *Fort Howard Paper Corp*, held that the redemption and withdrawal transactions were clearly "connected" because the deduction under *IRC Section 404(k)(1)* was conditioned on the benefits withdrawn by the retired employees being paid out of the proceeds from a redemption of the corporation's stock.ⁿ¹³ With the Courts of Appeals for the Third and Eighth Circuits taking the same view as the Tax Court,ⁿ¹⁴ the issue may ultimately be resolved by the Supreme Court.

The Tax Court has also found that payment of a shareholder's legal claim against the corporation is not necessarily "connected with" a redemption of the shareholder's stock simply because the redemption and payment of the claim occur at the same time.ⁿ¹⁵ This holding is supported by *IRC Section 162(k)*'s legislative history: "[T]he provision is not intended to deny a deduction for otherwise deductible amounts paid in a transaction that has no nexus with the redemption other than being proximate in time or arising out of the same general circumstances. For example, if a corporation redeems a departing employee's stock and makes a payment to the employee in discharge of the corporation's obligations under an employment contract, the payment in discharge of the contractual obligation is not subject to disallowance under this provision * * * Payments in discharge of other types of contractual obligations, in settlement of litigation, or pursuant to other actual or potential legal obligations or rights, may also be outside the intended scope of the provision to the extent it is clearly established that the payment does not represent consideration for the stock or expenses related to its acquisition...H. Conf. Rept. 99-841, (Vol. II), at II-168 to II-169 (1986), 1986-3 C.B. (Vol. 4) 1, 168, 169." Tax planners will therefore want to document carefully all possible independent bases for compensating the retiring shareholder (other than payment for his stock) to maximize the deductibility of payments made to such shareholders.

(n12)Footnote 1. A person is a related person for this purpose if the person bears a relationship to the acquiring corporation specified in *IRC § 267 (c)* or *IRC § 707(b)(1)* (but substituting 10 percent for 50 percent ownership), or the related person and the acquiring corporation are engaged in trades or businesses under common control as defined in *IRC § 52(a)* and *(b)*. See *IRC § 465(b)(3)(C)*, incorporated by reference into *IRC § 162(k)(1)*. The reach of *IRC § 162(k)* was further extended in *Custom Chrome, Inc v Comm'r*, 217 F3d 1117 (9th Cir 2000) , in which a shareholder's sale of stock to an unrelated entity was turned into a redemption by application of the step transaction doctrine. In that case, a leveraged buy-out was accomplished by forming a holding company and an acquisition company, which purchased the stock of the target company from its sole shareholder. Shortly thereafter the acquisition company was merged into the target, which became a wholly owned subsidiary of the holding company. Collapsing the steps, the Court of Appeals for the Ninth Circuit held that the target had effectively acquired its own stock from its sole shareholder. As a consequence, expenses connected with the transaction were nondeductible under *IRC § 162(k)*.

(n13)Footnote 2. 355 F2d 724 (5th Cir 1966) .

(n14)Footnote 3. See S Rep 99-313, at 223, n.3 (1986), 1986-3 CB (Vol 3) 223. *Five Star Mfg's* business purpose rationale was similar to the so-called *Corn Products* doctrine under which taxpayers were allowed to disregard the capital nature of expenditures for stock and other assets if the purpose of the acquisition was business-related and not for investment. See § 2.04[2][a]. This theoretical underpinning was removed some two years after *IRC § 162(k)* was enacted when the *Corn Products* doctrine as applied by the lower courts was overturned by the Supreme Court. *Arkansas Best Corp. v Comm'r*, 485 US 212 (1988) .

(n15)Footnote 4. Other than expenses expressly excepted by *IRC § 162(k)(2)*, including interest.

CHAPTER 6 Liquidating Distributions

1-6 Taxation of Securities Transactions § 6.01

§ 6.01 Introduction

Viewed from the shareholder level, a distribution in redemption of stock produces the same economic effect as a liquidating distribution--the shareholder surrenders all or part of his stock in return for assets of the corporation. It follows, then, that the shareholder should be allowed to treat the proceeds of a liquidation as a payment in exchange for his stock, and this is exactly the status that has been given to liquidating distributions since 1924 (except for the period 1934-1936).ⁿ¹

One exception to the general rule that a liquidation is a fully taxable exchange provides for nonrecognition of gain or loss on the complete liquidation of a subsidiary by its parent.ⁿ² Another converts shareholder gain into ordinary income whenever the liquidation is of a "collapsible corporation."ⁿ³

CHAPTER 6 Liquidating Distributions

1-6 Taxation of Securities Transactions § 6.02

§ 6.02 Complete Liquidations--Effect on the Shareholder

[1] The General Rule--Section 331(a).

Any amount distributed to a shareholder in complete liquidation of a corporation is treated as received "in full payment in exchange for the stock."ⁿ¹ To be noted is that the liquidation does not automatically produce capital gain or loss; it merely supplies the exchange component of the capital transaction formula. Still required is that the surrendered stock constitute a capital asset in the hands of the shareholder.

What is complete liquidation? The term is not defined either in *IRC Section 331* or the Regulations thereto. However, the Regulations under *IRC Section 332*, dealing with complete liquidations of subsidiaries, speak of the status of liquidation existing "when the corporation ceases to be a going concern and its activities are merely for the purpose of winding up its affairs, paying its debts, and distributing any remaining balance to its shareholders."ⁿ² The regulations go on to show that a liquidation can be completed prior to dissolution and that legal dissolution of the corporation is not required.ⁿ³ Since *IRC Section 332* is concerned with complete liquidations, the concept of liquidation found in the Regulations under that section should apply with equal force to all complete liquidations.ⁿ⁴

Prior to the Tax Equity and Fiscal Responsibility Act of 1982, each of a series of distributions made pursuant to a plan to redeem all of the stock of the corporation was treated as a partial liquidation. After August 31, 1982, such distributions are treated as being in complete liquidation of the corporation and, therefore, governed by *IRC Section 331(a)*.ⁿ⁵

[a] Computing Gain or Loss on the Liquidation. The gain or loss to a shareholder from a distribution in complete liquidation is determined in the same manner as any disposition of property, namely, by comparing the amount of the distribution with the basis of the surrendered stock.ⁿ⁶ According to the regulations, gain or loss is not determined in the aggregate, but rather on a share-by-share basis.ⁿ⁷ For example, assume that a shareholder, who purchased 100 shares of a corporation on March 1, 2000 at a cost of \$25 per share, and an additional 100 shares on March 1, 2001 at a cost of \$100 per share, receives a \$15,000 liquidating distribution from the corporation on June 1, 2001. The shareholder's economic gain of \$2,500 translates for tax purposes into a long-term capital gain of \$5,000 and a short-term capital loss of \$2,500.

The foregoing example assumed that the liquidating distribution was pro rata with respect to the shareholders. If this is not the case, the Service treats the liquidation as two separate transactions, the first of which is a pro rata distribution,

and the second, a payment by recipients of a lesser share to those receiving more than a pro rata portion.ⁿ⁸ The tax consequences of the payment depend "upon all of the relevant facts and circumstances which must be determined from all of the extrinsic and intrinsic evidence surrounding the transaction."ⁿ⁹

If the liquidation takes the form of a series of distributions, gain is recognized only after an amount equal to the shareholder's basis has been recovered.ⁿ¹⁰ Where the shareholder owns different blocks of stock, each distribution in the series must be allocated ratably among the different blocks in the proportion that the number of shares in a particular block bears to the number of shares outstanding, and gain recognized with respect to each specific block only after the shareholder has recovered his basis for that block.ⁿ¹¹ Once this has occurred, the portion of each subsequent distribution allocable to the specific block will be recognized as gain in its entirety. On the other hand, loss will not be recognized until the corporation has made its final distribution.ⁿ¹²

[b] The Time to Recognize Gain or Loss--"Open" and "Closed" Transactions. Suppose that X Corporation completely liquidates by making a single distribution of cash to its shareholders. It is obvious that the shareholders will recognize gain or loss on the liquidation in the taxable year of the distribution.ⁿ¹³ The identical result obtains if the corporation distributes assets in kind and the assets are readily susceptible of valuation.

Where the distribution includes assets whose value cannot be ascertained with reasonable accuracy, e.g., contingent contract rights, the transaction will remain "open" under the rule set down in *Burnet v. Logan*.ⁿ¹⁴ The taxpayer will recognize gain in the year of distribution only to the extent that the value of other assets received exceeds his basis for the stock. Additional gain will be includable when collection, sale, or other disposition converts the asset into property of ascertainable value. The important feature of the "open" transaction is that any additional gain realized is capital gain, since it is considered gain produced by the exchange of stock. Had a value been ascribed to the asset, and the liquidation "closed" in the year of distribution, any additional amount received on account of the asset could be ordinary income or capital gain, the determining factors being the character of the asset in the taxpayer's hands and the mode of disposition. If the asset has the status of a capital asset and the disposition takes the form of a sale or exchange, the additional gain will be capital gain. But if either of these requisites for capital treatment is lacking, the additional amount realized will enter gross income as ordinary income.

[c] Anticipatory Assignment of Income--Gift of Stock Followed by Liquidation. A gift of stock during the period between adoption of the plan of liquidation, but prior to actual distribution, may constitute an anticipatory assignment of the proceeds. A crucial question is whether the donee possesses sufficient voting power to call off the liquidation. If not, a court could infer that it was the donor's intention that the donee have no right other than to participate in the liquidation distribution.ⁿ¹⁵ In such case, the gift of the stock is a gift of the proceeds and nothing more.

Lack of control does not insure against a finding of anticipatory assignment. A court, applying a "realities and substance" test, could conclude that the liquidation had progressed so far as to render it unlikely that the plan of liquidation would be abandoned.ⁿ¹⁶ Courts that look to the realities and substance of events give no weight to the hypothetical possibility that the liquidation might be called off.ⁿ¹⁷

[d] Basis of Property Received. *IRC Section 334(a)* states the rule that the basis of property received in a complete liquidation in which gain or loss is recognized (or would be recognized if gain or loss was realized) will be the fair market value of the property at the time of the distribution.ⁿ¹⁸ Put another way, the basis of the property is equal to the basis of the surrendered stock, increased by the amount of any gain, and decreased by the amount of any loss, realized on the liquidation. *IRC Section 334(a)* has no application to the liquidation of a subsidiary under *IRC Section 332*; the basis of property received in such a liquidation is controlled by *IRC Section 334(b)*.

[2] Exception to the General Rule--Liquidation of a Subsidiary.

[a] Requirements of Section 332.

No gain or loss is recognized "on the receipt by a corporation of property distributed in complete liquidation of another corporation" n1 provided (1) the receiving corporation owns a prescribed percentage of the stock of the distributing corporation, and (2) the distribution is in complete cancellation or redemption of all of the stock of the distributing corporation and occurs within a specified period of time. n2 The transaction is treated like a tax-free reorganization in other respects as well, with the parent succeeding to the subsidiary's basis in properties transferred n2.1 as well as its other tax attributes (including loss carryovers). n2.2

[i] Stock Ownership Requirement. The first condition for nonrecognition calls for the recipient corporation to be the actual owner of stock (in the liquidating corporation) that possesses at least 80 percent of the total combined voting power of all classes of stock entitled to vote and has a value equal to at least 80 percent of the total value of the stock of the corporation. n3 Such ownership must be present on the date of adoption of the plan of liquidation and must continue without interruption until the distribution in liquidation is completed. n4 If the recipient corporation fails to maintain the required stock ownership continuously throughout the specified period, all distributions received under the plan of liquidation, including those received while the parent corporation is qualified with respect to the ownership of stock of the distributing corporation, will be subject to the general rule of *IRC Section 331* and not the special nonrecognition rule of *IRC Section 332(a)*. n5 Thus, even though *IRC Section 332* is not elective, it would appear possible for a parent to avoid nonrecognition at any time during the pendency of the liquidation merely by disposing of sufficient stock to reduce its holding in the subsidiary below the qualifying amount. n6

The opposite situation, an attempt to raise stock ownership to the required level, was presented in *Revenue Ruling 70-106*, n7 where the increase in the parent's stock ownership in the subsidiary was achieved by the redemption of a minority interest prior to adoption of the formal plan of liquidation. The Service denied the parent nonrecognition treatment under *IRC Section 332*, holding that "the plan of liquidation was adopted at the time [the parent corporation] reached the agreement with the minority shareholders and at such time, [the parent] owned seventy-five percent of the stock of [the subsidiary]." n8 Thus, all the shareholders, including the minority shareholders, were held to have received a distribution in liquidation governed by the provisions of *IRC Section 331*. It must be assumed that the Service found the existence of an informal plan of liquidation which antedated adoption of the formal plan. Otherwise the result seems hard to justify. It is interesting to note that the attempt would have succeeded if the stock of the minority shareholders had been purchased by the parent instead of having been redeemed by the subsidiary. A mere sale of stock between shareholders does not constitute an adoption of a plan of liquidation. n9

[ii] Distribution Requirements. The second condition of *IRC Section 332(b)* interrelates the timing of distributions with the form and content of the plan of liquidation. n10 If the transfer of assets is completed within a single taxable year of the distributing corporation, n11 adoption by the shareholders of the resolution authorizing the distribution will be considered the adoption of the plan of liquidation, even though the resolution fails to specify the time for completion of the transfer of property. n12 If the liquidation is not completed within one taxable year, the plan of liquidation must provide that the transfer of property will be completed within three years from the close of the taxable year in which the first distribution is made. n13 If the transfer of property is not completed within the specified period, none of the distributions made pursuant to the plan of liquidation will be granted nonrecognition treatment. n14 Where complete distribution does not occur within the taxable year, the Commissioner may require the taxpayer to post a bond or execute a waiver of the statute of limitations as a means of insuring the assessment and collection of taxes which will become due if *IRC Section 332* is rendered retroactively inapplicable. n15

While the apparent import of the statute is that nonrecognition of gain or loss will ensue only if the liquidating corporation is fully divested of its property within the prescribed period, the Regulations permit the retention of a nominal amount of assets for the sole purpose of preserving the corporation's legal existence. n16 But if the retained property consists of operating assets, the liquidation will fall outside the ambit of *IRC Section 332*. n17

Where the liquidation consists of more than one distribution, it is essential that a status of liquidation exist from the time

of the first distribution until complete liquidation.ⁿ¹⁸ Such a status exists when the corporation ceases to be a going concern and its activities are merely for the purpose of winding up its affairs, paying its debts, and distributing the balance of its property to its shareholders.ⁿ¹⁹

[iii] Deductible Liquidating Distributions of Regulated Investment Companies and Real Estate Investment Trusts. If a corporation receives a distribution from a regulated investment company (RIC) or a real estate investment trust (REIT) that is considered as being in complete liquidation of the RIC or REIT under *IRC Section 332(b)*, the corporation must recognize and treat as a dividend from the RIC or REIT an amount equal to the deduction for dividends paid allowable to the RIC or REIT by reason of the distribution.ⁿ²⁰

[b] Basis of Property Received in a Section 332 Liquidation.

[i] General Rule. Under *IRC Section 334(b)*, property received by a parent corporation in a *IRC Section 332* liquidation will have the same basis in the hands of the parent as it had in the hands of the subsidiary except that the basis in the hands of the parent will be the fair market value of the property at the time of the distribution if (i) gain or loss is recognized by the liquidating corporation with respect to the property, or (ii) the liquidating corporation is a foreign corporation, the parent is a domestic corporation, and the parent's aggregate adjusted bases of property described in *IRC Section 362(e)(1)(B)* (see § 3.02[5]) and distributed in the liquidation otherwise would exceed the fair market value of the property immediately after the liquidation. This rule should be applied asset-by-asset and not by allocating the aggregate basis of the acquired property among the component parts in proportion to the fair market value of each asset. However, if the liquidating corporation recognizes gain or loss with respect to the property, the basis of the property in the hands of the distributee will be its fair market value at the time of distribution.

[ii] Exception to the General Rule--Section 338. Under *IRC Section 338*, a purchasing corporation can treat a stock purchase as an asset acquisition if it irrevocably elects to do so not later than the 15th day of the ninth month beginning after the month in which the "acquisition date" occurs.ⁿ²¹ The acquisition date is the date on which there is a qualified stock purchase, that is, the purchasing corporation obtains by purchase, either in a single transaction or in a series of transactions during a 12-month acquisition period, stock that possesses at least 80 percent of the total combined voting power of all classes of stock entitled to vote and has a value equal to at least 80 percent of the total value of all classes of stock of the target (subsidiary) corporation.ⁿ²² To illustrate, if the purchasing corporation acquires the requisite degree of ownership in a single purchase on one day, that day will be the acquisition date and the election period measured from that date. On the other hand, if the acquisition is in steps, the acquisition date is the day on which the specified percentage of ownership is obtained provided the steps occur within twelve months.

The term "purchase" is defined as any acquisition of stock,ⁿ²³ except (1) an acquisition of stock in a transaction which causes the basis of the stock in the hands of the acquiring corporation to be determined by reference to its basis in the hands of the transferor (as in a reorganization) or under *IRC Section 1014(a)*; (2) an acquisition of stock from a decedent; (3) an acquisition of stock in an *IRC Section 351, 354, 355, or 356*, exchange or in any other transaction described in regulations in which the transferor does not recognize the entire amount of gain or loss realized on the transaction; and (4) an acquisition of stock from a person whose ownership would be attributed to the acquiring corporation.ⁿ²⁴ A purchase also occurs if stock is acquired by purchase from a related corporation provided at least 50 percent in value of the stock of such related corporation was acquired by purchase.ⁿ²⁵ For this purpose, a corporation is a related corporation if stock owned by such corporation is treated under *IRC Section 318* as owned by the corporation acquiring the stock.ⁿ²⁶

Example

:1 X Corporation owns 90 percent of the stock of Y Corporation. On June 1, 2001, P Corporation purchased 60 percent of the stock of X Corporation. P Corporation is treated as having acquired 54 percent (60 percent of 90 percent) of Y Corporation on that date. If the purchasing corporation had purchased only 40 percent of the X stock on June 1, 2001, but then purchased an additional 20 percent of the stock one month later, it would still be treated as owning 54 percent of the stock of Y Corporation,

but such ownership would begin at the time of the second purchase.

Example

:2 On January 1, 2001, *P* Corporation purchased 75 percent in value of *X* Corporation stock. On that date, *X* owned 80 of the 2,000 shares of *Y* Corporation stock. On June 1, 2001, *X* acquired an additional 320 shares of *Y* stock. On December 1, 2001, *P* purchased 1,400 shares of *Y* stock from an unrelated party and 240 of the 400 shares of *Y* stock held by *X*.

Of the 240 shares of *Y* stock purchased by *P* from *X* on December 1, 2001, 60 of those shares are deemed to have been acquired by *P* on January 1, 2001, the date on which 60 of the 80 shares of *Y* stock held by *X* were first considered owned by *P* under *IRC Section 318(a)(2)(C)*, namely, 75 percent of 80 shares. The remaining 180 shares of *Y* stock purchased by *P* from *X* on December 1, 2001 are deemed to have been acquired by *P* on June 1, 2001, the date on which an additional 240 of the 400 shares of *Y* stock owned by *X* were first considered owned by *P* under *IRC Section 318(a)(2)(C)*, that is, 300 shares (75 percent of 400 shares) minus the 60 shares deemed owned on January 1, 2001. Because stock acquisitions by *P* sufficient for a qualified stock purchase of *X* occur within a 12-month period (60 shares constructively on January 1, 180 shares constructively on June 1, and 1,400 shares actually on December 1), a qualified stock purchase is made on December 1, 2001.

Redemptions of stock of the acquired corporation from persons unrelated to the purchasing corporation that occur during the 12-month acquisition period are taken into account as reductions in the acquired corporation's outstanding stock for purposes of determining whether the amount of stock purchased by the acquiring corporation during the 12-month period satisfies the percentage ownership requirements.ⁿ²⁷ A redemption of stock from the purchasing corporation or from any person related to the purchasing corporation is not taken into account as a reduction in the acquired corporation's outstanding stock.ⁿ²⁸

The effect of an election is to treat the target corporation as having sold all of its assets for fair market value at the close of the acquisition date in a single transaction as part of a complete liquidation, and then to treat it as a new corporation that acquired all of those assets on the subsequent day.ⁿ²⁹ (It is important to note that the target corporation does not have to be liquidated for *IRC Section 338* to apply.)ⁿ³⁰ The assets of the target corporation will have a total basis equal to the sum of the grossed-up basis of the purchasing corporation's recently purchased stock (stock in the target corporation that is held by the purchasing corporation on the acquisition date and acquired by it during the 12-month acquisition period) and the basis of its nonrecently purchased stock (any stock that is held by the purchasing corporation on the acquisition date and that is not recently purchased stock).ⁿ³¹ The purchasing corporation can step up the basis of its nonrecently purchased stock to an amount equal to the grossed-up basis of its recently purchased stock multiplied by a fraction the numerator of which is the percentage of the value of the target corporation's stock attributable to the purchasing corporation's nonrecently purchased stock, and the denominator of which is 100 percent minus the numerator, provided it elects to recognize gain as if the nonrecently purchased stock were sold on the acquisition date for an amount equal to the stepped-up basis.ⁿ³² The grossed-up basis of the recently purchased stock is an amount equal to the basis of the stock multiplied by a fraction the numerator of which is 100 percent minus the percentage of the value of the target corporation's stock attributable to nonrecently purchased stock, and the denominator of which is the percentage of the value of the target corporation attributable to the purchasing corporation's recently purchased stock.ⁿ³³ Thus, if the purchasing corporation's recently purchased stock equaled 85 percent of the value of the stock in the target corporation, and its nonrecently purchased stock amounted to 10 percent of such value, the grossing up fraction would be 90/85.

The basis as determined is allocated pursuant to the residual method.ⁿ³⁴ Under that method, basis is first reduced by cash and general deposit accounts (including savings and checking accounts) other than certificates of deposit held in banks, savings and loan associations, and other depository institutions (Class I assets). Any remaining basis is allocated

to six different classes of assets in proportion to their fair market values. Class II assets consist of actively traded personal property within the meaning of *IRC Section 1092(d)(1)*, and certificates of deposit and foreign currency even if not actively traded.ⁿ³⁵ Class III assets are assets that the taxpayer marks to market at least annually for federal income tax purposes and debt instruments, other than (1) debt instruments issued by persons related at the beginning of the day following the acquisition date to the acquired corporation under *IRC Section 267(b)* or 707, (2) certain contingent debt instruments, and (3) debt instruments convertible into the stock of the issuer or other property. Class IV assets consist of inventory-type assets.^{n35.1} Class VI assets are all Section 197 intangibles, except goodwill and going concern value. Class VII assets are goodwill and going concern value. Class V assets are all other assets.

IRC Section 338 imposes consistency requirements whenever the purchasing corporation acquires the stock of a target corporation and one or more target affiliates and the purchases take place during a period consisting of the one-year period preceding the twelve-month acquisition period for the target corporation, plus the portion of the acquisition period up to and including the acquisition date, and the one-year period following the acquisition date--the "consistency period."ⁿ³⁶ (A corporation is a target affiliate of the target corporation if, at any time during that portion of the consistency period ending on the acquisition date of the target corporation, each of the corporations was a member of an affiliated group that had the same common parent.)ⁿ³⁷ In such case, any election made with respect to the first such purchase applies with equal force to each subsequent purchase, and no election can be made for a later purchase if one was not made with respect to the first of such purchases.ⁿ³⁸

Generally, with respect to a deemed asset sale, a target is not treated as a member of an affiliated group for consolidated return purposes. However, if an election under *IRC Section 338(h)(10)* is made, the target's deemed asset sale is included in the selling consolidated group's return, but no gain or loss is recognized the stock sale by members of the group. Absent an *IRC Section 338(h)(10)* election, there is normally double recognition of gain or loss--by the target corporation on the deemed sale of stock in the target affiliate and by the target affiliate on the deemed sale of its assets.ⁿ³⁹

A second consistency provision treats a purchasing corporation as having made an election with respect to any target corporation if, at any time during the consistency period, the purchasing corporation acquires any asset of the target corporation or target affiliate.ⁿ⁴⁰ Excepted from the scope of this second requirement is any acquisition by the purchasing corporation if the sale by the target corporation or target affiliate is in the ordinary course of its trade or business, the basis of the property acquired is determined, wholly by reference to the adjusted basis of the property in the hands of the person from whom it is acquired, the acquisition took place before September 1, 1982, the property is located outside the United States, or the regulations specifically exempt the acquisition.ⁿ⁴¹

The consistency requirements can be illustrated by the following examples:

Example 1:

A corporation purchases 100 percent of the stock of a target corporation on June 1, 2000, and makes a timely election to treat the purchase as an asset purchase. Within one year, it purchases all of the stock of a second corporation that is a target affiliate of the target corporation. The purchasing corporation is deemed to have made an election with respect to the affiliated corporation even if it does not actually do so.

Example 2:

Assume the same facts as in the previous example except that no election was made after the purchase of the stock of the target corporation. No election can be made with respect to the purchase of the stock of the affiliated corporation.

Example 3:

Assume the same facts as in the prior example except that the second purchase is of the assets of the

affiliated corporation. The purchasing corporation will be deemed to have made an election with respect to the target corporation.

[c] Effect of the Liquidation on Minority Shareholders. The liquidation of a subsidiary under *IRC Section 332* in no way affects the tax consequences of the distribution to minority shareholders. *IRC Section 332* and the applicable basis provision are the concern of the parent corporation alone. Although as a general rule, the holder of a minority interest will recognize his gain or loss under *IRC Section 331* and use fair market value as the basis for the property received by him, he is not precluded in a proper case, from seeking nonrecognition on the ground that the liquidation was also a reorganization, eg, a merger of subsidiary into parent with the parent issuing its stock to the holders of the minority interest.ⁿ⁴²

[d] Liquidation of a Foreign Subsidiary. The general nonrecognition rule of *IRC Section 332* does not apply when the liquidating subsidiary is a foreign corporation and the parent is a domestic corporation. In such case, the parent includes in its gross income as a deemed dividend the all earnings and profits amount for the taxable year in which the distribution occurs.ⁿ⁴³ The all earnings and profits amount is the net positive earnings and profits that would be attributed to a United States shareholder's controlled foreign corporation stock if the stock were sold in a transaction subject to *IRC Section 1248*, except that the all earnings and profits amount does not include amounts attributable to the holding period of non-United States persons, but does include earnings attributable to the United States shareholder's stock whether or not the shareholder was a 10-percent owner of the foreign corporation.ⁿ⁴⁴ The all earnings and profits amount is increased by any gain recognized by the foreign subsidiary, as when there are distributions to minority shareholders.ⁿ⁴⁵

A United States person who is not a 10-percent shareholder of the foreign corporation must recognize gain, but not loss, with respect to the stock of the foreign corporation.ⁿ⁴⁶ However, the shareholder may elect to include in income as a deemed dividend the all earnings and profits amount with respect to its stock in the foreign corporation.ⁿ⁴⁷ A *de minimis* exception eliminates gain recognition if the value of the United States person's stock is less than \$50,000.

[e] Liquidation of Foreign Owned Holding Company. Pursuant to *IRC Section 332(d)(1)*, a complete liquidation of an applicable foreign holding company is not treated as a liquidation of a subsidiary or any other type of liquidation.ⁿ⁴⁸ Instead, the distribution is treated as one to which *IRC Section 301* applies. This means that, if the liquidated company has earnings and profits, the distribution will be treated as a dividend.

An applicable holding company is any domestic corporation (i) that is a common parent of an affiliated group, (ii) the stock of which is directly owned by the distributee foreign corporation, (iii) substantially all of the assets of which consist of stock in other members of the affiliated group, and (iv) that has not been in existence at all times during the five years immediately preceding the date of the liquidation.ⁿ⁴⁹

[f] Record-Keeping and Filing Requirements. The income tax return filed by a parent corporation for each year in which it receives a distribution in liquidation of its subsidiary must contain a complete statement of the facts pertinent to nonrecognition treatment, including:

- (1) a certified copy of the plan of liquidation and of the resolutions adopting the plan;
- (2) a statement under oath showing in detail all transactions incident to the plan;
- (3) a list of all properties received, together with the basis of the property to the liquidating corporation and the fair market value of the property on the date of distribution;
- (4) a statement of any indebtedness of the subsidiary to the parent on the date of adoption of the plan and on the date of first liquidating distribution, and, if the debt was acquired at less than face value, the cost to the parent corporation; and

(5) a statement as to the ownership of all classes of stock of the subsidiary beginning as of the date of adoption of the plan and ending with the distribution in liquidation. As to each class, the number of shares, percentage owned, voting power, cost or other basis, and dates on which acquired must be detailed.ⁿ⁵⁰

The recipient corporation is required also to keep permanent records concerning the information that must be filed with its tax returns.ⁿ⁵¹

FOOTNOTES:

(n1)Footnote 1. *IRC § 331(a)*. *IRC § 2032A* sets forth certain rules for valuing special use property for estate tax purposes. *IRC § 1040* limits the gain to the estate of the distribution of that property to "qualified heirs." Neither of those provisions limits the amount of gain realized on the liquidation of a corporation treated as special use property under *IRC § 2032A*. *Ltr Rul 9146001* .

(n2)Footnote 2. *Treas Reg § 1.332-2(c)*. The retention of major assets by the corporation will preclude a finding that a complete liquidation has occurred. See, eg, *Hageman v Commr*, 446 F2d 20 (5th Cir 1971) .

The Service will not ordinarily rule on the tax effect of a liquidation preceded or followed by the transfer of all or a part of the business assets to another corporation (1) that is the alter ego of the liquidating corporation, and (2) which, directly or indirectly, is owned more than 20 % in value by persons holding directly or indirectly more than 20% in value of the liquidating corporation's stock. *Rev Proc 2010-3*, 2010-1 IRB 110, 116 (§ 4.01(22)).

The courts have recognized that there can be a *de facto* liquidation if (1) there is a manifest intention to liquidate, (2) there is a continuing purpose to terminate corporate affairs, and (3) the activities of the corporation and its shareholders are directed toward that objective. See, eg, *Rendina v Commr*, TC Memo 1996-392 ; *Estate of Maguire v Commr*, 50 TC 130 (1968) .

(n3)Footnote 3. *Id.* A merger of a subsidiary into its parent was followed by the transfer of a nominal amount of the subsidiary's cash to a newly formed corporation organized in the same state and with the same name as the old corporation. The transfer was made solely to protect the corporate name. Held, the substance and effect of the transaction was the same as if the old subsidiary had liquidated and retained its legal existence. *Rev Rul 84-2*, 1984-1 CB 92 .

(n4)Footnote 4. See, eg, *Kennemer v Commr*, 96 F2d 177 (5th Cir 1938) ; *TT Word Supply Co v Commr*, 41 BTA 965 (1940) , acq 1940-2 CB 8 . See also *Poro v Commr*, 39 TC 641 (1963) , acq 1963-2 CB 5 , where the question as to whether a liquidation had occurred had an effect on transferee liability.

(n5)Footnote 5. *IRC § 346(a)*. The Service will not ordinarily issue rulings as to the tax effect of a liquidation by a series of distributions when they are to be made over a period in excess of three years from the date of adoption of the plan of liquidation. *Rev Proc 2010-3*, 2010-1 IRB 110, 116 (§ 4.01(25)).

(n6)Footnote 6. *Treas Reg § 1.331-1(b)*.

(n7)Footnote 7. *Treas Reg § 1.331-1(e)*; *Cooledge v Commr*, 40 BTA 110 (1939) ; *Rev Rul 68-348*, 1968-2 CB 141 , amplified by *Rev Rul 85-48*, 1985-1 CB 126 ; contra, *Palmer v US*, 1 AFTR2d 863 (D Conn 1958) .

(n8)Footnote 8. *Rev Rul 79-10*, 1979-1 CB 140 .

(n9)Footnote 9. *Rev Rul 79-10*, 1979-1 CB 140 .

(n10)Footnote 10. *Quinn v Commr*, 35 BTA 412 (1937) , acq 1937-1 CB 21 ; *Rev Rul 68-348*, 1968-2 CB 141 .

(n11)Footnote 11. *Rev Rul 68-348, 1968-2 CB 141* .

(n12)Footnote 12. *Dresser v US, 55 F2d 499 (Ct Cl 1932)* , *cert denied 287 US 635* ; *Rev Rul 68-348, 1968-2 CB 141* ; but see *Commr v Winthrop, 98 F2d 74 (2d Cir 1938)* allowing the loss in the year in which the corporation made its last substantial distribution, the amount of the final distribution being then determinable with reasonable accuracy; and *Rev Rul 69-334, 1969-1 CB 98* , allowing the loss in the year shareholders surrendered their stock in exchange for property and participation certificates entitling each shareholder to a proportionate interest in the final distribution. The final distribution was minimal and consisted of the cash of the corporation which had amounted to less than one percent of the assets prior to liquidation.

(n13)Footnote 13. A cash basis taxpayer is in constructive receipt of income on the date the liquidating distribution becomes payable, not the date he surrenders his shares. *Rev Rul 80-177, 1980-2 CB 109* .

(n14)Footnote 14. *283 US 404 (1931)* ; see § 1.04[2][a], *supra*. Cases in which the liquidation was held "open" include *Commr v Carter, 170 F2d 911 (2d Cir 1948)* (brokerage contracts for payment of commissions on future deliveries); *Westover v Smith, 173 F2d 90 (9th Cir 1949)* (contract for future royalty payments); *Dorsey v Commr, 49 TC 606 (1968)* (right to receive percentage based on receipts from sales or rentals); *Shea Co v Commr, 53 TC 135 (1969)* , *acq 1970-1 CB xvi* (contested claims). The subject asset was found to have ascertainable value in *Waring v Commr, 412 F2d 800 (3d Cir 1969)* (license agreement); *Grill v US, 303 F2d 922 (Ct Cl 1962)* (percentage interest in film receipts); *Campagna v US, 290 F2d 682 (2d Cir 1961)* (second mortgage); *Marsack's Estate v Commr, 288 F2d 533 (7th Cir 1961)* (license agreement); *Boudreau v Commr, 134 F2d 360 (5th Cir 1943)* (right to oil payments); *Stratton v Commr, TC Memo 1969-195* . (note secured by second mortgage); *Est of Goldstein v Commr, 33 TC 1032 (1960)* , *acq 1960-2 CB 5* (right to insurance renewal commissions). The Commissioner will argue that the value of an asset is ascertainable except in rare and extraordinary circumstances. *Rev Rul 58-402, 1958-2 CB 15* .

The proper year of inclusion may be at issue even when the transaction is closed. See, eg, *Byrne v Commr, 54 TC 1632 (1970)* , *aff'd per curiam 449 F2d 759 (8th Cir 1971)* , holding that the shareholder's gain was realized when the corporation delivered securities to a broker for reissuance to the shareholder and not when the securities were in fact reissued. In *Rushing v Commr, 441 F2d 593 (5th Cir 1971)* , the issue was whether the taxpayer had constructively received the entire distribution in the year of liquidation notwithstanding his installment sale of the stock to independent trustees after adoption of the plan of liquidation but before distribution; the court found for the taxpayer.

The value of the right to receive future royalty payments was held not to be ascertainable in *Cloward Instrument Corp v Commr, TC Memo 1986-345* .

(n15)Footnote 15. *Hudspeth v US, 471 F2d 275 (8th Cir 1972)* ; *Allen v Commr, 66 TC 340 (1976)* ; *Kinsey v Commr, 58 TC 259 (1972)* , *aff'd 477 F2d 1058 (2d Cir 1973)* . If the gift is to a charity, the donor is entitled to a charitable deduction.

(n16)Footnote 16. *Jones v US, 37 AFTR2d 76-885 (6th Cir 1976)* ; *Dayton Hydraulic Co v US, 39 AFTR2d P 77-379 (SD Ohio 1976)* , *aff'd per curiam 592 F2d 937 (6th Cir 1979)* , *cert denied 444 US 831* .

(n17)Footnote 17. Prior to its decision in *Jones v US, 37 AFTR2d 76-885 (6th Cir 1976)* , the Sixth Circuit held for taxpayers whenever it was hypothetically possible that the liquidation would be abandoned. *Jacobs v US, 390 F2d 877 (6th Cir 1968)* . *Jacobs* was cited with approval in *Charleston Natl Bank v US, 323 F Supp 530 (SD WVa 1971)* .

(n18)Footnote 18. The basis of stock subject to restrictions was its restricted value, not the exchange price at the time distributed. *Miller v Commr, TC Memo 1975-356* .

(n19)Footnote 1. *IRC § 332(a)*. The provision applies whether or not the recipient corporation continues the business of the liquidated corporation. *Rev Rul 70-105, 1970-1 CB 70* (business continued as branch of parent); *Rev Rul*

70-357, 1970-2 CB 79 (business discontinued, assets used by parent in its business). The Tax Court has questioned whether IRC § 332 would be applicable if both parent and subsidiary were liquidated. *International Inv Corp v Commr*, 11 TC 678 (1948), *affd per curiam* 175 F2d 772 (3d Cir 1949).

A parent corporation that was indebted to its wholly owned subsidiary received the note evidencing the debt as part of the distribution in complete liquidation of the subsidiary. The note was property for purposes of IRC § 332(a), entitling the transaction to nonrecognition treatment. *Rev Rul 74-54*, 1974-1 CB 76.

Rev Proc 90-52, 1990-2 CB 626, reprinted in Appendix D, *infra*, sets forth the information that must be included in a request for ruling under IRC § 332.

(n20)Footnote 2. IRC § 332 thus requires that the recipient corporation receive a distribution that represents at least partial payment for the stock which it owns in the liquidating corporation. If the latter corporation is so insolvent that it cannot distribute any property to its shareholders, the tax consequences of the loss are governed by *IRC Section 165(g)*. *Treas Reg § 1.332-2(b)*; *Continental Grain Co v Commr*, *TC Memo 1988-577*. See also *HK Porter Co, Inc v Commr*, 87 TC 689 (1986) (IRC § 332 inapplicable; parent allowed to recognize loss on the liquidation of its subsidiary where distribution was not of sufficient magnitude to cover the liquidation preference on the subsidiary's preferred stock, so that nothing was distributed with the respect to the parent's common stock). The receipt of cash alone will bring the liquidation within IRC § 332(a). *Rev Rul 69-379*, 1969-2 CB 48; *Tri-Lakes SS Co v Commr*, 146 F2d 970 (6th Cir 1945).

(n21)Footnote 2.1. See § 6.02[2][b][i], *infra*.

(n22)Footnote 2.2. See *IRC § 381(a)(1)*.

(n23)Footnote 3. *IRC §§ 332(b)(1), 1504(a)(2)*.

(n24)Footnote 4. *IRC § 332(b)(1)*; *Treas Reg § 1.332-2(a)*.

(n25)Footnote 5. *Treas Reg § 1.332-2(a)*.

(n26)Footnote 6. The predecessor of IRC § 332 (IRC of 1939, § 112(b)(6)(A)) was inapplicable if the recipient corporation at any time on or after adoption of the plan of liquidation and until receipt of property owned more stock of any class than it owned at the time of receipt of the property. A disposition of stock to achieve this situation was upheld in *Commr v Day & Zimmerman, Inc*, 151 F2d 517 (3d Cir 1945); *Granite Trust Co v US*, 238 F2d 670 (1st Cir 1956); and *Avco Mfg Corp v Commr*, 25 TC 975 (1956), *acq on other issues 1957-2 CB 3*, *nonacq on this issue 1958-1 CB 7*.

The Tenth Circuit in *Associated Wholesale Grocers, Inc v US*, 927 F2d 1517 (10th Cir 1991), used the interdependence test of the step transaction doctrine to find that a corporation had not lost 80 percent control of a subsidiary, and, thus, IRC § 332 applied.

(n27)Footnote 7. 1970-1 CB 70.

(n28)Footnote 8. *Id* at 71.

(n29)Footnote 9. *Rev Rul 75-521*, 1975-2 CB 120, *distinguishing Rev Rul 70-106*; *George L Riggs, Inc v Commr*, 64 TC 474 (1975), *acq 1976-2 CB 2*.

(n30)Footnote 10. The plan of liquidation must be adopted by each of the parties to the liquidation.

Under the check-the-box rules of *Treas Reg § 301.7701-3*, an election by a corporation to be classified as a partnership or as a disregarded entity is deemed to be a liquidation of the corporation. *Treas Reg § 301.7701-3(g)(1)(ii)*,

(iii). For purposes of satisfying the requirement of adoption of a plan of liquidation under *IRC* § 332, unless a formal plan of liquidation that contemplates the election is adopted, the making of the election is considered to be the adoption of the plan of liquidation immediately before the deemed liquidation. *Treas Reg* § 301.7701-3(g)(2)(ii).

(n31)Footnote 11. *Rev Rul* 76-317, 1976-2 CB 98 .

(n32)Footnote 12. *IRC* § 332(b)(2). The year of adoption of the plan and the year of distribution need not be the same. *Rev Rul* 71-326, 1971-2 CB 177 .

(n33)Footnote 13. *IRC* § 332(b)(3). *IRC* § 332 was held applicable where the resolutions merely provided that the corporation be "immediately dissolved." Distribution was in fact made within three years. The court denied the taxpayer's contention that the absence of a formal plan required recognition of its loss. *Burnside Veneer Co v Commr*, 167 F2d 214 (6th Cir 1948) ; see also *Service Co v Commr*, 165 F2d 75 (8th Cir 1948) .

(n34)Footnote 14. *IRC* § 332(b)(3).

(n35)Footnote 15. *IRC* § 332(b); *Treas Reg* § 1.332-4(a)(2), (3).

(n36)Footnote 16. *Treas Reg* § 1.332-2(c).

(n37)Footnote 17. *Rev Rul* 76-525, 1976-2 CB 98 ; but see *Cherry Burrell Corp v US*, 367 F2d 669 (8th Cir 1966) (cash retained beyond three-year period for purpose of meeting unsettled claims; nonrecognition treatment granted).

(n38)Footnote 18. *Treas Reg* § 1.332-2(c).

(n39)Footnote 19. *Treas Reg* § 1.332-2(c).

(n40)Footnote 20. *IRC* § 332(c). The provision is effective for distributions after May 21, 1998.

See §§ 12.03[1][c] and 13.03[1][c] for a discussion of the dividends paid deduction of a RIC and a REIT, respectively.

(n41)Footnote 21. The election is made on Form 8023. *Treas Reg* § 1.338-1(d); *Treas Reg* § 1.338-2(d).

(n42)Footnote 22. *IRC* §§ 338(a), (d), (g), (h), 1504(a)(2). *Rev Rul* 90-95, 1990-2 CB 67 , sets forth two situations in which a reverse subsidiary cash merger is treated as a qualified stock purchase of a target under *IRC* § 338. In the first case, a subsidiary is organized solely for the purpose of acquiring the stock of the target via a merger of the subsidiary into the target. In the second, the target is liquidated into the parent immediately following the merger of the subsidiary into the target. *Treas Reg* § 1.338-3(d) incorporates the approach of *Rev Rul* 90-95 into the regulations.

Rev Rul 90-95 was distinguished in *Rev Rul* 2001-46, 2001-2 CB 321 , where, pursuant to an integrated plan, a newly formed, wholly-owned subsidiary of an acquiring corporation merged into a target corporation, and then the target corporation merged into the acquiring corporation. The Service treated the transaction as a single statutory merger of the target corporation into the acquiring corporation. *Treas Reg* § 1.338(h)(10)-1(c)(2) permits taxpayers to make elections under *IRC* § 338(h)(10) where the acquisition of stock of the target corporation by the purchaser, viewed independently, constitutes a qualified stock purchase and, after the stock acquisition, the target merges or liquidates into the purchaser (or another member of the affiliated group that includes the purchaser), whether or not, under relevant provisions of law, including the step transaction doctrine, the acquisition of stock and the merger or liquidation qualify as a reorganization described in *IRC* § 368(a). If the election is made in such a case, for all federal tax purposes, the acquisition of the stock is treated as a qualified stock purchase and not as a reorganization described in *IRC* § 368(a).

A transfer of target assets to the purchasing corporation (or another member of the affiliated group of the purchasing

corporation) after a qualified stock purchase can be treated as a reorganization if the election is not made. The continuity of interest requirement is deemed to have been met. *Treas Reg § 1.338-2(c)(3)(ii)*.

(n43)Footnote 23. *IRC § 338(h)(3)(A)*.

(n44)Footnote 24. *IRC § 338(h)(3)(A)*.

(n45)Footnote 25. *IRC § 338(h)(3)(C)*. The carryover basis exception to the definition of purchase does not apply to an acquisition from a related corporation if the acquiring corporation made a qualified stock purchase of the stock of the related corporation and made an election with respect to such stock.

(n46)Footnote 26. The 12-month acquisition period is deemed to begin on the date on which the acquiring corporation is first considered as owning the acquired corporation's stock under *IRC § 318* (other than the option attribution rule of *IRC § 318(a)(4)*), and, if such stock may be considered owned by the acquiring corporation on more than one day, the stock is deemed acquired on the earliest date to the extent thereof.

(n47)Footnote 27. *Treas Reg § 1.338-3(b)(5)(ii)*.

(n48)Footnote 28. *Treas Reg § 1.338-3(b)(5)(iii)*. A redemption from a related corporation is taken into account as a reduction in the target's outstanding stock to the extent that the redeemed stock would have been considered as purchased by the purchasing corporation under *IRC § 338(h)(2)(C)* during the 12-month acquisition period if the redeemed stock had been acquired by the purchasing corporation from the related corporation on the day of the redemption.

(n49)Footnote 29. *IRC § 338(a)*; *Treas Reg § 1.338-1(b)(1)*. However, the regulations provide a list of exceptions to the general rule that "new target" is to be treated as a new corporation, including one providing that "new target" should be considered a continuation of "old target" for purposes of applying Code provisions relating to its employee benefit plans. *Treas Reg § 1.338-1(b)(2)(i)*. The IRS reserves the right to add other exceptions to the list, *Treas Reg § 1.338-1(b)(2)(viii)*, and recently did so in *Notice 2010-1, 2010-2 IRB 251* (new target and old target treated as the same corporation for purposes of applying *IRC § 807(e)(4)(A)*, which establishes specific reserve requirements for a "qualified foreign contract" issued by a foreign life insurance branch of a domestic insurance company if the issuing company was required by the foreign country (as of the time it began operations in the country) to operate in that country through a branch.

(n50)Footnote 30. Minority shareholders in the target corporation are not to be treated as having exchanged their stock for stock in the target corporation. If a valid election is made and the target corporation completely redeems the stock of a minority shareholder, the distribution is governed by *IRC § 336* as if it were in complete liquidation. *IRC § 338(c)(2)*.

(n51)Footnote 31. *IRC § 338(b)(1), (6)*.

Congress has left it to the Treasury to prescribe regulations setting forth the proper adjustments for liabilities of the target corporation and other relevant items and for determining the method of allocating the aggregate basis among the various assets of the target corporation. *IRC § 338(b)(2), (5)*. See the text at N 34, *infra*.

(n52)Footnote 32. *IRC § 338(b)(3)*. For example, if 10 percent of the value of the target corporation's stock is attributable to the purchasing corporation's nonrecently purchased stock, the multiplier would be 10/90.

(n53)Footnote 33. *IRC § 338(b)(4)*.

(n54)Footnote 34. *Treas Reg § 1.338-6*. A similar rule has been enacted for certain asset purchases. *IRC § 1060*.

(n55)Footnote 35. Class II assets do not include stock of affiliates of the acquired corporation, whether or not of a class that is actively traded, other than certain actively traded preferred stock described in *IRC § 1504(a)(4)*.

(n56)Footnote 35.1. *Rev Proc 2003-51, 2003-2 CB 121* , describes methods that may be used to determine the fair market value of inventory items for purposes of the purchase price allocation.

(n57)Footnote 36. *IRC § 338(f),(h)(4)*. The consistency period can be extended to include any period during which the Commissioner determines that there was in effect a plan to make a qualified stock purchase plus one or more other qualified stock purchases or asset acquisitions with respect to the target corporation or a target affiliate. *IRC § 338(h)(4)(B)*.

(n58)Footnote 37. Generally the term "target affiliate" does not include a foreign corporation, a DISC, or certain domestic corporations doing business in Puerto Rico or the Virgin Islands. *IRC § 338(h)(6)(B)*.

The definition of affiliated group found in *IRC § 1504* applies here.

(n59)Footnote 38. *IRC § 338(f)*. To prevent avoidance of the consistency requirements the Commissioner is given authority to treat stock acquisitions pursuant to a plan and satisfying the 80-percent requirement as qualified stock purchases even though they are not otherwise so defined. *IRC § 338(e)(3)*.

(n60)Footnote 39. *Treas Reg § 1.338-4(h)(2)* provides for nonrecognition of gain or loss on the deemed stock sale, if there is no *IRC § 338(h)(10)* election in effect and either (1) the target directly owns 80 percent, by vote and value, of the stock of the target affiliate, or (2) the target directly owns stock in the target affiliate and both are members of a consolidated group filing a final consolidated return.

(n61)Footnote 40. *IRC § 338(e)(1)*. *Rev Proc 89-40, 1989-2 CB 453* , sets forth procedures under which a corporate taxpayer can request that the Service impose a deemed election under *IRC § 338(e)(1)* with respect to an asset acquisition that includes a qualified stock purchase of a target corporation.

(n62)Footnote 41. *IRC § 338(e)(2)*.

(n63)Footnote 42. See *Treas Reg § 1.332-2(e)*. A minority shareholder's attempt to gain nonrecognition treatment failed when the continuity of interest test required in reorganizations was not met. The parent corporation's stockholdings could not be counted as contributing to continuity of interest when such ownership was purchased as the first step in a plan to acquire the assets of the subsidiary with a stepped-up basis. *Kass v Commr, 60 TC 218 (1973)* , *aff'd in an unpublished opinion* (3d Cir 1974).

(n64)Footnote 43. *Treas Reg § 1.367(b)-3(b)*. The provision applies to a US shareholder of the foreign subsidiary or a foreign corporation with respect to which there are one or more US shareholders. A "US shareholder" is any shareholder described in *IRC § 951(b)* (without regard to whether the foreign corporation is a controlled foreign corporation) and also any shareholder described in *IRC § 953(c)(1)(A)* (but only if the foreign corporation is a controlled foreign corporation subject to the rules of *IRC § 953(c)*).

The deemed dividend is treated as a dividend for purposes of the Code and is considered as paid out of earnings and profits with respect to which the amount of the deemed dividend was determined. *Treas Reg § 1.367(b)-2(e)*.

The rules contained in *Treas Reg § 1.367(b)-3* also apply to an asset acquisition described in *IRC § 368(a)(1)*.

(n65)Footnote 44. *Treas Reg § 1.367(b)-2(d)*. See § 20.04[4] for a discussion of *IRC § 1248*.

(n66)Footnote 45. *Treas Reg § 1.367-(b)(3)(ii)*, Ex 3.

(n67)Footnote 46. *Treas Reg* § 1.367(b)-3(c).

(n68)Footnote 47. The election may be made only if (1) the foreign corporation has provided the shareholder information to substantiate the shareholder's all earnings and profits amount with respect to the stock in the foreign corporation, and (2) the shareholder complies with the notice requirement described in *Treas Reg* § 1.367(b)-1(c).

(n69)Footnote 48. The distribution is treated as a liquidation to which *IRC* § 331 applies if the distributee foreign corporation is a controlled foreign corporation. *IRC* § 332(d)(3).

(n70)Footnote 49. *IRC* § 332(d)(2)(A). For this purpose, the term "affiliated group" has the meaning given to the term by *IRC* § 1504(a) (without regard to *IRC* § 1504(b)(2) and (4)). *IRC* § 332(d)(2)(B).

(n71)Footnote 50. *Treas Reg* § 1.332-6(b).

(n72)Footnote 51. *Treas Reg* § 1.332-6(a).

CHAPTER 6 Liquidating Distributions

1-6 Taxation of Securities Transactions § 6.03

§ 6.03 Complete Liquidations--Effect on the Liquidating Corporation

[1] Gain or Loss Resulting From the Distribution.

Until passage of the Tax Reform Act of 1986, *IRC Section 336* stated that no gain or loss would be recognized to a corporation on the distribution of property in complete liquidation. Exceptions to the general rule arose when the corporation distributed an installment obligation, LIFO inventory, or property subject to depreciation recapture. Gain or loss recognition was also required if there was a transfer of appreciated or depreciated property in discharge of the transferor's debt to the distributee, except in liquidations governed by *IRC Section 332*.

The 1986 Act reversed the general rule to provide that, unless otherwise provided, gain or loss will be recognized to a liquidating corporation on a distribution of property in complete liquidation "as if [the] property were sold

to the distributee at its fair market value."¹ If any property distributed in the liquidation is subject to a liability or the shareholder assumes a liability of the liquidating corporation, the fair market value of the property is treated as not less than the amount of the liability.²

The general rule does not apply, and the distributing corporation will not be called upon to recognize gain or loss, if the distribution falls within the reorganization provisions of the Code and there is nonrecognition of gain or loss to the recipient of the property.³ In addition, *IRC Section 336* contains two provisions designed to limit the extent of loss recognition at the corporate level. The first bars loss recognition if there is a distribution to a related party (as defined in *IRC Section 267*)⁴ and either (a) the distribution is not pro rata, or (b) the distributed property is property that was acquired by the liquidating corporation in a transaction to which *IRC Section 351* applied, or as a contribution to capital, during the five-year period ending on the date of distribution.⁵ The second provides that if a principal purpose of the contribution of property to a corporation in advance of its liquidation is to recognize a loss upon the sale or distribution of the property and thereby eliminate or limit corporate level gain, the basis for determining loss of any property acquired in any *IRC Section 351* transaction, or as a contribution to capital, will be reduced (but not below zero) by the excess of the basis of the property on the date of contribution over its fair market value on that date.⁶ For purposes of the second rule, it is presumed that any *IRC Section 351* transaction or contribution to capital within the two-year period prior to adoption of the plan of liquidation (or thereafter) has such a principal purpose.⁷

No gain or loss is recognized to a liquidating subsidiary on the distribution to its parent in a liquidation to which *IRC*

Section 332 applies.ⁿ⁸ Gain is recognized by the corporation, but loss is not, on distributions to minority shareholders in such a liquidation.ⁿ⁹ If the liquidating subsidiary is indebted to its parent, any transfer of property to the parent in satisfaction of the indebtedness in connection with the liquidation is treated as part of the liquidating distribution.ⁿ¹⁰

If a complete liquidation under *IRC Section 332* involves a domestic subsidiary and a foreign corporation, the liquidating subsidiary must recognize gain or loss to the extent of the net gain.ⁿ¹¹ If the subsidiary distributes a partnership interest (whether domestic or foreign), the corporation is treated as having distributed a proportionate share of partnership property.ⁿ¹² If the distribution involves a publicly traded partnership that is treated as a corporation for United States income tax purposes, the distribution is treated in the same manner as a distribution of stock.

There are three exceptions to the recognition rule. The first applies if the property was used by the domestic subsidiary, and will continue to be used by the foreign parent for ten years following the liquidation, in a trade or business in the United States, and both corporations file a ten-year recognition agreement.ⁿ¹³ The second is applicable to a distribution of a United States real property interest (other than stock in a former United States real property holding corporation that is treated as a United States real property interest for five years under *IRC Section 897(c)(1)(A)(ii)*).ⁿ¹⁴ The third applies when there is a distribution of the stock of an 80-percent domestic subsidiary.ⁿ¹⁵

If both the liquidating corporation and distributee corporation in a liquidation governed by *IRC Section 332* are foreign corporations, no gain or loss is recognized to the liquidating corporation, with two exceptions.ⁿ¹⁶ The first is the distribution of property (other than a United States real property interest) used by the liquidating corporation in a United States trade or business at the time of the liquidation, if the foreign parent agrees to use the property in a United States trade or business for ten years and the parties sign a ten-year gain recognition agreement.ⁿ¹⁷ The second arises when the property was previously used in the subsidiary's United States trade or business and is distributed within ten years after it ceased being so used.ⁿ¹⁸

The Code provides for the issuance of regulations under which a corporation, that owns stock that possesses at least 80 percent of the voting power and has at least 80 percent of the value of all stock of another corporation and sells, exchanges, or distributes the stock, can elect to treat the transaction as a disposition of all of the other corporation's assets and not recognize gain or loss on the disposition of the stock.ⁿ¹⁹

Gain or loss will be recognized to the liquidating corporation on a distribution in an *IRC Section 332* liquidation if the parent is a tax-exempt organization (other than a farmer's cooperative), unless, immediately after the distribution, the organization uses the property in an unrelated trade or business.ⁿ²⁰ If gain or loss is recognized on the liquidating distribution, it is also recognized if the subsidiary transfers property to the tax-exempt parent in satisfaction of a debt to it.

A taxable corporation that transfers all or substantially all of its assets to one or more tax-exempt entities is required to recognize gain or loss as if the assets transferred were sold at their fair market value (Asset Sale Rule).ⁿ²¹ The Asset Sale Rule does not apply if the transferred assets are used by the tax-exempt entity in an activity the income of which is subject to the unrelated business tax under *IRC Section 511(a)*; gain on those assets will be included in unrelated business taxable income when the tax-exempt entity disposes of the assets or ceases to use the assets in an activity the income from which is subject to tax under *IRC Section 511(a)*.ⁿ²²

A taxable corporation that changes its status to a tax-exempt entity generally is treated as having transferred all of its assets to a tax-exempt entity immediately before the change becomes effective in a transaction governed by the Asset Sale Rule (Change in Status Rule).ⁿ²³ The Change in Status Rule does not apply (subject to an anti-abuse rule) if the corporation was formerly tax-exempt and the change in status is within three years of the later of (a) the corporation first filing a return as a taxable corporation, or (b) a final determination that the corporation had become a taxable corporation.ⁿ²⁴

A further gain recognition situation is dictated by *IRC Section 897(d)(1)*, and arises whenever a foreign corporation distributes a United States real property interest.ⁿ²⁵ The amount of such recognition is the excess of the value of interest as of the time of distribution over its adjusted basis. However, no gain need be recognized if the basis of the distributed property in the hands of the distributee is the same as its adjusted basis before distribution increased by the amount of any gain recognized by the distributing corporation.

[2] Timing Problems--Income and Deductions.

[a] Income Considerations. Can a corporation escape a tax on income properly attributable to it by liquidating before the income is includable by the corporation under its method of accounting? For example, suppose that one of the assets distributed in liquidation is a contract right to receive income in the future. The value of the right will form a part of the shareholder's amount realized and enter the computation of gain or loss to be taxed at capital gain rates. The value of the contract will also constitute the shareholder's basis in the right to future income, so that until that basis is recovered, all amounts received under the contract will be received tax-free. And if the value of the contract cannot be ascertained with reasonable certainty, the liquidation will remain "open" under the *Carter* doctrine,ⁿ¹ with the result that any amount received under the contract will be deemed to have been received as part of the liquidation and therefore taxed as capital gain (assuming the liquidating distribution exceeds the shareholder's basis for the surrendered stock). Unless the income can in some way be attributed to the distributing corporation, the liquidation will effectively transmute ordinary income into capital gain.

A principal means of forcing attribution of income to the corporation is through application of the assignment of income doctrine. There should be little argument over invoking the doctrine whenever the corporation has a fixed right to future income on the date of liquidation, i.e., when it has done everything necessary to perfect its right to future income. The classic example is the cash basis corporation that has fully performed services for another and is merely awaiting payment of its charges. An assignment of the account receivable must be considered an anticipatory assignment of income.ⁿ²

Where the right to future income is contingent and unearned as of the date of liquidation, the corporation is taxed on the income collected by the shareholders only if it is still in existence at the time of receipt. The genesis of the principle is a statement by the Supreme Court in *United States v. Joliet & Chicago R.R.*ⁿ³ The anticipatory arrangement in that case was a "lease in perpetuity" under which the lessee guaranteed payment of a specified yearly dividend to the shareholders of the corporation. In applying the assignment of income doctrine, the Court stated:

"The fact that the corporation may remain in existence only to maintain a stock transfer book is immaterial. The umbilical cord between it and its shareholders has not been cut."ⁿ⁴

The effect of the "in existence" criterion may be seen by contrasting *United States v. Horschel*,ⁿ⁵ where accrued interest income on notes distributed as part of the liquidation and collected after the corporation had been dissolved was not taxable to the corporation, and *Wood Harmon Corp. v. United States*,ⁿ⁶ where the proceeds of a condemnation award became the corporation's income because it had not terminated its existence prior to receipt of the award; there was a balance in the bank account maintained by the corporation for the purpose of paying liabilities.

At what point is a corporation no longer in existence? According to the regulations, termination of existence occurs when the corporation "ceases business and dissolves, retaining no assets, whether or not under State law it may thereafter be treated as continuing as a corporation for certain limited purposes connected with winding up its affairs, such as for the purpose of suing and being sued."ⁿ⁷ Thus, if the corporation retains funds to pay creditors,ⁿ⁸ or if it is engaged in collecting the proceeds from the sale of business,ⁿ⁹ or if it is actively pressing valuable claims,ⁿ¹⁰ it remains in existence. In sum, as long as a corporation is in the process of liquidating its assets, its existence is not at an end, and this will be so even though an order of dissolution may have been issued.ⁿ¹¹

The "in existence" cases are predicated on a prior finding that the transfer in liquidation constituted an anticipatory assignment of income, that is, that the transfer was of income earned by or properly payable to the liquidating corporation. If the future income is completely dependent on post-liquidation events, the assignment of income doctrine is inapplicable, and the income ultimately realized will be taxed only to the recipient. For example, in *United Mercantile Agencies v. Commissioner*,ⁿ¹² the corporation, a collection agency, distributed uncollected account files to its stockholder. The amounts due could be converted into income only if future attempts at collection proved successful. Since, at the time of liquidation, there was no assurance that any portion of the accounts ever would be reduced to income without further action on the part of the shareholder, the Tax Court refused to tax the corporation on the amounts collected by him.

Income attributed to a liquidated corporation under the assignment of income doctrine is includable in its gross income in the year of receipt, not the year of assignment.ⁿ¹³ A second approach employed by the Commissioner to attribute after-acquired income to the corporation, but to do so in the year of liquidation, calls for application of *IRC Section 446(b)* and the use of a method of accounting which clearly reflects income.ⁿ¹⁴ The leading illustration of the use of *IRC Section 446(b)* in liquidation cases is provided by *Jud Plumbing & Heating, Inc. v. Commissioner*,ⁿ¹⁵ where a corporation that reported income by use of the completed-contract method of accounting (under which no income is reported until the contract is finally completed and accepted) was forced to switch to the percentage-of-completion method in order to clearly reflect the income earned on several long-term construction contracts which remained uncompleted at the time of liquidation.

Application of *IRC Section 446(b)* is not limited to a change from completed-contract method to percentage-of-completion method. For example, in *Commissioner v. Kuckenberg*,ⁿ¹⁶ a two-fold switch was effected--from cash basis to accrual method for some income, and from cash basis to percentage-of-completion method to clearly reflect other income.

Should *IRC Section 446(b)* be applicable if the assignment of income doctrine is available to attribute the income to the corporation? The difference in result can be quite significant. Under the clear reflection of income approach, the income will be includable by the corporation in the year of liquidation; under the assignment of income theory, it is reported as collected. In one case,ⁿ¹⁷ the Tax Court did reject the Commissioner's determination of a deficiency based on *IRC Section 446(b)*, on the ground that the corporation's continued existence permitted the income to be taxed to the corporation on assignment of income principles. The decision is a sound one, for the cash basis method of accounting utilized by the liquidating corporation would clearly reflect the income collected while it remained in existence. Use of *IRC Section 446(b)* in anticipatory assignment of income cases should, therefore, be restricted to situations in which the corporation has terminated its existence prior to receipt of the potential income.ⁿ¹⁸

[b] Deduction Considerations. Suppose that the liquidating corporation is in a business in which expenses are incurred some time prior to receipt of income. If the corporation could liquidate in mid-stream (between the time expenses are incurred and income is realized), deduct the expenses on its final return, and not be required to include the later receipts in income, it would most likely suffer a net operating loss that could be carried back to reduce the income of the three preceding taxable years.ⁿ¹⁹

The Commissioner has enjoyed only limited success in the few attempts he has made to prevent this result. In *Diamond A Cattle Co. v. Commissioner*,ⁿ²⁰ a net operating loss of more than \$300,000 incurred during seven and one-half months of operations was allowed over the Commissioner's contention that the operating loss carryback provisions never contemplated relief to taxpayers in the particular situation presented, while in *Commissioner v. South Lake Farms, Inc.*,ⁿ²¹ the Ninth Circuit refused to apply *IRC Section 446(b)* to require the inclusion of income produced by a post-liquidation harvest in the return for the last taxable period of the liquidated corporation. The Government's difficulty in *South Lake Farms* stemmed from its inability to point to any method of accounting which would require inclusion by the old corporation.

The Ninth Circuit also denied the Commissioner the ability to resort to the tax benefit rule to produce income for the liquidating corporation in *South Lake Farms*. The court's theory in this regard rested on the absence of a recovery of a previously deducted amount since the corporation received nothing on the liquidation. This interpretation of recovery was discredited in *Bliss Dairy, Inc. v. United States*,ⁿ²² where the Supreme Court found that a distribution of expensed assets was inconsistent with the earlier deduction of the cost as a business expense.ⁿ²³

However, in *Central Cuba Sugar Co. v. Commissioner*,ⁿ²⁴ the Service's reallocation of expenses between transferor and transferee under the authority of the predecessor of *IRC Section 482* was held proper. Although *IRC Section 482* would appear to be the Commissioner's most potent weapon, since it permits him to allocate or apportion income and deductions between businesses under common control where necessary to prevent evasion of taxes or to clearly reflect income, resort to it in the liquidation area has been infrequent. Whether the greater use of *IRC Section 482* in general signals increasing application to liquidations in particular remains a question for the future.

[3] The Court Holding and Cumberland Public Service Cases.

Suppose that, prior to the enactment of the Tax Reform Act of 1986, *X Corp.* sold its sole asset at a gain and then liquidated. The corporation would have paid a tax on its profit from the sale while its shareholders would have been taxed on the gain realized on the liquidation. On the other hand, if the corporation were first liquidated and the asset then sold at fair market value, only one tax would have been paid--on the liquidation gain. The corporation would have been exempted from the recognition of gain; the shareholders would have realized no gain on the sale since their basis in the distributed asset would have equaled the amount realized. Thus, the better tax result was produced by a post-liquidation shareholder sale.

But suppose that the sale was negotiated by the corporation, with liquidation occurring immediately before closing. Could the sale now be considered as a sale by the shareholders or did it have to be imputed to the corporation? The answer, provided by the famous case of *Commissioner v. Court Holding Co.*,ⁿ¹ was that

"[T]he transaction must be viewed as a whole, and each step, from the commencement of negotiations to the consummation of the sale, is relevant. A sale by one person cannot be transformed for tax purposes into a sale by another by using the latter as a conduit through which to pass title."ⁿ²

In *Court Holding*, negotiations for sale were had and an oral agreement reached while the corporation held legal title to the property. On the date the parties met to reduce the agreement to writing, the purchaser was advised by the corporation's attorney that the sale could not be completed because it would impose a large tax liability on the corporation. Liquidation followed a day later and was followed in turn by a written agreement embodying substantially the same terms previously agreed upon, but with the shareholders named as sellers. Title passed to the purchaser three days after contract. The sale, in form by the shareholders, was disregarded, and the sale, in substance by the corporation, given effect.

Five years later, *United States v. Cumberland Public Service Co.*ⁿ³ presented the Supreme Court with a slightly different fact situation. In that case, the shareholders first offered to sell their stock, but were turned down by the prospective purchaser who wanted to purchase assets. The corporation rejected the purchaser's offer because it would have been saddled with a heavy capital gains tax. The shareholders then offered to sell the desired assets to the purchaser after acquiring them by liquidating the corporation. This offer was accepted and the steps necessary to consummate the transaction ensued. The Supreme Court, in affirming a Court of Claims decision in favor of the taxpayer, relied upon the latter court's finding that the sale in question had been made by the stockholders rather than the corporation. This was sufficient to permit the Court to distinguish *Court Holding* on its facts.

The difficulty in deciding when a transaction was made by the shareholders in their individual capacity, rather than as the alter ego of the corporation, prompted Congress to enact what was *IRC Section 337* prior to the Tax Reform Act of

1986 and eliminate the need to determine whether corporation or shareholder was the seller in fact. Repeal of the general rule as to nonrecognition of gain or loss to the liquidating corporation obviated the need for *IRC Section 337*, and it was removed from the Code by the Tax Reform Act of 1986. The repeal raises the specter of the possible application of *Court Holding* in *IRC Section 332* liquidations followed by a sale of the distributed property by the parent corporation.ⁿ⁴

FOOTNOTES:

(n1)Footnote 1. *IRC § 336(a)*. The Service will promulgate regulations to prevent the avoidance of corporate-level taxation with respect to the net built-in gain of C corporation assets that become assets of a regulated investment company or real estate investment trust in a carryover basis transaction. *IRS Notice 88-19, 1988-1 CB 486*, as modified by *IRS Notice 88-96, 1988-2 CB 420*. These regulations will permit the deferral of immediate built-in gain recognition by having the transferee elect to be subject to rules similar to those set forth in *IRC § 1374*. This permission can extend to a corporation that does not transfer any assets, but elects to be treated as a regulated investment company or real estate investment trust. *Ltr Rul 8915041*. Carryforwards from C corporation years can be used to offset the net recognized built-in gains. *Ltr Rul 199920036*.

IRC § 336(a) applies with full force to a liquidation of a corporation treated as special use property for estate tax purposes under *IRC § 2032A*. *Ltr Rul 9146001*.

CHAPTER 6 Liquidating Distributions

1-6 Taxation of Securities Transactions § 6.04

§ 6.04 Partial Liquidations--Effect on the Shareholder

[1] General Rule.

Amounts distributed to noncorporate shareholders¹ in partial liquidation of a corporation are given the same treatment as redemptions falling under *IRC Section 302(a)*; namely, they are considered as part or full payment in exchange for the stock.² All that is necessary to give the shareholder capital gain or loss on the liquidation is that the stock constitute a capital asset in his hands.

[2] Distributions Qualifying as Partial Liquidations.

IRC Section 302(e)(1) provides that a distribution will be in partial liquidation of a corporation if it is not essentially equivalent to a dividend, is in redemption of a part of the stock of the corporation pursuant to a plan, and occurs within the taxable year in which the plan is adopted or within the next succeeding taxable year.¹ Of critical importance here is the statutory direction that dividend equivalence be tested at the corporate level rather than at the shareholder level.²

[a] Corporate Contraction Doctrine. It will be recalled that under the 1939 Code redemptions and partial liquidations were governed by the same provision and tested for dividend equivalence under the same criteria. In differentiating the manner of determining dividend equivalence for the two kinds of transactions, the framers of the 1954 Code sought to characterize distributions as partial liquidations "by what happens solely at the corporate level by reason of the assets distributed ...".³ In so doing, Congress intended to codify the then existing concept of corporate contraction.⁴ The example of corporate contraction mentioned in the Senate Report is taken from *Imler v. Commissioner*,⁵ a case holding that a distribution of insurance proceeds, received on account of the destruction of the upper floors of a building by fire, was not taxable as a dividend since the distributing corporation discontinued the business operations formerly carried on in the destroyed portion of the building, thereby effecting a bona fide contraction of business activities and a consequent reduction in capital used in the business. The Senate Report goes on to state that "voluntary bona fide contraction of the corporate business may of course also qualify to the same extent as under existing law."⁶

What was the extent to which a voluntary contraction qualified as a partial liquidation under pre-1954 law? One fact pattern involved the distribution of a reserve for expansion after the planned expansion had been abandoned and the funds accumulated for that purpose were no longer needed. For example, in *Commissioner v. Champion*,⁷ a corporation increased its capital structure in anticipation of new plant construction to be undertaken for the purpose of

enhancing profits through an increase in production and a decrease in competitive freight costs. Government regulation of freight costs, coupled with technological innovation which caused a reduction in the demand for the corporation's product (and a consequent decrease in the price for the product), led the corporation to curtail its plan for expansion and to redeem a portion of its shares. The distribution was not treated as a dividend, for in the opinion of the Sixth Circuit:

"There [was] a reasonable inference that shrinkage in its business brought the company face to face with the realization that its capital was in excess of its needs and to that extent unprofitable, and that the increase in capitalization had been a mistake. Under such circumstances, good business judgment might naturally suggest a redemption proportionate to the decline in business. Redemption under such conditions is not essentially equivalent to the distribution of a taxable income ... "n8

Champion must be contrasted with *McGuire v. Commissioner*,ⁿ⁹ where distribution of the reserve for expansion was held to be essentially equivalent to a dividend because the reduction in capital was not accompanied by a commensurate reduction in business activities. The fact that profits had been permitted to accumulate for a definite purpose, subsequently abandoned, could not change the dividend character of the distribution.ⁿ¹⁰

The Senate Report casts some doubt on the present validity of cases such as *Champion* for it states that "a distribution of a reserve for expansion is not a partial liquidation."ⁿ¹¹ However, it may well be that the Senate Finance Committee did not intend to overrule *Champion*, but rather to reaffirm the easily distinguished decision in *McGuire*.

Under the 1939 Code, a reduction in working capital needs could lead to a legitimate corporate contraction, provided there was a matching reduction in corporate activity.ⁿ¹² Under present law, the same rule obtains. In the language of the Service:

"[T]he amount which may be properly distributed as a partial liquidation includes not only the net proceeds derived from the sale of operating assets, or the assets themselves, [the required reduction in business activity] but also includes that portion of the working capital (including cash) reasonably attributable to the business activity terminated."ⁿ¹³

Determination of the amount of working capital attributable to the operation of the terminated business activity is a factual matter based upon many considerations, of which the amount of working capital actually used in the business activity prior to its cessation is most important.ⁿ¹⁴ However, an abnormal increase in working capital just prior to distribution will be disregarded and viewed as an attempt to siphon off corporate earnings as part of the liquidation.ⁿ¹⁵ Similarly, the amount of cash or liquid assets in the corporation prior to distribution cannot be used as the sole measuring rod of working capital, for this might lead to a retention of liquid assets in excess of business needs.ⁿ¹⁶

Additionally, a valid corporate contraction has been occasioned by a distribution of funds made available when the corporation liquidated one of its operating departments.ⁿ¹⁷ However, mere diminution in the size of the corporation's business is insufficient; there must also be a corresponding reduction in the amount of working capital employed in the business. A good illustration of this point is provided by *Estate of Charles D. Chandler v. Commissioner*,ⁿ¹⁸ where the corporation sold a department store which it had been operating, opened a ladies' clothing store equal in size to that department in the old store, and then made a pro rata distribution in redemption of one-half of its outstanding shares. The Tax Court viewed the distribution as nothing more than a vehicle for shifting the corporation's accumulation of excess cash and other liquid assets from its hands to those of its shareholders, something which could have been accomplished by the declaration of a true dividend. Fatal to the taxpayer's contention that the sale of the department store and opening of a smaller business resulted in a corporate contraction was the fact that the amount of capital actually committed to the business did not change accordingly.ⁿ¹⁹

The corporate contraction concept is not limited to cases involving a decline in business needs. For example, in *Commissioner v. Sullivan*,ⁿ²⁰ a majority of the Fifth Circuit found a distribution in kind of oil leases, drilling

equipment, notes receivable, and a gas payment to be in partial liquidation of the corporation, where the transfer was motivated by the corporation's reluctance to assume the risk of developing the oil leases, an activity the corporation had no authority to engage in under its charter. The dissent agreed that a business purpose prompted distribution of the oil leases and drilling equipment, but felt that the notes and gas payment were included solely to benefit the stockholders. The conclusion to be drawn from both opinions in *Sullivan* is that a distribution of operating assets in furtherance of a valid business purpose will more easily pass muster as a corporate contraction than a distribution of cash or other liquid assets.

[b] Termination of an Active Trade or Business. A distribution will automatically qualify as a partial liquidation provided (1) the distribution is either attributable to the corporation's ceasing to conduct, or consists of the assets of, a trade or business that the corporation actively conducted throughout the five-year period immediately before the distribution and that it did not acquire within such five-year period in a transaction in which gain or loss was recognized in whole or in part; and (2) immediately after the distribution the liquidating corporation is actively engaged in the conduct of a trade or business that it actively conducted throughout the five-year period ending on the date of distribution and that it did not acquire within such period in a transaction in which gain or loss was recognized in whole or in part.ⁿ²¹

A distribution qualifying as a partial liquidation can consist of the assets used in the trade or business during the five-year period preceding distribution, the proceeds from the sale of such assets, the normal quantity of inventory used in the trade or business, or the proceeds from the bulk sale of such inventory. While the composition of the distribution can vary, it appears that the extent of the distribution cannot. The requirement of the Code that the distribution be "attributable to the corporation's ceasing to conduct, or consists of the assets of, a qualified trade or business" has been taken to mean that all of the assets used in the conduct of the terminated trade or business, or all of the proceeds from their sale, must be distributed, and that the distribution must take place as soon as possible after the cessation of business or sale of assets.ⁿ²²

The definition of active trade or business contemplated by the partial liquidation provisions is the same as the one that obtains for divisive reorganizations governed by *IRC Section 355*. The regulations under the latter provision state that a trade or business consists of a specific existing group of activities carried on for the purpose of earning income or profit, and that the activities included in such group must take in every operation which forms a part of, or a step in, the process of earning income or profit from such group.ⁿ²³ Excluded from the definition are the holding of property for investment purposes, and the ownership and operation of land or buildings used substantially by the owner in a trade or business.ⁿ²⁴

An important feature of the repeal of the special provision governing partial liquidations and the requirement that such distributions come under the redemption provisions of the Code is the authorization of regulations to ensure that the change will not be circumvented through the use of *IRC Section 355, 351* or any other provision of the Code or regulations, including those governing consolidated returns.ⁿ²⁵ Congress contemplates that, thereby, a corporation may be treated as a continuing entity and any distribution by it taxed accordingly even though the transaction is in form a corporate liquidation.ⁿ²⁶ One example considered by Congress was the transfer of assets to a new subsidiary followed by a tax-free spinoff of the new stock and then by a distribution of the distributing corporation's remaining assets. Although the distribution of the assets appears to be a liquidation, it is suggested that the subsidiary could be treated as a continuation of the distributor and the distribution of the assets to the shareholders characterized as other than a complete liquidation.ⁿ²⁷

Although some commentators have discerned a tendency to assume the contrary, it appears that a distribution which fails to satisfy the active trade or business test can still qualify as a partial liquidation under the general corporate contraction provision.ⁿ²⁸ The Service position accords with this view.ⁿ²⁹ Thus, in *Revenue Ruling 56-513*,ⁿ³⁰ a delay in distributing the proceeds of the sale of assets used in the discontinued trade or business prevented the distribution from qualifying under the trade or business rule, but did not prevent it from being treated as a partial liquidation under

the general definition.

FOOTNOTES:

(n1)Footnote 1. In determining whether stock is held by a noncorporate shareholder, stock held by a partnership, estate, or trust is treated as if held proportionately by its partners or beneficiaries. *IRC § 302(e)(5)*.

(n2)Footnote 2. *IRC § 302(a), (b)(4)*.

(n3)Footnote 1. The plan must call for partial liquidation. See *Charlie Sturgill Motor Co v Commr, TC Memo 1973-281*, where the distribution was taxed as a dividend because the corporation adopted only a plan of complete liquidation.

A pro rata distribution in partial liquidation of the corporation qualifies as a redemption under *IRC § 302(b)(4)*, even though the shareholders do not surrender any of their stock. *Rev Rul 90-13, 1990-1 CB 65*. Until the Service resolves the issue, it will not issue rulings regarding deemed surrenders in partial liquidations when (i) the corporation has outstanding more than one class of stock and there are priorities as to dividend or liquidating distributions, or any other differences in stock rights, or (ii) either under the terms of the stock or as established contractually, there are outstanding any rights affecting the corporation's stock, such as warrants, options, convertible securities, shareholder agreements or rights of first refusal. *Rev Proc 98-3, 1998-1 IRB 100*.

(n4)Footnote 2. *IRC § 302(e)(1)(A)*.

(n5)Footnote 3. S Rep No 1622, 83d Cong, 2d Sess 49 (1954).

(n6)Footnote 4. S Rep No 1622, 83d Cong, 2d Sess 262 (1954). See generally Chommie, "Section 346(a)(2): The Contraction Theory," *11 Tax L Rev 407 (1956)*.

(n7)Footnote 5. *11 TC 836 (1948)*, *acq 1949-1 CB 2*.

(n8)Footnote 6. S Rep No 1622, 83d Cong, 2d Sess 49 (1954).

The notion of "contraction" contemplates some reduction in business volume or operations. *Charlie Sturgill Motor Co v Commr, TC Memo 1973-281*; see also *Rev Rul 78-402, 1978-2 CB 138*, and *Rev Rul 76-526, 1976-2 CB 101*.

The Service will not rule as to the amount of working capital attributable to a business or portion of a business terminated that can be distributed in partial liquidation, and will not ordinarily rule whether a distribution will qualify as a partial liquidation unless it results in a 20 percent or greater reduction in gross income, net fair market value of assets, and employees. *Rev Proc 2007-3, 2007-1 IRB 108*. Partial liquidations that qualify as complete terminations under *IRC § 302(e)(2)* are not subject to this provision.

(n9)Footnote 7. *78 F2d 513 (6th Cir 1935)*; *accord, Upham v Commr, 4 TC 1120 (1945)*, *acq 1945 CB 7*; *Sagner v Commr, 1953 Tax Ct Memo LEXIS 48*.

(n10)Footnote 8. *Commr v Champion, 78 F2d 513, 514 (6th Cir 1935)*.

(n11)Footnote 9. *84 F2d 431 (7th Cir 1936)*, *cert denied 299 US 591*.

(n12)Footnote 10. The lack of change at the corporate level was matched by a corresponding lack of change at the shareholder level; a father and son owned all of the stock of the corporation except for a single share. A similar result was reached in *Rev Rul 78-55, 1978-1 CB 88*.

(n13)Footnote 11. S Rep No 1622, 83d Cong, 2d Sess, 262 (1954).

(n14)Footnote 12. *Commr v Quackenbos*, 78 F2d 156 (2d Cir 1935) ; *O'Brion v Commr*, 1951 Tax Ct Memo LEXIS 26 ; *Jones v Commr*, BTA Memo 1942-555; *contra*, *Dunton v Clauson*, 67 F Supp 839 (SD Me 1946) ; *Towers v Commr*, 24 TC 199 (1955) , *affd* 247 F2d 233 (2d Cir 1957) , *cert denied* 355 US 914 ; see also *Rev Rul* 67-16, 1967-1 CB 77 (distribution of condemnation proceeds not a contraction; no decline in business activity).

(n15)Footnote 13. *Rev Rul* 60-232, 1960-2 CB 117 , *modifying* *Rev Rul* 55-373, 1955-1 CB 363 . A distribution of working capital attributable to activities that had produced 95 percent of a corporation's gross income prior to termination was held to be a genuine contraction in *Rev Rul* 75-3, 1975-1 CB 108 .

(n16)Footnote 14. *Rev Rul* 60-232, 1960-2 CB 117 .

(n17)Footnote 15. *Rev Rul* 60-232, 1960-2 CB 117 . *Rev Rul* 76-289, 1976-2 CB 100 .

(n18)Footnote 16. *Rev Rul* 60-232, 1960-2 CB 117 ; see also *Rev Rul* 60-322, 1960-2 CB 118 .

(n19)Footnote 17. *Commr v Babson*, 70 F2d 304 (7th Cir 1934) , *cert denied* 293 US 571 ; *Weinman v Commr*, TC Memo 1956-229 ; *Heber Scowcroft Inv Co v Commr*, 1945 Tax Ct Memo LEXIS 140 (1945) ; *Rev Rul* 74-296, 1974-1 CB 80 . The liquidation of property which produced a minor percentage of the corporation's income might not qualify. *Cf* *Rev Rul* 57-333, 1957-2 CB 239 .

A sale of a subsidiary's stock to an unrelated party followed by a distribution of the proceeds of the sale by the parent is not a partial liquidation. *Rev Rul* 79-184, 1979-1 CB 143 . However, a distribution by a parent of the proceeds of a sale of the assets of a subsidiary is a partial liquidation of the parent corporation, if the subsidiary is completely liquidated under *IRC* § 332. *Rev Rul* 75-223, 1975-1 CB 109 .

(n20)Footnote 18. 22 TC 1158 (1954) , *affd per curiam* 228 F2d 909 (6th Cir 1955) . See also *Pliner v Commr*, TC Memo 1961-218 .

(n21)Footnote 19. The Tax Court may have reached the wrong result by focusing on book values as shown on the corporation's financial statements rather than on the portion of the amount realized on the sale which was actually reinvested in the new venture.

(n22)Footnote 20. 210 F2d 607 (5th Cir 1954) ; *accord*, *Lockhart v Commr*, 8 TC 436 (1947) .

(n23)Footnote 21. *IRC* § 302(e)(3), (4). The failure to operate the business for at least five years is not cured by a delay in distributing the proceeds of sale. *Rev Rul* 71-473, 1971-2 CB 179 .

See generally Greene, "Disposing of Part of a Business: Planning Under the Statutory Rules," 15 *Tul Tax Inst* 158 (1965); Caplan, "The Five-Year Active Business Rule in Separations and Partial Liquidations," 1961 *So Calif Tax Inst* 211.

(n24)Footnote 22. *Kenton Meadows Co v Commr*, TC Memo 1984-379 , *affd* 766 F2d 142 (4th Cir 1985) , *cert denied* 474 US 1082 ; *Gordon v Commr*, 424 F2d 378 (2d Cir 1970) , *affg* 51 TC 1032 (1969) . The Tax Court decision in *Gordon* came after a reversal and remand by the Supreme Court. 391 US 83 (1968) , *revd* 382 F2d 499 (2d Cir 1967) ; *Rev Rul* 58-565, 1958-2 CB 140 .

A temporary investment of funds following the sale of part of the taxpayer's business does not prevent the distribution from qualifying as a partial liquidation. *Rev Rul* 71-250, 1971-1 CB 112 . However, any profit earned on the investment and distributed to the shareholders will be subject to tax under *IRC* § 301, while any losses sustained will reduce the amount treated as distributed in partial liquidation. *Rev Rul* 76-279, 1976-2 CB 99 .

(n25)Footnote 23. *Treas Reg* § 1.355-3(b)(2)(i).

(n26)Footnote 24. *Treas Reg § 1.355-3(b)(2)(iv)*. Since the holding of stock for investment does not qualify as an active trade or business, a distribution of stock of a controlled subsidiary that ceases to do business cannot qualify as a partial liquidation of the parent. *Morgenstern v Commr*, 56 TC 44 (1971) .

(n27)Footnote 25. *IRC § 346(b)*.

(n28)Footnote 26. S Rep No 97-494, 97th Cong, 2d Sess 188 (1982).

(n29)Footnote 27. S Rep No 97-494, 97th Cong, 2d Sess 188 (1982).

(n30)Footnote 28. The distribution must still meet the distribution time requirements of *IRC § 302(e)(1)*. *Rev Rul 77-468*, 1977-2 CB 109 .

(n31)Footnote 29. It has been said that a contrary approach would make the general rule meaningless; Rabkin & Johnson, 3A *Federal Income, Gift and Estate Taxation* § 24.10[4].

(n32)Footnote 30. 1956-2 CB 191 ; see also *Rev Rul 57-333*, 1957-2 CB 239 , where the Service first considered whether the distribution could fit the trade or business test and then looked to see if a corporate contraction had occurred.

CHAPTER 6 Liquidating Distributions

1-6 Taxation of Securities Transactions § 6.05

§ 6.05 Partial Liquidations--Effect on the Liquidating Corporation

A distribution in partial liquidation has the same effect on the distributing corporation as any distribution in redemption of stock. Gain will be recognized if the corporation distributes appreciated property to the shareholder.ⁿ¹ Earnings and profits will be reduced in an amount equal to the ratable share of the earnings and profits attributable to the shares redeemed as part of the partial liquidation.ⁿ²

CHAPTER 7 Stock Bail-Outs

1-7 Taxation of Securities Transactions § 7.01

§ 7.01 Introduction

We have seen that the extraction of earnings and profits from a going corporation cannot be achieved without dividend consequences unless the shareholder's proportionate interest is sufficiently reduced by a redemption which qualifies as an exchange under *IRC Section 302(a)*.ⁿ¹ But if the corporation is sufficiently liquid, a possible solution is a tax-free stock dividend of preferred stock, followed by a sale of the preferred to a third party, and then by the complete redemption of the preferred by the corporation.

The device just described met with court approval in *Chamberlin v. Commissioner*,ⁿ² where the Sixth Circuit held that the rapid succession of prearranged events did not change the character of a nontaxable stock dividend or prevent the shareholders from achieving the same economic result as a dividend, but at preferential capital gain rates. *Chamberlin* was decided in 1953; in 1954, Congress took action to prevent preferred stock "bail-outs" by enacting *IRC Section 306*, which taints the stock received as a dividend and changes the character of the gain realized on its disposition.

CHAPTER 7 Stock Bail-Outs

1-7 Taxation of Securities Transactions § 7.02

§ 7.02 Combating Stock Bail-Outs--Section 306 Stock

[1] Section 306 Stock Defined

The legislative attack on preferred stock bail-outs starts with a new concept--Section 306 stock. The scope of the concept is not limited to preferred stock received as a stock dividend; it also includes stock received in a reorganization and stock having a transferred or substituted basis. Since the statute is aimed at preventing the bail-out of profits at preferred rates, stock will not be Section 306 stock if distributed at a time when the corporation has neither current nor accumulated earnings and profits.ⁿ¹ But if there is even \$1 of earnings and profits, the taint of *IRC Section 306* attaches to all of the distributed stock.

[a] Stock Received as a Dividend. Stock received as a dividend after June 22, 1954 will be Section 306 stock if (1) any part of the distribution is excluded from gross income by *IRC Section 305(a)*, and (2) the stock is not common stock issued with respect to common stock.ⁿ² For common stock to be Section 306 stock, it must be distributed as a dividend with respect to stock which is not common stock and must not be includable in gross income when received. For example, if common stock is distributed as a dividend on preferred stock, and the shareholder receiving the stock has the right to take the dividend in stock or in cash, the dividend will be taxable under *IRC Section 305(b)(1)* and the stock will not be Section 306 stock.

There is no statutory or regulatory definition of common stock beyond that common stock which is convertible into preferred stock or property will not be considered common stock.ⁿ³ In fact, the only further clues to the meaning of the term "common stock" are some rulings, one holding that redeemable nonvoting common stock was not common stock for purposes of *IRC Section 306(c)(1)(B)*;ⁿ⁴ a second distinguishing the first, finding that stock was common stock even though no shareholder could sell the stock without first offering it to the corporation at book value;ⁿ⁵ another holding a redesignated class of common stock to be other than common stock because it was preferred as to the payment of dividends;ⁿ⁶ a fourth stating that nonvoting stock was common stock because its disposition, while not giving rise to a loss of voting control, would cause the shareholder to lose an interest in the unrestricted equitable growth of the corporation;ⁿ⁷ and, lastly and perhaps most important, one that provides that stock restricted as to dividends or to share beyond par value on liquidation is not common stock.ⁿ⁸ Perhaps the most important feature of rulings holding that stock with certain preferences is still common stock is the ability of the stock in question to share without limitation in the growth of the corporation.ⁿ⁹

[b] Stock Received Pursuant to a Reorganization. A second category of Section 306 stock is comprised of stock,

other than common stock, received pursuant to a reorganization or corporate separation which is either wholly or partially nontaxable, provided the effect of the transaction is substantially the same as the receipt of a stock dividend or the stock is received in exchange for Section 306 stock.ⁿ¹⁰ The critical determination is whether the transaction has the effect of a stock dividend, a determination which the Regulations make by looking to see if cash received in lieu of such stock would have been treated as a dividend under *IRC Section 356(a)(2)*, or as a distribution governed by *IRC Section 301*.ⁿ¹¹

The foregoing may be amplified by considering a number of cases in which the Internal Revenue Service has been asked to rule whether stock received in a reorganization is Section 306 stock. In Revenue Ruling 59-84,ⁿ¹² a corporation issued one share of new common stock or one share of new nonvoting, nonparticipating, cumulative preferred stock for each share of existing common stock. In the exchange, some of the shareholders of the corporation received only common or preferred while others received both. By definition, the shareholders who received only common stock did not receive Section 306 stock. The one shareholder who received only preferred shares was held not to have received Section 306 stock since, after the exchange, he owned no common stock, no voting stock, and no participating stock. However, each of the shareholders who received both common and preferred ended with a common stock ownership greater in percentage than his ownership interest prior to the exchange. This led the Service to find that, as to such shareholders, the transaction had substantially the same effect as the receipt of a stock dividend, causing the preferred stock received by them to be classified as Section 306 stock.

The criteria applied in determining whether the transaction has the effect of a stock dividend are strikingly similar to those employed in testing a redemption for dividend equivalence.ⁿ¹³ The shareholder who received only preferred stock in exchange for his common suffered a meaningful reduction in his interest in the corporation. Indeed, he had received cash instead of stock, his redemption would have been substantially disproportionate. The shareholders receiving both common and preferred found themselves in much the same position as the shareholder who receives property in a pro rata redemption and is saddled with the receipt of a dividend. To further illustrate the point, one need only compare *Revenue Ruling 70-199*ⁿ¹⁴ with *Revenue Ruling 60-1*.ⁿ¹⁵ In the former, the shareholder's ownership of all of the outstanding shares of one class of stock gave him the power to elect a majority of the directors of the corporation. This power was unaffected by a recapitalization involving other shares of the corporation, causing the Service to conclude that the stock issued pursuant to the reorganization was Section 306 stock. In the latter ruling, a merger of two publicly held corporations brought an exchange of preferred stock in the merged corporation for similar stock in the surviving corporation. Prior to the transaction, the preferred stock in the old corporation had been widely held; the largest individual holder owned only one and one-half percent of the outstanding issue and owned no common stock. In addition, there was no pattern of ownership between common and preferred; the holders of 75 percent of the preferred owned no other stock in the corporation, while the persons who held both common and preferred had less than 25 percent of the voting power before the merger and less than 20 percent after the merger. These circumstances, coupled with the fact that the new preferred stock was issued to meet the needs of the corporation and not for the convenience of the shareholders, resulted in a finding that the effect of the transaction was not substantially the same as the receipt of a stock dividend.

When preferred stock that is not Section 306 stock is exchanged in an acquisitive reorganization for preferred stock of equal value and with terms not substantially different, the new stock will not be Section 306 stock within the meaning of *IRC Section 306(c)(1)(B)*.ⁿ¹⁶

Preferred stock that is convertible into common stock may not be Section 306 stock. The Service has announced that it will usually rule to that effect if the convertible preferred is received in a reorganization by shareholders who will own no common stock after the reorganization, and the preferred stock will be widely held or it is represented that there will not be any conversion of the stock pursuant to a concerted plan which will result in both common and preferred being held by an exchanging shareholder.ⁿ¹⁷ However, even if preferred stock issued with respect to common stock is found to be Section 306 stock, common stock of the same corporation acquired in an exchange of the Section 306 stock will not carry any taint.ⁿ¹⁸

[c] Stock Having a Substituted Basis. *IRC Section 306(c)(1)(C)* adds to the definition of Section 306 stock any stock held by a person whose basis for the stock is determined by reference to the basis of Section 306 stock, either in his hands or in the hands of another. For example, if a person transfers Section 306 stock to a newly formed corporation in exchange for all of the stock of such corporation, the stock received by the transferor will be classified as Section 306 stockⁿ¹⁹ even if it is common stock.ⁿ²⁰ Furthermore, the transferred Section 306 stock will remain tainted since the basis of the stock in the hands of the transferee corporation is determined by reference to the basis of the stock in the hands of the transferor.ⁿ²¹

Under this subsection, Section 306 stock acquired by gift remains Section 306 stock. However, if the value of the gift is includable in the decedent's gross estate because the transfer was made in contemplation of death, and the donee still holds the stock on the date of the donor's death, the taint is removed since the basis of the stock in the donee's hands is determined by reference to its fair market value on the date of death or alternate valuation date.ⁿ²²

[d] Stock Acquired in a Section 351 Exchange. The Tax Equity and Fiscal Responsibility Act of 1982 enlarged the definition of Section 306 stock to include any stock other than common stock acquired in an exchange that normally would be tax free under *IRC Section 351*, if the receipt of money in lieu of the stock would have been treated as a dividend to any extent.ⁿ²³ This provision closes the door to potential tax avoidance by making rules similar to the related corporation redemption rules of *IRC Section 304(b)(2)*ⁿ²⁴ applicable for purposes of determining the amount of the potential dividend and of determining the application of *IRC Section 306* to any subsequent disposition of the stock.

[e] Preventing Avoidance of Section 306. We have already seen that common stock that is convertible into stock other than common stock is excluded from consideration as common stock for purposes of *IRC Section 306*. If this were not so, earnings and profits could be bailed-out by combining a distribution of convertible common stock, with an exercise of the conversion privilege and a sale of the preferred stock acquired on the exchange.

Another potential opportunity to avoid the consequences of *IRC Section 306* is foreclosed by *IRC Section 306(d)*, which treats stock rights as stock. Thus, if the corporation has earnings and profits at the time it distributes rights to acquire stock which would have been Section 306 stock if it were distributed, and if the rights are excluded from the recipient's gross income by *IRC Section 305(a)*, the rights will be considered Section 306 stock, as will any stock acquired by the exercise of those rights.ⁿ²⁵

Avoidance that could result from a substantial change in the terms and conditions of any stock is prevented by making such stock Section 306 stock if there are earnings and profits either at the time of distribution or at the time of the change.ⁿ²⁶ In other words, stock that could not be categorized as Section 306 stock when originally distributed, because of the absence of earnings and profits, may be so classified at a later date if the terms and conditions of the stock are substantially changed and the corporation then has earnings and profits.

[2] The Effect of a Disposition of Section 306 Stock

[a] Where the Disposition Is a Redemption

[i] General Rule. If the disposition of Section 306 stock takes the form of a redemption which does not completely terminate the shareholder's interest in the corporation, the amount realized will be treated as a distribution to which *IRC Section 301* applies.ⁿ¹ The amount that will be taxed as a dividend depends upon the extent of the corporation's earnings and profits at the time of the redemption; the amount of earnings and profits at the time the Section 306 stock is distributed is immaterial, except insofar as the existence of some earnings and profits at the time of the stock distribution is needed to make the stock Section 306 stock.ⁿ²

[ii] Exception--A Complete Redemption or Partial Liquidation. Dividend consequences will not attach if the redemption is a complete redemption to which *IRC Section 302(b)(3)* applies or a partial liquidation falling under *IRC Section 302(b)(4)*.ⁿ³ The constructive ownership rules of *IRC Section 318(a)* must be applied when determining

whether the redemption completely terminates the shareholder's stock interest in the corporation. However, family attribution can be waived if the conditions of *IRC Section 302(c)(2)* are met.ⁿ⁴

[b] Where the Disposition Is Other Than a Redemption

[i] General Rule. If the disposition is not a redemption, the gain realized will be treated as ordinary income to the extent of the shareholder's ratable share of the corporation's earnings and profits at the time the Section 306 stock was distributed.ⁿ⁵ The excess of the amount realized over the portion treated as ordinary income is first applied against and in reduction of the shareholder's basis for the stock, with any further balance treated as gain from the sale of the stock.ⁿ⁶ If the amount realized is greater than the shareholder's ratable share of earnings and profits, but less than the shareholder's basis for his Section 306 stock, the shareholder realizes a loss that he is not allowed to recognize.ⁿ⁷ Instead, the unrecovered basis is added back to the basis of the stock with respect to which the Section 306 stock was issued.ⁿ⁸

Example:

At a time when a corporation had earnings and profits of \$5,000, it distributed 100 shares of preferred stock worth \$5,000 to its sole shareholder. The common stock with respect to which the distribution was made had a basis of \$10,000 and was worth \$15,000 on the date of distribution. Pursuant to *IRC Section 307*,ⁿ⁹ \$2,500 of the shareholder's basis for the common stock must be allocated to the preferred stock; his basis for the common would then become \$7,500. A sale of the preferred stock for \$8,000 would cause the shareholder to realize ordinary income of \$5,000 (his ratable share of earnings and profits at the time of the original stock distribution) and gain attributable to the sale of the stock of \$500 (\$8,000 less the sum of (1) the portion of the amount realized treated as ordinary income, \$5,000, and (2) the adjusted basis of the preferred stock, \$2,500). If the selling price had been \$7,000, the ordinary income portion would still be \$5,000, leaving a balance of \$2,000 to be applied against the \$2,500 basis of the preferred stock. The realized loss of \$500 would not be allowed as a deduction, but that sum would be added to the basis of the shareholder's common stock.

How should a transaction involving Section 306 stock be taxed if, at the time of receipt of the stock, the taxpayer owned some preferred stock and the disposition is of less than his total holding of the preferred? This was the question presented in *Fireover v. United States*,ⁿ¹⁰ where the taxpayer received 535 preferred shares as a dividend on common stock. This raised to 600 the number of preferred shares owned by the taxpayer; the other 65 had been acquired at the same time as the common. The taxpayer then disposed of 451 of the preferred shares. The district court applied the first-in, first-out rule of stock identificationⁿ¹¹ and held that sixty-five of the shares were those owned before the stock dividend. The Third Circuit disagreed on the ground that the tacking rules of *IRC Section 1223(5)* caused the preferred received as a dividend to have the same holding period as the common with respect to which it was issued. Thus, all of the preferred had the same holding period so that of the 451 shares, only 48.86 (65/600ths of 451) were not Section 306 stock.

[ii] Exception--Complete Termination of a Shareholder's Entire Stock Interest. A disposition that is not a redemption will avoid the general rule of *IRC Section 306(a)(1)* if it terminates the shareholder's entire stock interest in the corporation.ⁿ¹² A disposition will not completely terminate a shareholder's interest, if, afterwards, stock owned by another is attributed to the shareholder by operation of the constructive ownership rules of *IRC Section 318(a)*.ⁿ¹³ Moreover, the exception will be inapplicable if the transferee is a person whose stock ownership would be attributable to the shareholder under *IRC Section 318(a)*.ⁿ¹⁴

[iii] Exception--Complete Liquidations. The usual rules governing gain or loss will be applicable if the shareholder redeems Section 306 stock in a distribution which qualifies as a complete liquidation.ⁿ¹⁵ This exception, as well as those relating to complete redemptions, partial liquidations, and complete terminations of a shareholder's interest, is grounded on the assumption that the transaction is not generally considered to be a means by which shareholders can remove corporate earnings at preferential rates.ⁿ¹⁶

[iv] Exception--Nonrecognition Transaction. *IRC Section 306(b)(3)* makes *IRC Section 306(a)* inapplicable to the extent that some other provision of the Code grants nonrecognition to gain or loss realized on the disposition of the Section 306 stock. However, since any stock received by the stockholder in a tax-free exchange will assume a substituted basis and therefore be Section 306 stock, the exception serves merely to defer operation of the general rule. Furthermore, any "boot" received in an otherwise tax-free transaction will not be protected by *IRC Section 306(b)(3)*, but will be subject to *IRC Section 306(a)* treatment.ⁿ¹⁷

[v] Exception--Nonavoidance Transactions. The final exception applies whenever the Service is satisfied that the transaction is "not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax."ⁿ¹⁸ Two sets of transactions are granted immunity from *IRC Section 306(a)*. The first is where the distribution and disposition or redemption do not have a tax avoidance purpose,ⁿ¹⁹ while the second covers the situation in which the shareholder has made a prior or simultaneous disposition (or redemption) of the stock with respect to which the Section 306 stock was issued.ⁿ²⁰

FOOTNOTES:

(n1)Footnote 1. *IRC § 306(c)(2)*. If there is a substantial change in the terms and conditions of stock which would have been *IRC § 306* stock but for the absence of earnings and profits at the time of distribution, the rule of *IRC § 306(c)(2)* will be disregarded if there are earnings and profits at the time of such change. *IRC § 306(g)(3)*.

(n2)Footnote 2. *IRC § 306(c)(1)(A)*; *Treas Reg § 1.306-3(i)*. A distribution of common on common is excluded even if the distributed stock is treasury stock rather than newly issued stock. *Rev Rul 55-746, 1955-2 CB 224* .

The broadened application of *IRC § 305(b)*, relating to taxable stock dividends (see § 4.06[2][a][i]-[iv], *supra*) will lessen the scope of *IRC § 306*.

(n17)Footnote 17. Rev Proc 77-37, 1977-2 CB 568 . An excellent treatment of the subject of the effect of IRC § 306 on the use of convertible preferred stock is contained in Metzger, N 13, *supra*.

(n18)Footnote 18. IRC § 306(e)(1). The exchange need not be pursuant to a conversion privilege contained in the instrument.

(n19)Footnote 19. Rev Rul 77-108, 1977-1 CB 56 . This assumes that the transaction meets the conditions of IRC § 351 so that the transferor's basis for the acquired stock is controlled by IRC § 358(a). See § 3.03, *supra*.

(n20)Footnote 20. Treas Reg § 1.306-3(e).

(n21)Footnote 21. IRC § 362(a)(1).

(n22)Footnote 22. IRC § 1014(a), (b)(9); Treas Reg § 1.306-3(e).

(n23)Footnote 23. IRC § 306(c)(3). The attribution rules of IRC § 318 apply in determining the extent of common control, with the corporation-shareholder provisions applied using 5 percent as the stock ownership prerequisite. IRC § 306(c)(4).

(n24)Footnote 24. See § 5.04[1], *supra*.

(n25)Footnote 25. Treas Reg § 1.306-3(b).

(n26)Footnote 26. IRC § 306(g)(3).

(n27)Footnote 1. IRC § 306(a)(2).

(n28)Footnote 2. Treas Reg § 1.306-1(c).

(n29)Footnote 3. IRC § 306(b)(1)(B). Complete redemptions are discussed in § 5.02 [2][c], *supra*.

(n30)Footnote 4. Treas Reg § 1.306-2(a)(2).

(n31)Footnote 5. IRC § 306(a)(1)(A). The amount treated as ordinary income is considered to be a dividend received from the corporation for purposes of IRC § 1(h)(11), the maximum rate of tax on dividends. IRC § 306(a)(1)(D). See § 2.06[2][a][i] for a discussion of IRC § 1(h)(11).

Although the statute is couched in terms of earnings and profits at the time of distribution, the appropriate measure should be accumulated earnings and profits and current earnings and profits for the year of distribution. See B. Bittker & J. Eustice, *Federal Income Taxation of Corporations and Shareholders* 10-10 (5th ed. 1987).

If there has been a substantial change in the terms and conditions of the stock, the ratable portion of earnings and

profits will be the portion determined as of the date of the change, if that figure is higher than the one determined as of the date of distribution. *IRC § 306(g)(3)*.

It should be noted that the realization of ordinary income at the shareholder level is not offset by a reduction of earnings and profits at the corporate level.

(n32)Footnote 6. *IRC § 306(a)(1)(B)*. The gain will be capital gain if the stock is a capital asset in the hands of the taxpayer.

(n33)Footnote 7. *IRC § 306(a)(1)(C)*.

(n34)Footnote 8. *Treas Reg § 1.306-1(b)*, Exs. (2) and (3).

(n35)Footnote 9. See *§ 4.06[2][b]*, *supra*.

(n36)Footnote 10. See *§ 7.02[1]*, N 11, *supra*,

(n37)Footnote 11. See *§ 1.05 [7][a]*, *supra*.

(n38)Footnote 12. *IRC § 306(b)(1)(A)*.

(n39)Footnote 13. *IRC § 306(b)(1)(A)*.

(n40)Footnote 14. *IRC § 306(b)(1)(A)*.

(n41)Footnote 15. *IRC § 306(b)(2)*.

(n42)Footnote 16. S Rep No 1622, 83d Cong, 2d Sess 243 (1954).

(n43)Footnote 17. *Treas Reg § 1.306-3(d)*; *Rev Rul 76-14, 1976-1 CB 97* ; but see *Rev Rul 76-15, 1976-1 CB 98* .

The issuance of cash to minority shareholders in lieu of fractional shares of Section 306 stock in a recapitalization does not serve a tax avoidance purpose and will be treated as a redemption under *IRC § 302(a)*. *Rev Rul 81-81, 1981-1 CB 122* .

(n44)Footnote 18. *IRC § 306(b)(4)*.

(n45)Footnote 19. The Service will not ordinarily issue a ruling as to whether a distribution or disposition or redemption of Section 306 stock is in pursuance of a plan having as one of its principal purposes the avoidance of federal income taxes. *Rev Proc 2010-3, 2010-1 IRB 110, 116* (§ 4.01(23)).

(n46)Footnote 20. The fact that the Section 306 stock is widely held is in itself not a ground for relief under *IRC § 306(b)(4)*. *Rev Rul 89-63, 1989-1 CB 90* . The ruling will not be applied adversely to taxpayers who treated transactions in accordance with contrary conclusions found in *Rev Rul 57-212, 1957-1 CB 114*, *Rev Rul 57-103, 1957-1 CB 113* , and *Rev Rul 56-116, 1956-1 CB 164* , in the case of stock either issued before May 1, 1989, or issued thereafter pursuant to the terms of a plan of reorganization that was adopted before, and remained in effect until, that date.

A gift of Section 306 stock to a charitable organization did not produce income for the donee in *Rev Rul 57-328, 1957-2 CB 229* . The utility of a charitable gift of Section 306 stock has been diminished by the enactment of *IRC § 170(e)(1)*. See Ch 1, and *Pescosolido v Commr, 91 TC 52 (1988)* , *affd 883 F2d 187 (1st Cir 1989)* , and *Ltr Rul 8930001* .

All of the underlying common stock must be sold if such sale is the sole factor relied on to show the absence of a plan

of tax avoidance. *Rev Rul 75-247, 1975-1 CB 104* .

Rev Rul 80-33, 1980-1 CB 69 , is illustrative of the burden placed on a taxpayer to show that the distribution of preferred stock was not in pursuance of a tax avoidance purpose.

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.01

§ 8.01 Introduction

The discussion in earlier chapters indicated that gain or loss realized on the disposition of property will ordinarily be recognized in the year of transfer, but that there are instances in which the Internal Revenue Code permits the taxpayer to forego recognition of gain or loss on the ground that the transaction involves changes in the form of the taxpayer's investment, but not in its substance. The exceptions to the general rule are founded on the theory that the imposition of tax or allowance of loss should be postponed until the substance of the investment also undergoes change.

The reorganization provisions of the Code are in keeping with this approach. Nonrecognition is granted to a specified group of exchanges "which effect only a readjustment of continuing interest in property under modified corporate forms."ⁿ¹ But as in all tax-free exchange cases, it is not enough that a transaction meets the literal definition of reorganization; it must also satisfy the purposes and assumptions which underlie the exception to the general rule requiring recognition.ⁿ²

The initial discussion in this chapter will focus on the impact of the choice of a particular instrument on the reorganization status of the exchange. Following that, consideration will be given to the effect of a reorganization exchange on the holder of stock or securities in the reorganized corporation. The final portion of the chapter will be devoted to the tax consequences which attach to exchanges of stock or securities made other than as part of a reorganization.ⁿ³

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.02

§ 8.02 The Continuity of Interest and Continuity of Business Enterprise Requirements

[1] Purpose of the Requirements.

A transaction will not qualify as a reorganization unless the holders of stock or securities in the old corporation continue to retain an interest in the new enterprise.ⁿ¹ The requirement, which had its origins in judicial opinion, is intended to ensure that an exchange is truly a reorganization--a readjustment of interests under modified corporate form--and not a disguised sale.

The continuity of business enterprise requirement is a creature of the regulations.ⁿ² It is intended to serve the same policy as continuity of interest.

[2] Judicial Development of the Continuity of Interest Requirement.

The continuity of interest requirement first found expression in *Cortland Specialty Co. v. Commissioner*,ⁿ¹ where the Second Circuit held a transfer of substantially all the assets of one corporation in exchange for cash and short-term notes of another to be the equivalent of a sale and not a reorganization, even though the transaction literally fit the definition of reorganization then obtaining. In the court's opinion, a primary requisite of reorganization was that there be "some continuity of interest on the part of the transferor corporation or its stockholders in order to secure exemption,"ⁿ² and that this could not be found in notes payable in so short a time that they resembled cash.

One year later, the Supreme Court, in deciding *Pinellas Ice & Cold Storage Co. v. Commissioner*,ⁿ³ approved the result reached in *Cortland Specialty*, and laid to rest any possibility that short-term notes could give the holders thereof the necessary continuance of interest in the properties transferred by stating:

"[W]e think that to be within the exemption the seller must acquire an interest in the affairs of the purchasing corporation more definite than that incident to ownership of its short-term purchase-money notes."ⁿ⁴

Left unanswered by *Cortland Specialty* and *Pinellas* was whether long-term obligations could furnish the requisite continuity of interest.ⁿ⁵ The definitive answer to that question came in *LeTulle v. Scofield*,ⁿ⁶ where more than 90 percent of the consideration received by the transferor consisted of secured bonds, payable serially over a period beginning little more than one year and ending more than 12 years after the exchange. The Supreme Court reached the

conclusion that

"[T]he term of the obligations is not material. Where the consideration is wholly in the transferee's bonds, or part cash and part such bonds, we think that it cannot be said the transferor retains any proprietary interest in the enterprise. ... [W]e do not think that the fact ... that the bonds were secured solely by the assets transferred and that, upon default, the bondholder would retake only the property sold, changes his status from that of a creditor to one having a proprietary stake. ... "n7

By denying that a holder of debt securities could retain a proprietary interest in the transferee corporation, *LeTulle v. Scofield* made it clear that stock was the only form of consideration that could provide continuity of interest. Although one might conclude that the result in *LeTulle v. Scofield* establishes that continuity of interest is synonymous with participation in management, such is not the case; the required interest is present even when the taxpayer receives nothing other than nonvoting preferred stock redeemable at stated intervals.ⁿ⁸ Indeed, continuity of interest has been deemed to exist in instances in which no stock was received, but the taxpayer's proprietary interest was present in some other form, eg, depositor in mutual savings bank, policyholder in mutual life insurance company.ⁿ⁹ However, in *Paulsen v. Commissioner*,ⁿ¹⁰ the Supreme Court denied tax-free treatment on the merger of a stock savings and loan association into a mutual savings and loan association, where the shareholders of the target corporation had the choice of receiving passbook accounts or time certificates of deposit for their guaranty shares.ⁿ¹¹ Although depositors and borrowers of the acquiring corporation had the power to vote on matters that required shareholder approval, a majority of the Court concluded that the debt characteristics of the interests in the mutual savings and loan association greatly outweighed the equity characteristics, and, thus, that there was no continuity of interest.

The continuity of interest requirement looks not only to see whether stock is received, but also how much stock is received.ⁿ¹² This quantitative side of the requirement is satisfied only if the retained equity interest represents a substantial part of the value of the property transferred; the extent of transferor's percentage ownership interest in the transferee corporation is unimportant. For example, in *Helvering v. Minnesota Tea Co.*,ⁿ¹³ a transfer of assets for an equity interest worth approximately \$540,000 and cash of approximately \$425,000, was considered a reorganization, even though the equity interest amounted to only 7 percent of the total outstanding equity in the transferee corporation; the stock interest received represented a material part (56 percent) of the value of the transferred assets. This should be contrasted with *Southwest Natural Gas Co. v. Commissioner*,ⁿ¹⁴ where the retention of an equity interest representing 1 percent of the value of the property transferred was held to be inadequate, notwithstanding that, following the exchange, the shareholders of the old corporation owned 16 percent of the outstanding stock of the transferee corporation.

There is no magic formula for determining the amount of stock necessary to satisfy the quantitative element of the continuity of interest requirement. However, the Service currently takes the position that shareholders of the old corporation preserve a substantial part of the value of their proprietary interest if, pursuant to a contract to effect the proposed reorganization that provides a fixed consideration for their equity interest, they acquire in the aggregate stock in the transferee corporation equal in value to at least 40 percent of the total value of all consideration received for the outstanding stock of the old corporation, determined as of the last business day before the first date such contract becomes a binding contract.ⁿ¹⁵ How much lower than 40 percent one can go and still satisfy the requirement is unclear, but one should be aware of the fact that as the amount of nonstock consideration increases, so does the likelihood of litigation.ⁿ¹⁶

It was thought at one time that the continuity of interest requirement could not be met if stock issued in a reorganization of an insolvent corporation went to the creditors of the insolvent corporation and not to its stockholders.ⁿ¹⁷ However, in *Helvering v. Alabama Asphaltic Limestone Co.*,ⁿ¹⁸ the Supreme Court held that since the creditors of an insolvent corporation succeed to the proprietary interests of its shareholders, stock received by such creditors can satisfy the continuity of interest requirement. The regulations follow this mandate and provide rules for determining whether the continuity of interest requirement is met when creditors of the target receive stock in the reorganization transaction.ⁿ¹⁹

The creditor continuity of interest (creditor COI) regulations apply whether or not the target corporation is a party to a title 11 or similar case (i.e., whether the reorganization is a G reorganization or a reorganization of another kind),ⁿ²⁰ but if the reorganization occurs outside a title 11 case, the target must be insolvent (i.e., its liabilities must exceed the fair market value of its assets).ⁿ²¹

The creditor COI regulations determine whether the continuity of interest requirement is satisfied by comparing the value of stock of the acquiring corporation (or stock of a corporation in control of the acquiring corporation)ⁿ²² received by the creditors and stockholders of the target for their proprietary interests with the total consideration (including cash and property other than stock) received for their proprietary interests. The regulations make it significantly easier to meet the continuity of interest test by excluding from the comparison nonstock consideration received by senior creditors, which is deemed received in exchange for the senior creditors' interests *qua* creditors rather than in exchange for their proprietary interests in the target.ⁿ²³ The amount of consideration deemed received by senior creditors in exchange for their proprietary interests equals the value of their claims multiplied by a fraction, the numerator of which is the value of stock in the acquiring corporation received by all senior creditors and the denominator of which is the value of all consideration (including such stock plus any money and the value of any other property) received by all senior creditors.ⁿ²⁴ All consideration (if any) received by junior creditors and shareholders, including nonstock consideration, is deemed received in exchange for their proprietary interests.ⁿ²⁵ "The effect of this rule is that there [will be] 100 percent continuity of interest if each senior claim is satisfied with the same ratio of stock to nonstock consideration and no junior claim is satisfied with nonstock consideration."ⁿ²⁶

Example:

T Corp is insolvent, with assets valued at \$150x and liabilities of 200x. T Corp transfers all of its assets to A Corp in exchange for \$95x in cash and A Corp stock with a value of \$55x. A senior class of creditors with claims valued at \$50x receives \$40x in cash and \$10x of A Corp stock. A junior class of creditors with claims valued at \$100x receives \$55x in cash and \$45x in A Corp stock. (The shareholders of T Corp receive nothing.) Under the creditor COI regulations, 20 percent or \$10x of the total consideration received by the senior class of creditors is deemed received in exchange for their proprietary interests in T Corp ($\$50x \text{ (value of claims)} \times (\$10x \text{ (value of A Corp stock)} / \$50x \text{ (value of all consideration received)}) = \$10x$). (The remaining 80% or \$40x is deemed paid to the senior creditors in exchange for the value of their debt claims.) Therefore, in total T Corp's creditors received stock worth \$55x (\$45x to the junior class and \$10x to the senior class) for their proprietary interests in T Corp out of a total consideration of \$110x paid by the acquiring corporation in cash and stock for the creditors' proprietary interests in the corporation. Since a substantial part (50 percent) of the proprietary interests in T Corp is preserved, the continuity of interest requirement is satisfied.ⁿ²⁷

Suppose that a taxpayer sells acquired stock within a short period of time after the exchange. None of the Supreme Court cases establishing the continuity of interest requirement addressed the issue of whether sales of stock in the issuing or acquiring corporation by former shareholders of the acquired or target corporation violated the continuity of interest requirement. A number of lower court cases focused on the question of whether, on the date of the potential reorganization, the shareholders intended to sell the newly acquired stock. Looking at facts that were nearly identical, some courts found that continuity of interest did not exist, while others held the requirement to be satisfied.ⁿ²⁸

Final regulations issued in 1998 permit former target corporation shareholders to sell stock received in a potential reorganization to third parties without causing the reorganization to fail to satisfy the continuity of interest requirement. The regulations provide that the requirement is satisfied if, in substance, a substantial part of the value of the proprietary

interest in the target corporation is preserved in the exchange.ⁿ²⁹ A proprietary interest in the target corporation is preserved if, in the transaction, it is exchanged for a proprietary interest in the issuing corporation, it is exchanged by the issuing corporation for a direct interest in the target enterprise, or it otherwise continues as a proprietary interest in the target corporation.ⁿ³⁰ A proprietary interest in the target corporation is not preserved if, in connection with the transaction, it is acquired by the issuing corporation for consideration other than stock in the issuing corporation, or stock in the issuing corporation furnished in exchange for a proprietary interest in the target corporation is redeemed.

A proprietary interest is not preserved if, in connection with a potential reorganization, a person related to the issuing corporation acquires, with consideration other than a proprietary interest in the issuing corporation, stock of the target corporation, or stock of the issuing corporation furnished in exchange for a proprietary interest in the target corporation in the transaction, except to the extent those persons who were the direct or indirect owners of the target corporation prior to the transaction maintain a direct or indirect proprietary interest in the issuing corporation.ⁿ³¹

In determining whether a proprietary interest in the target corporation is preserved, the consideration to be exchanged for proprietary interests in that corporation pursuant to a contract to effect the potential reorganization is to be valued on the last business day before the first date the contract is a binding contract, if the contract provides for a fixed consideration.ⁿ³² If the term of a binding contract that relates to the amount or type of consideration the shareholders of the target corporation will receive in the potential reorganization is modified before the closing date of the potential reorganization, the date of the modification will be treated as the first date there is a binding contract.ⁿ³³

A contract provides for a fixed consideration if it provides the number of shares of each class of stock of the issuing corporation, the amount of money, and the other property (identified by value or by specific description), if any, to be exchanged for all of the proprietary interests and for each proprietary interest in the target corporation.ⁿ³⁴ A contract that does not meet the general rule for a contract with a fixed consideration, but with respect to which a target corporation shareholder has an election to receive stock, or stock and money or other property, for target corporation stock is treated as providing for fixed consideration if the determination of the number of shares of issuing corporation stock to be provided to the target corporation shareholder is determined using the value of the issuing corporation stock on the last business day before the first date there is a binding contract.ⁿ³⁵

A contract that provides for contingent adjustments to the consideration will be treated as providing for fixed consideration if it would satisfy the rules for fixed consideration without the contingent adjustment provision.ⁿ³⁶ A contract will not be treated as providing for fixed consideration if the contract provides for contingent adjustments to the consideration that prevent (to any extent) the target corporation shareholders from being subject to the economic benefits and burdens of ownership of the issuing corporation stock after the last business day before the first date the contract is a binding contract.ⁿ³⁷

The following will not prevent a contract from being treated as a contract for a fixed consideration: (1) placing part of the consideration to be exchanged for proprietary interests in the target corporation in escrow to secure target's performance of customary pre-closing covenants or customary target representations or warranties;ⁿ³⁸ (2) the presence of a customary anti-dilution clause;ⁿ³⁹ (3) the possibility that some shareholders may exercise dissenters' rights and receive consideration other than that provided in the binding contract;ⁿ⁴⁰ and (4) the fact that money may be paid in lieu of issuing fractional shares.ⁿ⁴¹

For purposes of the continuity of interest requirement regulations, two corporations are related persons if either of the corporations are members of the same affiliated group under *IRC Section 1504* (without regard to the exceptions in *IRC Section 1504(b)*), or a purchase of stock by one corporation by another corporation would be treated as a redemption of the stock of the first corporation under *IRC Section 304(a)(2)* (acquisition by a subsidiary of its parent's stock).ⁿ⁴² Each partner of a partnership will be treated as owning or acquiring any stock owned or acquired by the partnership, and as having furnished its share of any consideration furnished by the partnership to acquire the stock in accordance with that partner's interest in the partnership.ⁿ⁴³

[3] Statutory Development of the Continuity of Interest Requirement.

Two of the transactions defined as reorganizations by *IRC section 368(a)(1)* automatically give the taxpayer a proprietary interest in the transferee corporation. The type "B" reorganization--the acquisition of a controlling voting stock interest--cannot be effected unless the entire consideration for the transfer is voting stock.ⁿ¹

The transaction involving the acquisition of more than 80 percent of the outstanding shares of Hartford Fire Insurance Company stock by ITT in exchange for ITT voting stock presented a unique question to the courts. The problem in the transaction was that ITT purchased some Hartford shares shortly before the transaction.ⁿ² The Tax Court held that the acquisition qualified as a "B" reorganization.ⁿ³ In so doing, the court distinguished those cases in which the 80-percent requirement could not be met without taking the cash purchases into account and those in which there was a single acquisition for stock and impermissible consideration.

The Third Circuit reversed, rejecting, *inter alia*, the taxpayers' argument that the voting stock and control requirements are interrelated so that an acquisition of control of the target corporation qualifies as a "B" reorganization.ⁿ⁴ After petitions for certiorari were filed, the Service announced that it had reached a settlement with ITT under which the corporation agreed to pay \$18.5 million to the government in exchange for its promise not to pursue tax claims against former Hartford shareholders who had treated the stock-for-stock exchange as nontaxable.ⁿ⁵

The type "C" reorganization, the acquisition of another corporation's assets, also requires the bulk of the consideration to be in the form of voting stock, but here the statute permits the acquiring corporation to assume liabilities of the transferor corporation,ⁿ⁶ and even to give the transferor a limited amount of non-stock consideration.ⁿ⁷

The solely for voting requirement is not violated if, as part of the plan of reorganization but separate from the exchange of stock, the acquiring corporation contributes cash to the acquired corporation so it can discharge a bona fide debt of the corporation that was guaranteed by an exchanging shareholder.ⁿ⁸ It is also not violated if the acquiring corporation assumes valid reorganization expenses of the acquired corporation or its shareholders.ⁿ⁹

By insuring continuity of interest in the case of "B" and "C" reorganizations, the judicially developed concept of continuity is important only if the transaction is an "A" reorganization (a statutory merger or consolidation), "D" reorganization (a transfer of assets to a corporation controlled by the transferor or its shareholders), an "F" reorganization (a mere change in identity, form, or place of organization),ⁿ¹⁰ or a "G" reorganization (a transfer of assets in a bankruptcy proceeding).ⁿ¹¹

[4] The Problem of Remote Continuity of Interest.

[a] Judicial Development. Suppose that one corporation transfers assets to another and receives in exchange therefor the stock of a corporation that controls the transferee. Under case law developed before 1954,ⁿ¹ the receipt of stock of a corporation other than the acquiring corporation would not give the transferor the necessary proprietary interest in the transferee corporation. Remote continuity is now permitted by statute, but it should be noted that the effective dates of the provisions allowing the use of the stock of a corporation other than the transferee are different for "A," "B," "C", and "G" reorganizations.

[b] Statutory Relief.

[i] Type "A" Reorganization. A merger will qualify as an "A" reorganization if the shareholders of the merged corporation receive stock in either the acquiring corporation or a corporation that is in control of the acquiring corporation.ⁿ² The use of the stock of one corporation precludes the use of the stock of the other; split consideration is not permitted.ⁿ³

One further prerequisite to the use of the stock of the controlling corporation in an "A" reorganization requires that a

merger of the old corporation into the controlling corporation also have qualified as an "A" reorganization.ⁿ⁴ Thus, since a merger will be an "A" reorganization only if "effected pursuant to the corporation laws of the United States or a State or Territory or the District of Columbia,"ⁿ⁵ it would appear that the Code prohibits the use of the parent corporation's stock if it is a foreign corporation, or if the triangular merger cannot be achieved under state law. However, the Regulations provide that

"The ... test of whether the transaction would have qualified under section 368(a)(1)(A) if the merger had been into the controlling corporation means that the general requirements of a reorganization under section 368(a)(1)(A) (such as a business purpose, continuity of business enterprise, and continuity of interest) must be met in addition to the special requirements of section 368(a)(2)(D). Under the test, it is not relevant whether the merger into the controlling corporation could have been effected pursuant to State or Federal corporation law."ⁿ⁶

Under Section 368(a)(2)(E), the stock of a parent corporation can also be used when the merger is of a subsidiary into an unrelated corporation that survives the merger, if:

- (1) after the merger, the surviving corporation holds substantially all of its properties (other than the voting stock of the parent corporation received on the merger) and substantially all of the subsidiary's property; and
- (2) the shareholders of the surviving corporation receive voting stock of the parent in exchange for the parent's acquisition of 80 percent control of the survivor.ⁿ⁷

Consideration other than voting stock can be used to acquire stock of the surviving corporation in excess of the amount necessary to give the parent control of the surviving corporation.

[ii] Type "B" and "C" Reorganizations. The consideration given by the acquiring corporation in a "B" or "C" reorganization can likewise consist of the stock of the acquiring corporation or of the stock of a corporation that is in control of the acquiring corporation.ⁿ⁸ Split consideration (the use of stock in both corporations in the same transaction) is never permitted in a "B" reorganization, and the Regulations set forth an identical rule for "C" reorganizations.ⁿ⁹ Nevertheless, there is no valid reason for a complete prohibition against the use of the stock of both the acquiring corporation and the controlling corporation in a "C" reorganization. Nonstock consideration is allowed in a "C" reorganization to the extent of 20 percent of the value of the property owned by the transferor corporation. Since the Code does not specify the form which such consideration must take, presumably it could consist of the stock of another corporation. If this is so, then the Regulations would be limited in application to instances in which neither the stock of the acquiring corporation nor the stock of the controlling corporation has a value equal to at least 80 percent of the value of the property of the transferor corporation.

[iii] Type "G" Reorganization. The use of stock of a corporation controlling the acquiring corporation in a "G" reorganization (a transfer by a corporation of all or part of its assets in a case under title 11 of the United States Code or a receivership, foreclosure, or similar proceeding in a federal or state court)ⁿ¹⁰ is sanctioned by *IRC Section 368(a)(2)(D)*. As in the case of a statutory merger, stock of the acquiring corporation cannot be used in the transaction.

A "G" reorganization also can take the form of a "reverse merger" of the insolvent corporation. The requirements in such case are that no former shareholder of the surviving corporation receives any consideration for his stock and that former creditors of the surviving corporation exchange their claims for voting stock of the controlling corporation having a value equal to at least 80 percent of the value of the debt of the surviving corporation.ⁿ¹¹

[c] Regulatory Relief.

The step transaction doctrine permits the IRS to attempt to collapse a multi-step transaction into fewer steps in order to

recharacterize the tax treatment of the transaction. Since corporate reorganizations involve businesses with ongoing business activity, it is, in theory, possible for any post-reorganization transfer to be lumped back in with the original reorganization in order for the IRS to challenge the tax-free qualification of the reorganization. *Treasury Regulation Section 1.368-2(k)*ⁿ¹² creates safe harbors for certain transfers of assets or stock following a reorganization. The failure of a transfer to meet this safe harbor will not cause the transfer to disqualify the original reorganization, however it does mean that the transfer may still be scrutinized under the step transaction rule. Essentially this regulation permits stock and assets acquired in a reorganization to be further transferred within a qualified group as defined in *Treasury Regulation Section 1.368-1(d)(4)(ii)*, provided that the corporation does not, with the transfer, cease to be a member of the qualified group, or terminate its existence for federal income tax purposes.

[5] Scope of the Continuity of Business Enterprise Requirement.

The continuity of business enterprise requirement will be satisfied if the issuing corporation continues the target corporation's historic business.ⁿ¹ The fact that the acquiring corporation is in the same line of business as the acquired corporation tends to establish the requisite continuity, but alone, is insufficient.ⁿ²

A corporation's historic business is the business it has conducted most recently.ⁿ³ However, a business entered into as part of a plan of reorganization does not qualify as such.ⁿ⁴ If the acquired corporation has more than one line of business, continuity of business enterprise requires only that the acquiring corporation continue a significant line of business.ⁿ⁵

Continuity of business enterprise will also result from the use by the issuing corporation of a significant portion of the target corporation's historic assets in a business.ⁿ⁶ A corporation's historic business assets are those used in its historic business, and may include stock and securities, and intangible assets such as goodwill and trademarks whether or not they have a tax basis.ⁿ⁷ Generally, the determination of the portion of a corporation's assets considered significant is based on the relative importance of the assets to the operation of the business.ⁿ⁸ However, all of the facts and circumstances, such as the net fair market value of those assets, will be considered.

The following rules apply in determining whether the continuity of business requirement is satisfied:

- (1) The issuing corporation is treated as holding all of the businesses held by all of the members of a qualified group.ⁿ⁹ For this purpose, a qualified group consists of one or more chains of corporations connected through stock ownership with the issuing corporation, but only if (a) the issuing corporation owns directly at least 80 percent of the voting stock and at least 80 percent of the total number of shares of all other classes of stock of one other corporation, and (b) at least 80 percent of the voting stock and at least 80 percent of all other classes of stock in each of the other corporations (except the issuing corporation) is owned directly or indirectly by one or more of the other corporations.ⁿ¹⁰
- (2) Each partner of a partnership will be treated as owning the target corporation's business assets used in a business of the partnership in accordance with that partner's interest in the partnership.ⁿ¹¹
- (3) The issuing corporation will be treated as conducting a business of a partnership if members of a qualified group, in the aggregate, own an interest in the partnership representing a significant interest in the partnership, or one or more members of the qualified group have active and substantial management functions as a partner with respect to that partnership business.ⁿ¹²
- (4) If a significant historic target corporation business is conducted in a partnership, the fact that the issuing corporation is conducting that business as described in the preceding paragraph tends to establish the requisite continuity, but is not sufficient by itself.ⁿ¹³

Revenue Ruling 87-76,¹⁴ sheds further light on the Service's position with respect to the nature of a corporation's historic business. The acquired corporation in the ruling was engaged in the investment business, and, from its inception, maintained one-third of its investment portfolio in growth stocks, one-third in income stocks, and one-third in corporate bonds. The corporation was acquired in a "C" reorganization by an investment company whose portfolio consisted of high-grade municipal bonds. Pursuant to the plan of reorganization, the acquired corporation was required to sell its entire portfolio of stocks and bonds prior to the reorganization, and to invest the proceeds in municipal bonds. Although both corporations were in the investment business, the Service took the position that the acquired corporation's historic business of investing in stocks and bonds was not the same line of business as investing in municipal bonds. Moreover, since the investment in municipal bonds was made in contemplation of the reorganization, the investment could not be considered the acquired corporation's historic business.

(n12)Footnote 10. *469 US 131 (1985)*. The decision resolved a conflict in the circuits. Compare *West Side Fed Sav & Loan Assn v US*, *494 F2d 404 (6th Cir 1974)* and *Home Sav & Loan Assn v US*, *514 F2d 1199 (9th Cir 1975)*, cert denied *423 US 1015*.

(n13)Footnote 11. A situation similar to *Paulsen* was presented in *Estate of Silverman v Commr*, *98 TC 54 (1992)*. Although the transaction could not qualify as a tax-free reorganization, the taxpayer was able to treat six-year certificates of deposit issued by the acquiring bank as evidence of indebtedness of the acquirer and, thus, could defer gain until payment under the installment sale rules.

(n14)Footnote 12. A transfer from one wholly owned subsidiary to another qualified as a reorganization even though no stock was received either by the transferor or by the parent corporation. Since the parent already owned all of the stock of the acquiring corporation, the issuance of additional shares would have been a meaningless gesture. *Rev Rul 75-383, 1975-2 CB 127*. A similar result was reached in *Rev Rul 70-240, 1970-1 CB 81*, where the same individual was the sole shareholder of both parties to the reorganization.

(n15)Footnote 13. 296 US 378 (1935) .

(n16)Footnote 14. 189 F2d 332 (5th Cir 1951) , cert denied 342 US 860 .

(n17)Footnote 15. See *Temp Treas Reg § 1.368-1(e)(2)*, discussed below at fns 31-39 and accompanying text, and the Examples at *TempTreas Reg § 1.368-1(e)(2)(v)*. The 40 percent minimum, which replaces a 50 percent standard followed by the Service for many years, see, eg, *Rev Rul 66-224, 1966-2 CB 114* , has been followed in recent IRS private rulings. See, eg, *PLR 200930025*, (April 22, 2009) . Although *Temp Treas Reg § 1.368-1(e)(2)* expired on March 19, 2010, the Internal Revenue Service has announced that, until final regulations are issued on the subject, taxpayers may continue to rely on the provisions of the Temporary Regulations so long as all relevant parties adopt positions consistent with those provisions. See Notice 2010-25, 2010-14 IRB 527 ; fn 40, *infra*.

(n18)Footnote 16. In *John A Nelson Co v Helvering*, 296 US 374 (1935) , the value of the stock received equaled about 38 percent of the value of the assets transferred to the acquiring corporation.

(n19)Footnote 17. *Comm'r v Palm Springs Holding Corp*, 119 F2d 846 (9th Cir 1941) ; *Helvering v New President Corporation*, 122 F2d 92 (8th Cir 1941) .

(n20)Footnote 18. 315 US 179 (1942) .

(n21)Footnote 19. *Treas Reg § 1.368-1(e)(6)*, added by *TD 9434* , 73 *Fed Reg* 75566 (Dec 12, 2008) .

(n22)Footnote 20. See *Norman Scott, Inc v Commr*, 48 TC 598 (1967) which upheld, as a tax-free type "A" reorganization, a statutory merger involving insolvent corporations.)

(n23)Footnote 21. *Treas Reg § 1.368-1(e)(6)(i)*. The preamble to *TD 9434* , justifies the expansion of the application of the G reorganization rules to reorganizations of insolvent corporations outside of bankruptcy as "consistent with Congress' intent to facilitate the rehabilitation of troubled corporations." *TD 9434* , 73 *Fed Reg* at 75566. When Congress, in the Bankruptcy Tax Act of 1980 (Pub L 96-589), added G reorganizations to the list of transactions that qualify as a "reorganization," it made clear that such reorganizations were expected to meet the same continuity of interest requirement that applies to other reorganizations. See S Rep No 96-1035, 96th Cong, 2d Sess 10 (1980); HR Rep No 833, 96th Cong 2d Sess 8 (1980).

(n24)Footnote 22. See *IRC § 368(a)(2)(D)*.

(n25)Footnote 23. Senior creditors means the most senior class of creditors that receives stock in exchange for its claims, as well as any other class of creditors of equal seniority.

(n26)Footnote 24. If some senior creditors receive a higher proportion of their consideration in the form of cash or other property than others in the same class, a portion of the nonstock consideration received by such senior creditors will be taken into account in the continuity of interest test. See *Treas Reg § 1.368-1(e)(8)*, Ex 10 (ii).

(n27)Footnote 25. *Treas Reg § 1.368-1(e)(6)(ii)*.

(n28)Footnote 26. *TD 9434* . If only one class of creditors of the target corporation receives stock in the acquiring corporation pursuant to the terms of the reorganization, their stock is counted for purposes of measuring continuity of interest provided that the stock issued by the acquiring corporation is not de minimis in relation to the total consideration received by the insolvent target corporation, its shareholders, and its creditors. *Treas Reg § 1.368-1(e)(6)(ii)*.

(n29)Footnote 27. *Treas Reg § 1.368-1(e)(8)*, Ex 10. Note that had the nonstock consideration received by the senior creditors not been excluded from the continuity of interest comparison, the portion of the total consideration received by T Corp's creditors represented by A Corp stock would have been less than 37 percent, not enough to meet

the Internal Revenue Service's usual minimum standard for continuity of interest. See Rev Proc 77-37, 1977-2 CB 568 .

(n30)Footnote 28. Compare *McDonald's Restaurants of Illinois v Commr*, 688 F2d 520 (7th Cir 1982) and *Heintz v Commr*, 25 TC 132 (1955) , *nonacq* 1958-2 CB 9 , with *Est of Christian v Commr*, TC Memo 1989-413 , and *Penrod v Commr*, 88 TC 1415 (1987) .

Faber, "Postreorganization Sales and Continuity of Interest," 68 *Tax Notes* 863 (1995).

Satisfaction of the continuity of interest test is not affected by a partnership's distribution of stock received in a reorganization to its partners in accordance with their interests in the partnership. *Rev Rul* 95-69, 1995-2 CB 38 .

An open market repurchase by the acquiring corporation of shares issued in a merger was held to have no effect on continuity of interest in *Rev Rul* 99-58, 1999-2 CB 701 .

(n31)Footnote 29. *Treas Reg* § 1.368-1(e)(1)(i).

(n32)Footnote 30. For purposes of the continuity of interest regulations, any reference to the issuing corporation or the target corporation includes a reference to a successor or predecessor of such corporation, except that the target corporation is not treated as a predecessor of the issuing corporation and the issuing corporation is not treated as a successor of the target corporation. *Treas Reg* § 1.368-1(e)(5).

A proprietary interest in the acquired corporation (other than one held by the acquiring corporation) is not preserved to the extent that consideration received prior to a potential reorganization, either in a redemption of the acquired corporation stock or in a disposition with respect to the acquired corporation stock, is treated as other property or money received in the exchange for purposes of *IRC* § 356, or would be so treated if the shareholder of the acquired corporation also had received stock of the issuing corporation in exchange for stock owned by the shareholder in the acquired corporation. *Treas Reg* § 1.368-1(e)(1)(ii).

(n33)Footnote 31. *Treas Reg* § 1.368-1(e)(3)(i).

(n34)Footnote 32. *Temp Treas Reg* § 1.368-1T(e)(2)(i). A binding contract is an instrument enforceable under applicable law against the parties to the instrument. The presence of a condition outside the control of the parties, such as regulatory agency approval, will not prevent an instrument from being a binding contract. The fact that insubstantial terms remain to be negotiated, or that customary conditions remain to be satisfied, will not prevent an instrument from being a binding contract. *Temp Treas Reg* § 1.368-1T(e)(2)(ii)(A).

Any class of stock, securities, or indebtedness that the issuing corporation issues to the target corporation shareholders pursuant to the potential reorganization and that does not exist before the first date there is a binding contract to effect the potential reorganization is deemed to have been issued before the last business day before the first date there is a binding contract. *Temp Treas Reg* § 1.368-1T(e)(2)(iv).

(n35)Footnote 33. *Temp Treas Reg* § 1.368-1T(e)(2)(ii)(B)(1). A modification of a term that relates to the amount or type of consideration the target shareholders will receive in a transaction that would have resulted in the preservation of a substantial part of the target shareholders' proprietary interests in the target corporation if there had been no modification will not be treated as a modification if (i) the modification has the sole effect of providing for the issuance of additional shares of issuing corporation stock to the target corporation shareholders, (ii) the modification has the sole effect of decreasing the amount of money or other property to be delivered to the target corporation shareholders, or (iii) the modification has the effect of decreasing the amount of money or other property to be delivered to the target corporation shareholders and providing for the issuance of additional shares of issuing corporation stock to the target corporation shareholders. *Temp Treas Reg* § 1.368-1T(e)(2)(ii)(B)(2).

A modification of a term that does not preserve the target corporation shareholders' proprietary interest will not be treated as a modification if (i) the modification has the sole effect of providing for the issuance of fewer shares of issuing corporation stock to the target corporation shareholders, (ii) the modification has the sole effect of increasing the amount of money or other property to be delivered to the target corporation shareholders, or (iii) the modification has the effect of increasing the amount of money to be delivered to the target corporation shareholders and providing for the issuance of fewer shares of issuing corporation stock to the target corporation shareholders. *Temp Treas Reg* § 1.368-1T(e)(2)(ii)(b)(3).

A tender offer that is subject to § 14(d) of the Securities and Exchange Act of 1934 and is not pursuant to a binding contract, is treated as a binding contract made on the date of its announcement, notwithstanding that it may be modified by the offeror. *Temp Treas Reg* § 1.368-1T(e)(2)(ii)(C).

(n36)Footnote 34. *Temp Treas Reg* § 1.368-1T(e)(2)(iii)(A).

(n37)Footnote 35. Id.

(n38)Footnote 36. *Temp Treas Reg* § 1.368-1T(e)(2)(iii)(B)(1).

(n39)Footnote 37. *Temp Treas Reg* § 1.368-1T(e)(2)(iii)(B)(2). For example, a contract will not provide for a fixed consideration if there are contingent adjustments to the consideration if the value of the stock or assets of the issuing corporation increase or decrease after the last business day before the first date there is a binding contract, or if there are contingent adjustment to the number of shares of issuing corporation stock to be provided to target corporation shareholders using a value of issuing corporation shares after the last business day before the first date there is a binding contract.

(n40)Footnote 38. *Temp Treas Reg* § 1.368-1T(e)(2)(iii)(C).

(n41)Footnote 39. *Temp Treas Reg* § 1.368-1T(e)(2)(iii)(D). The absence of an anti-dilution clause will prevent a contract from being treated as providing for fixed consideration if the issuing corporation alters its capital structure between the first date there is a binding contract and the effective date of the potential reorganization in a manner that materially alters the economic arrangement of the parties to the contract.

(n42)Footnote 40. *Temp Treas Reg* § 1.368-1T(e)(2)(iii)(E).

(n43)Footnote 41. *Temp Treas Reg* § 1.368-1T(e)(2)(iii)(F).

Temp Treas Reg § 1.368-1T(e)(2), cited in footnotes 31-40 above, expired on March 19, 2010, three years after issuance, pursuant to *IRC* § 7805(e)(2). However, in *Notice 2010-25*, 2010-14 *IRB* 527, the IRS announced that taxpayers may continue to rely on the rules set forth in *Temp Treas Reg* § 1.368-1T(e)(2) after the expiration of the temporary regulations and prior to the issuance of new regulations, provided that such rules are consistently applied by the target corporation, the issuing corporation, the controlling corporation of the acquiring corporation (if its stock is provided as consideration in the transaction) and any direct or indirect transferee of transferred basis property from any of the foregoing.

(n44)Footnote 42. *Treas Reg* § 1.368-1(e)(4)(i). The following rules apply for purposes of *Treas Reg* § 1.368-1(e)(4):

(1) A corporation will be treated as related to another corporation if such relationship exists immediately before or immediately after the acquisition of the stock involved.

(2) A corporation, other than the target corporation, or a person related to the target corporation, will be treated as related to the issuing corporation if the relationship is created in connection with the potential

reorganization. *Treas Reg* § 1.368-1(e)(4)(ii).

(n45)Footnote 43. *Treas Reg* § 1.368-1(e)(5).

(n46)Footnote 1. *IRC* § 368(a)(1)(B). Preferred stock allowed to vote only if there are arrearages in dividends should not be considered voting stock unless dividends are in arrears at the time of the exchange. Cf *Rev Rul* 66-339, 1966-2 CB 274 . In *Forrest Hotel Corp v Fly*, 112 F Supp 782 (SD Miss 1953) , common stock which was prevented from voting because dividends on preferred were in arrears held to be voting stock, as was the preferred which was permitted to vote because of the existence of such arrearages.

The Supreme Court, giving full content to the phrase "solely for ... voting stock" has held warrants to purchase additional shares not to be voting stock. *Helvering v Southwest Consol Corp*, 315 US 194 (1942) ; see also *Gordon v Commr*, 424 F2d 378 (2d Cir) , *cert denied* 400 US 848 ; *Rev Rul* 70-108, 1970-1 CB 78 . However, the Service has ruled that contingent stock arrangements will not defeat a "B" reorganization as long as the contingent right is not embodied in a negotiable instrument. *Rev Rul* 75-456, 1975-2 CB 128 ; *Rev Rul* 75-237, 1975-1 CB 116 ; *Rev Rul* 67-90, 1967-1 CB 79 ; *Rev Rul* 66-112, 1966-1 CB 68 ; see also *Hamrick v Commr*, 43 TC 21 (1964) , *acq in result Rev Rul* 66-112 (contingent right stock for purposes of *IRC* § 351). The Service will issue favorable rulings on contingent stock transactions provided certain conditions are satisfied. See § 8.03[1], *infra*.

Contingent stock payments may be subject to the imputed interest rules of *IRC* § 483. See Ch 2 for the method of determining the portion of a contingent stock payment representing unstated interest.

Furthermore, the payment of cash in lieu of fractional shares will not disqualify the transaction if the payment is made for the purpose of rounding off fractions and is not a separately bargained-for consideration. *Mills v Commr*, 331 F2d 321 (5th Cir 1964) ; *Rev Rul* 74-36, 1974-1 CB 85 ; *Rev Rul* 66-365, 1966-2 CB 116 . The payment will not give rise to a taxable stock dividend under *IRC* § 305(b)(2). *Treas Reg* § 1.305-3(c). See § 4.06[2][a], *supra*.

(n47)Footnote 2. The Service had issued a private letter ruling advising that the transaction would be a "B" reorganization if ITT unconditionally divested itself of the purchased shares. Later, the Service, alleging misrepresentations in the application for the ruling, revoked it. The Service has taken the position in a published ruling that an unconditional sale of stock to an unrelated third party prior to the exchange offer will permit the transaction to qualify as a "B" reorganization. *Rev Rul* 72-354, 1972-2 CB 216 .

(n48)Footnote 3. *Reeves v Commr*, 71 TC 727 (1979) . The same conclusion was reached in *Pierson v US*, 472 F Supp 957 (D Del 1979) .

(n49)Footnote 4. *Heverly v Commr*, 621 F2d 1227 (3d Cir 1980) . The appeal from the district court in *Pierson v US*, 472 F Supp 957 (D Del 1979) , was consolidated with an appeal from the Tax Court in one of the cases that had been heard with *Reeves v Commr*, 71 TC 727 (1979) . The First Circuit also reversed the Tax Court in *Chapman v Commr*, 618 F2d 856 (1st Cir 1980) .

(n50)Footnote 5. The petitions for certiorari were dismissed. 451 US 1012 .

(n51)Footnote 6. *IRC* § 368(a)(1)(C). The assumption of too many liabilities may so alter the character of the transaction as to place it outside the purposes and assumptions of the reorganization provisions. *Treas Reg* § 1.368-2(d)(1).

For transactions occurring after Dec 31, 1999, prior ownership of stock of the acquired corporation by the acquiring corporation will not by itself prevent the solely for voting stock requirement from being satisfied. *Treas Reg* § 1.368-2(d)(4)(i).

(n52)Footnote 7. *IRC § 368(a)(2)(B)*. The consideration other than voting stock cannot exceed 20 percent of the value of all property owned by the transferor corporation. While the assumption of liabilities will not be deemed "other consideration" if only voting stock is exchanged for property, it will so count if the transferee corporation acquires some of the transferor's property for a consideration other than voting stock.

If the acquiring corporation owned stock of the acquired corporation prior to the transaction, the sum of money or other property distributed to the acquired corporation's shareholders, other than the acquiring corporation and the acquired corporation's creditors, plus the acquired corporation's liabilities assumed by the acquiring corporation, cannot exceed 20 percent of the value of all the acquired corporation's properties. *Treas Reg § 1.368-2(d)(4)(i)*.

(n53)Footnote 8. *Rev Rul 79-89, 1979-1 CB 152* . A different result was reached in *Rev Rul 79-4, 1979-1 CB 150* , where the guaranteed loan was treated as the debt of the shareholder.

(n54)Footnote 9. *Rev Rul 73-54, 1973-1 CB 187* . The payment or assumption of expenses that are not solely and directly related to the reorganization, the transfer of property of the target corporation for stock of the acquiring corporation, or the exchange of equity interests, will constitute additional consideration.

(n55)Footnote 10. Taxpayers have often attempted to characterize transactions of "F" reorganizations in order to make better use of carryovers from the acquired entity. See, eg, *Security Indus Ins Co v US, 702 F2d 1234 (5th Cir 1983)* .

(n56)Footnote 11. The Service once contended that the continuity of interest requirement was applicable to recapitalizations. It no longer does so. *Treas Reg § 1.368-1(b)*.

(n57)Footnote 1. *Groman v Commr, 302 US 82 (1937)* ; see also *Helvering v Bashford, 302 US 454 (1937)* .

Groman was applied to deny reorganization status to the transaction in *Calcote v US 327 F Supp 363 (DNJ 1971)* . In that case, the taxpayers were shareholders in corporation X as well as minority shareholders in corporation Y; corporation X owned 80 percent of the Y stock. In a two-step transaction, the taxpayers exchanged their Y shares for additional X shares and then exchanged their X shares for stock in corporation A. Since both steps formed an integral part of the transaction, they had to be viewed as constituting the acquisition of the stock of one corporation by another in exchange for the stock of the acquiring corporation's parent; this could not be treated as a "B" reorganization in the year involved.

(n58)Footnote 2. *IRC § 368(a)(2)(D)*. See generally Ferguson & Ginsburg, "Triangular Reorganizations," *28 Tax L Rev 159 (1973)*; Freling, "Three-Party Reorganizations," *22 Tul Tax Inst 179 (1973)*.

IRC § 368(a)(2)(D) can apply when the parent corporation merges into one of two subsidiaries created for purposes of the transaction. *Rev Rul 77-428, 1977-2 CB 118* .

One corporation is in control of another if it owns 80 percent of all classes of stock entitled to vote and 80 percent of the total number of shares of all classes of stock of the corporation. *IRC § 368(c)*. This provision has been construed as requiring the ownership of 80 percent of *each* class of stock of the corporation. *Rev Rul 59-259, 1959-2 CB 115* .

The Service has ruled that a state law merger will not qualify as a Type "A" reorganization if the merger does not result in one corporation acquiring the assets of a target corporation and the target corporation ceasing to exist. *Rev Rul 2000-5, 2000-1 CB 436* .

(n59)Footnote 3. *IRC § 368(a)(2)(D)*.

(n60)Footnote 4. *IRC § 368(a)(2)(D)*.

(n61)Footnote 5. *Treas Reg § 1.368-2(b)*.

(n62)Footnote 6. *Treas Reg § 1.368-2(b)(2)*.

(n63)Footnote 7. A merger failed to qualify under *IRC § 368(a)(2)(E)* when only 2 percent of the total consideration received by the shareholders of the surviving corporation consisted of voting stock of the parent corporation. The continuity of interest requirement was not satisfied. *Rev Rul 73-427, 1973-2 CB 301*.

The fact that the shareholders of the target corporation made a firm commitment underwriting of some of the shares of the parent corporation received by them a precondition to the merger, did not prevent a holding that the voting stock was used to acquire control in *Ltr Rul 8702003*.

Flyer, "An Analysis of the New A Reorganization: Its Operation And Planning Potential," *35 J Tax'n 30 (1971)*.

(n64)Footnote 8. *IRC § 368(a)(1)(B), (C)*. *Rev Rul 74-564, 1974-2 CB 124*, and *Rev Rul 74-565, 1974-2 CB 125*, illustrate complicated maneuvers involving mergers that could not qualify as "A" reorganizations, but did constitute "B" reorganizations. In each case, a corporation used voting stock of its parent to gain control of another corporation.

(n65)Footnote 9. *Treas Reg § 1.368-2(d)(1)*.

(n66)Footnote 10. *IRC § 368(a)(1)(G), (3)(A)*. The transfer must be made while the transferor corporation is under the jurisdiction of the court and must be pursuant to a plan of reorganization approved by the court. *IRC § 368(a)(3)(B)*. In addition, the stock or securities received from the acquiring corporation must be distributed in a transaction which qualifies under *IRC § 354, 355 or 356*. *IRC § 368(a)(1)(G)*.

(n67)Footnote 11. *IRC § 368(a)(3)(E)*.

(n68)Footnote 12. *TD 9396, 2008-22 IRB 1026*, effective May 9, 2008.

(n69)Footnote 1. *Treas Reg § 1.368-1(d)(1), (2)(i)*.

(n70)Footnote 2. *Treas Reg § 1.368-1(d)(2)(i)*.

(n71)Footnote 3. *Treas Reg § 1.368-1(d)(2)(iii)*. Investment activity can be a historic business for purposes of the continuity of business enterprise requirement. *Abegg v Commr, 50 TC 145 (1968)*, *aff'd 429 F2d 1209 (2d Cir 1970)*, *cert denied 400 US 1008*.

(n72)Footnote 4. *Treas Reg § 1.368-1(d)(2)(iii)*.

(n73)Footnote 5. *Treas Reg § 1.368-1(d)(2)(ii)*.

(n74)Footnote 6. *Treas Reg § 1.368-1(d)(1), (3)(i)*. The historic business assets of a merged corporation consisted of tax-exempt bonds and a municipal bond fund. These assets were distributed or disposed of within a short period of time following the merger. The Tax Court held that the continuity of business requirement was not met because the surviving corporation did not continue the merged corporation's historic business or use a significant portion of the merged corporation's historic assets in its business. *Honbarrier v Commr, 115 TC 300 (2000)*.

(n75)Footnote 7. *Treas Reg § 1.368-1(d)(3)(ii)*.

(n76)Footnote 8. *Treas Reg § 1.368-1(d)(3)(iii)*.

(n77)Footnote 9. *Treas Reg § 1.368-1(d)(4)(i)*.

(n78)Footnote 10. *Treas Reg § 1.368-1(d)(4)(ii)*. If members of the qualified group own interests in a partnership meeting requirements equivalent to *IRC § 368(c)* (a *§ 368(c)* controlled partnership), any stock owned by the *§ 368(c)* controlled partnership will be treated as members of the qualified group. Solely for purposes of determining whether a lower-tier partnership is a *§ 368(c)* controlled partnership, any interest in a lower-tier partnership that is owned by a *§ 368(c)* controlled partnership is treated as owned by members of the qualified group. *Treas Reg § 1.368-1(d)(4)(iii)(D)*.

(n79)Footnote 11. *Treas Reg § 1.368-1(d)(4)(iii)(A)*.

(n80)Footnote 12. *Treas Reg § 1.368-1(d)(4)(iii)(B)*.

(n81)Footnote 13. *Treas Reg § 1.368-1(d)(4)(iii)(C)*.

Taxation of Securities Transactions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.03

§ 8.03 Effect of Reorganizations on Shareholders and Holders of Securities

[1] Nonrecognition of Gain or Loss.

[a] General Rule. Under *IRC Section 354(a)(1)*, no gain or loss will be recognized if stock or securities in a corporation which is a party to the reorganization are exchanged solely for stock or securities in such corporation or in another corporation, also a party to the reorganization. The section is applicable solely to exchanges in pursuance of a reorganization as defined in the Code. Thus, if the transaction takes the form of a "B" reorganization, the only exchange sheltered from recognition is the one in which stock of the acquired corporation is surrendered and stock of the acquiring corporation received; a contemporaneous exchange of debentures between the acquiring corporation and security holders of the acquired corporation, since not a part of the definition of a "B" reorganization, will be subject to the general rule regarding recognition of gain or loss.ⁿ¹ Even where the exchange is part of a reorganization, some gain may be recognized if (1) the principal amount of securities received exceeds the principal amount of securities surrendered, (2) securities are received and none are surrendered,ⁿ² or (3) nonqualified preferred stock as defined in *IRC Section 351(g)(2)* is received in exchange for stock other than nonqualified preferred stock (as so defined),ⁿ³ although the only instance in which nonrecognition is wholly unavailable is the one in which only stock is surrendered and only securities are received.ⁿ⁴

The receipt of nonqualified preferred stock in a recapitalization of a family-owned corporation does not result in the recognition of gain.ⁿ⁵ For this purpose, a family-owned corporation is defined as any corporation if at least 50 percent of the stock (by vote and value) is owned by members of the same family for the eight-year period beginning five years before the recapitalization.ⁿ⁶ However, shares held by a family member are not treated as held by a family member to the extent a non-family member had a right, option, or agreement to acquire the shares (directly or indirectly), or with respect to which a family member has reduced risk or loss with respect to the share.ⁿ⁷

Ordinarily, a United States person recognizes gain under *IRC Section 367(a)* on the transfer of property in a reorganization exchange, unless an exception applies. One exception comes about on an exchange of stock or securities of a domestic or foreign corporation pursuant to an asset reorganization, unless the exchange is considered an indirect stock transfer under *Regulations Section 1.367(a)-3(d)*.ⁿ⁸

[b] Definitional Problems.

[i] Party to a Reorganization. One of the conditions of *IRC Section 354(a)* is that the exchange be of stock or

securities in a corporation which is "a party to a reorganization." The term "a party to a reorganization" is defined by the Code as including:

- (1) a corporation resulting from a reorganization;
- (2) both corporations, in the case of a reorganization resulting from the acquisition by one corporation of the stock or properties of another;
- (3) a corporation in control of the acquiring corporation in a "B," "C," or "G" reorganization, provided the controlling corporation's stock is the consideration for the acquisition;
- (4) a corporation controlling the surviving corporation in a statutory merger, provided the stock of the controlling corporation is used in the transaction and the transaction qualifies as an "A" reorganization by virtue of *IRC Section 368(a)(2)(D)* or *368(a)(2)(E)*; and
- (5) a corporation which acquires stock or property in an "A," "B," "C," or "G" reorganization and then transfers such assets or stock to a controlled subsidiary.ⁿ⁹

To illustrate:

Example:

If Corporation *A* is merged into Corporation *B*, both corporations will be parties to the reorganization. If Corporation *A* transfers substantially all of its assets to Corporation *B* in exchange for the voting stock of Corporation *C*, which controls Corporation *B*, all three corporations are parties to the reorganization. But if Corporation *A* transfers all of the stock of Corporation *B* to Corporation *C* in exchange solely for the voting stock of the latter corporation, only Corporation *B* and Corporation *C* would be parties to the reorganization; the fact that Corporation *A* takes part in the transaction does not make it a party to the reorganization.ⁿ¹⁰

If a transaction otherwise qualifies as a Type "B" reorganization or as a reverse triangular merger (see *Section 8.05A*), the target corporation in the Type "B" reorganization or the surviving corporation in the reverse triangular merger remains a party to the reorganization even though its stock or assets are transferred in a transaction described below.ⁿ¹¹ If a transaction otherwise qualifies as a forward triangular merger, a triangular Type "B" reorganization, a triangular Type "C" reorganization, or a reorganization in a bankruptcy proceeding, the acquiring corporation remains a party to the reorganization even though its stock is transferred in such a transaction.ⁿ¹²

A transfer qualifies under the preceding paragraph if it consists of one or more distributions to shareholders (including distributions that involve the assumption of liabilities), (1) the property distributed consists of (a) assets of the acquired corporation, the acquiring corporation, or the surviving corporation, as the case may be, or an interest in an entity received in exchange for such assets in a transfer described in the succeeding sentence; (b) stock of the acquired corporation provided the distributions of stock do not cause the acquired corporation to cease to be a qualified corporation, or (c) a combination thereof; and (2) the aggregate of such distributions does not consist of (a) an amount of assets of the acquired corporation, the acquiring corporation (disregarding assets held before the potential reorganization) or the surviving corporation (disregarding assets of the merged corporation), as the case may be, that would result in a liquidation of the corporation for federal income tax purposes, or (b) all of the stock of the acquired corporation that was acquired in the transaction.ⁿ¹³ A transfer of assets or stock (or a combination thereof) as set forth in the preceding sentence will qualify if the corporation involved does not terminate its corporate existence in connection with the transfers.ⁿ¹⁴

[ii] Stock or Securities. Suppose that as part of a statutory merger which meets the tests for an "A" reorganization,

a taxpayer exchanges stock in the merged corporation for stock and rights to acquire additional stock of the surviving corporation. For many years, the regulations provided that "for the purpose of section 354, stock rights or stock warrants are not included in the term 'stock or securities.'"n15 On the other hand, if the taxpayer received contingent rights to acquire additional stock, he was more likely to succeed in having such rights classified as stock. For example, in *Carlberg v. United States*,n16 the consideration received by shareholders of a merged corporation consisted of stock and "certificates of contingent interest," the latter representing stock which was set aside pending the determination of unresolved but potentially substantial liabilities. The Eighth Circuit found the contingent interest to be evidence of a stock interest and not "other property" as contended by the Government. The court deemed it significant that the "certificates of contingent interest" could produce nothing other than stock. A result similar to *Carlberg* was reached in *Hamrick v. Commissioner*,n17 where the contingent right to additional shares was embodied in a contract and not in a separate, transferable instrument as in *Carlberg*. The Service has acquiesced in the result in *Hamrick* in a ruling which held that a provision for a nonassignable contingent contract right to additional voting stock will not violate the "solely for voting stock requirement" of a "B" reorganization.n18

Regulations, effective March 9, 1998, now provide that, for purposes of *IRC Section 354*, the term "securities" includes rights issued by a party to the reorganization to acquire its stock.n19 However, *IRC Section 354* will not apply to any transaction in which the shareholder receives solely rights to acquire stock in a corporation a party to the reorganization.n20 (It is important to note that the imputed interest provisions of *IRC Section 483* will come into play if any of the shares acquired on the exercise of the rights are issued to the shareholders more than one year after the effective date of the reorganization.)n21

Suppose, however, that the plan of reorganization calls for bondholders to exchange their securities for short-term notes. The problem here is whether the notes constitute securities that may be received without recognition of gain or loss. Early cases, latching on to the statement in *Pinellas Ice & Cold Storage Co. v. Commissioner*,n22 that short-term notes "were not securities within the intendment of the [reorganization provisions]"n23--a statement meant to convey that such notes did not provide the holder with a continuing proprietary interest in the issuer--generally held notes maturing in less than five years after issuance not to be securities.n24 Later cases have abandoned time as a controlling criterion; a one-year note can be a security if an overall evaluation of the instrument leads to the conclusion that it has the characteristics of a security.n25

When a distribution of stock or securities to shareholders is statutorily required to qualify a transaction as a non-divisive "D" reorganization, but because of an identity (or near identity) of ownership of the corporate parties to the reorganization such a distribution would be a "meaningless gesture" that would not change the substance of the transaction, the regulations supply a "deemed" distribution where an actual distribution is lacking.n26 In a typical case contemplated by the regulations, T, a corporation wholly owned by shareholder A, sells all of its assets to S, also wholly owned by A, for \$100x of cash, after which T liquidates.n27 Such a transaction would qualify as a reorganization under *IRC Section 368(a)(1)(D)* if S issued even a single share of stock to T which T distributed to A.n28 However, even if S does not issue its stock in the transaction, and T has no S stock to distribute to A, S will be deemed to have issued a share of its stock to T as consideration for T's assets,n29 and that share will be deemed distributed to T's shareholder A.n30

[c] Receipt of Other Property--"Boot."

[i] Extent of Recognition. Although *IRC Section 354* seemingly grants nonrecognition only when stock or securities are exchanged *solely* for other stock or securities, the receipt of other property ("boot") will not be a complete bar to nonrecognition, provided the exchange would have fit within *IRC Section 354* but for the receipt of the other property.n31 By virtue of *IRC Section 356(a)(1)*, the taxpayer's recognized gain cannot exceed the amount of "boot." Thus, gain will be recognized in full only when the amount of other property received equals or exceeds the realized gain. On the other hand, any loss realized on the exchange will not be recognized no matter how much "boot" the taxpayer receives.n32

For purposes of computing any recognized gain, to the extent the terms of the exchange specify the other property or money that is received in exchange for a particular share of stock or security surrendered or a particular class of stock or securities surrendered, those terms control provided that they are economically reasonable.ⁿ³³ If there is no such specification, a pro rata portion of the other property and money received is treated as received in exchange for each share of stock and security surrendered, based on the fair market value of each surrendered share or security.ⁿ³⁴

Nonqualified preferred stock (as defined in *IRC Section 351(g)(2)*) received in a reorganization will be treated as other property except to the extent that, under *IRC Section 354*, it can be received without the recognition of gain.ⁿ³⁵

IRC § 357(c)(1), discussed in § 3.02[2][a][ii], requires recognition of gain whenever the sum of liabilities assumed by a transferee corporation in a Type "D" reorganization exceeds the total of the adjusted bases of the assets transferred pursuant to the corporation if, following the transfer, the corporation distributes its stock or securities in a tax-free divisive reorganization.ⁿ³⁶

[ii] Character of the Recognized Gain. Since the gain required to be recognized by *IRC Section 356(a)* results from an exchange of property, it would appear that such gain should be capital gain provided the stock or securities exchanged by the taxpayer constituted a capital asset in his hands. However, *IRC Section 356(a)(2)* requires that the taxpayer treat the recognized gain as a dividend to the extent of his ratable share of the corporation's accumulated earnings and profits whenever the exchange "has the effect of the distribution of a dividend."ⁿ³⁷

Because dividend income under *IRC Section 356(a)(2)* is keyed to the amount of gain recognized under *IRC Section 356(a)(1)*, which, in turn, is keyed to the amount of gain realized and the amount of "boot," the taxpayer's dividend income can never exceed the amount of other property received by him on the exchange; it can be less.

Example:

If the taxpayer receives other property of \$2,000 in an exchange in which he realizes \$4,000 of gain, and if at the time of the exchange his ratable share of post-1913 earnings and profits is \$3,000, he will have \$2,000 of dividend income (if *IRC Section 356(a)(2)* is applicable) and \$2,000 of unrecognized gain. If the taxpayer's ratable share of accumulated earnings and profits amounted to \$1,000, he would have dividend income of only \$1,000; the balance of his recognized gain would be capital gain.

When does a reorganization exchange have the effect of a distribution of a dividend? Early regulations gave the impression that dividend consequences automatically ensued whenever the corporation had accumulated earnings and profits.ⁿ³⁸ The position taken by the Regulations stemmed from the opinion in *Commissioner v. Estate of Bedford*.ⁿ³⁹ A case involving the exchange of shares of cumulative preferred stock for shares of new preferred, shares of common, and cash. Since the cash represented payment of dividend arrearages on the surrendered preferred, the distribution took on the characteristic of a dividend, and the case so held. However, because of certain language in the opinion--"that a distribution, pursuant to a reorganization, of earnings and profits has the effect of a distribution of a taxable dividend" within [the predecessor of *IRC Section 356(a)(2)*]"ⁿ⁴⁰--language that went further than was necessary for the decision in *Bedford*, it was commonly assumed that any gain recognized under *IRC Section 356* would be treated as a dividend to the extent of the taxpayer's ratable share of the distributing corporation's earnings and profits. Later cases and rulings have tended to restrict *Bedford* to its facts and to determine the character of the recognized gain by applying the same criteria used in testing a stock redemption for dividend equivalence.ⁿ⁴¹ As the Court of Claims put it:

"If Congress meant merely to say that any boot money at all paid out of earnings should be a taxable dividend, it used a verbose and complicated way of saying it."ⁿ⁴²

Thus, a distribution of cash or other property, made as part of a reorganization exchange, should be classified as a dividend only if the exchange does not produce a meaningful reduction in the shareholder's proportionate interest in the

corporation.ⁿ⁴³ And the corporation in which the meaningful reduction must occur is the acquiring corporation, not the acquired corporation, as the Fifth Circuit had once held.ⁿ⁴⁴ According to the Supreme Court,ⁿ⁴⁵ the proper approach utilizes the step-transaction doctrine and assumes that the transaction begins with a stock-for-stock exchange that is followed by a redemption of a portion of the shares for cash or other property.

[iii] Securities as Other Property. A reorganization exchange involving the receipt of securities will be wholly tax-free only when securities are exchanged for securities in an equal or lesser principal amount or for stock and securities in an equal or lesser principal amount.ⁿ⁴⁶ If the principal amount of the securities received exceeds the principal amount of the securities surrendered, the taxpayer will be in receipt of "boot" to the extent of the fair market value of such excess.ⁿ⁴⁷ If securities are received and none are surrendered, as in the case of an exchange of stock and securities,ⁿ⁴⁸ the fair market value of the entire principal amount of the securities received will be treated as other property.ⁿ⁴⁹ The following examples illustrate the foregoing rules:

Example 1:

A taxpayer exchanges a security in the principal amount of \$10,000 for a security in the principal amount of \$15,000, but with a fair market value of \$12,000. Because the principal amount of the securities received exceeds the principal amount of those surrendered, the taxpayer will be in receipt of "boot" to the extent of the fair market value of the excess principal amount, or \$4,000 ($5,000/15,000 \times \$12,000$). If the taxpayer had received two securities, each in the principal amount of \$7,500, but one having a fair market value of \$7,500 and the other, a fair market value of \$4,500, one-third of the value of each security would be treated as "boot."ⁿ⁵⁰

Example 2:

A taxpayer exchanges stock for stock and a security in the principal amount of \$10,000 with a fair market value of \$9,000. Since no securities were surrendered, the fair market value of the security received, \$9,000, will be treated as other property.

Example 3:

A taxpayer exchanges a security in the principal amount of \$10,000 for stock and a security in the principal amount of \$9,000. No gain or loss will be recognized in this situation; the principal amount of the security received is less than the principal amount of the security surrendered.

A right to acquire stock that is treated as a security for purposes of *IRC Section 354* or *355* has no principal amount.ⁿ⁵¹ Therefore, the right is not other property when received in a transaction to which *IRC Section 356* applies regardless of whether securities are surrendered in the exchange.

Example 4:

A taxpayer exchanges stock for stock and a right to acquire stock. Because the right does not have a principal amount, the taxpayer does not receive an excess principal amount. The same result would obtain if the taxpayer exchanged a right to acquire stock for stock and another right to acquire stock.

Example 5:

A taxpayer exchanges a right to acquire stock for stock and a debt security with a principal amount of \$10,000. The taxpayer receives an excess principal amount of \$10,000 because the stock right surrendered had no principal amount.

[2] Basis and Holding Period.

[a] Nonrecognition Property. Property which can be received tax-free in a reorganization exchange will assume a basis equal to that of the property surrendered, decreased by the amount of "boot" received, and increased by the amount of gain (including the amount of dividend income) recognized on the exchange.ⁿ¹ If more than one kind or

class of nonrecognition property is received in the exchange, the aggregate basis of such property, determined in the manner specified in the preceding sentence, must be allocated among the several classes of stock and securities received in proportion to their respective fair market values.ⁿ² If one share of stock or security is received for more than one share of stock or security, or if a fraction of a share or security is received, the basis of the shares or securities surrendered must be allocated to the shares or securities received in a manner that reflects, to the greatest extent possible, that a share or security received in respect of shares or securities that were acquired on the same day and at the same price.ⁿ³ To the extent it is not possible to allocate basis in this manner, the basis of the shares or securities surrendered must be allocated to the shares or securities received in a manner that minimizes the disparity in the holding periods of the surrendered shares or securities whose basis is allocated to any particular share or security received.ⁿ⁴

To the extent that the terms of the reorganization exchange specify which shares of stock or securities, or other property or money, are received in exchange for a particular share or security or a particular class of stock or securities, those terms will control provided they are economically reasonable.ⁿ⁵ If the terms of the exchange do not contain such a specification, a pro rata portion of the shares of stock and securities of each class received is treated as received in exchange for each share of stock and security surrendered, based on the fair market value of the surrendered stock and securities.ⁿ⁶

If a shareholder or security holder surrenders a share of stock or a security and receives no property, or property (including property that can be received under *IRC Section 354* without the recognition of gain, or other property or money) with a fair market value less than that of the stock or securities surrendered in the transaction, the shareholder or security holder is treated as follows:ⁿ⁷

First, the shareholder or security holder is treated as receiving the stock, securities, other property, or money actually received and an amount of stock of the issuing corporation that has a value equal to the excess of the value of the stock or securities surrendered over the value of the stock, securities, other property, or money actually received in the transaction. If the shareholder owns only one class of stock of the issuing corporation the receipt of which would be consistent with the economic rights associated with each class of stock of the issuing corporation, the stock deemed received by the shareholder will be the stock of that class. If the shareholder owns multiple classes of stock of the issuing corporation the receipt of which would be consistent with the economic rights associated with each class of stock of the issuing corporation, the stock deemed received by the shareholder will be stock of each class owned by the shareholder immediately prior to the transaction. The basis of each share of stock or security deemed received and actually received will be determined under the rules discussed above.

Second, the shareholder or security holder is then treated as surrendering all of its stock and securities to the issuing corporation, including the shares and securities held immediately before the transaction and those shares and securities actually and deemed received in the transaction, in a recapitalization in exchange for the stock and securities the shareholder or security holder actually holds after the transaction. The basis of each share of stock and security deemed received in the recapitalization is determined under the rules discussed above.

If a shareholder or security holder that acquired shares or securities on different dates or at different prices exchanges the shares or securities, and is not able to identify which particular share of stock is received in exchange for a particular share of stock or security, the shareholder or security holder may designate which share of stock or security is received in exchange for a particular share of stock or security, provided the designation is consistent with the terms of the exchange or distribution.ⁿ⁸ The designation must be made on or before the first date on which the basis of a share of stock or a security received (or deemed received) is relevant.ⁿ⁹

The holding period of nonrecognition property received in a reorganization exchange is prescribed by *IRC Section 1223(1)*. If the transferred stock or securities constituted a capital asset in the hands of the taxpayer, their holding period will be added to the holding period of the stock or securities received.

[b] Other Property. The basis of any other property (except money) received by the taxpayer will be its fair market value at the time of receipt.ⁿ¹⁰ The holding period of such property commences with acquisition by the taxpayer.

[3] Record-Keeping and Filing Requirements.

Every taxpayer, other than a corporation that is a party to the reorganization, who participates in a reorganization exchange must file a statement with his income tax return for the year of exchange showing (a) the cost or other basis of the stock or securities transferred in the exchange, (b) the fair market value on the date of the exchange of the stock, securities, and "boot" received, and (c) any liabilities assumed and any liabilities to which the property received is subject.ⁿ¹ A second requirement makes the taxpayer maintain permanent records to substantiate the information contained in the statement.ⁿ²

A corporation is saddled with reporting requirements whenever a person (or group of persons) acquires at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of all classes of stock of the corporation in either a single transaction or series of related transactions.ⁿ³ The provision applies as well to other substantial changes in the capital structure of a corporation. The information required to be furnished is set forth in regulations.ⁿ⁴ No reporting is required if the transaction takes the form of a dissolution of the corporation or a liquidation of the whole or any part of its capital stock and information regarding the transaction must be reported under *IRC Section 6043(a)*,ⁿ⁵ or if the corporation reasonably determines that all of its shareholders who receive cash, stock, or other property pursuant to the acquisition of control or substantial change in capital structure are exempt recipients as defined in the regulations.ⁿ⁶

The regulations state that acquisition of control occurs in a transaction or series of related transactions if (a) before an acquisition of stock of the first corporation (directly or indirectly) by a second corporation, the second corporation does not have control of the first corporation; (b) after the acquisition, the second corporation has control of the first corporation; (c) the fair market value of the stock acquired in the transaction or any related transaction as of the date or dates the stock was acquired is \$100 million or more; (d) the shareholders of the first corporation receive stock or other property pursuant to the acquisition; and (e) the first corporation or any of its shareholders is required to recognize gain if any under *IRC Section 367(a)* and the regulations, as a result of the transaction.ⁿ⁷

A change in capital structure occurs if a corporation in a transaction or series of transactions (i) merges, consolidates, or otherwise combines with another corporation or transfers all or substantially all of its assets to one or more corporations; (ii) transfers all or part of its assets to another corporation in a bankruptcy or similar case and, in pursuance of the plan, distributes stock or securities of that corporation; or (iii) changes its identity, form or place of organization and the corporation or any shareholder is required to recognize gain, if any, under *IRC Section 367(a)* and the regulations, as a result of the transaction.ⁿ⁸ The change is substantial if the amount of any cash and the fair market value of property (including stock) provided to the shareholders of the corporation pursuant to the change in capital structure, as of the date or dates on which the cash or other property is provided, is \$100 million or more.ⁿ⁹

A corporation that fails to file the required return is subject to a penalty unless the failure is due to reasonable cause. The penalty is \$500 a day for each day that the failure continues; the total penalty cannot exceed \$100,000.ⁿ¹⁰

(n18)Footnote 18. *Rev Rul 66-112, 1966-1 CB 68*. *Rev Rul 57-586, 1957-2 CB 249*, was distinguished on the ground that the interest in that ruling was embodied in a negotiable instrument.

The Service will issue favorable rulings on transactions involving contingent rights to acquire additional stock if (1) all of the stock will be issued within five years from the date of the initial transfer, (2) there is a valid business reason for the issuance of the contingent rights, (3) the maximum number of shares that may be issued in the exchange is stated, (4) at least 50 percent of the maximum number of shares of each class that may be issued is issued in the initial distribution, (5) the contingent rights are either nonassignable or not evidenced by a negotiable certificate, (6) the rights can give rise to the receipt of additional stock only, (7) the stock issuance will not be triggered by an event the occurrence or nonoccurrence of which is within the control of the shareholder, (8) the stock issuance will not be triggered by the payment of additional tax or reduction in tax paid as a result of a Service audit of the shareholders or the corporation either with respect to the transaction in which the contingent stock will be issued or when the transaction in which the contingent stock will be issued involves related parties within the meaning of *IRC § 267(c)(4)*, and (9) the mechanism for the calculation of the additional stock to be issued is objective and readily ascertainable.

Rulings will be issued for transactions calling for stock to be placed in escrow if (1) there is a valid business reason for the escrow arrangement; (2) the escrowed stock is legally outstanding under state law and is so shown on the

balance sheet; (3) dividends are paid currently to the exchanging shareholders; (4) voting rights are exercisable by exchanging shareholders; (5) no share is subject to restrictions requiring return of stock to the corporation because of death, termination of employment, etc; (6) the stock is released from escrow within five years of the consummation of the reorganization; (7) at least 50 percent of the initially issued stock is not subject to the escrow; and (8) the conditions specified in (7), (8), and (9) of the preceding paragraph are met. *Rev Proc 77-37, 1977-2 CB 568*, amplified by *Rev Proc 84-42, 1984-1 CB 521*.

Contingent stock payments may be subject to the imputed interest rules of *IRC § 483*. See Ch 2 for the method of determining the portion of a contingent stock payment representing unstated interest.

See generally Tillinghast, "Contingent Stock Pay-Outs in Tax-Free Reorganizations," 22 *Tax Lawyer* 467 (1969).

(n19)Footnote 19. *Treas Reg § 1.354-1(e) (1998)*. A right to acquire stock has no principal amount.

A right to acquire nonqualified preferred stock, received in an exchange for (or in a distribution with respect to) stock, or a right to acquire stock, other than nonqualified preferred stock is not considered either stock or a security. *Temp Treas Reg § 1.356-6T(a)(2)*.

For this purpose the term "rights to acquire stock" has the same meaning as it does under *IRC §§ 305 and 317*, discussed in Chapter 4.

(n20)Footnote 20. *Treas Reg § 1.354-1(d), Ex 4*.

Where the interest is paid in the form of additional stock, the "interest" shares will have a basis equal to fair market value. *Rev Rul 70-300, 1970-1 CB 125*, clarified by *Rev Rul 72-35, 1972-1 CB 139*.

(n22)Footnote 22. *287 US 462 (1933)*.

(n23)Footnote 23. *Id at 468-69*.

(n24)Footnote 24. Eg, *Neville Coke & Chem Co v Commr, 148 F2d 599 (3d Cir)*, *cert denied 326 US 726*; *Commr v Sisto Fin Corp, 139 F2d 253 (2d Cir 1943)*. Additional discussion can be found in § 3.02[2][a], *supra*.

(n25)Footnote 25. *US v Mills, 399 F2d 944 (5th Cir 1968)*.

In *Rev Rul 2004-78, 2004-2 CB 108*, a target corporation issued securities with a 12-year term. The corporation was acquired in a merger two years prior to the maturity date of the instruments. As part of the merger, the security holders of the target corporation exchanged those securities for instruments of the acquiring corporation that contained the same terms (other than interest rate) as the securities of the target corporation. Although instruments with a term of two years generally would not qualify as securities, the Service held that the debt instruments of the acquiring corporation represented a continuation of the security holders' investment in the target corporation in substantially the same form. This meant that the debt instruments of the acquiring corporation exchanged for the securities of the target corporation were securities for purposes of *IRC § 354*.

(n26)Footnote 26. *Treas Reg § 1.368-2(l)*, added by *TD 9475, 74 Fed Reg 67053 (Dec 18, 2009)*. The "meaningless gesture" doctrine was engrafted onto the reorganization provisions by the courts, see *James Armour, Inc v Commr, 43 TC 295, 307 (1964)* and was long followed by the Internal Revenue Service, see *Rev Rul 70-240, 1970-1 CB 81*, before being incorporated into the regulations.

(n27)Footnote 27. The regulations apply to any case in which "the same person or persons own, directly or

indirectly, all of the stock of the transferor and transferee corporations in identical proportions." *Treas Reg* § 1.368-2(l)(2)(i). Thus, the regulations would apply if, in the above example, S and T were owned by individuals A, B, and C, who owned 34 percent, 33 percent and 33 percent, respectively, of each corporation. *Treas Reg* § 1.368-2(l)(3), Ex 4. The attribution principles of *IRC* § 318(a)(2) are followed in determining stock ownership except that attribution to corporations is made without regard to the 50 percent stock ownership limitation in *IRC* § 318(a)(2)(C), and an individual and all members of his family are treated as one individual. *Treas Reg* § 1.368-2(l)(2)(ii). The same person or persons will be treated as owning all of the stock of the transferor and transferee corporations even if there is a *de minimis* variation in shareholder identity or proportionality of ownership. *Treas Reg* § 1.368-2(l)(2)(iii). The regulations under *Treas Reg* § 1.368-2(l) do not apply, however, to transactions qualifying as triangular reorganizations as defined in *Treas Reg* § 1.358-6(b)(2). *Treas Reg* § 1.368-2(l)(2)(iv).

(n28)Footnote 28. Under *IRC* § 368(a)(1)(D), "stock or securities of the corporation to which the assets are transferred ... [must be] distributed in a transaction which qualifies under section 354, 355 or 356." *IRC* § 354(b)(1)(B) provides that *IRC* § 354 will not apply to an exchange in pursuance of a plan of reorganization described in *IRC* § 368(a)(1)(D) unless the transferee corporation acquires substantially all of the assets of the transferor, and the stock, securities, and other properties received by the transferor, as well as any other properties of the transferor, are distributed in pursuance of the plan of reorganization.

(n29)Footnote 29. In cases where no consideration is received from S, the transferee, in exchange for the transferor T's assets, or the value of the consideration paid by S is less than the fair market value of T's transferred assets, the stock that is deemed transferred by S is presumed to have a value equal to the excess of the assets' fair market value over any consideration paid for the assets by S. If S paid fair market value for T's assets, a share of S's stock is nevertheless considered issued for nominal value in addition to the consideration S actually transferred. *Treas Reg* § 1.368-2(l)(2)(i).

(n30)Footnote 30. *Treas Reg* § 1.368-2(l)(2)(i). Where appropriate, the fictional share of stock is deemed distributed through chains of ownership to the extent necessary to reflect the actual ownership of S and T, the transferor and transferee corporations. When the deemed-issued stock has only nominal value (because the consideration actually given up by S equaled the fair market value of T's assets), the shareholder(s) of S and T, after adjusting the basis of such share in accordance with the rules of *IRC* § 358 and the regulations thereunder (see § 8.03[2], *supra*), may designate an actual share of the transferee's stock to which the basis, if any, of the fictional share will attach. See *Treas Reg* § 1.358-2(a)(2)(iii).

(n31)Footnote 31. Following completion of a merger, the market price of the acquiring corporation's stock fell precipitously due to reports that the corporation had failed to disclose material facts about its financial condition. The shareholders of the merged corporation sued the acquiring corporation for securities fraud. As part of the settlement of the litigation, the taxpayer received cash and certain discounts on future purchases. The cash and discounts were treated as if they had been received as part of the merger and, thus, were taxable as "boot." *Tribune Publishing Co v US*, 836 F2d 1176 (9th Cir 1988).

(n32)Footnote 32. *IRC* § 356(c). Since gain or loss must be computed separately for each block of stock or securities transferred as part of the exchange, the taxpayer can find himself with recognized gains and unrecognized losses resulting from the same transaction.

(n33)Footnote 33. *Treas Reg* § 1.356-1(b).

(n34)Footnote 34. *Id.*

(n35)Footnote 35. *IRC* § 356(e); *Treas Reg* § 1.356-6(a). A discussion of nonqualified preferred stock can be found in § 3.02[2]. See also § 8.06[2][b].

(n36)Footnote 36. *IRC* § 357(c)(1)(B).

(n37)Footnote 37. The distribution involved in *Vesper Co v Commr*, 131 F2d 200 (8th Cir 1942) , was held to have the effect of a dividend even though the corporation had only current earnings and profits; the court applied the *IRC* § 316 test.

The Third Circuit and the Tax Court have held that the amount of "boot" dividend is measured by the accumulated earnings and profits of the transferor corporation, not those of the acquiring corporation. *Atlas Tool Co v Commr*, 614 F2d 860 (3d Cir 1980) , *cert denied* 449 US 836 ; *Est of Bell v Commr*, TC Memo 1971-285 . The Fifth Circuit used the earnings and profits of both corporations where there was an identity of stock interests in the two corporations. *Davant v Commr*, 366 F2d 874 (5th Cir 1966) , *cert denied* 386 US 1022 .

A "boot" dividend qualifies as a dividend for the dividends received deduction under *IRC* § 243(a), *Rev Rul* 72-327, 1972-2 CB 197 , and for the deemed-paid foreign tax credit allowed by *IRC* § 902. *Rev Rul* 74-387, 1974-2 CB 207 .

(n38)Footnote 38. *Treas Reg* § 1.356-1(c), Ex (1). The Regulation was revised in 2006 to eliminate that impression. In the interim, the Service had ruled that cash received in lieu of fractional shares would be treated as consideration paid for the redemption of such shares if not a separately bargained-for consideration. *Rev Rul* 74-36, 1974-1 CB 85 ; *Rev Rul* 69-34, 1969-1 CB 105 ; *Rev Rul* 66-365, 1966-2 CB 116 .

(n39)Footnote 39. 325 US 283 (1945) .

(n40)Footnote 40. *Id* at 292 .

(n41)Footnote 41. Eg, *Wright v US*, 482 F2d 600 (8th Cir 1973) ; *Hawkinson v Commr*, 235 F2d 747 (2d Cir 1956) ; *Idaho Power Co v US*, 161 F Supp 807 (Ct Cl 1958) , *cert denied* 358 US 832 ; *Rev Rul* 93-62, 1993-2 CB 118 ; *Rev Rul* 75-515, 1974-2 CB 118 .

(n42)Footnote 42. *Idaho Power Co v US*, 161 F Supp 807, 809 (Ct Cl) , *cert denied* 358 US 832 (1958) .

(n43)Footnote 43. *US v Davis*, 397 US 301 (1970) , discussed in Ch 5.

See TAM 199934001 for an application of the meaningful reduction test to characterize "boot" received in a recapitalization as gain rather than a dividend.

The Commissioner might contend that the distribution of other property was functionally unrelated to the reorganization, causing the distribution to be treated as a dividend to the extent provided by *IRC* § 301. This argument is likely to be pressed in liquidation-reincorporation cases. See, eg, *Davant v Commr*, 366 F2d 874 (5th Cir 1966) , *cert denied* 386 US 1022 , (applying *IRC* § 301); *American Mfg Co v Commr*, 55 TC 204 (1970) (denying *IRC* § 301 treatment).

A special rule affects "boot" received in exchange for Section 306 stock. Under *IRC* § 356(f), an amount equal to the value of the other property received by the taxpayer will be treated as a distribution of property to which *IRC* § 301 applies. See Ch 4.

(n44)Footnote 44. *General Housewares Corp v US*, 615 F2d 1056 (5th Cir 1980) ; *Shimberg v US*, 577 F2d 283 (5th Cir) , *cert denied* 439 US 1115 .

(n45)Footnote 45. *Commr v Clark*, 109 S Ct 1455 (1989) . See Gardner & Stewart, "Boot Distributions in Reorganizations: Has the U.S. Supreme Court's *Clark* Decision Resolved the Controversy?" 17 *J Corp Tax* 41 (1990).

(n46)Footnote 46. *IRC* § 354(a)(1), (2)(A).

Nonrecognition does not extend to stock including nonqualified preferred stock as defined in *IRC* § 351(g)(2),

securities, or other property received that is attributable to interest that has accrued on securities on or after the beginning of the holder's holding period. *IRC* § 354(a)(2)(B). Moreover, the property attributable to such interest is not treated as "boot" under *IRC* § 356, but, rather, as income under *IRC* § 61. (This situation will arise when the reorganization is a "G" reorganization.)

(n47)Footnote 47. *IRC* § 356(d)(1), (2)(B).

(n48)Footnote 48. An exchange of stock solely for securities does not fit within *IRC* § 354 at all. Therefore, the securities cannot be treated as "boot" under *IRC* § 356. The transaction is treated as a redemption of stock and is governed by *IRC* § 302. *Treas Reg* § 1.354-1(d), Ex (3).

(n49)Footnote 49. *IRC* § 356(d)(1), (2)(B).

(n50)Footnote 50. *Treas Reg* § 1.356-3(c), Ex 6.

(n51)Footnote 51. *Treas Reg* § 1.356-3(b), effective Mar 9, 1998. The rule does not extend to a right to acquire nonqualified preferred stock received in exchange for (or in a distribution with respect to) stock, or a right to acquire stock, that is other than nonqualified preferred stock. *Treas Reg* § 1.356-6(a)(2).

(n52)Footnote 1. *IRC* § 358(a)(1). If the property exchanged was purchased at different times or at different prices, the taxpayer may be faced with an identification problem when he comes to sell the property received in the exchange. See § 1.05[7].

(n53)Footnote 2. *IRC* § 358(b); *Treas Reg* § 1.358-2(a)(2). If the taxpayer surrenders more than one class of stock or securities or surrenders both stock and securities, it becomes necessary to determine the stock and securities received with respect to each class of stock or securities surrendered before any allocation can be made. Then a separate basis computation and allocation must be made for each class. *Treas Reg* § 1.358-2(a)(4). Stock or securities in different corporations, or stock or securities in the same corporation which have different rights attributable to them, will be considered different classes of stock or securities. *Treas Reg* § 1.358-2(a)(1).

(n54)Footnote 3. *Treas Reg* § 1.358-2(a)(2)(i).

(n55)Footnote 4. *Id.*

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.04

§ 8.04

Effect of Reorganizations on the Transferor Corporation

[1] Nonrecognition of Gain or Loss.

Under *IRC Section 361(a)*, no gain or loss is recognized to a corporation that is a party to a reorganization and, pursuant to the plan of reorganization, exchanges property solely for stock or securities in another corporation that is a party to the reorganization. If the exchange is not solely in kind and "boot" is received, the recipient will be forced to recognize gain to the extent that the "boot" is not distributed pursuant to the plan; loss is not recognized in any event.ⁿ¹ A transfer of money or property to creditors in connection with the reorganization is treated as a distribution in pursuance of the plan.ⁿ²

IRC Section 361(c)(1) sets forth a second nonrecognition rule to govern the distribution of "qualified property"--stock in (or the right to acquire stock in), or an obligation of (i) the distributing corporation, or (ii) any other corporation that is a party to the reorganization, if the stock, right, or obligation was received by the distributing corporation in the exchange.ⁿ³ A distribution of appreciated property that is not qualified property leads to the recognition of gain (in the amount of the appreciation) by the distributing corporation.ⁿ⁴ The provisions of *IRC Sections 311, 336, and 337* have no application to a distribution in connection with a reorganization.ⁿ⁵

A transfer of property by a domestic corporation to a foreign corporation is taxable to the transferor. *IRC Section 367(a)(1)* does not permit the foreign corporation to be treated as a corporation for the purpose of determining the extent to which gain must be recognized on the transfer. The exceptions contained in *IRC Sections 367(a)(2) and (3)*, for the transfer of stock or securities of a foreign corporation that is a party to the exchange or reorganization, and the transfer of property for use by the foreign corporation in the active conduct of a trade or business, do not apply unless the transferor corporation is controlled (within the meaning of *IRC Section 368(c)*) by five or fewer domestic corporations.ⁿ⁶

[2] Basis and Holding Period.

The transferor corporation determines its basis for stock and securities in another corporation that is a party to the reorganization received pursuant to the plan of reorganization under the rules prescribed by *IRC Section 358*, namely, the same basis as the transferred property, decreased by the amount of any "boot" received,ⁿ¹ and increased by the amount of any gain recognized on the exchange. Any other property received pursuant to the plan of reorganization will

assume a basis equal to its basis in the hands of the transferor of the property, adjusted by the amount of gain or loss to such transferor on the transfer.ⁿ²

The holding period of nonrecognition property received in exchange for property which was either a capital asset or Section 1231 property will include the period that the transferor held the transferred property.ⁿ³ The holding period of stock or securities received in exchange for noncapital assets or for property which was not Section 1231 property, as well as the holding period of any "boot" received in exchange, will commence with acquisition.

[3] Effect on Earnings and Profits.

IRC Section 312(h)(2), effective for plans of reorganization adopted after July 18, 1984, decrees that proper allocation with respect to the earnings and profits of the acquired corporation in a "C" or "D" reorganization be made between the acquiring corporation and the acquired corporation (or any corporation that had control of the acquired corporation before the reorganization).

[4] Treatment of Expenses Incurred by the Transferor.

An acquisitive reorganization often involves the expenditure of funds by the transferor for such things as investment banking fees. At issue in *INDOPCO, Inc. v. Commissioner*ⁿ¹ was whether expenses incurred in a reorganization could be deducted by the acquired corporation under *IRC Section 162(a)*. The Supreme Court held they could not, but rather had to be capitalized under *IRC Section 263*. In so doing, the Court rejected the taxpayer's argument that capitalization was required only when the payments resulted in the creation of a separate and distinct additional asset. The applicable test for Justice Blackmun was whether the expenditure produced significant benefits to the taxpayer extending beyond the tax year in which they were incurred.

In *Wells Fargo & Co. v. Commissioner*ⁿ² the Eighth Circuit held that a portion of compensation paid to employees of a target corporation was a currently deductible expense.ⁿ³ The employees worked on various aspects of the transaction in which the corporation was acquired in a tax-free reorganization. None of the employees was hired specifically to render services on the transaction; all were hired to conduct the day-to-day business of the corporation. The court distinguished *INDOPCO* on the ground of the relationship of the expense at issue and the long-term benefit to be derived therefrom, finding that there was only an incidental benefit between the compensation (that originates in the employment relationship) and the acquisition (that provides the long-term benefit).

INDOPCO was distinguished in *Santa Fe Pacific Gold Co and Subs v Comm'r*,ⁿ⁴ where the Tax Court allowed the deduction of a \$65 million termination fee paid by the taxpayer to a "white knight" with which the taxpayer had entered into a merger agreement in an attempt to avoid a hostile takeover by a larger company. When the defensive action failed and the taxpayer finally succumbed to a merger with the larger company, it was required by the terms of its earlier merger agreement with the white knight to pay a termination fee. Unlike *INDOPCO*, the taxpayer's expenditure did not contribute to a restructuring of the company which produced benefits lasting beyond the taxable year. To the contrary, it was incurred as the result of taxpayer's unsuccessful attempt to prevent the restructuring, which taxpayer's management regarded as inconsistent with the company's best interests. Consequently, the termination fee was deductible by the taxpayer under either *IRC Section 162*, as an expenditure made to defend its business, or *IRC Section 165*, as a loss from an abandoned transaction (the white knight merger).ⁿ⁵

[5] Filing Requirements.

Every corporation that is a party to the reorganization is required to file with its return for the year in which the reorganization occurs a statement of all facts pertinent to nonrecognition treatment, including: (a) a copy of the plan of reorganization, with a statement, executed under penalties of perjury, showing in full the purposes of the reorganization and in detail all transactions incident to the plan; (b) a statement of the cost or other basis of all property, including

stock and securities, transferred incident to the plan; (c) a statement of the amount and fair market value (as of the date of exchange) of all stock, securities, and other property or money received and of all distributions or other dispositions thereof; and (d) a statement of the amount and nature of any liabilities assumed or to which any of the property received is subject.ⁿ¹

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.05

§ 8.05

Effect of Reorganizations on the Transferee Corporation

[1] Nonrecognition of Gain or Loss.

Under *IRC Section 1032(a)*, no gain or loss is recognized by a corporation that exchanges its own stock, including treasury stock, for money or other property. Although the provision expressly refers to the issuance of the acquiring corporation's stock, the Service has stated that no gain or loss will be recognized by a subsidiary which uses its parent's stock as consideration for the acquisition.ⁿ¹

There is no statutory provision governing the consequence of the issuance of securities for property. However, it is now unquestioned that the corporation recognizes no gain or loss on such a transaction.

An acquiring corporation will be called upon to recognize any gain realized on the distribution of appreciated property as "boot." The earnings and profits of the corporation will be increased by the amount of recognized gain.ⁿ²

The regulations contain special rules for the disposition of stock or stock options in transactions in which a corporation or partnership (the acquiring entity) acquires money or other property in exchange, in whole or in part, for stock of a corporation (the issuing corporation).ⁿ³ These rules apply to transactions not qualifying under any other nonrecognition provision.

Generally, no gain or loss is recognized on the disposition of the issuing corporation's stock by the acquiring entity.ⁿ⁴ The transaction is treated as if, immediately before the acquiring entity disposes of the stock of the issuing corporation, the acquiring entity purchased the issuing corporation's stock from the issuing corporation for fair market value with cash contributed to the acquiring entity by the issuing corporation (or, if necessary, through intermediate corporations or partnerships). If the issuing corporation receives money or other property in payment for its stock, the amount of cash deemed contributed is the difference between the fair market value of the issuing corporation stock and the amount of money or the fair market value of other property received by the issuing corporation as payment.ⁿ⁵

The rules apply only if, pursuant to a plan to acquire money or other property, (1) the acquiring entity acquires stock of the issuing corporation directly or indirectly from the issuing corporation in a transaction in which, otherwise, the basis of the stock of the issuing corporation would be determined, in whole or in part, with respect to the issuing corporation's

basis in its stock under *IRC Section 362(a)* or 723 (provided that, in the case of an indirect acquisition by the acquiring entity, the transfers of stock through intermediate entities occur immediately after one another); (2) the acquiring entity immediately transfers the stock of the issuing corporation to acquire money or other property (from a person other than an entity from which the stock was directly or indirectly acquired); (3) the party receiving the stock of the issuing corporation from the acquiring entity does not receive a substituted basis in the stock of the issuing corporation; and (4) the issuing corporation stock is not exchanged for stock of the issuing corporation.ⁿ⁶

Example 1:

A Corp. owns all of the stock of B Corp. B Corp. enters into an agreement with X to acquire property from X in exchange for 10 shares of A Corp. stock worth \$1,000. A Corp. transfers the 10 shares of its stock to B Corp. in a transaction in which, normally, the basis of the A Corp. stock in the hands of B Corp. would be determined with respect to A Corp.'s basis in the stock under *IRC Section 362(a)*. B Corp. transfers the stock to X to acquire the property.

Because of the rules discussed above, no gain or loss is recognized on the disposition of the A Corp. stock by B Corp. Immediately before the disposition, B Corp. is treated as purchasing the stock from A Corp. for \$1,000 in cash contributed to B Corp. by A Corp. Under *IRC Section 358*, A Corp.'s basis in its B Corp. stock is increased by \$1,000.

The same result would obtain if, instead of transferring stock, A Corp. had transferred an option with a fair market of \$1,000 to purchase its stock.

Example 2:

Assume the same facts as in Example 1, except that B Corp. is a partner in a partnership, and that the partnership enters into the agreement with X. After the transfer of the A Corp. stock to B Corp., the latter transfers the stock to the partnership in a transaction in which, normally, the basis of the A Corp. stock in the hands of the partnership would be determined under *IRC Section 723*. The partnership then immediately transfers the shares to X.

Because of the above rules, no gain or loss is recognized on the disposition of the A Corp. stock by the partnership. Immediately before the partnership's disposition of the stock, it is treated as having purchased the stock from A Corp. for \$1,000 in cash indirectly contributed to the partnership by an intermediate corporation. Under *IRC Section 722*, B Corp.'s basis in its partnership interest is increased by \$1,000. In addition, under *IRC Section 358*, A Corp.'s basis in its B Corp. stock is increased by \$1,000.

[2] Basis and Holding Period.

The basis of property acquired by a corporation in connection with a reorganization will be the same basis that the property had in the hands of the transferor, increased by the amount of gain recognized by the transferor on the exchange.ⁿ¹ Thus, since gain will be recognized by the transferor only in the instance in which it receives "boot," the transferor's basis will never be stepped-up if the reorganization exchange is wholly tax-free to the transferor.ⁿ² The statute is applied literally--gain must be recognized by the transferor; the recognition of gain by a transferor corporation's shareholders on the distribution of "boot" received by the transferor corporation as part of the reorganization will not trigger an adjustment to the transferee's basis.ⁿ³

The substituted basis rule of *IRC Section 362(b)* is made inapplicable if the property acquired by the transferee consists of stock or securities in a corporation which is a party to the reorganization, unless the stock or securities are acquired in exchange for the stock or securities of the transferee or of a corporation which is in control of the transferee. It also will

be inapplicable if there is an importation of net built-in loss as part of the reorganization.ⁿ⁴

The transferee corporation's holding period for the acquired property will include the period during which the property was held by the transferor.ⁿ⁵ This will apply to all of the acquired property, not just to property which was a capital asset or *IRC Section 1231* property in the hands of the transferor.

[3] Filing Requirements.

The regulations do not impose different filing requirements for transferee corporations. The statement required of transferor corporations must be filed by transferees as well.ⁿ¹

FOOTNOTES:

(n7)Footnote 1. *IRC § 362(b)*. In no event can the basis of property be increased above the fair market value of the property, determined without regard to *IRC § 7701(g)* (fair market value of property subject to a nonrecourse liability treated as not less than the amount of the debt). *IRC § 362(d)(1)*. If gain is recognized to the transferor as a result of an assumption of a nonrecourse liability that is also secured by assets that are not transferred to the transferee, and no person is subject to tax on the gain, the basis can be increased only by the ratable portion of the liability determined according to the relative fair market values of all assets subject to the liability. *IRC § 362(d)(2)*.

IRC § 362(b) has been applied in concert with *IRC § 1013* to give the acquiring corporation the transferor's basis for work-in-process inventory acquired in the transaction. *Arwood Corp v Commr, TC Memo 1971-2* .

IRC § 358(e) eliminates the possibility that *IRC § 358* can control the basis of the acquired property when the transferee corporation uses treasury stock rather than newly issued stock as consideration for the acquisition.

(n8)Footnote 2. Because the increase in basis is tied to recognized gain and not the receipt of "boot" by the transferor, there will be no adjustment to basis if the transferor receives "boot" but sustains a loss on the exchange.

(n9)Footnote 3. *Schweitzer & Conrad, Inc v Commr, 41 BTA 533 (1940)* . The transferor corporation will avoid recognition of gain only when the distribution of "boot" received by it is "in pursuance of the plan of reorganization." *IRC § 361(b)(1)(A)*.

(n10)Footnote 4. *IRC § 362(e)(1)*, discussed in § 3.05[2].

(n11)Footnote 5. *IRC § 1223(2)*.

(n12)Footnote 1. See § 8.04[4].

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.05A

§ 8.05A Triangular Reorganizations

A triangular reorganization is a reorganization involving a parent corporation (*P*), its controlled corporation (*S*), and a third corporation (*T*), in which the stock of *P* is transferred pursuant to the reorganization.ⁿ¹ This section will consider gain and loss and basis issues that arise in the following types of transactions:

- (1) *Forward triangular merger.* A forward triangular merger is a statutory merger of *T* and *S*, with *S* surviving, that qualifies as a reorganization under *IRC Section 368(a)(1)(A)* or *(G)* by reason of the application of *IRC Section 368(a)(2)(D)*.ⁿ²
- (2) *Triangular C reorganization.* A triangular C reorganization is an acquisition by *S* of substantially all of *T*'s assets in exchange for *P* stock in a transaction that qualifies as a reorganization under *IRC Section 368(a)(1)(C)*.ⁿ³
- (3) *Reverse triangular merger.* A reverse triangular merger is a statutory merger of *S* and *T*, with *T* surviving, that qualifies as a reorganization under *IRC Section 368(a)(1)(A)* by reason of the application of *IRC Section 368(a)(2)(E)*.ⁿ⁴
- (4) *Triangular B reorganization.* A triangular B reorganization is an acquisition by *S* of *T* stock in a transaction that qualifies as a reorganization under *IRC Section 368(a)(1)(B)*.ⁿ⁵

[1] Gain or Loss on the Exchange of Parent Corporation Stock in a Triangular Reorganization.

In the case of a forward triangular merger, a triangular C reorganization, or a triangular B reorganization, *P* stock provided by *P* to *S* (or directly to *T* or *T*'s shareholders on behalf of *S*), pursuant to the plan of reorganization, is treated as a disposition by *P* of shares of its own stock for *T*'s assets or stock, as applicable.ⁿ¹ This means that, under *IRC Section 1032(a)*, *P* will recognize neither gain nor loss on the transaction. If the transaction is a reverse triangular merger, nonrecognition for *P* is found in *IRC Section 361*.

S must recognize gain or loss on its exchange of *P* stock as consideration in a forward triangular merger, a triangular C reorganization, or a triangular B reorganization, if *S* did not receive the *P* stock from *P* pursuant to the plan of reorganization.ⁿ² This rule does not apply in the case of a reverse triangular merger; *IRC Section 361* provides

nonrecognition treatment for *S*'s use of *P* stock in that instance.

An indirect transfer occurs if a United States person exchanges stock or securities of a corporation (the acquired corporation) for stock or securities of a foreign corporation that controls the acquiring corporation in a triangular merger or triangular B reorganization.ⁿ³ This will require gain recognition by the United States person under *IRC Section 367(a)*.ⁿ⁴

[2] Basis of Stock Held by a Parent Corporation in a Triangular Reorganization.

Regulations Section 1.358-6 uses an over-the-top method to determine *P*'s basis in the stock of its subsidiary (*S* or *T*, as the case may be) following a triangular reorganization. The following rules apply:

(1) Forward triangular merger--In such a merger, *P*'s basis in its *S* stock is adjusted as if (a) *P* acquired the *T* assets acquired by *S* (and *P* assumed any liabilities that *S* assumed or to which the acquired *T* assets were subject) directly from *T* in a transaction in which *P*'s basis in the *T* assets was determined under *IRC Section 362*, and (b) *P* transferred those *T* assets (and liabilities) to *S* in a transaction in which *P*'s basis in *S* stock was determined under *IRC Section 358*.ⁿ¹

(2) Triangular C reorganization--The basis of *P*'s *S* stock is determined in the same manner as in the case of a forward triangular merger.ⁿ²

(3) Reverse triangular merger--Generally, *P*'s basis in the *T* stock acquired in the reverse triangular merger equals its basis in its *S* stock before the transaction adjusted as if *T* had merged into *S* in a forward triangular merger.ⁿ³ If *P* acquires less than all of the *T* stock in the transaction, the basis adjustment is reduced in proportion to the percentage of *T* stock not acquired.ⁿ⁴ If *P* owns *T* stock before the transaction, *P* can treat that stock as acquired in the transaction or not, without regard to the form of the transaction.ⁿ⁵

If a reorganization qualifies as both a reverse triangular merger and a transfer to a controlled corporation governed by *IRC Section 351*, or both as a reverse triangular merger and a reorganization governed under *IRC Section 368(a)(1)(B)* (exchange of stock for voting stock), *P* can (a) determine the basis in its *T* stock under the general rule applicable to reverse triangular mergers, or (b) determine its basis in the *T* stock as if *P* acquired the *T* stock from the former *T* shareholders in a transaction in which *P*'s basis in the *T* stock was determined under *IRC Section 362(b)*.ⁿ⁶

(4) Triangular B reorganization--In a triangular B reorganization, *P*'s basis in its *S* stock is adjusted as if (i) *P* acquired the *T* stock (actually acquired by *S*) directly from the *T* shareholders in a transaction in which *P*'s basis in the *T* stock was determined under *IRC Section 362(b)*; and (ii) *P* transferred the *T* stock to *S* in a transaction in which *P*'s basis in the stock was determined under *IRC Section 358*.ⁿ⁷

The amount of any adjustment to *P*'s basis in its *S* or *T* stock, described above, is decreased by the fair market value of any consideration (including *P* stock in which gain or loss is recognized) that is exchanged in the reorganization and that is not provided by *P* pursuant to the plan of reorganization.ⁿ⁸ There is no adjustment at all to *P*'s basis if the decrease equals or exceeds the amount of the adjustment prescribed when *P* furnishes all of the consideration.ⁿ⁹

The following examples illustrate the foregoing rules:ⁿ¹⁰

Example 1:

T has assets with an aggregate basis of \$1,200,000 and a fair market value of \$2 million, and no

liabilities. Pursuant to a plan, *P* forms *S* with cash of \$100,000 (that *S* retains), and *T* merges into *S*, with the former *T* shareholders receiving *P* stock worth \$2 million in exchange for their *T* stock. The transaction is a forward triangular merger.

In order to determine *P*'s basis in its *S* stock as a result of the reorganization, *P*'s \$100,000 basis in its *S* stock is adjusted as if *P* acquired the *T* assets directly from *T* in a transaction in which *P*'s basis in the *T* assets was determined under *IRC Section 362(b)*. Under that provision, *P* would have an aggregate basis of \$1,200,000 in the *T* assets. *P* is then treated as if it transferred the *T* assets to *S* in a transaction in which *P*'s basis in the *S* stock was determined under *IRC Section 358*. This requires an increase in the basis of its *S* stock by the \$1,200,000 basis in the *T* assets deemed transferred, giving *P* a \$1,300,000 basis in its *S* stock.

Example 2:

The facts are the same as in Example 1, except that *T*'s assets are subject to \$1 million of liabilities and the *T* shareholders receive \$1 million of *P* stock in exchange for their *T* stock. *P*'s basis in its *S* stock is first increased by the \$1,200,000 basis in the assets deemed transferred and then decreased by the \$1 million of liabilities to which the assets are subject, yielding a net basis adjustment of \$200,000, and a \$300,000 basis for *P* in its *S* stock.

Example 3:

Assume the same facts as in Example 1, except that *T*'s assets are subject to liabilities of \$1,800,000 and the *T* shareholders receive \$200,000 of *P* stock in exchange for their *T* shares. Because the liabilities to which the *T* assets acquired by *S* are subject exceed the aggregate adjusted basis in those assets, *P* has no adjustment in its *S* stock as a result of the reorganization.

Example 4:

T has assets with an aggregate basis of \$1,200,000 and a fair market value of \$2 million, and no liabilities. *P* has a \$2,200,000 basis in its *S* stock. Pursuant to a plan, *S* merges into *T* with *T* surviving. In the merger, the *T* shareholders receive \$1,800,000 of *P* voting stock and \$200,000 in exchange for their *T* stock. The transaction is a reverse triangular merger.

P's basis in the *T* stock acquired in the merger is *P*'s \$2,200,000 basis in its *S* stock before the transaction, adjusted as if *T* had merged into *S* in a forward triangular merger. In such case, *P*'s basis in its *S* stock would have been increased by \$1,200,000, the basis of the *T* assets deemed transferred. This results in *P* having a basis of \$3,400,000 in its *T* stock immediately after the transaction.

Example 5:

Assume the same facts as in Example 4, except that *P* forms *S* pursuant to the plan of reorganization and the *T* shareholders receive \$2 million of *P* voting stock in exchange for their *T* stock in which they have a basis of \$1,700,000. The reorganization qualifies both as a reverse triangular merger and a reorganization under *IRC Section 368(a)(1)(B)* (stock-for-stock exchange).

P can determine its basis as if the transaction was a reverse triangular merger (in which case the basis would be \$1,200,000, *T*'s net asset basis), or as if *P* acquired the *T* stock from the former *T* shareholders in a transaction in which *P*'s basis in the *T* stock was determined under *IRC Section 362(b)* (in which case the basis would be \$1,700,000, the *T* shareholders' aggregate basis in the *T* stock immediately before the reorganization).

Example 6:

The facts are the same as in Example 4, except that a 10 percent shareholder of *T* does not participate in the transaction. The remaining *T* shareholders receive \$200,000 cash from *P* and *P* stock worth \$1,600,000 for their *T* stock. The \$1,200,000 basis adjustment determined in Example 4 must be reduced in proportion to the percentage of *T* stock not acquired in the transaction (10 percent), resulting in a net adjustment of \$1,080,000 and a basis of \$3,280,000 for the *T* stock acquired by *P* in the transaction.

Example 7:

The facts are the same as in Example 4, except that *P* owns 10 percent of the *T* stock, with a basis of \$160,000, before the transaction. All *T* shareholders, other than *P*, surrender their *T* stock for \$200,000 cash and *P* stock worth \$1,600,000. *P* can treat its *T* stock owned before the transaction as acquired in the transaction or not. If *P* treats that *T* stock as acquired in the transaction, *P*'s basis in all of its *T* stock will be adjusted as in Example 4. If *P* treats its *T* stock as not acquired in the transaction, *P* retains its \$160,000 basis in that stock and determines its basis in the *T* shares actually acquired in the same manner as in Example 6.

Example 8:

T has assets with a fair market value of \$2 million and no liabilities. The *T* shareholders have an aggregate basis in their *T* stock of \$1,700,000 immediately before the reorganization. Pursuant to a plan of reorganization, *P* forms *S* with \$100,000 cash and *S* acquires all of the *T* stock in exchange for *P* voting stock worth \$2 million. The transaction is a reorganization to which *IRC Section 368(a)(1)(B)* applies.

P's \$100,000 basis in its *S* stock is adjusted by treating *P* as if it acquired the *T* stock acquired by *S* directly from the *T* shareholders in exchange for the *P* stock in a transaction in which *P*'s basis in the *T* stock was determined under *IRC Section 362(b)*, that is, *P* would have an aggregate basis of \$1,700,000 in the *T* stock acquired by *S* in the reorganization. *P* is then treated as if it transferred the *T* stock to *S* in a transaction in which *P*'s basis in the *S* stock was determined under *IRC Section 358*. This increases *P*'s basis in its *S* stock by the \$1,700,000 basis in the *T* stock deemed transferred, resulting in *P* having a basis of \$1,800,000 in its *S* stock after the transaction.

Example 9:

T has assets with an aggregate basis of \$1,200,000 and fair market value of \$2 million and no liabilities. *S* is an operating company with substantial assets that has been in existence for several years. *P* has a \$2 million basis in its *S* stock. Pursuant to a plan of reorganization, *T* merges into *S* and, in exchange for their *T* stock, the *T* shareholders receive \$1,400,000 of *P* stock provided by *P* pursuant to the plan and \$600,000 cash provided by *S*. The transaction is a forward triangular merger.

P's \$2 million basis in its *S* stock is increased by the \$1,200,000 basis in the *T* assets deemed transferred and then decreased by the \$600,000 of cash provided by *S* in the reorganization. Thus, *P* has a net adjustment of \$600,000 in its *S* stock, giving *P* a \$2,600,000 basis in its *S* stock.

Example 10:

Assume the same facts as in Example 9, except that the consideration furnished by *S* consists of an asset with an adjusted basis of \$400,000 and a fair market value of \$600,000. *P*'s adjusted basis is the same as in Example 9, but *S* recognizes \$200,000 of gain under *IRC Section 1001* on the disposition of the asset in the reorganization. If *S* had furnished an asset with a basis of \$1,200,000 and a fair market value of \$600,000, *S* would recognize a \$600,000 loss under *IRC Section 1001*. *P*'s basis adjustment would remain the same.

Example 11:

Assume the same facts as in Example 9, except that the consideration furnished by *S* consists of *P* stock worth \$600,000 acquired by *S* in an unrelated transaction several years before the reorganization. *S* has an adjusted basis of \$400,000 in the *P* stock. *P*'s basis adjustment is the same as in Example 9; *S* recognized \$200,000 of gain on the disposition of *P* stock under *Regulations Section 1.1032-2(c)*.

FOOTNOTES:

(n1)Footnote 1. *Treas Reg § 1.358-6(b)(1)*.

(n2)Footnote 2. *Treas Reg § 1.358-6(b)(2)(i)*. *P*'s transfer of the acquiring corporation's stock to another subsidiary controlled by *P* as part of the plan of reorganization, following the merger of *T* with and into *S*, will not prevent the transaction from qualifying as a forward triangular merger. *Rev Rul 2001-24, 2001-1 CB 1290*.

(n3)Footnote 3. *Treas Reg § 1.358-6(b)(2)(ii)*.

(n4)Footnote 4. *Treas Reg § 1.358-6(b)(iii)*. A merger qualifies as a tax-free reverse triangular merger even though the surviving corporation sells a portion of its assets to an unrelated party immediately after the merger pursuant to the plan of reorganization. *Rev Rul 2001-25, 2001-1 CB 1291*. In the fact pattern set forth in the ruling, *T* sold 50 percent of its operating assets following the merger, but continued to hold the sale proceeds.

The Service has ruled that the control-for-voting-stock requirement of a reverse triangular merger was satisfied when *P* received 51 percent of *T*'s stock in a tender offer and *S* then merged into *T* with the remaining *T* shareholders receiving cash and *P* stock for their *T* shares. *Rev Rul 2001-26, 2001-1 CB 1297*.

An acquiring corporation formed a subsidiary that merged into a target with the target surviving. After the target's shareholders received the acquiring corporation's stock for their target stock, there was an upstream merger of the target into the acquiring corporation. The acquisition and upstream merger were treated as steps in an integrated plan resulting in a statutory merger of the target into the acquiring corporation. *Ltr Rul 200145039*.

An acquiring corporation's transfer of the target corporation's assets to a subsidiary controlled by the acquiring corporation as part of a plan of reorganization will not prevent a transaction that otherwise qualifies as a reorganization under *IRC § 368(a)(1)(D)* from so qualifying. *Rev Rul 2002-85, 2002-2 CB 986*. The Service will amend *Treas Reg § 1.367(a)-3(d)* to provide specifically that a reorganization under *IRC § 368(a)(1)(D)* followed by a transfer of all or part of a target corporation's assets to a controlled subsidiary pursuant to a plan of reorganization constitutes an indirect transfer of securities for purposes of *Treas Reg § 1.367(a)-3*. *Notice 2002-77, 2002-2 CB 997*.

(n5)Footnote 5. *Treas Reg § 1.358-6(b)(2)(iv)*.

(n6)Footnote 1. *Treas Reg § 1.1032-2(b)*. The rules applicable to *P* stock apply to an option to buy or sell *P* stock issued by *P*. *Treas Reg § 1.1032-2(e)*, effective for transfers of stock options occurring on or after May 16, 2000.

(n7)Footnote 2. *Treas Reg § 1.1032-2(c)*.

(n8)Footnote 3. *Treas Reg § 1.367(a)-3(d)(1)(i), (ii), (iii)*.

(n9)Footnote 4. *Treas Reg § 1.367(a)-3(a)*.

(n10)Footnote 1. *Treas Reg § 1.358-6(c)(1)(i)*. If, in applying *IRC § 358*, the amount of *T* liabilities assumed or to which the acquired *T* assets are subject equals or exceeds *T*'s aggregate adjusted basis in its assets, the amount of the adjustment is zero. *P* recognizes no gain under *IRC § 357(c)* as a result of the triangular reorganization.

(n11)Footnote 2. *Treas Reg § 1.358-6(c)(1)(i)*.

(n12)Footnote 3. *Treas Reg § 1.358-6(c)(2)(i)(A)*.

(n13)Footnote 4. *Treas Reg § 1.358-6(c)(2)(i)(B)*. The percentage of *T* stock not acquired in the transaction is determined by taking into account the fair market value of all classes of *T* stock. *Treas Reg § 1.358-6(c)(2)(i)(A)*.

(n14)Footnote 5. *Treas Reg § 1.358-6(c)(2)(i)(C)*.

(n15)Footnote 6. *Treas Reg § 1.358-6(c)(2)(ii)*.

(n16)Footnote 7. *Treas Reg § 1.358-6(c)(3)*.

(n17)Footnote 8. *Treas Reg § 1.358-6(d)(1)*. The provision does not apply to the amount of *T* liabilities assumed by *S* or to which the *T* assets acquired by *S* are subject. *Id.*

(n18)Footnote 9. *Treas Reg § 1.358-6(d)(2)*.

(n19)Footnote 10. All of the examples assume that (a) *P*, *S*, and *T* are domestic corporations, (b) *P* owns all of the only class of *S* stock outstanding, and (c) *P* and *S* do not file consolidated returns.

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.06

§ 8.06 Divisive Reorganizations

[1] Introduction.

The preceding sections of this chapter have been devoted to the tax consequences of exchanges of stock or securities made in connection with acquisitive reorganizations. The focus in this section will be upon the effect which a divisive reorganization, a distribution which separates an existing business from the distributing corporation, has on shareholders and security holders.

A divisive reorganization may take one of three forms: (1) a spin-off, the distribution by a corporation to its shareholders of the stock of a subsidiary corporation without the surrender by the shareholders of any of their stock in the parent; (2) a split-off, the distribution by a parent corporation of stock in its subsidiary in exchange for some of the stock of the parent; or (3) a split-up, the distribution of stock in two or more corporations in return for all of the stock of the distributing corporation. Under the 1939 Code, the tax consequences of a corporate division depended on the method used to achieve the separation; under the present Code, the form of the division is not determinative of the result.ⁿ¹

[2] Effect on Distributees.

[a] Nonrecognition of Gain or Loss.

IRC Section 355 provides for the tax-free distribution of stock or securities in a corporation controlled by the distributing corporation immediately before the distribution,ⁿ¹ provided certain conditions are satisfied.ⁿ²

[i] The "Device" Rule. The distribution must not be used principally as a device for the distribution of earnings and profits (of either the distributing corporation or the controlled corporation).ⁿ³ The mere fact that stock or securities in the distributing corporation or the controlled corporation are sold following the distribution will not be construed to mean that the transaction is being used principally as a bail-out device.ⁿ⁴ However, a sale made pursuant to an arrangement negotiated or agreed upon prior to the distribution is strong evidence of an attempt to distribute earnings and profits, a sale that is not prearranged is only evidence of a device.ⁿ⁵

The regulations list two other factors that are evidence of a device. The first is a distribution that is pro rata or substantially pro rata among the shareholders of the distributing corporation.ⁿ⁶ The second takes into account the

nature, kind, amount, and use of the assets of the distributing and controlled corporations immediately after the transaction. The existence of assets that are not used in a trade or business that satisfies the active business requirement (for example, excess cash or liquid assets) is evidence of a device.ⁿ⁷ There is also such evidence if the business of either the distributing corporation or the controlled corporation is a "secondary business" that continues as such for a significant period of time and can be sold without adversely affecting the business of the other corporation.ⁿ⁸

The regulations also set forth three nondevice factors, namely, (1) a corporate business purpose for the transaction, (2) a distributing corporation that is publicly traded and has no shareholder who is directly or indirectly the beneficial owner of more than 5 percent of any class of stock, and (3) shareholders that are domestic corporations so that, if the transaction were not governed by *IRC Section 355*, the distributee would be entitled to a dividends received deduction.ⁿ⁹

The requirement, judicially originated,ⁿ¹⁰ but now part of the Regulations, that the distribution be in furtherance of a business purpose is designed to provide nonrecognition treatment only to distributions that are incident to readjustments of corporate structures required by business exigencies.ⁿ¹¹ The purpose must be a corporate business purpose, that is, a real and substantial nonfederal tax purpose.ⁿ¹² It is important to note that the business purpose requirement extends to the distribution. If a corporate business purpose can be carried out through a nontaxable transaction that does not involve the distribution of stock of a controlled corporation, and that is neither impractical nor unduly expensive, the separation is not carried out for that business purpose.ⁿ¹³

The role of business purpose in corporate separations can be illustrated by comparing two situations presented in *Revenue Ruling 69-460*.ⁿ¹⁴ In the first, key employees desired to purchase stock in the distributing corporation. However, the purchase of such stock interest would have been expensive due to the inclusion of the controlled corporation's stock in the assets of the distributing corporation. Furthermore, the distributing corporation was not desirous of giving its employees any interest in the controlled corporation. By distributing stock in the controlled corporation to the shareholders of the distributing corporation, the sale of an interest in the distributing corporation became feasible. Thus, the distribution furthered a business purpose of the corporation. In the second situation, the sale to the key employee was of stock in the controlled corporation rather than in the distributing corporation. Since the sale could have been accomplished without any distribution of the controlled corporation's stock, the Service held that the distribution of that corporation's stock to the sole stockholder of the parent corporation was not undertaken for valid business reasons.

A final requirement, independent but related to the device rule, calls for a continuity of interest on the part of one or more persons who were owners of the enterprise prior to the transaction. In this context, those owners must own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified forms in which the enterprise is conducted after the separation.ⁿ¹⁵

[ii] The Active Business Requirement. Immediately following the distribution, both the distributing corporation and the controlled corporation must be engaged in the active conduct of a trade or business; but if immediately prior to the distribution, the distributing corporation had no assets other than stock or securities in the controlled corporations, then the Code requires that each of the controlled corporations be engaged in the active conduct of a trade or business immediately after the transaction.ⁿ¹⁶

A corporation will be considered to be engaged in the active conduct of a trade or business only if (1) it actively conducts the trade or business itself or substantially all of its assets consist of stock and securities in a controlled corporation which is so engaged;ⁿ¹⁷ (2) the trade or business has been actively conducted throughout the five-year period ending on the date of distribution; (3) the trade or business was not acquired during such five-year period in a transaction in which gain or loss was recognized to any extent; and (4) control of a corporation that (at the time of acquisition of control) was conducting the trade or business was not acquired by a distributee corporation or by the distributing corporation, directly or indirectly, within the five-year period, or if control was so acquired, in each instance

it was acquired only in nonrecognition transactions or by reason of such transactions combined with acquisitions before the five-year period.ⁿ¹⁸ For purposes of the last requirement, all distributee corporations that are members of the same affiliated group are treated as one distributee corporation.ⁿ¹⁹

IRC Section 355(b)(3)(A), applicable to distributions made after May 17, 2006, provides that a corporation is treated as meeting the active business requirement only if the corporation is engaged in the active conduct of a trade or business.^{n19.1} All members of the corporation's separate affiliated group are treated as one corporation.^{n19.2}

The regulations provide that a trade or business consists of a specific group of activities carried on for the purpose of earning income or profit from only such group of activities and that the activities included in such group must include every operation which forms a part of, or a step in, the process of earning income or profit from such group. The holding of investment property and the ownership of real property all or substantially all of which is used by the owner in the operation of a trade or business are excluded from the category of trade or business.ⁿ²⁰ At one time groups of activities which form a part of a business operated for profit, but do not themselves independently produce income were once considered not to be a trade or business. Although the Regulations no longer decree this as part of the active business requirement, such activities may constitute a secondary business as defined by the device rule.

[iii] The Distribution Requirement. The distributing corporation must either (a) distribute all of the stock and securities in the controlled corporation held by it immediately before the distribution, or (b) distribute at least 80 percent of the voting stock and at least 80 percent of the total number of shares of all other classes of stock of the controlled corporation, and establish to the satisfaction of the Service that the retention of stock or securities in the controlled corporation was not in pursuance of a plan of tax avoidance.ⁿ²¹

For purposes of determining the tax treatment of transfers of property to the controlled corporation by the distributing corporation, the fact that shareholders of the distributing corporation dispose of part or all of the distributed stock, or that the corporation whose stock was distributed issues additional stock, shall not be taken into account in determining control.ⁿ²²

Because the distribution must divest the distributing corporation of its control of the controlled corporation, a transfer of less than a controlling interest will disqualify the transaction, unless the transfer can be identified as a first step in a planned divestiture of control under a binding commitment to take all steps necessary to distribute control.ⁿ²³ However, it has been suggested that *IRC Section 355* would apply where control is distributed through multiple distributions actually taking place within a short period of time such as twelve months, even though the corporation is not under a binding obligation to distribute control.ⁿ²⁴

A distribution meeting the above requirements ("device" rule, active business requirement, and distribution requirement) will qualify for nonrecognition treatment whether or not it is pro rata with respect to all of the shareholders of the distributing corporation.ⁿ²⁵ Furthermore, although many corporate separations follow a "D" reorganization (the transfer of property to a corporation controlled after the transfer by the transferor corporation or its shareholders), the distribution need not be part of a reorganization, thereby permitting the tax-free distribution of stock or securities in an existing controlled corporation.ⁿ²⁶

[b] Limitations on Nonrecognition. *IRC Section 355(a)(3)(A)* restricts the scope of Section 355(a)(1) by making the latter provision inapplicable if the distribution consists of securities in the controlled corporation and such securities are in a principal amount greater than the principal amount of the securities surrendered by the taxpayer, or if securities are received and none are surrendered. In addition, under Section 355(a)(3)(B), any stock of the controlled corporation acquired by "the distributing corporation in a taxable transaction occurring within five years of the distribution will not be treated as stock, but as other property." The term "stock" as used in the previous sentence means stock interest and not merely stock certificate. Thus, a corporation that acquired stock in a controlled corporation in a taxable transaction occurring within five years of the distribution was held to have distributed other property, even though, prior to the

distribution and as part of a tax-free recapitalization, it had exchanged the acquired shares for the shares ultimately distributed.ⁿ²⁷

A further exception precludes nonrecognition treatment to the extent that any stock (including nonqualified preferred stock, as defined in *IRC Section 351(g)(2)*), securities, or other property received is attributable to interest that accrued on securities on or after the beginning of the holder's holding period.ⁿ²⁸ In addition, the amount so excluded is treated as interest income and not "boot," so that the amount must be taken into income even though no gain is realized on the transaction as a whole.ⁿ²⁹ Nonqualified preferred stock (as defined in *IRC Section 351(g)(2)*) received in a distribution with respect to stock other than nonqualified stock (as so defined) is not treated as stock or securities.ⁿ³⁰

For purposes of *IRC Section 355(a)(3)(D)*, preferred stock is qualified preferred stock, even though it is described in *IRC Section 351(g)(2)*, if it is received in exchange for, or in a distribution with respect to, preferred stock (the original preferred stock) that is qualified preferred stock, provided (i) (a) the original stock is qualified preferred stock solely because, on its issue date, either a right or obligation described in *IRC Section 351(g)(2)(A)(i)-(iii)* was not exercisable until after a 20-year period beginning on the issue date, or (b) the right or obligation was exercisable within the 20-year period but was subject to a contingency which made remote the likelihood of the redemption or purchase, or (c) the issuer's (or a related party's) right to redeem or purchase the stock was not likely to be exercised within the 20-year period, or (d) because of any combination of these reasons; and (ii) the stock received is substantially identical to the original preferred stock.ⁿ³¹ The stock received will continue to be treated as qualified preferred stock in subsequent transactions involving the stock.ⁿ³²

Stock is substantially identical to the original preferred stock if (i) the stock received does not contain any terms that, in relation to the terms of the original preferred stock, either decrease the period in which a right or obligation described in *IRC Section 351(g)(2)(A)(iii)* can be exercised, or increase the likelihood that the right or obligation will be exercised, or accelerate the timing of the returns from the stock, including the timing of actual or deemed dividends or other distribution received on the stock; and (ii) as a result of the exchange or distribution, exercise of the right or obligation does not become more likely than not to occur within the 20-year period beginning on the issue date of the original preferred stock.ⁿ³³

Preferred stock containing a right or obligation described in *IRC Section 351(g)(2)(B)(i)-(iii)* that is exercisable only upon the holder's separation from service from the issuer or a related person will be treated as transferred in connection with the performance of services, if the stock is received in exchange for, or in a distribution with respect to, existing stock containing a similar right or obligation that was issued in exchange for services.ⁿ³⁴ In applying the rules relating to nonqualified preferred stock, the preferred stock received will continue to be treated as transferred in connection with the performance of services in subsequent transactions involving the stock.

[c] Receipt of "Boot."

[i] Extent and Character of Recognized Gain. Although the tax-free character of a divisive reorganization is seemingly predicated on the distribution of "solely stock or securities," the receipt of other property in connection with the distribution is not a complete bar to nonrecognition. If the corporate separation involves a surrender of stock by the distributee (a split-off or split-up), *IRC Section 356(a)(1)* will operate to limit the recognized gain to the amount of money and the fair market value of other property received by the distributee.ⁿ³⁵ The character of the recognized gain will turn on whether the exchange has the effect of the distribution of a dividend, and if it does, then the taxpayer will be called upon to treat as a dividend so much of his *recognized* gain as is equal to his ratable share of the corporation's *accumulated* earnings and profits.ⁿ³⁶ But if the transaction is a spin-off where no stock is surrendered, then no matter whether gain or loss is *realized* on the distribution, the amount of cash and the value of other property received will be considered an *IRC Section 301* distribution, causing dividend consequences to attach to the extent of the corporation's *current and accumulated* earnings and profits.ⁿ³⁷

[ii] Securities as Other Property. The distributee in an *IRC Section 355* transaction will be the recipient of "boot" if he receives securities in the controlled corporation and either (1) he does not surrender securities in the distributing corporation, or (2) he surrenders securities in the distributing corporation, but the principal amount of the securities received exceeds the principal amount of the securities surrendered.ⁿ³⁸ The amount of "boot" when securities are received and none are surrendered is equal to the fair market value of the securities received;ⁿ³⁹ the fair market value of the excess principal amount will constitute the other property received when securities are surrendered and securities in a greater principal amount are received.ⁿ⁴⁰

[d] Basis and Holding Period. The basis of property received in an *IRC Section 355* distribution is governed by *IRC Section 358*, the operation of which has been examined previously in connection with incorporating exchanges under *IRC Section 351*ⁿ⁴¹ and reorganization exchanges under *IRC Section 354*.ⁿ⁴² Nonrecognition property (stock, and securities which are not treated as other property by *IRC Section 356(d)*) assumes a basis equal to the basis of the stock or securities with respect to which the distribution is made, with an adjustment downward in the amount of "boot" received and upward in the amount of gain recognized (including the amount of such gain treated as a dividend).ⁿ⁴³ If the transaction is a split-up, where the distributee exchanges all of his stock or securities in the distributing corporation for stock or securities in the controlled corporations, the basis determined under *IRC Section 358(a)* must be allocated among the stock and securities permitted to be received tax-free in proportion to their respective fair market values.ⁿ⁴⁴ Allocation is also mandated when the distribution takes the form of a split-off or spin-off, but here the allocation must take into account not only the stock or securities received, but also those of the distributing corporation which are retained.ⁿ⁴⁵ Property constituting "boot" will always take a basis equal to its fair market value.ⁿ⁴⁶

If a shareholder or security holder receives shares of stock or securities of more than one class, or receives "boot" in addition, then, to the extent the terms of the distribution specify that shares of stock or securities of a particular class or "boot" is received with respect to a particular share of stock or security or a particular class of stock or securities of the distributing corporation, the terms shall control the allocation of basis if they are economically reasonable.ⁿ⁴⁷ If such terms do not exist, a pro rata portion of the shares of stock and securities of each class received and a pro rata portion of the boot is treated as received with respect to each share of stock and security of the distributing corporation with respect to which the distribution is made, based on the fair market value of each share of stock or security.ⁿ⁴⁸

If a share of stock or security is received in exchange for, or with respect to, more than one share of stock or security and such shares or securities were acquired on different dates or at different prices, the share of stock or security received shall be divided into segments based on the relative fair market values of the shares of stock or securities surrendered in exchange for the share or security or the relative fair market values of the shares or securities with respect to which the share or security is received in a distribution.ⁿ⁴⁹

If a shareholder or security holder that acquired shares or securities on different dates or at different prices exchanges the shares or securities, or receives a distribution of shares or securities, and is not able to identify which particular share of stock is received in exchange for, or in respect to, a particular share of stock or security, the shareholder or security holder may designate which share of stock or security is received in exchange for, or with respect to, a particular share of stock or security, provided the designation is consistent with the terms of the exchange or distribution.ⁿ⁵⁰ The designation must be made on or before the first date on which the basis of a share of stock or a security of the distributing corporation or the controlled corporation is relevant, as when the shares or securities are sold or otherwise transferred.ⁿ⁵¹ If the designation is not made in a case in which the shareholder is unable to identify which share of stock is received in exchange for, or in respect to, a particular share of stock, the shareholder will be treated as selling or transferring the share received in respect of the earliest share purchased or acquired.ⁿ⁵²

As a general rule, the period for which the taxpayer held the stock or securities surrendered in a split-off or split-up, or for which he held the shares retained in a spin-off, will be added to the holding period of the stock and securities received tax-free in the distribution.ⁿ⁵³ The holding period of any other property received in the distribution will start with its acquisition.

[3] Effect on the Distributing Corporation.**[a] Gain or Loss.**

As a general rule, a distribution of stock or securities in the controlled corporation ("qualified property") as part of a corporate division does not require the recognition of gain or loss by the distributing corporation.ⁿ¹ A distribution of appreciated property other than stock or securities in the controlled corporation ("disqualified property") results in the recognition of gain by the distributing corporation; no loss is recognized if the disqualified property has a value less than basis.ⁿ²

Recognition of corporate-level gain (but not shareholder gain) will be required for any "disqualified distribution" of stock or securities in the controlled corporation made after October 9, 1990.ⁿ³ An *IRC Section 355* distribution is a disqualified distribution if, immediately after the distribution, any person holds "disqualified stock" in either the distributing corporation or any distributed controlled corporation constituting a 50-percent or greater interest in such corporation.ⁿ⁴ Under the regulations, a distribution is not a disqualified distribution if the distribution does not violate the purposes of *IRC Section 355(d)*, namely, the effect of the distribution is neither to increase ownership (combined direct and indirect) in the distributing corporation or any controlled corporation by a disqualified person, nor to provide a disqualified person with a purchased basis in the stock of any controlled corporation.ⁿ⁵

A person has a 50-percent or greater interest in the distributing corporation or any controlled corporation if that person owns stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of all shares entitled to vote.ⁿ⁶ Related persons (determined under the rules contained in *IRC Sections 267(b)* and *707(b)(1)*) are treated as one person, as are two or more persons acting pursuant to a plan or arrangement with respect to acquisitions of stock or securities in the distributing or controlled corporation.ⁿ⁷ In addition, the entity-shareholder attribution rules of *IRC Section 318(a)(2)* apply, with the ownership threshold reduced from 50 percent to 10 percent, and with the rules also applied to attribute ownership of securities held by the entity to the shareholder.ⁿ⁸

Stock in the distributing corporation or any controlled corporation is disqualified stock if acquired by purchase after October 9, 1990, and during the five-year period ending on the date of distribution.ⁿ⁹ Stock in any controlled corporation is also disqualified stock if received in the distribution, to the extent attributable to stock or securities in the distributing corporation acquired during the same five-year period.ⁿ¹⁰ The running of the five-year period is suspended for any period during which the holder's risk of loss with respect to stock or securities, or with respect to any portion of the activities of the corporation, is (directly or indirectly) substantially diminished by an option, a short sale, any special class or stock, or any other device or transaction.ⁿ¹¹

Generally, an option is not treated as exercised for purposes of *IRC Section 355(d)*.ⁿ¹² However, in determining whether a person has acquired a 50 percent or greater interest under *IRC Section 355(d)(4)*, an option that has not been exercised when a distribution occurs is treated as exercised on the date it was issued or most recently transferred if (a) its exercise (whether by itself or in conjunction with the deemed exercise or one or more other options) would cause a person to become a disqualified person; and (b) immediately after the distribution, it is reasonably certain that the option will be exercised.ⁿ¹³ An option that is treated as exercised is so treated both for purposes of determining the percentage of voting power owned by the holder and for purposes of determining the percentage of the value of stock owned by the holder.ⁿ¹⁴

Stock acquired by purchase ceases to be acquired by that purchase if the basis relating from that purchase is eliminated.ⁿ¹⁵ Basis in the stock of a corporation (or an interest in another entity) is eliminated if and when it would no longer be taken into account by any person in determining gain or loss on a sale or exchange of any stock of the corporation (or an interest in another entity).ⁿ¹⁶ However, basis is not eliminated if it is allocated between the stock of two corporations under *Section 1.358-2(a) of the regulations*. In addition, the basis resulting from a purchase of the

stock of a distributing corporation that is exchanged for stock in a controlled corporation is not eliminated, notwithstanding the basis elimination rule.ⁿ¹⁷

Stock or securities are generally considered acquired by purchase if they are acquired (i) in a transaction in which the acquirer's basis is not determined in whole or in part by reference to the basis of the stock or securities in the hands of the person from whom acquired, (ii) from a decedent, or (iii) pursuant to an incorporating transfer or acquisitive or divisive reorganization.ⁿ¹⁸ However, property acquired in an acquisition to which *IRC Section 351* applies will be deemed to be acquired by purchase to the extent acquired in exchange for any cash, cash item, marketable stock or security, or debt of the transferor.ⁿ¹⁹

If property is acquired in a carryover basis transaction from a transferor who acquired the property by purchase, the acquirer is generally considered to have acquired the property by purchase on the date that the transferor actually acquired it by purchase.ⁿ²⁰

A deemed purchase will occur if a person acquires by purchase an interest in an entity and any stock or securities held by the entity are attributed to that person under the rules of *IRC Section 318(a)(2)*, modified as described above.ⁿ²¹ In such case, the person is treated as having acquired the stock or securities by purchase on the later of the date of purchase of the interest in the entity or the date the stock or securities are purchased by the entity (or considered as purchased under the carryover basis rules).ⁿ²² The "deemed purchase" rule also applies to determine the timing of a purchase where a person and an entity are treated as a single person under the related party rules.ⁿ²³

Corporate gain recognition is required as well, if, pursuant to a plan or arrangement related to the distribution, a person acquires a 50-percent or more interest (by vote or value) in either the distributing corporation or any controlled corporation.ⁿ²⁴ The amount of gain is the same whether the acquisition is of the distributing corporation or the controlled corporation, namely, the amount of gain that the distributing corporation would have recognized had the stock of the controlled corporation been sold for fair market value on the date of distribution; the gain is recognized immediately before the distribution.ⁿ²⁵ No adjustment to the basis of the stock or assets of either corporation is allowed by reason of the recognition of gain.

Acquisitions occurring within the four-year period beginning two years before the date of distribution are presumed to have occurred pursuant to a plan or arrangement, unless it can be shown that the acquisition during the four-year period was unrelated to the distribution.ⁿ²⁶ In the case of a post-distribution acquisition (other than involving a public offering), the distribution and acquisition can be part of a plan only if there was an agreement, understanding, arrangement, or substantial negotiation regarding the acquisition or similar acquisition at some time during the two-year period ending on the date of the distribution.ⁿ²⁷ The existence of an agreement or the like within the two-year period tends to show that the distribution and acquisition are part of the plan. However, all facts and circumstances must be considered to determine if the distribution and acquisition are part of a plan.ⁿ²⁸

If stock of the distributing or controlled corporation is acquired pursuant to an option, the option will be treated as an agreement, understanding, or arrangement to acquire the stock on the earliest of the following dates: the date that the option is written, if the option was more likely than not to be exercised as of that date; the date that the option is transferred, if the option is more likely than not to be exercised as of that date; and the date that the option is modified in a manner that materially increases the likelihood of exercise, if the option was more likely than not to be exercised as of that date.ⁿ²⁹ However, if the writing, transfer, or modification of the option had a principal purpose of avoiding *IRC Section 355(e)*, the option will be treated as an agreement, understanding, arrangement, or substantial negotiation to acquire the stock on the date of the distribution.

A plan (or series of related transactions) is not one that will cause gain recognition if, immediately after completion of the plan or transactions, the distributing corporation and all controlled corporations are members of a single affiliated group of corporations.ⁿ³⁰

Example 1:

P Corp. owns all of the stock of *S* Corp., which in turn owns all of the stock of *S1* Corp. The three are members of an affiliated group of corporations. *P* is merged into unrelated *X* Corp. in a transaction in which the former shareholders of *X* will own 50 percent or more of the vote or value of *X* after the merger. As part of the plan of merger, *S1* will be distributed by *S* to *X* in a transaction that otherwise qualifies under *IRC Section 355*. After the distribution, *S*, *S1* and *X* will remain members of a single affiliated group of corporations. Even though there has been an acquisition and a distribution that is part of a plan or series of related transaction, corporate gain recognition is not required because the distributing corporation, *S*, and the controlled corporation, *S1*, remain within a single affiliated group of corporations after the distribution.

Under *IRC Section 355(e)(3)(A)*, the following acquisitions are not taken into account, provided that stock held before the acquisition was not acquired pursuant to a plan or series of related transactions to acquire a 50-percent or greater ownership in either the distributing or controlled corporation:

- (1) The acquisition of stock in any controlled corporation by the distributing corporation.
- (2) The acquisition by a person of stock in any controlled corporation by reason of holding stock or securities in the distributing corporation (eg, the receipt by a distributing corporation shareholder of controlled corporation stock in a distribution in which a shareholder that did not own 50 percent or more of the stock of the distributing corporation owns 50 percent or more of the stock of the controlled corporation).
- (3) The acquisition by a person of stock in any successor corporation of the distributing corporation or any controlled corporation by reason of holding stock or securities in the distributing or controlled corporation (eg, the receipt by former shareholders of the distributing corporation of 50 percent or more of the stock of a successor corporation in a merger of the distributing corporation).
- (4) The acquisition of stock in the distributing corporation or any controlled corporation to the extent that the percentage of stock owned directly or indirectly in such corporation by each person owning stock in such corporation immediately before the acquisition does not decrease.

Example 2:

A owns all of the stock of *P* Corp. which owns all of the stock of *S* Corp. The stock of *S* is distributed to *A* in a transaction that otherwise qualifies under *IRC Section 355*. As part of a plan, *P* then merges with *X* Corp., all of the stock of which is owned by *A*. Gain recognition is not required because *A* owns directly or indirectly 100 percent of the stock of both *X*, the successor to *P*, and *S* before and after the transaction.ⁿ³¹

If the assets of the distributing corporation or any controlled corporation are acquired by a successor corporation in an "A," "C," or "D," reorganization, or any other transaction specified in regulations, the shareholders (immediately before the acquisition) of the corporation acquiring the assets are treated as acquiring stock in the corporation from which the assets were acquired.ⁿ³²

IRC Section 355 (or so much of *IRC Section 356* as relates to it) does not apply to any distribution of stock from one member of an affiliated group of corporations to another member of the group (an "intragroup spinoff") if the distribution is part of a plan or series of related transactions pursuant to which one or more persons acquire directly or

indirectly stock representing a 50-percent or greater interest in the distributing corporation or any controlled corporation.ⁿ³³

Example 3:

P Corp. owns all of the stock of *S* Corp., which in turn owns all of the stock of *S1* Corp. *S* distributes the stock of *S1* to *P* as a part of a plan or series of transactions in which *P* then distributes *S* to its shareholders and then *P* is merged into unrelated *X* Corp. After the merger, former shareholders of *X* Corp. own 50 percent or more of the voting power or value of the merged corporation. Because the distribution of *S1* by *S* is part of a plan or series of transactions in which *S* is distributed by *P* outside the *P* affiliated group and *P* is then acquired in a transaction governed by *IRC Section 355(e)*, application of *IRC Section 355(f)* causes *IRC Section 355* to be inapplicable to the intragroup spinoff of *S1* to *P*. In addition, the distribution of *S* by *P* is subject to the gain recognition rule of *IRC Section 355(e)*.

If there is a distribution governed by *IRC Section 355(e)(1)*, the statutory period for the assessment of any deficiency attributable to any part of the gain recognized by reason of the distribution does not expire before three years from the date the Service is notified by the taxpayer that the distribution occurred, and the deficiency may be assessed at any time during that three-year period.ⁿ³⁴

[i] Distributions Involving Foreign Corporations. If the distributing corporation is a domestic corporation and the controlled corporation is a foreign corporation, the controlled corporation will be considered to be a corporation and no gain will be recognized to the distributing corporation.ⁿ³⁵ If the distributee is an individual, then, solely for the purposes of determining gain recognized by the distributing corporation, the controlled corporation will not be considered to be a corporation, and the distributing corporation will recognize any gain (but not loss) realized on the distribution.ⁿ³⁶ The rules do not apply to a foreign distributee to the extent gain is recognized under *IRC Section 367(e)(1)* (transfer by a domestic corporation to a person who is not a United States person).ⁿ³⁷

If the distributing corporation is a controlled foreign corporation, *pro rata* distributions of stock of the controlled corporation will result in a reduction in the distributee shareholder's basis to the extent that the distributee's Section 1248 amount is reduced.ⁿ³⁸ If the distribution by the controlled foreign corporation is not *pro rata*, United States shareholders receive income to the extent that the shareholders' potential dividend under *IRC Section 1248* is reduced.ⁿ³⁹ Any deemed dividend included in income by a foreign corporation is not treated as foreign personal holding company income under the controlled foreign corporation rules.ⁿ⁴⁰

Under *IRC Section 1248(f)(1)*, a distribution by a domestic corporation of stock in a controlled foreign corporation produces a dividend for the distributing corporation to the extent of the earnings and profits of the foreign corporation attributable to the stock that were accumulated in taxable years of the foreign corporation beginning after 1962, and during the period the stock was held by the domestic corporation while the foreign corporation was a controlled foreign corporation. In addition, as mentioned above, any distribution of stock of a foreign subsidiary to foreign persons (persons other than citizens or residents of the United States, or domestic corporations) requires the recognition of gain (but not loss) by the distributing corporation.ⁿ⁴¹

[b] Earnings and Profits. *IRC Section 312(h)(1)* decrees that "proper allocation with respect to the earnings and profits of the distributing corporation and the controlled corporation (or corporations) shall be made under regulations prescribed by the Secretary or his delegate." The Regulations that have been prescribed condition the mode of allocation on the form of the transaction. If the corporate separation follows a "D" reorganization, earnings and profits are allocated between the distributing corporation and the newly created controlled corporation in proportion to the fair market values of the assets transferred and the assets retained.ⁿ⁴² However, the Regulations go on to provide that in a proper case, the allocation should be made "in proportion to the net basis of the assets transferred and of the assets retained or by such other method as may be appropriate under the facts and circumstances of the case."ⁿ⁴³ On the other hand, if the *IRC Section 355* distribution or exchange is not made as part of a "D" reorganization, the Regulations call

for a decrease in the earnings and profits of the distributing corporation to the extent of the lesser of (1) the amount by which earnings and profits would have been decreased if the distributing corporation had transferred the stock of the controlled corporation to a new corporation as part of a "D" reorganization, and immediately thereafter distributed the stock of such new corporation in an *IRC Section 355* distribution, or (2) the net worth of the controlled corporation.ⁿ⁴⁴ But whether the *IRC Section 355* distribution is part of a "D" reorganization or not, a deficit of the distributing corporation can never be allocated to the controlled corporation.ⁿ⁴⁵

[4] Distributions Involving Disqualified Investment Corporations.

IRC Section 355 does not apply to any distribution that is part of a transaction (or series of transactions) if, immediately after the transaction (or series), (i) either the distributing corporation or controlled corporation is a disqualified investment corporation, and (ii) any person holds a 50-percent or greater interest in any disqualified investment corporation, but only if the person did not hold such an interest in the corporation immediately before the transaction (or series).ⁿ¹ A disqualified investment corporation is defined as a distributing or controlled corporation with a fair market value of investment assets of 2.3 or more of the fair market value of all assets of the corporation.ⁿ²

Investment assets include cash, stock or securities in a corporation, any interest in a partnership, any debt instrument or other evidence of indebtedness, any option, any forward or futures contract, any notional principal contract, any derivative, any foreign currency, or any similar asset.ⁿ³ Investment assets do not include:

- (1) any asset that is held for use in the active and regular conduct of (a) a lending or finance business within the meaning of *IRC Section 954(h)(4)*, (b) a bank (as defined in *IRC Section 581*), a domestic building and loan association (within the meaning of *IRC Section 7701(a)(19)*, or (c) any similar institution specified by the Service;ⁿ⁴
- (2) any security (as defined in *IRC Section 475(c)(2)*) that is held by a dealer in securities and is marked to market;ⁿ⁵
- (3) any stock or securities, any debt instrument or other evidence of indebtedness, or any option, any forward or futures contract, any notional principal contract, or any derivative issued by a corporation that is a 20-percent controlled entity with respect to the distributing or controlled corporation;ⁿ⁶ or
- (4) any interest in a partnership, or any debt instrument or other evidence of indebtedness issued by the partnership, if one or more of the trades or businesses are (or, without regard to the five-year requirement of *IRC Section 355(b)(2)(B)*, would be) taken into account by the distributing or controlled corporation in determining whether the active business requirements are met with respect to the distribution.ⁿ⁷

[5] Filing Requirements.

Every corporation that engages in an *IRC Section 355* distribution shall attach to its return for the year of distribution a detailed statement setting forth "such data as may be appropriate in order to show compliance with the provisions of the section."ⁿ¹ Every taxpayer who receives such a distribution shall attach to the return for the year of distribution a statement containing such data as may be appropriate in order to show the applicability of *IRC Section 355*.ⁿ² The taxpayer's statement should include a description of the stock and securities received and surrendered and the names and addresses of all corporations involved in the transactions.ⁿ³

FOOTNOTES:

(n1)Footnote 1. For purposes of *IRC § 367*, the provision designed to protect against tax-avoidance transfers from United States persons to foreign corporations, any *IRC § 355* distribution is treated as an exchange whether or not in fact it is an exchange. *IRC § 367(c)*. In addition, gain may be recognized by the distributing corporation if the

distribution is made by a domestic shareholder to a person who is not a US person. *IRC* § 367(e)(1). See *Treas Reg* § 1.367(e)-1 for exceptions to the gain recognition rule and the manner in which the amount of recognized gain will be determined.

(n2)Footnote 1. A corporation controls another if it owns 80 percent of the voting stock and 80 percent of the total number of shares of all other classes of stock of such other corporation. *IRC* § 368(c). The required control must be more than transitory or illusory. *Rev Rul* 63-260, 1963-2 CB 147 ; but see *Rev Rul* 69-407, 1969-2 CB 50 , upholding a distribution of stock of a controlled corporation after 80 percent control was achieved in a recapitalization.

(n3)Footnote 2. A more detailed discussion of the conditions can be found in 3A Rabkin & Johnson, *Federal Income, Gift and Estate Taxation*, § 31.14 (Matthew Bender). See also Jacobs, "The Anatomy of A Spin-Off," 1967 *Duke LJ* 1.

A checklist of the information which must be included in a request for ruling under *IRC* § 355 can be found in *Rev Proc* 96-30, 1996-1 CB 696 , modified and amplified by *Rev Proc* 2003-48, 2003-2 CB 86 , reprinted in App E.

(n4)Footnote 3. *IRC* § 355(a)(1)(B). A distribution cannot run afoul of the device rule where neither the distributing corporation nor the controlled corporation has earnings of profits, *Treas Reg* § 1.355-2(d)(5); or where the distribution, if taxable, would not result in dividend income to the distributees. *Treas Reg* § 1.355-2(d)(5)(iii), (iv). *Rev Rul* 71-383, 1971-2 CB 180 (distribution would have been substantially disproportionate redemption, taxable as capital gain).

(n5)Footnote 4. *IRC* § 355(a)(1)(B).

(n6)Footnote 5. *Treas Reg* § 1.355-2(d)(2)(iii). The greater the percentage of stock sold after the distribution, and the shorter the period of time between distribution and sale, the greater the evidence of a device. See, eg, *South Tulsa Pathology Laboratory, Inc v Commr*, 118 TC 84 (2002) .

A prearranged sale defeated the transaction in *Rev Rul* 55-103, 1955-1 CB 31 . However, in *Rev Rul* 59-197, 1959-1 CB 77 , the sale had a valid business purpose (to give a key employee a proprietary interest in the corporation) so that the transaction was not considered a "device." A similar conclusion was reached in *Pulliam v Commr*, *TC Memo* 1997-274 , nonacq 1999-1 IRB 5 .

(n7)Footnote 6. *Treas Reg* § 1.355-2(d)(2)(ii).

(n8)Footnote 7. *Treas Reg* § 1.355-2(d)(2)(iv)(B).

(n9)Footnote 8. *Treas Reg* § 1.355-2(d)(2)(iv)(C). A secondary business is one whose principal function is to serve the other corporation.

(n10)Footnote 9. *Treas Reg* § 1.355-2(d)(3). The stronger the evidence of a device, the stronger the business purpose required to prevent the determination that the transaction was used principally as a device.

(n11)Footnote 10. *Gregory v Helvering*, 293 US 465 (1935) . It has been held that even if there is no tax avoidance motive, a distribution lacking a business purpose will not come within *IRC* § 355. *Commr v Wilson*, 353 F2d 184 (9th Cir 1965) .

(n12)Footnote 11. *Treas Reg § 1.355-2(b)(1)*. See, eg, *Rev Rul 2003-52, 2003-1 CB 960* . Coakley, "The Evolving Business Purpose Requirement for Spin-Off Transactions," *103 Tax Notes 1141 (2004)*; Beller, "Business Purpose Under Section 355: What Works and What Doesn't?" *58 Tax Notes 1109 (1993)*.

In determining whether a distribution of stock of a controlled corporation satisfies the business purpose requirement, the fact the *IRC § 355* permits a distributing corporation to distribute stock of a controlled corporation without recognition of gain does not present a potential for avoidance of federal taxes. *Rev Rul 2003-110, 2003-2 CB 1083* .

(n13)Footnote 12. *Treas Reg § 1.355-1(b)(2)*. A shareholder purpose is not a corporate business purpose. However, a shareholder purpose for a transaction may be so nearly coextensive with a corporate business purpose so as to preclude any distinction between them. In such case, the transaction satisfies the business purpose requirement.

According to *Rev Rul 2003-55, 2003-1 CB 961* , the regulations do not require that the corporation succeed in meeting its corporate business purpose, as long as, at the time of the distribution, such a purpose exists and motivates, in whole or substantial part, the distribution. An unexpected change in market or business conditions following a distribution that prevents accomplishment of the business purpose will not prevent satisfaction of the requirement. The spinoff, in *Rev Rul 2003-55* , was undertaken in order to permit a public offering of the controlled corporation's stock. However, an unexpected deterioration in market conditions led the corporation and its advisors to a decision to postpone, and eventually abandon, the public offering.

A distribution that is expected to cause the aggregate value of the stock of a distributing corporation and the stock of a controlled corporation to exceed the pre-distribution value of the distributing corporation's stock satisfies the corporate business requirement where the increased value is expected to serve a corporate business purpose of either the distributing corporation or the controlled corporation (or both), even if it benefits the shareholders of the distributing corporation. *Rev Rul 2004-23, 2004-1 CB 585* .

(n14)Footnote 13. *Treas Reg § 1.355-2(d)(3)*. For examples of transactions involving a business purpose, see, eg, *King v Commr, 458 F2d 245 (6th Cir 1972)* ; *Rev Rul 2003-75, 2003-2 CB 79* ; *Rev Rul 2003-74, 2003-2 CB 77* ; *Rev Rul 89-101, 1989-2 CB 67* ; *Rev Rul 88-33, 1988-1 CB 115* ; *Rev Rul 85-127, 1985-2 CB 119* ; *Rev Rul 85-122, 1985-2 CB 118* ; *Rev Rul 82-131, 1982-2 CB 83* ; and *Rev Rul 77-22, 1977-1 CB 91* .

(n15)Footnote 14. *1969-2 CB 51* .

(n16)Footnote 15. *Treas Reg § 1.355-2(c)*. The requirement does not mandate that all owners of the distributing corporation prior to the distribution own stock in all of the corporations resulting from the separation. See, eg, *Treas Reg § 1.355-2(c)(2)*, Ex (1), involving a split-off in which one of two equal shareholders becomes the sole owner of the distributing corporation while the other owns 100 percent of the distributed corporation.

An example of a distribution made in furtherance of a business purpose that failed to meet the continuity of interest test can be found in *Rev Rul 69-293, 1969-1 CB 102* , where the shareholders lost their proprietary interest after the corporation amended its charter to become a nonprofit membership corporation.

(n17)Footnote 16. *IRC § 355(a)(1)(C), (b)(1)*.

The fact that the controlled corporation does not have any employees is one factor to consider in determining whether the corporation is actively engaged in a trade or business, but does not automatically prevent the transaction from qualifying under *IRC § 355*. *Rev Rul 80-181, 1980-2 CB 121* . The Service has held that a corporation, acting as a general partner in a real estate limited partnership, was engaged in the active conduct of a trade or business where its officers performed active and substantial management functions for the partnership, including decision-making regarding significant business decisions of the partnership and regular participation in the overall supervision, direction and control of the employees of the partnership in operating the partnership's rental business. The fact that the

corporation lacked employees to perform the operational services necessary to operate, the partnership's properties did not, of itself, cause the corporation to fail the active trade or business test. *Rev Rul 92-17, 1992-1 CB 142*. See also *Rev Rul 2002-49, 2002-2 CB 288*, and *Rev Rul 79-394, 1979-2 CB 141*, amplified by *Rev Rul 80-181, 1980-2 CB 121*.

Rev Rul 92-17 has been modified by *Rev Rul 2007-42, 2007-28 IRB 44*, to remove any requirement that a corporate partner must perform management functions in order for the partner to be treated as engaged in the active conduct of the trade or business of the partnership. Apparently, one crucial aspect is the extent of the corporate partner's interest in the partnership.

A REIT can be engaged in the active conduct of a trade or business solely by virtue of functions with respect to rental activity that produces income qualifying as rents from real property within the meaning of *IRC § 856(d)*. *Rev Rul 2001-29, 2001-1 CB 1348*.

(n18)Footnote 17. The "substantially all of its assets" requirement is satisfied for ruling purposes if 90 percent or more of the controlling corporation's gross assets consists of stock in corporations engaged in active conduct of a trade or business. *Rev Proc 77-37, 1977-2 CB 568*.

(n19)Footnote 18. *IRC § 355(b)(2)(A)-(D)*. The regulations provide an exception to the general no gain or loss rule in *IRC § 355(b)(2)(C)* and *(D)*, namely, that a direct or indirect acquisition of a trade or business by one member of an affiliated group from another member of the group is not the type of transaction to which the provisions were intended to apply. *Treas Reg § 1.355-3(b)(4)(iii)*.

A corporation was engaged in the active conduct of a trade or business during the five-year period even though it did not have any income in one of those years, where the reason for the lack of income was the unexpected bankruptcy of its single customer. *Rev Rul 82-219, 1982 CB 82*.

Gain recognition under *IRC § 357(c)*, because of an incorporating transfer where assumed liabilities exceeded the adjusted bases of the transferred assets, does not run afoul of the active business provisions. The prohibition against the acquisition of a trade or business in a taxable transaction contemplates the acquisition of the business from an outside source. *Rev Rul 78-442, 1978-2 CB 43*.

A Subchapter S corporation, that owned 50 percent of a subsidiary, acquired control of the subsidiary when the stock of the other 50 percent shareholder was redeemed by the subsidiary. Therefore, a spinoff of the subsidiary on the same day as the redemption was not tax-free. *McLaulin v Commr, 276 F3d 1269 (11th Cir 2001)*.

The Service will not ordinarily rule whether the active business requirement is met when, within the five-year period, a distributing corporation acquired control of a controlled corporation as a result of the distributing corporation transferring cash or other liquid or inactive assets to the controlled corporation in a transaction in which gain or loss was not recognized under *IRC § 351* or *368(a)(1)(D)*. *Rev Proc 2010-3, 2010-1 IRB 110, 116-117 (§ 4.01(27))*.

If a corporation engaged in the active conduct of one trade or business during the five-year period purchased, created, or otherwise acquired another trade or business in the same line of business, the acquisition of the other business is ordinarily treated as an expansion of the original business, all of which is treated as having been actively conducted during the five-year period, unless the acquisition effects a change of such character as to constitute the acquisition of a new or different business. *Treas Reg § 1.355-3(b)(3)(ii)*; *Rev Rul 2003-18, 2003-1 CB 467*. See also *Rev Rul 2003-38, 2003-1 CB 811*, where a retail store's creation of an Internet site to sell its products was treated as an expansion of the existing business.

(n20)Footnote 19. The *IRC § 1504(a)* definition of affiliated corporation is applied without regard to the definition of includible corporation contained in *IRC § 1504(b)*.

(n21)Footnote 19.1. The Service has interpreted *IRC § 355(b)(3)* as calling into question whether *Treas Reg § 1.355-3(b)(4)(iii)* appropriately reflects the 2006 amendment. However, the Service has given notice that it will not challenge transactions that would have come within *IRC § 355(b)(2)(C)* and *(D)* prior to the enactment of *IRC § 355(b)(3)* if the distributions are made before temporary or final regulations changing the rule are effective. *Notice 2007-60, 2007-35 IRB 466* .

IRC § 355(b)(3)(C) contains transitional rules providing that *IRC § 355(b)(3)(A)* shall not apply to any distribution made pursuant to a transaction that was (i) governed by an agreement binding on May 17, 2006, and at all times thereafter; (ii) described in a ruling request submitted to the Service on or before May 17, 2006; or (iii) described on or before May 17, 2006, in a public announcement or in a filing with the Securities and Exchange Commission. The provision requires a corporation to make an irrevocable election if the purpose of the election is to disqualify the distribution under *IRC § 355(a)*. The form and manner of the election are set forth in *Notice 2006-81, 2006-2 CB 595* .

(n22)Footnote 19.2. *IRC § 355(b)(3)(B)*. A corporation's separate affiliated group is the affiliated group that would be determined under *IRC § 1504(a)* if the corporation were the common parent and *IRC § 1504(b)* did not apply.

(n23)Footnote 20. *Treas Reg § 1.355-3(b)(2)(iv)*.

(n24)Footnote 21. *IRC § 355(a)(1)(D)*. A distribution of rights or warrants to purchase stock in the controlled corporation does not satisfy the distribution requirement. *Redding v Commr, 630 F2d 1169 (7th Cir 1980)* , *cert denied 450 US 913* .

The Service will not apply the *Court Holding* doctrine (or any formulation of the step transaction doctrine) to determine whether the distributed corporation was a controlled corporation immediately before the distribution solely because of any postdistribution acquisition or restructuring of the distributed corporation, whether prearranged or not. *Rev Rul 98-27, 1998-2 CB 315* .

(n25)Footnote 22. *IRC § 351(c)(2)*.

(n26)Footnote 23. *Commr v Gordon, 391 US 83 (1968)* .

(n27)Footnote 24. Note, "Federal Taxation: Multi-Step Stock Purchase Right Distribution Disqualified as Tax-Free Spin-Off," 1969 *Duke L J* 179.

(n28)Footnote 25. *IRC § 355(a)(2)(A)*.

(n29)Footnote 26. *IRC § 355(a)(2)(C)*.

(n30)Footnote 27. *Rev Rul 65-286, 1965-2 CB 92* .

(n31)Footnote 28. *IRC § 355(a)(3)(C)*. See § 3.02[2] for a description of nonqualified preferred stock.

(n32)Footnote 29. *IRC § 355(a)(3)(G)*. S Rep No 96-1035, 96th Cong, 2d Sess 38 (1980).

(n33)Footnote 30. *IRC § 355(a)(3)(D)*.

(n34)Footnote 31. *Treas Reg § 1.356-7(b)(1)*. The principles apply to rights to acquire stock. *Treas Reg § 1.356-7(d)*.

(n35)Footnote 32. *Treas Reg § 1.356-7(b)(3)*.

(n36)Footnote 33. *Treas Reg § 1.356-7(b)(2)*.

(n37)Footnote 34. *Treas Reg § 1.356-7(c)*. The rules apply for the purposes of *IRC §§ 354(a)(2)(C)(i)* and *356(e)(2)* as well as *IRC § 355(a)(3)(D)*.

(n38)Footnote 35. The receipt of "boot" does not permit the recognition of any loss realized on the distribution. *IRC § 356(c)*.

(n39)Footnote 36. *IRC § 356(a)(2)*. The provision is discussed in § 8.03[1][c][ii].

If Section 306 stock is exchanged, then the "boot" will be treated as a distribution to which *IRC § 301* applies. *IRC § 356(f)*.

(n40)Footnote 37. *IRC § 356(b)*; *Treas Reg § 1.356-2(b)*.

(n41)Footnote 38. *IRC § 356(d)(1)*. Rights issued by the distributing corporation or the controlled corporation are treated as securities with no principal amount for the purpose of *IRC § 355*. *Treas Reg § 1.355-1(c)*. Excluded is any right to acquire nonqualified preferred stock received in exchange for (or in a distribution with respect to) stock, or a right to acquire stock, other than nonqualified preferred stock. *Treas Reg § 1.356-6(a)(2)*. The term "rights to acquire stock" has the same meaning as it does under *IRC Sections 305* and *317*, discussed in Chapter 4.

(n42)Footnote 39. *IRC § 356(d)(2)(B)*. The combined effect of this rule and the treatment given to "boot" in spin-offs completely removes a spin-off in which securities only are distributed from the ambit of *IRC § 355*.

(n43)Footnote 40. *IRC § 356(d)(2)(C)*. Examples of the application of this provision can be found in § 8.03[1][c][iii].

(n44)Footnote 41. See § 3.03.

(n45)Footnote 42. See § 8.03[3].

(n46)Footnote 43. *IRC § 358(a)(1)*.

(n47)Footnote 44. *IRC § 358(b)(1)*.

(n48)Footnote 45. *IRC § 358(b)(2)*. A spin-off is considered an exchange for purposes of *IRC § 358*. Basis is allocated among the stock and securities of the distributing corporation that are retained and those of the controlled corporation that are received.

(n49)Footnote 46. *IRC § 358(a)(2)*.

(n50)Footnote 47. *Treas Reg § 1.358-2(a)(2)(v)*.

(n51)Footnote 48. *Id.*

(n52)Footnote 49. *Treas Reg § 1.358-2(a)(2)(vi)*.

(n53)Footnote 50. *Treas Reg § 1.358-2(a)(2)(vii)*.

(n54)Footnote 51. *Id.*

(n55)Footnote 52. *Id.*

(n56)Footnote 53. *IRC § 1223(1)*.

(n57)Footnote 1. *IRC §§ 355(c)(1), 361(c)(1)*. The first provision is applicable if the corporate separation is not

preceded by a "D" reorganization, the latter if it is.

(n58)Footnote 2. *IRC §§ 355(c)(2)(A), 361(c)(2)(A)*. The gain is measured by the excess of fair market value over adjusted basis in the hands of the distributing corporation. If the property is subject to a liability or the shareholder assumes a liability of the distributing corporation in connection with the distribution, the fair market value of the property is treated as not less than the amount of the liability. *IRC §§ 355(c)(2)(C), 361(c)(2)(C)*.

(n59)Footnote 3. The disqualified distribution rule does not apply to distributions made pursuant to a written binding contract in effect on Oct 9, 1990, and at all times thereafter before the distribution.

(n60)Footnote 4. *IRC § 355(d)(2)*. An anti-avoidance rule contained in the regulations provides that the Service can treat a distribution as a disqualified distribution if it or another transaction is engaged in or structured with a principal purpose to avoid the purposes of *IRC § 355(d)*. In doing so, the Service can determine that the existence of an intermediary (a related person, intermediary, pass-through entity, or similar person) should be disregarded, in whole or in part, if the intermediary is formed or availed of to avoid the purposes of *IRC § 355(d)*. *Treas Reg § 1.355-6(b)(4)*.

(n61)Footnote 5. *Treas Reg § 1.355-6(b)(3)(i)*. A disqualified person is a person that, immediately after a distribution, holds disqualified stock that the person acquired by purchase or received such stock in a distribution as a result of owning purchased stock. *Treas Reg § 1.355-6(b)(3)(ii)*.

(n62)Footnote 6. *IRC § 355(d)(4)*. Generally, all shares of stock within a single class are considered to have the same value. *Treas Reg § 1.355-6(c)(2)*.

(n63)Footnote 7. *IRC § 355(d)(7)*. Two or more persons act pursuant to a plan or arrangement if they have a formal or informal understanding among themselves to make a coordinated acquisition of stock. A principal element in determining if such an understanding exists is whether the investment decision of each person is based on the investment decision of one or more other existing or prospective shareholders. *Treas Reg § 1.355-6(c)(4)(ii)*. The participation of creditors in an insolvency workout or bankruptcy reorganization is not considered action pursuant to a plan or arrangement.

If two or more persons do not act pursuant to a plan or arrangement with respect to the acquisition of stock in a corporation, a subsequent acquisition in which such persons exchange their stock in that corporation for stock in a second corporation in an exchange basis transaction will not result in their being treated as one person, even if the acquisition of the second corporation's stock is pursuant to a plan or arrangement. *Treas Reg § 1.355-6(c)(4)(iv)*.

(n64)Footnote 8. *IRC § 355(d)(8)(A)*.

(n65)Footnote 9. *IRC § 355(d)(3)(A)*.

(n66)Footnote 10. *IRC § 355(d)(3)(B)*.

(n67)Footnote 11. *IRC § 355(d)(6)*.

(n68)Footnote 12. *Treas Reg § 1.355-6(c)(3)(i)*. The following are treated as options: a call option, warrant, convertible obligation, the conversion feature of convertible stock, put option, redemption agreement, notional principal contract that provides for the payment of amounts in stock, stock purchase agreement or similar arrangement, or any other instrument that provides for the right to purchase, issue, redeem, or transfer stock (including an option on an option). *Treas Reg § 1.355-6(c)(3)(v)*. For instruments not generally treated as options, see *Treas Reg § 1.355-6(c)(3)(vi)*.

(n69)Footnote 13. *Treas Reg § 1.355-6(c)(3)(ii)*. The determination of whether, immediately after the distribution, an option is reasonably certain to be exercised is based on all of the facts and circumstances, with the fair market value

of stock underlying the option determined by taking into account control premiums and minority and blockage discounts. *Treas Reg § 1.355-6(c)(3)(vii)*. A stock purchase or similar agreement is treated as reasonably certain to be exercised if the parties' obligations to complete the transaction are subject only to reasonable closing conditions.

(n70)Footnote 14. *Treas Reg § 1.355-6(c)(3)(iv)*. If a stock purchase agreement or similar arrangement is deemed exercised, the purchaser is treated as having purchased the stock under the terms of the agreement or arrangement as though all covenants had been satisfied and all contingencies met. The agreement or arrangement is deemed to have been exercised on the date it is entered into or most recently assigned.

(n71)Footnote 15. *Treas Reg § 1.355-6(b)(2)(iii)(A)*.

(n72)Footnote 16. *Treas Reg § 1.355-6(b)(2)(iii)(C)(1)*. Generally, the basis of stock resulting from a purchase is eliminated as well if the stock is exchanged or transferred in a carryover basis or exchange basis transaction. *Treas Reg § 1.355-6(b)(2)(iii)(C)(2)*.

(n73)Footnote 17. *Treas Reg § 1.355-6(b)(2)(iii)(C)(3)*.

(n74)Footnote 18. *IRC § 355(d)(5)(A)*. Stock treated as "boot" under *IRC § 351(b)* or *356(a)(1)* is treated as purchased on the date of the exchange or distribution for purposes of *IRC § 355(d)*. *Treas Reg § 1.355-6(d)(2)(i)(A)(2)*.

Stock acquired in a qualified stock purchase with respect to which an *IRC § 338* election (or an *IRC § 338(h)(10)* election) is made is not treated as a purchase for purposes of *IRC § 355(d)(5)(A)*. However, any stock (or an interest in another entity) held by an old target that is treated as purchased by a new target is treated as acquired by a purchase unless an *IRC § 338* election or an *IRC § 338(h)(10)* election is made for that stock. *Treas Reg § 1.355-6(d)(2)(iv)*.

(n75)Footnote 19. *IRC § 355(d)(5)(B)*. If the transferred items are used in an active trade or business and do not exceed the reasonable needs of the business, the acquisition is not a purchase. *Treas Reg § 1.355-6(d)(3)(iv)*. The same holds true for an acquisition of stock in exchange for an amount of stock in another corporation that meets the requirements of *IRC § 1504(a)(2)* (the ownership of stock that possesses 80 percent of the total voting power and 80 percent of the total value of the stock of the corporation). *Treas Reg § 1.355-6(d)(3)(iii)*.

Stock is not treated as purchased if the transferor, the transferee, and any distributed controlled corporation are members of the same affiliated group. However, the transferred cash, marketable stock, or debt must not have been acquired from a nonmember in a related transaction to which *IRC § 362(a)* or *IRC § 362(b)* applies to determine the basis in the acquired assets. *Treas Reg § 1.355-6(d)(3)(v)*.

(n76)Footnote 20. *IRC § 355(d)(5)(C)*. If a distributing corporation distributes any stock of a controlled corporation with respect to recently purchased stock in a distribution that qualifies under *IRC § 355*, the controlled corporation stock is deemed acquired by purchase by the distributee on the date the distributee acquired the recently acquired stock. *Treas Reg § 1.355-6(e)(4)*. If a corporation distributes a tax-free stock dividend under *IRC § 305(a)*, the stock received in the distribution (to the extent *IRC § 307(a)* determines the distributee's basis) is deemed to be acquired by purchase by the distributee on the date that the distributee acquired the stock with respect to which the distribution is made.

(n77)Footnote 21. *IRC § 355(d)(8)(B)*.

(n78)Footnote 22. *Treas Reg § 1.355-6(e)(1)(i)*. If a person treated as holding stock under *IRC § 355(d)(8)(A)* later directly purchases the stock, the date of the later direct purchase is used in determining when the five-year period begins. *Treas Reg § 1.355-6(e)(1)(iv)*.

(n79)Footnote 23. *Treas Reg § 1.355-6(e)(1)(ii)*. If a person and an entity are treated as a single person under *IRC § 355(d)(7)*, and the person later purchases an additional interest in the entity, the person is treated as purchasing on the

date of the later purchase the amount of stock attributed from the entity to the person under *IRC* § 355(d)(8)(A) as a result of the additional interest. *Treas Reg* § 1.355-6(e)(1)(ii). If two persons are treated as one person under *IRC* § 355(d)(7), and one later purchases stock from the other, the date of the later purchase is used in determining when the five-year period begins. *Treas Reg* § 1.355-6(e)(a)(iii).

(n80)Footnote 24. *IRC* § 355(e)(1), (2), 4(A). *IRC* § 355(e)(1) does not apply to any distribution governed by *IRC* § 355(d). *IRC* § 355(e)(2)(D).

The entity-individual rules of *IRC* § 318(a)(2) apply in determining whether a person holds stock or securities in any corporation, with corporation-shareholder attribution being applied without the 50-percent threshold specified in *IRC* § 318(a)(2)(C). The aggregation rules of *IRC* § 355(d)(7) also apply. *IRC* § 355(e)(4)(C).

No gain recognition is required if the distribution is made in a bankruptcy or similar case. *IRC* § 355(e)(4)(B).

(n81)Footnote 25. This result obtains because stock and securities in the controlled corporation are not treated as qualified property for purposes of *IRC* §§ 355(c)(2) and 361(c)(2). *IRC* § 355(e)(1).

(n82)Footnote 26. *IRC* § 355(e)(2)(B). Whether a distribution and an acquisition are part of a plan is determined based on all the facts and circumstances. *Treas Reg* § 1.355-7(b)(1).

Treas Reg § 1.355-7(d) lists nine safe harbors that apply in determining that a distribution and acquisition are not part of a plan.

(n83)Footnote 27. *Treas Reg* § 1.355-7(b)(2). Substantial negotiations in the case of an acquisition (other than involving a public offering) generally requires discussions of significant economic terms (eg, the exchange ratio in a reorganization) by one of more officers, directors, or controlling shareholders of the distributing or controlled corporation, or another person who has the permission of the distributing or controlled corporation, with the acquirer or a person having the permission of the acquirer. *Treas Reg* § 1.355-7(h)(1)(iv).

(n84)Footnote 28. Facts and circumstances tending to show that a distribution and acquisition are part of a plan are set forth in *Treas Reg* § 1.355-7(b)(3). Facts and circumstances tending to show that a distribution and acquisition are not part of a plan are contained in *Treas Reg* § 1.355-7(b)(4).

For an example of a transaction in which the facts and circumstances indicated that the acquisition and the distribution were not part of a plan under *IRC* § 355(e) and *Treas Reg* § 1.355-7(b), see *Rev Rul* 2005-65, 2005-42 CB 684 .

(n85)Footnote 29. *Treas Reg* § 1.355-7(e)(1)(i). The determination of whether an option was more likely than not to be exercised is based on all of the facts and circumstances, taking control premiums and minority and blockage discounts into account in determining the fair market value of stock underlying an option.

Generally, the following are not treated as options for this purpose: (1) an option that is part of a security arrangement in a typical lending transaction, if the arrangement is subject to customary commercial conditions; (2) options exercisable only upon death, disability, mental incompetency, or separation from service; or (3) rights of first refusal. *Treas Reg* § 1.355-7(e)(4).

(n86)Footnote 30. *IRC* § 355(e)(2)(C).

(n87)Footnote 31. Any reference to a controlled corporation or a distributing corporation includes a reference to any predecessor or successor corporation. *IRC* § 355(e)(4)(D).

(n88)Footnote 32. *IRC* § 355(e)(3)(B).

(n89)Footnote 33. *IRC § 355(f)*.

(n90)Footnote 34. *IRC § 355(e)(4)(E)*.

(n91)Footnote 35. *Treas Reg § 1.367(b)-(5)(b)(1)(i)*.

(n92)Footnote 36. *Treas Reg § 1.367(b)-5(b)(1)(ii)*. All distributees in a distribution where the distributing corporation is a domestic corporation and the controlled corporation is a foreign corporation are presumed to be individuals. *Treas Reg § 1.367(b)-5(b)(3)*. The presumption can be rebutted using certain shareholder identification principles contained in *Treas Reg § 1.367(e)-1(d)*.

(n93)Footnote 37. *Treas Reg § 1.367(b)-5(b)(2)*.

(n94)Footnote 38. *Treas Reg § 1.367(b)-5(c)*. The § 1248 amount with respect to stock in a foreign corporation is the net positive earnings and profits that would have been attributable to that stock an includable in income under *IRC § 1248* if the stock had been sold by the shareholder. *Treas Reg § 1.367(b)-2(c)(1)*. See § 20.04[4] for a discussion of *IRC § 1248*.

The distributee's basis in the stock cannot be reduced below zero, and to the extent that the reduction would have reduced the basis below zero, the distributee must include the amount in income as a deemed dividend.

(n95)Footnote 39. *Treas Reg § 1.367(b)-5(d)*. All persons owning stock in the distributing corporation immediately after the distribution are treated as distributees of the stock. *Treas Reg § 1.367(b)-5(d)(2)*.

(n96)Footnote 40. *Treas Reg § 1.367(b)-5(f)*.

(n97)Footnote 41. *IRC § 367(e)(1)*; *Treas Reg § 1.367(e)-1(b)(1)*.

(n98)Footnote 42. *Treas Reg § 1.312-10(a)*.

(n99)Footnote 43. *Treas Reg § 1.312-10(a)*. Unfortunately the regulations do not define what a proper case is. The Court of Claims refused to apply the net basis method in *Bennett v US*, 427 F2d 1202 (Ct Cl 1970), on the ground that to do so would have disturbed the purpose of *IRC § 312(i)* and *Treas Reg § 1.312-10(a)*, namely, to neutralize the effect of a divisive reorganization on future shareholder taxability.

(n100)Footnote 44. *Treas Reg § 1.312-10(b)*.

(n101)Footnote 45. *Treas Reg § 1.312-10(c)*.

(n102)Footnote 1. *IRC § 355(g)(1), (4)*. A 50-percent or greater interest means stock possessing at least 50% of the total combined voting power of all classes of stock entitled to vote or at least 50% of the total value of all classes of stock. *IRC §§ 355(d)(4), 355(g)(3)(A)*. The attribution rules of *IRC § 318* apply in determining ownership. *IRC § 355(g)(3)(B)*.

(n103)Footnote 2. *IRC § 355(g)(2)(A)*. In the case of distributions made before May 17, 2007, a corporation is a disqualified investment corporation if investment assets constitute 3.4 or more of the fair market value of all assets of the corporation.

(n104)Footnote 3. *IRC § 355(g)(2)(B)(i)*.

(n105)Footnote 4. *IRC § 355(g)(2)(B)(ii)*.

(n106)Footnote 5. *IRC § 355(g)(2)(B)(iii)*.

(n107)Footnote 6. *IRC § 355(g)(2)(B)(iv)*. The distributing or controlled corporation is treated as owning its ratable share of the assets of any 20-percent controlled entity.

A 20-percent controlled entity is any corporation with respect to which the distributing or controlled corporation owns directly or indirectly stock meeting the requirements of *IRC § 1504(a)(2)*, except that that provision will be applied by substituting 20% for 80% and without regard to stock described in *IRC § 1504(a)(4)*.

(n108)Footnote 7. *IRC § 355(g)(2)(B)(v)*. The distributing or controlled corporation is treated as owning its ratable share of the assets of the partnership.

(n109)Footnote 1. *Treas Reg § 1.355-5(a)*.

(n110)Footnote 2. *Treas Reg § 1.355-5(b)*.

(n111)Footnote 3. *Treas Reg § 1.355-5(b)*.

CHAPTER 8 Reorganizations and Other Exchanges

1-8 Taxation of Securities Transactions § 8.07

§ 8.07 Other Exchanges of Stock and Securities

[1] Recapitalizations.

A recapitalization, although denominated a reorganization by *IRC Section 368(a)(1)(E)*, differs from other reorganizations in that one corporation does not acquire the stock or assets of another. Rather, a recapitalization contemplates the "reshuffling of a capital structure within the framework of an existing corporation ... "n1 The Code gives no aid in determining when a change in capital structure takes on the characteristics of a recapitalization. However, one thing is clear--a transaction viewed as a recapitalization by the financial community will not necessarily be considered one for tax purposes; the transaction must partake of the essential nature of a reorganization and not be solely a vehicle for extracting earnings and profits from the corporation.n2

The regulations fill some of the void created by the absence of a statutory definition, for they indicate that a recapitalization takes place if:

- (1) a corporation discharges outstanding bonds by issuing preferred shares to the bondholders;n3
- (2) a corporation issues preferred stock in exchange for common stock or common stock in exchange for preferred;n4 or (1954)
- (3) a corporation's outstanding preferred stock with dividends in arrears is surrendered and the shareholder receives stock in exchange for the old shares and stock in discharge of the dividend arrearages.n5 However, if pursuant to the exchange, there is an increase in the proportionate interest of the preferred shareholders in the assets or earnings and profits of the corporation, then an amount equal to the lesser of (1) the amount by which the fair market value or liquidation preference, whichever is greater, of the stock received in the exchange exceeds the issue price of the preferred stock surrendered, or (2) the amount of the dividends in arrears, will be treated as a taxable stock dividend under *IRC Section 305(b)(4)*.n6

The concept of recapitalization is not limited to the instances set forth in the Regulations. For example, the Service has ruled that exchanges of common for common and preferred for preferred qualify as recapitalizations.n7 And it is now well settled that an exchange of outstanding securities for new securities will also constitute a recapitalization,n8

although the receipt of securities in a principal amount greater than the principal amount of the surrendered securities will render the transaction taxable to the extent provided in *IRC Section 356*.ⁿ⁹

The final transactional form--the exchange of stock for stock and securities--is also the most troublesome, for it is here that the financial notion of a recapitalization runs headlong into the requirement that a reorganization meet not only the technical specifications prescribed by law, but also the underlying assumptions and purposes of the reorganization provisions. To illustrate, in *Bazley v. Commissioner*,ⁿ¹⁰ a husband and wife exchanged all of a corporation's 1,000 shares of \$100 par value common stock for 5,000 shares of common stock, each share having a stated value of \$60, and \$400,000 of new debentures payable in ten years but callable at any time. The taxpayer reported the transaction as a tax-free recapitalization under the predecessor of *IRC Section 368(a)(1)(E)*. The Commissioner charged the taxpayer with an amount of income equal to the full value of the debentures. The Government's action was approved by the Tax Court, the Third Circuit, and the Supreme Court, the latter concluding that

"No doubt there was a recapitalization of the Bazley corporation in the sense that the symbols that represented its capital were changed, so that the fiscal basis of its operations would appear very differently on its books. But the form of a transaction as reflected by correct corporate accounting opens questions as to the proper application of a taxing statute; it does not close them. ... What is controlling is that a new arrangement intrinsically partake of the elements of reorganization which underlie the Congressional exemption and not merely give the appearance of it to accomplish a distribution of earnings. In the case of a corporation which has undistributed earnings, the creation of new corporate obligations which are transferred to stockholders in relation to their former holdings, so as to produce, for all practical purposes, the same result as a distribution of cash earnings of equivalent value, cannot obtain tax immunity because cast in the form of a recapitalization-reorganization."ⁿ¹¹

A number of factors appear to have influenced the Court in *Bazley*. The debentures were distributed pro rata to the holders of common stock of the corporation. They were worth at least their principal amount and were callable at any time by the corporation, the stock of which was so closely held that the will of the corporation was, in substance, the will of the shareholders. Finally, the transaction did not accomplish anything that could not have been accomplished by an outright dividend distribution of the debentures.

Exchanges of stock for securities are not always barred from achieving the status of recapitalization. For example, in *Davis v. Penfield*,ⁿ¹² the Fifth Circuit found an exchange of 7 percent preferred stock for 7 percent debentures of equal value to be a recapitalization, distinguishing *Bazley* on the ground that no one shareholder held a majority of the voting sharesⁿ¹³ and that the exchange did not step up the tax position of the former preferred shareholders; they received nothing that was not fully assured to them had they continued to hold the preferred shares. In *Seide v. Commissioner*,ⁿ¹⁴ an exchange of 3,200 shares of \$100 par value 8 percent cumulative preferred stock for \$320,000 face amount 8 percent debentures was likewise held to be a recapitalization, the Tax Court rested its decision on the following facts: (1) the ownership of preferred did not "track" the ownership of common, (2) the debentures were not readily marketable, and (3) the debentures were issued for a valid business purpose--to eliminate dividends in arrears on the preferred stock. Although an exchange solely of stock for securities may still be considered a recapitalization, the transaction will not be tax free because of *IRC Section 354(a)(2)(A)(ii)*; instead, it will be treated as a redemption of the stock.ⁿ¹⁵ However, the factors relied on by the courts in *Davis v. Penfield* and *Seide v. Commissioner* retain their validity as determinants of the existence of a recapitalization.

[2] Exchanges of Stock for Stock of the Same Corporation.

We have seen that an exchange of common for common or preferred for preferred can qualify as a capitalization, and, thus, as a reorganization. However, such exchanges need not achieve recapitalization status to be tax free. *IRC Section 1036(a)* provides that "no gain or loss shall be recognized if common stock in a corporation is exchanged solely for common stock in the same corporation, or if preferred stock in the same corporation." Application of the section is not

limited to exchanges involving shares of the same class of stock. Thus, nonvoting common stock can be exchanged for voting common stock without giving rise to recognized gain or loss.ⁿ¹ Moreover, the section will be applicable whether the exchange is between shareholders or between shareholder and corporation.ⁿ²

If the exchanging shareholder receives money or other property in addition to stock which he can receive tax free under *IRC Section 1036(a)*, he will be required to recognize any gain realized to the extent of the "boot."ⁿ³ It should be noted that here, unlike certain other nonrecognition situations, consideration received in the form of an assumption of liability or the transfer of property subject to a liability is treated as other property.ⁿ⁴ But like other nonrecognition exchanges, the receipt of "boot" will not permit the recognition of any loss realized on the exchange.ⁿ⁵

If no "boot" is received, the stock received will assume the basis of the surrendered stock.ⁿ⁶ If "boot" is received and gain is recognized under *IRC Section 1031(b)*, the aggregate basis of the stock and property other than money received in the exchange will be the basis of the old stock, decreased in the amount of money received and increased in the amount of gain recognized.ⁿ⁷ The basis so determined must then be allocated to the stock and property other than money, the latter taking so much of the basis as is equal to its fair market value and the stock taking the balance.ⁿ⁸

Example:

If a taxpayer exchanges common stock with a basis of \$5,000 for common stock in the same corporation having a value of \$7,000, other property of a value of \$2,000, and cash of \$1,000, the taxpayer's realized gain of \$5,000 will be recognized only to the extent of \$3,000, the sum of the amount of money and the value of other property received. The aggregate basis of the property received in the exchange is \$7,000 (\$5,000 basis of the surrendered stock, less \$1,000, the amount of money received, plus \$3,000, the amount of gain recognized), of which \$2,000 will be assigned to the other property and \$5,000 to the new common stock.

Coupling the substituted basis of the acquired stock with the fact that, in most cases, the surrendered stock will have been a capital asset in the hands of the exchanging shareholder permits the shareholder to include the period for which he held the surrendered stock in the holding period of the stock received in the exchange.ⁿ⁹ Since the basis of any other property received in the exchange will be equal to its fair market value, the shareholder's holding period for such property runs from the time of the exchange.

[3] Exchanges of United States Obligations Issued Under the Second Liberty Bond Act.

[a] General Rule. *IRC Section 1037(a)* provides for nonrecognition of gain or loss on the surrender to the United States of obligations issued under the Second Liberty Bond Actⁿ¹ when (1) such obligations are exchanged solely for other obligations issued under the Act, and (2) the Treasury has issued regulations to the effect that gain or loss is not to be recognized in connection with a particular exchange. The Regulations under *IRC Section 1037* permit the necessary regulations to take the form of a Treasury Department circular containing the exchange offer,ⁿ² and the Treasury Department has announced that it will exercise its authority to designate certain exchanges as nontaxable by so declaring in the circular that announces the particular offer to exchange and sets forth the terms and conditions thereof.ⁿ³ In addition, announcements as to such circulars will be made in the Internal Revenue Bulletins.ⁿ⁴

If the conditions of *IRC Section 1037(a)* are met, gain or loss will go unrecognized whether the surrendered obligation is a capital asset or not.ⁿ⁵ Moreover, the fact that the taxpayer is required to pay money on the exchange will not defeat the application of *IRC Section 1037*.ⁿ⁶ However, if the taxpayer receives money on the exchange, he will be required to treat the money as "boot" and recognize gain to the extent thereof.ⁿ⁷

If obligations are exchanged solely for obligations, the obligations received will assume the basis of those surrendered to the United States.ⁿ⁸ If the taxpayer is required to pay additional consideration as part of the exchange, his basis for the new obligation will be increased accordingly.ⁿ⁹ On the other hand, if the taxpayer receives cash (other than in

payment of interest), the basis of the obligations received on the exchange will be reduced by the amount of such cash, but increased by the amount of any gain required to be recognized on account of the receipt of "boot."ⁿ¹⁰

Gain or loss not recognized because of the application of *IRC Section 1037(a)* will be recognized, at least in part, when the obligation received on the exchange reaches final maturity, or is disposed of or redeemed before maturity in a transaction that does not qualify as an *IRC Section 1037(a)* exchange, but the extent of such recognition is limited to the amount of gain or loss realized on the later transaction.ⁿ¹¹

[b] Exchanges Involving Discount Bonds. The treatment accorded exchanges of obligations issued under the Second Liberty Bond Act is unaffected by the fact that the surrendered obligation was originally issued at a discount. However, if any portion of the gain realized on the exchange of the discount obligation would have been converted into ordinary income by *IRC Section 1271(c)(2)*,ⁿ¹² were it not for the shelter provided by *IRC Section 1037(a)*, the fact that an original issue discount bond is surrendered will have an effect on the character of the gain recognized on the later disposition or maturity of the acquired obligation. The later recognized gain will be treated as ordinary income to the extent that the gain realized but not recognized on the original exchange would have been treated as such.ⁿ¹³

The rule just described is subject to a number of exceptions. The character of any gain recognized on the later disposition will be unaffected by the fact that a discount bond was surrendered in the original exchange if that exchange produced a loss for the taxpayer. Furthermore, if application of *IRC Section 1031(b)* requires any gain to be recognized on the earlier exchange and such recognized gain is treated as ordinary income, the amount of gain recognized on the subsequent disposition and required to be treated as ordinary income will be reduced by the amount of ordinary income previously recognized.ⁿ¹⁴ Finally, if the obligation surrendered to the United States on the earlier exchange was a noninterest bearing, nontransferable obligation issued at a discount and redeemable for fixed amounts increasing at stated intervals, or a Series E savings bond held beyond maturity, the amount of ordinary income that can be recognized on the later disposition is limited to the difference between the issue price of the surrendered obligation and the stated redemption price of that obligation at the time of the original exchange.ⁿ¹⁵

The following example illustrates the application of the foregoing rules:

Example:

The taxpayer purchased a noninterest bearing, nontransferable obligation issued under the Second Liberty Bond Act for \$75 and redeemable in ten years at \$100. Some years later, when the stated redemption price of the obligation was \$90, the taxpayer exchanged it for a marketable bond having a face value and market value of \$100. A few days after the exchange, the newly acquired obligation was sold for \$100. The tax consequences of the exchange and sale are:

- (1) Gain realized on the original exchange--\$25 (\$100, value of the new obligation, less \$75, basis of the surrendered obligation);
- (2) Gain recognized on the original exchange--none, under *IRC Section 1037(a)*;
- (3) Basis of the new obligation--\$75, as determined under *IRC Section 1031(d)*;
- (4) Gain realized on the sale of the new obligation--\$25;
- (5) Gain recognized on the sale of the new obligation--\$25, under *IRC Section 1001(c)*;
- (6) Character of the gain recognized on the sale of the new obligation:ⁿ¹⁶

(a) Ordinary income--\$15, the difference between the issue price of the surrendered obligation and the stated redemption price at the time of the original exchange (the surrendered obligation was not transferable and did not bear interest).ⁿ¹⁷

(b) Long-term capital gain--\$10. Had the taxpayer received a bond worth \$99 and cash of \$1, *IRC Section 1031(d)* would have required the recognition of \$1 of the gain realized on the exchange. If this \$1 was considered ordinary income, then the amount of ordinary income arising on the disposition of the new obligation would be decreased by \$1 and the amount of long-term capital gain arising therefrom increased by \$1.

[4] Exchanges of Convertible Securities.ⁿ¹

Despite the fact that the issuance of convertible bonds and convertible preferred stock is not an infrequent occurrence, the Internal Revenue Code is strangely silent as to the consequences of the exercise of the conversion privilege. Thus, the task of defining the tax effect of an exchange of a convertible security has been left to the courts and the Treasury, with the latter assuming a major role in this regard.

[a] Conversion Into Stock or Other Securities of the Issuer or Obligor.

[i] Conversion Privilege Contained in the Instrument. It has long been the rule that the holder of a bond does not realize gain or loss when he exercises a conversion privilege contained in the instrument and exchanges the bond for another bond of the obligor corporation or for stock of such corporation.ⁿ² The rationale given for this conclusion is that the transaction is not closed for purposes of income taxation until there is a disposition of the bond or stock acquired on the exchange.ⁿ³

The rule obtaining with respect to convertible bonds has been held applicable to a conversion of preferred stock into common stock of the same corporation. In the language of the Service:

"[T]he exercise of a conversion privilege provided for in the preferred stock certificate into common stock of the same corporation results in no taxable income or deductible loss to the shareholder."ⁿ⁴

This rule is based on the assumption that the conversion merely changes the form of the investment and not its substance, and that a change in substance would produce gain or loss. However, it is not always clear where there is a mere change in form. In *Revenue Ruling 90-7*^{n4.1} the IRS ruled that the owner of a certificate in an investment trust who traded the certificate for proportionate amounts of stock held by the trust would not recognize gain or loss in the exchange. This revoked the earlier *Revenue Ruling 68-633*, which held otherwise.ⁿ⁵

There are times when a surrender of convertible securities can be considered part of a recapitalization, and the tax consequences of the exchange governed accordingly. Such a result seems warranted when the issuing corporation has undertaken a plan of reorganization involving the entire issue of convertible securities, or at least a substantial part thereof. Yet the Service has classified conversions made solely at the option of the holders of the stock or securities as recapitalizations. For example, in *Revenue Ruling 56-179*,ⁿ⁶ the issuing corporation proposed to redeem its first preference stock, each share of which was convertible into seven shares of common. In order to avoid the issuance of a large number of common shares (resulting from the exercise of the conversion privilege), the corporation gave each owner of first preference stock who chose not to convert his shares into common, an additional option to acquire a bond, a lesser amount of common stock, and cash. The Service accorded recapitalization status to the exchange made pursuant to the additional option granted by the corporation, a necessary step if the exchange was to be at least partially tax-free. But, in addition, the Service found the exercise of the conversion privilege to be a recapitalization as well. This was unnecessary, since the same result would have obtained had it been held that the transaction would not be considered closed until the exchanging shareholder disposed of the common stock received in the conversion.ⁿ⁷

[ii] Conversion Privilege Not Contained in the Instrument. The conversion of a convertible security will be tax-free only if it is made pursuant to a conversion privilege contained in the converted instrument. A later consent to conversion will not supply the defect caused by the initial absence of the privilege from the instrument.ⁿ⁸

There have been some cases where an exchange of bonds of the same obligor has been found to be nontaxable even though the exchange was not made pursuant to a conversion privilege contained in the instrument or as part of a recapitalization. In the main, these have concerned refundings of defaulted municipal bonds, the new bonds containing substantially the same terms as the old. The theory underlying nontaxability has been that the bonds received on the exchange represented a continuation of the old debt and did not evidence a new indebtedness. In most cases, the only thing changed was the maturity date of the obligation,ⁿ⁹ although in one case, the court found that even the existence of a new interest rate did not produce a different obligation.ⁿ¹⁰ However, where the change in interest rate was coupled with changes in maturity date and call date, something more than a continuation of the old debt was effected and the exchange was held to be taxable.ⁿ¹¹

[b] Conversion Into Stock or Securities of Another Corporation or Issuer. The exchange of stock or securities of one issuer or obligor into those of another, even if made pursuant to a conversion privilege in the instrument, will be a taxable event, unless the transaction qualifies as a reorganization.ⁿ¹² This rule is grounded on the assumption that the securities of different entities are essentially different, so that the exchange produces a change in the substance, as well as in the form, of the investment.

[c] Use of Convertible Obligations in Corporate Acquisitions. The acquisition by one corporation of the stock of another cannot qualify as a reorganization if the consideration for the acquisition consists solely of securities of the acquiring corporation; securities can never provide a continuing proprietary interest in the acquiring corporation, and such an interest is a condition precedent to reorganization status.ⁿ¹³ However, the need to qualify the transaction as a reorganization would be obviated if the taxpayer could employ the installment method of reporting income and effectively defer the recognition of gain until he disposed of the obligations received on the exchange.ⁿ¹⁴ And if the obligation was convertible into the stock of the acquiring corporation, the exchanging shareholder would be given the opportunity to participate in the future growth of the corporation.ⁿ¹⁵ Thus, the combination of a convertible obligation and the installment method of reporting could give the exchanging shareholder a tax result substantially equivalent to the one he would achieve in a tax-free reorganization.

At the same time, the use of the convertible obligation would provide the acquiring corporation with an attractive and rather inexpensive method of obtaining the stock of the acquired corporation. There would be no cash outlay on account of the "purchase price" until the maturity of the obligation or its prior redemption. The acquiring corporation's cost in carrying the debt would be minimal, for it would be allowed to deduct 85 percent of the dividends received on the acquired stock, while deducting all of the interest paid by it to holders of the obligations.

The availability of installment reporting in a debt-financed acquisition is severely limited by *IRC Section 453(f)(4)*,ⁿ¹⁶ which requires a taxpayer to treat an obligation as a payment if it is:

- (1) payable on demand; or
- (2) issued with interest coupons attached or in registered form or in any other form designed to make the obligation readily tradable in an established securities market.

Before the enactment of the Installment Sales Revision Act of 1980,ⁿ¹⁷ which amended the Code to provide for installment reporting when only one payment is received,ⁿ¹⁸ installment reporting by the exchanging shareholder was not an absolute certainty even if the taxpayer could establish that the obligation should be treated as an evidence of indebtedness of the purchaser and not as a payment. The threshold problem was whether the installment method could be used when the only payment called for by the obligation would come at maturity or at prior redemption. There was

nothing in either the Code or Regulations which prescribed a minimum number of payments as a prerequisite for electing the installment method to report the gain realized on a casual sale of personalty. On the other hand, the Regulations applicable to dealers in personal property defined a sale on the installment plan as one which contemplates that the purchase price will be paid for in two or more payments.ⁿ¹⁹ Seizing upon this definition, the Internal Revenue Service took the position, in *Revenue Ruling 69-462*,ⁿ²⁰ that a sale of real property could not qualify for installment reporting when the total purchase price was payable in a lump sum in a year subsequent to the year of sale. The Service recognized that *IRC Section 453(b)* did not expressly prescribe multiple payments as a prerequisite for installment reporting of gain on sales of real property. It overcame this problem by stating that

"[S]uch a requirement [multiple payments] is implicit in Section 453(b) of the Code, inasmuch as income from sales of personal property by dealers may be returned on the installment method only if the plan of sale contemplates multiple payments of the purchase price and income from sales of real property may be returned on the basis' prescribed for dealers, i.e., as each of the payments against the purchase is actually received."ⁿ²¹

The Service also found support for its multiple payment requirement in some earlier decided cases. In one of these, *Prendergast v. Commissioner*,ⁿ²² real property was sold for a consideration consisting of two of the purchaser's ten-year bonds, both bonds maturing on the same date. The Board of Tax Appeals upheld the Commissioner's position that the transaction could not be considered an installment sale, in part basing its decision on the dictionary definition of "installment"--a portion of a debt or sum which is divided into portions that are made payable at different times. In *James McCutchen & Company v. Commissioner*,ⁿ²³ the agreement fixed only a single date for payment, although any dividends paid on the stock which formed the subject matter of the sale would be applied against the purchase price. Although dividends were in fact paid in the year of sale, the Board of Tax Appeals again denied installment treatment; it could find only one payment that had to be paid in all events.

One might wonder why the Service felt it necessary to rule on single-payment transactions in 1969 when prior case law had denied the availability of installment reporting to such transactions. The answer lies in General Counsel's Memorandum 12148,ⁿ²⁴ which cited *Prendergast* solely for the proposition that the installment method could not be used where there was no payment in the year of sale and the entire purchase price was payable in a lump sum in post-sale year (the Revenue Act then in effect did not contain any provision expressly negating the necessity of a year-of-sale payment). It is interesting to note that the view taken by General Counsel's Memorandum 12148 had been earlier rejected by the Court of Claims,ⁿ²⁵ and was later rejected by the Ninth Circuit.ⁿ²⁶

A second problem arises whenever the obligation is convertible.ⁿ²⁷ The issue here is whether the conversion feature must be treated apart from the evidence of indebtedness and considered a payment. The Proposed Regulations under *IRC Section 1273* would seem to negate a separate value for the conversion privilege when they say that the issue price of a convertible obligation "includes any amount paid in respect of the conversion privilege."ⁿ²⁸ But those same Regulations make it clear that when the obligation is part of an investment unit consisting of an option or warrant and a debt instrument, the component parts must be separately valued. Another argument for separate valuation is that the conversion privilege, although contained in a debt obligation, is not an evidence of indebtedness of the purchaser, and therefore, cannot be excluded from the payments received in the year of sale or exchange. The proper answer is in doubt--there are no decided cases on the issue.

We have seen that *IRC Section 453(f)(4)* seeks to thwart debt-financed acquisitions by affecting the tax consequences of the recipient. *IRC Section 279*, another provision added by the Tax Reform Act of 1969, works against the acquiring corporation by limiting the corporation's deduction for interest paid or incurred with respect to its "corporate acquisition indebtedness" to a maximum of \$5 million.ⁿ²⁹ An obligation will constitute such indebtedness only if:

- (1) the obligation is issued as the consideration for the acquisition of (a) the stock of another corporation, or (b) the assets of another corporation pursuant to a plan under which at least two-thirds (in value) of the

assets (other than money) used in the trades and businesses carried on by such corporation are acquired;ⁿ³⁰

(2) the obligation is either (a) subordinated to the claims of trade creditors of the issuing corporation or (b) expressly subordinated in right of payment to the payment of any substantial amount of then outstanding or later issued unsecured indebtedness of the corporation;ⁿ³¹

(3) the obligation is either (a) convertible into the stock of the issuing corporation or (b) part of an investment unit which includes an option to acquire stock in the issuing corporation;ⁿ³² and
