A dealer, just as any other taxpayer, is not permitted a deduction for any expenses allocable to tax-exempt income *other than interest*.ⁿ¹ Similar disallowance attends any interest expense or indebtedness incurred or continued to purchase or carry tax-exempt interest obligations.ⁿ² However, except for interest expense, a deduction is disallowed to a dealer for any expense allocable to tax-exempt interest, provided the expense is incurred in connection with the dealer's trade or business and is deductible under *IRC Section 162*.ⁿ³

[3] Amortization of Bond Premium

The average taxpayer, acquiring a bond at a premium, has the option to amortize the premium in the manner set forth in *IRC Section 171*.ⁿ¹ However, the section has no application to dealers in securities, except insofar as they hold securities for investment.ⁿ² But since the yearly decrease in value of the bond will most likely approximate the amount of annual premium amortization, a parallel result can be achieved if the dealer values inventory securities at the lower of cost or market, as is permitted.ⁿ³ The decline in inventory value furnishes the dealer with the equivalent deduction.ⁿ⁴

[a] Tax-Exempt Interest Securities. A dealer in securities, holding tax-exempt municipal bonds purchased at a premium as part of inventory of securities, must adjust the basis in the securities to reflect bond premium amortization. The manner in which the adjustment is accomplished turns on the method of inventory valuation employed by the dealer.

If the gross income of the dealer is computed by the use of inventories, and inventories are valued on any basis other than cost, the required adjustment is a yearly reduction in the dealer's "cost of securities sold"ⁿ⁵ by an amount equal to the amount of amortizable bond premium that an investor would be entitled to deduct were such deduction not disallowed by *IRC Section 171(a)(2)*.ⁿ⁶ The rule just announced has no application if the obligation is sold or disposed of within thirty days of acquisition,ⁿ⁷ or if the obligation bears as its earliest maturity or call date, a date more than five years from the date of acquisition.ⁿ⁸ In the first case, no reduction in cost of securities sold is required at all. In the second, no adjustment with respect to the obligation is required if the taxpayer still holds the obligation at the end of the taxable year.ⁿ⁹ Instead, when the taxpayer sells or otherwise disposes of the obligation, the cost of securities sold for the taxable year of disposition must be reduced by an amount equal to the total amortizable bond premium attributable to the taxpayer's period of ownership.ⁿ¹⁰ However, even then, no adjustment need be made if the obligation is sold at a gain, or otherwise disposed of at a time when its value exceeds its adjusted basis.ⁿ¹¹

Example:

X, a dealer in securities, and a calendar year taxpayer, values inventories on a basis other than cost. On January 1, 1988, the dealer purchases three municipal bonds. Each bond has a face value of \$1,000 and was purchased for \$1,120. Bond 1 matures on December 31, 1990. Bonds 2 and 3 mature on December 31, 1997. Bonds 1 and 2 are sold on December 31, 1989 for \$1,050 each. Bond 3 is sold on December 31, 1990 for \$1,150. The adjustment to cost of securities sold are:

Bond	Adjustment		
	1988	1989	1990
1	\$40	\$40	
2	None	\$24	
3	None	None	None

Annual adjustment of one-third of the premium is required with respect to Bond 1, since its maturity date falls within three years from the date acquired. No reduction in cost of securities sold is required in 1988 with respect to Bonds 2 and 3. Each bears a maturity date more than five years from the date of acquisition; each was still held by the taxpayer at the end of the year. The sale of Bond 2 at a loss triggers a 1989 reduction in cost of securities sold attributable to the period of X's ownership of the bond. No adjustment is required when Bond 3 is sold. It had, as its earliest maturity date, a date more than five years after the date it was acquired; and it was sold at a gain.

If the taxpayer computes income without the use of inventories, or by the use of inventories valued at cost, he makes no adjustment to cost of securities sold. However, he is required to make a year-of-sale adjustment to the adjusted basis of any obligation sold or disposed of during the taxable year. The reduction in basis is equal to the amount of amortization

which would have been required for the period the bond was held were the premium amortizable.ⁿ¹² Again, there is no adjustment if the bond is disposed of within thirty days of acquisition, or if the earliest maturity or call date of the bond is a date more than five years from the date of acquisition and the bond is sold at a gain.

FOOTNOTES:

(n1)Footnote 1. However, if there will be a difference if the activities cannot be deemed a trade or business and the route to deduction is *IRC § 212*. In such case, the deductions constitute miscellaneous itemized deductions subject to the 2 percent floor of *IRC § 67*.

(n2)Footnote 1. *Treas Reg § 1.263(a)-2(e)*.

(n3)Footnote 2. *Treas Reg § 1.263(a)-2(e)*. *Spreckels v Helvering*, 315 US 626 (1942) . *Prop Treas Reg 1.263(a)-1(d)(1)*, (2).

(n4)Footnote 3. *Treas Reg § 1.263(a)-2(e)*.

Commissions paid to brokers by a distributor of mutual fund shares were held to be currently deductible in *Ltr Rul 9345003* . The ruling contains a detailed discussion of the factors that make one a dealer in securities. They include:

- (1) whether the person sells to customers;
- (2) the form of the person's compensation; and
- (3) the person's relationship to its supply of securities.

See also, *Prop Treas Reg 1.263(a)-1(d)(1)*.

CHAPTER 18 The Taxpayer as a Dealer in Securities

2-18 Taxation of Securities Transactions § 18.05

§ 18.05 Mark-to-Market Accounting Method for Dealers in Securities

IRC Section 475, effective for taxable years ending on or after December 31, 1993, requires dealers in securities to utilize a mark-to-market accounting system in valuing securities held for sale to customers. Two rules apply. Any security forming part of the inventory of the dealer is included in inventory at its fair market value.ⁿ¹ In the case of any security that is not inventory and is held at the close of the taxable year, the dealer must recognize gain or loss as if the security were sold for its fair market value on the last business day of the taxable year and report the gain or loss on the dealer's return for that year.ⁿ²

For purposes of the mark-to-market rules, a dealer in securities is a taxpayer who (1) regularly purchases securities from, or sells securities to, customers in the ordinary course of a trade or business, or (2) regularly offers to enter into, assume, offset, assign, or otherwise terminate positions in securities with customers in the ordinary course of a trade or business.ⁿ³ A security is any (a) share of stock in a corporation; (b) partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust; (c) note, bond, debenture, or other evidence of indebtedness;ⁿ⁴ (d) interest rate, currency, or equity notional principal contract;ⁿ⁵ (e) evidence of an interest in, or a derivative financial instrument in, any of the foregoing, or any currency, including any option, forward contract, short position, and any similar financial instrument in such a security or currency (but not a contract to which *IRC Section 1256(a)* applies); and (f) any position not described in (a)-(e), but which is a hedge with respect to such a security and is clearly identified as such in the dealer's records before the close of the day on which it was acquired or entered into.ⁿ⁶

IRC Section 475 does not apply to any security held for investment, any hedge of a security held for investment, or any hedge of a position, right to income, or any liability that is not a security in the hands of the taxpayer.ⁿ⁷ It likewise does not apply to any note, bond, debenture, or other evidence of indebtedness that is acquired or originated by a dealer in the ordinary course of the dealer's trade or business and is not held for sale, or to any obligation to acquire such a security if the obligation is entered into in the ordinary course of the trade or business.ⁿ⁸ A security is held for investment or not held for sale if it is not held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.ⁿ⁹

The exceptions will not apply to any security unless it is clearly identified in the dealer's records as an excepted security before the close of the day on which it was acquired, originated, or entered into.ⁿ¹⁰ The following items held by a dealer are per se held for investment and are deemed to be properly identified as such:

(1) Stock in a corporation, or in a partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust, to which the taxpayer has a relationship described in *IRC Section 267(b)(2), (3), (10), (11), or (12)*, or in *IRC Section 707(b)(1)(A) or (B)*; or

(2) A contract that is treated for federal income tax purposes as an annuity, endowment, or life insurance contract.ⁿ¹¹

If a security has not been timely identified under *IRC Section 475(b)(2)* and, after the last day on which such an identification would have been timely, the per se rule begins to apply to the security, then the dealer must recognize gain or loss on the security as if it was sold for its fair market value as of the close of business on the last day before the per se rule begins to apply to the security.ⁿ¹² If a security ceases to be an excepted security after being identified as such, *IRC Section 475* will apply to any changes in value of the security occurring after the cessation.ⁿ¹³

The mark-to-market rules apply to any security that is improperly identified as being held for investment, and to any position that the dealer fails to identify as a hedge of a security. However, any loss resulting from application of the *IRC Section 475* prior to disposition of the security or position is recognized only to the extent of gain previously recognized under the mark-to-market rules with respect to the security or position.ⁿ¹⁴

Gain or loss resulting from the application of the mark-to-market rules is normally treated as ordinary income or loss.ⁿ¹⁵ However, this will not be the case for any gain or loss allocable to a period during which the security is one excepted from the definition of security for purposes of *IRC Section 475*, is held by the taxpayer other than as a dealer in securities, or is improperly identified.ⁿ¹⁶

IRC Sections 263A (uniform capitalization rules) and *263(g)* (requiring capitalization of interest and carrying charges in the case of straddles) do not apply to any security subject to the mark-to-market rules.ⁿ¹⁷ Moreover, a security marked to market under *IRC Section 475* is not subject to the wash sale rules of *IRC Section 1091*; the security is not deemed to be sold and reacquired.ⁿ¹⁸

Any taxpayer required to change its accounting method to comply with *IRC Section 475* is treated as having initiated the change and as having the change consented to by the Service. The net amount of any adjustments required by *IRC Section 481* because of the change is taken into account ratably over the five-taxable year period beginning with the first taxable year ending on or after December 31, 1993.ⁿ¹⁹ If any portion of the adjustment called for by *IRC Section 481(a)* is attributable to the use of the last-in, first-out method of accounting with respect to any qualified security for five consecutive taxable years, the portion is taken into account over a 15-year period.ⁿ²⁰ A qualified security for this purpose is one acquired by a floor specialist in connection with the specialist's duties as a specialist on an exchange, but only if the security is one in which the specialist is registered with the exchange.ⁿ²¹ The 15-year rule also applies to a taxpayer who is a market maker in connection with the taxpayer's duties as a market maker. In this case, the security must be included on the National Association of Security Dealers Automated Quotation (NASDAQ) system, the taxpayer must be registered as a market maker in such security with the National Association of Security Dealers, and as of the last day of the taxable year preceding the taxpayer's first taxable year ending on or after December 31, 1993, the taxpayer (or a predecessor) must have been actively engaged as a market maker in the security for the two-year period ending on that date (or, if shorter, the period beginning 61 days after the security was listed on the NASDAQ system and ending on that date).ⁿ²²

As a general rule, a loss incurred by a member of a consolidated group on stock of the group's common parent is disallowed; gain is eliminated in certain transactions.ⁿ²³ However, a subsidiary that is a dealer in its parent's stock or positions recognizes both gain and loss on the stock to the extent taken into account under of *IRC Section 475(a)* (or *IRC Section 1256(a)* for dealer equity options).ⁿ²⁴ To be eligible, the subsidiary must regularly trade in the parent's stock (of the same class) in the ordinary course of its business as a dealer. The exception does not apply if the subsidiary or any other member of the group has structured or engaged in any transaction while a member (or in anticipation of

becoming a member), during the taxable year or in any year within the preceding five taxable years that is open for assessment under *IRC Section 6501*, with a principal purpose of avoiding gain or creating loss on the parent's stock subject to *IRC Section 475(a)*.

IRC Section 475(e)(1), enacted as part of the Taxpayer Relief Act of 1997, permits a dealer or trader in commodities to elect the mark-to-market accounting of *IRC Section 475* for commodities held by the dealer.ⁿ²⁵ For this purpose, a commodity is defined as any commodity that is actively traded; any option, forward contract, short position, notional principal contract or derivative instrument that references such a commodity, and any other evidence of an interest in such a commodity, as well as any position that hedges the described items and is clearly identified in the taxpayer's records before the close of the day it was acquired or entered into (or such other time as regulations may prescribe).ⁿ²⁶

Traders in securities are also permitted to elect mark-to-market accounting for all securities held in connection with the taxpayer's trade or business as a trader; the election can be made without the consent of the Service, but cannot be revoked without consent.ⁿ²⁷ Even if the election is made, the mark-to-market rules do not apply to any security that is not held in connection with the trader's trade or business and is adequately identified as such before the day on which it was acquired, originated, or entered into (or such other time that regulations may prescribe).ⁿ²⁸ Any security subject to the mark-to-market rules that was acquired in the normal course of the taxpayer's activities as a trader in securities is not taken into account for purposes of the constructive sale rules of *IRC Section 1259*.ⁿ²⁹

The House version of the bill that became the Taxpayer Relief Act of 1997 contained an express statement that gain or loss recognized by an electing trader would be taxed as ordinary gain or loss. The final version omitted that statement, but does state that "rules similar to the rules of subsections (b)(4) and (d) shall apply to securities held by a person in any trade or business with respect to which an election... is in effect."ⁿ³⁰ *IRC Section 475(d)(3)* states a general rule that gain or loss with respect to a security subject to the mark-to-market rules is to be treated as ordinary income or loss. Presumably, this is the indication that Congress meant to provide ordinary treatment for securities marked to market by a trader. However, gain or loss that is treated as ordinary gain or loss because of the election is treated as capital gain or loss for purposes of the tax on net earnings from self-employment, and is treated as passive income for purposes of determining the amount of a publicly traded partnership's passive income.ⁿ³¹

IRC Section 475(g) mandates the issuance of regulations to carry out the purposes of *IRC Section 475*. The legislative history of *IRC Section 475* indicates that those regulations may permit the use of valuation methodologies that reduce the administrative burden of compliance on the taxpayer but clearly reflect income for federal income tax purposes.ⁿ³² The result is a safe harbor that is based on the principle that, if a mark-to-market method used for financial reporting is sufficiently consistent with the requirement of *IRC Section 475* and if the financial statement employing that method has certain indicia of reliability, then the values used on that financial statement may be used for purposes of the mark-to-market rules.ⁿ³³

The financial statement must be the taxpayer's primary financial statement for the taxable year prepared in accordance with United States generally accepted accounting principles and (i) is a financial statement that is required to be filed with the Securities Exchange Commission, (ii) is a financial statement required to be filed with a federal agency other than the Internal Revenue Service, or (iii) is a certified audited financial statement used for a non-tax purpose.ⁿ³⁴

FOOTNOTES:

(n1)Footnote 1. *IRC § 475(a)(1)*. For further discussion of the effect of this provision on the valuation and taxation of inventories of securities dealers, see L. Schneider, *Federal Income Taxation of Inventories § 8.01[4]* (Matthew Bender).

(n2)Footnote 2. *IRC § 475(a)(2)*. Gain or loss realized on a later disposition of the security is adjusted to take into account any gain or loss taken into account under the mark-to-market rules.

The mark-to-market rule of *IRC* § 475(a)(2), including the valuation requirement subsumed therein, is a method of accounting subject to the clear reflection standard of *IRC* § 446(b). *Bank One Corp v Commr*, 120 TC 174 (2003) .

(n3)Footnote 3. *IRC* § 475(c)(1). If the principal activity of a taxpayer is selling nonfinancial goods or providing nonfinancial services, the fact that the taxpayer extends credit to the purchasers of its nonfinancial goods or services does not make the taxpayer a dealer in securities, even if the taxpayer sells the acquired evidences of indebtedness. *Treas Reg* § 1.475(c)-1(b). A taxpayer that regularly purchases securities from customers in the ordinary course of a trade or business is not ordinarily a dealer in securities if the taxpayer does not sell more than a negligible portion of the purchased securities. *Treas Reg* § 1.475(c)-1(c).

A taxpayer's transactions with related persons may be transactions with customers for purposes of *IRC* § 475. For example, if a taxpayer, in the ordinary course of the taxpayer's trade or business, regularly holds itself out to related persons as willing and able to enter into either side of a position in securities, the taxpayer is a dealer in securities for purposes of *IRC* § 475, even if it engages in no other transactions with customers. The foregoing rule does not apply to members of a consolidated group unless the group makes the intragroup customer election. The election is made by filing a statement signed by the common parent and attached to the timely filed federal income tax return for the consolidated group for that taxable year. The election applies to that year and to all subsequent years, and can be revoked only with the permission of the Commissioner. *Treas Reg* § 1.475(c)-1(a)(3). *Rev Proc* 97-43, 1997-2 CB 494 , sets forth the procedure for a taxpayer requesting consent to change its method of accounting to comply with the election.

A taxpayer whose sole business consists of trading in securities (does not purchase from, or sell to, customers in the ordinary course of a trade or business) is not a dealer in securities. *Rev Rul* 93-76, 1993-2 CB 235 , as modified and clarified by *Rev Rul* 94-7, 1994-1 CB 151 , and as clarified, modified, and partially obsoleted, and superseded by *Rev Rul* 97-39, 1997-2 CB 62 , reprinted as Appendix I, *infra* .

The regulations extend the definition of dealer in securities to a taxpayer that, in the ordinary course of the taxpayer's trade or business, regularly holds itself out as willing and able to enter into, assume, offset, assign, or otherwise terminate a position in securities with customers. *Treas Reg* § 1.475(c)-1(a)(2)(i).

(n4)Footnote 4. This category of security does not include any nonfinancial customer paper, namely, (i) a note, bond, debenture, or other evidence of indebtedness; (ii) that arises out of the sale of nonfinancial goods and services by a person whose principal activity is the selling or providing of nonfinancial goods and services; and (iii) that is held by that person or a related person (within the meaning of *IRC* § 267(b) or *IRC* § 707(b)) at all times since issue. *IRC* § 475(c)(4).

(n5)Footnote 5. An equity notional contract does not include any other notional contract, such as a notional principal contract based on the price of oil, wheat, or other commodity. HR Rep No 213, 103d Cong, 1st Sess 130 (1993).

(n6)Footnote 6. *IRC* § 475(c)(2). The classification of a security under financial accounting principles is not dispositive of treatment of the security for federal income tax purposes. *Rev Rul* 93-76, 1993-2 CB 235 , as modified and clarified by *Rev Rul* 94-7, 1994-1 CB 151 , reprinted as Appendix I, *infra* . The following items held by a dealer in securities are not securities for purposes of the mark-to-market rules: (1) a security, if *IRC* § 1032 prevents the taxpayer from recognizing gain or loss with respect to that security; (2) a debt instrument issued by the taxpayer (including a synthetic debt instrument, within the meaning of *Treas Reg* § 1.1275-6(b)(4), that the taxpayer is treated as having issued); or (3) a REMIC residual interest, or an interest or arrangement that is determined by the Commissioner to have substantially the same economic effect, if the interest is acquired after Jan 4, 1995. *Treas Reg* § 1.475(c)-2(a). A negative REMIC residual interest, or an interest or arrangement having substantially the same economic effect acquired before Jan 4, 1995, is also not a security. *Treas Reg* § 1.475(c)-2(c).

A hedge is any position that manages the dealer's risk of interest rate or price changes or currency fluctuations, including any position that is reasonably expected to become a hedge within 60 days after the acquisition of the position. *IRC § 475(c)(3)*. For transactions entered into before Dec 17, 1999, a hedge was a position that reduced the dealer's risk.

Congress anticipates that the identification rules with respect to hedges will be applied in such a manner as to minimize the imposition of additional accounting burdens on securities dealers. HR Rep No 213, 103d Cong, 1st Sess 130 (1993).

The mark-to-market rules do not apply to any foreign currency transaction that is part of a Section 988 hedging transaction. *IRC § 988(d)(1)*.

(n7)Footnote 7. *IRC § 475(b)(1)(A), (C)*. Except as otherwise determined by the Commissioner in a revenue ruling, revenue procedure, or letter ruling, the investment security exception does not apply to any interest rate, currency, or equity notional principal contract, or to any evidence of an interest in, or a derivative financial instrument in a security. *IRC § 475(b)(4)*; *Treas Reg § 1.475(b)-1(c)(1)*. The described notional principal contracts and derivative securities can be treated as investment securities in the hands of a dealer if the taxpayer establishes unambiguously that the contract or securities were not acquired in the taxpayer's capacity as a dealer in such securities. *Treas Reg § 1.475(b)-1(e)(2)*.

(n8)Footnote 8. *IRC § 475(b)(1)(B)*.

(n9)Footnote 9. *Treas Reg § 1.475(b)-1(a)*.

(n10)Footnote 10. *IRC § 475(b)(2)*. If, as of the close of the last taxable year ending before Dec 31, 1993, a security was identified under *IRC § 1236* as a security held for investment, the security is treated as adequately identified as held for investment for purposes of *IRC § 475*. Temp *Treas Reg § 1.475(b)-2T(a)(1)*. However, except for this transitional rule, identification of a security as held for investment under *IRC § 1236* will not serve to identify the security as held for investment or as not for sale for the mark-to-market rules, unless there is a specific reference to *IRC § 475*. *Rev Rul 93-76, 1993-2 CB 235*, as modified and clarified by *Rev Rul 94-7, 1994-1 CB 151* and as clarified, modified, and partially obsoleted, and superseded by *Rev Rul 97-39, 1997-2 CB 62*, reprinted as Appendix I, *infra*.

In determining the timeliness of an identification under *IRC § 475(b)(2)*, the date that a dealer acquires a security is not affected by whether the dealer has a substituted basis in the security. *Treas Reg § 1.475(b)-2(b)*.

Congress anticipates that Treasury Regulations will permit a financial institution that is treated as a securities dealer and that originates evidences of indebtedness in the ordinary course of business to identify those evidences of indebtedness as held out for investment based on the accounting practices of the institution, but not later than 30 days after the date the evidence of indebtedness is originated. HR Rep No 213, 103d Cong, 1st Sess 133-134 (1993); *Rev Rul 93-76, 1993-2 CB 235*, as modified and clarified by *Rev Rul 94-7, 1994-1 CB 151*, and as clarified, modified, and partially obsoleted, and superseded by *Rev Rul 97-39, 1997-2 CB 62*, reprinted as Appendix I, *infra*. Congress also anticipates that, where appropriate, the regulations will provide similar identification rules for evidences of indebtedness that are acquired by a financial institution.

(n11)Footnote 11. *Treas Reg §§ 1.475(b)-1(b)(1), (2)*. The relationships are determined taking into account the attribution rules of *IRC §§ 267(c)* and *707(b)(3)*. *Treas Reg § 1.475(b)-1(b)(2)(ii)*.

The per se rule does not apply to a security if (i) the security is actively traded on an established financial market; (ii) less than 15 percent of all of the outstanding shares or interests of the same class are held by the taxpayer and parties in one of the described relationships to the taxpayer; and (3) if the security was acquired from a person having one of the specified relationships to the taxpayer, then, after the time the security was acquired, at least one full business day has passed, and there has been significant trading involving unrelated persons. *Treas Reg § 1.475(b)-1(b)(3)*.

(n12)Footnote 12. *Treas Reg* § 1.475(b)-1(4)(i)(B).

(n13)Footnote 13. *IRC* § 475(b)(3).

(n14)Footnote 14. *IRC* § 475(d)(2).

(n15)Footnote 15. The rule applies as well to any hedges that are subject to the mark-to-market provisions. HR Rep No 213, 103d Cong, 1st Sess 135 (1993).

(n16)Footnote 16. *IRC* § 475(d)(3). Gain or loss resulting from the disposition of a security that would have been subject to the second mark-to-market rule will also be treated as ordinary income or loss. However, if a security is never held in connection with the taxpayer's activities as a dealer in securities, *IRC* § 475(d)(3) does not affect the character of the gain or loss from the security, even if the taxpayer fails to identify the security under *IRC* § 475(b)(2). *Treas Reg* § 1.475(d)-1(a).

If a dealer acquires a security with a substituted basis, (i) *IRC* § 475(a) applies only to changes in value of the security occurring after the acquisition; and (ii) any built-in gain or loss with respect to the security (based on the difference between the fair market value of the security on the date the dealer acquired it and its basis to the dealer on that date) is taken into account, and has the character that would apply to the built-in gain or loss if *IRC* § 475(a) did not apply to the security. *Treas Reg* § 1.475(a)-3.

(n17)Footnote 17. Congress believes that the fair market value of a security should include costs that the dealer would otherwise capitalize. HR Rep No 213, 103d Cong, 1st Sess 131 (1993).

(n18)Footnote 18. *IRC* § 475(d)(1).

(n19)Footnote 19. Omnibus Budget Reconciliation Act of 1993, § 13223(c)(2). To compute the net Section 481(a) adjustment, the taxpayer needs to determine which of the securities it held at the close of the taxable year immediately preceding the year of change are marked to market at the beginning of the year of change. Any security not treated as identified as being covered by an exception to the mark-to-market rules must be marked to market as of the beginning of the year of change and must be taken into account in computing the amount of the net Section 481 adjustment. *Rev Rul* 93-76, 1993-2 CB 235, as modified and clarified by *Rev Rul* 94-7, 1994-1 CB 151, and as clarified, modified, and partially obsoleted, and superseded by *Rev Rul* 97-39, 1997-2 CB 62, reprinted as Appendix I, *infra*.

(n20)Footnote 20. Omnibus Budget Reconciliation Act of 1993, § 13223(c)(3).

(n21)Footnote 21. A floor specialist is a person who is (i) a member of a national securities exchange; (ii) is registered as a specialist with the exchange; and (iii) meets the requirements for specialists established by the SEC. *IRC* § 1236(d).

(n22)Footnote 22. Omnibus Budget Reconciliation Act of 1993, § 13223(c)(3)(B).

(n23)Footnote 23. *Treas Reg* § 1.1502-13(f)(6)(i), (ii).

(n24)Footnote 24. *Treas Reg* § 1.1502-13(f)(6)(iii).

(n25)Footnote 25. The election can be made without the consent of the Service. Once made, it applies to the taxable year in which it is made and all subsequent taxable years unless revoked with the consent of the Service. *IRC* § 475(e)(3).

To make the election under *IRC* § 475(e), dealers and traders must attach a statement to the original tax return for the year immediately preceding the election year or to an extension request for that return. The statement, which must be

filed by the original return's due date, must describe (1) the election being made, and (2) the first tax year for which the election is effective. If an eligible dealer or trader elects the mark-to-market method and the dealer or trader's accounting method is inconsistent with *IRC § 475*, the accounting method must be changed to comply with the election. *Rev Proc 99-17, 1999-1 CB 503*.

(n26)Footnote 26. *IRC § 475(e)(2)*.

(n27)Footnote 27. *IRC § 475(f)(1)(A), (3)*. A trader in commodities can also elect the mark-to-market rules with respect to commodities held in connection with the taxpayer's activities as a trader in commodities. *IRC § 475(f)(2)*. The election can be made separately for each trade or business.

Rev Proc 99-17, 1999-1 CB 503, governs an election under *IRC § 475(f)* as well. However, the required statement must also include the trade or business for which the election is made. The statement must be filed not later than the due date (without regard to extensions) of the original federal income tax return for the taxable year immediately preceding the election year, and the statement must be attached either to that return or, if applicable, to a request for an extension of time to file that return. *Rev Proc 99-17* provides the exclusive means of making the election. Thus, in *Ltr Rul 200423015*, the failure to follow the prescribed requirements precluded use of the mark-to-market method of accounting by a trader.

An electing trader must recognize gain or loss on any security held in connection with the trade or business as if the security were sold for its fair market value on the last business day of the taxable year; the gain or loss is taken into account for that year. Proper adjustment must be made in the amount of any gain or loss subsequently realized for the gain or loss taken into account under the mark-to-market rules.

(n28)Footnote 28. *IRC § 475(f)(1)(B)*. If a security that was identified as having no connection with the taxpayer's trade or business later ceases to be such, the mark-to market rules apply to any changes in value of the security occurring after the cessation.

(n29)Footnote 29. *IRC § 475(f)(1)(C)*. The constructive sale rules of *IRC § 1259* are discussed in §§ 9A.06[2] and 10.02[2].

(n30)Footnote 30. *IRC § 475(f)(1)(D)*.

(n31)Footnote 31. *IRC § 475(f)(1)(D)*.

CHAPTER 19 Expenses of Investors and Traders

2-19 Taxation of Securities Transactions § 19.01

§ 19.01 Introduction

Each person who engages in securities transactions incurs some expenses in addition to the purchase price. In the case of the casual, infrequent investor, the extra cost may be limited to purchase and selling commissions paid to brokers; in the case of the trader, the expenses may encompass every conceivable cost of carrying on a trade or business.

Some expenditures, notably those incurred on the purchase of securities, can never be claimed as a deduction. Instead, they are treated as capital expenditures and added to the basis of the acquired property. Other amounts paid give rise to a deduction for both the frequent trader and the sometime investor. Still others may be deductible by the trader, but not the investor; this occurs when deductibility is restricted to expenses incurred in carrying on a trade or business. Finally, there are some potentially deductible expenses that are rendered nondeductible by a specific provision of the Code evidencing a legislative policy against allowance, eg, *IRC Section 265(a)(2)* barring any deduction for interest paid on funds borrowed to purchase or carry tax-exempt securities.

CHAPTER 19 Expenses of Investors and Traders

2-19 Taxation of Securities Transactions § 19.02

§ 19.02 Distinguishing the Trader and Investor

The discussion in the immediately preceding chapter distinguished the dealer in securities from the trader or investor. In brief, the dealer is a merchant in securities who regularly engages in the purchase of securities and their resale to customers, and who does not expect to profit from an increase in the value of the securities between purchase and resale, but rather from a price differential or mark-up which represents compensation for his labor and services.ⁿ¹

The trader also regularly engages in the purchase and resale of securities. Indeed, the frequency of his activities may be sufficient to constitute a trade or business.ⁿ² But the trader performs no merchandising function; he buys and sells securities for his own account, seeking "such circumstances as a rise in value or an advantageous purchase to enable [him] to sell at a price in excess of cost."ⁿ³

The investor is often thought of as a person who limits his investment activities to occasional transactions for his own account.^{n3.1} But frequency of investment activity cannot furnish the only basis for distinguishing between trade and investor, for there are persons who must be classified as investors even though their investments and transactions are as extensive as those of persons considered to be traders. In such case, the distinction must be based on the nature of the investment which each makes. The trader is more often identified with speculative securities and quick turnover; the investor is more concerned with traditional yield values and with the realization of a profit through appreciation over a longer period.

A further distinction between trader and investor lies in the provisions which govern the deductibility of expenses incurred in connection with their investment activities. A trader, if engaged in a trade or business, will secure his deductions under *IRC Section 162*. If his activities do not rise to the status of a trade or business, the applicable provision is *IRC Section 212*. An investor must always find the authorization of his deduction in *IRC Section 212*, since "managing one's own investments in securities is not the carrying on of a trade or business, irrespective of the extent of the investments or the amount of time required to perform the managerial functions."ⁿ⁴ Although, with rare exception, this will have little effect on the expenses which can be deducted, it may make a difference in the taxpayer's taxable income. Expenses allowed under *IRC Section 162* reduce gross income to arrive at adjusted gross income;ⁿ⁵ this is true of *IRC Section 212* expenses only if they are attributable to property held for the production of rents or royalties.ⁿ⁶ Thus, the trader whose activities constitute a trade or business can deduct his investment expenses and still take the standard deduction in lieu of itemizing personal deductions;ⁿ⁷ an investor must choose between the standard deduction and itemizing, and if the investor itemizes, the 2-percent floor on itemized deductions dictated by *IRC Section 67* will

come into play. In addition, the ability to carry back and carry forward excess deductions depends upon the presence of a trade or business.ⁿ⁸ The computation of an individual's net operating loss for a given year limits deductions which are not attributable to a trade or business to the amount of nonbusiness gross income.ⁿ⁹

CHAPTER 19 Expenses of Investors and Traders

2-19 Taxation of Securities Transactions § 19.03

§ 19.03 Expenses Incurred in the Purchase of Securities

"It has long been recognized, as a general matter, that costs incurred in the acquisition or disposition of a capital asset are to be treated as capital expenditures. The most familiar example of such treatment is the capitalization of brokerage fees for the sale or purchase of securities, as explicitly provided by long standing Treasury regulation, *Treas. Reg. 1.263(a)-2(e)*, and as approved by this Court in *Helvering v. Winmill*, 305 U.S. 79 (1938) , and *Spreckels v. Commissioner*, 315 U.S. 626 (1942) ."n1

A deduction for purchase commissions will be denied even though the taxpayer incurs them as a regular and recurring expense in his business of buying and selling securities.n2 Indeed, the requirement that commissions paid on the acquisition of securities be added to the cost of the securities extends even to purchases made by dealers in securities, and to purchases by a corporation.n3

How does one resolve the issue of deduction versus capitalization when it comes to other expenses as to which the Regulations are silent? The best approach seems to be the one announced by the Supreme Court in *Woodward v. Commissioner*,n4 and *United States v. Hilton Hotel Corp.*,n5 decided on the same day. In both cases, litigation expenses incurred in appraisal proceedings for the purchase of minority shares were held nondeductible and properly treated as part of the cost of the acquired stock. According to the Court, the relevant inquiry is "whether the origin of the claim litigated is in the process of acquisition itself."n6 There is no reason to confine the "origin" test to expenses incurred in litigation; it should be applied whenever it becomes necessary to distinguish between deductible expense and capital expenditure in the purchase of securities. To illustrate, purchase commissions would be considered capital items, even if not governed by a particular provision of the regulations, since the taxpayer would not have incurred the expense but for the purchase of the securities. Therefore, it must be said that the expense originated "in the process of acquisition itself."n7

It may be difficult, at times, to determine whether the expenditure was incurred in the acquisition process. For example, if the expenditures relate to an action brought against a corporate executive or broker-dealer under Section 10(b) of the Securities Exchange Act, the crucial determinant is the ground upon which the suit is based. If it is against the executive as a purchaser of stock, or against the broker-dealer on a claim that arose in the investment process, the expenditure will not be currently deductible.n8

CHAPTER 19 Expenses of Investors and Traders

2-19 Taxation of Securities Transactions § 19.04

§ 19.04 Expenses Incurred in the Sale of Securities

As we saw in the preceding section, commissions paid on the purchase of securities are treated alike by dealers, traders and investors; they must be capitalized and added to the basis of the acquired property. Equality of treatment does not prevail when it comes to brokerage fees incurred in the sale of securities, for while a dealer is permitted to deduct selling commissions as an ordinary and necessary expense of doing business,ⁿ¹ an investor or trader (even one whose activities can be characterized as a trade or business) can use such commissions, as well as most other selling expenses, only as an offset against the selling price to reduce the amount of gain or increase the amount of loss realized from the transaction.ⁿ²

The distinction in treatment rests on practical considerations:

"The dealer usually buys in large quantities, his sales are numerous and in relatively small amounts, his commissions are often computed and paid on a volume of sales instead of on individual transactions, and where he uses inventories he necessarily departs widely from the principles of accounting for the profit on each individual purchase and sale."ⁿ³

But, as the Supreme Court observed:

"[F]or the casual buyer and seller of securities, or even the large scale trader on his own account, ... the practical obstacles to treating sales commissions as offsets against selling price do not exist."ⁿ⁴

On the other hand, state transfer taxes imposed on the sale of securities, and not deductible as taxes under *IRC Section 164*, can be deducted by dealers, traders and investors either as an expense of carrying on a trade or business (*IRC Section 162*) or as an expense incurred in the production of income (*IRC Section 212*).ⁿ⁵ This differs from the position taken with respect to the now repealed federal excise tax on stock transfers, the Government holding such taxes deductible by dealers but not by traders or investors.ⁿ⁶ However, in *Hirshon v. United States*,ⁿ⁷ the Court of Claims reached a contrary result, finding such taxes to be deductible in full, as ordinary and necessary business expenses, by a trader in securities. It should be noted, though, that some years later, the Tax Court did not see fit to extend the *Hirshon* rationale and allow a nonbusiness taxpayer to deduct such taxes as an expense incurred in the production of income.ⁿ⁸

An attempt to treat state income taxes attributable entirely to gains realized on the sale of stock as an expense of sale, deductible in computing gain for federal income tax purposes, met with failure in *Taylor v. Commissioner*.ⁿ⁹ Although

state income taxes are allowed as a deduction under *IRC Section 164*, a deduction under a predecessor section would have been wholly worthless to the taxpayer; he had no income apart from the gains against which to apply the deduction.ⁿ¹⁰ Denial of the deduction rested, in part, on the theory that

"When gain is realized in a capital transaction, the assessment of income taxes may be inevitable, in a sense, but resulting income taxes are highly contingent. Other unrelated transactions resulting in capital losses can reduce, or obliterate, the contingent liability."ⁿ¹¹

(n1)Footnote 1. *GCM 15430*, XIV-2 CB 59 (1935). *GCM 15430* was declared obsolete by *Rev Rul 69-31*, 1969-1 CB 307. The position taken therein is still good law. *Prop Treas Reg 1.263(a)-1(d)(1)*.

(n2)Footnote 2. *Spreckels v Commr*, 315 US 626 (1942) ; *Treas Reg § 1.263(a)-2(e)*.

Prior to 1976, where the seller was an estate, the selling expense could be used as an offset against the gross amount in computing capital gain or loss, and as a deduction for estate tax purchases under *IRC § 2053*. See, eg, *Commerce Trust Co v US*, 438 F2d 111 (8th Cir 1971) ; *Clapp v US*, 26 AFTR2d 70-5537 (CD Cal 1970) ; *Est of Dorn v Commr*, 54 TC 1651 (1970) , acq, 1971-2 CB 2 ; *Bray v Commr*, 46 TC 577 (1966) , acq 1971-2 CB 2 , aff'd 396 F2d 452 (6th Cir 1968) ; *Rev Rul 71-173*, 1971-1 CB 204 . *IRC § 642(g)* was amended in 1976 to prevent such a result. See *Prop Treas Reg 1.263(a)-1(d)(1)*, (2).

The taxpayer in *McKeague v US*, 57 AFTR2d 86-1258 (Fed Cir 1986) , deducted litigation expenses incurred in an action by an officer-shareholder regarding his employment by the corporation and the sale price of his stock to the other shareholders. The Claims Court allowed the deduction. The Federal Circuit remanded the matter to the lower court to consider whether the suit had a dual origin--to preserve his investment in the stock and to protect his employment--and, if so, to determine how the expenses should be allocated between the capital and ordinary income components of the claim.

Dye v US, 121 F3d 1399 (10th Cir 1997) , also required an allocation of litigation expenses between the portion of the recovery that produced ordinary income, yielding an ordinary deduction, and the portion that was capital in nature, resulting in a capital loss.

Payments to investment bankers in connection with an unsuccessful effort to defeat a hostile tender offer were partly attributable to an evaluation of the taxpayer's stock, and partly related to a defense of its business and corporate policy. The portion related to the evaluation of the stock was a capital expenditure; the balance was deductible as a business expense. *AE Staley Mfg Co & Subs v Commr*, 119 F3d 482 (7th Cir 1997) .

CHAPTER 19 Expenses of Investors and Traders

2-19 Taxation of Securities Transactions § 19.05

§ 19.05 Expenses Incurred in Carrying or Managing Securities

[1] Interestⁿ¹

[a] In General. *IRC Section 163* sets forth a general rule that "there shall be allowed as a deduction all interest paid or accrued within the taxable year on indebtedness."ⁿ² But suppose the interest was paid as part of a scheme having no economic purpose and designed solely to provide the taxpayer, generally a high-bracket taxpayer, with a tax deduction. This was the situation in *Knetsch v. United States*ⁿ³ where the taxpayer purchased ten single-premium annuity bonds, each in the face amount of \$400,000 and bearing interest at 2 1/2 percent, compounded annually, by giving his check for \$4,000 and signing nonrecourse annuity loan notes for the balance. The notes were secured by the bonds and carried an interest rate of 3 1/2 percent. The taxpayer prepaid the first year's interest, \$140,000, on the day that he signed the note. Five days later he borrowed \$99,000 of the amount by which the cash or loan value of the bonds at the end of the first contract year would have exceeded his original indebtedness; he again prepaid the interest. For the two years involved in the proceeding, the taxpayer's borrowings against the loan value of the bonds amounted to some \$203,000, while his claimed interest deduction exceeded \$294,000. The Supreme Court disallowed the deduction, noting that the taxpayer's continued borrowings would have converted a "guaranteed" cash value at maturity of more than \$8,300,000 into a relative pittance of \$1,000, and concluding, therefore, that

"Knetsch's transaction with the insurance company did 'not appreciably affect his beneficial interest except to reduce his tax. ...' For it is patent that there was nothing of substance to be realized by Knetsch from this transaction beyond a tax deduction. What he was ostensibly 'lent' back was in reality only the rebate of a substantial part of the so-called 'interest' payments. The \$91,570 difference retained by the company was its fee for providing the facade of 'loans' whereby the petitioners sought to reduce their 1953 and 1954 taxes in the total sum of \$233,297.68. There may well be single-premium annuity arrangements with nontax substance which create an 'indebtedness' for the purposes of ... § 163(a) of the 1954 Code. But this one is a sham."ⁿ⁴

The deduction in *Knetsch* was denied because the sham character of the transaction negated the existence of any "indebtedness." But an interest deduction may be unavailable even when the loan transaction is genuine, as it was in *Goldstein v. Commissioner*.ⁿ⁵ There the taxpayer borrowed almost \$1 million at 4 percent interest in order to purchase low-yield Treasury notes, the sole purpose behind the transaction being to secure a large interest deduction to offset income from the taxpayer's sweepstakes winnings. The Second Circuit found deductibility barred by the underlying notion of *IRC Section 163*--to permit a deduction when a taxpayer decides to engage in a purposive activity financed

with borrowed funds rather than with his own funds. Thus, the court was of the opinion, that "when it enacted Section 163(a) Congress could not have intended to permit a taxpayer to reduce his taxes by means of an interest deduction that arose from a transaction that had no substance, utility or purpose beyond the tax deduction."ⁿ⁶

IRC Section 163 allows the deduction for interest "paid or accrued within the taxable year." For taxpayers employing the accrual method of accounting, interest accrues ratably over the period of the loan and is allowable as a deduction ratably over the period, irrespective of when paid.ⁿ⁷ An exception to this general rule occurs when the interest is payable by an accrual method taxpayer to a related cash basis taxpayer and the amount of interest is not includable in income for the taxable year of the accrual. In such case, the deduction is allowable in the year in which the amount is includable in the gross income of the person to whom the payment is made.^{n7.1}

A cash basis taxpayer is allowed to deduct expenses only when they are paid.ⁿ⁸ It follows logically that such a taxpayer should be allowed to deduct all of the interest paid during the taxable year. However, *IRC Section 461(g)* requires interest attributable to periods after the close of the taxable year in which paid to be charged to capital account and treated as paid in the period to which attributable.ⁿ⁹

A special rule, designed to match the deduction for amortization of original issue discount (OID) with the inclusion of accrued discount in the holder's income, applies in the case of any debt instrument issued after July 1, 1982, other than by a natural person. Under *IRC Section 163(e)(1)*, the amount of the OID allowable as a deduction in any taxable year is equal to the aggregate daily portions of the OID for days during the taxable year.ⁿ¹⁰ If the instrument is held by a related foreign person, the deduction is not allowed until the OID is paid.ⁿ¹¹

A second rule governing the deduction of interest applies when a debt instrument with OID is held by a related foreign person that is a controlled foreign corporation or passive foreign investment company. In such case, a deduction will be allowable to the issuer with respect to the OID for any taxable year before the taxable year in which paid only to the extent the OID is includable in the prior taxable year in the gross income of a United States person who owns stock in the corporation.^{n11.1}

Except to the extent disallowed by a provision such as *IRC Section 249* (limitation on the deduction of bond premium on repurchase),ⁿ¹² if a debt instrument is repurchased by the issuer for a price in excess of its adjusted issue price, the excess (repurchase premium) is deductible as interest for the year in which the repurchase occurs.ⁿ¹³ If the issuer repurchases a debt instrument in a debt-for-debt exchange, the repurchase price is the issue price of the newly issued debt instrument (reduced by any unstated interest within the meaning of *IRC Section 483*).ⁿ¹⁴ However, if the issue price of the newly issued debt instrument is determined under either *IRC Section 1273(b)(4)* or *IRC Section 1274*, any repurchase premium is not deductible in the year of the repurchase, but is amortized over the term of the newly issued debt instrument in the same manner as if it were OID.ⁿ¹⁵

In a qualified reopening of an issue of debt instruments, if a holder pays more or less than the adjusted issue price of the original debt instruments to acquire an additional debt instrument, the issuer treats the difference as an adjustment to the issuer's interest expense for the original and additional debt instruments.^{n15.1} The adjustment is taken into account over the term of the instrument using constant yield principles.

If the holder pays more than the adjusted issue price of the original debt instrument, then with respect to the issuer but not the holder, the difference increases the aggregate adjusted issue prices of both the original and additional debt instruments in the issue.^{n15.2} If the holder pays less than the adjusted issue price of the original debt instrument, then with respect to the issuer but not the holder, the difference reduces the aggregate adjusted issue prices of all debt instruments in the issue.^{n15.3}

As of the reopening date, the issuer must redetermine the yield of the debt instruments in the issue for purposes of applying the constant yield method to determine the issuer's accruals of interest expense over the remaining term of the

debt instruments in the issue.^{n15.4} This redetermined yield is based on the aggregate adjusted issue prices of the debt instruments in the issue and the remaining payment schedule of the debt payments in the issue. If the aggregate adjusted issue prices of the debt instruments in the issue are less than the aggregate stated redemption price at maturity of the instruments (determined as of the reopening date) by a *de minimis* amount, the issuer can either treat all stated interest as qualified stated interest, or choose to deduct the OID at maturity, on a straight-line basis over the term of the debt instrument or in proportion to stated interest payments.ⁿ¹⁶

The Tax Reform Act of 1986 introduced *IRC Section 163(h)* and the disallowance of any deduction for personal interest, that is, interest other than (1) interest properly allocable to a trade or business (other than the trade or business of performing services as an employee),ⁿ¹⁷ (2) investment interest,^{n17.1} (3) interest taken into account under *IRC Section 469* in computing income or loss from passive activities, (4) qualified residence interest, (5) interest on certain unpaid installments of estate taxes, and (6) any interest on educational loans allowed as a deduction under *IRC Section 221*.ⁿ¹⁸ The Taxpayer Relief Act of 1997 added *IRC Section 221(a)* to permit a limited deduction of interest on education loans. The deduction begins at \$1,000 in the case of taxable years beginning in 1998, and increases in \$500 yearly increments to a maximum of \$2,500 for taxable years beginning in 2001 and thereafter.^{n18.1} There is a phaseout based on the taxpayer's modified adjusted gross income.^{n18.2}

The special concept in the personal interest rules is qualified residence interest, defined as interest paid or accrued on (1) "acquisition indebtedness"--any indebtedness that is incurred in acquiring, constructing, or substantially improving any qualified residence of the taxpayer and is secured by such residence, or (2) on any "home equity indebtedness" with respect to a qualified residence of the taxpayer.ⁿ¹⁹ Refinanced acquisition indebtedness is treated as acquisition indebtedness to the extent that the refinanced amount does not exceed the amount of outstanding acquisition indebtedness immediately before the refinancing.

Home equity indebtedness is defined by *IRC Section 163(h)(3)(C)* as any indebtedness (other than acquisition indebtedness) secured by a qualified residence to the extent that the aggregate amount of such indebtedness does not exceed (1) the fair market value of the qualified residence reduced by (2) the amount of acquisition indebtedness with respect to the residence. However, the amount of home equity indebtedness can never exceed \$100,000.

A residence is a qualified residence if it is the principal residence of the taxpayer or one other residence of the taxpayer.ⁿ²⁰

Interest paid or accrued by an estate or trust on indebtedness secured by a qualified residence of a beneficiary of the trust or estate is treated as qualified residence interest.ⁿ²¹

The aggregate amount that can be treated as acquisition indebtedness is \$1 million (\$500,000 in the case of a married individual filing a separate return).ⁿ²² The limitation does not apply to "pre-October 13, 1987 indebtedness," that is, debt incurred on or before October 13, 1987, and secured by a qualified residence on that date and at all times thereafter before the interest is paid or accrued; all of such debt is acquisition indebtedness regardless of amount.ⁿ²³ However, the amount of such debt reduces the \$1 million dollar maximum on new acquisition debt, but not below zero.ⁿ²⁴ Pre-October 13, 1987 indebtedness, also includes debt incurred after that date, secured by a qualified residence, and used to refinance pre-October 13, 1987 indebtedness, but only to the extent of the principal amount of the refinanced debt immediately before the refinancing and only for the term of the original debt.ⁿ²⁵

The following examples illustrate the operation of the qualified residence interest rules:

Example 1:

During 1988, a taxpayer borrowed \$800,000 to purchase a principal residence and \$400,000 to buy a summer residence. Interest, on \$1 million of the debt will be acquisition indebtedness; interest on an additional \$100,000 of debt will qualify as home equity indebtedness; the balance of the interest will be

nondeductible personal interest.

Example 2:

In 1988, a taxpayer borrowed \$400,000 to purchase a principal residence. Payments of principal reduced the outstanding balance of the debt to \$300,000. The taxpayer refinanced the debt by borrowing \$500,000. The new debt will be treated as acquisition indebtedness only to the extent of \$300,000 unless the taxpayer uses all or part of the additional \$200,000 to substantially improve the residence. If not, \$100,000 of the amount in excess of \$300,000 can qualify as home equity indebtedness, with the balance treated as nondeductible personal interest.

Example 3:

In 1970, a taxpayer borrowed \$90,000 to purchase a residence. The taxpayer obtained a new, 20 year mortgage of \$200,000 on July 1, 1983, when the house was worth \$300,000. The outstanding balance of the mortgage on October 3, 1987 was \$190,000. The taxpayer can continue to deduct all of the interest on the mortgage.

A set of elaborate tracing rules is used to determine whether interest is to be treated as (1) interest allocated to a trade or business, (2) interest allocated to a passive activity or former passive activity, (3) interest allocated to an investment expenditure, (4) interest allocated to a personal expenditure, or (5) interest allocated to a portfolio expenditure. In general, interest expense on a debt is allocated in the same manner as the debt to which the interest expense relates is allocated.ⁿ²⁶ Debt is allocated by tracing disbursements of the debt proceeds to specific expenditures during the period beginning on the date the proceeds of the debt are used and ending on the earlier of the date the debt is repaid or the date the debt is reallocated.ⁿ²⁷ Except for interest treated as qualified residence interest, the allocation is unaffected by the fact that property is used to secure the debt.ⁿ²⁸

Example:

An individual pledges corporate stock held for investment as security for a loan and uses the proceeds to purchase an automobile for personal use. The interest expense accruing on the debt is allocated to personal expense. If the debt were secured by a mortgage on the individual's personal residence and the interest classified as qualified residence interest, the interest would not be treated as personal interest.

A deposit of loan proceeds into the borrower's account is treated as an investment expenditure, and amounts held in the account (whether interest bearing or not) are treated as property held for investment.ⁿ²⁹ Debt allocated to an account must be reallocated when the proceeds are used for another expenditure.

Example:

A taxpayer borrows \$50,000 on January 1 and deposits the proceeds in a noninterest bearing checking account. On May 1, the taxpayer uses \$15,000 to purchase an automobile. On October 1, he uses \$30,000 for a passive activity expenditure. From January 1 through April 1, the entire debt is allocated to an investment expenditure. From May 1 through September 30, \$15,000 of the debt is allocated to a personal expenditure and \$35,000 is allocated to an investment expenditure. From October 1 through December 31, \$15,000 of the debt is allocated to a personal expenditure, \$35,000 of the debt is allocated to a passive activity expenditure, and \$5,000 is allocated to an investment expenditure.

Ordering rules come into play if debt proceeds are deposited in an account that contains unborrowed proceeds. Generally, debt proceeds are treated as expended before any unborrowed amounts held in the account at the time of the deposit and any amounts (borrowed or unborrowed) that are deposited in the account after the debt proceeds are deposited.ⁿ³⁰

Example:

A taxpayer enters into the following transactions during the taxable year:

January 10	Deposits \$500 proceeds of Debt A and \$1,000 unborrowed funds
January 11	Deposits \$500 proceeds of Debt B
February 17	\$800 personal expenditure
February 26	\$700 passive activity expenditure
June 21	Deposits \$1,000 proceeds of Debt C
November 21	\$800 investment expenditure
December 20	\$600 personal expenditure

The \$800 personal expenditure is treated as made from the \$500 proceeds of Debt A and \$300 of the proceeds of Debt B. The \$700 passive activity expenditure is deemed to be made from the remaining \$200 proceeds of Debt B and \$500 of unborrowed funds. The \$800 investment expenditure is treated as made entirely from the proceeds of Debt C. The \$600 personal expenditure is made from the remaining \$200 proceeds of Debt C and \$400 of unborrowed funds.

Interest on Debt A allocable to the period from January 10 through February 16 is investment interest. Interest on the debt for the balance of the year is personal interest.

Interest on Debt B allocable to the period from January 11 through February 16 is investment interest. For the period from February 17 through February 25, 60 percent of the interest is personal interest; the balance is investment interest. For the remainder of the year, 60 percent of the interest is personal interest; 40 percent is passive activity interest.

Interest on Debt C from June 21 through December 19 is investment interest. Of the interest allocable to the balance of the year, 80 percent is investment interest and the balance is personal interest.

The taxpayer is given the option of using a simplified method of determining the date on which debt is reallocated. Under this method, the taxpayer can treat all expenditures made during the calendar month from debt proceeds as made on the first day of the month or the date the debt proceeds were deposited in the account, whichever is later.³¹ The optional method applies only if all expenditures from an account during the same calendar month are similarly treated.

Thus, if the taxpayer in the preceding example chooses to apply the optional rule to all expenditures, the \$800 personal expenditure (\$500 from Debt A and \$300 from Debt B) made on February 17 is deemed to be an expenditure made on February 1. The same holds true for the passive activity expenditure (\$200 from Debt B) made on February 26. The \$800 investment expenditure made on November 24 from Debt C is treated as made on November 1st. The \$600 personal expenditure (\$200 from Debt C) is treated as made on December 1st. The interest allocation is:

Interest on Debt A is investment interest from January 10 through January 31 and is personal interest for the rest of the year.

Interest on Debt B is investment interest from January 11 through January 31. It is 60 percent personal interest and 40 percent passive activity interest for the period February 1 through December 31.

Interest on Debt C is investment interest from June 21 through November 30. For the rest of the year, 80 percent of the interest is investment interest; the balance is personal interest.

An alternative allocation method allows a taxpayer to treat any expenditure made from an account within 15 days after debt proceeds are deposited in the account as made from such proceeds to the extent thereof, even if under the general rule the proceeds would be treated as used to make one or more other expenditures. A similar rule applies to debt

proceeds received in cash.ⁿ³²

Example:

Assume the same facts as in the preceding example except that the proceeds of Debt B are deposited on February 11 rather than on January 11. Since the \$700 passive activity expenditure occurs within 15 days after the proceeds of Debt B are deposited in the account, the taxpayer can treat the expenditure as being made from the proceeds of Debt B to the extent thereof. If the taxpayer does so, the expenditures from the account are treated as follows: The \$800 personal expenditure on February 17 is treated as made from the \$500 proceeds of Debt A and \$300 of unborrowed funds. The \$700 passive activity expenditure made on February 26 is treated as made from the \$500 proceeds of Debt B and \$200 of unborrowed funds. The remaining expenditures follow the general rule as to allocation.

Interest on Debt A through February 16 is investment interest. It is personal interest for the rest of the year.

Interest on Debt B is investment interest from February 11 through February 25. Thereafter, it is passive activity interest.

Interest on Debt C is investment interest from June 21 through December 19. The interest for the rest of the year is 20 percent personal interest and 80 percent investment interest.

If repayment of the debt occurs when the proceeds are allocated to more than one expenditure, the debt is treated as repaid in the following order:

- (1) Amounts allocated to personal expenditures;
- (2) Amounts allocated to investment expenditures and passive activity expenditures other than a rental real estate activity with respect to which the taxpayer materially participates;
- (3) Amounts allocated to passive activity expenditures in connection with a rental real estate activity with respect to which the taxpayer materially participates;
- (4) Amounts allocated to former passive activity expenditures (activities where the taxpayer changed from a passive investor to material participant); and
- (5) Amounts allocated to trade or business expenditures.ⁿ³³

Amounts allocated to two or more expenditures within the same class (eg, different investment expenditures) are treated as repaid in the order in which the amounts were allocated to the expenditures. The taxpayer may treat allocations that occur on the same day as occurring in any order.

Example:

A taxpayer borrows \$100,000 on May 15 and immediately deposits the proceeds in an account. He uses the proceeds to make the following expenditures:

June 12	\$40,000 passive activity expenditure
July 10	\$20,000 trade or business expenditure
July 30	\$40,000 personal expenditure

The taxpayer repays \$90,000 of the debt on January 30 of the following year. The \$40,000 allocated to the passive activity expenditure, the \$40,000 allocated to the personal expenditure, and \$10,000 of the trade or business expenditure are treated as repaid.

If the taxpayer maintains a line of credit or similar arrangement that allows the taxpayer to borrow periodically under a single line of credit, the order of repayment depends on the interest rate charged to the taxpayer. Advances that bear the same fixed or variable rate of interest are treated as a single debt. Advances on which interest accrues at different fixed or variable rates are different debts and are treated as repaid in the order deemed repaid under the loan agreement.ⁿ³⁴

If a debt is refinanced, the replacement debt is allocated to the expenditures to which the refinanced debt was allocated. The amount of replacement debt not used for refinancing is allocated to expenditures in accordance with the general rules.ⁿ³⁵

Example:

Assume the facts in the preceding example, except that \$90,000 of the original debt is repaid with the proceeds of a new debt of \$120,000. The remaining \$30,000 is used to make an investment expenditure. The new debt is allocated \$40,000 to personal expenditure, \$40,000 to passive activity expenditure, \$10,000 to trade or business expenditure, and \$30,000 to investment expenditure. The new debt will be treated as repaid in the following order: (1) amount allocated to personal expenditure, (2) amount allocated to investment expenditure, (3) amount allocated to passive activity expenditure, and (4) amount allocated to trade or business expenditure.

Reallocation of debt is required when a leveraged asset is sold and the proceeds of sale are used for a different class of expenditure. If the proceeds of sale do not exceed the debt allocated to the property, the amount of reallocation is limited to the amount of such proceeds.ⁿ³⁶ If the proceeds exceed the debt allocated to the asset at the time of sale, the proceeds are treated as (1) borrowed funds to the extent of the debt allocated to the asset when sold, and (2) unborrowed funds to the extent of the excess.ⁿ³⁷

Example 1:

A taxpayer borrows \$20,000 and uses \$15,000 of the proceeds to purchase an investment asset and \$5,000 for a personal expenditure. One year later, the taxpayer sells the investment asset for \$10,000 and uses the proceeds for a passive activity expenditure. It is clear that 25 percent of the interest remains personal interest and that 50 percent of the interest is reallocated to passive activity interest. The balance of the interest probably remains investment interest; the regulations are not specific in this regard.

Example 2:

Assume the same borrowing and initial expenditures as in Example 1. One year later, the taxpayer sells the investment asset for \$25,000, and places the proceeds in an account. Sometime thereafter, \$20,000 of the funds on deposit is used to make a passive activity expenditure. The expenditure is deemed to have been made with \$15,000 of borrowed funds (the debt allocated to the investment asset) and \$5,000 of unborrowed funds.

Debt must also be reallocated when the character of the asset changes (eg, from a trade or business asset to a personal asset). The amount of debt reallocated by reason of the change cannot exceed the fair market value on the date of change in use.ⁿ³⁸

The allocation rules apply to any interest expense paid or accrued in taxable years beginning after December 31, 1986.ⁿ³⁹ However, debt outstanding on December 31, 1986, that is properly attributable to a business or rental activity is allocated to assets held for use or sale to customers in the activity.ⁿ⁴⁰ Debt is properly attributable to a business or rental activity if the taxpayer properly and consistently deducted interest on the debt on Schedule C, E, or F of Form

1040 before 1987. The taxpayer can elect out of the transitional rule and have the new allocation rules apply.ⁿ⁴¹ For purposes of the allocation or election out, a partnership or S corporation is treated as the taxpayer with respect to the debt of the partnership or corporation.ⁿ⁴²

Debt allocated pursuant to the transitional rule must be allocated in a reasonable and consistent manner among the assets held for use or for sale to customers on the last day of the taxable year that includes December 31, 1986. Debt is not treated as allocated in a reasonable and consistent manner if the amount of debt allocated to goodwill exceeds the basis thereof, or if the amount of debt allocated to an asset exceeds or is less than the fair market value of the asset.ⁿ⁴³

A taxpayer specifies the manner in which debt is allocated under the transitional rule by attaching a statement to the taxpayer's taxable return for the first taxable year beginning after 1986. If the taxpayer chooses to allocate debt pursuant to the transitional rule, the statement must be prominently identified as a "TRANSITIONAL ALLOCATION STATEMENT UNDER § 1.163-8T(n)(3)" and contain the following information:

- (1) A description of the business or rental activity to which the debt is properly attributable;
- (2) The amount of debt allocated;
- (3) The assets among which the debt is allocated;
- (4) The manner in which the debt is allocated;
- (5) The amount of debt allocated to each asset; and
- (6) Such other information as the Service may require.ⁿ⁴⁴

A taxpayer electing out of the transitional rule attaches a statement identified as an "ELECTION OUT UNDER § 1.163-8T(n)(3)."ⁿ⁴⁵ The allocation or election out cannot be revoked or modified without the consent of the Service.ⁿ⁴⁶

[b] Excess Investment Interest. An analysis of certain nontaxable, high-income, tax returns for 1966, revealed that a significant number of the taxpayers filing such returns claimed a deduction for "other interest" (interest other than home mortgage interest or interest incurred in connection with a business) substantially in excess of their investment income.ⁿ⁴⁷ The belief that it was necessary to restrict the deduction of interest on funds borrowed to acquire or carry investment assets, in order to prevent the use of the excess interest deduction as a shelter for other income received by the taxpayer, led Congress to the enactment of *IRC Section 163(d)*.

IRC Section 163(d) limits the deduction available to a noncorporate taxpayer with respect to the taxpayer's investment interest expense, i.e., interest paid or accrued on indebtedness incurred or continued to acquire or carry property held for investment,ⁿ⁴⁸ to the amount of the taxpayer's net investment income for the taxable year.ⁿ⁴⁹ (A partner's or S corporation shareholder's proportionate share of investment interest incurred by the partnership or S corporation is taken into account separately by the partner or shareholder and added to his other investment interest to see if the deduction limit is exceeded.)ⁿ⁵⁰

The amount of any investment interest expense rendered nondeductible by operation of *IRC Section 163(d)(1)* can be carried over indefinitely to offset future years' investment income; the amount disallowed in the earlier year is treated as investment interest paid or accrued in the succeeding taxable year.ⁿ⁵¹ The Service originally took the position that when the amount of disallowed investment interest exceeded the taxable income for the year, the carryover could not exceed the amount of taxable income.ⁿ⁵² The Service changed its stance after four appellate courts and the Tax Court held that all of the disallowed interest could be carried forward.ⁿ⁵³

The limiting factor--net investment income--is simply, "the excess of investment income over investment expenses."ⁿ⁵⁴ Investment income is defined as gross income from property held for investment,ⁿ⁵⁵ but does not include any net capital gain from the disposition of investment property unless the taxpayer elects otherwise.ⁿ⁵⁶ In such case, the taxpayer is required to reduce the amount of net capital gain subject to the maximum capital gains rate by the amount treated as investment income. Investment expenses are "the deductions allowed under this chapter which are directly connected with production of investment income."ⁿ⁵⁷

IRC Section 212 permits the deduction of expenses paid or incurred for the production or collection of income, or for the management, conservation, or maintenance of property held for the production of income; the definition of investment expenses is cast in terms of expenses "directly connected with the production of ... income."ⁿ⁵⁸ An issue is presented as to whether the difference in language is evidence of a Congressional intent to restrict investment expenses to those connected with the production of income, or whether the word "production" should be broadly construed to include collection of investment income as well as the management, conservation, and maintenance of property held for the production of investment income? The issue should be resolved in favor of the more expansive construction in order to prevent an artificial inflation of net investment income (by the amount of expenses incurred in the collection of investment income, and in the management, conservation, and maintenance of property held for the production of such income) and an unwarranted increase in the amount of investment interest deductible by the taxpayer.

Income and expenses taken into account under *IRC Section 469* in computing income or loss from a passive activity are not treated as investment income and expenses.ⁿ⁵⁹ (However, because the passive loss rules were not fully phased in before 1991, the amount of such loss that was allowed in any taxable year before that date reduced the amount of the taxpayer's net investment income for that taxable year.)ⁿ⁶⁰

[c] Interest on Indebtedness Incurred to Purchase or Carry Tax-Exempt Securities. Under *IRC Section 265(a)(2)*, no deduction is allowed for "interest on indebtedness incurred or continued to purchase or carry obligations ... the interest on which is wholly exempt from [income taxation]," e.g., municipal bonds paying interest excluded from gross income under *IRC Section 103*.ⁿ⁶¹ Since the provision is not qualified in any way, it applies equally to dealers, traders, and investors.ⁿ⁶²

Prior to 1986, long-standing judicial and administrative interpretations permitted financial institutions to invest deposited funds in tax-exempt obligations, while continuing to deduct interest paid to depositors. The only limitation on the deduction was the 20 percent reduction in the amount that could be deducted for interest on funds allocable to tax-exempt obligations acquired by financial institutions after 1982.ⁿ⁶³

IRC Section 265(b)(1), added by the Tax Reform Act of 1986, disallows that portion of a financial institution's interest expense that is allocable to tax-exempt interest on obligations acquired after August 7, 1986.ⁿ⁶⁴ The portion of the institution's interest expense that is so allocable is an amount that bears the same ratio to the expense as the taxpayer's average adjusted bases of the obligations bears to the average adjusted bases of all assets of the taxpayer.ⁿ⁶⁵

An exception to the disallowance rule for financial institutions is provided in the case of a "qualified tax-exempt obligation," defined as a tax-exempt obligation issued after August 7, 1986 (other than a private activity bond that is not a qualified 501(c)(3) bond, or an obligation issued to refund, or which is part of a series of obligations issued to refund, an obligation issued before August 8, 1986 that was not an industrial development bond or private loan bond) that is designated as a qualified tax-exempt obligation by the issuer.ⁿ⁶⁶ However, an obligation will not be treated as a qualified tax-exempt obligation unless the issuer is a qualified small issuer, that is, reasonably anticipated amount of tax-exempt obligations (other than private activity bonds) and certain refunding obligations that will be issued by the issuer during the calendar year does not exceed \$10 million.ⁿ⁶⁷ An allocation of the amount of an issue is prescribed in the case of an issue under which more than one governmental unit receives benefits if all of the governmental units irrevocably agree on the allocation and the allocation bears a reasonable relationship to the benefits received by the

entities.ⁿ⁶⁸

The American Recovery and Reinvestment Act of 2009 ("ARRA") provided certain temporary incentives for financial institutions to acquire tax-exempt obligations. For purposes of determining the ratio of the financial institution's average adjusted bases of tax-exempt obligations to the average bases of its total assets under *IRC Section 265(b)(2)*, which in turn determines the pro rata amount of interest disallowed by *IRC Section 265(b)(1)*, the financial institution may exclude from the numerator of the fraction the bases of any tax-exempt obligations issued in 2009 and 2010, provided the amount excluded does not exceed 2 percent of the denominator.^{n68.1} However, tax-exempt obligations excluded from the numerator under this "de minimis exception" are treated as having been acquired on August 7, 1986,^{n68.2} meaning that the financial institution's interest expense allocable to such excluded obligations, like interest expense allocable to "qualified tax-exempt obligations," is a tax preference item subject to the 20 percent disallowance rule.

ARRA (Section 1502(a)) also liberalized, for tax-exempt obligations issued in 2009 or 2010, the rules which determine whether such obligations are "qualified tax-exempt obligations." First, the amount of tax-exempt obligations that may be issued by a "qualified small issuer" under *IRC Section 265(b)(3)(C)(i)*, the amount of "qualified tax-exempt obligations" that may be designated by such an issuer under *IRC § 265(b)(3)(D)(i)*, and the amount of refunding tax-exempt obligations that may be designated as "qualified tax-exempt obligations" under *IRC § 265(b)(3)(D)(iii)*, have all been increased from \$10 million to \$30 million.^{n68.3} Second, for purposes of determining whether an issuer has satisfied the requirements for "qualified tax-exempt obligations" with respect to bonds issued in 2009 and 2010, any "qualified 501(c)(3) bond" (as defined in *IRC Section 145*) is to be treated as though the *IRC Section 501(c)(3)* organization for whose benefit the bonds were issued was the actual issuer.^{n68.4} Finally, for purposes of testing whether the "qualified tax-exempt obligation" rules are met in the case of a "qualified financing issue" made in 2009 or 2010, the rules applicable to composite bond issues (i.e., combined issues of bonds for different entities) in *IRC Section 265(b)(3)(F)* are to be replaced by new qualifying rules in *IRC Section 265(b)(3)(G)(iii)*.^{n68.5} Under the new rules, a qualifying financing issue is no longer tested as a whole (i.e., by treating the composite issue as a single issue); rather, the qualifying rules are applied separately to each borrower, as though the portion of the proceeds used by that borrower were issued as a separate issue. According to an example given in the House Conference Report, a \$100 million pooled financing issue issued in 2009 could meet the *IRC Section 265(b)(3)* definition of a "qualified tax-exempt obligation" if the proceeds of the issue were used to make four equal loans of \$25 million to four qualified borrowers.^{n68.6} However, the entire issue would fail to meet the requirements of a "qualified tax-exempt obligation" if (1) any borrower were not a qualified borrower, (2) any qualified borrower's share of the proceeds exceeded \$30 million (the maximum amount allowed in 2009 or 2010), or (3) any qualified borrower would, if it were the issuer of a separate issue in an amount equal to the amount loaned to that borrower, fail to meet any of the other requirements of *IRC Section 265(b)(3)*.^{n68.7}

There can be no doubt that *IRC Section 265(a)(2)* must apply when the taxpayer incurs or continues a debt for the sole purpose of purchasing or carrying tax-exempt securities.ⁿ⁶⁹ But is disallowance still mandated when the purchase of such obligations is merely a temporary investment of funds borrowed primarily for a business purpose? In other words, must there be a correlation between incurrence or continuation of the debt and the purchase or carrying of tax-exempt securities? Apparently so, since a deduction for interest paid or accrued on money borrowed to finance plant expansion, increase working capital, and liquidate other corporate indebtedness has been allowed, notwithstanding the short-term investment of the funds in tax-exempt securities; the debt was not incurred for the purpose of purchasing or carrying tax-exempt bonds, but rather for a business purpose apart from the acquisition of municipal bonds.ⁿ⁷⁰

We are led to a further question. Can the necessary correlation between borrowing and carrying tax-exempt securities be inferred from the mere fact that a taxpayer incurs a debt to finance additional investments at the same time that he holds tax-exempt obligations? The Commissioner would answer in the affirmative, pointing to a statement once made by the Supreme Court:

"[I]nterest can be said to be incurred or continued as a cost of producing exempt income whenever a taxpayer borrows for the purpose of making investments and in fact invests funds in exempt

securities."ⁿ⁷¹

The courts disagree, denying the deduction only when there is a sufficiently direct relationship between the incurrence or continuance of the debt and the purchase or carrying of the securities. The thrust of this approach is best summed up in the language of the Tax Court:

"We are of the opinion that the requisite sufficiently direct relationship between the incurring of various indebtedness by petitioner and his holding of tax-exempt securities, is absent here, except for the general one that the incurring of indebtedness allowed petitioner to retain his tax-exempt holdings. However, if this were a sufficient ground for disallowing the interest deduction, then section 265(2) would in fact be a mechanical test; i.e., the deduction would be disallowed whenever indebtedness was incurred while tax-exempts were held. ... [T]his is not the result that the statute was intended to achieve."ⁿ⁷²

Unquestionably, a sufficiently direct relationship between debt and purchase exists when the new funds are invested in additional tax-exempt securities. But disallowance is not limited to that fact pattern. For example, in *Illinois Terminal R.R. v. United States*ⁿ⁷³ the borrowed funds (\$20 million) were used to purchase another corporation's properties. Two years later one of these properties was sold to a city for \$9 million in cash and \$11,000,000 in tax-exempt bonds. The cash was applied in reduction of the outstanding loan balance; the bonds were held. The Court of Claims denied the interest expense deduction, notwithstanding the taxpayer's argument that the loan was needed to sustain its business operations rather than its ownership of tax-exempt securities. The argument failed because the court found that the loan was continued out of a concern for preserving the bond holdings, something that could be accomplished only if the debt financed the taxpayer's operations.

Must disallowance be decreed whenever borrowed funds are used for a purpose or a project that could have been financed by a sale of the tax-exempt securities held by the taxpayer? This would seem to be a logical extension of *Illinois Terminal R.R.*, but it does violence to the idea that *IRC Section 265(a)(2)* is not intended to operate as a mechanical rule. And so, once again, there must be a connection between the loans and the tax-exempt securities before the interest deduction will be denied. This is, perhaps, best illustrated by the decision of the Seventh Circuit in *Wisconsin Cheeseman, Inc. v. United States*.ⁿ⁷⁴ The taxpayer, engaged in a seasonal business (Christmas sales), would obtain short-term loans each fall in order to meet its recurring working capital needs. The borrowings were repaid out of the receipts of each year's sales, any balance of such receipts going to purchase municipal bonds and treasury bills. The treasury bills were reduced to cash by the following summer, the municipal bonds were not. Instead, the latter were used as collateral for the bank loans obtained during the fall of the following year. The court held *IRC Section 265(a)(2)* applicable, being convinced that "the deduction should not be allowed if a taxpayer could reasonably have foreseen at the time of purchasing the tax-exempts that a loan would probably be required to meet future economic needs of an ordinary, recurring variety."ⁿ⁷⁵ Thus, even if the taxpayer had not pledged the municipal bonds as security for the loan, the deduction would have been barred by the fact that the underlying reason for the recurring loan was the carrying of tax-exempt obligations.

On the other hand, the court permitted a deduction for interest on a construction loan secured by a mortgage on the taxpayer's real property. The Commissioner had denied the deduction, on the ground that the taxpayer should have financed its new plant by selling tax-exempt securities instead of obtaining a mortgage loan. The Seventh Circuit found that business reasons dominated the mortgaging of the taxpayer's real estate; a reasonable person would not sacrifice liquidity and security by selling municipal bonds in lieu of incurring a debt to obtain the necessary funds for plant construction. Therefore, the relationship between the mortgage indebtedness and the holding of tax-exempt obligations was not sufficiently direct to justify a disallowance of the mortgage interest deduction.ⁿ⁷⁶

Although a sufficiently direct relationship between the incurrence of a debt and the carrying of tax-exempts is the *sine qua non* of disallowance, it is not necessary that the borrowed money be directly traceable to the continued holding of

the obligations. The result in *Leslie v. Commissioner*⁷⁷ furnishes support for this proposition. The case concerned the deductibility of interest expense accrued by a brokerage firm on funds borrowed to finance customers' purchases of securities in margin accounts. The amount of money that the firm borrowed was determined on a day-to-day basis. While the purchase and continued ownership of tax-exempt obligations had an effect on the daily cash requirements of the firm, transactions in tax-exempts were not specifically considered in determining the amount of bank borrowings. If total disbursements for a given day were expected to exceed receipts, the firm would borrow the amount needed to maintain a reasonable cash position. No thought was given to the liquidation of some of the tax-exempt securities as a means of reducing the amount which had to be borrowed, since these were held not as an investment, but as an incident of the firm's brokerage business, i.e., through participation in syndications, through maintaining a market in tax-exempts, and through purchases for customers.

The Tax Court found for the taxpayer, basing its decision that the firm did not incur a portion of its indebtedness for the purpose of purchasing or carrying tax-exempt securities on the following: (1) there was no conscious thought given to obtaining a part of the firm's cash requirements through a sale of the tax-exempts; (2) there was no relationship between the amounts borrowed and the tax-exempt securities purchased; (3) the borrowed money was not traceable to the purchase of tax-exempts, since the funds were deposited in the firm's general purpose checking accounts; (4) the ratio of tax-exempts to borrowed funds was so small that the need for capital could not have been met by liquidating the obligations; and (5) the tax-exempt securities were acquired as a consequence of the firm's brokerage business and held for only a minimal period.

The Second Circuit reversed. In its view:

"[T]he fact that money was borrowed 'in the conduct of Bache's large and many-sided business activities' by no means negates the existence of a purpose, to the extent that the borrowing allowed Bache to deal in and retain a portion of the tax-exempts. To the contrary, in computing its daily cash needs for the purposes of borrowing, Bache took into account the amount of intended purchases of tax-exempt securities. Bache was, in essence, using the United States to finance its purchases of tax-exempt securities to the extent that it obtained an interest deduction allocable to a business income on which it paid no tax."⁷⁸

Thus, the court found a direct correlation between the continuance of the debt and the carrying of the tax-exempt securities, and disallowed an allocable portion of the interest accrued on the borrowed funds.⁷⁹

IRC Section 265(a)(4) is a necessary corollary of the provision permitting a regulated investment company to pay exempt-interest dividends to its shareholders. The added subsection disallows any deduction for interest on indebtedness incurred or continued to purchase or carry shares of stock of any investment company which distributes such dividends during the taxable year of the shareholder. If the company pays only exempt-interest dividends during the taxable year, all of the interest deduction will be denied. If both tax-free and taxable dividends are distributed, there is disallowance only to the extent the interest relates to the exempt-interest dividends.⁸⁰

[d] Interest on Obligations Not in Registered Form. *IRC Section 163(f)(1)* denies a deduction for interest paid on any obligation not in registered form.^{80.1} There are, however, exceptions for obligations (1) issued by an individual, or (2) not of a type issued to the public, or (3) having a maturity (at issue) of not more than one year,⁸¹ but the last two exceptions will not apply to any obligation determined by regulations to be of a type used frequently in avoiding federal taxes.⁸²

For obligations issued on or before March 18, 2012, *IRC Section 163(f)(1)* also does not apply to a foreign targeted obligation that is (a) issued under arrangements reasonably designed to ensure that the obligation will be sold only to a person who is not a United States person,⁸³ and, (b) in the case of an obligation not in registered form, the interest is payable outside the United States and its possessions and bears a legend on its face that any United States person who

holds the obligation will be subject to all limitations imposed by the Code with respect to bonds that should have been issued in registered form.^{n83.1} However, the foreign targeted obligation exception has been repealed for obligations issued after March 18, 2012, after which interest will be nondeductible on all bearer obligations other than those falling in the three exceptions referred to above.ⁿ⁸⁴

[e] Interest Allocable to Accrued Market Discount.ⁿ⁸⁵ Current deductions for interest allocable to market discount bonds are allowable only to the extent that the taxpayer's net direct interest--the excess of the amount of interest paid or accrued to purchase or carry market discount bonds over the aggregate of interest (including original issue discount) includable in gross income for the taxable year with respect to the bond--exceeds the amount of market discount allocable to the days during the taxable year on which the bond was held by the taxpayer.ⁿ⁸⁶ The disallowed portion of the interest expense is deferred to the year of disposition of the bond and allowed as a deduction at that time.ⁿ⁸⁷ If the bond is disposed of in a nonrecognition transaction, the disallowed interest expense becomes a deduction only to the extent that gain is recognized on the exchange; the balance of the gain is treated as disallowed interest expense with respect to the transferred basis property or exchange basis property received in the transaction.ⁿ⁸⁸

It should be noted that the provision applies to all market discount obligations *acquired* after the date of enactment of the Tax Reform Act of 1984. A consequence of this results in any gain recognized by the taxpayer on the disposition of a bond *issued* on or before July 18, 1984 being treated as ordinary income to the extent of the deferred interest allowable as a deduction in the year of disposition.ⁿ⁸⁹ However, the disallowance rule does not apply at all if the taxpayer elects to include market discount in income currently.ⁿ⁹⁰

[f] Interest Allocable to Discounted Short-Term Obligations.ⁿ⁹¹ *IRC Section 1282(a)* limits the ability of taxpayers who remain eligible to defer including acquisition discount on short-term obligations in income (e.g., cash basis taxpayers) to make leveraged purchases of short-term obligations as a device to defer tax on ordinary income. The net direct interest expense with respect to any short-term obligation can be taken as a deduction only to the extent that the expense exceeds the sum of (1) the daily portions of acquisition discount for each day during the taxable year on which the taxpayer held the obligation, and (2) the amount of any interest payable on the obligation (other than interest taken into account in determining the amount of acquisition discount) that accrues during the taxable year while the taxpayer held the obligation (and is not included in the gross income of the taxpayer for the taxable year under the taxpayer's method of accounting). Rules similar to those described in the preceding subsection apply to short-term obligations.ⁿ⁹² Thus, for example, the deferred portion of the interest expense becomes a deduction at the time of disposition of the obligation.

The provision does not apply to any taxpayer required to include acquisition discount in income currently or to any taxpayer who elects to do so.ⁿ⁹³

[g] Interest on High Yield Discount Obligations. Normally, the issuer of an original issue discount (OID) bond is permitted to deduct the discount as interest over the life of the bond. *IRC Section 163(e)(5)*, added to the Code in 1989 and generally applicable to obligations issued after July 10, 1989, limits the amount of the annual deduction when a debt instrument issued by a corporation (other than an S corporation) is an "applicable high yield discount obligation,"^{n93.1} that is, an obligation that (1) has a maturity date that is more than five years from the date of issue, (2) has a yield to maturity that equals or exceeds the sum of the applicable federal rate (AFR) in effect under *IRC Section 1274(d)* for the calendar month the obligation is issued, plus five percentage points, and (3) has significant OID.ⁿ⁹⁴

The limitation is achieved by dividing the yield on the obligation into an interest portion and a "disqualified" or equity portion.ⁿ⁹⁵ The disqualified portion of the OID is the lesser of (1) the amount of the OID or (2) the portion of the total return on the obligation that bears the same ratio to the total return as the "disqualified yield" on the obligation bears to the yield to maturity on the obligation. The disqualified yield is that portion of the yield that exceeds the AFR for the month in which the obligation is issued, plus six percentage points. If the yield to maturity on the obligation, determined by disregarding the OID, exceeds the AFR plus six percentage points, the disqualified portion is the entire amount of

the OID.

Example 1:

A corporation issues an applicable instrument on January 1, 2000 with an issue price of \$10,000 and a yield to maturity of 20 percent in a month in which the AFR is 9 percent. The AFR plus 6 percentage points is 15 percent. The return on the instrument in 2000 is \$2,000 (\$10,000 issue price times the 20 percent yield to maturity); the adjusted issue price at the end of 2000 is \$12,000. The return on the instrument in 2001 is \$2,400 (20 percent of the adjusted issue price of \$12,000). The disqualified yield is 5 percent (20 percent yield to maturity minus 15 percent). The disqualified portion is 25 percent (5 percent divided by 20 percent yield to maturity). The ratio of the disallowed portion of the yield to the yield is constant throughout the term of the instrument. Thus, the amount of the disqualified portion is \$500 (\$2,000 return times 25 percent) in 2000 and \$600 (\$2,400 return times 25 percent) in 2001.

The allocation of OID payments made before maturity between the disqualified portion and the remainder is to be made pursuant to regulations to be promulgated. These regulations are expected to provide that the payments will be allocated on a pro rata basis between accrued but unpaid OID treated as interest and the accrued but unpaid disqualified portion of the discount.

Example 2:

Assume the same facts as in Example 1, except that the corporation distributes \$1,200 in cash with respect to the instrument at the end of 2001. Of that amount, 25 percent or \$300, will be considered to be payment of the accrued but unpaid disqualified portion; the balance will be allocated to unpaid OID treated as interest.

In general, earnings and profits of the issuing corporation will be computed as if *IRC Section 163(e)(5)* did not exist. However, in determining the amount of the disqualified portion that is treated as a dividend for any year, earnings and profits are not reduced by any amount attributable to the disqualified portion for that year. The computation of earnings and profits for subsequent years is unaffected by this special rule.

Example 3:

A corporation accrues \$10,000 of interest with respect to an applicable instrument held by another corporation for a taxable year. \$8,000 of that amount is treated as interest for which a deduction is allowed when paid; the balance is the disqualified portion. None of the interest is paid during the year. The corporation has earnings and profits of \$11,000 before the accrued interest on the instrument is taken into account. Applying the general and special rules gives the issuing corporation earnings and profits of \$3,000 for the purpose of determining the character of the portion of the yield that is treated as a distribution with respect to stock and \$1,000 of earnings and profits for all other purposes including the determination of earnings and profits in subsequent years.

[h] Interest Paid by a Corporation to a Related Person. Prior to the enactment of the Omnibus Budget Reconciliation Act of 1989, interest paid by a United States corporate taxpayer was generally deductible, whether or not the interest was paid to a related party and whether or not the interest income was subject to federal income taxation when received by the payee. *IRC Section 163(j)* now disallows the deduction of "disqualified interest" ^{n95.1} paid by a United States corporation ⁿ⁹⁶ to a related tax-exempt entity ^{n96.1} if the corporation (1) has a debt-equity ratio exceeding 1.5 to 1, ⁿ⁹⁷ and incurs (2) "excess interest expense"--i.e., "net interest expense" greater than the sum of 50 percent of the corporation's "adjusted taxable income" ⁿ⁹⁸ plus any "excess limitation carryforward"--for the taxable year. ⁿ⁹⁹ The amount disallowed cannot exceed the corporation's excess interest expense for the taxable year. ⁿ¹⁰⁰

Net interest expense is the excess of the amount of interest paid or accrued by the taxpayer during the taxable year over the amount of interest income includable in the taxpayer's gross income for that year. The corporation's adjusted taxable income is its taxable income computed without any interest deduction, net operating loss deduction, or deduction for

depreciation, amortization, or depletion. A taxpayer has an excess limitation whenever 50 percent of its adjusted taxable income is greater than its net interest expense for any taxable year; the difference becomes the excess limitation carryforward in the next succeeding taxable year, and to the extent not used to offset interest in that year, to the second and third succeeding years.^{n100.1}

Example:

For 2000, a corporation has \$1,500 of adjusted taxable income and \$600 of net interest expense. Thus, none of its interest expense is disallowed by *IRC Section 163(j)* in 2000, and it has a \$150 excess limitation for the year (50 percent of its adjusted taxable income or \$750 less \$600 net interest expense) that can be carried forward to 2001.

In 2001, the corporation has \$1,000 of adjusted taxable income and \$600 of net interest expense. Although net interest expense is \$100 greater than 50 percent of adjusted taxable income, there is again no disallowance because of the presence of the \$150 excess limitation carryforward. There is an excess limitation carryforward to 2002 of \$50.

A payor and recipient of interest are related if either *IRC Section 267(b)* (see § 2.07[4][a]) or *IRC Section 707(b)* specifies that they are such. However, payments of interest to a partnership that would otherwise be a related person will generally not be treated as paid to a related person if partners not subject to United States income tax on their distributive shares of the partnership's interest income own in the aggregate less than 10 percent of the profits and capital interests in the partnership. An exception to this last-stated rule applies to the extent any partner is a related person to the paying corporation.

A recipient is tax exempt for purposes of *IRC Section 163(j)* if no federal income tax is imposed on that person's receipt of interest. If interest is paid to a pass-through entity, the determination of whether the payee is tax exempt is made at the beneficial owner level. Where an income tax treaty reduces the amount of United States income tax payable with respect to the interest, the portion treated as paid to a tax-exempt person is determined by a fraction, the numerator of which is the rate of tax that would be imposed absent the treaty less the treaty rate, and the denominator of which is the nontreaty rate.ⁿ¹⁰¹

IRC Section 163(j) applies as well to interest paid or accrued after December 31, 1993 on an indebtedness to a person who is not a related person if there is a disqualified guarantee of the indebtedness.ⁿ¹⁰² A disqualified guarantee is a guarantee made by a related person that is a tax-exempt organization or a foreign person, but does not apply to a guarantee (1) in any circumstances that will be identified in regulations, where the interest on the indebtedness would have been subject to a net basis tax if the interest had been paid to the guarantor, or if (2) the taxpayer owns a controlling interest in the guarantor.ⁿ¹⁰³

In applying *IRC Section 163(j)* to a corporation that owns (directly or indirectly) an interest in a partnership, (i) the corporation's distributive share of interest income paid or accrued to the partnership is treated as interest income paid or accrued to the corporation, (ii) the corporation's distributive share of interest paid or accrued by the partnership is treated as interest paid or accrued by the corporation, and (iii) the corporation's share of the liabilities of the partnership are treated as liabilities of the corporation.^{n103.1}

[i] Interest on Disqualified Debt Instruments. No deduction is allowed for any interest paid or accrued on a disqualified debt instrument--indebtedness of a corporation that is payable in the stock of the issuer or a related party (within the meaning of *IRC Section 267(b)* or *707(b)* or equity held by the issuer (or a related party) in any other person).ⁿ¹⁰⁴ Indebtedness is treated as payable in stock of the issuer or a related party only if (1) a substantial amount of the principal or interest is required to be paid or converted, or at the option of the issuer or a related party, is payable in, or convertible into, such stock, (2) a substantial amount of the principal or interest is required to be determined, or

may be determined at the option of the issuer or a related party, by reference to the value of stock of the issuer or any other person, or (3) the indebtedness is part of an arrangement that is reasonably expected to achieve those results.ⁿ¹⁰⁵ If the disqualified debt instrument of a corporation is payable in equity held by the issuer (or a related party) in any other person (other than a related party), the basis of the equity is increased by the amount not allowed as a deduction.ⁿ¹⁰⁶

[j] Treatment of Bond Issuance Premium. The issuer of a debt instrument with bond issuance premium determines its interest deduction by offsetting the interest allocable to an accrual period with the bond issuance premium allocable to that period.ⁿ¹⁰⁷ This rule does not apply to (1) regular instruments in a REMIC, qualified mortgages held by a REMIC, and certain other debt instruments, or pools of debt instruments, with payments subject to acceleration, or (2) to debt instruments that provide for contingent payments.ⁿ¹⁰⁸

Bond issuance premium is the excess of the issue price of a debt instrument over its stated redemption price at maturity.ⁿ¹⁰⁹ For this purpose, the issue price of a convertible bond does not include any amount equal to the value of the conversion option.ⁿ¹¹⁰

An issuer amortizes bond issuance premium by offsetting the qualified stated interest allocable to an accrual period with the bond issuance premium allocable to the period; the offset occurs when the issuer takes the qualified stated interest into account under its regular method of accounting.ⁿ¹¹¹

The bond premium allocable to an accrual period is determined under a three-step process.ⁿ¹¹² Within an accrual period, the bond premium allocable to the period accrues ratably.

The first step is to determine the yield to maturity, namely, the discount rate that, when used in computing the present value of all principal and interest payments to be made under the debt instrument, produces an amount equal to the issue price of the debt instrument.ⁿ¹¹³ The yield must be constant over the term of the debt instrument and, when expressed as a percentage, must be calculated to at least two decimal places.

The second step is to determine the accrual period for the bond.ⁿ¹¹⁴ This determination is made in the same manner as the determination of the accrual period for original issue discount.ⁿ¹¹⁵

The third step calls for determining the bond issuance premium allocable to the accrual period.ⁿ¹¹⁶ The issuance premium so allocable is the excess of the qualified stated interest allocable to the accrual period over the product of the adjusted acquisition price at the beginning of the accrual period and the yield.

If the bond issuance premium allocable to an accrual period exceeds the qualified stated interest allocable to the period, the excess is treated as ordinary income by the issuer for the period.ⁿ¹¹⁷ However, the amount so treated is limited to the amount by which the issuer's total interest deductions on the debt instrument in prior accrual periods exceed the total amount treated by the issuer as ordinary income in prior accrual periods. If the bond issuance premium allocable to an accrual period exceeds the sum of the qualified stated interest allocable to the accrual period and the amount treated as ordinary income for the accrual period, the excess is carried forward to the next accrual period and is treated as bond issuance premium allocable to that period.ⁿ¹¹⁸ Any carryforward that exists on the date the instrument is retired is treated as ordinary income on that date.

An issuer determines bond issuance premium on a variable rate debt instrument by reference to the stated price at maturity of the equivalent fixed rate debt instrument constructed for the variable rate debt instrument.ⁿ¹¹⁹ The issuer also allocates bond issuance premium among the accrual periods by reference to the equivalent fixed rate debt instrument.

An issuer determines bond issuance premium on an inflation-indexed debt instrument by assuming that there will be no

inflation or deflation over the term of the instrument.ⁿ¹²⁰ The issuer also allocates any bond issuance premium among the accrual periods by assuming that there will be no inflation or deflation over the term of the instrument. However, if the bond issuance premium allocable to a period exceeds the qualified stated interest allocable to the period, the excess is treated as a deflation adjustment.

The payment schedule that an issuer must construct for a contingent payment debt instrument determines the amount of bond issuance premium on the debt instrument, the yield and maturity of the debt instrument, and the allocation of bond issuance premium to an accrual period.ⁿ¹²¹ However, if a debt instrument is subject to a mandatory sinking fund provision, the issuer must determine the payment schedule by assuming that a pro rata portion of the debt instrument will be called under the sinking fund provision.ⁿ¹²²

The foregoing rules can be illustrated by the following example that assumes a 30-day month and a 360-day year:

Example:

On March 1, 2000, A Corp. received \$2,200,000 for a \$2 million bond maturing on March 1, 2007 and payable on that date. The bond provided for unconditional payments of interest of \$200,000 payable on March 1 of each year; the payments constitute qualified stated interest. A Corp. is a cash method taxpayer using the calendar year as its taxable year. A Corp. decided to use annual accrual periods ending on March 1 of each year. Based upon these facts, the amount of bond issuance premium is \$200,000.

Based upon the payment schedule and the issue price of the bond, the yield of the debt instrument is approximately 8.07 percent, compounded annually.ⁿ¹²³ The bond issuance premium allocable to the accrual period ending on March 1, 2001 is the excess of the \$200,000 qualified stated interest allocable to the period over \$177,637 (the product of the \$2,200,000 adjusted issue price at the beginning of the period and the yield of 8.07 percent, compounded annually), or \$22,363. Thus, A Corp. can deduct only \$177,637 of the \$200,000 qualified stated interest payment made on March 1, 2001.

[k] Interest and Carrying Charges Allocable to Straddles. *IRC Section 263(g)(1)* disallows a deduction for interest and carrying charges properly allocable to personal property that is part of a straddle (as defined in *IRC Section 1092(c)*).ⁿ¹²⁴ Any amount so disallowed is chargeable to the capital account with respect to the personal property to which the amount relates. By requiring capitalization, the provision prevents a taxpayer from gaining a timing advantage by accruing deductions associated with carrying the straddle before recognizing income from a position in personal property that is part of the straddle, and from taking deductions having a character different from that of the income.

Proposed regulations define personal property as property, whether or not actively traded, that is not real property.ⁿ¹²⁵ A position in personal property can itself be personal property, but only if the position confers or may confer substantial rights on the taxpayer. Personal property includes both financial positions that provide substantial rights, but do not impose substantial obligations on the holder (e.g., common stock or a purchased option), as well as executory contracts that impose both rights and obligations on the holder (e.g., notional principal contracts and forward transactions).ⁿ¹²⁶ However, the definition excludes straddles comprised only of financial positions that impose only obligations on the holder (e.g., the obligor's position in a debt instrument or a writer's position in an option).ⁿ¹²⁷

For purposes of *IRC Section 263(g)*, the phrase "interest and carrying charges" is defined as the excess of (a) the sum of (i) interest on indebtedness incurred or continued to purchase or carry the personal property,ⁿ¹²⁸ and (ii) all other amounts (including charges to insure, store, or transport the personal property) paid or incurred to carry the personal property, over (b)(i) the amount of interest (including original issue discount) includable in gross income for the taxable year with respect to the property, (ii) any amount treated as ordinary income under *IRC Section 1271(a)(3)(A)* (certain gain attributable to acquisition discount on short-term government obligations), *IRC Section 1278* (market discount), or

IRC Section 1281(a) (discount on certain short-term obligations) with respect to the personal property for the taxable year, (iii) the excess of any dividends includable in gross income with respect to the property for the taxable year over the amount of any dividends received deduction allowable under *IRC Section 243, 244, or 245*, and (iv) any amount that is a payment with respect to a security loan (within the meaning of *IRC Section 512(a)(5)*) includable in gross income with respect to the property for the taxable year.ⁿ¹²⁹

IRC Section 263(g)(1) does not apply in the case of any hedging transaction (as defined in *IRC Section 1256(e)*).ⁿ¹³⁰ The provision is applied after *IRC Section 263(h)* in the case of a short sale, and after *IRC Section 1277* (deferral of interest deduction allocable to accrued market discount) and *IRC Section 1282* (deferral of interest deduction allocable to accrued discount).ⁿ¹³¹

[l] Interest on Underpayments Attributable to Nondisclosed Reportable Transactions. No deduction is allowed for interest paid or accrued on any underpayment of tax that is attributable to the portion of any reportable transaction for which the reasonable cause exception of *IRC Section 6664(d)(1)* does not apply.ⁿ¹³² A reportable transaction understatement is the sum of (a) the product of (i) the amount of increase (if any) in taxable income that results from a difference between the proper treatment of an item attributable to a reportable transaction and the taxpayer's treatment thereof, and (ii) the highest rate of tax applicable to the taxpayer, and (b) the amount of decrease (if any) in the aggregate amount of credits that result from a difference between the taxpayer's treatment of an item attributable to a reportable transaction and the proper treatment of the item.ⁿ¹³³ A reportable transaction is any transaction with respect to which information is required to be included with a return or statement because it is determined that the transaction has the potential for tax avoidance or evasion.ⁿ¹³⁴

[m] Interest Paid in Connection with Insurance Contracts. No deduction is allowed for (1) any amount paid or accrued on indebtedness to purchase or carry a single premium life insurance, endowment or annuity contract;ⁿ¹³⁵ (2) any amount paid or accrued on indebtedness incurred or continued to purchase or carry a life insurance, endowment or annuity contract (other than a single premium contract or contract treated as a single premium contract) pursuant to a plan of purchase that contemplates the systematic direct or indirect borrowing of part or all of the increases in the cash value of the contract;ⁿ¹³⁶ or (3) any interest paid or accrued on any indebtedness with respect to one or more life insurance policies owned by the taxpayer covering the life of any individual, or any endowment or annuity contracts owned by the taxpayer covering any individual.ⁿ¹³⁷

In addition to the above, no deduction is allowed for that portion of the taxpayer's interest expense that is allocable to unborrowed policy cash values.ⁿ¹³⁸ However, this disallowance rule does not apply to any policy or contract owned by an entity engaged in a trade or business if the policy or contract covers only one individual and that individual is (at the time covered by the policy or contract) a 20-percent owner of the entity, or, if not a 20-percent owner, an officer, director, or employee of the trade or business.ⁿ¹³⁹ A second exception arises when the policy or contract is held by a natural person, unless a trade or business is directly or indirectly the beneficiary of the policy.ⁿ¹⁴⁰

[n] Interest Incurred by an Electing Small Business Trust. An electing small business trust (ESBT) is one of the permitted shareholders of an S corporation. Until 2007, all shareholders of an S corporation, except an ESBT, could deduct interest expense arising from an indebtedness incurred in connection with an acquisition of S corporation stock. *IRC Section 641(c)(2)(C)(iv)*, effective for taxable years after 2006, now permits an ESBT to claim such a deduction.

[2] Dividends on Short Sales

A short sale is a sale of stock which the seller does not own, delivery to the purchaser being made with shares borrowed from some owner of the stock.ⁿ¹ Not infrequently, dividends are paid on the stock before the short sale is closed. This imposes an additional obligation on the short seller. Not only is he required to return an equivalent number of shares to the lender, he must also pay the lender the amount of dividends paid on the stock while the short sale remained open.

Prior to 1984, it was well-settled that an individual short seller, whether dealer, trader or investor, was entitled to deduct

the dividend equivalent paid to the lender of the stock, either under *IRC Section 162*, as an ordinary and necessary expense of carrying on a trade or business, or under *IRC Section 212*, as an expense incurred in the production or collection of income.ⁿ¹ Of course, for *IRC Section 212* to apply, the taxpayer had to show that his purpose in engaging in the short sale was the production of income.ⁿ²

The Tax Reform Act of 1984 added *IRC Section 263(h)* which bars the deduction to the extent that the payments made by the taxpayer exceed the amount of income received by the taxpayer for the use of any collateral with respect to stock used in the short sale, if the sale is closed on or before 45 days after the date of the sale.ⁿ³ The period is increased to one year and a day if the payment is in lieu of an extraordinary dividend.ⁿ⁴ The running of the period is suspended during any period in which the taxpayer holds, has an option to buy, or is obliged to buy, substantially identical stock or securities, or has diminished his risk of loss by holding one or more positions with respect to substantially similar or related property.

A corporate taxpayer will be permitted a deduction only if it is involved in the business of trading or dealing in securities; the corporate investor is relegated to using the payment as an offset of the selling price.ⁿ⁵ The difference in treatment between corporations and individuals stems from the fact that, while both corporate and noncorporate taxpayers are eligible to deduct trade or business expenses under *IRC Section 162*, individuals are the only ones who may claim a deduction under *IRC Section 212*.

Finally, no deduction is available to any taxpayer, whether dealer, trader, or investor, corporation or individual, for amounts paid to reimburse the lender for stock dividends or liquidating distributions paid with respect to the borrowed stock while the short sale remained open. Instead, such amounts are treated as capital expenditures.ⁿ⁶

[3] Miscellaneous Expenses.

Unless a specific provision bars deduction or an expenditure is classified as a capital item,ⁿ¹ expenses incurred in carrying or managing securities are deductible under *IRC Section 162*, if incurred in the taxpayer's trade or business, or under *IRC Section 212*, if incurred by an individual for the production or collection of income, or for the management, conservation, or maintenance of property held for the production of income.ⁿ² An important point is that, for *IRC Section 212*, the term "income" encompasses income realized in the current year or in a prior year, or which may be realized in a subsequent year. Moreover, it is not confined to recurring forms of income, but applies as well to gains from the disposition of property.ⁿ³

In *Klamath Strat. Inv. Fund v US*,^{n3.1} the taxpayers created limited liability companies taxable as partnerships that were managed by an investment advisor under a plan devised by the advisor to produce substantial artificial tax losses for the taxpayers but also involving legitimate investments in foreign currency contracts by the LLCs. Despite holding that the tax shelter aspect of the plan was a sham, the district court found that the individual taxpayers had a reasonable expectation of making a profit from the LLC's foreign currency transactions. The court allowed deductions under *IRC Section 212* for certain "operational expenses" paid by the taxpayers, including a management fee to the investment advisor and a fee to their accountants. On appeal, the district court was reversed on the deduction issue. Section 212 requires a profit motive, and since the operational expenses were incurred in connection with the LLC/partnership's business, the existence of a profit motive should have been determined at the partnership level rather than at the level of the individual taxpayers. The "critical inquiry" in this connection is the motive of the partner that effectively controlled the partnership's activities. The controlling partner here was the investment advisor which, under agreements with the taxpayers, was vested with sole managerial responsibility for the LLCs. The investment advisor, unlike the individual taxpayers, was primarily motivated by tax savings, not economic profit, and that motive, attributed to the LLCs, doomed the deduction.

The list of expenses deductible under *IRC section 212* includes, but is not limited to, custodian's fees,ⁿ⁴ accountant's fees,ⁿ⁵ investment advisory fees,ⁿ⁶ the cost of financial publications,ⁿ⁷ the cost of renting a safe deposit box to

safeguard securities,ⁿ⁸ the cost of secretarial and clerical help,ⁿ⁹ office expenses,ⁿ¹⁰ fees incurred by a stockholder in a proxy contest,ⁿ¹¹ and Securities and Exchange Commission semi-annual reporting fees.ⁿ¹²

The Tax Reform Act of 1986 imposed limits on the deductibility of miscellaneous itemized expenses (including investment expenses allowed as a deduction by *IRC Section 212*) incurred after 1986. Such expenses are deductible only to the extent that the aggregate of such deductions for the taxable year exceeds 2 percent of adjusted gross income.ⁿ¹³ The provision does not apply to the certain specified deductions, including the charitable deduction and the deduction for interest, taxes, and casualty and wagering losses.ⁿ¹⁴ The Treasury is authorized to prescribe regulations that prohibit the indirect deduction through pass-through entities (other than estates, trusts, cooperatives, and real estate investment trusts) of amounts that are not allowable as a deduction to an individual.ⁿ¹⁵ The pass-through entity rule is also inapplicable to investment expenses of a publicly offered regulated investment company.ⁿ¹⁶

IRC Section 68, added by the Omnibus Budget Reconciliation Act of 1990, provides that total otherwise allowable itemized deductions (other than medical expenses, casualty and theft losses, and investment interest expense) are reduced by an amount equal to 3 percent of the taxpayer's adjusted gross income in excess of \$100,000.ⁿ¹⁷ However, in no event can the deductions be reduced by more than 80 percent.

IRC Section 274(h) disallows any deduction under Section 212 for "expenses allocable to a convention, seminar, or similar meeting." This effectively precludes any deduction for attendance at investment seminars and the like, but not if the expenses are incurred in connection with the taxpayer's trade or business.

[4] Expenses Relating to Tax-Exempt Income.

It will be recalled that, under *IRC Section 265(a)(2)*, no taxpayer--dealer, trader, or investor--can deduct the interest paid or accrued on indebtedness incurred or continued to purchase or carry tax-exempt securities. A companion provision, *IRC Section 265(a)(1)*, bars the deduction of any other amount "allowable under section 212 ... which is allocable to interest ... wholly exempt from the taxes imposed by this subtitle." Because disallowance is keyed to *IRC Section 212*, it affects only investors and traders whose transactions in securities cannot be considered the carrying on of a trade or business; expenses incurred by dealers and traders whose activities qualify as a trade or business reach deductibility through *IRC Section 162*.

IRC Section 265(a)(1) also provides that no deduction will be available for "any amount otherwise allowable as a deduction which is allocable to one or more classes of income other than interest ... wholly exempt from [income taxation]." Disallowance here extends to dealers, traders, and investors; the provision covers "any amount otherwise allowable as a deduction," not just amounts allowable under *IRC Section 212*. Indeed, *IRC Section 265(a)(1)* is not limited just to expenses which qualify for deduction under *IRC Section 162* or *212*, it can operate to deny a deduction, otherwise allowable under *IRC Section 164*, for state or foreign taxes paid with respect to income exempt from federal income taxes, but not from taxation by a state or foreign government.ⁿ¹

The amount subject to the disallowance rule of *IRC Section 265(a)(1)* consists of all expenses directly allocable to any class or classes of exempt income and a proportionate share of any expenses which are indirectly related to both taxable income and tax-exempt income.ⁿ² The Regulations call for the apportionment to be made "in the light of all the facts and circumstances in each case ... "ⁿ³ And so, while an allocation of expenses to tax-exempt and nonexempt income in the proportion which each bears to the taxpayer's total income may be proper in a great majority of cases, it is not mandated if the facts and circumstances of the case dictate the use of some other method of apportionment.ⁿ⁴

An important consideration is whether *IRC Section 265(a)(1)* reaches expenses incurred in transactions producing gain which need not be recognized for federal income tax purposes. Stated in another way, is there a distinction between wholly exempt income and unrecognized gain? The Internal Revenue Service originally held that there was not;ⁿ⁵ the courts were unanimous in their disagreement with the Government.ⁿ⁶ A typical view was that expressed by the Ninth

Circuit:

"There is a valid distinction between 'wholly exempt' income and income on which 'no gain or loss is recognized.' Wholly exempt income is never taxed. Nonrecognized gains are not taxed in the particular transaction that qualifies for nonrecognition treatment. They may be taxed, however, if the transaction fails to meet the nonrecognition requirements and may also be taxed at another time. In other words, they are not 'wholly exempt' from the tax."n7

The Service finally gave in; it now agrees that nonrecognized gain is not income that is wholly exempt from tax, so that expenses attributable to such income are not denied deduction under *IRC Section 265(a)(1)*.n8

FOOTNOTES:

(n1)Footnote 1. See generally, Kanter, "The Interest Deduction: When and How Does it Work," 26 *NYU Inst on Fed Tax* 87 (1968).

(n2)Footnote 2. The indebtedness must be that of the taxpayer. There is no deduction under *IRC § 163* if the taxpayer's liability is secondary. See, eg, *Golder v Commr*, 604 F2d 34 (9th Cir 1979) ; *Hamrick v Commr*, TC Memo 1980-149 ; *Rushing v Commr*, 58 TC 996 (1972) , acq 1973-2 CB 3 ; *Rev Rul 74-592*, 1974-2 CB 47 .

Interest paid by a shareholder on an obligation with respect to which the shareholder and his corporation were jointly and severally liable was deductible by the shareholder; the fact of joint liability did not convert the shareholder's primary liability into one that was derivative. *Arrigoni v Commr*, 73 TC 792 (1980) , acq on this issue 1980-2 CB 1 .

Interest paid on recourse notes given in connection with sham transactions is deductible. *Rice's Toyota World, Inc v Commr*, 752 F2d 89 (4th Cir 1985) ; *Larsen v Commr*, 89 TC 1229 (1987) ; *Coleman v Commr*, 85 TC 622 (1985) . However, the Tax Court refused to apply this rule where the payment of the interest to the lender was not the end of the matter; the taxpayers recovered the interest in the form of gains upon the items purchased with the borrowed funds. *Seykota v Commr*, TC Memo 1991-541 . The transaction involved in *Seykota* gave rise to the litigation in *Lee v Commr*, 155 F3d 584 (2d Cir 1998) ; the deduction was denied again.

An interest deduction was allowed in *Halle v Commr*, 83 F3d 649 (4th Cir 1996) , for payments made by a purchaser to postpone closing of a stock purchase transaction. The Service contended that the existence of a liquidated damages provision in the agreement was the equivalent of an option to purchase and, therefore, that there was no indebtedness. A majority of the Fourth Circuit found that the language of the stock purchase agreement created an unconditional agreement leading it to conclude that there was a bona fide debt.

(n3)Footnote 3. 364 US 361 (1960) .

(n4)Footnote 4. 364 US at 366 . Courts of Appeal found loan transactions to be shams in *Thompson v Commr*, 631 F2d 642 (9th Cir 1980) ; *Barnett v Commr*, 364 F2d 742 (2d Cir 1966) , and *Ippolito v Commr*, 364 F2d 744 (2d Cir 1966) . The Tax Court did the same in *Salley v Commr*, 55 TC 896 (1971) , acq in result only 1975-1 CB 2 , aff'd 464 F2d 479 (5th Cir 1972) ; *Collins v Commr*, 54 TC 1656 (1970) , acq 1971-2 CB 2 ; *Dixon v Commr*, TC Memo 1991-614 ; *Rosenthal v Commr*, TC Memo 1970-332 , aff'd mem 33 AFTR2d 74-402 (9th Cir 1973) , cert denied 416 US 984 ; *Norton v Commr*, TC Memo 1970-279 , aff'd per curiam 474 F2d 608 (9th Cir 1973) ; and *Estate of Melcher v Commr*, TC Memo 1970-237 , aff'd, 476 F2d 398 (9th Cir 1973) .

Soon after the taxpayer in *Gatto v Commr*, 1 F3d 826 (9th Cir 1993) , transferred cash to a trust, the cash was returned to the grantor in exchange for interest-bearing promissory notes. The transaction was viewed, not as a transfer of cash to the trust, but rather as a donation to it of a promise to make a gift of money in the future--an unenforceable promise under the applicable local law. Thus, the taxpayer did not incur genuine indebtedness and was precluded from claiming an interest deduction.

(n5)Footnote 5. 364 F2d 734 (2d Cir 1966) , cert denied, 385 US 1005 .

(n6)Footnote 6. 364 F2d at 742 . The Court of Appeals for the Fourth Circuit came to a contrary conclusion in *Rice's Toyota World v Commr*, 752 F2d 89, 95-96 (4th Cir 1985) , when it allowed the taxpayer to deduct interest on genuine recourse indebtedness incurred to finance the purchase of a mainframe computer, even though the Court had found that the purchase itself was a sham and had disallowed the investment credit and depreciation deductions with respect to the computer. Dictum in *Jacobson v Commr*, 915 F2d 832, 838 (2d Cir 1990) ("Even if the motive for a transaction is to avoid taxes, interest incurred therein may still be deductible if it relates to economically substantive indebtedness") seemed to indicate that the Second Circuit was reconsidering its position in *Goldstein*, but it corrected that impression in *Lee v Commr*, 155 F3d 584 (2d Cir 1998) , when it again disallowed an interest deduction on genuine indebtedness incurred as an integral part of a transaction found lacking in economic substance: "To adopt petitioner's reading would be to permit every shelter, no matter how transparently sham, to qualify for an interest expense deduction as long as the money used to finance the not-for-profit transactions involved were borrowed from a lender--any commercial bank would do--that demanded repayment. That result... is contrary to the longstanding jurisprudence of sham shelters from *Knetsch* on down. It would also squarely contradict our holding in *Goldstein*." 155 F3d at 587 . Accord: *Klamath Strat Inv Fund v US*, 568 F3d 537, 549-550 (5th Cir 2009) ; *Winn-Dixie Stores, Inc v Commr*, 113 TC 254, 294 (1999) , aff'd 254 F3d 1313 (11th Cir 2001) , cert denied, 535 US 986 (2002) . See also § 1.02A regarding the application of the economic substance doctrine.

(n7)Footnote 7. *Rev Rul 68-643, 1968-2 CB 76* . This assumes that the obligation to pay interest is fixed at the end of the taxable year. *Scott Paper Co v Commr*, 74 TC 137 (1980) ; *Rev Rul 74-127, 1974-1 CB 127* .

Debentures with interest payable semiannually on March 15 and September 15 to holders of record on March 1 and September 1, respectively, were convertible into common stock. The taxpayer was not obligated to pay interest for any portion of a six-month period with respect to a debenture tendered for conversion prior to the record date of that period. The taxpayer, in *Southwestern Energy Co & Subs v Commr*, 100 TC 500 (1993) , claimed that it was entitled to accrue an interest deduction for the period September 15 to December 31 of the years in issue, regardless of whether the debentures were thereafter converted. The Tax Court denied the deduction on the ground that the "all events test" necessary to support the accrual had not been met. (Under the all events test, an amount does not accrue until all the events have occurred which fix that amount as well as determine who is to pay or receive it. *US v Anderson*, 269 US 422 (1926) .) See also *Ltr Rul 9340001* .

(n8)Footnote 7.1. *IRC § 267(a)(2)*. The covered relationships are set forth in *IRC § 267(b)*.

The disallowance continues even though the related person to whom the interest is due assigns the obligation to an unrelated third party. *Ronald Moran Cadillac v US*, 385 F3d 1230 (9th Cir 2004) , cert denied, 125 S Ct 1882 .

(n9)Footnote 8. Interest charged by a broker on an indebtedness due him under a margin account is deductible by the taxpayer only when the broker receives payments from the taxpayer, or makes collections for the account of the taxpayer and applies the amount collected or paid to the payment of interest. *Rev Rul 70-221, 1970-1 CB 33* .

Loan discount is interest that is generally deductible by a cash basis taxpayer only when actually paid. *Rev Rul 75-12, 1975-1 CB 62* . However, the Service has ruled that a bank, issuing long-term certificates of deposit at a discount, with no interest payable until maturity, is required to prorate the discount over the life of the certificate, even if it is a cash basis taxpayer. *Rev Rul 78-236, 1978-1 CB 56* .

An interest deduction is allowed a cash basis taxpayer only when the payment is made in cash or its equivalent. The lender's acceptance of the borrower's note as (1) payment of the principal sum and interest on an existing indebtedness plus (2) evidence of a new indebtedness, does not produce a deduction for the borrower. *Rev Rul 70-647, 1970-2 CB 38* . The same holds true for interest paid by cash basis taxpayers using funds obtained from the original creditor through a second loan, advance, or any other financial arrangement. *Wilkerson v Commr*, 655 F2d 980 (9th Cir 1981) ;

Battelstein v IRS, 631 F2d 1182 (5th Cir 1980) , cert. denied, 451 US 938 ; but see *Franklin v Commr*, 683 F2d 125 (5th Cir 1982) , where an interest deduction was allowed for payments to participating banks with funds borrowed from a lead bank. The Service will continue to litigate cases on facts similar to *Franklin* where no debtor-creditor relationship exists between the original debtor and the participating banks. IRS Action on Decision, reprinted at 25 *Tax Notes* 55-56 (1984).

The relevant inquiry in cases involving interest paid with proceeds obtained through a second loan from the original creditor is whether the borrower had other funds with which to pay the interest, whether the funds used to pay the interest were traceable, and whether the borrower realistically could have used the borrowed funds for any other purpose. See *Davison v Commr*, 107 TC 35 (1996) , *aff'd* 141 F3d 403 (2d Cir 1998) .

(n10)Footnote 9. Points paid in respect of any indebtedness incurred in connection with the purchase or improvement of, and secured by, the principal residence of the taxpayer are deductible in the year paid. *IRC* § 461(g)(2). The requirements necessary for the deduction are set forth in *Rev Proc* 92-12, 1992-1 CB 663 .

IRC § 461(g)(2) permits a current deduction for points paid in connection with the acquisition of a residence, but does not mandate that they be deducted currently. A taxpayer can amortize points over the term of the mortgage. *Ltr Rul* 199905033 .

(n11)Footnote 10. See Ch 17 for the way to determine the daily portion of OID. For purposes of the issuer's deduction, there is no reduction in OID because of a sale to a subsequent holder, nor is OID ever deemed to be zero through application of the *de minimis* rule of *IRC* § 1273(a)(3), discussed in Ch 17.

If a debt instrument has a *de minimis* amount of OID, the issuer may choose to deduct the OID at maturity, on a straight-line basis over the term of the debt instrument, or in proportion to stated interest payments. The issuer makes this choice by reporting the *de minimis* OID in a manner consistent with the method chosen on the issuer's timely filed federal income tax return for the taxable year in which the debt instrument is issued. *Treas Reg* § 1.163-7(b)(2).

The provision does not apply to obligations issued by natural persons before March 2, 1984, or to loans not in excess of \$10,000 between natural persons. *IRC* § 163(e)(4).

(n12)Footnote 11. *IRC* § 163(e)(3). The included relationships are those specified in *IRC* § 267(b).

IRC § 267(a)(2), and not *IRC* § 163(e)(3), governs if the OID is income effectively connected with the conduct of a US trade or business of the related foreign person. However, this exception is inapplicable if the foreign person claims an exemption from US income tax on the amount owed, or is subject to a reduced rate of tax, pursuant to a treaty obligation of the US. *Treas Reg* § 1.163-12(b)(1).

IRC § 267(a)(2) requires a matching of the interest deduction with the payee's inclusion in income. In other words, if the payee uses the cash receipts and disbursements method of accounting, and the payor is an accrual method taxpayer, the deduction is allowable only when the payment is made to the payee. In the case of an item payable to a controlled foreign corporation or passive foreign investment company, a deduction will be allowable for any taxable year before the year of payment only to the extent that an amount attributable to the item is includable in the prior taxable year in the gross income of a United States person who owns stock in the corporation. *IRC* § 267(a)(3)(B)(i).

(n13)Footnote 11.1. *IRC* § 163(e)(3)(B)(i).

(n14)Footnote 12. See § 17.05[2], *supra*.

(n15)Footnote 13. *Treas Reg* § 1.163-7(c).

(n16)Footnote 14. *Treas Reg* § 1.163-7(c). *IRC* § 483 is discussed in § 2.07[1][a], *supra*.

(n17)Footnote 15. *Treas Reg* § 1.163-7(c). *IRC* §§ 1273(b)(4) and 1274 are discussed in § 17.02A[1], *supra*.

(n18)Footnote 15.1. *Treas Reg* § 1.163-7(e)(1), effective for qualified reopenings where the reopening date is on or after March 13, 2001. *Treas Reg* § 1.163-7(f). The adjustments are taken into account in determining the issuer's adjusted issue price under *Treas Reg* § 1.1275-1(b). *Treas Reg* § 1.163-7(e)(5). See § 17.02A[1] for a discussion of qualified reopenings.

(n19)Footnote 15.2. *Treas Reg* § 1.163-7(e)(2).

(n20)Footnote 15.3. *Treas Reg* § 1.163-7(e)(3).

(n21)Footnote 15.4. The constant yield method is described in *Treas Reg* § 1.1272-1(b).

(n22)Footnote 16. See *Treas Reg* § 1.1273-1(d) and § 17.02A[1], *supra* , for the meaning of *de minimis*.

(n23)Footnote 17. Interest paid to purchase stock in order to acquire ownership of a business is not interest allocable to a trade or business, but, rather, investment interest deductible to the extent the taxpayer has investment income. *Malone v Commr*, *TC Memo* 1996-408 .

An S corporation in the business of selling timeshares elected to report the gain derived from the sales on the installment method. This triggered application of *IRC* § 453(l)(3) and required the corporation to pay interest on the tax deferred by reason of the installment sale election. The shareholder of the corporation attempted to deduct the interest on his personal return. The Service denied the deduction on the ground that the interest was not allocable to the shareholder's trade or business; the Tax Court agreed. *Carlson v Commr*, *112 TC* 240 (1999) .

(n24)Footnote 17.1. Interest paid by the taxpayer to his ex-wife on a promissory note that equalized the property distribution in the marriage dissolution was held to be investment interest. The court reached this conclusion because the taxpayer received more investment property than his ex-wife, and the note was intended to compensate her for the share of that property. *Armacost v Commr*, *TC Memo* 1998-150 .

(n25)Footnote 18. See, generally, Block, "The Trouble With Interest: Reflections on Interest Deductions After the Tax Reform Act of 1986," *40 U Fla L Rev* 689 (1988); Galvin, "The Deduction of Nonbusiness Interest: An Exercise in Planned Confusion," *41 Tax Lawyer* 803 (1988); Taggart, "Denial of the Personal Interest Deduction," *41 Tax Lawyer* 195 (1988).

Temp Treas Reg § 1.163-9T(b)(2)(i)(A) provides that interest paid on underpayments of individual income taxes is personal interest even if the source of the income generating the tax liability is from the taxpayer's trade or business. The Eighth Circuit in *Miller v US*, *65 F3d* 687 (8th Cir 1995) , held the regulation valid as a reasonable interpretation of the personal interest provisions of *IRC* § 163(h). The Tax Court disagreed, *Redlark v Commr*, *106 TC* 31 (1996) , but was reversed by the Ninth Circuit. The appellate opinion is reported at *141 F3d* 936 (9th Cir 1998) . The Tax Court will no longer follow its decision in *Redlark*. *Robinson v Commr*, *119 TC* 44 (2002) .

A district court has held the interest to be deductible. *Allen v US*, *987 F Supp* 460 (ED NC 1998) . The Fourth Circuit reversed. *173 F3d* 533 (4th Cir 1999) . The Sixth Circuit determined that such interest is nondeductible in *McDonnell v US*, *180 F3d* 721(6th Cir 1999) ; the Seventh Circuit did as well in *Kikalos v Commr*, *190 F3d* 791 (7th Cir 1999) .

The Ninth Circuit has held that the regulation does not apply to interest paid by a shareholder on a DISC's deferred tax liability because there was no underpayment. Nevertheless, it refused a deduction on the ground that the interest arose in the DISC's trade or business and was not allocable to the shareholder's trade or business. *Tedori v US*, *211 F3d* 488 (9th Cir 2000) .

(n26)Footnote 18.1. *IRC § 221(b)(1)*. The deduction enters into the computation of adjusted gross income. *IRC § 62(a)(17)*. A taxpayer is entitled to a deduction under *IRC § 221* only if the taxpayer has a legal obligation to make interest payments under the terms of the qualified educational loan. *Treas Reg § 1.221-1(b)(1)*. An individual is not entitled to the deduction for any taxable year in which the individual is claimed as a dependent by another taxpayer. *Treas Reg § 1.221-1(b)(2)(i)*. If a taxpayer is married as of the close of a taxable year, the taxpayer is entitled to a deduction only if the taxpayer and the taxpayer's spouse file a joint return for the taxable year. *Treas Reg § 1.221-1(b)(3)*.

If a third party who is not legally obligated to make a payment of interest on a qualified educational loan makes a payment of interest on behalf of a person who is legally obligated to make the payment, the taxpayer is treated as receiving the payment from the third party and, in turn, paying the interest. *Treas Reg § 1.221-1(b)(4)*.

(n27)Footnote 18.2. *IRC § 221(b)(2)*.

(n28)Footnote 19. *IRC § 163(h)(3)(A), (B)*. Indebtedness will not fail to be treated as secured by property solely because, under applicable state or local homestead or other debtor protection law in effect on Aug 16, 1986, the security interest is ineffective or the enforceability of the security interest is restricted.

Debt can qualify as acquisition indebtedness under the tracing rules of *Temp Treas Reg § 1.163-8T* and to the extent of expenditures made within 90 days before or after the date the debt is incurred. In the case of the construction or substantial improvement of a residence, debt incurred before the residence or improvement is complete may be treated as incurred to construct or improve the residence to the extent of expenditures made no more than 24 months before the date the debt is incurred. Debt incurred within 90 days after completion can be treated as incurred to construct or improve the residence to the extent of expenditures made within the period beginning 24 months prior to the date of completion and ending on the date the debt is incurred. *Notice 88-74, 1988-2 CB 386*. The Notice also provides that debt incurred to acquire an interest in a residence incident to a divorce is eligible to be treated as acquisition indebtedness without regard to the treatment of the transaction under *IRC § 1041*. See also *Seymour v Commr*, 109 TC 279 (1997). *Seymour* is discussed in Note, "Section 1041 Does Not Require Interest Paid to an Ex-Spouse to be Treated as Personal Interest: *Seymour v. Commissioner*," 51 *Tax Law* 829 (1998).

Interest on a loan used to purchase a personal residence was not qualified residence interest where the loan was secured by the taxpayer's tax-deferred annuity, or by the taxpayer's savings account. *Ltr Ruls 8742024, 8743063*.

The same holds true even if the loan is secured only by a mortgage on commercial property owned by the taxpayers. *Ltr Rul 9418001*.

If a taxpayer uses a single premium annuity contract as collateral to obtain or continue a mortgage loan, *IRC § 264(a)(2)* disallows a deduction for interest on the loan to the extent the loan is collateralized by the annuity contract. The amount disallowed is the current interest rate on the mortgage loan multiplied by the amount of the annuity contract used as collateral (or by the amount of the loan, if less). *Rev Rul 95-53, 1995-2 CB 30*.

Interest accrued on acquisition indebtedness, including a price level adjusted mortgage (PLAM), is treated as acquisition indebtedness until it is paid. *Temp Treas Reg § 1.163-11T*.

In *Ulsa v Commr*, *TC Memo 1997-551*, the taxpayers' credit rating was such that they could not obtain financing to purchase a residence. Instead the home was acquired by members of the taxpayers' family who also obtained the financing for the purchase. The taxpayers occupied the house and made all payments with respect to the property, including mortgage principal and interest. The court held that, based upon all of the evidence, the taxpayers held the benefits and burdens of ownership of the home, that they established equitable and beneficial ownership of the property, and that they were liable to the family members in respect of the mortgage indebtedness. This entitled them to claim a

home mortgage interest deduction for the year in question.

(n29)Footnote 20. A taxpayer who claims a deduction for qualified residence interest on any seller-provided financing must include the following information on the taxpayer's return for each year that a deduction is taken: the name, address, and taxpayer identification number of the person to whom the interest is paid or accrued. The recipient of the interest must report the name, address, and taxpayer identification number of the person liable for the payment of the interest. *IRC § 6109(h)*. For this purpose, seller-provided financing means any indebtedness incurred in acquiring a residence if the person to whom the indebtedness is owed is the person from whom the residence was acquired. *IRC § 163(h)(4)(A)*. A residence can be a qualified residence even if rented to others if the taxpayer uses it as such at least 14 days a year or 10 percent of the time it is rented (whichever is greater). The time test is inapplicable if the residence is not rented at all during the year. *IRC § 163(h)(4)(A)(iii)*.

The term "principal residence" has the same meaning for this purpose as it does for purposes of *IRC § 121*. *Temp Treas Reg § 1.163-10T(p)(2)*. A second residence can be a house, condominium, mobile home, boat, or house trailer that contains sleeping space and toilet and cooking facilities. *Temp Treas Reg § 1.163-10T(p)(3)(ii)*.

(n30)Footnote 21. *IRC § 163(h)(4)(D)*.

(n31)Footnote 22. *IRC § 163(h)(3)(B)(ii)*.

(n32)Footnote 23. *IRC § 163(h)(3)(D)(i), (iii)*.

(n33)Footnote 24. *IRC § 163(h)(3)(D)(ii)*.

(n34)Footnote 25. *IRC § 163(h)(3)(D)(iv)*. If the principal of the original acquisition indebtedness is not amortized over its term (eg, it calls for a balloon payment), interest can be deducted as qualified residence interest for the term of the first refinancing or 30 years, whichever period is shorter.

(n35)Footnote 26. *Temp Treas Reg § 1.163-8T(c)(2)(ii)(A)*. Accrued interest is treated as a debt until it is paid, and any interest accruing on unpaid interest is allocated in the same manner as the unpaid interest. *Temp Treas Reg § 1.163-8T(c)(2)(ii)(B)*.

(n36)Footnote 27. *Temp Treas Reg § 1.163-8T-(c)(1), (2)(i)*. *Notice 88-37, 1988-1 CB 522*, provides guidance on the reporting of interest expense with respect to debt-financed acquisitions and distributions; *Notice 89-35, 1989-1 CB 675*, does the same for acquisitions and distributions by pass-through entities.

(n37)Footnote 28. *Temp Treas Reg § 1.163-8T-(c)(1), (m)(3)*.

(n38)Footnote 29. *Temp Treas Reg § 1.163-8T(c)(4)(i)*.

(n39)Footnote 30. *Temp Treas Reg § 1.163-8T(c)(4)(ii)*. A special ordering rule treats an expenditure from a checking account as made at the time the check is written, provided the check is delivered or mailed to the payee within a reasonable period thereafter. *Temp Treas Reg § 1.163-8T(c)(4)(iii)(A)*.

In the case of an account consisting solely of the proceeds of a debt and interest earned on such account, the taxpayer may treat any expenditure from the account as made first from amounts constituting interest rather than debt proceeds. *Temp Treas Reg § 1.163-8T(c)(4)(ii)(C)*.

(n55)Footnote 46. *Temp Treas Reg § 1.163-8T(n)(3)(x)*.

(n56)Footnote 47. HR Rep No 413 (Pt 1), 91st Cong, 1st Sess (1969).

(n57)Footnote 48. *IRC § 163(d)(3)(A)*. Property held for investment includes (a) property that produces gross income from interest, dividends, annuities, or royalties not derived in the ordinary course of business, and (b) any interest held by a taxpayer involving the conduct of a trade or business that is not a passive activity, and with respect to which the taxpayer does not materially participate (is not involved in the operations of the activity on a regular, continuous, and substantial basis). *IRC § 163 (d)(5)*.

IRC § 163(d) does not limit the deductibility of interest incurred in connection with a trade or business. A finding that the taxpayer, a registered representative for a stock exchange member firm, was not engaged in the business of trading securities for his own account, prevented full deduction of interest paid on his margin account. *Asch v Commr, TC Memo 1986-238*. See also *Olson v Commr, TC Memo 1989-564*. A contrary result was reached in *Morley v Commr, 87 TC 1206*, where the court found that a real estate broker acquired property with the intent of reselling it and, in fact, entered into negotiations for its sale. The fact that the taxpayer is engaged in a trade or business that produces capital gains and losses (eg, trading in securities) does not make the interest investment "interest." *King v Commr, 89 TC 445 (1987), acq 1988-1 CB 1*.

Interest on indebtedness incurred to purchase S corporation stock is investment interest subject to the limitations of *IRC § 163(d)*. The purchasers had a substantial investment motive looking toward the realization of capital gains. The result was not changed by the fact that the taxpayers were full-time employees actively engaged in management of the corporation. *GCM 39529*.

If an individual, who is neither a dealer nor a trader in stock or securities, borrows money to purchase stock in a C corporation to protect the individual's employment with the corporation, the interest on the loan is investment interest for purposes of *IRC § 163(d)*. *Rev Rul 93-68, 1993-2 CB 72*. The same result was reached in *Russon v Commr, 107 TC 263 (1996)*, where the Tax Court rejected the taxpayer's argument that investment property is limited to property that has actually produced investment income.

The existence of a substantial investment motive required a finding that interest paid on indebtedness incurred by a shareholder who used the funds as an additional capital contribution was investment interest. The fact that the capital was needed to meet state law requirements did not affect the result. *Yamamoto v Commr*, TC Memo 1986-316 . See also *Houston v Commr*, TC Memo 1989-175 ; *Recklitis v Commr*, 91 TC 874 (1988) ; *Polakis v Commr*, 91 TC 660 (1988) .

For purposes of the provision, the term "interest" includes any amount allowable as a deduction in connection with personal property in a short sale. *IRC § 163(d)(3)(C)*.

Investment interest does not include qualified residence interest, or any interest taken into account under *IRC § 469* in computing income or loss from a passive activity. However, *Temp Treas Reg § 1.163-10T(o)(5)* allows a taxpayer to elect to treat any debt secured by a qualified residence as not secured by that residence. In an appropriate case, the interest may be treated as investment interest. See, eg, *Ltr Rul 9335043* .

(n58)Footnote 49. *IRC § 163(d)(1)*. The Service, in *Miner v Commr*, TC Memo 2003-39 , contended that the taxpayer could not deduct margin interest because she was an investor and not a trader. The Tax Court held that the deduction was allowed by *IRC § 163(d)* to the extent of the taxpayer's net investment income.

(n59)Footnote 50. *Rev Rul 84-131*, 1984-2 CB 37 . The IRS ruled in *Rev Rul 2008-12*, 2008-1 CB 520 , that where a partnership actively trades securities as its trade or business, but has a noncorporate limited partner who did not materially participate in these activities, then that partner's distributive share of interest expense should be subject to the investment interest limitation of *IRC § 163(d)*. Because the business is active (despite the fact that the partner's involvement was not), the interest deduction should be above the line, that is, a deduction used in determining adjusted gross income. *Announcement 2008-65*, 2008-2 CB 279 , explained that the interest deduction in such a case would properly be taken on Schedule E. In *Rev Rul 2008-38*, 2008-2 CB 249 , the IRS compared the situation of the noncorporate taxpayer who had investment interest expenses as a result of being a nonmaterially participating partner in an active business, with the noncorporate taxpayer who simply had investment income expenses. In the former case, essentially the situation in *Rev Rul 2008-12* , the deduction allowed would be taken above the line. However, in the latter case, the deduction would be taken as an itemized deduction. In both cases, the aggregate amount of the deduction could not exceed the taxpayer's investment income for the year. This means that if the taxpayer had both investment income, and investment income interest deductions from different sources, the taxpayer would have to have a reasonable allocation of that income between these two different categories of interest expense, in order to determine how much of the income was above-the-line, and how much was below the line.

(n60)Footnote 51. *IRC § 163(d)(2)*.

(n61)Footnote 52. *Rev Rul 86-70*, 1986-1 CB 83 ; *Ltr Rul 8525002* ; *Ltr Rul 7935002* .

(n62)Footnote 53. *Allbritton v Commr*, 37 F3d 183 (5th Cir 1994) ; *Flood v Commr*, 33 F3d 1174 (9th Cir 1994) ; *Sharp v US*, 14 F3d 583 (1993) ; *Beyer v Commr*, 916 F2d 153 (4th Cir 1990) ; *Lenz v Commr*, 101 TC 260 (1993) . (n63)Footnote 54. *IRC § 163(d)(4)(A)*.

(N64)Footnote 55. Interest income derived from a refund of federal taxes is treated as investment income for purposes of computing the limitation on the deduction of investment interest. *Ltr Rul 9307005* . Income realized on the cancellation of an indebtedness that was incurred to acquire property held for investment constitutes investment income. *Ltr Rul 9522008* .

(n65)Footnote 56. *IRC § 163(d)(4)(B)*. The term "property held for investment" includes interest-free gift loans that yield gross income in the form of imputed interest under *IRC § 7872*. *Ltr Rul 9526003* .

The investment interest deduction in *Talchik v Commr*, *TC Memo 2003-342*, was limited to the amount of interest and dividends received by the taxpayers during the taxable year. Although the taxpayers realized capital gains during the year, they were completely offset by capital loss carryovers from prior years.

The election is made on Form 4952 filed on or before the due date (including extensions) of the income tax return for the taxable year in which the net capital gain is recognized. *Treas Reg § 1.163(d)-1(b)*. The election is revocable with the consent of the Commissioner. *Treas Reg § 1.163(d)-1(c)*.

For taxable years 2003 through 2010, investment income does not include any qualified dividend income taxed preferentially under *IRC § 1(h)(11)(B)*. See *§ 2.06[2][a][i]*. The taxpayer can elect to include qualified dividend income in investment income. See *Treas Reg § 1.163(d)-1(a)*.

(n66)Footnote 57. *IRC § 163(d)(4)(C)*. Nonbusiness bad debts are considered investment expenses only to the extent that they are deductible in the taxable year. *Keating v Commr*, *89 TC 1071 (1987)*, *acq 1989-2 CB 1*.

(n67)Footnote 58. *IRC § 163(d)(4)(C)*.

(n68)Footnote 59. *IRC § 163(d)(4)(D)*.

(n69)Footnote 60. *IRC § 163(d)(4)(E)*.

(n70)Footnote 61. For purposes of the section, the term "interest" includes any amount paid or incurred by any person making a short sale in connection with personal property used in the short sale, or by any other person for the use of any collateral with respect to the short sale. This rule does not apply if the person making the short sale provides cash as collateral for the sale and receives no material earnings on the cash during the period of the short sale. *IRC § 265(a)(5)*.

The Service will not ordinarily issue a ruling as to whether indebtedness is incurred or continued to purchase or carry tax-free interest obligations. *Rev Proc 2009-3, 2009-1 IRB 107*.

(n71)Footnote 62. *Denman v Slayton*, *282 US 514 (1931)*; *Rev Rul 73-602, 1973-2 CB 91*. Moreover, the deduction will be disallowed even though the dealer's ultimate purpose is to profit through a resale of the bonds. *Kirchner, Moore & Co v Commr*, *54 TC 940 (1970)*, *aff'd*, *448 F2d 1281 (10th Cir 1971)*.

Rev Proc 72-18, 1972-1 CB 740, clarified by *Rev Proc 74-8, 1974-1 CB 419*, and modified by *Rev Proc 87-53, 1987-2 CB 669*, provides guidelines for the application of *IRC § 265(a)(2)* to taxpayers holding tax-exempt state and local obligations. *Rev Procs 72-18, 74-8*, and *87-53* are reprinted as Appendix F, *infra*.

(n72)Footnote 63. *IRC § 291(a)(3), (e)(1)(B)*.

(n73)Footnote 64. A financial institution is defined as one that accepts deposits from the public in the ordinary course of its business, and is either a domestic institution subject to federal or state supervision or a foreign bank doing business in the US. *IRC § 265(b)(5)*.

Rev Rul 90-44, 1990-1 CB 54, sets forth guidelines regarding the disallowance of interest expense allocable to tax-exempt obligations held by financial institutions.

Periodic and upfront payments made on bank interest rate swaps to reduce the risk of holding tax-exempt municipal bonds are not treated as interest for purposes of either *IRC § 265(b)* or *§ 291(a)*; the payments are not compensation for the use or forbearance of money. *Ltr Rul 9824026*.

A financial institution waiver of its right under an interest adjustment clause to receive a higher interest rate on tax-exempt bonds resulted in a deemed exchange of old bonds for new bonds, with the new bonds deemed to have been issued on the date of the waiver. Since the waiver occurred after Aug 7, 1986, the institution was precluded from deducting the portion of its interest expense allocable to tax-exempt interest on the new bonds. *Rev Rul 87-19, 1987-1 CB 249*.

(n74)Footnote 65. *IRC §§ 265(b)(2), 291(e)(1)(B)(II)*.

The Tax Court has held that a parent corporation does not have to include tax-exempt obligations purchased by a subsidiary in the computation of the average adjusted bases of its tax-exempt obligations. *PSB Holdings, Inc v Commr, 129 TC 131 (2007)*.

(n75)Footnote 66. *IRC § 265(b)(3)(A), (B)*. Interest allocable to qualified tax-exempt obligations remains subject to the 20-percent disallowable rule of *IRC § 291*.

(n76)Footnote 67. *IRC § 265(b)(3)(C)*. In addition, not more than \$10 million of obligations can be designated as qualified tax-exempt obligations by any issuer (including subordinate entities) for any calendar year. *IRC § 265(b)(3)(D)*. Refunding obligations are not taken into account for this purpose if (i) they were not taken into account in determining whether the issuer is a qualified small issuer; (ii) the average maturity date of the refunding obligations is not later than the average maturity date of the refunded obligations; (iii) the refunding obligation has a maturity date not later than 30 years after the date the original obligation was issued; and (iv) the aggregate face amount of the refunding issue does not exceed \$10 million. The average maturity date requirement need not be met if the average maturity of the original issue is three years or less.

For this purpose, the date of issue of a draw-down construction loan note is the date on which more than a *de minimis* amount of funds is first advanced under the note; the amount of the draw-down note is the stated principal value of the note. *Rev Rul 89-70, 1989-1 CB 88*.

(n77)Footnote 68. *IRC § 265(b)(3)(C)(iii)*.

(n78)Footnote 68.1. *IRC § 265(b)(7)*, added by Section 1501(c) of ARRA. For purposes of applying this exclusion, a refunding bond (whether a current or advanced refunding), is treated as issued on the date of the issuance of the refunded bond (or in the case of a series of refundings, the original bond). *IRC § 265(b)(7)(C)*.

(n79)Footnote 68.2. See *IRC § 291(e)(1)(B)(iv)*, also added by ARRA.

(n80)Footnote 68.3. *IRC § 265(b)(3)(G)(i)*.

(n81)Footnote 68.4. *IRC § 265(b)(3)(G)(ii)*.

(n82)Footnote 68.5. A "qualified financing issue" is a composite, pooled or other conduit financing issue the proceeds of which are used directly or indirectly to make or finance loans to one or more ultimate borrowers, all of whom are "qualified borrowers." A "qualified borrower" means (1) a State or political subdivision thereof or (2) a § 501(c)(3) organization.

(n83)Footnote 68.6. HR Conf Rep 111-16, 111th Cong, 1st Sess (Feb 12, 2009), at 576.

(n84)Footnote 68.7. *Id.*

(n85)Footnote 69. See, eg, *Denman v Slayton, 282 US 514 (1931)*; *Drybrough v Commr, 376 F2d 350 (6th Cir 1967)* (*IRC § 265(a)(2)* applied even though purchase of securities was in wife's name; taxpayer failed to show that

funds used to purchase bonds were wife's separate property; funds came from borrowings); *Jacobson v Commr*, 28 TC 579 (1957) .

The Tax Court has held that, in an appropriate case, the provisions of *IRC* § 265(a)(2) may be used when one member of an affiliated group is the borrower and another member is the purchaser of the tax-exempt obligations. *H Enterprises Intl, Inc & Subs v Commr*, 105 TC 71 (1995) . The court found such an appropriate case in a second decision involving the same taxpayer reported as *TC Memo 1998-97* . The Tax Court was affirmed by the Eighth Circuit. 183 F3d 907 (8th Cir 1999) .

In Rev Rul, 2004-47, 2004-1 CB 941 , the Service took the following positions regarding the application of *IRC* § 265(a)(2) to situations in which a member of an affiliated group borrows money and transfers the money to another member of a group that is a dealer in tax-exempt obligations:

(1) If the funds contributed to the dealer are directly traceable to the contributor's borrowing, but are not directly traceable to the dealer's purchase or carry of tax-exempt obligations, *IRC* § 265(a)(2) applies to disallow a portion of the interest expense of the contributor, as determined by the allocation formula in § 7 of *Rev Proc 72-18*, 1972-1 CB 740 .

(2) If there is no direct evidence linking the borrowed funds to any funds transferred to the dealer in tax-exempt obligations, *IRC* § 265(a)(2) does not apply to disallow any portion of the interest expense of the borrowing member on the dealer member's investment in tax-exempt obligations.

(3) If the borrowed funds are directly traceable to a loan to the dealer in tax-exempt obligations, *IRC* § 265(a)(2) does not apply to disallow the interest expense of the borrowing member, but does apply to disallow a portion of the interest expense of the dealer, as determined by the allocation formula in § 7 of *Rev Proc 72-18* .

(n86)Footnote 70. *Rev Rul 55-389*, 1955-1 CB 276 .

Rev Proc 70-20, 1970-2 CB 499 , contains guidelines for the deduction of interest by banks holding tax-exempt securities. It has been amplified and modified by *Rev Proc 83-91*, 1983-2 CB 618 ; *Rev Proc 81-16*, 1981-1 CB 688 ; and *Rev Proc 78-34*, 1978-2 CB 535 .

(n87)Footnote 71. The language appears in a footnote to the Court's opinion in *US v Atlas Life Ins Co*, 381 US 233, 248-249 (1965) .

(n88)Footnote 72. *Ball v Commr*, 54 TC 1200, 1207 (1970) , *nonacq* 1972-1 CB 1 ; see also *Wisconsin Cheeseman, Inc v US*, 388 F2d 420 (7th Cir 1968) ; *Illinois Terminal RR v US*, 375 F2d 1016 (Ct Cl 1967) ; *Batten v US*, 322 F Supp 629 (ED Va 1971) .

Interest on loans to purchase US Treasury bonds is deductible. *Treas Reg* § 1.265-2(a). However, no deduction will be allowed if the necessity for the loan can be traced to the continued retention of tax-exempt obligations. The Eighth Circuit has held that such a situation exists if tax-exempt securities are used as collateral to obtain the loan. *Levitt v US*, 517 F2d 1339 (8th Cir 1974) .

A taxpayer maintained two separate investment accounts, one for taxable securities and the other for tax-exempt obligations. He proposed to finance the purchase of additional taxable securities in a margin account. The Service held, in *Ltr Rul 8624017* , that the margin account interest would not be deductible. The same result would obtain if the taxpayer purchased zero-coupon bonds. The Tax Court had reached the same result in *McDonough v Commr*, *TC Memo 1977-50* .

(n89)Footnote 73. *Ball v Commr*, 54 TC 1200, 1207 (1970) , *nonacq* 1972-1 CB 3 , see also *Wisconsin Cheeseman, Inc v US*, 388 F2d 420 (7th Cir 1968) ; *Illinois Terminal RR v US*, 375 F2d 1016 (Ct Cl 1967) ; *Batten v US*, 322 F

Supp 629 (ED Va 1971) .

Interest on loans to purchase US Treasury bonds is deductible. *Treas Reg § 1.265-2(a)*. However, no deduction will be allowed if the necessity for the loan can be traced to the continued retention of tax-exempt obligations. The Eighth Circuit has held that such a situation exists if tax-exempt securities are used as collateral to obtain the loan. *Levitt v US*, 517 F2d 1339 (8th Cir 1974) .

(n90)Footnote 74. 388 F2d 420 (7th Cir 1968) .

(n91)Footnote 75. 388 F2d at 422 .

(n92)Footnote 76. *Mariorenzi v Commr*, 490 F2d 92 (1st Cir 1974) (no deduction for interest or mortgage loan obtained to directly assist purchase of tax-exempt bonds); *Israelson v US*, 367 F Supp 1104 (D Md 1973) , *aff'd per curiam* 35 AFTR2d 75-461 (4th Cir 1974) (deduction allowed for purchase money mortgage interest, but not for interest on loan used to purchase nonexempt securities).

(n93)Footnote 77. 413 F2d 636 (2d Cir 1969) , *cert denied* 396 US 1007 .

A registered broker-dealer obtains funds to finance margin purchases by its customers by borrowing from commercial banks using securities (including tax-exempts) held for the accounts of customers as collateral. *IRC § 265(2)* does not disallow a deduction for interest paid on such loans where the broker-dealer properly identifies and segregates the proceeds of the loans, as required by SEC Rule 15c 3-3. In essence, the borrowed funds are traceable to a dominant business purpose apart from the purchasing or carrying of tax-exempt securities. *Rev Rul 74-294, 1974-1 CB 71* .

An indebtedness was incurred by one affiliated corporation for the benefit of another with which it filed consolidated returns. At the time of the borrowing, the second corporation held tax-exempt obligations. According to *GCM 39514* , *IRC § 265(2)* barred a deduction for the interest incurred by the borrowing corporation. A similar result involving affiliated corporations can be found in *GCM 39515* .

(n94)Footnote 78. 413 F2d at 639-640 .

(n95)Footnote 79. An allocation was required because it was impossible to trace the borrowed money directly to the holdings of tax-exempt securities. This was considered a fairer measure of the appropriate disallowance than disallowing the entire interest on the debt.

The *Leslie* formula was applied in *Dillon, Read & Co v US*, 875 F2d 293 (Fed Cir 1989) , and *EF Hutton Group, Inc v US*, 811 F2d 581 (Fed Cir 1987) . The Service took the position, in *Dillon, Read*, that interest on loans collateralized by a broker-dealer's stock of tax-exempt securities should be totally disallowed, and that the allocation called for by *Leslie* should apply only to interest on loans not so secured. The Federal Circuit, relying on the special treatment accorded broker-dealers in *Rev Proc 72-18, 1972-1 CB 740* , held that the *Leslie* approach should prevail whenever it was impossible to trace the borrowed funds to the holding of tax-exempt securities. *Rev Proc 72-18* is reprinted as Appendix F, *infra* .

(n96)Footnote 80. *Treas Reg § 1.265-3(b)*. The amount of interest relating to exempt-interest dividends is determined by a fraction, the numerator of which is the amount of exempt-interest dividends received by the taxpayer, and the denominator of which is the total amount of dividends received (excluding capital gains dividends received and capital gains required to be included in the shareholder's computation of long-term gains).

(n97)Footnote 80.1. "Registered form" has the same meaning for purposes of *IRC § 163(f)* as for purposes of *IRC §§ 103(b)(3)* and 149 (requiring tax-exempt bonds to be in registered form). See *Temp Treas Reg § 5f.163-1(a)*, defining "registered form" with reference to *Treas Reg § 5f.103-1(c)*. The definition of registered form is discussed in

Chapter 17, § 17.02[1]. As with tax-exempt bonds, *IRC § 149(a)(3)(A)*, for purposes of *IRC § 163(f)*, book entry obligation can be treated as in registered form if the right to the principal of, and interest on, the obligation can be transferred only through a book entry in a manner consistent with regulations prescribed by the Treasury. See Chapter 17, § 17.02[1], fn 19.

(n98)Footnote 81. *IRC §§ 163(f)(2)(A)(i), (ii) and (iii)*. The exception for obligations with maturity dates at issuance of not more than one year eliminates the registration requirement for most commercial paper.

(n99)Footnote 82. *IRC § 163(f)(2)(C)*. Such regulations can only be applied prospectively to obligations issued after the regulations' effective date.

(n100)Footnote 83. The term "US person" includes a citizen or resident of the US, a domestic partnership, a domestic corporation, and any estate or trust other than a foreign estate or foreign trust. *IRC § 7701(a)(30)*.

An obligation not in registered form can be sold to a United States person that is a financial institution purchasing for its own account or for the account of a customer and that agrees to comply with the requirements of *IRC § 165(j)(3)(A)-(C)*, discussed in Ch 17. *Treas Reg § 1.163-1(c)(1)*.

(n101)Footnote 83.1. *IRC §§ 163(f)(2)(A)(iv), and 163(f)(2)(B)*. This exception too is subject to the Treasury's authority to issue, with prospective effect only, regulations that exclude a type of obligation from the exception, although its authority is not limited in this case to obligations of a type determined to be used frequently in avoiding Federal taxes.

(n102)Footnote 84. See Sections 502(a) and 502(f) of the Hiring Incentives to Restore Employment Act of 2010, Pub L No 111-147, *124 Stat 71 (2010)* (the HIRE Act of 2010").

(n103)Footnote 85. The treatment of accrued market discount is discussed in Ch 17.

(n104)Footnote 86. *IRC § 1277(a), (c)*. *IRC § 1277* does not apply to any tax-exempt bond. *IRC § 1278(a)(1)(C)*.

(n105)Footnote 87. *IRC § 1277(b)(2)(A)*. If there is net interest income for any taxable year, the taxpayer can elect to deduct any disallowed interest expense to the extent of such net interest income. *IRC § 1277(b)(1)*.

(n106)Footnote 88. *IRC § 1277(b)(2)(B)*.

(n107)Footnote 89. *IRC § 1277(d)*.

(n108)Footnote 90. *IRC § 1278(b)(1)(A)*.

(n109)Footnote 91. See § 17.02[1][b][vi], for a discussion of discounted short-term obligations.

(n110)Footnote 92. *IRC § 1282(c)*.

(n111)Footnote 93. *IRC § 1282(b)*.

(n112)Footnote 93.1. The limitations on the deductibility of OID in *IRC § 163(e)(5)(A)* with respect to an "applicable high yield discount obligation" (AHYDO) will not apply to certain AHYDOs issued between September 1, 2008 and December 31, 2009, inclusive. *IRC § 163(e)(F)(i)*. (The Secretary is authorized to extend the suspension period if such extension is deemed appropriate in light of distressed conditions in the debt capital markets). *IRC § 163(e)(F)(iii)*. In general, AHYDOs issued during this suspension period will be exempt from the *IRC § 163(e)(5)* rules provided they are issued in a debt-for-debt exchange (including an exchange resulting from a significant modification of a debt instrument) for a debt instrument of the same issuer that is not an AHYDO. (If a qualifying AHYDO is later exchanged for another AHYDO the latter will also qualify for the exemption. *IRC § 163(e)(5)(F)(ii)*.) However, if a

non-AHYDO debt instrument for which an AHYDO is exchanged was issued to a "related person" (within the meaning of *IRC* § 108(e)(4)-see text at § 17.05[3][b][iv])) or pays contingent interest of the kind described in *IRC* § 871(h)(4) (applied without regard to subparagraph (D))-see text at § 20.06[1][b]), the AHYDO issued in exchange does not qualify for exemption from the *IRC* § 163(e)(5) rules. *IRC* § 163(e)(5)(F)(i).

In Notice 2010-11, 2010-4 *IRB* 326, the Treasury exercised the authority granted by *IRC* § 163(e)(5)(F)(iii) by extending the suspension period to "qualified obligations" issued after December 31, 2009 and on or before December 31, 2010. An AHYDO will be considered a "qualified obligation" if, in addition to meeting the requirements stated above, it would not have been an AHYDO if its issue price, (determined under *IRC* §§ 1273(b)(1), (2) or (3) or *IRC* § 1274(b)(3)), were increased by the amount of any discharge of indebtedness income realized by the issuer (or obligor) upon the exchange of the AHYDO for a non-AHYDO. For example, assume an issuer issues a new debt instrument in 2010 with an issue price of \$80x and a stated redemption price at maturity of \$100x for a debt instrument that is not an AHYDO and has an issue price of \$100x. The issuer realizes \$20x of discharge of indebtedness income on the exchange. The new debt instrument is a "qualified obligation" not subject to the limitation on the deductibility of interest under *IRC* § 163(e)(5) if it is considered an AHYDO at its actual issue price of \$80x but would not have been an AHYDO if its issue price had been \$80x + \$20x = \$100x at the time of the exchange.

(n113)Footnote 94. *IRC* § 163(i). In determining whether a debt instrument is an applicable high yield discount obligation, any payment under the obligation is assumed to be made on the last day permitted under the instrument, and any payment in the form of another obligation (or stock) of the issuer (or a related person within the meaning of *IRC* § 453(f)(1)) is assumed to be made when the obligation or stock is required to be paid in cash or property other than the obligation or stock.

A debt instrument has significant OID if the aggregate amount that would be includable in gross income with respect to the instrument for periods before the close of any accrual period (as defined in *IRC* § 1272(a)(5)) ending after the fifth anniversary of the issue date exceeds the sum of (i) the aggregate amount of interest to be paid under the instrument before the close of the accrual period, and (ii) the product of the issue price of the instrument (as defined in *IRC* §§ 1273(b) and 1274(a)) and its yield to maturity. The issuer's choice of accrual periods to determine OID accruals is used to determine whether a debt instrument has significant OID. *Treas Reg* § 1.163-7(d).

See generally Levin & Gallagher, "New Code Section 163(e)(5) Limiting Deductibility of Interest on OID and PIK Debentures," 46 *Tax Notes* 555 (1990).

(n114)Footnote 95. A corporate holder of the instrument is allowed a dividends received deduction for the part of the disqualified portion that would have been treated as a dividend had it been distributed by the issuing corporation with respect to stock.

(n115)Footnote 95.1. Disqualified interest includes interest paid or accrued (directly or indirectly) by a taxable REIT subsidiary of a REIT to the REIT. See § 13.02[3] for the definition of a taxable REIT subsidiary.

(n116)Footnote 96. All members of an affiliated group are treated as a single taxpayer. *IRC* § 163(j)(6)(C).

(n117)Footnote 96.1. For foreign corporation payees, the tax-exempt status of the entity can result from treaty relief or the portfolio interest rules. See Umbrecht & Llewellyn, "Planning Pitfalls and Opportunities for Foreign Owned Corporations Under the Earnings Stripping Rules," 47 *Tax Lawyer* 641, 650 (1994).

(n118)Footnote 97. For this purpose, the debt-equity ratio is the ratio that the total indebtedness of the corporation bears to the sum of its money and the adjusted bases of its assets reduced by the amount of the indebtedness. The amount of any original issue discount indebtedness taken into account is its issue price plus the portion of original issue discount accrued under the rules of *IRC* § 1272 without regard to the adjustments for acquisition premiums described in *IRC* §§ 1272(a)(7) and 1272(b)(4).

The determination of the debt-equity ratio is made as of the last day of the taxable year of the payor. *Prop Treas Reg § 1.163(j)-1(b)*.

(n119)Footnote 98. Adjusted taxable income is the corporation's taxable income for the tax year, computed without regard to any carryforwards or disallowances specified in *IRC § 163(j)*, but with the modifications contained in *Prop Treas Reg § 1.163(j)-1(f)*.

(n120)Footnote 99. The disallowed amount is treated as disqualified interest paid or accrued in the succeeding taxable year, but the debt-equity ratio does not apply to the amount so treated.

(n121)Footnote 100. *IRC § 163(j)* is applied after taking into account other provisions that might limit the interest deduction. *Prop Treas Reg § 1.163(j)-7*. However, *IRC § 163(j)* is applied before application of the at-risk rules of *IRC § 465* and the passive activity loss rules of *IRC § 469*. *IRC § 163(j)(7)*.

(n122)Footnote 100.1. The President's revenue raising proposals for the fiscal 2010 budget include a proposal to amend *IRC 163(j)* by eliminating the 1.5 to 1 debt-equity safe harbor, reducing the 50-percent of adjusted taxable income threshold to 25 percent (except guaranteed debt would remain subject to the 50 percent threshold), limiting the carryforward for disallowed interest to 10 years, and abolishing entirely the carryforward of excess limitation. See US Dept of the Treasury, *General Explanations of the Administration's Fiscal Year 2010 Revenue Proposals* (May 2009) at 33-34. These changes would apply to certain "expatriated entities" as defined in *IRC § 7874*, including taxpayers that would have been "expatriated entities" had *IRC § 7874* been in effect in years beginning after July 10, 1989. Although similar proposals to tighten the earnings stripping rules have been made in the past, this one is supported by a finding in a 2007 Treasury study for Congress that "[t]here is strong evidence that [inverted corporations] are stripping a significant amount of earnings out of their U.S. operations and, consequently, it would appear that section 163(j) is ineffective in preventing them from engaging in earnings stripping." See Jt Comm on Taxation, *Description of Revenue Provisions Contained in the President's Fiscal Year 2010 Budget Proposal (Part Three: Provisions Related to the Taxation of Cross-Border Income and Investment)* (Sept 2009), p 56-69, quoting (at p 60) from US Dept of the Treasury, *Report to the Congress on Earnings Stripping Transfer Pricing and US Income Tax Treaties* (November 28, 2007), p 26.

(n123)Footnote 101. For example, if a corporation pays \$600 in interest to a foreign taxpayer resident in a country that has a treaty with the US under which interest is taxed at 15 percent rather than, say, 30 percent, the numerator of the fraction will be 15 percent (30 percent less 15 percent) and the denominator 30 percent, so that one-half of the interest will be treated as tax-exempt.

(n124)Footnote 102. *IRC § 163(j)(6)(D)*. A guarantee includes any arrangement under which a person (directly or indirectly) assures, on a conditional or unconditional basis, the payment of another's obligation under any indebtedness.

(n125)Footnote 103. A controlling interest is the direct or indirect ownership of at least 80 percent of the total voting power and value of all classes of stock of a corporation, or 80 percent of the profit and capital interests of any other entity. The attribution rules of *IRC § 267(c)(1)* and (5) apply, but are extended to ownership interests in entities other than corporations.

A gross basis tax is any income tax that is determined by reference to the gross amount of any item of income without any deduction. A net basis tax is any tax other than a gross basis tax. *IRC § 106(j)(6)(E)*.

One commentator has concluded that, as applied to third-party loans guaranteed by a foreign shareholder, *IRC § 163(j)* treats foreign-based multinationals more harshly than their US-based counterparts and likely violates the nondiscrimination provisions in most treaties. Yanowitz, "Section 163(j) and U.S. Subsidiaries with Foreign Shareholder Guaranteed Debt," *61 Tax Notes 1099* (1993).

(n126)Footnote 103.1. *IRC § 163(j)(8)*.

(n127)Footnote 104. *IRC § 163(l)(1), (2), (6)*. The term "disqualified debt instrument" does not include indebtedness issued by a dealer in securities (or a related party) that is payable in, or by reference to, equity (other than equity of the issuer or a related party) held by the dealer in its capacity as a dealer in securities, as defined in *IRC § 475. IRC § 163(l)(5)*.

A corporation issued units consisting of a five-year note and a three-year forward contract ("Purchase-Contract/Note unit") to purchase the corporation's common stock. In Rev Rul 2003-97, 2003-2 CB 380, the Service held that the interest accruing on the note was not disallowed under *IRC § 163(l)*. In so holding, the ruling found the following four factors to be critical:

- (1) The holder had the unrestricted legal right to convert the Purchase-Contract/Note unit into a Purchase-Contract/Strip unit or to settle the contract with separate cash and retain the note, and the holder was not economically compelled to keep the unit unseparated.
- (2) In the event of the issuer's bankruptcy, the contract would terminate and the associated note or strip would be released to the holder. The issuer was advised that the holder would be treated as a creditor in the bankruptcy proceeding.
- (3) The period the notes would remain outstanding after a remarketing was significant, both absolutely and relative to the total term of the notes. Notes are considered to remain outstanding only when not subject to redemption at the option of the issuer.
- (4) On the issue date, it was substantially certain that a remarketing of the notes would succeed. For this purpose, a remarketing of the notes is not substantially certain to succeed if a reset rate is capped.

(n128)Footnote 105. *IRC § 163(l)(3)*.

(n129)Footnote 106. *IRC § 163(l)(6)*.

(n130)Footnote 107. *Treas Reg § 1.163-13(a)*. Bond issuance premium is allocable to an accrual period based on a constant yield. The use of a constant yield to amortize bond premium is intended to generally conform the treatment of debt instruments with bond issuance premium with those having original issue discount.

(n131)Footnote 108. *Treas Reg § 1.163-13(b)*.

(n132)Footnote 109. *Treas Reg § 1.163-13(c)*.

(n133)Footnote 110. The value of a conversion option is determined under *Treas Reg § 1.171-1(e)(1)(iii)(A)*. See § 17.02[5][b].

(n134)Footnote 111. *Treas Reg § 1.163-13(d)(1)*.

(n135)Footnote 112. *Treas Reg § 1.163-13(d)(3)*.

(n137)Footnote 114. *Treas Reg § 1.163-13(d)(3)(ii)*.

(n138)Footnote 115. See *Treas Reg § 1.1272-1(b)(1)(ii)*.

(n139)Footnote 116. *Treas Reg § 1.163-13(d)(3)(iii)*.

(n140)Footnote 117. *Treas Reg § 1.163-13(d)(4)(i)*.

(n141)Footnote 118. *Treas Reg § 1.163-13(d)(4)(ii)*.

(n142)Footnote 119. *Treas Reg § 1.163-13(e)(1)*. The issuer constructs the equivalent fixed rate debt instrument, as of the issue date, by using the principles of *Treas Reg § 1.1275-5(e)*. See § 17.02A[d] for a discussion of variable rate debt instruments.

(n143)Footnote 120. *Treas Reg § 1.163-13(e)(2)*. A discussion of inflation-indexed debt instruments can be found in § 17.02B.

(n144)Footnote 121. *Treas Reg § 1.163-13(e)(3)(i)*. If the bond provides for a contingency that is remote or incidental, the issuer takes the contingency into account under the rules contained in *Treas Reg § 1.1275-2(h)*. *Treas Reg § 1.163-13(e)(4)*.

(n145)Footnote 122. *Treas Reg § 1.163-13(e)(3)(ii)*.

(n146)Footnote 123. The yield to maturity is approximate because it has been rounded to two decimal places. The dollar amounts in the examples use the correct yield, with the amounts rounded to the nearest dollar.

(n147)Footnote 124. *IRC § 263(g)* is inapplicable if none of the taxpayer's positions that are part of the straddle are personal property. *Prop Treas Reg § 1.263(g)-1(b)*. See § 9.02[4], *supra*, for a discussion of the tax treatment of straddles.

(n148)Footnote 125. *Prop Treas Reg § 1.263(g)-2(a)*.

(n149)Footnote 126. *Prop Treas Reg § 1.263(g)-2(a)(1)*.

(n150)Footnote 127. *Prop Treas Reg § 1.263(g)-2(a)(1), (2)*.

(n151)Footnote 128. Interest, here, includes any amount paid or incurred in connection with personal property used in a short sale.

Indebtedness is incurred or continued to purchase or carry personal property that is part of a straddle if (1) the proceeds of the indebtedness are used directly or indirectly to purchase or carry the property, (2) the indebtedness is secured directly or indirectly by the property, and (3) payments on the indebtedness are determined by reference to the value or change in value of the personal property. *Prop Treas Reg § 1.263(g)-3(c)*.

(n152)Footnote 129. *IRC § 263(g)(2)*.

(n153)Footnote 130. *IRC § 263(g)(3)*.

(n154)Footnote 131. *IRC § 263(g)(4)*.

(n155)Footnote 132. *IRC § 163(m)*.

(n156)Footnote 133. *IRC § 6662A(b)*. An increase in taxable income includes any reduction of the excess of deductions allowed for the taxable year over gross income for the year, and any reduction if the amount of capital losses that would be allowed for the year (without regard to *IRC § 1211*).

(n157)Footnote 134. *IRC § 6707A(c)(1)*.

(n158)Footnote 135. *IRC § 264(a)(2)*. A contract is treated as a single premium contract if substantially all of the premiums are paid within four years from the date on which the contract was purchased, or if an amount is deposited with the insurer for payment of a substantial number of future premiums on the contract. *IRC § 264(c)*.

(n159)Footnote 136. *IRC § 264(a)(3)*. The provision is inapplicable to any amount paid or accrued by a person (i) if no part of four of the first seven annual premiums is paid under the plan by means of indebtedness, (ii) if the total amounts paid or accrued during the taxable year does not exceed \$100, (iii) if the amount was paid or accrued on indebtedness incurred because of an unforeseen substantial loss of income or unforeseen increase in the person's financial obligations, or (iv) if the indebtedness is incurred in connection with the person's trade or business. *IRC § 264(d)*. In applying the four-of-seven rule, if there is a substantial increase in the premiums on the contract, a new seven-year period begins on the date the first increased premium is paid.

(n160)Footnote 137. *IRC § 264(a)(4)*. A deduction is allowed if the policies or contracts cover an individual who is a key person to the extent that the aggregate amount of the indebtedness covering the individual does not exceed \$50,000. *IRC § 264(e)(1)*. A key person is an officer or 20-percent owner, except that the number of individuals who can be treated as key persons with respect to any taxpayer cannot exceed the greater of (a) five individuals or (b) the lesser of five percent of the total officers and employees of the taxpayer or 20 individuals. *IRC § 264(e)(3)*.

If the taxpayer is a corporation, a 20-percent owner is any person who owns directly 20 percent or more of the outstanding stock of the corporation or stock possessing 20 percent or more of the total combined voting power of all stock of the corporation. *IRC § 264(e)(4)(A)*. If the taxpayer is not a corporation, a 20-percent owner is any person who owns 20 percent or more of the capital or profits interest in the taxpayer. *IRC § 264(e)(4)(B)*.

(n161)Footnote 138. *IRC § 264(f)(1)*. The unborrowed policy cash value is the excess of the cash surrender value of the policy or contract determined without regard to any surrender charge, over the amount of any loan with respect to the policy or contract. *IRC § 264(f)(3)*.

(n162)Footnote 139. *IRC § 264(f)(4)*.

(n163)Footnote 140. *IRC § 264(f)(5)*

(n164)Footnote 1. See chapter 10 for a discussion of the tax treatment of short sales.

(n181)Footnote 10. *Roy v Commr*, TC Memo 1968-99 ; *Tully v Commr*, TC Memo 1965-232 ; *Treas Reg* § 1.212-1(g).

(n182)Footnote 11. Expenses incurred in a trustee substitution proceeding were held deductible in *Nidetch v Commr*, TC Memo 1978-313 . The substitution allowed the taxpayer to secure the voting support of a substantial block of stock, thereby strengthening her position in the event of a contest.

(n183)Footnote 12. *Rev Rul* 65-13, 1965-1 CB 87 .

(n184)Footnote 13. *IRC* § 67(a). There is an exception to the 2 percent floor for costs paid or incurred in connection with the administration of an estate or non-grantor trust which would not have been incurred if the property were not held in an estate or trust. *IRC* § 67(e); *Prop Treas Reg* § 1.67-4; *Bay v Commr*, TC Memo 1998-411 . As interpreted by the Supreme Court, *IRC* § 67(e) is limited to expenses that are not "commonly" or "customarily" incurred

by individuals. See *Knight, Trustee v Commr*, 552 US 181 (2008) . In the Knight case, a trust sought an unrestricted deduction for investment advisory fees incurred, the trust argued, in order that the trustees' investments might satisfy the "reasonably prudent investor" standard of trust law. The Supreme Court held that the deduction was nevertheless subject to the 2 percent floor because investment advisory fees are a type of expense that is commonly incurred by individuals as well as estates and trusts.

In Notice 2008-32, 2008-1 CB 593 , supplemented in Notice 2008-116, 2008-2 CB 1372, modified and superseded by Notice 2010-32, 2010-16 IRB 594, the Internal Revenue Service announced that it and the Treasury Department expect to issue final regulations under Treas Reg § 1.67-4 consistent with the Supreme Court's decision in Knight. The final regulations will also address the issue raised when a nongrantor trust or estate pays a "Bundled Fiduciary Fee" for costs incurred in-house by the fiduciary, some of which are subject to the 2-percent floor and some of which are fully deductible. See *Prop Treas Reg § 1.67-4(c)*. The Service announced that the final regulations will only be applied prospectively, and that in taxable years ending before January 1, 2010, taxpayers (trusts and estates) may deduct the full amount of such Fee without regard to the 2 percent floor. However, payments by the fiduciary to third parties for expenses that are readily identifiable as subject to the 2-percent floor must be treated separately from the otherwise Bundled Fiduciary Fee. Notice 2010-32, 2010-16 IRB 594 .

(n185)Footnote 14. *IRC § 67(b)*.

(n186)Footnote 15. *IRC § 67(c)*.

(n187)Footnote 16. A regulated investment company is publicly traded for this purpose if its shares are continuously offered pursuant to a public offering, are regularly traded on an established securities market, or are held by or for no fewer than 500 persons at all times during the taxable year.

(n188)Footnote 17. The provision is effective for taxable years beginning after Dec 31, 1990 and before Jan 1, 1996. It does not apply to estates and trusts.

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.01

§ 20.01 Introduction

With *IRC Section 61(a)* requiring the inclusion in gross income of "all income from whatever source derived," a U.S. taxpayer holding foreign securities treats the income from such securities in a manner no different from that accorded his other income. However, the amount of tax liability is affected by the receipt of income from foreign sources; the taxpayer is allowed a credit against U.S. tax for the income taxes paid to foreign countries on or with respect to such income. And, if the taxpayer is a domestic corporation receiving dividends from a foreign subsidiary, it might be eligible for a credit with respect to foreign taxes paid by the subsidiary on the earnings that produce the dividend.

The foregoing assumes that the investment is not made in an attempt to avoid federal income taxes. A taxpayer's tax burden could be reduced if a closely held corporation, organized in a country that imposed a lesser tax on income than the United States, were used as the vehicle for investing in foreign securities. Of course, the taxpayer would be subject to tax if the stock were sold or redeemed, or if the corporation liquidated, but the income then derived would, in all probability, be long-term capital gain taxed at preferential rates.

The sort of tax avoidance described in the preceding paragraph can no longer be accomplished. The Code requires United States shareholders of foreign personal holding companies to report their proportionate shares of the undistributed foreign personal holding company income of the corporation. A somewhat similar scheme attributes certain of the undistributed income of a controlled foreign corporation to its shareholders, while a third provision affects the character of the gain realized on the disposition of foreign investment company stock unless the company has elected to distribute its income currently.

The foreign taxpayer generally pays United States taxes only if income is derived from United States sources. And, then, investment income is taxed separately from the portion of income that is effectively connected with the conduct of a trade or business within the United States. The former is subject to tax at a flat rate of 30 percent, unless a lesser rate is imposed by treaty; the latter, which may include foreign source income if certain factors exist, is assessed at the regular rates paid by United States taxpayers.

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.02

§ 20.02 Tax Consequences of Investments in Foreign Securities by United States Citizens and Residents--In General

[1] Gains and Losses on Dispositions of Foreign Securities

As a general rule, gains and losses derived from dealings in foreign securities are treated no differently from those resulting from transactions in domestic securities. If the security is a capital asset, its sale or exchange produces capital gain or loss, unless the transaction is subject to some nonrecognition provision of the Code, e.g., *IRC Section 1036*.ⁿ¹ The principal points of departure are (1) the sale or exchange of stock in a foreign investment company (any gain realized is treated as ordinary income to the extent of the taxpayer's ratable share of earnings and profits accumulated since December 31, 1962)ⁿ² and (2) the sales or exchange of stock in a controlled foreign corporation (in which case a portion of the gain may be treated as a dividend).ⁿ³

[2] Dividends Paid on Foreign Stock

Dividends received from foreign corporations by an individual are fully includable in gross income.

A corporate shareholder is also required to report the entire amount of foreign dividends received as gross income. However, it is entitled to a dividends received deduction on the United States source portion of the dividends if the domestic corporation owns at least 10 percent (by vote and value), of the foreign corporation paying the dividends, and the latter is not a foreign personal holding company passive foreign investment company.ⁿ¹

If the domestic corporation owns 10 percent or more of the voting stock of the foreign corporation, it will have additional dividend income--the *IRC Section 78* or "gross-up" dividend--whenever it elects to claim a foreign tax credit for taxes deemed to have been paid by it under the provisions of *IRC Section 902(a)*.ⁿ² The grossed-up amount is treated as a dividend for all purposes of the Code save one; it is ineligible for the dividends received deduction of *IRC Section 245*.

[3] Interest Paid on Foreign Securities

All interest on foreign securities received by a resident taxpayer or United States citizen must be reported as gross income. Included within this requirement is any interest paid on obligations issued by a foreign government; the exclusion provided by *IRC Section 103* does not extend to such obligations.ⁿ¹

[4] Credit for Foreign Taxes Paid

[a] Election to Take the Credit. A taxpayer incurring foreign tax liability may claim the amount of such taxes as a deduction under *IRC Section 164*. The taxpayer may also choose to take the amount paid as a credit against his federal income tax for the year.ⁿ¹ However, the credit is not allowed against the minimum tax on tax preferences, the accumulated earnings tax, the personal holding company tax, the tax on war loss recoveries, or the tax on recoveries of foreign expropriation losses.ⁿ²

As a general rule, the credit is allowed to the person on whom the tax is imposed, although a husband and wife making a joint return may compute the credit on the basis of the total taxes paid by or accrued against both spouses.ⁿ³ And if the husband and wife are domiciled in a community property state and file separate returns, any foreign tax paid on community income may be divided and a credit for one half thereof allowed to each spouse.ⁿ⁴ A partner is entitled to claim his proportionate share of the foreign taxes paid by the partnership; a beneficiary of an estate or trust may do the same with respect to the taxes of the estate or trust.ⁿ⁵ The shareholder in a regulated investment company may claim his share of the credit if the corporation makes the election provided by *IRC Section 853*.ⁿ⁶ Finally, a domestic corporation owning 10 percent or more of the voting stock of, and receiving dividends from, a foreign corporation may be deemed to have paid a proportion of the foreign taxes paid by the foreign corporation with respect to the accumulated profits from which the dividends are paid.ⁿ⁷

The election to take the credit (or to change the choice from credit to deduction or from deduction to credit) may be made when the return is filed or at any time before the expiration of the statute of limitations for filing a claim for refund for the year involved.ⁿ⁸ However, in lieu of the normal limitation period of three years after the filing of the return or two years after the payment of the tax, whichever is later,ⁿ⁹ *IRC Section 6511(d)(3)(A)* prescribes a special 10-year period if the claimed overpayment relates to foreign taxes.^{n9.1} If there is an agreement to extend the time for filing a claim for refund, the time for making the choice is likewise extended.ⁿ¹⁰ The credit can be claimed even though the taxpayer elects not to itemize deductions.ⁿ¹¹ However, it is unavailable if the taxpayer (a) elects to take any part of the eligible foreign taxes paid or accrued during the year as a deduction under *IRC Section 164*,ⁿ¹² (b) has extraterritorial income that is excluded from gross income under *IRC § 114*,^{n12.1} or (c) is a regulated investment company that has exercised the election under *IRC Section 853*.ⁿ¹³ Nor can it be claimed by (1) a United States citizen or domestic corporation entitled to the benefits of the exemption provided by *IRC Section 931* for income derived from sources within possessions of the United States,ⁿ¹⁴ (2) a citizen of a possession of the United States (except Puerto Rico) who is not otherwise a citizen of the United States, unless such person resides within the United States,ⁿ¹⁵ (3) an inhabitant of the Virgin Islands,ⁿ¹⁶ and (4) an alien resident of the United States or Puerto Rico, if (a) the alien is a citizen of a country which does not provide a tax credit to citizens of the US residing in such country, and (b) the President has declared that the credit will be allowed only if that country grants reciprocity by allowing United States citizens residing there a similar credit.ⁿ¹⁷

[b] Taxes Eligible for the Credit--The General Rule. A tax is eligible for the foreign tax credit only if it is an income, war profits, or excess profits tax imposed by a foreign country, by a political subdivision of a foreign country,ⁿ¹⁸ or by a possession of the United States--Guam, Puerto Rico, and the Virgin Islands.ⁿ¹⁹ However, any otherwise creditable tax will not be treated as such if (1) the amount of the tax is used (directly or indirectly) by the country imposing the tax to provide a subsidy by any means to the taxpayer, a related person within the meaning of *IRC Section 482*, or any party to the transaction or a related transaction, and (2) the subsidy is determined (directly or indirectly) by reference to the amount of the tax or the base used to compute it.ⁿ²⁰ The amount qualifying for the credit is limited to the tax itself;ⁿ²¹ no credit is given for interest and penalties paid in addition to the tax.ⁿ²²

The United States concept of a tax on income determines whether a particular tax can qualify as a creditable tax; the classification or characterization given the tax by the foreign legislation is not controlling.ⁿ²³ Thus, an amount paid to a foreign country for the release of claims which it had against the taxpayer was held not to be the payment of a foreign tax for which a credit was available, even though the payment was termed a tax under the laws of the foreign

country.ⁿ²⁴ And since the tax must be on income, sales taxes, turnover taxes, value added taxes, taxes on business capital, and taxes based on output are not creditable taxes.ⁿ²⁵ But this does not mean that the tax must be on net income; an impost on gross income will qualify for the foreign tax credit, since such a tax could be imposed by Congress.ⁿ²⁶

There is one other tax for which a credit can be claimed, namely, "a tax paid in lieu of a tax on income, war profits, or excess profits otherwise generally imposed by any foreign country or by any possession of the United States."ⁿ²⁷ A tax is in lieu of an income tax if, and only if, (1) it is a tax in the sense that it calls for a compulsory payment pursuant to the authority of the foreign country to levy taxes, and has a predominant character similar to that of an income tax in the United States sense, and (2) operates as a tax in substitution for, and not in addition to, an income tax or series of income taxes otherwise imposed.ⁿ²⁸

[c] Taxes Eligible for the Credit--Taxes Deemed Paid by Domestic Corporations. By virtue of *IRC Section 902(a)*, a domestic corporation, which owns at least 10 percent of the voting stock of a foreign corporation from which it receives dividends during the taxable year,ⁿ²⁹ is deemed to have paid a proportion of the post-1986 income taxes paid or deemed paid by the foreign corporation to any foreign country, or to any possession of the United States.^{n29.1} The proportion of foreign taxes deemed paid can be expressed in terms of the following formula:

$$\frac{\text{dividends received}}{\text{.....X}} \times \text{post-1986 foreign taxes.}^{\text{n29.2}}$$

The foreign corporation's post-1986 undistributed earnings are its earnings and profits (computed in essentially the same manner as a domestic corporation, but in the foreign corporation's functional currency) accumulated in taxable years beginning after December 31, 1986, and determined as of the close of the taxable year in which the dividend is distributed without diminution by reason of dividend distributions during the taxable year.ⁿ³⁰ The corporation's post-1986 foreign income taxes are the sum of (1) the foreign income taxes with respect to the taxable year of the foreign corporation in which the dividend is distributed, and (2) the foreign income taxes with respect to prior taxable years beginning after 1986, to the extent that the taxes were not attributable to dividends distributed by the foreign corporation in prior years.ⁿ³¹ If the first day on which the domestic corporation owns 10 percent of the voting stock of the foreign corporation and the requirements of a qualified group are met is in a taxable year of the foreign corporation beginning after December 31, 1986, the post-1986 undistributed earnings and foreign income taxes of the foreign corporation are determined by taking into account only periods beginning on the first day of the first taxable year in which the requirements are met.ⁿ³²

As an illustration:

Example:

If X Corp., a domestic corporation owns at least 10 percent of the voting stock of Y Corp., a foreign corporation, which (1) has post-1986 undistributed earnings of \$120,000, (2) pays \$30,000 in taxes to foreign countries, and (3) distributes \$60,000 as a dividend to X Corp., the latter is deemed to have paid \$15,000 ($\$60,000 / \$120,000 \times \$30,000$) in foreign taxes. Because of this, X Corp.'s dividend income is \$75,000 not \$60,000; *IRC Section 78* requires the domestic corporation to "gross up" the amount of foreign taxes paid by it and to treat that amount as a dividend received from the foreign corporation. However, the gross-up dividend does not itself generate a deemed-paid credit (it is not considered a dividend received by the corporation for the purposes of *IRC Section 902*),ⁿ³³ nor is it taken into account in determining the dividends received deduction of *IRC Section 245*.ⁿ³⁴

Foreign income taxes incurred with respect to dividends paid out of accumulated profits for taxable years beginning before the first taxable year taken into account in determining the post-1986 undistributed earnings of a foreign corporation give rise to a deemed credit determined under the rules in effect before the Tax Reform Act of 1986.ⁿ³⁵

The applicable formula is:

$$\frac{\text{dividends received}}{\text{accumulated profits in excess of } x \text{ foreign taxes.}} \times \text{foreign taxes}$$

However, any dividend distributed after 1986 is treated as made out of post-1986 undistributed earnings to the extent thereof.ⁿ³⁷

If a foreign corporation is a member of a qualified group and owns 10 percent of the voting stock of another foreign corporation from which it receives dividends, the first corporation is deemed to have paid the same proportion of the post-1986 foreign income taxes paid by the second corporation as would be the case if the first corporation were a domestic corporation.ⁿ³⁸ A qualified group is defined as the first foreign corporation mentioned in the previous sentence and any other foreign corporation if (1) the domestic parent owns at least 5 percent of the voting stock of the other foreign corporation indirectly through a chain of foreign corporations connected through stock ownership of at least 10 percent of their voting stock, (2) the first corporation is the first-tier corporation in the chain, and (3) the other foreign corporation is not below the sixth tier in the chain.ⁿ³⁹ A qualified group does not include any foreign corporation below the third tier in the chain unless the foreign corporation is a controlled foreign corporation and the domestic shareholder and the domestic corporation is a United States shareholder in such foreign corporation.ⁿ⁴⁰ *IRC Section 902(b)(1)* will apply to those taxes paid by a member of the qualified group below the third tier only with respect to those periods during which it was a controlled foreign corporation.ⁿ⁴¹

No deemed-paid foreign tax credit is allowed for taxable years beginning after August 5, 1997 for foreign income taxes incurred by noncontrolled foreign corporations below the third tier or by controlled foreign corporations below the sixth tier, even though a liquidation, reorganization, or similar transaction might cause the corporations to meet the requirements of *IRC Section 902*.^{n41.1}

The following example illustrates the computation of the deemed-paid credit when there are second and third-tier corporations:

Example:

D Corp., a domestic corporation, owns 20 percent of *F Corp.*, a foreign corporation. *F Corp.*, in turn, owns 50 percent of the voting stock of another foreign corporation, *S Corp.*, which owns 60 percent of *T Corp.*, still another foreign corporation. The indirect ownership requirement is satisfied since *D Corp.* owns indirectly 10 percent (20 percent x 50 percent) of *S Corp.* and 6 percent (10 percent x 60 percent) of *T Corp.* The three foreign corporations have profits, pay foreign income taxes, and pay dividends for 1987 as follows:

T Corp.

Additional considerations arise if there are post-1986 deficits that are carried back to pre-1987 earnings and profits or pre-1987 deficits that are carried forward. The rules described below apply only with respect to a foreign corporation whose functional currency after the effective date of the Tax Reform Act of 1986 is the same as it was before the Act.ⁿ⁴⁵

In computing the deemed-paid foreign tax credit for dividends paid in a taxable year of the foreign corporation in which there is a deficit in the post-1986 undistributed earnings pool, the deficit is carried back to years prior to the effective date of the Tax Reform Act of 1986. The amount carried back will reduce the earnings and profits of the pre-effective date years for purposes of calculating the deemed-paid credit and will be removed from the pool of post-1986 undistributed earnings.

The following examples illustrate the Service's position with respect to the carryback and carryforward of the deficits. The examples assume that (1) all earnings and profits and deficits are attributable to the taxpayer's general limitation category (*IRC Section 904(d)(1)(I)*); (2) the foreign corporation's earnings and profits and related tax amounts are computed in the corporation's functional currency, which did not change from pre-1987 years to post-1986 years; (3) the foreign taxes attributable to post-1986 taxable years have been translated into United States dollars at the exchange rate on the date of payment as required by *IRC Section 986(b)*; and (4) the domestic shareholder and foreign corporation have the same calendar taxable year.

Example 1:

The earnings of foreign taxes paid by, and distributions from, the foreign corporation (in the

2-20 Taxation of Securities Transactions § 20.02

corporation's functional currency) for the period 1985 through 1990 are as follows:

Year	After-Tax Earnings	Foreign	December 31 Distributions
1985	\$150,000	\$120,000	-0-
1986	150,000	120,000	-0-
1987	(100,000)	10,000	50,000
1988	100,000	50,000	-0-
1989	-0-	-0-	50,000
1990	-0-	-0-	-0-

The above gives rise to the following cumulative amounts:

Year	Current and Accumulated Earnings	Post-1986 Undistributed Pool of Earnings	Post-1986 Pool of Foreign Taxes
1985	\$150,000		
1986	300,000		
1987	200,000	(100,000)	\$10,000
1988	250,000	100,000	60,000
1989	250,000	100,000	60,000
1990	200,000	50,000	30,000

Under *IRC Section 316(a)*, the \$50,000 distribution in 1987 is treated as a dividend in its entirety because the current and accumulated earnings of \$200,000 (\$150,000 from each of 1985 and 1986 minus the 1987 deficit of \$100,000) exceeds the amount of the distribution. The dividend is deemed to be made out of 1986 earnings and profits. The denominator for the deemed-paid dividend fraction is \$50,000 (the 1986 earnings of \$150,000 reduced by the \$100,000 deficit carried back to 1986 from the post-1986 undistributed earnings pool); the numerator is \$50,000 (the amount of the distribution); the deemed-paid credit is \$120,000.

The \$100,000 deficit for 1987 that is carried back to 1986 is removed from the post-1986 undistributed pool; the \$50,000 distribution in 1987 has no effect on the post-1986 undistributed earnings pool since the amount thereof was a negative number. (The distribution does reduce accumulated earnings.) Thus, when the foreign corporation realizes \$100,000 in earnings in 1988, the post-1986

earnings pool becomes \$100,000. The \$50,000 distribution in 1988 reduces both the amount of positive post-1986 undistributed earnings and the amount of accumulated earnings.

The \$10,000 of foreign taxes associated with the 1987 deficit will not be carried back to 1986 or removed from the pool of post-1986 foreign income taxes. Accordingly, when the \$50,000 dividend is paid in 1989, the denominator for the deemed-paid credit fraction is \$100,000 (the post-1986 undistributed earnings pool at the time of distribution), the numerator is \$50,000 (the amount of the distribution), and the deemed-paid credit is \$30,000 (\$50,000/\$100,000 times the post-1986 pool of foreign taxes).

If a foreign corporation pays a dividend in a year when it has a deficit in its post-1986 undistributed earnings pool, carrying back the deficit may prevent the crediting of foreign income taxes paid with respect to earnings and profits of a pre-1987 year. By way of illustration, if the foreign corporation in the preceding example had a deficit in earnings for 1987 of \$150,000 instead of \$100,000, the 1987 distribution of \$50,000 would still be a dividend, but it would be deemed to be made out of 1985 earnings since the deficit would offset all of the 1986 earnings. Because no future distribution would be treated as made out of 1986 earnings, the foreign income taxes paid with respect to those earnings would never be creditable. The denominator of the deemed-paid credit fraction would be \$150,000 (the 1985 earnings), and the deemed-paid credit would be \$40,000 (\$50,000/\$150,000 times the \$120,000 of foreign taxes). In addition, the \$150,000 deficit would be removed from the post-1986 undistributed pool by the 1987 distribution because the deficit was carried back to offset pre-1987 earnings and profits.

The dividend in the preceding example was paid in 1987, the first post-1986 year. However, the deficit in the post-1986 earnings pool cannot be carried back to a pre-effective date year unless there is a dividend.

Example 2:

Assume that a foreign corporation has earnings and profits, pays foreign income taxes, and makes distributions as follows:

Year	After-Tax Earnings	Foreign Taxes	December 31 Distributions
1986	\$100,000	\$80,000	-0-
1987	(50,000)	-0-	-0-
1988	150,000	120,000	100,000
1989	75,000	20,000	-0-
1990	25,000	20,000	120,000
1991	-0-	-0-	-0-

The above gives rise to the following cumulative amounts:

Year	Current and Accumulated Earnings	Post-1986 Undistributed Pool of Earnings	Post-1986 Pool of Foreign Taxes
198	\$100,0		

2-20 Taxation of Securities Transactions § 20.02

6	00		
1987	50,000	(50,000)	-0-
1988	200,00	100,00	120,00
1989	175,00	75,000	20,00
1990	200,00	100,00	40,00
1991	80,000	-0-	-0-

In this case, no portion of the 1987 deficit of \$50,000 is carried back because no distribution is made until 1988, a year in which the post-1986 undistributed earnings pool is positive. The 1988 dividend is made entirely out of the post-1986 pool of undistributed earnings because the pool is at least as great as the dividend. The denominator of the deemed-paid credit fraction is \$100,000 (the post-1986 undistributed earnings pool as of 1988, the year of distribution); the numerator is \$100,000 (the amount of the distribution); the deemed-paid credit is \$120,000.

Since the post-1986 undistributed earnings pool in 1990 is only \$100,000, the portion of the 1990 dividend of \$120,000 that can be made out of post-1986 undistributed earnings is limited to \$100,000. The additional \$20,000 will be deemed made out of the 1986 earnings and profits of \$100,000. The denominator of the deemed-paid credit fraction for the portion of the dividend made out of the post-1986 undistributed earnings pool is \$100,000, and the credit derived therefrom is \$40,000. The denominator of the fraction for the portion of the dividend made out of the 1986 earnings and profits is \$100,000; the deemed-paid credit relating thereto is \$16,000 (\$20,000 dividend/\$100,000 earnings and profits times \$80,000 foreign taxes paid with respect to 1986 earnings).

The amount of a deficit in earnings and profits of the foreign corporation accumulated as of the end of the last pre-effective date taxable year is carried forward and included in the post-1986 undistributed earnings pool as of the first day of the foreign corporation's first taxable year beginning after December 31, 1986.

Example 3:

Assume that the foreign corporation has earnings and profits, pays the foreign income taxes, and makes distributions as follows:

Year	After-Tax Earnings	Foreign Taxes	December 31 Distributions
1984	\$25,000	\$20,000	-0-
1985	(100,000)	5,000	-0-
1986	(25,000)	-0-	-0-
1987	200,000	100,000	-0-
1988	100,0	50,000	200,000

2-20 Taxation of Securities Transactions § 20.02

8	00		
198	100,0	50,000	-0-
9	00		

The above give rise to the following cumulative amounts:

Year	Current and Accumulated Earnings	Post-1986 Undistributed Pool of Earnings	Post-1986 Pool of Foreign Taxes
1984	\$25,000		
1985	(75,000)		
1986	(100,000)		
1987	100,000	100,000	100,000
1988	200,000	200,000	150,000
1989	100,000	100,000	50,000

The post-1986 undistributed earnings pool is reduced by the \$100,000 accumulated deficit in earnings and profits existing at the end of 1986. Under *IRC Section 316(a)*, the 1988 dividend distribution of \$200,000 represents all of the corporation's current and accumulated earnings and profits and is made out of the post-1986 undistributed earnings pool of \$200,000. The denominator of the deemed-paid credit is \$200,000 (\$300,000 in post-1986 earnings and profits reduced by the \$100,000 accumulated deficit carried forward from 1986). The deemed-paid credit is \$150,000 (\$200,000 dividend/\$200,000 post-1986 undistributed earnings pool times \$150,000 post-1986 pool of foreign taxes). The foreign taxes associated with pre-1987 tax years are not carried forward and included in the post-1986 pool of foreign income taxes.

The results will be modified if a dividend is paid out of current earnings and profits and there is a deficit in current and accumulated earnings and profits.

Example 4:

Assume the following facts with respect to the foreign corporation:

Year	After-Tax Earnings	For- eign Taxe s	December 31 Distributions
1986	(100,000)	-0-	-0-
1987	150,000	120,000	100,000
1988	(150,000)	-0-	-0-

2-20 Taxation of Securities Transactions § 20.02

1989	100,000	50,000	100,000
1990	250,000	100,000	50,000

The cumulative figures are:

Year	Current and Accumulated Earnings	Post-1986 Undistributed Pool of Earnings	Post-1986 Pool of Foreign Taxes
1986	(100,000)		
1987	50,000	50,000	120,000
1988	(200,000)	(200,000)	-0-
1989	(100,000)	(100,000)	50,000
1990	50,000	50,000	150,000

The 1987 distribution of \$100,000 is a dividend in its entirety as a result of the current earnings and profits of \$150,000. The denominator of the deemed-paid credit fraction is \$50,000 (the post-1986 undistributed earnings pool of \$150,000 reduced by the \$100,000 accumulated deficit carried forward). Although the dividend is \$100,000, the deemed-paid credit cannot exceed the foreign taxes actually or deemed paid. Thus, the numerator of the fraction cannot exceed the denominator and, in this case, is limited to \$50,000. The deemed-paid credit is, therefore, \$120,000 (\$50,000/\$50,000 times \$120,000).

The 1987 dividend of \$100,000 reduces the current earnings and profits for 1987 to \$50,000, which is then added to the \$100,000 accumulated deficit from the previous year to produce an accumulated deficit at the start of 1988 of \$50,000.

The \$100,000 distribution in 1989 will be taxed as a dividend because there are current earnings and profits of \$100,000. Since there is a deficit in the corporation's post-1986 undistributed earnings pool of \$100,000 (the \$50,000 deficit in accumulated earnings and profits at the end of 1987 plus the \$150,000 deficit in earnings and profits for 1988, reduced by the \$100,000 in earnings and profits for 1989), the foreign income taxes of \$50,000 paid in 1989 will not be creditable. However, the amount will remain in the post-1986 pool of foreign taxes not previously credited.^{n45.1}

The \$100,000 dividend in 1989 is applied against and completely eliminates the \$100,000 in current earnings and profits for that year, and, thus, the accumulated deficit at the start of 1990 is the same as it was at the beginning of 1989, namely, \$200,000.

The \$50,000 distribution in 1990 is a dividend due to the existence of \$250,000 in current earnings and profits. The post-1986 undistributed earnings pool for 1990 is \$50,000 (current earnings and profits of \$250,000 less \$200,000 deficit in the pool at the end of 1989); the deemed-paid credit is \$150,000 (\$50,000/\$50,000 times \$150,000, the pool of foreign taxes not previously credited).

[d] Year in Which the Credit May Be Taken. Under *IRC Section 905(a)*, the foreign tax credit "may, at the option of the taxpayer and irrespective of the method of accounting employed in keeping his books, be taken in the year in which the taxes of the foreign country or the possession of the United States accrued" Thus, cash basis taxpayers can take the credit either in the year in which the foreign tax is paid or, if they so elect, in the year in which the taxes accrue.ⁿ⁴⁶ But, once a cash basis taxpayer makes the election to take the credit in the year of accrual, this method must be followed in all subsequent years.ⁿ⁴⁷ This prevents the claiming of a second deduction in the year in which they are paid, although, the taxpayer can get a credit for both the taxes paid and the taxes accrued in the year for which the election is first made.ⁿ⁴⁸

A foreign tax is accruable, for the purposes of the credit, for the year to which it relates, even though the taxpayer contests liability and does not pay the tax until a later year. However, the *accrual* cannot be made until the contested liability is determined.ⁿ⁴⁹ In other words, the tax cannot be accrued, and a credit claimed, until the amount due is settled, but when this occurs, the accrual relates back to the taxable year for which the tax is imposed.ⁿ⁵⁰ Such a rule furthers the purpose underlying *IRC Section 905(a)*--to allow a taxpayer employing the cash method of accounting a credit against the federal tax imposed for the year in which the income subject to the foreign tax is received.ⁿ⁵¹

Taxpayers who take foreign income taxes into account when accrued must translate the amount of those taxes into United States dollars at the average exchange rate for the taxable year to which the taxes relate.^{n51.1} This rule does not apply to any foreign income taxes paid before the beginning of the taxable year to which the taxes relate or more than two years after the close of that year, or to accrued taxes denominated in an inflationary currency.^{n51.2} If any of the exceptions apply, the amount of the foreign taxes (and adjustments) must be translated into United States dollars using the exchange rate as of the payment date of the tax (or adjustment), while refunds are translated at the exchange rate on the date of original payment.^{n51.3} None of the foregoing rules applies to a regulated investment company that accounts for income on an accrual basis; any foreign income taxes paid or accrued by it on such income must be translated into dollars using the exchange rate as of the date the income accrues.^{n51.4}

If the amount of foreign tax actually paid differs from the amount accrued, accrued taxes are not paid within two years after the close of the taxable year to which they relate, or if there is any refund of the foreign tax, the taxpayer must notify the Service, which will then redetermine the amount of federal tax due for the affected year.ⁿ⁵² If the accrued tax is not paid within two years of the year of accrual, the redetermination results in a denial of a credit for the tax.^{n52.1} If the accrued tax is paid after the two-year period, and an indirect foreign tax credit is involved, the tax is taken into account for the taxable year in which paid.^{n52.2} In the case of a direct foreign tax credit, the later payment is taken into account for the taxable year to which the tax relates.^{n52.3} In both cases, the tax is translated into United States dollars using the exchange rate as of the time the tax is paid.ⁿ⁵³

If a redetermination of United States tax liability is necessitated by a foreign tax redetermination that reduces the amount of foreign tax, the taxpayer must file the notification within 180 days after the date of the foreign tax redetermination.^{n53.1} If there is an increase in the foreign tax, the notification must be filed within the period provided by *IRC Section 6511(d)(3)(A)*--ten years from the due date of the return for the taxable year.ⁿ⁵⁴

[e] Limitations on the Credit

[i] In General. The amount of the credit that can be taken in any taxable year is subject to a limitation based on the aggregate of the income taxes paid to all foreign countries and possessions of the United States. Under this limitation, the taxpayer's credit for foreign taxes cannot exceed the same proportion of federal income taxes against which the credit is taken which the taxpayer's taxable income from all foreign sources bears to his total taxable income.ⁿ⁵⁵ The limitation formula is the following:

$$\begin{array}{l} \text{Maximum credit for} \\ \text{foreign taxes paid to} \\ \text{all foreign countries} \end{array} = \begin{array}{l} \text{Taxable income from all for-} \\ \text{eign} \\ \text{sources} \end{array} \times \begin{array}{l} \text{United States} \\ \text{tax prior to cred-} \\ \text{it} \end{array}$$

___ Total taxable income

In ascertaining the limit, the total taxable income of individuals, estates, and trusts is computed without the deduction for personal exemptions,ⁿ⁵⁶ while income exempt from United States taxes is excluded from both the numerator and denominator of the limiting fraction.ⁿ⁵⁷ But, the fact that there is income exempt from federal income taxes in no way lessens the amount of foreign tax qualifying for the credit;ⁿ⁵⁸ the limitation affects only the credit. (It can readily be seen that if all of the foreign income is exempt from federal income taxes, the taxpayer can take no credit for foreign taxes since the limiting fraction has a numerator of zero and a denominator of zero.)ⁿ⁵⁹ Finally, long-term capital gain from sources without the United States is includable in taxable income from sources without the United States only to the extent of foreign source capital gain net income (the lesser of capital gain from sources without the United States, or capital gain net income).ⁿ⁶⁰

If capital gain net income from foreign sources exceeds capital gain net income from all sources, and the taxpayer has capital gain net income from foreign sources in only one separate category (see § 20.02[4][e][iii]), the excess is allocated as a reduction to that separate category.^{n60.1} If the taxpayer has capital gain net income from foreign sources in more than one separate category, the excess must be apportioned on a pro rata basis as a reduction to each separate category.^{n60.2}

If capital gains are taxed at preferential rates, (a) foreign source capital gain net income is reduced by the rate differential portion of foreign source net capital gain, (b) the taxpayer's entire taxable income is computed by reducing capital gain net income by the rate differential portion of net capital gain, and (c) any net capital loss from sources outside the United States must be reduced by the rate differential portion of the excess of net capital gain from United States sources over net capital gain.ⁿ⁶¹ The rate differential portion is determined by the following fraction:

$$\frac{\text{Highest applicable rate} - \text{alternative tax rate}}{\text{Highest applicable tax rate}}.$$
ⁿ⁶²

If a taxpayer with a capital gain rate differential for the year has capital gain net income from foreign sources in only one rate group within a separate category, any reduction to the separate category must be allocated to that rate group.^{n62.1} If a taxpayer with a capital gain rate differential for the year has capital gain net income from foreign sources in more than one rate group within a separate category, any reduction to the separate category must be apportioned on a pro rata basis among the rate groups.^{n62.2}

In determining taxable income from foreign sources for purposes of *IRC Section 904*, capital gain income from foreign sources in each long-term rate group in each separate category (separate category long-term rate) must be reduced by the rate differential portion of the capital gain net income.^{n62.3} If a taxpayer has a net long-term capital loss from United States sources, and also has a short-term capital gain from any source, the capital gain net income from foreign sources in each separate category long-term rate must be reduced by the rate differential portion of the applicable rate differential amount.^{n62.4} In addition, a taxpayer with a net capital loss in a separate category rate group must reduce the capital loss by the sum of the rate differential portions of the capital gain net income in each long-term rate group offset by the capital loss.^{n62.5} A net capital loss in a separate category rate group is the amount, if any, by which capital losses in a rate group from foreign sources included in a separate category exceed capital gains from foreign sources in the same rate group and the same separate category.

IRC Section 904(k)(1) and (2), allow individuals with no more than \$300 (\$600 in the case of married persons filing jointly) of creditable foreign taxes, and no foreign source income other than passive income, to elect to be exempt from the foreign tax credit limitation rules.^{n62.6} An individual making the election is not entitled to any carryback or

carryover of excess foreign taxes paid in a taxable year to which the election applies. For purposes of this provision, passive income is generally defined as income that is foreign personal holding company income under the Subpart F rules, and income inclusions from passive foreign investment companies, provided the income is shown on a payee statement furnished to the individual.^{n62.7}

IRC Section 904(h) treats certain amounts derived from a United States-owned foreign corporation, that would normally be treated as foreign source income, as income from sources within the United States.ⁿ⁶³ The affected classes are (a) Subpart F income and foreign personal holding company income includable in the income of United States shareholders to the extent the income is attributable to income of the United States-owned foreign corporation from sources within the United States, (b) foreign passive investment company income that is taxed currently, (c) interest, which is allocable to income of the United States-owned foreign corporation derived from United States sources, and is paid or accrued by the foreign corporation to a United States shareholder or related party,ⁿ⁶⁴ and (d) the portion of dividends paid or accrued by the foreign corporation that is determined by multiplying the dividend by a fraction, the numerator of which is the portion of the corporation's earnings and profits for the year from sources within the United States and the denominator of which is the total amount of its earnings and profits for the taxable year.ⁿ⁶⁵ The recharacterization of interest and dividends as U.S. source income is not required if less than 10 percent of the corporation's earnings and profits for the taxable year is from sources within the United States or if a U.S. income tax treaty treats the income as foreign source income.ⁿ⁶⁶ The provisions of *IRC Section 904(h)* are applied before applying the rules of *IRC Section 904(f)*, discussed below.ⁿ⁶⁷

If a taxpayer sustains an overall domestic loss for any taxable year beginning after December 31, 2006, and elects to claim a foreign tax credit, that portion of the taxpayer's taxable income from United States sources for each succeeding taxable year that is equal to the lesser of (i) the amount of the loss (to the extent not used in prior taxable years, or (ii) 50 percent of the taxpayer's taxable income from United States sources for each succeeding taxable year will be treated as foreign source income.^{n67.1} Any income from United States sources that is so treated as foreign source income must be allocated among and increase the income categories in proportion to the loss from United States sources previously allocated to those income categories.^{n67.2}

A further limitation operates as a reduction in the amount of the allowable credit. By virtue of *IRC Section 908*, such reduction is required whenever the taxpayer, or a member of a controlled group which includes the taxpayer, participates in an international boycott (as defined in *IRC Section 999(b)*).ⁿ⁶⁸ The reduced credit is determined by multiplying the otherwise allowable credit by the international boycott factor, a fraction the numerator of which reflects the operations of the taxpayer or controlled group in countries associated in carrying on the boycott, and the denominator of which reflects the worldwide operations of the taxpayer or group.ⁿ⁶⁹ If the taxpayer clearly demonstrates that the foreign taxes paid and income earned during the year are attributable to specific operations, then, in lieu of applying the international boycott factor, the disallowed amount of the credit is the amount specifically attributable to operations connected with the boycott.ⁿ⁷⁰

Finally, *IRC Section 901(k)* denies foreign tax credits for any taxes paid or deemed paid to any country (1) that the United States does not recognize (unless the government is eligible to purchase defense articles or services under the Arms Export Control Act), (2) with respect to which the United States has severed diplomatic relations or does not conduct such relations, or (3) that the Secretary of State has designated as a country that repeatedly provides support for acts of international terrorism.ⁿ⁷¹ The denial applies during the period beginning on the later of January 1, 1987 or six months after the country becomes one of the described types, and ending on the date that the Secretary of State certifies to the Secretary of the Treasury that the country is no longer so described.ⁿ⁷²

[ii] Recapture of Overall Foreign Losses. We have seen that repeal of the per country limitation prevents the use of losses derived in one foreign country to reduce worldwide income without a corresponding reduction in the allowed credit for taxes paid on income earned in a different country. Even under the overall limitation, foreign losses in excess of foreign income could reduce the amount of tax on domestic source income. Moreover, if foreign income were

derived in a subsequent year, the taxpayer would be entitled to a credit for taxes paid thereon, securing the benefit of having reduced total income in the loss year while paying no federal tax in the later year. *IRC Section 904(f)* bars this result by requiring recapture of the loss when the taxpayer derives the foreign income.

The statute accomplishes this recapture by treating as domestic source income the lesser of the amount of the loss (to the extent not previously recaptured) or 50 percent (or more if the taxpayer so chooses) of the taxpayer's foreign taxable income for the year. By treating this sum as income from sources within the United States, the taxpayer can claim neither a foreign tax credit nor a deduction with respect to foreign taxes paid on such income.

Recapture is required only if, in a prior year, the taxpayer sustained an "overall foreign loss," defined as the amount by which the gross income for that prior year from sources without the United States was exceeded by the deductions properly apportioned or allocated thereto.ⁿ⁷³ In determining the amount of the loss, the following are not taken into account:

- (a) any net operating loss deduction allowable for such year; and
- (b) any casualty loss for such year, to the extent such losses are not compensated for by insurance or otherwise.ⁿ⁷⁴

A second recapture provision, *IRC Section 904(f)(3)*, becomes operative whenever property used predominantly outside the United Statesⁿ⁷⁵ in a trade or business is disposed of prior to recapture of the loss under the method described above. Recapture in this instance is required even though, absent the provision, gain realized on the disposition would be sheltered from recognition by some other section of the Code. The amount of gain to be taken into account in the lesser of the gain realized on the disposition or the portion of overall foreign loss not previously recaptured.ⁿ⁷⁶ The normal gain characterization rules apply with any gain recognized solely by reason of the recapture provision taking the same character it would have if the taxpayer sold the property in a taxable transaction.ⁿ⁷⁷

For purposes of *IRC Section 904(f)(3)*, "the term 'disposition' includes a sale, exchange, distribution, or gift of property whether or not gain or loss is recognized on the transfer."^{n77.1} An exception is made for a disposition of property which is not a material factor in the realization of income by the taxpayer and for a disposition of property to a domestic corporation as part of a reorganization or liquidation of a subsidiary that gives rise to carryover attributes under *IRC Section 381*.^{n77.2}

A disposition of any share of stock in a controlled foreign corporation in a transaction or series of transactions (an applicable disposition) is treated as a disposition for purposes of *IRC Section 904(f)(3)* if, immediately before the transaction or series of transactions, the taxpayer owned more than 50 percent (by vote or value) of the stock of the controlled foreign corporation.^{n77.3} A disposition is not treated as an applicable disposition if (1) it is part of a tax-free corporate or partnership organization, or if the transferor receives stock in a foreign corporation and the stock received is exchanged basis property, and (2) immediately after the disposition, the taxpayer owns (by vote or value) at least the same percentage of stock in the controlled foreign corporation (or, if the controlled foreign corporation is not in existence after the disposition, in another foreign corporation stock which was received by the transferor in exchange for stock in the controlled foreign corporation) as the percentage of stock in the controlled foreign corporation that the taxpayer owned immediately before the transaction or series of transactions.ⁿ⁷⁸ A disposition is also not an applicable transaction if it is part of a transaction or series of transactions in which the taxpayer (or any member of a controlled group of corporations filing a consolidated return under *IRC Section 1501* that includes the taxpayer) acquires the assets of the controlled foreign corporation in exchange for the shares of the controlled corporation in a tax-free liquidation of a subsidiary or a tax-free reorganization.ⁿ⁷⁹

Special foreign credit limitations exist for various types of income. Because of this, *IRC Section 904(f)(5)* provides that the amount of separate limitation losses for any taxable year will reduce income from U.S. sources only to the extent

that the aggregate amount of such losses exceeds the aggregate amount of the separate limitation incomes for the taxable year. The losses are allocated proportionately among the separate limitation income categories in which the taxpayer has income for the taxable year; U.S. source losses are allocated to those categories after the allocation of the foreign-source losses. If separate limitation losses are allocated to foreign income in a different category and the first category (the one in which the loss was incurred) has income in a subsequent year, the income is recharacterized as income in the second category in proportion to the prior allocation of the loss to that category. If any separate limitation loss for a taxable year is allocated against separate limitation income for the year, rules similar to those contained in *IRC Section 904(f)(3)* apply to gain from a disposition of property if the gain would be in the same income category as the separate limitation loss.

An additional recapture provision recharacterizes an overall domestic loss sustained by a taxpayer for any taxable year beginning after December 31, 2006. Under *IRC Section 904(g)(1)*, the portion of the taxpayer's taxable income from sources within the United States for each taxable year after 2006 that is equal to the lesser of the amount of the loss (to the extent not previously recaptured) or 50 percent of the taxpayer's taxable income from sources within the United States for the taxable year will be treated as foreign source income. An overall domestic loss is a domestic loss to the extent the loss offsets foreign source income for the taxable year or for any preceding taxable year due to a carryback.^{n79.1} A domestic loss is the amount by which the gross income for the taxable year from United States sources is exceeded by the sum of the deductions properly apportioned or allocated thereto (determined without regard to any carryback from a subsequent taxable year).^{n79.2} Any United States source income that is recharacterized under *IRC Section 904(g)(1)* will be allocated among and increase the income categories described in *IRC Section 904(f)(5)(E)(i)* in proportion to the loss from United States sources previously allocated to those sources.^{n79.3}

[iii] Special Limitation Applied to Certain Categories of Income. For taxable years prior to 2007, *IRC Section 904(d)(1)* required that the limitation on the allowable foreign tax credit be computed separately for taxes paid with respect to:

- (1) dividends from a DISC or former DISC to the extent such dividends are treated as income from foreign sources;
- (2) taxable income attributable to foreign trade income within the meaning of *IRC Section 923(b)*;
- (3) distributions from an FSC or former FSC attributable to foreign trade income and qualifying interest and carrying charges as defined in *IRC Section 945(c)*;
- (4) passive income;
- (5) high withholding tax interest;
- (6) financial services income;
- (7) shipping income; and
- (8) in the case of a corporation, dividends from noncontrolled Section 902 corporations out of earnings and profits accumulated in taxable years beginning before January 1, 2003.^{n79.4}

For taxable years beginning after December 31, 2006, the number of separate categories is reduced to two, namely passive category income and general category income.^{n79.5} Passive category income includes passive income and specified passive income, the latter including (i) dividends from a DISC or former DISC to the extent the dividends are treated as income from sources without the United States, (ii) taxable income attributable to foreign trade income, and (iii) distributions from a FSC (or a former FSC) out of earnings and profits attributable to foreign trade income or

interest or carrying charges derived from a transaction that results in foreign trade income.^{n79.6} General category income is any income other than passive category income.^{n79.7}

Passive income for this purpose is income that would be foreign personal holding company income and, generally, any passive foreign investment income inclusions (under *IRC Section 1293*).ⁿ⁸⁰ However, passive income does not include any export financing interest or high-taxed income.ⁿ⁸¹ Passive income also does not include rents and royalties paid or accrued after September 20, 2004, if they are derived in the active conduct of a trade or business, regardless of whether the rents or royalties are received from a related or unrelated person.^{n81.1}

High-taxed income is income that would be passive income if the sum of foreign income taxes paid and deemed paid by the taxpayer exceeds the highest rate of tax applicable to the taxpayer multiplied by the amount of the income (including any gross-up dividend).ⁿ⁸² Only foreign-source income is relevant in determining whether income is high-taxed income.^{n82.1}

Export financing interest is interest derived from financing the sale for use outside the United States of any property that is manufactured, produced, grown, or extracted in the United States by the taxpayer or a related person, if not more than 50 percent of the fair market value of the property is attributable to products imported into the United States.^{n82.2} For this purpose, a related person is an individual, corporation, partnership, trust, or estate that controls, or is controlled by, the person with respect to whom the determination is being made.^{n82.3}

Financial services income is income that (1) is derived in the active conduct of a banking, financing, or similar business, or from the investment by an insurance company of its unearned premiums or reserves ordinary and necessary for the proper conduct of its insurance business, or (2) is of a kind that would be insurance income as defined in *IRC Section 953(a)* determined without regard to any provisions that limit insurance income to income from countries other than the country in which the corporation was organized.ⁿ⁸³ If, for any taxable year, an entity is predominantly engaged in the active conduct of a banking, insurance, financing, or similar business, financial services income includes passive income, but does not include any high-taxed income. Financial services income is treated as general category income in the case of a member of a financial services group and any other person if the person is predominantly engaged in the active conduct of a banking, insurance, financing or similar business.ⁿ⁸⁴

Dividends received from a noncontrolled Section 902 corporation are dividends received from a foreign corporation in which the taxpayer owns between 10 percent and 50 percent of the stock.^{n84.1} If a foreign corporation is a 10/50 corporation with respect to the taxpayer, any inclusion under *IRC Section 1293* (current taxation of income from qualifying electing funds) with respect to the corporation is treated as a dividend from the corporation.^{n84.2}

IRC Section 904(d)(3) contains a set of look-through rules for controlled foreign corporations. Dividends, interest, rents and royalties received from a controlled foreign corporation by a U.S. shareholder will not be treated as passive category income, except that such interest, rent, or royalty income is properly allocable to passive category income of the controlled foreign corporation.^{n84.3} Dividends paid out of the earnings and profits of a controlled foreign corporation to a United States shareholder are treated as passive category income in proportion to the ratio of (1) the portion of the earnings and profits attributable to income in the category, to (2) the total amount of earnings and profits.^{n84.4} Subpart F inclusions are also subject to the look-through rule.^{n84.5} However, if the *de minimis* rules of Subpart F apply (the sum of the corporation's foreign base company income and gross insurance income for the taxable year is less than the lesser of 5 percent of gross income or \$1 million) to a controlled foreign corporation, none of its foreign base company income or its gross insurance income will be treated as passive category income.^{n84.6} The last stated rule does not apply to income that would otherwise be financial services income.

The look-through also applies when a passive foreign investment company is a controlled foreign corporation, and the taxpayer is a United States shareholder in the controlled foreign corporation. In such case, any amount included in gross income under *IRC Section 1293* is treated as income in a separate category to the extent the amount is attributable to

income in that category.ⁿ⁸⁵

The principles of *IRC Section 904(d)(3)* are applied as well to any foreign source interest, rents, and royalties paid by a United States corporation to a related corporation.^{n85.1} For this purpose, a United States corporation and another corporation are considered to be related if one owns, directly and indirectly, stock possessing more than 50 percent of the total voting power of all classes of stock of the other corporation or more than 50 percent of the total value of the other corporation. In addition, a United States corporation and another corporation will be considered to be related if the same United States shareholders own, directly and indirectly, stock possessing more than 50 percent of the total voting power of all classes of stock or more than 50 percent of the value of each corporation.^{n85.2} The constructive ownership rules of *IRC Section 318* apply in determining the extent of stock ownership. (For taxable years beginning before January 1, 2001, the test is 50 percent or more, not more than 50 percent.)

The look-through rules also apply to partnerships. In general, a partner's distributive share of partnership income is characterized as income in a separate category to the extent that the distributive share is a share of income earned or accrued by the partnership in that category.^{n85.3} However, if any limited partner or corporate general partner owns less than 10 percent of the capital and profits interest in a partnership, the partner's distributive share is deemed to be passive income. The exception does not apply if the partner holds the partnership interest in the ordinary course of its trade or business, or to the extent a partner's distributive share of income from the partnership is a share of high withholding interest received or accrued by the partnership, regardless of the partner's level of ownership in the partnership.^{n85.4}

The look-through rules also apply to dividends paid by a noncontrolled Section 902 corporation.^{n85.5} In this case, the dividend is treated as passive category income or general category income in proportion to the ratio of the portion of earnings and profits attributable to such income to the total amount of earnings and profits. Earnings and profits for this purpose are determined under the provisions of *IRC Section 316*.^{n85.6} The allocation of income to passive category income and general category income will also apply to any carryforward under *IRC Section 904(c)* from a taxable year beginning before January 1, 2003.^{n85.7}

[iv] Carryback and Carryover of Excess Taxes Paid. It will be recalled that no deduction for foreign taxes paid is allowed in any year that "the taxpayer chooses to take to any extent the benefits of section 901."ⁿ⁸⁶ Thus, a taxpayer cannot take a foreign credit to the extent of the applicable limitation and then claim a deduction for the balance. But this does not mean that the taxpayer can never reap a benefit from the portion of the foreign taxes not currently creditable; *IRC Section 904(c)* permits a one-year carryback and a ten-year carryforward (in that order) of the excess of the foreign tax paid over the amount which can be taken as a credit under the limitation of *IRC Section 904(a)* (the "unused foreign tax").ⁿ⁸⁷ On the other hand, the mere fact that the unused foreign tax can be carried back and carried forward is no assurance that it will ultimately be allowed as a credit; the unused foreign tax must be added to the foreign tax paid or accrued in the year to which it is carried, and the total then subjected to the *IRC Section 904(a)* limitation. In other words, the amount not currently creditable can be used as a credit in another year only if the taxes paid or accrued in that year are less than the credit ceiling imposed by the limitation.

The carryback and carryover are subject to other conditions:

- (1) The unused foreign tax cannot be used as a deduction in the year to which it is carried; it may be availed of only as a credit in such year;ⁿ⁸⁸ and
- (2) There is a separate carryback and carryover of any unused foreign taxes on income as to which a special limitation is computed under *IRC Section 904(d)*. These excess taxes can be claimed as a credit in another year only if the limitation with respect to *IRC Section 904(d)* separate category income exceeds the foreign taxes paid on such income in that year.

Example:

2-20 Taxation of Securities Transactions § 20.02

A, a calendar year taxpayer using the cash receipts and disbursements method of accounting chooses to claim a credit for foreign taxes paid to country X for each of the years set forth below. In each of the years so that he can carry back and carry forward his unused foreign taxes as follows:ⁿ⁸⁹

	1997	1998	1999	2000	2001
Limitation					
Taxes actually paid to foreign country X	100	100	300	300	350
Unused foreign taxes to be carried back or carried forward	-0-	-0-	150	100	-0-
Excess limitation	-0-	100	-0-	-0-	150
Unused foreign taxes carried back or forward under IRC Section 904(c) from					
1999	-0-	100	-0-	-0-	50
2000	-0-	-0-	-0-	-0-	100

If A had derived *IRC Section 904(d)* separate category income from sources within foreign country X, he would have made a separate, but similar, determination as to the carryback and carryover of the foreign income taxes paid with respect to such income.

IRC Section 904(d)(4)(C)(iv) provides that look-through treatment applies to the carryover of excess foreign taxes from pre-2003 taxable years to post-2002 taxable years to the extent that they are allocable to dividends from a 10/50 corporation. To the extent that a taxpayer has paid, accrued, or deemed paid excess taxes in a separate category for dividends from a 10/50 corporation paid in a pre-2003 taxable year and those excess taxes are carried over to taxable years beginning on or after the corporation's first post-2002 taxable year, the excess taxes are assigned to the appropriate separate category as if the associated dividends had been eligible for look-through treatment when based on a reconstruction of the corporation's pre-2003 earnings.^{n89.1}

Excess taxes that are allocable to dividends from a 10/50 corporation paid in post-2002 taxable years that are attributable to one or more separate categories are carried back to prior taxable years in the same separate categories to which the dividends were assigned.^{n89.2}

A foreign tax credit carryback that reduces or eliminates an underpayment of tax in a prior year does not stop interest from accruing on the underpayment for the period ending with the filing date for the subsequent taxable year in which the foreign taxes were paid or accrued.ⁿ⁹⁰ A similar rule is provided for cases in which a net operating loss carryback or a net capital loss carryback triggers a foreign tax credit carryback.

If the foreign tax credit carryback results in an overpayment of tax, the overpayment is not considered to have been made until the filing date of the subsequent taxable year in which the foreign taxes were paid or accrued.ⁿ⁹¹ A claim for refund resulting from an overpayment attributable to a foreign tax credit carryover must be filed within 10 years from the year in which the taxes were originally paid or accrued.ⁿ⁹²

[v] Minimum Holding Period for Certain Taxes. No credit is allowed for any withholding tax on a dividend paid by a corporation or a regulated investment company if the shareholder has not held the stock for 16 days in the case of common stock and 46 days in the case of preferred stock; the tax disallowed as a credit can be claimed as a deduction.^{n92.1} The disallowance applies both to foreign tax credits for foreign withholding taxes that are paid on the dividend where the dividend-paying stock is held for less than the designated holding period and to indirect credits for

deemed paid taxes where any of the required stock ownership in the chain of ownership is held for less than the specified period.^{n92.2} The disallowance also extends to the situation in which the recipient of the dividend is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property.^{n92.3}

Periods during which the taxpayer is protected from risk of loss generally are not counted toward the holding period requirement; *IRC Section 246(c)(4)* applies to cases governed by *IRC Section 901(k)*.^{n92.4} If a person's holding period is reduced because of the application of the rules of *IRC Section 246(c)(4)* to any contract for the bona fide sale of stock, the determination of whether the holding period is met for purposes of indirect foreign tax credits is made as of the date the person enters into the contract.^{n92.5}

The disallowance rules do not apply to any qualified tax with respect to any security held in the active conduct in a foreign country of a securities business of any person (i) who is registered as a securities broker or dealer under Section 15(a) of the Securities Exchange Act of 1934, (ii) who is registered as a Government securities broker or dealer under Section 15C(a) of that act, or (iii) who is licensed or authorized to conduct securities activities in the foreign country and is subject to bona fide regulation by a securities regulating authority of such country.^{n92.6} A qualified tax is a tax paid to a foreign country other than the one in which the dealer is carrying on the securities business if the dividend to which the tax is attributable is subject to tax by the foreign country in which the business is conducted and that country allows a credit against its net basis tax for the full amount of the tax paid to the other foreign country.^{n92.7}

A second disallowance provision prevents the taking of a credit for any withholding tax on any item of income or gain with respect to any property other than stock if (a) the property is held by the recipient of the item for 15 days or less during the 31-day period beginning on the date that is 15 days before the date on which the right to receive payment of the item arises, or (b) to the extent that the recipient of the item is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property.^{n92.8} The disallowance rule does not apply to any qualified tax with respect to any property held in the active conduct in a foreign country of a business as a dealer in such property.^{n92.9} A person is a dealer with respect to a security if the rules of *IRC Section 901(k)* would apply if the security were stock, and with respect to any other property if the person would come within the scope of *IRC Section 1221(a)(1)*.^{n92.10} A tax is a qualified tax if the tax is paid to a foreign country (other than the one in which the person is a dealer) if the item to which the tax is attributable is subject to taxation on a net basis by the country in which the person does business as a dealer, and that country allows a credit against its net basis tax for the full amount of the tax paid to the other foreign country.ⁿ⁹³ The Service is authorized to prescribe regulations that *IRC Section 901(l)(1)* does not apply to property where its application is not necessary to carry out the purposes of the provision.ⁿ⁹⁴

Every United States person who controls a foreign business entity is required to file an annual return (on Form 5471) setting forth certain information with respect to the entity.ⁿ⁹⁵ A person is in control of a corporation if the person owns stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all shares of all classes of stock of the corporation.ⁿ⁹⁶ If a person is in control of one corporation, the person is deemed to be in control of the second corporation.ⁿ⁹⁷ The attribution rules of *IRC Section 318* are applicable in determining stock ownership, except that (1) the provisions of *IRC Section 318(a)(3)* are not to be applied so as to make a United States person the owner of stock owned by one who is not a United States person, and (2) attribution from a corporation to a shareholder is triggered whenever the shareholder is triggered whenever the shareholder owns 10 percent of the stock of the corporation.ⁿ⁹⁸

A person is in control of a partnership if the person controls directly or indirectly more than a 50-percent interest in the partnership.ⁿ⁹⁹ A 50-percent interest in a partnership is (1) an interest equal to 50 percent of the capital interest, or 50 percent of the profits interest, in the partnership, or (2) to the extent provided in regulations, an interest to which 50 percent of the deductions or losses of the partnership are allocated.ⁿ¹⁰⁰

One penalty for failure to file is a 10-percent reduction in the amount of foreign taxes eligible for credit during the taxable year.ⁿ¹⁰¹ If the failure continues for 90 days or more after notice to the taxpayer by the IRS, the reduction is increased by 5 percent for each three-month period, or fraction thereof, during which the default in filing continues.ⁿ¹⁰² However, the maximum reduction cannot exceed the greater of \$10,000 or the income of the foreign entity for the annual accounting period with respect to which the failure occurs,ⁿ¹⁰³ and, itself, is reduced by the amount of any dollar penalty imposed, as described in the next paragraph.ⁿ¹⁰⁴

A second penalty requires a payment of \$10,000 for each annual accounting period with respect to which a failure to file exists.ⁿ¹⁰⁵ If any such failure continues for more than 90 days after notice of failure is mailed, the taxpayer is subject to an additional penalty of \$10,000 for each 30-day period (or fraction thereof) during which the failure to file continues, the maximum of such additional penalty not to exceed \$50,000.ⁿ¹⁰⁶

FOOTNOTES:

(n1)Footnote 1. See Rev Rul 66-171, 1966-1 CB 181 , and Rev Rul 64-156, 1964-1 CB 139 , applying IRC § 1036 in transactions that also qualified as reorganizations.

(n2)Footnote 2. IRC § 1246(a); see § 20.05[2][a].

(n23)Footnote 15. *IRC § 932(a)*; *Treas Reg § 1.901-1(g)(5)*. The person is treated as a nonresident alien individual. Nonresident alien individuals and foreign corporations are allowed a credit only if the foreign taxes are paid with respect to income effectively connected with the conduct of a trade or business in the US. *IRC §§ 874(c), 882(c)(3), 906(a)*. See § 20.06[2][c].

(n24)Footnote 16. *Treas Reg § 1.901-1(g)(5)*.

(n25)Footnote 17. *IRC § 901(c)*. The President must find (1) that the foreign country does not allow a similar foreign tax credit to citizens of the US residing in the foreign country; (2) that the foreign country, when requested to do so, has not acted to allow such a similar credit; and (3) that it is in the public interest to allow the US foreign tax credit to citizens or subjects of the foreign country who reside in the US only if the foreign country allows a similar credit to US citizens who reside in the foreign country.

The credit is disallowed for all taxable years beginning while a Presidential proclamation denying the credit is in effect.

(n26)Footnote 18. *Treas Reg § 1.901-2(b)*; *Burnet v Chicago Portrait Co*, 285 US 1 (1932) . The Service will not ordinarily rule whether a foreign levy meets the requirement of a creditable tax under *IRC § 901*. *Rev Proc 2007-7, 2007-1 CB 227* .

(n27)Footnote 19. *Treas Reg § 1.901-2(c)*; *Rev Rul 70-228, 1970-1 CB 160* ; *Rev Rul 8, 1953-1 CB 300* . Taxes paid with respect to distributions from corporations electing to be possessions corporations under *IRC § 936* are not treated as foreign taxes eligible for the credit if a dividends received deduction is allowed with respect to the distribution or to the extent that gain or loss is not recognized. *IRC § 901(g)*.

Foreign income, war profits, and excess profits taxes do not include taxes for which a credit is disallowed under *IRC § 901*. *Treas Reg § 1.902-1(a)(7)*.

(n28)Footnote 20. *IRC § 901(i)*.

(n29)Footnote 21. In determining the amount to be credited, a cash basis taxpayer uses the rate of currency exchange on the date of payment. *Rev Rul 73-491, 1973-2 CB 268* . See § 20.02[4][d] for the translation rules

applicable to taxpayers who accrue foreign income taxes.

(n30)Footnote 22. *Treas Reg § 1.901-2(a)*.

(n31)Footnote 23. *Biddle v Commr, 302 US 573 (1938)* .

(n32)Footnote 24. *Rev Rul 68-149, 1968-1 CB 341* .

(n33)Footnote 25. In some cases, the tax or some portion thereof may qualify for a deduction under *IRC § 164*. See eg, *Rev Rul 70-464, 1970-2 CB 152* .

(n34)Footnote 26. *Santa Eulalia Mining Co v Commr, 2 TC 241 (1943)* , *dismissed per curiam 142 F2d 450 (9th Cir 1944)* .

(n35)Footnote 27. *IRC § 903*. The Service will not ordinarily rule whether a foreign levy meets the requirements of a creditable tax under *IRC § 903*. *Rev Proc 2006-7, 2006-1 IRB 242* .

(n36)Footnote 28. *Treas Reg §§ 1.901-2(a), 1.903-1*.

(n37)Footnote 29. The 10 percent stock ownership requirement need be met only at the time the dividend is received. *Treas Reg § 1.902-3(a)(4)*. *IRC § 902(a)* does not contain any indirect ownership provisions that attribute one domestic corporation's stock to another, nor do the consolidated return provisions provide an exception to the ownership requirements contained in *IRC § 902(a)*. *Rev Rul 85-3, 1985-1 CB 222* . The court, in *First Chicago NBD Corp v Commr, 135 F3d 457 (7th Cir 1998)* , agreed with the Service that a group of affiliated corporations that filed a consolidated income tax return could not aggregate the affiliates' stockholdings in a foreign corporation to reach the 10 percent threshold.

In *Rev Rul 71-141, 1971-1 CB 211* , each of two corporations that formed a partnership to acquire 40 percent of the stock of a foreign corporation was treated as the owner of 20 percent of the stock for *IRC § 902(a)* purposes. *IRC § 902(c)(7)* now provides that stock owned, directly or indirectly, by or for a partnership is considered as being owned proportionately and actually by its partners.

The stock on which the dividends are paid may be nonvoting stock. *Rev Rul 79-74, 1979-1 CB 242* . A dividend produced by a transaction treated as a redemption under *IRC § 304* qualifies as a dividend for purposes of the deemed paid tax credit. *Rev Rul 91-5, 1991-1 CB 114* , *modified and amplified by Rev Rul 92-86, 1992-2 CB 69* . See Staffaroni, "The International Boundaries of Section 304," 46 *Tax Lawyer* 125 (1992).

(n38)Footnote 29.1. If a domestic corporation has a calendar year and its foreign subsidiary paying dividends has a later ending fiscal year, the domestic corporation shareholder may claim the deemed paid credit in the calendar year in which the dividends are received. However, the domestic corporation can claim the credit only after its foreign subsidiary has paid or accrued its foreign taxes at the end of its fiscal year. Therefore, the domestic corporation can claim the deemed paid credit on its original return for the year in which the dividend was received when that return is filed after the end of the foreign subsidiary's taxable year. If the domestic corporation's return is filed before the end of the subsidiary's fiscal year, the domestic corporate shareholder can later file an amended return to claim the deemed paid credit for the year in which the dividend was received. *Ltr Rul 9426003* .

(n39)Footnote 29.2. The pool of post-1986 foreign income taxes must be reduced by the amount of taxes attributable to earnings distributed to shareholders ineligible for the deemed paid credit (eg, a foreign shareholder, a US individual shareholder, or a domestic corporate shareholder that owns less than 10 percent of the foreign corporation's voting stock). A reduction in the pool is required as well if a shareholder eligible for the credit chooses to claim a deduction for foreign taxes paid or accrued for the taxable year of distribution or inclusion. *Treas Reg § 1.902-1(a)(8)(i)*.

(n40)Footnote 30. *IRC § 902(c)(1)*.

(n41)Footnote 31. *IRC § 902(c)(2)*.

(n42)Footnote 32. *IRC § 902(c)(3)*.

(n43)Footnote 33. *IRC § 902(a)(1)*.

(n44)Footnote 34. *IRC § 78*.

(n45)Footnote 35. *IRC § 902(c)(6)(A)*.

(n46)Footnote 36. US law controls the determination of earnings and profits for this purpose. *US v Goodyear Tire & Rubber Co*, 493 US 132 (1989). The year-by-year sourcing method required by *IRC § 902(c)(1)* for post-1986 dividends had to be used in determining a domestic parent's deemed-paid foreign tax credit for a pre-1986 dividend that consisted of all of its foreign subsidiary's accumulated profits. *Brunswick Corp & Subs v Commr*, 100 TC 6 (1993).

(n47)Footnote 37. *IRC § 902(c)(6)(B)*.

(n48)Footnote 38. *IRC § 902(b)(1)*.

Ownership by the first foreign corporation must be satisfied only at the time the dividend is received. *Treas Reg § 1.902-1(c)*.

(n49)Footnote 39. *IRC § 902(b)(2)*.

(n50)Footnote 40. *IRC § 902(b)(2)*.

(n51)Footnote 41. *Id.* In order for the deemed-paid tax credit to apply to taxes paid by a fourth-, fifth, or sixth-tier corporation, three requirements must be satisfied. First, the corporation must be a controlled foreign corporation. Second, the US corporation claiming the credit must be a US shareholder with respect to the foreign corporation. Third, the product of the percentage ownership of voting stock at each level from the US corporation down must equal at least 5 percent.

(n52)Footnote 41.1. Taxpayer Relief Act of 1997, § 1120(c)(2).

(n53)Footnote 42. This is also the amount of the corporation's post-1986 undistributed earnings.

(n54)Footnote 43. In the fraction, 150,000/250,000, the numerator is the dividend paid to S Corp., while the denominator is the amount of post-1986 undistributed earnings of T Corp.

(n55)Footnote 44. The amount of dividends entering into the formula is exclusive of the amount of gross-up dividend determined under *IRC § 78*. *IRC § 902(a)*.

(n56)Footnote 45. *IRS Notice 87-54*, 1987-2 CB 363. *IRS Notice 87-54* governs instances in which there is an actual dividend paid in a post-1986 taxable year of a foreign corporation. *IRS Notice 88-70*, 1982-2 CB 369, provides rules concerning the carryforward and carryback of deficits in earnings and profits between pre-1987 and post-1986 taxable years in those situations in which there is a deemed income inclusion occurring in a post-1986 taxable year of a foreign corporation.

Rev Rul 87-72, 1987-2 CB 170, contains rules for determining the amount of the deemed-paid credit with respect to distributions made before the effective date of the Tax Reform Act of 1986 when a deficit in earnings and profits is carried back to taxable years preceding the deficit year.

(n57)Footnote 45.1. *Treas Reg § 1.902-1(b)(4)*.

(n58)Footnote 46. By definition, an accrual basis taxpayer always takes the credit in the year that the taxes accrue.

(n59)Footnote 47. *IRC § 905(a)*; *Treas Reg § 1.905-1(a)*.

(n63)Footnote 51. HR Rep No 179, 68th Cong, 1st Sess 10 (1924). Consistent with this approach, the year that a tax is withheld is the proper year for which to claim a credit. *Lederman v Commr*, 6 TC 991 (1946) .

(n64)Footnote 51.1. *IRC § 986(a)(1)(A)*. The taxpayer can elect that the provision not apply to any foreign taxes if the liability for the taxes is denominated in a currency other than the taxpayer's functional currency. Regulations may prescribe that the election can apply to foreign income taxes attributable to a qualified business unit. *IRC § 986(a)(1)(D)*.

(n65)Footnote 51.2. *IRC § 986(a)(1)(B), (C)*.

(n66)Footnote 51.3. *IRC § 986(a)(2)*.

(n67)Footnote 51.4. *IRC § 986(a)(1)(E)*.

(n68)Footnote 52. *IRC § 905(c)(1)*. The Service can prescribe adjustments to the pools of post-1986 foreign income taxes and the pools of post-1986 undistributed earnings under the deemed paid credit rules of *IRC §§ 902* and *960* in lieu of the redetermination.

If there are no pools to adjust at the time of a foreign tax redetermination, a redetermination of US tax liability is required. This is done by adjusting the pools for the tax years to which the additional taxes relate and redetermining federal tax liability for those years using the adjusted pools. *Ltr Rul 200127011* .

In the case of any tax accrued but not paid, the taxpayer, as a condition precedent to the allowance of a credit, may be required to post a bond conditioned on the payment of any amount of tax found due on the redetermination. *IRC § 905(c)(4)*.

(n69)Footnote 52.1. *IRC § 905(c)(2)(A)*.

(n70)Footnote 52.2. *IRC § 905(c)(2)(B)(i)(I)*.

(n71)Footnote 52.3. *IRC § 905(c)(2)(B)(i)(II)*.

(n72)Footnote 53. *IRC § 905(c)(2)(B)(ii)*. To the extent provided in regulations, the average exchange rate for the period (specified in the regulations) during which the tax or adjustment is paid may be used instead of the exchange rate as of the date of payment. *IRC § 986(a)(3)*.

(n73)Footnote 53.1. A foreign tax redetermination includes (1) a refund of foreign taxes, (2) a difference between the dollar value of the accrued foreign tax and the dollar value of the foreign tax actually paid attributable to differences in units of foreign currency paid and units of foreign currency accrued, or (3) a difference between the dollar value of the accrued foreign tax and the dollar value of the accrued foreign tax actually paid attributable to fluctuations in the value of foreign currency relative to fluctuations in the value of the foreign currency relative to the dollar between the

date of accrual and the date of payment. *Temp Treas Reg § 1.905-3T(c)*.

(n74)Footnote 54. *Temp Treas Reg § 1.905-4T(b)(2)*. The taxpayer notifies the Service by filing Form 1120X or 1040X, and Form 1118 or 1116 (according to the instructions to Form 1118) with the Service Center where the tax return claiming the credit was filed. *Temp Treas Reg § 1.905-4T(b)(1)*.

IRC § 6689 prescribes a penalty of 5% a month, with a maximum of 25%, for failure to notify the Service. However, according to *Temp Treas Reg § 1.905-4T(d)*, a taxpayer has 180 days after publication of an announcement notifying the taxpayer of the availability of forms and instructions to comply with the notification provisions. No announcement has been made as of yet.

(n75)Footnote 55. *IRC § 904(a)*. In the case of an individual, the tax against which the credit is taken is reduced by the sum of nonrefundable personal credits other than the adoption expense credit, the child tax credit, and the credit for elective deferrals and certain IRA contributions. *IRC § 904(h)*. *IRC § 904(h)* does not apply to taxable years beginning during 2000, 2001, 2002, or 2003.

Foreign source taxable income must be reduced by the amount of any net operating loss deduction attributable to foreign operations. *Rev Rul 71-432, 1971-2 CB 270* ; *Rev Rul 69-121, 1969-1 CB 194* .

A loss incurred on the worthlessness of stock in a foreign subsidiary was held allocable against the taxpayer's foreign source income, and not its worldwide income, in *Black & Decker Corp v Commr, TC Memo 1991-557 affd 986 F2d 60 (4th Cir 1993)* . The loss grew out of activity and the use of property in the foreign country.

(n76)Footnote 56. *IRC § 904(b)(1)*.

(n77)Footnote 57. *Carstairs v US, 75 F Supp 683 (ED Pa 1936)* ; *Rev Rul 62-67, 1962-1 CB 128* ; see also *Rev Rul 68-622, 1968-2 CB 298* , applying the limitation to the tax credit allowed to insurance companies under *IRC § 841*. Foreign income taxable in the US, but not in the foreign country, is includable in the numerator and the denominator of the fraction.

(n78)Footnote 58. *Rev Rul 54-15, 1954-1 CB 129* .

(n79)Footnote 59. Although the tax would not be creditable in the year paid, it may be carried back and carried forward pursuant to the provisions of *IRC § 904(c)*. *Rev Rul 72-126, 1972-1 CB 217* .

(n80)Footnote 60. *IRC § 904(b)(2)(A), (3)(A)*.

(n81)Footnote 60.1. *Treas Reg § 1.904(b)-1(a)(1)(ii)(A)*.

(n82)Footnote 60.2. For this purpose, pro rata means based on the relative amounts of capital gain net income from foreign sources in each separate category. *Id.*

(n83)Footnote 61. *IRC § 904(b)(2)(B), (3)(D)*. A capital gain differential is considered to exist for a taxable year only if the taxpayer has taxable income (excluding net capital gain and qualified dividend income) for the taxable year and (i) in the case of a noncorporate taxpayer, tax is imposed on the net capital gain at a reduced rate under *IRC § 1(h)* for the taxable year, or (ii) in the case of a corporation, tax is imposed under *IRC § 1201(a)* on the taxpayer at a rate less than any rate imposed by the taxpayer by *IRC § 11, 511, or 831(a) or (b)*, whichever applies, determined without regard to any increase in tax under *IRC § 11(b)(1)*. *Treas Reg § 1.904(b)-1(b)(2)*.

A noncorporate taxpayer that has a capital gain rate differential for the taxable year and is not subject to the alternative minimum tax for the taxable year can elect not to apply the rate differential adjustments, if the highest rate of tax imposed on the taxpayer's taxable income (excluding net capital gain and any qualified dividend income) for the taxable

year under *IRC § 1* does not exceed the highest rate of tax in effect under *IRC § 1(h)* for the year and the amount of the taxpayer's net capital gain and qualified dividend income from sources outside the US is less than \$20,000. A taxpayer subject to the alternative minimum tax can make the election if all of the above conditions are met and the rate of tax imposed on the taxpayer's alternative minimum taxable income (excluding net capital gain and qualified dividend income) does not exceed 26 percent. *Treas Reg § 1.904(b)-1(b)(3)*.

(n84)Footnote 62. *IRC § 904(b)(3)(E)*.

(n85)Footnote 62.1. *Treas Reg § 1.904(b)-1(a)(1)(ii)(B)*.

(n86)Footnote 62.2. For this purpose, pro rata means based on the relative amounts of capital gain net income from foreign sources in each rate group within the applicable separate category. *Id.*

(n87)Footnote 62.3. *Treas Reg § 1.904(b)-1(c)(1)(i)*. A taxpayer with qualified dividend income must make a similar adjustment, unless the taxpayer is a noncorporate taxpayer and has elected not to apply rate differentials. *Treas Reg § 1.904(b)-1(e)(1), (2)*.

(n88)Footnote 62.4. *Treas Reg § 1.904(b)-1(c)(1)(ii)*.

(n89)Footnote 62.5. *Treas Reg § 1.904(b)-1(d)(1)*. The determination of which capital gains are offset by net capital losses from foreign sources must follow the order prescribed by *Treas Reg § 1.904(b)-1(d)(2)*.

(n90)Footnote 62.6. The election can be made only if all of the taxes for which a credit is allowable to the taxpayer under *IRC § 901* for the taxable year are creditable foreign taxes. *Treas Reg § 1.904(j)-1(a)*. The provision does not apply to estates and trusts. *IRC § 904(k)(3)(D)*.

(n91)Footnote 62.7. *IRC § 904(k)(3)(A)*. The amount of creditable taxes must also be shown on a payee statement furnished to the individual. *IRC § 904(k)(3)(B)*.

(n92)Footnote 63. A foreign corporation is a US-owned foreign corporation if 50 percent or more of the total combined voting power of all classes of stock entitled to vote, or the total value of the stock of the corporation, is held by citizens or residents of the US, domestic corporations, domestic partnerships, or domestic estates or trusts. *IRC §§ 904(h)(6), 7701(a)(30)*. In determining the extent of ownership, stock owned by a foreign corporation, foreign partnership, or foreign estate or trust is deemed to be owned by its shareholders, partners, or beneficiaries, while a person holding an option to purchase stock is treated as the owner of the stock.

The rules for resourcing interest and dividends also apply to a 10/50 corporation that meets the definition of a US-owned foreign corporation. *Temp Treas Reg § 1.904-5T(m)*.

(n93)Footnote 64. See § 20.04[1] for the definition of US shareholder and § 2.07[4][a] for the definition of related person.

In the case of interest treated as foreign-source income under *IRC § 861(a)(1)(A)*, the corporation paying the interest is treated as a US-owned foreign corporation. *IRC § 904(h)(9)(A)*.

(n94)Footnote 65. *IRC § 904(h)(1)-(4)*. The term "dividend" includes any gain treated as ordinary income under *IRC § 1246* or as a dividend under *IRC § 1248*. *IRC § 904(h)(7)*.

In the case of any dividend treated as foreign-source income under *IRC § 861(a)(2)(A)*, the corporation paying the dividend is treated as a US-owned foreign corporation. *IRC § 904(h)(9)(B)*.

(n95)Footnote 66. *IRC § 904(h)(5), (10)*. For this purpose, earnings and profits are determined without any

reduction for interest subject to the recharacterization rules.

(n96)Footnote 67. *IRC § 904(h)(8)*.

(n97)Footnote 67.1. *IRC § 904(g)(1), 2(B)*. The provision also applies for purposes of *IRC § 936*.

An overall domestic loss is any domestic loss to the extent it offsets taxable income from foreign sources for the taxable year or any preceding taxable year because of a carryback. A domestic loss is the amount by which the gross income for the taxable year from United States sources is exceeded by the amount of deductions properly apportioned or allocated thereto (determined without regard to any carryback from a subsequent year). *IRC § 904(g)(2)(A)*.

(n98)Footnote 67.2. *IRC § 904(g)(3)*. The term "income category" means each separate category of income described in *IRC § 904(d)(1)*, discussed in § 20.02[4][e][iii]. *IRC § 904(f)(5)(E)(i)*.

(n99)Footnote 68. The following countries may require participation in, or cooperation with, an international boycott: Bahrain, Kuwait, Lebanon, Libya, Oman, Qatar, Saudi Arabia, Syria, United Arab Emirates, and Republic of Yemen. 69 *Fed Reg* 1616 (Jan 6, 2004) .

(n100)Footnote 69. *IRC § 999(c)(1)*.

(n101)Footnote 70. *IRC § 999(c)(2)*.

(n102)Footnote 71. The countries presently are Cuba, Iran, North Korea, Sudan, and Syria. Rev Rul 2005-3, 2005-1 *CB* 334 .

The denial applies as well to the deemed-paid credit allowed to domestic corporate shareholders of controlled foreign corporations by *IRC § 960*. See § 20.04[2][g].

The credit denial does not preclude a deduction for the taxes. Even if no deduction is taken, the requirement that the amount of any deemed-paid tax credit be treated as a grossed-up dividend is inapplicable. *IRC § 901(j)(3)*.

(n103)Footnote 72. See Rev Rul 92-62, 1992-2 *CB* 193 , for guidance in determining what portion of foreign taxes paid are creditable when a sanction period ends during the taxpayer's taxable year.

The denial extended to the credit allowed by *IRC § 960*.

(n104)Footnote 73. *IRC § 904(f)(2)*.

(n105)Footnote 74. *IRC § 904(f)(2)*. Any foreign expropriation loss for a year prior to Jan 1, 1991 is also not taken into account.

(n106)Footnote 75. The determination as to whether the predominant use of property has been without the US is made by looking at the use made during the three-year period ending on the date of disposition (or during the entire period of ownership if less than three years). *IRC § 904(f)(3)(A)*.

(n107)Footnote 76. *IRC § 904(f)(3)(A)*.

(n108)Footnote 77. *IRC § 904(f)(3)(B)(ii)*.

(n109)Footnote 77.1. *IRC § 904(f)(3)(B)(i)*.

(n110)Footnote 77.2. *IRC § 904(f)(3)(C)*.

(n111)Footnote 77.3. *IRC § 904(f)(3)(D)(i), (ii).*

(n112)Footnote 78. *IRC § 904(f)(3)(D)(iii).*

(n113)Footnote 79. *IRC § 904(f)(3)(D)(iv).*

(n114)Footnote 79.1. *IRC § 904(g)(2)(A).* An overall domestic loss does not include any loss for any taxable year unless the taxpayer chooses to claim a foreign tax credit for the year. *IRC § 904(g)(2)(B).*

(n115)Footnote 79.2. *IRC § 904(g)(2)(A).*

(n116)Footnote 79.3. *IRC § 904(g)(3).*

(n117)Footnote 79.4. The rules of *IRC § 316* apply in determining earnings and profits for these purposes. See § 4.02[1][a] for a discussion of these rules.

As a general rule, for purposes of *IRC § 904*, loss recognized with respect to stock that is allocated to foreign source income must be allocated to the separate category under *IRC § 904(d)* to which gain on a sale of the stock would have been assigned. *Treas Reg § 1.865-2(a)(5)*. There are exceptions for losses on (i) stock with respect to which the taxpayer included a dividend recapture amount (unless the dividends are passive-basket dividends) (*Reg § 1.865-2(b)(1)*); (ii) stock that constitutes inventory (*Reg § 1.865-2(b)(2)*); and (iii) stock in an S corporation (*Reg § 1.865-2(b)(3)*).

IRC § 865(h) provides that a taxpayer may elect to treat gain from the sale of stock of a foreign corporation as foreign source gain if the gain would otherwise be sourced in the US under *IRC § 865*, but would be sourced outside the US under a treaty obligation of the US. If the taxpayer makes the election, the gain is placed in its own separate limitation category for purposes of computing the foreign tax credit limitation under *IRC § 904*. *Ltr Rul 199918047*.

(n118)Footnote 79.5. *IRC § 904(d)(1)(A), (B)*. Tax imposed under the law of a foreign country or possession of the US on an amount that does constitute income under US tax principles is treated as imposed on passive income. *IRC § 904(d)(2)(H)*.

(n119)Footnote 79.6. *IRC § 904(d)(2)(A)(i), (B)(v)*. Passive category income is any income that would be foreign personal holding company income under the Subpart F rules, as well as amounts includable in income under the passive foreign investment company rules. *IRC § 904(d)(2)(B)(i), (ii)*.

(n120)Footnote 79.7. *IRC § 904(d)(2)(A)(ii)*.

(n121)Footnote 80. *IRC § 904(d)(2)(B)*. Passive income does not include rents or royalties that are derived in the active conduct of a trade or business and received from an unrelated person. *Treas Reg § 1.904-4(b)(2)(i)*.

Royalty income received by a domestic corporation from its foreign parent was held to be passive income for purposes of the foreign tax credit in *American Air Liquide v Commr*, 116 TC 60 (2001), *affd in an unpublished opinion* (9th Cir 2002). In so holding, the Tax Court dismissed the contention that the failure to treat the income as general limitation income for purposes of the credit (as is the case when royalty income is received from a controlled foreign corporation) violated Article 24(3) of the US-France Treaty.

The Treasury Department has proposed regulations that will change the result in *American Air Liquide*. Under *Prop Treas Reg § 1.904-4(b)(2)(i)*, royalties paid by a related party are considered active and, thus, general limitation basket income, if a group member also uses the licensed technology in the active conduct of a trade or business. As proposed, the regulation is prospective.

(n122)Footnote 81. *IRC § 904(d)(2)(B)(iii).*

(n123)Footnote 81.1. *Treas Reg § 1.904-4(b)(2)(i).*

(n124)Footnote 82. *IRC § 904(d)(2)(F).* For this purpose, the term "foreign income taxes" includes any income, war profits, or excess profits tax imposed by any foreign country or possession of the US.

(n125)Footnote 82.1. *Treas Reg § 1.904-4(c)(1).*

(n126)Footnote 82.2. *IRC § 904(d)(2)(G).*

(n127)Footnote 82.3. *IRC § 904(d)(2)(I), 954(d)(3).* Ownership of stock possessing 50 percent or more of the total voting power of all classes of stock entitled to vote or of the total value of the stock of the corporation constitutes control of the corporation.

(n128)Footnote 83. *IRC § 904(d)(2)(D).* *Treas Reg § 1.904-4(e)(2)* contains a list of items of active financing income.

(n129)Footnote 84. *IRC § 904(d)(2)(C).* A financial services group is any affiliated group that is predominantly engaged in the active conduct of a banking, insurance, financing, or similar business. In determining whether a group is so engaged, there is taken into account only the income of members of the group that are US corporations or controlled foreign corporations in which the US corporations own, directly or indirectly, at least 80% of the total voting power and value of the stock.

(n130)Footnote 84.1. *IRC § 904(d)(2)(E)(i).* A controlled foreign corporation will not be treated as a noncontrolled § 902 corporation with respect to any distributions out of its earnings and profits for periods during which it was a controlled foreign corporation.

(n131)Footnote 84.2. *IRC § 904(d)(2)(E)(ii).*

(n132)Footnote 84.3. *IRC § 904(d)(3)(A), (C).* In determining whether any income of a controlled foreign corporation is passive category income, the exclusion of high-taxed income does not apply. *IRC § 904(d)(3)(F)(i).* Any amount of the taxpayer that is treated as passive category income under *IRC § 904(d)(3)(F)* is so treated notwithstanding any provision of *IRC § 904(d)(2)*, except that the determination of whether any amount is high-taxed income is made after the application of *IRC § 904(d)(3)(F)*. *IRC § 904(d)(3)(F)(ii).*

(n133)Footnote 84.4. *IRC § 904(d)(3)(D).* For purposes of *IRC § 904(d)(3)(G)* provides that the term "dividend" includes any amount included in gross income under *IRC § 951(a)(1)(B)* (see § 20.04[2][a]). Any amount included in gross income as a gross-up dividend under *IRC § 78* to the extent attributable to amounts included in gross income in *IRC § 951(a)(1)(A)* is not treated as a dividend but is included in gross income under *IRC § 951(a)(1)(A)*.

(n134)Footnote 84.5. *IRC § 904(d)(3)(B).*

(n135)Footnote 84.6. *IRC § 904(d)(3)(E).*

(n136)Footnote 85. *IRC § 904(d)(3)(H).*

(n137)Footnote 85.1. *Treas Reg § 1.904-5(g).*

(n138)Footnote 85.2. One partnership is considered as owning more than 50 percent of the value of another partnership if the first owns more than 50 percent of the capital and profits interests in the second. *Treas Reg § 1.904-5(h)(4).*

Two look-through entities are related if the same US shareholders own, directly or indirectly, stock possessing more than 50 percent of the total voting power of all classes of stock (in the case of a corporation) or more than 50 percent of the total value of each look-through entity. *Treas Reg § 1.904-5(i) ((1))*.

(n139)Footnote 85.3. *Treas Reg § 1.904-5(h)(2)(i)*.

(n140)Footnote 85.4. *Treas Reg §§ 1.904-5(h)(2)(ii), 1.904-5(h)(4)*. A partnership interest will be considered to be held in the ordinary course of a partner's active trade or business if the partner (or a member of the partner's affiliated group of corporations) engages (other than through a less than 10 percent interest in a partnership) in the same or related trade or business as the partnership.

(n141)Footnote 85.5. *IRC § 904(d)(4)(A)*. In the case of a distribution from a controlled foreign corporation to a US shareholder, similar rules apply in determining which earnings and profits of the controlled foreign corporation that are attributable to dividends received from a noncontrolled Section 902 corporation can be treated as income in a separate category. *IRC § 904(d)(4)(B)*.

(n142)Footnote 85.6. *IRC § 904(d)(4)(C)(i)*. If the Service determines that the allocation to either passive category income or general category income has not been substantiated, the dividend is treated as passive category income. *IRC § 904(d)(4)(C)(ii)*.

(n143)Footnote 85.7. *IRC § 904(d)(4)(C)(iv)*.

(n144)Footnote 86. *IRC § 275(a)(4)* (emphasis supplied).

(n145)Footnote 87. Prior to enactment of the American Jobs Creation Act of 2004, the carryback period was two years, while the carryover period was five years. The new carryback rule applies to excess foreign taxes arising in taxable years beginning after the date of enactment of the Act. The carryover rules apply to excess foreign taxes that may be carried to any taxable year ending after the date of enactment.

A wholly-owned subsidiary that had been unable to claim its entire foreign tax credit was liquidated by its parent under *IRC § 332*. In the year of liquidation, the parent had taxable income from foreign sources attributable to the continuation of the subsidiary's business. The foreign taxes paid were less than the limitation prescribed by *IRC § 904(a)*, allowing the parent to carry over and use the uncredited foreign taxes of the subsidiary. *Rev Rul 72-453, 1972-2 CB 439*.

An excess foreign tax that is carried forward cannot be claimed as a credit in a year in which the taxpayer does not have foreign source income. *Smith v Commr, TC Memo 1984-509*.

(n146)Footnote 88. However, the excess foreign tax may be used as a credit in such other year even though the taxpayer decides to deduct the taxes actually paid or accrued during that year. In such case, the amount of the limitation is determined as though the taxpayer had chosen to claim a credit for that year. *Treas Reg § 1.904-2(d)*.

(n147)Footnote 89. The carryback and carryover of unused foreign taxes by a husband and wife filing a joint return for all years is computed on the basis of the joint unused foreign taxes and limitations. *Treas Reg § 1.904-3(c)*.

(n148)Footnote 89.1. *Temp Treas Reg § 1.904-2T(h)(1)*. Any excess taxes carried over from pre-2003 taxable years to post-2002 taxable years that would otherwise be assigned to the passive category are assigned to the general limitation category.

The reconstruction of earnings is accomplished in accordance with *Temp Treas Reg § 1.904-7T(f)*.

(n149)Footnote 89.2. *Temp Treas Reg § 1.904-2T(h)(2)*.

(n150)Footnote 90. *IRC § 6601(d)(2)*.

(n151)Footnote 91. *IRC § 6611(f)(2)*. Thus, interest accrues on the deficiency expunged by the later foreign tax carryback until the due date of the return for the taxable year from which the carryback arises. *Hallmark Cards, Inc v Commr*, 111 TC 266 (1998) ; *Intel Corp v Commr*, 111 TC 90 (1998) .

(n152)Footnote 92. *IRC § 6511(d)(3)(A)*.

The Court of Claims has taken the position that the 10-year period of limitations begins to run on the date prescribed by law for filing the return for the year for which a refund is sought. *Ampex Corp v US*, 620 F2d 853 (Ct Cl 1980) . The Sixth Circuit has ruled that the period runs from the due date for filing the return for the year from which the excess foreign taxes are carried. *Chrysler Corp v Commr*, 436 F3d 644 (6th Cir 2006) .

(n153)Footnote 92.1. *IRC § 901(k)(1)(A)(i), (3), (7)*. A withholding tax includes any tax determined on a gross basis, but does not include any tax that is in the nature of a prepayment of a tax imposed on a net basis. *IRC § 901(k)(1)(B)*.

IRC § 78 does not apply to the tax that is not allowed as a credit. *IRC § 901(k)(7)*. Therefore, the amount of the tax is not grossed up and included in income.

The disallowance rule applies to dividends received or accrued after September 4, 1997.

(n154)Footnote 92.2. *IRC § 901(k)(2)*.

(n155)Footnote 92.3. *IRC § 901(k)(1)(A)(ii)*.

(n156)Footnote 92.4. *IRC § 901(k)(5)*. The rules of *IRC § 246(c)(3)* regarding the determination of the holding period also apply.

(n157)Footnote 92.5. *IRC § 901(k)(6)*.

(n158)Footnote 92.6. *IRC § 901(k)(4)(A)*.

(n159)Footnote 92.7. *IRC § 901(k)(4)(B)*.

(n160)Footnote 92.8. *IRC § 901(l)(1)*.

(n161)Footnote 92.9. *IRC § 901(l)(2)(A)*.

(n162)Footnote 92.10. *IRC § 901(l)(2)(C)*.

(n163)Footnote 93. *IRC § 901(l)(2)(B)*.

(n164)Footnote 94. *IRC § 901(l)(3)*. Pursuant to this authority, the Service issued *Notice 2005-90, 2005-2 CB 1163* , in which it announced that it had been determined that the application of *IRC § 901(l)(1)* to foreign withholding taxes imposed on payments in a back-to-back computer program licensing arrangement in the ordinary course of the licensor's and licensee's respective trades or businesses is not necessary to carry out the purposes of *IRC § 901(l)*. Taxpayers can rely on the guidance in *Notice 2005-90* until regulations incorporating the guidance are issued.

(n165)Footnote 95. *IRC § 6038(a)*. A "United States person" means a citizen or resident of the US, a domestic corporation or partnership, and any estate or trust other than one, the income of which, from sources without the US which is not effectively connected with a trade or business within the US, is not includable in gross income. *IRC § 7701(a)(30)*.

The term "foreign business entity" means a foreign corporation or foreign partnership. *IRC § 6038(e)(1)*.

US persons owning at least 10 percent of a controlled foreign corporation or controlled foreign partnership may be required to furnish the designated information. *IRC § 6038(a)(4), (5)*.

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.03

§ 20.03 Tax Consequences of Investments in Foreign Securities by United States Citizens and Residents--Controlled Foreign Corporations

Prior to 1962, no United States tax was imposed with respect to the foreign source earnings of a foreign corporation controlled by American shareholders until dividends paid by the corporation were received by its shareholders. This was subject to only one exception--when the foreign corporation was a foreign personal holding company.

In 1961, President Kennedy questioned the desirability of providing tax deferral with respect to the earnings of corporations controlled by American shareholders. In his words:

"The undesirability of continuing deferral is underscored where deferral has served as a shelter for tax escape through the unjustifiable use of tax havens such as Switzerland. Recently more and more enterprises organized abroad by American firms have arranged their corporate structures ... so as to exploit the multiplicity of foreign tax systems and international agreements in order to reduce sharply or eliminate completely their tax liabilities both at home and abroad. ...

"If we are seeking to curb tax havens, if we recognize that the stimulus of tax deferral is no longer needed in the developed countries ... we can no longer afford existing tax treatment of foreign income."n1

After recommending that tax deferral remain in effect for income from investment in developing economies, the President continued:

"On the other hand, I recommend elimination of the tax haven device anywhere in the world, even in the underdeveloped countries, through the elimination of tax deferral privileges for those forms of activities, such as trading, licensing, insurance, and others, that typically seek out tax haven methods of operation. There is no valid reason to permit their remaining untaxed regardless of the country in which they are located."n2

The Congressional response--the enactment of "Subpart F"--was less sweeping. Tax deferral was eliminated only with respect to tax-haven operations by controlled foreign corporations. To achieve this, the United States shareholders of

foreign corporations are taxed on their pro rata share of certain classes of income whether distributed to them or not.ⁿ³ A discussion of the provisions of Subpart F follows. In this treatment, no consideration is given to the special rules provided for corporations which derive income from the insurance of United States risks, or for corporations organized in Puerto Rico or possessions of the United States.ⁿ⁴

[1] Controlled Foreign Corporation Defined

A foreign corporation becomes a controlled corporation within the purview of Subpart F when 50 percent or more of the total combined voting power of all classes of voting stock, or of the total value of the stock of the corporation, is owned by United States shareholders on any day during the corporation's taxable year.ⁿ¹ The term "United States shareholder" is defined as any United States person--a citizen or resident of the United States, a domestic corporation, a domestic partnership, or any estate or trust other than a foreign estate or trust--owning 10 percent or more of the total combined voting power of the corporation.ⁿ² Thus, a dual test is imposed with respect to stock ownership. United States persons must own at least 50 percent of the voting power or value, but stock owned by a United States person is not counted unless the person owns at least 10 percent of the voting power. In other words, there is little likelihood that a foreign corporation will be classified as a controlled foreign corporation if its stock is widely held by unrelated persons.

Generally, the determination as to whether United States shareholders own 50 percent or more of the total combined voting power of all classes of stock entitled to vote is made in light of all of the facts and circumstances of the case.ⁿ³ However, the United States shareholders will automatically be deemed to own the requisite percentage of total combined voting power whenever:

- (1) they have the power to elect, appoint, or replace a majority of the corporation's board of directors (or, if it does not have a board of directors, then a majority of the comparable governing board);
- (2) they can elect exactly one-half of the members of the governing body of the corporation and any person or persons elected or designated by such shareholders have the power either to cast a vote deciding an evenly divided vote of the body or, for the duration of any deadlock which may arise, to exercise the powers ordinarily exercised by the body; or
- (3) the powers ordinarily exercised by the board of directors of a domestic corporation are exercised by a person whom they can elect, appoint, or replace.ⁿ⁴

The crucial factor is the reality of voting power, not mere ownership of voting stock. Nominal ownership of voting stock will be disregarded if the shareholder has agreed not to vote his stock or to vote it only in a specified manner; the determination as to voting power will be made on the basis of the agreement.ⁿ⁵ Any arrangement to shift formal voting power away from United States shareholders will not be given effect if, in fact, voting power is retained.ⁿ⁶ In addition, record ownership will be disregarded if (a) there is a separate class of stock with percentage voting power greater than its share of earnings, (b) the holders of the separate class do not exercise their voting power independently, or fail to exercise their rights, and (c) a principal purpose of the arrangement is to avoid classification as a controlled foreign corporation.ⁿ⁷

Indirect and constructive ownership of stock must be taken into account in computing the extent of a United States person's voting power in a foreign corporation. The indirect ownership rule is prescribed by *IRC Section 958(a)(2)*; stock owned by a foreign corporation, foreign partnership, foreign estate, or foreign trust is considered as being owned proportionately by its shareholders, partners, or beneficiaries. The constructive ownership rules are those contained in *IRC Section 318(a)*,ⁿ⁸ with the following modifications:

- (1) a citizen or resident alien does not constructively own the stock owned by any family member who is a non-resident alien;

(2) for the purpose of applying *IRC Section 318(a)(2)* (attribution from corporations, partnerships, estates, or trusts), a partnership, estate, trust, or corporation owning more than 50 percent of the combined voting power of a corporation is considered as owning all of the stock of the corporation;

(3) stock owned by a corporation will be attributed proportionately to any shareholder owning 10 percent or more of its stock; and

(4) *IRC Section 318(a)(3)* will not be applied to make a domestic corporation, domestic partnership, or nonforeign estate or trust the constructive owner of stock owned by one who is not a United States person.ⁿ⁹

The following example illustrates some of the foregoing principles:

Example:

United States citizen *A* owns 5 percent of the one class of stock in domestic corporation *X*, which owns 60 percent of the one class of stock in foreign corporation *Y*, which, in turn, owns 75 percent of the one class of stock in foreign corporation *Z*. *A*'s father, *F*, a nonresident alien, owns the balance of the stock in foreign corporation *Z*. By virtue of the indirect ownership rule of *IRC Section 958(a)(2)*, corporation *X* is treated as the owner of 45 percent (60 percent of 75 percent) of the stock in corporation *Z*. The indirect ownership rule cannot be applied to make *A* the owner of any of the *Z* stock; attribution under *IRC Section 958(a)(2)* ends with the first United States person in the chain of ownership running from the foreign entity.ⁿ¹⁰ If the indirect ownership rule were the only one applicable, foreign corporation *Z* would not be a controlled foreign corporation since United States shareholders do not own more than 50 percent of the combined voting power of the corporation. However, the constructive ownership rules also apply to make corporation *X* the owner of 60 percent of the *Z* stock. (Corporation *Y* owns more than 50 percent of the stock in corporation *Z*, causing it to be treated as the owner of 100 percent of the *Z* stock; corporation *X* owns 60 percent of that 100 percent.) And since the rule which imputes the greatest degree of stock ownership controls for any one determination,ⁿ¹¹ a United States person owns more than 50 percent of the voting power in foreign corporation *Z*, making it a controlled foreign corporation. The attribution rules cannot be applied to make *A* a United States shareholder. His ownership of less than 10 percent of the stock in corporation *X* precludes attribution from entity to shareholder; his father's status--that of a nonresident alien--prevents application of the family attribution rule.

[2] Effect on the Shareholder

[a] Inclusion in Gross Income of Certain Undistributed Income of the Corporation. *IRC Section 951(a)* requires every United States shareholder who owns stock in a controlled foreign corporation on the last day of its taxable year (or on the last day in the year on which it was a controlled foreign corporation) to report the shareholder's pro rata share of (1) the corporation's Subpart F income,ⁿ¹ (2) the corporation's previously excluded Subpart F income withdrawn from investment in less developed countries (determined under *IRC Section 955(a)(3)* as in effect before the enactment of the Tax Reduction Act of 1975), (3) the corporation's previously excluded Subpart F income withdrawn from foreign base shipping companies for such year (determined under *IRC Section 955(a)(3)*,^{n1.1} and (4) the amount determined under *IRC Section 956* with respect to the shareholder for the taxable year (but only to the extent not excluded from income under *IRC Section 959(a)(2)*).ⁿ² (The foreign trade income of a foreign sales corporation and any deductions apportioned or allocated to such income are not taken into account under Subpart F).ⁿ³ The amount includable is computed by reference only to stock owned directly or indirectly (through foreign entities); the shareholder need not include any amounts attributable to stock constructively owned, even though such stock is taken into account in determining whether the shareholder is a United States shareholder and whether the corporation is a controlled foreign corporation.ⁿ⁴ If controlled foreign corporation status did not exist for the entire year, a further

proration is required to reflect that fact. But no inclusion in gross income is required unless the corporation was a controlled foreign corporation for an uninterrupted period of at least thirty days during the taxable year.

If a controlled foreign corporation has only one class of stock outstanding during the taxable year, each United States shareholder's pro rata share of the corporation's Subpart F income or withdrawal for the taxable year is determined by allocating the corporation's earnings and profits on a per share basis.^{n4.1} If the corporation has more than one class of stock outstanding, then, generally, the Subpart F income or withdrawal is allocated to the multiple classes of stock by reference to the distributions that would be made to each class if the corporation's earnings and profits for the year were distributed on the last day of the corporation's taxable year (the hypothetical distribution).^{n4.2} Where, however, the allocation of the amount of the corporation's earnings and profits between multiple classes of stock depends on the exercise of discretion by the corporation's board of directors or similar governing body, earnings and profits are allocated to classes of shares with discretionary rights by reference to the relative values of those classes at the time of the hypothetical distribution.^{n4.3} No amount will be considered as distributed as part of the hypothetical distribution with respect to any class of stock to the extent that a distribution of the amount would constitute a distribution in redemption of stock (even if the distribution would be treated as a dividend), a distribution in liquidation, or a return of capital.^{n4.4}

A restriction or other limitation on distributions or earnings and profits by the controlled foreign corporation is not taken into account in determining the amount of earnings and profits allocated to a class of stock of the corporation or the amount of the United States shareholder's pro rata share of the corporation's Subpart F income or withdrawal for the taxable year.^{n4.5} Types of restrictions covered by the foregoing rule include (a) an arrangement that restricts the ability of the corporation to pay dividends on a class of stock owned by United States shareholders until a condition or conditions are satisfied (as until another class of stock is redeemed), (b) a loan agreement entered into by the corporation that restricts or otherwise affects the ability to make distributions on its stock until certain requirements are satisfied, or (c) an arrangement that conditions the ability of the corporation to pay dividends to its shareholders on the financial condition of the corporation.^{n4.6}

If a controlled foreign corporation has more than one class of stock outstanding and the corporation has earnings and profits and Subpart F income for a taxable year attributable to a redemption by a subsidiary or affiliated corporation as described in *IRC Section 304*, and the transaction is part of a plan a principal purpose of which is the avoidance of federal income taxation, the amount of earnings and profits allocated to any one class of stock is that amount that bears the same ratio to the remainder of the earnings and profits as the value of all shares of such class of stock, determined on the hypothetical distribution date, bears to the total value of all shares of all classes of stock of the corporation, determined on that date.^{n4.7}

If a controlled foreign corporation has one or more classes of preferred stock with cumulative dividend rights, the stock is considered as stock with discretionary distribution rights for purposes of the allocation of earnings and profits.^{n4.8} As a result, *Regulation Section 1.951-1(e)(3)(ii)* will apply for purposes of allocating earnings and profits to the stock, except that earnings and profits must first be allocated to the stock under the provisions of *Regulation Section 1.951-1(e)(3)(i)* to the extent of any dividends paid with respect to the stock during the taxable year.^{n4.9} Additional earnings and profits will be allocated to the stock only in an amount equal to the excess (if any) of the amount allocated with respect to dividends paid during the year.^{n4.10} However, if a class of redeemable preferred stock with cumulative dividend rights has a mandatory redemption date, and all dividend arrearages with respect to the stock compound at least annually at a rate not lower than the applicable federal rate that applies on the date the stock is issued for the term from the issue date to the mandatory redemption rate, based on a comparable compounding assumption, the stock is not considered stock with discretionary distribution rights for purposes of the allocation of earnings and profits.^{n4.11}

IRC Section 951 coordinates its provisions with those pertaining to passive foreign investment companies. Income that would be includable both under the controlled foreign corporation rules and *IRC Section 1293* (relating to current taxation of income from certain passive foreign investment companies) is includable only under *IRC Section 951*.ⁿ⁵

[b] The Includable Income--Subpart F Income.

As defined by *IRC Section 952*, a controlled foreign corporation's Subpart F income is the sum of its insurance income,ⁿ⁶ an amount equal to the product of the income of the corporation (other than income attributable to earnings and profits of the corporation otherwise includable in the income of a U.S. person under *IRC Section 951* and income from U.S. sources effectively connected with a trade or business conducted by the corporation in the United States) multiplied by the international boycott factor,ⁿ⁷ the amount of any illegal kickbacks or bribes paid by or on behalf of the corporation directly or indirectly to an official, employee, or agent of a government, its foreign base company income, and any income derived from any country during which *IRC Section 901(k)* (discussed in § 20.02[4][e][i]) applies to such country, but does not include any item of income from sources within the United States which is effectively connected with the conduct by the corporation of a trade or business within the United States unless such item is exempt from taxation or subject to a reduced rate of tax under a treaty obligation of the United States.ⁿ⁸ However, the amount of Subpart F income that may be taxed in any given year is limited to the earnings and profits of the controlled foreign corporation for such year.ⁿ⁹ However, if Subpart F income is reduced by reason of the last-stated rule, any excess of earnings and profits for any subsequent taxable year over the Subpart F income of the corporation for the year is recharacterized as Subpart F income.ⁿ¹⁰

The amount included in the gross income of any United States shareholder for any taxable year, and attributable to a qualified activity is reduced by the amount of the shareholder's pro rata share of any qualified deficit--a deficit in earnings and profits of the controlled foreign corporation for any prior taxable year that began after December 31, 1986 (in which the corporation was a controlled foreign corporation)--but only to the extent the deficit is attributable to the same qualified activity giving rise to the income being offset, and has not previously been taken into account.ⁿ¹¹ A qualified activity is defined as one giving rise to (1) foreign base company oil income, (2) foreign base company sales income, (3) foreign base company services income, (4) in the case of a controlled foreign corporation predominantly engaged in the active conduct of an insurance business in the taxable year and in the prior taxable year in which the deficit arose, insurance income or foreign personal holding company income, and (5) in the case of a controlled foreign corporation predominantly engaged in the active conduct of a banking, financing, or similar business in the taxable year and in the prior taxable year in which the deficit arose, foreign personal holding company income.

A controlled foreign corporation can elect to reduce the amount of its Subpart F income for any taxable year that is attributable to any qualified activity by the amount of any deficit in earnings and profits of a qualified chain member for a taxable year ending with (or within) the taxable year of the controlled foreign corporation to the extent the deficit is attributable to the activity. To the extent the deficit reduces Subpart F income, the deficit is not again taken into account under *IRC Section 952(c)(1)(B)*.ⁿ¹² A qualified chain member is a corporation organized under the laws of the same foreign country as the controlled foreign corporation if at all times during the taxable year in which the deficit arose (a) all of its stock (other than directors' qualifying shares) is owned (directly or indirectly) by the controlled foreign corporation, or (b) it owns (directly or indirectly) all of the stock of the controlled foreign corporation (other than directors' qualifying shares).

[i] Foreign Base Company Income. The gross foreign base company income component of Subpart F income consists of four items, namely, foreign personal holding company income, foreign base company sales income, foreign base company services income, and foreign base company oil related income.ⁿ¹³ Any interest that is paid or accrued by the controlled foreign corporation to any United States shareholder (or to any controlled foreign corporation related to the shareholder) must first be allocated to foreign personal holding company income that is passive income.ⁿ¹⁴

Adjusted gross foreign base company income is computed using *de minimis* and full inclusion tests. Under the *de minimis* test, adjusted gross foreign base company income is treated as being equal to zero if the sum of the gross foreign base company income and gross insurance income of the controlled foreign corporation is less than the lesser of 5 percent of gross income or \$1 million.ⁿ¹⁵ Even if the *de minimis* test is otherwise satisfied, the adjusted gross foreign base company income of a controlled foreign corporation always includes income from trade or service receivables

acquired from a related person, income from loans made to a person to acquire inventory from a related person or for the performance of services by a related person, and portfolio interest.ⁿ¹⁶

An anti-abuse rule requires that the *de minimis* test be applied by aggregating the income of two or more controlled foreign corporations if a principal purpose for separately organizing, acquiring, or maintaining multiple corporations is to prevent income from being treated as foreign base company income under the *de minimis* test; a purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).ⁿ¹⁷ Two or more controlled foreign corporations are presumed to have been organized, acquired, or maintained to prevent income from being treated as foreign base company income or insurance income under the *de minimis* test if the corporations are related parties and one of the following situations exists:ⁿ¹⁸

- (1) The activities carried on by the controlled foreign corporations, or the assets used in those activities, are substantially the same activities that were previously carried on, or assets that were previously held, by a single controlled foreign corporation. Further, the United States shareholders of the controlled foreign corporations or related persons are substantially the same as the United States shareholders of the one controlled foreign corporation in a prior taxable year.ⁿ¹⁹
- (2) The controlled foreign corporations carry on a business, financial operation, or venture as partners directly or indirectly in a partnership that is a related person with respect to each of the controlled foreign corporation.
- (3) The activities carried on by the controlled foreign corporations would constitute a single branch operation if carried on by a United States person.^{n19.1}

Under the full inclusion test, if the sum of the gross foreign base company income and the gross insurance income for the taxable year exceeds 70 percent of the gross income of the corporation, adjusted gross foreign base company income consists of all gross income of the corporation other than gross insurance income, while adjusted gross insurance income consists of all gross insurance income.^{n19.2} In either case, gross income does not include income derived from United States sources effectively connected with the conduct of a United States trade or business, unless the income is exempt from tax (or taxed at a reduced rate) by treaty.^{n19.3}

The gross income included in adjusted gross foreign base company income of a controlled foreign corporation generally retains its character as foreign personal holding company income, foreign base company sales income, foreign base company services income, foreign base company shipping income, or foreign base company oil income.^{n19.4} However, gross income included in adjusted gross foreign base company income because of the full inclusion test is termed full inclusion foreign base company income and constitutes a separate category of adjusted foreign base company income for purposes of allocating and apportioning deductions allowed in computing net foreign base company income.^{n19.5}

Net foreign base company income is computed by reducing each constituent item of foreign base company income by deductions properly allocable to such item.^{n19.6} If, after such reduction, the amount of each category of foreign base company income or foreign personal holding company income is less than zero, the loss in that category cannot reduce any other category of foreign base company income or foreign personal holding company income except by operation of the earnings and profits limitation of *IRC Section 952(c)(1)*.^{n19.7}

Foreign base company income does not include any item of income received by a controlled foreign corporation if the taxpayer establishes to the satisfaction of the Service that such income was subject to an effective rate of foreign income tax greater than 90 percent of the maximum rate imposed on corporations by *IRC Section 11*.ⁿ²⁰ The preceding rule does not apply to foreign base company oil related income or portfolio interest.

Adjusted net foreign base company income equals the net foreign base company income of a controlled foreign

corporation, reduced by any net item of such income that qualifies for the high tax exception.^{n20.1} A net item of income qualifies for the high tax exception only if (1) an election is made to exclude the income from the computation of Subpart F income, and (2) it is established that the net item of income was subject to foreign income taxes imposed by a foreign country or countries at an effective rate that is greater than 90 percent of the maximum rate of tax specified in *IRC Section 11* for the taxable year of the controlled foreign corporation.^{n20.2}

The effective rate at which taxes are imposed on a net item of income is (a) the United States dollar amount of foreign income taxes paid or accrued with respect to the net item of income divided by (b) the United States dollar amount of the net item of foreign base company income, increased by the amount of such foreign taxes.^{n20.3} The amount of foreign taxes accrued with respect to a net item of income (other than foreign personal holding company income that is passive) for purposes of the high tax exception is the United States dollar amount of foreign income taxes that would be deemed paid under *IRC Section 960* with respect to that item if the item were included in the gross income of a United States shareholder under *IRC Section 951(a)(1)(A)* (determined, in the case of an individual, as if an election under *IRC Section 962* to be taxed at corporate rates, has been made).ⁿ²¹ The amount of income taxes paid or accrued with respect to a net item of foreign personal holding company income that is passive is the United States dollar amount of foreign income taxes deemed paid under *IRC Section 960* and that would be taken into account in determining the foreign tax credit limitation with respect to high taxed income.ⁿ²²

[ii] Foreign Personal Holding Company Income. Foreign personal holding company income for Subpart F purposes is defined as the portion of gross income that consists of (1) dividends, interest, royalties, rents, and annuities,ⁿ²³ (2) the excess of gains over losses from the sale or exchange of property that gives rise to income described in (1), that is an interest in a trust, partnership, or REMIC, or that does not give rise to any income, (3) the excess of gains over losses from transactions (including futures, forward and similar transactions) in commodities, (4) the excess of foreign currency gains over foreign currency losses attributable to an *IRC Section 988* transaction (other than one directly related to the business needs of the controlled foreign corporation), (5) any income equivalent to interest, including income from commitment fees (or similar amounts) for loans actually made, (6) income from notional principal contracts, (7) payments in lieu of dividends made pursuant to an agreement to which *IRC Section 1058* applies (equity securities lending transactions, and (8) amounts received under a personal service contract, if some person other than the corporation has the right to designate the individual who is to perform the services or the individual who is to perform the services is designated in the contract, and amounts received from the sale or other disposition of the personal service contract.ⁿ²⁴ Gains and losses from commodities transactions are not included here if (1) they arise out of commodity hedging transactions, (2) are active business gains or losses from the sale of commodities, but only if substantially all of the controlled foreign corporation's business is as an active producer, processor, merchant or handler of commodities, or (3) are foreign currency gains or losses (as defined in *IRC Section 988(b)*) attributable to any Section 988 transaction.ⁿ²⁵ In determining the foreign personal holding company income of a regular dealer in certain property,ⁿ²⁶ forward contracts, option contracts, notional principal contracts, or similar financial instruments (including instruments referenced to commodities), there is not taken into account (i) any item of income, gain, deduction, or loss from any transaction (including hedging transaction and transactions involving physical settlement) entered into in the ordinary course of the dealer's trade or business, and (ii) if the dealer is a dealer in securities, any interest or dividend or equivalent amount from any transaction (including any hedging transaction or transaction described in *IRC Section 956(c)(2)(J)*)ⁿ²⁷ entered into in the ordinary course of the dealer's trade or business as a dealer in securities, but only if the income from the transaction is attributable to activities of the dealer in the country under the laws of which the dealer is created or organized (or in the case of a qualified business unit is attributable to activities of the unit in the country in which the unit both maintains its principal office and conducts substantial business activity).ⁿ²⁸ Foreign currency gains or losses are not taken into account if they are directly related to the business needs of the controlled foreign corporation.ⁿ²⁹

Foreign personal holding company income does not include rents or royalties derived in the active conduct of a trade or business and received from a person other than a related person,ⁿ³⁰ or any export financing interest that is derived in the conduct of a banking business.ⁿ³¹ It also does not include any (1) dividendsⁿ³² and interest received from a related

person that (a) is organized under the laws of the same foreign country as the controlled foreign corporation, and (b) has a substantial part of its assets used in its trade or business in that foreign country, and (2) rents and royalties received from a related person for the use of, or privilege of using, property within the country in which the controlled foreign corporation is organized.ⁿ³³ To determine the extent to which a controlled foreign corporation's distributive share of an item of partnership income is foreign personal holding company income, the exceptions contained in *IRC Section 954(c)* that are based on whether the controlled foreign corporation is engaged in the active conduct of a trade or business will apply only if the exception would have applied if the controlled foreign corporation had earned the income directly, taking into account only the activities of, and property owned by, the partnership.ⁿ³⁴

If a controlled foreign corporation sells an interest in a partnership with respect to which the corporation is a 25-percent owner, the corporation is treated for purposes of *IRC Section 954(c)* as selling the proportionate share of the assets of the partnership attributable to the interest.ⁿ³⁵ A controlled foreign corporation is a 25-percent owner when it owns directly 25 percent or more of the capital or profits interest in a partnership.ⁿ³⁶ If a controlled foreign corporation is a shareholder or partner of a corporation or partnership, the controlled foreign corporation is treated as owning its proportionate share of any capital or profits interest held directly by such corporation or partnership.ⁿ³⁷

IRC Section 954(h)(1) contains a special rule that removes qualified banking or financing income of an eligible controlled foreign corporation from the category of foreign personal holding company income.ⁿ³⁸ To be an eligible controlled foreign corporation, the corporation must be predominantly engaged in the active conduct of a banking, finance, or similar business, and conduct substantial activity with respect to that business.ⁿ³⁹

A controlled foreign corporation is predominantly engaged in the active conduct of a banking, financing, or similar business if (1) more than 70 percent of the gross income of the corporation is derived directly from the active and regular conduct of a lending or finance business from transactions with customers who are not related persons;ⁿ⁴⁰ (2) it is engaged in the active conduct of a banking business and is an institution licensed to do business as a bank in the United States (or is any other corporation that is not licensed but is specified in regulations); or (3) it is engaged in the active conduct of a securities business and is registered as a securities broker or dealer under Section 15 of the Securities Exchange Act of 1934 or is registered as a Government securities broker or dealer under Section 15C(a) of that Act (or is any other corporation that is not registered and is specified in regulations).ⁿ⁴¹

Qualified banking or financing income is income of an eligible controlled foreign corporation that (i) is derived by the eligible controlled foreign corporation or a qualified business unit of the corporation; (ii) is derived from one or more transactions with customers located in a country other than the United States, and substantially all of the activities in connection with the transactions are conducted directly by the corporation or unit in its home country; and (iii) is treated as earned by the corporation or unit in its home country for purposes of that country's tax laws.ⁿ⁴² No income of an eligible controlled foreign corporation (or qualified business unit of the corporation) that is not engaged in the banking or securities business can be treated as qualified banking or financing income unless more than 30 percent of the corporation's or unit's gross income is derived directly from the active and regular conduct of a lending or finance business from transactions with customers that are not related persons and that are located within the corporation's or unit's home country.ⁿ⁴³ In addition, qualified banking or financing income does not include income derived from transactions with customers located in a country other than the home country of the foreign corporation (or a qualified business unit of the corporation) unless the corporation or unit conducts substantial activity with respect to a banking, finance or similar business in its home country.ⁿ⁴⁴ Finally, the qualified banking or finance income of an eligible controlled foreign corporation or a qualified business unit of the corporation must be determined separately for the corporation and each unit by taking into account (1) in the case of the corporation, only items of income, deduction, gain, or loss and activities of the corporation not properly allocable or attributable to any qualified business unit of the corporation, and (2) in the case of a qualified business unit, only items of income, deduction, gain, or loss and activities properly allocable to that unit.ⁿ⁴⁵

A controlled foreign corporation's distributive share of partnership income will not be excluded from foreign personal

holding company income under the exception contained in *IRC Section 954(h)* unless the controlled foreign corporation is an eligible controlled foreign corporation (taking into account the income of the controlled foreign corporation and any partnerships or other qualified business units of the controlled foreign corporation, including the controlled foreign corporation's distributive share of partnership income) and the partnership, of which the controlled foreign corporation is a partner, generates qualified banking or financing income (taking into account only the income of the partnership).ⁿ⁴⁶

Pursuant to *IRC Section 954(i)(1)*, foreign personal holding company does not include qualified insurance company income of a qualifying insurance company. To be treated as such, the income must be received (a) from a person other than a related person and be derived from investments made by a qualifying insurance company or a qualifying insurance company branch of its reserves allocable to exempt contracts or of 80 percent of its unearned premiums from exempt contracts, or (b) from a person other than a related person and be derived from investments made by the insurance company or branch of an amount of its assets allocable to exempt contracts equal to (i) in the case of property, casualty, or health insurance contracts, one-third of its premiums earned on such insurance contracts during the taxable year, and (ii) in the case of life insurance or annuity contracts, 10 percent of the reserves described in (a) for such contracts.ⁿ⁴⁷ A controlled foreign corporation's distributive share of partnership income will not be excluded from foreign personal holding company income under the exception contained in *IRC Section 954(i)* unless the controlled foreign corporation partner is a qualifying insurance company (determined by examining premiums written by the controlled foreign corporation and any partnerships or qualified business units of the controlled foreign corporation partner) and the income of the partnership, of which the controlled foreign corporation is a partner, would have been qualified insurance income if received directly by the controlled foreign corporation.ⁿ⁴⁸

[iii] Foreign Base Company Sales Income. Foreign base company sales income is income derived from the purchase and sale of personal property, provided:

- (1) the property is either purchased from or sold to a related person;
- (2) the property is manufactured, produced, grown, or extracted outside of the country which the controlled foreign corporation is organized; and
- (3) the property is sold outside of that country.ⁿ⁴⁹

The concern of Congress in this instance is the sales income of a selling subsidiary which has been separated from the manufacturing activities of a related corporation merely to obtain a lower rate of tax for the sales income.ⁿ⁵⁰ This accounts for the requirement that either the sale or purchase be transacted with a related party. It also accounts for the fact that the provision is inapplicable unless the property is produced and sold outside of the country in which the controlled foreign corporation is organized; a lower rate of tax is likely to be obtained only through purchases and sales made in another country. Finally, it accounts for the provision in the Regulations that foreign base company sales income does not include income derived in connection with the sale of personal property manufactured, produced, or constructed by the controlled foreign corporation from personal property which it has purchased.ⁿ⁵¹

A person is a related person in this case if the person is an individual, corporation, partnership, trust, or estate that controls the controlled foreign corporation, or is controlled by the controlled foreign corporation or the same persons that control the controlled foreign corporation.ⁿ⁵² Control of a corporation requires the direct or indirect ownership of more than 50 percent of the voting stock or of the total value of stock of the corporation. For a partnership, trust, or estate, control means the direct or indirect ownership of more than 50 percent (by value) of the beneficial interests therein.

The selling corporation will be considered to have manufactured, produced, or constructed personal property if it substantially transforms the property it purchases, or if it uses the purchased property as a component part of the

property which is sold.ⁿ⁵³ This contemplates a significant amount of manufacturing, major assembling, or construction; activity such as minor assembling, packaging, repackaging, or labeling will not be sufficient to remove the income from the ambit of foreign base company sales income.ⁿ⁵⁴

Foreign base company sales income can also be derived from the purchase and sale of personal property through a branch operating in a country other than the one in which the controlled foreign corporation is organized, where the use of the branch to carry on such activities has substantially the same tax effect as if the branch were a subsidiary corporation incorporated in the country in which it operates.ⁿ⁵⁵

Will a controlled foreign corporation be deemed to have "manufactured" property if it contracts with a related or unrelated contract manufacturer to have products manufactured for it? The Internal Revenue Service initially held, in *Rev Rul 75-7*,ⁿ⁵⁶ that the controlled foreign corporation would be considered the manufacturer if it retained ownership of and control over the property and had no profit-sharing or similar relationship with the contract manufacturer, although the contract manufacturer would then be considered a branch of the controlled foreign corporation and, under certain circumstances, subpart F income could still result from the arrangement.ⁿ⁵⁷ But the Service revoked *Rev Rul 75-7* after the Tax Court held in, *Ashland Oil* and *Vetco*, that neither an unrelated nor a related contract manufacturer could be considered a "branch" of a controlled foreign corporation for purposes of the "branch rule."ⁿ⁵⁸

In final regulations effective July 1, 2009,ⁿ⁵⁹ the Treasury provided, as an alternative to the physical manufacturing tests, a fact-based "substantial contribution test," under which products manufactured for a controlled foreign corporation by a contract manufacturer will be considered manufactured by the controlled foreign corporation if the latter makes a substantial contribution through the activities of its employees to the manufacture of such products.ⁿ⁶⁰ The final regulations look exclusively to the activities of the controlled foreign corporation's employees in a contract manufacturing arrangement to determine whether the resulting product may be deemed manufactured by the controlled foreign corporation; other factors, such as contractual risks assumed by the controlled foreign corporation, are not relevant to this determination.ⁿ⁶¹

The regulations separately address issues that arise when a controlled foreign corporation owns an interest in a partnership that does business either with the controlled foreign corporation itself or with persons "related" to the controlled foreign corporation. In general, the controlled foreign corporation's distributive share of the partnership's income is foreign base company sales income if it would have been so characterized if earned directly by the corporation instead of the partnership.ⁿ⁶² For this purpose, when the characterization of an item of partnership income as foreign base company sales income depends on whether a transaction involved a "related party" or occurred outside a party's country of organization, such determinations are to be made by substituting the controlled foreign corporation for the partnership.ⁿ⁶³ Further, if the controlled foreign corporation engages in a transaction involving the sale of personal property to, or purchase of personal property from, a partnership in which it holds an interest, for purposes of determining whether the controlled foreign corporation's distributive share of that partnership's income constitutes foreign base company sales income, the corporation's transaction with the partnership is deemed to be one with a "related party" if the controlled foreign corporation purchased property sold to the partnership from a related party, or the controlled foreign corporation resold property purchased from the partnership to a related party.ⁿ⁶⁴

Example:

CFC1, a Country A corporation, is an 80 percent partner in Partnership, which is organized in Country B. CFC2, a Country B corporation, owns the remaining 20 percent of Partnership. CFC1 and CFC 2 are both controlled foreign corporations of USP, their common US parent. Partnership purchases Product from CFC2, which manufactures Product in Country B, and then resells Product to unrelated third parties in Country B. Because CFC2's Product was not acquired from a related party, and is both manufactured and sold to unrelated parties in the country in which CFC2 was organized, CFC2's transactions with Partnership are not deemed to be with a "related party" and no part of its distributive share of Partnership's income is foreign base company sales income. CFC1's 80 percent distributive share of

Partnership's income is, however, foreign base company sales income to CFC1. Had CFC1 engaged in the transactions directly in place of Partnership, foreign base company sales income would have resulted from the purchase of Product from a related party (CFC2) organized outside CFC1's country of organization (Country A), and the resale of Product to unrelated parties who are likewise outside CFC1's country of organization (in Country B).ⁿ⁶⁵

[iv] Foreign Base Company Services Income. This component of foreign base company income consists of income derived from the performance of "technical, managerial, engineering, architectural, scientific, skilled, industrial, commercial, or like services" if performed for a related person and performed outside of the country in which the controlled foreign corporation is incorporated.ⁿ⁶⁶ As in the case of sales income, the purpose here is to deny tax deferral where the service subsidiary is separated from the manufacturing company and organized in another country primarily to obtain a lower rate of tax for the service income.ⁿ⁶⁷ Therefore, foreign base income does not include income derived from the performance of services that are directly related to the sale or exchange by the controlled foreign corporation of property manufactured, produced, grown, or extracted by it and are performed prior to the time of sale or exchange, an offer to sell or exchange such property, or to income that is exempt insurance income or that is not treated as foreign personal holding company income under *IRC Section 954(c)(2)(C)(ii)*, *954(h)*, or *954(i)*, discussed in § 20.03[2][b][ii].

[v] Foreign Base Company Oil Related Income. Foreign base company oil related income is nonextraction income derived from sources outside the United States from the processing of minerals extracted (by the taxpayer or any other person) from oil and gas wells into their primary products, the transportation or distribution of those minerals or primary products, the disposition of assets used in a trade or business encompassing the activities just described, or the performance of any other related service.ⁿ⁶⁸ Excepted from the scope of the definition is (1) income derived from a source within a foreign country in connection with oil or gas extracted from wells within the foreign country, or oil, gas, or a primary product sold by the controlled foreign corporation or a related person for use or consumption within the foreign country or loaded there on a vessel or aircraft for use as fuel, and (2) dividends and interest from a foreign corporation qualifying for the deemed paid credit under *IRC Section 902*, dividends from domestic corporations treated as income from foreign sources, amounts giving rise to a deemed paid credit under *IRC Section 960*, and the taxpayer's distributive share of the income of partnerships, to the extent attributable to foreign oil and gas extraction income, or to foreign oil related income.ⁿ⁶⁹

Income which normally would be foreign base company oil related income is not treated as such if the foreign corporation is not a large oil producer, that is, if the aggregate daily production of foreign crude oil and natural gas of the corporation and related persons for the taxable year is less than 1,000 barrels per day (or its equivalent in gas).ⁿ⁷⁰

[c] The Includable Income--Previously Excluded Subpart F Income Withdrawn From Investment in Foreign Base Company Shipping Operations. A reduction in the amount of qualified investments in foreign base company shipping operations of a controlled foreign corporation for any taxable year produces includable income for United States shareholders to the extent to which the decrease in investment does not exceed the amount of foreign base company shipping income that was excluded from income for all prior taxable years beginning before 1987 and not previously withdrawn from investment in foreign base company shipping operations.ⁿ⁷¹ The decrease in qualified investments for any taxable year is determined by subtracting the amount of the corporation's qualified investments at the close of the year from the amount of such investments at the close of the last taxable year beginning before 1987 (to the extent such amounts do not exceed the sum of the decreases in qualified investments for prior taxable years beginning after 1986), and then reducing the determined figure by the amount by which losses realized on the disposition of qualified investments exceed the gains on such dispositions during the taxable year.ⁿ⁷² However, in no case can the decrease be considered greater than the sum of (1) the earnings and profits for the taxable year, (2) the earnings and profits accumulated for taxable years beginning after December 31, 1975, and (3) the amount of previously excluded Subpart F income invested in less developed country corporations, as defined by *IRC Section 955(c)(2)* prior to its amendment by the Tax Reduction Act of 1975, to the extent attributable to earnings and profits accumulated for

taxable years beginning after December 31, 1962.ⁿ⁷³

Qualified investments in foreign base company shipping operations consist of investments in aircraft and vessels used in foreign commerce and in other assets used in connection with the performance of services directly related to the use of such aircraft and vessels.ⁿ⁷⁴ Qualified investment also includes investments by a controlled foreign corporation in the stock or obligations of a related controlled foreign corporation that holds assets described in the preceding sentence. In addition, *IRC Section 955(b)(2)* provides for the promulgation of regulations under which an investment by one or more controlled foreign corporations may be treated as an investment by a related foreign corporation. Finally, amounts that had been invested in shipping companies that were classified as less developed country corporations prior to the enactment of the Tax Reduction Act of 1975 are to be treated as qualified investments in foreign base company shipping operations.ⁿ⁷⁵

[d] The Includable Income--Investment of Earnings in U.S. Property. The third category of income taxed to the U.S. shareholders of controlled foreign corporations requires each to report the lesser of:

(1) the excess (if any) of (a) the shareholder's pro rata share of the average amounts of U.S. property held (directly or indirectly) by the controlled foreign corporation as of the close of each quarter of the taxable year, over (b) the amount of earnings and profits of the corporation treated as having been included in the shareholder's income due to earnings invested in U.S. property;ⁿ⁷⁶ or

(2) the shareholder's pro rata share of the applicable earnings of the controlled foreign corporation.ⁿ⁷⁷

For this purpose the corporation's applicable earnings consist of its current and accumulated earnings and profits reduced by distributions made during the year and by retained earnings previously included in the shareholder's income because of investments in U.S. property.ⁿ⁷⁸

In applying this inclusion rule to any taxable year, any item of U.S. property that was acquired by the controlled foreign corporation before the first day on which it became a controlled foreign corporation is disregarded.ⁿ⁷⁹ However, the aggregate amount that can be disregarded cannot exceed the portion of the applicable earnings of the corporation that were accumulated before that day.ⁿ⁸⁰

If the corporation ceases to be a controlled foreign corporation during any taxable year:

(1) the determination of any U.S. shareholder's pro rata share is made on the basis of stock owned by the shareholder on the last day during the taxable year on which the corporation is a controlled foreign corporation;

(2) the amount of the corporation's investment in U.S. property is determined by only taking into account quarters ending before that last day; and

(3) in determining applicable earnings, the amount of current earnings taken into account is prorated to the part of the year during which the corporation is a controlled foreign corporation.ⁿ⁸¹

"U.S. property" is defined as any property acquired after December 31, 1962, which is:

(1) tangible property located in the United States;

(2) stock of a domestic corporation;

(3) an obligation of a U.S. person;ⁿ⁸²

(4) any right to the use in the United States of a patent, copyright, invention, secret formula or process, or similar property right, if acquired or developed by the controlled foreign corporation for use in the United States; and

(5) any trade or service receivable acquired directly or indirectly from a related person who is a U.S. person, if the obligor is also a U.S. person.ⁿ⁸³

United States property does not include:

(1) obligations of the United States, money, or bank deposits;

(2) property located in the United States, but purchased for export to, or use in, foreign countries;

(3) obligations of a United States person arising in the ordinary course of business from the sale or processing of property;

(4) transportation equipment used primarily outside the United States;ⁿ⁸⁴

(5) an amount equal to that portion of the earnings and profits of the controlled foreign corporation accumulated after 1962, and composed of items of income which are derived from sources within the United States and are effectively connected with the conduct of a trade or business within the United States (such items being excluded from Subpart F income under *IRC Section 952(b)*);ⁿ⁸⁵

(6) any movable property (other than a vessel or aircraft) used for resource exploration and exploitation activities on the Continental Shelf of the United States;

(7) the stock or obligations of a domestic corporation (unless the corporation is a United States shareholder of the controlled foreign corporation) if United States shareholders of the controlled foreign corporation own, directly or indirectly, less than 25 percent of the total combined voting power of the domestic corporation;ⁿ⁸⁶

(8) property which is otherwise United States property which is held by a foreign sales corporation and is related to its export activities;

(9) deposits of cash or securities made or received on commercial terms in the ordinary course of a United States or foreign person's business as a dealer in securities or in commodities, but only to the extent the deposits are made or received as collateral or margin for (i) a securities loan, notional principal contract, options contract, forward contract, or futures contract, or (ii) any other financial transaction in which the Service determines that it is customary to post collateral or margin;

(10) an obligation of a United States person to the extent the principal amount of the obligation does not exceed the fair market value of readily marketable securities sold or purchased pursuant to a sale and repurchase agreement or otherwise posted or received as collateral for the obligation in the ordinary course of its business by a United States or foreign person that is a dealer in securities or commodities;

(11) securities acquired and held by a controlled foreign corporation in the ordinary course of its business as a dealer in securities if the dealer accounts for the securities as held primarily for sale to customers in the ordinary course of its business, and the dealer disposes of the securities (or the securities mature while held by the dealer) within a period consistent with the holding of securities for sale to customers in

the ordinary course of business; and

(12) an obligation of a United States person that is not a domestic corporation, and is not a (i) United States shareholder of the controlled foreign corporation, or (ii) a partnership, estate, or trust in which the controlled foreign corporation, or any related person (as defined in *IRC Section 954(d)(3)*), is a partner, beneficiary, or trustee immediately after the acquisition of any obligation of the partnership, estate, or trust by the controlled foreign corporation.ⁿ⁸⁷

[e] Exclusion From Gross Income of Previously Taxed Earnings and Profits. In order to prevent the double taxation of income imputed to United States shareholders under the provisions of Subpart F, *IRC Section 959(a)* provides that amounts previously included in income under *IRC Section 951(a)* will not be taxed again when distributed as increases in earnings invested in United States property.ⁿ⁸⁸ (Any amount included in gross income under *IRC Section 1248(a)* or *(f)*, discussed in § 20.03[4], is treated as an amount previously included in income under *IRC Section 951(a)(1)(A)*).ⁿ⁸⁹ *IRC Section 959(a)* also provides an exclusion for amounts which have been included in the gross income of a United States shareholder and are then distributed to the shareholder either directly, or indirectly through a chain of ownership of foreign entities. A similar exclusion, provided by *IRC Section 959(b)*, prevents the imposition of a second tax on amounts taxed to United States shareholders of one controlled foreign corporation and then distributed through a chain of ownership to another controlled foreign corporation in which the taxpayer is also a United States shareholder.

Example 1:

A, a United States citizen, owns 100 percent of the stock of *CF Corporation*, a foreign corporation, throughout 2001 and 2002. During 2001, the corporation derives \$1,000 of Subpart F income and has \$1,000 of earnings and profits. Under *IRC Section 951(a)*, A must include the \$1,000 in gross income for 2001. However, when *CF Corporation* distributes \$1,000 to A in 2002, the entire amount can be excluded from gross income for that year inasmuch as the distribution represents earnings and profits attributable to an amount previously included in gross income under the provisions of Subpart F. There would also be no inclusion in 2002, if, instead of distributing the \$1,000 to A, *CF Corporation* had invested the amount in United States property, say, stock in a domestic corporation.

Example 2:

A, a United States citizen, owns 100 percent of the stock of *CF Corporation*, a foreign corporation, which, in turn, owns 100 percent of another foreign corporation, *R Corporation*. During 2001, *R Corporation* derives \$1,000 of Subpart F income and has earnings and profits in excess of that amount. Because A indirectly owns 100 percent of the stock of *R Corporation*, A is required to include the \$1,000 in his gross income for 2001. In 2002, *R Corporation* distributes the \$1,000 to *CF Corporation*, which has no Subpart F income for the year. However, *CF Corporation* invests the sum in United States property. This would trigger an additional inclusion of \$1,000 in 2002 were it not for *IRC Section 959(b)*; the amount is excludable because it is attributable to earnings and profits previously taxed to a United States shareholder under the provisions of *IRC Section 951(a)*.

To apply *IRC Section 959*, actual distributions during the taxable year are taken into account before determining the amount of increase in investment in U.S. assets that may be excluded because of *Section 959*.ⁿ⁹⁰

IRC Section 959(c) provides a hierarchy of sources of actual distributions. They are treated as being paid first out of the aggregate of earnings and profits attributable to earnings invested in United States property and earnings and profits attributable to earnings invested in excess passive assets, with any distribution being allocated between the two on the basis of the respective amounts of earnings and profits of each, then out of Subpart F income, and only then, if any balance remains, out of earnings and profits which have not already been taxed to the shareholders. Only when the last

source is reached is any portion of the distribution taxable to the shareholders as dividend.ⁿ⁹¹

Amounts that would be included in income as investments in U.S. property under *IRC Section 956* are treated as attributable first to retained earnings that are included in income as Subpart F income and then to other earnings and profits.ⁿ⁹²

[f] Adjustments to the Shareholder's Basis. The inclusion of an amount in gross income under *IRC Section 951(a)* works a corresponding increase in the shareholder's basis for stock in the controlled corporation (or in the basis of the property in a foreign entity which causes the taxpayer to be treated as the indirect owner of stock in a controlled foreign corporation).ⁿ⁹³ The exclusion of an amount from gross income under *IRC Section 959* produces the opposite result--a reduction in basis.ⁿ⁹⁴ (If the reduction exceeds the adjusted basis of the stock, the excess is treated as gain from the sale or exchange of property.)ⁿ⁹⁵ The increase in basis takes effect as of the last day in the taxable year of the corporation on which it is a controlled corporation; the reduction in basis is effective as of the time the excluded amount is received.ⁿ⁹⁶

When a lower-tier controlled foreign corporation earns Subpart F income, and stock in that corporation is later disposed of by an upper-tier controlled foreign corporation, the gain is treated as a dividend to the extent provided under *IRC Section 1248* as if the controlled foreign corporation were a United States person.ⁿ⁹⁷ The Code authorizes the issuance of regulations to provide for adjustments similar to those detailed in the preceding paragraph.ⁿ⁹⁸

Example:

A United States person owns all of the stock of a controlled foreign corporation (upper-tier corporation) that owns all of the stock of a second controlled foreign corporation (lower-tier corporation). In 1998, the lower-tier corporation earns \$2,000 of Subpart F income that must be included in the United States shareholder's income for that year. In 1999, the upper-tier corporation sells the stock of the lower-tier corporation and recognizes \$6,000 of gain with respect to the sale; the gain must be treated as a dividend and, thus, as Subpart F personal holding company income. Regulations can provide that the basis of the upper-tier corporation's stock be increased by the \$2,000 that was included in the United States shareholders income in 1998, thereby reducing the amount of gain to be recognized on the sale to \$4,000.

[g] The Corporate Shareholder's Foreign Tax Credit. If the United States shareholder is a domestic corporation, and the amount included in its gross income under *IRC Section 951(a)* is attributable to the earnings and profits of a foreign corporation that is a member of a qualified group (as defined in *IRC Section 902(b)*), the domestic corporation is deemed to have paid a portion of the foreign corporation's post-1986 foreign income taxes determined under *IRC Section 902* in the same manner as if the amount so included were a dividend paid by the foreign corporation.ⁿ⁹⁹ Once having claimed this credit, the corporation is barred from taking an additional credit when it receives a distribution of the previously taxed income.ⁿ¹⁰⁰

[3] Mitigating the Effect of the Controlled Foreign Corporation Provisions

[a] Election by Individuals to Be Taxed at Corporate Rates. An individual United States shareholder (or a trust or estate that is a United States shareholder) can elect to have the income imputed under *IRC Section 951(a)* taxed at the rates imposed on corporations by *IRC Section 11* or *IRC Section 55* (the alternative minimum tax) instead of those levied on individuals by *IRC Section 1*.ⁿ¹ There is one wrinkle: the amount in each taxable income bracket in the rate table for corporations "shall not exceed an amount which bears the same ratio to [the] bracket amount as the amount included in [the shareholder's] gross income under section 951(a) for the taxable years bears to [the] shareholder's pro rata share of the earnings and profits for the taxable year of all controlled foreign corporations with respect to which such shareholder includes any amount in gross income under section 951(a)." ⁿ²

Consistency in tax treatment is accorded by *IRC Section 962(a)(2)*. Inasmuch as the electing shareholder is taxed as a corporation, the deemed-paid foreign tax credit allowed can be claimed by domestic corporations under *IRC Section 960*

. However, the electing shareholder is faced with the inclusion of another item of gross income, namely, the gross-up dividend of *IRC Section 78*.ⁿ³

The foregoing may be seen more graphically in the following illustration:

Example:

A, a married individual, owns 60 percent of the one class of stock of *F Corporation*, a controlled foreign corporation. For 1993, the corporation has Subpart F income of \$150,000 and pretax earnings and profits of \$300,000, and pays foreign income taxes of \$100,000. A's gross income apart from A's *IRC Section 951(a)* income is \$100,000; allowable deductions amount to \$50,000. A is required to include \$90,000 of the corporation's \$150,000 of Subpart F income in gross income for 1993. If A elects to have the provisions of *IRC Section 962* apply for that year, the tax will be computed as follows:

Income required to be included under <i>IRC Section 951(a)</i>	\$90,000
Gross-up dividend ($\$90,000/\$300,000 \times \$100,000$) ⁿ⁴	30,000
Taxable income under <i>IRC Section 11</i>	\$120,000
Tax under <i>IRC Section 11</i> ⁿ⁵	38,425
Foreign tax credit	30,000
United States tax payable on amounts included under <i>IRC Section 951(a)</i>	8,425
Tax with respect to other taxable income (\$50,000)	12,022
Total tax	20,447

If the taxpayer does not elect to be taxed at corporate rates, the total tax for 1993 (on \$90,000 + \$50,000, or \$140,000) will be \$35,929. It can be seen that the election will work to the advantage of the taxpayer only if the corporate rate applicable to the income is less than the individual rate.

If the election is feasible, it is not without adverse tax consequence for the shareholder. A subsequent distribution of the income taxed at corporate rates must be included in gross income to the extent that the amount distributed exceeds the amount of tax paid pursuant to the election.ⁿ⁶

A shareholder makes the *IRC Section 951(a)* election by filing a statement to that effect with the tax return for the taxable year with respect to which the election applies.ⁿ⁷ The election pertains to all controlled foreign corporations whose income is imputed to the shareholder, and is binding for the taxable year for which it is made unless the Commissioner consents to its revocation.ⁿ⁸ But "approval will not be granted unless a material and substantial change in circumstances occurs which could not have been anticipated when the election was made."ⁿ⁹

[b] Export Trade Corporations. ⁿ¹⁰*IRC Section 970*, a second relief provision, permits a controlled foreign corporation that qualified also as an export trade corporation prior to October 31, 1971 and does not fail to meet the prescribed requirements for three consecutive taxable years,ⁿ¹¹ to reduce its foreign base company income by the portion of such income that consists of "export trade income." This provision is intended as an encouragement to the export trade by continuing tax deferral for corporations exporting products produced in the United States.ⁿ¹² However, in order to keep the income attributed to export trade corporations in line with the income actually created by export trade activities, and to restrict the exclusion to the extent to which the income receiving special treatment is used for the expansion of the export trade business itself, the amount of the reduction is limited to the lesser of:

- (1) 1 1/2 times the export promotion expensesⁿ¹³ allocable to export trade income included in foreign base company income;

(2) 10 percent of the gross receipts from which the corporation derives export trade income included in foreign base company income; or

(3) an amount, which bears the same ratio to the increase in the corporation's export trade assetsⁿ¹⁴ for the year, as the export trade income that constitutes foreign base company income bears to the entire export trade income of the corporation for the taxable year.ⁿ¹⁵

To further insure that the excluded income is used to increase the controlled foreign corporation's export trade assets, *IRC Section 970(b)* treats each United States shareholder's pro rata decrease in the corporation's investments in export trade assets for the taxable year (determined by subtracting the amount of such investments at the close of the taxable year from the amount of such investments at the close of the preceding taxable year)ⁿ¹⁶ as an item of previously excluded Subpart F income withdrawn from investment in less developed countries and, thus, as an item of income includable in the shareholder's gross income under *IRC Section 951(a)*.ⁿ¹⁷ However, the amount of such inclusion in gross income cannot exceed the lesser of (1) the portion of the shareholder's pro rata share of excluded export trade income not previously included in gross income by reason of the application of *IRC Section 970(a)*, or (2) the shareholder's pro rata share of the sum of the controlled foreign corporation's earnings and profits accumulated after 1962 and its earnings and profits for the taxable year in question.ⁿ¹⁸

A controlled foreign corporation is an export trade corporation if, for the three-year period immediately preceding the close of the taxable year (1) 90 percent or more of its gross income was derived from foreign sources, and (2) 75 percent or more of its gross income was export trade income.ⁿ¹⁹ (The second requirement is reduced to 50 percent for corporations exporting agricultural products grown in the United States.)ⁿ²⁰ The corporation has export trade income if it derives net income from (1) the sale to an unrelated person of property produced in the United States for use, consumption, or disposition abroad, or from the performance of services related to the sale, installation, or maintenance of such property, (2) the performance of services in connection with the use by an unrelated person outside the United States of patents, copyrights, secret processes, and other like property owned by the manufacturer or producer of export property in respect of which the corporation derives export trade income, (3) the use of export property by an unrelated person or the use of export property in the rendition of technical services to an unrelated person, and (4) interest from export trade assets.ⁿ²¹

[4] Sales or Exchanges of Stock in Corporations That Are or Have Been Controlled Foreign Corporations

As a general rule, the tax consequences of a disposition of stock in a foreign corporation are the same as those attending the sale or exchange of stock in a domestic corporation. The similarity vanishes when the shareholder disposing of the stock owned (directly, indirectly, or constructively under the rules contained in *IRC Section 958*) 10 percent or more of the total combined voting power of the foreign corporation at any time during the five-year period ending on the date of disposition, and the corporation was a controlled foreign corporation at some time during the period of the shareholder's 10 percent ownership. Under *IRC Section 1248(a)*, any gain realized by such shareholder on the sale or exchange of the stock in the foreign corporation is treated as a dividend "to the extent of the earnings and profits of the foreign corporation attributable ... to such stock which were accumulated in taxable years ... beginning after December 31, 1962, and during the period or periods the stock sold or exchanged was held by [the shareholder] while such foreign corporation was a controlled foreign corporation."ⁿ¹ (The taxpayer has the burden of establishing the amount of earnings and profits to be taken into account; otherwise the entire gain will be treated as a dividend.)ⁿ²

If a controlled foreign corporation sells or exchanges stock in any other foreign corporation, the gain is treated as a dividend for purposes of Subpart F income inclusions to the United States shareholder, to the extent of earnings and profits of the second corporation attributable to periods in which the first foreign corporation owned the stock of the second while the latter was a controlled foreign corporation with respect to the United States shareholder.ⁿ³ The same country exception of *IRC Section 954(c)(3)(A)(i)* does not apply, so the dividend must be included in the foreign personal holding company income of the selling corporation.ⁿ⁴

It is important to note that *IRC Section 1248* may be applicable even though, when the disposition occurs, the shareholder owns less than 10 percent of the corporation's voting stock and the corporation is not a controlled foreign corporation; the provision is triggered as long as the shareholder's 10 percent ownership and the corporation's controlled foreign corporation status coexisted at some time during the five-year period, although dividend consequences will attach only to that portion of the gain attributable to earnings and profits accumulated while the two conditions coincided.ⁿ⁵

If the shareholder is a corporation, the dividend nature of the income may entitle the corporation to a credit for foreign taxes paid by the foreign corporation on the earnings and profits producing the "dividend" (the deemed-paid credit of *IRC Section 902*).ⁿ⁶ If the shareholder is an individual, and the stock sold or exchanged is a capital asset which has been held for more than one year, the tax attributable to the amount included in gross income as a dividend--the difference between the shareholder's tax liability taking *IRC Section 1248(a)* into account and the tax liability determined as if the portion falling within *IRC Section 1248(a)* had not been recognizedⁿ⁷--cannot be greater than the sum of (1) the shareholder's pro rata share of the taxes that would have been paid by the foreign corporation with respect to its income had it been a domestic corporation, and (2) the tax that would have been paid on the shareholder's share of the balance of the corporation's earnings had they been distributed and included in gross income as long-term capital gain.ⁿ⁸

Although the earnings and profits of the foreign corporation for any taxable year are determined according to rules substantially similar to those applicable to domestic corporation,ⁿ⁹ the following amounts are expressly excluded:

- (1) earnings and profits previously taxed to the shareholder under *IRC Section 951*;ⁿ¹⁰
- (2) earnings and profits of the foreign corporation attributable to any amount previously included in gross income of the shareholder under *IRC Section 1293* (current taxation of income from a passive foreign investment company that is a qualified electing fund) with respect to the stock sold or exchanged, but only to the extent inclusion of the amount did not result in an exclusion when the income was distributed;ⁿ¹¹
- (3) any item of income derived from sources within the United States, and includable in the gross income of the corporation for taxable years prior to 1967 as income of a foreign corporation engaged in a trade or business within the United States, and, for taxable years after 1966, as income effectively connected with the conduct of a trade or business within the United States;ⁿ¹²
- (4) earnings and profits accumulated during any taxable year beginning before January 1, 1976, while the corporation was a less developed country under *IRC Section 902(d)*, as in effect prior to the Tax Reduction Act of 1976;ⁿ¹³ and
- (5) earnings and profits attributable to foreign trade income (other than certain exempt foreign income) of a foreign sales corporation.ⁿ¹⁴

There is another modification, one which causes an increase in earnings and profits. This will come about when (a) the sale or exchange is of stock in a foreign corporation (first-tier corporation) that owns stock in another foreign corporation (lower-tier corporation), and (b) the shareholder selling or exchanging the stock owned (directly, indirectly, or constructively) 10 percent or more of the stock of the lower-tier corporation at any time during the five-year period ending on the date of sale or exchange, and at a time when the lower-tier corporation was a controlled foreign corporation; the earnings and profits of the first-tier corporation will be deemed to include the earnings and profits of the lower-tier corporation that (1) are attributable to the stock of that corporation owned indirectly by the shareholder because of his ownership of the stock sold or exchanged, and (2) were accumulated after 1962 during periods when the

lower-tier corporation was a controlled foreign corporation and the shareholder, an indirect owner of its stock.ⁿ¹⁵ This provision prevents the avoidance of *IRC Section 1248(a)* through the sale of stock in a foreign corporation having no earnings and profits but owning a subsidiary that does.

A second provision curbs avoidance of *IRC Section 1248* through the use of domestic holding companies. Under *IRC Section 1248(e)*, the sale or exchange of stock in a domestic corporation "formed or availed of principally for the holding, directly or indirectly, of stock of one or more foreign corporations," is treated as a sale or exchange of the stock of the foreign corporation held by the domestic corporation.ⁿ¹⁶

Under *IRC Section 1248(f)(1)*, a domestic corporation that satisfies the 10 percent stock ownership requirement of *IRC Section 1248(a)(2)* and distributes stock of the foreign corporation in a distribution to which *IRC Section 311(a)*, 337, 355(c)(1), or 361(c)(1) applies, the excess of the fair market value of the stock over its adjusted basis in the hands of the corporation as a dividend to the extent of the earnings and profits of the foreign corporation which were accumulated after 1962 and during the period the stock was held by the domestic corporation while the foreign entity was a controlled foreign corporation.ⁿ¹⁷ However, this rule will not apply, and nonrecognition treatment will ensue, if the domestic corporation distributes the stock to another domestic corporation which is treated as holding the stock for the period the stock was held by the distributing corporation, and which, immediately after the distribution, satisfies the stock ownership requirements of *IRC Section 1248(a)* with respect to the foreign corporation.ⁿ¹⁸

A further provision affects the character of the gain realized by a partner on certain partnership distributions or by reason of the sale of the partnership interest. The stock is treated as an unrealized receivable of the partnership to the extent that a sale of the stock by the partnership would have produced dividend income.ⁿ¹⁹ Thus, ownership of controlled foreign corporation stock by a partnership may cause some of the gain realized by the partner on distribution or sale to be taxed as ordinary income.ⁿ²⁰

Under *IRC Section 1248(i)*, if any shareholder of a 10-percent corporate shareholder of a foreign corporation exchanges stock in the 10-percent corporate shareholder for stock of the foreign corporation, the 10-percent corporate shareholder recognizes gain in the same manner as if the stock of the foreign corporation received in the exchange had been issued to the 10-percent corporate shareholder and then distributed by it to the exchanging shareholder in redemption or liquidation (whichever is appropriate). The amount of gain recognized by the 10-percent corporate shareholder cannot exceed the amount treated as a dividend under *IRC Section 1248*.

Even though *IRC Section 1248(a)* potentially affects all sales or exchanges on which gain is recognized,ⁿ²¹ it is made inapplicable to redemptions of stock to pay death taxes and administration expenses (redemptions governed by *IRC Section 303*) and to any gain treated as a dividend, as gain from the sale of a noncapital asset, or as short-term capital gain.ⁿ²²

[5] Temporary Dividends Received Deduction

A corporation that is a United States shareholder of a controlled foreign corporation may elect, for one taxable year, an 85 percent dividends received deduction with respect to certain cash dividends the shareholder received from its controlled foreign corporations.ⁿ¹ For this purpose, the term "dividends" includes cash amounts included in gross income as dividends under *IRC Sections 302, 304, and 356(a)(2)*, but does not include amounts treated as dividends under *IRC Sections 78 or 1248*.ⁿ² In addition, a cash dividend includes a cash distribution from a controlled foreign corporation that is excluded from gross income under *IRC § 959(a)* (exclusion from income of previously taxed earnings and profits), to the extent of any amount included in income by the shareholder under *IRC Section 951(a)(1)(A)* as a result of a cash dividend during the taxable year to (a) the controlled foreign corporation from another controlled foreign corporation that is in a chain of ownership as described in *IRC Section 958(a)*, or (b) any other controlled foreign corporation in that chain of ownership, but only to the extent of cash distributions that are described in *IRC § 959(b)* made during the taxable year to the controlled foreign corporation from which the United States

shareholder received the distribution.ⁿ³

The temporary dividends received deduction is subject to several limitations. First, the amount of dividends eligible for the deduction cannot exceed the greatest of the following: (1) \$500 million; (2) the amount shown on the shareholder's applicable financial statement as earnings permanently reinvested outside the United States; or (3) in the case of an applicable financial statement that fails to show a specific amount of earnings permanently reinvested outside the United States and that shows a specific amount of tax liability attributable to such earnings, the amount of the liability divided by 0.35.ⁿ⁴ The amounts described in (2) and (3) are treated as zero if there is no applicable financial statement or the statement does not show a specific amount of earnings or liability.

Second, the dividends must be extraordinary, that is, the deduction is allowed only to the extent the cash dividends received exceed the annual average for the base period years of (i) the dividends received during each base period year by the shareholder from controlled foreign corporations, (ii) the amount includable in the shareholder's gross income for each base period year under *IRC Section 951(a)(1)(B)*, and (iii) the amounts that would have been included for each base period year but for *IRC Section 959(a)* with respect to the controlled foreign corporations.ⁿ⁵ The base period years are the three taxable years that are among the five most recent taxable years ending on or before June 30, 2003, disregarding the taxable year for which the sum of the described amounts is the largest and the year for which the sum is the smallest.ⁿ⁶

Third, under *IRC Section 965(b)(4)*, the amount of the dividend must be invested in the United States pursuant to a domestic reinvestment plan approved by the taxpayer's president, chief executive officer, or comparable official before the payment of the dividend and then subsequently approved by the taxpayer's board of directors, management committee, executive committee, or similar body. The domestic reinvestment plan must provide for the investment of the dividend in the United States (other than as payment for executive compensation), including as a source for the funding of worker hiring and training, infrastructure, research and development, capital investments, or the financial stabilization of the corporation for purposes of job retention or creation.ⁿ⁷ Expenditures that are not considered investments in the United States include executive compensation, intercompany distributions, obligations, and transactions, dividends and other distributions with respect to stock, stock redemptions, portfolio investments in business entities, debt instruments or other evidences of indebtedness, and tax payments.ⁿ⁸

The domestic reinvestment plan must describe specific anticipated investments in the United States in sufficient detail to enable the taxpayer to show upon examination that the expenditures that subsequently occurred were of the kind that were in fact contemplated at the time of adoption of the plan.ⁿ⁹ However, a taxpayer is not required to trace or segregate the specific dividend proceeds it receives to demonstrate that it has properly invested the amount of the dividend in the United States pursuant to the plan.ⁿ¹⁰

Further limitations affect the shareholder's taxable income for any taxable year, which cannot be less than the amount of nondeductible CFC dividends received during the year.ⁿ¹¹ In addition, the nondeductible CFC dividends for any taxable year are not taken into account in determining the amount of any net operating loss for the taxable year, or the amount of income for purposes of a net operating loss carryback or carryover to that year.ⁿ¹² Finally, no foreign tax credit can be claimed with respect to the deductible portion of any dividend or any amount described in *IRC Section 965(a)(2)* that is included in income under *IRC Section 951(a)(1)(A)*, nor is any deduction allowed for expenses properly allocated and apportioned to the deductible amount.ⁿ¹³

The taxpayer may elect to apply *IRC Section 965* to the taxpayer's last taxable year that begins before October 22, 2004, or to taxpayer's first taxable year that begins during the one-year period beginning on that date.ⁿ¹⁴ The election must be made before the due date (including extensions) of the tax return for the taxable year. The taxpayer must also comply with certain reporting requirements.ⁿ¹⁵

(n4)Footnote 4. "In an effort to cover every contingency, the rules of Subpart F share the complexity that typifies virtually all of the Code provisions dealing with foreign corporations and transactions, yet in the end it turns many tasks over to the Treasury to discharge by regulations." Bittker & Eustice, *Federal Income Taxation of Corporations and Shareholders* 17-70 (5th ed 1987).

(n5)Footnote 1. *IRC* § 957(a).

(n6)Footnote 2. *IRC* §§ 951(b), 957(c), 7701(a)(30). *IRC* § 7701(a)(31) defines a foreign estate or trust as one "the income of which, from sources without the United States which is not effectively connected with the conduct of a trade or business within the United States, is not includible in gross income under subtitle A."

A person born in, and a resident of, Puerto Rico is a US person for this purpose. *Rev Rul* 74-375, 1974-2 *CB* 215 .

(n7)Footnote 3. *Treas Reg* § 1.957-1(b)(1). Thus, in *Rev Rul* 70-426, 1970-2 *CB* 157 , a foreign corporation was held to be a controlled foreign corporation where the renewal of its one-year charter required approval of shareholders owning 75 percent of the total combined voting power and a domestic corporation owned 50 percent of the voting stock; the domestic corporation had the power to prevent renewal and cause liquidation.

(n8)Footnote 4. *Treas Reg* § 1.957-1(b)(1).

(n9)Footnote 5. *Treas Reg* § 1.957-1(b)(2).

(n10)Footnote 6. *Treas Reg* § 1.957-1(b)(2).

(n11)Footnote 7. *Treas Reg* § 1.957-1(b)(2). *Koehring v Commr*, 583 F2d 313 (7th Cir 1978) .

(n12)Footnote 8. The attribution rules of *IRC* § 318(a) are discussed in § 5.02[1].

(n13)Footnote 9. *IRC* § 958(b)(1)-(4). The topic of attribution in this context is discussed in Alexander, "Controlled Foreign Corporations and Constructive Ownership," 18 *Tax L Rev* 531 (1963).

(n14)Footnote 10. *Treas Reg* § 1.958-1(b).

(n15)Footnote 11. *Treas Reg* § 1.958-2(f)(2).

(n16)Footnote 1. The pro rata share of any US shareholder's Subpart F income is the (1) amount that would have been distributed with respect to the stock owned by the shareholder if, on the last day of the corporation's taxable year on which it is a controlled foreign corporation, it had distributed pro rata to its shareholders an amount (a) that bears the same ratio to its Subpart F income for the taxable year as (b) the part of the year during which the corporation is a controlled foreign corporation, reduced by (2) the amount of distributions received by any other person during the year with respect to such stock, but only to the extent of the dividend that would have been received if the amount (a) that bears the same ratio to the Subpart F income of the corporation for the taxable year, as (b) the part of the year during

which the US shareholder did not own the stock bears to the entire year. Any gain included in the gross income of any person as a dividend under *IRC § 1248* is treated as a distribution with respect to the stock involved. *IRC § 951(a)(2)*.

(n17)Footnote 1.1. See § 20.04[2][c].

(n18)Footnote 2. The US shareholder includes the requisite amount in gross income for the taxable year in which or with which the taxable year of the corporation ends.

If the taxpayer omits from gross income an amount properly includable under *IRC § 951(a)*, the tax may be assessed, or a proceeding in court for the collection of the tax may be done without assessing, at any time within six years after the return was filed. *IRC § 6501(e)(1)(B)*.

A controlled foreign corporation having one US shareholder owning more than 50 percent of the total voting power of all classes of stock entitled to vote or 50 percent of the total value of all classes of stock of the corporation must adopt a taxable year that corresponds to, or ends one month earlier than, the taxable year of its majority US shareholder. *IRC § 898*.

Rev Proc 90-26, 1990-1 CB 512, contains guidance with respect to the required taxable year of controlled foreign corporations.

(n19)Footnote 3. *IRC § 951(c)*.

(n20)Footnote 4. A taxpayer owning 95 percent of the stock of a foreign corporation placed the stock in a voting trust. Under the voting trust agreement, the taxpayer was barred from exercising any voting rights of the shares or from controlling the board of directors. At issue in *Textron, Inc. v Commr*, 117 TC 67 (2001), was whether the taxpayer was subject to the inclusion provisions of *IRC § 951(a)*. The Tax Court held that it was not because it did not stock in the foreign corporation directly or indirectly (through a foreign entity). However, because the voting trust was a trust for tax purposes and the taxpayer was the grantor and sole beneficiary of the trust, the income earned by the trust was includable by the taxpayer under the grantor trust rules of the Code.

(n21)Footnote 4.1. *Treas Reg § 1.951-1(e)(2)*.

(n22)Footnote 4.2. *Treas Reg § 1.951-1(e)(3)(i)*. If there are dividends in arrears for prior taxable years with respect to a class of preferred stock of the corporation, the earnings and profits for the taxable year are attributed to the arrearage only to the extent the arrearage exceeds the corporation's earnings and profits remaining from prior taxable years beginning after Dec 31, 1962, or the date on which the stock was issued, whichever is later. *Treas Reg § 1.951-1(e)(3)(iv)*.

(n23)Footnote 4.3. *Treas Reg § 1.951-1(e)(3)(ii)*.

(n24)Footnote 4.4. *Treas Reg § 1.951-1(e)(3)(ii)(A)*. Earnings and profits are allocated, first, to any class of stock with nondiscretionary distribution rights such as preferred stock entitled to a fixed return.

Discretionary distribution rights do not include rights to redeem shares of a class of stock even if the distribution would be treated as a dividend. *Treas Reg § 1.951-1(e)(3)(ii)(B)*.

If a class of stock has both discretionary and nondiscretionary rights, earnings and profits are allocated to the nondiscretionary distribution rights under *Treas Reg § 1.951-1(e)(3)(i)* and to the discretionary rights under *Treas Reg § 1.951-1(e)(3)(ii)*. As to the latter, the value used in determining the amount of the distribution is the value of the stock solely attributable to the discretionary distribution rights. *Treas Reg § 1.951-1(e)(3)(iii)*.

(n25)Footnote 4.5. *Treas Reg § 1.951-1(e)(5)(i)*. A restriction or other limitation includes any limitation that has

the effect of limiting the allocation or distribution of earnings and profits by a controlled foreign corporation, other than currency or other restrictions or limitations imposed under the laws of any foreign corporation under *IRC* § 964(b). *Treas Reg* § 1.951-1(e)(5)(ii). The right to a periodic receipt of a fixed amount with respect to a class of stock that is a condition precedent to a further distribution of earnings and profits with respect to a class of stock (not including a distribution in partial or complete liquidation) is not a restriction or limitation on the distribution of earnings and profits of the controlled foreign corporation. *Treas Reg* § 1.951-1(e)(5)(iii).

(n26)Footnote 4.6. *Treas Reg* § 1.951-1(e)(5)(iv).

(n27)Footnote 4.7. *Treas Reg* § 1.951-1(e)(3)(v), applicable for taxable years of a controlled foreign corporation beginning after Jan 1, 2006.

For a discussion of *IRC* § 304, see § 5.04.

(n28)Footnote 4.8. *Treas Reg* § 1.951-1(e)(4)(ii), applicable for taxable years of a controlled foreign corporation beginning after Jan 1, 2006.

(n29)Footnote 4.9. *Id.*

(n30)Footnote 4.10. *Id.*

(n31)Footnote 4.11. *Id.* The applicable federal rate is determined under the rules of *IRC* § 1274(d)(1).

(n32)Footnote 5. *IRC* § 951(d).

(n33)Footnote 6. The term "insurance income" is defined in *IRC* § 953. It will not be discussed here.

(n34)Footnote 7. The international boycott factor is a fraction, the numerator of which reflects the corporation's world-wide operations in countries associated with an international boycott, and the denominator of which reflects its total world-wide operations. *IRC* § 999(c)(1). In lieu of the factor, the corporation can add income specifically attributable to boycott operations. *IRC* § 999(c)(2).

(n35)Footnote 8. Interest, dividends, royalties, other investment income, and carrying charges received or accrued by a foreign sales corporation are treated as US-source income for this purpose.

(n36)Footnote 9. *IRC* § 952(c)(1)(A). The manner in which the current earnings and profits limitation is applied is set forth in *Treas Reg* § 1.952-1(e).

For years after December 31, 1986, earnings and profits must be computed in the controlled foreign corporation's functional currency. *Temp Treas Reg* § 1.964-1T(g)(1)(i).

A controlled foreign corporation that receives a dividend from another controlled foreign corporation within the same chain of ownership is required to increase earnings and profits by the amount of the distribution. *Rev Rul* 86-33, 1986-1 CB 287.

(n37)Footnote 10. *IRC* § 952(c)(2).

(n38)Footnote 11. *IRC* § 952(c)(1)(B). In determining the deficit attributable to a qualified activity giving rise to foreign base company sales income or foreign base company services income, deficits in earnings and profits (to the extent not previously taken into account) for taxable years beginning after 1962 and before 1987 are also taken into account. Deficits for years beginning after 1982 and before 1987 are taken into account for a qualified activity giving rise to foreign base company oil related income.

For this purpose, the earnings and profits of a controlled foreign corporation are determined without regard to the LIFO inventory, installment sales, and completed contract method of accounting adjustments to earnings and profits required by *IRC § 312(n)*. *IRC § 952(c)(3)*.

(n39)Footnote 12. *IRC § 952(c)(1)(C)*. The provision is applied after *IRC § 952(c)(1)(A)* and *(B)*.

A sister corporation of a controlled corporation that had a common parent was held not to be a qualified chain member in *Stanford v Commr*, 152 F3d 450 (5th Cir 1998) . This prevented the use of that corporation's deficit to reduce the controlled foreign corporation's Subpart F income.

(n40)Footnote 13. *IRC § 954(a)*. A controlled foreign corporation that is a member of a partnership determines the character of its share of the partnership's income as if the income were realized directly by the controlled foreign corporation. *Treas Reg § 1.952-1(g)(1)*. The regulation, effective for taxable years of a controlled foreign corporation beginning on or after July 23, 2002, overrules the decision of the Eighth Circuit in *Brown Group, Inc & Subs v Commr*, 1996 US App LEXIS 8129 (8th Cir 1996) , *nonacq* 1996-2 CB 2 .

(n41)Footnote 14. *IRC § 954(b)(5)*.

(n42)Footnote 15. *IRC § 954(b)(3)(A)*; *Treas Reg § 1.954-1(b)(1)(i)(A)*. A controlled foreign corporation having a functional currency other than the US dollar must translate the \$1 million threshold using the weighted average exchange rate for the taxable year of the corporation. *Treas Reg § 1.954-1(b)(1)(i)(B)*.

(n43)Footnote 16. *Treas Reg § 1.954-1(b)(1)(i)(C)*.

(n44)Footnote 17. *Treas Reg § 1.954-1(b)(4)(i)*.

(n45)Footnote 18. *Treas Reg § 1.954-1(b)(4)(ii)*. The presumption can be rebutted by proof to the contrary.

Persons are related if they are in a relationship described in *IRC § 267(b)*. In determining whether two or more corporations are members of the same controlled group under *IRC § 267(b)(3)*, a person is considered to own stock owned directly by such person and stock owned with the application of *IRC §§ 267(c)* and *1563(e)(1)*. In determining whether a corporation is related to a partnership under *IRC § 267(b)(10)*, a person is considered to own the partnership interest owned directly by such person and the partnership interest owned with the application of *IRC § 267(e)(3)*. *Treas Reg § 1.954-1(b)(4)(iii)*.

(n46)Footnote 19. The presumption arising from activities or assets can be rebutted by proof that the activities carried on by each controlled foreign corporation would constitute a separate branch under the principles of *Temp Treas Reg § 1.367(a)-6T(g)(2)* if carried on by a United States person. In general, a separate branch exists if a particular group of activities is sufficiently integrated to constitute a single business that could be operated as an independent business.

(n47)Footnote 19.1. The principles of *Temp Treas Reg § 1.367(a)-6T(g)(2)* apply in determining whether the activities would constitute a single branch operation.

(n48)Footnote 19.2. *IRC § 954(b)(3)(B)*; *Treas Reg § 1.954-1(b)(1)(ii)*.

(n49)Footnote 19.3. *Treas Reg § 1.954-1(b)(1)(ii)*; *IRC § 952(b)*. For purposes of *IRC § 952(b)*, any exemption (or reduction) with respect to the branch profits tax imposed by *IRC § 884* is not taken into account.

(n50)Footnote 19.4. *Treas Reg § 1.954-1(b)(2)*.

(n51)Footnote 19.5. *Treas Reg § 1.954-1(b)(2)*.

(n52)Footnote 19.6. *IRC § 954(b)(5); Treas Reg § 1.954-1(c).*

(n53)Footnote 19.7. *Treas Reg § 1.954-1(c)(ii).* The provisions of *IRC § 952(c)(1)* are discussed in § 20.04[2][b].

(n54)Footnote 20. *IRC § 954(b)(4).* The Service will not issue rulings concerning the effective rate of tax that a foreign country will impose on income. *Rev Proc 2007-7, 2007-1 CB 227* .

Full inclusion foreign base company income will be excluded from Subpart F income if more than 90 percent of the adjusted gross foreign base company income and adjusted gross insurance income of a controlled corporation (determined without regard to the full inclusion test) is attributable to net amounts excluded from Subpart F income to have the high tax exception apply. *Treas Reg § 1.954-1(d)(6).*

(n55)Footnote 20.1. *Treas Reg § 1.954-1(d)(1).*

(n56)Footnote 20.2. *Treas Reg § 1.954-1(d)(1).* An election to exclude passive foreign personal holding company income must be made consistently for all items of such income eligible to be excluded for the taxable year. *Treas Reg § 1.951-1(d)(4).*

(n57)Footnote 20.3. *Treas Reg § 1.954-1(d)(2).*

(n58)Footnote 21. *Treas Reg § 1.954-1(d)(3)(i).*

(n59)Footnote 22. *Treas Reg § 1.954-1(d)(3)(ii).*

(n60)Footnote 23. Dividends, interest (including factoring income that is treated as income equivalent to interest), rents, and royalties received or accrued from a controlled foreign corporation that is a related party are not treated as foreign personal holding company income to the extent attributable or properly allocable (determined under rules similar to those applicable to a look-through of such income when received by a US shareholder from a controlled foreign corporation) to income of the related person that is neither Subpart F income nor income treated as effectively connected with the conduct of a trade or business in the US. *IRC § 954(c)(6)(A).* The rule applies to taxable years of foreign corporations beginning after Dec 31, 2003, and ending before Jan 1, 2009, and to taxable years of US shareholders with or within which such taxable years end. *IRC § 954(c)(6)(B).*

The Service intends to issue additional regulations concerning *IRC § 954(c)(6)*. *Notice 2007-9, 2007-5 IRB 401* .

(n61)Footnote 24. *IRC § 954(c)(1).* In the case of any regular dealer in property, foreign personal holding company income does not include the excess of gains over losses from the sale or exchange of property if the property is held by the taxpayer for sale to customers in the ordinary course of business, or if the sale or exchange does not give rise to any income. *IRC § 954(c)(1)(B).* In *Dover Corp & Subs v Commr, 122 TC 324 (2004)* , a deemed sale of a subsidiary's assets immediately after a check-the-box liquidation of the subsidiary did not constitute foreign personal holding company income.

Any item of income, gain, deduction, or loss from a notional principal contract entered into for purposes of hedging any item described in (1)-(5) of the text is taken into account under the rules applicable to the other category and not as a separate item of foreign personal holding company income.

United States municipal bond interest received by a controlled foreign corporation is includable in its foreign personal holding company income. *Treas Reg § 1.954-2(b)(3).*

If a distribution by a controlled foreign corporation results in the inclusion of an amount in income as a deemed dividend by a foreign corporation, the deemed dividend is not included as foreign personal holding company income. *Treas Reg § 1.367(b)-5(f).*

Income that is personal holding company income in the hands of the controlled foreign corporation retains that character when it enters the income of domestic corporations under *IRC § 951*. *Rev Rul 76-403*, 1976-2 CB 229 .

Income from notional principal contracts based solely on interest rates or interest rate indices is income equivalent to interest unless earned by a "regular dealer"--a controlled foreign corporation that regularly and actively deals in property and positions in property with unrelated persons in the ordinary course of business. *Treas Reg §§ 1.954-2(a)(4)(iv)*, *1.954-2(h)(3)*.

Amounts received under a personal service contract are included only if at some time during the taxable year 25% or more in value of the outstanding stock of the corporation is owned, directly or indirectly, by or for the person who has performed, is to perform, or may be designated as the one to perform, the services.

(n62)Footnote 25. *IRC § 954(c)(1)(C)*. A commodity hedging transaction is a hedging transaction entered into by the controlled foreign corporation in the normal course of the corporation's trade or business primarily to manage risk of price changes or currency fluctuations with respect to ordinary property or property described in *IRC § 1231(b)* held by the corporation, or to manage such other risks as may be prescribed in regulations; the transaction must be clearly identified as a hedging transaction in accordance with *IRC § 1221(a)(7)*. *IRC §§ 954(c)(5)(A)*, *1221(b)(2)*.

The "substantially all" test is met if 85% of the controlled foreign corporation's taxable income is derived from its business as an active producer, processor, merchant, or handler of commodities. *Treas Reg § 1.954-2(f)(iii)(C)*. Commodities with respect to which gains and losses are not taken into account under *IRC § 954(c)(2)(C)* in computing a controlled foreign corporation's foreign personal holding company income are not taken into account in applying the substantially all test to the corporation. *IRC § 954(c)(5)(B)*.

Regulations provide that a hedging transaction entered into by a controlled foreign corporation with respect to its business as a producer, processor, merchant, or handler of commodities may be a qualified hedging transaction. *Treas Reg § 1.954-2(f)(2)(v)*. For this purpose, a producer, processor, merchant, or handler of commodities includes a controlled foreign corporation that regularly uses commodities in a manufacturing, construction, utilities, or transportation business. A corporation is not a producer, processor, merchant, or handler of commodities if its business is primarily financial. *Treas Reg § 1.954-2(f)(2)(vi)*. The regulations are effective for hedging transactions entered into on or after Jan 31, 2003.

(n63)Footnote 26. The property involved consists of property that (a) gives rise to dividends, interest, royalties, rents and annuities (other than rents or royalties that are derived from the active conduct of a trade or business and that are received from a person other than a related person), but not property that gives rise to income that is not treated as foreign personal holding company income under *IRC § 954(h)* or *954(i)*; (b) is an interest in a trust, partnership, or REMIC; or (c) does not give rise to any income.

(n64)Footnote 27. *IRC § 956(c)(2)(J)* refers to deposits of cash or securities made or received on commercial terms in the ordinary course of a US or foreign person's business as a dealer in securities or in commodities, but only to the extent the deposits are made or received as collateral or margin for (i) a securities loan, notional principal contract, options contract, forward contract, or futures contract, or (ii) any other financial transaction in which it is determined that it is customary to post collateral or margin.

(n65)Footnote 28. *IRC § 954(c)(2)(C)(i)*, *(ii)*. *IRC § 954(c)(2)(C)(ii)* applies only to the first taxable year of a foreign corporation beginning after Dec 31, 1998 and before Jan 1, 2009, and to taxable years of US shareholders with or within which the taxable year of the foreign corporation ends. *IRC § 954(h)(9)*.

See *IRC § 954(h)(7)* for anti-abuse rules regarding the application of *IRC § 954(c)(2)(C)(ii)*.

(n66)Footnote 29. *IRC § 954(c)(1)(C), (D); Treas Reg § 1.954-2(g)(2)(ii)*. Currency gain or loss arising from an interest-bearing liability must be allocated and apportioned between Subpart F income and non-Subpart F income in the same manner that interest expense associated with the liability is allocated and apportioned under *Temp Treas Reg §§ 1.861-9T and 1.861-12T. Treas Reg § 1.954-2(g)(2)(iii)*.

Transactions in dealer property that are entered into by a controlled foreign corporation that is a regular dealer in such property in its capacity as a dealer are treated as directly related to the business needs of the controlled foreign corporation. *Treas Reg § 1.954-2(g)(2)(ii)(C); Prop Treas Reg § 1.954-2(g)(2)(ii)(C)(1)*.

An interest-bearing liability incurred by a controlled foreign corporation that is denominated in (or determined by reference to) a nonfunctional currency is treated as dealer property if the liability, by being denominated in such currency, reduces the controlled foreign corporation's currency with respect to dealer property, and the liability is identified on the controlled foreign corporation's records as a liability treated as dealer property before the close of business on the day the liability is incurred. *Prop Treas Reg § 1.954-2(g)(2)(ii)(C)(2)(i)*. If the controlled foreign corporation identifies certain interest-bearing liabilities as liabilities treated as dealer property but fails to identify other interest-bearing liabilities that manage the corporation's currency risk with respect to assets that constitute dealer property, the Service may treat the other liabilities as dealer property if it determines that the failure to identify the other liabilities had as one of its principal purposes the avoidance of federal income tax. *Prop Treas Reg § 1.954-2(g)(2)(ii)(C)(2)(ii)*.

(n67)Footnote 30. *IRC § 954(c)(2)(A)*. Rents derived from leasing an aircraft or vessel in foreign commerce can be treated as derived in the active conduct of a trade or business, as determined under regulations prescribed by the Service, if the active leasing expenses are not less than 10% of the profit on the lease.

A person is a related person with respect to a controlled foreign corporation, if:

such person is an individual, corporation, partnership, estate, or trust that controls, or is controlled by, the controlled foreign corporation; or

such person is a corporation, partnership, trust, or estate that is controlled by the same persons who control the controlled foreign corporation.

Control, here, is the ownership of more 50 percent of the voting stock of a corporation. The rules for determining ownership prescribed by *IRC § 958* are applicable for this purpose. *IRC § 954(d)(3)*.

(n68)Footnote 31. *IRC § 954(c)(2)(B)*.

(n69)Footnote 32. The exception does not apply to dividends paid out of earnings and profits accumulated before the corporations were related persons. *Ltr Rul 199907022*.

(n70)Footnote 33. *IRC § 954(c)(3)*. The exception does not apply (i) in the case of any interest, rent, or royalty to the extent it reduces the payor's Subpart F income, or creates (or increases) a deficit that may reduce the Subpart F income of the payor or another controlled foreign corporation, or (ii) to a dividend if the dividend is attributable to earnings and profits accumulated by the distributing corporation during a period in which the person receiving the dividend did not hold the stock, either directly or indirectly through a chain of one or more subsidiaries (each of which is organized in the same foreign country as the controlled foreign corporation and has a substantial part of its assets used in its business located in that country).

(n71)Footnote 34. *Treas Reg § 1.954-2(a)(5)(ii)(A)*.

(n72)Footnote 35. *IRC § 954(c)(4)(A)*.

(n73)Footnote 36. *IRC § 954(c)(4)(B)*.

(n74)Footnote 37. *IRC § 954(c)(4)(B)*.

(n75)Footnote 38. The provision applies only to the taxable years of a foreign corporation beginning after Dec 31, 1998, and before Jan 1, 2007, and to taxable years of US shareholders with or within which any such taxable year of the foreign corporation ends. *IRC § 954(h)(9)*. See *IRC § 954(h)(7)* for anti-abuse rules to be used in applying *IRC § 954(h)(1)*.

IRC § 954(h)(1) does not apply to income described in *IRC § 954(c)(2)(C)(ii)* (discussed above) of an eligible controlled foreign corporation that is a dealer in securities. *IRC § 954(h)(6)*.

(n76)Footnote 39. *IRC § 954(h)(2)(A)*.

(n77)Footnote 40. A person is a related person with respect to a controlled foreign corporation if (1) the person is an individual, corporation, partnership, trust, or estate that controls or is controlled by the foreign corporation, or (2) the person is a corporation, partnership, trust, or estate that is controlled by the same person or persons that control the controlled foreign corporation. *IRC § 954(d)(3), 954(h)(5)(E)*.

(n78)Footnote 41. *IRC § 954(h)(2)(B)*. A lending or financing business is defined as the business of (a) making loans; (b) purchasing or discounting accounts receivable, notes, or installment obligations; (c) engaging in leasing (including entering into leases and purchasing, servicing, and disposing of leases and leased assets); (d) issuing letters of credit or providing guarantees; (e) providing charge and credit card services; or (f) rendering services or making facilities available in connection with the above activities carried on by the corporation (or qualified business unit) rendering the service or making the facilities available, or by an affiliated corporation (or qualified business unit of the affiliated corporation). *IRC § 954(h)(4)*.

(n79)Footnote 42. *IRC § 954(h)(3)(A)*. A qualified business unit is a separate and clearly identifiable unit of a trade or business of a taxpayer that maintains separate books and records. *IRC §§ 954(h)(5)(D), 989(a)*.

The home country of the controlled foreign corporation is the country in which the corporation was created or organized. The home country of a qualified business unit is the country in which it maintains its principal office. *IRC § 954(h)(5)(A), (B)*.

An activity will be treated as conducted directly by an eligible foreign corporation or qualified business unit in its home country if the activity is performed by employees of a related person and (i) the related person is an eligible controlled foreign corporation the home country of which is the same or the home country of the corporation or unit to which the provision is being applied, (ii) the activity is performed in the home country of the related person, and (iii) the related person is compensated on an arm's-length basis for the performance of its employees and the compensation is treated as earned by the related person in its home country for purposes of that country's tax laws. *IRC § 954(h)(3)(E)*.

(n80)Footnote 43. *IRC § 954(h)(3)(B)*.

(n81)Footnote 44. *IRC § 954(h)(3)(C)*.

(n82)Footnote 45. *IRC § 954(h)(3)(D)*.

(n83)Footnote 46. *Treas Reg § 1.954-2(a)(5)(ii)(B)*.

(n84)Footnote 47. *IRC § 954(i)(2)*.

(n85)Footnote 48. *Treas Reg § 1.954-2(a)(5)(ii)(C)*.

(n86)Footnote 49. *IRC § 954(d)(1)*. The provision also covers fees and commissions which the controlled foreign corporation receives for acting as an agent for a related person in purchasing or selling personal property.

Foreign base company sales income does not include income of a controlled foreign corporation derived in connection with the sale of personal property manufactured, produced, or constructed by it in whole or in part from personal property that it purchased. *Treas Reg § 1.954-3(a)(4)(i)*. To determine whether a controlled foreign corporation's distributive share of any item of gross income of a partnership would have been foreign base company sales income if received by the corporation directly, the property sold will be considered to be manufactured, produced, or constructed by the controlled foreign corporation only if the manufacturing exception would have applied to exclude the income from foreign base company sales income if the controlled foreign corporation had earned the income directly, taking into account only the activities of, and property owned by, the partnership. *Treas Reg § 1.954-3(a)(6)(i)*.

The term "personal property" does not include agricultural commodities that are not grown in the US in commercially marketable quantities. *Treas Reg § 1.954-3(a)* contains a list of agricultural commodities that are grown in the United States in commercially viable quantities.

See generally, Voce, "Foreign Base Company Sales Income: A Primer and an Update," 53 *Tax Lawyer* 327 (2000).

(n87)Footnote 50. S Rep No 1881, 87th Cong, 2d Sess 84 (1962).

(n88)Footnote 51. *Treas Reg § 1.954-3(a)(4)(i)*.

(n89)Footnote 52. *IRC § 954(d)(3)*. Rules similar to those contained in *IRC § 958* are used in determining ownership.

If the determination of whether an item of partnership income would be Subpart F income if received by the controlled foreign corporation directly requires a determination of whether an entity is a related person, the determination is made by reference to the controlled foreign corporation, not to the partnership. *Treas Reg § 1.954-1(g)(1)*. The same holds true for a determination of whether an activity occurred within or outside the country in which the controlled foreign corporation is organized.

(n90)Footnote 53. *Treas Reg § 1.954-3(a)(4)(ii), (iii)*.

(n91)Footnote 54. S Rep No 1881, 87th Cong, 2d Sess (1962); *Treas Reg § 1.954-3(a)(4)(iii)*, Ex (3).

(n92)Footnote 55. *IRC § 954(d)(2)*. There is no statutory or regulatory definition of "branch." The Tax Court believes that it should be given its ordinary meaning in a business or accounting sense. Hence, in *Ashland Oil, Inc v Commr*, 95 TC 348 (1990), it refused to treat a separately incorporated manufacturing entity operating pursuant to an arm's-length contract, with the controlled foreign corporation having no direct or indirect stock interest in that entity (and vice versa), as a branch. *Ashland Oil* was followed in *Vetco, Inc v Commr*, 95 TC 579 (1990).

The Service will follow the *Ashland* and *Vetco* opinions. The activities of a contract manufacturer cannot be attributed to a controlled foreign corporation for purposes of either *IRC § 954(d)(1)* or *IRC § 954(d)(2)* to determine whether the income of a controlled foreign corporation is foreign base company sales income. *Rev Rul 97-48, 1997-2 CB 89*.

(n93)Footnote 56. 1975-1 CB 244.

(n94)Footnote 57. Under the "branch rule," *IRC § 954(d)(2)*, the controlled foreign corporation would have subpart F income if the contract manufacturer/branch were located in a country other than the controlled foreign corporation's country of incorporation, and the controlled foreign corporation's profit from the sale of the manufactured product were taxed at an effective rate that was less than 90 percent of, and at least 5 percentage points less than, the effective rate in

the country in which the contract manufacturer/branch was located. See *Treas Reg* § 1.954-3(b)(1)(ii); *Rev Rul* 75-7 .

(n95)Footnote 58. See *Rev Rul* 97-48 .

(n96)Footnote 59. The regulations will apply to taxable years of controlled foreign corporations beginning after June 30, 2009, but, at their election, taxpayers may apply them retroactively to all open taxable years. *Treas Reg* § 1.954-3(a)(4)(iv)(c) and (d).

(n97)Footnote 60. *Treas Reg* § 1.954-3(a)(4)(iv), added by *TD 9438* , *73 Fed Reg* 79334 (Dec 29, 2008) . Such activities include, but are not necessarily limited to: oversight and direction of manufacturing processes; participation in manufacturing processes (though such participation fails to satisfy the regulations' physical manufacturing tests); selection of materials or vendors, or control of raw materials, work-in-process or finished goods; management of manufacturing costs or capacities; control of manufacturing related logistics; quality control; and developing or directing the use or development of product design and design specifications, trade secrets, technology or other intellectual property for the purpose of manufacturing the property.

(n98)Footnote 61. See *TD 9438* , *73 Fed Reg* at 79336.

(n99)Footnote 62. *Treas Reg* §§ 1.952-1(g) and 1.954-1(g)(1).

(n100)Footnote 63. *Treas Reg* § 1.954-1(g)(1).

(n101)Footnote 64. *Treas Reg* § 1.954-1(g)(2). The "related party" label also applies in transactions where the controlled foreign corporation sells property on behalf of the partnership to a related party (eg, on a commission basis), or sells property on behalf of a related party to the partnership. *Id.*

(n102)Footnote 65. See *Treas Reg* § 1.954-1(g)(3), Ex 2. Note that for purposes of determining whether CFC1's distributive share is foreign base company sales income, its country of organization, not that of Partnership, must be used. *Treas Reg* § 1.954-1(g)(1).

(n103)Footnote 66. *IRC* § 954(e)(1). A controlled foreign corporation's distributive share of a partnership's services income will be deemed to be derived from services performed for or on behalf of a related person if the partnership is a related person with respect to the controlled foreign corporation, and, in connection with the services performed by the partnership, the controlled foreign corporation (or a related person) provided assistance that would have constituted substantial assistance contributing to the performance of the services if furnished to the controlled foreign corporation by a related person. *Treas Reg* § 1.954-4(b)(2)(iii).

(n104)Footnote 67. S Rep No 1881, 87th Cong, 2d Sess (1962).

(n105)Footnote 68. *IRC* §§ 907(c)(2), 954(g)(1). Foreign base company oil related income does not include any dividend or interest that is passive income as defined in *IRC* § 904(d)(2)(A), discussed in § 20.02[4][e][iii]. It also does not include any income *IRC* § 954(c). See § 20.03[2][b][iii].

(n106)Footnote 69. *IRC* § 954(g)(1)(A), (B).

(n107)Footnote 70. *IRC* § 954(g)(2).

(n108)Footnote 71. *IRC* § 955(a)(1).

(n109)Footnote 72. *IRC* § 955(a)(2).

(n110)Footnote 73. *IRC* § 955(a)(2).

(n111)Footnote 74. *IRC § 955(b)(1)*.

(n112)Footnote 75. *IRC § 955(b)(5)*.

(n113)Footnote 76. *IRC § 956(a)(1)*. The amount taken into account with respect to any property is its adjusted basis as determined for purposes of computing earnings and profits, reduced by any liability to which the property is subject.

A controlled foreign corporation will be considered to hold indirectly any investment in US property held on its behalf by a trustee or nominee or, at the discretion of the District Director, investments in US property acquired by any other foreign corporation that is controlled by the foreign corporation, if one of the principal purposes for creating, organizing, or funding the other foreign corporation is to avoid application of *IRC § 956* with respect to the controlled foreign corporation. *Temp Treas Reg § 1.956-1T(b)(4)(i)*.

(n114)Footnote 77. *IRC § 956(a)(2)*.

(n115)Footnote 78. *IRC § 956(b)(1)*.

(n116)Footnote 79. *IRC § 956(b)(2)*.

(n117)Footnote 80. *IRC § 956(b)(2)*.

(n118)Footnote 81. *IRC §§ 956(b)(3), 956A(e)*.

(n119)Footnote 82. In *Schering-Plough Corp v US*, 2009 US Dist LEXIS 77467 (DNJ August 28, 2009), the Court applied the substance over form, step transaction and economic substance doctrines to recharacterize a US parent's sale to its controlled foreign corporation subsidiary as in reality a loan from the subsidiary to the parent. The US parent sold its subsidiary, in exchange for cash, the right to future income due under the "receive leg" of an interest rate swap the parent entered into with a bank in anticipation of the sale. The US parent remained obligated to the bank on the "pay leg" of the swap, and its payments to the bank funded the income "purchased" by the subsidiary. Finding that the pay and receive legs were of approximately equal value, and that as a result of related transactions both the US parent and the bank assumed no risk and had no expectation of profit from the interest rate swap (other than the bank's fee for serving as intermediary), the Court dismissed the swap as economically meaningless and treated the bank as a mere conduit for the US parent's repayment of the cash initially advanced by its subsidiary. The subsidiary's acquisition of the US parent's "obligation" constituted "US property" and triggered the recognition of subpart F income.

(n120)Footnote 83. *IRC § 956(c)(1)*. A state obligation is not an obligation of a US person, and is not to be taken into account in determining the US shareholder's pro rata share of the increase in earnings invested in US property. *Rev Rul 71-14, 1971-1 CB 218*.

The final regulations to be issued under *IRC § 956* will exclude from the definition of the term "obligation" an obligation that would constitute an investment in US property if held at the end of the controlled foreign corporation's taxable year, provided (i) the obligation is collected within 30 days from the time it is issued, and (ii) the corporation does not hold for more than 60 days during the year obligations that would constitute an investment in US property if held at the end of the taxable year. *IRS Notice 88-108, 1988-2 CB 445*.

A loan by a controlled foreign corporation is considered an investment in US property when the loan is made to a foreign corporation that is treated as a domestic subsidiary pursuant to an election by its parent under *IRC § 1504(d)*. *Rev Rul 82-171, 1982-2 CB 161*.

The Service has held that a controlled foreign corporation is deemed to have made an investment of earnings in US property when its stock is pledged as collateral by its US shareholders. The Service bases its position on *IRC § 956(c)*,

which provides that the corporation is treated as holding the obligation of a US person if it acts as a pledgor or guarantor. *Rev Rul 76-125, 1976-1 CB 204*. The Tax Court disagrees with the ruling and holds otherwise. *Ludwig v Commr, 68 TC 979 (1977)*.

A purchase of US person's debt obligations that mature and are repaid shortly before the end of the controlled foreign corporation's taxable year may constitute an investment of earnings in US property where new debt obligations issued by the same US person are purchased by the controlled foreign corporation shortly after the beginning of its next taxable year. *Rev Rul 89-73, 1989-1 CB 258*.

If a controlled foreign corporation is a partner in a partnership that owns property that would be US property if owned directly by the controlled foreign corporation, the corporation will be treated as holding an interest in the property equal to its interest in the partnership and the interest will be treated as an interest in US property. *Treas Reg § 1.956-2(a)(3)*.

(n121)Footnote 84. Vessels leased by a controlled foreign corporation and operated exclusively between ports in the US and ports in possessions of the US are not used in foreign commerce so that leasehold improvements made on the vessels are considered US property for purposes of *IRC § 956*. *Rev Rul 73-195, 1973-1 CB 349*.

(n122)Footnote 85. If an item is excluded from income because of the application of *IRC § 883(a)(1)*, *IRC § 952(b)* will not apply and the income will be treated as Subpart F income. *Rev Rul 87-15, 1987-1 CB 248*.

For purposes of *IRC § 952(b)*, any exemption (or reduction) with respect to the branch profits tax imposed by *IRC § 884* is not taken into account.

(n123)Footnote 86. In determining stock ownership for this purpose, the attribution rules of *IRC § 318* apply irrespective of the residence of the owner of the shares.

(n124)Footnote 87. *IRC § 956(c)(2)*. The term "dealer in securities" has the meaning given the term by *IRC § 475(c)(1)*, and the term "dealer in commodities" has the meaning given the term by *IRC § 475(e)*, except that the term includes a futures commission merchant. See *§ 18.05*.

(n125)Footnote 88. Tax-exempt interest received by a controlled foreign corporation is not includable currently in the income of its US shareholders. Since the purpose of *IRC § 959* is the prevention of double taxation of previously reported income, the Service takes the position that the provision does not apply to an actual distribution of earnings attributable to such interest. *Ltr Rul 8928036*.

The distribution of previously taxed income and the amount of the exclusion from income is kept in the foreign functional currency of the distributing foreign corporation for purposes of *IRC § 301*, because the distribution is not taxable as a dividend under *IRC § 301(c)(1)*. However, the distribution must be translated into U.S. dollars to determine the amount of exchange gain or loss under *IRC § 986(c)* (discussed in *§ 20.08[2]*). *TAM 200141003*.

(n126)Footnote 89. *IRC § 959(e)*. A purchaser of stock in a US corporation that is formed principally to hold the stock of a controlled foreign corporation does not receive previously taxed income treatment. Instead, that treatment is accorded to the US corporation whose stock was acquired where dividend consequences attended the sale of the stock under *IRC § 1248(e)*.

(n127)Footnote 90. *IRC § 959(f)(2)*.

(n128)Footnote 91. *IRC § 959(d)* provides that any distribution excluded from gross income under *IRC § 959(a)* "shall be treated, for purposes of this chapter, as a distribution which is not a dividend; except that such distributions shall immediately reduce earnings and profits."

Following a distribution out of earnings and profits by a controlled foreign corporation of property that has depreciated in value, the corporation's earnings and profits will be adjusted by reducing the sources of the distributions in the order set forth in *IRC § 959(c)*, to the extent thereof. *Rev Rul 86-131, 1986-2 CB 135* .

(n129)Footnote 92. *IRC § 959(f)(1)*.

(n130)Footnote 93. *IRC § 961(a)*. The increase is limited in the case of an individual shareholder who elects, under *IRC § 962*, to be subject to tax at corporate rates. See § 20.03[3][a].

(n131)Footnote 94. *IRC § 961(b)(1)*. A special rule is applied if the shareholder has made the *IRC § 962* election.

The basis reduction is permitted only if the exclusion from gross income comes under *IRC § 959(a)(1)*. There is no reduction if the governing exclusion is *IRC § 959(a)(2)*, unless the excluded amount is distributed to the US shareholder. *Rev Rul 76-539, 1976-2 CB 232* .

(n132)Footnote 95. *IRC § 961(b)(2)*.

(n133)Footnote 96. *Treas Reg §§ 1.961-1(a)(1), 1.961-2(a)(1)*.

(n134)Footnote 97. *IRC § 964(e)(1)*. See § 20.03[4]. The basis adjustments of *IRC § 961(c)* also apply to the stock of higher-tiered controlled foreign corporations in the same chain of ownership.

(n135)Footnote 98. *IRC § 961(c)*. The basis adjustments of *IRC § 961(c)* also apply to the stock of higher-tiered controlled foreign corporations in the same chain of ownership.

(n136)Footnote 99. *IRC § 960(a)(1)*. *IRC § 902* is discussed in § 20.02[4][c].

If a domestic corporation computes deemed-paid taxes under both *IRC § 902* and *IRC § 960* in the same year, *IRC § 960* is applied first. After the deemed-paid taxes are computed under *IRC § 960* with respect to a deemed income inclusion, post-1986 undistributed earnings and profits and post-1986 foreign income taxes in each separate category are reduced by the appropriate amounts before deemed-paid taxes are computed under *IRC § 902* with respect to a dividend distribution. *Treas Reg § 1.960-1(i)(2)*.

(n137)Footnote 100. *IRC § 960(a)(2)*. *IRC § 960(b)* sets forth a special rule relating to the *IRC § 904* limitation on the foreign tax credit for the year of receipt of previously taxed earnings and profits.

Ltr Rul 9023006 illustrates the proper method of computing earnings and profits for determining foreign tax credits under *IRC §§ 902* and *960* if, in the same taxable year, the US corporation includes an amount in income under *IRC § 951(a)* and also receives a cash dividend from its foreign subsidiary.

(n138)Footnote 1. *IRC § 962(a), (b)*; *Treas Reg § 1.962-2(a)*.

(n139)Footnote 2. *IRC § 962(c)*. The corporate tax rate is the sum of 15 percent of the first \$50,000 of taxable income, 25 percent of the next \$25,000, and 34 percent of taxable income in excess of \$75,000.

A corporation with taxable income in excess of \$100,000 must increase its tax by the lesser of 5 percent of such excess or \$11,750.

(n140)Footnote 3. *Treas Reg § 1.962-1(b)(1)(i) (b)*, (b)(2)(ii), (c).

(n141)Footnote 4. *IRC §§ 78, 960(a)(1)*.

(n142)Footnote 5. Each bracket amount specified in *IRC § 11(b)* would be reduced by one-half, the ratio of the

Subpart F income included in the shareholder's income (\$90,000) to the shareholder's pro rata share of the corporation's earnings and profits (60 percent of \$300,000).

(n143)Footnote 6. *IRC § 962(d)*.

(n144)Footnote 7. *Treas Reg § 1.962-2(b)*.

(n145)Footnote 8. *IRC § 962(b); Treas Reg § 1.962-2(c)*.

(n146)Footnote 9. *Treas Reg § 1.962-2(c)*.

(n147)Footnote 10. See generally Schenk & Balkin, "Subpart G Tax Incentives for Export Trade: A Technical Analysis of Tax Haven Operations," *54 Minn L Rev* 245 (1969); Brudno, "Export Trade Corporations," *5 Inst on Private Investments Abroad & Foreign Trade* 59 (1963).

(n148)Footnote 11. *IRC § 971(a)(3)*.

(n149)Footnote 12. S Rep No 1881, 87th Cong, 2d Sess 91 (1962).

(n150)Footnote 13. "Export promotion expenses" are defined by *IRC § 971(d)* as being the following expenses paid or incurred in the production of export trade income:

salaries or other compensation for personal services rendered;

rent paid for the use of property; an allowance for depreciation;

and any other ordinary and necessary expenses reasonably allocable to the receipt or production of export trade income.

No expense incurred in the United States will be treated as an export promotion expense unless 90 percent of each category of expense is incurred outside the United States.

(n151)Footnote 14. Defined as working capital necessary for the production of export trade income, inventory of export property, facilities located outside the United States for the storage, handling, transportation, or servicing of export property, and evidences of indebtedness executed by unrelated persons in connection with the purchase of export property. *IRC § 971(c)*.

A controlled foreign corporation need not take into account an excess of current liabilities over current assets (negative working capital) when determining the amount of its export trade assets. *Rev Rul 69-549, 1969-2 CB 158*.

(n152)Footnote 15. *IRC § 970(a)(1), (2)*.

(n153)Footnote 16. *IRC § 970(c)(3)*. The amount taken into account with respect to any asset is its adjusted basis reduced by any liability to which the asset is specifically subject. *IRC § 970(c)(1); Treas Reg § 1.970-1(d)(1)(iii)*.

IRC Section 970(c)(4) permits an election to determine the decrease in investment as of a day other than the last day of the taxable year and preceding taxable year.

(n154)Footnote 17. An export trade corporation transferred property having an adjusted basis equal to its untaxed Sub-part F income to a commonly owned DISC without receiving any consideration for the transfer. The transfer did not reduce the export trade corporation's investment in export trade assets for purposes of applying *IRC § 970(b)*. *Rev Rul 73-196, 1973-1 CB 354*.

(n155)Footnote 18. *Treas Reg § 1.970-1(c)(2)*.

Suppose, in a given year, a controlled foreign corporation, qualifying as an export trade corporation, has \$400 Subpart F income, of which \$300 is excluded under *IRC § 970(a)*. The corporation invests the \$400 in export trade assets. In a later year, the corporation sells \$100 of those assets and distributes \$100 to its United States shareholder. The reduction in export trade assets and the distribution to the shareholder of an amount equal to the previously included Subpart F income are treated as separate events. Thus, while the actual distribution is excluded from the shareholder's gross income under *IRC § 959(a)*, the amount of the reduction in export trade assets must be included in the shareholder's income. *Rev Rul 71-213, 1971-1 CB 219* .

(n156)Footnote 19. *IRC § 971(a)(1)*.

(n157)Footnote 20. *IRC § 971(a)(2)*.

(n158)Footnote 21. *IRC § 971(b)*. The Service has ruled that income derived by an export trade corporation from sales of export property solicited by a related foreign corporation acting merely as a commission sales agent of the export trade corporation is export trade income. *Rev Rul 71-184, 1971-1 CB 220* .

(n159)Footnote 1. *IRC § 1248* applies only if the gain realized is recognized in whole or in part. *Treas Reg § 1.1248-1(c)*.

A US person will be treated as having sold or exchanged stock if the person is treated as realizing gain from the sale or exchange of the stock. This means that redemptions and liquidations treated as exchanges are subject to *IRC § 1248(a)*.

An amount treated as a dividend under *IRC § 1248* cannot be taken into account in determining the extent to which capital losses are deductible under *IRC § 1211*. *Rev Rul 74-60, 1974-1 CB 236* .

To determine how much of a parent's gain on the sale of a controlled foreign corporation's stock is a dividend under *IRC § 1248*, the foreign corporation's earnings and profits must be reduced by presale distributions to the parent and postsale distributions to the purchaser. *TAM 199906035* .

See, generally, Friedman & Silbert, "The Ultimate U.S. Tax Burden on Foreign Operations--Section 1248," 24 *NYU Inst on Fed Tax* 1401 (1966); Irell & Stone, "Understanding Section 1248--The New Tax Law Regarding Sales or Liquidations of Foreign Corporations," 1964 *So Calif Tax Inst* 321.

(n160)Footnote 2. *IRC § 1248(h)*.

(n161)Footnote 3. *IRC § 964(e)(1)*. The provision is effective for gain recognized on transactions, including deemed sales, occurring after Aug 5, 1997.

Regulations can provide for a basis adjustment to the stock of the selling controlled foreign corporation to be made to reflect the inclusion in income by the US shareholder. *IRC § 961(c)*. The basis adjustments of *IRC § 961(c)* also apply to the stock of higher-tiered controlled foreign corporations in the same chain of ownership.

(n162)Footnote 4. *IRC § 964(e)(2)*.

(n163)Footnote 5. A finding, that the substance of a purported sale of stock in a foreign corporation was in fact a liquidation, extended the period during which the corporation qualified as a controlled foreign corporation. *Est of Weiskopf v Commr*, 64 TC 78 (1975) , *affd mem 37 AFTR2d 76-1427 (2d Cir 1976)* .

(n164)Footnote 6. *Treas Reg § 1.1248-1(d)(1)*. No additional credit is allowable if the amount of the *IRC § 1248*

dividend is actually distributed to the shareholder at a later date. *Rev Rul 90-31, 1990-1 CB 147*.

(n165)Footnote 7. *Treas Reg § 1.1248-4(b)(1)*.

(n166)Footnote 8. *IRC § 1248(b)*. The limitation applies only if the taxpayer can prove the amount of foreign taxes to be taken into account under Section 1248(b). *IRC § 1248(h)*.

The tax attributable to amounts included as dividends in the gross income of a partner in a partnership that sells stock in a controlled foreign corporation is subject to the limitation in *IRC § 1248(b)*. *Rev Rul 69-124, 1969-1 CB 203*. The same holds true for a shareholder in an S corporation. *Ltr Rul 199908044*.

(n167)Footnote 9. *IRC § 1248(c)(1)*. The computation of the amount of earnings and profits attributable to the particular block sold or exchanged is broken down into simple cases and complex cases. A simple case must meet the following conditions imposed by *Treas Reg § 1.1248-2(c)* to insure an "easy" computation: (1) on each day of the period during which the block sold or exchanged was held by the shareholder, the corporation was a controlled foreign corporation and was not a foreign personal holding company or a foreign investment company; (2) the corporation had only one class of stock and the same number of shares of such stock outstanding on each day of such period; (3) the corporation was not a less developed country corporation for any taxable year within the period; (4) during the period involved, distributions out of earnings and profits were made only out of post-1962 earnings and profits, only when the shareholder owned the block of stock and the corporation was a controlled foreign corporation. If by reason of the ownership of the block of stock sold or exchanged, the shareholder owns sufficient stock in a lower-tier corporation to require its earnings and profits to be included in the earnings and profits of the first-tier corporation to the extent prescribed by *IRC § 1248(c)(2)*, then the four previously mentioned conditions must be met with respect to the lower-tier corporation as well, and the shareholder's percentage of indirect ownership of stock in such corporation kept at a constant level throughout the period involved. If these conditions cannot be met, the case is a complex case governed by *Treas Reg § 1.1248-3*.

(n168)Footnote 10. *IRC § 1248(d)(1)*. The exclusion is permitted only to the extent that the inclusion in gross income under *IRC § 951* did not lead to the exclusion of an actual distribution under *IRC § 959*.

There is no reduction in earnings and profits when a sale or exchange of stock in the controlled foreign corporation produces an *IRC § 1248* dividend. The reduction will occur when amounts attributable to the dividend are actually distributed to the shareholder. *Rev Rul 90-31, 1990-1 CB 147*.

(n169)Footnote 11. *IRC § 1248(d)(6)*.

(n170)Footnote 12. *IRC § 1248(d)(4)*. This provision does not apply to any item of income which is exempt from taxation or is subject to a reduced rate of tax pursuant to a treaty obligation of the US.

(n171)Footnote 13. *IRC § 1248(d)(3)*.

(n172)Footnote 14. *IRC § 1248(d)(5)*.

(n173)Footnote 15. *IRC § 1248(c)(2)*.

(n174)Footnote 16. A redemption or liquidation that is treated as an exchange of stock is governed by *IRC § 1248(e)*. *IRC § 1248(a)(2)*.

The only case to address the meaning of "principally" in the context of *IRC § 1248* is *Teller v Commr, TC Memo 1992-402*. The Tax Court looked to uses of the term in other Code sections and accorded to it the everyday meaning of first importance.

(n175)Footnote 17. To the extent earnings and profits are taken into account under this subsection, they are excluded from consideration under *IRC § 1248(e)*. *IRC § 1248(f)(3)*.

(n176)Footnote 18. *IRC § 1248(f)(2)*.

(n177)Footnote 19. *IRC § 751(c), (e)*.

(n178)Footnote 20. See Ch 14.

(n179)Footnote 21. See, eg, *Rev Rul 87-47, 1987-1 CB 250*, involving gain realized on a distribution of shares of a foreign subsidiary that could not qualify as a tax-free spinoff, and *Rev Rul 75-143, 1975-1 CB 275*, treating "boot" received on the transfer of controlled foreign corporation stock to a newly formed corporation as a dividend.

(n180)Footnote 22. *IRC § 1248(g)(1), (2)*.

(n181)Footnote 1. *IRC § 965(a)(1)*. All US shareholders that are members of an affiliated group filing a consolidated return under *IRC § 1501* are treated as one US shareholder. *IRC § 965(c)(5)(A)*.

No dividends received deduction is allowed under *IRC §§ 243 or 245* for any dividend for which a deduction is allowed under *IRC § 965(a)(1)*.

(n182)Footnote 2. *IRC § 965(c)(3)*; *Notice 2005-10, 2005-1 CB 474*. Dividends resulting from liquidations of a subsidiary qualifying under *IRC § 332* to which *IRC § 367(b)* applies qualify as cash dividends to the extent the US shareholder receives cash as part of the liquidation. *IRC § 965(c)(3)*.

(n183)Footnote 3. *IRC § 965(a)(2)*.

(n184)Footnote 4. *IRC § 965(b)(1)*. The term "applicable financial statement" means the most recently audited financial statement that is certified on or before June 30, 2003, as being prepared in accordance with generally accepted accounting principles, and that is used for the purposes of a statement or report to creditors, shareholders, or any other substantial nontax purpose. If the taxpayer is required to file a financial statement with the Securities and Exchange Commission, the term means the most recent such statement filed on or before June 30, 2003. *IRC § 965(c)(1)*.

(n185)Footnote 5. *IRC § 965(b)(2)*. The amount of dividends eligible for the deduction must be reduced by any increase in related-party indebtedness of the controlled foreign corporation between Oct 3, 2004 and the close of the taxable year for which the election is made. *IRC § 965(b)(3)*. All controlled foreign corporations with respect to which the taxpayer is a US shareholder are treated as one controlled foreign corporation for this purpose.

(n186)Footnote 6. *IRC § 965(c)(2)(A)*. If the taxpayer has fewer than five taxable years ending on or before June 30, 2003, the base period years include all the taxable years of the taxpayer ending on or before June 30, 2003. *IRC § 965(c)(2)(B)*. Special rules adjust the base period to take account of mergers, acquisitions, and spin-offs. *IRC § 965(c)(2)(C)*.

(n187)Footnote 7. *Notice 2005-10, 2005-6 IRB 474*. The Notice also lists acquisition of interests in business entities and advertising and marketing expenditures as permitted investments.

(n188)Footnote 8. *IRC § 965(b)(4)*; *Notice 2005-10, 2005-6 IRB 474*.

(n189)Footnote 9. *Notice 2005-10, 2005-6 IRB 474*.

(n190)Footnote 10. *Notice 2005-10, 2005-6 IRB 474*.

(n191)Footnote 11. *IRC § 965(e)(2)(A)*. The term "nondeductible CFC dividends" means the excess of the amount

of dividends taken account under *IRC* § 965(a) over the deduction allowed under that subsection for the dividends. *IRC* § 965(e)(2)(C).

(n192)Footnote 12. *IRC* § 965(e)(2)(B).

(n193)Footnote 13. *IRC* § 965(d)(1), (2). Unless the taxpayer specifies otherwise, the deductible portion of any dividend or other amount is the amount that bears the same ratio to the amount of the dividend or other amount as the amount allowed as a deduction under *IRC* § 965(a) for the taxable year bears to the amount of dividends taken into account under *IRC* § 965(b)(2)(A). *IRC* § 965(d)(3).

(n194)Footnote 14. *IRC* § 965(f).

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.04

§ 20.04 Tax Consequences of Investments in Foreign Securities by United States Citizens and Residents--Passive Foreign Investment Companies

The Tax Reform Act of 1986 added new provisions governing the treatment of United States shareholders in passive foreign investment companies. Unlike the rules discussed earlier, the provisions are applied without regard to the degree of United States ownership in the fund.

[1] Passive Foreign Investment Company Defined

Pursuant to *IRC Sections 1297(a)* and *1297(d)*, a foreign corporation is a passive foreign investment company (PFIC) if (1) 75 percent or more of its gross income for the taxable year is passive income,ⁿ¹ or (2) on average, at least 50 percent of its assets are assets that produce passive income or are held for the production of passive income.ⁿ² The determination in (2) is made on the basis of the value of the assets of a foreign corporation if the corporation is a publicly traded corporation for the taxable year.ⁿ³ A controlled foreign corporation (CFC), or any other foreign corporation that so elects, will have the determination based on the adjusted bases of its assets in lieu of their value.ⁿ⁴ The election, once made, can be revoked only with the consent of the Service. A foreign corporation that owns (directly or indirectly) at least 25 percent (by value) of the stock of another corporation must take into account a proportionate share of the assets and income of the other corporation in determining whether the foreign corporation is a PFIC.ⁿ⁵ A corporation is not treated as a PFIC for its start-up year (the first year in which it has gross income) if (1) neither the corporation nor predecessor corporation was a PFIC; (2) it is established to the satisfaction of the Service that the corporation will not be a PFIC for either of the two taxable years following the start-up year; and (3) the corporation is not a PFIC for either of those two years.ⁿ⁶ A similar rule applies to a corporation that has passive income from the disposition of an active business.ⁿ⁷

Stock of a United States corporation owned by another United States corporation in which a foreign corporation owns at least 25 percent (by value) of the stock is treated as a nonpassive asset. In determining whether a foreign corporation is a PFIC, stock of a regular domestic C corporation owned by a 25-percent domestic corporation is treated as an asset that does not produce passive income (and is not held for the production of passive income) and income derived from the stock is not passive income.ⁿ⁸ Thus, a foreign corporation, in applying the look-through rule available to 25-percent owned corporations, will be treated as owning nonpassive assets in these cases. The rule does not apply if, under a treaty obligation of the United States, the foreign corporation is not subject to the accumulated earnings tax, unless the corporation waives the benefit of the treaty. If a foreign corporation tries to use the rule to avoid the PFIC provisions, it

will be subject to the accumulated earnings tax imposed by *IRC Section 531*.

IRC Section 1298(b)(1) provides that if a shareholder owns stock in a foreign corporation that, at any time during the shareholder's holding period with respect to the stock, was a PFIC that was not a qualified electing fund, the stock will retain its character as PFIC stock, even if the corporation ceases to qualify as a PFIC under *IRC Section 1297(a)*, unless the shareholder elects to purge the PFIC taint by making either a deemed sale election or a deemed dividend election.ⁿ⁹ A shareholder making a deemed sale election with respect to a former PFIC is treated as having sold all of its stock in the former PFIC for its fair market value on the termination date--the last day of the taxable year of the foreign corporation for which it qualified as a PFIC.ⁿ¹⁰ This causes the amount of any gain to be recognized as an excess distribution on the termination date.ⁿ¹¹ Any loss realized on the deemed sale is not recognized.ⁿ¹² For purposes of applying the PFIC rules and no other purposes, the deemed sale election also causes the shareholder's holding period in the stock of the foreign corporation to begin on the day following the termination, whether or not the shareholder recognized gain on the deemed sale.ⁿ¹³

A shareholder of a former PFIC can make a deemed dividend election if the foreign corporation was a controlled foreign corporation during its last year as a PFIC, whether the shareholder is a United States shareholder of the controlled foreign corporation, as defined in *IRC Section 951(b)*.ⁿ¹⁴ A shareholder making an election with respect to a former PFIC must include in income as a dividend its pro rata share of the post-1986 earnings and profits of the PFIC attributable to all of the stock it held, directly or indirectly, on the termination date and treat the amount included as an excess distribution received on that date.ⁿ¹⁵ The excess distribution resulting from the deemed dividend election is allocated under *IRC Section 1291(a)(1)(A)* only to each day of the shareholder's holding period of the stock during which the foreign corporation qualified as a PFIC.ⁿ¹⁶ After the deemed dividend election, the shareholder's stock with respect to which the election was made is not treated as stock in a PFIC unless the foreign corporation thereafter qualifies as a PFIC.ⁿ¹⁷

The deemed dividend election is made in the same manner, within the same time periods, and on the same form as the deemed sale election.ⁿ¹⁸ In addition, similar basis adjustment and holding period rules apply.ⁿ¹⁹

The Commissioner may, in his discretion, grant consent for a late purging election.ⁿ²⁰ However, the Commissioner can grant relief only if (i) the shareholder requests the consent before a representative of the Service raises upon audit the PFIC status of the foreign corporation for any taxable year of the shareholder; (ii) the shareholder has agreed in a closing agreement with the Commissioner to eliminate any prejudice to the interests of the United States government as a consequence of the shareholder's inability to file amended returns for the taxable year in which the CFC qualification date fallsⁿ²¹ (or an earlier closed taxable year in which the shareholder has taken a position that is inconsistent with the treatment of the foreign corporation as a PFIC);ⁿ²² and (iii) the shareholder satisfies certain procedural requirements.ⁿ²³

For this purpose, passive income has the same meaning as foreign personal holding company income, as defined for Subpart F purposes. However, passive income does not include any income derived in the active conduct of a banking or insurance business in the United States, interest, dividends, rents, or royalties received or accrued from a related person (within the meaning of *IRC Section 954(d)(3)*) to the extent the amount is properly allocable to income of the related person that is not passive income, or income that is foreign trade income of a foreign sales corporation or export trade income of an export trade corporation.ⁿ²⁴

Prior to 1998, a foreign corporation that was a CFC could also be a PFIC if it met the passive income test or passive asset test. In such case, a 10-percent United States shareholder of the corporation could be subject to both the Subpart F provisions and the PFIC provisions of the Code. *IRC Section 1297(e)(1)*, added by the Taxpayer Relief Act of 1997, changes that result by providing that the corporation will not be treated as a PFIC during the "qualified portion" of a shareholder's holding period with respect to stock in the corporation. The qualified portion is the portion of the shareholder's holding period after December 31, 1997, during which the shareholder is a 10-percent United States

shareholder and the corporation is a CFC.ⁿ²⁵

The effect of *IRC Section 1297(e)(1)* is to subject a 10-percent United States shareholder to current inclusion under the Subpart F rules with respect to stock of a PFIC, but not to be subject to the PFIC provisions with respect to that stock. The PFIC provisions continue to apply to a corporation that is also a CFC with respect to shareholders who are not 10-percent United States shareholders and are not subject to the Subpart F rules.

If *IRC Section 1297(e)(1)* ceases to apply to a shareholder because the shareholder is no longer a 10-percent United States shareholder of the corporation, for purposes of the PFIC rules, the shareholder's holding period for the stock is treated as beginning immediately after such cessation.ⁿ²⁶ Thus, in applying the rules applicable to a PFIC that is not a qualified electing fund, the earnings of the corporation are not attributed to the period during which the shareholder was subject to the Subpart F rules and not to the PFIC provisions.

A further purging election is available to a shareholder of a corporation to which *IRC Section 1297(e)* applies (a Section 1297(e) corporation).ⁿ²⁷ The mechanics and consequences of the election are similar to those described above.ⁿ²⁸

[2] Taxation of Excess Distributions From and Dispositions of Stock in Passive Foreign Investment Companies

In order to eliminate the tax advantages that United States shareholders in foreign investment funds had over United States shareholders in domestic investment funds, *IRC Section 1291* eliminates the economic benefit of tax deferral by imposing United States income taxes and an interest charge based on the value of the deferral at the time that the shareholder disposes of stock in the PFIC or receives an excess distribution (unless the PFIC is a qualified electing fund).ⁿ¹ The gain recognized on the disposition or on receipt of an excess distribution is considered to be earned pro rata over the period of the taxpayer's holding period of the stock, and is treated as ordinary income.ⁿ² To the extent provided in regulations, transfers of stock in a PFIC that would normally be wholly or partly tax-free become taxable to the extent of the excess of the fair market value of the stock over its adjusted basis, with proper adjustment in the basis of the stock made to reflect the recognition of gain.ⁿ³

The United States tax due in the year of disposition or receipt of excess distribution is the sum of (1) United States tax computed using the highest rate of tax for the taxpayer (without regard to other income or expenses the taxpayer may have) on income attributed to prior years; (2) interest imposed on the deferred tax; and (3) United States tax on the gain attributable to the year of disposition or receipt and to years in which the foreign corporation was not a PFIC.ⁿ⁴ The portions of the distribution that are not characterized as excess distributions are subject to tax in the current year under normal Code provisions.

Under *IRC Section 1291(g)*, the United States investor's creditable foreign taxes for the distribution includes the amount of direct foreign taxes paid by the investor with respect to the distribution (e.g., withholding taxes) and the amount of the PFIC's foreign taxes deemed paid by the investor with respect to the distribution under *IRC Section 902* to the extent the taxes are creditable under general foreign tax credit principles and the investor chooses to claim the taxes as a credit.ⁿ⁵ The investor then determines the amount of the creditable foreign taxes that are attributable to the portion of the distribution that is an excess distribution ("excess distribution taxes") by apportioning the total amount of creditable foreign taxes between the amount of the distribution that is an excess distribution and the amount that is not on a pro rata basis. For purposes of determining the amount of the distribution from the PFIC (and the amount of the excess distribution) the gross-up under *IRC Section 78* is included in the amount of money or other property received.

The taxpayer next allocates the excess distribution taxes ratably to each day in the holding period of the stock. To the extent the taxes are allocated to days in tax years prior to the year in which the corporation became a PFIC and to the current tax year, the taxes are taken into account under general foreign tax credit rules. To the extent the taxes are allocated to days in other tax years, the foreign tax credit limitation provisions of *IRC Section 904* are applied separately

to those taxes. Under this rule, the allocable taxes can reduce the aggregate increase in tax on which interest is computed, but not below zero. If the allocable taxes are in excess of any increase in tax, no interest will be due, but no carryover will be allowed since the foreign tax credit limitations are applied with respect to excess distributions occurring within each taxable year.

IRC Section 1298(c) provides that, if a pooled income fund owns stock in a PFIC and no portion of any gain from a disposition of the stock may be allocated to income under the terms of the governing instrument, the deferred tax and interest charge rules will not apply so long as a charitable deduction would be allowable with respect to the gain, and the current inclusion rule applicable to investors in a PFIC that is a qualified electing fund will not apply with respect to the stock held. However, for distributions received from a PFIC, the deferred tax and interest rules will continue to apply to excess distributions, even when the distributions are received from a PFIC that has been a qualified electing fund for all of its life as a PFIC.

An excess distribution is a distribution in the taxable year that exceeds 125 percent of the average amount received with respect to stock in the PFIC during the three preceding taxable years (or, if shorter, the taxpayer's holding period before the taxable year).ⁿ⁶ If there are multiple distributions during the year, each distribution is an excess distribution to the extent that it represents a ratable portion of the total distributions that are excess distributions.ⁿ⁷ For example, if a calendar-year taxpayer's average distributions for the prior three years are \$100, and he receives a \$100 distribution in January and a \$50 distribution in November, the total excess distribution is \$25 (\$150 total distribution less \$125, 125 percent of the \$100 average). Two thirds of the total excess distribution is then allocated to the January distribution and one third to the November distribution for purposes of attributing the excess distribution to current and prior years to compute the amount of deferred tax and interest.

IRC Section 1291(b)(3) calls for regulations providing for the following adjustments to be made in determining excess distributions:

- (1) Determinations are to be made on a share-by-share basis, except that shares with the same holding period can be aggregated.
- (2) Proper adjustments must be made for stock splits and stock dividends.
- (3) If the taxpayer does not hold the stock during the entire taxable year, distributions must be annualized.
- (4) If the taxpayer's holding period includes periods during which the stock was held by another person, distributions received by the other person are taken into account as if received by the taxpayer.
- (5) If distributions are received in a foreign currency, determinations are made in that currency and the amount of any excess distribution is translated into dollars.
- (6) Proper adjustment is made for amounts not includable in gross income under *IRC Sections 959(a)* or *1293(c)*.
- (7) If a charitable deduction was allowable to a trust for any distribution of its income, proper adjustment must be made for the deduction to the extent allocable to distributions or gain in respect of stock in a PFIC.

IRC Section 1291(e) provides rules similar to those that applied to foreign investment companies (as in effect on the day before the enactment of the American Jobs Creation Act of 2004) for stock with a substituted basis that inherits the attributes of passive foreign investment stock, for the treatment of certain forms of indirect ownership of PFIC stock, for

information reporting by 5-percent owners of PFIC's, and to deny a step up in basis for stock acquired from a decedent other than a foreign decedent.ⁿ⁸

IRC Section 1291(d)(2) allows a taxpayer, who holds stock in a PFIC on the day that it becomes a qualified electing fund and can establish the fair market value of the stock on that day to the satisfaction of the Service, to elect to recognize gain as if the stock were sold on that day.ⁿ⁹ In such case, the adjusted basis of the stock will be increased by the amount of the recognized gain, and the taxpayer's holding period will be treated as beginning on that day. The election can be made by a shareholder who would realize a loss on the deemed sale, but the loss cannot be recognized.ⁿ¹⁰

If a PFIC becomes a qualified electing fund for a taxable year that begins after December 31, 1986, the taxpayer holds stock in the company on the first day of that taxable year, and the company is a CFC, the taxpayer can elect to include in gross income as a dividend received on that first day an amount equal to the portion of the post-1986 earnings and profits of the corporation attributable to the stock in the company held by the taxpayer on that day.ⁿ¹¹ The amount treated as a dividend is considered an excess distribution and is allocated only to days during periods taken into account in determining the post-1986 earnings and profits so attributable. In this case, the adjusted basis of the stock is increased by the amount treated as a dividend and the taxpayer's holding period begins on the day the taxpayer is deemed to have received the dividend.

[3] Qualified Electing Funds

IRC Section 1291(d)(1) causes *IRC Section 1291* to be inapplicable to any distributions paid by a PFIC, or any disposition of stock in a PFIC, if the company is a qualified electing fund with respect to the taxpayer for each of its taxable years (i) that begins after December 31, 1986, and for which the company is a PFIC, and (ii) that includes any portion of the taxpayer's holding period.

[a] Qualified Electing Fund Defined. A PFIC is a qualified electing fund if an election by the taxpayer applies to the company for the taxable year, and the company complies with such requirements as the Service will prescribe for determining the ordinary earnings and net capital gain of the company for the taxable year, and otherwise carrying out the purposes of the PFIC rules.ⁿ¹ The election can be made for any taxable year if made before the 15th day of the third month of the following taxable year, and continues in effect for subsequent taxable years for which the company is a PFIC unless revoked with the consent of the Service.ⁿ²

[b] Current Taxation of Income From Qualified Electing Funds. Every United States person who, directly or indirectly, owns stock in a qualified electing fund at any time during the taxable year of the fund must include in gross income the person's pro rata share of the ordinary earnings and net capital gain of the fund as ordinary income and long-term capital gain, respectively.ⁿ³ The inclusion is made for the taxable year of the shareholder in which or with which the taxable year of the fund ends.ⁿ⁴ Later distributions by the PFIC will not be treated as a dividend, if the shareholder can establish that the distribution is out of earnings and profits that were previously included in the gross income of the shareholder.ⁿ⁵ However, the rule stated in the last sentence will not apply to any U.S. shareholder in a PFIC that is also a CFC, and any inclusion in income under *IRC Section 1293* will be treated, for purposes of *IRC Section 959*, as an inclusion of Subpart F income.ⁿ⁶

According to *IRC Section 1293(g)*, in determining the amount includable in the gross income of any person, the ordinary earnings and net capital gain of a qualified electing fund do not include any item of income received by the fund if (1) the fund is a CFC and the person is a United States shareholder in the fund, and (2) the person establishes to the satisfaction of the Service that (a) the income was subject to an effective rate of income tax imposed by a foreign country greater than 90 percent of the maximum rate of tax imposed by *IRC Section 11*, or (b) the income is from sources within the United States, is effectively connected with the conduct by the qualified electing fund of a trade or business in the United States, and is not exempt from taxation (or subject to a reduced rate of tax) under a treaty

obligation of the United States. Regulations will prescribe adjustments that may be necessary to prevent the same item of income of a qualified electing fund from being included in the gross income of a United States person more than once.

The basis of the taxpayer's stock in a PFIC is increased by the amount of the fund's ordinary earnings and net capital gain included in income, and decreased by any distributions not treated as a dividend.ⁿ⁷ A similar rule applies to any property held by the taxpayer that causes the taxpayer to be treated under *IRC Section 1298(a)* as owning stock in a qualified electing fund.

For purposes of the application of *IRC Section 960*, corporate 10-percent shareholders treat any amount included currently in income as if it were included under *IRC Section 951*, and any distribution not treated as a dividend as if excluded from gross income under *IRC Section 959*.ⁿ⁸

United States shareholders of a qualified electing fund can, subject to an interest charge, elect to defer United States tax on amounts included in income for which no current distributions are received.ⁿ⁹ However, the election is not available for any amounts that must be included in income currently under *IRC Section 951*.ⁿ¹⁰

The election to defer is treated as an extension of time to pay the tax. It terminates if the shareholder receives a distribution of previously taxed earnings or transfers the stock, or if the PFIC ceases to be a qualified fund.ⁿ¹¹ It will also terminate if the Service believes that collection of any deferred amount is in jeopardy.ⁿ¹²

[4] Mark-to-Market Election

A shareholder of a PFIC (including a person who is treated as owning stock in a PFIC) is permitted to make a mark-to-market election for PFIC stock that is marketable.ⁿ¹ The election applies only to the United States person (or CFC treated as a United States person) that makes the election; it does not apply to a transferee of the stock.ⁿ² Under the election, the shareholder includes in income each year an amount equal to the excess, if any, of the fair market value of the PFIC stock as of the close of the taxable year over the shareholder's adjusted basis in the stock.ⁿ³ The shareholder is allowed a deduction for the lesser of the excess, if any, of the adjusted basis of the stock over its fair market value, or the "unreversed inclusions" with respect to the stock.ⁿ⁴ When a United States person is treated as owning stock through a foreign entity, mark-to-market gain or loss is determined as of the last day of the taxable year of the entity and then included in the taxable year of the United States person that includes the last day of the taxable year of the foreign entity.ⁿ⁵

PFIC stock is considered marketable if it is regularly traded on a national securities exchange that is registered with the Securities and Exchange Commission, on the national market established pursuant to the Securities and Exchange Act of 1934, or any exchange or other market that the Internal Revenue Service determines has rules adequate to ensure that the market price represents a legitimate and sound fair market value.ⁿ⁶ Any option that is considered marketable under the foregoing rules is also treated as marketable to the extent provided in regulations.ⁿ⁷ In addition, PFIC stock is treated as marketable, to the extent provided in regulations, if the PFIC offers for sale (or has outstanding) any stock of which it is the issuer and which is redeemable at its net asset value in a manner comparable to a United States regulated investment company.ⁿ⁸ Finally, any PFIC stock owned by an RIC that offers for sale (or has outstanding) stock of which it is the issuer and which is redeemable at its net asset value is marketable stock.ⁿ⁹

The shareholder's adjusted basis in the PFIC stock is adjusted to reflect the amounts included or deducted under the election.ⁿ¹⁰ In the case of stock owned indirectly by a United States person under *IRC Section 1296(g)(1)*, the basis adjustment is made to the basis of the stock in the hands of the actual owner, but only for the purposes of determining the subsequent application of the PFIC rules to the indirect United States owner.ⁿ¹¹ In addition, similar basis adjustments are made to the adjusted basis of the property actually held by the indirect United States owner by reason of which the United States person is treated as owning PFIC stock.ⁿ¹²

Any amount included in gross income pursuant to a mark-to-market election, as well as gain on the actual sale or disposition of PFIC stock, is treated as ordinary income.ⁿ¹³ Ordinary loss treatment applies to any amount allowed as a deduction under the election, and to any loss realized on the actual sale or other disposition of PFIC stock to the extent that the amount of the loss does not exceed the net mark-to-market gains previously included in income with respect to the stock.ⁿ¹⁴ The source of any amount included or deducted under the election is determined in the same manner as if the amount was gain or loss from the sale of stock in the PFIC.ⁿ¹⁵

A CFC that owns stock in a PFIC is treated as a United States person that may make the election with respect to its PFIC stock.ⁿ¹⁶ Any amount includable in the CFC's income pursuant to the election is treated as foreign personal holding company income; any deduction resulting from the election is treated as a deduction allocable to foreign personal holding company income.ⁿ¹⁷ The source of such amounts is determined by reference to the actual residence of the CFC.ⁿ¹⁸

If the mark-to-market election is made after the beginning of the taxpayer's holding period for the PFIC stock, and the PFIC is not a qualified electing fund, a coordination rule applies to ensure that the taxpayer does not avoid the interest charge imposed by *IRC Section 1291* (discussed in § 20.04[2]) with respect to amounts attributable to periods before the election.ⁿ¹⁹ If an RIC makes the mark-to-market election after the beginning of its holding period with respect to PFIC stock, the RIC's tax for the first tax year in which the election is made is increased by the interest that would have been charged under *IRC Section 1291*, unless the mark-to-market election is made on the last day of the preceding year; no deduction is allowed for the increase in tax.ⁿ²⁰

Except as provided in the coordination rules, the rules of *IRC Section 1291*, applicable to funds that are not qualified electing funds, do not apply to a shareholder for which a mark-to-market election is in effect.ⁿ²¹ In applying *IRC Section 1291* in a case where a mark-to-market election was in effect for any prior year, the shareholder's holding period for the PFIC stock is treated as beginning immediately after the last taxable year for which the election applied.ⁿ²²

If stock in a PFIC is acquired from a decedent and a mark-to-market election was in effect on the date of the decedent's death, the basis of the stock in the hands of the person acquiring the stock is the lesser of the adjusted basis of the stock in the hands of the decedent immediately before death or the date of death value.ⁿ²³ In the case of a PFIC shareholder who becomes a United States person in a taxable year beginning after December 31, 1997, the adjusted basis of any marketable stock in the PFIC owned by the individual on the first day of such taxable year is treated as being the greater of its fair market or adjusted basis on that day.ⁿ²⁴

The mark-to-market election applies to the year in which made and all subsequent years unless the PFIC stock ceases to be marketable stock, or the Service consents to the revocation of the election.ⁿ²⁵ The election must be made on or before the due date (including extensions) of the income tax return of the United States person that owns, or is treated as owning marketable stock in the PFIC.ⁿ²⁶

FOOTNOTES:

(n1)Footnote 1. The gross income test applies to the total gross income of a corporation for the taxable year determined under the principles of *IRC § 61* and Subpart F.

(n2)Footnote 2. See, eg, *Ltr Rul 9447016*, where a corporation that did not qualify as a PFIC under the asset test was held not to be such under the income test because its nonpassive losses exceeded its passive and nonpassive income.

(n3)Footnote 3. *IRC § 1297(f)(1)*. A foreign corporation is treated as publicly traded if the stock of the corporation is regularly traded on (a) a national securities exchange that is registered with the Securities and Exchange Commission or the national market system established pursuant to § 11A of the Securities and Exchange Act of 1934, or (b) any

exchange or other market that is determined to have rules sufficient to ensure that the market price represents a sound fair market value. *IRC § 1297(f)(3)*.

(n4)Footnote 4. *IRC § 1297(f)(2)*. Elimination of the overlap between a CFC and a PFIC (see the text at N 10 below) effectively means that the only persons that must use tax basis are persons who own less than 10 percent of the stock of a CFC.

Any tangible personal property leased by the foreign corporation under a lease with a term of at least 12 months is treated as an asset actually held by the corporation. The amount of the leased asset taken into account for this purpose is the unamortized portion of the present value of the payments under the lease. The rules do not apply if the lessor is a related person or a principal purpose of leasing the property was to avoid the PFIC provisions. *IRC § 1298(d)*.

The adjusted basis of the total assets of a CFC is increased by the amount of unreimbursed research or experimental expenditures paid or incurred by the corporation during the taxable year and the preceding two taxable years. If the corporation is a licensee of any intangible property and uses the asset in the active conduct of a trade or business, the adjusted basis of the corporation must be increased by an amount equal to 300 percent of the payments made during the taxable year by the corporation for the use of the property. *IRC § 1298(e)*. Again, the rules do not apply to any payments to a related foreign person and to any payments under a license if a principal purpose of entering into the license was to avoid the rules relating to passive foreign corporations or to investments by a CFC in excess passive assets.

(n5)Footnote 5. *IRC § 1297(c)*.

(n6)Footnote 6. *IRC § 1298(b)(2)*.

(n7)Footnote 7. *IRC § 1298(b)(3)*.

(n8)Footnote 8. *IRC § 1298(b)(8)*.

(n9)Footnote 9. *Treas Reg § 1.1298-3(a), (b)(1)*.

(n10)Footnote 10. *Treas Reg § 1.1298-3(b)(2), (d)*. The deemed sale election must be made in the shareholder's original or amended return for the taxable year that includes the termination date (election year). If the election is made in an amended return, the return must be filed within three years of the due date, as extended, of the original return for the election year. *Treas Reg § 1.1298-3(b)(3)*.

The deemed sale election is made by filing Form 8621 with the return for the election year, reporting the gain as an excess distribution and paying the tax and interest due thereon. *Treas Reg § 1.1298-3(b)(4)*.

(n11)Footnote 11. *Treas Reg § 1.1298-3(b)(2)*. A shareholder that makes the deemed sale election increases its adjusted basis of the stock owned by the amount of gain recognized on the deemed sale. If the shareholder makes the deemed sale election with respect to a PFIC of which it is an indirect shareholder, the shareholder's adjusted basis of the stock or other property owned directly by the shareholder, through which ownership of the PFIC is attributed to the shareholder, is increased by the amount of the gain recognized by the shareholder; the adjusted basis of the direct owner of the stock is increased as well. *Treas Reg § 1.1298-3(b)(5)*.

(n12)Footnote 12. *Treas Reg § 1.1298-3(b)(2)*. There is no adjustment to basis on account of a loss that is not recognized. *Treas Reg § 1.1298-3(b)(5)*.

(n13)Footnote 13. *Treas Reg § 1.1298-3(b)(6)*.

(n14)Footnote 14. *Treas Reg § 1.1298-3(c)(1)*.

(n15)Footnote 15. *Treas Reg § 1.1298-3(c)(2)*. Post-1986 earnings and profits are post-1986 undistributed earnings, within the meaning of *IRC § 902(c)(1)*, without regard to *IRC § 901(c)(2)*, as of the close of the taxable year that includes the termination date. *Treas Reg § 1.1298-3(c)(3)(i)*. In making the computation, only earnings and profits accumulated in taxable years during which the foreign corporation was a PFIC are taken into account.

A shareholder's pro rata share of the post-1986 earnings and profits attributable to the stock held by the shareholder on the termination date is the amount of such earnings and profits of the PFIC accumulated during any portion of the shareholder's holding period ending on the termination date and attributable to the PFIC stock held on that date. *Treas Reg § 1.1298-3(c)(3)(ii)(A)*. There is a reduction for amounts previously included in income pursuant to another provision of the Code. *Treas Reg § 1.1298-3(c)(3)(ii)(B)*.

(n16)Footnote 16. *Id.*

(n17)Footnote 17. *Id.*

(n18)Footnote 18. *Treas Reg § 1.1298-3(c)(4), (5)(i)*. The shareholder must attach a schedule to Form 8621 that demonstrates the calculation of post-1986 earnings and profits treated as distributed to the shareholder because of the election. *Treas Reg § 1.1298-3(c)(5)(ii)*.

(n19)Footnote 19. *Treas Reg § 1.1298-3(c)(6), (7)*.

(n20)Footnote 20. *Treas Reg § 1.1298-3(e)(1)*.

(n21)Footnote 21. The CFC qualification date is the first day on which the qualified portion of the shareholder's holding in a section 1297(e) PFIC begins. *Treas Reg § 1.1297-3(d)*.

(n22)Footnote 22. The interests of the US government are prejudiced if granting relief would result in the shareholder having a lower tax liability (other than by a *de minimis* amount), taking into account applicable interest charges, for the taxable year that includes the CFC qualification date (or a prior taxable year in which the taxpayer took a return position that was inconsistent with the treatment of the foreign corporation as a PFIC) that the shareholder would have had if the shareholder had made a timely purging election under *IRC § 1298(b)(1)* (or had not taken an inconsistent position on a return for a prior taxable year). The time value of money is taken into account for purposes of this computation. *Treas Reg § 1.1298-3(e)(2)*.

(n23)Footnote 23. The amount due with respect to a late purging election is determined in the same manner as if the purging election had been timely filed. However, the shareholder is also liable for interest on the amount due, determined for the period beginning on the due date (without extensions) for the taxpayer's tax return for the year in which the CFC qualification date falls and ending on the date the late purging election is filed. *Treas Reg § 1.1298-3(e)(3)*.

(n24)Footnote 24. *IRC § 1297(b)(2)*.

(n25)Footnote 25. *IRC § 1297(e)(2)*. *IRC § 1297(e)(1)* does not apply to stock treated as owned by a person pursuant to *IRC § 1298(a)(4)* (person holding option to acquire the stock treated as owning the stock) unless the person establishes that the stock is owned by a US shareholder who is not exempt from tax. *IRC § 1297(e)(4)*.

(n26)Footnote 26. *IRC § 1297(e)(3)*.

(n27)Footnote 27. A foreign corporation is a Section 1297(e) corporation with respect to a shareholder if (a) the foreign corporation qualifies as a PFIC under *IRC § 1297(a)* on the first day on which the qualified portion of the shareholder's holding period in the foreign corporation begins, as determined under *IRC § 1297(e)(2)*, and (b) the stock of the foreign corporation held by the shareholder is treated as stock of a PFIC, pursuant to *IRC § 1298(b)(1)*, because,

at any time during the shareholder's holding period of the stock, other than the qualified portion, the corporation was a PFIC that was not a qualified electing fund. *Treas Reg § 1.1291-9(j)(2)(v)*.

(n28)Footnote 28. *Treas Reg § 1.1297-3(a)-(c)*.

(n29)Footnote 1. Any amount included in the gross income of a U.S. shareholder of a CFC because of an investment in U.S. assets is treated as a distribution with respect to stock in a PFIC that is a CFC. *IRC § 1298(b)(9)*.

As a general rule, *IRC § 1291* will not apply if a mark-to-market election under *IRC § 1296* is in effect for the taxable year. *IRC § 1291(d)(1)*. The mark-to-market election is the subject of § 20.04[4]. *IRC § 1291* also does not apply to stock marked to market under *IRC § 475* or any other provision, except that rules similar to those of *IRC § 1296(j)* apply.

(n30)Footnote 2. *IRC § 1291(a)(1), (2)*. Use of passive foreign investment stock as security for a loan is treated as a disposition of the stock.

The taxpayer's holding period is determined under the rules of *IRC § 1223*, except that (1) for purposes of applying *IRC § 1291* to an excess distribution, the holding period is treated as ending on the date of the distribution, and (2) if the mark-to-market election under *IRC § 1296* applied to the stock with respect to the taxpayer for any prior taxable year, the holding period is treated as beginning on the first day of the first taxable year after the last taxable year for which the election applied. *IRC § 1291(a)(3)(A)*.

Attribution rules are applied to the extent that the effect is to treat stock of a PFIC as owned by a US person, but not to treat stock owned, directly or indirectly, by a US person as owned by any other person. *IRC § 1298(a)(1)*. Under these rules, stock owned, directly or indirectly, by or for a corporation in which a person owns at least 50 percent in value of the stock is deemed to be owned proportionately by such person, while stock owned, directly or indirectly by or for a partnership, estate, or trust is considered as owned proportionately by its partners or beneficiaries. *IRC § 1298(a)(2), (3)*. *IRC § 1297(e)* does not apply in determining whether a corporation is a PFIC for purposes of *IRC § 1298(a)(2)*.

To the extent provided in regulations, if any person has an option to acquire stock, the stock will be considered as owned by the person. An option to acquire an option, and each one of a series of such options, will be considered as an option to acquire the stock. *IRC § 1298(a)(4)*.

If a person has an option to acquire stock in a PFIC, and sells the option instead of exercising it, the sale will be treated as a disposition to which *IRC § 1291* applies. This will not be the case if the option is exercised. *Prop Treas Reg § 1.1291-1(d)*.

If a US person is treated as owning stock in a PFIC by virtue of the attribution rules, any distribution of money or other property to the actual holder of the stock is treated as a distribution to the US person. Amounts deemed distributed to the US person are not includable in gross income of the holder actually receiving those amounts for purposes of causing the US person to include the amounts in income again.

(n31)Footnote 3. *IRC § 1291(f)*.

(n32)Footnote 4. *IRC § 1291(c)*. The aggregate amount of interest on the increases in tax is treated as interest paid under *IRC § 6601* on the due date for the current year.

(n33)Footnote 5. The rules coordinating *IRC §§ 901* and *1291* also apply to any gain that, absent *IRC § 1291*, would be treated as a dividend under *IRC § 1248*.

(n34)Footnote 6. *IRC § 1291(b)(2)(A)*. Any excess distribution received during the three-year period is taken into

account only to the extent it was included in gross income under *IRC § 1291(a)(1)(B)*.

There can be no excess distributions for the taxable year in which the taxpayer's holding period for the stock begins. *IRC § 1291(b)(2)(B)*.

(n35)Footnote 7. *IRC § 1291(b)(1)*.

(n36)Footnote 8. See § 20.05[2][a].

(n37)Footnote 9. The election must be made with the filing of the electing shareholder's tax return (or amended return filed within three years of the due date, as extended) for the taxable year that includes the qualification date. *Treas Reg § 1.1291-10(c)*. The election is made on Form 8621 or on a statement containing similar information. *Treas Reg § 1.1291-10(d)*.

(n38)Footnote 10. *Treas Reg § 1.1291-10(b)*.

(n39)Footnote 11. For this purpose, post-1986 earnings and profits are earnings and profits that were accumulated in taxable years beginning after Dec 31, 1986, and during the period or periods the stock was held by the taxpayer while the company was a PFIC, but without regard to whether the earnings relate to a period during which the PFIC was a CFC. *Treas Reg § 1.1291-9* sets forth the rules regarding the time and manner of making the deemed dividend election.

For purposes of *IRC § 959(e)*, any amount included in gross income as a dividend is treated as included under *IRC § 1248(a)*.

(n40)Footnote 1. *IRC § 1295(a)*. *Treas Reg § 1.1295-1(b)* sets forth the requirements for making the election.

(n41)Footnote 2. *IRC § 1295(b)*. The election applies to all subsequent years with respect to the company unless revoked by the taxpayer with the consent of the Service.

If a US person, or the US shareholder on behalf of a CFC, makes a mark-to-market election under *IRC § 1296* with respect to stock for which a qualified electing fund election is in effect, or marks-to-market the stock under any other provision of the Code, the qualified electing fund provision is automatically terminated with respect to that stock, effective on the last day of the taxable year preceding the first taxable year for which the election under *IRC § 1296* is in effect or the stock is marked-to-market. *Treas Reg § 1.1295-1(i)(3)*. A shareholder whose qualified electing fund election is terminated cannot make a qualified electing fund election with respect to the PFIC before the sixth taxable year in which the termination became effective, unless the election under *IRC § 1296* was terminated because the PFIC stock ceased to be marketable or the stock was no longer marked-to-market. *Treas Reg § 1.1295-1(i)(5)*.

(n42)Footnote 3. *IRC § 1293(a)(1)*. The pro rata share is the amount that would have been distributed to the shareholder if, on each day during the taxable year of the fund, the fund had distributed to each shareholder a pro rata portion of that day's ratable share of its ordinary income and net capital gain for the year. *IRC § 1293(b)*. To the extent provided in regulations, if the fund establishes to the satisfaction of the Service that it uses a shorter period than the taxable year to determine shareholders' interests in the earnings of the fund, *pro rata* shares may be determined by using the shorter period.

The fund's ordinary earnings are the excess of its earnings and profits for the taxable year over its net capital gain. The fund's net capital gain for any taxable year cannot exceed its earnings and profits for the year. *IRC § 1293(e)*. Earnings and profits are determined without the LIFO inventory, installment sales, and completed contract method of accounting adjustments required by *IRC § 312(n)*, except to the extent it would increase earnings and profits by an amount that was previously distributed by the qualified electing fund.

(n43)Footnote 4. *IRC § 1293(a)(2)*.

(n44)Footnote 5. *IRC § 1293(c)*. The distribution immediately reduces earnings and profits.

(n45)Footnote 6. *IRC § 1293(c)*.

(n46)Footnote 7. *IRC § 1293(d)*.

(n47)Footnote 8. See § 20.04[2][g].

(n48)Footnote 9. *IRC § 1294(a)(1), (b)*. The election must be made by the due date, as extended, of the tax return for the shareholder's taxable year to which the election applies. The shareholder is required to file Form 8621 or a statement containing similar information. *Temp Treas Reg § 1.1294-1T(c), (d)*.

(n49)Footnote 10. *IRC § 1294(a)(2)*.

(n50)Footnote 11. *IRC § 1294(c)(1), (2)*. The extension will not terminate by reason of a transfer of stock in a nonrecognition transfer; the transferee succeeds to the treatment of the transferor.

A loan by a qualifying electing fund to a shareholder of the fund is treated as a distribution for purposes of *IRC §§ 1293 and 1294*. *IRC § 1294(f)*.

(n51)Footnote 12. *IRC § 1294(c)(3)*. The IRS has the authority to require a bond as in the case of any extension of time for payment. *IRC § 1294(e)*.

(n52)Footnote 1. *IRC § 1296(a)*. Stock owned, directly or indirectly, by or for a foreign partnership, foreign trust, or foreign estate is considered as being owned proportionately by its partners or beneficiaries. *IRC § 1296(g)(1)*. A disposition that results in a US person being treated as not owning PFIC constructively is treated as a disposition by the US person of the PFIC stock. *IRC § 1296(g)(2)*.

Under the regulations, marketable stock includes (1) a class of stock that is regularly traded on one or more qualified exchanges or other markets, in other than *de minimis* quantities, on at least 15 days during each calendar quarter; (2) stock in PFIC's that meet certain conditions that liken the PFIC to an RIC; and (3) options on stock described in (1) and (2). *Treas Reg § 1.1296-2*.

For the calendar year in which a corporation initiates a public offering trading on one or more qualified exchanges or other markets, the class of stock is treated as marketable for that year if the stock is regularly traded, other than in *de minimis* quantities, on one-sixth of the days remaining in the quarter in which the offering occurs, and on at least 15 days during each remaining quarter of the calendar year. If the public offering takes place in the last quarter of the year, the class of stock is treated as marketable if regularly traded, other than in *de minimis* quantities, on the greater of one-sixth of the days remaining in the quarter or five days. *Treas Reg § 1.1296-2(b)(2)*.

(n53)Footnote 2. *Treas Reg § 1.1296-1(b)(2)*. The election is made with respect to a single foreign corporation and, therefore, a separate election must be made for each foreign corporation that meets the requirements of *IRC § 1296*. *Treas Reg § 1.1296-1(b)(3)*.

(n54)Footnote 3. *IRC § 1296(a)(1)*.

(n55)Footnote 4. *IRC § 1296(a)(2)*. The unrecovered inclusions are the excess, if any, of the mark-to-market gains included in income by the shareholder for prior taxable years (including any amount that would have been included for any prior year, but for the interest on tax deferral imposed by *IRC § 1291*), over the mark-to-market losses for the stock that were allowed as deductions in prior years. *IRC § 1296(d)*.

If a regulated investment company (RIC) makes the mark-to-market election for its PFIC stock, the deduction for the

excess of the stock's adjusted basis over its fair market value is allowed to the extent of its mark-to-market inclusions for prior years.

(n56)Footnote 5. *Treas Reg § 1.1296-1(g)(3)*.

(n57)Footnote 6. *IRC § 1296(e)(1)(A)*. A foreign securities exchange must have trading volume, listing, financial disclosure, surveillance, and other requirements designed to prevent fraudulent and manipulative practices, to remove impediments to and perfect the mechanism of a free and open, fair and orderly market, and to protect investors; and the laws of the country in which the exchange is located and the rules of the exchange ensure that the requirements are actually enforced. In addition the rules of the exchange must effectively promote active trading of listed stocks. *Treas Reg § 1.1296(e)-1(c)(1)(ii)*.

(n58)Footnote 7. *IRC § 1296(e)(1)(C)*.

(n59)Footnote 8. *IRC § 1296(e)(1)(B)*.

(n60)Footnote 9. *IRC § 1296(e)(2)*. Except as provided in regulations, similar treatment as marketable stock applies to any PFIC stock held by any other RIC that publishes net asset valuations at least annually.

(n61)Footnote 10. *IRC § 1296(b)(1)*.

(n62)Footnote 11. *IRC § 1296(b)(2)(A)*.

(n63)Footnote 12. *IRC § 1296(b)(2)(B)*.

(n64)Footnote 13. *IRC § 1296(c)(1)(A)*. Any amount included by an RIC is treated as a dividend for the purposes of *IRC § 851(b)(2)* and (3), the income limitation provisions used in determining whether a corporation is an RIC. *IRC § 1296(h)*.

Any gain from the disposition of stock of a foreign corporation that does not qualify as a PFIC for the year of disposition will be capital gain. *Treas Reg § 1.1296-1(c)(7)*, Ex 2.

(n65)Footnote 14. *IRC § 1296(c)(1)(B)*. Any loss with respect to stock for which a mark-to-market election was made but that is recognized in a taxable year during which the foreign corporation is not a PFIC is a capital loss. *Treas Reg § 1.1296-1(c)(7)*, Ex 4.

(n66)Footnote 15. *IRC § 1296(c)(1)(C)*.

(n67)Footnote 16. *IRC § 1296(f)(1)*.

(n68)Footnote 17. *IRC § 1296(f)(2)*.

(n69)Footnote 18. *IRC § 1296(f)(2)*.

(n70)Footnote 19. *IRC § 1296(j)(1)*.

(n71)Footnote 20. *IRC § 1296(j)(2)*.

(n72)Footnote 21. *IRC § 1291(d)(1)*. For the first taxable year for which a § 1296 election is in effect with respect to stock of a PFIC, the US person making the election must (1) apply the rules of *IRC § 1291* with respect to, or disposition of, the stock; (2) apply *IRC § 1291* to the amount of the excess, if any, of the fair market value of the stock on the last day of the US person's taxable year over its adjusted basis, as if the amount were gain recognized from the disposition of stock on the last day of the taxpayer's taxable year; and (3) increase the adjusted basis of the stock by the

amount of that excess. *Treas Reg* § 1.1296-1(i)(2).

The coordination rules are applicable as well to a US person that marks-to-market its PFIC stock under a provision other than *IRC* § 1296. *Treas Reg* § 1.1291(c)(3).

(n73)Footnote 22. *IRC* § 1291(a)(3)(A)(ii).

(n74)Footnote 23. *IRC* § 1296(i).

(n75)Footnote 24. *IRC* § 1296(l).

(n76)Footnote 25. *IRC* § 1296(k).

(n77)Footnote 26. *Treas Reg* § 1.1296-1(h)(1). The election is made on Form 8621.

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.05

§ 20.05 Tax Consequences of Investments in US Securities by Nonresident Aliens and Foreign Corporations

[1] The Taxation of Passive Investment Income

The United States taxation of a foreign taxpayer's passive investment income--income not effectively connected with the conduct of a trade or business in the United States--extends only to income from sources within the United States. Whether income is from United States sources, or from foreign sources and, thus nontaxable, is a matter normally to be determined under the various source rules that are prescribed for different types of income in *IRC Sections 861, 862, and 863*. The source rules most pertinent to foreign investors--those for interest, dividends, and gains on sales of property--are discussed in greater detail below, but a few general points should be kept in mind.

First, determining the "source" of an item of income is not a matter of finding the physical source or location of the funds from which the item is paid. "[In prescribing source rules,] Congress was not referring ... to the origin of the physical means of payment, but rather to the place where the recipient's income was 'produced.'"n1 In seeking the source of interest, dividends or royalty payments, for example, the fact that the payments are made out of a foreign bank account, in which only foreign income has been deposited, does not necessarily give the payments a foreign source.n2

Second, *IRC Sections 861, 862 and 863* do not comprehensively cover all types of income, including income related to securities transactions, on which nonresident aliens may be subject to US tax. Where income is not of a kind covered by a specific statutory sourcing rule, the Internal Revenue Service and the courts will generally compare it with the kinds of income for which sourcing rules are specifically prescribed and apply by analogy the sourcing rule for the income type that is most similar to the income in question.

Thus, in *Bank of America v US*,n3 "acceptance" and "confirmation" commissions received by a US bank from foreign banks for undertaking to pay US exporters presenting commercial letters of credit and similar obligations issued by the foreign banks were deemed analogous to (though not the same as) interest because, like interest, the commissions predominately compensated the US bank for assuming the risk that the foreign banks might fail to reimburse it for amounts advanced on their behalf. On the other hand, "negotiations" commissions paid to the US bank for acting as the foreign banks' agent in determining whether the conditions of their letters of credit had been met, without obligating the US Bank to use its funds to make payments under the letters of credit if the conditions were satisfied, were deemed more in the nature of compensation for services performed by the US bank. Accordingly, the "acceptance" and "confirmation" commissions were sourced at the residence of the foreign banks by analogy to the statutory sourcing rule

for interest (residence of obligor), while "negotiating" commissions were sourced in the US, where the US banks' services were performed, by analogy to the sourcing rule applicable to compensation for services.ⁿ⁴ In another case involving income that did not fall squarely into one of *IRC Section 861*'s categories, a foreign parent company received fees from its US subsidiary as compensation for guaranteeing the US subsidiary's indebtedness to third parties, calculating the fees as a percentage (1.5 percent) of the subsidiary's outstanding guaranteed indebtedness each year. The Tax Court decided that the lack of an unconditional obligation to assume the subsidiary's outside indebtedness made it inappropriate to analogize these fees to interest. Finding that the guarantee was more akin to a service performed for the US subsidiary by the foreign parent in its home country (where the assets supporting the guarantee were located), the Tax Court held that the fees charged for that service should be sourced outside the US where it felt the service was performed.ⁿ⁵

Finally, a determination that passive investment income received by a foreign taxpayer has a US source does not necessarily mean that it will therefore be taxed by the US; it only means that the US considers such investment income to be within its jurisdiction to tax. Whether or not US source income of a foreign taxpayer is actually taxed, and at what rate, depends upon the provisions of and statutory exceptions to *IRC Sections 871* (taxation of foreign individuals) and *881* (taxation of foreign corporations). Tax rates are also governed by income tax treaties between the US and individual foreign countries which often reduce or eliminate, for the resident-beneficiaries of the US's treaty partners, US tax on various kinds of income. One example of US source income that is not taxable to any nonresident alien or foreign corporation is the statutory exception for "portfolio interest" as defined in *IRC Section 871(h)(2)*, the purpose of which is to encourage foreign investors to deposit their funds in the US. This and other rules governing the taxation of US source investment income received by foreign individuals and corporations are discussed in § 20.05 [1][b], *infra*.

[a] The Source Rules.

[i] Interest. The general rule regarding the source of interest income is that it is determined by reference to the residence of the obligor.ⁿ⁶ Thus, "interest from the United States, any Territory, and political subdivision of a Territory, or the District of Columbia, and interest on bonds, notes, or other interest-bearing obligations of residents, corporate or otherwise," constitutes income from sources within the United States.ⁿ⁷

IRC Section 861(a) makes exceptions from the general rule in certain categories where the resident payor derives at least 80 percent of its income from an active business outside the United States, or the interest is paid on deposits in a foreign branch of a US bank. More specifically, the following four categories of interest are considered income from sources outside the US, notwithstanding that the payor is legally resident in the US.

(1) Interest paid by a resident alien individual or domestic corporation, if it is established to the satisfaction of the Service that, during the three-year period ending with the close of the payor's taxable year preceding the payment, at least 80 percent of the payor's income was "active foreign business income."ⁿ⁸ "Active foreign business income" means gross income derived from sources outside the United States attributable to the active conduct of a trade or business in a foreign country.^{n8.1} If the payor of the interest is a domestic corporation, the 80-percent test may also be satisfied by a subsidiary in which the domestic corporation owns at least 50 percent of the stock. However, if the nonresident recipient of the interest is a "related person," (eg, a corporation 10 percent or more of which is owned by the payor of the interest),ⁿ⁹ a "look-thru" rule applies under which the percentage of the interest received that is deemed sourced outside the US cannot exceed the percentage of the payor's gross income that is "active business income." Thus, if 20 percent of the payor's income is not attributable to the conduct of an active business or is not from sources without the US, no more than 80 percent of the recipient's interest payment will be regarded as sourced without the US.

(2) interest on deposits with a foreign branch of a domestic corporation or domestic partnership, provided the branch is engaged in the commercial banking business;ⁿ¹⁰

(3) interest on deposits or withdrawable accounts in foreign branches of United States savings and loan associations;ⁿ¹¹ and

(4) in the case of a foreign partnership that is predominantly engaged in the active conduct of a trade or business outside the United States, any interest paid by a trade or business engaged in by the partnership in the United States and not allocable to income that is effectively connected (or treated as effectively connected) with the conduct of a trade or business in the United States.ⁿ¹²

However, *IRC Section 871(i)* prevents the imposition of any tax on interest on deposits, if the interest is not effectively connected with the conduct of a trade or business in the United States.ⁿ¹³

[ii] Dividends. Dividends received from domestic corporations are generally considered income from United States sources, without regard to whether or to what extent the domestic corporation earned its income from sources within or without the United States.ⁿ¹⁴

Dividends from a foreign corporation may also be considered US source income under certain circumstances described in *IRC Section 861(a)(2)*. Under *IRC Section 861(a)(2)(B)*, dividends received from a foreign corporation are deemed to be wholly or partially from US sources if, in the three-year period ending with the taxable year before the dividend is declared, at least 25 percent of the corporation's gross income from all sources was effectively connected with the conduct of a US trade or business. In this event, the portion of such foreign corporation's dividends that are deemed to be from US sources is determined by multiplying the total amount of dividends received by a fraction, the numerator of which is the gross income for the three-year period that was effectively connected with the conduct of a trade or business in the United States, and the denominator of which is the entire gross income for the period.ⁿ¹⁵ (If the corporation has no gross income from any source during the three-year period, the 25 percent test is applied with respect to its income in the year the dividend is paid.)ⁿ¹⁶

For purposes of the foreign tax credit, dividends (other than dividends for which a dividends received deduction is allowable under *IRC Section 245(b)*) from a foreign corporation are treated as income from sources without the United States to the extent (and only to the extent) they exceed the amount that is 100/70ths of the amount of the deduction allowable under *IRC Section 245* in respect of such dividends.ⁿ¹⁷ Finally, dividends paid by a foreign corporation from earnings and profits accumulated by a domestic corporation subject to federal income taxes are United States source income in their entirety.ⁿ¹⁸ Dividends received by a United States corporation from a DISC or former DISC constitute income derived from sources within the United States, except to the extent the dividends are attributable to qualified export receipts, in which case they are treated as foreign source income.ⁿ¹⁹ Dividends other than those described above are considered dividends from sources outside the United States.ⁿ²⁰

[iii] Dividend Equivalents. *IRC Section 871(l)*, added to the Code by the Hiring Incentives to Restore Employment Act (the "HIRE" Act) of 2010,ⁿ²¹ provides that, for purposes of *IRC Sections 871* and *881*, and the obligation to withhold the tax imposed by those sections from payments to nonresident aliens pursuant to §§ 1441 et seq and 1471 et seq, a "dividend equivalent" shall be treated as a dividend from sources within the United States. A dividend equivalent is defined as:ⁿ²²

(A) any substitute dividend made pursuant to a securities lending or a sale-repurchase transaction that (directly or indirectly) is contingent upon, or determined by reference to, the payment of a dividend from sources within the United States;

(B) any payment made pursuant to a notional principal contract that (directly or indirectly) is contingent upon, or determined by reference to, the payment of a dividend from sources within the United States;ⁿ²³ and

(C) any other payment determined by the Secretary [of the Treasury] to be substantially similar to a payment described in paragraphs (A) or (B) above.

Dividend equivalents treated as U.S.-source dividends under *IRC Section 877(l)* are the gross amounts used in computing any net amounts transferred to or from the foreign taxpayer.ⁿ²⁴ An example given by the Joint Committee on Taxation illustrates this rule. Under a typical total return swap referencing stock of a domestic corporation (an example of a notional principal contract to which *IRC § 877(l)* applies), a foreign investor enters into an agreement with a counterparty under which amounts due to each party are based on the returns generated by a notional investment in a specified dollar amount of the domestic corporation's stock. The investor agrees for a specified period to pay to the counterparty (1) an amount calculated by reference to a market interest rate (such as the London Interbank Offered Rate (LIBOR)) on the notional amount of the domestic corporation's stock and (2) any depreciation in the value of the stock. In return, the counterparty agrees for the specified period to pay the investor (1) any dividends paid on the stock and (2) any appreciation in the value of the stock. Amounts owed by each party under this swap typically are netted so that only one party makes an actual payment. *IRC Section 877(l)* treats any dividend-based amount under the swap as a payment even though any actual payment under the swap is a net amount determined in part by other amounts (for example, the interest amount and the amount of any appreciation or depreciation in value of the referenced stock). Accordingly, a counterparty to a total return swap may be obligated to withhold and remit tax on the gross amount of a dividend equivalent even though, as a result of a netting of payments due under the swap, the counterparty is not required to make an actual payment to the foreign investor.ⁿ²⁵

The antecedent of *IRC Section 871(l)* is the "transparency rule" promulgated by the Treasury in a set of final regulations issued in 1997.ⁿ²⁶ The 1997 regulations cover the same transactions now governed by *IRC Section 871(l)(2)(A)*; so-called "substitute dividends" paid in connection with "securities lending transactions" (a transfer of one or more securities that is described in *IRC Section 1058(a)* or a substantially similar transactionⁿ²⁷) and "sale-repurchase transactions" (an agreement under which a person transfers a security in exchange for cash and simultaneously agrees to receive substantially identical securities from the transferee in the future in exchange for cash).ⁿ²⁸ Under the transparency rule, "a substitute dividend payment [paid under such agreements] shall be sourced in the same manner as the distributions with respect to the transferred security. ..."n29

The peculiar thing about the 1997 regulations, and *IRC § 877(l)*, is that, as the Treasury conceded when the 1997 regulations were promulgated, the transparency rule treats substitute payments differently for sourcing purposes than they are treated for other purposes under the Internal Revenue Code.ⁿ³⁰ The general rule with respect to such payments is stated in *Prop Treas Reg Section 1.1058-1(d)*:

"...[A] payment of amounts required to be paid by the borrower that are equivalent to all interest, dividends, and other distributions...shall be treated by the lender as a fee for the temporary use of property. Thus, for example, an amount received by the lender that is equivalent to a dividend paid during the term of the loan shall not constitute a dividend to the lender for purposes of the Internal Revenue Code, but shall be taken into account as ordinary income."

Consistent with this general rule, the IRS has held that substitute dividends are not dividends for purposes of the dividends received deduction under *IRC Section 243*,ⁿ³¹ and that substitute interest cannot be tax-exempt interest under *IRC Section 103* even though the underlying security is a tax-exempt bond.ⁿ³² Nor is the transparency or "look through" rule always applied consistently even in transactions to which it is otherwise applicable. For example, if the issue is whether a substitute interest payment to a foreign taxpayer is US or foreign source income, the focus is on the underlying security (transparency rule applies), but the underlying security is disregarded if the issue is whether the substitute payment is "effectively connected" with a US trade or business of the foreign taxpayer (transparency rule does not apply).ⁿ³³ Indeed, the term transparency rule is itself a misnomer, since under the regulations (as well as under *IRC Section 871(l)*) a substitute payment will be treated as derived from a dividend on the underlying security even

though that underlying security may no longer be owned by the borrower that is supposedly a mere conduit for dividends to the lender.ⁿ³⁴

It would appear that the justification for departing from the general rule for determining the character of substitute payments when it comes to the sourcing rules for passive income received by foreign taxpayers is that, as a practical matter, application of the general rule in such cases would make the US withholding tax on interest and dividends a dead letter.ⁿ³⁵ In the absence of a "transparency rule," foreign taxpayers holding US stocks could easily avoid the US withholding tax on their dividends by entering into securities lending or similar agreements with their US brokers, thereby transforming their taxable US-source dividends into nontaxable substitute payments that are exempt as US-source "portfolio interest."ⁿ³⁶

However, a troubling possible consequence of unhitching the sourcing rules from the reality of securities lending transactions is that the borrower might re-transfer the underlying securities to a foreign party, which might transfer them to second foreign party, and so on, so that multiple substitute payments based on the same dividend could become subject to withholding tax under the transparency rule, and the total tax collected could exceed the 30 percent rate imposed by the Internal Revenue Code.ⁿ³⁷ The IRS sought to address this potential problem in *Notice 97-66*,ⁿ³⁸ issued shortly after publication of the 1997 final regulations, which provided relief in the following terms:

"[T]he amount of U.S. withholding tax to be imposed ... with respect to a foreign-to-foreign payment will be the amount of the underlying dividend multiplied by a rate equal to the excess of the rate of U.S. withholding tax that would be applicable to U.S. source dividends paid by a U.S. person directly to the recipient of the substitute payment over the rate of U.S. withholding tax that would be applicable to U.S. source dividends paid by a U.S. person directly to the payor of the substitute payment. This amount may be reduced or eliminated to the extent that the total U.S. tax actually withheld on the underlying dividend and any previous substitute payments is greater than the amount of U.S. withholding tax that would be imposed on U.S. source dividends paid by a U.S. person directly to the payor of the substitute payment."

However, *Notice 97-66* spawned transactions in which, relying on the literal terms of *Notice 97-66*, taxpayers took the position that a foreign payor of substitute dividends to a payee which was subject to the same withholding tax rate on US source dividends as the payor could calculate the rate on the foreign-to-foreign payment as zero even though no withholding tax had ever actually been paid with respect to the dividend on the underlying US security.ⁿ³⁹

Notice 97-66 was withdrawn by the IRS in *Notice 2010-46*ⁿ⁴⁰ in light of what the IRS regarded as the misinterpretation of *Notice 97-66* and the enactment of *IRC Section 877(l)*. Section 877(l)(6) expressly authorizes the Treasury to reduce the amount of tax imposed under *IRC Sections 871* or *881* "in the case of any chain of dividend equivalents" that is subject to tax under those sections "but only to the extent that the taxpayer can establish that such tax has been paid with respect to another dividend equivalent in such chain, or is not otherwise due, or as the ... [Treasury] determines is appropriate to address the role of financial intermediaries in such chain."ⁿ⁴¹

Treasury and the IRS announced in *Notice 2010-46*, Section II, their intention to issue regulations, with an effective date of January 1, 2012, exercising the authority granted by *IRC Section 871(l)(6)*. Consistent with the provisions of the new statute, the regulations will replace the formulary approach previously adopted by *Notice 97-66* with a documentation-based system, outlined in part II of *Notice 2010-46*. Under the new system, withholding agents will be able to reduce withholding to the extent that withholding is shown to have been made on another substitute payment or dividend with respect to identical securities. Further, a withholding agent making a substitute dividend payment to a financial institution which is certified as a "Qualified Securities Lender" will not be required to withhold U.S. tax with respect to such payment provided the Qualified Securities Lender is obliged to make an offsetting substitute dividend payment with respect to identical securities and withholds and pays over to the IRS US withholding tax on such offsetting payment.ⁿ⁴²

In addition to the rules applicable until September 14, 2010 (*Notice 97-66* as modified by *Notice 2010-46*), and the regulations expected to be applicable on and after January 1, 2012, *Notice 2010-46* announced a third set of rules for avoiding multiple tax on dividend substitute payments in a chain of securities lending transactions, which will be applicable during the "transition period" between September 14, 2010 and January 1, 2012. Under the "transition period" rules, the maximum aggregate U.S. gross-basis tax due, if any, with respect to a series of Securities Lending Transactions and any related dividend payment will be the amount determined by the tax rate paid by the foreign taxpayer (other than in the case of a Qualified Securities Lender that is obligated to make an offsetting substitute dividend paymentⁿ⁴³) bearing the highest rate of U.S. gross-basis tax in the series. A withholding agent that is obligated to make a substitute dividend payment pursuant to a Securities Lending Transaction during the transition period may presume that US tax has been paid in an amount equal to the amount implied by the net payment if all of the following requirements are satisfied: (1) the withholding agent receives a substitute dividend or dividend payment with respect to identical securities that reflects a reduction for withholding of U.S. gross-basis tax; (2) the withholding agent does not know or have reason to know that tax was not withheld and deposited or paidⁿ⁴⁴; and (3) the withholding agent is a person subject to audit under *IRC § 7602*, or in the case of a Qualified Intermediaryⁿ⁴⁵, by an external auditor.

[iv] Gains and Losses From the Sale of Securities. Gains derived from the sale of investment securities by a nonresident alien or foreign corporation are foreign source income no matter where the sale takes place, unless the nonresident has an office or fixed place of business in the United States and gain from the sale is attributable to the office.ⁿ⁴⁶ However, if the securities are held by a dealer other than for investment, the applicable source rule depends on the place of purchase and sale.ⁿ⁴⁷ If the purchase of the "inventory" securities takes place outside the United States or its possessions and the sale occurs within the United States, the gains are United States source income.ⁿ⁴⁸ If the purchase occurs within the United States and the sale without, the income is from foreign sources.ⁿ⁴⁹ In other words, the gain is treated as derived entirely from the country in which the property is sold, i.e., the country in which the right, title, and interest of the seller pass to the buyer.ⁿ⁵⁰

IRC Section 306(f) sets forth a special rule for determining the source of gain from the sale of Section 306 stock.ⁿ⁵¹ To the extent that such gain is considered gain from the sale of a noncapital asset and, thus, as ordinary income, it "shall ... be treated as derived from the same source as would have been the source if money had been received from the corporation as a dividend at the time of the distribution of such stock."

Generally, loss recognized with respect to stock is allocated to, or apportioned between, United States source and foreign source income.ⁿ⁵² This can lead to different classifications for gains and losses. For example, any gain produced by a sale of stock is determined according to the residence of the taxpayer. Thus, if a nonresident sells stock in a United States corporation from which the nonresident has received dividends, and the sale produces a gain, the gain is foreign source income. However, if the sale produces a loss, the loss will be a deduction against United States source income.

[b] Imposition of the Tax on United States Source Income. *IRC Sections 871(a)(1)* and *881(a)* assess a tax of 30 percent on the interest, dividends, and other fixed or determinable annual or periodical gains, profits, and income not effectively connected with the conduct of a trade or business within the United States which are received by nonresident alien individuals and foreign corporations during the taxable year.ⁿ⁵³ However, *IRC Section 871(i)* precludes the imposition of any tax on (1) interest on deposits, if the interest is not effectively connected with the conduct of a trade or business in the United States; (2) a percentage of any dividend paid by a domestic corporation that meets the 80-percent foreign business requirement;ⁿ⁵⁴ (3) income derived by a foreign central bank of issue from bankers' acceptances; and (4) dividends paid by a foreign corporation that is treated under *IRC Section 861(a)(2)(B)* as income from sources within the United States.

Under *IRC Section 7701(b)*, a nonresident alien is an individual who is not (1) a citizen of the United States or a person

granted lawful permanent resident status; (2) has not had a substantial presence in the United States during the taxable year; and (3) has not made the first-year election.ⁿ⁵⁵ The substantial presence test is met if the person is present in the United States for 31 days during the calendar year in question and the sum of the number of days present in the United States during the current calendar year, plus one third of the days present in the preceding calendar year and one sixth of the days present in the second preceding year equals or exceeds 183 days. Exceptions are made for an individual present in the United States for less than 183 days in the current year if it is established that the person has a tax home in a foreign country and has a closer connection to the foreign country than to the United States. Foreign government-related individuals (e.g., diplomats or full-time employees of international organizations), teachers or trainees, students, and professional athletes who are temporarily in the United States to compete in certain charitable sports events are exempt from the substantial presence test. A teacher or trainee loses that exemption if it is applied for any two calendar years during the preceding six calendar years. The substantial presence test must be met for any year after the fifth year for which the person was exempt either as a teacher or trainee, or as a student, unless it is established that there is no intention to permanently reside in the United States and has substantially complied with the requirements for a student visa.

Under *IRC Section 269B*, a foreign corporation will be treated as a domestic corporation and will be taxed on its worldwide income if it and a domestic corporation are stapled entities, that is, if more than 50 percent in value of the beneficial ownership in each of the entities are stapled interests. Two or more interests are stapled interests if, by reason of form of ownership, restrictions on transfer, or other terms and conditions, in connection with the transfer of one of such interests the other interests must also be transferred. The rule does not apply if it is established to the satisfaction of the Service that the domestic corporation and foreign corporation are foreign owned (less than 50 percent of the combined voting power of all classes of stock entitled to vote and of the total value of the stock is held, directly or indirectly, by United States persons).ⁿ⁵⁶

Foreign investors treat original issue discount (OID) somewhat differently from their domestic counterparts. OID on obligations issued before April 1, 1972, is not taxed until sale, exchange, or surrender at maturity.ⁿ⁵⁷ A foreign taxpayer acquiring an OID obligationⁿ⁵⁸ issued after March 31, 1972, treats OID in two ways. When a foreign taxpayer receives payment on an OID obligation, an amount equal to the OID accruing while the obligation was held by the nonresident alien will generally be subject to tax. However, the amount of OID is taken into account only to the extent that the tax thereon does not exceed the payment less the tax imposed on that payment.ⁿ⁵⁹ On the sale or exchange of an OID obligation, any gain not in excess of the OID accruing while the obligation was held by the foreign investor will be subject to tax to the extent not previously taken into account on a payment.ⁿ⁶⁰ The provisions of *IRC Section 1286*, relating to the treatment of stripped bonds and stripped coupons as obligations with OID, apply for purposes of determining the amount of tax due under *IRC Section 871(a)*.ⁿ⁶¹

As a general rule, the payor of periodic income to a nonresident alien or foreign corporation is required to withhold 30 percent of the amount of the payment.ⁿ⁶² However, the Code does not require the imposition of the 30-percent withholding tax on portfolio interest received by a nonresident individual or a foreign corporation from sources within the United States.ⁿ⁶³ Portfolio interest is defined as interest paid on any obligation in registered form,ⁿ⁶⁴ provided the obligor receives a statement that the beneficial owner of the obligation is not a U.S. person.ⁿ⁶⁵ Interest received by a nonresident individual is not portfolio interest if the recipient is a 10-percent shareholder--a person who owns 10 percent or more of the total combined voting power of all classes of stock of the corporation issuing the obligation, or, if the obligation is issued by a partnership, a person who owns 10 percent or more of the capital or profits interest in the partnership.ⁿ⁶⁶ For a foreign corporation, interest that would be treated as portfolio interest is not if it is received by (1) a bank on an extension of credit made in the ordinary course of business and is not interest on an obligation of the United States; (2) a 10-percent shareholder; or (3) a controlled foreign corporation from a related person.ⁿ⁶⁷

IRC Section 871(h)(4)(A) excludes from the category of portfolio interest:

(a) any amount of interest that is determined by reference to

- (i) any receipts, sales, or other cash flow of the debtor or a related person,
 - (ii) any income or profits of the debtor or a related person,
 - (iii) any change in value of any property of the debtor or a related person, or
 - (iv) any dividend, partnership distributions, or similar payments made by the debtor or a related person, and
- (b) any other type of contingent interest that is identified in regulations, where a denial of the portfolio interest exemption is necessary to prevent avoidance of federal income tax.ⁿ⁶⁸

This rule does not apply to:

- (1) any amount of interest solely by reason of the fact that the timing of any interest or principal is subject to a contingency,
- (2) any amount of interest solely by reason of the fact that the interest is paid with respect to nonrecourse or limited recourse indebtedness,
- (3) any amount of interest all or substantially all of which is determined by reference to any other interest not described in the preceding sentence (or by reference to the principal amount of indebtedness on which such other interest is paid),
- (4) any amount of interest solely by reason of the fact that the debtor or a related person enters into a hedging transaction to manage the risk of interest rate or currency fluctuations with respect to the interest,
- (5) any amount of interest determined by reference to (a) changes in the value of, or index of the value of, property (including stock that is actively traded within the meaning of *IRC Section 1092(d)*) other than a U.S. real property interest, or (b) the yield on, or index of the yield on, such property, other than a debt instrument that pays contingent interest, or stock or other property that represents a beneficial interest in the debtor or a related person, and
- (6) any other type of interest identified in regulations.ⁿ⁶⁹

IRC Section 871(h)(4)(A) also does not apply to any indebtedness with a fixed term that was issued on or before April 7, 1993, or issued after that date pursuant to a written binding contract in effect on that date and at all times thereafter until the indebtedness was issued.ⁿ⁷⁰

IRC Sections 871(a)(1) and *881* generally do not apply to any interest-related dividend received from a regulated investment company.ⁿ⁷¹ Excepted from this rule is (a) any interest-related dividend received from a regulated investment company by a person to the extent the dividend is attributable to interest (other than original issue discount on an obligation payable 183 days or less from the date of original issue or interest on deposits not effectively connected with a United States trade or business) received by the company on indebtedness issued by that person or by any corporation or partnership in which the person is a 10-percent shareholder (as defined in *IRC Section 871(h)(3)*, discussed above); (b) any interest-related dividend with respect to stock of a regulated investment company unless the

person who would otherwise be required to deduct and withhold tax from the dividend receives a statement that the beneficial owner of the stock is not a United States person; and (c) any interest-related dividend paid to any person within a foreign country (or any interest-related dividend payment addressed to, or for the account of, persons within that foreign country) during any period of time that the Service determines that the exchange of information between the United States and that country is inadequate to prevent the evasion of federal income taxes by United States persons, unless the stock was acquired on or before the date of the determination.ⁿ⁷²

An interest-related dividend is any dividend (or part thereof) that is designated by the regulated investment company as an interest-related dividend in a written notice mailed to its shareholders not later than 60 days after the close of the taxable year.ⁿ⁷³ If the aggregate amount so designated for any taxable year (including amounts designated with respect to dividends paid after the close of the taxable year according to *IRC Section 855*) is greater than the qualified net interest income (qualified interest income less deductions properly attributable thereto) of the company for the taxable year, the portion of each distribution that will be an interest-related dividend is only that portion of the designated amount that the qualified net interest income bears to the aggregate amount so designated.ⁿ⁷⁴ Qualified interest income equals the sum of the following amounts derived by the regulated investment company from sources within the United States:

- (i) any amount includable in gross income as original issue discount on an obligation payable 183 days or less from the date of original issue (without regard to the period held by the company);
- (ii) any interest includable in gross income (including amounts recognized as ordinary income in respect of original issue discount, market discount, or acquisition discount and such other amounts as regulations may provide) on an obligation in registered form, but not (a) any interest on an obligation issued by a corporation or partnership if the regulated investment company is a 10-percent shareholder thereof, or (b) any contingent interest that is treated as not being portfolio interest under *IRC Section 871(h)(4)*;
- (iii) any interest on deposits, if the interest is not effectively connected with the conduct a trade or business in the United States (without regard to the business of the regulated investment company); and
- (iv) any interest-related dividend includable in gross income with respect to stock of another regulated investment company.ⁿ⁷⁵

A nonresident alien shareholder of a regulated investment company is not subject to tax on any short-term capital gain dividend received from a regulated investment company, unless the shareholder is otherwise taxable on capital gains.ⁿ⁷⁶ A short-term capital gain dividend is any dividend (or part thereof) that is designated by the regulated investment company as a short-term capital dividend in a written notice mailed to its shareholders not later than 60 days after the close of the taxable year.ⁿ⁷⁷ If the aggregate amount so designated for any taxable year (including amounts designated with respect to dividends paid after the close of the taxable year according to *IRC Section 855*) is greater than the qualified short-term capital gain of the company for the taxable year, the portion of each distribution that will be a short-term capital gain dividend is only that portion of the designated amount that the qualified short-term capital gain bears to the aggregate amount so designated.ⁿ⁷⁸ For this purpose, qualified short-term capital gain is the excess of the net short-term capital gain of the regulated investment company for the taxable year over its net long-term capital loss (if any) for the year.ⁿ⁷⁹ The net short-term capital gain of the regulated investment company is computed by taking into account any short-term capital gain dividend received from another regulated investment company, while the excess of net short-term capital gain over net long-term capital loss is determined without regard to any net capital loss or net short-term capital loss attributable to transactions after October 31 of the taxable year; those losses are treated as arising on January 1 of the next taxable year.ⁿ⁸⁰

IRC Section 892(a) exempts from taxation any income received by a foreign government received from investments in the United States in (1) stocks, bonds, or other domestic securities, (2) financial instruments held in the execution of

governmental financial or monetary policy, or (3) interest on deposits in U.S. banks, except when the income is derived from the conduct of a commercial activity, received from or by a controlled commercial entity, or derived from the disposition of any interest in a controlled commercial entity.ⁿ⁸¹ *IRC Section 892(b)* provides a similar rule for investment income of international organizations.

Gains realized on lump-sum distributions from qualified employees' trusts are subject to tax.ⁿ⁸² On the other hand, gains from the sale of securities are not considered to be fixed or determinable income. Under *IRC Section 871(a)(2)*, a nonresident alien is taxed on net capital gains from U.S. sources (the excess of capital gains from sources within the United States over capital losses from such sources) only if present in the United States for 183 days or more during the taxable year;ⁿ⁸³ the rate imposed is, again, 30 percent. A foreign corporation not engaged in business in the United States is never present in the United States and, therefore, is never taxed on its capital gains from U.S. sources.ⁿ⁸⁴

Capital losses are taken into account in computing net capital gains only if actually incurred during the taxable year; capital loss carryovers are not available to a nonresident alien. However, if, by some chance, the gain is taxed under *IRC Section 871(a)(1)* as an item of fixed or determinable income, it is not subject to tax a second time under *IRC Section 871(a)(2)*.

[2] Income Effectively Connected With a U.S. Trade or Business

[a] The Effectively Connected Income Concept

[i] The Function of the Concept. Prior to the enactment of the Foreign Investors Tax Act in 1966, the conduct of a trade or business in the United States by a foreign taxpayer triggered "force of attraction" rules which caused income from U.S. sources--passive investment income and business income alike--to be taxed by the United States at regular rates. Present law taxes income at such rates only if effectively connected with the conduct of a trade or business in the United States;ⁿ¹ investment income is taxed separately. Thus, one function of the effectively connected income concept is to distinguish between United States source investment income, taxed at the flat rate provided by *IRC Sections 871(a)(1)* and *881(a)*, and United States source business income, taxed under the progressive rates imposed on individuals by *IRC Section 1*, *Section 55*, or *Section 402(e)(1)*, or under the corporate rates of *IRC Section 11*. But the effectively connected concept plays another role; it determines whether certain classes of foreign source income will be taxed by the United States.

[ii] Effectively Connected Income From United States Sources. The Code is almost silent when it comes to defining the effectively connected concept. However, it does set forth two principal factors to be taken into account in determining if periodic income from sources within the United States, or capital gain or loss from United States sources, is effectively connected with the conduct of a trade or business within the United States, namely, whether:

"(A) the income, gain, or loss is derived from assets used in or held for use in the conduct of such trade or business, or (B) the activities of such trade or business were a material factor in the realization of the income, gain, or loss."ⁿ²

The statute goes on to say that in making this determination "due regard shall be given to whether or not [the] asset or [the] income, gain, or loss was accounted for through [the] trade or business." This may be taken as an indication that a person will be hard pressed to deny that income is effectively connected with the conduct of a trade or business if, on the business's books, the income is treated as business income.

A simple example will serve to illustrate these principles:

Example:

F Corp., a foreign corporation engaged in manufacturing operations in the United States, purchases stock in a domestic corporation in order to insure a constant source of supply of raw materials for its

operations. Dividends paid on, and gain realized from the sale of, such stock will be considered income effectively connected with the conduct of a trade or business in the United States. So would income or gain from a temporary investment of working capital, but not income or gain from securities purchased with funds not needed in the conduct of the business in the United States.ⁿ³

The content of effectively connected income is more easily determined when the income does not consist of the fixed or determinable type specified in *IRC Sections 871(a)(1)* and *881(a)*, or capital gain. By use of a "force of attraction" rule all such other income from United States sources, eg, gain from the sale of a noncapital asset in the United States, is treated as effectively connected with the conduct of the taxpayer's trade or business within the United States.ⁿ⁴

Under *IRC Section 864(c)(6)*, the determination of whether income or gain of a nonresident alien or foreign corporation taken into account in one year but attributable to a transaction in another tax year is effectively connected with a United States trade or business is made by looking to the year of the transaction, without regard to the requirement that the taxpayer be engaged in a trade or business during the year the income is taken into account. Under *IRC Section 864(c)(7)*, the determination of whether any income or gain attributable to a sale or exchange of property within 10 years after the property ceases to be used in connection with the conduct of a United States trade or business is effectively connected income is made as if the sale or exchange occurred immediately before the cessation, without regard to the requirement that the taxpayer be engaged in a United States trade or business during the taxable year in which the income is taken into account.

IRC Section 897 treats gain realized by a foreign taxpayer from the disposition of a United States real property interest as gain effectively connected with a trade or business conducted by the taxpayer within the United States.ⁿ⁵ The term "United States real property interest" is broadly defined and includes not only direct interests in real property located in the United States or the Virgin Islands, but also "any interest (other than an interest solely as a creditor) in any domestic corporation unless the taxpayer establishes [in accordance with regulations to be prescribed] that such corporation was at no time a United States real property holding corporation during the shorter of [the period after June 18, 1981, during which the taxpayer held the interest or the five-year period ending on the date of disposition]."ⁿ⁶

A corporation is a United States real property holding corporation if the fair market value of its United States real property interests amount to 50 percent or more of the total value of (1) its United States real property interests, (2) its real property located outside the United States, and (3) all its other trade or business assets.ⁿ⁷ The process of determining real property holding corporation status is more complex than the simple definition would have it appear, because:

- (1) any interest in a domestic or foreign real property holding corporation must be treated as a United States real property interest;ⁿ⁸
- (2) United States real property interests held by a partnership, trust or estate are deemed to be owned proportionately by its partners or beneficiaries;ⁿ⁹
- (3) a corporation that owns 50 percent or more of the fair market value of all classes of stock of a second corporation is treated as owning that portion of each of the second corporation's assets that corresponds to the percentage of the controlling corporation's stock ownership.ⁿ¹⁰

Three exclusionary rules soften the impact of the Act. First, an interest in a domestic corporation is not a United States real property interest if, on the date of disposition, the corporation has no United States real property interests and those that it had during the specified period were disposed of in transactions in which the full amount of the corporation's gain was recognized.ⁿ¹¹ Second, stock regularly traded on an established securities market is an exempt interest, unless at some time during the designated period, the shareholder owned more than 5 percent of that class of stock.ⁿ¹² Third, interests in a real estate investment trust are excluded from the scope of the Act if, at all times during the specified

period, the REIT was domestically controlled (less than 50 percent in value of its stock was owned directly or indirectly by foreign persons).ⁿ¹³

IRC Section 897 contains a number of other far-reaching rules:

(1) Gain will be recognized by a foreign corporation on the distribution of appreciated United States real property interests.ⁿ¹⁴

(2) Other provisions which normally prescribe nonrecognition treatment will apply to an exchange of a United States real property interest only when it is exchanged for an interest "the sale of which would be subject to taxation. ..." ⁿ¹⁵ In addition, regulations can further limit the scope of nonrecognition to prevent tax avoidance.ⁿ¹⁶

(3) The amount of money and property received by a foreign person in exchange for all or part of the person's interest in a partnership, trust, or estate is, to the extent attributable to United States real property interests, considered as an amount received from the sale or exchange in the United States of such property.ⁿ¹⁷

(4) Any distribution by a qualified investment entity (a real estate investment trust or regulated investment company that is a United States real property holding corporation or that would be if the exceptions provided in *IRC Sections 897(c)(3)* and *897(h)(2)* did not apply to interests in any real estate investment trust or regulated investment company) to a nonresident alien individual, a foreign corporation, or other qualified investment entity is, to the extent attributable to gain from sales or exchanges by the entity of United States real property interests, treated as gain recognized by the foreign taxpayer or other qualified investment entity from the sale or exchange of such an interest.ⁿ¹⁸ In addition, any distribution of an appreciated United States real property interest by a domestically controlled qualified investment entity will produce gain for the entity to the extent of the entity's foreign ownership percentage.ⁿ¹⁹

(5) Gain will be recognized by a nonresident alien individual or foreign corporation on the transfer of a United States real property interest to a foreign corporation, if the transfer is made as paid-in surplus or as a contribution to capital, to the extent of the excess of the fair market value of the property transferred over the adjusted basis and any other gain recognized to the transfer at the time of the transfer.ⁿ²⁰ If an interest in a domestically controlled qualified investment entity is disposed of in an applicable wash sale transaction, the taxpayer is treated as having gain from the sale or exchange of a United States real property interest that, but for the disposition, would have been treated as gain from the sale or exchange of a United States real property interest under *IRC Section 897(h)(1)*.^{n20.1} An applicable wash sales transaction is a transaction (or series of transactions) under which a nonresident alien individual, foreign corporation or qualified investment entity (i) disposes of an interest in a domestically controlled qualified investment entity during the 30-day period preceding the ex-dividend date of a distribution that is to be made with respect to the interest and any portion of which, but for the disposition, would have been treated as gain from the sale or exchange of a United States real property interest under *IRC § 897(h)(1)*, and (ii) acquires, or enters into a contract or option to acquire, a substantially identical interest in the entity beginning with the first day of the 30-day period.^{n20.2} A transaction is not treated as an applicable wash sale transaction if the foreign taxpayer or qualified investment entity receives the distribution with respect to either the interest that was disposed of, or acquired in the transaction.^{n20.3} In addition, a transaction is not treated as an applicable wash sale transaction if it involves the disposition of any class of stock in a qualified investment entity that is regularly traded on an established securities market within the United States, but only if the nonresident alien individual, foreign corporation, or qualified investment entity did not own more than 5 percent of the class of stock at any time during the one-year

period ending on the date of distribution.^{n20.4}

Certain foreign corporations can avoid some of the burden imposed upon such corporations by *IRC Section 897* by electing to be treated as domestic corporations. A corporation is eligible to make the election only if it holds a United States real property interest, and, under any treaty obligation of the United States, is entitled to nondiscriminatory treatment with respect to that interest.ⁿ²¹ The election can be made only if all shareholders of the corporation at the time of the election consent to it and agree that any gain from the disposition of the interest, that would be taken into account under *IRC Section 897*, will be taxable notwithstanding any treaty provision to the contrary.ⁿ²² Once made, the election can be revoked only with the consent of the Secretary.ⁿ²³

The Code sets forth a system for the withholding of tax on dispositions of United States real property interests.ⁿ²⁴ Under the provision, the transferee is required to deduct and withhold 10 percent of the amount realized on the disposition or, if less, the transferor's maximum tax liability (the maximum amount of tax that could be imposed on the gain realized plus the amount of the transferor's unsatisfied withholding liability with respect to that interest). Exemptions are provided if: (1) the transferor furnishes a nonforeign affidavit, that is, an affidavit stating that he is not a foreign person; (2) the transferor is a nonpublicly traded domestic corporation and furnishes an affidavit that it is not a United States real property holding corporation; (3) the transferor receives a qualifying statement from the Service that he has reached an agreement for the payment of the tax, is exempt from tax, or has provided adequate security for the payment of the tax; (4) the transferee will use the property as a residence and the amount realized for the property does not exceed \$300,000; or (5) the property is stock regularly traded on an established securities market.ⁿ²⁵ No withholding is required on the grant or lapse of an option to acquire a United States real property interest, but is upon the sale, exchange, or exercise of the option.ⁿ²⁶ If the United States real property interest is owned by foreign and nonforeign persons, the amount subject to withholding is determined by allocating the amount realized on the transfer in proportion to the relative capital contribution to the property of each transferor.ⁿ²⁷

Withholding at the 10 percent rate is required, as well, in the following circumstances: (1) a domestic corporation makes a distribution to a foreign shareholder in redemption of stock or in liquidation of the corporation; (2) a domestic or foreign partnership, trust, or estate makes a taxable distribution to its partners or beneficiaries; or (3) the transfer consists of a partnership interest or of a beneficial interest in an estate or trust.ⁿ²⁸ If a domestic partnership, the trustee of a domestic trust, or the executor of a domestic estate disposes of a United States real property interest and the amount of the gain is includable in the income of a foreign partner or beneficiary, the withholding rate is 35 percent. A foreign corporation must also withhold 35 percent of the amount of gain recognized on a distribution governed by *IRC Section 897(d)* or *(e)*.

Under *IRC Section 6039C*, each foreign person who did not engage in a trade or business within the United States at any time during the calendar year, and who holds directly real property interests with a value of at least \$50,000, must file an annual return setting forth his name and address, a description of the property, and such other information as regulations will require. United States property interests held by a partnership, trust, or estate is treated as owned by its partners or beneficiaries. Interests held by a spouse or minor child of an individual is treated as owned by the individual.

[iii] Effectively Connected Income From Foreign Sources. Income, gain, or loss from sources outside of the United States will be treated as effectively connected with the conduct of a trade or business within the United States only when (1) the foreign taxpayer has an office or other fixed place of business in the United States to which the foreign source income, gain, or loss is attributable, and (2) such income, gain, or loss (a) consists of rents and royalties from intangible property, (b) is derived from the sale of certain inventory, (c) "consists of dividends or interest, or gain or loss from the sale or exchange of stock or notes, bonds, or other evidences of indebtedness, and either is derived in the active conduct of a banking, financing, or similar business within the United States or is received by a corporation the principal business of which is trading in stocks or securities for its own account," or (d) is an item of income or gain equivalent to any of the foregoing.ⁿ²⁹ But even such dividends and interest will not be effectively connected income if paid by a foreign corporation in which the taxpayer directly, indirectly, or constructively owns more than 50 percent of

the combined voting power of all classes of stock entitled to vote.ⁿ³⁰ Moreover, the legislative history indicates that dividends, interest, and gains from stocks or securities held for investment purposes only will not be included within the category of foreign source income which can be treated as effectively connected income, and that a corporation will not be treated as being principally in the business of trading in stock or securities because of incidental investments held by it.ⁿ³¹ Thus, a foreign corporation whose principal activity is holding stock or securities of corporations in which it owns a significant portion of the outstanding voting stock will generally not be considered to have as its principal business trading in stocks or securities.ⁿ³²

Special rules of application limit the foreign source income subject to United States taxation to income which has its economic genesis in the United States.ⁿ³³ An office or other fixed place of business of an agent is disregarded in determining whether a foreign taxpayer has an office or fixed place of business in the United States, unless the agent (1) has authority to negotiate binding contracts in the name of the nonresident alien or foreign corporation, or has a stock of merchandise from which he regularly fills orders on behalf of such foreign person, and (2) is not an independent agent acting in the ordinary course of his business.ⁿ³⁴ A second special rule does not consider income, gain, or loss as attributable to an office or other fixed place of business within the United States unless such office is a material factor in the production of such income, the office regularly carries on activities of the type from which the income is derived, and the income is properly allocable to the activities of the United States business.ⁿ³⁵ Put another way, the income must be generated in the United States, the activities of the United States office must be an essential element in the production of the income (although it need not necessarily be a major factor in the production of the income), and the income must not be derived from casual sales.ⁿ³⁶

[b] Exclusion of Certain Trading in Securities From the Classification of "Trade or Business Within the United States." Long before the Foreign Investors Tax Act, the rule had been that a foreign taxpayer was not engaged in a trade or business within the United States if the taxpayer effected transactions in stocks or securities through a resident broker, commission agent, or custodian.ⁿ³⁷ On the other hand, the foreign taxpayer was considered to be so engaged if the transactions were effected by the taxpayer while present in the United States,ⁿ³⁸ or by a resident agent who exercised discretionary authority with respect to the trading.ⁿ³⁹

IRC Section 864(b)(2)(A)(i) continues the exclusion for trading in stocks or securities through a resident broker, commission agent, custodian, or other independent agent, but only if the taxpayer does not maintain an office in the United States through which, or at the direction of which, the transactions in stock or securities are effected.ⁿ⁴⁰ Thus, a foreign dealer having no office in the United States during the taxable year can transact an unlimited number of securities transactions through independent agents without having the activities classified as a trade or business in the United States.

In addition, *IRC Section 864(b)(2)(A)(ii)* states that the term "trade or business within the United States" does not include "trading in stocks or securities for the taxpayer's own account, whether by the taxpayer or his employees or through a resident broker, commission agent, custodian, or other agent, and whether or not any such employee or agent has discretionary authority to make decisions in effecting the transactions." This exception does not apply to a dealer in securities.ⁿ⁴¹

The failure of a dealer to fit within the exception provided by *IRC Section 864(b)(2)(A)(ii)* does not lead automatically to a finding that the taxpayer is engaged in a trade or business. Whether a dealer is conducting a trade or business in the United States remains a question of fact.ⁿ⁴² Thus, while Section 864(b)(2)(A) can relieve a person from trade or business status, it cannot by itself thrust him into that status.

IRC Section 864(b)(2)(B) provides a similar safe harbor for trading in commodities "if the commodities are of a kind customarily dealt in on an organized commodity exchange and if the transaction is of a kind normally consummated at such place." The safe harbor does not apply in the case of a dealer in commodities.

[c] Imposition of the Tax on Effectively Connected Income. As we have seen, income effectively connected with the conduct of a trade or business in the United States by a nonresident alien or foreign corporation is taxed at the rates imposed upon the taxable income of domestic taxpayers.ⁿ⁴³ In general, the computation of the amount subject to tax is made by allowing the taxpayer to claim deductions only to the extent that they are allocable to the effectively connected income.ⁿ⁴⁴ However, the following deductions are allowed in full, whether or not they are connected with such income:

- (1) casualty or theft losses of nonresident alien individuals suffered with respect to property located in the United States, but not connected with a trade or business;ⁿ⁴⁵
- (2) the charitable deduction allowed by *IRC Section 170*;ⁿ⁴⁶ and
- (3) the personal exemption allowed individuals by *IRC Section 151*, although a nonresident alien individual who is not a resident of Canada or Mexico is allowed only one such exemption.ⁿ⁴⁷

A foreign taxpayer is allowed a credit for taxes paid or deemed paid to foreign countries and possessions of the United States on or with respect to income which is effectively connected with the conduct of a trade or business within the United States, except to the extent that the foreign tax is imposed on income from U.S. sources solely because the nonresident alien individual taxpayer is a citizen or resident of the foreign country or U.S. possession imposing the tax, or because the foreign corporation taxpayer is organized or created under its laws or domiciled there for tax purposes.ⁿ⁴⁸ The credit is allowed only against the tax on effectively connected income; no credit is allowed against the flat 30-percent tax imposed on passive investment income by *IRC Sections 871(a)* and *881(a)*.ⁿ⁴⁹

The determination of the amount of taxes deemed by *IRC Section 902* to have been paid by a foreign corporation receiving effectively connected dividends from a foreign subsidiary is made by treating the corporation as a domestic corporation.ⁿ⁵⁰ The computation of the credit limitation of *IRC Section 904* is made by considering the effectively connected income as the taxpayer's only taxable income.ⁿ⁵¹

IRC Section 884 imposes an additional 30-percent branch profits tax on a foreign corporation's effectively connected earnings and profits for the taxable year,ⁿ⁵² decreased (but not below zero) by the amount of any increase in the corporation's U.S. net equity for the year, and increased by any decrease in the corporation's U.S. net equity for the year.ⁿ⁵³ However, the increase for any taxable year cannot exceed the corporation's accumulated effectively connected earnings and profits (the excess of the aggregate effectively connected earnings and profits for preceding taxable years beginning after December 31, 1986, over the aggregate dividend equivalent amounts for those years) as of the close of the preceding taxable year.ⁿ⁵⁴ The corporation's U.S. net equity is the amount of the money and aggregate adjusted basis of property treated as connected with the conduct of a trade or business in the United States, reduced (even below zero) by the liabilities of the corporation that are treated as connected with the conduct of the U.S. trade or business.ⁿ⁵⁵

An income tax treaty between the United States and a foreign country can modify or eliminate the branch profits tax only if the foreign corporation is a "qualified resident" of the foreign country, or the treaty permits a withholding tax on dividends paid by the foreign corporation.ⁿ⁵⁶ A foreign corporation is a qualified resident if 50 percent or more (by value) of its stock is owned by nonresident aliens who are not residents of the foreign country, or if at least 50 percent of its income is used (directly or indirectly) to meet liabilities to persons who are not residents of the foreign country or citizens or residents of the United States.ⁿ⁵⁷ A special rule makes the foreign corporation a qualified resident if its stock is primarily and regularly traded on an established securities market in the foreign country, or the corporation is wholly owned (directly or indirectly) by another foreign corporation that is organized in the foreign country and whose stock is so traded or by a domestic corporation whose stock is primarily and regularly traded on an established securities market in the United States.ⁿ⁵⁸

If a foreign corporation is a qualified resident of a foreign country with which the United States has an income tax

treaty, the rate of tax is the treaty rate specified for branch profits, or if none is specified, the rate on dividends paid by a domestic corporation to a corporation resident in the foreign country that wholly owns the domestic corporation.ⁿ⁵⁹

No tax is imposed under either *IRC Section 871(a)* or *881(a)* on dividends paid to foreign taxpayers by a foreign corporation that is subject to the branch profits tax; there is also no withholding requirement under either *IRC Section 1441* or *1442* with respect to those dividends.ⁿ⁶⁰ However, the withholding tax may be imposed on dividends attributable to pre-1987 earnings and profits, and on dividends attributable to any earnings and profits when an income tax treaty bars application of the branch profits tax.

As a general rule, any interest paid by a U.S. trade or business of a foreign corporation is treated as paid by a domestic corporation,ⁿ⁶¹ and, to the extent that the allocable interest exceeds the interest treated as paid by a domestic corporation, the foreign corporation will be liable for tax under *IRC Section 881(a)* in the same manner as if the excess were interest paid to the foreign corporation by a domestic corporation on the last day of the foreign corporation's taxable year.ⁿ⁶²

Interest received by a foreign corporation may be subject to a benefit under a treaty with the country in which either the payor or recipient is a resident, provided, in each case, the foreign corporation is a qualified resident of the treaty partner.ⁿ⁶³ A similar rule applies to U.S. source dividends received by a foreign corporation from another foreign corporation that is not subject to the branch profits tax.ⁿ⁶⁴

FOOTNOTES:

(n1)Footnote 1. See *Howkins v Commr*, 49 TC 689, 693 (1968) .

(n2)Footnote 2. See, eg, *Rev Rul 71-516*, 1971-2 CB 264 , where interest on obligations of a foreign government was held have its source outside the US, in accordance with *IRC § 861(a)(1)*'s general rule sourcing interest in the US only if the obligor is a US resident, even though the interest on the foreign government's obligations was physically paid by the US underwriter, a bank, from its offices in the US.

(n3)Footnote 3. 680 F2d 142 (Ct Cl 1982) . The source of income rules can have important tax consequences for US as well as foreign taxpayers, since the amount of the foreign tax credit to which US residents are entitled depends on the percentage of their worldwide income that is sourced outside the United States. See *IRC § 904*; § 20.02[e], *supra* . US taxpayers, like nonresidents, would therefore normally prefer that income be classified as from sources outside the United States. *Bank of America* was such a case. In addition, US taxpayers may be liable to the Internal Revenue Service if they make taxable payments of US source income to foreign taxpayers and fail to withhold US taxes from such payments as required by *IRC § 1441*. See *Howkins v Commr*, 49 TC 689 (1968) .

(n4)Footnote 4. *Bank of America v US*, 680 F2d 142, 148-150 (Ct Cl 1982) .

(n5)Footnote 5. *Container Corp v Commr*, 134 TC No 5 (2010).

(n6)Footnote 6. Conversely, "interest other than that derived from sources within the United States as provided in *IRC Section 861(a)(1)*" is treated as income from sources without the United States. *IRC § 862(a)(1)*.

(n7)Footnote 7. *IRC § 861(a)(1)*. Despite the statutory reference to "bonds, notes, or other interest bearing obligations" *IRC § 861(a)(1)* is not limited to the interest on securities or other obligations issued or voluntarily assumed by a US resident. Thus, prejudgment interest that a US resident was ordered to pay to a nonresident alien individual pursuant to a judgment of a US court was held to be US source income to the nonresident under *IRC § 861(a)(1)* in *Iglesias v US*, 848 F2d 362 (2d Cir 1988) . Interest on a federal tax refund paid to a nonresident in accordance with US law is also US source income. See *Helvering v Stockholms Enskilda Bank*, 293 US 84 (1934) .

(n8)Footnote 8. *IRC § 861(a)(1)(A)*. If the payor has no gross income for the three-year period, the applicable

period is the year in which payment is made.

(n9)Footnote 8.1. *IRC § 861(c)*.

(n10)Footnote 9. The definition of "related person" in subpart F (controlled foreign corporations--see § 20.04, *supra*) applies for this purpose, see *IRC § 954(d)(3)*, except that ownership of 10 percent or more of a corporation's stock (rather than 50 percent or more) is considered a controlling interest. *IRC § 861(c)(2)*.

(n11)Footnote 10. *IRC § 861(a)(1)(B)(i)*.

(n12)Footnote 11. *IRC § 861(a)(1)(B)(ii)*.

(n13)Footnote 12. *IRC § 861(a)(1)(C)*.

(n14)Footnote 13. For this purpose the term "deposits" means (1) deposits with persons carrying on the banking business, (2) deposits or withdrawable accounts with federally and state chartered savings and loan institutions, but only to the extent that the amounts paid or credited on the accounts are deductible in determining the taxable income of the institution, and (3) amounts held by an insurance company under an agreement to pay interest. *IRC § 871(i)(3)*.

Interest received on US bank deposits by a US trust and distributed to a nonresident alien beneficiary is not taxed to the beneficiary. The trust is merely a conduit to the beneficiary, and there is no statutory reason for distinguishing between cases where interest is received by a nonresident alien directly, or indirectly through a trust or estate. *Isidro Martin-Montis Trust v Commr*, 75 TC 381 (1980), *acq* 1981-2 CB 2; *Rev Rul 81-244*, 1981-2 CB 151 . However, if the interest is received by a trust that is not required to distribute income currently, and not distributed to the beneficiary until a subsequent year, the interest is taxable to the trust in the year of receipt. *Rev Rul 86-76*, 1986-1 CB 349 .

(n15)Footnote 14. *IRC § 861(a)(2)*. *IRC § 861(a)(2)(A)* still makes an exception for dividends from domestic corporations which derive most of their income from Puerto Rico or a US possession and have an election in effect under *IRC § 936*, but since the *IRC § 936* election has been terminated (see *IRC § 936(j)*) the exception no longer applies.

(n16)Footnote 15. *IRC § 861(a)(2)(B)*. For purposes of the 25 percent test, income that is "treated as" effectively connected with the active conduct of a US trade or business by other provisions of the Internal Revenue Code is also included in the numerator of the fraction, except that the items excluded by *IRC § 884(d)(2)* from the effectively connected earnings and profits tax base subject to the *IRC § 884* branch profits tax are also excluded from the numerator of the 25 percent test. See § 20.05[2][c], fn 52 (listing items of income excluded from the branch profits tax base by *IRC § 884(d)(2)*).

(n17)Footnote 16. *IRC § 861(d)*.

(n18)Footnote 17. *IRC § 861(a)(2)(B)*. In the case of a dividend from a 20-percent owned corporation, the fraction is changed from 100/70ths to 100/80ths.

The dividends received deduction is the subject of § 4.04[2][a].

(n19)Footnote 18. *IRC § 861(a)(2)(C)*.

(n20)Footnote 19. *IRC § 861(a)(2)(D)*; *Rev Rul 73-68*, 1973-1 CB 336 .

(n21)Footnote 20. *IRC § 862(a)(2)*.

(n22)Footnote 21. See section 541 of the HIRE Act, Pub L No 111-147, 124 Stat 71 (2010). The effective date of *IRC § 871(l)* is September 14, 2010, 180 days after the date of enactment (March 18, 2010) of the HIRE Act.

(n23)Footnote 22. See *IRC § 871(l)(2)*.

(n24)Footnote 23. Until March 19, 2012, the date which is 2 years after the March 18, 2010 enactment of *IRC § 871(l)*, only payments made under certain "specified" notional principal contracts may be considered dividend equivalents; thereafter, payments under any notional principal contract, if contingent upon or determined by reference to the payment of a dividend from sources within the United States, will be considered dividend equivalents. See *IRC § 871(l)(3)(A)* and *(B)*. Specified notional principal contracts under which dividend equivalent payments may be made prior to March 19, 2012 must possess at least one of the following five characteristics: (i) any long party to the contract transfers an underlying security to any short party, (ii) in connection with the termination of the contract, any short party transfers the underlying security to any long party, (iii) the underlying security is not readily tradable on an established securities market, (iv) the underlying security is posted as collateral by any short party to the contract with any long party, or (v) the contract is identified by the Secretary of the Treasury as a "specified notional principal contract." *IRC § 871(l)(3)(A)*. For purposes of applying these tests, a "long party" means any party to the contract which is entitled to receive any payment pursuant to the contract which is contingent upon or determined with reference to the payment of a dividend from sources within the United States with respect to the underlying security; a "short party" means any party to the contract which is not a "long party," and "underlying security" means the US security the dividends on which are the predicate for determining the amount of payments under the contract, or on which such payments are contingent (for this purpose, any index or fixed basket of securities is treated as a single security). See *IRC § 871(l)(4)*. See also Ch 9A for a general description of notional principal contracts and their tax treatment.

(n25)Footnote 24. See *IRC § 877(l)(5)*.

(n26)Footnote 25. See Joint Comm on Taxation, Technical Explanation of the Revenue Provisions Contained in Senate Amendment 3310, the "Hiring Incentives to Restore Employment Act," Under Consideration by the Senate (JCX-4-10), Feb 23, 2010, at 79.

(n27)Footnote 26. See TD 8735, 1997-2 CB 72, 62 FR 53498 (1997).

(n28)Footnote 27. See Ch 10 on Short Sales for a discussion of Section 1058 in the context of securities lending transactions.

(n29)Footnote 28. See *Treas Reg § 1.861-3(a)(6)*.

(n30)Footnote 29. *Treas Reg § 1.861-3(a)(6)*. The transparency rule also applies to substitute interest payments under the 1997 regulations. See *Treas Reg § 1.861-2(a)(7)*. See also *Treas Reg §§ 1.871-7(b)(2)* and *1.881-2(b)(2)*.

(n31)Footnote 30. TD 8735, 62 FR 53498, 53499 (1997).

(n32)Footnote 31. *Rev Rul 60-177*, 1960-1 CB 9 .

(n33)Footnote 32. *Rev Rul 80-135*, 1980-1 CB 18 .

(n34)Footnote 33. For example, if a foreign bank lends securities in a transaction that the facts and circumstances indicate in substance is an extension of credit pursuant to a loan agreement in the ordinary course of the bank's trade or business, the substitute payment may be characterized as interest which would not qualify as portfolio interest [exempt from withholding tax] under *IRC § 881(c)(3)(A)*. See TD 8735, 62 FR 53498, 53500 (1997).

(n35)Footnote 34. Of course, under a securities lending agreement described in *IRC § 1058*, the lender continues to have the right to receive identical securities from the borrower, but until that right is exercised neither the lender nor the borrower need have legal or beneficial ownership of either the securities originally transferred by the lender or "identical securities" of the same issuer. This is absolutely clear in the case of substitute payments under notional principal contracts, covered by *IRC § 877(l)(2)(B)*, where neither the long party nor the short party may ever actually

own the "underlying security" from which the substitute payments are supposedly derived.

(n36)Footnote 35. See Hariton, *Equity Derivatives, Inbound Capital and Outbound Withholding Tax*, 60 Tax Lawyer 313 (2007) (hereafter, "Hariton"); see also § 20.05[1][b], *supra*. As noted in § 20.05[1][b], to attract foreign capital Congress has itself largely eviscerated the withholding tax base with respect to US-source interest paid to nonresident aliens by exempting "portfolio interest" from the tax, but it chose to leave the withholding tax on US-source dividends intact.

(n37)Footnote 36. See *IRC § 871(h)*.

(n38)Footnote 37. *IRC § 871(a)*. The 30 percent rate may be, and frequently is, reduced by tax treaties between the US and treaty partners, so that it actually applies only to nonresident aliens who are not residents of countries with which the US has tax treaties.

(n39)Footnote 38. *1997-2 CB 328 (1997)*.

(n40)Footnote 39. See Staff Report of S. Permanent Subcomm on Investigations, 110th Cong, "Report on Dividend Tax Abuse: How Offshore Entities Dodge Taxes on US Stock Dividends" (Comm Print 2008). The Report on Dividend Tax Abuse described a typical transaction designed to use *Notice 97-66* as a way around the transparency rule as follows:

"The first step in the structure was that a U.S. financial institution used an offshore corporation that it owned and controlled to borrow U.S. stock from an offshore client anticipating a dividend. The offshore corporation borrowed the stock prior to the dividend, sold the stock so that it would not have to pay [tax on] the dividend itself, and simultaneously entered into a swap agreement with its affiliated financial institution. [Prior to *IRC § 871(l)*, the transparency rule did not apply to notional principal contracts such as swap agreements.] After the dividend was issued, the financial institution paid a tax-free "dividend equivalent" payment under the swap agreement to the offshore corporation which, in turn, paid the same amount (called a "substitute dividend") back to the offshore client from which it had borrowed the stock. According to the theory the financial institutions adopted, no withholding of the substitute dividend payment was required, because the substitute dividend payment was between two foreign parties located in jurisdictions subject to the same withholding rate. In short, the claim was that the substitute dividend payment, like the dividend equivalent payment under the swap agreement, was tax-free."

(n41)Footnote 40. *2010 IRB LEXIS 315*. Taxpayers may continue to rely on *Notice 97-66* until the September 14, 2010 effective date of *IRC § 871(l)*, with the following modification: "a withholding agent or foreign lender may not rely on *Notice 97-66* when the withholding agent or foreign lender knows or has reason to know that a Securities Lending Transaction, or series of such transactions, has a principal purpose of reducing or eliminating the amount of gross-basis tax that would have been due in the absence of such transaction or transactions. For example, a person may not rely on *Notice 97-66* to reduce or eliminate the amount of U.S. tax on the substitute dividend it is obligated to pay the foreign lender when it structures or participates in an arrangement whereby it: (1) borrows shares of a domestic corporation from a foreign person in a transaction described in *IRC § 1058* after a dividend declaration; (2) sells that stock to a related U.S. person before the ex-dividend date; and (3) enters into a total return swap agreement with that related person in order to hedge its risk." No inference is intended by the IRS that the transactions prohibited by this modification of *Notice 97-66* were not previously prohibited by the Notice, or by existing judicial doctrines, prior to the modification. *Notice 2010-46*, § I.B.

(n42)Footnote 41. For purposes of this provision, an actual dividend is also treated as a dividend equivalent. *IRC § 871(l)(6)*,

(n43)Footnote 42. *2010 IRB LEXIS 315*, *Notice 2010-46*, Section IIA. A "Qualified Securities Lender" is defined as a foreign financial institution, such as a bank, custodian or broker-dealer, that is regularly engaged in a trade or

business that includes the borrowing and lending of securities of US corporations with unrelated clients, is subject to audit by the IRS, and files an annual statement with the IRS certifying that it meets the conditions necessary to be a Qualified Securities Lender.

(n44)Footnote 43. During the transition period, withholding agents may adopt a system that reasonably implements the principles of the Qualified Securities Lender system described in Part II of *Notice 2010-46*. In particular, during the transition period, a withholding agent is not required to withhold on a substitute dividend payment made to a Qualified Securities Lender if the withholding agent receives, at least annually, a statement from its counterparty that substantially complies with the certification requirement that will have to be met once regulations under *IRC § 871(l)(6)* become final. A financial institution may make such a certification only if it reasonably determines that it meets the requirements to qualify as a Qualified Securities Lender described in part II of *Notice 2010-46*, see fn 34, *supra*, without regard to the requirement that a Qualified Securities Lender file an annual statement with the Service. It is anticipated, however, that future guidance will provide that all Qualified Securities Lenders taking advantage of transition relief may be required to identify themselves to the Service (in a manner to be specified) before the end of calendar year 2010. *2010 IRB LEXIS 315, Notice 2010-46*, (Part III).

(n45)Footnote 44. For this purpose, a withholding agent has a reason to know that tax was not withheld if, for example, the amount of any lending fee or similar fee is increased directly or indirectly, in whole or in part, by the difference between the gross amount of the substitute dividend and the net amount received.

(n46)Footnote 45. In general, a Qualified Intermediary is a foreign financial institution that has entered into a withholding and reporting agreement (a QI agreement) with the IRS. See *Treas Reg § 1.1441-1(e)(5)(ii)*.

(n47)Footnote 46. *IRC § 865(a)(2), (e)(2)(A)*. A nonresident alien is any person other than a US person. *IRC § 865(g)(1)(B)*. For this purpose, a US resident is a US citizen or resident alien who does not have a tax home in a foreign country, a nonresident alien who has a tax home in the US, and any corporation, trust, or estate that is a US person. *IRC § 865(g)(1)(A)*. A US person or resident alien cannot be treated as a nonresident with respect to any sale of personal property unless an income tax equal to at least 10% of the gain derived is actually paid to a foreign country with respect to that gain. *IRC § 865(g)(2)*. *IRC § 865(g)(2)* does not apply to a sale by a *bona fide* resident of Puerto Rico of stock in a corporation that is engaged in the active conduct of a trade or business in Puerto Rico and derived more than 50% of its gross income in the three-year period preceding the sale from that trade or business. *IRC § 865(g)(3)*.

(n48)Footnote 47. *IRC § 865(b)*.

(n49)Footnote 48. *IRC § 861(a)(6)*.

Income derived from the purchase of inventory property within a possession of the US and its sale within the US is treated as derived partly from sources within and partly from sources without the US. *IRC § 863(b)(3); Treas Reg § 1.861-7(b)*.

(n50)Footnote 49. *IRC § 862(a)(6)*.

(n51)Footnote 50. *Treas Reg § 1.861-7(a), (c)*. If bare legal title is retained by the seller, the sale is deemed to have occurred when beneficial interest and the risk of loss passed to the buyer. *Ronrico Corp v Commr*, 44 BTA 1130 (1941). A "substance of the transaction" test will be applied if the transaction is arranged in a particular manner for the primary purpose of tax avoidance. *Treas Reg § 1.861-7(c)*; See *Kaspore Cohn Co v Commr*, 35 BTA 646 (1937), where the separate identity of a foreign subsidiary was disregarded and the US parent treated as the seller.

Gains, profits and income from the disposition of a US real property interest are treated as foreign source income when the real property is located in the Virgin Islands. *IRC § 862(a)(8)*.

(n52)Footnote 51. The subject of Section 306 stock is covered in Ch 7.

(n53)Footnote 52. *Treas Reg § 1.865-2(a)(1)*. The provision applies to property that is marked-to-market. It does not apply to stock constituting inventory. *Treas Reg § 1.865-2(b)(2)*.

Loss with respect to personal property other than stock is allocated in the same manner as gain on the sale of the property would be sourced. *Treas Reg § 1.865-1(a)(1)*. The provision does not apply to foreign currency losses or loss recognized with respect to options contracts or derivative financial instruments. *Treas Reg § 1.865-1(c)(1)*.

(n54)Footnote 53. There is no deduction for expenses incurred in connection with the production of this income. *IRC § 873(a)*.

A substitute interest payment received by a foreign person pursuant to a securities lending transaction or a sale-repurchase transaction has the same character as interest income paid or accrued with respect to the terms of the transferred security. A substitute dividend payment received by a foreign person in such a transaction has the same character as a distribution received with respect to the transferred security. *Treas Reg §§ 1.871-7(b)(2), 1.881-2(b)(2)*.

Income excluded from gross income by treaty will be exempt from taxation under *IRC §§ 871(a)(1) and 881(a)*. *IRC § 894(a)*. The same holds true for items excluded from gross income by other Code provisions. A treaty may also require the imposition of a lesser rate of tax.

The tax rate applied to nonresident aliens and foreign corporations will be doubled if the President finds that, under the laws of any foreign country, US citizens or corporations are subjected to discriminatory or extraterritorial taxes. *IRC § 891*.

No tax is imposed on the proceeds from a wager placed in a blackjack, baccarat, craps, roulette, or big-6 wheel game, unless the Service determines by regulation that collection of the tax is administratively feasible. *IRC § 871(j)*.

(n55)Footnote 54. The percentage is equal to the percentage that the gross income of the corporation from foreign sources for the three-year period preceding the dividend payment is of the corporation's total gross income. If the corporation has no gross income during the three-year period, the percentage is based on the income in the year of payment.

(n56)Footnote 55. An alien who has not established a taxable year for any prior period is placed on a calendar year taxable year. *IRC § 7701(b)(8)(A)*.

An alien can make the first-year election and be treated as a resident for the election year if the person (1) was not a resident for the year prior to the election; (2) has a substantial presence in the US for the year following the election; and (3) is present in the US for at least 31 consecutive days in the election year. *IRC § 7701(b)(4)*.

The Service will not rule whether an alien individual is a nonresident of the US, including whether the individual has met the requirements of the substantial presence test or exceptions to the test. However, the Service may rule regarding the legal interpretation of a particular provision of *IRC § 7701(b)* or the regulations thereunder. *Rev Proc 2007-7, 2007-1 CB 227*.

(n57)Footnote 56. *IRC § 269B(e)*. Indirect ownership is determined under the stock ownership rules applicable to controlled foreign corporations (*IRC § 958(a)*) and the option attribution rule of *IRC § 318(a)(4)*.

(n58)Footnote 57. *IRC §§ 871(a)(1)(C)(i), 881(a)(3)(A)*, prior to amendment by the Tax Reform Act of 1984. The obligations had to be issued after Sept 28, 1965. It is unclear whether the enactment of specific provisions prevents the taxation of OID where the bonds were issued before September 28, 1965. Such OID might be considered fixed or determinable income under the rationale of *US v Midland-Ross Corp*, 381 US 54 (1965).

(n59)Footnote 58. An OID obligation is any bond or evidence of indebtedness having OID, other than an obligation payable 183 days or less from the date of original issue or a tax-exempt obligation. *IRC § 871(g)(1)(B)(i), (ii)*.

The IRS will not rule whether a debt instrument having OID within the meaning of *IRC § 1273* is an OID obligation under *IRC § 871(g)(1)(B)(i)* when the instrument is payable within 183 days or less from the date of issue (without regard to the period held by the taxpayer). *Rev Proc 2007-7, 2007-1 CB 227*.

(n60)Footnote 59. *IRC §§ 871(a)(1)(C)(ii), 881(a)(3)(B)*. The determination of the amount of OID accruing during a period is made under the rules of *IRC § 1272* (see ch 17), without regard to any exception for short-term obligations. *IRC § 871(g)(2)*. The determination of the source of the OID is made at the time of the payment as if the payment were of interest. *IRC § 871(g)(3)*.

(n61)Footnote 60. *IRC §§ 871(a)(1)(C)(i), 881(a)(3)(A)*. The determination of the source of the OID is made at the time of the sale or exchange as if the sale or exchange involved the payment of interest. *IRC § 871(g)(3)*.

(n62)Footnote 61. *IRC § 871(g)(4)*. See Ch 17 for a discussion of *IRC § 1286*.

(n63)Footnote 62. *IRC §§ 1441, 1442*. A treaty can reduce the amount required to be withheld.

A deemed dividend resulting from the application of *IRC § 304(a)(1)* will be subject to withholding if paid to a foreign corporation from sources within the US. *Rev Rul 92-85, 1992-2 CB 69*. The consequences of *IRC § 304* in international transactions are explored in Staffaroni, "The International Boundaries of Section 304," 46 *Tax Lawyer* 125 (1992).

Dividends that are designated by a regulated investment company as capital gain dividends under *IRC § 852(b)(3)(C)* do not constitute fixed or determinable annual or periodical income for purposes of *IRC § 1441*, and are not subject to withholding at the source when paid to nonresident aliens and nonresident foreign corporations. *Rev Rul 69-244, 1969-1 CB 215*.

(n64)Footnote 63. *IRC §§ 871(h)(1), 881(c)(1)*.

Where, pursuant to a securities lending transaction or a sale-repurchase transaction, a foreign person transfers to another person a security the interest on which would qualify as portfolio interest in the hands of the lender, substitute interest payments made with respect to the transferred security will be treated as portfolio interest unless one of the exceptions to the portfolio interest exemption applies. *Treas Reg § 1.871-7(b)(2)*.

(n65)Footnote 64. *IRC §§ 871(h)(2), 881(c)(2)*. Interest on obligations not in registered form issued prior to March 19, 2012 will be treated as portfolio interest if it the obligation is described in *IRC § 163(f)(2)(B)*; viz, (1) there are arrangements reasonably designed to ensure that the obligation will be sold (or resold in connection with the original issue) only to a person who is not a United States person; (2) interest is payable only outside the United States and its possessions, and (3) the face of the obligation contains a statement that any United States person who holds the obligation will be subject to limitations under the United States income tax laws. *IRC §§ 871(h)(2)(A) and 881(c)(2)(A)*. These exceptions to the requirement that exempt "portfolio interest" must be paid with respect to an obligation in registered form are repealed for obligations issued after March 18, 2012. See Section 502(b) and 502(f) of the Hiring Incentives to Restore Employment Act of 2010, Pub L No 111-147, 124 *Stat* 71 (2010) (the "HIRE Act of 2010"). See also Ch 17.02[1], fn 17.

(n66)Footnote 65. The Treasury has discretion to waive the requirement of a statement identifying the beneficial owner as a non-US person if it determines that such statement is not required in order to carry out the purposes of the provision; for example, if the Treasury were to determine that there is a low risk of tax evasion and adequate

documentation standards within the country of tax residency of the beneficial owner of the obligations in question. See *IRC § 881(c)(2)*; Joint Comm on Taxation, Technical Explanation of the Revenue Provisions Contained in Senate Amendment 3310, the "Hiring Incentives to Restore Employment Act," Under Consideration by the Senate (JCX-4-10), Feb 23, 2010, 53.

(n67)Footnote 66. *IRC § 871(h)(3)*. The attribution rules of *IRC § 318(a)* are applicable in determining ownership with three modifications. Stock owned by a corporation is attributed to a shareholder without regard to the 50 percent limitation normally required. Stock owned by a shareholder is attributed to a corporation without regard to the 50 percent threshold, but if the shareholder owns less than 50 percent of the stock, the corporation is deemed to own an amount of stock in the proportion that the value of the shareholder's stock in the corporation bears to the value of all of the corporation's stock. Stock treated as owned by a person under the option attribution rules is not deemed owned by that person for purposes of entity-individual and individual-entity attribution.

(n68)Footnote 67. *IRC § 881(c)(3)*. A number of special rules apply if portfolio interest is received by a controlled foreign corporation. *IRC § 881(c)(5)(A)*. The rules also apply to certain interest-related dividends received from a regulated investment company by a controlled foreign corporation. *IRC § 881(e)(1)(C)*.

Whether interest paid to a partnership and included in the distributive share of a foreign partner is received by a 10-percent shareholder is determined at the partner level. *Treas Reg § 1.871-14(g)(3)(i)*. A similar rule governs interest paid to a simple trust or grantor trust and distributed to or included in the gross income of a foreign taxpayer that is a beneficiary or owner of the trust; the determination is made at the beneficiary or owner level. *Treas Reg § 1.871-14(g)(4)*.

(n69)Footnote 68. A related person is any person related to the debtor within the meaning of *IRC § 267(b)* or *707(b)(1)*, or who is a party to any arrangement undertaken for a purpose of avoiding the application of *IRC § 871(h)(4)(A)*. *IRC § 871(h)(4)(B)*.

The provisions of *IRC § 871(h)(4)* are made applicable to foreign corporations by *IRC § 881(c)(4)*.

(n70)Footnote 69. *IRC § 871(h)(4)(C)*.

(n71)Footnote 70. *IRC § 871(h)(4)(D)*.

(n72)Footnote 71. *IRC §§ 871(k)(1)(A), 881(e)(1)(A)*. Excepted from this general rule is any interest described in *IRC § 871(k)(1)(B)*, and any interest-related dividend received by a controlled foreign corporation to the extent the dividend is attributable to interest received by the regulated investment company from a person who is a related person (within the meaning of *IRC § 864(d)(4)*) with respect to the controlled foreign corporation. *IRC § 881(e)(1)(B)*.

(n73)Footnote 72. *IRC § 871(k)(1)(B), (E)(i), (iii), (F)*.

(n74)Footnote 73. *IRC § 871(k)(1)(C)*. No dividend with respect to any taxable year beginning after Dec 31, 2007, can be an interest-related dividend.

(n75)Footnote 74. *IRC § 871(k)(1)(C), (D)*. In making the designations, permitted by *IRC §§ 852(b)(3)(C), 852(b)(5)(A), 854(b)(1), 871(k)(1)(C), and 871(k)(2)(C)*, the RIC may designate the maximum amount permitted under each provision even if the aggregate of all the amounts so designated exceeds the total amount of the RIC's dividend distribution. *Rev Rul 2005-31, 2005-1 CB 1084*.

(n76)Footnote 75. *IRC § 871(k)(1)(E)*.

(n77)Footnote 76. *IRC §§ 871(k)(2)(A), (B); 881(e)(2)*.

Under *IRC § 897(h)(1)*, a distribution by a regulated investment company to a foreign taxpayer with respect to any class of stock that is regularly traded on an established securities market located in the US is not treated as gain recognized from the sale or exchange of a US real property interest if the foreign taxpayer did not own more than 5% of the class of stock at any time during the one-year period ending on the date of distribution. The amount that would otherwise be treated as short-term capital gain is, instead, included in the shareholder's gross income as a dividend from the regulated investment company. *IRC § 871(k)(2)(E)*.

(n78)Footnote 77. *IRC § 871(k)(2)(C)*. No dividend with respect to any taxable year of the company beginning after Dec 31, 2007, can be a short-term capital gain dividend. In making the designations, permitted by *IRC §§ 852(b)(3)(C), 852(b)(5)(A), 854(b)(1), 871(k)(1)(C), and 871(k)(2)(C)*, the RIC may designate the maximum amount permitted under each provision even if the aggregate of all the amounts so designated exceeds the total amount of the RIC's dividend distribution. *Rev Rul 2005-31, 2005-1 CB 1084*.

(n79)Footnote 78. *IRC § 871(k)(2)(C), (D)*.

(n80)Footnote 79. *IRC § 871(k)(2)(C), (D)*.

(n81)Footnote 80. *IRC § 871(k)(2)(C), (D)*. The treatment of post-Oct 31 losses assumes that an election under *IRC § 4982(e)(4)* does not apply. See *§ 12.03[7]* for a discussion of that provision.

(n82)Footnote 81. A controlled commercial entity is one engaged in commercial activities if the foreign government holds (directly or indirectly) either a 50 percent or greater voting or value interest in the entity, or an interest that gives it effective control of the entity. *IRC § 892(a)(2)(B)*.

A foreign government is treated as a resident of its country for federal tax purposes. It is also treated as such for the purposes of any income tax treaty obligation of the US if it grants equivalent treatment to the US government. *IRC § 892(a)(3)*.

Income earned from a US real property interest described in *IRC § 897(c)(1)(A)(i)*, or from the disposition of such an interest, is not exempt from tax under *IRC § 892*. *Temp Treas Reg § 1.892-3T(a)(1)(iii)*.

(n83)Footnote 82. *IRC § 871(a)(1)(B)*. Certain other items of income unrelated to transactions in securities are also taxed.

(n84)Footnote 83. Capital gain dividends of a regulated investment company are taxable to a nonresident alien shareholder under *IRC § 871(a)(2)* only if the taxpayer meets the physical presence test. *Rev Rul 69-235, 1969-1 CB 190*. This ruling extends to undistributed capital gain dividends as well.

(n85)Footnote 84. The gains and losses of a nonresident alien individual are determined without regard to the exclusion permitted by *IRC § 1202*. See *§ 2.06[2][a][ii]* for a discussion of *IRC § 1202*.

A domestically controlled qualified investment entity is one in which at all times during the testing period less than 50% in value of the stock was held directly or indirectly by foreign persons. *IRC § 897(h)(4)(B)*.

(n86)Footnote 1. The Service will not ordinarily rule whether a taxpayer is engaged in a trade or business in the US, and whether income is effectively connected with the conduct of a trade or business in the US. *Rev Proc 2010-7, 2010-1 CB 231, 232*.

(n87)Footnote 2. *IRC § 864(c)(2)*.

(n88)Footnote 3. Other examples can be found in HR Rep No 1450, 89th Cong, 2d Sess 59-61 (1966).

(n89)Footnote 4. *IRC § 864(c)(3)*. If the taxpayer is not engaged in a trade or business within the US, he is not taxed on such income since it is not periodic and since a person not engaged in a trade or business cannot have any effectively connected income. *IRC § 864(c)(1)(B)*.

(n90)Footnote 5. See generally Feder & Parker, "The Foreign Investment in Real Property Tax Act of 1980," 34 *Tax Law* 545 (1981).

A foreign government is treated as a person with respect to US real property interests. *Temp Treas Reg § 1.897-9T(e)*. This means that income earned from, or gain derived from the disposition of, a US real property interest is not exempt from tax under *IRC § 892*. *Temp Treas Reg § 1.892-3T(a)(1)(iii)*.

(n91)Footnote 6. *IRC § 897(c)(1)(A)(ii)*.

A recent ruling, however, has identified a potential loophole in this otherwise broad rule. In Rev Rul 2008-31, 2008-26 *IRB* 1180, a foreign corporation entered into a notational principal contract with an unrelated domestic corporation. The return on the contract was based on an index that measured appreciation and depreciation of real estate within wide geographic areas, an index that was not maintained by either of the two corporations. The ruling determined that the contract was not a United States real property interest for purposes of *IRC Section 897(c)(1)*.

(n92)Footnote 7. *IRC § 897(c)(2)*.

(n93)Footnote 8. *IRC § 897(c)(1)(A)(ii), (c)(4)(A)*.

(n94)Footnote 9. *IRC § 897(c)(4)(B)*. Assets used or held for use in a trade or business by the partnership, trust, or estate are deemed to be so held by the partners or beneficiaries.

Any asset deemed held by a partner or beneficiary is so treated for purposes of applying ownership to partnerships, trusts, or estate that are above in a chain of partnerships, trusts, or estates.

(n95)Footnote 10. *IRC § 897(c)(5)*. The attribution rules of *IRC § 318(a)* are made applicable, but are modified to the extent that the entity-individual attribution rules become operative when a shareholder owns 5 percent of the corporation's stock. *IRC § 897(c)(6)(C)*.

"Ownership" of assets by the controlling corporation can be reattributed to corporations that are higher in a chain of corporations. *IRC § 897(c)(5)(A)*.

(n96)Footnote 11. *IRC § 897(c)(1)(B)*.

(n97)Footnote 12. *IRC § 897(c)(3)*. The attribution rules of *IRC § 318(a)* apply, with the entity-individual rules triggered when a shareholder owns 5 percent of the corporation's stock. *IRC § 897(c)(6)(C)*.

(n98)Footnote 13. *IRC § 897(h)(2)*.

(n99)Footnote 14. *IRC § 897(d)(1)*. See Chs 4, 5 and 6.

No gain will be recognized if carryover basis rules would normally apply and, at the time of receipt of the distributed property, the distribution would be subject to tax on a later disposition by the recipient. A second-tier foreign subsidiary owned a parcel of US real property. A liquidating distribution of the property to its parent, another foreign corporation was subject to nonrecognition treatment under *IRC § 332* and did not require the recognition of gain under *IRC § 897*; a later distribution by the first-tier subsidiary to its domestic parent did. *Rev Rul 90-76, 1990-2 CB 176*.

(n100)Footnote 15. *IRC § 897(e)(1)*. The purpose of *IRC § 897(e)* is to preserve otherwise available

nonrecognition treatment to cases where it is clear that the gain inherent in a US real property interest will remain subject to federal income tax. Therefore, a foreign corporation was entitled to nonrecognition under *IRC § 351* when it transferred stock of a domestic subsidiary that constituted a US real property interest to a new domestic subsidiary in exchange for the latter's stock. *Rev Rul 84-160, 1984-2 CB 125*. See also *Rev Rul 87-66, 1987-2 CB 168*.

(n101)Footnote 16. *IRC § 897(e)(2)*; *Temp Treas Reg §§ 1.897-5T, 1.897-6T*. New final regulations will revise *Temp Treas Reg § 1.897-5T* and *Temp Treas Reg § 1.897-6T* to reflect recently issued regulations under *IRC § 368(a)(1)(A)*. *Notice 2006-46, 2006-1 CB 1044*.

(n102)Footnote 17. *IRC § 897(g)*.

(n103)Footnote 18. *IRC § 897(h)(1), 4(A)(i)*. However, any distribution by a qualified investment entity to a nonresident alien individual or a foreign corporation with respect to any class of stock that is regularly traded on an established securities market located in the US will not be treated as gain recognized from the sale or exchange of a US real property interest if the shareholder did not own more than 5% of the class of stock at any time during the one-year period ending on the date of the distribution.

A regulated investment company will not be a qualified investment entity after Dec 31, 2007. *IRC § 897(h)(4)(A)(ii)*. Nonetheless, a real estate investment trust will be treated as a qualified investment entity with respect to any distribution by the entity to a nonresident alien individual or a foreign corporation that is attributable directly or indirectly to a distribution to the entity from a real estate investment trust.

The term "United States real property interest" does not include any interest in a domestically controlled qualified investment entity. *IRC § 897(h)(2)*.

(n104)Footnote 19. *IRC § 897(d)(1), (h)(3)*. The "foreign ownership percentage" of a qualified investment entity is the greatest percentage of stock held by foreign persons during whichever of the following periods (testing period) is the shortest: (1) the period beginning on June 18, 1980 and ending on the date of distribution, (ii) the five-year period ending on the date of distribution, or (iii) the period during which the entity was in existence. *IRC § 897(h)(4)(C), (D)*.

A domestically controlled qualified investment entity is one in which at all times during the testing period less than 50% in value of the stock was held directly or indirectly by foreign persons. *IRC § 897(h)(4)(B)*.

If any portion of a distribution from a qualified investment entity to a nonresident alien individual or a foreign corporation is treated as gain realized by the individual or corporation from the sale or exchange of a US real property interest, the qualified investment entity must deduct and withhold a tax equal to 35% (or, to the extent provided in regulations 15% (20% in the case of taxable years beginning after Dec 31, 2010)) of the amount so treated. *IRC § 1445(e)(6)*.

(n105)Footnote 20. *IRC § 897(j)*.

(n106)Footnote 20.1. *IRC § 897(h)(5)(A)*. The provision applies to any substitute dividend payment as defined in *IRC § 861*, or any other similar payment that the Service determines necessary to prevent avoidance of the purposes of the applicable wash sales transaction rule. *IRC § 897(h)(5)(B)(ii)*. The portion of any payment treated as gain from the sale or exchange of a United States real property interest in this case is equal to the portion of the distribution the payment is in lieu of that would have been so treated but for the transaction giving rise to the payment.

No deduction or withholding of any tax is required in the case of an applicable wash sale transaction. *IRC § 1445(b)(8)*.

(n107)Footnote 20.2. *IRC § 897(h)(5)(B)(i)*.

(n108)Footnote 20.3. *IRC § 897(h)(5)(B)(iii).*

(n109)Footnote 20.4. *IRC § 897(h)(5)(B)(iv).*

(n110)Footnote 21. *IRC § 897(i)(1).*

(n111)Footnote 22. *IRC § 897(i)(3).* If a class of interest is traded on an established securities market, the consent need only be made by a person who held more than 5 percent of that interest. The constructive ownership rules of *IRC § 897(c)(6)(C)* apply in determining the extent of ownership of a class of interest.

(n112)Footnote 23. *IRC § 897(i)(2).*

(n113)Footnote 24. *IRC § 1445.*

(n114)Footnote 25. *Rev Proc 88-23, 1988-1 CB 787*, sets forth the procedure for obtaining a withholding certificate to reduce or dispense with the 10 percent withholding tax.

(n115)Footnote 26. *Treas Reg § 1.1445-1(b)(3).* The amount of withholding in the case of the exercise of an option is based on the amount paid for the option.

(n116)Footnote 27. *Treas Reg § 1.1445-1(b)(2).* A husband and wife are each deemed to have contributed 50 percent of the aggregate capital contributed by them.

(n117)Footnote 28. *Treas Reg § 1.1445-5* contains special rules concerning distributions and other transactions by corporations, partnerships, and trusts. *Treas Reg § 1.445-8* contains the rules for publicly traded partnerships and trusts, including real estate investment trusts.

(n118)Footnote 29. *IRC § 864(c)(4)(B).* *IRC § 864(c)(4)(A)* sets forth the general rule that foreign source income is not effectively connected income.

(n119)Footnote 30. *IRC § 864(c)(4)(D)(i).* A second exclusion covers subpart F income. *IRC § 864(c)(4)(D)(ii).*

(n120)Footnote 31. HR Rep No 1450, 89th Cong, 2d Sess 59, 65 (1966).

(n121)Footnote 32. HR Rep No 1450, 89th Cong, 2d Sess 66 (1966). A corporation whose principal activity is trading in securities for its own account will not be one whose foreign source income can be effectively connected income, if its trading activities are excluded from the definition of the term "trade or business within the United States" by *IRC § 864(b)(2)(A)*. CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.06

§ 20.06 Expatriation by United States Citizens and Residents--The Alternative Tax Regime Under Section 877A

As discussed in the previous section, individual foreign investors in US securities and other US investments are taxed differently from and in many cases more favorably than individual US investors. The tax regime applicable to "nonresident aliens" does not tax income from sources outside the United States, and investment income from US sources is taxed at a flat rate of 30 percent (without deductions), withheld at the source, that may be reduced (to zero in some cases) by statute or one of the many tax treaties in force between the US and various foreign countries. The differences between individual foreign and US investor tax regimes--income, estate and gift--may be sufficiently great to tempt some US citizens and permanent residents ("green card" holders) to relinquish their US citizenship or abandon their green card status, move to another country (if not already resident there) and thereafter become subject to US tax only under a more favorable nonresident alien tax regime.

The Internal Revenue Code, from 1966, sought to discourage this rather extreme tax saving strategy by denying nonresident alien tax status to certain expatriates, imposing instead an alternative tax regime somewhere between nonresident alien and US citizen or resident status. Although originally aimed at expatriates whose principal purpose for expatriation was the avoidance of US taxes, since 2004 the application of the alternative tax regime no longer depends on intent but is determined by objective tests targeting wealthy individuals and those that have not complied with their US tax obligations prior to expatriation. Until 2008, the alternative tax system, then imposed by *IRC Section 877*, taxed such expatriates at the same rates of tax applicable to US citizens and permanent residents on all of their US income, whether or not effectively connected to a US trade or business, over a 10-year period following expatriation.

Effective with respect to expatriations occurring on or after June 17, 2008, the alternative tax regime has been changed. Although the expatriate is now taxed as a nonresident alien after relinquishing US citizenship or giving up permanent resident status, new *IRC Section 877A* where applicable, treats expatriation as a tax realization event. A mark-to-market tax is imposed as though all of the covered expatriate's property were sold at fair market value on the day before expatriation. Deferred compensation also becomes subject to immediate taxation (at present value) unless the expatriate agrees to accept a 30 percent withholding tax on future payments of such compensation. These and other provisions of the new legislation are covered in this section (§ 20.06), which affects not only the expatriates themselves but also those making payments to such expatriates (such as present or former employers, and trustees or administrators of trusts and accounts in which they have or had an interest).ⁿ¹ Details regarding the alternative tax regime that remains applicable to expatriates who relinquished their citizenship or permanent residence status before June 17, 2008 are discussed in the following section, § 20.06A.

[1] Covered Expatriates Under Section 877A

The rules that identify individuals covered by the alternative tax regime under *IRC Section 877A*, referred to as "covered expatriates," are basically the same as the coverage rules under *IRC Section 877*.ⁿ² An "expatriate" is defined in *IRC Section 877A(g)(2)* as either (1) a citizen who relinquishes his US citizenshipⁿ³ or (2) a "long-term resident"ⁿ⁴ of the United States who ceases to be a "lawful permanent resident" of the United States within the meaning of *IRC Section 7701(b)(6)*.ⁿ⁵ The process may be voluntary or involuntary. A "covered expatriate"--an individual subject to the alternative tax regime--is defined as an expatriate who meets any one or more of the following three objective criteria.ⁿ⁶

(A) An average annual net income tax liability greater than \$149,000 for the five years preceding the year in which the individual's "expatriation date"ⁿ⁷ occurs;ⁿ⁸ or

(B) A net worth of \$2 million or more as of the expatriation date;ⁿ⁹ or

(C) Failure to certify, under penalty of perjury, compliance with all Federal tax obligations for the 5 years preceding the year in which the individual's "expatriation date" occurs, or failure to submit such evidence of such compliance as the IRS may require.ⁿ¹⁰

A former US citizen will not be subject to the alternative tax regime under *IRC Section 877A* even though the individual meets the tax liability and/or net worth tests if he or she qualifies under the "dual citizen" exception or the "minors" exception.ⁿ¹¹ Under the "dual citizen" exception a former citizen is exempt from the alternative tax regime if (1) the individual was at birth a citizen of both the United States and another country, (2) as of the expatriation date, the individual continues to be a citizen of, and is taxed as a resident of, such other country, and (3) the individual has been a resident of the United States (as defined in *IRC Section 7701(b)(1)(A)(ii)*) for not more than 10 taxable years during the 15-taxable year period ending with the taxable year in which his expatriation date falls.ⁿ¹² The "minors" exception exempts from the alternative tax regime a former citizen who (1) relinquished US citizenship before attaining age 18½, and (2) was a resident of the United States for not more than 10 taxable years before the date of relinquishment.ⁿ¹³

In addition, if a covered expatriate reacquires US citizenship or permanent resident status, during the period such status is retained he or she will be taxable as a US citizen or resident and will not be treated as a "covered expatriate" for purposes of *IRC Section 877A(d)(1)* or *IRC Section 877A(f)*.ⁿ¹⁴

Congress changed prior law by making expatriation effective for US tax purposes (and, for covered expatriates, making the alternative tax regime effective in its stead) on the date citizenship is relinquished or permanent resident status is abandoned or revoked.ⁿ¹⁵ Under prior law, *Section 7701(n) of the Internal Revenue Code* provided that a former US citizen or resident who relinquished US citizenship or abandoned or otherwise lost permanent residence status retained the status of a US citizen or resident for federal tax purposes until notification of such expatriation was provided to the IRS,ⁿ¹⁶ as well as the Secretary of State (in the case of a former citizen) or the Secretary of Homeland Security (in the case of a former permanent resident), *IRC Section 7701(n)* was repealed by Section 301 of Pub Law 110-245.ⁿ¹⁷ However, *IRC Section 7701(n)* continues to apply to individuals who relinquished their citizenship or permanent resident status prior to June 17, 2008; that is, such individuals will continue to be taxable as US citizens or residents until the notices required by *IRC Section 7701(n)* are provided, and after that time such individuals will be subject to the alternative tax regime in *IRC Section 877* rather than the regime provided in *IRC Section 877A*.ⁿ¹⁸

[2] The Alternative Tax Regime for Covered Expatriates

[a] The Mark-to-Market Exit Tax.

Under the new alternative tax regime imposed by *IRC Section 877A*, covered expatriates must now pay an exit tax as the price of expatriation. All of the covered expatriate's propertiesⁿ¹⁹ are treated as though they were sold on the day before the expatriation date for fair market value.ⁿ²⁰ To the extent the fair market value of any property exceeds the taxpayer's basis,ⁿ²¹ gain must be recognized in the year of "sale" notwithstanding any other provision of the Internal Revenue Code.ⁿ²² Any loss arising from the deemed "sale" of a property is also allowed to the extent otherwise provided in the Code,ⁿ²³ except that the "wash sale" loss disallowance and other rules in *IRC § 1091* will not be applied.ⁿ²⁴ There is an exclusion amount of \$600,000, to be adjusted annually for inflation; gains "realized" by reason of *IRC Section 877A(a)(1)* are includible in gross income only to the extent the total of such gains exceeds the exclusion amount.ⁿ²⁵

IRC Section 877A(a)(1) only outlines the parameters of the new mark-to-market tax. Until regulations are issued, the *IRS Guidance for Expatriates* fills in the gaps. The *Guidance* provides that the mark-to-market tax covers any interest in property that would be includible in the covered expatriate's gross estate for Federal estate tax purposes if he or she had died on the day before the expatriation date as a citizen or resident of the United States.ⁿ²⁶ The fair market value of each such interest is similarly determined under applicable estate tax principles.ⁿ²⁷ The exclusion amount is allocated pro-rata to each property on which gain is recognized under *IRC Section 877A(a)(2)(A)* ("gain asset") by multiplying the exclusion amount by a fraction, the numerator of which is the built-in gain with respect to the gain asset and the denominator of which is the total built-in gain of all gain assets. If the total gain of all the gain assets is less than the exclusion amount, the exclusion amount allocable to the gain assets is limited to the total *IRC Section 877A(a)(2)(A)* gain.ⁿ²⁸

Example:

A, a covered expatriate, relinquished his citizenship on November 1, 2010. On October 31, 2010, A owned three assets: Asset X had a fair market value of \$2,000,000 and an adjusted basis in A's hands of \$200,000; it thus had a built-in gain of \$1,800,000; Asset Y had a fair market value of \$1,000,000 and an adjusted basis of \$800,000 for a built-in gain of \$200,000; and Asset Z with a fair market value of \$500,000 and an adjusted basis of \$800,000, had a built-in loss of \$300,000. The exclusion amount (\$627,000 for 2010) is allocated between Assets X and Y (no part of the exclusion is allocated to Asset Z since it had a built-in loss) in accordance with the ratios of the built-in gain on each asset to the \$2 million total gain on both assets. Accordingly, 90% (1.8/2.0) of the \$627,000 exclusion amount, or \$564,300, is allocated to Asset X, and 10% of the exclusion amount or \$62,700 is allocated to Asset Y. The amounts of gain includible in income under *IRC Section 877A(a)* are therefore \$1,235,700 for Asset X (\$1,800,000-\$564,300) and \$137,300 for Asset Y (\$200,000-\$62,700). The loss of \$300,000 on Asset Z is also allowable subject to *IRC Section 1211(b)* and other loss limitation provisions of the Code (other than *IRC Section 1091*).ⁿ²⁹

IRC Section 877A(a) provides that the basis of any property deemed sold for purposes of the mark-to-market tax is to be adjusted by the amount of gain or loss realized under that section, without regard to whether all or a portion of the gain was excluded from income by *IRC Section 877A(a)(3)*.ⁿ³⁰ Thus, if in the above example Assets X, Y and Z were US real property interests and were subsequently sold by A at a time when A was a nonresident alien, the basis of Assets X and Y would be increased by \$1.8 million and \$200,000, respectively, without reduction by the portion of the exclusion amounts allocated to those assets. The basis of Asset Z would be reduced by \$300,000, from \$800,000 to \$500,000. Even though A is a nonresident alien, any gain realized (after taking account these adjustments to basis) would be taxable to A under *IRC Section 897*.ⁿ³¹

A covered expatriate may irrevocably electⁿ³² to defer payment of all or part of the mark-to-market tax imposed by *IRC Section 877A(a)* on a property-by-property basis. The amount of the mark-to-market tax attributable to a particular property (when more than one property is deemed sold under *IRC Section 877A(a)*) is determined in a two-step process.

First, compare the covered expatriate's tax liability for the portion of the taxable year that includes the day before the expropriation date after taking all deemed sales triggered by *IRC Section 877A(a)* into account with the tax liability for the same period without taking such deemed sales into account. The difference is the covered expatriate's total tax liability attributable to *Section 877A(a)*. Second, determine the portion of the *IRC Section 877A(a)* tax liability attributable to each property by multiplying the total *IRC Section 877A(a)* tax liability by a fraction, the numerator of which is the gain (if any) included in gross income with respect to the deemed sale of that property (*i.e.* the gain realized reduced by the exclusion amount, but not offset by losses realized in *IRC Section 877A(a)* deemed sales of other properties) and the denominator is the sum of the amounts includible in income with respect to all gain properties. In the example given above, assuming that A's total tax liability for the relevant taxable year is \$500,000, but would have been \$300,000 had the gains and losses from *IRC Section 877A(a)* deemed sales not been taken into account, 90 percent of the \$200,000 *IRC Section 877A(a)* tax liability, or \$180,000 would be deemed attributable to Asset X, and 10 percent of such liability, or \$20,000 to Asset Y, calculated as follows;

Gain recognized on deemed sale of Asset X	\$1,235,700
Gain recognized on deemed sale of Asset Y	\$137,300
Gain recognized on deemed sale of Asset Z	- 0 -
Total gain recognized on all deemed sales	\$1,373,000

IRC Section 877A(a) tax attributable to Asset X: $\$200,000 \times 1,235,700/1,373,000 [.9] = \$180,000$

IRC Section 877A(a) tax attributable to Asset Y: $\$200,000 \times \$137,300/1,373,000 [.1] = \$20,000$

IRC Section 877A tax imposed with respect to gain property may be deferred until the due date (without extensions) of the covered expatriate's return (1) for the taxable year in which the property is sold or otherwise disposed of (including a transfer by gift or in a "tax-free" exchange in which gain or loss is not recognized),ⁿ³³ or (2) for the taxable year that includes the date of death of the covered expatriate, whichever is earlier. Interest on the deferred tax begins to accrue on the due date of the covered expatriate's taxable return (without extensions) for the taxable year that includes the day before the expatriation date,ⁿ³⁴ is calculated at the underpayment rate established under *IRC Section 6621*, and compounds daily under *IRC Section 6622* until the date the tax is paid.

Deferral of the mark-to-market tax requires that the covered expatriate provide "adequate security" for payment of the deferred tax, including a bond or letter of credit.ⁿ³⁵ In addition, the covered expatriate must make an irrevocable waiver of any right under any treaty of the United States which would preclude assessment or collection of any tax imposed by reason of *IRC Section 877A*.ⁿ³⁶ The *IRS Guidance for Expatriates* further provides that the covered expatriate must enter into a "tax deferral agreement" with the IRS, in the form attached as Appendix A to the *IRS Guidance*, and enter a written agreement with a US person to act as the covered expatriate's limited agent, in the form attached to the *IRS Guidance* as Appendix B, to receive communications from the IRS and otherwise act on behalf of the covered expatriate under the provisions of the tax deferral agreement and relevant procedural provisions of the Code.ⁿ³⁷

[b] Taxation of Deferred Compensation Items.

Deferred compensation items are exempt from the mark-to-market tax, but a covered expatriate must make a choice as to whether to include such items in income at their present value as of the day before the expatriation date,ⁿ³⁸ or have the payor of the deferred compensation withhold US tax at a 30 percent rate from subsequent payments.ⁿ³⁹ If the withholding option is chosen, the payor of the deferred compensation must be notified of the covered expatriate's tax status under *IRC Section 877A*, and the covered expatriate must execute an irrevocable waiver of the right to claim any reduction in the 30 percent withholding rate to which he or she may be entitled under any applicable treaty between the United States and the country in which the covered expatriate is or becomes a resident.ⁿ⁴⁰

A deferred compensation item is defined comprehensively for purposes of *IRC Section 877A(d)* to include any interest in a retirement or other type of deferred compensation plan or arrangement permitted under the Internal Revenue Code,ⁿ⁴¹ an interest in a foreign pension plan or similar retirement arrangement or programⁿ⁴², any property or right to property which the covered expatriate has a right to receive in connection with the performance of services to the extent not previously taken into account under or in accordance with *IRC Section 83*.ⁿ⁴³ and a catch-all category, any "item of deferred compensation," which includes any other legally binding right to compensation held by the covered expatriate as of the expatriation date which has not been actually or constructively received but which is payable to the covered expatriate on or after the expatriation date.ⁿ⁴⁴ A deferred compensation item does not, however, include any deferred compensation item to the extent such item is attributable to services performed by the covered expatriate outside the United States at a time when he or she was not a citizen or resident of the United States.ⁿ⁴⁵

A taxable payment of deferred compensation as to which the covered expatriate has validly elected the withholding option, referred to in the statute as an "eligible deferred compensation item,"ⁿ⁴⁶ is taxable to the extent and at the time it would be includible in the gross income of the covered expatriate if such expatriate continued to be subject to tax as a citizen or resident of the United States.ⁿ⁴⁷ If the withholding option is not elected, and the item is not an eligible deferred compensation item (or, as the *IRS Guidance for Expatriates* puts it, is an "ineligible deferred compensation item"), the item becomes taxable as of the day before the expatriation date, in accordance with the following rules (pending the issuance of regulations or further guidance from the IRS):

(1) In the case of any plan or arrangement described in *IRC Section 877A(d)(4)(A), (B) or (C)*, (i.e., all items of deferred compensation other than the receipt of property or the right to receive property as to which *IRC Section 83* applies), an amount equal to the present value of the covered expatriate's accrued benefit is treated as having been received by the covered expatriate on the day before the expatriation date as a distribution under the plan.ⁿ⁴⁸ For this purpose, present value is calculated as follows--

(A) In the case of a defined contribution plan described in *IRC Section 219(g)(5)(A)(i)*, the present value of the covered expatriate's accrued benefit is the account balance.

(B) In the case of a defined benefit plan described in *IRC Section 219(g)(5)(A)(i)*, the present value of the covered expatriate's accrued benefit is determined using the method set forth in section 4.02 of *Rev Proc 2004-37, 2004-1 CB 1099*, determined as of the day before the expatriation date.

(C) In the case of any other deferred compensation item not described above or in *IRC Section 877A(d)(4)(D)*, the present value of the covered expatriate's accrued benefit is determined by applying the principles in Proposed *Treasury Regulation Section 1.409A-4*, except that where the proposed regulations provide for a determination to be made as of the end of the taxable year, such determination shall be made as of the day before the expatriation date, and the present value of the covered expatriate's accrued benefit is determined without regard to any substantial risk of forfeiture.ⁿ⁴⁹

(2) In the case of any propertyⁿ⁵⁰ which the covered expatriate is entitled to receive in connection with the performance of services as described in *IRC Section 877A(d)(4)(D)*, the rights of the covered expatriate to such item will be treated as becoming transferable (within the meaning of *Treasury Regulation Section 1.83-3(d)*) and not subject to a substantial risk of forfeiture (within the meaning of *Treasury Regulation Section 1.83-3(c)*) on the day before the expatriation date; accordingly, the fair market value of the property (determined without regard to any lapse restriction as defined in *Treasury Regulation Section 1.83-3(i)*), reduced by any amount paid for the property, will be includible in income as of such date.ⁿ⁵¹

(3) In the case of any right to receive property in the future which the covered expatriate is entitled to receive in connection with the performance of services as described in *IRC Section 877A(d)(4)(D)*, such as a stock-settled appreciation right or a stock-settled restricted stock unit,ⁿ⁵² such right will be treated as substantially vested as of the day before the expatriation date and, under the cash-equivalency doctrine (see *Cowden v Commissioner*, 289 F2d 20 (5th Cir 1961)), the value of such right generally will be includible in the income of the covered expatriate as of such date. The value of such right is determined by applying principles similar to *Proposed Treasury Regulation Section 1.409A-4*, except that where such proposed regulations provide for a determination to be made as of the end of the taxable year, that determination is to be made as of the day before the expatriation date.ⁿ⁵³

Where the amount of an ineligible item of deferred compensation is included in income under *IRC Section 877A(d)(2)*, an appropriate adjustment should be made to subsequent distributions from the plan to the covered expatriate to prevent the same income from being taxed twice.ⁿ⁵⁴ Further, no early distribution tax is to be imposed with respect to income triggered by reason of *IRC Section 877A(d)(2)*.ⁿ⁵⁵

[c] Taxation of Specified Tax Deferred Accounts.

Like items of deferred compensation, specified tax deferred accounts are not subject to the mark-to-market tax regime. Instead, *IRC Section 877A(e)(1)* provides that the covered expatriate shall be treated as receiving his entire interest in such accounts on the day before the expatriation date. As with items of deferred compensation, appropriate adjustment is made to subsequent distributions from the tax deferred account to take into account the previously taxed income, and no early distribution tax applies by reason of the early recognition of income.ⁿ⁵⁶

The types of tax deferred accounts to which *IRC Section 877A(e)(1)* applies are: an individual retirement plan as defined in *IRC Section 7701(a)(37)*, other than any arrangement described in subsection (k) or (p) of *IRC Section 408* ("simplified employee pensions" and "simple retirement accounts"); a qualified tuition program as defined in *IRC Section 529*; a Coverdell education savings account as defined in *IRC Section 530*; a health savings account as defined in *IRC Section 223*, and an Archer MSA as defined in *IRC Section 220*.ⁿ⁵⁷

[d] Special Rules for Nongrantor Trusts.

A covered expatriate's interest in a trust, other than a trust of which the covered expatriate is considered an owner under *IRC Section 671 et seq.*, is not subject to the mark-to-market tax.ⁿ⁵⁸ However, if the covered expatriate was a beneficiary of such a trust on the day before the expatriation date,ⁿ⁵⁹ two special rules apply to a subsequent distribution of property (including cash) from the trust to the covered expatriate: First, the trustee is required to deduct and withhold 30 percent of that portion of the distribution (referred to as the "taxable portion") that would be includible in the covered expatriate's gross income if he or she were still a citizen or resident of the United States.ⁿ⁶⁰ Second, if the fair market value of such property exceeds its adjusted basis in the hands of the trust, the trust must recognize gain as if the property had been sold to the covered expatriate at its fair market value.ⁿ⁶¹

Example 1:

The Trustee of a complex, nongrantor trust, distributes a painting to A, a covered expatriate who was a beneficiary of the trust on the day before A's expatriation date. The painting is a capital asset and has a basis of \$100,000 and a fair market value of \$400,000. The trust is a domestic trust that excludes gains from the sale or exchange of capital assets from its distributable net income (DNI) under *IRC Section 643(a)(3)*. The trust must include the \$300,000 of capital gain in its gross income and may not deduct that amount under *IRC Section 661* in computing its taxable income under *IRC Section 641*. However, in these circumstances the trust is not required to deduct and withhold tax pursuant to *IRC Section 877A(f)(1)(A)*, nor is A taxable on the \$300,000 capital gain.ⁿ⁶²

Example 2:

The facts are the same as in Example 1, except that the trust is a foreign trust that includes capital gain in DNI pursuant to *IRC Section 643(a)(6)(C)*. Although the trust must include the \$300,000 of capital gain in its gross income, it may deduct that amount under *IRC Section 661* in computing its taxable income under *IRC Section 641*. If A, who is now a nonresident alien, had continued to be subject to tax as a citizen or resident of the United States, the capital gain of \$300,000 would have been includible in A's gross income pursuant to *IRC Section 662*. Therefore, the taxable portion of the trust's distribution to A is \$300,000, and in accordance with *IRC Section 877A(f)(1)(A)*, the trust is required to deduct and withhold 30 percent of \$300,000, or \$90,000, from the distribution to A.ⁿ⁶³

Under *IRC Section 877A(f)(4)(B)*, a covered expatriate is treated as having waived any right to claim any reduction under any treaty with the United States in withholding on any distribution to which *IRC Section 877A(f)(1)(A)* applies unless the covered expatriate agrees to such other treatment as the IRS deems appropriate. In the *IRS Guidance for Expatriates*, a covered expatriate is given the option of avoiding withholding, and preserving his or her right to claim treaty benefits with respect to distributions from the trust, by agreeing to be treated as having received the value of his or her interest in the trust on the day before the expatriation date. To elect this treatment, the covered expatriate must obtain a letter ruling from the IRS as to the value, if ascertainable, of the interest in the trust as of the day before the expatriation date, following the procedures set out in *Rev Proc 2009-4n64* (or a successor publication).ⁿ⁶⁵ Once the ruling is obtained, the covered expatriate has reported and paid tax on the income deemed received as of the day before the expatriation date,ⁿ⁶⁶ and the trustee has received a copy of the letter ruling and a certification that the tax has been paid, no subsequent distributions from the trust to the covered expatriate will be subject to 30 percent withholding and the covered expatriate will not be precluded from claiming treaty benefits with respect to any distributions from the trust.ⁿ⁶⁷

[3] Information Reporting Requirements

Pending the issuance of regulations under *IRC Section 877A*, the Internal Revenue Service has announced that the following requirements apply to covered expatriates that relinquish citizenship or lose permanent resident status on or after June 17, 2008.ⁿ⁶⁸

[a] Tax Returns.

Unless the covered expatriate's expatriation date is January 1, he or she must file a dual status return for the year in which expatriation occurs. This requires that the covered expatriate file Form 1040R (nonresident alien return) with Form 1040 attached as a schedule covering the period from the beginning of the taxable year through the day before the expatriation date.ⁿ⁶⁹ Thereafter, a covered expatriate files only Form 1040NR, except that there is no obligation to file a return for a taxable year if the covered expatriate is fully withheld upon at the source and has no income effectively connected with a trade or business in the United States for that year.ⁿ⁷⁰

[b] Form 8854.

All U.S. citizens who relinquish their U.S. citizenship and all long-term residents who cease to be lawful permanent residents of the United States, whether or not they otherwise qualify as covered expatriates for purposes of *IRC Section 877A*, must file Form 8854 by the due date (including extensions) of the Federal tax return for the taxable year which includes the day before their expatriation date in order to certify, under penalties of perjury, that they have been in compliance with all federal tax laws during the five years preceding the year of expatriation. Individuals who fail to make such certification will be treated as covered expatriates within the meaning of *IRC Section 877A(g)* even though they do not meet the tax liability test or the net worth test.ⁿ⁷¹

Individuals who meet the tax liability or net worth test, and are therefore considered covered expatriates for purposes of *IRC Section 877A*, must also include the following on their Form 8454 for the taxable year which includes the day before their expatriation date:

- Identification of all properties as to which the covered expatriate elects to defer the mark-to-market tax, the amount of tax attributable to each such property, and an irrevocable election to waive any right under any US treaty that would preclude assessment or collection of such tax.
- Identification of any property held by the covered expatriate on the date he or she first became a resident of the United States, as well as on the day before the expatriation date, as to which the covered expatriate elects not to apply the step-up in basis rule in *IRC Section 877A(h)(2)* for purposes of the mark-to-market tax imposed by reason of *IRC Section 877A(a)*.
- Identification of each item of deferred compensation as to which the covered expatriate elects 30 percent withholding rather than immediate taxation and an irrevocable waiver of any right to claim a reduction in the 30 percent withholding rate with respect to each such item.ⁿ⁷²

A covered expatriate who had an interest in one or more nongrantor trusts on the day before the expatriation date must also file Form 8454 annually to report any distributions received from such trust(s) or to certify that no distributions were received. However, if the covered expatriate makes an election on Form 8454 to be treated as having received the value of his or her entire interest in the trust on the day before the expatriation date, and follows the procedures required by the Internal Revenue Service to implement such an election, the covered expatriate will thereafter be relieved of this reporting obligation.ⁿ⁷³

[c] Form W-8CE.

A covered expatriate who has a deferred compensation item, a specified tax deferred account, or an interest in a nongrantor trust must file Form W-8CE with the relevant payor on the earlier of (1) the day prior to the first distribution on or after the expatriation date or (2) 30 days after the covered expatriate's expatriation date.ⁿ⁷⁴

In the case of an eligible deferred compensation item, Form W-8CE provides notice to the payor that the individual is a covered expatriate who has waived treaty benefits and that taxable payments are therefore subject to 30 percent withholding. In the case of an ineligible deferred compensation item, Form W-8CE provides notice to the payor that the individual is a covered expatriate who is treated as having received an amount equal to the present value of his or her accrued benefit on the day before the expatriation date. Receipt of Form W-8CE requires the payor to provide a written statement to the covered expatriate within 60 days setting forth the present value of the covered expatriate's accrued benefit on the day before the expatriation date.ⁿ⁷⁵

Similarly, in the case of a specified tax deferred account, Form W-8CE provides notice to the payor that the individual is a covered expatriate who is treated as having received a distribution of his or her entire interest in the account on the day before his or her expatriation date. Just as in the case of an ineligible deferred compensation item, the payor must provide a written statement to the covered expatriate within 60 days of receiving Form W-8CE setting forth the amount of the covered expatriate's account balance on the day before the expatriation date.ⁿ⁷⁶

Finally, in the case of an interest in a nongrantor trust of which the covered expatriate was a beneficiary on the day before the expatriation date, Form W-8CE provides notice to the trustee that the individual is a covered expatriate. The covered expatriate is deemed to have waived treaty benefits with respect to future distributions from the trust unless the covered expatriate checks a box on Form W-8CE certifying that he or she will elect on Form 8854 to pay tax currently on the value of his or her interest in the trust. If the box is checked, the trustee must, within 60 days of receipt of Form W-8CE, provide the covered expatriate with the information needed to calculate the value of his or her interest in the

trust as of the day before the expatriation date. The covered expatriate is subject to 30 percent withholding on the taxable portion of each distribution from the trust on or after the expatriation date until such time as the trustee receives a copy of the letter ruling and the covered expatriate's certification in writing under penalties of perjury that the tax owed on the value of the interest in the trust has been paid to the IRS.ⁿ⁷⁷

FOOTNOTES:

(n1)Footnote 1. See also *Notice 2009-85, 2009-45 IRB 598* ("Guidance for Expatriates Under Section 877A"), hereafter referred to as "*IRS Guidance for Expatriates*."

(n2)Footnote 2. In fact, *IRC § 877A(g)(1)(A)* incorporates the rules in *IRC § 877(a)(2)* by reference.

(n3)Footnote 3. *IRC Section 877A(g)(4)* recognizes four types of events that will result in relinquishment of citizenship in a manner that is effective for US tax purposes. These are:

(A) Renouncing US nationality before a diplomatic or consular officer of the United States pursuant to paragraph (5) of *section 349(a) of the Immigration and Nationality Act (8 USC 1481(a)(5))*,

(B) Furnishing the United States Department of State with a signed statement of voluntary relinquishment of United States nationality confirming the performance of an act of expatriation specified in paragraph (1), (2), (3), or (4) of *section 349(a) of the Immigration and Nationality Act (8 USC 1481(a)(1)-(4))*,

(C) Issuance by the United States Department of State of a certificate of loss of nationality, or

(D) Cancellation by a court of the United States of a naturalized citizen's certificate of naturalization.

A renunciation or voluntary relinquishment under (A) or (B) must be subsequently approved by the issuance of a certificate of loss of nationality by the United States Department of State, but is effective for tax purposes as of the date the individual's renunciation or voluntary relinquishment of citizenship is made.

(n4)Footnote 4. A "long-term resident" is any individual (other than a citizen of the United States) who is a lawful permanent resident of the United States in at least 8 taxable years during the period of 15 taxable years ending with the taxable year in which such individual ceases to be a lawful permanent resident. See *IRC § 877A(g)(5)*, incorporating by reference *IRC § 877(e)(2)*. A "lawful permanent resident" of the US is defined in *IRC § 7701(b)(6)*, discussed in n 5 below.

(n5)Footnote 5. Under *IRC § 7701(b)(6)*, an individual is a lawful permanent resident of the United States for any year in which such individual has the status of having been lawfully accorded the privilege of residing permanently in the United States as an immigrant in accordance with US immigration laws (*i.e.*, has a "green card") provided such status is not revoked or abandoned in that year. In addition, an individual ceases to be a lawful permanent resident in any year in which such individual is treated as a resident of a foreign country under the tie-breaker provisions of a tax treaty between the US and such foreign country, does not waive the benefits of the treaty, and notifies the IRS of the commencement of such treatment. Notification is to be made on IRS Forms 8833 and 8854. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 599* .

(n6)Footnote 6. See *IRC § 877A(g)(1)*, which references the provisions of *IRC §§ 877(a)(2)(A), (B), and (C)*.

(n7)Footnote 7. For purposes of this and the other two criteria, as well as the other provisions of *IRC § 877A*, an individual's "expatriation date" is the date on which such individual relinquishes citizenship (the earliest to occur of the events referred to in note 3, *supra*) or the date on which a long-term resident other than a citizen ceases to be a lawful

permanent resident of the United States. *IRC § 877A(g)(3)*.

(n8)Footnote 8. *IRC § 877(a)(2)(A)*. The figure satisfying the tax liability test is adjusted for inflation each year, rounded to the nearest multiple of \$1,000. *IRC § 877(a)(2)* (flush language). \$149,000 is the adjusted amount for 2010. See Rev Proc 2009-50, 2009-45 *IRB* 617, 624 (Nov 9, 2009) , § 3.26. The figure for 2009 was \$145,000. *Rev Proc 2008-66*, 2008 *IRB* 1107 § 3.26. The individual's income tax liability is determined under *IRC § 38(c)(1)*, and in the case of an individual filing a joint return must take into account the entire net income tax reflected on such return. *Notice 97-19*, 1997-1 *CB* 394, 1997 *IRB LEXIS* 89, *10 .

(n9)Footnote 9. *IRC § 877(a)(2)(B)*. The provisions of *Notice 97-19* , may be used for guidance in applying the net worth as well as the tax liability test. *IRS Guidance for Expatriates*, *Notice 2009-85*, 2009-45 *IRB* at 599 . Pursuant to *Notice 97-19* , for purposes of the net worth test, an individual is considered to own any interest in property that would be taxable as a gift under Chapter 12 of the Code if the individual were a citizen or resident of the US and transferred the interest immediately prior to the expatriation date (without regard, however, to the various gift tax deductions and exclusions in *IRC §§ 2503(b) through (g)*, the spousal gift-splitting provisions in *IRC § 2513*, or the charitable and spousal deductions in *IRC §§ 2522-2524*). Further, the individual's interests in property are to be valued using the valuation principles of *IRC Section 2512* and the regulations thereunder without regard to any prohibitions or restrictions on such interest. An individual's net worth includes beneficial interests in trusts, and *Notice 97-19* provides special rules for valuing such interests. *Notice 97-19* , § III.

(n10)Footnote 10. *IRC § 877(a)(2)(C)*. Federal tax obligations include but are not limited to obligations to file income tax, employment tax, gift tax and information returns, if applicable, and obligations to pay all relevant tax liabilities, interest, and penalties. The certification must be made on IRS Form 8854, which is to be filed by the due date for the taxpayer's return for the taxable year that includes the day before his expatriation date. *Notice 2009-85*, 2009-45 *IRB* at 599 .

(n11)Footnote 11. *IRC 877A(g)(1)(B)*. Both exceptions have been modified and liberalized somewhat as compared with the "dual citizen" and "certain minors" exceptions under prior law. See *IRC § 877(c)* and § 20.07A[1] below. As under prior law, however, the individual must still certify compliance with all federal tax obligations; failure to do so will result in the individual's meeting the non-compliance test of *IRC § 877(a)(2)(C)*, which makes the individual subject to the alternative tax regime notwithstanding the "dual citizen" and "minors" exceptions.

(n12)Footnote 12. *IRC § 877A(g)(1)(B)(i)*.

(n13)Footnote 13. *IRC § 877A(g)(1)(B)(ii)*.

(n14)Footnote 14. *IRC § 877A(g)(1)(C)*, *IRC § 877A(d)(1)* subjects certain payments of deferred compensation to covered expatriates to withholding tax, while *IRC § 877A(f)* does the same for certain distributions to expatriates from nongrantor trusts. See §§ 20.07[2][b] and 20.07[2][d] below.

(n15)Footnote 15. See *IRC § 877A(g)(3)* and (4); *IRC § 7701(a)(50)*.

(n16)Footnote 16. See *IRC § 6039G*.

(n17)Footnote 17. 122 *Stat* 1638 (2008). Section 301 of Pub Law 110-245, also known as the Heroes Earnings Assistance and Relief Tax Act of 2008 (or "HEART") also added section *IRC § 877A*.

(n18)Footnote 18. See *IRS Guidance for Expatriates*, *Notice 2009-85*, 2009-45 *IRB* at 604-605 .

(n19)Footnote 19. With the exception of deferred compensation items, specified tax deferred accounts, and interests in nongrantor trusts. *IRC § 877A(c)*. All of these items are dealt with elsewhere in *IRC § 877A*. See §§ 20.07[2][b], [c], and [d] below.

(n20)Footnote 20. *IRC § 877A(a)(1)*.

(n21)Footnote 21. *IRC § 877A(h)(2)* provides that, solely for purposes of the mark-to-market tax, unless the taxpayer irrevocably elects otherwise, property which was held by an individual on the date the individual first became a resident of the United States (within the meaning of *IRC § 7701(b)*) is treated as having a basis not less than the fair market value of such property on such date. In the *IRS Guide for Expatriates*, the IRS and Treasury Department announced that they intend to exercise their regulatory authority to exclude from this step-up-in-basis rule United States real property interests within the meaning of *IRC § 897(c)* ("USRPIs"), and property used or held for use in connection with the conduct of a trade or business within the United States, unless such trade or business was not carried on through a "permanent establishment" in the United States within the meaning of an income tax treaty between the US and the country in which the taxpayer resided before becoming a resident of the United States. *IRS Guide for Expatriates, Notice 2009-85, 2009-45 IRB at 602* .

(n22)Footnote 22. *IRC § 877A(a)(2)(A)*.

(n23)Footnote 23. For example, a net capital loss is subject to the limitations on the deductibility of capital losses in *IRC § 1211(b)*. See Chapter 2, § 2.05[2][b].

(n24)Footnote 24. *IRC § 877A(a)(2)(B)*. The wash sale provisions are discussed in § 2.07[3].

(n25)Footnote 25. *IRC § 877A(a)(3)*. The exclusion amount is \$626,000 in 2009, *Rev Proc 2008-66* , § 3.27, and \$627,000 in 2010. *Rev Proc 2009-50, 2009-45 IRB 617* , § 3.27.

(n26)Footnote 26. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 599-600* , § 3A. Credits allowed against the estate tax in *IRC § 2010-2016*, inclusive, are disregarded. In addition, a beneficial interest in a trust which is not includible in the covered expatriate's gross estate is considered a property "sold" for purposes of the mark-to-market tax, and is to be valued in accordance with the special rules in *Notice 97-19* .

(n27)Footnote 27. Specifically, (a) the special valuation rules in *IRC § 2701-2704*, applicable to certain interests in corporations, partnerships and trusts, apply for purposes of *IRC § 877A* as if the covered expatriate's interests subject to those provisions were being transferred to family members; (b) the covered expatriate's tax liability as a result of *IRC § 877A* or otherwise, is not taken into account; and (c) *IRC §§ 2055, 2056, 2056A, and 2057* (concerning charitable contributions, bequests to a surviving spouse, special treatment of qualified domestic trusts and special deductions for interests in a family-owned business) are not be taken into account. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 600-601* , § 3B.

(n28)Footnote 28. *Id.*

(n29)Footnote 29. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 600-601* .

(n30)Footnote 30. *IRC § 877A(a)(2)* (flush language).

(n31)Footnote 31. See § 20.06[2][a], *supra*.

(n32)Footnote 32. Although *IRC § 877A(b)(6)* provides that an election to defer payment of *IRC § 877A* tax with respect to a property, once made, is irrevocable, the *IRS Guide for Expatriates* states that a covered expatriate may pay any tax deferred under *IRC § 877A(b)*, together with accrued interest, at any time. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 602* .

(n33)Footnote 33. The IRS has, but so far has not exercised, authority to allow deferral to continue when property is disposed of in a transaction in which gain is not recognized in whole or in part. *IRC § 877A(b)(1)*.

(n34)Footnote 34. See *IRC § 877A(b)(7)* (date on which interest begins to accrue to be determined without regard

to the deferral allowed by *IRC § 877A(b)*.

(n35)Footnote 35. *IRC § 877A(b)(4)*.

(n36)Footnote 36. *IRC § 877A(b)(5)*.

(n37)Footnote 37. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 603, 614-617*.

(n38)Footnote 38. See *IRC § 877A(d)(2)*.

(n39)Footnote 39. See *IRC § 877A(d)(1)*. If the payor of the deferred compensation item is not a US person, such person must elect to be treated as a US person for purposes of assuming the withholding obligation and meet such other requirements as the IRS may provide to ensure that the withholding obligation is met. *IRC § 877A(d)(3)(A)(ii)*. The payor of the deferred compensation, as well as the covered expatriate, becomes liable for payment of the tax under the withholding option. See *IRC § 1461; IRC § 877A(d)(6)(A); IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 607*. An item of deferred compensation subject to withholding under *IRC § 877A(d)(1)* is not also subject to withholding under *IRC § 1441* (applicable to US payors of certain types of income (including wages) from US sources paid to nonresident aliens). *IRC § 877A(d)(6)(C)*.

(n40)Footnote 40. See *IRC § 877A(d)(3)(B)*. The decision whether to recognize deferred compensation immediately or accept 30 percent withholding on subsequent payments is made on an item-by-item basis, so that some deferred compensation items may be includible in income immediately while others are subject to withholding. The IRS must be notified on Form 8854 of each deferred compensation item with respect to which the withholding option is elected, which must be filed with the covered expatriate's tax return for the taxable year which includes the day before the expatriation date.

(n41)Footnote 41. *IRC § 877A(d)(4)(A)* refers to "any interest in a plan or arrangement described in *IRC § 219(g)(5)*," which includes (i) a plan described in *IRC § 401(a)* that includes a trust exempt from tax under *IRC § 501(a)*; (ii) an annuity plan described in *IRC § 403(a)*; (iii) an employee plan established by the United States or by a State or political subdivision, or a federal or State agency or instrumentality, but excluding an eligible deferred compensation plan within the meaning of *IRC § 457(b)*; (iv) an annuity contract described in *IRC § 403(b)*; (v) a simplified employee pension within the meaning of *IRC § 408(k)*; (vi) a simplified retirement account within the meaning of *IRC § 408(p)*; and a trust described in *IRC § 501(c)(18)*. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 605*.

(n42)Footnote 42. *IRC § 877A(d)(4)(B)*.

(n43)Footnote 43. *IRC § 877A(d)(4)(D)*. Property is taken into account under or in accordance with *IRC § 83* to the extent that, on or before the expatriation date, property transferred to the covered expatriate in connection with the performance of services has become substantially vested or the covered expatriate has made a valid election under *IRC § 83(b)* to include the value of such property in income, and the covered expatriate has in fact accurately reported the value of such property in his federal income tax return and paid all taxes due in respect of such return (or, if the return is due after the expatriation date, the income has been subject to appropriate tax withholding. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 605*.

(n44)Footnote 44. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 605-606*. "An item of deferred compensation generally includes an amount,...whether or not substantially vested, that constitutes nonqualified deferred compensation for purposes of *section 404(a)(5)* (determined without regard to *§ 1.404 (b)-1T, Q&A 2*), including a cash-settled stock appreciation right, a phantom stock arrangement, a cash-settled restricted stock unit, an unfunded and unsecured promise to pay money or other compensation in the future (other than such a promise to transfer property in the future), and an interest in a trust described in *section 402(b)(1)* or *(4)* (commonly referred to as a secular trust)." *Id.*

(n45)Footnote 45. *IRC § 877A(d)(5)*. Pending further guidance from the IRS, taxpayers may use any reasonable method to determine the portion of a deferred compensation item that is attributable to services performed outside the United States while the covered expatriate was not a citizen or resident of the United States provided it is consistent with existing guidance (including *Treas Reg § 1.861-4 (b) (2)*, *Revenue Ruling 79-388*, and *Revenue Procedure 2004-37*) and based upon a reasonable, good faith interpretation of *IRC § 877A (d) (5)*. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 607*.

(n46)Footnote 46. See *IRC § 877A(d)(3)*.

(n47)Footnote 47. *IRC § 877A(d)(1)(B)*. However, the tax is deemed imposed under *IRC § 871* (tax on US source income of nonresident alien individuals). *IRC § 877A(d)(6)(B)*. Any amount due under *IRC § 871* that is not paid by means of withholding must be reported by the covered expatriate on the income tax return for the relevant taxable year. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 607*.

(n48)Footnote 48. *IRC § 877A(d)(A)(i)*; *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 606*.

(n49)Footnote 49. *Id.*

(n50)Footnote 50. Property is to be given the meaning set out in *Treas Reg § 1.83-3(e)*. See *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 606*.

(n51)Footnote 51. *IRC § 877A(d)(A)(ii)*; *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 606-607*.

(n52)Footnote 52. A stock appreciation right is a right to compensation based on the appreciation in value of a specified number of shares of stock or other property during a specified period (such as a period beginning on the date of grant or some other specified date and the date of exercise of such right). A stock appreciation right is a stock-settled stock appreciation right to the extent that the compensation payable under such right is in the form of a transfer of shares of stock or other property or a right to receive property in the future. A restricted stock unit is a right to receive compensation in cash, shares of stock, or other property following the satisfaction of a specified vesting condition. A restricted stock unit is a stock-settled restricted stock unit to the extent that the compensation payable under such restricted stock unit is in the form of a transfer following the satisfaction of such vesting condition of shares of stock or other property or a right to receive property in the future. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 606*.

(n53)Footnote 53. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 607*.

(n54)Footnote 54. *IRC § 877A(d)(2)(C)*. Amounts included in gross income should be treated as investments in the contract in the case of distributions to which *IRC § 72* applies, or, where distributions are received pursuant to deferred compensation items to which *Prop Treas Reg § 1.409A-4* would apply, the adjustment should be made pursuant to principles similar to those of *Prop Treas Reg § 1.409A-4*. In other cases, any reasonable method may be used to determine the amount of the adjustment so long as it is consistently applied to all such ineligible deferred compensation items with respect to the covered expatriate; does not reduce the amount includible in the covered expatriate's income below zero; and does not result in an aggregate amount of such adjustment that, when combined with amounts treated as an investment in the contract or determined pursuant to principles similar to those in *Prop Treas Reg § 1.409A-4* exceeds the amount included in the covered expatriate's income pursuant to *IRC § 877A(d)(2)(A)*. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 607*.

(n55)Footnote 55. *IRC § 877A(d)(2)(B)*. An early distribution tax includes the taxes imposed by *IRC §§ 72(t), 220(e)(4), 223(f)(4), 409A(a)(1)(B), 529(c)(6), or 530(d)(4)*. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 607*.

(n56)Footnote 56. *IRC § 877A(e)(1)(B) and (C)*.

(n57)Footnote 57. *IRC § 877A(e)(2).*

(n58)Footnote 58. *See IRC § 877A(c)(3) and 877A(f)(3)*

(n59)Footnote 59. As required by *IRC § 877A(f)(5)*. A beneficiary is defined by the *IRS Guidance for Expatriates* as "a person (a) who is entitled or permitted, under the terms of the trust instrument or applicable local law, to receive a direct or indirect distribution of trust income or corpus (including, for example, a distribution in discharge of an obligation of that person), (b) with the power to apply trust income or corpus for his or her own benefit, or (c) to whom the trust income or corpus could be paid if the trust or the current interests in the trust were then terminated." *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 610 .*

(n60)Footnote 60. *IRC § 877A(f)(1)(A).*

(n61)Footnote 61. *IRC § 877A(f)(1)(B)*. If a nongrantor trust becomes a grantor trust on or after the expatriation date, the conversion will be deemed to be a taxable distribution to the covered expatriate subject to *IRC § 877A(f)(1)* to the extent of the portion of the trust of which the covered expatriate is treated as the owner. *IRS Guidance for Expatriates, Notice 2009-85, 2009-45 IRB at 610 .*

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.06A

§ 20.06A Expatriation by United States Citizens and Residents Before June 17, 2008--The Alternative Tax Regime Under IRC Section 877

Prior to the enactment of legislation passed in 1996, an individual who relinquished his or her United States citizenship with a principal purpose of avoiding United States taxes was subject to tax on his or her United States source income at the rates applicable to United States citizens, rather than the rates applicable to other nonresident aliens, if the result was a higher United States tax liability. In addition, the scope of items treated as United States source income was broader than those items normally considered to be United States source income.

The rules were amended in 2004, in part, to replace the subjective determination that tax avoidance was a principal purpose for expatriation with one that is more objective. The new test applies to individuals who relinquish their United States citizenship or terminate long-term residency after June 3, 2004.

[1] Persons Covered by the Expatriation Rules

Prior to the 1996 legislation, the expatriation rules applied only to United States citizens who lost their citizenship. Under *IRC Section 877(e)(1)*, the expatriation rules are extended to any long-term resident who ceases to be a lawful permanent resident of the United States (loses green-card status) or is treated as a resident of a foreign country under a tie-breaker provision in a tax treaty with the United States (and the long-term resident does not waive the benefits of the treaty applicable to residents of the foreign country). A long-term resident under the 1996 legislation is any individual (other than a citizen of the United States) who is a lawful permanent resident of the United States in at least eight taxable years during the period of 15 taxable years ending with the year of termination of residence.ⁿ¹ However, an individual is not treated as a lawful permanent resident for any taxable year during the 15 year period if the individual is treated as a resident of another country under a tie-breaker provision of a treaty and does not waive the benefits of the treaty.

The expatriation rules of *IRC Section 877(a)(1)* applied to any individual, who within the ten-year period immediately preceding the close of the taxable year, lost United States citizenship, if (a) the average annual net income tax of the individual for the five-year period ending before the date of loss of United States citizenship was greater than \$124,000, (b) the net worth of the individual as of that date was \$2 million or more, or (c) the individual failed to certify under penalties of perjury that he had met the requirements of the tax laws for the five preceding taxable years or failed to submit such evidence of compliance as the Service required.ⁿ²

The expatriation rules of *IRC Section 877* did not apply to an individual if the individual was born with dual citizenship.ⁿ³ A second exception applied (1) to any individual who became a citizen of the United States at birth, (2) if neither parent of the individual was a citizen of the United States at the time of the individual's birth, (3) if the loss of United States citizenship occurred before the individual attained the age of 18, and (4) if the individual was not present in the United States for more than 30 days during any calendar year that is one of the ten calendar years preceding the individual's loss of citizenship.ⁿ⁴

[2] Tax Consequences of Expatriation

Under *IRC Section 877(a)(1)*, a person who came within the ambit of the expatriation rules prior to June 17, 2008 is subject to tax on United States source income and gains at the rates applicable to United States citizens for the ten-year period following the close of the taxable year in which expatriation occurs, if this results in a tax liability greater than the tax that would normally be imposed on the nonresident alien under *IRC Section 871*.ⁿ¹ For this purpose, gross income includes both income from United States sources that is not effectively connected with the conduct of a trade or business within the United States and income that is so connected.ⁿ² In computing taxable income, the following deductions are allowed: (1) deductions connected with includable gross income, (2) deductions for casualty losses suffered on property located within the United States, (3) charitable deductions, (4) personal exemptions, except that only one exemption is allowed unless the taxpayer is a resident of a contiguous country, and (5) deductions for losses not connected with a trade or business if incurred in a transaction entered into for profit, but only if any profit that might have resulted from the transaction would have been included in gross income; no capital loss carryover is allowed.ⁿ³

Example:

On December 31, 2004, A, a former United States citizen, expatriated under circumstances that made A subject to the rules of *IRC Section 877(a)(1)*. In 2005, A earns \$200,000 of United States source dividends and \$100,000 of United States source interest income that qualifies as portfolio interest under *IRC Section 871(h)*. Under *IRC Section 871*, the tax that normally is imposed on a nonresident alien having the same amount of income as A is \$60,000, or 30 percent of the dividend income of \$200,000; no tax is due on the portfolio interest.

Because A is subject to *IRC Section 877(a)(1)*, a second computation has to be made using the rates applicable to United States citizens. Assume that A is entitled to claim deductions of \$40,000 under *IRC Section 877(b)(2)*, and that A is a single taxpayer. The tax due on an unmarried United States taxpayer with net income of \$260,000 (\$300,000 of gross income less \$40,000 of allowable deductions) is \$83,732. A must pay this higher tax because it exceeds the amount computed under *IRC Section 871*.

A special source rule, contained in *IRC Section 877(d)(1)*, treats the following items of gross income as United States source income: (a) gains on the sale or exchange of property (other than stock or debt obligations) located within the United States, (b) gain on the sale or exchange of stock issued by a domestic corporation or debt obligations of United States persons or of the United States, a state or political subdivision thereof, or of the District of Columbia, and (c) income or gain derived from stock in a controlled foreign corporation (a corporation in which the expatriate owned, or is considered as owning, at any time during the two-year period ending on the date of loss of citizenship more than 50 percent of the total combined voting power or total value of the stock of the corporation) to the extent the income or gain does not exceed the earnings and profits attributable to the stock that were earned or accumulated before the loss of citizenship and during periods that the stock ownership requirements were met.

In addition to the special source rules of *IRC Section 877(d)(1)*, *IRC Section 877(d)(2)* provides that any exchange that normally would be treated as a nonrecognition exchange is transformed into a taxable transaction taking place in the year of exchange if the income derived from the property transferred was or would have been United States source

income and the income derived from the property acquired would be foreign source income; the amount realized on the transaction is the fair market value of the transferred property. However, immediate gain recognition is not required if the expatriate enters into an agreement with the Service that specifies any income or gain derived from the property acquired in the exchange (or any property that has a basis determined in whole or part by reference to that property) during the ten-year period will be treated as from United States sources.ⁿ⁴ If the property transferred in the exchange is disposed of by the transferee, the agreement will terminate and any gain that was not recognized because of the agreement must be recognized as of the date of the disposition.ⁿ⁵ Regulations may require the removal of appreciated tangible property from the United States, and any other occurrence that (without recognition of gain) results in a change in the source of income or gain from sources within the United States to foreign sources to be treated as an exchange on which gain is recognized immediately.ⁿ⁶

*Notice 97-19*ⁿ⁷ provides that *IRC Section 877(d)(2)* must be applied using a 15-year period beginning five years prior to expatriation. In addition, removal of appreciated tangible personal property with an aggregate fair market value in excess of \$250,000 must be treated as an exchange to which *IRC Section 877(d)(2)* applies. Any gain derived from removal of property with an aggregate fair market value of \$250,000 or less during the 15-year period will not be taxable under *IRC Section 877*. If an individual removes property with an aggregate fair market value in excess of \$250,000 during the 15-year period, the individual must recognize a pro rata portion of the gain attributable to the value in excess of \$250,000 unless the individual enters into a gain recognition agreement. A pro rata portion of the gain must be calculated by multiplying the total gain on the removed property by a fraction, the numerator of which is the excess of the aggregate fair market value of all removed property over \$250,000 and the denominator of which is the aggregate fair market values of all removed property. Removal of appreciated intangible property during the five-year period prior to expatriation will not be treated as an exchange if the removal occurred prior to February 6, 1995.

If an expatriate contributes property during the 10-year period beginning on the date of loss of United States citizenship to a corporation that would be a controlled foreign corporation in which the individual would be a United States shareholder if still a citizen, and income derived from the property immediately before the contribution was or would have been from sources within the United States, any income or gain from the property (or any other property that has a basis determined in whole or part by reference to the contributed property) received or accrued by the corporation is treated as received or accrued by the expatriate rather than the corporation.ⁿ⁸ The foregoing rule does not apply to the extent that the property is treated as sold by the corporation for purposes of gain recognition pursuant to the gain deferral agreement mentioned above. If stock in the corporation to which property has been contributed (or any other stock that has a basis determined in whole or part by reference to such stock) is disposed of during the ten-year period and while the contributed property is held by the corporation, a pro rata share of the property (determined on the basis of the value of the stock) is treated as sold by the corporation immediately before the disposition.ⁿ⁹

An expatriated individual, who normally would be subject to the rules of *IRC Section 877(a)(1)*, will be subject to the rules governing citizens and residents of the United States for any taxable year during the ten-year period prior to the close of the taxable year in which the individual is present in the United States for more than 30 days.ⁿ¹⁰ There are three exceptions to this physical presence rule. First, up to 30 days of physical presence in the United States in any taxable year can be disregarded if the individual is performing services in the United States on that day for an employer, unless the employer is related, or the employer fails to meet such requirements as the Service may prescribe by regulations to prevent avoidance of the physical presence rule.ⁿ¹¹ Second, the physical presence rule does not apply to an expatriated individual if (a) the individual becomes a citizen or resident of the country in which the individual, the individual's spouse, or either of the individual's parents were born, and (b) the individual becomes fully liable for income tax in that country.ⁿ¹² Third, an individual is not subject to the physical presence rule if, for each year in the ten-year period ending on the date of loss of United States citizenship or termination of residence, the individual was present in the United States for 30 days or less.ⁿ¹³ It should be noted that the general rule applies even though the individual could meet one of the exceptions for days of physical presence under *IRC Section 7701(b)*.

[3] Information Reporting Requirements

Any person who loses United States citizenship and becomes subject to *IRC Section 877* must provide a statement that contains the following information: (1) the taxpayer's taxpayer identification number, (2) the mailing address of the individual's principal foreign residence, (3) the foreign country in which the individual resides, (4) the foreign country of which the individual is a citizen, (5) information detailing the income, assets, and liabilities of the individual, (6) the number of days during any portion of which the individual was physically present in the United States during the taxable year, and (7) such other information as may be prescribed in regulations.ⁿ¹

An expatriate who fails to provide the required statement, fails to include all of the required information, or includes incorrect information is subject to a penalty for each year (of the ten-year period beginning on the date of loss of United States citizenship) during any portion of which such failure continues of \$10,000, unless the failure is due to reasonable cause and not to willful neglect.ⁿ²

The person or court to whom the statement must be furnished is required to provide the Service with a copy of the statement or the name (and other identifying information) of any individual who fails to furnish the required statement.ⁿ³ The names of individuals who lose United States citizenship and become subject to *IRC Section 877(a)* or *Section 877A* in each calendar quarter must be published in the Federal Register not later than 30 days after the close of the quarter.ⁿ⁴

FOOTNOTES:

(n1)Footnote 1. *IRC § 877(e)(2)*.

(n2)Footnote 2. *IRC § 877(a)(1), (2)*. If the loss of citizenship occurs in any calendar year after 2004, the \$124,000 amount will be increased by the cost-of-living adjustment determined under *IRC § 1(f)(3)*, using 2003 as the base year.

An individual's net income tax is the sum of the individual's regular tax liability and alternative minimum tax liability reduced by certain nonrefundable personal credits and the foreign tax credit. *IRC § 38(c)(1)*.

For purposes of the net worth test, an individual is considered to own any interest in property that would be taxable as a gift for federal gift tax purposes if the individual were a citizen or resident of the US who transferred the interest immediately before expatriation. In determining the values of interests in property for purposes of the net worth test, individuals must use the valuation principles of *IRC § 2512* and the regulations thereunder without regard to any prohibitions or restrictions on the interest. *Notice 97-19, 1997-1 CB 394*.

(n3)Footnote 3. *IRC § 877(c)(1), (2)(A)*. An individual has dual citizenship if (i) the individual was born a citizen of the US and a citizen of another country, and continues to be a citizen of the other country, and (ii) the individual has had no substantial contacts with the US. An individual is treated as having no substantial contacts with the US only if the individual was never a resident of the US (as defined in *IRC § 7701(b)*, discussed in § 20.06[1][b]), has never held a US passport, and was not present in the US for more than 30 days during any calendar year that is one of the ten calendar years preceding the individual's loss of US citizenship. *IRC § 877(c)(2)(B)*.

(n4)Footnote 4. *IRC § 877(c)(1), (3)*.

(n5)Footnote 1. In determining whether any gain from the sale or exchange of property is US source income, the running of the ten-year period is suspended for any period during which the expatriate's risk of loss with respect to the property is substantially diminished by the holding of a "put" with respect to the property (or similar property), the holding by another person of a right to acquire the property, a short sale, or any other transaction. *IRC § 877(d)(3)*.

The taxpayer is entitled to a credit for any income, war profits, and excess profits taxes paid to any foreign country or possession of the US on any income of the taxpayer on which tax is imposed solely by reason of *IRC § 877(a)*. *IRC § 877(b)*.

(n6)Footnote 2. *IRC §§ 877(b)(1), 872(a).*

(n7)Footnote 3. *IRC §§ 877(b)(2), 873(b).*

(n8)Footnote 4. Guidance on gain recognition agreements can be found in *Notice 97-19, 1997-1 CB 394* .

(n9)Footnote 5. To the extent provided in regulations, the ten-year period can be extended to a 15-year period beginning five years before the loss of US citizenship. In the case of any exchange occurring during the additional five-year period, any gain recognized under *IRC § 877(d)(2)* must be recognized immediately after the loss of citizenship. *IRC § 877(d)(2)(D).*

(n10)Footnote 6. *IRC § 877(d)(2)(E).*

(n11)Footnote 7. *1997-1 CB 394* .

(n12)Footnote 8. *IRC § 877(d)(4)(A), (B).* *Notice 97-19, 1997-11 CB 394* , has extended the ten-year period to a 15-year period beginning five years prior to expatriation. The notice also sets forth the information that must be filed by an individual making the contribution.

(n13)Footnote 9. *IRC § 877(d)(4)(C).*

(n14)Footnote 10. *IRC § 877(g)(1).*

(n15)Footnote 11. *IRC § 877(g)(2)(A).* An employer is related within the meaning of *IRC §§ 267 and 707*.

(n16)Footnote 12. *IRC § 877(g)(2)(B).*

(n17)Footnote 13. *IRC § 877(g)(2)(C).*

(n18)Footnote 1. *IRC § 6039G(a), (b).*

(n19)Footnote 2. *IRC § 6039G(c).*

(n20)Footnote 3. *IRC § 6039G(d).*

(n21)Footnote 4. *IRC § 6039G(d)* (flush language).

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.07

§ 20.07 Expatriation By US Entities

[1] Section 7874: Background and Operation

Section 7874 of the Internal Revenue Code, added in 2004, is the Congressional response to tax-motivated "corporate inversions" in which US-based multinationals remove their foreign operations from US tax jurisdiction and often lower the tax burden on their US operations as well.ⁿ¹ In a typical tax-motivated corporate inversion, the US parent of a multinational group reincorporates or otherwise relocates its legal residence from the US to a foreign country, often a tax haven with little or no connection to the group's business activities, without changing substantially either the location of the group's business activities or the owners of the parent company's stock. Prior to section 7874, corporate inversions were attractive to US-based multinationals because a multinational group with a foreign parent is not subject to US tax on income from its (or its subsidiaries') business operations outside the US, either currently or in the future. Moreover, by subsequently leveraging its US operations through intercompany debt held by related foreign entities or transferring its intangibles outside the US, the group could employ tax-reduction strategies available to other foreign based multinationals.ⁿ²

In general, *IRC Section 7874* applies to the direct or indirect acquisition by a foreign corporation of substantially all the properties of a domestic (*i.e.*, US) corporation, or substantially all the properties constituting a trade or business of a domestic partnership,ⁿ³ if, after the acquisition: (1) at least 60 percent of the stock of the foreign corporation (by vote or value) is held by (a) former shareholders of the domestic corporation "by reason of holding stock in the domestic corporation," or, (b) if the foreign corporation acquired properties from a domestic partnership, is held by former partners of that partnership "by reason of holding a capital or profits interest in the domestic partnership"),ⁿ⁴ and (2) the "expanded affiliated group" that includes the acquiring foreign corporation does not have substantial business activities in the country in which the acquiring foreign corporation is organized, compared to the total business activities of that expanded affiliated group throughout the world.ⁿ⁵

If these requirements are met, *IRC Section 7874* provides two alternative sets of tax consequences. Which set of tax consequences applies depends on the percentage of the acquiring foreign corporation owned by the domestic entity's former shareholders or partners after the inversion transaction. If former shareholders or partners of the domestic entity hold 80 percent or more of the foreign corporation's stock, the foreign corporation is thereafter treated for tax purposes as though it were a domestic corporation, wholly defeating the tax avoidance purpose of the inversion transaction.ⁿ⁶ If the domestic entity's former owners hold at least 60 percent, but less than 80 percent, of the acquiring foreign

corporation's stock, the latter's tax status as a foreign corporation will be respected (though it is now referred to as a "surrogate foreign corporation"), but the domestic entity and all of its US affiliates (each of which is now referred to as an "expatriated entity") will lose the right to use net operating losses or tax credits to offset the income from or tax on any "inversion gain."ⁿ⁷

Inversion gain includes any gain or income recognized by the expatriated entity (including its US affiliates) by reason of a transfer of stock or other property in connection with the inversion transaction or a transfer or license of property to the surrogate foreign corporation or any other foreign related person at any time within a roughly 10 year period (the "applicable period" as defined below).ⁿ⁸ Any gain or income that falls within the definition of "inversion gain" may not be offset by an expatriated entity's net operating losses, if any, nor may the tax deemed attributable to inversion gain be reduced by the expatriated entity's tax credits.ⁿ⁹ Inversion gain remains tainted in this manner throughout the "applicable period;" the period beginning on the first date properties are acquired as part of the acquisition triggering *IRC Section 7874* and ending 10 years after the last date properties are acquired as part of that acquisition.ⁿ¹⁰

[2] *Treasury Regulation Section 1.7874-1: Administrative Exceptions to Section 7874*

Congress expressly granted the Treasury broad authority to "provide such regulations as are necessary to carry out...section [7874], including regulations... necessary to prevent the avoidance of the purposes of this section..."ⁿ¹ Regulations promulgated pursuant to such authority are "legislative regulations" to which courts must accord "controlling weight unless... arbitrary, capricious, or manifestly contrary to the statute."ⁿ²

However, the principal intention of the first set of regulations to be finalized under *IRC Section 7874*, *Treas Reg 1.7874-1*, was not to prevent the avoidance of *IRC Section 7874* but to prevent the application of that section to certain transactions that might technically be covered but did not raise the tax avoidance concerns targeted by Congress.ⁿ³ Thus, *IRC Section 7874* does not apply to an "internal group restructuring," as defined in the regulations, because unlike a corporate inversion, the same corporate parent that owns the domestic entity prior to the acquisition of its properties owns the foreign corporation that acquires those properties.ⁿ⁴ Furthermore, an acquisition of substantially all the properties of a US entity in which the former owners of the domestic entity suffer a "loss of control" resembles a sale or joint venture more than a corporate inversion, and so are excluded from the operation of section 7874.ⁿ⁵ In transactions which qualify as an "internal group restructuring" or a "loss of control," the regulations override the general rule that affiliate-owned stock is not taken into account at all in calculating the post-acquisition percentage of the acquiring foreign corporation's stock held by the former owners of the acquired domestic entity.ⁿ⁶ Instead, affiliate-owned stock is included in the denominator of the ownership fraction (the total number of foreign corporation shares outstanding, post-acquisition), but *not* in the numerator (the number of those shares held by the former owners of the domestic entity).ⁿ⁷ As demonstrated in the following examples, this effectively removes internal group restructuring and loss of control transactions from the scope of *IRC Section 7874*.

Example 1:

P Corp owns all the stock of USS, a domestic corporation. P forms FS, a foreign corporation, and exchanges all of USS's stock for all 100 shares of FS's stock. The transaction literally satisfies the ownership test for a surrogate foreign corporation (see *IRC Section 7874(a)(2)(B)(ii)*) since all the stock of FS (the indirect owner of 100% of USS's properties) is owned by P Corp, the former owner of all of the stock of USS. However, the transaction also qualifies as an internal group restructuring as defined in *Treasury Regulation Section 1.7874-1(c)(2)*, since P Corp owned at least 80 percent of USS before the acquisition and owns at least 80 percent of FS after the acquisition. Applying the special rule of *Treasury Regulation Section 1.7874-1(c)(1)*, the FS stock owned by P Corp is included in the denominator but not in the numerator of the ownership fraction. The ownership fraction thus becomes 0/100 instead of 100/100, and the transaction fails the 60 percent or more ownership test.ⁿ⁸

Example 2:

P Corp owns all the stock of USS, a domestic corporation. B, a corporation unrelated to P, holds all 60 outstanding shares of FS, a foreign corporation. P transfers all the outstanding stock of USS to FS in exchange for 40 newly issued shares of FS. After the acquisition, B, FS and USS (but not P Corp, which owns less than 50 percent of FS's stock) are members of an expanded affiliated group or "EAG" that includes FS. The ownership test is literally met because P Corp, the former owner of USS, is deemed to own 100 percent of FS's stock. The 40 shares P Corp acquired in the transaction are the only shares counted because *Code Section 7874(c)(2)* requires that the remaining 60 shares of FS stock owned by B, a member of FS's EAG, be disregarded for purposes of computing the ownership test. However, P has suffered a loss of control within the meaning of *Treasury Regulation Section 1.7874-1(c)(3)* since after the acquisition P does not own directly or indirectly more than 50 percent of the stock of any member of FS's EAG. The ownership fraction under *Treasury Regulation Section 1.7874-1(c)(1)* is recalculated by including the stock owned by B, a member of the EAG, in the denominator but not the numerator of the ownership fraction. The ownership fraction therefore falls from 100 percent (40/40) to 40 percent (40/100), and the transaction is not subject to *Code Section 7874(c)(2)*.ⁿ⁹

[3] 2009 Temporary Regulations: Closing Loopholes in Section 7874

Treasury did flex its regulatory muscles in temporary regulations issued in June, 2006, which were withdrawn and reissued in modified form in June, 2009.ⁿ¹ The temporary regulations interpret the provisions of *IRC Section 7874(a)(2)(B)*, defining a "surrogate foreign corporation," with the aid of the Treasury's "legislative" authority, so as to tighten the rules in a number of significant ways.

[a] Publicly Held Foreign Partnerships Treated as Foreign Corporations.

IRC Section 7874(a)(2)(B) provides that "a foreign corporation shall be treated as a surrogate foreign corporation if..." certain tests are met. (Emphasis added.) *IRC section 7704* treats publicly traded partnerships (generally, partnerships the interests in which are either traded on an established securities market or are "readily tradable" on a secondary market) as corporations, with the exception, prescribed by *IRC section 7704(c)*, of publicly traded partnerships in which 90 percent or more of the partnership's gross income is passive-type income. Concluding that the passive income exception could open a door to avoidance of *IRC Section 7874* that was not intended by Congress, and that making publicly traded partnerships subject to *IRC Section 7874* regardless of the nature of their gross income was not inconsistent with the Congressional purpose behind the passive income exception,ⁿ² the temporary regulations provide that a publicly traded partnership that would be treated as a corporation but for *IRC Section 7704(c)* must be treated as a corporation for purposes of *IRC Section 7874*.ⁿ³ Further, in a modification of the withdrawn temporary regulations, the 2009 version provides that even if the interests in a partnership are not publicly traded when the partnership completes the acquisition of substantially all the properties of a domestic entity, the partnership will be treated as a corporation as of such time if, but for *IRC Section 7704(c)*, it would have been treated as a corporation under *IRC Section 7704* at any time thereafter, provided that its interests subsequently become publicly traded pursuant to a plan in existence at the time of the acquisition.ⁿ⁴

If the regulations deem a partnership to be a corporation under the rule stated above, the partnership is treated as a corporation organized in the foreign country in which, or under the laws of which, the partnership was created or organized, and interests in the partnership are treated as stock in the corporation.ⁿ⁵ If 80 percent or more of the partnership's post-acquisition "stock" is owned by the former owners of the acquired domestic entity, the partnership is treated as a domestic corporation regardless of its actual place of organization.ⁿ⁶ In that case, the following events are deemed to have occurred immediately before the first date that properties are acquired as part of the acquisition in question: the partnership is treated as having transferred all of its assets and liabilities to a newly formed domestic corporation in exchange solely for stock of the domestic corporation and then distributing that stock to its partners in

proportion to their partnership interests in liquidation of the partnership, with tax consequences determined under the provisions of the Internal Revenue Code and "general tax principles."ⁿ⁷

If the post-acquisition ownership of the partnership *qua* corporation by the former owners of the acquired domestic entity falls into the 60-80 percent range, which ordinarily would make it a "surrogate foreign corporation," its tax status instead reverts to a partnership; since *IRC Section 7874* prescribes no tax consequences for an entity classified as a surrogate foreign corporation, there is no longer any reason to treat it as a corporation for *IRC Section 7874* purposes.ⁿ⁸ However, the domestic entity the properties of which were acquired by the partnership becomes an "expatriated entity" (together with all related US persons) subject to the tax regime with respect to inversion gains for 10 years.ⁿ⁹ Similarly, if it is established that the partnership is not a surrogate foreign corporation because, for example, less than 60 percent of its "stock" is owned by former owners of the domestic entity, its status as a partnership under *IRC section 7704(c)* will be unaffected by *IRC Section 7874*.ⁿ¹⁰

[b] Special Rules for Applying the "Substantially All of the Properties" Test.

IRC section 7874(a)(2)(B)(i) defines a surrogate foreign corporation as a foreign corporation that, *inter alia*, "makes a direct or indirect acquisition of substantially all of the properties held directly or indirectly by a domestic corporation or substantially all of the properties constituting a trade or business of a domestic partnership." The temporary regulations give meaning to the term "indirect acquisition" in this context, and additionally prescribe a special rule to prevent taxpayers from using multiple entities to avoid meeting the "substantially all" test.

A foreign corporation makes an "indirect acquisition" of a domestic entity's properties if the domestic entity is a corporation and the foreign corporation acquires stock in that corporation.ⁿ¹¹ If less than all of the domestic corporation's stock is acquired, a proportionate amount of the corporation's properties are indirectly acquired based on the relative values of the stock acquired compared to all outstanding stock of the corporation.ⁿ¹² Similarly, the acquisition of an interest in a partnership results in an indirect acquisition of a proportionate amount of the partnership's properties based on the relative values of the interest acquired compared to all interests in the partnership.ⁿ¹³ Thus, for example, the acquisition by a foreign corporation of a 40 percent interest in a domestic partnership that owns 100 percent of a domestic corporation would constitute an indirect acquisition by the foreign corporation of both 40 percent of the stock of the domestic corporation and 40 percent of the properties held by the domestic corporation.ⁿ¹⁴

Suppose a corporation or partnership (the "acquiring entity") acquires stock or properties of a domestic entity in exchange for stock of a related foreign corporation (the "foreign issuing corporation")? The temporary regulations treat both the foreign issuing corporation, and the actual acquiring entity, as having made the acquisition, provided the foreign issuing corporation is a member of the acquiring entity's expanded affiliated group after the acquisition.ⁿ¹⁵

Note, however, that an acquisition of stock in a foreign corporation that owns stock of a domestic corporation (or an interest in a domestic partnership) does not constitute an indirect acquisition of any properties held by the domestic corporation (or the partnership) under the temporary regulations.ⁿ¹⁶ Accordingly, if a foreign corporation owns all the stock of a domestic corporation, and its (*i.e.*, the foreign corporation's) stock is acquired by a second foreign corporation, the second foreign corporation will not be considered to have thereby made an indirect acquisition of any of the underlying properties of the domestic corporation for purposes of *IRC Section 7874*.

The 2009 version of the temporary regulations includes a special rule to prevent two or more foreign corporations from directly or indirectly acquiring, in the aggregate, substantially all of the properties of a domestic entity pursuant to a single plan but arguing that *IRC Section 7874* does not apply because no single acquiring corporation obtained "substantially all" the properties of the target. In such cases, each of the acquiring corporations will be treated as completing an acquisition of substantially all the domestic entity's properties.ⁿ¹⁷

[c] Special Rules for Applying the Ownership Test.

Under *IRC section 7874(a)(2)(B)(ii)*, an acquiring foreign corporation cannot be a surrogate foreign corporation unless at least 60 percent of the stock of the acquiring foreign corporation is held, after the acquisition, by the former stockholders of the acquired domestic corporation (or the former partners of the acquired partnership), who hold their foreign corporation stock "by reason of" having held stock, or a capital or profits partnership interest, in the acquired domestic corporation or partnership. The temporary regulations address four types of problems that may arise in applying this ownership test: (1) when do former stockholders or partners acquire their foreign corporation stock "by reason of" holding stock or partnership interests in the acquired domestic entity; (2) how should holders of stock options and similar interests be treated; (3) how should the ownership test be applied if the former owners of an acquired domestic entity do not receive stock in the acquiring foreign corporation for their interests but receive other interests that are "economically equivalent" to stock; and (4) how should the ownership test be applied if the acquiring foreign corporation acquires properties from multiple domestic entities pursuant to a common plan. In addition, *Notice 2009-78*ⁿ¹⁸ announced that Treasury and the Internal Revenue Service intend to issue regulations covering a fifth problem: (5) when will stock issued by the acquiring foreign corporation in an offering related to the acquisition of the domestic entity be disregarded in applying the ownership test.

[i] The "By Reason Of" Standard.

The 2009 temporary regulations clarify that stock in the acquiring foreign corporation is received "by reason of" the stock or partnership interests held by the former stockholders or partners of the acquired domestic entity whether such stock is received "in exchange for" or "with respect to" their domestic stock or partnership interests.ⁿ¹⁹ Thus, if a foreign corporation acquires the properties of a domestic corporation by purchasing the properties directly from the domestic corporation in exchange for its stock, and the domestic corporation's shareholders acquire the foreign corporation's stock in a distribution from the domestic corporation, the shareholders are treated as having received the foreign corporation's stock "by reason of" holding stock in the domestic corporation even though their receipt resulted from a distribution with respect to their domestic corporation stock rather than in an exchange for their stock.ⁿ²⁰ A similar result obtains if the foreign corporation acquires substantially all of the properties of a domestic partnership directly from the partnership in exchange for its stock, in which case its partners are deemed to hold their proportionate shares of the foreign corporation stock by reason of holding their respective interests in the partnership.ⁿ²¹ However, as illustrated in the following example, if the former shareholders or partners of the domestic entity acquire their foreign corporation stock in exchange for both their domestic corporation stock (or partnership interest) and for other property, a proportionate part of their foreign corporation stock will not be held "by reason of" their ownership of their domestic corporation stock or partnership interests and will not count in calculating the ownership test.ⁿ²²

Example

A, an individual, owns all the stock of X and Y. X is a domestic corporation with a value of \$40x, and Y is a foreign corporation with a value of \$60x. A transfers all of the stock in both X and Y to F, a newly-formed foreign corporation, in exchange solely for all of F's stock. A's stock ownership in F does not satisfy the ownership test with respect to F's acquisition of the properties of domestic corporation X because, after the acquisition, A holds only 40 percent (40x/100x) of F's stock "by reason of" having held stock in X.ⁿ²³

[ii] Options and Similar Interests.

In granting the Treasury authority to prescribe regulations implementing the definition of a "surrogate foreign corporation," *IRC section 7874(c)(6)* specifically refers to rules prescribing the treatment of "warrants, options, contracts to acquire stock, convertible debt interests, and other similar interests as stock." The 2006 temporary regulations provided that an option or similar interest giving the holder the right to acquire stock in a domestic corporation, or to acquire a capital or profits interest in a partnership, should be treated as exercised for purposes of

determining whether the former owners of the domestic entity own 60 percent or more of the acquiring foreign corporation's stock, but only if such treatment resulted in the acquiring foreign corporation being classified as a surrogate foreign corporation.ⁿ²⁴ The 2009 temporary regulations take a somewhat different approach, and apply not only to options to acquire stock or a partnership interest in a domestic entity, but also to options to purchase stock in the acquiring foreign corporation.

An option to acquire stock in a corporation (including a "similar interest" as defined below) is treated as stock in that corporation, with a value equal to the option holder's claim on the equity of the corporation,ⁿ²⁵ not including the value of any property the holder of the option would be required to provide to the corporation if the option were exercised.ⁿ²⁶ In two situations, however, an option will not be treated as the equivalent of stock. First, an option to acquire stock in a foreign corporation will be disregarded if a principal purpose of the issuance or acquisition of the option was to avoid the foreign corporation's being classified as a surrogate foreign corporation.ⁿ²⁷ Second, any option to acquire stock (or a partnership interest) will be disregarded if the result of treating the option as stock (or a partnership interest) would be to duplicate the claim on the equity of the corporation (or partnership) of an actual stockholder (or partner).ⁿ²⁸ The above rules apply not only to options but also to interests similar to an option ("similar interests"), including, but not limited to, "a warrant, a convertible debt instrument, an instrument other than debt that is convertible into stock, a put, stock subject to risk of forfeiture, a contract to acquire or sell stock, and an exchangeable share (as well as similar partnership interests).ⁿ²⁹

Example

A, an individual, owns all the stock of D, a domestic corporation. B, an individual unrelated to A, owns all the outstanding stock of F, a foreign corporation. C, an individual unrelated to A or B, holds a warrant to acquire F stock from F for \$20x. A transfers all D's stock to F. Immediately after the transfer, the F stock which C has a right to purchase has a value of \$70x. For purposes of determining whether A holds at least 60 percent of F's stock, C is deemed to hold stock in F with a \$50x value (C's claim on the equity of F is the \$70x current value of the stock less its \$20x option price, without taking into account the \$20x to be received by F). Note, however, that if instead of holding F's warrant C holds an option to purchase issued and outstanding F stock held by B with a value of \$70x for an option price of \$20x, C's option would be disregarded for purposes of the ownership test, because taking into account the stock subject to C's option would partially duplicate F stock held by B. In these circumstances, only the F stock actually held by B is counted for purposes of calculating A's percentage interest in F.ⁿ³⁰

[iii] Economically Equivalent Interests.

Perhaps the most controversial use of the Treasury's loophole-closing authority has been its treatment of "economically equivalent interests." These are defined as interests held by the former owners of a domestic entity that are not stock in the acquiring foreign corporation (indeed are not necessarily interests in that corporation of any kind), but give the former owners "distribution rights that are substantially similar in all material respects" to the distribution rights provided by stock in the foreign corporation.ⁿ³¹ If classifying such interests as stock in the foreign corporation would cause that corporation to be a "surrogate foreign corporation," the temporary regulations provide that they will be so treated.ⁿ³² The type of transaction that concerns the Treasury is illustrated in the following example.

Example

A privately held domestic corporation, USC, intends to make an initial public offering of stock for cash. First, however, it forms FC, a foreign corporation, which issues its shares to the public in exchange for cash and then contributes the cash to a newly formed US subsidiary, S. S merges with and into USC. Pursuant to the merger agreement, FC exchanges its stock in S for new Class A stock of UST, while the shareholders of UST exchange their stock for UST's new Class B stock. The Class B stock gives former

UST shareholders the right to dividend distributions approximately equal to any dividend distributions FC makes with respect to its publicly traded stock and also permits the UST shareholders to require, under certain circumstances, that UST redeem the Class B stock at fair market value. Since FC has few assets other than its Class A shares in UST, the Class A shares and the Class B shares are of approximately equal value. The Class B stock does not, however, confer any voting rights with respect to FC. According to the Treasury, "these transactions are contrary to the policies underlying section 7874,"ⁿ³³ and if treating the Class B stock of UST as stock in FC would make FC a surrogate foreign corporation, the class B stock will be treated as stock in FC for purposes of section 7874.ⁿ³⁴

The temporary regulations also treat the claims of creditors of a domestic entity as stock (or a partnership interest) in the domestic entity if, immediately prior to the first date on which the entity's properties are acquired as part of an acquisition of substantially all its properties, the entity is in a Title 11 or similar case (as defined in *IRC section 368(a)(3)*) or its liabilities exceed the value of its assets.ⁿ³⁵ The rationale of this provision is that the creditors of an insolvent corporation succeed to the proprietary interests of its shareholders, and are so treated, for example, in determining whether a reorganization of an insolvent corporation satisfies the continuity of interest test.ⁿ³⁶

[iv] Acquisitions of Multiple Domestic Entities.

Suppose the shareholders of two domestic corporations agree to merge their businesses by having a single foreign corporation acquire the properties of both corporations in exchange for the foreign corporation's stock, and that each group of shareholders receives 50 percent of the foreign corporation's stock in connection with the reorganization. May each shareholder group argue that since neither group acquired at least 60 percent of the foreign corporation's stock, the ownership test has not been met? The temporary regulations say no: the multiple acquisitions must be treated as a single acquisition, with the domestic entities treated as a single domestic entity. The shares of stock (or partnership interests) held by former shareholders (or partners) in the domestic entities, as well as the shares of stock they receive in the foreign corporation, are aggregated for purposes of determining whether the ownership test is met.ⁿ³⁷

[v] Stock Issued in a Related Public or Private Offering.

IRC Section 7874(c)(2)(B) provides that in calculating the post-acquisition fraction of the acquiring foreign corporation's stock held by the former owners of the acquired domestic entity, shares of the foreign corporation's stock "sold in a public offering related to the acquisition" are excluded from the denominator of the fraction. In Notice 2009-78, *supra*, the Internal Revenue Service and the Treasury announced that they intend to issue regulations that will disregard any stock issued by a foreign corporation in a transaction related to the acquisition, whether issued in a public or a private offering, if the stock is issued in exchange for "nonqualified property." Nonqualified property is defined as (i) cash or cash equivalents; (ii) marketable securities (except that stock in any member of the foreign corporation's expanded affiliated group, even if a "marketable security," is not included in the definition of "nonqualified property"); and (iii) any other property acquired by the foreign corporation in a transaction with a principal purpose of avoiding the purposes of section 7874.ⁿ³⁸ Accordingly, if the acquiring foreign corporation issues its stock for cash in a transaction related to its acquisition of a domestic entity, thereby diluting the interest held by former owners of that entity from 100 percent to 79 percent, the interest of the former owners will remain at 100 percent for purposes of Section 7874 whether the offering is made to the public (in which case section 7874(c)(2)(B) will apply) or to a private investor (in which case the new regulation will apply).ⁿ³⁹

By making clear that foreign corporation stock issued for property other than "nonqualified property" will not be disregarded, even if the stock is issued in a "public offering," *Notice 2009-78* also addressed a taxpayer concern best illustrated by an example from *Notice 2009-78*.

Example

Foreign corporation FT, a publicly held foreign corporation, wishes to merge with publicly held domestic corporation DT. FT forms foreign subsidiary FA which forms foreign subsidiary FMS and US subsidiary DMS. FMS merges into FT with FT surviving the merger, and the shareholders of FT surrender their FT stock solely in exchange for FA stock. DMS then merges with and into DT with DT surviving the merger and shareholders of DT surrendering their DT stock solely in exchange for FA stock. After completion of the plan, FA is owned by the former shareholders of FT and DT and now owns those companies as its subsidiaries. Supposing that the former stockholders of FT and DT each own a 50% interest in FA after the mergers are completed, the question is whether the FA shares acquired by the former FT shareholders will be disregarded under *IRC § 7874(c)(2)(B)* for purposes of the ownership test because they were "sold in a public offering related to the acquisition of" DT. If so, DT's shareholders would be treated as the owners of 100 percent of FA's stock for purposes of the ownership test, with the consequences prescribed by *IRC Section 7874*. The new regulations would prevent this result by allowing stock sold by the acquiring foreign corporation to be taken into account for purposes of the ownership test, whether or not the stock was sold in a "public offering" (*IRC Section 7874(c)(2)(B)* notwithstanding), as long as the stock was not sold in exchange for "nonqualified property," defined to exclude stock in the acquiring foreign corporation's expanded affiliated group (whether or not such stock falls into the category of "marketable securities").ⁿ⁴⁰

[d] Rules for Applying the Substantial Business Activities Test.

The 2009 temporary regulations adopt a facts and circumstances test with no bright line rules for determining whether or not, after the acquisition, the expanded affiliated group which includes the acquiring foreign corporation (hereafter, the "EAG") is carrying on "substantial business activities" in the foreign corporation's legal domicile, as compared with the worldwide business activities of the group.ⁿ⁴¹ In this respect the approach is quite different from the 2006 version of the temporary regulations, which contained a safe harbor that assured taxpayers they could avoid *IRC Section 7874* if at least 10 percent of the EAG's employees (by headcount and compensation), assets (by value) and sales were located in the acquiring foreign corporation's legal domicile.ⁿ⁴² The safe harbor and illustrative examples in the 2006 version were dropped from the 2009 temporary regulations as well after Treasury concluded that they might protect "transactions that are inconsistent with the purposes of section 7874;" taxpayers may no longer rely on the safe harbor or the examples.ⁿ⁴³ Instead, taxpayers are left with the following limited guidance.

The following items are considered relevant in the application of the substantial business activities test: (i) the historical conduct of continuous business activities in the foreign country which is the acquiring foreign corporation's legal domicile (hereafter, the "foreign country"); (ii) whether the EAG carries on an active trade or business in the foreign country involving EAG-owned property or employees located in the foreign country, or sales within the foreign country; (iii) whether EAG officers or employees based in the foreign country perform substantial managerial activities; (iv) whether a substantial degree of ownership of the EAG is held by persons resident in the foreign country; (v) whether the business activities carried on by the EAG in the foreign country are material to the achievement of the overall business objectives of the EAG.ⁿ⁴⁴ A proportionate share of the business activities, assets, income and sales of any partnership in which the EAG holds at least a 10 percent capital and profits interest must be taken into account for purposes of applying the substantial business activities test, whether within or outside the foreign country.ⁿ⁴⁵

Business activities, as well as assets or employees, will not be considered for purposes of the substantial business activities test if they were transferred to or located in the foreign country for the purpose of avoiding *IRC Section 7874*, or if, some time after the acquisition, they are transferred out of the foreign country pursuant to a plan that existed at the time of the acquisition.ⁿ⁴⁶

FOOTNOTES:

(n1)Footnote 1. See HR Rep No 108-755, 108th Cong 2d Sess (2004) (Conference Report to Accompany H.R. 4520 ("American Jobs Creation Act of 2004"), at 567-574 (hereafter, "Conf Rep on § 7874"). The Treasury described the

problem in a 2002 white paper. See Office of Tax Policy, Dept of the Treasury, "Corporate Inversion Transactions: Tax Policy Implications," (May, 2002). (hereafter, "2002 White Paper").

(n2)Footnote 2. The Treasury's White Paper noted the "prevalent use of foreign related-party debt in inversion transactions." Treasury White Paper at 22. Treasury viewed this as evidence that the anti-earnings stripping rules in *IRC* § 163(j) need tightening, a view Treasury continues to hold. See General Explanations of the Administration's Fiscal Year 2010 Revenue Proposals (May 2009) at pp 33-34 (proposal to tighten the earnings-stripping rules applicable to all US entities defined as "expatriated entities" for purposes of *IRC* § 7874 as well as entities that would be so defined had the provisions of *IRC* § 7874 gone into effect for taxable years beginning after July 10, 1989 (instead of taxable years ending after March 4, 2003, the actual effective date of *IRC* § 7874)). See also § 19.05[1][h], n 100, *supra*.

(n3)Footnote 3. *IRC* § 7874(a)(2)(B)(i). As noted above, only inversion transactions completed after March 4, 2003 are subject to *IRC* § 7874. *Id.* Further, if more than half the properties of a domestic corporation or partnership were acquired prior to March 4, 2003, the inversion is not subject to *IRC* § 7874 even if the acquisition was not completed until after March 4. *IRC* § 7874(a)(2) (final paragraph). In determining whether a foreign corporation has acquired "substantially all" of a domestic entity's properties, all acquisitions made directly or indirectly by the corporation pursuant to a plan, or in a related series of transactions, are included. *IRC* § 7874(a)(2)(B). An acquisition will be deemed made pursuant to a plan if it occurs within a 4 year period beginning 2 years before the ownership requirements of *IRC* § 7874(a)(2)(B)(ii) (see below) are met. *IRC* § 7874(c)(3). Moreover, any transfer of the domestic entity's properties or liabilities (including by contribution or distribution) other than to the acquiring foreign corporation will be disregarded if made as part of a plan a principal purpose of which is to avoid the purposes of *IRC* § 7874. *IRC* § 7874(c)(4).

(n4)Footnote 4. *IRC* § 7874(a)(2)(B)(ii). Stock in the acquiring foreign corporation (1) held by members of the corporation's post-acquisition "expanded affiliated group" or (2) sold in a public offering related to the acquisition of the domestic entity's properties, is disregarded in determining whether the ownership test is met. *IRC* § 7874(c)(2). For the definition of "expanded affiliated group," see n 5, *infra*.

(n5)Footnote 5. *IRC* § 7874(a)(2)(B)(iii). An "expanded affiliated group," as that term is used in *IRC* § 7874, has the same meaning as "affiliated group" in *IRC* § 1504(a) except that (1) the 80 percent voting control and value test is replaced by a 50 percent voting control and value test, and (2) the requirement in *IRC* § 1504(a)(3) that deconsolidated entities may not rejoin the consolidated group less than 5 years after the deconsolidation occurs does not apply. *IRC* § 7874(c)(1).

(n6)Footnote 6. *IRC* § 7874(b). Taxation as a domestic corporation is required notwithstanding *IRC* § 7701(a)(4) (defining a domestic corporation as a corporation organized under the laws of the United States or any State), and notwithstanding "any treaty obligation of the United States heretofore or hereafter entered into..." *IRC* § 7874(f). When *IRC* § 7874(b) applies, the deemed conversion from foreign to domestic corporation is treated as a reorganization described in *IRC* § 368(a)(1)(F) that occurs immediately before the first date properties are acquired as part of the foreign corporation's acquisition of the domestic entity. *Temp Treas Reg* § 1.7874-2T(m)(1).

(n7)Footnote 7. *IRC* § 7874(a)(1). An "expatriated entity" includes the US company that transferred substantially all its properties to a surrogate foreign corporation, *IRC* § 7874(a)(2)(A)(i), and any US person related (within the meaning of *IRC* § 267(b) or *IRC* § 707(b)(1)) to such company. *IRC* § 7874 (a)(2)(A)(ii). Thus, every member of the US transferor's affiliated group is subject to the inversion gain provisions, which also apply notwithstanding any treaty obligation of the United States to the contrary. *IRC* § 7874(f), *supra*. However, no US entity is considered an "expatriated entity," and none is subject to the provisions of *IRC* § 7874 regarding "inversion gain," if the former owners of the US group end up owning 80 percent or more of the stock of the acquiring foreign corporation, in which case the acquiring foreign corporation is treated as a domestic corporation under *IRC* § 7874(b). As a technical matter, an "expatriated entity" must be owned at least in substantial part by a "surrogate foreign corporation," *IRC* § 7874(a)(2)(A), and a foreign corporation that is treated as a domestic corporation under *IRC* § 7874(b) is expressly

excluded from the definition of a "surrogate foreign corporation." *IRC § 7874(a)(3)*.

(n8)Footnote 8. *IRC § 7874(d)(2)*. Inversion gain does not include income or gain on a transfer of property that constitutes inventory in the hands of the expatriated entity, or similar property described in *IRC § 1221(a)(1)*. For purposes of computing inversion gain, property is transferred to a "foreign related person" if the transferee or licensee is a foreign person and either (1) "related" to the expatriated entity within the meaning of *IRC § 267(b)* or *707(b)(1)* or (2) under the same "common control" (within the meaning of *IRC § 482*) as the expatriated entity. *IRC § 7874(d)(3)*.

(n9)Footnote 9. See *IRC § 7874(e)(1)* and (3). "Specifically, any applicable corporate-level income or gain required to be recognized under sections 304, 311(b), 367, 1001, 1248, or any other provision with respect to the transfer of controlled foreign corporation stock or the transfer or license of other assets by a U.S. corporation as part of the inversion transaction or after such transaction to a related foreign person is taxable, without offset by any tax attributes (e.g., net operating losses or foreign tax credits)." See Conf Rep on § 7874, *supra*, at p 574.

(n10)Footnote 10. *IRC § 7874(d)(1)*. If an expatriated entity is a partnership, the disallowance of net operating losses and tax credits on inversion gain is applied at the partner level. The amount of inversion gain attributed to each partner is the sum of (i) each partner's distributive share of the partnership's inversion gain for the year plus (ii) any gain recognized for the taxable year by the partner by reason of the transfer during the applicable period of all or part of the partner's interest in the partnership to the surrogate foreign corporation. *IRC § 7874(e)(2)*.

(n11)Footnote 1. *IRC § 7874(g)*. See also *IRC § 7874(c)(6)* (express authority to issue such regulations "as may be appropriate to determine whether a corporation is a surrogate foreign corporation").

(n12)Footnote 2. See *Chevron USA, Inc v Natural Res Def Council, Inc*, 467 US 837, 843-844 (1984) ; *Beecher v Commr*, 481 F3d 717 (9th Cir 2007) .

(n13)Footnote 3. See TD 9238, 70 FR 76685 (December 28, 2005) ; TD 9399, 73 FR 29054 (May 20, 2008) .

(n14)Footnote 4. See *Treas Reg § 1.7874-1(c)(2)*. "Internal group restructuring" is defined as an acquisition of substantially all the properties of a domestic entity by a foreign corporation if the common parent of the "expanded affiliated group" of which the foreign corporation is a member (or "EAG" as it is referred to in the regulations) held directly or indirectly at least 80 percent of the stock of the domestic entity before the acquisition, and holds at least 80 percent of the stock of the foreign acquiring corporation after the acquisition. Treasury excluded internal group restructuring transactions from the scope of section 7874 because "Congress intended...to prevent the section from applying to certain transactions occurring within a group of corporations owned by the same common parent corporation before and after the transaction, such as the conversion of a wholly owned domestic subsidiary (or its assets) to a wholly owned foreign corporation, without a change in the parent corporation of the group." See TD 9238 , *supra*, 70 FR at 76686.

(n15)Footnote 5. "Loss of control" in this context means that after the acquisition, the former stockholders or partners of the transferor domestic entity do not hold, in the aggregate, directly or indirectly, more than 50 percent of the stock of the acquiring foreign corporation or members of its expanded affiliated group. See *Treas Reg § 1.7874-1(c)(3)*.

(n16)Footnote 6. Compare *IRC § 7874(c)(2)* and *Treas Reg § 1.7874-1(b)* (general rule) with *Treas Reg § 1.7874-1(c)(1)* (special rule for internal group restructurings and transactions involving a loss of control).

(n17)Footnote 7. *Treas Reg § 1.7874-1(c)(1)*, *supra*.

(n18)Footnote 8. See *Treas Reg § 1.7874-1(f)*, Ex 3. Note, however, that Treasury has announced its intention to narrow the "internal group restructuring" exception to exclude certain "divisive transactions." See TD 9453, 74 FR 27920, 27925 (June 12, 2009). The set of facts which led to this announcement involved a publicly traded US company,

USP, with a wholly owned subsidiary, S1, which in turn owned all the stock of S2. The S2 stock did not represent substantially all the properties of S1. Pursuant to a plan, S2 transferred substantially all of its properties to F1, a newly formed foreign subsidiary, in exchange for all of F1's stock, after which it distributed F1's stock to S1. At this point the internal group restructuring exception should apply, since USP, the common parent of the expanded affiliated group that includes F1, indirectly owned 100 percent of S2, the domestic entity/transferor, prior to the acquisition, and 100 percent of F1 after the acquisition. However, as part of the same plan, S1 subsequently transferred F1's stock to USP, which in turn distributed the F1 stock to its shareholders. "The IRS and the Treasury Department believe it is inappropriate for the internal restructuring exception to apply to divisive transactions such as the one described above," and intend to modify the regulations to prevent that exception from applying in these circumstances. *Id.*

(n19)Footnote 9. See *Treas Reg § 1.7874-1(f)*, Ex 7.

(n20)Footnote 1. See TD 9265, 71 FR 32437 (June 6, 2006), withdrawn and replaced by TD 9453, 74 FR 27920 (June 12, 2009). The temporary regulations issued in 2009 are scheduled to expire on June 8, 2012. *Temp Treas Reg § 1.7874-2T(p)*.

(n21)Footnote 2. "The legislative history of section 7704 indicates that the rationale for... [the passive income] exception was to preserve flow-through tax treatment where a partnership simply holds investments that the partners could have independently acquired, as opposed to business activities that would normally be conducted in corporate form and taxed at the entity level. See H.R. Rep. 100-3391 (Oct 26, 1987) (at 1966-1067), In the case of [a publicly held partnership participating in an inversion transaction]... the rationale for the exception provided by section 7704(c) does not clearly apply." TD 9265, *supra*, 71 FR at 32438.

(n22)Footnote 3. See *Temp Treas Reg § 1.7874-2T(h)(1)* and (2).

(n23)Footnote 4. *Temp Treas Reg § 1.7874-2T(h)(2)(ii)*. The 2005 regulations had a limited 2-year post-acquisition window in which the public trading of the partnership's interests could retroactively characterize the partnership as a corporation as of the time of the acquisition, although there was no requirement that such post-acquisition public trading have been contemplated by a plan in existence at the time of the acquisition. Although the 2009 regulations now provide that post-acquisition public trading of the partnership's interests for an unlimited period after the acquisition must have been part of a plan in existence on the date of acquisition, they also presume the existence of such a plan on the acquisition date if the partnership's interests are in fact publicly traded within a 2 year period. *Temp Treas Reg § 1.7874-2T(h)(2)(ii)*.

(n24)Footnote 5. *Temp Treas Reg § 1.7874-2T(h)(1)*.

(n25)Footnote 6. *Temp Treas Reg § 1.7874-2T(h)(3)*.

(n26)Footnote 7. *Temp Treas Reg § 1.7874-2T(h)(6)*.

(n27)Footnote 8. *Temp Treas Reg § 1.7874-2T(h)(4)*.

(n28)Footnote 9. *Id.*

(n29)Footnote 10. *Temp Treas Reg § 1.7874-2T(h)(5)*.

(n30)Footnote 11. *Temp Treas Reg § 1.7874-2T(c)(1)(i)*.

(n31)Footnote 12. *Temp Treas Reg § 1.7874-2T(b)(8)(i)*.

(n32)Footnote 13. *Temp Treas Reg § 1.7874-2T(c)(1)(ii)* and *1.7874-2T(b)(8)(ii)*.

(n33)Footnote 14. *Temp Treas Reg § 1.7874-2T(n)*, Ex 2.

(n34)Footnote 15. *Temp Treas Reg § 1.7874-2T(c)(iii)* and (iv). Where a partnership rather than a corporation is the acquiring entity, the test is whether the partnership would have been a member of the same affiliated group as the foreign issuing corporation if the partnership had also been a corporation.

(n35)Footnote 16. *Temp Treas Reg § 1.7874-2T(c)(2)*. "The IRS and Treasury Department believe that it was not Congress's intent for section 7874 to apply to indirect acquisitions by foreign corporations of domestic entities that were already owned by a foreign corporation before the acquisition." *TD 9265*, *supra*, 71 *FR* at 32439.

(n36)Footnote 17. *Temp Treas Reg § 1.7874-2T(d)*.

(n37)Footnote 18. 2009-40 *IRB* 452 .

(n38)Footnote 19. *Temp Treas Reg § 1.7874-2T(f)(1)*. The 2006 version of the temporary regulations had simply defined "by reason of" as meaning "in exchange for."

CHAPTER 20 Foreign Securities and Foreign Shareholders

2-20 Taxation of Securities Transactions § 20.08

§ 20.08 Foreign Currency Transactions

[1] The Functional Currency Concept

Before the Tax Reform Act of 1986, the Code did not contain any express statutory rules for determining the amount and timing of gain or loss arising from fluctuations in the value of foreign currency (exchange gain or loss). The 1986 Act adopted a functional currency concept, under which exchange gain or loss is recognized on a transaction-by-transaction basis in the case of certain transactions denominated in a currency other than a functional currency.ⁿ¹

A taxpayer's functional currency is the United States dollar, or in the case of a qualified business unit (QBU) (a separate and clearly identified unit of a trade or business of a taxpayer that maintains separate books and records),ⁿ² the currency of the economic environment in which a significant part of the QBU's activities is conducted and that is used by the QBU in keeping its books and records.ⁿ³ If (i) the activities of the QBU are conducted in dollars; (ii) the QBU has the United States, or any possession or territory of the United States where the dollar is the standard currency, as its residence; (iii) the QBU does not keep books and records in the currency of any economic environment in which a significant part of its activities are conducted; or (iv) the QBU produces income or loss that is effectively connected with the conduct of a trade or business within the United States, the functional currency of the QBU must be the dollar.ⁿ⁴

A QBU with a legacy currency as its functional currency is required to change its functional currency to the euro beginning on the first day of the first taxable year that begins on or after the day that the euro is substituted for that legacy currency (in accordance with the Treaty on European Union) and in which the QBU begins to maintain its books and records in the euro.ⁿ⁵ Notwithstanding the foregoing, a QBU with a legacy currency as its functional currency is required to change its functional currency to the euro no later than the last taxable year beginning on or before the first taxable year the legacy currency is no longer valid tender. A QBU with a nonlegacy currency as its functional currency may change its functional currency to the euro if (1) the euro is the currency of the economic environment in which a significant part of the QBU's activities are conducted; (2) after the conversion, the QBU maintains its books and records in the euro; and (3) the QBU is not required to use the dollar as its functional currency.ⁿ⁶ The change is deemed made with the consent of the Commissioner.ⁿ⁷

An affected taxpayer of a QBU that changes its functional currency to the euro is required to attach to its return for the

taxable year of change a statement that includes the following: "TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS CHANGED ITS FUNCTIONAL CURRENCY TO THE EURO PURSUANT TO *TREAS. REG. SECTION 1.985-8*."n8 An affected taxpayer is in the case where a QBU is: (1) an individual as a result of his/her activities, the individual; (2) a QBU branch of a United States corporation, the corporation; (3) a controlled foreign corporation (or a QBU branch thereof), each U.S. shareholder of the controlled foreign corporation; (4) a partnership, each partner separately; (5) a noncontrolled Section 902 corporation, each domestic shareholder; or (6) a trust or estate, the fiduciary of the trust or estate.n9

A QBU that changes its functional currency from a legacy currency to the euro must make the following adjustments:n9.1

(1) The euro basis in property and the euro amount of liabilities and other relevant items must equal the product of the legacy functional currency adjusted basis or amount of liabilities multiplied by the applicable conversion rate.

(2) Except as provided in 3 and 4, a legacy currency denominated Section 988 transaction (determined after applying the rules applicable to 988 hedging transactions, discussed in § 20.08[3]) outstanding on the last day of the taxable year immediately prior to the year of change will continue to be treated as a Section 988 transaction and the principles of *IRC Section 988* will apply.

(3) The QBU must realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to nonfunctional currency (coin or currency, and nonfunctional currency denominated demand or time deposits or similar instruments issued by a bank or other financial institution)n9.2 that is denominated in a legacy currency as if the currency were disposed of on the last day of the taxable year immediately prior to the year of change. The character and source of the gain or loss are determined under *IRC Section 988*.n9.3

(4) A QBU may elect to realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to a legacy currency denominated account receivable or payable as if the item were terminated on the last day of the taxable year ending prior to the year of change.n9.4

If a branch of the taxpayer changes its functional currency from a legacy currency to the euro for a taxable year during which the taxpayer's functional currency is other than the euro, the branch's euro equity pool must equal the product of the legacy currency amount of the equity pool multiplied by the applicable conversion rate; no adjustment to the basis pool is required.n9.5 If the change by the branch occurs for a taxable year in which the taxpayer's functional currency is the euro, the taxpayer will realize gain or loss attributable to the branch's equity pool under the principles of *IRC Section 987*, computed as if the branch terminated on the last day prior to the year of change.n9.6

If the taxpayer changes its functional currency to the euro in a taxable year during which the functional currency of a branch of the taxpayer is not the euro, the basis pool must equal the legacy currency amount of the basis pool multiplied by the applicable conversion rate; no adjustment to the equity pool is required.n9.7 If the change occurs when the functional currency of the branch is the euro, the taxpayer will realize gain or loss attributable to the branch's equity pool determined under the principles of *IRC Section 987*, computed as if the branch terminated on the last day prior to the year of change.n9.8

Additional adjustments are required when a corporation changes its functional currency to the euro. The amount of the corporation's euro currency earnings and profits and the amount of its euro paid-in capital must equal the product of the legacy currency amounts of those items multiplied by the applicable conversion rate.n9.9 The foreign income taxes and accumulated profits or deficits of a foreign corporation that were maintained in foreign currency for purposes of the

deemed-paid tax credit of *IRC Section 902* and were attributable to taxable years of the foreign corporation beginning before January 1, 1987, also must be translated into the euro at the conversion rate.^{n9.10}

For taxable years beginning after August 24, 1994, any QBU that would otherwise be required to use a hyperinflationary currency as its functional currency must use the dollar as its functional currency and compute income or loss or earnings and profits under the dollar approximate separate transactions method of accounting (DASTM) described below.ⁿ¹⁰ The currency of a country is hyperinflationary when there is cumulative inflation of at least 100 percent during the 36-month period preceding the first day of the current calendar year, determined by reference to the consumer price index of the country listed in the monthly issues of "International Financial Statistics" or a successor publication of the International Money Fund.ⁿ¹¹ The functional currency of a QBU that otherwise would be required to use a hyperinflationary currency as its functional currency and that is a branch of a foreign corporation having a non-dollar foreign functional currency that is not hyperinflationary shall be the functional currency of the foreign corporation.ⁿ¹² In addition, a foreign corporation (or its QBU branch) operating in a hyperinflationary environment is not required to use the dollar as its functional currency if that foreign corporation is not a controlled foreign corporation.ⁿ¹³

A QBU can elect to use the dollar as the functional currency if it keeps its books and records in dollars, and its functional currency, absent the dollar election, would be a hyperinflationary currency.ⁿ¹⁴ The taxpayer can also elect the dollar as its functional currency if the taxpayer uses a method of accounting that approximates a separate transactions method.ⁿ¹⁵ The election applies to the taxable year for which it is made and all subsequent years, unless revoked with the consent of the Service.

If an eligible QBU is a branch of a United States person, the dollar election is made by attaching a completed Form 8819 to the United States person's timely filed (taking extensions into account) tax return for the first taxable year for which the election is to be effective.ⁿ¹⁶ If an eligible QBU is a controlled foreign corporation, or a branch of a controlled foreign corporation, the election can be made either by the foreign corporation or by the controlling United States shareholders on behalf of the foreign corporation by (a) filing a completed Form 8819 and (b) giving written notice to all United States persons who are known to be shareholders of the foreign corporation that the dollar election will be made (the notice must also include all information required in Form 8819).ⁿ¹⁷ Failure of the controlling United States shareholders (or the foreign corporation, if the dollar election is made by the corporation) to timely file Form 8819 or give the required notice will not invalidate the dollar election, if it is established to the satisfaction of the district director that reasonable cause existed for such failure.ⁿ¹⁸ If an eligible QBU is a noncontrolled foreign corporation, or a branch of a noncontrolled foreign corporation, the dollar election must be made by the corporation or the majority domestic corporate shareholders on behalf of the corporation; the procedure and rules are the same as in the case of a controlled foreign corporation except that majority domestic corporate shareholders are substituted for controlling shareholders.ⁿ¹⁹ Any other person making a dollar election must file Form 8819 and fulfill any other notice requirement that may be required by the Service.ⁿ²⁰

If a dollar election is made for an eligible QBU (electing QBU), then the dollar will be the functional currency of any related person (regardless of when that person became related to the electing QBU) that is an eligible QBU, or any branch of the related person that is an eligible QBU.ⁿ²¹ For this purpose, the term "related person" means any person with a relationship defined in *IRC Section 267(b)* to the electing QBU (or to the United States or foreign person of which the electing QBU is a part). In determining whether two or more corporations are members of the same controlled group under *IRC Section 267(b)(3)*, a person is deemed to own stock owned directly by such person, stock owned due to the application of *IRC Section 1563(e)(1)* (stock considered owned because a person has an option to acquire the stock), and stock owned due to the application of the constructive ownership rules of *IRC Section 267(c)*. If a dollar election is made for a QBU branch of any person, each eligible QBU branch of such person must use the dollar as its functional currency.ⁿ²²

Once a dollar election is made by or on behalf of an eligible QBU, the QBU is deemed to have the dollar as its

functional currency.ⁿ²³ Each United States person that owns stock of a foreign corporation that has the dollar as its functional currency must make all of its federal income tax calculations with respect to the foreign corporation using the dollar as the corporation's functional currency (regardless of when ownership was acquired or whether the United States person received the written notice required as part of the election process).ⁿ²⁴

Under conformity requirements, if a dollar election is made for an eligible QBU, any related party of the QBU that is itself an eligible QBU, or any branch of the related party that is an eligible QBU, must use the dollar as its functional currency.^{n24.1} If a dollar election is made for a QBU branch of any person, each eligible QBU branch of the person must use the dollar as its functional currency.^{n24.2}

If an eligible QBU's functional currency changes due to a dollar election, or to the conformity requirements just mentioned, the change is deemed to be consented to by the Commissioner.^{n24.3} No adjustments under *IRC Section 481(a)* are required solely because of the change, but the QBU must make the following adjustments:^{n24.4}

(1) The QBU must recognize or otherwise take into account for all purposes of the Code the amount of any unrealized exchange gain or loss attributable to a Section 988 transaction that, after applying the rules relating to 988 hedging transactions, is denominated by reference to the new functional currency.^{n24.5} The amount of the gain or loss is determined without regard to whether any gain or loss would be realized on the transaction as a whole. The character and source of the gain are determined under *IRC Section 988*.

(2) The new dollar adjusted basis of property and the new dollar amount of liabilities and other relevant items (such as forward contracts, futures contracts, options, or similar financial instruments) must equal the product of the old functional currency basis or amounts multiplied by the new dollar/old functional currency spot exchange rate on the last day of the taxable year ending before the year of change.^{n24.6}

(3) If a QBU is a branch of a taxpayer, and both had the different functional currencies prior to the change to the dollar as the functional currency, the branch's new dollar equity pool must equal the product of the old functional currency amount of the equity pool multiplied by the spot rate; no adjustment to the basis pool is necessary.^{n24.7} If the branch and the taxpayer had the same functional currency before the change, the branch's basis pool must equal the difference between the branch's total old functional currency basis and its total old functional currency amount of its liabilities; the branch's equity pool must equal the product of the basis pool multiplied by the spot rate.^{n24.8}

Because of the conformity requirement of the dollar election, when a branch changes its functional currency to the dollar, the branch is treated as if it terminated on the last day of the taxable year ending before the year of change.^{n24.9} Because of this, the taxpayer must realize gain or loss attributable to the branch's equity pool under the principles of *IRC Section 987*.^{n24.10}

The amount of a corporation's dollar earnings and profits and the amount of its dollar paid-in capital must equal the old functional currency amounts of those items multiplied by the spot rate.^{n24.11} The foreign income taxes and accumulated profits or deficits of a foreign corporation that were maintained for purposes of the deemed-paid credit of *IRC Section 902* and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, also must be translated into the dollar at the spot rate.^{n24.12}

A United States shareholder of a controlled foreign corporation that changes its functional currency to the dollar must recognize foreign currency gain or loss computed under *IRC Section 988(c)* as if all previously taxed earnings and profits, if any, (including amounts attributable to pre-1987 taxable years that were translated from dollars into functional currency in the foreign corporation's first post-1986 taxable year) were distributed immediately prior to the change.^{n24.13} The shareholder must also recognize gain or loss attributable to the corporation's paid-in capital to the

same extent, if any, that such gain or loss would be recognized under the regulations under *IRC Section 367(b)* if the corporation were liquidated completely.^{n24.14} The full amount of the gain or loss must be included in income or earnings and profits on the last day of the taxable year ending before the year of change.^{n24.15}

Any eligible QBU that has a dollar functional currency must compute income or loss or earnings and profits (or deficit in earnings and profits) in dollars using DASTM.ⁿ²⁵ However, the QBU can use a method other than DASTM if the QBU demonstrates to the satisfaction of the Service that it can properly employ such method.ⁿ²⁶ Generally, this will require a showing that the QBU can compute foreign currency gain or loss under the principles of *IRC Section 988* with respect to each of its Section 988 transactions. If subsequently the QBU can no longer demonstrate that it can properly employ the alternative method, the QBU will be deemed to have changed its method of accounting to DASTM.

Under DASTM, income or loss or earnings and profits (or a deficit in earnings and profits) of a QBU for its taxable year is determined in dollars by first preparing an income or loss statement for the QBU using its hyperinflationary currency and then translating the amounts of hyperinflationary currency into dollars no less than monthly during the taxable year (translation period).ⁿ²⁷ The translation into dollars is made at an exchange rate determined under any reasonable method, provided that the method is consistently applied to all translation periods and conforms to the taxpayer's method of financial accounting.ⁿ²⁸ Reasonable methods include the average of beginning and ending exchange rates for the translation period and the spot rate on the last day of the translation period. Once chosen, a method for determining an exchange rate can be changed only with the consent of the district director.

A similar translation is required annually at the end of the taxable year to determine DASTM gain or loss of the QBU.ⁿ²⁹ Such gain or loss equals (i) the net worth of the QBU at the end of the taxable year minus the net worth of the QBU at the end of the preceding taxable year, plus (ii) the dollar amount of dividend distributions for the taxable year and any items that decrease net worth for the taxable year but that generally do not affect income or loss or earnings and profits (or a deficit in earnings and profits) reduced by items that increase net worth for the taxable year but that generally do not affect income or loss or earnings and profits (or a deficit in earnings and profits), minus (iii) the amount of dollar income or earnings and profits (or plus the amount of any dollar loss or deficit in earnings and profits) determined for the taxable year.ⁿ³⁰ DASTM gain or loss is treated as ordinary income or loss.ⁿ³¹

A taxpayer can elect to use a small QBU DASTM allocation for a QBU that has a translated adjusted basis in assets of \$10 million or less at the end of any taxable year.ⁿ³² In calculating the \$10 million threshold, a QBU is treated as owning all of the assets of each related QBU having its residence in the QBU's country of residence, with appropriate adjustment to eliminated double counting of assets created between related QBU's resident in the same country.ⁿ³³ In the case of a QBU branch of a United States person, the election is made by attaching a statement to the United States person's timely filed federal income tax return (including extensions) for the first year in which the election is to be effective.ⁿ³⁴ In the case of any other QBU, the election is made in the manner prescribed in *Regulations Section 1.964-1*.ⁿ³⁵ In either case, the election is deemed to have been made with the consent of the Commissioner.ⁿ³⁶

[2] Foreign Currency Translations

IRC Section 986(b) provides that, in determining the tax of any shareholder of a foreign corporation, the earnings and profits of the corporation must be determined in the corporation's functional currency.ⁿ¹ When the earnings and profits are distributed, deemed distributed, or otherwise taken into account by a United States person, they must be translated into dollars using the appropriate exchange rate.

Currency translation is also required in computing the amount of foreign income taxes deemed paid under *IRC Section 902* or *960*. Taxpayers who take foreign income taxes into account when accrued must translate the amount of those taxes into United States dollars at the average exchange rate for the taxable year to which the taxes relate.^{n1.1} This rule does not apply to any foreign income taxes paid before the beginning of the taxable year to which the taxes relate or more than two years after the close of that year, or to accrued taxes denominated in an inflationary currency.^{n1.2} If any

of the exceptions apply, the amount of the foreign taxes (and adjustments) must be translated into United States dollars using the exchange rate as of the payment date of the tax (or adjustment), while refunds are translated at the exchange rate on the date of original payment.ⁿ²

Foreign currency gain or loss with respect to distributions of previously taxed income (as described in *IRC Section 959* or *1293(c)*) attributable to movements in exchange rates between the times of the deemed and actual distributions is recognized and treated as ordinary income from the same source as the associated income inclusion.^{n2.1} The Treasury is authorized to prescribe regulations governing distributions of previously taxed earnings and profits through tiers of corporations.

Pursuant to new proposed *IRC Section 987* Regulations, the foreign exchange pool method must be used to determine the amount of Section 987 gain or loss a taxpayer must recognize in a taxable year.ⁿ³ Under the foreign exchange pool method, a balance sheet approach is used to determine gain or loss which is then recognized to the extent of the remittance portion.ⁿ⁴ The remittance portion is determined by dividing the total remittance by the total adjusted basis of *IRC Section 987* gross assets.ⁿ⁵ Exchange gain or loss on the remittance portion is treated as ordinary income or loss, sourced by using the average tax book value of assets in the year of remittance as determined under *Regulation Section 1.861-9T(g)*.ⁿ⁶

[3] Treatment of Section 988 Transactions

Pursuant to *IRC Section 988(a)(1)(A)*, "any foreign currency gain or loss attributable to a section 988 transaction shall be computed separately and treated as ordinary income or loss (as the case may be)."ⁿ¹ To the extent that regulations provide, any amount treated as ordinary income or loss will be treated as interest income or expense.ⁿ² Foreign currency gain or loss is gain or loss realized due to changes in exchange rates after the date (i) the taxpayer acquires a debt instrument or becomes the obligor under a debt instrument, or (ii) accrues any item of expense or gross income or receipts that is to be paid or received after the date on which accrued or taken into account (booking date) and before the date on which payment is made or received (payment date).ⁿ³

To be a Section 988 transaction, the transaction must be one in which the amount that the taxpayer is entitled to receive (or is required to pay) is denominated in terms of a nonfunctional currency, or is determined by reference to the value of one or more nonfunctional currencies, and must consist of: (1) the acquisition of a debt instrument or becoming the obligor under a debt instrument, (2) the accruing (or otherwise taking into account) of any item of expense or gross income or receipts that is to be paid or received after the date on which it is accrued or taken into account, (3) the entering into or acquiring of any forward contract, futures contract, option, or similar financial instrument,^{n3.1} or (4) the disposition of any nonfunctional currency.ⁿ⁴

After February 14, 2000, if a taxpayer issues, acquires, or otherwise enters into or holds a hyperinflationary debt instrument or a hyperinflationary deposit on which interest is paid or accrued that is denominated in (or determined by reference to) a nonfunctional currency of the taxpayer, the taxpayer realizes exchange gain or loss with respect to the instrument or deposit for its taxable year determined by reference to the change in exchange rates between (1) the later of the first day of the taxable year, or the date the instrument was entered into (or an amount deposited), and (2) the earlier of the last day of the taxable year, or the date the instrument (or deposit) was disposed of or otherwise terminated.^{n4.1} No gain or loss is realized by reason of factors other than movement in exchange rates.^{n4.2} Any exchange gain or loss realized under the foregoing rule is an adjustment to the functional currency principal amount of the issuer, the functional currency basis of the holder, or the functional currency amount of the deposit.^{n4.3}

After February 14, 2000, if a taxpayer acquires or enters into a hyperinflationary contract that has payments to be made or received that are denominated in (or determined by reference to) a nonfunctional currency of the taxpayer, the taxpayer realizes exchange gain or loss for its taxable year determined by reference to the change in exchange rates between (a) the later of the first day of the taxable year, or the date the contract was acquired or entered into, and (b) the

earlier of the last day of the year, or the date the contract is disposed of or otherwise terminated.^{n4.4} The foregoing rule does not apply if a qualified business unit uses DASTM or the hedging rules of *Regulations Section 1.446-4* or *1.988-5* apply.^{n4.5}

In general, foreign currency-related regulated futures contracts and nonequity options that would be marked to market under *IRC Section 1256* if held at the end of the taxable year are not treated as Section 988 transactions.ⁿ⁵ However, a taxpayer can elect to treat such regulated futures contracts and nonequity options as foreign currency gain or loss, and, thus, as ordinary in character and sourced on the basis of residence.^{n5.1} The election for any taxable year must be made on or before the first day of the taxable year, or if later, the first day during the year that the taxpayer holds such a contract or option.^{n5.2} The election cannot be made with respect to any income or loss of a partnership that has elected to be treated as a qualified fund, but, a partner in such a fund can elect to treat gain or loss from regulated futures contracts and nonequity options (other than such income or loss the partner receives by virtue of being a partner in a qualified fund) as gain or loss from Section 988 transactions.

In the case of a qualified fund, the entering into or acquisition of any forward contract, futures contract, option, or similar financial instrument that would be marked to market if held on the last day of the taxable year is not a Section 988 transaction.ⁿ⁶ A partnership can elect to be a qualified fund if (1) at all times during the taxable year (and during each year that the election is in effect), the partnership has at least 20 partners and no single partner owns more than 20 percent of the interests in the capital or profits of the partnership,ⁿ⁷ (2) the principal activity of the partnership for the taxable year (and each such preceding taxable year) consists of buying and selling options, futures, or forwards with respect to commodities, (3) at least 90 percent of the gross income of the partnership for the taxable year (and each such preceding taxable year) must be from interest, dividends, gain from the sale or disposition of capital assets held for the production of interest and dividends, and income and gains from commodities, futures, forwards, and options with respect to commodities, and (4) no more than a *de minimis* amount of the gross income of the partnership for the taxable year (and each such preceding taxable year) is derived from buying and selling commodities. The election must be made on or before the first day of the taxable year, or if later, the first day during the year on which the partnership holds one of the specified instruments.^{n7.1} The election continues to apply unless revoked with the consent of the Service.

For a qualified fund, any bank forward contract, foreign currency futures contract, or similar instrument (not otherwise a Section 1256 contract) is treated as a Section 1256 contract for the purposes of *IRC Section 1256*.^{n7.2} Therefore, if the instrument is held by the qualified fund on the last day of the taxable year, it will be marked to market--treated as sold on the last business day of the year, gain or loss taken into account for the taxable year, and proper adjustment made in the amount of any gain or loss subsequently realized to reflect gain or loss taken into account by year-end marking to market. In addition, gains and losses on instruments that become Section 1256 contracts solely because they are held by a qualified fund are treated as short-term capital gains and losses.^{n7.3}

If a partnership that elected to be treated as a qualified fund fails to meet the qualified fund definition for the current taxable year, the character of its gain or loss on its Section 1256 contracts will depend upon whether the gains and losses of the partnership for the taxable year from all such contracts result in a net gain or net loss. If the result is a gain, the gain is ordinary; if a loss, the loss is characterized under the rules that would have applied if the partnership had not ceased to be a qualified fund.ⁿ⁸ However, if the Service determines that the failure to meet the qualified fund requirements was inadvertent, the partnership takes steps within a reasonable time to meet the failed conditions, and the partnership agrees to make such adjustments (including adjustments with respect to partners) as may be required by the Service with respect to the period of inadvertent failure, the partnership will be treated as a qualified fund for the entire taxable year.

Mixed foreign currency straddles, i.e., straddles containing one or more currency positions that would normally give rise to capital gain or loss and one or more positions that would normally produce ordinary income or loss, are subject to the mixed straddle regulations prescribed under *IRC Section 1092(b)*.ⁿ⁹ The treatment of mixed straddles is discussed in § 9.02[4].

If any Section 988 transaction is part of a "988 hedging transaction," all transactions that are part of the transaction will be integrated and treated as a single transaction or otherwise treated consistently.ⁿ¹⁰ The determination of whether the hedging transaction is a Section 988 transaction is made without regard to the marked to market rules of *IRC Section 1256*, and neither those rules nor the loss deferral rules of *IRC Section 1092* will apply.

One type of 988 hedging transaction, a qualified hedging transaction, consists of a qualified debt instrument and a *Regulations Section 1.988-5* hedge.^{n10.1} In such case, the debt instrument and the hedge are integrated into a single synthetic debt instrument for income tax purposes.^{n10.2} If the qualified hedging transaction results in a synthetic functional currency denominated debt instrument, no foreign currency gain or loss will be realized.^{n10.3}

A qualifying debt instrument and a hedge are an integrated transaction if all of the following requirements are satisfied:^{n10.4}

1. All payments to be made or received under the qualifying debt instrument are fully hedged on the date the taxpayer identifies the transaction as a qualified hedging transaction such that a yield to maturity can be calculated.
2. The hedge is identified in the taxpayer's books and records on the date the hedge is entered into.^{n10.5}
3. None of the parties to the hedge are related.^{n10.6}
4. In the case of a qualified business unit with a residence outside the United States, both the qualifying debt instrument and the hedge are properly reflected on the books of the qualified business unit throughout the term of the qualified hedging transaction.
5. Both the qualifying debt instrument and the hedge are entered into by the same person.
6. With respect to a foreign person engaged in a United States trade or business that enters into a qualifying debt instrument or hedge through the trade or business, all items of income or expense associated with the debt instrument or hedge (other than the interest deduction of a foreign corporation coming within the rules of *Regulations Section 1.882-5*), would have been effectively connected with the United States trade or business throughout the term of the qualified hedging transaction had the special rules relating to qualified hedging transactions not applied.

If a taxpayer legs into an integrated transaction, that is, enters into a hedge after the date the qualifying debt instrument is entered into, then: (1) exchange gain or loss will be realized with respect to the qualifying debt instrument solely by reference to changes in exchange rates between (a) the date the instrument was acquired by the holder, or the date the obligor assumed the obligation to make payments under the instrument, and (b) the leg-in date; (2) the recognition of such gain or loss will be deferred until the date the qualifying debt instrument matures or is otherwise disposed of; and (3) the source and character of the gain or loss will be determined on the leg-in date as if the qualifying debt instrument was actually sold or otherwise terminated by the taxpayer.^{n10.7}

A taxpayer legs out of an integrated transaction if the taxpayer disposes of or otherwise terminates all or a part of the qualifying debt instrument or hedge prior to maturity of the qualified hedging transaction, or the taxpayer changes a material term of the qualifying debt instrument (such as exercising an option to change the interest rate or index, or the maturity date) or hedge (for example, changing the interest or exchange rates underlying the hedge, or the expiration date) prior to maturity of the qualified hedging transaction.^{n10.8} If a taxpayer legs out of integrated treatment, the following rules apply:

1. The transaction will be treated as a qualified hedging transaction during the time the requirements of *Regulations Section 1.988-5(a)* were satisfied.
2. If the hedge is disposed of or otherwise terminated, the qualifying debt instrument is treated as sold for its fair market value on the date the hedge is disposed of or otherwise terminated (the "leg-out date"), and any gain or loss (including gain or loss resulting from factors other than movements in exchange rates) from the identification date to the leg-out date is realized and recognized on the leg-out date. The spot rate on the leg-out date is used to determine exchange gain or loss on the debt instrument for the period beginning on the leg-out date and ending on the date the instrument matures or is disposed of or otherwise terminated. Proper adjustment to the principal amount of the debt instrument must be made to reflect any gain or loss taken into account.
3. If the qualifying debt instrument is disposed of or otherwise terminated, the hedge is treated as sold for its fair market value on the leg-out date, and any gain or loss from the identification date to the leg-out date is realized and recognized on the leg-out date. The spot rate on the leg-out date is used to determine exchange gain or loss for the period beginning on the leg-out date and ending on the date the hedge is disposed of or otherwise terminated.
4. The part of the qualified hedging transaction that has not been terminated (the remaining debt instrument in its entirety even if partially hedged, or the hedge) cannot be part of a qualified hedging transaction for any period subsequent to the leg-out date.^{n10.9}
5. If a taxpayer legs out of a qualified hedging transaction and realizes a gain with respect to the terminated instrument, then the rules in paragraphs 2 or 3, as appropriate, will not apply if during the period beginning 30 days before the leg-out date and ending 30 days after that date the taxpayer enters into a transaction that hedges at least 50 percent of the remaining currency flow with respect to the qualifying debt instrument that was part of the qualified hedging transaction (or, if appropriate, an equivalent amount under the *Regulations Section 1.988-5* hedge that was part of the qualified hedging transaction).

A hedged executory contract will also be treated as a single transaction.^{n10.10} An executory contract is an agreement entered into before the accrual date to pay nonfunctional currency (or an amount determined by reference thereto) in the future with respect to the purchase or sale of property used in the ordinary course of the taxpayer's trade or business, or the acquisition or performance of services, or the sale of inventory, in the future.^{n10.11} A contract to buy or sell stock is also an executory contract.

A hedge for this purpose is a deposit of nonfunctional currency in an account with a bank or financial institution used exclusively for deposits of nonfunctional currency used to hedge executory contracts, a forward or futures contract that reduces the risk of exchange rate fluctuations by reference to the taxpayer's functional currency with respect to nonfunctional currency payments made or received under the executory contract, or an option contract if the option's expiration date is on or before the accrual date.^{n10.12}

A hedged executory contract must meet the following requirements:^{n10.13}

1. The executory contract and the hedge are identified as a hedged executory contract in the taxpayer's records before the close of the date the hedge is entered into.^{n10.14}
2. The hedge is entered into (that is, settled or closed, or in the case of nonfunctional currency deposited with a bank or other financial institution, such currency is acquired or deposited) on or after the date the executory contract is entered into and before the accrual date.

3. The executory contract is hedged in whole or in part throughout the period beginning on the date the hedge is identified and ending on or after the accrual date.
4. None of the parties to the hedge are related.
5. In the case of a qualified business unit with a residence outside the United States, both the executory contract and the hedge are properly reflected on its books.
6. Both the executory contract and the hedge are entered into by the same person.
7. With respect to a foreign person engaged in a United States trade or business that enters into an executory contract or hedge through the trade or business, all items of income or expense associated with the executory contract or hedge would have been effectively connected with the United States trade or business throughout the term of the hedged executory contract had the special rules relating to hedged executory contracts not applied.

If a taxpayer enters into a hedged executory contract, amounts paid or received by the taxpayer under the hedge are treated as paid or received by the taxpayer under the executory contract, or any subsequent account payable or receivable, or that portion to which the hedge relates.^{n10.15} In addition, the taxpayer recognizes no exchange gain or loss on the hedge. If an executory contract, on the accrual date, becomes an account payable or receivable, the taxpayer does not recognize exchange gain or loss on the payable or receivable for the period covered by the hedge.

The effect of integrating an executory contract and a hedge that partially hedges the contract is to treat the amounts paid or received under the hedge as paid or received under the portion of the executory contract being hedged, or any subsequent account payable or receivable.^{n10.16} The income or expense of services performed or received under the executory contract, or the amount realized or basis of property sold or purchased under the executory contract, that is attributable to the portion of the executory contract that is not hedged must be translated into functional currency on the accrual date. Exchange gain or loss is realized when payment is made or received with respect to any payable or receivable arising on the accrual date with respect to the unhedged amount.

If the taxpayer disposes of (or otherwise terminates) the executory contract prior to the accrual date, the hedge is treated as sold for its fair market value on the date of disposition and any gain or loss must be realized and recognized on that date; the gain or loss is an adjustment to the amount received or expended with respect to the disposition or termination.^{n10.17} The spot rate on the date the hedge is treated as sold is used to determine subsequent exchange gain or loss on the hedge. If the hedge is disposed of prior to the accrual date, any gain or loss realized on the disposition is not recognized, but is an adjustment to the income from, or expense of, the services performed or received under the executory contract, or to the amount realized or basis of property sold or purchased under the contract. No gain or loss is recognized on a disposition of the hedge after the accrual date.^{n10.18}

IRC Sections 263(g), 1092, and 1256 generally do not apply with respect to the executory contract or hedge that comprises a hedged executory contract.^{n10.19} However, they may apply to a hedged executory contract if the transaction is part of a straddle.

If a taxpayer purchases or sells stock or securities that are traded on an established securities market, and (a) hedges all or part of the purchase or sale for any part of the period beginning on the trade date and ending on the settlement date, and (b) identifies the hedge and the underlying stock or securities as an integrated transaction, then any gain or loss on the hedge becomes an adjustment to the amount realized or the adjusted basis of the stock or securities sold or purchased (and is not taken into account as exchange gain or loss).^{n10.20} For this purpose, a hedge is a deposit of nonfunctional currency in an account with a bank or other financial institution, or a forward or futures contract, or any

combination thereof, that reduces the risk of exchange rate fluctuations for any portion of the period between the trade date and the settlement date. *IRC Sections 263(g), 1092, and 1256* do not apply with respect to stock or securities or the hedge.

The source of any amount treated as ordinary income or loss under *IRC Section 988(a)(1)(A)* is determined by reference to the residence of the taxpayer or the qualified business unit of the taxpayer on whose books the asset, liability, or item of income or expense is properly reflected.ⁿ¹¹ The following residence rules apply: (1) an individual's residence is that person's tax home; (2) the residence of a United States corporation, partnership, trust, or estates is the United States; (3) a foreign entity's residence is the foreign country; and (4) the residence of a qualified business unit is the country in which the principal place of business of the unit is located.ⁿ¹² If an individual does not have a tax home, (as so defined) the residence of the individual is the United States if the individual is a United States citizen or resident alien and a country other than the United States if the individual is not a United States citizen or resident alien. However, all swap income (income attributable to United States dollar denominated interest rate swaps where one party is a taxpayer with the United States dollar as its functional currency) attributable to a United States trade or business must be sourced in the United States and effectively connected to the United States trade or business.ⁿ¹³

Regulations provide that the noncontingent bond method of *Regulation Section 1.1275-4(b)* should apply to contingent payment debt instruments in which one or more payments are denominated in a currency other than the taxpayer's functional currency.ⁿ¹⁴ The regulations are applicable to the following instruments: (1) debt instruments issued for money or publicly-traded property for which all payments of principal and interest are denominated in, or determined by reference to, a single nonfunctional currency and that have one or more non-currency contingencies; (2) debt instruments issued for money or publicly-traded property for which payments of principal or interest are denominated in, or determined by reference to, more than one currency and that have no non-currency contingencies; (3) debt instruments issued for money or publicly-traded property for which payments of principal or interest are denominated in, or determined by reference to, more than one currency and that also have one or more non-currency contingencies; and (4) debt instruments that otherwise would fall into one of the three described categories but for the fact that the instruments are not issued for money or publicly-traded property.ⁿ¹⁵

The rules generally do not apply to an instrument under which any payment is determined by reference to a hyperinflationary currency.ⁿ¹⁶ In such case, the amount, timing, source, and character of interest, principal, foreign currency gain or loss, and gain or loss relating to a non-currency contingency must be determined under the method that reflects the instrument's economic substance.ⁿ¹⁷

The regulations generally provide that the noncontingent bond method is applied in the currency in which the instrument is denominated (the denomination currency).ⁿ¹⁸ This generally requires taxpayers (a) to accrue interest in the denomination currency at a yield at which the issuer would issue a fixed rate debt instrument denominated in the denomination currency with terms and conditions similar to those of the contingent payment debt instrument, (b) to translate the interest accrued from the denomination currency into the functional currency (and account for foreign currency gain or loss on payments of interest and principal) under the principles of *Regulation Section 1.988-2(b)*, and (c) to account for gain or loss arising from contingencies in a manner consistent with the rules of *Regulation Section 1.1275-4(b)*.ⁿ¹⁹

The holder of the debt instrument normally will use the yield and projected payment schedule determined by the issuer to determine the holder's interest accruals and adjustments for the instrument.ⁿ²⁰ If the issuer does not determine a comparable yield and projected payment schedule for the instrument, or if the issuer's comparable yield or projected payment schedule is unreasonable, the holder must do so and explicitly disclose both this fact and the reason why the holder made its own determination.

The regulations provide further that the holder maintains its adjusted basis in functional currency by computing basis adjustments in the denomination currency and then translating the adjustments into functional currency.ⁿ²¹ This means

that the holder's basis is increased by the holder's accrued but unpaid interest inclusions on the debt instrument, generally without regard to any positive or negative adjustment, and decreased by the amount of any noncontingent payment and the projected amount of any contingent payment previously made on the debt instrument; all of these amounts are translated into functional currency.ⁿ²²

The holder of the debt instrument uses the denomination currency in determining the amount realized on the retirement or disposition of the instrument.ⁿ²³ If the payment is received on the scheduled retirement of the debt instrument, the holder generally is treated as receiving the projected amount of any contingent payment due at maturity. In the case of a sale or exchange or unscheduled retirement of the instrument, general recognition principles apply. However, the amount realized by a holder in any case is reduced by any negative adjustment carryforward existing in the year of sale, exchange, or retirement.

In calculating gain or loss other than foreign currency gain or loss, the amount realized must be translated into functional currency.ⁿ²⁴ Foreign currency gain or loss is recognized only when payments are made or received pursuant to the instrument.ⁿ²⁵ No foreign currency gain or loss is recognized with respect to a net positive or negative adjustment.

The noncontingent bond method does not apply to nonfunctional currency contingent debt instruments. Instead, the debt instrument is separated into its components based on the currency in which the payments are denominated and whether the payments are contingent or noncontingent.ⁿ²⁶ The noncontingent components in each currency are treated as a separate debt instrument denominated in the currency in which the payments are denominated. A component consisting of a contingent payment is generally treated in the manner provided in *Regulation Section 1.1275-4(c)(4)*.ⁿ²⁷

If a subsequent holder of the instrument purchases the instrument for a price greater or less than its adjusted issue price, the holder is required to allocate the excess to interest accrued on the instrument or to projected payments on the instrument in a reasonable manner.ⁿ²⁸ If the purchase price is greater than the adjusted issue price, each allocation is treated as a negative adjustment on the instrument, and the holder's basis on the instrument is decreased as the negative adjustments are taken into account. If the purchase price is less than the adjusted issue price, the holder is treated as having received a positive adjustment on the instrument and the holder's basis is increased accordingly.

FOOTNOTES:

(n1)Footnote 1. *IRC § 985(a)*. The conversion to the euro of legacy currencies (the national currency of a participating member state of the European Union prior to substitution of the euro for the national currency) is not an exchange of property for other property differing materially in kind or extent. Therefore, no gain or loss is recognized on the conversion. *Treas Reg § 1.1001-5(a)*.

(n2)Footnote 2. *IRC § 989(a)*. The determination as to whether activities constitute a trade or business is ultimately based upon an examination of all the facts and circumstances. Generally, a trade or business for this purpose is a specific unified group of activities carried on for profit, the expenses of which are deductible under *IRC § 162* or *IRC § 212(1)* or (2). The group of activities must ordinarily include every operation that forms a part of, or a step in, a process by which an enterprise may earn income or profit, including the collection of income and payment of expenses. *Treas Reg § 1.989(a)-1(c)*.

Any activity (wherever conducted and regardless of its frequency) that produces income or loss that is, or is treated as, effectively connected with the conduct of a US trade or business is treated as a separate QBU if the separate books and records requirement is satisfied. *Treas Reg § 1.989(a)-1(b)(3)*.

A complete and separate set of books and records must include books of original entry and ledger accounts, both general and subsidiary, or similar records. *Treas Reg § 1.989(a)-1(d)*. For purposes of *Treas Reg § 1.989(a)-1(b)(3)*, books and records include those used to determine income or loss that is, or is treated as, effectively connected with a

US trade or business. *Treas Reg § 1.989(a)-1(d)(2)*.

The Service will not ordinarily rule whether a unit or a taxpayer's trade or business is a QBU, or whether a currency is the functional currency of a QBU. Rev Proc 2007-7, 2007-1 CB 227 .

(n3)Footnote 3. *IRC § 985(b)(1)*. The economic environment in which a significant part of the activities of a QBU are conducted is determined by taking into account all the facts and circumstances, including (but not limited to): (i) the currency of the country in which the unit is a resident; (ii) the principal currency of the unit's cash flows; (iii) the principal currency in which the unit generates revenues and incurs expenses; (iv) the principal currency in which the borrowing or lending of the unit is conducted; (v) the currency of the unit's principal sales market; (vi) the duration of the unit's business operations; and (vii) the significance and/or volume of the unit's independent activities. The rate of inflation is not a factor to be used in determining the unit's economic environment. *Treas Reg § 1.985-1(c)(2)*.

The taxpayers, in *Quijano v US*, 93 F3d 26 (1st Cir 1996) , *cert denied* 117 S Ct 690 , sought to claim a currency loss incurred on the repayment of a mortgage on a personal residence. The court held that the taxpayers could not use a functional currency other than the US dollar because the property did not qualify as a QBU.

The Service will not ordinarily issue a ruling whether a currency is the functional currency of a QBU. Rev Proc 2007-7, 2007-1 CB 227 .

(n4)Footnote 4. *IRC § 985(b)(2)*; *Treas Reg § 1.985-1(b)(1)*. The dollar must be the functional currency of a taxpayer that is not a QBU (eg, an individual).

(n5)Footnote 5. *Treas Reg § 1.985-8(b)(2)*. A legacy currency is the former currency of a member state of the European Union for which the euro is substituted. *Treas Reg § 1.985-8(a)(1)*.

A QBU whose first taxable year begins after the euro has been substituted for a legacy currency cannot adopt a legacy currency as its functional currency. *Treas Reg § 1.985-8(b)(1)*.

(n6)Footnote 6. *Treas Reg § 1.985-8(b)(3)*. The change must be made within the same period as is required for a QBU with a legacy currency as its functional currency.

A QBU changing its functional currency from a nonlegacy currency to the euro must make the adjustments specified in *Treas Reg § 1.985-5*. *Treas Reg § 1.985-8(b)(4)*.

(n7)Footnote 7. *Treas Reg § 1.985-8(b)(4)*.

(n8)Footnote 8. *Treas Reg § 1.985-8(b)(5)*.

(n9)Footnote 9. *Treas Reg § 1.985-8(c)(2)*. The conversion rate is the rate at which the euro is substituted for the legacy currency. *Treas Reg § 1.985-8(a)(2)*.

(n10)Footnote 9.1. *Treas Reg § 1.985-8(c)(2), (3)*.

(n11)Footnote 9.2. *IRC § 988(c)(1)(C)(ii)*.

(n12)Footnote 9.3. New proposed regulations plan to modify *IRC § 988* sourcing regulations. Under the proposed regulations, generally effective a year after becoming final, certain transactions described in *IRC §§ 988(c)(1)(A)(i)* and *(ii)* and *988(c)(1)(C)* that are denominated in the owner's functional currency and that are attributable to a QBU under *Treas Reg § 1.987-2(b)* shall not be treated as *IRC § 988* transactions, thus no currency gain or loss shall be recognized under *IRC § 988* with respect to such items. *Prop Treas Reg § 1.987-3(e)(2)*.

(n13)Footnote 9.4. The election is made by attaching a statement to the return for the taxable year immediately prior to the year of change. The statement must contain the following: "TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS ELECTED TO REALIZE CURRENCY GAIN OR LOSS ON LEGACY CURRENCY DENOMINATED ACCOUNTS RECEIVABLE AND PAYABLE UPON CHANGE OF FUNCTIONAL CURRENCY TO THE EURO." *Treas Reg § 1.985-8(c)(3)(iv)(B)*.

(n14)Footnote 9.5. *Treas Reg § 1.985-8(c)(4)(i)*.

(n15)Footnote 9.6. *Treas Reg § 1.985-8(c)(4)(ii)*. The adjustment is taken into account by the taxpayer ratably over four taxable years beginning with the taxable year of change.

The principles of *IRC § 987* are discussed in § 20.09[2].

(n16)Footnote 9.7. *Treas Reg § 1.985-8(c)(5)(i)*.

(n17)Footnote 9.8. *Treas Reg § 1.985-8(c)(5)(ii)*.

(n18)Footnote 9.9. *Treas Reg § 1.985-8(c)(6)*.

(n19)Footnote 9.10. *Id.*

(n20)Footnote 10. *Treas Reg § 1.985-1(b)(2)(ii)(A)*. If a QBU is required to change its functional currency to the dollar, the change is considered made with the consent of the Commissioner. *Treas Reg § 1.985-1(b)(2)(C)*. Adjustments required to be made by reason of the change to DATSM are specified in *Treas Reg § 1.985-7*.

A QBU that has been required to use the dollar as its functional currency must change its functional currency as of the first day of the first taxable year that follows three consecutive taxable years in which the currency of its economic environment is not a hyperinflationary currency. *Treas Reg § 1.985-1(b)(2)(E)*.

(n21)Footnote 11. *Treas Reg § 1.985-1(b)(2)(ii)(D)*. The cumulative inflationary rate for the 36-month period is based on compounded inflation rates. Thus, if the current calendar year is 1996 and for 1993, 1994, and 1995, a country's annual inflation rates are 30%, 30%, and 35%, respectively, the cumulative inflation rate is 128 percent $(((1.30 \times 1.30 \times 1.35) - 1.00) \times 100 = 128\%)$ and the currency of the country for the qualified business unit's 1996 year is hyperinflationary.

If a country's currency is not listed in the monthly issues of "International Financial Statistics," a QBU may use any other reasonable method consistently applied for determining the country's consumer price index.

(n22)Footnote 12. *Treas Reg § 1.985-1(b)(2)(ii)(B)(1)*. In such case, the QBU's income or loss or earnings and profits are determined under the DASTM by substituting the functional currency of the foreign corporation for the dollar.

(n23)Footnote 13. *Treas Reg § 1.985-1(b)(2)(ii)(B)(2)*.

(n24)Footnote 14. *IRC § 985(b)(3)*; *Treas Reg § 1.985-2*. A QBU that could have used a hyperinflationary currency as its functional currency absent the dollar election is called an eligible QBU in the regulations. *Treas Reg § 1.985-2(b)(1)*.

A noncontrolled *IRC § 902* corporation (a foreign corporation in which at least 10 percent of the voting stock is owned by a domestic corporation) can elect to use the dollar as its (or its QBU branch's) functional currency under the procedures set forth in *Treas Reg § 1.985-2(c)(3)*. *Treas Reg § 1.985-1(b)(2)(ii)(B)(2)*.

(n25)Footnote 15. *IRC § 985(b)(3); Treas Reg § 1.985-3.*

(n26)Footnote 16. *Treas Reg § 1.985-2(c)(1)(i).*

(n27)Footnote 17. *Treas Reg § 1.985-2(c)(2)(i), (ii).* The controlling US shareholders are those US shareholders who, in the aggregate, own greater than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote. If the foreign corporation is a controlled foreign corporation, but the US shareholders do not, in the aggregate, own the requisite voting power, the controlling US shareholders are all the US shareholders who own stock of the controlled foreign corporation.

Stock ownership is determined by applying *IRC § 958(a)*, the ownership rules applicable to controlled foreign corporations.

(n28)Footnote 18. *Treas Reg § 1.985-2(c)(2)(iii).*

(n29)Footnote 19. *Treas Reg § 1.985-2(c)(3)(i).* Majority domestic corporate shareholders are those domestic corporate shareholders who, in the aggregate, own greater than 50 percent of the total combined voting stock of all classes of stock of the noncontrolled foreign corporation entitled to vote that is owned by all the domestic corporate shareholders.

(n35)Footnote 24.1. *Treas Reg § 1.985-2(d)(3)(i).* A related person means any person with a relationship defined in *IRC § 267(b)* to the electing QBU (or to the US or foreign person of which the electing QBU is a part). In determining whether two or more corporations are members of the same controlled group under *IRC § 267(b)(3)*, a person is deemed to own stock owned directly by that person, stock owned with the application of *IRC § 1563(e)(1)*, and stock owned with the application of *IRC § 267(c)*.

(n36)Footnote 24.2. *Treas Reg § 1.985-2(d)(3)(ii).*

(n37)Footnote 24.3. *Treas Reg § 1.985-2(d)(4).*

(n38)Footnote 24.4. *Id; Treas Reg § 1.985-5.* The adjustments are made on the last day of the taxable year ending before the year of change. *Treas Reg § 1.985-5(a).*

(n39)Footnote 24.5. *Treas Reg § 1.985-5(b).* The full amount of the gain or loss must be included in income or earnings and profits on the last day of the taxable year ending before the year of change. *Treas Reg § 1.985-5(a).*

Section 988 transactions are the subject of § 20.09[3].

(n40)Footnote 24.6. *Treas Reg § 1.985-5(c).*

(n41)Footnote 24.7. *Treas Reg § 1.985-5(d)(1)(ii).* Proposed regulations provide that if the QBU and the owner had different functional currencies prior to the change, the owner and the QBU must make adjustments to both historic and marked items. These adjustments must be made pursuant to the principles set forth in the newly proposed section

987 regulations. *Prop Treas Reg § 1.985-5(d)(1)(ii)*.

(n42)Footnote 24.8. *Treas Reg § 1.985-5(d)(1)(iii)*. Under the proposed regulations, both the QBU and the taxpayer are subject to the rules prescribed in *IRC § 987* if the QBU, having the same functional currency as the taxpayer, changes to a new functional currency different from the taxpayer and, as a result of the change, the taxpayer will be an owner of a QBU. *Prop Treas Reg § 1.985-5(d)(1)(iii)*.

(n43)Footnote 24.9. *Treas Reg § 1.985-5(d)(2)*.

(n44)Footnote 24.10. The full amount of the gain or loss must be included in income or earnings and profits on the last day of the taxable year ending prior to the year of change. *Treas Reg § 1.985-5(a)*.

(n45)Footnote 24.11. *Treas Reg § 1.985-5(e)(1)*.

(n46)Footnote 24.12. *Id.*

(n47)Footnote 24.13. *Treas Reg § 1.985-5(e)(2)*.

(n48)Footnote 24.14. *Id.*

(n49)Footnote 24.15. *Treas Reg § 1.985-5(a)*.

(n50)Footnote 25. *Treas Reg § 1.985-2(d)(2)(i)*.

(n51)Footnote 26. *Treas Reg § 1.985-2(d)(2)(ii)*.

(n52)Footnote 27. *Treas Reg §§ 1.985-3(b), 1.985-3(c)(1), (7)*. A taxpayer can divide its taxable year into translation periods of equal length (with not more than one short period annually) that are less than one month. Once such a translation period is established, it cannot be changed without the consent of the district director.

(n53)Footnote 28. *Treas Reg § 1.985-3(c)(6)*.

(n54)Footnote 29. *Treas Reg § 1.985-3(d)*. The method of translation is set forth in *Treas Reg § 1.985-3(d)(5)*.

(n55)Footnote 30. *Treas Reg § 1.985-3(d)(3), (4)*. Net worth of a QBU at the end of any taxable year equals the aggregate dollar amount representing assets on the QBU's balance sheet at the end of the taxable year less the aggregate dollar amount representing liabilities on the balance sheet. The Service may adjust the amount of any asset or liability if a purpose for acquiring or disposing of the asset, or incurring or discharging the liability, is to manipulate the balance sheet in order to avoid tax. *Treas Reg § 1.985-3(d)(2)*.

If the item giving rise to the adjustment would be translated under *Treas Reg § 1.985-3(d)(5)* at the exchange rate for the last translation period of the year if it were on the QBU's year-end balance sheet, for purposes of *Treas Reg § 1.985-3(d)(3)* the item must be translated at the exchange rate on the date the item is transferred. If the item giving rise to the adjustment would be translated at the exchange rate for the translation period in which the cost of the item were incurred if it were on the QBU's year-end balance sheet, the item must be translated at the same historical rate. The rule is effective for any transfer, dividend, or distribution that is a return of capital that is made after March 8, 2005, and that gives rise to an adjustment under *Treas Reg § 1.985-3(d)(3)*.

(n56)Footnote 31. *Treas Reg § 1.985-3(d)(8)*.

(n57)Footnote 32. *Treas Reg § 1.985-3(e)(2)(i)*. If a taxpayer makes the election, DASTM gain or loss of a small QBU is allocated ratably to all items of the QBU's gross income (determined prior to the adjustment for DASTM gain or loss). *Treas Reg § 1.985-3(e)(2)(iv)*. In the case of a controlled foreign corporation, DASTM gain or loss is allocated

to Subpart F income in a separate category in the same ratio that gross Subpart F income in that category for the taxable year bears to its total gross income in that category for the taxable year.

(n58)Footnote 33. *Treas Reg § 1.985-3(e)(2)(i)*. A related person is any person with a relationship to the QBU (or to the US or foreign person of which the electing QBU is a part) that is defined in *IRC § 267(b)* or *707(b)*. *Treas Reg § 1.985-3(e)(2)(vi)*.

If an election of the small QBU DASTM allocation is made, each QBU of any related person that satisfies the \$10 million threshold requirement is deemed to have made the election as well. *Treas Reg § 1.985-3(e)(2)(v)*.

(n59)Footnote 34. *Treas Reg § 1.985-3(e)(2)(iii)(A)*. The statement must identify the QBU (or QBU's) for which the election is being made and the country of residence, state the adjusted basis of the assets of the QBU (and any related same-country QBU), and include a statement that the election is being made pursuant to *Treas Reg § 1.985-3(e)(2)*.

(n60)Footnote 35. *Treas Reg § 1.985-3(e)(2)(iii)(B)*.

(n61)Footnote 36. *Treas Reg § 1.985-3(e)(2)(ii)*. There is also deemed consent to any application of the DASTM procedure prescribed in *Treas Reg § 1.985-3(e)(3)* due to an increase in the adjusted basis of the QBU's assets.

(n62)Footnote 1. The amount of a distribution from a foreign corporation to a domestic shareholder also is determined in the foreign corporation's functional currency. *TAM 200143001*.

(n63)Footnote 1.1. *IRC § 986(a)(1)(A)*. The taxpayer can elect that the provision not apply to any foreign taxes if the liability for the taxes is denominated in a currency other than the taxpayer's functional currency. Regulations may prescribe that the election can apply to foreign income taxes attributable to a qualified business unit. *IRC § 986(a)(1)(D)*.

(n64)Footnote 1.2. *IRC § 986(a)(1)(B), (C)*. None of the translation rules apply to a regulated investment company that accounts for income on an accrual basis; any foreign income taxes paid or accrued by it on such income must be translated into dollars using the exchange rate as of the date the income accrues. *IRC § 986(a)(1)(D)*.

(n65)Footnote 2. *IRC § 986(a)(2)*. To the extent provided in regulations, the average exchange rate for the period (specified in the regulations) during which the tax or adjustment is paid may be used instead of the exchange rate as of the date of payment. *IRC § 986(a)(3)*. Cash basis taxpayers always use the exchange rate as of the date the tax is paid.

(n66)Footnote 2.1. *IRC § 986(c)*.

(n67)Footnote 3. Congress has withdrawn the 1991 proposed regulations and has provided new proposed regulations designed to more accurately facilitate the recognition of true economic foreign currency gain and loss while minimizing the recognition of non-economic foreign currency gain and loss. The new proposed regulations do not apply to financial institutions, S corporations, trusts or estates. *Prop Treas Reg § 1.987-1(b)(iii)*.

Rules contained in both *Prop Treas Reg § 1.987-4* and *Prop Treas Reg § 1.987-5* form the foreign exchange pool method.

(n68)Footnote 4. *Prop Treas Reg § 1.987-4(e)*. Under the balance sheet approach, the bases of *IRC § 987* marked items are translated into the owner's functional currency at the spot rate on the last day of the taxable year. *IRC § 987* historic items are translated into the owner's functional currency at the historic exchange rate.

(n69)Footnote 5. The total remittance, determined in the owner's function currency on the last day of the owner's taxable year, must equal the excess of the total amounts transferred from the QBU to the owner over the total amounts transferred from the owner to the QBU on an annual basis. *Prop Treas Reg § 1.987-5(c)*.

(n70)Footnote 6. *IRC § 987(3)(B)* requires a taxpayer to source exchange gain or loss by reference to the source of income giving rise to post-1986 accumulated earnings. To avoid the complexities of this sourcing rule, the average book value of assets under *Treas Reg § 1.861-9T(g)* is now used as a proxy for post-1986 accumulated earnings in the context of *IRC § 987*. *Prop Treas Reg § 1.987-6(b)(2)*.

(n71)Footnote 1. A taxpayer can elect to treat any foreign currency gain or loss attributable to a forward contract, futures contract, or option that (1) is not marked to market, (2) is a capital asset in the hands of the taxpayer, and (3) is not part of a straddle, as capital gain or loss if the taxpayer makes the election and identifies the transaction as such before the close of the day the transaction is entered into (or such earlier time as the Service may prescribe). *IRC § 988(a)(1)(B)*.

IRC § 988 does not apply to any Section 988 transaction entered into by an individual that is a personal transaction. *IRC § 988(e)(1)*. Under *IRC § 988(e)(2)*, no gain is recognized on the disposition of nonfunctional currency in a personal transaction to the extent that the gain does not exceed \$200. A personal transaction does not include any transaction to the extent that expenses properly allocable to the transaction are deductible under *IRC § 162* (other than traveling expenses) or *IRC § 212(1)* or (2). *IRC § 988(e)(3)*.

(n72)Footnote 2. *IRC § 988(a)(2)*.

(n73)Footnote 3. *IRC § 988(b), (c)(2), (3)*.

(n74)Footnote 3.1. A similar financial instrument includes a notional principal contract only if the payments required to be made or received under the contract are determined with reference to a nonfunctional currency. *Treas Reg § 1.988-1(a)(2)(iii)(B)(1)*. The term includes a currency swap, but does not include a swap referenced to a commodity or equity index. *Treas Reg § 1.988-1(a)(2)(iii)(B)(2)*. The treatment of foreign currency swaps is discussed in § 9A.07.

(n75)Footnote 4. *IRC § 988(c)(1)*. Nonfunctional currency includes coin or currency, and nonfunctional currency denominated demand or time deposits or similar instruments issued by a bank or other financial institution. *IRC § 988(c)(1)(C)(ii)*. Gain or loss from the disposition of nonfunctional currency is treated as foreign currency gain or loss. *IRC § 988(c)(1)(C)(i)(II)*.

Although there may be a conversion of a legacy currency to the euro, Section 988 transactions will continue to be treated as nonfunctional currency transactions, even though the remaining payments on an asset or liability will be made in a new functional currency, the euro. *Treas Reg 1.985-8(c)(3)*.

The accrual of a foreign tax liability is treated as a Section 988 transaction, except for a QBU of a domestic person that uses the US dollar as its functional currency and claims a tax credit for foreign taxes paid. *Treas Reg § 1.988-1(a)(2)(ii)*.

A payment as a mere guarantor does not qualify as an *IRC Section 988* transaction. *Intergraph Corp v Commr*, 106 TC 312 (1996), *affd in an unpublished opinion* (11th Cir 1997).

(n76)Footnote 4.1. *Treas Reg § 1.988-2(b)(15)(i)*. The provision does not apply to a debt instrument that has interest and principal payments that are to be made by reference to a currency or item that does not reflect hyperinflationary conditions in a country. *Treas Reg § 1.988-2(b)(15)(iii)*.

A hyperinflationary debt instrument is one that provides for (i) payments denominated in or determined by reference to a hyperinflationary currency at the time the taxpayer enters into or acquires the instrument, or (ii) payments denominated in or determined by reference to a hyperinflationary currency during the taxable year, and the terms of the instrument provide for the adjustment of principal or interest payments in a manner that reflects hyperinflation. *Treas Reg § 1.988-2(b)(15)(vi)*. A hyperinflationary deposit is a demand or time deposit or similar instrument issued by a bank

or other financial institution that provides for the same type of payments. *Treas Reg § 1.988-2(b)(15)(vii)*.

(n77)Footnote 4.2. *Treas Reg § 1.988-2(b)(15)(ii)*.

(n78)Footnote 4.3. *Treas Reg § 1.988-2(b)(15)(v)*.

(n79)Footnote 4.4. *Treas Reg § 1.988-2(d)(5)(i)*. Proper adjustments must be made in the amount of any gain subsequently realized for gain or loss taken into account under *Treas Reg § 1.988-2(d)(5)(i)*.

A hyperinflationary contract is one that provides for payments denominated in or determined by reference to a currency that is hyperinflationary at the time the taxpayer acquires or otherwise enters into the contract. *Treas Reg § 1.988-2(d)(5)(ii)*.

(n80)Footnote 4.5. *Treas Reg § 1.988-2(d)(5)(iii)*.

(n81)Footnote 5. *IRC § 988(c)(1)(D)*; *Treas Reg § 1.988-1(a)(7)*. The taxpayer can elect to have such transactions treated as Section 988 transactions.

(n82)Footnote 5.1. *Treas Reg § 1.988-1(a)(7)(ii)*.

(n83)Footnote 5.2. *Treas Reg § 1.988-1(a)(7)(iv)*. The procedure for making the election is set forth in *Treas Reg § 1.988-7(a)(iii)*.

(n84)Footnote 6. *IRC § 988(c)(1)(E)*.

(n85)Footnote 7. In the case of a partnership engaged in trading commodities futures, forwards, and options on Oct 22, 1988, or with respect to which a registration statement indicating that the partnership was to be principally engaged in such trading was filed with the SEC on or before Oct 18, 1988, a partner can own up to the lesser of 33 1/3 percent of capital or profits interest in the partnership, or the lowest percentage previously owned by that partner after Oct 20, 1988. *Treas Reg § 1.988-1(a)(8)(viii)*

The 20-percent ownership limitation does not apply to an interest of a general partner if neither that partner, nor any person whose taxable income is combined with the partner's taxable income in a consolidated return, has ordinary income or loss that is foreign currency gain or loss. The limitation does not apply as well to any partner whose share of the partnership's income and loss is not subject to federal income taxation. *IRC § 988(c)(1)(E)(v)(II), (III)*.

In computing a partner's interest in profits, income allocable to a general partner as incentive compensation and not deductible by the partnership is disregarded. *IRC § 988(c)(1)(E)(v)(II)*

(n86)Footnote 7.1. The procedure for making the election is set forth in *Treas Reg § 1.988-1(a)(8)(iv)*.

(n87)Footnote 7.2. *IRC § 988(c)(1)(E)(iv)(I)*.

(n88)Footnote 7.3. *IRC § 988(c)(1)(E)(iv)(II)*.

(n89)Footnote 8. HR Rep No 1104, 100th Cong, 2d Sess 193 (1988).

(n90)Footnote 9. HR Rep No 1104, 100th Cong, 2d Sess 193-194 (1988).

(n91)Footnote 10. *IRC § 988(d)(1)*. A "988 hedging transaction" is a transaction entered into by the taxpayer primarily (1) to manage risk of currency fluctuations with respect to property held (or to be held) by the taxpayer, or (2) to manage risk of currency fluctuations with respect to borrowings made or to be made, or obligations incurred or to be incurred, by the taxpayer. *IRC § 988(d)(2)*.

A "988 hedging transaction" entered into by a securities dealer is not subject to the mark-to-market accounting rules imposed on such dealers by *IRC § 475*.

Feinschreiber, "Hedging Foreign Transactions Without Exposure to Currency Transactions," 11 *J Tax'n of Investments* 100 (1994); Homan, "The Section 988(d) Hedging Rules: Room to Expand Integration Treatment," 46 *Tax Lawyer* 887 (1993).

(n92)Footnote 10.1. *Treas Reg § 1.988-5(a)(1)*. A § 1.988-5(a) hedge is a spot contract, futures contract, forward contract, option contract, notional principal contract, currency swap contract, similar financial instrument, or series or combinations thereof, that when integrated with a qualifying debt instrument permits the calculation of a yield to maturity (under principles of *IRC § 1272*) in the currency in which the synthetic debt instrument is denominated. *Treas Reg § 1.988-5(a)(4)*.

(n93)Footnote 10.2. *Treas Reg § 1.988-5(a)(9)(ii)*. The synthetic debt instrument is subject to all of the original issue discount rules.

Neither the qualifying debt instrument nor the hedge that makes up the qualified hedging transaction is subject to *IRC § 263(g)*, *§ 1092*, or *§ 1256* for the period the transactions are integrated. However, the qualified hedging transaction may be subject to *IRC § 263(g)* or *§ 1092* if the transaction is part of a straddle. *Treas Reg § 1.988-5(a)(9)(i)(A)*.

(n94)Footnote 10.3. *Treas Reg § 1.988-5(a)(1)*. If the qualifying hedging transaction results in a synthetic nonfunctional currency denominated debt instrument, it is treated in the same manner as an actual nonfunctional currency debt instrument.

(n95)Footnote 10.4. *Treas Reg § 1.988-5(a)(5)*. At the discretion of the Commissioner, a transaction shall not satisfy the requirements of *Treas Reg § 1.988-5(a)(5)* if the debt instrument making up the qualified hedging transaction is part of a straddle prior to the time the qualified transaction is identified. *Treas Reg § 1.988-5(a)(7)*.

(n96)Footnote 10.5. The rules relating to identification are contained in *Treas Reg § 1.988-5(a)(8)*.

(n97)Footnote 10.6. Related means the relationships defined in *IRC § 267(b)* or *IRC § 707(b)*.

(n98)Footnote 10.7. *Treas Reg § 1.988-5(a)(6)(i)*.

(n99)Footnote 10.8. *Treas Reg § 1.988-5(a)(6)(ii)*.

(n100)Footnote 10.9. An exception to this rule obtains if identification is made by the Commissioner under *Treas Reg § 1.988-5(a)(8)(iii)*.

(n101)Footnote 10.10. *Treas Reg § 1.988-5(b)(1)*.

(n102)Footnote 10.11. *Treas Reg § 1.988-5(b)(2)(i), (ii)(A)*. An executory contract does not include a Section 988 transaction. *Treas Reg § 1.988-5(b)(2)(ii)(B)*.

The accrual date is the date when the item of income or expense (including a capital expenditure) that relates to the executory contract is required to be accrued under the taxpayer's method of accounting. *Treas Reg § 1.988-5(b)(3)(iv)*.

(n103)Footnote 10.12. *Treas Reg § 1.988-5(b)(iii)(A), (D)*.

(n104)Footnote 10.13. *Treas Reg § 1.988-5(b)(2)(i)*.

CHAPTER 21 New Market Credit

2-21 Taxation of Securities Transactions § 21.01

§ 21.01 Introduction

The Internal Revenue Code contains a number of tax incentives to taxpayers making investments and loans in low-income communities. *IRC Section 45D*, enacted in 2000, adds to these incentives by providing a new tax credit for qualified equity investments made to acquire stock in a selected community development entity ("CDE").ⁿ¹

FOOTNOTES:

(n1)Footnote 1. The credit is part of the general business credit. *IRC § 38(b)(13)*. The provision is effective for qualified investments made after Dec 31, 2000.

As originally enacted, the credit was only available through the end of 2007. However, subsequent legislation has extended this incrementally. Most recently, the Tax Extenders and Alternative Minimum Tax Relief Act of 2008 (Pub L No 110-343, October 3, 2008) extended the availability of this credit through the end of the year 2009.

No portion of the unused business credit for any taxable year that is attributable to the new markets credit can be carried back to a taxable year ending before Jan 1, 2001. *IRC § 39(d)(9)*. Any unused credit is allowed as a deduction for the first taxable year following the last taxable year that the credit could have been allowed as a credit under *IRC § 39. IRC § 196(a), (c)(9)*.

Until further guidance is provided, the availability of federal tax benefits, other than the low-income housing credit provided by *IRC § 42*, does not limit the availability of the new markets tax credit. The Treasury Department and the Service are studying how *IRC § 42* may limit the availability of the new markets tax credit. *Notice 2002-64, 2002-2 CB 690*.

CHAPTER 21 New Market Credit

2-21 Taxation of Securities Transactions § 21.02

§ 21.02 Allowance of the Credit

Pursuant to *IRC Section 45D(a)*, a taxpayer who holds a qualified equity investment (an investment in a qualified CDE) is entitled to 5-percent credit for the year in which the equity interest is purchased from the CDE and the first two anniversary dates thereafter, and a 6-percent credit for the next four anniversary dates.ⁿ¹ The credit is applied to the amount paid to the qualified CDE for the investment at its original issue.

A qualified equity investment is any equity investment in a qualified CDE if (a) the investment is acquired by the taxpayer at its original issue (directly or through an underwriter) solely in exchange for cash, (b) substantially all of the cash is used by the CDE to make qualified low-income community investments, and (c) the investment is designated for purposes of *IRC Section 45D* by the qualified CDE.ⁿ² Any equity investment issued by a qualified CDE more than five years after the date that the entity receives an allocation under *IRC Section 45D(f)* is not a qualified equity investment.ⁿ³

Generally, an equity investment in an entity is not eligible to be designated as a qualified equity investment if it is made before the entity enters into an allocation agreement with the Service.ⁿ⁴ However, an equity investment in an entity is eligible to be designated as a qualified equity investment if (i) it is made on or after April 20, 2001, (ii) the designation of the equity investment as a qualified equity investment is made for a credit allocation received pursuant to an allocation application submitted to the Service no later than August 29, 2002, and (iii) the equity investment otherwise satisfies the requirements of *IRC Section 45D*.ⁿ⁵

If an entity ceases to be a CDE during the seven-year period following the taxpayer's investment, the proceeds of the investment cease to be used to make qualified low-income community investments, or the equity investment is redeemed by the issuing CDE during that seven-year period, then any credits claimed with respect to the equity interest are recaptured (with interest) and no further credits are allowed.ⁿ⁶ The Commissioner can waive a requirement or extend a deadline if the waiver or extension does not materially frustrate the purposes of *IRC Section 45D*.ⁿ⁷

A qualified community development entity is any domestic corporation or partnership (1) whose primary mission is serving, or providing capital for, low-income communities or low-income persons, (2) that maintains accountability to residents of low-income communities by their representation on any governing board or on any advisory board of the CDE, and (3) is certified by the Treasury Department as an eligible CDE.ⁿ⁸ A specialized small business investment company (as defined in *IRC Section 1044(c)(3)*), and a community development financial institution (as defined in

Section 103 of the Community Development Banking and Financial Institutions Act of 1994) are treated as meeting the requirements set forth for a qualified CDE.ⁿ⁹

Qualified low-income community investments include:

- (a) capital or equity investments in, or loans to, qualified active low-income community businesses;
- (b) the purchase from another qualified CDE of any loan made by such entity that is a qualified low-income community investment;
- (c) financial counseling and other services specified in regulations to businesses and residents in low-income communities; and
- (d) an equity investment in, or loan to, another qualified CDE.ⁿ¹⁰

A loan purchased by a CDE (the ultimate CDE) from another CDE (whether or not that CDE had received an allocation under *IRC Section 45D(f)(2)*) is a qualified low-income community investment if it qualifies as such at the time the loan was made or at the time the ultimate CDE purchases the loan.ⁿ¹¹ The purchase of a loan by the ultimate CDE from a CDE that did not make the loan (the second CDE) is treated as a purchase of the loan by the ultimate CDE from the CDE that made the loan (the originating CDE) if the second CDE purchased the loan from the originating CDE or another CDE, and each entity that sold the loan was a CDE at the time of sale.ⁿ¹² A loan is treated as made by a CDE to the extent the CDE purchases the loan from the originator (whether or not the originator is a CDE) within 30 days after the date the originator makes the loan, if at the time the loan is made, there is a legally enforceable written agreement between the originator and the CDE that requires the CDE to approve the making of the loan either directly or by imposing specific loan underwriting criteria, and requires the CDE to purchase the loan within 30 days after it is made.ⁿ¹³

A qualified active low-income community business QALICB is defined as any corporation (including a nonprofit corporation) or partnership if for the taxable year:

- (i) at least 50 percent of the total gross income of the entity is derived from the active conduct of a qualified business within any low-income community;ⁿ¹⁴
- (ii) a substantial portion of the use of the tangible property of the entity (whether owned or leased) is within any low-income community;ⁿ¹⁵
- (iii) a substantial portion of the services performed for the entity by its employees are performed in any low-income community;ⁿ¹⁶ and
- (iv) less than 5 percent of the average of the aggregate adjusted bases of the property of the entity is attributed to collectibles (as defined in *IRC Section 408(m)(2)*) other than collectibles that are held primarily for sale to customers in the ordinary course of business, or to nonqualified financial services (as defined in *IRC § 1397C(e)*).ⁿ¹⁷

In no case will an entity be treated as a QALICB if the entity is located in a population census tract for which the median family income exceeds 120 percent of (a) in the case of a tract not located within a metropolitan area, the statewide median family income, or (b) in the case of a tract located within a metropolitan area, the greater of statewide median family income or metropolitan area median family income.ⁿ¹⁸ The 120-percent-income restriction does not apply to an entity located within a population census tract with a population of less than 2,000 if the tract is not located in a metropolitan area, or, if located in a metropolitan area, more than 75 percent of the tract is zoned for commercial

purposes.

A low-income community is any population census tract where (1) the poverty rate for the tract is at least 20 percent, or (2) the median family income for the tract does not exceed 80 percent of the greater of statewide median family income or metropolitan area income (or for a census tract not in a metropolitan area, 80 percent of statewide median family income).ⁿ¹⁹ Proposed Regulations have been issued that provide rules for determining when one or more targeted populations (within the meaning of Section 103(20) of the Riegle Community Development and Regulatory Act of 1994) may be treated as low-income communities.ⁿ²⁰ Specifically, targeted populations that will be treated as a low-income community are individuals, or an identifiable group of individuals, including an Indian tribe, who are low-income persons as defined in *Proposed Treasury Regulation Section 1.45D-1(d)(9)(i)* or who are individuals who otherwise lack adequate access to loans or equity investments as defined in *Proposed Treasury Regulation Section 1.45D-1(d)(9)(ii)*.ⁿ²¹ The Proposed Regulations also include the qualified active low-income community business requirements for low-income targeted populations.ⁿ²² A population census tract with a population of less than 2,000 must be treated as a low-income community if the tract is within an empowerment zone the designation of which is in effect under *IRC Section 1391*, and is contiguous to one or more low-income communities.ⁿ²³

There is a national limitation on the amount of qualifying equity investment for each calendar year, namely: \$1 billion for 2001, \$1.5 billion for 2002 and 2003, \$2 billion for 2004 and 2005, and \$3.5 billion for 2006, 2007, 2008 and 2009.ⁿ²⁴ The limitation is allocated by the Secretary of the Treasury among qualified community development entities selected by the Secretary.ⁿ²⁵ In making allocations, the Secretary must give priority to any entity with a record of having successfully provided capital or technical assistance to disadvantaged businesses or communities, or that intends to use substantially all the cash it raises to make qualified low-income community investments in one or more businesses in which persons unrelated to the entity hold the majority equity interest.ⁿ²⁶ If the limitation for any year exceeds the aggregate amount allocated by the Secretary, the limitation for the succeeding calendar year is increased by the amount of the excess.ⁿ²⁷

A CDE must provide notice to any taxpayer who acquires a qualified equity investment in the CDE at its original issue that the equity investment is a qualified equity investment entitling the taxpayer to claim the new markets credit.ⁿ²⁸ In addition, if at any time during the seven-year period beginning on the date of original issue of a qualified equity investment in a CDE, there is a recapture event, the CDE must provide notice to each holder, including prior holders, that a recapture event has occurred.ⁿ²⁹

The availability of federal tax benefits does not limit the availability of the new markets credit.ⁿ³⁰ This rule does not apply to the low-income housing credit under *IRC Section 42*.ⁿ³¹ The bankruptcy of a CDE does not preclude a taxpayer from continuing to claim the new market credits on the remaining credit allowance dates.ⁿ³²

FOOTNOTES:

(n1)Footnote 1. The credit is available to the original purchaser and to any subsequent holder. *IRC § 45D(b)(4)*.

The basis of any qualified equity investment is reduced by the amount of any credit allowed under *IRC § 45D*. The reduction does not apply for purposes of *IRC §§ 1202, 1400B, and 1400F. IRC § 45D(h)*. See § 2.06[2][a][ii] for a discussion of *IRC § 1202*, and § 2.06[2][a][iv] for a discussion of *IRC §§ 1400B and 1400F*.

An equity investment is any stock (other than nonqualified preferred stock, as defined in *IRC § 351(g)(2)*) in a corporation or any capital interest in a partnership. *IRC § 45D(b)(6); Treas Reg § 1.45D-1(c)(2)*.

The credit is claimed by filing Form 8874 with the taxpayer's federal income tax return.

(n2)Footnote 2. *IRC § 45D(b)(1)*. The substantially-all investment requirement is met if at least 85 percent of the aggregate gross assets of the qualified CDE are invested in low-income community investments. *IRC § 45D(b)(3)*. The

regulations reduce the 85 percent requirement to 75 percent for the last year of the seven-year credit period. *Treas Reg § 1.45D-1(c)(5)(v)*.

For purposes of the substantially-all requirement, aggregate gross assets are determined according to cost basis, not fair market value. *Treas Reg § 1.45D-1(c)(5)(ii), (iii)*.

The CDE must invest the taxpayer's cash investment in a qualified low-income community investment within 12 months after the cash is paid by the taxpayer to the CDE. *Treas Reg § 1.45D-1(c)(3)(iv)*.

There is no prohibition against the use of cash derived from a borrowing, including a nonrecourse loan, to make a qualified equity investment in a qualified CDE. Rev Rul 2003-20, 2003-1 CB 465 .

(n3)Footnote 3. Any allocation not used within the five-year period can be reallocated. The maximum amount of equity investments issued by a qualified CDE that can be so designated by the entity cannot exceed the portion of the limitation allocated to the entity under *IRC § 45D(f)*. *IRC § 45D(b)(2)*.

(n4)Footnote 4. *Treas Reg § 1.45D-1(c)(3)(i)*. An allocation agreement is an agreement between the Service and a CDE relating to a new markets credit allocation under *IRC § 45D(f)(2)*.

(n5)Footnote 5. *Treas Reg § 1.45D-1(c)(3)(ii)(A)*. In addition, an equity investment in an entity is eligible to be designated as a qualified equity investment if (1) the equity investment is made on or after the date the Service publishes a Notice of Allocation Availability in the Federal Register; (2) the designation of the equity investment as a qualified equity investment is made for a credit allocation received pursuant to an allocation application submitted to the Service under that Notice; and (3) the equity investment otherwise satisfies the requirements of *IRC § 45D* and *Treas Reg § 1.45D-1*. *Treas Reg § 1.45D-1(c)(3)(ii)(B)*. If the entity in which the equity investment is made does not receive an allocation pursuant to an allocation application submitted no later than Aug 29, 2002, the equity investment will not be eligible to be designated as a qualified equity investment. *Treas Reg § 1.45D-1(c)(3)(iii)*.

(n6)Footnote 6. *IRC § 45D(g)*. The amount of recapture is limited to the amount of the credits that were used to reduce tax liability. Bankruptcy of a CDE is not a recapture event. *Treas Reg § 1.45D-1(e)(4)*.

(n7)Footnote 7. *Treas Reg § 1.45D-1(e)(5)(i)*. A CDE that believes it has good cause for a waiver or extension can request relief from the Commissioner in a ruling request that sets forth all the relevant facts and includes a detailed explanation describing the event or events relating to the request. *Treas Reg § 1.45D-1(e)(5)(ii)*.

(n8)Footnote 8. *IRC § 45D(c)(1)*.

(n9)Footnote 9. *IRC § 45D(c)(2)*.

(n10)Footnote 10. *IRC § 45D(d)(1)*; *Treas Reg § 1.45D-1(d)(1)*. The definition of a qualified low-income community investment contained in the regulations will be amended to include investments through two additional CDEs. Notice 2003-64, 2003-2 CB 646 . Reserves (but not in excess of 5 percent of the taxpayer's cash investments in the CDE) for loan losses and for additional investments in existing qualified low-income community investments are treated as invested in a qualified low-income community investment. *Treas Reg § 1.45D-1(d)(3)*.

(n11)Footnote 11. *Treas Reg § 1.45D-1(d)(1)(ii)(A)*. A loan by an entity is treated as made by a CDE if the entity is a CDE at the time it makes the loan. *Treas Reg § 1.45-1(d)(1)(ii)(B)*.

(n12)Footnote 12. *Treas Reg § 1.45D-1(d)(1)(ii)(C)*.

(n13)Footnote 13. *Treas Reg § 1.45D-1(d)(8)*.

(n14)Footnote 14. The 50 percent test is met if 50 percent of the use of tangible property of the entity is within any low-income community or if 50 percent of the services performed for the entity by its employees are performed in any low-income community. *Treas Reg § 1.45D-1(d)(4)(i)(A)*.

Proposed Treasury Regulations provide that at least 50% of the entity's gross income for any taxable year must be derived from sales, rentals, services, or other transactions with individuals who are low-income persons for purposes of *IRC § 45D(e)(2)*. *Prop Treas Reg § 1.45D-1(d)(9)(i)(B)(1)(i)*. The Proposed Regulations also provide that at least 50% of the entity must be owned by individuals who are low-income persons at the time the qualified low-income community investment is made. *Prop Treas Reg § 1.45D-1(d)(9)(i)(B)(1)(iii)*.

Special rules will apply to targeted populations in Gulf Opportunity Zones. Among them is the requirement that, in order to be a QALICB in such case, the entity must be located in a population census tract that contains one or more areas designated by FEMA as flooded, having sustained extensive damage, or having sustained catastrophic damage as a result of Hurricane Katrina.

An entity will be treated as engaged in the active conduct of a trade or business if, at the time the CDE makes a capital or equity investment in, or loan to, the entity, the CDE reasonably expects to generate revenues (or in the case of a nonprofit corporation, receive donations) within three years after the date the investment or loan is made. *Treas Reg § 1.45D-1(d)(4)(iv)*.

(n15)Footnote 15. The substantial-portion test is met if at least 40 percent of the use of the tangible property of the entity is within a low-income community. *Treas Reg § 1.45D-1(d)(4)(i)(B)*. The percentage is raised to 85% if the entity has no employees. *Treas Reg § 1.45D-1(d)(4)(i)(C)*.

(n16)Footnote 16. The substantial-portion test is met if at least 40 percent of the services performed for the entity by its employees are performed in a low-income community. *Treas Reg § 1.45D-1(d)(4)(i)(C)*.

Forthcoming regulations will provide that at least 40% of the entity's employees must be individuals who are low-income persons at the time of hiring. *Notice 2006-60, 2006-2 CB 82*.

(n17)Footnote 17. *IRC § 45D(d)(2)(A)*. A sole proprietorship can be a qualified active low-income community business if it would meet the statutory requirements were it incorporated. *IRC § 45D(d)(2)(B)*. The same holds true for a portion of a business. *IRC § 45D(d)(2)(C)*.

A qualified business has the meaning given to it by *IRC § 1397C(d)*, except that (a) the rental to others of nonresidential real property located in any low-income community shall be treated as qualified business if there are substantial improvements located on the property, and (b) any requirement relating to rental of tangible personal property is inapplicable. *IRC § 45D(d)(3)*; *Treas Reg § 1.45D-1(d)(5)(ii)*. *IRC § 1397C(d)* is discussed in § 17.03[3][b][ii].

The regulations will be amended to provide that the rental to others of real property for low-income targeted populations that otherwise satisfies the requirements to be a qualified business will be treated as located in a low-income community if at least 50% of the entity's total gross income is derived from rentals to individuals who are low-income persons or to a QALICB. *Notice 2006-60, 2006-2 CB 82*.

There is no requirement that employees of a qualified business be residents of a low-income community. *Treas Reg § 1.45D-1(d)(5)(i)*.

(n18)Footnote 18. *Notice 2006-60, 2006-2 CB 82*.

(n19)Footnote 19. *IRC § 45D(e)(1)*. The median family income test for population census tracts located in US

possessions (Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa) is applied using possession-wide income.

In the case of an area that is not tracted for population census tracts, the equivalent county divisions (as defined by the Bureau of the Census for purposes of defining poverty areas) is to be used for purposes of determining poverty rates and median family income. *IRC § 45D(e)(3)*.

(n20)Footnote 20. *IRC § 45D(e)(2); Prop Treas Reg § 1.45D-1(d)(9)*.

(n21)Footnote 21. *Prop Treas Reg § 1.45D-1(d)(9)*. An individual is considered to be low-income if the individual's family income, adjusted for family size, is not more than (1) for metropolitan areas, 80 percent of the area median family income; and (2) for non-metropolitan areas, the greater of 80 percent of the area median family income, or 80 percent of the statewide non-metropolitan area median family income. *Prop Treas Reg § 1.45D-1(d)(9)(i)(A)*.

(n22)Footnote 22. *Prop Treas Reg § 1.45D-1(d)(9)(i)(B)*.

(n23)Footnote 23. *IRC § 45D(e)(4)*.

(n24)Footnote 24. *IRC § 45D(f)(1)*. Pursuant to *IRC § 1400N(m)(2)*, the credit limitation is increased by an amount equal to \$300 million for 2005 and 2006, and \$400 million for 2007, to be allocated among qualified community development entities to make qualified low-income community investments within the Gulf Opportunity Zone, as defined in *IRC § 1400M*.

(n25)Footnote 25. *IRC § 45D(f)(2)*. A qualified community development entity is eligible for an allocation under *IRC § 45D(f)(1)* of the increased limitation applicable to the Gulf Opportunity Zone, described in N. 17, only if a significant mission of the entity is the recovery and redevelopment of the Gulf Opportunity Zone. *IRC § 1400N(m)(1)*.

(n26)Footnote 26. A party is related within the meaning of *IRC § 267(b)* or *IRC § 707(b)(1)*.

(n27)Footnote 27. *IRC § 45D(f)(3)*. No amount can be carried to a calendar year after 2014.

IRC § 45D(f)(3) is applied separately with respect to the increase in the credit limitation described in N. 17. *IRC § 1400N(m)(3)*.

(n28)Footnote 28. *Treas Reg § 1.45D-1(g)(2)(i)(A)*. The notice must be given no later than 60 days after the date the taxpayer makes the investment in the CDE and must contain the amount paid to the CDE for the qualified equity investment at its original issue and the taxpayer identification number of the CDE.

(n29)Footnote 29. *Treas Reg § 1.45D-1(g)(2)(i)(B)*. The notice must be provided no later than 60 days after the date the CDE becomes aware of the recapture event.

(n30)Footnote 30. *Treas Reg § 1.45D-1(g)(3)(i)*.

(n31)Footnote 31. *Treas Reg § 1.45D-1(g)(3)(ii)*.

(n32)Footnote 32. *Treas Reg § 1.45D-1(g)(4)*.

2-A Taxation of Securities Transactions 1

1 PURPOSE

The purpose of this revenue procedure is to update *Revenue Procedure 81-57, 1981-2 C.B. 674* which sets forth in a checklist questionnaire the information necessary to be included in a request for a ruling under *section 351 of the Internal Revenue Code*, relating to transfers to a corporation controlled by the transferor or transferors.

APPENDIX A: Revenue Procedure 83-59

Checklist of information to be included in request for ruling under IRC Section 351

2-A Taxation of Securities Transactions 2

2 BACKGROUND

The Internal Revenue Service receives many requests for rulings in which the information furnished about the proposed transaction is not sufficient to permit a determination to be made. In such cases it is necessary to obtain additional facts from the taxpayer before the request for a letter ruling can be considered. This procedure is time consuming for both Service personnel and taxpayers and delays issuance of the final ruling letter. This checklist will facilitate the filing and processing of requests for rulings under section 351 of the Code by showing specific information and representations to be included so the request will be as complete as possible when initially filed. Because the information and representations necessary to rule on a particular transaction depend upon all the facts and circumstances, information or representations in addition to those set forth in this revenue procedure may be required.

The authority and general procedures of the National Office of the Internal Revenue Service and of the Office of the District Directors of Internal Revenue with respect to the issuance of letter rulings and determination letters are outlined in *Rev. Proc. 83-1, 1983-1 I.R.B. 16*. See also *Rev. Proc. 83-22, 1983-13 I.R.B. 73*, relating to areas in which advance rulings generally will not be issued.

Careful attention to all the requirements of these revenue procedures will aid in the timely processing of letter ruling requests.

APPENDIX A: Revenue Procedure 83-59

Checklist of information to be included in request for ruling under IRC Section 351

2-A Taxation of Securities Transactions 3

3 CHANGES

.01

Section 1 has been changed to indicate the purpose of the revenue procedure is to update *Rev. Proc. 81-57*.

.02

Section 2 is modified to set forth the necessary representations, as well as to update references to Revenue Procedures cited.

.03

Section 4 is substantially altered.

1

The taxpayer must now submit standard representations using the precise language or submit an explanation of the reasons why the representation cannot be made in that form.

2

Section 4.032 is expanded to include several representations concerning the issuance of stock or securities for services.

3

Section 4.033(a) is changed by rewording the request for information.

4

Section 4.033(a)(1) requests the same information in representation form, and adds a new representation relating to reporting items of income and deduction, and also requests information from transferors on the completed contract method of accounting.

5

Sections 4.033(a)(3) through (7) have been reworded using representation format.

6

Section 4.033(8) is expanded to request several new representations concerning solicitation, continuity of interest, and acquisition indebtedness.

7

Section 4.033(9) is added to request representations concerning the formation of bank holding companies.

8

Section 4.033(b) is modified to request information in representation format.

9

Section 4.044 is added to request information concerning the issuance of "section 306 stock".

10

Section 4.055(f) is added to request a representation pertaining to redemptions or other reacquisitions of stock.

11

Section 4.055(g) is added to request a representation pertaining to "control" of the transferee.

12

Section 4.06 is modified and reworded to request information in representation format.

13

Section 4.071 is modified to include citations to section 351(e)(1) of the Code and *section 1.351-1(c)(1)(ii) of the Income Tax Regulations*.

14

Section 4.074 is added to request a representation concerning personal service corporations.

15

Section 4.083(b) is updated to reflect the revenue procedure being superseded.

16

Section 4.10 is updated to reflect the revenue procedure being superseded:

17

Section 5 is updated to reflect a new title and symbols.

18

Section 6 is updated to reflect the revenue procedure being superseded.

Taxation of Securities Transactions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

APPENDIX A: Revenue Procedure 83-59

Checklist of information to be included in request for ruling under IRC Section 351

2-A Taxation of Securities Transactions 4

4 INFORMATION TO BE INCLUDED IN REQUESTS FOR RULINGS UNDER SECTION 351 OF THE CODE

Each of the items in this Section should be specifically dealt with in the letter ruling request. If an item is not applicable, so state and briefly explain why it is not applicable. Standard representations are set forth throughout this Section and are highlighted by having the word "representation" in boldface type. These representations are of equal importance with the other factual information requested herein. They, however, function to insure that specific statutory and judicial requirements, and administrative ruling guidelines, are satisfied. Each representation should be submitted in precisely the language requested. If a representation cannot be submitted, an explanation must be given. Variations of the language of the representations delay processing the ruling request and will not be accepted unless reasons satisfactory to the Service are submitted. Submission of the information and representations should follow the format of this revenue procedure as closely as possible.

.01 Information regarding transferee corporation.

1 Name, taxpayer identification number, and place and date of incorporation of the transferee corporation (transferee).

2 Description of the business of the transferee, and its method and period of accounting.

3 Identify the District Office having audit jurisdiction over the return of the transferee and the known transferors (collectively referred to as taxpayers). State whether, to the best of the knowledge of the taxpayers, and the taxpayer's representative(s), the identical issue is in a return of the taxpayers (or of a related taxpayer within the meaning of section

2-A Taxation of Securities Transactions 4

267 of the Code or a member of an affiliated group of which the taxpayer is also a member within the meaning of section 1504) and, if so, whether the issue (1) is being examined by a District Director, (2) has been examined and the statutory period of limitation on assessment or refund of tax has not expired or a closing agreement covering the issue or liability has not been entered into by a District Director, (3) is being considered by an Appeals Office in connection with the taxpayers return for an earlier period, or that issue has been considered by an Appeals Office and the statutory period of limitation on assessment or refund of tax has not expired or a closing agreement covering the issue or liability has not been entered into by an Appeals Office, or (4) is pending in litigation in a case involving the taxpayers or a related taxpayer. The request must contain a statement whether, to the best of the knowledge of the taxpayers and the taxpayers representative(s), the identical or similar issue has been the subject matter of a prior ruling request and whether it was ruled on by the Service to the taxpayers or to the taxpayers' predecessor and, if so, when and with what results. If after the request is filed but before a ruling is issued, the taxpayers know that an examination of the issue by a District Director has been started, the taxpayers must notify the National Office of such an action. If a return is filed before a ruling is received from the National Office concerning the return, a copy of the request must be attached to the return. This alerts the District Office and avoids premature District action on the issue.

.02 Information regarding the transferors.

1 Name and taxpayer identification number of all known transferors.

2 State the method and period of accounting used by such transferors.

.03 Transfer to corporation.

1 Property -- Identify and describe fully all types of property, tangible and intangible, to be transferred to the transferee by each transferor. Identify specifically each transferor and the property being transferred by that transferor. Also, furnish a description of the business, if any, of each transferor and the property transferred that is related to that business.

2 Services and Indebtedness-- State whether services have been or will be performed by any transferor for or on behalf of the transferee in connection with the transaction. Submit a **REPRESENTATION** as follows: (i) No stock or securities will be issued for services rendered to or for the benefit of the transferee in connection with the proposed transaction, and (ii) No stock or securities will be issued for indebtedness of the transferee that is not evidenced by a security or for interest on indebtedness of the transferee which accrued on or after the beginning of the holding period of the transferor(s) for the debt. See section 351(d) of the Code.

3 Assets and Liabilities.

2-A Taxation of Securities Transactions 4

a Assets-- State whether any of the assets to be transferred were received by the transferor(s) as part of a plan of liquidation of another corporation.

1 Unreported Income -- State whether income items, such as accounts receivable or commissions due, are being transferred to the transferee. If so, and the transferor(s) of these items uses the cash method of accounting, submit a **REPRESENTATION** as follows: (i) The transferor(s) neither accumulated receivables nor made extraordinary payment of payables in anticipation of the transaction, and (ii) The transferee will report items which, but for the transfer, would have resulted in income or deduction to a transferor in a period subsequent to the transfer and such items will constitute income or deductions to the transferee when received or paid by it. Further, submit a **REPRESENTATION** as follows: The proceeds received in collection of the income items will be included as ordinary income in computing the taxable income of the transferee. (*Rev. Rul. 80-198, 1980-2, C.B. 113*). If a transferor is on the completed contract method of accounting, explain fully how the transferor has reported income, costs and expenses related to each contract and how the transferee will report such items subsequent to the transfer.

2 Partners and Partnerships-- State whether the partners' interests in the partnership or the partnership's assets will be transferred and whether the partnership will be liquidated.

3 Patents or patent applications.-- If patents or patent applications are being transferred, submit a **REPRESENTATION** as follows: The patents or patent applications qualify as "property" within the meaning of section 351 of the Code. See *Rev. Rul. 64-56, 1964-1 C.B. (Part I) 133*. Also, submit a **REPRESENTATION** as follows: The transferor(s) will transfer all substantial rights in such patents or patent applications within the meaning of section 1235 of the Code. See *Rev. Rul. 69-156, 1969-1 C.B. 101*.

4 Copyrights-- If copyrights are being transferred, state whether the copyright for all media are being transferred and whether any contracts for the exploitation of a copyright in a particular medium are being transferred. Submit a **REPRESENTATION** as follows: All rights, title and interests for each copyright, in each medium of exploitation, will be transferred to the transferee.

5 Franchises, trademarks or trade names.-- If franchises, trademarks or trade names are being transferred, submit a **REPRESENTATION** as follows: The transferor will not retain any significant power, right, or continuing interest, within the meaning of section 1253(b) of the Code, in the franchises, trademarks or trade names being transferred.

6 Technical "Know-how"-- State whether the transaction involves an agreement that purports to furnish technical "know-how" in exchange for stock. If so, submit the information required by *Rev. Proc. 69-19, 1969-2 C.B. 301*, as amplified by *Rev. Proc. 74-36, 1974-2 C.B. 491*.

2-A Taxation of Securities Transactions 4

7 Stock of another corporation-- State whether stock of another corporation is part or all of the property being transferred to the transferee. If so, state the percentage of the transferred stock and the percentage of the transferee's stock which is owned actually and constructively by the transferor. Also, state whether the stock is being transferred subject to any liabilities or whether any liabilities of the transferor are being assumed in connection with the transfer of such stock. See section 304 of the Code. If the stock to be transferred is other than common stock, submit a **REPRESENTATION** as follows: None of the stock to be transferred is "section 306 stock" within the meaning of section 306(c) of the Code.

8 Other information.

a Solicitation-- Submit a **REPRESENTATION** as follows: The transfer is not the result of the solicitation by a promoter, broker, or investment house.

b Retained rights-- Submit a **REPRESENTATION** as follows: The transferor(s) will not retain any rights in the property transferred to the transferee.

c Licenses, leases, etc.-- Describe any licenses, leases, etc., to be granted in exchange for stock or securities.

d Leaseback -- Describe any property to be transferred to the transferee that will be leased back to a transferor, other shareholder, or a related party. Furnish the terms of the lease and identify the lessee.

e Reserve for bad debts-- Submit a **REPRESENTATION** as follows: The value of the stock received in exchange for accounts receivable will be equal to the net value of the accounts transferred, i.e. the face amount of the accounts receivable previously included in income less the amount of the reserve for bad debts. See *Rev. Rul. 78-280, 1978-2 C.B. 139*.

f Continuity of interest-- If the exchange is part of a larger transaction that fits a pattern common to acquisitive reorganization (see section 3.0123 of *Rev. Proc. 83-22*), submit the following **REPRESENTATION**: (i) With respect to the larger transaction, shareholders of the acquired corporation will receive, in exchange for their stock of the acquired corporation, stock of the acquiring corporation equal, in the aggregate, to a number of shares having a value, as of the date of the exchange, of at least 50 percent of the value of all of the formerly outstanding stock of the acquired corporation as of the same date; (ii) There is no plan or intention on the part of the shareholders of the acquired corporation to sell or otherwise dispose of a number of shares of stock of the acquiring corporation to be received in the transaction that would reduce such shareholders' ownership to a number of shares having, in the aggregate, a value of less than 50 percent of the total fair market value of the acquired corporation's stock outstanding as of the effective date of the proposed transaction; and, (iii) There have not been any significant changes in the stock ownership of the

2-A Taxation of Securities Transactions 4

acquired corporation in the last five years that would cause the continuity of interest requirement not to be satisfied.

g Acquisition indebtedness-- If stock of a corporation is being transferred, submit a **REPRESENTATION** as follows: Any debt relating to the stock being transferred that is being assumed (or to which such stock is subject) was incurred to acquire such stock and was incurred when such stock was acquired, and each transferor is transferring all of the stock for which the acquisition indebtedness being assumed (or to which such stock is subject) was incurred.

9 Formation of bank holding companies--

(a) If the stock of a bank is being transferred to a bank holding company, submit a **REPRESENTATION** as follows: The transferee will be a bank holding company within the meaning of section 2(a) of the Bank Holding Company Act of 1956.

b Submit a **REPRESENTATION** as follows: An application to form a bank holding company was not filed with the Federal Reserve Board before August 16, 1982. If such an application was filed then submit a **REPRESENTATION** as follows: The bank holding company was formed no later than the later of (i) the 90th day after the date of the last required approval of any regulatory authority to form such bank holding company, or (ii) January 1, 1983.

c Submit a **REPRESENTATION** as follows: The transferor(s), in the aggregate, who have "acquisition indebtedness" assumed, or receive "securities", or receive other property (as described in section 304(a)), will not have the 50 percent control (as defined in section 304(c) by applying the modified section 318 attribution rules) of the transferee bank holding company.

d Submit a **REPRESENTATION** as follows: The transferor(s) receiving securities qualify as "Qualified Minority Shareholders", as defined in section 304(b)(3)(D)(i) of the Code.

e Submit a **REPRESENTATION** as follows: The bank, the stock of which is being transferred in the transaction to the transferee bank holding company, was an operating company when the acquisition indebtedness being assumed was incurred.

f If securities are being issued by the bank holding company, submit a **REPRESENTATION** as follows: The acquisition of control of the bank, the stock of which is being transferred in the transaction to the bank holding company, as well as the transfer of the bank stock that constitutes control, are transferred pursuant to a single plan.

b Liabilities.

2-A Taxation of Securities Transactions 4

1 Submit a **REPRESENTATION** as follows: The adjusted basis and the fair market value of the assets to be transferred by the transferor(s) to the transferee will, in each instance, be equal to or exceed the sum of the liabilities to be assumed by the transferee plus any liabilities to which the transferred assets are subject. See section 357(c) of the Code.

2 Submit a **REPRESENTATION** as follows: The liabilities of the transferor(s) to be assumed by the transferee were incurred in the ordinary course of business and are associated with the assets to be transferred. If the liabilities to be assumed were not so incurred, state the business reason or purpose for the assumption of these liabilities. See section 357(b) of the Code.

3 Submit a **REPRESENTATION** as follows: There is no indebtedness between the transferee and the transferor(s) and there will be no indebtedness created in favor of the transferor(s) as a result of the transaction.

.04 Consideration from the transferee.

1 Stock-- Describe the terms of each class and the number of shares of each class to be issued to each transferor for:

a Property-- See.031 above and identify the property of each transferor.

b Services-- See.032 above and identify the services. Indicate those transferors who will also receive stock for property.

2 Indebtedness-- State the principal amount of indebtedness and its terms to be created in favor of each transferor for:

a Property-- See.031 above and identify the property of each transferor.

b Services-- See.032 above and identify the services.

3 Other property in addition to stock and indebtedness-- Indicate the amount and provide a complete description of

2-A Taxation of Securities Transactions 4

any other property that will be issued to each transferor including, but not limited to:

a Cash.

b Stock rights, warrants, or certificates of contingent interest, with the terms of each.

4 Section 306 stock-- If any stock other than common stock will be received in the exchange, explain why it is believed this stock is not "section 306 stock" within the meaning of section 306(c)(3) of the Code.

.05 Control by transferors.

1 Stock of transferee outstanding immediately before transaction.

a Furnish a description of the terms and the total number of shares of each class outstanding.

b State the total number of shares of each class held by a shareholder who will be a transferor in the exchange.

c State the total number of shares of each class held by each shareholder owning five percent or more of a class and the number of shareholders owning the balance of each class outstanding.

2 Stock of transferee outstanding immediately after transaction.

a State the total number of shares of each class.

b State the total number and percent of shares of each class held by each transferor.

3 Plan and dates of exchanges.

2-A Taxation of Securities Transactions 4

a Submit a **REPRESENTATION** as follows: The transfers and exchanges will occur under a plan agreed upon before the transaction in which the rights of the parties are defined. See *section 1.351-1(a)(1) of the regulations*.

b Submit a **REPRESENTATION** as follows: All exchanges will occur on approximately the same date.

c State whether any of the stock issued will be placed in escrow, or whether any of the stock will be issued later under a contingent stock arrangement.

4 Additional stock issues.

a State whether any stock will be issued in the near future in addition to that being issued under the plan. If so, give full particulars.

b If a public offering is planned, submit the following information:

1 The total number of shares of each class involved.

2 If underwriters are involved, explain whether the underwriter will purchase these shares for their own account or will act as agent for the transferee. See *Rev. Rul. 78-294, 1978-2 C.B. 141*.

c If any rights, warrants, or subscriptions of the transferee are outstanding or will be issued or offered, state the total number of shares of each class of stock involved and explain the circumstances in which they were or will be issued or offered.

5 Disposition of stock by transferor(s).

a Indicate the number of shares of each class that each transferor will dispose of after the exchange.

2-A Taxation of Securities Transactions 4

b State the consideration to be received in exchange for the transferee stock disposed.

c Provide the names of the acquiring parties and their relationship to the transferee or shareholder-transferor.

d State the circumstances and reasons for the disposition, including any agreements between the parties.

e If there are, or will be, any options to purchase stock from any of the transferors, give full particulars.

f Submit a **REPRESENTATION** as follows: There is no plan or intention on the part of the transferee to redeem or otherwise reacquire any stock or indebtedness to be issued in the proposed transaction.

g Submit a **REPRESENTATION** as follows: Taking into account any issuance of additional shares of transferee stock; any issuance of stock for services; the exercise of any transferee stock rights, warrants, or subscriptions; a public offering of transferee stock; and the sale, exchange, transfer by gift, or other disposition of any of the stock of the transferee to be received in the exchange, the transferor(s) will be in "control" of the transferee within the meaning of section 368(c) of the Code. See *Rev. Rul. 59-259, 1959-2 C.B. 115*, and *section 1.351-1(a)(1) of the regulations*.

.06 General.

1 Business reasons or purpose-- Explain the business reasons for the transaction.

2 Value for value-- Submit a **REPRESENTATION** as follows: Each transferor will receive stock, securities or other property approximately equal to the fair market value of the property transferred to the transferee or for services rendered or to be rendered for the benefit of the transferee.

3 Activities of transferee-- Submit a **REPRESENTATION** as follows: The transferee will remain in existence and retain and use the property transferred to it in a trade or business.

4 Disposition of property-- Submit a **REPRESENTATION** as follows: There is no plan or intention by the transferee to dispose of the transferred property other than in the normal course of business operations.

2-A Taxation of Securities Transactions 4

5 Related, connected, or step transactions-- Describe any loans, sales, exchanges, or other transactions, other than recurring arm's length sales, purchases, etc. in the normal course of business, that will occur or are contemplated whether or not considered as related to or in connection with the exchange.

6 Expenses-- Submit a **REPRESENTATION** as follows: Each of the parties to the transaction will pay its or his/her own expenses, if any, incurred in connection with the proposed transaction.

.07 Special Corporations.

1 Investment Company-- Submit a **REPRESENTATION** as follows: The transferee will not be an investment company within the meaning of section 351(e)(1) of the Code and *section 1.351-1(c)(1)(ii) of the regulations*.

2 Small Business Corporation-- State whether the transferee intends to make the election under section 1362(a) of the Code to be taxed as a "small business corporation" as defined in section 1361(a).

3 Bankrupt Transferor-- Submit a **REPRESENTATION** as follows: The transferor is not under the jurisdiction of a court in a title 11 or similar case (within the meaning of section 368(a)(3)(A)) and the stock or securities received in the exchange will not be used to satisfy the indebtedness of such debtor. See section 351(e) of the Code.

4 Personal Service Corporation-- Submit a **REPRESENTATION** as follows: The transferee will not be a "personal service corporation" within the meaning of section 269A of the Code.

.08 Copies of documents to be submitted with request.

1 Balance sheets-- Latest of transferee or other business involved. If transferee is a new corporation, submit a pro-forma balance sheet.

2 Plan or agreement of exchange -- If one has been committed to writing.

3 Securities-- If it is contended that any part or all of the indebtedness described in 4.042(a) above is "securities" within the meaning of section 351 of the Code submit:

a A brief explaining why.

b A copy of the note or other evidence of the indebtedness and loan agreement, if any. However, see section 4.0112 of *Rev. Proc. 83-22*.

.09 Foreign Transferee-- If the transfer is to a foreign corporation, see section 367 of the Code and the regulations thereunder and *Rev. Proc. 68-23, 1968-1 C.B. 821*.

.10 Taxpayer's memorandum-- Submit the information required by section 9 of *Rev. Proc. 83-1, 1983-1 I.R.B. 16*.

2-B Taxation of Securities Transactions 1

1 PURPOSE

The purpose of this revenue procedure is to update *Rev. Proc. 81-62, 1981-2 C.B. 684*, which sets forth in a checklist questionnaire the information that must be included in a request for a ruling under *section 302 and 311 of the Internal Revenue Code*, relating to distributions in redemption of stock.

APPENDIX B: Revenue Procedure 86-18

Checklist of information to be included in request for rulings under IRC Sections 302 and 311
Sections 302 and 311 Checklist Questionnaire

2-B Taxation of Securities Transactions 2

2 BACKGROUND

The Internal Revenue Service receives many requests for rulings in which the information relating to the proposed transaction is not sufficient to permit a determination to be made. In these cases, it is necessary to obtain additional facts from the taxpayer before the request for a letter ruling can be considered. Obtaining these additional facts is time consuming for both Service personnel and taxpayers and delays issuance of the ruling letter.

This checklist will facilitate the filing and processing of request for rulings under sections 302 and 311 of the Code by showing specific information and representations to be included so that the requests will be as complete as possible when initially filed. Because the information and representations necessary to rule on a particular transaction depend upon all the facts and circumstances, information or representations in addition to those set forth in the revenue procedure may be required.

The authority and general procedures of the National Office of the Internal Revenue Service and of the office of the District Directors of Internal Revenue with respect to the issuance of letter rulings and determination letters are outlined in *Rev. Proc. 86-1, 1986-1 I.R.B. 6*. See also *Rev. Proc. 86-3, 1986-1 I.R.B. 26*, relating to areas in which advance rulings generally will not be issued. These revenue procedures, along with the present checklist revenue procedure, are subject to periodic updating by the Service. Therefore, careful attention should be given to ensure usage of the most current revenue procedures.

Careful attention to all requirements of these revenue procedures will aid in the timely processing of letter ruling requests.

2-B Taxation of Securities Transactions 3

3 CHANGES

01

Section 1 is modified to indicate that the purpose of the revenue procedure is to update *Rev. Proc. 81-62*.

02

Section 2 is modified to state that representations are now required, and to update references to revenue procedures cited.

03

Section 4 is modified to update references to Code sections.

04

Section 5 is substantially altered. The taxpayer must now submit standard representations using the precise language specified herein, or submit an explanation why the representations cannot be made in the requested form. Sections 5.021, 5.032, 5.033, 5.041, 5.044, 5.051, and 5.052 are modified accordingly. To properly reflect applicable changes, some citations to Code sections and to revenue rulings and procedures have been added or deleted. Changes include:

1

Section 5.012 now requires taxpayers to submit information concerning any prior ruling requests submitted by the taxpayer (or predecessor) that were withdrawn in which the identical or similar issue was present.

2

Section 5.014 has been deleted.

3

Section 5.02 is modified to update references to revenue procedures cited.

4

Section 5.022(b) is modified to reflect the addition of section 318(a)(5)(E) to the Code.

5

Section 5.023 is amplified to request information concerning the acquisition by the Redeemed Shareholder of the redeemed stock.

6

Section 5.033(a) is modified to request information concerning changes in Corporation's outstanding equity in the past 5 years.

7

Section 5.033(b) is modified to request details of transactions involving any related corporation.

8

Section 5.033(c) is modified to include indirect sales or acquisitions of Corporation's stock by the Redeemed Shareholder.

9

Section 5.041(b)(2)(C) is modified to request supporting relevant authority for taxpayer's contention.

10

Section 5.041(c) is added and requests information and a representation if the Redeemed Shareholder is an entity.

11

Section 5.043 is modified to update reference to the partial liquidation section and to request supporting authority for taxpayer's contention.

12

Section 5.044(a) is modified to request information if common stock is to be redeemed.

13

Section 5.062(b)(5) is modified to show changes in the recapture provisions.

14

Section 5.07 is modified to request general information, and requires taxpayers to list the specific rulings being requested and the authorities supporting the rulings.

05

Section 6 is modified to substitute Associate Chief Counsel (Technical) for Assistant Commissioner (Technical), and CC:C:R for T:C:R.

06

Section 7 is modified to state that *Rev. Proc. 81-62* is superseded.

2-B Taxation of Securities Transactions 4

4 TRANSACTIONS TO WHICH SECTION 303 OR 302(B)(4) OF THE CODE APPLIES

01 Section 303. Distribution in redemption to pay death taxes.-- To the extent the distribution is within the terms of section 303 of the Code, section 302(b)(1), (2) or (3) does not apply to the distribution. If the stock redeemed was included in a decedent's gross estate, see section 303 which treats these redemptions under certain circumstances as in full payment in exchange for the stock so redeemed.

02 Section 302(b)(4) Distribution in partial liquidation.-- If any part of the distribution will qualify as a partial liquidation under section 302(b)(4) of the Code, state the amount and the reason reasons why it qualified under section 302(b)(4). See *Rev. Proc. 81-42, 1981-2 C.B. 611*.

Checklist of information to be included in request for rulings under IRC Sections 302 and 311
Sections 302 and 311 Checklist Questionnaire

2-B Taxation of Securities Transactions 5

5 INFORMATION TO BE INCLUDED IN REQUESTS FOR RULINGS UNDER SECTIONS 302 AND 311 OF THE CODE

Each of the items in this section should be specifically dealt with in the letter ruling request. If an item is not applicable, so state, and briefly explain why. Standard representations are set forth throughout this section and are highlighted by the word "representation" in boldface type. These representations are of equal importance with the other factual information request herein. The representations function to ensure that specific statutory and judicial requirements and administrative ruling guidelines are satisfied. Each representation set forth in this section should be submitted precisely in the language requested. If a representation cannot be submitted as requested, an explanation must be given. Variations of the language of the representations may delay processing the ruling request and will not be accepted unless reasons satisfactory to the Service are submitted. Submission of the information and representations should follow the format of this revenue procedure as closely as possible, with appropriate descriptive headings. Care must be taken to ensure that all the facts relating to the transaction are submitted.

01 Information regarding the corporation that is redeeming its stock (Corporation).

1 Identification.-- Name, taxpayer identification number, and place and date of incorporation of Corporation.

2 Jurisdiction.-- Identify the District Office that will have audit jurisdiction over the return of Corporation (referred to below as "taxpayer"). State whether, to the best knowledge of the taxpayer and the taxpayer's representatives, if any, the identical issue is in a return of the taxpayer (or of a related taxpayer within the meaning of section 267 of the Code, or a member of an affiliated group of which the taxpayer is also a member within the meanings of section 1504) and, if so, whether the issue (1) is being examined by a District Director, (2) has been examined by a District Director and-(a)

2-B Taxation of Securities Transactions 5

the statutory period of limitation either on assessment or for filing a claim for refund or credit of tax has not expired and (b) a closing agreement covering the issue or liability has not been entered into by a District Director, (3) is being considered by an Appeals Office in connection with the taxpayer's return for an earlier period, (4) has been considered by an Appeals Office and (a) the statutory period of limitation either on assessment or for filing a claim for refund or credit of tax has not expired and (b) a closing agreement covering the issue or liability has not been entered into by an Appeals Office, or (5) is pending in litigation in a case involving the taxpayer or a related taxpayer. The request must contain a statement whether, to the best knowledge of the taxpayer and the taxpayer's representatives, the identical or a similar issue has been (i) submitted to the Service, but withdrawn before a ruling was issued, or (ii) ruled on by the Service to the taxpayer or the taxpayer's predecessor and, if so, when and with what result. If, after the request is filed but before a ruling is issued, the taxpayer knows that an examination of the issue by a District Director has been started, the taxpayer must notify the National Office of this action. If a return is filed before a ruling is received from the National Office concerning the issue that is the subject of the request for ruling, a copy of the request must be attached to the return. This alerts the District Office and avoids premature District action on the issue.

3 Business.-- Provide the following information about Corporation: (i) a brief description of its businesses, (ii) its method of accounting, and (iii) its tax year.

02 Description of Corporation's capital structure and ownership of Corporation's stock.

1 Description of capital structure.

a In general.-- Furnish a complete description of each class of Corporation's outstanding stock (throughout this document the word "stock" includes all forms of equity ownership), setting forth the rights and privileges of each class, including voting or non-voting rights, dividend and liquidation preferences or limitations, and whether classified as common or preferred stock. Also describe all other outstanding interests (bonds, debentures, notes, warrants, options, etc.), and briefly explain why each of these items should or should not be considered a stock interest. If Corporation has no outstanding interests convertible into stock, submit the following Representation: There are no outstanding options or warrants to purchase Corporation stock, nor are there any outstanding debentures or other obligations that are convertible into Corporation stock or would be considered Corporation stock. Applying the constructive ownership rules of section 318(a) of the Code, state the relationship between the shareholders and the creditors of Corporation. In addition, describe any new debt or equity that Corporation anticipates issuing.

b Distribution of obligations of Corporation.-- If applicable, submit the following Representation: No notes or other obligations of Corporation will be distributed to a redeemed shareholder. Alternatively, if notes or other obligations of Corporation will be distributed to a shareholder whose stock is being redeemed (a Redeemed Shareholder), furnish the following:

1 Copy.-- Provide a copy or prototype of the instrument that set forth its terms and limitations.

2-B Taxation of Securities Transactions 5

2 Period of payments.-- Give the beginning and ending payment dates. Submit the following Representation: In no event will the last payment on any note or other obligation be made more than 15 years after the date of issuance of the note or other obligation. See section 4.0112 of *Rev. Proc. 86-3*.

3 Payment of fixed amount.-- State whether the amount to be paid, including interest, is a fixed amount payable at a fixed time, and whether the amount or the time of payment is subject to any change or adjustment. Submit the following Representation: None of the consideration from Corporation, including interest, consists entirely or partly of corporation's promise to pay an amount that is based on, or contingent on, future earnings of Corporation, an amount that is contingent on working capital being maintained at a certain level, or any other similar contingency. See section 3.0117 of *Rev. Proc. 86-3*. Alternatively, furnish any payments' terms and reasons why the right to the payments should not be considered an equity interest in Corporation.

4 Financial statements.-- Submit profit and loss statements and balance sheets for the latest 3 years.

5 Subordination.-- Submit the following Representation: Any note or other obligation to be issued to a redeemed shareholder will not be subordinated to the claims of general creditors of Corporation.

6 Default.-- Submit the following Representation: In the event of default on any note or other obligation, no shares of stock will revert to or be received by a redeemed shareholder nor will any redeemed shareholder be permitted to purchase the stock at public or private sale. See Section 3.0116 of *Rev. Proc. 86-3*.

2 Ownership of stock before the redemption.

a Shares owned directly.-- State the total number of shares outstanding for each class of stock in Corporation immediately before the redemption. Also state the number of shares and percentage of each class of stock owned directly by each shareholder immediately before the redemption. However, if there are more than 25 shareholders, the statement in the preceding sentence may be limited to Redeemed Shareholders and those shareholders whose stock is attributed to them under section 318(a) of the Code.

b Shares constructively owned.-- State the number of shares and percentage of each Redeemed Shareholder, and the relationship under section 318(a) of the Code of any person or entity whose stock is attributed to a Redeemed Shareholder. In determining stock constructively owned by each Redeemed Shareholder under section 318(a), ownership may be attributed any number of times from an individual or entity to another, as provided in section 318(a)(5)(A). However, observe the exception in section 318(a)(5)(B) with respect to double attribution among members of the family (under section 318(a)(1)) and the exception in section 318(a)(5)(c) with respect to "sidewise"

2-B Taxation of Securities Transactions 5

attribution to (under section 318(a)(3)) and from (under section 318(a)(2), a partnership, estate, trust, or corporation). Also, observe the following exceptions to constructive ownership: (i) to (under section 318(a)(3) of the Code) and from (under section 318(a)(2)) an employees' trust described in section 401(a) that is exempt from tax under section 501(a); and (ii) to a trust (under section 318(a)(3)) if the beneficiary's interest is a remote contingent interest. If it is contended that a trust is an employees' trust or that a beneficiary's interest is a remote contingent interest, submit information to support the contention. In addition, observe that pursuant to section 318(a)(5)(E) of the Code, an S corporation is treated as a partnership and each of its shareholders as partners of the partnership for purposes of section 318(a). But note the limitation for purposes of constructive ownership provided by section 318(a)(5)(E).

1 Section 318(a)(1) of the Code: family attribution.-- If the Redeemed Shareholder is an individual, indicate the number of shares and percentage of each class of stock of Corporation owned actually and constructively under section 318(a) by members of the Redeemed Shareholder's family described in section 318(a)(1).

2 Section 318(a)(2) of the Code: attribution from a partnership, estate trust, or corporation.-- Indicate the number of shares and percentage of each class of stock of Corporation owned actually and constructively under section 318(a) by any partnership, estate, trust, or corporation in which the Redeemed Shareholder has an interest and the interest of the Redeemed Shareholder in each of these entities.

3 Section 318(a)(3) of the Code: attribution to a partnership, estate, trust, or corporation.-- Indicate the number of shares and percentage of each class of stock of Corporation owned actually and constructively under section 318(a) as follows: (i) by any of the partners if the Redeemed Shareholder is a partnership; or (ii) by any of the beneficiaries if the Redeemed Shareholder is a trust or estate; or (iii) by any of the shareholders owning actually or constructively, under section 318(a), 50 percent or more in value of the stock of the Redeemed Shareholder, if the Redeemed Shareholder is a corporation.

4 Section 318(a)(4) of the Code: options to acquire stock of Corporation.-- Identify all holders of any rights or options (including those in the form of convertible debentures and stock rights or warrants) to acquire stock of Corporation and the relationship, direct or indirect under section 318(a), of the option holders to each of the Redeemed Shareholders.

c Percent of stock owned.-- Indicate the total percentage of each class of stock of Corporation owned actually and constructively, as determined in section 5.022(a) and (b) above, by each shareholder of Corporation immediately before the redemption.

3 Stock to be redeemed.-- State the number of shares of each class of stock to be redeemed from each shareholder of Corporation listed in section 5.022(a) above. Unless the stock is traded on an established securities market, also state when, from whom, and for what consideration each Redeemed Shareholder received the equity interest being redeemed.

2-B Taxation of Securities Transactions 5

4 Ownership of stock after the redemption.-- Indicate the number of shares of each class of stock of Corporation owned actually and constructively by each shareholder, the total outstanding, and the percentage of each class of stock owned actually and constructively by each Redeemed Shareholder immediately after the redemption, determined in the same manner and including the same information as required in section 5.022 above.

03 Other relationships or transactions.-- Information showing the complete factual background relating to the redemption of each Redeemed Shareholder.

1 Other relationships between Corporation and any Redeemed Shareholder.-- With regard to each Redeemed Shareholder, state whether the shareholder was, or will be, an employee of, an officer of, or in any way related to, Corporation. Describe fully all business and debtor-creditor relationships between each Redeemed Shareholder and Corporation. Describe all direct and indirect payments by Corporation to, or for the benefit of, each Redeemed Shareholder. (See e.g., *Rev. Rul. 77-467, 1977-2 C.B. 92* and section 3.0118 of *Rev. Proc. 86-3*). Give details of any agreements between a Redeemed Shareholder and Corporation, such as an employment contract, covenant not to compete, insurance, pensions, deferred compensation, or other benefits, and state whether the agreements, payments, or benefits had an affect upon the amount of property to be distributed in the redemption. Describe any property a Redeemed Shareholder will transfer or surrender in the transaction other than stock of Corporation, and the consideration to be received in exchange therefor. State whether any part of the consideration from Corporation will be received by a Redeemed Shareholder, directly or indirectly, as a creditor, employee, or in some capacity other than as a Redeemed Shareholder. Describe whether the Redeemed Shareholder conducts or will conduct any business with, or leases or will leases any property to, Corporation.

2 Agreements between shareholders.-- Submit the following Representation: No shareholder of Corporation has been or will be obligated to purchase any of the stock to be redeemed. Alternatively, if there are, or within the 3-year period prior to the transaction have been, any agreements between a Redeemed Shareholder and other shareholders as to the acquisition or disposition of any equity interest, such as buy-sell agreements or option, describe the agreements or options in full. Submit copies of all pertinent agreements. See *Rev. Rul. 69-608, 1969-2 C.B. 43*.

3 Other transactions.-- Submit the following Representation: The redemption described in this ruling request is an isolated transaction and is not related to any other past or future transaction. Alternatively, state whether there have been, or will be, any related transactions, and, if so, briefly describe these other transactions and fully explain their relationship to, and impact on, the present transaction. See section 9.06 of *Rev. Proc. 86-1*.

a Transactions involving Corporation.-- If there have been no changes in Corporation's outstanding equity in the past 5 years, submit the following Representation; There have been no redemptions, issuances, or exchanges by Corporation of its stock in the past 5 years. Alternatively, describe all changes in Corporation's outstanding equity during this period, including every redemption, issuance, or exchange of stock by Corporation. State whether any of the shareholders involved in any of these prior transactions are Redeemed Shareholders, or related within the meaning of section 318 of the Code to a Redeemed Shareholder, in the present transaction. If no future transactions are planned or intended, submit the following Representation: Corporation has no plan or intention to issue, redeem, or exchange

2-B Taxation of Securities Transactions 5

additional share of its stock. Alternatively, if any issuances, redemptions, or exchanges are planned, describe the transaction, the number and type of shares, and the consideration to be paid or received in exchange for the stock, and state whether any of the shareholders involved in any future transaction are Redeemed Shareholders, or related within the meaning of section 318 of the Code to a Redeemed Shareholder, in the present transaction.

b Transactions involving any related corporation.-- State whether there were, or will be, any distributions, redemptions, or issuances of stock of any related corporation, and if so, briefly describe the transactions and fully explain their relationship to the present transaction.

c Transactions involving any Redeemed Shareholder.-- State whether any Redeemed Shareholder or a related party has sold or acquired, or intends to sell or acquire, any stock in Corporation or any related corporation either directly or constructively within five years of the redemption. If so, state the number of shares of each class, identify the parties to the transaction, the relationship of the parties and their relationship to any Redeemed Shareholder within the meaning of section 318(a) of the Code, and the consideration to be received in exchange therefor. State whether the sale or disposition of the stock has been considered consummated in computing the ownership of stock before and after the redemption in section 5.022 and 4 above. State whether Corporation will be liable, directly or indirectly, for any part of the buyer's obligation in the purchase of stock. See *Rev. Rul. 69-608*, supra.

4 In general.-- Describe any relationship or transaction between Corporation and any Redeemed Shareholder, and describe any transaction by either Corporation or any Redeemed Shareholder, if the relationship or transaction affects the Redeemed Shareholder's percentage ownership of any class of Corporation's stock, regardless of whether the transaction or relationship is past, contemplated, or not considered related to the redemption.

04 Information to determine whether the redemption is an exchange or dividend.

1 Termination of shareholder's interest.

a Complete termination of shareholder's stock interest.-- Submit the following Representation: None of the redeemed shareholders are related, within the meaning of section 318 of the Code, to any remaining shareholders of Corporation.

b Termination of shareholder's interest except for constructive ownership under section 318(a)(1) of the Code.-- If it is contended there has been a complete termination of a Redeemed Shareholder's interest except for constructive ownership from a family member under section 318(a)(1) so that section 302(b)(3) should apply pursuant to the application of section 302(c)(2), furnish the following with respect to the Redeemed Shareholders:

2-B Taxation of Securities Transactions 5

1 Identity of the Redeemed Shareholders.

2 Acquisitions or dispositions of stock of Corporation within the last 10 years by the Redeemed Shareholders. Do not include a change in interest resulting from partition of community property. See *Rev. Rul. 82-129, 1982-2 C.B. 76*.

(A)

Acquisitions by Redeemed Shareholders within the last 10 years.--Submit the following Representation: None of the stock to be redeemed was acquired by the redeemed shareholder within the 10-year period preceding the redemption from a person whose stock would be attributed under section 318(a) of the Code to the redeemed shareholder at the time of redemption. (Alternatively, see (C) below.)

(B)

Dispositions by Redeemed Shareholder within the last 10 years.--Submit the following Representation; No person whose stock would be attributed to the redeemed shareholder under section 318(a) of the Code will own stock of Corporation after the redemption if the stock was acquired by that person from the redeemed shareholder within 10 years preceding the redemption. (Alternatively, see (C) below.)

(C)

Avoidance of federal income tax.--If the representation in either (A) or (B) immediately above cannot be furnished because of an acquisition or disposition described therein, but it is contended that the acquisition or disposition did not have as one of its principal purposes the avoidance of federal income tax, give a full description and furnish an analysis of both the facts and supporting relevant authority for the contention. See section 3.0119 of *Rev. Proc. 86-3*.

3 Interest in Corporation after the redemption.

(A)

No interests other than creditor and constructive owner under section 318(a)(1) of the Code.--Describe whether Corporation will provide any compensation or economic benefit to any Redeemed Shareholder (regardless of whether the compensation or benefit is related to prior services) including termination bonuses, payments under covenants not to complete, free insurance, and future employment of any type whether directly as an officer or employee or indirectly as an independent contractor or consultant. Submit the following Representation: After the redemption, no redeemed shareholder will have any interest in Corporation, including an interest as an officer, director, or employee (other than an interest as a creditor as described in *section 1.302-4(d) of the Income Tax Regulations*, and constructive ownership under section 318(a)(1) of the Code). See *Rev. Ruls. 84-135, 1984-2 C.B. 80, 81-233, 1981-2 C.B. 83, and 71-426*,

1971-2 C.B. 173.

(B)

Agreement as to future interests.--When attribution under section 318(a)(1) of the Code is to be waived pursuant to section 302(c)(2)(A), submit the following Representation: Each redeemed shareholder will execute and file the agreement required by section 302(c)(2)(A)(iii) of the Code with respect to the acquisition of any interest in Corporation within 10 years from the date of the redemption.

(C)

Termination of entity-shareholder's interest except for constructive ownership under section 318(a)(1) of the Code.--If a partnership, estate, trust, or corporation is a Redeemed Shareholder and stock is attributed to it under section 318(a)(3) of the Code from a "related person" (defined in section 302(c)(2)(C)(ii)), submit: (i) the name and relationship to the entity of each related person; (ii) the representations in section 5.041(b)(2)(A) for each Redeemed Shareholder and in section 5.041(b)(2)(B) for each Redeemed Shareholder and each related person (or the information in section 5.041(b)(2)(C)); (iii) the information and representations required by section 5.041(b)(3)(A) and (B) for each Redeemed Shareholder and each related person; and (iv) the following Representation: The Redeemed Shareholder and each related person will agree to be jointly and severally liable for any deficiency (including interest and additional tax) resulting from an acquisition of an interest in Corporation within 10 years from the date of the redemption.

2 Substantially disproportionate redemption.-- If it is contended the redemption is substantially disproportionate to one or more of the Redeemed Shareholders, furnish the information required in section 302(b)(2) of the Code with respect to each of those shareholders.

a Fifty-percent rule.-- State the percent of the total combined voting power of all classes of stock entitled to vote owned actually and constructively by each Redeemed Shareholder (as determined in section 5.024 above) immediately after the redemption.

b Eighty-percent rule.-- Submit computations to show that each Redeemed Shareholder owns actually and constructively immediately after the redemption (as determined under section 5.024 above) less than 80 percent of the percentage of the outstanding common stock (voting and nonvoting) owned immediately before the redemption, in accordance with the requirements in section 302(b)(2)(C) of the Code. If a Redeemed Shareholder holds no common stock, either directly or constructively, no computation for common stock is required (see *Rev. Rul. 81-41, 1981-1 C.B. 121*).

3 Redemption not essentially equivalent to a dividend.-- If the redemption does not qualify as a partial liquidation under section 301(b)(4) of the Code, as an exchange under section 303, or under section 302(b)(2) or (3), and it is contended "the redemption is not essentially equivalent to a dividend" within the meaning of section 302(b)(1), submit

2-B Taxation of Securities Transactions 5

whatever facts and analysis of supporting authority are relevant with respect to each Redeemed Shareholder (which have not been furnished above) to support this contention. Supply information to show that each Redeemed Shareholder will have a meaningful reduction in proportionate interest in vote, dividend rights, and right to receive assets on liquidation with regard to Corporation. See *United States v. Davis*, 397 U.S. 301 (1969), Ct. D. 1937, 1970-1 C.B. 62, section 1.302-2 of the regulations, and Rev. Rul. 81-289, 1981-2 C.B. 82.

4 Other information to determine whether the redemption is an exchange, a dividend, or other ordinary income transaction to the Redeemed Shareholder or any other person.

a "Section 306 stock".-- If it is contended that none of the stock to be redeemed is "section 306 stock" within the meaning of section 306(c) of the Code, submit the following Representation: None of the stock to be redeemed is "section 306 stock" within the meaning of section 306(c) of the Code. If the stock to be redeemed is common stock, state whether it was received in exchange for preferred stock. If the stock to be redeemed is preferred stock, furnish the following information:

1 Issued for cash.-- If issued for cash, furnish a statement to that effect and state whether the stock was paid for in full.

2 Issued upon incorporation.-- If the stock was issued upon incorporation in exchange for property, furnish a statement to that effect. (See section 306(c)(3) and (4) of the Code.)

3 Issued under other circumstances.

(A)

When issued.--Give the date or dates on which the stock was issued.

(B)

Transaction.--Describe the transaction in which the stock was issued (whether a stock dividend, or reorganization, or other transaction).

(c) Consideration to Corporation.--Describe the kind of property, if any, Corporation received in exchange for the stock.

b Declared but unpaid dividends.-- Submit the following Representation: There are no declared but unpaid

2-B Taxation of Securities Transactions 5

dividends, or funds set apart for dividends, or any of the stock to be redeemed. (See *Rev. Rul. 75-320, 1975-2 C.B. 105*, and *Rev. Rul. 69-130, 1969-1 C.B. 93*.)

c Financing of redemption.-- State the source of the cash or other property to be distributed in the redemption. If cash has been or will be borrowed for the redemption, give full redemption, give full particulars as to the parties to, and terms of, the loan agreement.

d Stock not to be cancelled, retired, or held as treasury stock.-- If a party other than Corporation will hold the stock to be redeemed, give all facts concerning the arrangement and the conditions, if any, under which the stock may be returned to the Redeemed Shareholder or any person other than Corporation, and the relationship under section 318(a) of the Code of that person to the Redeemed Shareholder.

e Debt owed by Redeemed Shareholder to Corporation.-- If a Redeemed Shareholder owes any amount to Corporation, state the circumstances under which the debt arose, the terms of the debt, and when and how it will be discharged.

f Redemption price and fair market value of the stock.-- Submit the following Representation: At the time of the exchange, the fair market value of the consideration to be received by the redeemed shareholder will be approximately equal to the fair market value of Corporation's stock to be exchanged therefor. Alternatively, if it will not be approximately equal, give a complete explanation, including the fair market value of both the stock redeemed and the assets distributed.

05 Effect on Redeemed Shareholder when redemption is treated as an exchange.

1 Loss to Redeemed Shareholder.-- Submit the following Representation: The price to be paid for Corporation's stock to be redeemed will not result in a loss with respect to those shares of stock. Alternatively, if any Redeemed Shareholder will realize a loss on the redemption, state reasons to establish why section 267 of the Code will not apply.

2 Installment method.-- If a Redeemed Shareholder requests a ruling that the installment method under section 453 of the Code will apply to the redemption, furnish information to support the contention that the requirements in section 453(b) will be met with respect to the Redeemed Shareholder. Further, submit the following Representation: The redemption of Corporation stock (i) is not a disposition of personal property on the installment plan by a person who regularly sells or otherwise disposes of personal property on the installment plan and (ii) is not a disposition of personal property of a kind required to be included in the inventory of any redeemed shareholder at the close of the taxable year. Any note or other obligation to be issued to a redeemed shareholder will not be issued in any form designed to render it readily tradable on an established securities market. See section 453(b), (f)(2), and (f)(5) of the Code.

2-B Taxation of Securities Transactions 5

06 Property distributed in redemption of the stock.-- Describe in detail the property to be received by each Redeemed Shareholder.

1 United States cash.-- Indicate the amount of United States cash (including cash equivalents within the meaning of *Rev. Rul. 66-290, 1966-2 C.B. 112*) to be distributed to each Redeemed Shareholder.

2 Property other than United States cash.

a Description.-- Describe fully all types and categories of property, tangible and intangible, other than United States cash (including cash equivalents within the meaning of *Rev. Rul. 66-290*), to be distributed by Corporation to each Redeemed Shareholder.

b Recognition of gain or income to Corporation.-- In order to determine whether gain or income will be recognized to Corporation upon the distribution of property, provide the following:

1 Inventory (section 311(b)).-- A statement whether any inventory will be distributed and, if distributed, whether Corporation is on the LIFO method of inventory.

2 Liability in excess of basis (section 311(c)).-- A statement as to the amount of any liabilities to be assumed by a Redeemed Shareholder, the amount of any liability to which the property distributed is subject, and the adjusted basis in the hands of Corporation of all property distributed.

3 Appreciated property (section 311(d)).-- A statement whether any appreciated property will be distributed by Corporation to a Redeemed Shareholder as part of the redemption. If so state any exceptions or limitations which may be applicable to prevent recognition of gain to Corporation and give reasons for their applicability.

4 Unreported and anticipatory assignment of income.-- State whether Corporation will distribute to a Redeemed Shareholder any assets which represent earned but unreported income such as receivables being reported on a cash basis, unfinished construction contracts, commissions due, or other assets resulting in an anticipatory assignment of income.

5 Installment obligations and recapture provisions.-- State whether Corporation will distribute to a Redeemed

2-B Taxation of Securities Transactions 5

Shareholder in the redemption (i) any installment obligations (section 453B of the Code), (ii) any property described in the recapture provisions of the Code including, but not limited to, sections 47, 291(a), 341(f), 617(d), 897(d), 904(f), 1245(a), 1248(f), 1250(c), 1252(a), 1254, or 1255, (iii) any property for which the taxpayer obtained a deduction (See *Hillsboro National Bank v. Commissioner*, 460 U.S. 370 (1983); *Rev. Rul. 74-396*, 1974-2 C.B. 106; *Rev. Rul. 61-214*, 1961-2 C.B. 60), or (iv) any property described in sections 1256 or 1276.

6 Reserve for bad debts.-- A statement whether Corporation will distribute to a Redeemed Shareholder any receivables. If so, state the amount of any reserve for bad debts related to the receivables.

7 Sale, lease, or other disposition of property.-- State whether the Redeemed Shareholder will sell, lease, or otherwise dispose of any property received in the redemption, and give full particulars as to the circumstances and agreement with respect to the sale, lease, or other disposition. If property will be leased back to Corporation, submit a copy of the lease, and state whether: (i) the terms of the lease are the result of arm's length negotiation; (ii) the payments to be made thereunder will be in an amount equal to the fair rental value of the property; (iii) the payments will be dependent on the future earnings of Corporation; and (iv) the payments will be subordinated to the claims of general creditors. See *Rev. Rul. 77-467*, 1977-2 C.B. 92.

8 Cross-redemption.-- If the Redeemed Shareholder is a corporation and the property to be distributed by Corporation is stock of the Redeemed Shareholder, submit a statement concerning treatment of the cross-redemption by each of the corporations, together with a statement of relevant authorities to support the treatment.

07 07 General

1 Additional statements.-- See *Rev. Proc. 86-1* for additional information and statements that must be submitted with all ruling requests, including statements required under sections 9.02 and 9.09 (relating to instructions to taxpayers).

2 Requested rulings.-- List the rulings being requested in the exact wording desired, and provide statutory, regulatory, or other authority for their issuance.

3 Taxpayer's memorandum.-- Submit the information required by section 9.03 of *Rev. Proc. 86-1* (relating to relevant authorities regarding the tax results of the transaction).

SECTION 346 CHECKLIST QUESTIONNAIRE

2-C Taxation of Securities Transactions 1

1 PURPOSE

The purpose of this Revenue Procedure is to update *Rev. Proc. 73-36, 1973-2 C.B. 496*, which sets forth in a convenient checklist questionnaire the information necessary to be included in a request for a ruling under *section 346 of the Internal Revenue Code* (and its related sections, 331 and 336) which relates to a distribution by a corporation in partial liquidation.

18 of 52 DOCUMENTS

APPENDIX C: Revenue Procedure 81-42

Checklist of information to be included in request for ruling under IRC Section 346 (now Section 302(b)(4))

SECTION 346 CHECKLIST QUESTIONNAIRE

2-C Taxation of Securities Transactions 2

2 BACKGROUND

The Internal Revenue Service receives many requests for rulings in which the information furnished as to the proposed transaction is not complete enough to permit a determination to be made. In such cases it is necessary to secure additional facts from the taxpayer before the ruling request can be considered. This procedure is time-consuming for both Service personnel and taxpayers and delays issuance of the final ruling letter. This checklist will facilitate the filing of requests for rulings under section 346 of the Code by showing specific information which should be included so that the application will be as complete as possible when originally filed.

However, since the information necessary to rule on a particular transaction depends upon all the facts and circumstances of that case, information in addition to that suggested in this revenue procedure may be required. Nevertheless, careful use of the checklist should avoid much needless delay and permit the issuance of rulings in the most expeditious fashion possible.

The authority and general procedures of the National Office of the Service and of the Office of the District Directors of Internal Revenue with respect to the issuance of rulings and determination letters are outlined in *Rev. Proc. 80-20, 1980-1 C.B. 633*, as amended by *Rev. Proc. 81-33, 1981-32 I.R.B. 19*. See also *Rev. Proc. 81-10, 1981-13 I.R.B. 44*. Careful attention to all the requirements of those revenue procedures will serve to minimize needless delays in processing requests for rulings.

APPENDIX C: Revenue Procedure 81-42

Checklist of information to be included in request for ruling under IRC Section 346 (now Section 302(b)(4))

SECTION 346 CHECKLIST QUESTIONNAIRE

2-C Taxation of Securities Transactions 3

3 CHANGES

.01

Section 1 has been changed to indicate that the purpose of the revenue procedure is to update *Rev. Proc. 73-36*.

.02

Sections 2 and 4 and the index have been modified by substituting more complete and updated numbering and references. The present section 4 was section 3 in the prior revenue procedure.

.03

Section 4 has been modified to emphasize the desirability of providing all the information requested in the checklist, or, if appropriate, briefly stating why a checklist item is believed not to be nonapplicable.

.04

Section 4.01-1 has been modified to provide that references in this revenue procedure to the Distributor corporation include a liquidating subsidiary of such Distributor.

.05

Section 4.01-3 has been expanded regarding whether the identical issue presented in the ruling request is, or has been, under consideration elsewhere in the Service.

.06

Section 4.02-2(a) has been expanded to request a description of the continuing business.

.07

Section 4.02-2(c) has been expanded to include termination of a business (as well as a contraction), and to request a five-year dividend history for the Distributor.

.08

Section 4.02-2(d)(1)(A) has been expanded to request information as to whether reduced assets were active or passive.

.09

Section 4.02-2(d) also has been expanded to request information as to the amount of assets to be reduced, and to request any other information demonstrating a contraction or termination.

.10

Section 4.02-2(g) has been modified by having the term "cash" also reference cash equivalents and by requesting a breakdown between United States and foreign cash.

11

. Section 3.02-2(g)(3)(B)(ii) has been expanded to request information whether proceeds from sales, etc., will be segregated in a special account and not used in the continuing business of the Distributor.

.12

Section 4.02-2(g)(5) has been added to request a statement that the distributed assets are assets that were actively used in the business or the proceeds from their sale, and not substituted assets.

.13

Section 4.03-3 has been modified by changing section 453(d) to section 453B and adding sections 1248, 1254, and LIFO inventory.

.14

Section 4.03-4 is modified by deleting the phrase "other than cash."

.15

Section 4.05 has been expanded to request information as to employment agreements between the Distributor corporation and its shareholders.

.16

Section 4.06 has been expanded to show representations that must be included in a taxpayer's ruling request.

.17

Section 4.07 has been added to deal with related or multiple transactions in addition to the partial liquidation.

APPENDIX C: Revenue Procedure 81-42

Checklist of information to be included in request for ruling under IRC Section 346 (now Section 302(b)(4))
SECTION 346 CHECKLIST QUESTIONNAIRE

2-C Taxation of Securities Transactions 4

4 INFORMATION TO BE INCLUDED IN REQUESTS FOR RULINGS UNDER SECTION 346 OF THE CODE

Each of the items included in this section should be specifically dealt with in the application even though some may not appear to be applicable. Presentation of the information required should follow the format of this revenue procedure as closely as possible with appropriate descriptive headings. If an item is believed not to be applicable, say so, and briefly explain why it does not apply. Processing ruling requests is significantly expedited by providing all the information requested in exactly the order in which it is requested herein.

.01 Information regarding the liquidating corporation.

1 Identification.-- Name, taxpayer identification number, and place and date of incorporation of the liquidating corporation (the Distributor). If the transaction also includes a liquidation of a subsidiary of the Distributor, then, throughout this checklist questionnaire, the information requested should be furnished with regard to both the Distributor and such liquidating subsidiary.

2 Tax year.-- The last day of the Distributor's taxable year.

3 Jurisdiction.-- Identify the District Office that will have audit jurisdiction over the return of the Distributing corporations and state whether to the best of the knowledge of the taxpayer and the taxpayer's representative(s), if any, the identical issue is in a return of the taxpayer (or of a related taxpayer within the meaning of section 267 of the Code, or a member of an affiliated group of which the taxpayer is also a member within the meaning of section 1504) and, if

2-C Taxation of Securities Transactions 4

so, whether the issue (1) is being examined by a District Director, (2) has been examined and the statutory period of limitation on assessment or refund of tax has not expired or a closing agreement covering the issue or liability has not been entered into by a District Director, (3) is being considered by an Appeals office in connection with the taxpayer's return for an earlier period, or that issue has been considered by an Appeals office and the statutory period of limitation on assessment or refund of tax has not expired or a closing agreement covering the issue of liability has not been entered into by an Appeals office, or (4) is pending in litigation in a case involving the taxpayer or a related taxpayer. The request must contain a statement whether, to the best of the knowledge of the taxpayer and the taxpayer's representative(s), the identical or similar issue has been ruled on by the Service to the taxpayer or to the taxpayer's predecessor and, if so, when and with what results. If after the request is filed but before a ruling is issued, the taxpayer knows that an examination of the issue by a District Director has been started, the taxpayer must notify the National Office of such action. If a return is filed before a ruling is received from the National Office concerning the return, a copy of the request must be attached to the return. This alerts the District Office and avoids premature District action on the issue.

.02 Type and description of partial liquidation.

1 Series of distributions in complete liquidation.-- If it is contended the distribution is one of a series of distributions in redemption of all of the stock of the Distributor, furnish the following information:

a Reasons.-- Give reasons why the Distributor is being liquidated in a series of distributions rather than in one distribution.

b Expected date and amount of each of the distributions.-- In this respect, see Sec. 4.017 of *Rev. Proc. 81-10*, which states that rulings will not ordinarily be issued on the tax effect to shareholders of the liquidation of a corporation by a series of distributions, where the distributions in liquidation are to be made over a period in excess of three years from the adoption of the plan of liquidation.

c Dissolution.-- State whether the Distributor will be dissolved at the time of the final distribution in complete liquidation. If it will not, give the reasons for not dissolving it.

2 Distribution not essentially equivalent to a dividend.-- If it is contended the distribution is not essentially equivalent to a dividend within the meaning of section 346(a)(2) of the Code, furnish the following information:

a General information as to the business or businesses of the Distributor, both before and after the transaction.

2-C Taxation of Securities Transactions 4

1 Description.-- Furnish a full and complete description of the business of the Distributor, identify the business terminated or contracted, and describe in detail the business to be continued.

2 How and when the business or businesses were acquired.

(A)

Acquired from another person.--If the business or businesses were acquired within the past five years from other persons, identify the persons, their relationship to the Distributor or its shareholders, the type of transactions in which they were acquired, the consideration given in exchange, the date of the transactions, and the amount of gain or loss, if any, recognized on the transactions.

(B)

Initiated by the Distributor.--If the business or businesses were commenced within the past five years by the Distributor, give the source of the capital and assets used to commence and operate each business and give the dates the operation of each business commenced.

b Termination of a business.-- If it is contended the distribution is not essentially equivalent to a dividend because of the termination of a business within the meaning of section 346(b) of the Code, furnish the following information.

1 Active business.-- Furnish the information necessary to establish that the businesses are "active businesses" within the meaning of *section 1.355-1(c) of the Income Tax Regulations*.

2 Five-year requirement.

(A)

Date terminated.--Give the date the business operations were terminated.

(B)

Continuous and continued operation.--State whether the businesses have been continuously and actively conducted within the meaning of *section 1.355-1(c) of the regulations* for the five-year period immediately preceding the date of sale (see 4.02-2(g)(3)(B) below) or distribution (see 4.02-2(g)(3)(A) below) of the assets of the terminated business and whether the remaining businesses will continue to be actively operated.

2-C Taxation of Securities Transactions 4

c Genuine or bona fide contraction or termination of a business.-- If it is contended the distribution is not essentially equivalent to a dividend because of a genuine or bona fide contraction of the Distributor's business within the meaning of section 346(a)(2) of the Code or a termination of a business within the meaning of section 346(b), furnish the following information:

1 Involuntary.-- If the contraction or termination was involuntary in that it was beyond the control of the Distributor, describe the conditions or causes of the contraction such as a fire, flood, storm, condemnation, loss of a franchise, etc.

2 Voluntary.-- If the contraction or termination was voluntary, give the business purpose for, and a complete description of, the circumstances, conditions, or transactions leading to the contraction.

3 Date or period contracted or terminated.-- If the contraction or termination was involuntary give the date of the incident leading to the contraction. If the contraction or termination was voluntary, give the dates on which the contraction commenced and was completed.

4 Dividends paid.-- Give the dates and amounts of all dividends paid by the Distributor in the last five years.

d Reductions resulting from the termination or contraction of a business.

1 Assets.

(A)

Description.--Describe those assets of the Distributor which have been or will be reduced, and identify each asset reduction with the terminated business or the involuntary or the voluntary acts described in 4.02-2(c)(1) or 4.02-2(c)(2) above. Relate these assets to those assets described in 4.02-2(g)(1) and (2) ("Distribution of assets") below. State whether the assets being reduced are actively used in the business or are passive assets. For either voluntary or involuntary contractions, give the fair market value, net and gross, of both the reduced active assets and the retained assets.

(B)

Disposition other than by distribution.--If the Distributor will sell, lease, or otherwise dispose of any property, other

than by distribution to the shareholders, furnish the following information:

(i) Transaction.--Describe the assets to be disposed of and the type of transaction.

(ii)

Basis and amount realized.--Give the tax basis and the amount and type of consideration to be received in exchange, including insurance proceeds and condemnation award if applicable.

(iii)

Relationship of acquiring party.--Identify the person acquiring the assets, and give the relationship, direct or indirect, of the Distributor and its shareholders to that person, including, if a corporation, the number of shares of stock the Distributor and its shareholders own in the acquiring corporation.

(C)

Inventory.--If any inventory will be sold other than in the ordinary course of business, furnish the following:

(i) Average inventory.--A statement whether the items in such inventory were substantially similar to, and substantially the same in quantity as, those during the prior five-year period.

(ii)

Bulk sale.--A statement whether the inventory will be sold in "bulk" and the number of persons purchasing the inventory.

(D)

Actively used in operations.--Furnish a statement whether all of the assets which will be distributed to the shareholders, or those assets which will be sold and the proceeds from the sale distributed, were being actively used in operations at the time of termination or contraction of the business, and whether such assets had been actively used for the past five years, or were replacements of assets actively used for such period, or whether such assets are or were idle, passive or investment assets.

2 Gross sales, fees, etc.-- Give the average annual amount of gross sales, fees, etc. of the terminated or contracted business over the past five years, the percentage of that gross to the total gross of the Distributor and the amount the total gross will be reduced as a result of the termination or contraction.

2-C Taxation of Securities Transactions 4

3 Employees.-- Give the number of employees of the Distributor whose services will be terminated and who will be discharged as a result of the termination or contraction and the percent that number is of the total number of employees of the Distributor.

4 Other reductions.-- Furnish any other information demonstrating a contraction or termination of the business such as reductions in territory, floor space, production, fixed assets, activities, etc.

e Changes in business and assets of the Distributor.

1 Past changes.

(A)

Business activity.--Describe any substantial changes in the business activities of the distributor during the past five years in addition to the one on which this application is based, such as acquisitions, expansions, conversions, and other contractions or terminations.

(B)

Assets.--Describe any substantial changes in assets during the past five years other than those occurring in the normal course of business, such as an unusual or abnormal increase in working capital, extraordinary sales, purchases, replacements, and renovations of fixed and operating assets, and shifts, transfers, or loans of assets (including working capital) from one business activity to another including the business terminated or contracted.

2 Proposed changes.-- Describe any acquisitions, expansions, additions, conversions, renovations, or replacements of business activity or assets proposed for the future and the source of funds and capital for such changes.

f Other factors relevant in determining whether there is a true termination or genuine contraction.

1 Information as to source of assets to be distributed.-- A statement whether the assets to be distributed or proceeds from sale of assets, are from the following sources:

(A)

2-C Taxation of Securities Transactions 4

Expansion reserve.--A reserve for expansion no longer needed.

(B)

Business decline.--A mere decline in, or loss of, business.

(C)

Working capital decrease.--A mere decrease in need for working capital.

(D)

Nominal business.--Proceeds from the sale of a business which is nominal in relation to the entire business of the Distributor.

(E)

Loss business.--A business operated at a loss which acquired assets from another business of the Distributor.

2 Purpose of distribution.

(A)

The Distributor's purpose.--State the business purpose of, and the advantages to, the Distributor in making the distribution.

(B)

Shareholder purpose.--State the reasons why the shareholders desire this distribution, their part in formulating and approving the plan, and the advantages to the shareholders as a result of the distribution.

g Distribution of assets.

1 Property other than cash (including negotiable instruments and other cash equivalents within the meaning of *Rev. Rul. 66-290, 1966-2 C.B. 112*).--Describe fully all types and categories of property, tangible and intangible, other

than cash, to be distributed by the Distributor to the shareholders.

2 Cash (including negotiable instruments and other cash equivalents within the meaning of *Rev. Rul. 66-290*).

(A)

Amount.--State the total amount of cash to be distributed, and whether it is United States or foreign cash.

(B)

Source.--Furnish a statement whether the amount to be distributed will be limited to the following:

(i) Working capital.--The portion of the working capital reasonably attributable to the terminated or contracted business activities and no longer required in the operation of the continuing business activities. See *Rev. Rul. 60-232*, 1960-2 C.B. 115, and *Rev. Proc. 81-10*.

(ii)

Net proceeds.--The amount realized on the sale of assets of the business terminated or contracted (or insurance proceeds or condemnation award) less all liabilities attributable to those assets retained or distributed in kind (including all expenses and taxes incurred on the sale and those incurred in connection with the distribution).

3 Timely distributions.

(A)

Date of distributions.--Give the dates, or expected dates, of distributions of all assets pursuant to the plan of partial liquidation. State whether all distributions pursuant to the plan will be made within the taxable year in which the plan is adopted or within the succeeding taxable year.

(B)

Proceeds from sale, insurance benefits, condemnation award, etc.

(i) Time between receipt of proceeds and distribution.--Give the dates of sale, destruction, or condemnation, and receipt of proceeds therefrom. If there is any time lag between the receipt of proceeds and distribution, give the reasons.

(ii)

Use of proceeds between time of receipt and distribution.

(a) Temporary investments.--Describe how the proceeds will be maintained before the distribution, the type of investment, if any, and how the investment was or will be disposed of. Will the proceeds be segregated in a special account and not used in the Distributor's continuing business?

(b) Gain, income or loss on temporary investments.--State the amount of gain, income or loss realized on the temporary investment and the disposition of any such gain or income.

4 All assets or proceeds from terminated business distributed.-- If it is contended the partial liquidation is a termination under section 346(b) of the Code, furnish a statement that all assets or net proceeds from the sale of the assets will be distributed. If all such assets will not be distributed, give reasons why and explain how the undistributed assets will be used by the Distributor in the future.

5 Distributed assets are not to be substituted assets.-- State that the distributed assets are assets that were being actively used in a business, or the proceeds from their sale, and not substituted assets. See *Rev. Rul. 79-275, 1979-2 C.B. 137*.

h Discharge or disposition of liabilities.

1 Amount.-- Furnish the amount of liabilities of the terminated or contracted business.

2 Discharge.-- State the source of the funds that will be used to discharge these liabilities.

3 Reduction in distribution.-- State whether the property of the terminated or contracted business or the proceeds which will be distributed to the shareholders from the sale of such property will be reduced by the amount of such liabilities. See 4.02-2(g)(1)(B)(ii) above.

4 Assumption by shareholders.-- Furnish the amount of liabilities, if any, to be assumed by each of the distributee-shareholders, the amount of liabilities to which the property distributed is subject, the adjusted basis of the property distributed to each such shareholder in the hands of the Distributor, and the fair market value of the property distributed to such shareholder.

.03 *Recognition of gain or income to the Distributor.*-- If it is contended that neither gain nor income will be

2-C Taxation of Securities Transactions 4

recognized to the Distributor upon the distribution of property, state the reasons, including statements with respect to the following:

1 Unreported or anticipatory assignment of income.-- State whether the Distributor will distribute any assets which represent earned income to shareholders, such as receivables being reported on a cash basis, unfinished construction contracts, commissions due, or other assets resulting in an anticipatory assignment of income.

2 Reserve for bad debts.-- If the Distributor will distribute to its shareholders any receivables, state the amount of any reserve for bad debts related to the receivables.

3 Installment obligations and recapture provisions.-- State whether the Distributor will distribute to the shareholders in partial liquidation any installment obligations (section 453B of the Code), property described in sections 48, 341(f), 617(d), 1245(a), 1248, 1250(c), 1251(e), 1252(a), or 1254, or LIFO inventory distributed pursuant to a plan adopted after December 31, 1981 (See section 336(b)), or other assets the cost of which had previously been deducted for federal income tax purposes.

4 Sale, lease, or other disposition of property.-- State whether the shareholders will sell, lease, or otherwise dispose of any property received in the distribution. If they will, describe the assets to be so disposed of and the transaction, including the consideration to be received in exchange. Identify the person acquiring the assets, and give the relationship, direct or indirect, of the Distributor and its shareholders to that person including, if a corporation, the number of shares of stock the Distributor and its shareholders own in the acquiring corporation.

.04 Redemption of stock.

1 Description of outstanding stock.-- Furnish a complete description of each class of the Distributor's stock outstanding, setting forth the rights and privileges of each class.

2 Ownership of Stock.-- State whether the stock is closely or widely held, and if the former, identify the shareholders, the number of shares of each class held by each shareholder, and the relationship of the shareholders to each other. If widely held, give the number of shareholders and the largest number of shares held by a shareholder.

3 Shares Redeemed.

a Number.-- Give the number of shares of each class of stock of the Distributor to be redeemed from each

shareholder.

b None redeemed.-- If no shares of stock of the Distributor will be surrendered, give reasons why the distribution should not be considered a dividend.

c Non pro rata redemption.-- If the distribution of property or redemption of stock will be non pro rata, submit reasons.

4 Transactions in which stock to be redeemed was acquired if stock is closely held and acquired within last five years.

a When acquired.-- Give the dates on which the stock was acquired.

b From whom acquired.-- Identify the person or entity from whom the stock was acquired and the relationship of such person to any of the shareholders of the Distributor.

c Consideration.-- Describe the amount and kind of consideration paid or transferred for the stock.

5 Other factors affecting the taxable status of the distribution.

a Declared but unpaid dividends.-- State whether there are any declared but unpaid dividends on any of the stock to be redeemed.

b Distribution in redemption of stock under section 302 of the Code.-- If it is contended any part of the distribution will qualify as one in redemption of stock under section 302, state the amount, identify the shareholders, and furnish information necessary to make a determination under section 302. See *sections 1.302-1(b) and 1.346-2 of the regulations*. See also *Rev. Proc. 73-35, 1973-2 C.B. 490*.

6 Value of stock redeemed.-- State whether the fair market value of the assets distributed to each shareholder will be equal to the fair market value of the stock surrendered by each shareholder in the exchange. If it will not, give a complete explanation.

.05 General.

1 Covenants not to compete.-- If a business of the Distributor will be sold or otherwise acquired by another person, state whether the Distributor will receive consideration for an agreement not to compete with the acquiring person. If it will, state whether such consideration will be included in the distribution to the shareholders.

2 Documents.-- Submit copies of the following documents:

a Plan of complete or partial liquidation.-- If no formal plan of liquidation has been or will be adopted, state whether the plan has been or will be approved by the directors and shareholders, and give the date or expected date of approval or adoption.

b Financial statements.-- Submit year-end balance sheets and profit and loss statements for each of the past five years.

.06 Assumptions or representations.-- Furnish all applicable assumptions and representations including the following representations:

(i) There is no plan or intention to completely liquidate the Distributor.

(ii)

The Distributor has no plan or intention to reenter a terminated business or to expand its continuing business operations other than through normal internal growth.

(iii)

The liquidation will not be preceded or followed by the reincorporation in, or transfer or sale to, a recipient corporation (Recipient) of any of the business or assets of the Distributor, if persons holding more than 20 percent in value of the stock in the Distributor also hold more than 20 percent in value of the stock in the Recipient. Representation (i) above does not apply when there will be a series of distributions in complete liquidation under section 346(a)(1) of the Code.

.07 Transactions in addition to the partial liquidation.

2-C Taxation of Securities Transactions 4

1 Multiple transaction.-- Describe any property the shareholders will transfer or surrender in the transaction, other than stock of the Distributor, and the consideration to be received in exchange therefor.

2 Shareholder and the Distributor in dual capacity.-- State whether all or any part of the consideration from the Distributor will be received by a shareholder as a debtor, creditor, employee, or in some capacity other than that of a shareholder of the Distributor whose stock is being redeemed pursuant to sections 331 and 346 of the Code.

3 Related transactions.-- If the request deals with only one step of a larger integrated transaction, the facts, circumstances, etc., relating to the entire transaction must be submitted.

SECTION 355 CHECKLIST QUESTIONNAIRE

2-E Taxation of Securities Transactions 1

1. PURPOSE

This revenue procedure updates *Rev. Proc. 86-41, 1986-2 C.B. 716*, which sets forth in a checklist questionnaire the information that must be included in a request for rulings under section 355, relating to the nonrecognition of gain or loss on distributions of stock and securities of controlled corporations.

APPENDIX E: Revenue Procedure 96-30, as Modified and Amplified by Revenue Procedure 2003-48
Checklist of information to be included in request for ruling under IRC Section 355 IRC Section 355
SECTION 355 CHECKLIST QUESTIONNAIRE

2-E Taxation of Securities Transactions 2

2. BACKGROUND

This checklist is intended to facilitate the filing and processing of ruling requests under section 355. It specifies information and representations to be included so that the requests will be as complete as possible when initially filed. Nevertheless, because the information and representations necessary to rule on a particular transaction depend upon all the facts and circumstances, the Service may require information or representations in addition to those set forth in this revenue procedure.

The general procedures of the Internal Revenue Service with respect to the issuance of letter rulings and determination letters by the National Office are outlined in the first revenue procedure published each year (the "annual revenue procedure"). See, e.g., *Rev. Proc. 96-1, 1996-1 I.R.B. 8*. The Service also publishes a revenue procedure, generally in the first Internal Revenue Bulletin of the year, which provides a list of those areas of the Code under the jurisdiction of the Associate Chief Counsel (Domestic) for which the Service will not issue advance letter rulings. See, e.g., *Rev. Proc. 96-3, 1996-1 I.R.B. 82*. The Service periodically updates these revenue procedures, along with this checklist questionnaire.

Careful attention to all requirements of the most recent revenue procedures, including this checklist questionnaire, will aid in the timely processing of ruling requests. Failure to submit the requisite information and representations will often delay consideration of the transaction and the issuance of a letter ruling.

SECTION 355 CHECKLIST QUESTIONNAIRE

2-E Taxation of Securities Transactions 3

3. CHANGES

This revenue procedure substantially modifies *Rev. Proc. 86-41*. The principal changes are to add to, delete, or modify the information and representations requested, and to add an appendix that provides guidelines with respect to ruling requests involving certain corporate business purposes. This document also revokes section 3.01(23) of *Rev. Proc. 96-3*, which sets forth "no rule" positions regarding certain corporate business purposes.

2-E Taxation of Securities Transactions 4

4. INFORMATION TO BE INCLUDED IN REQUESTS FOR RULINGS UNDER SECTION 355

This section describes the information and representations to be provided in a section 355 ruling request. The presentation of the information and representations in the ruling request should follow the organization of this section and use appropriate descriptive headings. Taxpayers are welcome to provide a narrative description of the transaction to supplement (but not substitute for) the presentation requested in this section.

A ruling request should address each item in this section and provide all facts relevant to the transaction. If an item is not applicable, so state and briefly explain why.

Standard representations are set forth throughout this section and are highlighted by the word "representation" in boldface type. The representations are necessary to ensure that specific statutory and judicial requirements, and administrative ruling guidelines relating thereto, are satisfied. Each representation should be submitted in the language requested. If a representation cannot be submitted exactly as requested, an explanation must be given. Deviation from the language of the representations should be avoided, except as required by the facts being described. Unnecessary variations may delay processing the ruling request and will not be accepted unless reasons satisfactory to the Service are submitted.

The terms "Distributing" and "Controlled" in this document refer to the "distributing corporation" and "controlled corporation" as described in section 355(a)(1)(A). References to the term "distribution" include a distribution of stock or securities of Controlled with respect to Distributing stock, an exchange of Distributing stock or securities for Controlled stock or securities, or some combination thereof, as the context requires.

Requests for information and representations regarding Distributing or Controlled include, as the context requires, a request for information (or representations) regarding a successor of Distributing or Controlled. For example, if Distributing will merge with an acquiring corporation after the distribution, the representation requested in section 4.03(8) of this revenue procedure (that is, Distributing will continue to conduct its business) should be modified to include a similar representation under penalties of perjury by the acquiring corporation regarding the continuing

conduct of Distributing's business after the merger, in addition to Distributing's representation. Similarly, the representation requested in section 4.05(1) of this revenue procedure (that is, there is no plan or intention by the Distributing shareholders to dispose of their shares in Distributing), should be modified to include a similar representation regarding dispositions of acquiring corporation shares by the Distributing shareholders. If a taxpayer believes that information regarding, or a representation by, a successor is inappropriate or should be modified, the taxpayer must explain why.

.01 Information regarding Distributing and Controlled

(1) Identification.-- State the name, employer identification number, and place and date of incorporation of Distributing and Controlled. If Controlled is not in existence, state its proposed name and place of incorporation. If Distributing joins in the filing of a consolidated federal income tax return, provide the name and employer identification number of the common parent corporation of the affiliated group.

(2) Jurisdiction.-- Identify the District Office that has or will have examination jurisdiction over the return of Distributing (sometimes referred to below as the "taxpayer") and of Controlled.

(1) Taxable year.--

State the last day of the taxable year of Distributing and Controlled.

.02 Ownership of interests in Distributing and Controlled

(1) Capital structure of Distributing and Controlled immediately prior to the distribution.-- Under a separate heading for each corporation, provide the following information with respect to the stock and securities of Distributing and Controlled that will be outstanding immediately prior to the distribution:

(a) A complete description of each class of stock, setting forth the rights and privileges of each class, including voting or nonvoting rights, dividend and liquidation preferences or limitations, and whether classified as common or preferred stock.

(b) A list of the number of shares and the percentage of each class of stock owned by each shareholder prior to the distribution. However, if the corporation has more than 100 shareholders, the taxpayer need only list those shareholders owning 5 percent or more of any class of stock, and state the total number of other shareholders together with the total number of shares and the percentage that these other shareholders own of each class of stock.

(c) A description of any existing, planned, or intended agreements, such as a voting trust, affecting the rights of any shareholder. However, if the corporation has more than 100 shareholders, the taxpayer need only describe agreements affecting shareholders owning directly, or as a result of the agreement, controlling, 5 percent or more of any class of stock.

2-E Taxation of Securities Transactions 4

(d) A description of any securities and all other outstanding interests (bonds, debentures, notes, warrants, options, puts, etc.) and a brief explanation as to whether any of these items should be considered a stock interest.

(2) Foreign shareholders.-- If Distributing has any foreign shareholders, state whether: (i) Distributing or Controlled was a United States real property holding corporation (as defined in section 897(c)(2)) at any time during the 5-year period ending on the date of the distribution, and (ii) Distributing or Controlled will be a United States real property holding corporation immediately after the distribution. See section 367(e)(1) and section 897. In addition, if Distributing is publicly traded, provide a list of all foreign persons owning 5 percent or more of Distributing stock either before or after the distribution. If Distributing is not publicly traded, provide a list of all foreign persons owning stock of Distributing either before or after the distribution. See section 4.08(7) of this revenue procedure for additional information regarding foreign parties.

(3) Description of stock, securities, and other property being distributed.

(a) Stock.-- State the number of shares and percentage of each class of stock of Controlled being distributed. In addition, if preferred stock is being distributed and it is contended that this stock is not "section 306 stock," within the meaning of section 306(c), fully explain the reasons for this contention.

(b) Securities.-- State the principal amount of each series of securities of Controlled being distributed.

(c) Other Property.-- Provide complete details as to any property, other than stock and securities of Controlled, to be distributed or received in the transaction including, but not limited to, cash, stock rights, warrants, or the payment of expenses incurred in connection with the transaction (see section 356).

(d) Timing.-- State the date of the distribution and whether all the stock, securities, and other property will be distributed on that date. If all the stock, securities, and other property are not being distributed on the same date, state the approximate length of, and the reasons for, the delay in the distribution.

(e) Planned stock issuances, etc.-- Describe any planned or intended stock issuances, redemptions, or dispositions of Controlled shares. Explain the effect of any of these transactions on the distribution-of-control requirement of section 355(a)(1)(D), and if property is being transferred from Distributing to Controlled, the effect on the control-immediately-after requirement of section 368(a)(1)(D).

(f) Obtaining control.-- State whether Distributing has modified or will modify its ownership of Controlled stock, such as in a recapitalization, within the 5-year period preceding the distribution with the result that Distributing obtained

2-E Taxation of Securities Transactions 4

or will obtain control of Controlled, as defined in section 368(c). Provide complete details, including the information requested in section 4.08(8) of this revenue procedure, with respect to such modifications.

(4) Ownership of stock and securities in controlled immediately after the distribution.

(a) Interests in Controlled to be held by Distributing (see section 1.355 2(e) of the Income Tax Regulations).

(i) Retention of stock, securities, or options.-- State the number of shares and percentage of each class of stock in, and the principal amount of each series of securities of, Controlled to be held by Distributing after the distribution and the length of time Distributing will hold this interest. Describe any options that Distributing will hold after the distribution to acquire stock in Controlled and the length of time Distributing will hold these options.

(ii) Retention of debt.-- If Controlled will be indebted to Distributing after the distribution of Controlled stock, submit the following REPRESENTATION: *The indebtedness owed by the controlled corporation to the distributing corporation after the distribution of the controlled corporation stock will not constitute stock or securities.*

(iii) Purpose for Distributing holding stock, securities, or options in Controlled.-- If Distributing will hold stock, securities, or options in Controlled after the distribution, explain the reasons therefor and why this should not be viewed as in pursuance of a plan having as one of its principal purposes avoiding federal income tax. See Appendix B of this revenue procedure regarding favorable rulings with respect to the retention of stock, securities, or options. State whether a distribution of all the stock or securities of Controlled would be treated to any extent as a distribution of "other property" under section 356.

(b) Interests in Controlled to be held by shareholders of Distributing.

(i) Distributions or exchange.-- State whether the distribution of Controlled stock will be pro rata or non pro rata with respect to the shareholders of Distributing. Fully describe the transaction between Distributing and its shareholders.

(ii) Stock ownership.-- State the number of shares and the percentage of each class of stock outstanding in Distributing and Controlled that will be owned by each shareholder immediately after the distribution. However, if there will be more than 100 shareholders immediately after the distribution, the taxpayer need only list those shareholders who will own 5 percent or more of any class of stock, and state the expected total number of other shareholders together with the expected total number of shares and the expected percentage that these other shareholders will own of each class of stock.

2-E Taxation of Securities Transactions 4

(iii) Securities.-- Identify any shareholders of Distributing receiving securities of Controlled and state the principal amount of each series of securities to be received in the transaction. With respect to each shareholder, state the principal amount of each series of Distributing securities to be surrendered in the transaction, or, if no securities are being exchanged, so state. See section 1.355-2(f)(1).

(iv) Surrender of stock.-- If one or more Distributing shareholders will surrender Distributing stock in the transaction, submit the following REPRESENTATION: *The fair market value of the controlled corporation stock and other consideration to be received by each shareholder of the distributing corporation will be approximately equal to the fair market value of the distributing corporation stock surrendered by the shareholder in the exchange.*

(c) Interests in Controlled to be held by security holders of Distributing.-- Identify those security holders of Distributing receiving Controlled stock, the total number of shares of each class of stock being received, and the principal amount of the securities of Distributing being exchanged. Identify those security holders of Distributing receiving securities of Controlled, the principal amount being received by each holder, and the principal amount of the securities of Distributing being exchanged. See section 1.355-2(f)(1). If no securities are being exchanged, so state. If the securities are, or, immediately after the distribution, will be, held by more than 100 security holders, identify only those security holders that will own 5 percent or more of the outstanding shares of any class of Controlled stock or of any outstanding series of Controlled securities immediately after the distribution.

(d) Receipt of consideration other than with respect to stock or securities.

(i) Shareholder in dual capacity.-- Submit the following REPRESENTATION: *No part of the consideration to be distributed by the distributing corporation will be received by a shareholder as a creditor, employee, or in any capacity other than that of a shareholder of the corporation.*

(ii) Security holder in dual capacity. -- If consideration will be distributed to security holders, submit the following REPRESENTATION: *No part of the consideration to be distributed by the distributing corporation will be received by a security holder as an employee or in any capacity other than that of a security holder of the corporation.*

(iii) Other transfers.-- State whether the shareholders or security holders of Distributing will transfer or surrender any property in the transaction other than stock or securities of Distributing. If so, provide full details. Information concerning the businesses of Distributing and Controlled (see generally section 1.355-3)

.03 *Information concerning the businesses of Distributing and Controlled.*

(1) Description of businesses.-- Describe each line of business engaged in by Distributing, Controlled, and their respective subsidiaries, whether or not the business will be relied upon to meet the requirements of section 355(b). Note which corporations are engaged in each line of business.

(2) Distributing's Active Businesses.-- Submit a complete description of each trade or business that will be relied upon to meet the requirements of section 355(b) (an "Active Business"), that is conducted directly by Distributing, and that will be retained by Distributing. Provide the following information with respect to each such Active Business:

(a) Active conduct during the preceding 5-year period.-- Provide all information necessary to establish that the Active Business is a trade or business that has been actively conducted for the entire 5-year period ending on the date of the distribution (within the meaning of section 1.355-3(b)(2) and (3)). In general, the description should conclusively show that substantial managerial and operational activities have been directly carried on by the Active Business during each of the past 5 years.

(b) Employee Information.-- If the Active Business employed fewer than 50 full-time employees during any of the past 5 years, submit separate lists for each of the past 5 years showing the job titles of the Active Business' employees, the function (managerial, operational, or other) of each position, and the number of persons employed in each position. Include a brief description of the type of duties performed by each category of employee during each of these years.

(c) Nonemployee Information.-- If Distributing is required to submit the employee information specified in section 4.03(2)(b) of this revenue procedure with respect to an Active Business, also state whether Distributing uses persons who are not employees, such as independent contractors. If so, include a brief description of the duties they perform, and the percentage of the activities they perform for the Active Business.

(d) Continuous ownership of an Active Business during the preceding 5-year period.-- State whether the Active Business has been continuously conducted, within the meaning of section 1.355-3(b), by Distributing for the 5-year period ending on the date of distribution. Give the date Distributing commenced conduct of the Active Business or acquired the Active Business. If an Active Business has not been continuously conducted by Distributing for such 5-year period, see section 4.03(6) of this revenue procedure.

(e) Change in business.-- Describe any substantial change during the preceding 5-year period in the type of business activity conducted or the method of conducting business, such as substantial changes in: products or services offered, production capacity, assets owned or used, technology employed, sales or distribution channels, or locations. If the preceding 5-year period includes any time during which there was no business activity, or a significant amount of time during which there was a substantial reduction in business activity, identify the period of time, the type and amount of business activity during this period, and the reasons for the cessation or reduction in activity.

2-E Taxation of Securities Transactions 4

(f) Separation of real property, intellectual property, or other intangible property from user.-- State whether all or a portion of any real property, intellectual property, or other intangible property historically occupied or used by one business will be separated in the transaction from that business. If so, describe the property. State whether the business formerly using the property will continue to use the property after the transaction, and the terms upon which it will be allowed to use the property. Describe any other planned use of the property after the transaction. Explain the reason for separating the ownership of the property from its historic user.

(g) Balance sheets.-- Provide a copy of the most recent balance sheet of Distributing (including all applicable notes). The balance sheet should not be limited to assets and liabilities of Distributing's Active Businesses. Also submit any consolidated balance sheets prepared for financial accounting purposes that include Distributing.

(h) Profit and loss statements.-- Submit separate unconsolidated profit and loss statements (including all applicable notes) for each of the past 5 years for each Active Business. The statements must show that each business has had gross receipts and operating expenses (including employee expenses such as payroll withholding taxes) representative of the active conduct of a trade or business for each of the past 5 years. Submit the following REPRESENTATION: *The 5 years of financial information submitted on behalf of the distributing corporation is representative of the corporation's present operation, and with regard to such corporation, there have been no substantial operational changes since the date of the last financial statements submitted.*

(3) Description of Active Businesses being transferred by Distributing to Controlled.-- If, in connection with the plan, Distributing transfers all or part of the assets of one or more of its Active Businesses (see section 1.355-3(c), example (4)) to either a newly formed or pre-existing Controlled, identify and submit a complete description of each Active Business or part of an Active Business being transferred. Submit the information and representation required by section 4.03(2)(a) through (h) of this revenue procedure for each such Active Business, or part of an Active Business, being transferred. If property will be transferred from Distributing to Controlled, submit a pro forma balance sheet for Controlled reflecting the transfer of assets to Controlled and all liabilities to be assumed or to which the property transferred will be subject.

(4) Pre-existing Controlled's Active Businesses.-- If Controlled is a pre-existing corporation, submit a complete description of each Active Business conducted directly by Controlled. Submit the information and representation required by section 4.03(2)(a) through (h) of this revenue procedure with respect to each such Active Business, treating references to Distributing as references to Controlled, as appropriate.

(5) Indirect conduct of trade or business through ownership of stock in other corporations.-- If either Distributing or Controlled is not directly engaged in an Active Business but will be so engaged indirectly through ownership of stock and securities in one or more corporations controlled by it ("Other Corporations") immediately after the distribution, submit the information and representation required by sections 4.03(2)(a) through (h) of this revenue procedure (treating, for this purpose, each Other Corporation as Distributing or Controlled, as appropriate). In addition, if Distributing or Controlled is not directly engaged in an Active Business, submit the following REPRESENTATION:

2-E Taxation of Securities Transactions 4

Immediately after the distribution, at least 90 percent of the fair market value of the gross assets of [insert the name of the corporation so indirectly engaged] will consist of the stock and securities of controlled corporations that are engaged in the active conduct of a trade or business as defined in section 355(b)(2). See section 3.04 of Rev. Proc. 77-37, 1977-2 C.B. 568, 570.

(6) Changes in ownership of an Active Business during the 5-year period ending on the date of distributing.-- If an Active Business that is directly conducted by Distributing, Controlled, or an Other Corporation has been acquired by that corporation during the 5-year period ending on the date of distribution, identify the Active Business that was acquired and provide the following information with respect to that Active Business:

(a) Identity.-- Identify the party from whom the business was acquired, and the transferor's relationship, if any, to Distributing or its shareholders.

(b) Date.-- State the date the business was acquired and the period of time the business had been previously conducted by Distributing's, Controlled's, or Other Corporation's predecessor in interest.

(c) Transaction.-- Describe the transaction in which the business was acquired. For example, was the business acquired in a reorganization under section 368(a)(1), by purchase, or by some other means? If a letter ruling was issued with respect to the transaction, attach a copy.

(d) Consideration.-- State the consideration given in the acquisition.

(e) Gain or loss.-- State whether gain or loss was recognized, in whole or in part, to any party to the transaction and whether the basis of the assets acquired was determined, in whole or in part, by reference to the transferor's basis.

(7) Stock ownership during the preceding 5-year period (see section 355(b)(2)(D)).

(a) Stock of Controlled or Other Corporations continuously owned during the preceding 5-year period.-- Identify Controlled and Other Corporations whose shares have been continuously held by Distributing or Controlled for the 5-year period ending on the date of distribution.

(b) Stock of Controlled or Other Corporations acquired by Distributing, Controlled, or Other Corporations during the preceding 5-year period.-- If the stock of Controlled or Other Corporations has been acquired by Distributing, Controlled, or Other Corporations during the 5-year period ending on the date of the distribution, identify the stock that

2-E Taxation of Securities Transactions 4

was acquired and provide the following information with respect to that stock:

(i) Identity.-- Identify the party from whom the stock was acquired and the transferor's relationship, if any, to Distributing or its shareholders.

(ii) Date and consideration.-- State the date the stock was acquired and the consideration given in the acquisition.

(iii) Transaction.-- Describe the transaction in which the stock was acquired. For example, was the stock acquired in a section 368(a)(1) reorganization, by purchase, or by some other means? State whether control was acquired in a transaction in which Distributing transferred cash or other liquid or inactive assets to Controlled. See section 4.01(31) of *Rev. Proc.* 96-3. If a letter ruling was issued with respect to the transaction, attach a copy.

(iv) Gain or loss.-- State whether gain or loss was recognized, in whole or in part, to any party to the transaction and whether the basis of the stock acquired was determined, in whole or in part, by reference to the transferor's basis.

(c) Other changes in ownership.-- Provide complete details concerning any change in ownership of the stock of Distributing, Controlled, or Other Corporations during the 5-year period ending on the date of the distribution that is not fully described under section 4.03(7)(b) of this revenue procedure. For this purpose, a change of ownership includes, but is not limited to, acquisitions, redemptions, recapitalizations, stock dividends, and sales. Information regarding sales of stock to which the issuing corporation was not a party need not be provided if: (i) the sale occurred on a recognized stock exchange or in an established market, and (ii) both the purchaser and the seller held less than 5 percent of the corporation's stock both before and after the sale.

(8) Continuation of business.-- If the transaction involves the vertical division of a single Active Business, submit the following REPRESENTATION: *Following the transaction, the distributing and controlled corporations will each continue, independently and with its separate employees, the active conduct of its share of all the integrated activities of the business conducted by the distributing corporation prior to consummation of the transaction.* If the transaction involves the separation of two or more Active Businesses, submit the following REPRESENTATION: *Following the transaction, the distributing and controlled corporations will each continue the active conduct of its business, independently and with its separate employees.* Additionally, if, following the transaction, Distributing and Controlled will share the services of any employees, identify these employees, specify the services to be performed, the length of time the employees will be shared, the compensation arrangements, and explain why the services of these employees will be shared. In addition, describe any planned or intended substantial reduction in business activity for any Active Business. Generally, a substantial reduction in business activity does not include a vertical division of a single Active Business where Distributing and Controlled together continue all of the integrated activities of the Active Business.

.04 *Business purpose.*

(1) Detailed description.-- Describe in detail narrative form each corporate business purpose for the distribution of the stock of Controlled. Do not provide any documentation or substantiation in support thereof. Submit the following *REPRESENTATION: The distribution of the stock, or stock and securities, of the controlled corporation is carried out for the following corporate business purposes: [list these Corporate Business Purposes]. The distribution of the stock, or stock and securities, of the controlled corporation is motivated, in whole or substantial part, by one or more of these corporate business purposes.* The Service will decline to issue a letter ruling in all cases in which the taxpayer fails to submit the required representation. The National Office will not determine whether the distribution is being carried out for one or more corporate business purposes. This determination may be made upon an examination of the taxpayer's return.

.05 *Device.*

(1) Disposition of stock or securities.-- Submit the following *REPRESENTATION: The transaction is not used principally as a device for the distribution of the earnings and profits of the distributing corporation or the controlled corporation or both. See §355(a)(1)(B).* The Service will decline to issue a letter ruling in all cases in which the taxpayer fails to submit the required representation. The National Office will not determine whether the transaction is used principally as a device for the distribution of the earnings and profits of the distribution corporation, the controlled corporation, or both. The determination may be upon an examination of the taxpayer's return.

.06 *Continuity of shareholder interest.* The taxpayer must explain how the continuity of interest requirement will be satisfied. Generally, the Service will view this requirement as satisfied if one or more persons who, directly or indirectly, were the owners of the enterprise prior to the distribution own, in the aggregate, 50 percent or more of the stock in each of the modified corporate forms in which the enterprise is conducted after the separation. In appropriate cases, the Service may require a continuity of interest representation from the taxpayer.

.07 *Disqualified distribution.* Explain in detail why the distribution of Controlled stock, or of Controlled stock and securities, will not be a disqualified distribution within the meaning of section 355(d)(2). Generally, the explanation should set forth facts establishing that, taking into account the application of section 355(d)(6), (7), and (8), immediately after the distribution: (i) no person holds disqualified stock in Distributing that constitutes a 50 percent or greater interest in Distributing; and (ii) no person holds disqualified stock in Controlled that constitutes a 50 percent or greater interest in Controlled. It is not necessary for the taxpayer to submit information accounting for all of the stock of Distributing or Controlled if, by providing information with respect to a smaller amount of stock, it can establish that the distribution will not be a disqualified distribution.

.08 *Miscellaneous.*

(1) Transfers and transactions between Distributing and Controlled

(a) Contributions to capital.-- Provide complete details concerning any transfers of property by Distributing to Controlled in anticipation of or in connection with the transaction. For ruling purposes, such transfers ordinarily will be treated as occurring in connection with a reorganization pursuant to section 368(a)(1)(D). If a transfer of property from Distributing to Controlled will not qualify as a reorganization pursuant to section 368(a)(1)(D), and the taxpayer contends that section 351 applies to the transaction, submit the information and representations specified in *Rev. Proc. 83-59, 1983-2 C.B. 575*, as modified or superseded, or explain why an item is not being submitted.

(b) Liabilities.-- If Controlled is assuming liabilities submit the following REPRESENTATIONS:

(i) *The total adjusted bases and the fair market controlled corporation by the distributing corporation liabilities assumed by the controlled corporation plus assets are subject; and*

(ii)

The liabilities assumed in the transaction and the liabilities to which the transferred assets are subject were incurred in the ordinary course of business and are associated with the assets being transferred.

(c) Investment credit property.-- If any property is being transferred between Distributing and Controlled, state whether any investment credit determined under section 46 has been (or will be) claimed with respect to any of such property. If the answer is in the affirmative, submit the following REPRESENTATION: *The income tax liability for the taxable year in which investment credit property (including any building to which section 47(d) applies) is transferred will be adjusted pursuant to section 50(a)(1) or (a)(2) (or section 47, as in effect before amendment by Public Law 101-508, Title 11, 104 Stat. 1388, 536 (1990), if applicable) to reflect an early disposition of the property.* Alternatively, explain why no increase in tax will be required under section 50 (or section 47, as in effect before such amendment) as a result of the transaction.

(d) Matching of income and deductions.-- State the overall method of accounting of Distributing and Controlled. Further, state whether the transaction involves or will result in a situation in which one party recognizes income but another party recognizes the deductions associated with such income or one party owns property but another party recognizes the income associated with such property. See, for example, *Notice 95-53, 1995-44 I.R.B. 21*. If one or more parties use the cash method of accounting, explain the extent to which any actions have been or will be taken that are not in the ordinary course of business and that might affect the timing or the amount of any income or deduction to be recognized by a cash basis party to the transaction. See, for example, *Rev. Rul. 80-198, 1980-2 C.B. 113*. In addition, submit a statement as to whether any income items, such as accounts receivable, or any items resulting from a sale, exchange or disposition that would have resulted in income to Distributing, or any items of expense, will be transferred to Controlled. If any of these items are being transferred, fully explain. Further, submit the following REPRESENTATION: *The distributing corporation neither accumulated its receivables nor made extraordinary payment of its payables in anticipation of the transaction.* If Distributing uses the cash method of accounting or a

2-E Taxation of Securities Transactions 4

similar method and Controlled uses the accrual method or a similar method, a closing agreement will be required unless the taxpayer submits the following REPRESENTATION: *No income items, including accounts receivable or any item resulting from a sale, exchange or disposition of property, that would have resulted in income to the distributing corporation, and no items of expense will be transferred to the controlled corporation if the distributing corporation has earned the right to receive the income or could claim a deduction for the expense under the accrual or similar method of accounting.*

(2) Indebtedness.

(a) Cancellation of indebtedness.-- If any indebtedness has been or will be cancelled in connection with the transaction, give complete details concerning the principal amount of the indebtedness, the circumstances under which it arose, and the date and method under which the indebtedness will be discharged.

(b) Continuing indebtedness.-- Submit the following REPRESENTATION: *No intercorporate debt will exist between the distributing corporation and the controlled corporation at the time of, or subsequent to, the distribution of the controlled corporation stock.* Alternatively, submit a full description of all existing, planned, or intended debt between Distributing and Controlled, including complete details as to principal amounts, terms, and reasons for the issuance. Include copies of any instruments evidencing the intercorporate indebtedness. If any debt exists between Controlled, as debtor, and Distributing, as creditor, state whether such debt arose in connection with a transfer of assets by Distributing to Controlled. If so, explain the circumstances.

(3) Consolidated transactions.-- If Distributing joins in the filing of a consolidated federal income tax return, submit the following REPRESENTATION: *Immediately before the distribution, items of income, gain, loss, deduction, and credit will be taken into account as required by the applicable intercompany transaction regulations (See section 1.1502-13 and section 1.1502-14 as in effect before the publication of T.D. 8597, 1995-32 I.R.B. 6, and as currently in effect; section 1.1502-13 as published by T.D. 8597). Further, Distributing's excess loss account with respect to the Controlled stock will be included in income immediately before the distribution (See section 1.1502-19).*

(4) Continuing transactions between Distributing and Controlled (or two or more controlled corporations).-- Describe in detail any continuing, planned, or intended transactions between Distributing and Controlled following the distribution, either directly or indirectly (such as through a partnership), or between an Other Corporation and a corporation from which it will be separated. In addition, submit the following REPRESENTATION: *Payments made in connection with all continuing transactions, if any, between the distributing and controlled corporations, will be for fair market value based on terms and conditions arrived at by the parties bargaining at arm's length.*

(5) Investment company.-- If assets are transferred by Distributing to Controlled, or if liabilities owed by Controlled to Distributing are cancelled, submit the following REPRESENTATION: *No two parties to the transaction are investment companies as defined in section 368(a)(2)(F)(iii) and (iv).*

2-E Taxation of Securities Transactions 4

(6) Transfers of money or property to Distributing.-- Set forth all consideration received by Distributing, including distributions by Controlled to Distributing, in connection with the transaction. Describe any receipt of money or property by Distributing from Controlled in contemplation of the distribution (other than in the ordinary course of business).

(7) Foreign corporation.-- State whether Distributing, Controlled, or any Other Corporation is a foreign corporation and whether any such foreign corporation is a passive foreign investment corporation (as defined in section 1296(a)), or a controlled foreign corporation (as defined in section 957) both before and after the distribution. See sections 367(b), 367(e)(1), 897, and 1248(f).

(8) Other transactions.-- State whether there have been, or will be, any related transactions, and, if so, describe these other transactions and fully explain their relationship to, and impact on, the present transaction. Even if the transaction is thought to be unrelated, provide full details if it is contemplated that any stock is to be issued or redeemed by Distributing, Controlled, or Other Corporations, other than that already described as being distributed pursuant to the plan. Provide a description of any plan or intention to issue, redeem, or alter any rights in, such as voting rights, shares of stock of Distributing, Controlled, or Other Corporations.

(9) Plan of reorganization and other relevant documents.-- Submit a copy of the plan of reorganization or distribution. Alternatively, state why a copy is not available. In addition, submit a copy of any indemnification and tax sharing agreements to which Distributing or Controlled is a party. If these or any other documents requested in this revenue procedure become available after filing the ruling request, submit copies as soon as possible.

(10) Requested rulings.-- List the rulings being requested in the exact wording desired, and provide statutory, regulatory, or other authority for their issuance.

(11) Presubmission conference.-- Prior to submitting a section 355 ruling request, the taxpayer may request a conference with the Office of Assistant Chief Counsel (Corporate). A presubmission conference is particularly recommended if the transaction does not satisfy all of the requirements or relevant guidelines of this revenue procedure. The taxpayer must submit a description of the transaction, including the name of the taxpayer, and a memorandum of the issues to be discussed at the conference, at least three business days before the conference. The taxpayer must provide a power of attorney for each representative attending the conference. In appropriate cases, the Service will consider conducting the presubmission conference by telephone. For additional information regarding presubmission conferences, see the annual revenue procedure referred to in section 2 of this revenue procedure and contact the Office of the Assistant Chief Counsel (Corporate) at (202) 622-7710 (not a toll-free call).

(12) Distribution in Connection with Acquisitions.-- Regarding whether there is a plan (or series of related transactions) under § 355(e)(2)(A)(ii), submit one of the following *REPRESENTATIONS*: (i) *There is no acquisition of*

*stock of the distributing corporation or any controlled corporation (including any predecessor or successor of an such corporation) that is part of a plan or series of related transactions (within the meaning of § 1.355-7T) that includes the distribution of the controlled corporation stock; (ii) Each of the following acquisitions of stock of the distributing corporation or any controlled corporation (including any predecessor or successor of any such corporation) is or may be a part of a plan or series of related transactions (within the meaning of § 1.355-7T) that includes the distribution of controlled corporation stock: [DESCRIBE ACQUISITIONS HERE]. Taking all of these acquisitions into account, stock representing a 50-percent or greater interest (within the meaning of § 355(d)(4) in the distributing or controlled corporation (including any predecessor or successor of any such corporation) will not be acquired by any person or persons; or (iii) The distribution is not part of a plan or series of related transactions (within the meaning of § 1.355-7T) pursuant to which one or more persons will acquire directly or indirectly stock representing a 50-percent or greater interest (within the meaning of § 355(d)(4)) in Distributing or Controlled (including any predecessor or successor of any such corporation). If a representation cannot be submitted exactly as requested, an explanation must be given. The taxpayer must submit one of the three representations set forth above (as set forth above or in approximately modified form to the satisfaction of the Service) before the Service will issue a letter ruling. While the National Office will not determine whether a distribution and an acquisition are part of a plan (or series or related transactions) under § 355(e)(2)(A)(ii), the Service may rule on related significant issues (as defined in section 3.01(29) of *Rev. Proc. 2003-3, 2003-1 I.R.B. 113 at 115*). The determination of whether a distribution and an acquisition are part of a plan (or series of related transactions) may be made upon an examination of the taxpayer's return.*

(13) Regulatory filings.-- Provide copies of any proxy, statements, information statements, or prospectuses filed or prepared in connection with the distribution or any related transactions.

(14) Previously Declined Request for Ruling.-- The Service will not entertain any ruling request regarding a proposed or completed transaction if the Service has previously declined to rule on that transaction (or a similar transaction) because the Service was not satisfied that the distribution met the corporate business purpose requirement, was not a device for the distribution of earnings and profits, or was not part of a plan (or series of related transactions under § 355 (e).

(15) Request for Supplemental Ruling.-- The Service will decline a request for a supplemental letter ruling, unless the request presents a significant issue (as defined in section 3.01 (29) of *Rev. Proc. 2003-3*). A change in circumstances arising after the transactions ordinarily does not present a significant issue.

6. EFFECTIVE DATE

This revenue procedure will apply to all ruling requests postmarked, or, if not mailed, received, on or after June 5, 1996. However, the Service may ask the taxpayer to submit information specified in this revenue procedure for any ruling requests submitted prior to that date. The revocation of section 3.01(23) of *Rev. Proc. 96-3* is effective on date May 6, 1996. The Service will entertain ruling requests on the business purposes listed in Appendix A of this revenue procedure whether the ruling request arrives before, on, or after the publication date of this revenue procedure.

DRAFTING INFORMATION

The principal author of this revenue procedure is Dean P. Lekos of the Office of Assistant Chief Counsel (Corporate). For further information regarding this revenue procedure, contact Mr. Lekos on (202) 622-7550 or Mr. Howard W. Staiman on (202) 622-7750 (not toll-free calls).

APPENDIX B

SECTION 1. RULING REQUESTS INVOLVING RETENTION OF STOCK OR OPTIONS BY DISTRIBUTING

.01

The Service will issue favorable rulings regarding the application of section 355(a)(1)(D)(ii), relating to the retention by Distributing of stock or options in Controlled, to transactions in which Controlled stock will be widely held if Distributing establishes that the following requirements are satisfied:

(1) A sufficient business purpose exists for the retention of the stock, options, and any stock acquired on the exercise of the options.

(2) None of Distributing's directors or officers will serve as directors or officers of Controlled as long as Distributing retains the stock, options, or any stock acquired on the exercise of the options. Under appropriate facts and circumstances, the Service may issue a favorable ruling in cases in which the directors or officers of Distributing will serve as directors or officers of Controlled. For example, the Service may issue a favorable ruling if a director or officer of Distributing serves as a director or officer of Controlled solely to accommodate Controlled's business needs.

(3) The retained stock, options, and any stock acquired upon exercise of the options will be disposed of as soon as a disposition is warranted consistent with the business purpose specified in section 1.01(1) of this Appendix B, but in any event, not later than 5 years after the distribution.

(4) Distributing will vote the retained stock and any stock acquired on exercise of the options in proportion to the votes cast by Controlled's other shareholders. For example, if after the distribution the other shareholders of Controlled vote 70 percent in favor of a matter and 30 percent against, Distributing would be required to vote the stock 70 percent in favor and 30 percent against the matter.

.02

In other cases, the Service may issue favorable rulings, based upon all relevant facts and circumstances, regarding the application of section 355(a)(1)(D)(ii). For example, the Service will rule favorably if the transaction is covered by *Rev. Rul. 75-321, 1975-2 C.B. 123*.

SECTION 1. PURPOSE. The purpose of this Revenue Procedure is to set forth guidelines for taxpayers and field offices of the Internal Revenue Service for the application of *section 265(2) of the Internal Revenue Code of 1954* to certain taxpayers holding state and local obligations the interest on which is wholly exempt from Federal income tax. Guidelines for the application of section 265(2) of the Code to banks holding such tax-exempt obligations were set forth in *Revenue Procedure 70-20*, C.B. 1970-2, 499. This Revenue Procedure provides guidelines for the application of section 265(2) of the Code to individuals, to dealers in tax-exempt obligations, and to business enterprises that are not dealers in tax-exempt obligations, and to banks in situations not dealt with in *Revenue Procedure 70-20*.

SEC. 2. BACKGROUND.

.01

Section 265(2) of the Code provides, with two exceptions not here relevant, that no deductions shall be allowed for interest on indebtedness "incurred or continued to purchase or carry obligations * * * the interest on which is wholly exempt" from Federal income tax.

.02

Section 265(2) of the Code is derived from section 1202(1) of the Revenue Act of 1917 and section 234(a)(2) of the Revenue Act of 1918. It is clear from the legislative history of those sections and of subsequent unsuccessful efforts to amend such sections (or their successors) that Congress intended to disallow interest under section 165(2) of the Code only upon a showing of a purpose by the taxpayer to use borrowed funds to purchase or carry tax-exempt securities. See, *e.g.*, H. Rept. 767, 65th Cong., 10; S. Rept. 617, 65th Cong., 6, 7 (1918); 65 Cong. Rec. 7541-7542 (1924); and 67 Cong. Rec. 2964 (1925).

.03

Where the required purposive relationship is established, section 265(2) of the Code will be applicable even though the taxpayer does not receive tax-exempt interest, as for example, where the taxpayer holds defaulted obligations (see *Clyde C. Pierce Corp. v. Commissioner*, 120 F. 2d 206 (1941)), or where the taxpayer holds the obligation for a period before interest begins to accrue (see *Illinois Terminal Railroad Co. v. United States*, 375 F. 2d 1016, 1022 (1967)). Similarly, section 265(2) of the Code may be applicable even though the taxpayer's purpose in purchasing or carrying the tax-exempt obligations is to produce a taxable profit rather than tax-exempt interest. See *Denman v. Slayton*, 282 U.S. 514 (1931).

SEC. 3. GENERAL RULES.

01

.Section 265(2) of the Code is only applicable where the indebtedness is incurred or continued for the purpose of purchasing or carrying tax-exempt securities. Accordingly, the application of section 265(2) of the Code requires a determination, based on all the facts and circumstances, as to the taxpayer's purpose in incurring or continuing each item of indebtedness. Such purpose may, however, be established either by direct evidence or by circumstantial evidence.

.02

Direct evidence of a purpose to *purchase* tax-exempt obligations exists where the proceeds of indebtedness are used for, and are directly traceable to, the purchase of tax-exempt obligations. *Wynn v. United States*, 411 F. 2d 614 (1969), certiorari denied 396 U.S. 1008 (1970). Section 265(2) does not apply, however, where proceeds of a bona fide business indebtedness are temporarily invested in tax-exempt obligations under circumstances similar to those set forth in *Revenue Ruling 55-389*, C.B. 1955-1, 276.

.03

Direct evidence of a purpose to *carry* tax-exempt obligations exists where tax-exempt obligations are used as collateral for indebtedness. "[O]ne who borrows to buy tax-exempts and one who borrows against tax-exempts already owned are in virtually the same economic position. Section 265(2) makes no distinction between them." *Wisconsin Cheeseman v. United States*, 338 F. 2d 420, at 422 (1968).

.04

In the absence of direct evidence linking indebtedness with the purchase or carrying of tax-exempt obligations as illustrated in paragraphs.02 and.03 above, section 265(2) of the Code will apply only if the totality of facts and circumstances supports a reasonable inference that the purpose to purchase or carry tax-exempt obligations exists. Stated alternatively, section 265(2) will apply only where the totality of facts and circumstances establishes a "sufficiently direct relationship" between the borrowing and the investment in tax-exempt obligations. See *Wisconsin Cheeseman*, 338 F.2d 420, at 422. The guidelines set forth in sections 4, 5, and 6 shall be applied to determine whether such a relationship exists.

.05

Generally, where a taxpayer's investment in tax-exempt obligations is insubstantial, the purpose to purchase or carry tax-exempt obligations will not ordinarily be inferred in the absence of direct evidence as set forth in sections 3.02 and 3.03. In the case of an individual, investment in tax-exempt obligations shall be presumed insubstantial only where during the taxable year the average amount of the tax-exempt obligations (valued at their adjusted basis) does not exceed 2 percent of the average adjusted basis of his portfolio investments (as defined in section 4.04) and any assets held in the active conduct of a trade or business. In the case of a corporation, an investment in tax-exempt obligations shall be presumed insubstantial only where during the taxable year the average amount of the tax-exempt obligations (valued at their adjusted basis) does not exceed 2 percent of the average total assets (valued at their adjusted basis) held in the active conduct of the trade or business. This paragraph shall not apply to a dealer in tax-exempt obligations.

SEC. 4. GUIDELINES FOR INDIVIDUALS.

01

.In the absence of direct evidence of the purpose to purchase or carry tax-exempt obligations (as set forth in sections 3.02 and 3.03), the rules set forth in this section shall apply.

02

.An individual taxpayer may incur a variety of indebtedness of a personal nature, ranging from short-term credit for purchases of goods and services for personal consumption to a mortgage incurred to purchase or improve a residence or other real property which is held for personal use. Generally, section 265(2) of the Code will not apply to indebtedness of this type, because the purpose to purchase or carry tax-exempt obligations cannot reasonably be inferred where a personal purpose unrelated to the tax-exempt obligations ordinarily dominates the transaction. For example, section 265(2) of the Code generally will not apply to an individual who holds salable municipal bonds and takes out a mortgage to buy a residence instead of selling his municipal bonds to finance the purchase price. Under such circumstances the purpose of incurring the indebtedness is so directly related to the personal purpose of acquiring a residence that no sufficiently direct relationship between the borrowing and the investment in tax-exempt obligations may reasonably be inferred.

.03

The purpose to purchase or carry tax-exempt obligations generally does not exist with respect to indebtedness incurred or continued by an individual in connection with the active conduct of trade or business (other than a dealer in tax-exempt obligations) unless it is determined that the borrowing was in excess of business needs. However, there is a rebuttable presumption that the purpose to *carry* tax-exempt obligations exists where the taxpayer reasonably could have foreseen at the time of purchasing the tax-exempt obligations that indebtedness probably would have to be incurred to meet future economic needs of the business of an ordinary, recurrent variety. See *Wisconsin Cheeseman v. United States*, 388 F. 2d 420, at 422. The presumption may be rebutted, however, if the taxpayer demonstrates that business reasons, unrelated to the purchase or carrying of tax-exempt obligations, dominated the transaction.

.04

2-F Taxation of Securities Transactions Scope

Generally, a purpose to carry tax-exempt obligations will be inferred, unless rebutted by other evidence, wherever the taxpayer has outstanding indebtedness which is not directly connected with personal expenditures (see section 4.02) and is not incurred or continued in connection with the active conduct of a trade or business (see section 4.03) and the taxpayer owns tax-exempt obligations. This inference will be made even though the indebtedness is ostensibly incurred or continued to purchase or carry other portfolio investments. Portfolio investment for the purposes of this Revenue Procedure includes transactions entered into for profit (including investment in real estate) which are not connected with the active conduct of a trade or business. Purchase and sale of securities shall not constitute the active conduct of a trade or business unless the taxpayer is a dealer in securities within the meaning of *section 1.471-5 of the Income Tax Regulations*. A substantial ownership interest in a corporation will not be considered a portfolio investment. For example, where a taxpayer owns at least 80 percent of the voting stock of a corporation that is engaged in the active conduct of a trade or business, the investment in such controlling interest shall not be considered to be a portfolio investment. A sufficiently direct relationship between the incurring or continuing of indebtedness and the purchasing or carrying of tax-exempt obligations will generally exist where indebtedness is incurred to finance portfolio investment because the choice of whether to finance a new portfolio investment through borrowing or through the liquidation of an existing investment in tax-exempt obligations typically involves a purpose either to maximize profit or to maintain a diversified portfolio. This purpose necessarily involves a decision, whether articulated by the taxpayer or not, to incur (or continue) the indebtedness, at least in part, to purchase or carry the existing investment in tax-exempt obligations. A taxpayer may rebut the presumption that section 265(2) of the Code applies in the above circumstances by establishing that he could not have liquidated his holdings of tax-exempt obligations in order to avoid incurring indebtedness. The presumption may be overcome where, for example, liquidation is not possible because the tax-exempt obligations cannot be sold. The presumption would not be rebutted, however, by a showing that the tax-exempt obligations could only have been liquidated with difficulty or at a loss; or that the taxpayer owned other investment assets such as common stock that could have been liquidated; or that an investment advisor recommended that a prudent man should maintain a particular percentage of assets in tax-exempt obligations. Similarly, the presumption would not be rebutted by a showing that liquidating the holdings of tax-exempt obligations would not have produced sufficient cash to equal the amount borrowed. The provisions of this paragraph may be illustrated by the following example: Taxpayer A, an individual, owns common stock listed on a national securities exchange, having an adjusted basis of \$200,000; he owns rental property having an adjusted basis of \$200,000; he has cash of \$10,000; and he owns readily marketable municipal bonds having an adjusted basis of \$41,000. A borrows \$100,000 to invest in a limited partnership interest in a real estate syndicate and pays \$8,000 interest on the loan which he claims as an interest deduction for the taxable year. Under these facts and circumstances, there is a presumption that the \$100,000 indebtedness which is incurred to finance A's portfolio investment is also incurred to carry A's existing investment in tax-exempt bonds since there are no additional facts or circumstances to rebut the presumption. Accordingly, a portion of the \$8,000 interest payment will be disallowed under section 265(2) of the Code. See section 7 concerning the amount to be disallowed.

.05

In the case of a partnership which incurs indebtedness or which holds tax-exempt obligations, the partners shall be treated as incurring or holding their partnership share of such indebtedness or tax-exempt obligations. For purposes of this Revenue Procedure, the interest of a partner in the partnership's assets and indebtedness shall be determined in accordance with his capital interest in the partnership. The purposes for which the partnership incurs any indebtedness shall be attributed to the general partners in applying section 265(2). A general partner's interest in corporate stock owned by a partnership will ordinarily be considered a portfolio investment unless the partnership meets the substantial ownership requirement of section 4.04; and (1) the partner has at least an 80 percent interest in the partnership or (2) the business of the corporation and of the partner are closely related and the partner has an interest of more than 50 percent in the partnership. A limited partnership interest will be considered as representing portfolio investment.

SEC. 5. GUIDELINES FOR DEALERS IN TAX-EXEMPT OBLIGATIONS.

01

. A dealer in tax-exempt obligations (whether a corporation, partnership, or sole proprietorship) is subject to section 265(2) of the Code where it is established that indebtedness is incurred or continued for the purpose of holding tax-exempt obligations, even though the tax-exempt obligations are held for the purpose of resale at a gain rather than for the purpose of receiving tax-exempt interest income. See *Denman v. Slayton, supra*.

02

. Where proceeds of indebtedness are directly traceable to the purchase of tax-exempt obligations by a dealer in such obligations, section 265(2) of the Code applies as specified in section 3.02. Direct tracing may occur for example, where a brokerage business maintains a municipal bond account with a bank through which it purchases and sells all of its municipal bonds, with the brokerage business incurring an indebtedness to the bank during any period in which purchases exceed receipts from sales in the account. See *Wynn v. United States, supra*. As provided in section 7, where there is such direct tracing the entire interest on the indebtedness is nondeductible under section 265(2) of the Code.

.03

Where indebtedness is incurred or continued for the general purpose of carrying on a brokerage business which includes the purchase of both taxable and tax-exempt obligations, and the use of the borrowed funds cannot be directly traced, it is reasonable to infer that the borrowed funds were used for all the activities of the business which include the purchase of tax-exempt obligations. Accordingly, section 265(2) of the Code is applicable in such circumstances. See *Commissioner v. Leslie, 413 F.2d 636 (1969), certiorari denied, 396 U.S. 1007 (1970)*. However, in such a case only an allocable portion of the interest deduction is disallowed, as provided in section 7.

04

. The purpose to purchase or carry tax-exempt obligations generally cannot be inferred where indebtedness is incurred to acquire or improve physical facilities. In such circumstances a dominant business purpose apart from the purchasing or carrying of tax-exempt obligations is sufficiently established, with the result that any inference that the indebtedness was incurred or continued for the proscribed purpose is adequately rebutted. Compare *Wisconsin Cheeseman, supra*.

SEC. 6. GUIDELINES FOR CORPORATIONS THAT ARE NOT DEALERS IN TAX-EXEMPT OBLIGATIONS.

.01

Where there is no direct evidence of the purpose to purchase or carry tax-exempt obligations (as set forth in sections 3.02 and 3.03), the rules set forth in this section shall apply to a corporation which is not a dealer in tax-exempt obligations. The purpose to purchase or carry tax-exempt obligations will generally not be inferred with respect to indebtedness incurred or continued to provide funds for carrying on an active trade or business, not involving the

2-F Taxation of Securities Transactions Scope

holding of tax-exempt obligations, unless it is determined that the borrowing was in excess of business needs. Thus the purpose may be present where the borrowings exceed the reasonable needs of business or provide funds for portfolio investments. For example, where indebtedness is incurred and the proceeds are used, directly or indirectly, to purchase tax-exempt obligations which are retained for a substantial period of time as an investment, the purpose to purchase or carry tax-exempt obligations may be inferred. Similarly, where the taxpayer invests a disproportionately large portion of its liquid assets in tax-exempt obligations and there are no facts indicating that such investment is related to the reasonable needs of the taxpayer's business operations or is required on the basis of the financial conditions prevailing with respect thereto, the required purpose may also be inferred with respect to indebtedness of the taxpayer. On the other hand, temporary, short-term, investment of working capital in tax-exempt obligations, particularly where such obligations are of a nature suited for such investment (such as 90 day tax anticipation notes), and where such investments are liquidated frequently to provide funds for use in the taxpayer's business, normally provides no basis for inferring that the purpose to purchase or carry tax-exempt obligations exists with respect to indebtedness of the taxpayer. An inference may arise, however, with respect to indebtedness which is itself short-term and is incurred other than in the normal course of the taxpayer's trade or business.

.02

Generally, the purpose to *carry* tax-exempt obligations will be inferred unless rebutted by other evidence where the taxpayer could reasonably have foreseen at the time of purchasing the tax-exempt obligations that indebtedness probably would have to be incurred to meet future economic needs of the corporation of an ordinary, recurrent variety. For example, a purpose to carry tax-exempt obligations can be inferred in a case (such as *Wisconsin Cheeseman, supra*) where the regular business pattern of a corporation shows that it would be required to borrow funds to meet its recurring needs for working capital if it bought or retained tax-exempt obligations as a long-term investment. The presumption will not apply, however, if the taxpayer demonstrates that business reasons unrelated to the purchase or carrying of tax-exempt obligations dominated the transaction. For example, the purpose to carry tax-exempt obligations generally cannot be inferred where a mortgage debt is incurred to finance a new plant which is a nonrecurrent major expenditure. In such cases, a dominant business purpose, other than the purchase or carrying of tax-exempt obligations will normally exist and, accordingly, any inference will be rebutted. On the other hand, the purpose to *carry* tax-exempt obligations can be inferred where a corporation *continues* indebtedness which it could discharge, in whole or in part, by liquidating its holdings of tax-exempt obligations without withdrawing any capital which is committed to, or held in reserve for, the corporation's regular business activities. See *Illinois Terminal Railroad Co. v. United States, supra*.

.03

The required relationship will generally not be present where the taxpayer's holdings of tax-exempt obligations are nonnegotiable obligations acquired in the ordinary course of business in payment for services performed for, or goods supplied to, state or local governments. *R.B. George Machinery Co., 26 B.T.A. 594 (1932)* (Acquiesced C.B. XI-2, 4). Similarly, it generally will not be present where such holdings are required as a condition to performing a contract to provide services or property other than money to a state or local government in the ordinary course of the taxpayer's trade or business. See *Commissioner v. Bagley & Sewall Co., 221 F.2d 944 (1955)*.

SEC. 7. PROCEDURES.

.01

When there is direct evidence under sections 3.02 and 3.03 establishing a purpose to purchase or carry tax-exempt obligations (either because tax-exempt obligations were used as collateral for indebtedness or the proceeds of indebtedness were directly traceable to the holding of particular tax-exempt obligations) no part of the interest paid or incurred on such indebtedness may be deducted. However, if only a fractional part of the indebtedness is directly traceable to the holding of particular tax-exempt obligations, the same fractional part of the interest paid or incurred on such indebtedness will be disallowed. For example, if A borrows \$100,000 from a bank and invests \$75,000 of the proceeds in tax-exempt obligations, 75 percent of the interest paid on the bank borrowing would be disallowed as a deduction.

.02

In any other case where interest is to be disallowed in accordance with this Revenue Procedure, an allocable portion of the interest on such indebtedness will be disallowed. The amount of interest on such indebtedness to be disallowed shall be determined by multiplying the total interest on such indebtedness by a fraction, the numerator of which is the average amount during the taxable year of the taxpayer's tax-exempt obligations (valued at their adjusted basis) and the denominator of which is the average amount during the taxable year of the taxpayer's total assets (valued at their adjusted basis) minus the amount of any indebtedness the interest on which is not subject to disallowance to any extent under this Revenue Procedure.

SEC. 8. INQUIRIES. Inquiries in regard to this Revenue Procedure should refer to its number and be addressed to Assistant Commissioner (Technical), Attention: T:I:C, Washington, D.C.

APPENDIX F: Revenue Procedure 72-18 Revenue Procedure 74-8

2-F Taxation of Securities Transactions Scope

Rev. Proc. 74-8

SECTION 1. PURPOSE. The purpose of this Revenue Procedure is to clarify the second paragraph of section 4.04 of *Rev. Proc. 72-18, 1972-1 C.B. 740*, concerning the terms "portfolio investment" and "active conduct of a trade or business" as used in *Rev. Proc. 72-18*.

SEC. 2. IMPLEMENTATION. The second paragraph of section 4.04 of *Rev. Proc. 72-18* is clarified to read as follows: Portfolio investment for the purposes of this Revenue Procedure includes transactions entered into for profit (including investment in real estate) which are not connected with the active conduct of a trade or business. The purchase and sale of securities shall not constitute the active conduct of a trade or business unless the taxpayer is a dealer in securities within the meaning of *section 1.471-5 of the Income Tax Regulations*. A substantial ownership interest in a corporation engaged in the active conduct of a trade or business will not be considered a portfolio investment. For example, where a taxpayer owns 80 percent of the voting stock of a corporation that is engaged in the active conduct of a trade or business, the investment in such controlling interest will not be considered to be a portfolio investment. However, any ownership in a corporation not engaged in the active conduct of a trade or business will be considered a portfolio investment. Substantial ownership in a corporation is a question of fact which will be determined on a case-by-case basis.

APPENDIX F: Revenue Procedure 72-18 Revenue Procedure 74-8

2-F Taxation of Securities Transactions Scope

Rev. Proc. 87-53

SECTION 1. PURPOSE The purpose of this revenue procedure is to modify section 6.03 of *Rev. Proc. 72-18, 1972-1 C.B. 740*, in order to implement the nonsalable standard intended by that section. Under the nonsalable standard, *section 265(a)(2) of the Internal Revenue Code* generally does not apply to a taxpayer's holdings of tax-exempt obligations acquired in the ordinary course of the taxpayer's business from state and local governments, if such obligations are not salable.

SECTION 2. BACKGROUND

.01

Rev. Proc. 72-18 provides guidelines for the application of *section 265(a)(2) of the Internal Revenue Code* to certain taxpayers holding state and local obligations the interest on which is wholly exempt from federal taxation. (Before redesignation by section 902 of the Tax Reform Act of 1986, 1986-3 (Vol. 1) C.B. 1, 297, section 265(a)(2) was section 265(2).)

.02

Section 265(a)(2) of the Code provides, in part, that no deduction shall be allowed for interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from federal income taxation. The application of section 265(a)(2) requires a determination, based on all the facts and circumstances, of the taxpayer's purpose in incurring or continuing each item of indebtedness. This purpose may be established by either direct or circumstantial evidence.

.03

Section 6 of *Rev. Proc. 72-18* provides guidelines for corporations that are not dealers in tax-exempt obligations. Section 6.03 of *Rev. Proc. 72-18* provides, "The required relationship will generally not be present where the taxpayer's

holdings of tax-exempt obligations acquired in the ordinary course of business in payment for services performed for, or goods supplied to, state or local governments. *R.B. George Machinery Co.*, 26 B.T.A. 594 (1932) (Acquiesced C.B. XI-2, 4)."

.04

R.B. George Machinery Co., stands for the proposition that section 265(a)(2) of the Code does not apply if the tax-exempt obligations held by the taxpayer are nonsalable. See *Wisconsin Cheesman, Inc. v. United States*, 388 F.2d 420, 423 (7th Cir. 1968); *Illinois Terminal Railroad Co. v. United States*, 375 F.2d 1016, 1021 (Ct. Cl. 1967). The use of the term "nonnegotiable" in section 6.03 of *Rev. Proc. 72-18* does not precisely convey the nonsalable standard established by *R.B. George Machinery Co.*

SEC. 3. APPLICATION Section 6.03 of *Rev. Proc. 72-18* is modified to read, in part, as follows: The required relationship will generally not be present when the taxpayer is unable to sell holdings of tax-exempt obligations acquired in the ordinary course of business in payment for services performed for, or goods supplied to, state or local governments. *R.B. George Machinery Co. v. Commissioner*, 26 B.T.A. 594 (1932), *acq.*, XI-2 C.B. 4 (1932); *Wisconsin Cheesman, Inc. v. United States*, 388 F.2d 420 (7th Cir. 1968); *Illinois Terminal Railroad Co. v. United States*, 375 F.2d 1016 (Ct. Cl. 1967).

SEC. 4. EFFECTIVE DATE This revenue procedure is effective for all tax-exempt obligations acquired on or after January 11, 1988.

SEC. 5. EFFECT ON OTHER DOCUMENTS *Rev. Proc. 72-18* is modified.

SEC. 6. DRAFTING INFORMATION The principal author of this revenue procedure is Mr. Ned Blanchard of the Corporation Tax Division. For further information regarding the revenue procedure contact Mr. Ned Blanchard on (202) 377-9589 (not a toll-free call).

1 PURPOSE

The purpose of this revenue procedure is to update *Revenue Procedure 78-33, 1978-2 C.B. 532*, which sets forth in a convenient checklist questionnaire the information necessary to be included in a request for a ruling relating to the recapitalization of a corporation under *section 368(a)(1)(E) of the Internal Revenue Code*.

Checklist of information to be included in request for ruling under IRC Section 368(a)(1)(E)
SECTION 368(a)(1)(E) CHECKLIST QUESTIONNAIRE

2-G Taxation of Securities Transactions 2

2 BACKGROUND

The Internal Revenue Service receives many requests for rulings in which the information furnished about the proposed transaction is not complete enough to permit a determination to be made. In such cases it is necessary to get additional facts from the taxpayer before the ruling request can be considered. This procedure is time consuming for both Service personnel and taxpayers and delays the issuance of the final ruling letter. This checklist will facilitate the filing of requests for rulings under section 368(a)(1)(E) of the Code by showing specific information that should be included so that the application will be as complete as possible when originally filed. However, since the information necessary to rule on a particular transaction depends upon all the facts and circumstances of that case, information in addition to that suggested in this revenue procedure may be required. Nevertheless, careful use of the checklist should avoid much needless delay and permit rulings to be issued sooner.

The authority and general procedures of the National Office of the Service and of the Office of the District Directors of Internal Revenue with respect to the issuance of advance rulings and determination letters are outlined in *Rev. Proc. 80-20, 1980-1 C.B. 633*, as amended by *Rev. Proc. 81-33, page 564*, this Bulletin. See also *Rev. Proc. 81-10, 1981-1 C.B. 647*, relating to areas in which advance rulings generally will not be issued. Careful attention to all the requirements of these revenue procedures will also serve to minimize needless delays in processing requests for rulings.

SECTION 368(a)(1)(E) CHECKLIST QUESTIONNAIRE

2-G Taxation of Securities Transactions 3

3 CHANGES

.01

Section 1 has been changed to indicate that the purpose of the proposed revenue procedure is to update *Rev. Proc. 78-33*.

.02

Section 2 has been modified by substituting *Rev. Proc. 80-20*, as amended by *Rev. Proc. 81-33*, for *Rev. Proc. 72-3*, *1972-1 C.B. 698*, and *Rev. Proc. 72-9*, *1972-1 C.B. 718*. The latter have been superseded.

.03

Section 4 asks for the reason why a taxpayer thinks a checklist item is not applicable.

.04

Section 4.013 has been modified by substituting the language in section 9.06 of *Rev. Proc. 80-20* for the language from section 3.01 of *Rev. Proc. 72-3*, which has been superseded.

.05

Section 4.021(a)(6)(A) has been changed to require taxpayers to submit copies of existing stock redemption or buy-sell agreements or any such agreements to be entered into as part of the recapitalization.

.06

Section 4.021(a)(6)(B) has been modified by adding a new sentence defining what constitutes "issue price" for purposes of the preceding question.

.07

Section 4.021(a)(7) has been modified by adding a request for information as to the method of acquisition of all outstanding stock before the recapitalization.

.08

Section 4.032(a) has been modified by adding a new sentence asking whether any newly issued stock will be placed in escrow or issued under a contingent stock arrangement.

.09

Section 4.06 has been modified by adding a new sentence asking for a specific representation concerning related transactions.

4 INFORMATION TO BE INCLUDED IN REQUESTS FOR RULINGS UNDER SECTION 368(a)(1)(E) OF THE CODE

Each of the items included in this section should be specifically dealt with in the application even though some may not appear to be applicable. Presentation of the information required should follow the format of this revenue procedure as closely as possible with the appropriate descriptive headings. If an item is not applicable, say so and briefly explain why it is not applicable.

.01 Information regarding the corporation (the Corporation) involved in the recapitalization.

1 Identification. -- Name, taxpayer identification number, place, and date of incorporation of the Corporation.

2 Taxable year. -- State the last day of the taxable year of the Corporation.

3 Jurisdiction. -- Identify the District Office that will have audit jurisdiction over the return of the Corporation and state whether, to the best of the knowledge of the taxpayer and the taxpayer's representative, if any, the identical issue is in a return of the taxpayer (or of a related taxpayer within the meaning of section 267 of the Code, or a member of an affiliated group of which the taxpayer is also a member within the meaning of section 1504). If so, state whether the issue (1) is being examined by a District Director, (2) has been examined and the statutory period of limitation on assessment or refund of tax has not expired or a closing agreement covering the issue or liability has not been entered into by a District Director, (3) is being considered by an Appeals Office in connection with the taxpayer's return for an

earlier period, or that issue has been considered by an Appeals Office and the statutory period of limitation on assessment or refund of tax has not expired or a closing agreement covering the issue or liability has not been entered into by an Appeals Office, or (4) is pending in litigation in a case involving the taxpayer or a related taxpayer. The request must contain a statement whether, to the best of the knowledge of the taxpayer and the taxpayer's representative, the identical or similar issue has been ruled on by the Service and issued to the taxpayer or to the taxpayer's predecessor and, if so, when and with what results. If after the request is filed but before a ruling is issued, the taxpayer knows that an examination of the issue by a District Director has been started, the taxpayer must notify the National Office of such action. If a return is filed before a ruling is received from the National Office concerning the return, a copy of the request must be attached to the return. This alerts the District Office and avoids premature District action on the issue.

4 Business. -- Describe the business of the Corporation.

.02 *Description and ownership of stock and securities.*

1 Description of outstanding stock immediately before the recapitalization.

a Classes of Stock -- Furnish a complete description of each class of stock outstanding of the Corporation before the recapitalization, setting forth the rights and privileges of each class as follows:

1 Par or stated values.

2 Voting rights.

3 Liquidation rights -- State the amount per share and preferences of each class of stock upon liquidation.

4 Dividend rights (including any rights to receive stock).

(A)

State the terms, preferences and amount of the dividend distribution.

(B)

2-G Taxation of Securities Transactions 4

State whether the stock is cumulative or noncumulative.

(C)

Does the stock have a right to participate with other classes of stock? If so, explain.

(D)

State whether there are any dividends in arrears.

(E)

State the cash and stock dividend history of each class of stock for the past 5 years.

5 Conversion rights.

(A)

Is the stock convertible? If so, when?

(B)

State the class of stock or securities into which the stock is convertible.

(C)

State the rate of conversion or conversion price and whether the rate or price may change.

(D)

Will there be outstanding at the time of the recapitalization any stock options, warrants, convertible securities, or any other right that is convertible into any class of stock or securities of the Corporation? If so, explain.

6 Redemption rights.

2-G Taxation of Securities Transactions 4

(A)

Is the stock redeemable or callable at the option of the Corporation? Submit copies of existing stock redemption or buy-sell agreements or any such agreements to be entered into as part of the recapitalization.

(B)

State the amount per share of stock to be received upon redemption. Does this amount exceed 110 percent of the issue price of the stock? See *section 1.305-5(b) of the Income Tax Regulations*. For purposes of the preceding question, with respect to the description of stock to be issued in the recapitalization (as requested in section 4.025 below), "issue price" means the fair market value of the stock to be surrendered in exchange for the stock subject to call by the Corporation as of the date the Board of Directors of the Corporation agreed to the exchange ratio and the terms and conditions of the stock subject to call by the Corporation with respect to its redemption price.

(C)

Do the shareholders have a right ("put") to have the stock redeemed by the Corporation? If so, state the terms and conditions.

(D)

Does the Corporation have any plan or intention to redeem or otherwise acquire any of the shares of the stock? If so, explain.

(E)

Have there been any prior redemptions or acquisitions of the stock during the last 5 years (including any open market purchases)? If so, explain in full.

7 Section 306 stock -- State whether any of the stock outstanding is "section 306 stock" within the meaning of section 306(c) and identify that stock. As to each exchanging shareholder, state the method of acquisition of all of such shareholder's stock outstanding before the recapitalization.

8 Other terms -- State any other terms or features of each class of stock.

2 Ownership of outstanding stock immediately before the recapitalization. -- Set forth the number of shares and the

2-G Taxation of Securities Transactions 4

percentage of each class of stock outstanding owned by each shareholder, and the relationship between each shareholder, of the Corporation. However, if there are more than 25 shareholders, the number and percentage of shares owned by each shareholder may be limited to those shareholders owning in excess of 5 percent of the outstanding shares of each class and the total number of shareholders owning the balance of each class.

3 Description of outstanding securities immediately before the recapitalization. -- Furnish a complete description of each type of security outstanding of the Corporation that will be surrendered or exchanged in the recapitalization, setting forth the principal amount, the rights, and privileges of each type.

a Interest arrearages -- State whether there are any interest arrearages on the outstanding securities to be surrendered or exchanged. If so, explain.

4 Ownership of outstanding securities immediately before the recapitalization.-- Set forth the number of securities and the percentage of each type of security outstanding to be surrendered or exchanged owned by each security holder of the Corporation. However, if the securities are held by more than 25 security holders, the number and percentage of securities owned by each security holder may be limited to those security holders owning in excess of 5 percent of the outstanding securities of each type and the total number of security holders owning the balance of each type.

5 Description of stock to be issued in the recapitalization. -- Furnish a complete description of each class of stock of the Corporation to be issued in the recapitalization, setting forth the rights and privileges of each class. See 4.021(a)(1) through (8) above for the information to be furnished.

6 Ownership of stock immediately after the recapitalization. -- Set forth the number of shares and the percentage of each class of stock outstanding owned by each shareholder, and the relationship between shareholder of the Corporation. If the stock is held by more than 25 shareholders, the number and percentage of shares owned by each shareholder may be limited to those shareholders owning in excess of 5 percent of the outstanding shares of each class and the total number of shareholders owning the balance of each class.

7 Description of securities to be issued in the recapitalization. -- Furnish a complete description of each type of security to be issued in the recapitalization, setting forth the principal amount and the rights and privileges of each type.

8 Ownership of securities immediately after the recapitalization. -- Set forth the number of securities and the percentage of each type of security to be issued in the recapitalization to each security holder of the Corporation. However, if the type of security is held by more than 25 security holders, the number and percentage of securities owned by each security holder may be limited to those security holders owning in excess of 5 percent of the outstanding securities of each type and the total number of security holders owning the balance of each type.

.03 Information as to the plan of recapitalization.

1 Plan. -- Furnish the plan or agreement of exchange if reduced to writing (including any amendment to the articles of incorporation of the Corporation).

2 Exchange of stock and securities.

a Date of exchange -- When will the exchange take effect? Will any of the stock issued be placed in escrow or will any of the stock be issued later under a contingent stock arrangement? If so, give a full explanation.

b Exchanging shareholders -- Identify those shareholders and security holders who will exchange their stock or securities.

c Exchange -- Set forth the stock or securities to be issued and the stock or securities to be surrendered in the exchange.

(1) Will any stock or security be issued for dividend or interest arrearages? If so, explain. See *section 1.305-7(c) of the Income Tax Regulations*.

d Values -- Furnish a statement that the fair market value of the stock to be received by each exchanging shareholder will be equal to the fair market value of the stock surrendered in the exchange. If values will not be equal, provide a full explanation. (See section 356(f) of the Code.)

e Principal amount -- State the principal amount of the securities to be issued and the principal amount of the securities to be exchanged. (See sections 354(a)(2)(A) and 356(d)(2)(B) of the Code.)

f Disposition -- State whether the shareholders or security holders have any plan or intention to dispose of any of the stock or securities to be received by them in the exchange. If so, explain.

g Conversion -- If convertible preferred stock is to be received, see Section 4 of *Rev. Proc. 77-37, 1977-2 C.B. 568*, for information to be furnished.

2-G Taxation of Securities Transactions 4

h Fractional shares -- State how any fractional shares will be treated in the exchange. (See *Rev. Proc. 77-41, 1977-2 C.B. 574.*)

i Other property -- State whether any property other than stock or securities of the Corporation will be involved in the recapitalization.

j Other effects of the recapitalization -- State whether the recapitalization will have any effect upon the conversion rights or other privileges of any stock, stock rights, or security of the Corporation (whether or not involved in the recapitalization). If so, explain in detail. See section 305(c) of the Code *1.305-7(c) of the Income Tax Regulations.*

.04 *Business Purpose.* -- Describe in detail the corporate business purpose or purposes for the recapitalization of the Corporation.

.05 *General.*

1 Continued operation. -- Furnish a statement whether the Corporation will continue to conduct any business operations after the recapitalization.

2 Expenses. -- Furnish a statement that the Corporation and its shareholders and security holders will each pay their own expenses, if any, incurred in connection with the recapitalization.

3 Balance sheet. -- Furnish the most recent year end balance sheet and profit and loss statement of the Corporation.

.06 *Related steps or transactions.* -- Describe any other transactions that will occur or are contemplated, whether or not considered as related to or in connection with the recapitalization. If a section 305(c) ruling is requested, is the proposed recapitalization an isolated transaction and not part of a plan to periodically increase the proportionate interest of any shareholder in the assets or earnings and profits of the Corporation? See *section 1.305-7(c) of the Income Tax Regulations.*

2-H Taxation of Securities Transactions 1

1 PURPOSE

The purpose of this revenue procedure is to update *Rev. Proc. 81-52, 1981-2 C.B. 625*, which sets forth in a checklist questionnaire the information that must be included in a request for a ruling under *section 337 of the Internal Revenue Code* (and its related provision, section 331 of the Code) relating to the nonrecognition of gain or loss on sales or exchanges in connection with a complete liquidation of a corporation (Distributor). This checklist questionnaire does not deal with the special rules of section 337(e), relating to involuntary conversions, or of section 337(g), relating to cases under title 11 of the United States Code, or a receivership, foreclosure, or similar proceeding in a federal or state court.

APPENDIX H: Revenue Procedure 86-16

Checklist of information to be included in request for ruling under IRC Section 331 and 337
SECTIONS 331 and 337 CHECKLIST QUESTIONNAIRE

2-H Taxation of Securities Transactions 2

2 BACKGROUND

The Internal Revenue Service receives many requests for rulings in which the information relating to the proposed transaction is not sufficient to permit a determination to be made. In those cases, it is necessary to obtain additional facts from the taxpayer before the request for a letter ruling can be considered. Obtaining these additional facts is time consuming for both Service personnel and taxpayers and delays issuance of the ruling letter.

This checklist will facilitate the filing and processing of requests for rulings under sections 331 and 337 of the Code by showing specific information and representations to be included so that the requests will be as complete as possible when initially filed. Because the information and representations necessary to rule on a particular transaction depend upon all the facts and circumstances, information or representations in addition to those set forth in this revenue procedure may be required.

The authority and general procedures of the National Office of the Internal Revenue Service and of the Office of the District Directors of Internal Revenue with respect to the issuance of letter rulings and determination letters are outlined in *Rev. Proc. 86-1, 1986-1 I.R.B. 6*. See also, *Rev. Proc. 86-3, 1986-1 I.R.B. 26*, relating to areas in which advance rulings generally will not be issued. These revenue procedures, along with the present checklist revenue procedure, are subject to periodic updating by the Service. Therefore, careful attention should be given to ensure usage of the most current revenue procedures.

Careful attention to all requirements of these revenue procedures will aid in the timely processing of letter ruling requests.

APPENDIX H: Revenue Procedure 86-16

Checklist of information to be included in request for ruling under IRC Section 331 and 337
SECTIONS 331 and 337 CHECKLIST QUESTIONNAIRE

2-H Taxation of Securities Transactions 3

3 CHANGES

.01

Section 1 is modified to indicate that the purpose of the revenue procedure is to update *Rev. Proc. 81-52*.

.02

Section 2 is modified to state that representations are now required, and to update references to revenue procedures cited.

.03

Section 4 is substantially altered, with numerous sections being renumbered and relocated in the interest of simplification. The taxpayer must now submit standard representations using the precise language specified herein, or submit an explanation why the representations cannot be made in the requested form. Sections 4.021, 4.023, 4.025, 4.026, 4.027, 4.031, 4.032, 4.041 and 4.045 are modified accordingly. To properly reflect applicable changes, some citations to Code sections and to revenue rulings and procedures have been added or deleted. Changes include:

1

Section 4.012 now requires taxpayers to submit information concerning any prior ruling requests submitted by the

taxpayer (or predecessor) that were withdrawn in which the identical or similar issue was present.

2

Section 4.022 is added to request information concerning the liquidation of a subsidiary formerly requested in section 4.037(a). Reference to *Rev. Rul. 69-172, 1969-1 C.B. 99*, is deleted.

3

Section 4.023(a)(1)(B) is added to request information concerning covenants not to compete.

4

Section 4.033 has been modified to show changes in the recapture provisions.

5

Section 4.035 has been added to request information regarding advance payments received by Distributor.

6

Section 4.046 requires taxpayers to state whether the liquidation of Distributor will be carried out by the use of a statutory merger.

7

Section 4.05 requires taxpayers to list the specific rulings being requested and the authorities supporting the rulings.

.04

Section 5 is modified to substitute Associate Chief Counsel (Technical) for Assistant Commissioner (Technical), and CC:C:R for T:C:R.

.05

Section 6 is modified to state that *Rev. Proc. 81-52* is superseded.

Checklist of information to be included in request for ruling under IRC Section 331 and 337
SECTIONS 331 and 337 CHECKLIST QUESTIONNAIRE

2-H Taxation of Securities Transactions 4

4 INFORMATION TO BE INCLUDED IN REQUESTS FOR RULINGS UNDER SECTIONS 331 AND 337 OF THE CODE

Each of the items in this section should be specifically dealt with in the letter ruling request. If an item is not applicable, so state and briefly explain why. Standard representations are set forth throughout this section and are highlighted by the word "representation" in boldface type. These representations are of equal importance with the other factual information requested herein. The representations function to ensure that specific statutory and judicial requirements and administrative ruling guidelines are satisfied. Each representation set forth in this section should be submitted precisely in the language requested. If a representation cannot be submitted as requested, an explanation must be given. Variations of the language of the representations may delay processing the ruling request and will not be accepted unless reasons satisfactory to the Service are submitted. Submission of the information and representations should follow the format of this revenue procedure as closely as possible, with appropriate descriptive headings. Care must be taken to ensure that all the facts relating to the transaction are submitted.

.01 Information regarding the liquidating corporation (Distributor).

1 Identification.-- Name, taxpayer identification number, and place and date of incorporation of Distributor.

2 Jurisdiction.-- Identify the District Office that will have audit jurisdiction over the return of Distributor (referred to below as "taxpayer"). State whether, to the best knowledge of the taxpayer and the taxpayer's representatives, if any, the identical issue is in a return of the taxpayer (or of a related taxpayer within the meaning of section 267 of the Code, or a member of an affiliated group of which the taxpayer is also a member within the meaning of section 1504) and, if so, whether the issue (1) is being examined by a District Director, (2) has been examined by a District Director and (a) the

2-H Taxation of Securities Transactions 4

statutory period of limitation either on assessment or for filing a claim for refund or credit of tax has not expired and (b) a closing agreement covering the issue or liability has not been entered into by a District Director, (3) is being considered by an Appeals Office in connection with the taxpayer's return for an earlier period, (4) has been considered by an Appeals Office and (a) the statutory period of limitation either on assessment or for filing a claim for refund or credit of tax has not expired and (b) a closing agreement covering the issue or liability has not been entered into by an Appeals Office, or (5) is pending in litigation in a case involving the taxpayer or a related taxpayer. The request must contain a statement whether, to the best knowledge of the taxpayer and the taxpayer's representatives, the identical or a similar issue has been (i) submitted to the Service, but withdrawn before a ruling was issued, or (ii) ruled on by the Service to the taxpayer or the taxpayer's predecessor and, if so, when and with what result. If, after the request is filed but before a ruling is issued, the taxpayer knows that an examination of the issue by a District Director has been started, the taxpayer must notify the National Office of this action. If a return is filed before a ruling is received from the National Office concerning the issue that is the subject of the request for ruling, a copy of the request must be attached to the return. This alerts the District Office and avoids premature District action on the issue.

3 Business.-- Provide the following information about the Distributor: (i) a brief description of its businesses, (ii) its overall method of accounting, and (iii) its tax year.

4 Description of Distributor's capital structure and ownership of Distributor's stock.

a Description of capital structure.-- Furnish a complete description of each class of Distributor's outstanding stock (or other evidence of equity ownership) setting forth the rights and privileges of each class, including voting or nonvoting rights, dividend and liquidation preferences or limitations, and whether classified as common or preferred stock. Also describe all other outstanding interests (bonds, debentures, notes, warrants, options, etc.), and briefly explain why each of these items should or should not be considered a stock interest.

b Ownership of stock.-- State the total number of shares outstanding for each class of stock (or other equity) in Distributor, and the number of shares and percentage of each class of stock (or other equity) owned by each shareholder. However, if there are more than 25 shareholders, the statement in the preceding sentence may be limited by listing only those shareholders owning, directly or indirectly (within the meaning of section 318 of the Code), 5 percent or more of any class of stock and then stating the total number of remaining shareholders together with the total number of shares and percentages which these remaining shareholders own of each class of stock. State whether 80 percent or more of the voting power and stock in Distributor (within the meaning of section 332(b)(1) is held by a corporate shareholder (see section 337(c) of the Code and *section 1.1502-34 of the Income Tax Regulations*).

5 Filing status.-- State whether Distributor is a member of an affiliated group of corporations making a consolidated return and, if so, identify the common parent of the group.

.02 Information regarding plan of liquidation.

1 The plan of liquidation.

a Formal plan.-- State whether the plan has been, or will be, adopted by Distributor's directors and shareholders and give the date, or expected date, of approval or adoption. See *Rev. Rul. 57-140, 1957-1 C.B. 118*.

b Prior informal plan.-- Furnish any information which indicates that a plan of liquidation may have been informally adopted prior to the date set forth in 4.021(a) above. The information is not restricted to, but might include, facts indicating an informal agreement to liquidate by a significant number of shareholders, or the sale or distribution of a substantial portion of Distributor's assets prior to the formal date of adoption of the plan. See section 1.337-2(b) of the regulations and *Rev. Rul. 65-235, 1965-2 C.B. 88*. Describe any distributions to Distributor's shareholders during the 2-year period prior to the adoption of the plan of liquidation. State whether Distributor sold or otherwise disposed of any assets at a loss for federal income tax purposes, other than in the ordinary course of business, within the 2-year period preceding the date of adoption of the plan of liquidation. If so, furnish details, including the cost basis of each item and the amount for which each item was sold. If no sale or distribution of Distributor's assets has occurred, submit the following REPRESENTATION: *During the 2-year period prior to the adoption of the plan of liquidation, Distributor will not have sold any of its property of the type defined in section 337(b) of the Code, except in the ordinary course of business.*

c Rescission of a prior plan.-- State whether Distributor has ever adopted a plan of liquidation and, if so, provide full particulars regarding the abandonment or rescission of the plan. In this regard, indicate when Form 966, *Corporate Dissolution or Liquidation*, was filed in connection with the adoption of the plan, and provide pertinent dates and reasons for abandoning or rescinding the prior plan. If no prior plans were adopted submit the following REPRESENTATION: *No formal or informal plan of liquidation has ever been adopted by Distributor, except for the present plan which was [or will be] adopted on [date].*

2 Liquidation of Distributor's subsidiary.-- State whether any subsidiary of Distributor was, or will be, liquidated in connection with the liquidation of Distributor. If so, submit details. If a ruling is requested that such liquidation will qualify under section 332 of the Code, see *Rev. Proc. 81-68, 1981-2 C.B. 723*.

3 Sales or other dispositions of assets pursuant to the plan.

a Sales pursuant to the plan.

1 General description.-- Describe the assets to be sold pursuant to the plan of liquidation and the consideration to be received for the assets. If a sales agreement has not yet been entered into, approximate the assets to be sold and the

2-H Taxation of Securities Transactions 4

consideration to be received (if reasonably possible to do so). For sales pursuant to the plan, submit copies of sales contracts (or agreements in principal regarding these sales). State whether sales contracts are executory, contingent, or consummated.

A Stock in trade.-- Briefly describe the stock in trade or inventory (as defined in section 1.337-3(a) of the regulations) of Distributor, and state whether it will be sold. If substantially all the stock in trade or inventory of Distributor will be sold to one person in one transaction, furnish details concerning this sale. See section 337(b) of the Code and section 1.337-3 of the regulations.

B Covenants not to compete.-- If consideration is being received by Distributor or its shareholders for an agreement not to compete, provide full details concerning the agreement and the reporting of proceeds.

2 Method of payment.-- State the expected method of payment of the assets being sold. Summarize all pertinent portions of existing sales contracts (or agreements in principal regarding sales) relating to the method of payment.

3 Information regarding each purchaser of Distributor's assets (Purchaser).-- Identify each Purchaser, if known, and indicate whether Purchaser is an individual, partnership, corporation, or other entity. State whether there was, or will be, any transfer or sale of Distributor's assets to an entity that is wholly or partly owned by Distributor or Distributor's shareholders. If so, furnish full details concerning the transaction, including the type and percentage of the ownership interests involved. In this regard, note that section 4.0117 of *Rev. Proc. 86-3* indicates the Service will not ordinarily issue rulings on the application of section 337 of the Code to a corporation upon the sale of property (in connection with its liquidation) to another corporation, where more than a nominal amount of the stock (that is, more than 20 percent in value) of both the selling corporation and the purchasing corporation are owned by the same shareholders. Submit the following REPRESENTATION: *The liquidation of Distributor will not be preceded or followed by the reincorporation in, or transfer or sale to, a recipient corporation (Recipient) of any of the business or assets of Distributor, if persons holding more than 20 percent in value of the stock in Distributor also hold more than 20 percent in value of the stock in Recipient. For purposes of this representation, ownership has been determined by application of the constructive ownership rules of section 318, as modified by section 304(c)(3). Compare Rev. Ruls. 84-2, 1984-1 C.B. 92, and 61-156, 1961-2 C.B. 62.*

b Other dispositions of assets pursuant to the plan.-- Describe any other disposition of assets (for example, involuntary conversions), which will occur during the prescribed liquidation period, which the Distributor intends to treat as sales or exchanges pursuant to section 337 of the Code. Furnish complete details concerning these items.

4 Distribution of assets.

a Assets distributed directly to shareholders.

2-H Taxation of Securities Transactions 4

1 Description of assets.-- Describe the assets to be distributed directly to Distributor's shareholders.

2 Dates.-- Indicate when this distribution will be made.

b Assets distributed to an escrow or partnership on the liquidation of Distributor.

1 Description of assets.-- Describe the assets to be distributed to the escrow or partnership.

2 Description of escrow or partnership.-- Fully describe any escrow or partnership, including its partners and operation, receiving assets on Distributor's liquidation.

3 Dates.-- Indicate when this distribution will be made.

c Assets distributed to a liquidating trust.-- State whether the plan of liquidation requires the use of a liquidating trust, or if the use of a liquidating trust is otherwise contemplated. See *Rev. Ruls. 80-150, 1980-1 C.B. 316, and 72-137, 1972-1 C.B. 101*.

1 Description of assets.-- Describe the assets to be distributed to the liquidating trust.

2 The trust.-- Describe whether the use of the trust is permitted under applicable law, the powers and identity of the trustee, and the time period during which the trust will remain in existence.

3 Dates.-- Indicate when this distribution will be made.

4 Reasons.-- Give the reasons for using a liquidating trust.

5 Classification of the trust.-- In issuing a ruling under sections 331 and 337 of the Code in a situation where a liquidating trust is used, it is the practice of the Service to state in the ruling letter that the ruling is valid only if the trust

is not an association taxable as a corporation under section 301.7701 of the Procedure and Administration Regulations. However, if Distributor desires a ruling concerning the classification of the trust under section 301.7701, the ruling request should so indicate and it should include an additional copy of the entire ruling request. See *Rev. Proc. 82-58, 1982-2 C.B. 847*.

5 Assets retained.

a Description of assets.-- Fully describe any assets to be retained by Distributor subsequent to the 12-month period beginning on the date of adoption of the plan of liquidation. See section 1.337-2(b) of the regulations. If no assets will be retained, submit the following REPRESENTATION: *All assets of Distributor will be distributed in complete liquidation of Distributor within the 12-month period beginning on the date of adoption of the plan of liquidation.*

b Reason for retention.-- If assets will be retained beyond the 12-month period, set forth the reasons for their retention. Specifically, state whether any assets will be retained to satisfy claims of any shareholders with respect to their stock.

c Description of claims.-- Describe the claims to be satisfied with the retained assets.

d Period of retention.-- State whether the balance of the assets retained will be distributed as soon as all claims are satisfied.

6 Redemption and cancellation of Distributor's stock.

a Redemption of all stock.-- State whether all the outstanding stock of Distributor will be redeemed and cancelled.

b Non pro rata redemption.-- If the property to be used in redemption of Distributor's stock will not be distributed in exact proportion with the percentage of shares owned by each shareholder, submit reasons and details. See *Rev. Rul. 79-10, 1979-1 C.B. 140*.

c Shareholder and Distributor in dual capacity.-- Submit the following REPRESENTATION: *No part of the consideration to be received by any shareholder of Distributor will be received by the shareholder as a creditor, employee, or in some capacity other than that of a shareholder of Distributor.*

7 Status of liquidation.

a Status.-- Submit the following REPRESENTATION: *Pursuant to the plan of complete liquidation, Distributor will cease to be a going concern and its activities will be limited to the winding up of its affairs, paying its debts, and distributing any balance of its assets to its shareholders.* (See Rev. Rul. 60-50, 1960-1 C.B. 150.) If there is more than one liquidating distribution, furnish the following REPRESENTATION: *The status of liquidation will exist at the time of the first liquidating distribution and will continue until the final liquidating distribution is made.*

b Fair market value of assets.-- Submit the following REPRESENTATION: *The fair market value of Distributor's assets will exceed its liabilities both on the date of adoption of the plan of liquidation and at the time the first liquidating distribution is made.*

c Corporate charter.-- State whether Distributor intends to abandon its corporate charter. See Rev. Ruls. 60-50, 1961-1 C.B. 150, and 54-518, 1954-2 C.B. 142.

.03 *Recognition of gain or income to Distributor.* In order to determine whether gain or income will be recognized to Distributor upon the distribution of property, submit statements or representations with respect to the following:

1 Unreported or anticipatory assignment of income.-- State whether Distributor has any assets which represent earned but unreported income to Distributor, such as receivables being reported on a such basis, unfinished construction contracts, commissions due, or other similar assets. If Distributor has any assets representing earned but unreported income, state whether Distributor will distribute these assets to its shareholders or dispose of them in some other manner. If none of these assets are being distributed, submit the following REPRESENTATION: *No distribution of assets representing earned but unreported income will be made by Distributor to its shareholders in the liquidation.*

2 Reserve for bad debts.-- Submit the following REPRESENTATION: *Distributor does [or does not] maintain a reserve for bad debts.* See Rev. Rul. 78-279, 1978-2 C.B. 135.

3 Installment obligations and recapture provisions.-- State whether Distributor is selling, distributing to its shareholders, or otherwise disposing of (i) any installment obligations (section 453B of the Code), (ii) any property described in the recapture provisions of the Code including, but not limited to, sections 47, 291(a), 337(f), 341(f), 617(d), 897(d), 904(f), 1245(a), 1248(f), 1250(c), 1252(a), 1254, or 1255, (iii) any property for which the taxpayer obtained a deduction (see *Hillsboro National Bank v. Commissioner*, 460 U.S. 370 (1982); Rev. Rul. 74-396, 1974-2 C.B. 106; Rev. Rul. 61-214, 1961-2 C.B. 60), or (iv) any property described in sections 1256 or 1276. If installment obligations will be distributed, describe the nature and terms of the obligations. State how the shareholders intend to treat payments received on the installment obligations. State the effect of sections 453(h) and 453B(d)(2) of the Code on

Distributor's distribution.

4 Partnership interests.-- State whether Distributor will distribute to the shareholders any partnership interests representing property specified in sections 4.031, 4.032, or 4.033, above. See section 386 of the Code.

5 Advance payments.-- State whether Distributor has any items constituting prepaid subscription income, prepaid dues income, advance payments for goods, or payments received for services to be performed in the future. See sections 455 and 456 of the Code, *section 1.451-5 of the regulations*, and *Rev. Proc. 71-21, 1971-2 C.B. 549*.

.04 *General*

1 Other transactions.-- Submit the following REPRESENTATION: *The liquidating distribution(s) described in this ruling request is an isolated transaction and is not related to any other past or future transaction*. Alternatively, state whether there have been, or will be, any related transactions and, if so, briefly describe these other transactions and fully explain their relationship to, and impact on, the present transaction. See section 9.06 of Rev. Proc.

2 Financial statements.-- Submit a copy of the most recent balance sheet of Distributor.

3 Copy of plan.-- Submit a copy of the plan of liquidation adopted or to be adopted.

4 Collapsible corporation.-- In issuing a ruling under sections 331 and 337 of the Code, it is the practice of the Service to state in the ruling letter that the ruling under section 331 is valid only if section 341(a) is not applicable and that the ruling under section 337 is valid only if Distributor is not a collapsible corporation as defined in section 341(b) (or is not considered a collapsible corporation pursuant to section 341(e)(4)). See *Rev. Proc. 86-3, 1986-1 I.R.B. 26*, section 4.0117.

5 Section 333 of the Code.-- Submit the following REPRESENTATION: *The shareholders of Distributor will not elect to have section 333 of the Code apply to this liquidation*. See section 337(c)(1)(B).

6 Applicability of merger statutes.-- State whether the liquidation of Distributor will be carried out by the use of a statutory merger.

2-H Taxation of Securities Transactions 4

7 Additional statements.-- See *Rev. Proc. 86-1* for additional information and statements that must be submitted with all ruling requests, including statements required under sections 9.02 and 9.09 (relating to instructions to taxpayers).

8 Requested Rulings.-- List the rulings being requested in the exact wording desired, and provide statutory, regulatory, or other authority for their issuance.

9 Taxpayer's memorandum.-- Submit the information required by section 9.08 of *Rev. Proc. 86-1* (relating to relevant authorities regarding the tax results of the transaction).

APPENDIX I: Revenue Ruling 93-76

Guidelines for application of IRC Section 475

(Rev. Rul. 93-76, 1993-2 C.B. 235 as modified and clarified by Rev. Rul. 94-7, 1994-1 CB 151, and clarified, modified, partially obsoleted, and superseded by Rev. Rul. 97-39, 1997-2 C.B. 62)

2-I Taxation of Securities Transactions 475

475 MARK TO MARKET ACCOUNTING METHOD FOR DEALERS IN SECURITIES

Mark-to-market accounting method for dealers in securities. This ruling provides guidance to enable taxpayers to comply with the mark-to-market requirements of section 475 of the Code. *Rev. Ruls. 94-7 and 93-76* clarified, modified, partially obsoleted, and superseded.

Rev. Rul. 97-39

PURPOSE

This revenue ruling provides guidance under *section 475 of the Internal Revenue Code* to enable taxpayers to comply with the mark-to-market requirements of section 475. *Rev. Rul. 93-76, 1993-2 C.B. 235* (which was previously modified by *Rev. Rul. 94-7, 1994-1 C.B. 151*), is clarified, modified, partially obsoleted, and superseded.

LAW

Section 475 of the Code was enacted on August 10, 1993, in the Omnibus Budget Reconciliation Act of 1993 (the "1993 Act"), section 13223, 1993-3 C.B. 1, 69. It requires mark-to-market accounting treatment for certain securities held by a "dealer in securities" as defined in section 475(c)(1). This requirement is effective for all taxable years ending on or after December 31, 1993. Section 475 was amended on August 5, 1997, in the Taxpayer Relief Act of 1997 (the "1997 Act"), section 1001(b) (redesignating old section 475(e) as section 475(g) and adding new section 475(e) and (f) to allow dealers in commodities and traders in securities and commodities to elect mark-to-market accounting, effective for taxable years ending after August 5, 1997). This revenue ruling is limited to issues arising under the 1993 Act and does not address issues arising under the 1997 Act.

Section 475(a) sets forth two mark-to-market rules. First, any security that is inventory in the hands of a dealer must be included in inventory at its fair market value. Second, any security that is not inventory in the hands of a dealer and that

is held at the close of any taxable year is treated as sold by the dealer for its fair market value on the last business day of that taxable year, and any gain or loss is required to be taken into account for that taxable year.

Section 475(b)(1) provides that the mark-to-market rules do not apply to: (1) any security held for investment; (2) any evidence of indebtedness that is acquired (including originated), or any obligation to acquire an evidence of indebtedness that is entered into, by a dealer in the ordinary course of its trade or business, but only if the evidence of indebtedness or obligation to acquire an evidence of indebtedness is not held for sale; (3) any security that is a hedge with respect to a security that is not subject to the mark-to-market rules; and (4) any security that is a hedge of a position, right to income, or liability that is not a security in the hands of the taxpayer. Under section 475(b)(2), a security must be clearly identified in the dealer's records as being covered by one of the exceptions described in section 475(b)(1) before the close of the day on which the dealer acquired, originated, or entered into the security.

In addition to the identification requirements in section 475(b), section 475(c)(2)(F)(iii) requires a dealer in securities to identify a position that is not a security described in section 475(c)(2)(A)-(E), but that is treated as a security because it is a hedge with respect to such a security.

ISSUES AND HOLDINGS

Issue 1: If a taxpayer is not otherwise a dealer in securities within the meaning of section 475(c)(1) but, nevertheless, timely identifies all of its securities as being covered by one of the exceptions in section 475(b)(1), does that "protective identification" cause the taxpayer to be treated as a dealer?

Holding 1: No. A taxpayer that is not a dealer in securities within the meaning of section 475(c)(1) does not become a dealer in securities or create an inference that it is a dealer in securities by making a protective identification of its securities.

Issue 2: Is a bank or an insurance company excepted from the mark-to-market rules on the grounds that it is, per se, not a dealer in securities within the meaning of section 475(c)(1)?

Holding 2: No. A bank or an insurance company is subject to the mark-to-market rules if its activities bring it within the definition of a dealer in securities in section 475(c)(1). For example, many banks are dealers because they regularly originate and sell loans. As another example, an insurance company that regularly makes and sells policyholder loans is a dealer for purposes of section 475.

Issue 3: If a taxpayer's sole business consists of trading in securities (that is, the taxpayer does not purchase from, sell to, or otherwise enter into transactions with customers), is the taxpayer a dealer in securities within the meaning of section 475(c)?

Holding 3: No. A taxpayer whose sole business consists of trading in securities is not a dealer in securities within the meaning of section 475(c) because that taxpayer does not purchase from, sell to, or enter into transactions with, customers in the ordinary course of a trade or business.

Issue 4: Does the classification of a security under financial accounting principles, including FASB Statement No. 115 (Accounting for Certain Investments in Debt and Equity Securities), determine whether the security qualifies for one of the exceptions to the mark-to-market rules under section 475(b)(1)?

Holding 4: No. The classification of a security under financial accounting principles is not dispositive of the treatment of the security for federal income tax purposes. For example, for purposes of section 475, a security may in certain cases qualify for the held-for-investment exception to the mark-to-market rules even though, under applicable financial accounting principles, the security is classified as available for sale.

Issue 5: Does an identification of a security as "held for investment" under section 1236 serve to identify that security as "held for investment" (within the meaning of section 475(b)(1)(A)) or as "not held for sale" (within the meaning of section 475(b)(1)(B))?

Holding 5: No. Taxpayers may choose not to identify under section 475(b)(2) some or all of the securities that they identify under section 1236(a)(1). (For a transitional rule applicable to securities held as of the close of the last taxable year ending before December 31, 1993, however, see *section 1.475(b)-4(a) of the Income Tax Regulations*.) Accordingly, even if a section 1236 identification has been made, an identification of a security or hedge is a valid identification for purposes of section 475(b)(2) only if it contains a specific reference to section 475; this specific reference, however, may be effected by any reasonable method. For instance, certain accounts may be identified in such a way that placing a security or hedge in the account identifies the security or hedge for purposes of both section 1236(a)(1) and section 475(b)(1)(A), (B), or (C). See Holding 6 below. See Holding 15 below for a transitional rule that requires less specificity for identification of securities held by certain taxpayers that were not dealers in securities under section 1.475(c)-1T (as contained in 26 CFR part 1 revised April 1, 1996).

Issue 6: Is a dealer in securities required to use a special procedure to comply with the identification requirements under section 475?

Holding 6: No. Unless the Commissioner otherwise prescribes, a dealer may comply with the identification requirements under section 475 using any reasonable method (see, for example, guidance concerning identification requirements under sections 988(a)(1)(B), 1221, 1236(a)(1), and 1256(e)(2)(C)). The identification, however, must be made on, and retained as part of, the dealer's books and records. The dealer's books and records must clearly indicate the specific security or hedge being identified, and the identification must clearly indicate that it is being made for purposes of section 475. Alternatively, the dealer may identify specific accounts as containing only securities or hedges that are covered by a particular exception, so that placing a security or hedge in the account identifies the security or hedge as being covered by that exception. Under section 1.475(b)-2(a), an identification need not distinguish between an exception under section 475(b)(1)(A) (concerning certain securities held for investment) and one under section 475(b)(1)(B) (concerning securities not held for sale). Exceptions under either of these provisions, however, must be distinguished from exceptions under section 475(b)(1)(C) (concerning securities held as hedges).

In addition, rather than identifying specific securities or accounts as being covered by an exception described in section 475(b)(1), a dealer may comply with the identification requirement under section 475(b) by clearly indicating the specific securities or accounts that are not covered by a particular exception (that is, indicating that they are covered by some other exception or that they are not exempt) and identifying all other securities or accounts as being covered by a particular exception.

For example, a dealer may place on its books and records a statement that, unless otherwise identified, all of its securities for which an identification is still timely (including securities yet to be acquired) are identified as exempt under either section 475(b)(1)(A) or (B). This statement is effective to identify under section 475(b)(1)(A) or (B) each security covered by its terms unless, before the expiration of the period during which the security may be timely identified, the dealer identifies it as not exempt or as exempt under section 475(b)(1)(C).

Analogously, under *Rev. Rul. 64-160, 1964-1* (Part I) C.B. 306, modified by *Rev. Rul. 76-489, 1976-2* C.B. 250, dealers can identify specified accounts as containing only securities held for investment for purposes of section 1236(a)(1). Accordingly, dealers can satisfy the identification requirements of section 475(b)(2) by unambiguously indicating that all of the securities in one or more of these accounts are also described, for example, in section 475(b)(1)(A) or (B). Once such an identification of an account is made, placing a security in the account identifies the security not only as being "held for investment" for purposes of section 1236 but also as being described in the applicable subparagraph of section 475(b)(1).

Issue 7 in *Rev. Rul. 93-76* concerned transitional identification issues for securities acquired, originated, or entered into between August 10, 1993, and October 31, 1993. As the transition period has now ended, *Issue 7* is obsolete and is not reprinted in this revenue ruling.

Issue 8: If a dealer in securities originates or acquires an evidence of indebtedness in the ordinary course of a trade or business, are there any exceptions to the requirement that the dealer make an identification under section 475(b)(2) before the close of the day on which it originates or acquires the security?

Holding 8: Yes. Pending further guidance, if a financial institution (as defined in section 265(b)(5)) originates or acquires an evidence of indebtedness in the ordinary course of a trade or business, an identification of the evidence of indebtedness is timely if it is made in accordance with the dealer's accounting practice, but no later than 30 calendar days after the date of origination, or acquisition, by the financial institution. The preceding sentence applies to any dealer in securities for evidences of indebtedness that are mortgage loans.

Also, pending further guidance, a dealer in securities that enters into commitments to acquire mortgage loans may identify those commitments as being held for investment if the dealer acquires the mortgage loans and holds the mortgages as investments. This identification of commitments to acquire mortgage loans must be made in accordance with the dealer's accounting practice, but no later than 30 calendar days after the date of acquisition of the mortgage loans.

Issues 9, 10, and 11 discussed transitional issues concerning proper identification, computation of adjustments, and the period over which to spread any adjustments, for taxable years that included December 31, 1993. As the transition period has now passed, *Issues 9, 10, and 11* are obsolete and are not reprinted in this revenue ruling.

Issue 12: May a taxpayer use an amended return to make an election under section 1.475(c)-1(c)(1)(ii) (which concerns taxpayers that purchase securities from customers but make no more than negligible sales of securities)?

Holding 12: For any taxable year for which an original federal income tax return is filed after October 31, 1997, an election under section 1.475(c)-1(c)(1)(ii) must be made on an original federal income tax return that is filed on or before the due date (including any extensions of time) for that return. For any taxable year for which an original federal income tax return was filed on or before October 31, 1997, an election under section 1.475(c)-1(c)(1)(ii) also may be made on an amended return filed not later than October 31, 1997. Not later than December 15, 1997, compliance with section 475 must be reflected on an original or amended return for every other taxable year which is subject to the election and the original return for which is due on or before October 31, 1997. Note that amended returns must be filed before the expiration of the statute of limitations on assessment under section 6501(a).

As is noted in *Holding 17* below, a taxpayer subject to more than one exemption must affirmatively elect out of all applicable exemptions to be treated as a dealer in securities.

Issue 13: If a taxpayer wishes to use an amended return to make an election out of the customer paper exemption under section 1.475(c)-1(b)(4)(i)(B), by what date must the taxpayer file the amended return?

Holding 13: Section 1.475(c)-1(b)(4)(i)(B) provides a June 23, 1997, deadline to make the customer paper election on an amended return. *Notice 97-37, 1997-27 I.R.B. 8*, provides that additional guidance will extend that deadline. Accordingly, that deadline to file an amended return is extended to October 31, 1997. Not later than December 15, 1997, compliance with section 475 must be reflected on an original or amended return for every other taxable year which is subject to the election and the original return for which is due on or before October 31, 1997. Note that amended returns must be filed before the expiration of the statute of limitations on assessment under section 6501(a).

Issue 14: What is the general rule for identifying a security as excepted from mark-to-market accounting?

Holding 14: For a security to be exempt from mark-to-market accounting, the taxpayer must make an identification that is timely under section 475(b)(2), which generally requires a security to be identified before the close of the day on which it is acquired. For the only current exceptions to this rule, see Holding 8 above (identifications of securities by financial institutions and dealers in mortgages), section 1.475(b)-1(b)(4)(ii)(A) (identification of securities to which section 1.475(b)-1(b)(1) ceases to apply), and Holding 15 below (special identification rules for taxpayers not treated as dealers under section 1.475(c)-1T). For information about the required specificity of the identification, see Holding 5 above.

Issue 15: If a taxpayer makes an election out of either section 1.475(c)-1(b)(1) (customer paper exemption) or section 1.475(c)-1(c)(1) (negligible sales exemption) and the election has the effect of causing the taxpayer to be treated as a dealer in securities for a taxable year starting before the date the taxpayer filed the documentation effecting the election (date of the election), how does the taxpayer identify securities that were acquired before the date of the election?

Holding 15: A special identification regime applies to taxpayers that satisfy the following criteria:

First, the taxpayer is making an election out of the customer paper exemption, the negligible sales exemption, or both.

Second, the taxpayer was not treated as a dealer in securities under section 1.475(c)-1T (as contained in 26 CFR part 1 revised April 1, 1996).

The special identification regime applies only to securities ("transition securities") for which an identification would have been timely under the general rule (described in Holding 14 above) only if made on or before October 31, 1997. In applying the preceding sentence, a taxpayer may choose to substitute any earlier date that is on or after December 24, 1996. To make this substitution, the taxpayer must place in its books and records no later than October 31, 1997, an unambiguous statement that the taxpayer chooses to apply the general identification rule described in Holding 14 for all securities acquired on or after the specific date selected by the taxpayer.

Under the special identification regime, a transition security was properly identified as exempt for the purposes of section 475(b)(2) or (c)(2)(F)(iii) if the information that is contained in the taxpayer's books and records and that was entered substantially contemporaneously with the date of acquisition of the transition security supports a conclusion that the transition security was described by section 475(b)(1)(A), (B), or (C). This rule applies even if the information in the books and records does not meet the specificity that Holding 5 generally requires for identification. The status of a transition security that was acquired before the first day of the taxable year for which the election is being made is determined by examining the books and records as of the last day of the preceding taxable year.

The taxpayer must, by October 31, 1997, place in its books and records a statement resolving ambiguities, if any, concerning which transition securities are properly identified within the meaning of the preceding paragraph. Any information that supports treating a transition security as being described in section 475(b)(2) or (c)(2)(F)(iii) must be applied consistently.

A taxpayer, in determining whether a transition security must be identified, must apply the following principles: if the transition security was identified under section 1.1221-2 or section 1256(e) and the item being hedged is described in section 475(b)(1)(C)(i) or (ii), the section 1.1221-2 or section 1256(e) identification constitutes an identification for purposes of section 475(b)(2); and, if the item being hedged was ordinary property, as defined in section 1.1221-2, and the taxpayer did not identify the transition security as a hedging transaction, the transition security cannot be identified under section 475(b)(1)(C).

If a taxpayer made a protective identification (as described in Issue 1 above) of a transition security, and subsequent to

the protective identification the taxpayer makes an election that causes the taxpayer to be a dealer in securities for purposes of section 475, the protective identification is recognized and the taxpayer is subject to the general rules governing identifications for all transition securities that were eligible to be timely identified after the date that the taxpayer began making protective identifications. Thus, if a transition security was properly and timely identified as exempt from being marked to market and remains eligible for the exemption claimed, that transition security is not marked to market even though section 475 applies to the taxpayer. If a transition security was properly and timely identified and thereafter ceases to be held for investment or as a hedge, see section 475(b)(3). If a transition security was not eligible to be identified as exempt, see section 475(d)(2).

Issue 16: If an issuer of an evidence of indebtedness has the right to prepay at any time without a penalty (for example, a revolving credit card balance), does that right preclude that indebtedness from having a fair market value that is greater than the face value of the obligation?

Holding 16: No. Securities must be marked to fair market value based on all the facts and circumstances. For example, in light of contractual interest rates and general payment history on customer obligations, the fair market value of a customer obligation may be greater than the face amount, even if the customer has the right to repay the debt at its face amount at any time.

Issue 17: If a taxpayer would meet the definition of a dealer in securities under section 475 but otherwise satisfies more than one exemption from dealer status, must the taxpayer elect out of all applicable exemptions to be a dealer in securities for the purpose of section 475?

Holding 17: Generally, a taxpayer must make an election out of all applicable exemptions in order to be treated as a dealer under section 475. A taxpayer subject to multiple exemptions from section 475 must file all the documentation required to elect out of each applicable exemption. Sometimes, the documentation required for one election satisfies all of the filing requirements for another election. For example, if a taxpayer is subject to both the customer paper exemption under section 1.475(c)-1(b) and the negligible sales exemption under section 1.475(c)-1(c), the taxpayer may make an election under section 1.475(c)-1(b)(4) that is effective as of January 1, 1993, and timely file an amended 1993 federal income tax return using mark-to-market accounting for securities. The amended 1993 return itself represents an election out of the negligible sales exemption.

Issue 18: How does a taxpayer that is in its first year of existence elect out of an exemption from dealer status under section 475?

Holding 18: If a taxpayer decides for its first year of existence to make an election out of the negligible sales exemption to account for securities on a mark-to-market basis, the taxpayer should attach to its original return for that first year the following statement: "[Insert name and taxpayer identification number of the taxpayer] hereby elects not to be governed by section 1.475(c)-1(c)(1)(i) of the income tax regulations for the taxable year ending [describe the last day of the year] and for subsequent taxable years." If a taxpayer decides for its first year of existence to make an election out of the customer paper exemption or to make the intragroup-customer election, the taxpayer must meet the requirements of section 1.475(c)-1.

Issue 19: Which changes of accounting method are covered by the consent provisions of section 13223(c)(2) of the 1993 Act?

Holding 19: Under section 13223(c)(2) of the 1993 Act, certain changes of accounting method are treated as made with the consent of the Commissioner. This treatment extends only to a change in method that was effected by a taxpayer who (1) became a dealer for the taxable year that includes December 31, 1993, merely by virtue of the passage of the 1993 Act, and (2) who accounted for securities as a dealer under section 475 on its original federal income tax return for that year. Consent for other changes of method to comply with section 475 must be obtained either on a

taxpayer-by-taxpayer basis or as part of automatic consent contained in published guidance. See *Rev. Proc. 97-43*, page 12, this Bulletin.

Issue 20: If a taxpayer is accounting for securities by marking them to market under section 475(a), may the taxpayer, without the consent of the Commissioner, file a federal income tax return for a later taxable year that does not account for securities on a mark-to-market basis?

Holding 20: No. Once a taxpayer has used the section 475 mark-to-market method as its method of accounting for securities, the taxpayer may not change that method of accounting without obtaining the consent of the Commissioner. See section 446(e). Unless the Commissioner otherwise prescribes, to request consent the taxpayer must comply with the requirements of *Rev. Proc. 97-27*, 1997- 21 *I.R.B. 10*. For example, if a taxpayer accounts for securities by marking them to market because the taxpayer made more than negligible sales of securities and in a later year makes only negligible sales of securities, the taxpayer must obtain the consent of the Commissioner to change its method of accounting for securities. If a taxpayer made no more than negligible sales of securities but, pursuant to section 1.475(c)-1(c)(1)(ii), accounted for securities on a mark-to-market basis and the taxpayer makes no more than negligible sales of securities in a subsequent year, the taxpayer must obtain the consent of the Commissioner to change its method of accounting for securities. Especially in the latter example, consent for the change will be granted only in unusual circumstances.

EFFECT ON OTHER DOCUMENTS

Rev. Rul. 93-76 as modified by *Rev. Rul. 94-7*, is clarified, modified, partially obsoleted, and superseded. *Notice 97- 37*, 1997-27 *I.R.B. 8*, is obsoleted.

PROSPECTIVE APPLICATION

Pursuant to section 7805(b), if an identification is made on or before June 30, 1997, and the identification complies with the requirements set forth in the third paragraph of Holding 6 of *Rev. Rul. 93-76*, the identification will not be treated as failing to satisfy the requirements of section 475(b)(2) solely on the grounds that it failed to identify the operative subparagraph of that provision.

PAPERWORK REDUCTION ACT

The collections of information contained in this revenue ruling have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 *U.S.C. 3507*) under control number 1545-1558.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

The collections of information in this revenue ruling are in sections 26 *CFR 1.475(b)-2*, 26 *CFR 1.475(b)-4*, and 26 *CFR 1.475(c)-1*. This information is required to facilitate the administration of section 475 of the *Internal Revenue Code*. This information will be used to facilitate audits of taxpayers that elect to not be governed by certain exemptions under section 475 of the Code. The collections of information are required to obtain a benefit. The likely respondents are business or other for-profit institutions.

The recordkeeping burden described in Holding 6 was reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 *U.S.C. 3507*) under control number 1545-1496.

The estimated total annual recordkeeping burden described in Holding 15 is 450,000 hours.

The estimated annual burden per recordkeeper varies from 15 hours to 45 hours, depending on individual circumstances, with an estimated average of 22.5 hours. The estimated number of recordkeepers is 20,000.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

DRAFTING INFORMATION

The principal authors of this revenue ruling are Pamela Lew and Robert B. Williams of the Office of the Assistant Chief Counsel (Financial Institutions and Products). For further information regarding this revenue ruling contact Ms. Lew at (202) 622-3950 or Mr. Williams at (202) 622-3960 (not toll-free calls).
