

MAGNIFIDE® BUSINESS INTELLIGENCE

MAGNIFIDE Business Intelligence: The Power in Knowing.

Lender Processing Services' (LPS) MAGNIFIDE Business Intelligence (BI) represents the next step forward in true enterprise intelligence. As part of the MSP solution suite, users may seamlessly analyze MSP data to measure key performance indicators and make essential business decisions. LPS has responded to an industry need with a robust reporting and analytical engine.

Report Library

Storing both current and historical reports, clients have a single source to view important information. The MAGNIFIDE BI Report Library allows users to share reports and documents securely and within an easy-to-navigate structure. Seamless integration with the security features of MAGNIFIDE MSP and the MAGNIFIDE BI scheduler ensures that important information is delivered to the right people at the right time.

Dashboard Views

The MAGNIFIDE Business Intelligence Dashboard delivers easy online access to reports and analytical output. Specialized views for groups of specific users contain the most up-to-date information, delivered to the user automatically. Users can create customized Dashboard views, so that they can easily access the reports that they need quickly.

Sophisticated Reporting and Analysis

With current and historical views of MSP data, the possibilities for trending and analysis are nearly limitless. The MAGNIFIDE BI toolset offers robust and dynamic reporting functions, with query and graphing capabilities that make complex analysis straightforward and reliable.

From stylish dials and gauges, to simple line-by-line detail and totals, the ability to completely customize each report or analysis is a powerful feature. With a complete reporting engine, and the ability to format output to the precise needs of each user, all in a single solution, analysis has never been more easy, yet sophisticated.

Integrated Performance

A multitude of output options, including Microsoft® PowerPoint and Excel, along with the capability to import data files, ensures MAGNIFIDE BI fits into clients' existing desktop solutions with ease. Most components of MAGNIFIDE BI require only a Web browser to install. A comprehensive design studio can be installed optionally, enabling MAGNIFIDE BI to easily scale to each client's particular needs.

Value and Benefits

LPS understands that clients are as unique as their business processes. MAGNIFIDE BI gives users the ability to query, analyze, format, graph and distribute information according to your company's unique business needs.

- Analyze data in detail, summary or over time with robust reporting and graphical capabilities.
- Store and schedule delivery of reports when needed, with easy navigation and robust security.
- Customize dashboard views to meet end users' information needs, in a concise and easy-to-read format.
